The Ursinus Field Hockey Team ran into tough going out in Carbondale, Ill. at the National Tournament. A first round 1-0 upset at the hands of 13th seeded Cal-Berkley in the opening round eliminated the Bears from a championship shot. Yesterday, William and Mary eliminated Ursinus from the tournament with a 3-0 victory. "Sometimes you try hard, but you just can't do it," stated Head Coach Adele Boyd. "Hopefully we can learn something from this." Teams remaining in the tournament are San Jose State, Cal-Berkley, Penn State, and Delaware. The Lady Bruins will remain in Ill. until the tournament final Saturday, and then return home about midnight that night. The Grizzly salutes this year's hockey team for its outstanding season. Once again, you've made Ursinus proud, and have proved to us that you are championship material.

More expected next semester...

Dean of Students' Office Releases Vandalism Figures

by Barbara Foley '83

Recently, an article appeared in the Villanova University newspaper, *The Villanovan*, stating that the rate of vandalism on that campus had steadily increased in the past year. The figures jumped from approximately \$3,500 in the month of September, 1979, to \$10,000 in September, 1980. Prompted by this article, *The Grizzly* decided to investigate the incidence of vandalism here at Ursinus since the beginning of the school year.

David L. Rebuck, Associate Dean of Students, informed *The Grizzly* that there have been 60 charges since September 1, 1980 for all men and women. The

Dean David L. Rebuck

current all-campus figure for vandalism, not including residence halls, stands at \$542. All Ursinus students pay the above mention figure through a \$6.65 base fee for campus damages included in tuition. The figure is usually slightly higher; however, because each person is charged for specific damages in his/her particular residence hall, this charge is added to the \$6.65 base fee.

According to Leslie March, Associate Dean of Students, there has been a total of \$442.63 worth of damage done in the Women's Quad and the College Union. Of this figure, \$49 was assessed to a specific group. The remaining \$393.63 in damages occurred in the Women's Quad. This figure includes the replacement of three fire extinguishers, one badly torn bathroom screen, a telephone

(Continued on Page Six)

Maintenance Working To Conserve Energy

by Leah Whitman

Due to rising utility and fuel costs, the Maintenance Department has been working to lessen the costs of energy at the College. In addition to preventive maintenance checks four times a year, they have taken several conservation measures.

Although water is the least costly of all the utilities, when coupled with its partner sewer rental the cost nearly doubles. Ursinus' last quarter water bill was \$5,500, and the sewer rental was \$9,500. Sewer rental bills are determined by the number of gallons of water used. Water conserved has a twofold savings: water cost and sewer rental cost. To cut down both of these, the Maintenance Department has installed water saving showerheads throughout the campus.

Obviously, shorter showers can save water. However, a simple measure on the part of any student can help prevent waste of thousands of gallons — reporting leaks or dripping faucets. One defective toilet can waste 50,000 gallons of water overnight! That is more water than the average family uses in nearly nine months.

Conventional and Non-Conventional

Most of the conventional methods to lessen fuel consumption have already been taken. Thermopane windows in New Men's Dorm will be installed shortly, and insulation has been added in buildings where practical. New heating controls, more efficient thermostatic valve-types similar to those used in off-campus buildings, have been installed in Brodbeck Hall.

Ritter, Corson Hall and Wismer Hall have been approached in a different fashion. The roofs of these buildings have been sprayed with polyurethane on top of which a coating of butyl rubber has been applied for waterproofing. This is an experimental measure, the effectiveness of which has not yet been determined.

To lessen the sting of electric bills, more inexpensive mercury vapor lights have been installed outdoors and in the new Utility Gym. Since fluorescent lights provide more illumination per watt than incandescents, the 130 watt incandescents in Wismer have been replaced with 80 watt fluorescents. These are the newer "warm white" tubes that provide softer lighting than do standard fluorescents.

Weight Room Relocated In Helfferich

by Pat Keenan '84

The weight training facilities here at Ursinus have been changed this year due to several near serious accidents that occurred last year when students were lifting free-weights by themselves. While bench pressing large amounts of weight, some students were unable to lift it from their chest. Several times Michael Cash (Sports Information Director) and Richard Whatley (P.E. Professor/Assoc. Dean of Students) had to assist students in such dangerous situations.

Another reason for the rearrangement of the weight training facilities concerns the fact that campus strangers were stealing equipment from the weight room. However, the blame for stolen equipment cannot exclusively be placed on "outsiders". Some Ursinus students are suspected of the same crime.

The Universal Gym has been (Continued on Page Seven)

College Union Attempts World's Largest Molecule

by Melissa Hanlon '84

Over a hundred Ursinus students and faculty members gathered in the Union lounge for this year's Record Breaker, the world's largest gumdrop and toothpick molecule. The event, held on Thursday, November 13, was sponsored by the Union Program Board and planned by Stephanie Kane and Diana Dakay, the co-chairpersons of the

good number of people participated and we had a lot of fun."

Participants received commemorative tee shirts designed by Diana Dakay. With each team sporting a different color shirt, the mixture of people in the lounge virtually resembled a big bag of gumdrops.

The Special Events Committee of the Union Program Board has sponsored such record breaking

...approximately 20 feet long, 10 feet wide, and a foot and a half tall...over 80 pounds of gumdrops and over 6,000 toothpicks...

Program Board's Special Events Committee.

The finished structure was approximately 20 feet long, 10 feet wide, and a foot and a half tall; it was composed of over 80 pounds of gumdrops and over 6000 toothpicks. It took the 10 teams, including a team of faculty members and one of Program Board members, almost one half hour to complete.

According to Stephanie Kane, no one has ever attempted to set a record by building such a structure. She was very pleased with the turnout of the event. "The construction of the molecule required a real group effort of cooperation and coordination. A

events in previous years. Last year's attempt was for the world's largest sundae; other past record breakers have included world's largest hot dog, map, banana split, puzzle, tinker toy, and hamburger.

The Union Program Board also sponsors other entertainment events for the benefit of the College community. Throughout the year, it sponsors Coffeehouses, minicourses, and All-Campus Talent Night, the College Bowl, and many of the films shown on weekends in Wismer Auditorium. It also coordinates the spring Superstars Week and various contests and tournaments.

Representatives of Ursinus' faculty, administration and student body took part in the College Union's attempt to build the world's largest molecule on November 13.

Off The Editor's Desk

The new Utility Gym had its first exposure to vandalism at last Saturday night's party. Apparently, someone thought it necessary to prove his masculinity by destroying the enclosures around the stalls in the men's room. I'm still quite baffled by what this action proved, and I'm sure anyone who attempted to use the facilities after this was outraged by the inconvenience.

