THE GROSSLY

“NOTHING STRAIGHT BUT THE DATE”

FRIDAY, APRIL 18, 1980

“A Cosmic Intruder . . .”

Skylab Debris Hits Campus

by Ambrose

A sleepy Ursinus campus was the astonished recipient last week of two large hunks of scrap iron which fell in separate locations.

According to local space officials, the metal fragments are

remnants of the last Skylab craft that orbited the earth. One NASA spokesman commented, “Most of us here had thought that Skylab completely disintegrated and was strewn across Australia and the Indian Ocean last July. Apparently part of the space vehicle remained in orbit and only last week fell to earth.”

The first piece to hit was roughly 30 feet long and eight feet high and consisted of four or five smaller pieces that were irregularly fused together when the craft broke up. The rapid oxidation that occurred upon reentry was the cause of the thick coat of rust encrusting the cosmic intruder. Strangely enough, the

other fragment landed upright in front of the library.

Stated President Ricky P. Ricker, “Golly, we’re lucky as heck that nobody was bonked on the head by one of those things. I’ll have to send out a campus memo to warn everybody or thank everybody or something.”

One administrator was overheard saying that the scrap metal in front of Myrin looks a little like some sort of modern abstract sculpture due to its oddly symmetrical configuration. “But that warped I-beam next to Wismer is a damned eyesore.”

Removal of the debris will take place this weekend at the expense of the U. S. government.

The purpose of this picture is to fill in space on the front page. It has no meaning and bears no significance to the rest of this newspaper.

Frat Sponsors Marathon

Brothers of the Sigma Pi Chi Fraternity are sponsoring their first annual “Coast-to-Coast Drag Marathon,” in an effort to raise money for the reconstruction of Bomberger Tower. A team of ten brothers will attempt to walk across the United States dragging Phi Omega Kappa President Rhonda Stone by the neck. The group started their trek on Monday from the steps of Bomberger Hall, and are now estimated to be in the Pittsburgh area. Their journey will carry them through 17 states.

The administration has expressed that it is not financially feasible to replace the tower at this time (mainly due to a lack of funds). This caused a great stir throughout the college community, and many students were very disheartened by the decision. Many organizations have been trying to raise money, but none have been too successful. Thus the Drag Marathon. The idea was that of Sig Pi President Bob Williams. “Ever since the tower was taken down,” claims Williams, “there has been an emotional void in the hearts of all students. That tower is a symbol of what Ursinus is all about. To be without it is to be without the soul of the campus.”

Originally, Sig Pi was going to sponsor a volleyball marathon along with Phi Omega Kappa Sorority, but Phi O’s President Rhonda Stone was not convinced that it would be successful: “Volleyball Marathons are old, and don’t tend to raise money anymore. What we needed was a fresh new approach to fund raisers, so that we could convince people across the country just how determined we are. We must show people how important Bomberger Tower is to us.” Stone jumped at the opportunity to be the dragee, claiming it as “an honor to repay the college for all it has done for me, and to get our

lower back.” The marathoners hope to raise \$1,000,000.00. At present, they have raised approximately \$200,000 — an incredible sum. This does not include about

(Continued on Page 5)

Ayatollah Invades Library

In a shocking political move, five econ fanatics under the supervision of Ayatollah Greg Khopetti invaded a library study room and kidnapped the curve breakers of Section II’s Macro class.

Hostages were taken and under the direction of the Ayatollah Greg Khopetti, the immediate return of the deposed Shah Pilgram was demanded.

Recently elected President Abolhassan Bandi-Bowers is currently studying the long run effects of this short run variable and was unavailable for comment.

The militants, clad in polyester pants and peter pan work boots and armed with Dornbush and Fisher texts, were heard to shout “Greg Lives” and are considered dangerous.

A press release from the U.C. security council cited comment from President Kurt Waldemeyer “ . . . Ahhhhhh Yea . . . ” Political expert Jimmy Young-blood Doyle was quoted as saying . . . “Ursinus was a mere marginal stepping stone . . .”

Anticipating possible negotiations, President Symons summoned Pa. Senator Eugene McCarthy, who was working on a contract law bill in Congress, for a briefing with Secretary of State Cyrus Huber. Senator McCarthy is expected to accuse Khopetti of being a Communist and not a Keynesian.

Campus Visitor Is Victim Of Beastly Assault

The parking area behind Paisley Hall was the scene of violent assault on Wednesday, April 16. Shortly after midnight that evening, the boyfriend of an Ursinus female observed a group of squirrels tampering with his car in the parking lot.

Apparently the squirrels were attempting to lift the car off the ground and turn it around. When the man approached the group, he was immediately knocked to the ground and hit behind the ear with a very large nut. After being pummeled by twigs and leaves, the victim observed the rodents leaving the scene in a late model Honda Accord.

Several Collegeville and State police units were immediately summoned and were given a description of the squirrels’ vehicle. Shortly after, the alleged car was spotted outside of Schreiner Hall and it was learned that the squirrels were hiding within the walls of the women’s residence. However, the police were able to trace the car and as of yesterday four of the five squirrels had been apprehended. None of the attackers were Ursinus squirrels but one is an alumnus of the College.

David L. Reject, Asst. Dean of Students, commented, “It is an unfortunate fact that squirrel attacks are on the rise. Let’s all work to halt these incidents.” Letssee Starch, Asst. Dean of Students, stated, “students should not walk alone during the day when the little buggers are out hunting for food and should also stay off of roofs and away from wooded areas.”

Students Mourn Loss Of Bio Dept. Head

A. C. Fallen, the head of Ursinus’ renowned Biology department, is planning to take a leave of absence from Ursinus for the 1980-81 academic year. Despite desperate pleas from both faculty and students alike, Fallen remains firm in his decision. “I love you all,” he said to the thousands who gathered in Helferich at a recent rally held in his honor. Constantly wiping away tears as he spoke, Fallen talked to his cult-like following for over an hour, reminiscing of his many wonderful times at Ursinus.

dents screamed and begged hysterically for him not to leave (I imagine this scene was very similar to what Beatles’ concerts must have been like).

Finally, after over 20 minutes of this screaming and chanting, Fallen walked back onto his stage amid a deafening roar of approval from the crowd. He said he was sorry but Mr. David Randyson told him there was a gym class now and that everyone would have to go. Immediately there was a loud chorus of boos and curses for Randyson. This was

“I’m nothing special . . . I’m just another Joe putting in his eight hours . . .”

“Ursinus holds many joyous memories for me and each one of you will forever hold a special place in my heart,” he shouted above the cheering throng. “If any of you need me for anything, just call. You all have my number. Goodbye.” And then he was gone, almost as quietly as he had arrived on this campus, a short time ago. The cries for his return arose immediately after he had walked off the huge stage he had requested be built for this occasion. Lighters, candles, and burning coke cups flickered throughout the darkened gym and chants of “Fal-len Fal-len!” and “Hell no Fallen won’t go!” echoed from every mouth. Many female stu-

stified as soon as Fallen raised his arms. “Thank you for coming today,” he said, “If it will make you happy I will say goodbye to each one of you before you leave.” He proceeded to do just that, and in a remarkable display of his computer-like memory he called each student by his first name!

“Fallen’s Army” as his many devoted fans called themselves, had gotten what they wanted this time but their ultimate goal of getting Fallen to stay on campus next year seemed hopeless. They had organized a petition requesting Fallen’s salary be doubled and that he be given his own

(Continued on Page 3)

Nowhere Near The Editor's Desk

What's all this I've been hearing about the need for paved walkways around campus? Horsefeathers! Our determined little barespots provide the College with not only aesthetic beauty, but also create several job opportunities for the maintenance department and the cleaning service.

These little soggy mudbaths (especially between New Men's Dorm and gym as well as those in front of Wismer), although they may be a nuisance to some pedestrians, are purposely designed by Mother Nature to thoroughly encrust the soles of shoes, particularly those on Nike brand sneakers. As a result, the mud and filth are tracked indoors, and creates a whole bevy of jobs for the labor market.

Aside from providing job opportunities for the townies, these bare spots also help to keep the student body in superior physical condition. While jumping the mudholes, not only are the leg and back muscles strengthened, but the individual's balance is maintained, thereby alleviating the possibility of being a clutz.

Rumor has it that there is talk of smoothing over that muddy crater in front of the Union that was created by the extraction of a tree. Don't do it, President Richter! This dirtpile creates endless possibilities for an even better liberal education. Pilgrim and Pett could take their macro classes outside and point out the job possibilities created by the dirt. In addition, Whatley could have a field day by making the freshman jump around in the mud on a rainy day.

So keep your paved walkways! We want our filth. Before we get carried away with urbanization and convenience, let us appreciate the wonderful gift given to us by Mother Nature. Support your nearest mudhole!

Upheaval III ???

Eager students like the one pictured above wasted no time at designing their own works of modern sculpture around campus.

Maintenance Department Suspected Of Campus Vandalism

On Thursday afternoon, a handfull of unidentified men, posing as employees of the Ursinus maintenance department, drove onto campus and severely damaged the grass area in front of Brodbeck Hall. They spent two hours vandalizing the area by piling massive sections of scrap iron before leaving the campus unquestioned. Students reported seeing the men driving tractors across the lawn, an apparent violation of a presidential memo regarding the campus lawns, but

Photo by Larry Muscarella

thought nothing of it as the men appeared to be "installing a new dumpster."

