Self Study Continues

by Thomas A. Relly

For the past year and a half, Ursinus College had been involved in an extensive evaluation of itself better known as a self-study. Although much publicity was given to this program last year, perhaps it would be beneficial to the student body, particularly the freshmen, if the purpose of self-study was once again explained.

What is self-study? In order to maintain an atmosphere that is in keeping with the changing times and the student's interests, Ursinus has designated three task

force committees for the purpose of recommending changes in school policy to the Campus Planning Group. They are the Task Force on Student Life, the Task Force on Curriculum and the Task Force on Recruitment and Retention.

The Task Force on Student Life is composed of four students elected by the student body, three faculty members, three administration members, one alumni representative and one member of the Board of Directors. The

Homecoming Brings Crowning, Presentations

by Ranelle Petrucelli

Homecoming '78 brought excitement to all corners of the campus last weekend.

The celebration began on Friday with two fraternities, Beta Sigma Lambda and Delta Pi Sigma, holding their dinner dances and continued into Saturday, with its gorgeous weather and numerous activities. Homecoming Day began with a 4-1 win by the soccer team against an alumni soccer squad. The field hockey team also defeated their opponents - Princeton, 4 to 1. The cross country team recorded a dual victory with scores of 20-41

Mary Beth Kramer
Beta Sigma Lambda

against Swarthmore and 16-47 against Kutztown. In first place was sophomore Dave Garner, who set a third course record of 27.18 minutes (see sports). Unfortunately, the football team lost 42-13, but during halftime a lot of exciting things happened.

Mary Beth Kramer, representing Beta Sigma Lambda and escorted by Ron Platt, was crowned Homecoming Queen of 1978. All of the candidates had strong fraternity support.

Also at halftime, the House Decorating prizes were distributed. Continued on page 5

Ursinus News In Brief

Fire Alarm Installations Near Completion

Over the past several weeks more than 100 TC89B Honeywell smoke and fire detectors have been installed in off-campus houses, the Women's Quad and Old Men's Dorm. Maintenance workers will finish this task with the final installations being made in New Men's Dorm next week.

The alarms are designed to detect not only visible smoke, flame, high temperatures and some toxic gases but also invisible and sometimes odorless particles of combustion. The 85-decibel siren will not usually sound from normal cigarette, cigar or pipe smoke unless the smoke is very dense.

ProTheatre To Present "The Good Doctor"

ProTheatre, Ursinus' drama organization, will open its 1978-79 season November 2 with Neil Simon's comedy, "The Good Doctor," in the Bearpit Theatre.

A Broadway hit in 1973 starring Christopher Plummer, "The Good Doctor" will play for three performances at 7:30 p.m. on Thursday, Friday and Saturday, Nov. 2, 3 and 4.

The comedy, under the direction of Dr. Joyce Henry, is an adaptation of nine short stories by Anton Chekhov.

In one of the sketches, "Too Late for Happiness," Ursinus Chancellor Donald L. Helfferich and his wife Anna will join the predominantly student cast to play cameo roles.

Art Exhibit To Open Soon

A collection of watercolor paintings by Dorla Dean Slider, nationally known artist residing in Pottstown, will be exhibited in the Myrin Library, from October 29 to November 22.

Bomberger Tower Razed

Bomberger Hall has taken on a slightly different appearance. The orange bell tower, which is a Collegeville landmark, was removed this week for safety precautions. A check by the maintenance department over the summer revealed a deterioration in the structure of the tower. The weather has caused a general rotting of the wood and a loosening of nails. There was a good possibility that tiles could work free or the entire structure could come crashing down. Lloyd Kershner of Norristown was called in to remove the tower. At the present time the college does not have the finances to replace it.

Bomberger Tower from above

Hockey Ties Nation's Best

Women's National Field Hockey giants Ursinus and West Chester met head-on at Franklin Field October 17 before 3,328 cheering spectators. Defending National Champion West Chester entered the contest with a 9 win, 0 loss record. Ursinus, runner-up to West Chester, displayed a meek 6 win, 4 loss, 2 tie slate.

The West Chester Ramettes, under the coaching of Robin Cash, are known for their awesome defensive prowess and lightning offensive attacks, and are possibly one of the best teams Cash has ever had.

Ursinus coach Adele Boyd, experiencing a rough and tumble

season with her squad, was looking for the right, workable playing combination among her team. The entire first half West Chester completely dominated the game. It was a rare occasion for the ball to enter their half of the field.

Yet, with some outstanding saves by Ursinus Goalie Maryann Lindquist, Ursinus held without permitting a score.

After half-time sessions by both coaches with their respective teams, the tension among players and spectators continued to mount. Regardless of records entering this match, both teams rose to the occasion of a rival

No Tickets At Door

Last night at the weekly USGA meeting, it was announced that there may have recently been violations of the new alcohol policy. It has come to the attention of the USGA and the administration that tickets may have been sold at the door at functions which allowed for the consumption of alcoholic beverages. This is in direct violation of the present policy. If future infractions are detected by the Liquor Control Board, a \$300 fine could result and the College may revoke the newly-enacted policy.

Beginning this weekend, two USGA representatives will be present at all registered parties to ensure that no tickets are being sold once the doors open.

COMMENT...

by Stephen M. Lange

Campus Sunshine To Set?

An important 1977 Student Faculty Administration Relations Committee initiative has been eroded through the lack of cooperation by campus governing bodies.

