Report of the President

To the Trustees and Overseers of Bowdoin College:

The report from the president that usually fills this space has been published this year as an insert in *Bowdoin* magazine so that it could be distributed to all alumni, parents, and friends of the College. Next year we plan to add new dimensions to that report: at the least, a brief summary by the academic dean of the major academic events of the year and a financial report by the treasurer.

The *Report of the President* as it has traditionally been constituted, with separate reports from the president, the librarian, and the directors of the museums, with a listing of professional activities and appendix materials from other sources, has been published for very nearly a century. In that time its emphases and content have changed very little, while the College, and the nature of institutional reporting across the country, have changed enormously. Much of this traditional body of information, however, remains important, descriptive of the vitality of the College, and interesting.

This supplement, therefore, contains information on professional activities of the faculty and staff as well as reports on the library and the museums, together with most of the appendices. We have omitted the Personnel Report as well as the section on enrollment in courses. That information is available from the Office of Human Resources and the Office of the Registrar respectively.

The character of this supplement may change over the years, but the College intends to continue to publish the reports of the museums and the scholarly and professional activities of faculty and staff. Additional specialized data about the College, such as enrollment numbers and majors, we expect to assemble and maintain in a computer-based form to be made available on request.

Copies of the *Report of the President* that appeared in *Bowdoin* magazine are available from the Office of College Relations, Bowdoin College, Brunswick, Maine 04011, as are copies of this supplement.

Respectfully submitted,
Robert H. Edwards

Richard Leigh Chittim '41, Isaac Henry Wing Professor of Mathematics Emeritus, died on March 24, 1991. Professor Chittim graduated from Bowdoin *summa cum laude*, winning the Smyth Mathematical Prize, and did graduate work at Princeton University before returning to Bowdoin in early 1942 as instructor in mathematics. From 1947 to 1950 he studied at Merton College, Oxford, as a Rhodes Scholar, receiving B.A. and M.A. degrees in mathematics. He returned to Bowdoin in 1950 as assistant professor, was promoted to associate professor in 1957, became a full professor in 1963, and was named Wing Professor of Mathematics in 1977. In 1961-1962 he studied at the University of London under a National Science Foundation Faculty Fellowship. In 1985 he received the Alumni Council's Alumni Award for Faculty and Staff.

Professor Chittim was a faculty member and director of National Science Foundation Summer Institutes at Bowdoin from 1959 to 1961, from 1963 to 1968, and from 1970 to 1974. During the 1950s, he spent his summers revising and editing mathematical papers for the U. S. Geological Survey in Washington, D.C., and in the summer of 1956 he was a programmer with IBM in New York City. He was a past president of Phi Beta Kappa and had served as a member of the Rhodes Scholarship Selection Committee in Maine. An active musician, he performed frequently at Bowdoin recitals.

He is survived by his wife, Mary Elizabeth Young Chittim; a son, David B. Chittim of Lisbon; two daughters, Wendy Chittim of Bangor and Nancy H. Chittim of Lisbon; a brother, a sister, and five grandchildren.

On his retirement in 1986, the Richard L. and Mary Elizabeth Chittim Scholarship Fund was established at Bowdoin through gifts from former students, faculty colleagues, and other friends.

In his memorial minute to the faculty, Professor Wells Johnson wrote of Professor Chittim: "Dick personally represented the best of the liberal arts tradition, and he was able to transmit those values to his students. He was equally delighted with an ingenious mathematical proof, an opera, a poem, a chamber music piece, a geometrical construction, a play, a symphony, a piece of classical literature, a work for solo piano. . . . He found little distinction between life, work, and learning."

Paul Gifford Darling, Professor of Economics Emeritus, died on December 13, 1990. Professor Darling graduated from Yale University in 1937 and was an accountant in New York City

until 1942. During World War II he served in the U.S. Army's Medical Administrative Corps, attaining the rank of first lieutenant. He received a master of arts degree from New York University in 1947 and a Ph.D. from Columbia University in 1954. He taught economics at Rutgers from 1945 until 1949, when he joined the faculty at the Carnegie Institute of Technology. He became an associate professor of economics at Bowdoin in 1956, was promoted to full professor in 1960, and was chair of the Department of Economics from 1965 to 1967, from 1972 to 1974, and in 1976-1977. He retired in 1983.

In 1960-1961 Professor Darling did research under a Brookings Research Professorship, and in the summer of 1961 he served the Congressional Joint Economic Committee as staff economist and as an economic consultant. He was one of the early board members of the Maine Civil Liberties Union, helped in the founding of the Reform Democrats of Maine and the state chapters of Common Cause and SANE, and was a member of Veterans for Peace. The author of many articles in professional journals, he was a member of the American Economics Association and the American Finance Association.

Professor Darlings's first wife, Frances Koss Darling, and their son, Douglas, both died in 1967, within a few months of each other. He is survived by his second wife, Elizabeth Barnhill Johnsen Darling; her daughter, Susanna Darling, of Cambridge, Mass., whom he adopted; his daughter, Gail C. Darling, of Cape Elizabeth; a brother; and two grandchildren.