While Glenn Zweygardt, suspected of destroying scenic landscapes across the country, is believed to have directed the physical work on this plan, the unidentified man in the photo above is the alleged designer and financier of the job. Any information regarding the identity of this man should be reported to college authorities. Before the escape, Mr. Zweygardt was seen chuckling as he was overheard saying

"It cost them 60,000 dollars to get this here." College authorities estimate damages to be \$60,000, as it will probably cost as much to have it removed."

Unfortunately, maintenance workers have hesitated to disassemble the assemblage of metal, as they were informed that the piece was placed there under administrative orders. However, all plans to use the area as a landfill have been scrapped and the eyesore will be removed before it is spotted by any alumnus intending to donate to the school.

Students Mourn Fallen's Loss

(Continued from Page One)

research building on campus (preferably Wismer Hall), and submitted it to President Ricker in hope that Ricker's profound wisdom and logic could persuade Fallen to change his mind. The petition had been signed by every student and Ursinus employee, plus over 5,000 Collegeville-Bay area residents. This show of concern from outside of Ursinus' walls is due largely to much of the charity work Fallen has done for the community in the past.

Who is this cult figure, this idolized hero to students who have never had him in a course, this man who has become as much an institution to Ursinus as Martha Franklin? I asked him just that as we talked over a case of Miller bottles in his office in LSB. "I'm nothing special," he said matter-of-factly. "I'm just another Joe putting in his eight hours with only the satisfaction of seeing inquisitive minds nourished as my reward. I'd do it for nothing, really, but I take the salary because I don't want to get the college in trouble, taxwise. Also, I'm saving up to construct a Health Care Complex in Collegeville. I have dreamed of building it ever since coming here. All treatment would be free, of course."

When I asked of his plans for the upcoming year, his eyes glistened with the excitement of a young boy opening his first Christmas present. He said he plans on touring the country, giving a different lecture in 28 cities in 31 nights. "After that,"

he said confidently, a broad smile coming to his boyish face, "I plan on re-applying to medical school." Fallen couldn't remember exactly how many times he had previously applied but recalled it was almost the same number of times he had seen **The Rocky Horror Picture Show**, his all-time favorite film, and one he sees at least once every weekend. He had a hunch, though, that this was going to be his year. "Call it silly intuition I guess, but I had this premonition that the Dean of Harvard was going to call me, saying there was a terrible mix-up and all of my previous applications had been misfiled by an incompetent secretary. The whole thing sounds pretty fantastic, but stranger things have happened, right? I mean I've heard rumors of people getting into professional schools without going through the Pre-medical Committee evaluation! So I'm pretty optimistic about things."

Medical School's gain would definitely be Ursinus' loss because this man's magnetic personality and teaching load while at Ursinus will definitely be irreplaceable. For the past several years, in a feat of pure endurance, Fallen had taught both semesters of Vertebrate Development, and this year when V.D. was split into two semester courses, he still chose to teach both courses, one each semester! Somehow he also found time in the midst of all this to help give lab exams!

How does he do it? "It's simple," he relates, "Speed helps, but I just love my work and

my students. My sole enjoyment is in helping students and making the road to their chosen career a little easier. I do all I can to help them understand that I know exactly what they are going through and that they have other courses and activities to worry about besides the courses I teach them. I think all of the teachers at Ursinus are blessed with keen insight. I even tried to grow a moustache once to make myself look more easy going. I just try to be confidential. Every student can come to me if they have the need. I also hold private tutoring sessions in my office at night, mostly to female students. The guys are just too shy, I guess!"

"AC-DC" as he is fondly known to many on campus, is often seen in LSB at late hours diligently going over his notes and thinking of things to make his class more interesting. "Sometimes I stay here until 1 or 2 in the morning and even if I can only think of one good joke to tell the next day, it's worth it. Students here are often under a great deal of pressure and tend to take things much too seriously. It's like I tell all freshmen on their first day of classes, 'Look to your right and look to your left. Two of the three of you will graduate from Ursinus and go on to medical school and the other just took things much too seriously.'"

I also asked Fallen whether he had any advice to the incoming freshmen who will not have the privilege of being exposed to his fatherly guidance. "Get involved with the campus" he said immediately. "Involvement in campus activities is very important to all students and especially to those interested in going to medical school. Decent grades are fine but they don't mean anything if you don't have a good set of activities to go along with them, starting in your freshman year. You might as well go someplace like Harvard or Yale if you care about grades and only get involved in activities when you have to. Why do you think so many Ursinus students get into medical schools? Because we stress **campus activities**, not grades, and more and more medical schools are recognizing this as an important factor in selecting candidates. Well-rounded individuals make the good, caring doctors, not the walking machines who know a lot about nothing that are getting into many med schools today."

"Will you ever come back A.C.?" I asked. "We really need you here."

"I shall return," he said firmly. We can only hope so.

Calculus Theory Disproven

Doctor Peter Ketchup of the mathematics department disclosed today that he has disproven Calculus. That is correct. He claims that one of the basic laws of Calculus is wrong. According to Ketchup: "One of the key theorems of Calculus states that the limit, as Δx approaches zero, of $\Delta f / \Delta x$ equals $f'(x)$, which we have come to know as the first derivative. After researching the theorem, and experimenting with various functions, I have found that there is a number (somewhere between .05 and .04) which contradicts what mathematicians have thought true for years. It seems that as Δx approaches this number, the limit in question approaches the natural log of twelve, which is a constant. As to why this phenomena occurs, I have not yet determined for sure.

Ketchup has tested his theory with over 16,000 common and uncommon functions, and in all but one case, this limit approaches $\ln 12$. The function, oddly enough is $f(x) = x$. This simple function, which was thought to be the perfect example for any problem, seems to approach

($\ln 12 + .1$). According to Ketchup, this is the only function which does not approach $\ln 12$. He attributes this to a math error somewhere, and will assume his theory true for the general case.

If this theory is correct, then all of our uses of calculus are incorrect, i.e. calculated maximums may not be maximums, and same for minimums! Bridges, planes, and nuclear plants are built using calculus. That means that bridges may collapse at any time, planes may drop at a given altitude, and other things too ugly for print in a PG newspaper may occur. This tiny little constant, $\ln 12$, could possibly change the course of our lives.

Mathematicians from around the world have been meeting in Pfahler Hall, exploring this theory, trying to see just what effect it could have on the college. For Ketchup? It could mean a Nobel Prize. For Ursinus College: Who knows?

As a final note, the freshman Calculus book has been revised. Therefore, all science majors will be required to take the new Calculus course again next year.

ATTENTION STUDENTS! INTRODUCING SPEED BREATHING 1980!

Speed Breathing 1980 is the revolutionary new technique in respiratory functions. Yes, now you too can increase your breathing rate up to 800% with this truly amazing new process.

Think of how much time you'll save during those important exams when you can't afford to waste time breathing. Can you imagine increasing your scores on finals and MCATs by simply speed breathing? It's true. In fact, you could probably be finished reading this advertisement by now if you had speed breathed beforehand.

You can astound yourself and your friends with the techniques you can learn through Speed Breathing 1980. Our course is designed especially for the college student. One devotee actually speed breathed for ten years straight, and he never had to take another breath for the rest of his entire life. In fact, he had his lungs surgically removed. Girls, isn't that a terrific way to lose weight?

How much would you pay for this offer — but before you price it, consider this: Order before May 1 and receive a FREE 48 piece assorted silverware set. Plus, place an "X" in the left lung on your order blank and get a handy 5-in-1 kitchen tool AT NO ADDITIONAL COST. It not only chops, dices, and slices everything from onions to watermelons, but attach the handy adapter and it even makes ice cream.

Now how much would you pay for this offer . . . \$200 . . . \$300? Millions of similar speed breathing courses have been offered in Europe for over \$500! But this SPECIAL OFFER IS

ONLY \$99.95!!

Don't accept cheap imitations; send for your first cassette and illustrated booklet before midnight tonight. Supplies are limited so don't delay! Just fill out this coupon and send it along with \$99.95 in cash or precious metals to the prestigious Woodman's Institute.

-----+-----
Please enroll me in your Speed Breathing 1980 course and rush my first lesson on its way.

MIDDLE MANAGEMENT OPPORTUNITIES AVAILABLE FOR WOMEN/MEN UPON GRADUATION

Are you qualified to start in a management position earning 16K - leading to approximately 29K in four years? We are looking for mature, intelligent, college graduates with the ability to manage up to 50 people working with multi-million dollar equipment.

POSITIONS ARE AVAILABLE IN THESE FIELDS

- *Operations Analysis & Support
- *Diving & Salvage (SEALS/UDT)
- *Human Resources Management
- *Facilities Management
- *Shipboard Management
- *Aviation Management
- *Business Management
- *Nuclear Engineering
- *Civil Engineering
- *Computer Science
- *Educational Services
- *R & D
- *Pilot
- *Logistics
- *Instructor
- *Geophysics
- *Cryptology
- *Intelligence
- *Flight Officer
- *Communications
- *Public Affairs
- *Personnel/Admin

Prove to yourself that you can qualify for a challenging career opportunity. Don't settle for a job where you can't use your hard-earned college education!

Call the Navy Officer Information Office at (215) 564-3820/3821 (collect)

or send your resume in confidence to:

Sid Vicious Lives

In an exclusive interview just last night, East Wemmons, a junior chemistry major, revealed the nature of his senior research project. Wemmons plans to resurrect the former Sex Pistols' bass player Sid Vicious from the dead. Wemmons was quite optimistic about his future undertaking, describing it as "no more than a couple of relatively straightforward organic syntheses with a few twists thrown in." Inspired after watching 31 straight hours of *Frankenstein* reruns, Wemmons attempted to resume contact with his dead buddy to see if he would "lend support from his end."

