# **Dr.** Pancoast Predicts **Much Competition for Teachers**

next ten years will increase competition among prospective teachers but fair discipline. "Congratulate and ultimately increase the quality of education.

This was the forecast of a Penn- vately." sylvania legislator and Ursinus College professor of political science, contained in an address delivered to 80 student teachers of the College as they began their two-month assignments in area secondary schools.

Dr. G. Sieber Pancoast cited projections for 1982-83, contained in a state study, which stress a continuing competition among teachers entering their profession.

"Only the extremely competent will secure positions, since teachers will become even more professional, while a decreasing number of vacancies will exist, accompanied by increasing fund expenditures," he said.

Drawing on his teaching career, which began at Ursinus in 1937, Dr. Pancoast offered several point- implemented. ers to his audience, which promise success in the teaching profession.

"This means being free from favor- at the same time increase superitism or bias, being impartial, just, vision by the state. honest, and straight-forward.

"Know your subject material,"

He expressed the need for firm and compliment your students publicly; criticize and correct them pri-

Dr. Pancoast emphasized the need for teachers to think and stay young.

"As one works with youth, he tends to stay young with them. The energy, vitality, interest, and sincerity of the students rubs off and infects the teacher," he said. Dr. Pancoast, who received his Ph.D. in political science in 1956, is chairman of the House Education Committee and member of the Governor's Council on Basic Edu-

cation. He was first elected representative of the 147th legislative district, including the Collegeville area in 1964.

He spoke of continuing trends in the educational system in Pennsylvania, especially if recommendations of the Governor's Council are

Organizationally, those recommendations will encourage greater "Above all, be fair," he said. local discretion and autonomy, but

A declining birth rate and a de-crease in school enrollment in the know." 'I don't sive use of the community, year-round use of schools, and modifications concerning school attendance and size."

Dr. Pancoast said he expects administrative modifications in the educational system. These include a shifting of responsibility for the health and welfare of children from the Department of Education to the Department of Health and Welfare, and the placing of full responsibility for transportation on the Department of Transportation.

Other changes will occur in the School Code now being updated, and teachers are encouraged to aid in its revision.

Dr. Pançoast said Act. 195, the Public Employees Collective Bargaining Law, is the most important law in the Code with which teachers should be familiar. He expressed the concern that the law would create an atmosphere of a kind of professionalism among the teachers which would ultimately lead to unionism and to detrimental effects upon the educational system.

However, he optimistically stated, "I also believe that with more experience in the bargaining process, teachers will have a more professional attitude toward their work.

"This attitude should pervade all aspects of teaching including knowledge of subject materials, familiarity with a variety of teaching methods, evaluation of students, and discipline," he said.

#### THE URSINUS WEEKLY

### Editorial JOHN T. FIDLER

# When The Life Sciences **Become The Death Sciences**

Much of the mail the Weekly gets ends up as fodder for the waste basket, but some recent bulletins and brochures from The United Action for Animals, Inc., a humane society based in New York, were both informative and thoroughly disheartening. One booklet contains a list of about forty experiments conducted at leading universities in this country and in Canada. Many of these experiments were performed meeting was to discuss two differas master's and doctoral theses under the full cooperation of the institutions where these experiments were performed. What is especially disagreeable about these tests are the results and effects the various chemicals, drugs and toxic substances have on large numbers of dogs, cats, chickens, cattle and a host of other animals. Since I am the owner of a mixed-breed dog, which, without too much imagination can be thought of as a typical victim for one of these mad ventures (because we bought her at the local Humane Society, and many test animals are obtained from similar societies) I feel particularly repulsed by some of the senseless experiments run by intelligent, trained scientists.

One of these tests, conducted at a southern university, involved the poisoning of thirty-one calves and one steer with crude oil and kerosene. To quote some results from this experiment: "A few hours later (after the introduction of the crude oil into the stomach of the animal by a tube), the calf had a starved and dehydrated appearance and had defecated or vomited about half a quart of 'thickened black oil' onto the floor of its stall." The experimenters concluded that aspiration pneumonia with other complications appeared to be the most serious consequence of crude oil ingestion. As a non-scientist, and a human being, I must wonder what ran through these men's minds as they watched the cattle groveling in their own discolored waste.