Unfortunately, someone had to be responsible for the damage costs, and in keeping with party registration guidelines, the party sponsors (Delta Pi and Phi Psi) must pick up the tab. I do not disagree with this system of compensation for damages, while at the same time I can appreciate how deeply this vandalism will dip into the wallets of these two groups.

Let's look to the future, and consider some conceivable preventative medicine. The obvious action to take at future parties would be for the sponsoring groups to delegate a guard in the lavatories to watch for potential vandalism. However, at best, this method seems juvenile, time-consuming and slightly militant.

Needless to say, there must have been some other students going in and out of the men's room while this vandalism was taking place. Typically, these onlookers did not want to get involved, and chose not to report the incident to the party sponsors. However, perhaps a few realistic thoughts will encourage student cooperation in the future.

First, as I have mentioned in previous editorials, when students bring visitors to a campus function, they should keep in mind that they are acting as hosts and are responsible for the actions of their friends. Next, try to be aware of the financial burden that potential destruction will place on the sponsors of the party. Even worse, if this damage goes unassigned, eventually the costs come out of our own pockets in the way of tuition, room and board. Finally, one appeal to common sense. Although the Utility Gym will also be used for athletics and cultural events, the facility was created primarily for the purpose of providing Ursinus students with a place to hold social gatherings where alcohol is permissible. Essentially, it is our building, and it is up to us to maintain its upkeep. A good start would be to party only with a crowd that is there to have fun, and to deal with any potential vandals or troublemakers by giving them the boot.

And now I'm going to do something that I swore I wouldn't do this year, but the events of this semester (or lack of them) have changed my way of thinking.

Many times in the past, particularly during my freshman and sophomore years, I have been accused of being fanatically supportive of a musical group called "The Fabulous Greaseband." Friends of mine, particularly those who worked on this newspaper's editorial staff, actually resorted to calling me "A.Q. Greaseband," a title derived from a cross between my middle name and that of the group to which I am referring. However, I have chosen to take advantage of my access to this column, and bring to light a few pertinent issues concerning this matter.

Last year, a few key members of the Union's Program Board decided to cut from their 1980-81 budget the annual Ursinus appearance of The Greaseband. The prime consideration here was the extreme cost of the band (almost \$2,000), and it was assumed that several less expensive bands would be booked in place of this event. So far this year, we have yet to see anything more than the routine movies, Coffeehouse, minicourse and College Bowls sponsored by the Union (and the gumdrops, too!). These events, of course, were included in the budget, and the funds still remain for some "special events."

With this in mind, as well as the constant badgering by my friends and relatives from home concerning the return date of The Greaseband, starting today The Grizzly will be circulating a petition in favor of a return performance by The Greaseband next semester. We'll be shooting for lots of signatures in order to give the Union a convincing argument in favor of our request.

Need some more convincing yourself? Simply ask any one who has seen The Greaseband's visits to Ursinus. Outside of the pre-parties, post-parties, tremendous outside revenue, and enthusiastic crowd participation via costumes, dancing and singing, The Greaseband proves each and every time that "Rock 'n Roll Is Here to Stay!"

Journalism To Be Added To Curriculum

by Stephanie Kane '83

There's good news for all students who are anticipating a career in journalism, or even those who have some interest in the media, particularly newspaper work. A new class will be added to the curriculum in the fall of 1981, focusing on journalism techniques.

Although there is currently an Advanced Composition Course offered at Ursinus, it deals mostly with non-fictional writing, with only an introduction to journalism. The new course will be devoted entirely to journalism, focusing on layouts, headline writing and basic writing procedures. Students will have the opportunity to visit various newspaper offices in the surrounding area, as well as some major publishers in Philadelphia.

Since the course will be an aid for writing in school publications, there will be some student input in the design of the course; editors from The Grizzly, Lantern, and Ruby will be invited to contribute their knowledge and experience to the class.

The journalism course will be a three-hour class, with English Composition 101, 102 or the equivalent as a prerequisite.

Espadas To Speak Today In Illinois

Dr. Juan Espadas, Assistant Professor in the Romance Languages Department, is speaking at the annual meeting of the American Association of University Professors of Italian to be held today at the University of Illinois. He will present a paper on the problems of teaching a foreign language to speakers of that language who are immigrants or second or third generation Americans.

Espadas, who teaches Spanish, also was a program speaker at the recent annual meeting of the South Central Modern Language Association in Memphis, Tennessee, with a paper on the language of socially marginal groups in Spain.

A native of Spain, Espadas has been a member of the Ursinus faculty since 1972. He is a graduate of the University of Illinois, B.A., with honors and the master's degree in Spanish Linguistics, and earned his Ph.D. in Romance Philology from the University of Pennsylvania.

He is married and resides in Newark, Delaware.

Maintenance Planting New Trees

The Maintenance Department, headed by Fred Klee, will be busy this year maintaining the greenery of Ursinus' campus. The trees presently on the campus are victims of vandalism and also the "Dutch Elm Disease." Klee has been treating the trees with chemicals, but has found that these chemicals have not had much effect.

The elms have been replaced by Japanese Zelkovas, which are disease-resistant. A Red Maple will be planted next to Corson Hall in the hopes that it will grow large by the time the pines now in front of Corson die. Several Pin Oaks will replace the dead trees in front of 777 Main Street. Junipers will be planted adjacent to the Union and behind Curtis to make the area more appealing.

Placement Interviews Coming Soon

The Career Planning and Placement Office will have available starting at 3:00 P.M. on Tuesday, December 2, sign-up sheets for interviews with various companies who will be interviewing on campus next semester. Starting on November 17, seniors may sign up for interviews in the Career Planning and Placement Office, Corson Hall 113, with the following companies:

- Friday, Jan. 23 — Phila. National Bank (Domestic Lending)
- Monday, Jan. 26 — Ken Crest Centers
- Tuesday, Jan. 27 — Metropolitan Life Insurance (Group Insurance)
- Wednesday, Jan. 28 — Ketrion, Inc.
- Thursday, Jan. 29 — Bell of Pennsylvania
- Friday, Jan. 30 — Central Penn National Bank
- Monday, Feb. 2 — Prudential Insurance Company
- Tuesday, Feb. 3 — Phila. National Bank (Community Banking)
- Wednesday, Feb. 4 — McNeil Pharmaceuticals
- Thursday, Feb. 5 — Key Business Systems
- Friday, Feb. 6 — First Investor's
- Monday, Feb. 9 — Rohm & Haas
- Tuesday, Feb. 10 — B.F. Goodrich
- Wednesday, Feb. 11 — Girard Bank
- Friday, Feb. 13 — Merck and Company

The Career Planning and Placement Office is open Monday through Friday from 8:30 to 12:00 and 1:00 to 5:00.