Dean of the Faculty Alfred H. Fuchs paid tribute to Professor Darling in these words: "His concern for faculty, for education, and for the community was well known to this colleagues. He gave much to Bowdoin during his career. The College stands in his debt."

Eaton Leith, Professor of Romance Languages, died on January 15, 1991. Graduated from Dartmouth in 1922, he studied at L'Ecole du Chateau in Soisy-sous Etioilles, France, in 1920 and at the Sorbonne in Paris in 1922-23. He did graduate work at Harvard University from 1924 to 1928 and again in 1934-1935, receiving his master of arts degree in 1925. He was an instructor in French at Harvard in 1927-1928 and an instructor in Romance languages at Dartmouth from 1928 until 1934. He joined the faculty at Bowdoin in 1936 as an instructor in Romance languages, was promoted to assistant professor in 1942, to associate professor in 1945, and to full professor in 1949. During his years at Bowdoin he taught courses in Spanish, French, Italian, and English, and conducted a Senior Center seminar. He chaired the Department

of Romance Languages from 1956 to 1965 and retired in 1970.

During World War I Professor Leith served in the U.S. Army. He was chairman of the Brunswick Chapter of the American Red Cross, president of the Brunswick Area United Fund, and an officer of the Brunswick Democratic Town Committee. He took part in Brunswick Workshop Theater plays and was active in St. Charles Borromeo Church.

Professor Leith was faculty advisor to Delta Upsilon fraternity for many years, and during that time the fraternity became the first at Bowdoin to admit black members, breaking with its national organization and changing its name to Delta Sigma in order to do so. In 1959 the Eaton Leith Cup, contributed by an anonymous donor, was established to honor "that member of the Delta Sigma Fraternity who by scholarship, character, and humanity best exemplifies those principles which Eaton Leith has sought to instill in Delta Sigma and those principles upon which Bowdoin College is established." In 1962 another anonymous donor established the Eaton Leith French Prize, which is awarded annually to the member of the junior class who has achieved outstanding results in the study of French literature. In 1988 the Eaton Leith Tree was planted near the Hawthorne-Longfellow Library as a tribute to him from an anonymous faculty colleague.

In his retirement, Professor Leith enjoyed traveling in France, especially in Paris, and was awarded the title of "Paroissien d'honneur" by le Curé de S.-Germain-dès-Pres, the Père Gouday. Dean of the Faculty Alfred H. Fuchs noted especially that Professor Leith, "helped to build a distinguished collection in the library in French language, literature, and culture. He was a warm and generous friend to generations of students, colleagues, and administrators."

Professor Leith was married in 1924 to Margaret LeBaron, who died in 1977, and they had two daughters, Nancy E. Leith, who died in 1981, and Mimi L. Borden of Topsfield, Mass., who survives him, along with two grandsons and three great-grandchildren.

Jotham Donnell Pierce '39, Trustee Emèritus, died on October 16, 1990. Following his graduation from Bowdoin *cum laude*, he entered Harvard Law School, from which he was graduated in 1942. During World War II he served in the U.S. Army Air Corps, attaining the rank of major as a navigator with the 15th Air Force in Italy and being awarded the Distinguished Flying Cross and two Air Medals. After the war he joined the Portland law firm which is now Pierce, Atwood, Scribner, Allen, Smith & Lancaster, of which he was a partner for many years. He was

active in civic affairs, particularly with the Portland Boys Club, of which he was an honorary life member.

Mr. Pierce was a member of the Board of Overseers from 1963 until 1976 and a member of the Board of Trustees from 1976 until 1983. He had been a director of the Alumni Fund, chair of the 1957-1958 Alumni Fund, a member-at-large of the Alumni Council, and an admissions aide. He was a volunteer worker in the 175th Anniversary Campaign Program, was a past president of the Bowdoin Club of Portland, and chaired many Class of 1939 Reunions. He is survived by his wife, Sally Woodcock Pierce; three sons, Jotham D. Pierce, Jr. '65 of Hollis Center, Christopher A. Pierce '71 of Yarmouth, and James M. Pierce '76 of Portland; three daughters, Deborah P. Nicklas of Falmouth, Priscilla P. Bass of Portland, and Marianna C. Pierce of Cambridge, Mass.; two brothers; three sisters; and thirteen grandchildren.

Laurent C. Pinette, Director of the Dining Service Emeritus, died on December 24, 1990, after having retired in September of 1989. In 1955 he became chef at Chi Psi and was the first chef at the Senior Center when it opened in 1964. He was appointed assistant director of dining service and executive chef in 1971 and director of dining service in 1986. Mr. Pinette received the Alumni Award for Faculty and Staff on Homecoming Day in 1988 and was elected an honorary member of the Alumni Association in 1990. Bowdoin's Class of 1965 established the Laurent C. Pinette Scholarship Fund in his honor in 1986. He is survived by his wife, Phyllis St. Pierre Pinette; two daughters, Susan Pinette of Brunswick and Carol Nelson of Wiscasset; his mother, Mrs. Ernestine Pinette of Brunswick; two brothers; two sisters; and a grandson.