The initiative, entitled Procedures for Open Meetings, guaranteed that the meetings of co-operating campus committees would be announced and open to the campus community. Further, these groups pledged to publish their minutes conspicuously in campus buildings.

The Ursinus Student Government Association, by vote of its membership, committed itself to the procedures. By doing so it also committed its component committees including SFARC and the campus councils.

Inconsistent Practices

Nevertheless, meetings of the USGA and its committees have not to date been consistently open, announced or described in published minutes. This appears to signal either a lack of good faith, an ignorance of the procedures or carelessness. Even SFARC, which originated the procedures, has been lax in fulfilling their basic aim of opening governance to students and staff.

The slow erosion of committ-

Committee which last spring ment to open meetings has also taken place in committees of the faculty which, as with the USGA, voluntarily committed themselves to the procedures.

Among these is the Dining Hall breached its commitment by holding a closed dinner meeting which was dramatically broken into by former SFARC chairman Lawrence Dalaker and *Grizzly* correspondent and editor Robert J. Brancatelli. The initial Dining Hall Committee meeting of this fall semester was a closed, membership-only meeting. Described as merely "organizational" it may signify a backdown from its former commitment to openness. Minutes of this meeting have not been conspicuously posted.

Significantly, the faculty has set an example of good faith in opening the digest of its meetings to students.

This is not the time for the USGA, its committees or the several committees of the faculty which have student members to retreat from an earlier stance in favor of openness. Indeed, it is only consistent with the progressive spirit of the year to expand access to these groups, rather than retreat from existing standards.

Ravine "Paradise" Revisited

In the last issue of the *Ursinus Grizzly*, staff writer Jennifer Bassett reported that the College has used a campus wooded ravine as a "temporary" dump for rusted trucks, refrigerators and debris.

While College Maintenance Director Howard Shultze terms the problem "temporary" he admits that the area has been used as a dump for "many years." Since the *Grizzly* report, the College has contracted for removal of the debris. It is not clear, however, whether new debris will be dumped there after the current cleanup. It is clear though, that the area may never

be restored to its natural state, as Shultze told *Grizzly* editors that some material will be "stored" there in the future.

It is the *Grizzly's* opinion that College property - including the ravine - represents a legacy as great or greater than the College endowment. This legacy should be safeguarded and the *Grizzly* welcomes maintenance's report that the area will now be cleaned, but we feel that cleaning the area is a half-solution until it is completely reclaimed and a new method of disposal is found.

Additionally, the *Grizzly* will monitor the progress of the announced cleanup for its readers.

The View From Here

by Susan Ambrose

International Terrorism: What Can Be Done

The modern age has not only given us the benefits of technology; it has also plagued us with a wave of international terrorism. As Henry Kissinger, former Secretary of State, put it, "The international community cannot ignore these affronts to civilization; it must not allow them to spread their poison; it has a duty to act vigorously to combat them." But, can the actors within the international community determine a common course of action to combat these affronts to

civilization?

For the past twelve years the delegations to the United Nations have been unable to agree on a common definition of international terrorism. One man's terrorist is often another's "freedom fighter." It is for this reason that countries have been frustrated in various efforts to achieve comprehensive multilateral agreement on effective international proscription of terrorist acts, and appropriate sanctions.

In the past twelve years a total

of seven international conventions have been adopted that deal with some aspect of the terrorism problem.

International Conventions

The six conventions preceding Bonn (July 1978) — The Tokyo, the Hague, the Montreal, the OAS, the European Convention on the Suppression of Terrorism, and the UN Convention Against the Taking of Hostages — all reflect international concern and

Letters to the Editor

Springsteen Fans....Born To Bum?

accurate extension of rock and roll's original flavor. The spirit of his music and lyrics is much more satisfying than most of today's rock.

—Colin Gillis

I am writing in response to Brian Barlow's article "Springsteen and Dylan: Poet Laureates or Veritable Zeroes?" Although Springsteen is not a "Poet Laureate," he is definitely not a veritable zero. Mr. Barlow seems to be disturbed by his brother's insistence that Springsteen is the "saviour of rock n' roll" and by Bruce's "mass media coverage."

Is it "mass media coverage" to be advertised from North Jersey to South Jersey and parts of eastern Pennsylvania? Of course not. Springsteen is still a veritable unknown on the west coast despite his appearance on the covers of *Time* and *Newsweek* in 1975.

Mr. Barlow then goes on to say "In this article I'll not attack his talent or lack thereof, just the

Continued on page 3

Community Feedback

I would like to commend the editors and the staff of the new *Grizzly* for really becoming a new newspaper. Since I have been in the Ursinus area I have been extremely aware of the college paper and its importance in school communications. It has been a battleground for many important issues as well as an important public informant.

Recently, I have noticed that the writing has become better and the sports section up-to-date. There are more pictures and a wider area of coverage, and for this, the entire staff is to be commended.

As editor of my college paper several years ago, I realize the time and dedication you have to put forth to publish a paper every week in addition to your regular studies. Keep up the good work, and do not stop there.

—J. H. White

We Must Look Back

Barlow fails to find any significant themes in Springsteen's lyrics. I believe we must look back and remember what original rock and roll meant. Unlike today's tame pop sound, original rock and roll was a vehicle of youth; a primal, raw force which expressed youth's feelings of rebellion, frustration and disillusionment. I think Springsteen captures what any but the most docile young person often experiences. The feeling of escape in "Thunder Road" is very vivid to me, and the spirit of struggle in "Adam Raised A Cain" seems all too familiar. If Barlow does not identify with Springsteen's emotions, perhaps he has never lived with any anxieties or doubts.