Reader Rebound

To the Editor:

The Foreign & Domestic Teachers Organization needs teacher applicants in all fields from kindergarten through college to fill over 500 teaching vacancies both at home and abroad.

Since 1968, our organization has been finding vacancies and

locating teachers both in foreign countries and in all 50 states. We possess hundreds of current openings and have all the information as to scholarships, grants, and fellowships.

The principle problem with first year teachers is where to find the jobs!

Since college newspapers are

always anxious to find positions for their graduating teachers, your paper may be interested in your teachers finding employment for the following year, and print our request for teachers.

Our information and brochure is free and comes at an opportune time when there are more teachers than teaching positions. Should you wish additional information about our organization, you may write the Portland Oregon Better Business Bureau or the National Teacher's Placement Agency, UNIVERSAL TEACHERS, Box 5231, Portland, Oregon 97208.

We do not promise every graduate in the field of education a definite position. However, we do promise to provide them with a wide range of hundreds of current vacancy notices both at home and abroad.

Sincerely,
John P. McAndrew, President
Foreign & Domestic Teachers.

USGA Notes

The USGA met last Thursday in Corson Hall with the major topic of discussion being committees on which students feel they should have representation. Some of the committees on which the USGA will try to get representation are the Advisory Committee on Faculty Promotion and Tenure, the Appeals Committee, the Freshman Orientation Committee, as well as several others. This list of committees has been presented to President Richter, who will make the final decision on whether representation will be granted or not.

With the upcoming basketball season, the USGA has also been looking into the MAC rules for proper fan conduct at home basketball games. The decision was made to form a committee to meet with Randy

Davidson, Athletic Director, in order to discuss the rules and his interpretation of them.

Another area of interest was the possibility of having at least some of the administrative offices in Corson Hall open during lunch hours. It was felt that many students and parents are only free during lunch, and in order to convenience more people, Corson should be open during this time period. The USGA executive council will meet with Dr. Kane to discuss this issue.

The next meeting of the USGA will be Thursday, December 4th at 6:30 in Corson Board Room. Come out and get involved!

Government Association

Seminar with limited openings...

Medical Ethics Course Offered

by Kevin O'Neill '83

The newest addition to the spring roster at Ursinus will be a unique philosophy course introduced by Dr. William B. Williamson. This new philosophy elective, titled Philosophy 302, has a special appeal to pre-med, biology and all related majors. The course deals with the new questions in medical ethics raised by modern technology.

Dr. Williamson, who has taught at the College for 12 years, is the present head of the Philosophy Department. Williamson's interest in this area began about five years ago when he was asked to be a Philosophical Consultant on Medical Ethics at Jefferson Medical College in Philadelphia. He is currently assisting Dr. Susan Hain in teaching a course on medical

ethics at Jefferson. Hain will help in the teaching of this new course here at Ursinus. Williamson also holds a position as consultant to Montgomery County Community College and is now teaching a course with Dr. Elaine Schultz entitled "Ethical Decisions in Health Care."

Since his introduction to the subject of medical ethics, Williamson has accumulated a reputable background in this area. His further interest into the ethical questions of medicine has encouraged him to write a book on this subject along with Hain and Schultz. Dr. Albert C. Allen, Professor of Biology, will also contribute a chapter to this book.

Williamson is going to conduct the course in a "pure" seminar style. He wants to limit the class size to approximately 15 students.

Philosophy 302 will meet once a week and run for the entire spring semester. As a three credit course, it will present an attractive area of study for junior and senior biology and pre-med students.

After several introductory lectures and discussions, Philosophy 302 will feature lectures by concerned members of the faculty and the medical field, and other professors and philosophers interested in health care.

Contributions and opinions will be expected from the students during each seminar. One major paper on ethical dilemmas in modern medicine is required from each student. This research will be presented to the class. No examinations will be given to the students. Each grade will be derived from the evaluation of the student's presentation and his contributions during the seminar.

The course of study will cover the major ethical decisions in medicine and analytical, step by step, process by which to approach these decisions. Some of the suggested topics are abortion, euthanasia, genetic engineering, fetal research, confidentiality, and many other difficult medical questions. This aspect of Philosophy 302 appeals specifically to biology and pre-med. students. There is a growing interest among medical schools about such questions. Many schools have recently begun workshops on this subject of medical ethics, given to all first year students.

Many students have already shown an interest in the new course. Williamson would like all students interested in Philosophy 302 to contact him and set up an interview. During this interview, prospective members of the class will be informed on all aspects and advantages of this study program.

Phil. & Rel. Dept. Lecture On Judaism

Rabbi Mayer Selekmán presented two controversial views of the Jewish faith at a special lecture on Judaism at 1:00 p.m. last Monday, November 17. The program was sponsored by the Philosophy and Religion Department, and was held in Bomberger Auditorium.

Rabbi Selekmán, of the Broomall, Pa. Temple, is described by many as a "liberal, suburban rabbi." Although he conforms with basic Jewish law, he presented his supportive views of two contemporary issues.

The first area with which the Rabbi dealt was his approach to intermarriage. He stated that

(Continued on Page Six)

Rassias Method Explored for Languages

by Kay E. Buckwalter '81

Dr. D. Henry Buckley, professor at Dartmouth College, presented a four-hour lecture and demonstration of the Rassias method of teaching foreign languages this past Monday and Tuesday afternoons. The unique method of teaching was developed by John A. Rassias, of Dartmouth to increase language proficiency for all the students in their second language. Buckley has worked with Rassias and is presently the Executive Director of the Rassias Foundation.

Aims of the method are to create a dynamic pace in the classroom, expose the students to the language and culture by providing a high involvement of the students in the classroom, reduce homework, foster spontaneity of expression, eliminate self-consciousness of the students and emphasize the importance of languages.

The seminar was attended by faculty, administrators and students. Buckley discussed at length the advantages of the method. He stressed the fact that the Presidential Commission on Foreign Languages emphasizes the importance of learning other languages for communicating with other nations and it is essential for the defense of our national security.

Professor Annette V. Lucas, Chairperson of the Department of Romance Languages, would like to see the Rassias method implemented at Ursinus. She stated that this method is well-known in foreign language circles and there are demonstrations in the Philadelphia area (Buckley's office is in Philadelphia). She also commented that Temple University has a program using this method.

Theory of Rassias

The first session was devoted to the theory and development of the Rassias method. One striking difference of this method is the intensity of the classroom. Fifteen hours per week are dedicated to the target language. These are equally divided among three areas: the master teacher, the apprentice teacher and the language laboratory.

