Empire Shared Collection

Preserving legacy print collections

*Nicole Colello & Jennifer Murray
University at Buffalo*

About the Program

Create a sustainable and collaborative print retention program.

- ✦ *Promote cost-effective **management and preservation** of low-use legacy print collections, while assuring **ready and perpetual access** to scholars and researchers in Western New York*
- ✦ *Develop a **sustainable model** capable of growth*
- ✦ *Allow for **space gains** for all member libraries*

Program Timeline

WNYLRC RBDB Grants

2012-2013

Planning:

Develop the tools, standards, policies, services, & business model

2013-2014

Implementation:

Create a collection management program

2014-2015

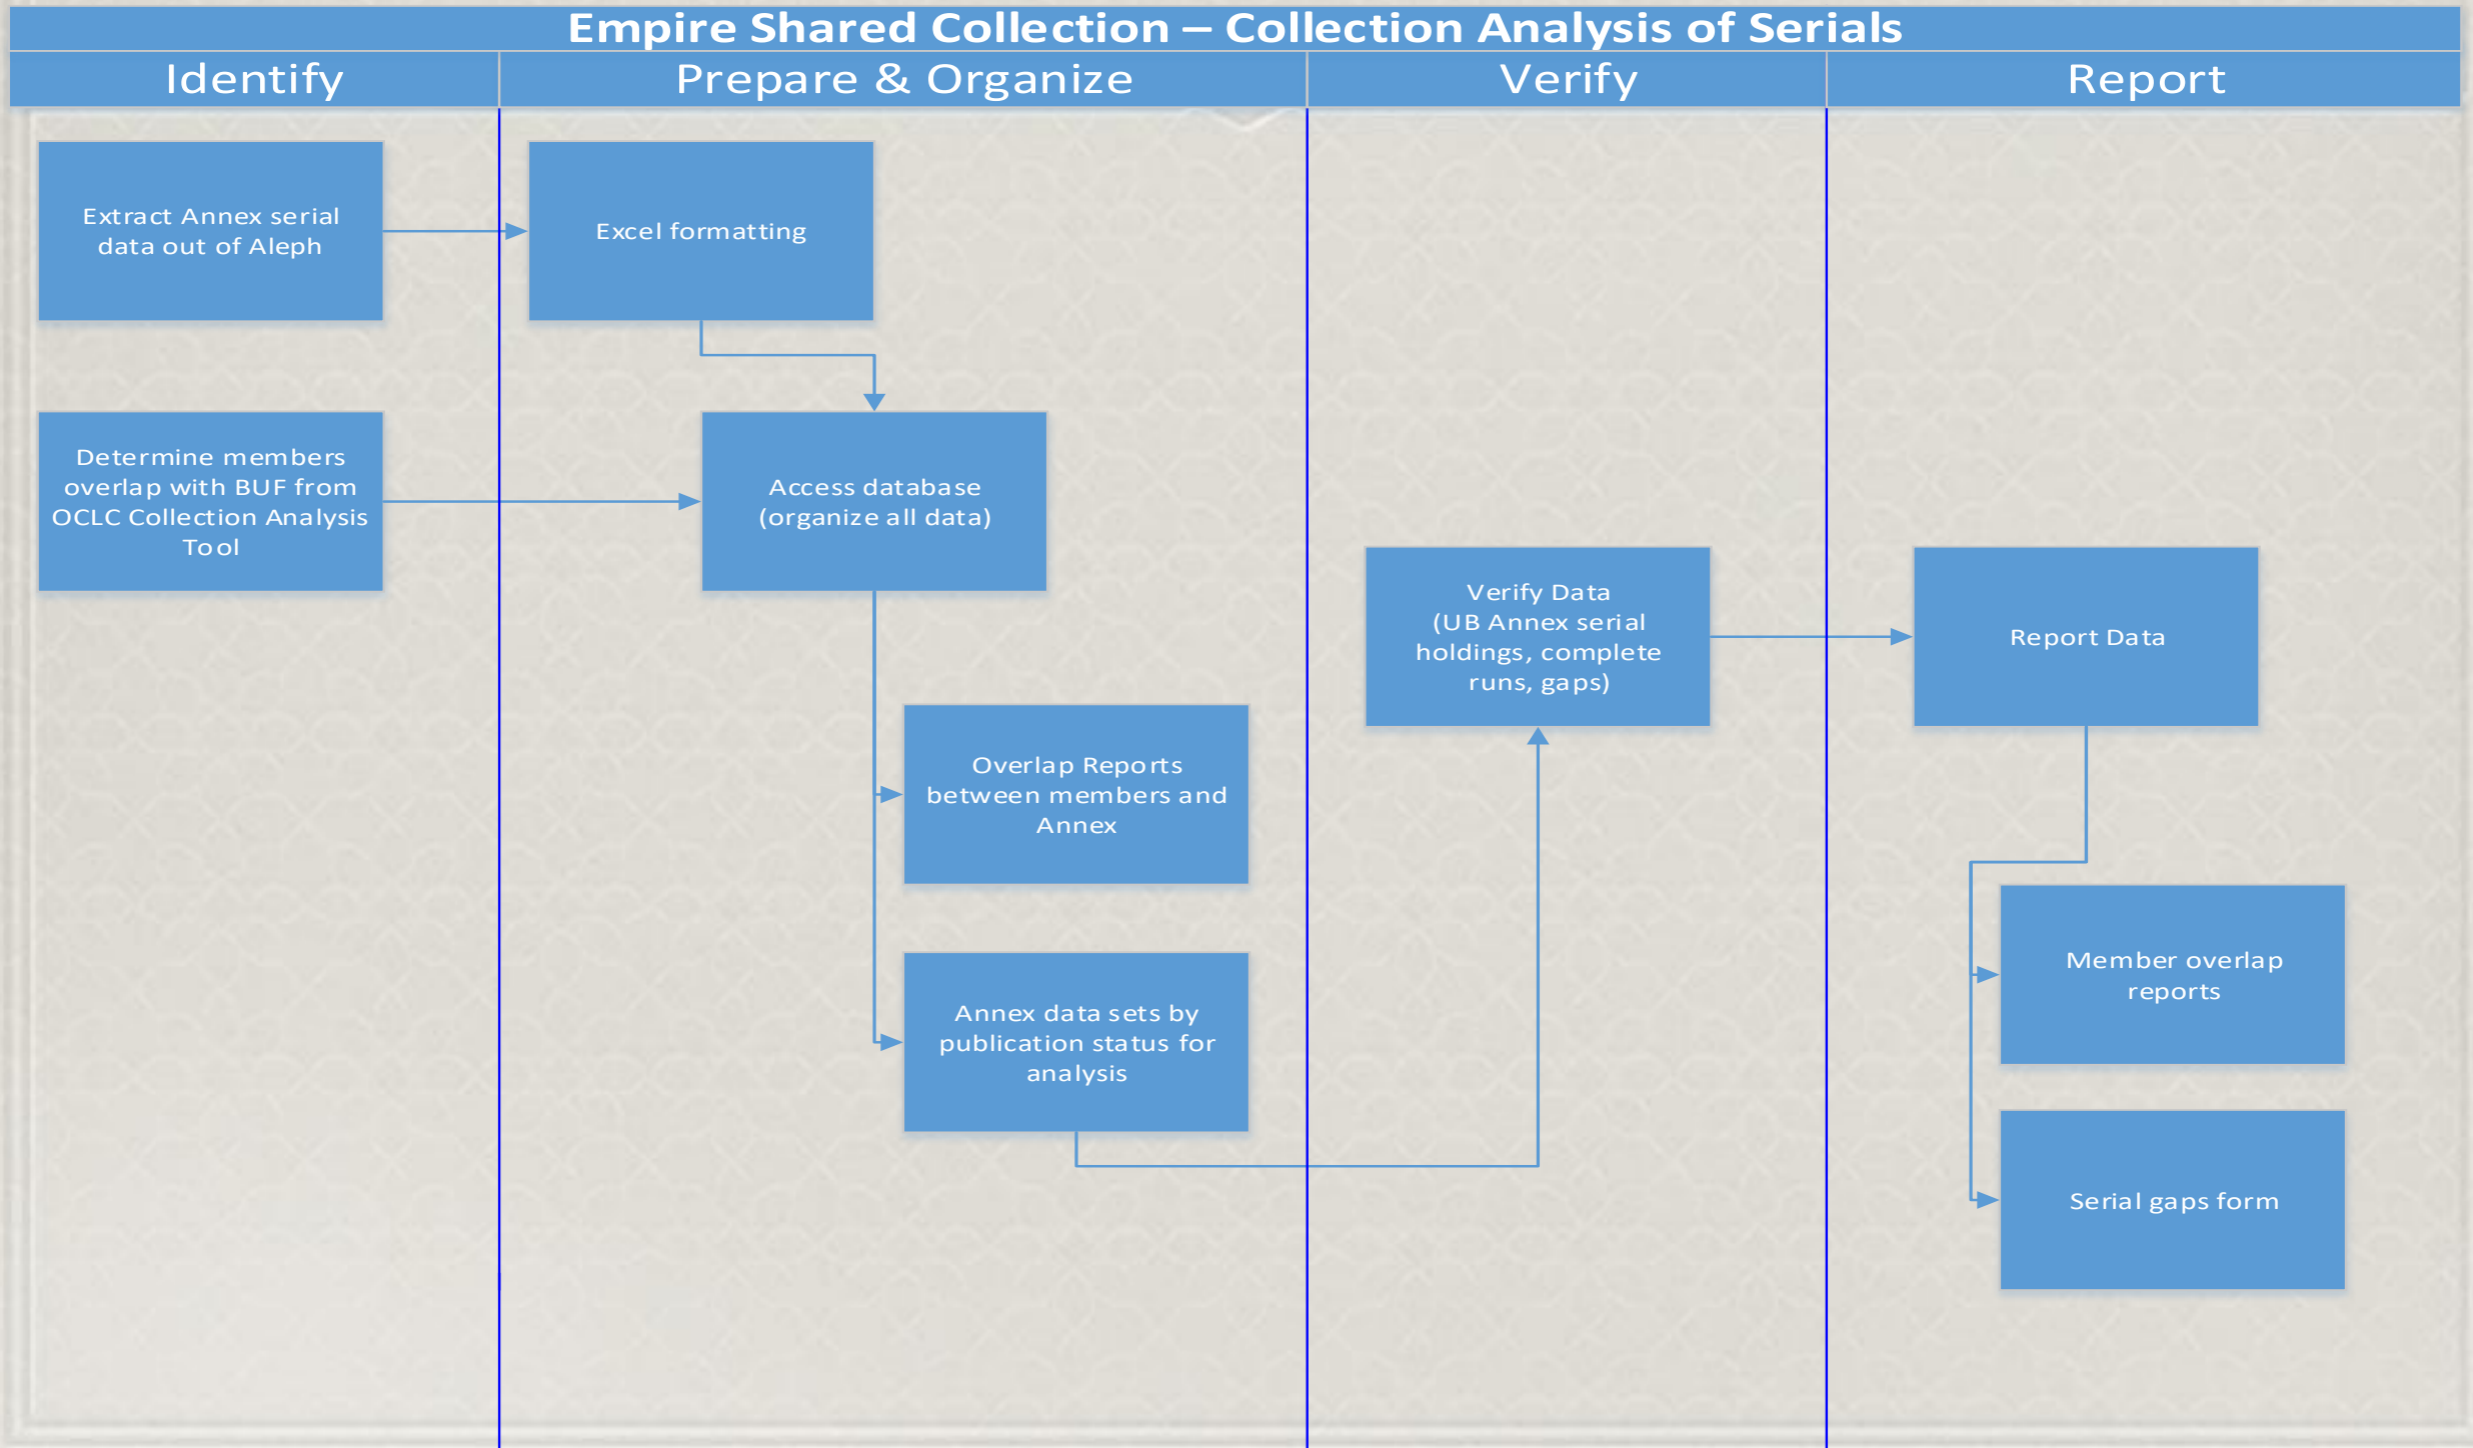

Collection Analysis:

