

CATALOGUE AND CHECK-LIST  
OF THE  
TREES AND WOODY SHRUBS  
OF  
AMERICA, NORTH OF MEXICO.

COMPILED FROM THE LATEST PUBLISHED AUTHORITIES, FOR THE TENTH  
ANNUAL REPORT OF THE GEOLOGICAL SUR-  
VEY OF INDIANA, BY

JOHN W. BYRKIT,

INDIANAPOLIS, INDIANA, MARCH, 1879.

---

The whole list was first arranged systematically, as nearly as possible, according to the latest views of Prof. Asa Gray and others, and then numbered from one to the end of the list, which gave to each species its systematic number; after which the following alphabetical arrangement of genera was made for convenience of ready reference, preserving the original number with each species, so we have in the following pages a combined systematic and alphabetically arranged catalogue.

As far as obtainable, the common or local names are given, which are often of value in directing attention to a species in question.

The capital letter A indicates that that species is peculiar to or most widely distributed over the Atlantic States; G

makes the same reference to the Gulf States, and P to the Pacific slope. Those not lettered are found in the central area.