The master teacher is the professor. He introduces new

concepts, usually grammatical, to his class of 22 students. He stresses group participation and is theatrical as he teaches. Only the target language is spoken by the master in and out of the classroom.

Apprentice teachers, better known as AT's, are upper level students, and rarely language majors. They must go through rigorous training by the staff. AT's work with smaller classes, eight to ten students, to improve pronunciation and to detect problems.

Language laboratory work is an integral part of the target language. Because of the intensity, the homework load is lighter. Again, the AT's supervise the labs similar to labs at Ursinus.

Buckley presented the material via video-tape and lecture. He spiced it with amusing anecdotes of his experiences using the method.

Actual Demonstration

On Tuesday, Buckley reviewed the basics for the newcomers and quickly followed by recruiting students and faculty for his class. He proceeded to teach Greek to his group of five using the Rassias method.

None of his pupils had any Greek before and at the end of thirty minutes, each could count to twelve, distinguish members of a family and recognize different parts of speech.

There is no intimidation, but a sense of group accomplishment. The result is two-fold: a knowledge of a foreign language and enjoyment.

Buckley continued with various techniques he uses to develop interest and to introduce cultural components to his classes. His desired ac-

complishment is to have the students express themselves spontaneously.

Will Ursinus Adopt Rassias?

Dr. Lucas and members of the Romance Language Department are anxious to apply for a grant from the Rassias Foundation which will enable Ursinus to implement this method. First, Ursinus as an institution, must meet certain criteria: 1. Commitment to the Method. Once the method is begun, it must be continued. 2. Institutional Resources. Ursinus must prove it can provide faculty, financial and educational resources to support it. 3. Broader Interest. The Foundation is committed to developing better communication and changing teaching values. It favors institutions with a similar outlook.

In the present French 101 course, the Rassias textbook is used. The staff has implemented some of this method on a very small scale but as the language program now exists, it is difficult to go full force. With the grant, experts from the Foundation will come to Ursinus to train master teachers and AT's.

The application will be sent to the Foundation before the end of this semester. Lucas would like to see the program begin during the summer session if at all possible. If not, next fall if Ursinus receives a grant.

If Ursinus does adopt the Rassias method, this would mean a revamping of the language program. According to Lucas, the number of hours would increase to eleven per week: five with the master teacher, four with AT's and two of laboratory work.

This publication is available free to all members of the campus community. A year's subscription is available to others for \$8, and may be obtained by writing to the College.

CAMPUS FOCUS

It's a bird, it's a plane, it's Retsmah!

TAMPA, Fla. (CH) — If Rocky the Flying Squirrel achieved stardom, can Retsmah the diving hamster?

University of South Florida student Niles Steckbauer is convinced he will. Steckbauer thinks his pet's ability to dive into a pool from a 27-foot platform will earn national interest. In fact, he's so convinced of Retsmah's potential, he's found the furry creature a lawyer, a producer and an escort. And he's still looking for a screenwriter to use Retsmah's talents, as well as a Lloyd's of London insurance policy to secure his future.

Retsmah — that's hamster spelled backwards — is already a seasoned performer, delighting USF students and local television crews with his dives. He learned to swim in Steckbauer's sink and took his first dive into the bathtub. From there it's been straight up, as he quickly progressed from 10-foot dives to his current 27-foot leaps.

Steckbauer's convinced he can go as 50 feet. "We don't know what his limits are yet," he says.

Smiles turn to groans for Ms. Piggy

MURFREESBORO, Tenn. (CH) — Foiled by the jealousy of her competitors, Ms. Piggy didn't reign over the Middle Tennessee State University homecoming.

Instead, she withdrew from competition after being selected as one of five queen finalists. Her departure was prompted by the "negative attitudes" of other students, says Ms. Piggy, who was actually an MTSU student who wore a pig mask and refused to reveal her identity.

She was sponsored in the homecoming queen competition by the MTSU Advertising Club, which hoped to generate publicity with their unusual candidate. Unfortunately, much of that publicity proved negative. "Everybody loved Ms. Piggy the first day she campaigned, but the second day, after it sunk in she might win, there were some bitter feelings," said the club treasurer. Realizing that, the club officers voted 3-2 to withdraw Ms. Piggy from further competition.

Those bitter feelings came predominantly from other sponsoring organizations and their candidates, who apparently were taking the event too seriously to find even a Muppet amusing.

College To Host 43rd "Messiah" Performance

The renowned Concerto Soloists of Philadelphia and four professional vocal soloists will augment the Ursinus College Choir when the College presents its 43rd annual performance of Handel's sacred oratorio, "Messiah," Saturday, December 6, at 7:30 p.m. in Bomberger Hall. A complete performance of the masterpiece, with talented faculty, alumni and area residents joining the 80-voice choir, will be conducted by John H. French, Music Director at Ursinus.

The Concerto Soloists return for the fourth consecutive year to play the orchestral score. The ensemble, directed by Marc Mostovoy, has been acclaimed for virtuosic performances of music from every period, especially 18th Century masterworks, and "Messiah" is one of their specialties.

The guest soloists are Lindsey Christiansen, soprano; Jennifer

Larmore, alto; Michael Magiera, tenor, and Dr. Neal Tracy, bass.

Soprano Lindsey Christiansen is expert in oratorio, operatic and lieder repertoires, and has given numerous performances in the U.S. and Germany. She holds music degrees from the University of Illinois and the University of Richmond, and has received many honors and awards. Presently, she teaches at Westminster Choir College in Princeton.

Jennifer Larmore received her degree and honors in voice from Westminster Choir College. She was soloist with the Westminster Choir at Gian Carlo Menotti's Spoleto Festivals in Charleston, S.C., and in Spoleto, Italy. She has also sung under conductors Bernstein, Kubelik, Shaw, and Mehta, and currently sings with the National Lyric Opera Company, Washington, D.C.

Tenor Michael Magiera is in his fourth season with the Opera

Company of Philadelphia and his fifth as soloist with the Philadelphia Singers. A recitalist at Ursinus in the 1978 Young Artists Series, his many other credits include the San Diego Opera, Delaware Symphony and Opera Company of Boston. He studies with Dorothy DiScala at the Academy of Vocal Arts, where he also performs.

Neal Tracy, of Lansdale, a 1980 Metropolitan Opera Auditions regional finalist, alternates his musical career between the operatic stage and the classroom. He has sung leading roles in dozens of operas from Don Giovanni to Figaro, and teaches at the Fine Arts Center in Greenville, S.C. He earned a doctoral degree in voice from Indiana University in 1974.