Continue the assessment of the aggregate collection – completeness and gaps in serial runs

Collection Analysis

Empire Shared Collection – Collection Analysis of Serials

Collection Analysis – Challenges

- ✦ Complexity/Quality of data
- ✦ Labor intensive
- ✦ Scalability
- ✦ Numerous Tools

Shared Collection – current

- ✿ ~34,000 serial titles held in the Annex
 - 30,000+ titles have been analyzed for gaps
- ✿ Empire Shared Collection:
 - ✿ 30,181 titles
 - ✿ 582,517 items
- ✿ New OCLC symbol (BUFSP)

Discovery and Delivery

Discovery Methods

- ✦ Local catalogs: *load records of shared materials into local catalogs – ease of discovery, yet labor intensive to maintain records in local systems.*
- ✦ Discovery layers: currently EDS, Summon and WorldCat Discovery (FirstSearch)
- ✦ *Custom catalogs – quarterly updates*
- ✦ *Discovery of materials easy for library patrons; less time spent maintaining records; and efficient processing of delivery requests.*

From Empire Shared Collection website

In the current library environment, academic and public libraries tend to work independently from each other when making collection management decisions such as retention, storage, and preservation. Representatives from multiple library sectors in Western New York have worked together to develop a collaborative program - the Empire Shared Collection Program - to address these issues.

Planning and implementation of the Empire Shared Collection Program was funded in part through member project grants from the Regional Bibliographic Data Bases and Interlibrary Resources Sharing Program (RBDB) awarded to the Western New York Library Resources Council by the New York State Education Department. The program is governed by a Steering Committee consisting of one representative from each participating library. The Steering Committee is responsible for creating and maintaining policies, agreements and procedures for the

establishment and maintenance of the program.

A result of this collaboration is the establishment of the Empire Shared Collection Repository (ESCR) which provides continuing access to a shared collection of seldom-used serial-type materials. The ESCR collection is housed in the high-density storage Annex operated by staff of the University at Buffalo and is funded through annual membership fees. The initial collection is based on the overlap of serial holdings between the participating libraries and the materials housed in the Annex. The collection will expand to include unique serials and "last copy" monographs.

More information about the program and the repository can be provided by contacting [Nicole Colello](#), Project Coordinator.

Statistics

As of May 5, 2015, the Empire Shared Collection includes:

3 0 1 8 1 Titles
5 8 2 5 1 7 Items

Average Total Turnaround Time: 12.34 hours

The Empire Shared Collection Program

*Administration, Membership and
Future Plans*

Who makes decisions?

Steering Committee consists of one representative from each member library

Charge:

Maintain policies, agreements, and procedures for the establishment and maintenance of the Collection

Memorandum of Understanding (MOU) is signed by all members and will be reviewed periodically by the Steering Committee

With the approval of current members, other institutions may participate if they agree to the terms of the MOU and the policies for the operation of the collection.

The Collection – A Single Copy Repository

- ✿ *No duplication of titles allowed within the repository*
- ✿ *Considered the designated “last copy” for the members*
- ✿ *Starting with the University at Buffalo Libraries Annex; plans exist to transition to a distributed model as space and use dictate*