Is Springsteen the saviour of rock? No. But I feel he is an

1. All letters to the editor will be printed as received provided they do not contain obscenity or libel.
2. Letters must contain less than 400 words.
3. In order to avoid censorship, no letter will be read by anyone other than the editorial staff prior to printing and letters will be edited only for clarity and good taste.
4. Letters to the editor must be accompanied by the author's name. We feel that this will contribute to the effectiveness of the comment.

Portrait of the Professor: Randy Davidson

by Mark B. Woodland

Who sings in the Lutheran Church Choir, is vice-president of local PTA-like organization, is involved with local soccer league and bakes bread? Randy Davidson is his name and raquetball is his game.

Originally from Medfield, Massachusetts, a small town outside of Boston, Mr. Davidson has covered quite a bit of territory before winding up in good ol' Collegeville. Davidson was always interested in sports and attended a co-op program at Northeastern University where he graduated in 1966 with a B.S. in Physical Education. During these five years at Northeastern he spent a year and a half working with the mentally retarded, a year as a Program Director for a local YMCA, (where he first became interested in swimming) a year as a teaching intern in a small town in upstate New York and finally in his fifth year, he experienced student teaching.

After graduation he received a federal fellowship to continue his education at Springfield College in a two-year masters program. He received his masters and CHES in Health and Physical Education.

WVIT Swim Coach

During this time, Mr. Davidson became good friends with a Mr. Red Sylvia, who is known for his national and international contributions to aquatics and also as a very competitive coach. Mr. Sylvia gave Davidson a lead about a job with West Virginia Institute of Technology as a swim coach and physical education teacher. While at WVIT, he had the title of Natorium Director and certainly fulfilled this title by building a decent swim team practically from scratch. He also served on the disciplinary committee and represented WVIT on the State Broadcasting Advisory Committee.

After four years at WVIT (which is in a small town outside of Charleston) he felt he had had enough of the mountains surrounding him. This claustrophobic feeling, along with his strong distaste for the smog and

bad water of the town where he lived, made him look elsewhere. Again, Red Sylvia aided and suggested Ursinus College to him. Davidson, knowing of all the war protests of the big universities of the north and of the radical attitude of the north, decided to let his hair grow to give a "hip" impression for his interview. He was mildly surprised when he came to visit Ursinus in the spring and found that his hair was not only longer than most of the faculty but also longer than most of the students. He was also surprised to see a line of girls in the quad doing a kickline preparing for Springfest, totally oblivious to the radical anti-war movements present at other schools at this time.

Impressed with this conservative manner, Mr. Davidson started teaching at Ursinus in 1972 when he first initiated the men's swim team. The first team consisted of twelve students, only six of them knew how to swim. The first year they were three and one, second, six and two, and they have progressed ever since. In his final year as swim coach,

the team placed third in the Mid-Atlantic Conference and had one swimmer place first in the MAC. Davidson humbly admits that he doesn't feel records are that important, just so you are on the winning side!

Pillsbury Dough Boy

Feeling certain that this is where he wants to be, he has built a home in Limerick where he lives with his wife, two children, two sheep dogs, two goats and a hamster. He enjoys gardening, music, sports and camping. Baking bread is one of his great interests; he says the kneading relieves much frustration, and for this reason is sometimes nicknamed the Pillsbury Dough Boy. Raquetball is what he is really into now and he enthusiastically enjoys his sport.

Randy Davidson is very concerned with the students and enjoyed coaching for the reason that as a coach he could be both a counselor and a friend. Now as the Department Head and in an administrative position he still tries to maintain this relationship with his students.

Springsteen Fans....

Continued from page 2

artificial image that has fostered my anti-Bruce sentiment." Brian, are you suffering from an inferiority complex? You must analyze the man's talent not his media coverage.

Springsteen's talent is undeniable. I live in Maryland where Springsteen is still a semi-unknown and I first listened to his music rather objectively. My first impression was favorable and I

"Springsteen is a good man to have around."

think one can see he is a folk-singer usually restricted to singing about what he knows best - the area around Asbury Park. He was one of the first vocalists I had heard in the mid-1970's whose lyrics did not comprise of inspiring lines as "let's dance, love, boogie-boogie."

Brian also mentions Springsteen's appearance on the cover of *Time* magazine. Several weeks after the issue came out, a man wrote *Time* and said that although Springsteen is "hot" now, no one will remember him a year from now. Well obviously the man was wrong. We do remember Springsteen and we will continue to. We remember him because of his talent and showmanship and not because of his "mass media coverage."

I must agree with Barlow when he says Springsteen is not the "saviour of rock n' roll," but no one said he was except for Barlow's brother (who is Barlow's brother anyhow?). No artist can be a saviour with only four albums to sample his talents from. But in this age of top-forty, disco and other forms of regressive rock, Springsteen is a good man to have around.

Brian, you just happen to be one of the few people in this country that lives in the area of Springsteen's hometown and you interpret New Jersey's support of the "hometown boy" into mass media coverage. Springsteen sells over a million records nationwide because of his talent and not his media coverage or "lack thereof."

Sincerely,
Jay Kolls

Continued from page 2

Appel as manager in favor of Jon Landau from *Rolling Stone* magazine. He really can't control how record Stones will blitz the public with his new releases. And to satisfy the demands of his followers, he's got to put out albums evidenced by the outcry after two years without a Springsteen album. After *Born to Run*'s release, *Darkness at the Edge of Town* was his answer, but as all Boss fans agree, Springsteen on record does not do justice to Springsteen on stage. They are really two different entities, many of the songs changed for the better during his concerts.