Tickets for "Messiah," which is usually sold out each year, may be ordered now: \$5 for reserved seating, \$4 for general admission.

grizzly off-campus

Miller Brewing Company Co. Sponsors 'Pick 'Em Up' Program

The Miller Brewing Company has added a weekly cash payment provision and increased the value of the prizes awarded in its 1980 College "Pick 'Em Up" reclamation program, Thomas B. Shropshire, Senior Vice-President and Treasurer has announced.

Shropshire said: "The change should stimulate further competition among college groups and result in a record number of recycled cans and bottles. It will further enhance Miller's commitment to a clean environment by stimulating interest in our collegiate reclamation program."

Since its inception in 1973, students participating in the program on campuses around the country have collected more than 33 million pounds of aluminum cans and 17 million pounds of bottles.

The Miller Brewing college program, which began at three universities, is now conducted on over 350 campuses, with many of these participating in the popular "Pick 'Em Up" program. The program is part of Miller's overall effort to help reduce litter and conserve energy. The company and more than 700 of its distributors operate reclamation centers which, in 1979, collected more than 33 million pounds of aluminum beverage cans.

Miller's Pick 'Em Up contest is open to any recognized campus organization in states where the program is legal. Groups are awarded one point per pound of bottles collected and 10 points per pound for aluminum cans collect-

ed each week. Points are accumulated at the conclusion of the contest, which ends one week before final exams. Groups participate in two divisions — one for fraternities and the second for sororities, dormitories and other campus organizations.

Participants in the current contest are eligible to receive such prizes as a wide-screen television, a deluxe stereo component system or 12-piece bar set if they accumulate 7,500 points; a video cassette recorder, component stereo system or color television if the group accumulates 3,000 points; and a washer and dryer,

microwave oven or icemaker if the group collects 1,500 points.

In addition, groups will receive the current cash value for aluminum turned in, Shropshire said.

"It definitely makes the program more attractive because now everyone can receive something for participating," he said. "Plus, all groups become eligible for valuable prizes when the campaign is over."

Miller is an operating company of Philip Morris Incorporated. Principal beer brands include Miller High Life, Lite and Lowenbrau.

Phila. last stop for tour...

Foghat and Outlaws Perform for 'Serious Rockers'

by Beth Harp '84

The hard-hitting sounds of Foghat and the melodic Southern rock of the Outlaws tore the Spectrum apart last Sunday night.

Max Webster opened the show with a fair but unimpressive performance. The crowd was impatiently waiting for some serious rock in the form of Foghat.

The stage was brilliantly lit. The amplifiers were chrome-covered and arranged to look like the lights in city buildings when everyone lit their matches and lighters. Two mirrored spheres were hanging from the ceiling. When the spotlights hit these

twirling balls, it seemed as if the Spectrum were a sky filled with whirling stars.

Foghat roared with "Stoned Blue" and other heavy metal sounds like "Fool for the City." Then the mood grew mellow as the lovely "Third Time Lucky" was done. From a state of total relaxation, the crowd was instantly propelled to a feverish pitch when the first strains of "Slow Ride" were heard.

Foghat did two encores — the crowd didn't want to let them go. The first was a rowdy, but touching "I Just Want to Make Love to You." The second encore

was a bit of a let-down. Foghat did their rendition of Chuck Berry's "Maybelline."

The Outlaws opened with a colorful light show and the rich sounds for which they are renowned. They played very few songs. They were on stage for a total of forty-five minutes. The Outlaws did only one encore — a beautifully arduous "Green Grass and High Tides." Each member of the band played a solo part — it was excellent. Although the continuity was broken once when a spectator on the second level let loose a firecracker, the trail was easy to pick up and follow again. This one song united the whole place — everyone stood in tribute.

This was the last show of the Outlaws-Foghat tour, and some flaws were evident. Although Foghat's lead singer's voice was almost gone, as was manifested when some of the very loud vocals in "Slow Ride" were barely audible, the impact of their music was still strongly felt. The Outlaws did cut their show short, but hearing "Green Grass and High Tides" alone was worth the price of admission. The show was truly a party for all serious rockers.

Art Exhibit On Display In Wismer

by Lisa Lepone '84

While walking through Wismer Auditorium during the past few weeks, one may have noticed the many works of art hanging on the walls throughout the basement level. These paintings are part of the 19th Annual Perkiomen Valley Art Center, Inc., Members' Exhibition.

The judging of the artwork was completed on Saturday, November 8, by three professional artists. The exhibit will be run until Sunday, November 23, when the show will culminate in a reception in Wismer Lounge. During this reception, the prizes will be awarded to those winning works.

The art exhibited in the program is a mixture of works from both professional and non-professional artists of the Perkiomen Valley Art Center, Inc. This art group is a very active and strong organization of people throughout the Perkiomen Valley area, who enjoy creating artwork. The group usually has two exhibits at Ursinus College, one during the fall and another during the spring. These exhibits, according to Dean Ruth Harris, who arranges the events, "have created much interest in this community in the area of art."

The art exhibit is judged every year by professional artists. This year's judges were Carol Schwartz, Donna Corrigan and

Atomic Poison Power Forum On Radiation Draws Mixed Views

by Christine Battle '83

Dr. Ernest Sternglass, Forum speaker of November 12, addressed an unusual crowd in Wismer Hall on the topic of "The Effects of Low Level Radiation in Man." This last forum of the semester was atypical in most

respects compared to its predecessors. The crowd appeared "unusual" in that it consisted not only of Ursinus College students, but was also disproportionately marked with professional people and those of the local community.

An explanation for the presence of the local citizenry is simple: the soon-to-be-completed Limerick Atomic Power Plant. Most present Ursinus students will not be in the Montgomery County area when (and if) the plant opens. Residents of the surrounding area are apprehensive and wish to know more about impending dangers concerning radioactive emissions from the plant.

The explanation for the presence of the professionals is not so simple. It appeared that most were present in defense of careers as scientists or as future "higher-ups" in the field of nuclear energy. Anti-Sternglass literature, published by the Pennsylvania Voice of Energy, was distributed by those I have broadly termed "professionals." The literature proclaims the invalidity of Sternglass' numerous contentions and conclusions.

In all fairness to the reader, I believe it should be stated here that I am not a student of science. I think this is important to note because the subject of nuclear energy is highly scientific — especially in the areas of nuclear physics and chemistry. This does not necessitate my total confusion in the scientific arena. My statement suggests only that my perception of the topic is, by the very nature of my personal studies, not a technical one.

I applaud Sternglass' courage in speaking on such a sensitive issue. The Three Mile Island incident has had a "sensitivity effect" on us, says Sternglass. Man discovered radiation 80 years ago, but, as is true of history since the first days of the industrial revolution, our concerns and responsibilities increase with our technological advances, though this increase is not directly parallel or proportional.