Retirements

Peter C. Barnard, A.B., of the Class of 1950, secretary of the President and Trustees and Overseer since 1977, was elected emeritus in May of 1990. His long service to his College is deeply appreciated.

Report of the Librarian

To the President of Bowdoin College:

I have the honor of submitting the following report for the year 1990-1991.

A dedication ceremony on June 1 during Reunion Weekend marked a significant enhancement in library service to the college community. The new Hatch Science Library provides space in a single facility to gather all the science material that for many years had been spread across the campus in buildings and rooms that were ill-adapted for library use. Kathleen Kenny, the science librarian, spent most of the fall planning the move to the new facility, a project made more complex by the fact that material in four buildings had to be integrated into a unified collection. When fall term final examinations ended, a crew of students and staff members began packing books. When college resumed in mid-January the move was complete, and the Hatch Science Library opened its doors to the public. By the time the dedication took place, the collections were in good order and the library was functioning as expected.

With the implementation of the library's automated system, the year also saw a major advance in the library's ability to serve the College. The online catalog was in operation when the College resumed last fall. By November, the acquisitions processes were integrated into the system, and the spring term began with the extended and reserved reading circulation procedures operating on the system. The communications link to the Bates, Colby, and University of Maine libraries was established, and this past summer saw the bibliographic records for currently received periodicals entered into the system, along with the necessary check-in and order records. When college resumes this fall, all the parts will be in place, and from a terminal in the library or one of its branches one will be able to find out if the library owns books or journals on a particular subject and if a wanted book is on order, in process, at the bindery, or checked out. The same screen will tell the reader the latest issue of a journal that has been received. If the wanted title is not in the Bowdoin library, two key strokes will put the reader into the Bates, Colby, or University of Maine catalogs, which can be searched exactly as Bowdoin's catalog is searched. The same capability is available to anyone with a terminal or a personal computer that can connect to the College's computer network.

While all the parts are in place, not all of the material owned by

the library can be found in the online catalog. This includes some of the older books, many of the periodical titles no longer received, nearly all of the material in Special Collections and college archives, and most of the library's extensive holdings of government publications, maps, and manuscripts. The card catalog and other finding aids have not yet been supplanted, and it will be a considerable while before they are.

The online catalog arrived at a timely moment for the science library. The relatively inexpensive installation of computer terminals provided a ready-made circulation system, and, for the first time, fully cataloged access to science materials in the same place they are housed.

Once again, Special Collections proved its value to users of the library. Bowdoin faculty, students and staff members who used the collections numbered 206, while 195 outside researchers availed themselves of its resources, and the staff answered 230 written inquiries. Volumes consulted numbered 1,166, and 1,935 volumes and boxes of manuscript and archival material, including newspapers, maps, microforms, and recordings, were called for.

Joshua Lawrence Chamberlain's fame, broadcast by the Civil War series on public television, accounted for many of the inquiries, and a project by the students in Angela Leonard's History 336 had a good deal to do with the statistics of use. Members of the class spent countless hours poring through hundreds of folders of letters, documents, pamphlets, and books, identifying material relating to slavery and the abolition movement in antebellum America. The result is an extensive bibliography of resources on the subject in the library's Special Collections. Students in many disciplines, including African-American studies, anthropology, art, education, English, history, music, religion, sociology, and women's studies, drew material from the collections for papers and course work.

Significant additions to the collections during the year included a fine collection of Leonard Baskin/Gehenna Press volumes; manuscript letters and poems of Hawthorne, Yeats, and Carl Sandburg; the addition of several more volumes to the papers of the Tucker family, who were involved in shipbuilding in nineteenth-century Bath; and some additions to the Fessenden family archives.

The staff mounted several exhibitions during the year, including a celebration of the first twenty-five years of the Hawthorne-Longfellow Library and the opening of the new Hatch Science Library. In addition to some minor exhibitions, the staff provided the usual nostalgic glance at the past for the fiftieth reunion class, this time for the Class of 1941.

Work on the third floor this past summer will complete half of the asbestos abatement program in the Hawthorne-Longfellow Library building. The project caused some inconvenience to readers who wanted to use books shelved on that floor, and considerable inconvenience to staff members who had to move a lot of books and other material out of the way. Work in the Special Collections area will be done during the mid-term break this winter.

In the past, this report has carried a table showing the growth of the library over the last five years. Since this librarian wrote his first report while serving as acting librarian twenty-five years ago, it may be of interest to see the growth of the library at five-year intervals.