And speaking of his songs, they certainly do talk about real people and real places in Bruce's life. There is a Jungland, a Rosalita, a Madam Marie's, a 57th Street, a South Beach Drag and I could go on and on. They are not feelings that were made up, but life and times that Bruce played a part in. Simply because Mr. Barlow has never been "out on the beach in a mist" is no basis for disclaiming that Bruce ever was.

"There are 'studio groups' and 'concert groups.' Bruce is the latter."

And after all the "hype" has worn down, Springsteen has carried the same diehard signs for over five years. He's an artist that never will be known nationally and doesn't want to be, for that matter. The rumor that the Bottom Line Concert was stacked in his favor is a cheap shot by those so-called "reliable, inside sources." Bruce has never had trouble selling out, and has sold out many arenas in record time. His recent summer tour was an incredible success, and the fans were the same ones that have been with him from the start. He's not a fad, his success hasn't been fabricated — He's made it without the help of mass marketing and still electrifies audiences in 1978 as he did in 1974.

I would suggest that any skeptics go see him in action, and capture the real Bruce Springsteen. Reviewers have had nothing but praise for his incredible performances. Boss fans or not, he's left them breathless, something none of his albums can communicate. There are "studio groups" and "concert groups." Bruce is the latter.

Bruce Springsteen and the E Street Band live up to a banner hanging from the Spectrum rafters: "Elvis may be the King of Rock 'n Roll, but Bruce is the Crown Prince!"

—Keith Wright

Life On These American Campuses

Mom, it isn't that bad—it's only 19 points below the class average.

What!!!!

Well college is hard, and I didn't want to be a cardiovascular specialist anyway.

What will everyone at church say?

Oh, that's OK. I won't go any more.

You're not getting off that easily. What seems to be the problem?

It's the adjustment.

What adjustment, being on your own making your own decisions?

No, my roommate smokes pot alot.

So what does that have to do with you?

I get high from the fumes.

Where are the deans when you need them?

There's only three deans for 500 men.

You could go to the library.

But then, I might miss a good TV show.

You mean to tell me that we're paying \$6,000.00 for you to watch TV.

Don't look at it that way, I appreciate your cooking much more.

It took a college education to tell you I'm a good cook? You can't be as smart as I thought you were.

But mom, look at the source.

Hey, don't get wise.

Are you trying to tell me not to study?

Don't ask for my advice any more, by the way, did you know it was my birthday today?

Of course I did, that's why I called.

Then why didn't you wish me happy birthday?

You never gave me a chance.

I still love you anyway, now you

Springsteen & Dylan: Poet Laureates or Veritable Zeros?

by Brian Barlow

(At a party last weekend, I received abuse from people for hardly mentioning Bob Dylan in my last article. I invite those students to re-read the third paragraph of that story. Today, I present "part two.")

In last month's Stereo Review, critic Noel Coppage shared his emotions for Bob Dylan's current effort (a term I use loosely), *Street-Legal*. That review showed that Mr. Coppage, like millions of other Americans, has been brainwashed by the "Dylan mystique." Like Springsteen, Dylan's success stems from media hype courtesy of *Time*, the magazine with as much redeeming social value as Reading beer.

Bob Greene accurately summed up Dylan's popularity. Our country was undergoing social changes in the 1960's and Mr. Greene believes that *Time* decided that there must be a poet, a prophet and a genius leading the way. "The editors of *Time* decided that the poet, prophet and genius was Bob Dylan. This must have come as a shock to Dylan, who couldn't even sing," wrote Greene.

"The first time I played *Street-Legal*, I awoke to the sound of the stylus stuck in the final groove."

Knowing he could not survive in the music business on talent alone, Dylan took advantage of this new image. People like Joan Baez and Peter, Paul and Mary recorded Bob's compositions, and the country began to believe *Time*. Because he was not comfortable as a center of attention, Dylan became a recluse similar to Howard Hughes. More people began believing in the mystique.

Vin Scelsa believes that *Street-Legal* sets social norms for people. The first time I put the album on my turntable, I awoke to the sound of the stylus stuck in the final groove. Maybe sleeping is a social norm.

In his review of *Street-Legal*, Coppage attacks those that question Dylan's abilities. Although conceding that Bob isn't a good

musician or singer, Noel labels his music "art." This must mean that paint spilled on a drop cloth is art. "Dylan's vocals though argue that it's better to be right than technically wonderful," claims Coppage. If this is the case, why did it take remakes by Joan Baez to get him started?

A DJ at WMMR saw Dylan's latest incarnation at his recent Spectrum concert as that of a "sexy rock and roller." He said that there have been many Dylan's through the years. Bob can't excel at any style thus far so he keeps trying to find one at which he can.

What has carried Dylan through the years is his ability to impress people with folk songs that Bob Greene labeled "nursery rhymes." I've often asked intense Dylanites what a particular song means and they give me a five-minute dissertation on how

different songs have different meanings. If his words are so poetically profound, why can't someone tap some of these esoteric concepts?

"Bob can't excel at any style thus far so he keeps trying to find one at which he can."

The 1975 Rolling Thunder Revue with Joan Baez, Ramblin' Jack Elliot and Mick Ronson really influenced a lot of people. When he released the Rubin Carter saga, some of the students at my high school put "Free the Hurricane" patches on the back of their army jackets. Maybe that was yet another form of "art."