At another university, in the department of Veterinary Science, pregnant sows were loaded into a truck and driven over bumpy roads for an hour in order to produce agalactia, a condition which results in a lack of milk. As if this were not enough, the surviving sows were then forced to fight with other aggressive sows for fifteen minutes every other day. When they were not being forced to fight, they were shocked for five minutes with an electric cattle prod. While all this was going on (and please remember that these men had to do these things, knowingly, and ultimately, with some degree of tion was discussed at length by devotion), the teat canals of the sows were injected with the faculty at our annual Septemheat-killed bacteria, and a natural laxative which is included in their diets was withheld. I quote again: "On the afternoon of the third day after giving birth, each sow was killed by gunshot and drained of blood. The researchers reported that (all of these tests) 'did not seem to increase the incidence of agalactia and did not significantly alter body weight gains of newborn pigs." Was it worth the deaths of these animals to prove something that is essentially problematic in nature? One might almost ask what good these tests might ever do in applying their results to the saving of human lives. Admittedly, there are important tests being conducted in heart disease, cancer and other disease research whose results might benefit a human life. But to inject battery acid or ammonia in an animal to see what happens is a sickening and disappointing use of money and intelligence. Most difficult for me to imagine is the reaction of the experimenter himself as he watches animals gasping for air (one dog was seen breathing 200 times a minute) and flapping their limbs in delirium. I for one could not stand there and watch such a thing. And I hardly think that the so-called scientist who can watch an animal die an unpleasant death is a better man than I. While I respect and admire the ef-

# Letters To The Editor

#### BEEF OVER RHETORIC Dear Sir:

In reply to Mr. Van Wyk's article concerning the meeting of USGA and Union representative of October 29th, we, the undersigned, would greatly appreciate the opportunity to present how we saw the meeting and the outcome. It was felt that the initial article was biased, and consequently, a total misrepresentation of the business and result of the meeting.

The original purpose of the ent views concerning the future possibility of a Union representative as a voting member of the USGA. Admittedly, the Union saw absolutely no dire need for a representative on the USGA, but the reason for better communication between the two organizations is meritable, and Program Board Chairman Robert Lemoi agreed to send an informal representative to USGA meetings, under the stipulation that the Union representative would not be a voting mem-

We feel that in essence, a great deal was accomplished through the agreement. Both the Union and the USGA feel that maximum communication is the key to effective cooperation and thus the agreement calling for an informal, non-voting member from the Union to the USGA is a step in the right direction.

> Cordially, Michael G. Powers Robert R. Lemoi David Zimmerman Geoffrey Higgins

#### PHYSICS DEPT. MAINTAINS STATUS QUO Dear Editor,

Miss Van Wagoner's editorial of last week shows that the students at Ursinus share one of the important concerns of the faculty, namely the imbalance between humanities and science majors in this year's freshman class. The quesber conference, but the many ideas expressed did not lead to any real that "library" was synonymous solutions.

From the point of view of the physics department, at least, the situation is not as bad as Miss Van Wagoner suggests:

1. Although we would like to see more physics majors, the number of freshman majors increased only from three last year to five this

forts of most scientific endeavor, this type of experimentation is too bizarre to place it in the same realm with much of the worthwhile work that is being done today.

Ursinus graduates who work on the staff of the College, like many year. 2. The time available to students in CMP physics labs has changed very little. The labs were scheduled for three hours last year but most of the students were able to finish in two and a half hours. This year approximately two and a half hours are available for each lab; in addition, the number of lab assistants per section has been increased without any increase in the number of students per section.

3. We have increased the time when help is available to the point where we now have several hours of problem-solving sessions scheduled every week. In these sessions a faculty member or a junior or small groups of students.

In short, although we are aware that some problems have been produced by increased enrollments in the sciences, we do not feel that students in physics courses have been at a disadvantage.

Sincerely, Martha C. Takats

Assistant Prof. of Physics

#### A PLEA FOR SILENCE Dear Sir,

I would like to suggest that the reasoning in Dave Ochocki's article concerning longer library hours in the October 25th issue of the Weekly was somewhat dubious. The logic implied in the proposal to have the library remain open until midnight so that the "break hour can be spread out" escapes me!

In the first place, the confines of the library should not be used for the apparently essential "break hour" to begin with, particularly now that the Student Union facilities are available. Is the thinking perhaps that the Union is located at too great a distance from the library and therefore impossible for the students to walk that far? With respect to the enforcement of a "quiet-down" rule, might I

not presume to reason that since the hue and cry of the students is to be treated like responsible adults, that they should act as such? I, for one, have always assumed with "quiet" having been taught this from a tender age and I hope that before arriving at Ursinus as responsible adults our students will have learned likewise.