It becomes increasingly evident that science is not the only discipline involved here. The scientist can only apply the principles that he knows to be scientifically valid and experimentally sound. The wide-spread application of these principles involves the economic, political, social and even moral disciplines.

Phil. & Rel. Dept. Presents Lecture

(Continued from Page Three)

intermarriage was "bringing in more new blood to Judaism than it was taking."

The other topic discussed was Messianic Judaism. This is a view held by some Jews, including Rabbi Selekman, who support the belief that the Messiah has already come.

In addition to this 1:00 lecture, Rabbi Selekman was the guest speaker in Professor Keith J. Hardman's morning class on Philosophy and Religion.

Dean of Students' Office Releases Vandalism Figures

booth, and two lamps and lamp shades from one of the lounges. So far, there have not been any off-campus house bills. In comparison, the men's dorms have been charged with a total of \$489 damage. According to Rebeck, \$259 was charged to specific individuals or groups.

Rebeck stated that the cost of damages for first semester are usually low, whereas damages across campus are astronomical during second semester. Rebeck

stressed the fact that the College can understand accidental breakage, and in this case, the student need only pay for repairs. He did say, however, that if the breakage comes as a result of a malicious act of vandalism, students will be required to pay for the repairs and disciplinary action will be taken against them. Both March and Rebeck stated that this is usually not necessary because most students are honest enough to take full responsibility for their actions.

On Dec. 4... Open House Planned By Astronomy Club

Due to rising student interest in astronomy on campus, the Astronomy Club will host an open house early in December. The club's advisor, Dr. Douglas Nagy, said that there will be two open house observatory meetings on December 4. One session will be from 3 to 6 a.m., and the second from 8 p.m. to midnight.

Both will meet in the Marsteller Observatory atop Pfahler Hall. They are open to all students and faculty. Those interested are encouraged to sign up for one of the half-hour time slots posted on the Physics bulletin board. There will be five people allowed into the observatory every half hour to insure that all will have an opportunity to use the telescopes.

There will be one large, permanent telescope at the observatory and one or two portable telescopes. Nagy said that the morning sessions will be viewing the planets Venus, Saturn and Jupiter, as well as a view of the crescent Moon. The evening session will observe the Andromeda Galaxy, the Orion Nebula and several multiple star clusters and systems.

Optimistic but careful about season...

A Look At This Year's Basketball Season

by John Fuller '81

The 1980-81 Ursinus Bruins Hoopsters will open up their season this Saturday night at home against Allentown. The team is highly optimistic but not overconfident as they try to improve on last year's performance.

A year ago, the Bruins finished 16-7, were Champions of the Middle Atlantic Conference Southeast Division (7-3), and placed fourth in the NCAA Mid-Atlantic-Region Tournament. They will lose only two players from that club, which may have been the best in "Big U" history.

This will be the first team that is made up entirely of players chosen and recruited by fourth year Coach Skip Werley. They will play a tough 26 game schedule (9 home, 14 away, 3 in California) against a variety of challenging Division II and III powers (as well as Penn State). The club is made up of four returning starters, six returning reserves, and one freshman. Here is a run down of the players.

Forward Kevin McCormick (Senior, co-captain) averaged 13 points and six rebounds per game. He also shot .864 from the free throw line. McCormick, often at a height disadvantage, makes up for this with his hustling style and his tough play off the boards. A four year starter, last season he was voted co-MVP by his teammates.

Guard Mike Brophy (Senior, co-captain) is an extremely valuable player for the Bruins. Sixthman for three years, Brophy will finally get that well-deserved nod for the starting five. A good outside shooter (the only player to shoot over 50% from the floor), Broph averaged 11 points per game last year. A very aggressive

player with unending hustle and desire, he has been the spark plug of the team. His hard-nosed style has earned him the "Best Defensive Player" award for 3 consecutive years.

Guard Jim Mobley (Senior) has done it all. His agility and speed have earned him a host of honors over the past three years. He has been the team's leading scorer for three straight years, the team MVP for 2 seasons, All League in the MAC Southeast, MVP of the MAC Southeast, nominated for All-American, and Second Team All-District. In addition, his 426 points last season (16 per game) has pushed him over the 1,000 point career mark. He is only 260 points shy of the 18 year-old Ursinus career scoring record.

Center Tom Broderick (Junior) was awarded Honorable Mention honors for the MAC last year. With a year of varsity experience under his belt, Broderick could be the key to this year's club. As the team's most improved player, the 6'7" "Swatter" averaged nine points and eight rebounds per game. An excellent shot blocker, Brod is able to fire up the team with his blocks as well as electrify the crowd with his slam-dunk.

Forward Dave Petitta (Junior) rounds out the starting five. A three year starter, Petitta's tough off the boards, agile enough to move well inside, and quick enough to run the fast break. Last year, he was second on the team in rebounds, averaging seven a game, while finishing fourth in scoring with 10 points a game.

Other players expected to see action this year include Senior Larry Davis, who missed most of last year with a broken ankle. A good shooting guard, Davis was a starter as a freshman but has been slowed by injuries ever

since. Senior Mike Cola was forced to sit out last year, but was a member of the team two years ago. An excellent leaper with the ability to score, Cola could be a major contributor to this team. Senior Dennis Leddy is a fine defensive player who has been a starter from time to time. Leddy is always ready to give it his best and should be very effective in the Bruins drive to the top.

Junior Jay DeFrusco is coming off knee surgery and making good progress. A quality shooter (shot .812 from the line), DeFrusco averaged six points while seeing action in 21 games last season. His shooting will be an asset over the long season. Sophomore Jack Devine rounds out the returning players. A fine shooter with intense concentration, Devine did not see much action last year but should gain some valuable experience this year.

The only freshman to crack the varsity this year is big man Jeff Berlin. An outstanding high school player, he will be counted on for rebounding as well as aggressive inside play.

The Bruins open up tomorrow night at 8:00 in Helfferich Hall against Allentown. That game is followed by four extremely tough contests against F&M, home on Monday; Scranton, away on Tuesday; Penn State, away on Friday; and defending MAC champions Albright on the following Wednesday.

Come on down and support our championship club — they deserve it. Ursinus once again has a team we can be proud of. Best of luck to the players, Coaches, Werley, Greg Thren, Joe Kelly and assistants J.R. Kramer and Kevin Readman in their drive to another MAC Championship.

Memo to UC Spectators

Congratulations to the players, coaches, trainers and spectators who make this fall's sports schedule such an exciting one. Our best wishes surely go with the hockey and cross country teams as they travel to the Nationals.