Art is a Math is an Art is a Math...

by Jennifer Bassett

Ursinus' latest forum speaker was the versatile Dr. Doris J. Schattschneider -- artist, professor, editor and foremost, a mathematician.

For the larger part of the October 24 forum, Schattschneider discussed and presented slides of M. C. Escher's fascinating and mathematically precise designs of interlocking figures that are often symbolic of the natural elements: land, water and sky. Schattschneider then went on to explain the geometric technicalities that make such works of art possible and their applications to three dimensional surfaces -- namely the kaleidocycle -- her own invention of

rotating geometric forms.

Her presentation was thoroughly researched and the slides were excellent. Even the mathematical explanations -- those of Euclidean, transformational and projective geometry -- were relatively easy to grasp.

Schattschneider is associate editor of *Mathematics Magazine* and co-author of *M. C. Escher Kaleidocycles*, which was written with her knowledge of Escher's art combined with innovations using kaleidocycles.

Schattschneider received her Ph.D. from Yale University and is presently an associate professor of mathematics at Moravian College.

Escher Takes On New Dimension

by Jonathan Cowie

People reported sighting lizards, devils, angels and fish on the Wismer Auditorium movie screen on October 24. Luckily, these were slides of the basic motifs used by M. C. Escher in his revolutionary form of art called "tesselations." The forum leader, Dr. Schattschneider, kindly brought various slides and objects concerning Escher and his

most of the figures being lizards. Through the work of Dr. Schattschneider and a number of associates, many of Escher's two dimensional lithographs have been turned into solid, three dimensional polyhedrons.

The number of sides that the polyhedron would have depends upon the geometric lattice originally used in the picture. Shapes

work. She told those at the forum how his work has evolved since his death in 1972.

Dr. Schattschneider showed how Escher's work has literally taken on another dimension. Previously, some of Escher's works were combinations of interlocking figures that were arranged in lattices to fill a flat plane. These figures vary from fish to birds, and from devils to angels, with

worked from basic tetrahedrons to complex twenty-or-more sided forms. The original patterns were also developed into a different area. Now, not only were polyhedrons developed, but intricate doughnut shaped forms were designed that would be able to turn in in a rotating fashion creating dynamic and endless images.

ted with Clamer Hall coming in first, Todd Hall second and South Hall third. Prizes of \$100, \$60 and \$40 respectively were awarded to the off-campus women houses.

Sue Kelly won the Linda McIntyre Award for proficiency and perseverance in collegiate athletics, for demonstrating initiative in financing her education and for overall cooperation and unselfishness at Ursinus. Jack Harvey was

presented with the Bruins Club Award for outstanding service to the college community.

At the end of the game, the Walker Memorial Trophy was also presented to the outstanding player in the Homecoming game - Leo Raffle. It is annually awarded by Mrs. Joseph Dempsey in memory of her son, captain of the team in 1954, who died in service during the Korean War.

Saturday night highlighted the

weekend as four fraternities (Alpha Phi Epsilon, Delta Mu Sigma, Sigma Rho Lambda, Zeta Chi) held their dinner dances.

Commencement Speaker Announced

The faculty voted to invite William Smith, Associate Conductor of the Philadelphia Orchestra, to deliver the commencement address and receive an honorary doctorate at the May graduation of the Ursinus College class of 1979, at its October 4 meeting.

Smith received his bachelor's and master's degrees from the University of Pennsylvania and an honorary doctorate from the Philadelphia College of the Performing Arts. He has been associated with the Philadelphia Orchestra since 1952 and has maintained continuing relationships with the Curtis Institute Orchestra and the Trenton Orchestra among others.

hijackers. This course of action, if it works, would go well beyond the various UN conventions which condemn but carry no penalties.

From this nucleus of seven, other democracies around the world could join this union and truly have an impact on terrorist crimes.

Only through a union of the democratic peoples, who can come to agreements and take actions together, will the world be rid of the heinous acts of terrorism which plague us today.

Hockey Draw

Continued from page 1
match-up and hockey was at its

Beth Beglin finally broke through the Ursinus defense after 6 minutes into the second half to score for West Chester.

Could Ursinus retaliate, or would this be the push the opposition needed to initiate additional scoring?

Ursinus countered with well-coordinated attacks. The team appeared awakened to the hard fact that a move had to occur immediately.

Dot Crosson, playing her second game as varsity for Ursinus, rocketed a perfect shot past West Chester's Rebecca Foulds for a goal. The drive concluding only three minutes after West Chester's.

Even Match

Neither team gained advantage of play for the remainder of the contest. Ursinus pulling itself together on sheer desire, and a better skilled West Chester attempting to offset and find fault in its opposition's formation.

The final seconds ticked away and found a tie game - West

Chester 1, Ursinus 1.

West Chester Coach, Robin Cash, dismayed at the outcome, felt her "offensive line became stale." Cash felt, "If Ursinus can't win on skill, they scrap and hustle until a score does result."

Adele Boyd was pleased with her team's performance after a grinding week of ceaseless play. "We've been hungry all season, but just couldn't score. After the J.V. beat West Chester this afternoon 1-0 to remain undefeated, I think the Varsity regained extra incentive for the match."

Minor Injuries

The game however, was not without its injuries. Sophomore Laurie Holmes was hit in the face with a stick and was down on the field for 2 minutes. But the tough Ursinusian got back up and continued to play the rest of the game.

Defense was outstanding with Lindquist, Beth Barr and Jan Zanger playing well. Zanger's important defense move of jumping and playing goalie saved the game.