Year	Expenditures	Materials	Salaries and Wages	Staff	Student Hours	Collections	Volumes Added	Periodicals	% of E & G
65-66	248,425	76,823	128,956	21.5	12,133	315,792	12,571	N/A	6.1
70-71	321,881	117,014	187,438	26.	13,017	443,978	15,300	1,647	5.1
75-76	460,286	196,635	231,898	22.5	10,545	517,631	15,229	1,795	5.1
80-81	714,550	338,643	329,643	22.5	16,431	608,444	15,368	1,777	5.1
85-86	1,219,162	593,543	586,265	26.8	17,855	692,723	18,347	2,007	4.6
90-91	1,957,253	968,796	910,812	34.1	27,430	777,872	14,453	2,172	N/A

That the collection more than doubled over twenty-five years is not surprising. A study of major libraries some years ago showed that they doubled in size every sixteen years. More startling is the eight-fold increase in the cost of the library. The increase makes graphic the fact that the inflation rate for publications far exceeds the Consumer Price Index. The average periodical subscription rose from \$6.95 in 1965 to \$124.74 in 1990, an increase of nearly eighteen times. Hardbound books averaged \$7.65 and paperbacks \$2.50 in 1965; last year the library paid an average of \$49.50 per volume, including both hardbound and paperback books, a more than six-fold increase. Salaries and wages have kept pace with those in other segments of the economy; it takes more people to operate a 775,000-volume library and serve a college community with 1,400 students than it does a library with 315,000 volumes and a student body near 900.

One anomaly in the table needs clarification: the decline in volumes added in 1990-1991 results from the way the count is compiled. New books are counted as they are cataloged. During

the past year and a half the backlog of uncataloged material grew considerably while the catalogers spent a great deal of time preparing for and bringing up the online catalog and then cleaning up problems. Books in the backlog are represented in the catalog by author and title and can be retrieved when called for. The backlog is no longer growing and is slowly diminishing.

Interlibrary loans continue to increase. Last year the staff secured 2,685 items for faculty and students, while the previous year's borrowing brought 2,301 items. Lending, however, declined from 4,998 to 4,125. The staff is at times swamped with more requests than can be handled and has no alternative but to return some of them unfilled. On the other hand, the success rate in securing wanted materials is about 95 percent, in contrast to the 75 percent rate of fifteen or twenty years ago.

The close link between the major academic libraries in Maine makes effective cooperation possible. About 25,000-30,000 students and faculty at the four campuses now have access to nearly 2,000,000 volumes. Probably less than 20 percent of those titles are represented in all four of the libraries, and about 50 percent can be found in one and only one of the four libraries. Once a reader knows a wanted book or journal exists at one of the institutions, the library can secure it in a few days—in hours for an emergency.

The Bates, Bowdoin, and Colby libraries have installed fax machines so that journal articles and other short works can be sent overnight by telephone wire. The three libraries have also agreed to lend directly to faculty and students upon presentation of an ID from a participating institution. Planning is underway to assign responsibility for the retention of older, little-used material. Each library will agree to retain for the indefinite future particular titles for which the library holds the most complete set, in the best condition, leaving the others free to retain or discard their holdings of the title. While it will take a good deal of time before the program is accepted and can be implemented, it offers some prospect for stemming the physical growth of the collections in at least a small degree. Efforts are also underway to stem the soaring costs for new subscriptions to journals that are not needed on-site by providing copies of tables of contents to those who need regular access to a journal that is held by one of the other libraries. Many periodicals, perhaps most, will not fit in this category, but avoiding new subscriptions to those that do can help to hold down the growth of the materials budget with little diminution of access to the material.

I cannot close this report without acknowledging my debt to so many: to Judith R. Montgomery, assistant librarian, who led the

staff through the sometimes terrifying maze the implementation of the automated system presented; to Lynda K. Zendzian, catalog librarian, who spent many hours beyond a normal work week at her home computer, learning the system so that she could demystify it for other members of the staff; to Kathleen Kenny, who quickly settled into her new job and planned, organized, and executed the move to the Hatch Science Library so that it was as painless as could be hoped, and brought the science library to full operation in an unbelievably short time; to so many staff members and student assistants who bore with good grace the double burden of providing normal library services while learning and adjusting to the hundreds of details and new procedures the system brought with it; and, not least, to Professor Alfred H. Fuchs, former dean of the faculty, who understood the library and its problems and gave it his strong support for sixteen years.

At the end of this year I will leave the library. I will leave with some regret, but I also take much satisfaction knowing that, thanks to the efforts of a dedicated staff and the strong support of the faculty and administration, I can walk away from a solid and vital institution which can and will continue to serve the College in the future as it has in the past.

Respectfully submitted,
Arthur Monke

Report of the Director, Bowdoin College Museum of Art

To the President of Bowdoin College:

I have the honor of submitting the following report for the year 1990-1991:

The accomplishments of the museum, of the members of its staff, are best articulated in the appended lists, which indicate the extraordinary vitality of the institution. College and community alike have benefited from these achievements, and, in turn, have provided generous supporters and participants.