High Density Storage

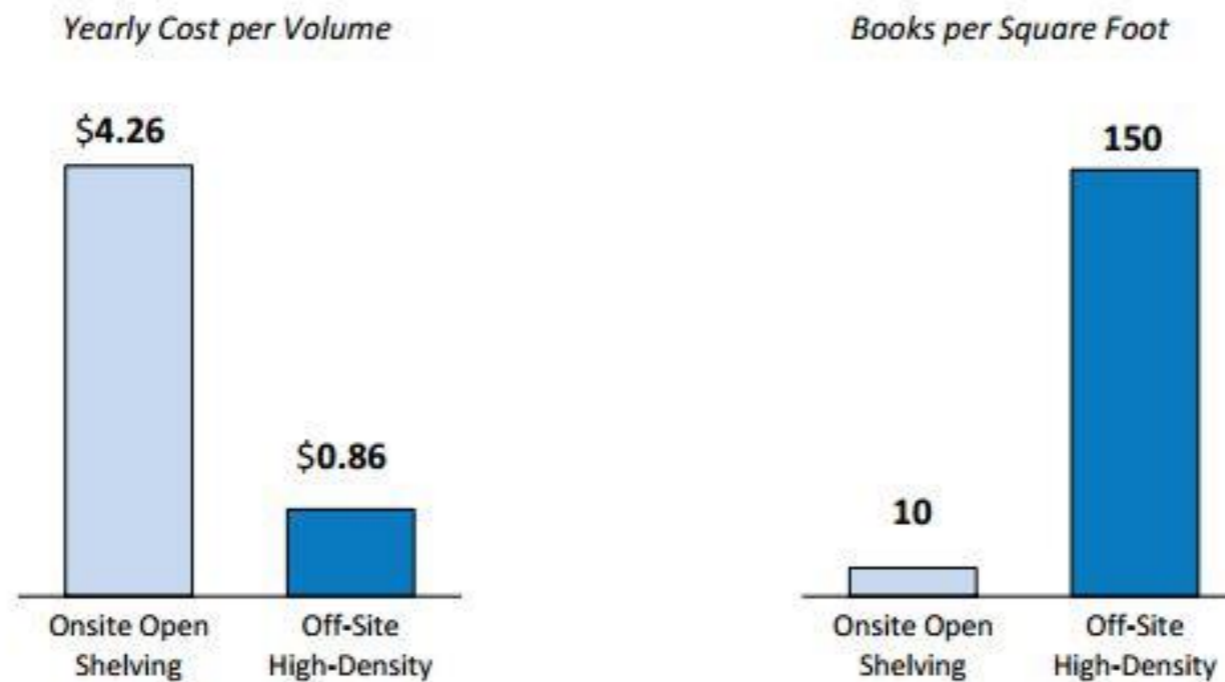

About the UB Libraries Annex

Why High Density Storage?

The Price of “Just-in-Case” Collections *Attachment to Open Stacks Comes With Significant Costs*

The Cost of Keeping a Book

Source: Courant, Paul and Matthew Nielsen, "On the Cost of Keeping a Book", *The Idea of Order: Transforming Research Collections for 21st Century Scholarship*. CLIR Pub#147. June 2010; Education Advisory Board Interviews and analysis.

Who owns the material?

- ✦ All participating members own the materials
- ✦ Materials are here forever unless Steering Committee approves withdrawals.
- ✦ As we move to a distributed model, publically accessible shelving is acceptable storage space.

Who does Cataloging?

The cataloging of records for materials included in the Shared collection will be the responsibility of the depositing library.

This includes:

- Since the initial collection consists of the ~34,000 serial titles currently stored at the Annex. UB will be responsible for adding those records to the BUFSP symbol.
- Updating OCLC LHRs occur on a quarterly basis.

Cost of Membership

The planning group determined that the fairest and most scalable way to determine the cost of membership was to use the **total materials expenditures budgets** of all member libraries.

All budgets are added together to create an aggregate number.

Each library's *percentage of the aggregate* amount is the percentage each will pay toward the Operating Cost of the program.

Membership Cost

So, for example let's say for FY14/15:

- Operating Costs of Annex = \$58,000
- UB's total materials expenditures budget = \$8.5 million
- The aggregate total of all participating libraries total expenditures budgets = \$17 million
- 8.5 million is 50% of 17 million
- UB would pay 50% of the Operating Costs, which would equal \$29,000

This Business Plan is scalable: the more participants in the program, the smaller the cost to each institution!