Having been a parttime student at Ursinus for the past two and a half years and at the same time a busy wife and mother, this problem of the library being utilized by the students as a recreational area, during "break hour" or otherwise, rings a loud bell with me. Many times I have had to move from one location to another in order to escape the confabs. Therefore, I would like to suggest that the U.S.G.A. make a universal appeal to our mature and responsible students for quiet in the library at ALL times. Extending the hours is not the solution-consideration for others is!

> Yours sincerely, Loretta G. Zvarick

## WHAT ARE WE DOING HERE?

At Ursinus everyone constantly sees people whom they don't know. Every time you go to class, that same guy with pimples, glasses, and beautiful ripe white heads or that buxom, elusive, voluptuous young lady that you pretend not to see, walks by you. So what do you do?

There is one thing that has been mastered to a refined art at Ursinus, and that one thing is: Avoiding To Look At The Person That You Don't Know. Now there are different ways to avoid looking at a person. The most widely used is the look at your feet tactic. senior physics major works with However, there are many more: you can act like you are interested in something on your right side, you might check your books by trying to fool the person coming your way that you are actually interested in what's in there, you could look up at the sky and pretend that you're interested in the ramifying nature of an oak tree, you can try to look right through the person's body, you can look straight ahead and not bat an eye, you can try the mystical and say three mantras and hope the guy disappears, or you can cut across the grass and avoid the whole confrontation.

Girls do some of these things (mostly the straight ahead stare, the down at the feet stare, the look at the purse deal, and maybe they pretend that they are looking at a squirrel).

Now if you think that this avoid saying or looking at the other person is temporary, forget it! This will stay with you all four years.

This goes to such an extreme I'II tell you what can happen and what probably will happen: Say, if somebody walked by you looking at his feet, and you had a banana cream pie. You draw back your arm and fire. Sploooosh! That pie hits him right in the back of his head, dripping like a slush ball down his neck. But does the guy turn around? No way.

Odds are he will probably keep right on walking and say to himself, "I'll just act cool and not let him know that he hit me.'

So next time you are leaving class, going to Wismer, or coming out of the john at the library, stare at the person and watch him (or her) make complete fools out of themselves. We are all guilty of making fools of ourselves. But if you get desperate, you can stock up on your banana cream pies, and show the world.

Chango Rag says, "Some people say two years Sing Sing and I say one year Ursinus.'

The third play in the group, Lanford Wilson's This is the Rill Speaking, directed by Dr. Joyce undoubtedly the best of the three. Six voices, provided by Kate Swanson, David Friedenberg, Kathy Morris, Paul Forsberg, Nina Camiel, and Dick Gaglio blended and changed to produce the scenes of small town America which we know so well. Each actor played several different roles, and the audience was kept laughing over typical incidents and stereotypes which were familiar to all. Dick Gaglio and Paul Forsberg were excellent as tobacco chewing, spitting farmers discussing the proper practices involved in having. I particularly liked the segment on that strange habit which produces blindness about my morals then, and I'll and insanity, and the poolgame in which David Friedenberg and Dick Gaglio participated. The family scenes, the old man and woman, and young lovers in the park were pure delight. The entire cast spoke together at the end and combined to create a fine picture of Americana.

ProTheatre has changed a great deal in the last few years. There has been a wider variety in the plays which are chosen to produce, and best of all, a wider interest the matter I would not impose on among the student body. The old But some- snack shop has been converted into thing really must be done when the a theater, complete with lighting, baked chicken wings flap and spill and further changes are being conthe peas all over my lap! What sidered for the building. The audience, being situated on three sides of the performing area, is at close range, which lends much to the atmosphere of the productions, and this arrangement is far superior to the formal setup of Wismer Auditorium. ProTheatre plans to stage the Second Shepherd's Play in December, and welcomes all to audition for acting parts in the production or to help with any of the other work that goes into putting the play on.