The year 1990-1991 was distinguished by especially strong temporary exhibitions and related publications and educational activities. Significant gifts of art, of money, loans to other museums, important purchases, and successful grant applications further characterized the year.

Whereas the careful lists printed with this report attest to the excellence, the liveliness, of the museum, no description gives adequate credit to every member of the staff, volunteer and paid, and to the college faculty and students, particularly of the Department of Art, whose commitment and contributions have been critical to all that has occurred. The Report of the Director provides, once again, an opportunity to thank each of these individuals.

The year has also been a time of considerable transition. The campus welcomed a new president, Robert H. Edwards, and his wife, Blythe Bickel Edwards; their visits to the museum's permanent collections and temporary exhibitions have been much appreciated. The dean of the faculty, Alfred H. Fuchs, who had represented the museum to the president and Governing Boards since 1978, retired from his administrative position to return to full-time teaching at the College. He has been cited for his interested involvement, loyal support, and effective advice on innumerable occasions and in many catalogue acknowledgements, but it is a pleasure to express again the gratitude of those college employees who over the years worked with him in the Museum of Art. His enthusiastic response to new ideas and to proposals for projects assured the success of many an undertaking. He remained steadfast in his endorsement of long-range plans, such as the installation of climate control, the most important undertaking for the museum's physical plant and care of collections.

Charles R. Beitz, appointed as Dean Fuchs's successor, began

his new position in early August. Dr. Beitz, who came from Swarthmore College, where he was professor and chair of the Department of Political Science, will be broadly responsible for the academic mission of the College, which includes overseeing the Museum of Art. In his interview for the position, Dr. Beitz expressed genuine interest in the museum, and members of the staff look forward to working with him.

Within the museum, several personnel changes occurred. Henrietta M. Tye, registrar, resigned in November to move to California, where she has been named registrar at the San Diego Center for Photographic Arts. Her successor is Mattie Kelley, formerly assistant registrar for special exhibitions at the National Gallery of Art, and most recently consultant registrar for The Currier Gallery of Art and the New England Foundation for the Arts. Donald A. Rosenthal, associate director and curator of collections, left Bowdoin at the end of June to become director of the Chapel Art Center and lecturer in art history at Saint Anselm College.

The year 1990-91 has been one of the most rewarding in the museum's history. Programs have been well-received; much progress has been made in the area of campus outreach; more and more students, their parents, and graduates have become interested in the art collections, the building itself, and the role of the museum in the curriculum.

But the Museum of Art is in a certain sense suspended within the College at this time of change in administration. The paid staff has been reduced by more than one and three-quarters positions; climate control is temporarily on hold.

The museum's primary focus for the future must be the permanent collection, which is its reason for being; care and educational use of that collection for campus and community are the highest priorities; but adequate staffing is utterly necessary to these institutional goals, as is a more complete mechanical system for environmental control.

At the College, in the state, and throughout the country, arts programs are currently subject to close scrutiny, revision, and often reduction, reflective of general fiscal uncertainty, in some instances, financial crisis. Yet, the arts have never seemed so important in relationship to contemporary society, as counterpoint and commentary, a creative, spiritual, and intellectual realm part of and beyond current events.

As Bowdoin approaches, in 1993-1994, the two-hundredth anniversary of its founding, and the Museum of Art anticipates the centennial celebration of the Walker Art Building, as work progresses on a major exhibition and publication, *The Legacy of*

progresses on a major exhibition and publication, *The Legacy of James Bowdoin III*, to honor the earliest patron of the arts in the College's traditions, it is hoped that the Governing Boards and administration will place the needs of the museum high on their list for celebratory fund-raising, and will focus, with understanding and pride, on the collections and building, which are among those assets that make the College unique among its peers.

Respectfully submitted,
Katharine J. Watson

APPENDIX

Programs and Activities

July 1, 1990–June 30, 1991

**(All events were held in the Walker Art Building
unless otherwise indicated.)**

August 23: Reception and tour for residential proctors.

August 26–31: Poster sale.

August 28: Open house for all students. Tours and reception hosted by the museum staff.

September 5: Meeting and reception for prospective art history majors.

September 12 and 16: Gallery talk, "Tiny Faces, Forgotten Lives: Miniatures in the Bowdoin College Museum of Art," William C. Watterson, associate professor of English.

*September 19 and 23: Gallery talk, "Shining Examples: Reflections on the Bowdoin Silver Collection," Martha G. Fales, honorary curator of silver and jewelry, Essex Institute, Salem, Massachusetts.

*September 25: Slide lecture, "Edward Perry Warren: Collector of Art and Conspirator Against Boston," Martin Green, Harriet Fay Professor of Literature, Tufts University and author, *The Mount Vernon Street Warrens*. Beam Classroom, Visual Arts Center.

December 1: Museum commemoration for A Day Without Art: A National Day of Action and Mourning, AIDS Awareness Day.

December 4: Museum Shop holiday party.