Middle States Self-Studies

Continued from page 1

student members are Vickie Spang, Paul Brogan, Britta Mattson and Dave Evans. This committee has been extremely active since its start last year. Some of its more significant recommendations to the Campus Planning Group have been the changes in the school drinking policy, and also dormitory visitation hours.

Curriculum Task Force

The Task Force on Curriculum is made up of various members of the faculty and administration who are presently studying academic policy at Ursinus. This committee will make recommendations to the Academic Council designed to make the curriculum more vigorous and flexible. Career orientation is also one of this committee's objectives, whereby they will study the potential of job opportunities for graduates.

Focusing its observations on applications and enrollment, the Task Force on Recruitment and Retention has already accomplished its task and its recom-

mendations are on file in the library. This three-part report deals with ways for Ursinus to continue to attract a constant number of applicants with above-average academic ability, as well as suggestions for maintaining a steady enrollment. This committee, while active, was composed of various members of the staff and administration at Ursinus.

Where do these task force committees stand at the present time? Inasmuch as it is still relatively early in the school year, the committees are still in the process of analyzing Ursinus College and eventually making recommendations.

Some of the more prominent issues concerning the Student Life Task Force at this time are health services, the book store, weekend activities, religious life and the athletic program. The Task Force on Curriculum is currently very crucial in that it will soon make its recommendations to the Academic Council.

The Recruitment and Retention Committee, having already made its recommendations, has accomplished its task.

On-Going Process

When will all of these recommendations be completed and made available? This self-study at Ursinus College is an on-going process that will occur at least through the end of this school year. However, as already mentioned, the Curriculum Task Force is very near making its recommendations. The progress of each of these active task force committees will be presented throughout the year, thereby making the student body aware of the events of self-study.

President Richter has expressed interest in scheduling an open meeting with the freshman class so that the subject of self-study can be discussed. This meeting, probably to be held sometime in November, will be an opportunity for freshmen and other interested students to learn more about this important function in Ursinus life.

Options To Terrorism

Continued from page 2

to the conventions. Secondly, the conventions lack teeth. All make the extradition of prosecution of terrorists subject to discretionary escape clauses, and none provide for punitive sanctions against states that simply refuse to comply at all.

Other obstacles which have blocked more effective international action are formidable. They include controversy over "justifiable" vs. "illegal" political violence, and widespread resistance to such infringement of national sovereignty as would be implied in any inflexible curtailment of the right to grant political asylum. Equally important, however, they have also included an understandable reluctance on the part of many nations otherwise ill-disposed toward terrorist activity to commit themselves to any course of action that might either invite direct terrorist retribution or provoke the application of

sanctions by states that happen to be sympathetic to the terrorists' cause.

The development and implementation of more effective measures to deter international terrorism has and will continue to be impeded by differing moral perspectives, a resistance to infringement of a nation's sovereignty, and the reluctance of states to commit themselves to any action that may invite retribution.

Bonn - A Beginning

The unexpected agreement of anti-terrorism reached at the recent Bonn Summit Meeting is a beginning. The seven participating democracies — Britain, Canada, France, West Germany, Italy, Japan and the United States — agreed to cut off commercial airline service to or from any country which harbors airplane

Plea From The Press

by Jim Wilson

The Grizzly is going through many changes as you have hopefully realized. However, every week we are pressured as to whether we can write enough copy to fill our paper. No one on the staff is here for the sole purpose of turning out articles eight days a week. We have plenty of classes to contend with in addition to investigating stories. So some of our articles are done on the spur of the moment. For this reason, a lot of us have to go out at the last moment and search for something to fill our pages (like this article). There are enough occurrences happening around here to write about that we are not made aware of. That is where you can help.

If something happens that you want to tell us about, like a medical breakthrough in your lab, someone neglecting their duties, new changes on the campus, a grain party or someone's first experience, write about it, and we will probably print it as long as it fits our standards.

Compacts and Subcompacts

GM: Looking Good For '79

(first in four part series)

by Mark Angelo

With the need to conserve gas and the price of gas itself, small cars are definitely in demand. And with Congress pressuring Detroit with gas mileage and emission standards, it looks very pathetic and foggy for the survival of the big American car. GM has introduced another wave of small cars for '79.

Chevrolet starts off with the leading U.S. compact, the Chevette. This year Chevette has many more standard options with 10½ more horsepower in one available engine, 1.6 litre. The major change is the price which is less than last year.

Monza gets its changes mechanically. It uses a Pontiac aluminum manifold and a new 2-bbl carburetor. Two V-6 options are available with 4- or 5-speed manual transmissions or an automatic. There is also a 305 V-8 option.

Pontiac's economy machine is the Sunbird. The car is a replica of last year with minor changes to

the grille. It is offered in a coupe, sport coupe, sport hatchback, or wagon series. Engine availabilities are the 151 in line 4-cylinder, the 231 V-6, or the 305 V-8.

Oldsmobile continues with its Starfire. It comes in two models: Starfire and Starfire SX. Engine sizes for this year are the 2.5 litre 4-cylinder, a V-6 and a 305 V-8. It gets only minor trim changes. A Starfire "Firenze" package is the performance option including better shocks and increased handling.

Buick enters the competition with the Skyhawk. Two coupe models are offered: Skyhawk and Skyhawk S. The S model has a blackout paint option for the grille and taillights. It also includes front and rear spoilers and special suspension. Surprisingly, Buick offers no 4-cylinder motor; the V-6 with 4- or 5-speed manual or 3-speed automatic transmission is the only powerplant.