Wemmons thinks the resurrection could be accomplished with just over a semester's work. From there he plans to bring back other rock and roll greats, specifically Jimi Hendrix (guitar), Keith Moon (drums), Jim Morrison (vocals) and the Grateful Dead's Pigpen (keyboards). He adds that these latter syntheses should require less time as he gets more proficient with the process. Once done, he could assemble the world's greatest rock and roll band, a group that "would not hesitate to play at Ursinus. Sid

tells me they're all very excited about living again and playing at the big U.C. It would be a great way to kick off a world tour. At least Todd would have something to offer besides the Zits!" The band, however, is still a few years off.

Vicious should materialize sometime in March of 1981. He was chosen as the first to be resurrected mainly because he and Wemmons were such good friends while he was alive. They first met at a punk rock concert in London (1977) where Wemmons was immediately impressed by Vicious' warmth and humor. "He's a very intelligent and misunderstood person. Some of his dead puppy jokes are real side-splitters." But since the two lived oceans apart they had to settle for being "very good pen pals."

Vicious even contemplated going to Ursinus for a few years. "He really was into some of the philosophy courses. We were to room together that fall but then he and the group had some troubles with their management." The group then fell apart, and in 1979 Vicious died of a heroin

overdose. "Sid sometimes thought he was a diabetic — he must've thought it was insulin."

Wemmons adds that the presence of Vicious on campus could "really get things rolling around here musically." Vicious has hinted at helping instruct some music courses and there is a strong possibility that he may establish a self-help clinic for those of the Collegeville Bay area who have succumbed to the murky depths of disco. Jeff Carlow, Jeff Plunkett and Jay Repko have already mentioned they would lend their support to such a noble cause. And, of course, the currently small Sex Pistols fan club is expected to see an increase in its enrollment.

The future of Ursinus (and therefore the rest of the world) is looking better and better as a result of such independent student research and the Grossly staff wishes Sid and East the best of luck. Sid, hope to see you soon!

DeCorator Introduces New Line

"Clothes are not usually designed for the portly man. I felt it was time to change this trend," commented Dr. Louis DeCorator, Professor of English, about his latest line of men's clothing.

Custom tailored by Stanley Blacker, the DeCorator Collection allows for those who enjoy the finer foods and wine to also wear the finer clothes.

"I've always adored camel hair blazers, but I could never get one to button. My collection is designed for those who also experience this," said the Shakespearean scholar.

Along with the camel hair blazer, is a fine selection of Scottish tweed sport coats, quality polyester quad suits, fine cashmere driving caps and matching

Shakespeare tote bags.

As a special treat, the collection includes a snappy knicker ensemble for the English playgoer. "I'm tired of going to splendid performances and being surrounded by people attired totally wrong. It's time people start to get more involved in the theatre."

DeCorator announced that his Spring/Summer catalog for his new line is available upon request at the U.C. Book Store.

College To Start Academic Pledging

The Academic Board today accepted a proposal to begin all-campus pledging for the 1980-81 school year. A recent study showed that the mean G.P.A. for all fraternity members was 81.54, while the mean for all Ursinus students was 81.44.

The board has concluded that this difference in G.P.A. is directly attributed to fraternity pledging. As a result, all incoming students will be required to endure a two-week pledging period, with Hell Night scheduled for the eve of classes. Pledging activities will include the traditional drop trips, other surprises not disclosed by the board at this time, and paddling by President Ricker.

Ricker seems enthusiastic about the upcoming experiment. "After watching the fraternal organizations of this campus drilling their pledges and instilling the desire and drive to excel academically, I am convinced that all-campus pledging will raise the mean G.P.A. I can be nothing but excited about this new mandatory pledge period for students." Asked about the paddling, Ricker said, "Sure it will hurt! But we must consider resistance. If we can build resistance, then we will be well on our way to reaching our goal. And I just can't wait to unleash on those white little fannies."

In a survey taken of fraternity members, 3% couldn't remember pledging, 6% witnessed an increase in grades, 45% showed no appreciable difference, 34% displayed a fierce intent to do better

and to study harder, despite a slight decrease in grades. The final 12% were drinking at the time, and refused to comment. In a second survey, 87% are in favor

of the mandatory pledging, 11% against, and 2% too drunk to answer. The numbers seem to support the decision. We can only wait to see the results.

Final Exam Schedule

In an effort to lighten the load on Ursinus students during finals, department chairmen across campus have decided to permit all students to see their final exams before the actual test date. The following is a comprehensive list of what all majors will face come May 1:

BIOLOGY: Using carbon, nitrogen, oxygen, hydrogen, Scotch tape and paper clips, create life. Ascertain that it can reproduce.

CHEMISTRY: Synthesize a universal solvent. Design a container for it.

ECONOMICS: Develop a realistic plan for financing the national debt. Implement this plan without government, military or industrial aid.

ENGLISH: Without utilizing prose, poetry or stream-of-consciousness narration, write the Great American Novel.

HISTORY: Trace the history of man from the time Adam ate the apple to what Carter said last night. Be brief and specific.

LANGUAGE: Combine the best features of all tongues known to man into a new language.

MATHEMATICS: Discuss the value of a system of mathematics without the concept of zero or infinity in simplifying calculations for differential calculus.

PHILOSOPHY: Choose one of the following; prove why you chose that one: (1) Sketch the development of human thought. Compare with the development of any other kind of thought. (2) Prove that you exist. Include arguments from Descartes, Kant, Mill, Hegel and Castaneda.

PHYSICAL EDUCATION: Demonstrate your coaching ability by training your roommate to qualify and place in the 1980 Olympics.

PHYSICS: Construct a simple machine which uses neither the principles of Newtonian or Einsteinian physics.

SOCIOLOGY: Estimate the sociological problems which might accompany the end of the world. Construct an experiment to test your theory.

Special Thanks to The December 19, 1974 issue of Ursinus Weekly and the Haverford Times.

Dome Club Visits Capitol

by BB Domeking

Accompanied by advisor Davie Douglas, the Ursinus College Dome Club went on a field trip to Washington D.C. this past weekend. "The political points of interest were all really nice, but we were mainly there to see the dome on the Capitol Building," stated club president Mark Domegelo. "This is a true piece of architectural genius."

Besides sightseeing, the club saw Laser Roch at the local planetarium and dined at Ho Chi Dome's Chinese restaurant. They left on Friday and returned Sunday.

The club was founded in November by Domegelo in order to bring pride to those with receding hairline. "Being bald is just like being Italian. People should be proud of their heritage. I'm bald and Italian, and I'm damn proud," commented the senior geology major.

This summer the group travels to Houston, Texas, to see the Astros baseball team play in the infamous Astrodome. Applications for any interested students can be obtained from Mr. Douglas. Girls are invited to apply, but no Nair headfake will be accepted.

Graduation Speaker Announced

Yesterday it was disclosed that this year's commencement speaker will be a wood-grain finished Advent TX90.

After graduating from the Tokyo Electronics factory in 1943, Advent TX90 went on to serve in the French National Guard where he delivered the morning announcements and worked at various assemblies. Advent secured a Ph.D in advanced public speaking in 1948 from Massachusetts Institute of Technology and became coordinator of public address systems in the Philadelphia area in 1953.

Advent TX90 is married and resides in Norristown with his wife Pioneer and sons, B.I.C. and Yamaha.

Union Photo Contest II

The College Union is currently sponsoring a pornographic photo contest for all members of the Ursinus Community.

Prizes will be awarded for most erotic pose, best well-laid look, most candid shot, most well-hung, and kinkiest photo.

Photographs, slides and 16 mm film splicings are eligible. Deadline for entries is April 25. Winning photos will be chosen and displayed in the Union on April 28.

Underground Nuke System Found

by Matt Amorphosis

Recently there has been much concern over campus beautification. Why does the administration hold the students totally responsible for all the unsightliness around campus? Maybe the students are responsible for all the toilet paper hanging from the trees, but this could not be avoided. After all, it was only natural that those new pieces of "sculpture" be given the proper reception. (Why toilet paper was an appropriate reception I leave to your imagination). Students are beginning to ask themselves why this litter has not been cleaned up.

Several weeks ago I had the same feeling. I began wondering how the administration was doing its part to beautify the campus. Little did I suspect at the time that this concern would put my life in such danger. And what I will report in this article, I can assure you, is all fact, and it could quite possibly astound the world. This is the story of URSINI, an Underground Reactionary Systems Installation for Nuclear Intervention. It all began one cold blustery night last month . . .

I was coming back from a party across Main Street heading back to my suite in a fairly rowdy mood. I was trying to mellow out by just taking in all the beauty of the snow-covered ground when I suddenly found myself gasping for air. I had inadvertently walked across one of the many steam outlets near the walkway between the library and Curtis dormitory. Picking myself up out of the snow and continuing on my way I felt quite annoyed. To top this off, when I got to my room I knew I would never get to sleep with all the stereos blasting indistinguishable noise into the deepest crevices of my mind. I set out, flashlight and crowbar in hand, to discover just what was the cause of all that ugly, annoying steam.

I finally opened one of the manholes in front of Wilkinson and climbed down the twenty foot ladder beneath it. Shining my flashlight around I saw various rusty pipes and valves. But what really caught my attention was the door with the "No Admittance" sign on it. Somehow it had failed to close fully, and I inquisitively pecked in. I opened it without the least difficulty, stepped through a second steel door, and was inside.