January 22, 1991: Slide lecture, "There's Gold in Them Thar Prints!!! (and Silver, and Platinum Too): The peregrinations of a Fine Photography collector armed with Bowdoin-bred esthetic judgment,

navigating the treacherous fads of the Artistocracy, and the volatile Art market," Isaac Lagnado '71, then staff vice president of research of the International Council of Shopping Centers, now president of Tactical Retail Solutions, Inc., New York, and collector of photography, New York. Presented in conjunction with the exhibitions *Recent Acquisitions in Photography: 1987-1991* and *The Hand-Held Camera*. Kresge Auditorium, Visual Arts Center.

January 30 and February 3: Gallery talk, "The Visual Experience: Tom Lieber's *From One*," James B. Satterthwaite, museum docent.

*February 6 and 10: Gallery talk, "Looking at Pictures," Juris K. Ubans, professor of art, University of Southern Maine, and director, Art Gallery, University of Southern Maine, Gorham. Presented in conjunction with the exhibition *Recent Acquisitions in Photography: 1987-1991*.

February 13 and 17: Gallery talk, "The Hand-Held Camera," John McKee, associate professor of art. Presented in conjunction with the exhibition of the same title, organized by Professor McKee.

February 24 to 28: Lecture series, American Art and American Literature, Henry Adams, Samuel Sosland Curator of American Arts, The Nelson-Atkins Museum of Art, Kansas City, Missouri. Presented with the support of the Henry Luce Foundation and cosponsored with the Department of Art. Beam Classroom, Visual Arts Center.

February 24: "Poe, Mallarmé, and Manet."

February 25: "Charles Demuth and Henry James's *The Turn of the Screw*."

February 26: "Rockwell Kent's *Moby Dick*."

February 26: Film, *Thomas Hart Benton*, produced by Ken Burns.

February 27: "Mark Twain, Thomas Hart Benton, and Jackson Pollock."

February 28: "Art without Words: The Adams Memorial."

February 26: Reception for prospective art history majors.

February 27 and March 3: Gallery talk, "Recent Acquisitions in Photography: 1987-1991," Elizabeth G. Yarnell '91, history and Italian major with studio art minor. Presented in conjunction with the exhibition of the same title.

March 6: Gallery talk, "Recent Acquisitions in Photography: 1987-1991," David A. Wilby '91, history and government major. Presented in conjunction with the exhibition of the same title.

March 10: Gallery talk, "The Changing Role of Photojournalism from the Socially-Conscious 1930s to the Present," Annalisa M. Ravin '91, history major with studio art minor. Presented in conjunction with the exhibition *Recent Acquisitions in Photography: 1987-1991*.

April 3 and 7: Gallery talk, "Nineteenth-Century American Landscapes from the Permanent Collection of Prints and Drawings," Janet Marstine. Presented in conjunction with the exhibition of the same title, organized by Ms. Marstine.

April 10 and 14: Gallery talk, "Jules Dalou's *The Peasant*," Donald A. Rosenthal.

April 16: Slide lecture, "The Foremost Eighteenth-Century Sculptor in Rome: Giovanni Battista Maini as a Metal Sculptor," Jennifer

Montagu, curator of the photograph collection, Warburg Institute, University of London, England. Presented with support from the Lectures and Concerts Committee and the Jasper Jacob Stahl Lectureship in the Humanities. Beam Classroom, Visual Arts Center.

April 17 and 21: Gallery talk, "Greek Pottery: Its Place in the Ancient Banquet," James A. Higginbotham, instructor, Department of Classics.

April 24 and 28: Gallery talk, "Fresh from an Ancient Tomb: A Look at the Bowdoin College Museum of Art's Cycladic Figure," Rosemary A. Blake '86, museum docent.

May 1 and 5: Gallery talk, "Mannerism: Sixteenth-Century Italian Works on Paper," Andrew A. Goldstone '91, art history major. Presented in conjunction with the exhibition of the same title, organized by Mr. Goldstone.

*May 2: Slide lecture, "Full Powers—The Art of Katherine Porter," Stacey S. Moss, associate director and curator, Wiegand Gallery, College of Notre Dame, Belmont, California. Presented in conjunction with the opening of the exhibition *Katherine Porter: Paintings/Drawings*. Ms. Moss was the catalogue author for the exhibition. Kresge Auditorium, Visual Arts Center.

May 2: Exhibition preview and reception for *Katherine Porter: Paintings/Drawings*.

May 3 at 12:30 p.m. and 3:30 p.m.: Dance performance, "Museum Pieces XI." The Bowdoin Dance Group, under the direction of June A. Vail, A. LeRoy Greason Assistant Professor of Dance in the Department of Theater Arts and Director of Dance.

May 13: Tea for Museum of Art volunteers. Lancaster Lounge, Moulton Union.

May 24: Gallery talk, "Katherine Porter: Paintings/Drawings," Katharine J. Watson.