Next week: intermediates, Camaro, Firebirds and Corvettes.

Swarthmore Chases Bears

Continued from page 8

the game, injured, after a thirteen yard run on Ursinus' first possession.

Freshman safety Nick Sabia set up Ursinus' first touchdown of the day when he intercepted a Swarthmore pass and returned the ball seventeen yards to the fifty. Craig Walck sprinted 32 yards and seven yards on two consecutive plays, and Jeff Bright burst through on an eight-yard run for the TD a play later. Walck made the extra point to put Ursinus ahead, 7-0.

Bears Hit Rock

The Bears luck was short-lived, though. Swarthmore took the kickoff and, helped by a defensive pass interference penalty, ended up on the Ursinus 15-yard line in a hurry. The Garnets scored two plays later when John Dugan, who rushed for 66 yards on the day, plunged in from the two.

Swarthmore scored on their next possession early in the second quarter after they foiled an Ursinus punt attempt which Walck aborted due to a bad snap. The Garnets hadn't had enough yet, and scored another TD on their next possession after picking off a Mark Ferrari pass and returning it 21 yards to the Ursinus 35. As if luck had run out, the Bears fumbled on the kickoff and Swarthmore recovered. Our defense managed a stand this time, forcing Swarthmore to punt. The punt, however, was well executed and was downed on the Ursinus one-yard line.

An attempt to get out of danger was foiled when Craig Walck lost the handle a few plays later. Swarthmore recovered on our fifteen and scored in rapid succession to make the score 28-7 at the half.

(Photo by Gary Aaronson)

Leo Raffle, upon acceptance of Walker Trophy

Swarthmore scored on their first two possessions in the third quarter to make the score 42-7. Clay Ebling finally broke the trend when he forced a fumble late in the third quarter. Walt Peppelman recovered the fumble for Ursinus to set up our final score of the day. Starting from the Garnet 43, Bright and Walck moved the ball downfield to the Swarthmore four, where Bright plunged in for number two. The pass attempt for the two-point conversion was incomplete, and the score remained 42-13 to the end of the game.

Individual Performances

Freshman linebacker Mike Milligan led the defensive efforts for the day with 9 unassisted and 3 assisted tackles. Senior defensive end John Groom was close behind with a combined total of ten tackles. Sophomore linebacker Walt Peppelman added a total of six tackles and a fumble recovery to his stats, doing his usual fine job on

defense. Clay Ebling contributed a total of nine tackles, while Nick Sabia chalked up six tackles and an interception for the day. Sophomore linebacker Leo Raffle, with a total of nine tackles and a fumble recovery, was honored as MVP with the presentation of the 1978 Kenneth Walker Memorial Trophy at the end of the game. Craig Walck added a 73-yard punt to his 73 yards on the ground, which is certainly an admirable coincidence.

The team will face Dickinson in their last home game of the season on November 4.

Soccer Splits: 2-2

by Ray Dougherty

Coming off five straight victories, the soccer team suffered a rather disappointing week. Although they won two games, the Bears lost two heartbreakers (1-0) to Haverford and Muhlenburg. Both games saw a superior Ursinus team outplay their opponents but fail to put the ball in the net.

On October 20, the Bears gained back some ground by defeating Swarthmore 1-0. Brain Barlow scored the lone goal on an assist from Dave Kennedy.

On Homecoming Day, the Bears defeated the Alumni in the annual tilt by a 5-1 margin. The Bears scored two goals early in the game and coasted to victory. Jeff Jewitt scored two goals, while Chris Good, Fred Ferrari and Tom Esposito had one each.

Bears of "Yesteryear"

The Bears of "Yesteryear" were led by such names as former co-captain Tom Ruth, Jeff Miller, Bill Weiss, and Ted Harvey. Despite the lopsided score, everyone involved seemed to have a pleasant afternoon.

With three games remaining the Bears have a 7-8 record. Of the final three games, two of them are home. This Saturday the Bears play Widener at 2:00 and on November 4 they host Moravian.

Sports Profile: Don Paolicelli

by Wesley Emmons

Don Paolicelli, 5'8", 190 lbs., is one of nine seniors on the Ursinus football team. He's been a starting guard for four years and is now only three weeks from the close of his final season as an active player.

Although Paolicelli has played hard and well, he also seems to have enjoyed his four year stay at Ursinus. He's a political science major, with definite plans for business. His outlook, he explained, appears optimistic, with several interviews arranged for the near future.

I asked him how does he think his education has influenced his job opportunities. He said, "I really don't think it's prepared me for a specific job. But, as far as background information, I think it's helped me. You know, it's a liberal arts college -- it's not like I'm going into the medical profession or something."

People The Best Part

Paolicelli explained that the people have been the best part of Ursinus. The thing he liked the least, he said, has been "until this year, the strictness, the rules, the old-fashionedness -- I don't like that at all. I never liked it and when the change was made it was definitely a change for the better. The alcohol policy, the dorm rules, the disciplinary rules -- those things."

Paolicelli keeps active. Not only is he co-captain of the football team (with Clay Ebling), but he also runs the intramural hockey teams and referees hockey and umpires softball games. He is also the president of Zeta Chi. When asked about ZX, he said that most of the bad press was due to the frat's reputation. "It carries through the years," he explained.