But inside what? To my right my flashlight revealed a tunnel that extended as far as I could see. To the left about fifty feet away was another door. Through the door I went. My sense of direction told me I was beneath Pfahler. So this was that room in Pfahler basement that one always hears strange machinery sounds coming from! Around me was a complexity of machines and a network of pipes travelling in all directions, most were parallel to

the tunnel in the other direction. Judging from the roar of the machinery and the noise emanating from the pipes, I imagined the machines to be turbines resembling those we had studied in high school chemistry during our discussion of nuclear power plants. The steam was evidently coming from the pipes, running parallel to the tunnel, passing through the turbines, and being expelled through various outlets above ground. I continued on to find a door with a safety latch. Strangely enough, it was controlled by a small clicking Geiger counter outside. I recognized it because the needle was vibrating on a scale marked "milliRems." What was a radioactivity indicator doing here of all places? What was inside?

I opened the door and found a room with about sixteen computer terminals inside. Turning one on, a "Ready" sign was printed. Then it asked for a password. Naturally, I was intrigued, and I ended up spending about twenty minutes trying to find a password that worked. Ironically, it was written on the desk right in front of me before I thought to try it. The password was "URSINI" and the key file number was *E54114. It printed a list of instructions entitled "EMERGENCY procedures in case of Nuclear Attack." This can be obtained in the library terminals I later discovered by running "Old*E5114:Emergnc" with the same password, "URSINI." I followed the instructions and turned on the television monitor above my head. To my amazement a display appeared showing a picture of four shiny missiles with blinking lights and

all! It reminded me of one of those new science fiction movies, except this was for real. Maybe this had something to do with the so-called astronomical studies done atop Pfahler. Then for about ten seconds a display of the front of Pfahler came on. "My God," I thought, "these rockets are inside the columns in front of the building!" As you can imagine, I nearly had a heart attack when I realized the seriousness of my discovery, so I panicked and ran. I went through two doorways and, sure enough, came out of a room in the basement of Pfahler labeled "Nuclear Lab." Outside I could still hear the clicking of the Geiger Counter safety lock, and I saw above me even more pipes I had never noticed before. I ran up the stairs and headed back to my suite when I suddenly realized I had neglected to replace the lid on the manhole outside Curtis. So I returned to rectify the situation. I was picking up the manhole cover when, out of the corner of my eyes, I saw a couple walking towards me!

What luck! Now I really panicked. I stood on the ladder with my flashlight off and carefully lowered the lid over my head. Once it was in place, I jumped to the bottom, turned on my flashlight, and ran through the doors which had remained open again by some miracle. I ran as fast as I could down the seemingly endless tunnel I had not yet explored and collapsed to catch my breath for a minute. Then I saw the sign. "URSINI," it said. "Underground Reactionary Systems Installation for Nuclear Intervention. I now realized that what I had discovered was no physics laboratory; this was an underground nuclear defense system!

To the left was a new branch of the tunnel. A sign indicated that it led to the "command post." This had to be Wismer cafeteria. I had often thought of Wismer as the ideal command post with its circular design, its panoramic view from the top, its numerous food storage units in the basement, and its auditorium which could be used as a briefing room.

Down there were lights and voices. Straight ahead was the rest of the tunnel, but my flashlight was becoming dim. (I guess they never do work when you really need them). So I had only one choice. I went through the doors to my right, up the ladders and emerged beside another steam outlet between the Union and the bookstore. It was almost dawn now, and I knew that students would soon be walking around campus, so I sneaked back to my room to do some serious thinking about this potentially dangerous information I had acquired. Being a chem major by nature and a scientist by habit, I sat down in my room to plot points: the manholes, the turbine room, the steam outlets around campus. As I suspected, they formed a virtually straight line. Where did the line point to? Where did this tunnel really lead to?

To the maintenance building. It suddenly occurred to me that perhaps that building with the big smokestack and metallic cylinders inside was not a beer brewery after all! Perhaps it is not really maintenance at all! Perhaps that explained why it takes so long to get things fixed around campus!

Well, I had to find out just what that building at the end of the tunnel really was. I dared not go to the administration with my discovery, so the next night I set out again; this time with a camera! I was a little nervous as I left my room that night, but not half as nervous as I was when I got to the manhole and realized I had left my crowbar in the computer room! "Well, what can I do except hope no one found it?" I thought. So it took me about an hour to finally get the lid off this time. I quietly climbed down the ladder, went through the two steel doors, and headed for the computer center. Meanwhile I was winding my camera when suddenly the entire hallway was ablaze with fluorescent light. In front of me stood, three very stern looking men. One I perceived to be an official, and by his side were two armed guards. I had time for only one picture before they aimed their weapons at me. "Bolt!" I thought. And bolt I did quicker than a gazelle, back to the valve room, up the ladder, out the manhole, and into Wilkinson One to hide. And I am still hiding. Not in Wilkinson, of course, but I can say this much: "I'm not coming out for a long, long time! And if there is no article written by me for next week's newspaper, you'll know they got me."

FULL SCHOLARSHIPS

TO MEDICAL SCHOOL!

YOU RECEIVE:

___ All tuition paid in full to any AMA or AOA approved school of medicine or osteopathy.

___ Reimbursement for all books and fees.

___ A stipend of \$453/month for 10½ months per year.

___ An opportunity for clerkship 45 days per year for clinical or military indoctrination experience.

___ A high quality internship and residency program.

___ AND MORE!

SOUND INTERESTING? To find out if you qualify, contact LT. JACK RUDNICK or Lt. MARY ELLEN QUINN, Medical Programs, U. S. Navy, 128 North Broad Street, Philadelphia, PA 19102. Or Call Collect, (215) 597-9680 or (215) 564-3826.

Frat

Sponsors

Marathon

(Continued from Page One)

\$60.00 used for bandages and Mercurochrome. Williams is overjoyed with the response. "Most of the donations are coming from fraternities enjoying the concept of our idea. In fact, members of the TK fraternity are trying it with sororities at Pitt University, just for the sport of it. We are well ahead of our pace, and I anticipate reaching our goal by the time we hit Salt Lake City." An exhausted Rhonda Stone could only reply "Ack-ack (cough) ugh, eh, blehh." she also looked enthused about the progress.

The marathoners expect to be done by late June, with rebuilding plans for the tower scheduled for July 1. It certainly is an effort on the part of these organizations which deserves our applause and appreciation.

Kerry Laras To Leave Ursinus

by Oscar Madison

In a move that has shocked the sporting world, Joe Maternal has been relieved of his duties as Penn State Football Coach. The terse announcement was made yesterday at a late-afternoon tension filled press conference by Penn State Director of Athletics Joe Maternal. In his first major move since becoming AD in January, Maternal indicated that Penn State would be downgrading its football program. Maternal also introduced the heir to Maternal's throne. Taking over the reins of the Nittany Lion Gridders will be the relatively unheralded Kerry Laras, formerly the Head Coach at Ursinus College.

AD Maternal alluded to problems concerning Coach Maternal's ability to cope with his athletes as the major reason for the Coach's surprise dismissal. Especially during the past season, the AD continued, the coach could not keep his player's egos at a reasonable level, causing players to suffer from delusions of grandeur. Noting that this problem is becoming more and more common with today's highly recruited star athletes, Maternal added that his solution would be to downgrade the Penn State Football program. "In this way," Maternal said, "We will no longer be in need of the egotistical, big-headed players we need now to keep the program going at its present level."

It was achieving this end that made Maternal's removal necessary. AD Maternal said "Joe is an

excellent coach and super person, and is not capable of downgrading our program to the extent we feel is required. For this, there is no doubt in my mind that Kerry Laras is the man."

An examination of Laras' record would indicate that the AD has indeed found his man. Under four years of Laras' skilled leadership, not one Ursinus player suffered from an oversized ego. This was assured by Laras' unique ability to have his players consistently going at less-than-peak levels. Should Laras be able to perform the same magic for the Nittany Lions, AD Maternal should see his goals reached in no time.

Laras echoed this in a brief statement to the press. "Wull, fellahs," he said, "I dink will be pwayin' divvission dree type foot-

ball in a madduh of months." (Translation: I'll do the job in no time.)

Reaction to these latest events has been universally along the lines of astonishment. Ursinus Athletic Director David Randyson seemed to have a typical reaction, as he was seen walking around in a daze muttering, "I can't believe it, I can't believe it." This sentiment was clear in Ursinus' official statement on the matter, as read by Sports Information Director Michael Money. Money said, "We are extremely shocked at this sudden and unexpected turn of events. In fact, we are totally unprepared to deal with this situation, and we are going to put off dealing with it for as long as possible. The only thing we are certain of right now is that Ursinus football will never again be the same."

What Should Be Happening?

THE BEAR FACTS
Tid-bits of campus news
not fit to print
by Matt Amorphosis

***Saturday 9:30 p.m.-11:00 p.m.** — Pizza lovers' delight. For the first time in 15 years, Marzellas will sell pizza after 9 p.m. Be sure to attend this genuine landmark in Collegeville history. Free pepperoni to the first ten customers.

***Sunday, 2:30 p.m.** — Be sure to attend the unveiling of Glenn Zweygardt's modern art statue entitled, "Upheaval III." The sight of the occasion is the college swimming pool in Helfferich gym. The steel structure will be used as a sliding pond near the deep end.

***Monday 1:00 p.m.** — Don't miss this controversial issue. The Student Activities Committee will begin an investigation based on student rumors that WRUC, the college radio station, has not been on the air for the past three years. "These rumors have been so predominant around campus that we have finally decided to include a warning in this year's catalog," said one spokesman. Page 12 of this year's catalog now reads, "The station will not be operating during the 1980-81 academic year."