The winter sports schedule begins this Saturday with our basketball team opening at home against Allentown College. Please make a special effort to join me in the stands to give this season a rousing start.

Due to the large number of persons expected at the indoor winter events, we should take time to remind each other that the National Collegiate Athletic Association, the Middle Atlantic Conference and Ursinus College take strong stands against irresponsible behavior by spectators at all athletic contests.

While members of the Ursinus community will be expect-

ed to properly define "responsible behavior," let me list a few specific items about which misunderstanding could occur:

(1) Please bring your I.D. card. We must be able to identify our guests quickly. Moreover, your I.D. card will get you into the game free.

(2) Please do not bring noisemakers (especially pots and pans) to the games.

(3) Please stay off the playing surface. It is enjoyable to shoot baskets when the game is not in progress, but there are now too many spectators to permit this.

(4) Please cooperate with Mr. Davidson and the security officials if they request your compliance with a regulation. Finally, we encourage your continued support of the basketball team this year. Players appreciate the past enthusiastic support that has been typical of Ursinus spectators.

See you at the game!

Tomorrow evening marks this year's home opener for the Ursinus College Men's Basketball Team. With this in mind the Athletic Department, with the support of the Dean of Students' Office and the USGA, has released the below copy of the MAC Guidelines on Sportsmanlike Conduct so that the College may continue to enjoy successful events again this year.

SPORTSMANLIKE CONDUCT

Section 1: Principles of Ethical Consideration.

- The Middle Atlantic States Collegiate Athletic Conference does not condone any unsportsmanlike conduct on the part of any individual associated with its member institutions.
- Individuals employed by, or associated with, a member institution to administer, supervise or coach intercollegiate athletics and all participating student-athletes shall conduct themselves with honesty and sportsmanship at all times so that intercollegiate athletics, their institution and they, as individuals, shall represent the honor and dignity of fair play and the generally recognized high standards associated with wholesome competitive sports.
- Unsportsmanlike conduct should subject the individual or individuals involved to disciplinary action. The member institution with which said individual is associated shall have the sole responsibility for determining what action to take and what procedures to follow before imposing disciplinary

Section 2. Acts of Unsportsmanlike Conduct

Acts of unsportsmanlike conduct shall include, but not be limited to:

- Any person who strikes or physically abuses an official, opposing coach or player.
- Any person who intentionally incites participants or spectators to violent or abusive action.
- Any person who uses obscene gestures or profane or unduly provocative language or action toward officials, opponents or spectators.
- Any person who public is unduly critical of any game official, Conference personnel, another institution, or its personnel.

Section 3: Notice

- Member institutions shall promptly notify the Executive Director of any action taken against any of its individuals as a result of unsportsmanlike conduct. A copy of said notice shall also be sent by the member institution to the Athletic Directors of all other institutions involved in the contest in which said unsportsmanlike conduct occurred.
- If any member institution feels that an individual from another institution should be disciplined for unsportsmanlike conduct, it shall notify in writing the Athletic Director of said institution setting forth the name of the individual involved, the conduct complained of, as well as the date and place said conduct occurred. The Athletic Director shall cause the matter to be investigated and shall notify the complaining institution of any action taken or of the reasons no action was taken. Said response shall be within forty-five (45) days of the receipt of the original correspondence. Copies of all correspondence sent under this sub-paragraph shall be sent to the Executive Director.

Weight-training Room Relocated

(Continued from Page One)

relocated upstairs in the gymnasium where it is still open for anyone to use. Downstairs, there will be a new "Exercise-Rehabilitation Laboratory." This room will be under supervision and will be open six to seven days a week for two to four hours a day. People will be able to work on specific exercise programs or rehabilitation of particular parts of the body.

The idea behind this new facility is to prevent potential injury. In addition, the school cannot afford to keep replacing stolen equipment. This new room

will provide a storage area for the rehabilitation equipment and insure that it is not misused or damaged.

Some of the rehabilitation equipment includes the Fitron bike, Olympic Free Weights, and a new Orthotron machine for rehabilitation of the knees, arms, and shoulders. This therapy-training equipment will hopefully prevent some injuries.

The new weight room is scheduled to open sometime after Thanksgiving vacation. Currently, the Athletic Department is waiting for the Orthotron to be

assembled. The hiring of supervisors and trainers is being handled by Dean Whatley.

The supervisors will help athletes work on specific programs and help them to keep progress cards. In addition, they will be supervising use of the equipment as well as insuring that the weight room is kept clean and orderly.

Randy Davidson, Head of the Athletic Department, wishes to stress, "The intent of the new supervised exercise room is to make use of the equipment more effectively and to protect the students."

Cross Country To Compete In Nationals This Weekend

by Brian Ballard '81

And the season continues . . . For the first time ever, the Ursinus College Cross Country Team will be represented as a team at the 1980 NCAA Division III National Championships.

Last weekend, the Bear Pack was led by Junior Pat Walker. Walker finished fourth overall covering the Memorial Lake State Park five mile course in 24:53. This works out an average time of under five minutes per mile. "My pre-race goal was to finish in the top five. I wanted to run with the leaders from the start of the race," Walker said. "I don't feel though that as a team we ran to our full capabilities. If we run our

best we could be the top team, finishing from the Mid-East region." When asked what his personal goal for this meet was, Walker responded, "to finish in the top 25 overall." Should he do this Walker would earn Div. III All-American!

Senior co-captain Ron Shaiko was the second Ursinus finisher taking eighth overall in the time of 15:01. Senior co-captain Dave Garner was next finishing 18th in 25:26. Garner overcame the ankle problems which slowed him in last week's M.A.C.'s. He is the only Ursinus runner to have previously run in Nationals having qualified individually last year. Garner seems unaffected

and should have a fine showing this weekend.

Rounding out the scoring for the Bear Pack was Neil Brown, finishing 21st in 25:28, and Jon Perrotto finishing 30th in 25:46. Dominick Buda and Ronald Desilets also competed finishing 39th and 70th, respectively.

Coach Rob Shoudt was very pleased with the team's effort noting that it was a season long effort which carried the Bears to their second place finish. "We look for a strong representation in the Nationals," the coach said, adding that, "we would like to come out of Nationals as the best Mid-East team." Shoudt also cited more maturity as a main reason for the success of the Bear's Season.

Fearless Friday Forecast

by Kevin Readman '81

Oakland at Philadelphia

Eagles continue to roll as they bag the Raiders by 4.

Houston at New York Jets

Playing at home does not help the Jets this time as the Oilers win by 7.

Chicago at Atlanta

Falcons are playing very well and Chicago is still having offensive trouble. Atlanta wins by 5.