Annex Operational Costs FY 2013/14 for Shared Collection

FY2013/2014 Shared Collection Repository Operational Costs

Personnel	Annual Cost
Annex Assistant (.20 FTE)	\$9,224
Laborer (.5 FTE)	\$15,750
Student Assistants (DocDel/Inventory/Metadata/Cataloging/ETC...)	\$10,148
Total Personnel	\$35,122
Hardware/Software Annual Maintenance	
GFA (Inventory Control System)	\$17,200
ILLiad Maintenance - Satellite Library	\$1,310
DLSG Bookeye (BSCAN)	\$2,387
DLSG Bookeye (KIC)	\$2,387
Total Hardware/Software Annual Maintenance	\$23,284
Supplies	
Paper, Toner, etc.	\$1,000
Total Supplies	\$1,000
Total Estimated FY 2013/2014 Costs	\$59,406

Future Plans:

✦ Phase II: Shared Monographs

- ✦ *The Steering Committee will determine the scope of a shared monograph collection (unique vs shared materials)*

✦ Initial Analysis of Shared Monographs

- ✦ https://public.tableau.com/views/MonoOverlap/Dashboard1?:embed=y&:display_count=yes&:showTabs=y

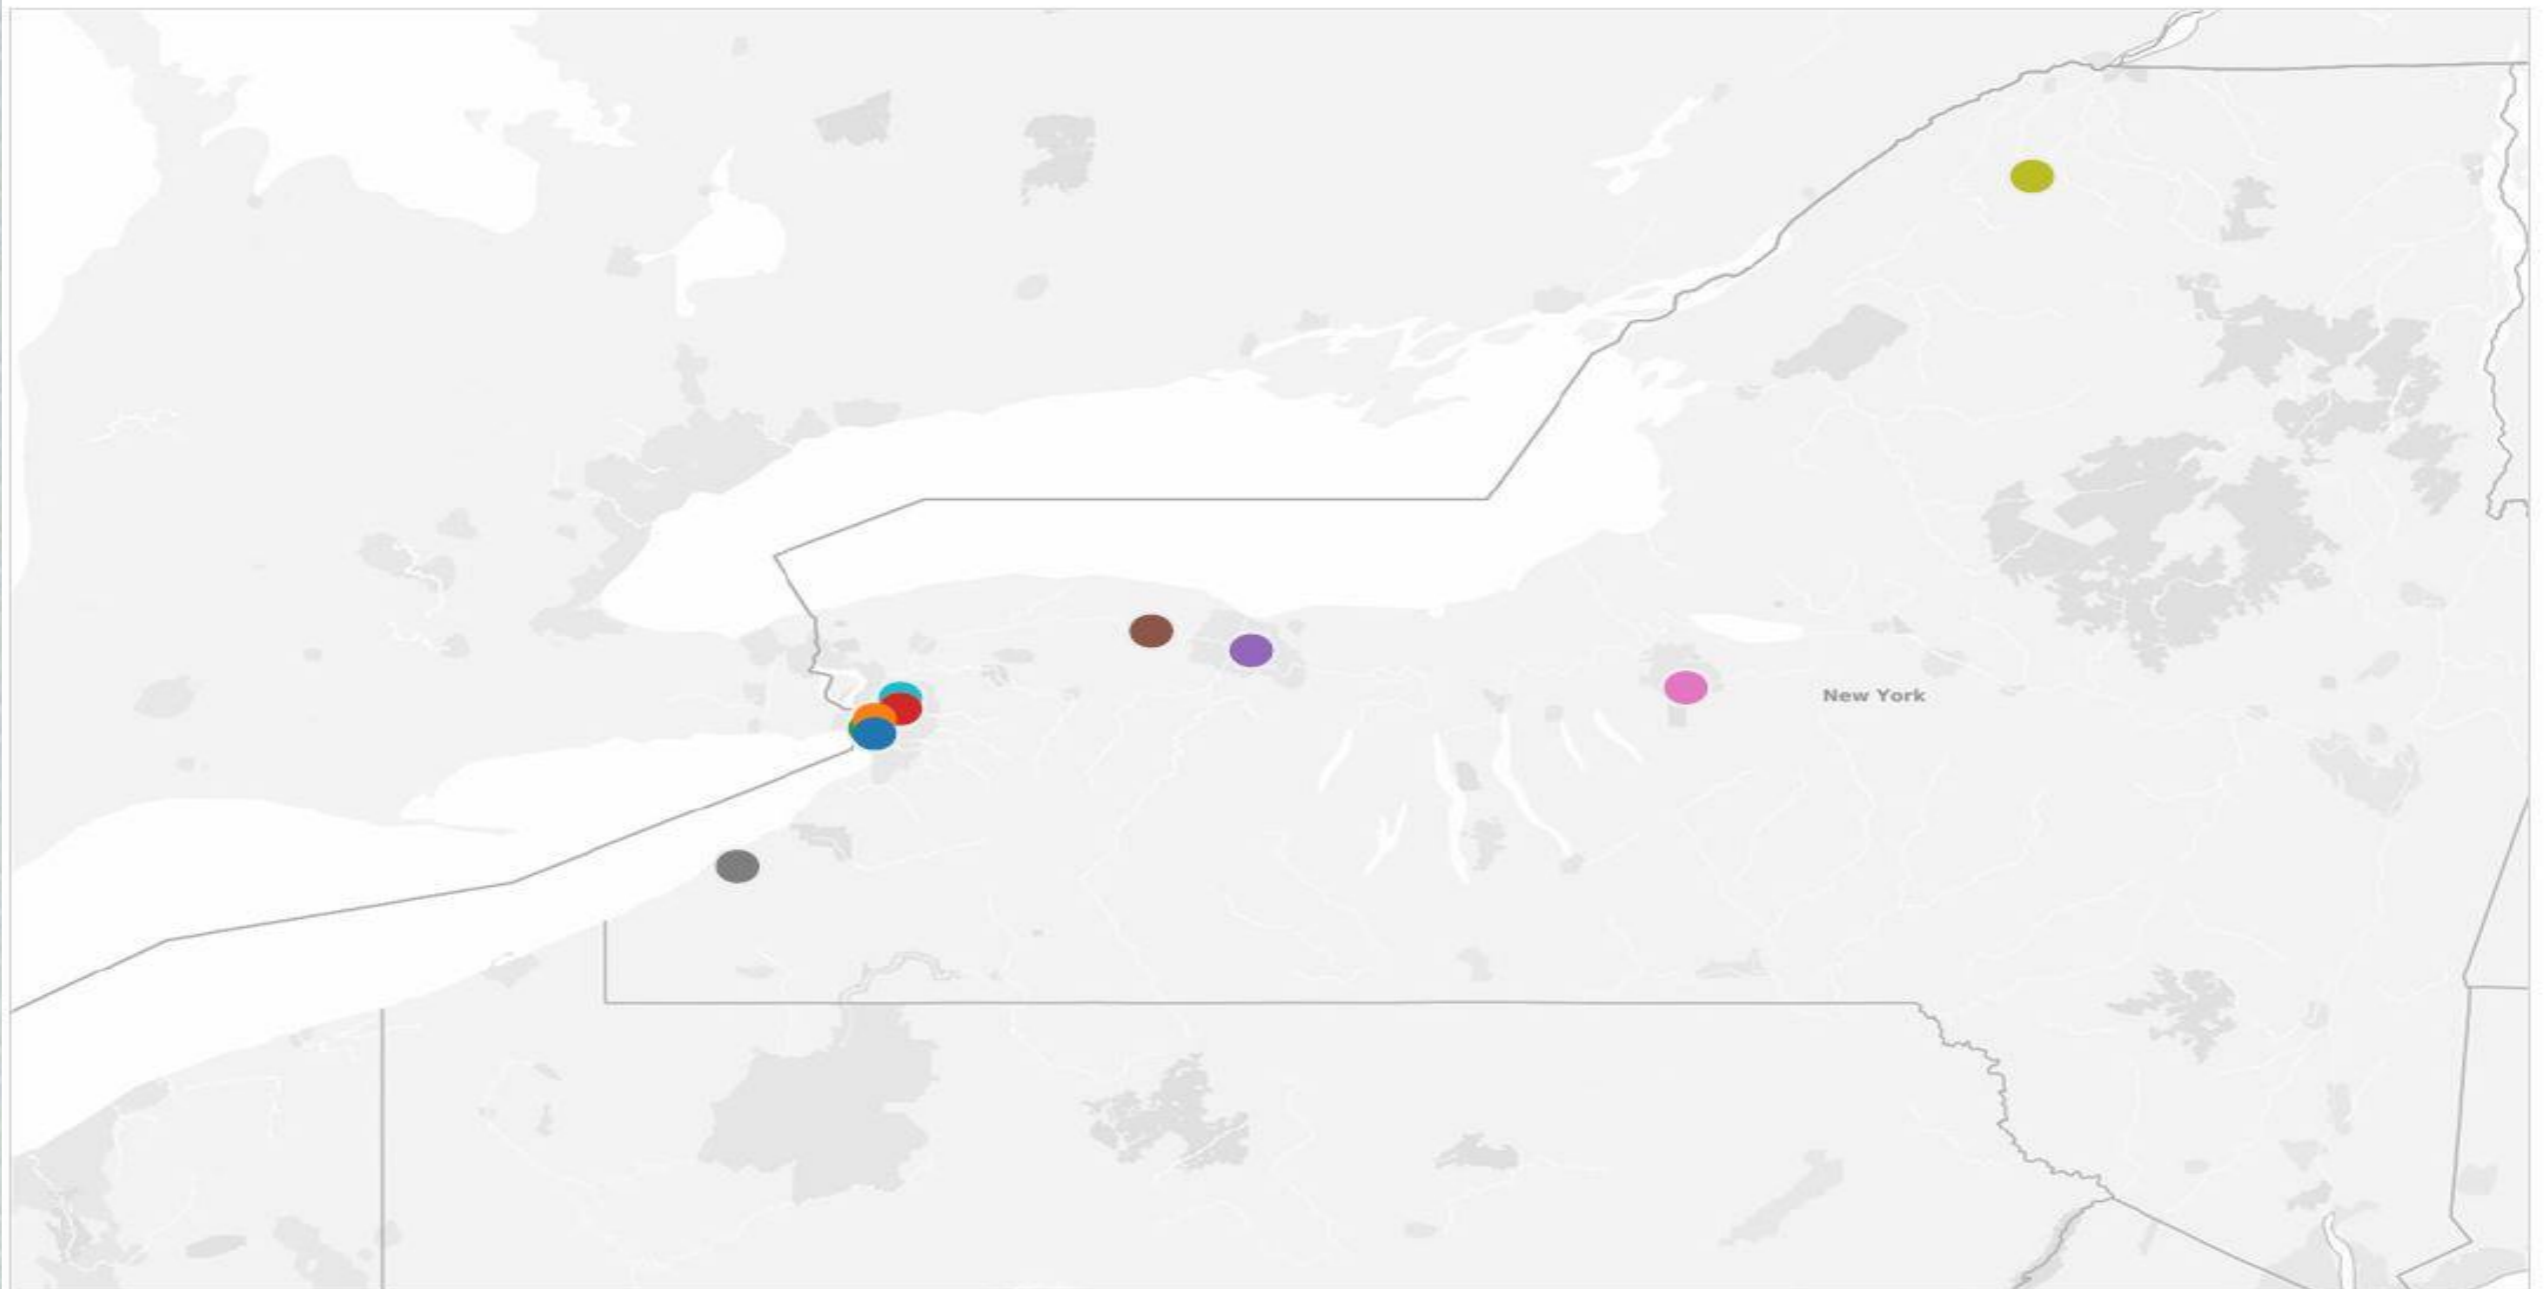

Future Plans:

- ✦ Distributed shared print serials collection
- ✦ Digitization support
- ✦ Print-on-demand services for member libraries
- ✦ Any other ideas...?