***Tuesday 9:00 a.m.-4:15 p.m.** — A definite must for sweet toothes. For one day only the college store will have a penny candy sale. All candy-bars and bubble gum will be sold for just one cent. "I always close 15 minutes early even though I'm getting paid for," said one cashier, "So I figure this sale was the least I could do."

***Wednesday 10:00 a.m.** — Don't wait in line for a computer terminal, attend a

The huge success of the Intramural Softball League this year has created excitement throughout the college community. An expanded playoff structure and the playing of games at the newly renovated Post Office Memorial Complex are among the reasons for such a large success.

This year, the playoff format was expanded to include six teams. As of this writing, eleven of the eighteen teams were still in contention for a playoff spot. In fact, the rugged Whaazoo Division had a virtual six-way tie for first place.

This year saw the league play games at the renovated Post Office Memorial Complex for the first time. This complex features a dirt infield, swamp outfield, and dugouts. Commissioners Martin

Flatz and Joe Bizarre were simply ecstatic about the move. "We welcomed the opportunity to bring U.C. Intramural Softball into Collegeville Bay Area. The league realizes how hungry the bay area is for winning, competitive, softball action, and saw no alternative but to jump at this opportunity. We have a good product to show, and Collegeville officials offered us a very reasonable contract for leasing the complex. I think everybody will benefit from the move."

"The Little Ginzo's" machoism speaks for itself. The magnitude of his presence on the mound is matched only by that of Mark "The Bird" Fidrych; as he commands his own cheering section on Paisley 3. The result of these changes has been a skyrocketing of attendance figures. By the end of the regular season, league officials estimate the attendance will break the one-million mark, more than tripling last year's total. Paisley Hall has issued daily quiet hours from 3:00 to 5:30 for watching softball, and the off-campus houses have sponsored bus excursions to Post Office games. In fact, the baseball team has threatened to boycott their important double-header against Widener unless the scheduled softball playoff games were moved to another time for their viewing pleasure. The Bay Area? Townies have flocked to P. O. Memorial for games. Tom Walker, Collegeville mailman, summed it up best: "I had my morning route changed to the afternoon so that I could watch softball action while delivering my mail!"

How will next year's program benefit from this year's success? Playoff games will be held at Veteran's Stadium next year, and Paisley field will be renovated with Astro-Turf. However, rumors that the famed "Brown-Monster" in right field will be torn down are not true. The league does recognize the need for some traditionalism. Promotional "give-away" days are also planned. The big news, though, is for expansion. The league hopes to expand to such cities as Trooper, Limerick, Haverford, and possibly Collingswood, New Jersey. According to Flatz: "Fan popularity is unquestionable. We have a product that can only get better by expansion to such places as Trooper and South Jersey. More teams means more excitement, more playoffs, and more good, clean fun . . . fresh in the American tradition. If we can bring back fun in the intramural softball league, then maybe all of America will be a little better off."

Remember, Fan Appreciation Day is Tuesday, April 22. All fans receive a free tote bag which reads, "I live in the Bay Area, and I love it!"

Calculator Crackdown Prohibits Assistance

Ursinus conservatism pinnacled last week when Professor Snide, head of the Physics department, surprised students and teachers alike by announcing the prohibition of the use of calculators on all science finals. "Ever since the downward trend in the cost of calculators, we've been noticing an increase in average test scores in the science department," said Dr. Snide. "Too many students have been programming their calculators with vital formulas and difficult integral theories. This can have a

seriously adverse effect on a student's learning process. For this reason we are banning the use of calculators on all science finals."

"I realize the strain this puts on students," continued Dr. Snide, "and to alleviate any problems I have personally advised all physics instructors to require answers to only three decimal places."

"Nevertheless," added Dr. Snide, "we are still permitting the use of slide rules and abacuses."

PLATTERS & PINS & NEEDLES

Graduation Speakers Chosen

Hermann F. Eilts, who served as U.S. Ambassador to Egypt during the crucial years from 1973 to mid-1979, and Raymond I. Lindquist, who was a minister at Hollywood First Presbyterian Church for almost 20 years, have been named guest speakers for Ursinus' graduation and baccalaureate services, respectively, according to Dr. William E. Akin, dean of the college.

For his vital role in Middle East

peace, Ambassador Eilts was chosen as the 1979 recipient of the Joseph C. Wilson Award, which is given to an American citizen whose sustained contribution to international understanding and the quality of life includes recent achievement of unusual and lasting significance.

A 1943 graduate of Ursinus, Ambassador Eilts began his career with the U.S. Foreign Service in 1947. In his 32-year tenure, he served in a succession of embassy posts in London and Near and Middle Eastern countries. He was appointed ambassador to Saudi Arabia in 1965 and is credited with establishing unusually effective working relations with the Saudi government.

In late fall 1973, Ambassador Eilts was assigned to the U.S. embassy in Cairo. His mission,

which he completed last June, was to work on a peace agreement between Egypt and Israel. Henry Kissinger praised him by saying: "I honestly do not believe we could have done it without you."

Currently, Ambassador Eilts is serving on the faculty of Boston University, where he is university professor of international relations and research professor of history and political science.

Reverend Lindquist, who was ordained to the Presbyterian ministry in 1934, is a trustee of the Princeton Theological Seminary and a member of Phi Delta Kappa. He is also on the Board of Directors of the Presbyterian Ministers' Fund.

Graduation and baccalaureate services are to be held May 11 at the college.

Glass Coordinates Program For "Non-traditional Students"

by Leah Whitman

You've seen the item in the daily bulletins and probably wondered, "Who are those 'non-traditional age' students who have those brown-bag lunches every two weeks? What are they doing there — organizing? Relax. Those "non-traditional age" students are just, for the most part, adults interested in education. And thanks to the efforts of Dr. Erlis Glass at Corson Hall, we'll hopefully be seeing more and more of them on campus.

Although Ursinus has always had a small adult enrollment, since the inception of Dr. Glass' program in January the number has increased to approximately thirty-five. Typically, the non-traditionals fall into two categories: those matriculating students over the age of twenty-four and the special students. The latter are non-matriculating students, high school students, and senior citizens. Some are testing the water with thoughts of a future degree, and some are here merely for personal fulfillment; others have as little as two years left to complete a previously interrupted degree program. But, regardless of their goals, the non-traditionals have questions, fears, or problems in common, and this is where those brown-bag lunches come in.

The lunches offer a prospective new student the chance to talk to someone who has, often after a lapse of several years, actually started college. Here he can ask the questions of those who have completed many courses despite the demands of family or job. Since the older student hasn't the advantage of the daily social

contacts of typical college life, the lunches are sometimes the only opportunity for them to meet with a group of peers with similar experiences. Also on hand are some of the deans and professors to offer advice, information, or just encouragement.

To ease the transition into academic life the college is considering a reading and study skills course for the newer adult students. Hopefully, there will be a one day workshop in both summer and fall for the evening students enrolled for each session. To better prepare the students the workshops will be held before the start of both sessions. Also in

the planning stage is a five week course for the fall day students. They'll meet one day a week for an hour or two group session. A nominal fee will be charged for the workshops and the course. And if more help is needed, Dr. Glass, as advisor to the special students, is always available for questions.

We hope this article has given you a better understanding of just who our 'non-traditional age' students are. If not, Pat Dansby, one of our adult students, has a sure-fire way of telling — they're the ones who ask, "Do I have to take phys ed?"

Study Reveals Low Pay In Higher Education

The real spending power of weekly wages for non-supervisory personnel in higher education today is about 70% of what it was in 1967, according to WORKING WOMEN'S newly released report, "Becoming a Priority: The Status of University and College Office Staff."

The report, based on a nationwide survey of the pay and working conditions of university and college office staff from 253 universities and colleges in the U.S. and extensive research, finds that 79% of the clerical workers surveyed make wages below \$11,000.

"Universities and colleges have to stop fighting inflation by paying substandard salaries to office workers," stated Karen Nussbaum, Director of WORKING WOMEN, and a former

university office worker. "Office staff must become more of a priority in the budgets of institutions of higher education."

The survey showed increased organizing activity, in the form of unions, staff councils, women's committees, and departmental groups. Approximately 50% of the union drives at universities and colleges were won in 1978 and 1979, despite increased use of university funds to pay anti-union consultants to defeat union drives.

For a free copy of a summary of the report, "Becoming a Priority: The Status of University and College Office Staff," write to Working Women, 1224 Huron Rd., Cleveland, OH 44115. For the full report, send \$3.00 to Working Women at the above address.

Berman Collection To Be Presented Sunday

Artist Glenn Zwegardt oversees the erection of his work "Upheaval II," as the maintenance department lends a hand last Thursday. The sculpture was placed on the grassy triangle behind Brodbeck Hall.

Photo by Larry Muscarella

Philip and Muriel Berman of Allentown, Pa., will present two outdoor sculptures and a collection of twentieth-century paintings and lithographs to Ursinus College, Collegeville, at an "Art in the Afternoon" ceremony on April 20.

The welded steel sculptures are by Glenn Zwegardt of Alfred Station, N.Y. "The Bearkeeper" will be installed in front of Myrin Library and "Upheaval II," thirty-five feet long, will be located on the open campus.

Paintings and lithographs will be displayed in Myrin Library. They range from lithographs by

Salvador Dali to oils by several South American painters including Santos Chavez and Leonello Berti.

President Richard P. Richter said that the new acquisitions will further the campus community's awareness of creativity as a component of liberal education. "The Bermans are doing a magnificent service to our campus and to this entire area by putting art out among people, making it part of daily life."