June 1: Tours of Museum of Art by museum staff for visitors during Reunion Weekend.

June 11 to August 28, Tuesdays through Fridays: Docent-guided tours of the museum for the general public.

*This program was supported in part by the Maine Arts Commission, a state agency supported by public tax dollars.

Report of the Director, Peary-MacMillan Arctic Museum and Arctic Studies Center

To the President of Bowdoin College:

I have the honor of submitting the following report for the year 1990-1991:

The 1990-1991 year saw developments in national and international arenas that reflect on Bowdoin's Arctic program. Native Americans demanded that museums redefine their responsibilities to and depictions of Fourth World peoples. At the same time, nations with Arctic lands and waterways (Canada, United States, the Soviet Union, and the Scandinavian countries) recognized that current levels of research on Arctic environments and cultures are insufficient to support intelligent decision making about development of the North. Planners realized that few young people are choosing careers focused on the Arctic, and that a shortage of critical expertise will result. Thus, on national and international levels, northern-oriented research and education have become high priorities.

The Peary-MacMillan Arctic Museum and Arctic Studies Center has at the center of its mission the preservation of the heritage of northern peoples, and education and research regarding Arctic cultures and environments. The events and projects of the last year demonstrate that Bowdoin's Arctic program is playing an increasingly significant role in serving the national and international agendas described above. The geologist and anthropologists on staff are actively researching paleoclimates and human adaptations to environmental and social change. Bowdoin's courses and field programs are introducing college students and young northerners to Arctic science and social science. Finally, native organizations from Maine, Alaska, and Canada are cooperating with the museum in preservation, research, and education projects.

These various activities have led to the staff's participation in conferences and workshops in the Soviet Union, Canada, and the United States. The growing national and international stature of Bowdoin's Arctic program has in turn expanded field study opportunities for students and research opportunities for the staff. As this report demonstrates, while being involved in developments outside the College, the staff has continued to focus on the growth of Bowdoin's Arctic program.

Collections Management

The Institute of Museum Services, a federal agency, awarded the Arctic Museum a matching conservation support grant to correct dangerous conditions in the museum's main collections storage area (a yellow jacket infestation, annual extremes in temperature and humidity, daily climate fluctuations). During the fall the entire collection was packed and removed to temporary storage facilities so work could be accomplished swiftly over the winter break. Renovations included the construction of a new, sealed floor and walls and the installation of climate control and fire detection systems. The structural work was accomplished over a two-month period, and the collections were returned to the storeroom and unpacked throughout the spring and early summer.

As a result of this project, the museum's most fragile collections are now stored in an ideal environment where temperature and relative humidity are maintained at constant levels and monitored twenty-four hours a day. In addition, the collection is safeguarded against dust and water damage.

The conservation of artifacts continued throughout the year, though at a reduced pace due to the inaccessibility of the collections. The Refuge Harbor Album, a photograph album compiled by Donald B. MacMillan in the early 1920s, contains over 1,024 images that are deteriorating because of the acidity of the album pages. Some of the images appear in the MacMillan Photograph Collection, which was copied in the early 1980s. This year the museum funded the preservation of the remaining 400 unique photographs from the album. Copy negatives and copy prints of each photograph were produced, packaged in acid-free envelopes, and labeled. In addition, 95 copy prints of other still photographs were made for the working file and various research projects.

Two 35-mm black-and-white finished films produced by Donald B. MacMillan in the 1920s and used during his lecture tours were copied onto archivally stable film stock, and video reference copies were made. A two-reel 16-mm color film of the 1947 MacMillan Arctic Expedition shot by Ralph Hubbard, Jr., was sent to the laboratory, but work on it has not been completed.

While the stabilization and repair of artifacts are important collections management activities, preventive conservation is of equal importance, for the primary goal is to protect objects from environmental and mechanical damage so that repair is not

necessary. The museum's preventive conservation program continued this year with the repackaging of historic cameras in acid-free containers, the inventorying, cleaning, and rehousing of forty-eight nineteenth-century navigational charts of Alaskan waters, and the inspection, brushing, and rehousing of nine Robert E. Peary-related fur and cloth garments donated to the museum by the Pejepscot Historical Society.

In 1989 the Kane Lodge Foundation donated funds to the Arctic Studies Program for the purchase of video equipment. When the collections room renovations were completed, shelves in the small facility were rearranged, and a video work station was installed in the room. The facility is now equipped with two professional-grade VHS/Super VHS player recorders and monitors, as well as an editing controller. This equipment will allow the staff to catalogue the film collection as it is preserved and provide researchers a means to study the Arctic Museum's film holdings.

The Arctic Museum has become known for its efforts to preserve early Arctic photographs and to ensure that they are documented and used extensively. The director was approached by the cultural arm of the North Slope Borough, the northernmost Inuit corporation in Alaska, for advice and help in preserving an early twentieth-century collection of black-and-white photographs taken by a resident of Point Barrow, Alaska. The collection is a unique record because a native was behind the camera and documented his own culture. By providing technical and administrative assistance in the preservation project, the Arctic Museum forged new ties which may lead to additional education and research opportunities.