In response to a question about their novel dorm cleanings, he added, "Yeah, we're trying to help the school, but we're getting something out of it, too. We're getting monetary gain out of it. It's good for us, it's good for the school. Simple as that. The bad reputation doesn't bother me at all. It never has -- it's part of

Don Paolicelli

being a Zetan. For as long as I can remember, ever since Fircroft, when we lived up there. We never used to bother anybody because we were all off campus. When they put us back on campus, they had to expect some sort of clash, because we're different. We go about things differently."

When asked about the football team and the number of injured players, he seemed unfazed. "I just think it's something that's happened. I don't think it's due to any particular thing. It's not due to a lack of physical training -- that's not it because physical training is what we stress. It's just . . . well, you can see it happen to all kinds of teams -- in the pros, whatever. It's like a cycle. It happens to all teams."

Broad Sports Background

Paolicelli's been active in sports for a long time. At Raritan High School in Hazlet, N.J. he lettered for three years in football and started all four years. He also lettered twice in wrestling and three times in baseball. He's played both ways as a guard in high school and he was the captain in his senior year. He plays no other intercollegiate sports, but then one must remember his sports-related activities.

Paolicelli's outlook for next year's team is bright. He mentions that there's only nine seniors leaving this year, and that's a void that will readily be filled by the large and young team.

J.V.'s Romp To Win

by Ken Rider

Freshman Roger Del Giorno has been having a unique experience in his initial college cross country season here at Ursinus. Even though he has been training fairly regularly since August 23 when the Bears returned for camp, Del Giorno ran his first meet on October 18, nearly two months later! A series of injuries, which included a muscle pull, a dog bite and a recurring colon problem have kept Del Giorno sidelined for much of the '78 season.

Last Wednesday, Del Giorno finally got to compete in a meet against Northeastern Christian Junior College, and he made up for his lost time by capturing first as Ursinus knocked off the visitors, 15-40. Freshman Ed Herd, also struggling with injuries, placed second, with senior Tom Isban finishing third. Sophomore Harry Dochelli and frosh John Siergiej tied for fourth. Persistent knee pains forced senior Steve "Disco" Payton to drop out of race after two miles.

Thin Clads Receive Treat

by Ken Rider

On Saturday, October 22, the Ursinus cross country squad received a special treat. Not only did the Bears get to compete on their home course (for only the second home meet this season), but they also finished on the track in front of a capacity Homecoming crowd. The harriers responded to the incentives, much to the delight of the partisan fans, by running Swarthmore and Kutztown State into the ground, 21-40 and 16-43, respectively. When the cheering finally subsided, Ursinus had two more victories to its credit and owned an impressive 10-1 record. The crowd support proved to be a major factor in turning two potentially close meets into routs.

Front-running sophomores Dave Garner and Ron Shaiko provided the one-two punch once again for Ursinus. Garner's winning time of 27:18 snapped the old five-mile course record by

Sophomore Dave Garner upon completion of record-setting race.

nine seconds and was his third course record in a row. Timed in 27:28, Shaiko missed equalling the former course standard by a

mere second. The two sophs agreed, after the race, that the meet was a good tune-up for MAC's and an opportunity to run well in front of the home crowd.

Solid Performances

Also spurred on by the Homecoming crowd were tri-captains Keith Kemper, Chris Duvally and Joe Figurelli. Competing in their final home meet, Kemper and Duvally finished eighth and twelfth to cap four years of solid performances for Ursinus. Former course record holder Joe Figurelli appeared to be rounding into form for the conference championships, finishing fourth.

With the MAC's a week away on November 4, the Bears appear ready to make a serious bid for the conference crown. Tomorrow's meet with Albright and Moravian is the team's final preparation before their most rigid test at MAC's.

Swarthmore Superior In Homecoming Game

by John O'Neill

Last Saturday the football team dropped this year's Homecoming game to an overwhelming Swarthmore squad, 42-13. Their ground game overpowered the Ursinus defense consistently with three of their backs running for over fifty yards each. On the positive side however, the offense did manage to produce 141 total yards. Craig Walck, at tailback, rushed for 73 yards to lead the team in rushing again this week. Freshman Jeff Bright rendered 42 hard-fought yards on the ground, caught two passes for twenty yards and scored two touchdowns in his varsity debut at the fullback position. Freshman quarterback Mark Ferrari completed three of nine passes for thirty yards, which included a ten-yard reception by senior tight end, Jeff Carlow. Ferreri replaced quarterback Dave Dougherty, who left

Craig Walck (#10) makes an excellent block, but QB Dave Dougherty's pass gets blocked by an improved Swarthmore team.

Photo by Dave Darab

Continued on page 7

Hockey Returns Home

Variety in score results does not sit well with Ursinus field hockey coach Adele Boyd. This past week her team went through a grueling schedule of five games in seven days. New England colleges and universities were the first challengers of the team on tour.

Ursinus opened against Southern Connecticut and won by a 2-0 score. The next day Yale overtook Ursinus with a shutout score of 1-0. In an attempt to salvage another victory, the Ursinus women were only capable of rendering a stalemate against Springfield 1-1.

After arriving home at 1:30 Tuesday morning, the team mem-

bers caught a few winks, went to class and departed for University of Penn at 5 o'clock. The team trailed almost the entire game, until Gina Buggy (Norristown) tied the score for Ursinus at 1:30 remaining. A tired squad just squeaked out a victory in the last two seconds of the game on a goal by Laura Haig.

Laurie Holmes packed Ursinus to a 4-1 victory over a visiting Princeton team on Homecoming day with two goals.

Ursinus was leading at half-time on Holmes' goals with assists from Trish DelFemine and Laura Haig. Dot Crosson smacked in the last goal for Ursinus.