The public is invited to the presentation ceremony at 2:30 p.m. in front of Myrin Library.

Off The Editors' Desk

Change. It's a sign of the times. Punk rock and new wave have made disco a bad memory. Turbo-charged V-6 engines have become more desirable than the nuclear era of big blocks. It's even respectable for a woman to invite a man to her apartment for Harvey's Bristol Creme. During these changing times comes an outcry from the students at Ursinus for change but some events of the past week or so serve to question the validity of this outcry. Can the students accept the change for which they so badly desire?

The art sculpture erected on campus last week entitled "Upheaval II" represents an attempt to institute change at Ursinus. This work of modern art immediately received negative remarks from the students, who were bewildered by its unusual design and coloration. Without allowing any time for an explanation of the sculpture's theme, several students reacted in an extremely negative and disrespectful manner toward the sculpture's presence, and exhibited a refusal to accept change.

Although "Upheaval II" may have a unique appearance contrary to the students' understanding of art, the fact remains that it was a gift presented to Ursinus absolutely free of charge. Its creator was on campus the morning after an incredible amount of vandalism had been done to the work, and was undoubtedly offended by the Ursinus student body.

The College has come a long way in recent years with establishing change. Juniors and Seniors remember the days of closed dorms during the week as well as a prohibition against alcohol on campus. However, change has come about as a result of open-mindedness on the part of both administration and students. Future actions similar to the vandalism done to "Upheaval II" last week will bring to mind not an outcry for change, but for a revival not only of the Bee Gees and 454 Chevies, but also the disrespectful unheard-ofness of a pushy female Harvey's drinker.

Van Gorden Takes Pool Title

With studied nonchalance that characterized his style, Steven VanGorden sunk the eight ball to defeat defending champion Dave Clare 150-142 in the recent college pool tournament.

The March 28 match-up lasted over three hours and was the culmination of over six weeks of eliminative competition. Sponsored by the College Union and organized by Jeff Niebling, Gamework Chairman, the tournament featured some of the best and worst pool players on Ursinus soil.

For his victory, VanGorden received a customized pool cue valued at \$125 and donated by Miller & Mohler, co-sponsors of the event.

Letters To The Editor

To the Editor:

Many students have asked questions about the two new outdoor welded steel sculptures and have wondered why the College accepted them. They have expressed puzzlement in particular over the meaning and value of "Upheaval II."

The gifts were offered to Ursinus College by Dr. Philip Berman and his wife, Muriel. Philip Berman is a former student who received an honorary degree from the College in 1967. Dr. Berman is head of Hess's of Allentown, a retail merchandising firm. The Bermans have collected and given works of outdoor sculpture to many colleges and municipalities. They believe that contemporary art forms provoke interest in and debate the creative process and ultimately humanize and bring together the people who share the experience of viewing such works. The Bermans have been noteworthy in their support of younger artists such as Glenn Zwegardt.

It was in this spirit that they offered works to Ursinus — at no cost to the College — and in this spirit that the College accepted them.

I understand from the artist that "Upheaval II" seeks to express the theme that out of the natural forces that cause destruction come the elements for a new ordering of man's environment and his life. The crudeness of the twisted beams at the base evolve into a sheer plane surface that reaches upward and supports the geometrically complex rhombus that perches solidly on top at a seemingly hazardous angle. In the transition among these elements Mr. Zwegardt sees his theme expressed.

"Bearkeeper," located in front of Myrin Library, evolved from Mr. Zwegardt's association of earlier signs of Hopi religious customs with the sense of tradition on our campus. Our sculpture is intended to suggest the theme that the spirit that originally animated Ursinus is kept and renewed on these grounds. The upward-thrusting, curved planes embrace and protect the horizontal tubes. The straight pole suggests the "keeping" function that Mr. Zwegardt discovered in native religious tradition, and the two main groups of elements — the flat upward-thrusting planes

and the circular horizontal members — make something of a cross.

I cite these thematic notions not because they give an adequate analysis of the works but because they may suggest the basis for dialogue among ourselves about these forms in particular and about the general value of artistic expression.

Contemporary outdoor sculpture often on first viewing contradicts one's accepted view of things. On a college campus, where the examination and clarifications of ideas is our main business, such art objects can be useful as takeoff points for discussion of themes and of man's constant urge to make significant forms.

I hope that many students will attend the ceremony at 2:30 p.m., Sunday, April 20, in front of Myrin Library. The College will accept the sculptures, along with a collection of paintings and lithographs, from the Bermans. Mr. Zwegardt will conduct an informal discussion of the significance of "Upheaval II."

Sincerely,
Richard P. Richter
President

GRIZZLY

"The Grizzly" is the successor to "The Ursinus Weekly" and is published throughout the academic year by the students of Ursinus College.

The publication is available free to all members of the campus community. A year's subscription is available to others for \$7, and may be obtained by writing "The Grizzly," Ursinus College, Collegeville, Pennsylvania 19426.

"The Grizzly" is edited totally by the students, and the views expressed are those of "The Grizzly" and are not necessarily those held by the administration, the faculty, or a consensus of the student body.

AVIATION MAINTENANCE

Are you mechanically inclined, interested in aviation, and looking for a challenging, meaningful career? If you are, then you should consider applying for a position as a Navy Aeronautical Maintenance Duty Officer. Selection is competitive, but it takes the best to play a vital role in managing an aviation maintenance budget and solving complex maintenance management problems at a naval facility ashore or on a carrier. All this — and an annual salary of approximately \$29,000 in just four years.

To the Editor:

I would like to thank the four juniors who applied for the position of Secretary of the class of 1981. We (the vice president and I) did not expect such a response after no one ran for the office during the election. The interest and willingness to work, even though we could only choose one, makes us very optimistic for next year.

Lastly, I would like to congratulate the new secretary of our class, Carol Stephens.

Kay E. Buckwalter,
President, Class of '81.

Ursinus News In Brief

Summer School Program

Ursinus will offer special programs in summer school for mathematically gifted students as well as area high school juniors and seniors and senior citizens, according to Dr. Peter Jessup, Chairman, Department of Mathematical Sciences.

Students scoring 650 or higher on SAT or PSAT are eligible to apply for a tuition waiver to take any regularly scheduled course in Mathematics, Computer Science or Statistics not offered at the student's high school.

This program is limited to the first 10 students who qualify. Eligibility ceases upon graduation from high school or acceptance as a degree candidate.

High school juniors and seniors and those over 62 are eligible to take any regular course for half tuition — \$31 per semester hour.

Written recommendations from a guidance counselor and approval of the Committee on Admissions are required for high school students. Senior citizens must have a sufficient educational background in the judgment of the Committee.

Each of the four summer sessions are three weeks long and classes meet five mornings per week from 9-12. The first session begins May 22.

Alcohol Workshop Presented

Dr. Barbara Cram, Clinical Coordinator of the Young Adult Program of the Horsham Clinic, presented an alcohol workshop for the 1979-80 and 1980-81 R.A.s on Saturday, March 28th from 9:00 a.m. until noon in Wismer Auditorium. Dr. Cram incorporated two films, "Alcohol Abuse: Early Warning Signs" and "Drugs and Alcohol: Making the Decision" and solicited reactions. Citing that six hundred million dollars a year are spent on advertising of alcohol and glamorizing its use, she asked the R.A.s to define abuse.

Some of the warning signs of excessive drinking are: personality changes, preoccupation with alcohol and drinking alone, lack of pride in self and work, increased need and tolerance for alcohol, and physical and emotional deterioration. R.A.s in group discussion addressed several issues and case studies, sharing their responses. Dr. Cram emphasized a non-judgmental attitude, early detection, objectivity in handling the problem, alternative activities, and providing information concerning alcoholism. She announced that the closest Alcoholics Anonymous Center is at 345 Main Street in Collegeville. The session ended with a provocative question and answer session.

Campus' First H-S Science Bowl

The first annual Science Bowl is being held at the College on Saturday, April 26, 1980 for representatives of eight local high schools. The Bowl will begin at 12:30 p.m. and consist of four matches, two semi-final contests, and a final playoff. The questions will be based on information from Biology, Chemistry, and Physics courses.

The participating high schools include Plymouth-Whitemarsh, Perkiomen Valley, Pottstown, Devon Preparatory, Spring-Ford, Boyertown, Norristown, and Phoenixville. Campus tours will be provided by Ursinus students during the afternoon hours.

CAMPUS FOCUS

Iranian Speaker

Leaves Wake Of Student Protest

(CH) — A national speaking tour by a former Iranian ambassador to the United Nations has sparked a wave of campus anger that left 78 protesters in three states in jail.

Fereydoun Hoveyda visited 13 campuses on his first tour and is now launching a second nationwide effort to promote his upcoming book, "The Fall of the Shah." In the book, he characterizes himself as powerless to alter the course of the ex-shah's reign in Iran.

Although widespread violence has been avoided, protests against Hoveyda on three campuses resulted in many arrests. At the University of Texas-Austin, 23 Middle Easterners were arrested and face charges of disrupting a public meeting. Forty-eight demonstrators were arrested by police during a Hoveyda speech at Northeast Louisiana University in Monroe while three people were charged with disorderly conduct after eggs and tomatoes were tossed at Hoveyda at Utah State.

A similar egg-throwing incident at Columbia College in Missouri did not produce any arrests. Arizona State University officials cancelled Hoveyda's speech there to avoid violence, but the former ambassador did receive his full \$2,000 fee from the student government.

What's Happening?