Baltimore at New England

Long day for Bert Jones and the Colts as they come up 8 points short.

Detroit at Tampa Bay

The Lions are falling apart and the Bucks take advantage to win by 3.

Cincinnati at Cleveland

Cleveland playing well, Cincinnati isn't. Browns by 10 big points.

Kansas City at St. Louis

Cards will come through once more and win by 4. St. Louis better than its record.

Green Bay at Minnesota

Incredibly, Minnesota is in the divisional race and the Pack is way back in the standings. Vikes by 9.

Seattle at Denver

Seahawks play tough but come up short on the scoreboard. Denver, barely, by 2.

New York Giants at San Francisco

Hilton able to hold the Giants and Simms enough for the 49ers to win by a fieldgoal. Trade demands from Hilton quiet this week.

Washington at Dallas

Cowboys cannot afford to lose and Landry knows it. Skins in trouble this week as they lose by 13.

Los Angeles at New Orleans

Saints still looking for a win and it won't be this week. Rams have lots of breathing room with this 10 point win.

Gridders Lose Early Lead to Tie Gettysburg

In what can only be described as one of the most exciting games seen at Ursinus in a long while, a furious second half rally by Gettysburg earned the Bullets a 27-27 tie against Ursinus last Saturday.

It was really two games rolled into one; the first half saw Ursinus play its best ball of the season as the Bears sliced through the Gettysburg defense effortlessly for 24 first half points, while shutting down the Bullets' potent offense, one which scored 35 points against Widener and 28 against Western Maryland in the previous two games. The second half was a different story, as domination by the Bullets overcame a determined Ursinus effort to hang onto, and then pull out, victory. At the end, a missed Gettysburg extra point and several dropped Ursinus passes in the end zone left neither team particularly happy with the outcome.

Ursinus' offense rolled early and often in the first half. The Bears took a 7-0 lead midway through the first quarter as Craig Walck hit John Blubaugh with a 30-yard touchdown pass to cap off a seven play, 61 yard drive. The payoff came as Walck, forced from the pocket by the Gettysburg rush, scrambled right, and found Blubaugh all alone at the five. Blubaugh easily beat the Bullet secondary to the flag, and the Bears had a sudden lead.

Early in the second quarter, the lead became 14-0. Due in a large part to the Gettysburg brain trust, the Bears only had to travel ten yards to do it. Seeing as how the Bullets had successfully executed

a fake punt in the first quarter, the Bullet coaches decided that a fourth and ten at the four would be another prime opportunity to catch the Bears napping, particularly in light of the recent punt-blocking explosion by Ursinus. Unfortunately for Gettysburg, the Bears weren't going for the block, the trick play was smelled-out, and Ursinus had the ball ten yards from paydirt. On second down from the eight, Walck hit Jim Rumer swinging out of the backfield, and it was 14-0.

Gettysburg most likely avoided a blowout on its next possession when the Bullet offense finally showed some signs of life, and drove 68 yards for its first touchdown. A 31 yard pass from Bill Wagner to running back John Scott was the key play during the drive, which ended up with fullback Scott Dudak going over from the five.

Ursinus got the momentum right back. On the first play after the Bullet kickoff, Rumer once again swung out of the backfield. He got open deep on the sideline, grabbed Walck's pass, and was finally caught from behind at the Gettysburg 15 after a 58 yard gain. Two plays later, Walck hit Jay Repko on the sideline route at the four, from where Walck rolled right, and hit Blubaugh breaking across the middle for the touchdown.

The lead grew to 24-7 by halftime, as Bruce Fensterbush's 35 yard field goal with 12 seconds left in the half capped off a last minute 30 yard drive. Passes from Walck to Blubaugh and Jack Freeman set up Fensterbush's

effort.

Gettysburg's second half comeback was aided by two Ursinus turnovers and several questionable calls by the officials. The Bullet's first touchdown came from a 38 yard drive following an interception. Gettysburg drove to a first and goal at the six on the running and receiving of Dudak and Scott. Two more Dudak carries plus one by Al Shrader led to a fourth and goal at the one. Schrader got the call on fourth down, and was apparently stopped short of the goal line by Mike Milligan, but the official on the side away from the play signaled touchdown, and was not overruled.

Ursinus answered right back with its final score of the day. Led by Rumer and Walck, the Bears drove from their own 30 to the Gettysburg 27 from where a 44 yard Fensterbush field goal made it 27-14 at 5:48 of the third quarter. This would not prove to be enough, however, as Gettys-

burg took the kickoff and drove 64 yards behind sub QB John Murphy. Murphy's five yard keeper finished off the drive, and it was 27-21 with a quarter to go.

For a while, it looked as though Ursinus would be able to hang on, especially after Leo Raffle's interception ended a five minute Bullet drive that got as far as the Ursinus 19. But a big sack by Terry Bazow and Mike Fagan pushed the ball back to the 34, and Raffle's return gave the Grizzlies the ball at their 39. Gettysburg's defense came through, though, soon forcing a fumble and giving the Bullets the ball at midfield. Dudak's running powered the ball to the Ursinus 9, from where, with 3:02 remaining, Scott's driving end zone catch of Murphy's low throw tied the score. Kicker Mike Ercole unbelievably missed the point after, and the game stayed knotted at 27.

Ursinus got one last gasp at pulling it out. The defense forced

Gettysburg to turn the ball over on downs on its 44 with one minute to go. Walck hit Freeman at the 30 on second down, and four plays later the ball was at the 25. With 20 seconds remaining, Bruce Fensterbush entered for the potential game-winning field goal. No one will ever know if Fensterbush's 42 yard effort was good enough, for Gettysburg got penetration up the middle, and the kick was blocked.

BEAR FACTS: The Grizzly defense put on an awesome first half performance, as well as a good overall effort. Dudak, the MAC's leading rusher, was held to 93 yards on 24 carries, some 35 yards below his average . . . Defensive stars were Terry Bazow (13 tackles) and John Gattuso (10 tackles) . . . An awesome pass rush got to the Bullet QB seven times. Gattuso was in on three, Bazow on two. Mark Schmidt had two, while Dave Dougherty and Mike Fagan were each in on one . . . This was the last home game for seniors Rich Barker, John Blubaugh, Lou Dalago, Dave Dougherty, Larry Fetterman, Jack Freeman, John Gattuso, Joe Marilino, Bob Osco-vitch, Eric Raffle, Leo Raffle, Tim Reilly, Jay Repko, Craig Walck and Dale Williams . . . Finale tomorrow at RPI.

John Blubaugh is the holder as Bruce Fensterbush gets ready to unleash his 44 yard field goal for Ursinus' 27th point against Gettysburg.