Publications

In 1988 the Arctic Studies Program sponsored an interdisciplinary conference titled "The Norse of the North Atlantic." The international gathering of natural scientists, anthropologists, archaeologists, and historians was attended by scholars from the United States, Canada, and Scandinavia. The curator, Gerald F. Bigelow, became the editor of the thirty-one conference papers in the spring of 1990, and the collected papers were sent to press in early 1991. The proceedings will appear as a special volume of the Danish publication *Acta Archaeologica*, a primary journal of record for Old World archaeology.

Exhibitions

Over the last six years the museum has been in contact with the Aroostook Micmac Council on an intermittent basis. This spring the museum and the Micmacs joined in a cooperative effort when the council asked the museum's director to help mount an exhibition of contemporary Micmac baskets. The exhibition, *Our Lives in Our Hands*, curated by Bunny McBride, an anthropologist and journalist, featured baskets representing the different styles and techniques employed by Maine's Micmac basket makers. It was accompanied by photographs that documented the processes of wood splint basket production and texts that discussed the importance of basketmaking in Micmac culture.

The exhibition was installed in the MacMillan Gallery in the spring of 1991 and was viewed by over 4,000 people during the two months it was at Bowdoin. At the exhibition opening and during the following weekend, Micmac basket makers demonstrated the art of producing wood splints from ash logs and the weaving of baskets. These programs took place in Hubbard Hall and were attended by the college community and the general public.

Members of the Micmac band spoke with students in Kaplan's Arctic Peoples course and met with a student conducting an independent study on the historical factors that led to the federal government's denial of Native American status to the Maine Micmacs. The exhibition and associated programs have rekindled an interest in the art of making baskets among Micmac people and have resulted in a new appreciation of Maine Native American lifeways by the general public.

In the spring the museum staff renovated the display cases in the northeastern end of the MacMillan Gallery. A new temporary exhibition generated from the museum's collections was installed in the cases. *Highlights from the Alaskan Collection* features artifacts accessioned within the last five years and discusses Alaskan Inuit spiritual beliefs and how they find expression in material culture.

Field Work

During the summer of 1990 Assistant Professor Peter D. Lea, who holds a joint geology and Arctic studies appointment, spent seven weeks working along the Kantishna River in interior Alaska on a National Science Foundation-sponsored research

program. He was accompanied by two Bowdoin College students, who helped him in his study of the sedimentology and paleoenvironments of the region. Lea then flew to the York Sound region of Baffin Island, where he conducted research and set up a logistics base for a field school program funded by the New England Consortium for Undergraduate Science Education (NECUSE) and the National Science Foundation. There, he was assisted by another Bowdoin College student. The field school will take place in August 1991 and will include faculty and students from Bowdoin College, Bates College, Mount Holyoke College, Arctic College, and Norwegian Water Resources.

In addition, two Bowdoin anthropology students spent the summer in Nain, Labrador, on a joint Torngasok Cultural Centre-Bowdoin College photograph identification program. They and two Inuit counterparts interviewed Inuit elders and asked them to identify individuals who appear in the Arctic Museum's MacMillan photograph collections. The students were on hand when the Schooner *Bowdoin*, now a sail training vessel owned by the Maine Maritime Academy, visited Nain after a thirty-six-year absence. The students organized a trip on the *Bowdoin* for some of the elders who had traveled on the schooner in their youth. All three of these projects are slated to continue during the 1991 summer season, and the resulting work will be described in next year's report.

Public Outreach

In addition to the exhibitions and associated demonstrations, the Arctic Studies Program sponsored public programs during the spring semester. Of particular note was a lecture by Lawson Brigham, a captain in the U.S. Coast Guard and an expert on the Soviet Union's icebreaker fleet.

Museum volunteers and work-study students continued the tradition of providing tours of the museum for regional school groups. In addition, the curator held biweekly meetings for docents, who conduct the majority of the museum tours.

The Museum Shop's inventory of Arctic-related books remained extensive this year. In addition, the shop maintained a diverse inventory of carvings, baskets, and jewelry produced by native peoples of Canada, Alaska, and the Soviet Union.

Overview

The renovation of the Arctic Museum's main storage space was a major accomplishment in the area of collections preservation. The field work components of the Arctic Studies Program diversified and developed, and talented undergraduates interested in geology and anthropology worked in northern regions alongside their instructors, peers, indigenous peoples, and professionals from a variety of institutions. Arctic Studies personnel participated in national and international planning and research ventures that expanded opportunities for students and increased awareness of the College's Arctic resources. Finally, the museum enjoyed cooperative relations with a number of native groups in Maine, Canada, and Alaska. These projects and associations have continued the long traditions of northern-focused research and education that distinguish Bowdoin in the world of liberal arts colleges.

Respectfully submitted,
Susan A. Kaplan