April 18 to April 26

Beta Beta Beta Approved

by Frank Ayres

Ursinus now has a national honor society in which students in the biology department may become members. This society is the Beta Beta Beta biological honor society. The membership in this society is divided into four classes: active, associate, graduate, and honorary.

Active members from Ursinus must be biology majors and at least a second semester sophomore. (Members must have an average biology grade of (84) B with a cumulative average of at least 81.67. Invitations are sent out to these students by the biology department. One of the purposes of this society is to function both as an honor society and also as a professional society for those students of the biological sciences.

Graduate members of the society shall be those active members of the society who have finished their undergraduate work or are faculty members of the department. Associate members will include those students whose interests are in the life sciences in some way but who are not eligible for an active membership.

Honorary members shall be elected by the chapter in recognition of significant accomplishments either in biology or in service to the chapter.

Active, graduate and honorary members remain members for life. Associate members will have their membership ended when they complete all of their undergraduate work. Ursinus will be a member of the Northeastern region of the national society.

Protheatre Pulls Off Pericles

by Jennifer Bassett

Several weeks ago, Dr. Joyce Henry directed Shakespeare's *Pericles* for proTheatre's spring production. Unlike most of Shakespeare's works, *Pericles* is a challenge to produce, especially in an area the size of the Bearpit. In *Pericles*, time leaps jaggedly between six remote locales, the plot is implausible and its characters are one-dimensional.

However, Henry and company managed to come across with an enjoyable and creative interpretation of the play. In fact, if there was awkwardness present, it was due to *Pericles*' inherent qualities, rather than from the performers.

The staging, props and costumes were outstanding and very professional. Stunning costumes were lent by Arizona State's Lyric Opera Theatre for the production. Costumes and sets varied from an opulent Old South, to a rowdy Old West, to corny nautical and more.

Since *Pericles* contains over thirty characters, many actors, both student and faculty, doubled in parts. Like most of the play's transitions, it worked.

Many of the actors seemed to improve in performance as the play progressed. This was especially true of Bruce Dalziel, who played *Pericles* and Christine Battle, who played *Pericles*' daughter, Marina.

Gower, who functions as *Pericles*' chorus was portrayed by William White, who came across as a spunky old guy. His performance also strengthened as the play continued. White certainly

has a fine oratorical voice.

Dr. John Wickersham played Antiochus, a proud and doting Plantation Daddy. Carol Kennedy was the daughter and lover of Antiochus. Although her stage appearance was very short, she was stunning and bore herself like a true belle.

Chuck Broadbent III, Keith Strunk, and Scott Fleagle played the roles of scheming gangsters. Although Shakespeare's exact intentions for these characters were unclear, they were enthusiastic businessmen.

Jonathon Cowie was Cleon, obedient sexual salve to his wife Dionyza. Cowie added some depth by acting like he was trying to think for himself at times, through amusing asides, so it wasn't just a henpecked husband part.

Rebecca Dunn was the manipulating Dionyza. She was perfectly selfish about it and used her husband to achieve her deeds. A particularly humorous moment in the play was the expression on the couple's faces when a servant interrupted them in the bedroom.

Louis DeCatur was Simonides, and he was lovable as the jovial antithesis of Antiochus. He played the part of a truly loving father with a sense of humor as a partying rancher who always seemed to be in the midst of a soedown.

Wendy Wallace was the rancher's daughter Thaisa. She portrayed the part well by acting virtuous and fair, but never seemed to age in performance, although the part of Thaisa spans several decades.

John Mulvey was another one of the lords and represented the

part as a kind of pseudo wizard. Wearing a very unruly wig, he especially contributed to the comedy of the play.

Several scenes in the play were outstanding, especially for *Pericles*. One was a shipboard scene where *Pericles* is again bewailing his tragic state. This could easily have been one of Shakespeare's blander monologues except for the fact that Dalziel, as *Pericles*, wallowed in a cesspool of self-pity, while at the helm as it rocked back and forth.

The best humor in *Pericles* was sexual, however. Dr. Joyce Henry was head Madame of a pathetic but appealing house of ill fame. Her performance was quite professional to say the least. Her and pimps Pander and Bault, played by Dr. Wickersham and George Weeks, bellowed out bawdiness with gusto. Weeks was one vile henchman.

The final scene of the play was the most moving. Dr. Henry acted at the other end of the moral spectrum in this scene as the goddess Diana. Dalziel expressed his excess of happiness more sincerely than he had done with *Pericles*' excesses of despair, although his portrayal of depression in the beginning of the scene had been a little frightening in its accuracy.

Battle was touching as a daughter trying to gain her father's recognition. The ballad she sang to *Pericles* was compelling and eloquent.

Like most reunion scenes, it wrapped up the play neatly. Although *Pericles* might not be a very profound play, proTheatre's version of it was as amusing as it was creative.

Class Of '83 News

by Frank Correll
Class Vice President

There will be a class meeting for all freshmen on Monday April 21 at 12:30 p.m. in Wismer cafeteria. This will be an organizational meeting for people who want to become involved with our class.

On Sunday April 27, there will be a guys vs. girls softball tournament. There will be four teams, each with 11 players of the same sex. The winner of the first game will play the winner of the

second game for the championship. Only 22 guys and 22 girls will be allowed to play, so if you are interested, see one of the class officers for details.

The gym is opening up from 5 p.m. to 10 p.m. on Sundays on an experimental basis. If there is a good turnout, the gym will be open on Sunday evenings next semester. If you would like the gym open on Sunday evenings, then grab a few friends and play some ball at the gym for the next few Sunday evenings.

CAMPUS FOCUS

Students Acquitted From "Loud" Party Charges

BROOKINGS, S.D. (CH) — Hosting a party doesn't necessarily make one responsible for the noise it may cause, a South Dakota court ruled recently.

Five South Dakota State University students were acquitted of charges they disturbed the peace because the prosecution couldn't prove they directly caused any noise. The case arose after a neighbor complained that he was disturbed by the sounds of car doors and horns and by loud talking during a party hosted by the five students in their house near the SDSU campus.

The complainant had four other neighbors corroborate his testimony, including one who said he heard loud music coming from the defendants' house. Police who were called to the scene said, however, that the house was "unusually quiet" for a party site.

The prosecutor maintained that because the five students invited party-goers and supplied liquor, they were responsible for any resulting noise. But because no witness could identify the defendants as the source of the disturbances, all five were acquitted.

Frisbee Attains Class Status

TAMPA, FLA. (CH) — University of South Florida students can now earn academic credit for throwing Frisbees.

That doesn't mean, however, that tossing the brightly colored discs on the dorm lawn three days a week will earn a student an easy 'A.' Frisbee students at USF have to tackle written assignments and exams and devise their own Frisbee game and nine-hole golf course in order to obtain their two hours of physical education credit.

Acquiring the basic skills and strategies of disc throwing is a part of the class and those entering will be divided into three categories — beginning, intermediate and advanced. The class has its own textbook — the Frisbee Player's Handbook by Mark Danna and Dan Poynter — and is taught by two graduate students who hold Frisbee Masters rankings.

The instructors say Frisbee is now viewed as a sport, not a fad, and one points out that Frisbee helps develop "cardiovascular fitness, kinesthetic awareness and body coordination."

And to think it was once just a game.

Students To See SAT Answers' Scoring Key

WASHINGTON, D.C. (CH) — Students will be able to review their Scholastic Aptitude Test (SAT) answers and verify their scores under a program announced recently by the College Board.

For a fee that probably won't exceed \$4, the College Board will send test takers their answer sheets, a scoring key and information on how the final score is tabulated. Correct answers to test questions won't be provided, however.

The College Board action is an attempt to ward off a national movement for testing regulation. College Board President George Hanford says the new proposal "strikes an appropriate balance" between consumer concerns and the Board's ability to continue conducting tests. The College Board has opposed a New York law requiring test questions and answers to be made public.

A New York congressman who has proposed national testing legislation is apparently not dropping that effort in light of the College Board proposal. An aide to Rep. Ted Weiss says the Board's action shows it is "tacitly acknowledging the validity of our arguments." The aide called on the College Board to support the Weiss bill.

Computers Become Mandatory At Harvard

CAMBRIDGE, Mass. (CH) — Students aren't the only ones trying to keep up with modern technology at Harvard University.

Next fall, all Harvard students will be required to take a two-week mini-course on computers. Over 200 faculty members are trying to get the jump on students, however, by taking the course now.

The faculty and staff are being encouraged to take it now, say Harvard officials, so they will know how much computer knowledge to expect of their students. But some professors say the course will also be their first exposure to an increasingly useful subject.

A music professor, for example, believes the course will help in directly analyzing some music. A professor of literature says learning computer programming will help him better understand computerized references to pieces of literature. A third professor, an assistant in linguistics, told the Harvard student newspaper that computers will allow him to "organize and retrieve words and suffixes without looking at textual corpses."

Sounds like a handy skill, indeed.

Phono Cartridge Calls The Tune

Tiny, delicate, based on space-age technology and painstaking laboratory refinements, the phono cartridge is a critical part of any home stereo system.

"Many audio connoisseurs have long believed that the best way to build a harmonious set of stereo components is to begin with a cartridge, match speakers — then add a turntable and amplifier to complement them," explains John R. Kelly, president of Audio-Technica U.S., Inc., a leading manufacturer of phono cartridges.

But most hi-fi owners don't understand how a cartridge "creates" music; and too many underestimate its importance in sound reproduction. That the cartridge plays a key role can best be seen by looking at its function relative to the rest of the stereo system.