### SEEDS AND ASHES A Bundle of Letters

By DOUG GLOVER and JOHN KRAUS

As neophytes to the craft of column writing, and as aspiring journalists of tomorrow, we began our year at Ursinus by asking the honorable John T. Fidler to take us under his wing and teach us what writing for the Ursinus Weekly is all about. While emptying out Mr. Fidler's garbage can, a task which he assured us is essential for developing the knowledge needed to write for the Weekly, we came across the following letters, which Mr. Fidler in his infinite wisdom decided were unsuitable for his paper. In our never ending attempt to fill our column we have decided to publish these letters. Dear Editor:

I came to Ursinus because the catalogue said that it was a good conservative school where everybody marries each other. I have been here for a month and I want to say loud and clear that I have been rooked. I haven't even been engaged yet let alone married and the boys I've been dating have been returning the boxes of chocolate I send them back to me half eaten. My mother goes to a lot of trouble to get those chocolates for me and frankly I am resentful of the snobbish attitudes of these fraternity boys. Also, I have been smelling a lot of incense around my dorm lately and this doesn't help my sinuses at all. I like Listerine Spray as much as the next girl, but it isn't even winter yet and I only use it to cover up the smell of that awful incense; that incense is so smelly that it sticks to everything and my roommate even is it on her breath. And another thing. I have heard that boys are allowed in the dorms on alternate leap years on the thirty-fifth day of October. This is when I study for my diterms and I resent being interrupted from my studies by a bunch of silly boys. Also, I shower three times a day and although I'm very careful, it is possible that one of these boys might see me in my Playtex Panties and Lord knows what stories will circulate

phisticated to see a movie that has been billed as a story of first love, but other reviews had indicated schools, but one must remember that there is a depth to Jeremy, and this reviewer found such evaluations to be warranted.

One part of the reviews has been overstated, however. Several others have called Jeremy and Susan "exceptional children," but Jeremy is told outright by his cello instructor that he is not concert quality. Jeremy considers his cello to be his only pure mode of expression, and he is determined to enter Juilliard, but this is only a possibility and not a probability. After all, a true child-prodigy in classical music would have been much further advanced by age fifteen.

dancer, and her goals are vague. people whose lives were candidly Surely by age sixteen she would observed. have been connected with a major The major fault that this review-

ballet company if she were truly At first one might feel too so- destined for a future in dance.

The school that Susan and Jeremy attend is typical of most high that a great percentage of uppermiddle-class New York teenagers attend private schools in order to avoid integration. These private schools are often progressive and include excellent music and dance programs supplementary to scholastic activities.

Robby Benson as Jeremy is very convincing as an awkward, sensitive adolescent; but in this reviewer's opinion, Glynnis O'Conner (Susan) steals the show. She plays an extremely convincing sixteenyear-old, and I really couldn't determine her actual age. Alone, Robby Benson appears contrived at en. Also, Susan is only an average nis O'Conner could easily be real

er found with the movie was with some of the background music. The voices had the wavering intonations of adolescents. Perhaps the producers intended the music to be a reminder that Susan and Jeremy are so young that the relationship is doomed to fail.

Nevertheless, Jeremy is enter-taining and interesting because of certain elements of growing up that produce a sudden identification for the audience.

"The Incomparable" Marlene Dietrich brings her internationally acclaimed show to the stage of the new, year round Valley Forge Music Fair, Pa. 202 south in Devon, Tuesday, November 13 thru Sunday, November 18. Backed by the 23 piece Music Fair Orchestra conducted by Stan Freeman, Miss Dietrich brings her extra special charm to arrangements by the highly acclaimed composer Burt Bacharach. Performances are Tuesday to Friday at 8:30, Saturday at 3 and 8:30 and Sunday at 8:30 p.m. Tick-ets are now available at the Music Fair box office, all Ticketron locations, Gimbels and Wanamakers in Philadelphia, Bag and Baggage in Wilmington, and major theatre ticket agencies throughout Philadelphia and the tri-state area.

#### By LEN DOMANSKI

On October 27 Ursinus met Franklin and Marshall College along with Albright in a double dual cross-country meet. The top Ursinus men were expected to face tough competition from John Hargraves, an F and M standout, on this Saturday. Unfortunately, the confrontation was never to take place for Hargraves was sidelined with tendonitis. Minus their star, F & M did not stand a chance against the red and gold horde. Also running that day was Albright College, but they were behind from the very start. Taking first that day was sophomore Len Domanski (25:06) with Ursinus additionally capturing second (Boops Stanfill, 25:27) and third (Dave Liscom, 25:32). Also running that day for Ursinus were fast improving freshman Ed Gilroy in 5th, Gary Stanfill (another of the fine running freshmen on the team) in 10th, Karl (the Flying Deutschman) Geisinger in 11th, old man Tom Torchia in 17th, Fred Carl in 20th and local product Kevin Kalmbach in 24th. The final scores read Ursinus 20, F&M 36 and Ursinus 16, Albright 44.

One week later, Ursinus was a- to run Ursinus past arch foe Wid-