From the stylus (needle), which it houses, the cartridge picks up sound directly from the record. The turntable's only purpose is to spin discs and ideally, the tone-arm, preamplifier and amplifier simply pass on the cartridge's message to the speakers — with a minimum of interpretation. So the "character" of any hi-fi set-up lies in the cartridge and the speakers.

The cartridge "plays its song" through the stylus tip at the end of the cantilever arm that extends out from the cartridge body. The arm moves up and down to track undulations in the record groove, while the cartridge body stays relatively still.

Together they move tiny magnets and coils back and forth near each other to create an electrical signal that is eventually amplified into music.

Cartridges vary both in quality and "flavor" of the sound they reproduce. A major difference among them is the shape of the stylus tip. Common varieties include spherical (ball shaped), elliptical, which have more length than width, and Shibata, which have a more complex shape. Each has advantages, and prices and quality vary. Consult your audio store salesman for a comparison.

The elliptical stylus starts out spherical, then two sides are ground into it. A third type of stylus, the Shibata, has more sophisticated grinding, enabling it to track even deeper.

The other basic structural distinction between cartridges is whether the magnets or the coils are attached to the cantilever arm. If the magnets are on the arm, they are the moving part while the coils stay rigid on the cartridge body. Most cartridges are "moving magnet."

Some cartridges, however, are "moving coil," with magnets fixed on the body and coils

moving on the arm. These cartridges are favored by many audiophiles because of their crisp accurate response to changes in the record grooves.

Specifications can be generally accurate guides to cartridge quality, but there is only one good way to choose the right one: listen carefully to a number of cartridges in various combinations with speakers, and hear the differences — which can be significant.

Some units give a "bright sound, emphasizing treble or "high;" others feature extra

bass response; and still others have "flat" or natural pick-up.

After auditioning several high-quality cartridges you can't go far wrong on a purchase. Just let your ears guide you.

To answer questions about phono cartridge design and performance, Audio-Technica has prepared the **Cartridge Buying Guide**, which includes an explanation of cartridge-related specifications and terminology. The booklet is available by writing to Audio-Technica U.S., Inc., 33 Shiwasssee Ave., Fairlawn, OH 44313.

Lacrosse Up To Potential — Men's Track Reaches — Halfway Point

Since returning from Easter Recess, the Men's Lacrosse Club has finally started performing up to its potential. By winning two out of three games in the past week, the club has boosted its record to 2-3.

The team recorded its initial victory last Saturday in a 19-10 thrashing of the Penn State jayvee team. In a game that wasn't as close as the score would indicate, Ursinus was totally in control for the entire game. In what was perhaps the Club's best effort in its three year history, excellent overall efforts were achieved both offensively and defensively. Mike Chiarrappa's eight goals led the offensive thrust, while Marty Sullivan on defense and Kevin Burke in goal anchored a staunch defense. Especially outstanding in this game was the play of the first Midfield line of Scott Garrison, Bruce Kuo and Rob Shillingford. The outstanding transition back and forth from offense to defense of this line was what made the entire effort possible. Shillingford's four goals made him Ursinus' second hire scorer of the game, while Kuo and Garrison each added two goals. Bill Black, Bob Pfeiffer and Pete Clifford added single goals to round off the Ursinus scoring.

Monday afternoon, the team traveled to Widener to face a varsity unit which was holding down first place in the MAC. Against a much more talented team, the Bears were never really in the game in a 16-2 loss. The team played a decent first half, but a disastrous third quarter in which Ursinus was outscored 6-0 put the game out of reach early on. Despite the score, Kevin Burke had a good game in goal, as did Marty Sullivan on defense. Bill Black chipped in with a good effort at attack. Rob Randelman and Bruce Kuo scored the Ursinus goals.

The club's most recent game was Wednesday afternoon. Competing back on the club level, Ursinus flattened East Stroudsburg State by a score of 10-3. In a sorely needed good effort in order to wash away the side effects of the Widener game, Ursinus was once again in control throughout.

Ursinus romped to a 19-10 victory last Saturday in a long-awaited showdown with Penn State. Here, Tom Walter, right, faces off against a Penn State opponent. (Photo by Larry Muscarella)

Bill Black and Rob Randelman each had three goals to lead the team's scoring, while Mike Chiarrappa added two more. Single tallies by Scott Garrison and Bruce Kuo finished the Ursinus offensive attack. Kevin Burke continued his outstanding play in goal making 17 saves, while Marty Sullivan had his fifth consecutive outstanding effort on defense. Mark Sander's effort on defense cannot be overlooked, as between Sander, Sullivan and Midfielder Tom Walter, Strouds-

burg was prevented from generating a consistent offensive attack. The first midfield line was once again excellent on offense and defense, as was the first attack line of Randelman, Black and Chiarrappa on offense.

NOTES: Next home game is tomorrow, Parent's Day, 1:30 p.m. against Bloomsburg State... the April 9 ANC game was rained out and will be made up this Wednesday....Ursinus also travels to ANC for a regularly scheduled game on Monday.

Baseball Hammers W. Maryland

by Joe Lazar

The Ursinus Baseball team, led by Jim Rumer's bases loaded double, defeated Western Maryland 11-8 on Tuesday to cap an eight-run sixth inning. The game was typical of the way the Bears have been playing baseball this year. It seems that for the first five innings of the games, the Bears' bats sleep while allowing opposing teams to gather leads. Ursinus then responds in the late innings to win games that seemingly were lost. Tuesday's game was no exception.

Western Maryland built a 3-0 lead in the second inning until Ursinus got one run back in their half of the frame. Both teams traded runs in the middle innings, and the score stood 4-2 in favor of Western Maryland when the fireworks started.

In the bottom of the sixth, second baseman Tom Beddow walked to open the inning. Short-

Jeff Grassie at bat vs Johns Hopkins during Saturday's doubleheader. The two teams split, with Ursinus winning an 8-7 thriller in the opener before falling 6-3 in the nightcap. (Photo by Larry Muscarella)

stop Craig Walck singled to right, with Beddow taking third base. After Walck stole second, first baseman John Blubaugh (2 for 4) sliced a single to left, tying the score at 4-4. Now the fun started. Singles by designated hitter Joe D'Ascenzo and third baseman Jim Dreves (3 for 4) gave the Bears a 5-4 lead. One out later, pinch hitter Rich Barker walked to load the bases. Centerfielder Rumer then broke the close game wide open with a long double knocking in two runs. When the dust cleared, Ursinus was leading 7-4. But the rout wasn't over yet. Left fielder Jeff Grassie knocked in two of his game-high three RBIs when he singled to center. One more run was scored, leaving the bewildered and battered Western Maryland ballclub behind 10-4 after six innings.

It didn't take long for Western Maryland to recuperate. In the top of the seventh inning they came back with three runs off

by Dave Garner
With the season half over, the 1980 Ursinus Track Team has a 3-2 record. It has been an up and down schedule so far for the Bears, who have rolled up big wins over Elizabethtown, Swarthmore and Muhlenberg, but have suffered significant setbacks at the hands of F.& M and Widener.

Despite strong winds which interfered with both the running and throwing events on Saturday, April 12, Ursinus easily handled host Muhlenberg by a score of 92-38. Led by junior Dan Stella's fine performance in the 440 yard intermediate hurdles, the thinclads captured twelve of the fifteen first places in the meet. Freshman Dave DiMattia* and Tim Grant were double winners for UC; Dave won the shotput and discus while Tim placed first in the 440 yd. run and triple jump. Ursinus dominated the distance events with Ron Shaiko taking the mile, Rory Wade winning the 880 yard run and Pat Walker cruising to victory in the three mile. Other firsts were recorded by Steve Schaffer in the long jump, Tom Broderick in the high jump, and

John Sweeney in the pole vault. Even though he placed second in the javelin, Soph Keith Beck qualified for the MAC championships with a heave of 177'8".

Widener spoiled the Bears only home track meet this year by dealing the hosts an 84-61 loss on Wednesday, April 9. Despite a sweep of the distance events, UC could not muster enough fire power to handle the powerful team from Chester. Jim Donaghy, Tim Grant and Steve Wallace eased to a 1-2-3 finish in the 100 meter run. Junior Ron Shaiko outdistanced teammates Roland Desilets and Bill Hutchinson to win the 1500 meter run, while Pat Walker led Joe Figurelli and John Perrotto to a sweep of the 5000 meter. Dave DiMattia won the shotput with an impressive toss of 47'11", and Tom Broderick notched a first in the high jump. The 1600 meter relay team of Shaiko, Donaghy, Grant and Wade, who earlier in the meet just missed qualifying for the National Championships in the 400 meter run, easily defeated Widener in the final event of the meet. The Widener meet was the first time that Ursinus has competed on the track since it was converted to meters.

Injuries are a problem for the Bears this spring. A leg injury to Danny Stella kept him out of two meets while John Sweeny is hampered by a sore neck. Dave DiMattia continues to perform well in spite of a bad knee. The Bears have lost pole vaulter Jim Mulroy and distance runner Dave Garner for the season to injuries. Mulroy is sidelined with bad knee while Garner is still recovering from an off-season operation on his ankle and a stress fracture in his foot.

The Bears hope to keep the winning momentum going tomorrow against Dickinson and Johns Hopkins. On Wednesday, the thinclads face a stiff test in a tri-meet with Delaware Valley and Haverford.

INTELLIGENCE

Do you have a keen, agile mind with the ability to self-start, produce and lead? Would you like to be an analyst, decision-maker and manager of our nation's invisible first line of defense? Then "Naval Intelligence Officer" may be for you. If you are selected to join the naval intelligence team, it means the Navy considers you outstanding. It cannot be otherwise. Intelligence is the guardian of our peace.
