## Introduction

Soybean variety and strain performance tests are conducted each year in Arkansas by the University of Arkansas System Division of Agriculture's Arkansas Crop Variety Improvement Program. The tests provide information to companies developing varieties and/or marketing seed within the State, and aid the Arkansas Cooperative Extension Service in formulating variety recommendations for soybean producers.

## Methods

Varieties and strains containing any herbicide tolerance trait(s) were eligible for entry into two types of tests: Early Planted Tests (EPTs) and Full-Season Tests (FSTs). Entries in the FSTs were also tested in a simulated Double-Crop test. To facilitate field operations and to allow for fairer comparisons between varieties and strains in both types of tests, entries were divided into maturity classes based on information provided by the originating company or institution. Entries in the EPTs were divided into four maturity classes. Entries in the FSTs were divided into five maturity classes. Entries in the "Early", "Mid", and "Late" Group IV EPTs and FSTs had relative maturities ranging from 4.0 to 4.5, 4.6 to 4.7, and 4.8 to 4.9, respectively. Entries in the Group V EPTs had relative maturities ranging from 5.0 to 5.3. Entries in the "Early" and "Late" MG V FSTs had relative maturities ranging from 5.0 to 5.3 and 5.4 to 5.9, respectively. The 2017 soybean performance tests contained 88 EPT entries and 217 FST entries.

The 2017 soybean FSTs were conducted at the Northeast Research and Extension Center (NEREC) at Keiser, the Lon Mann Cotton Research Station (LMCRS) near Marianna, the Rice Research and Extension Center (RREC) near Stuttgart, the Rohwer Research Station (RRS) near Rohwer and the Vegetable Research Station (VRS) near Kibler. The EPTs were established at the NEREC, the RRS, the

LMCRS, and at the Berger Farm, near Weiner, Ark. A test location map can be found inside the back cover.

Within each test, entries were arranged as a randomized complete block design with three or four replications. Plots in all tests were 4 or 5 rows wide depending on between-row spacing and 20-25 feet in length. Seeds were packaged for recommended planting rates and were planted with a cone planter. Specific location and cultural practice information accompany each table.

All rows of each plot were harvested for yield determination, except in the NEREC Irrigated and Non-Irrigated tests, all RREC tests, and all VRS tests where only the interior rows were harvested. Percent moisture was recorded for all harvested seed, and plot weights were adjusted to 13% moisture. Plot weights of all tests were converted to yield in bushels per acre (bu/A).

Plots were visually rated for shattering and lodging. Shattering ratings were carried out on border rows according to the following scale:

- |                   |                          |
|-------------------|--------------------------|
| 1. No shattering  | 4. 9-19% shattered       |
| 2. 1-3% shattered | 5. 20% or more shattered |
| 3. 4-8% shattered |                          |

Lodging ratings were recorded on a scale from 1 to 5 based on the following criteria:

1. Almost all plants erect
2. Either all plants leaning slightly, or a few plants down
3. Either all plants leaning moderately, or 25-50% of the plants down
4. Either all plants leaning considerably, or 50-80% of the plants down
5. All plants down badly

Average plant height was recorded in inches for each plot in the first replication of each test.

## Variety Testing Website

This report and other information about variety testing for corn, cotton, grain sorghum, rice, wheat and soybean can be found at [www.ArkansasVarietyTesting.com](http://www.ArkansasVarietyTesting.com). Disease ratings that do not appear in this or other reports may also be found on this website.

## Stuttgart: Rice Research and Extension Center (RREC)

### Irrigated, Full-Season, Soybean Varieties and Strains, 2017

Stuttgart Irrigated  
Full-Season

**Soil Series:** Crowley silt loam

**Soil pH:** 5.2

**Previous Crop:** Rice

**Row Width:** 30"

**Planting Date:** May 10

**Irrigation Dates:** July 18, 29  
August 24  
Sept. 16

**Fertilizer Application(s):** Variable rate of P & K April 12

**Herbicide Application(s):** Roundup April 12  
Dual Magnum May 11  
Select June 15  
Storm June 28

**Harvest Date:** Early MG 4 October 4  
Mid MG 4 October 4  
Late MG 4 October 4  
Early MG 5 October 12  
Late MG 5 October 12

# Rohwer: Rohwer Research Station (RRS)

## Irrigated, Full-Season Soybean Varieties and Strains, 2017

**Soil Series:** Desha silt loam  
**Soil pH:** 7.2  
**Previous Crop:** Corn  
**Row Width:** 38 twin row"  
**Planting Date:** May 11  
**Irrigation Dates:** July 6, 18, 25  
 August 22

**Herbicide Application(s):** Roundup + 2,4-D March 20  
 Gramoxone + Dual Magnum + Valor + Roundup May 11  
 Prefix June 8  
 Flexstar + Select June 28

**Insecticide Application(s):** Acephate + bifenthrin August 21

**Harvest Date:** Early MG 4 September 26  
 Mid MG 4 September 26  
 Late MG 4 September 29  
 Early MG 5 September 29  
 Late MG 5 October 5

<sup>a</sup> Average Yield from 2015 and 2017.

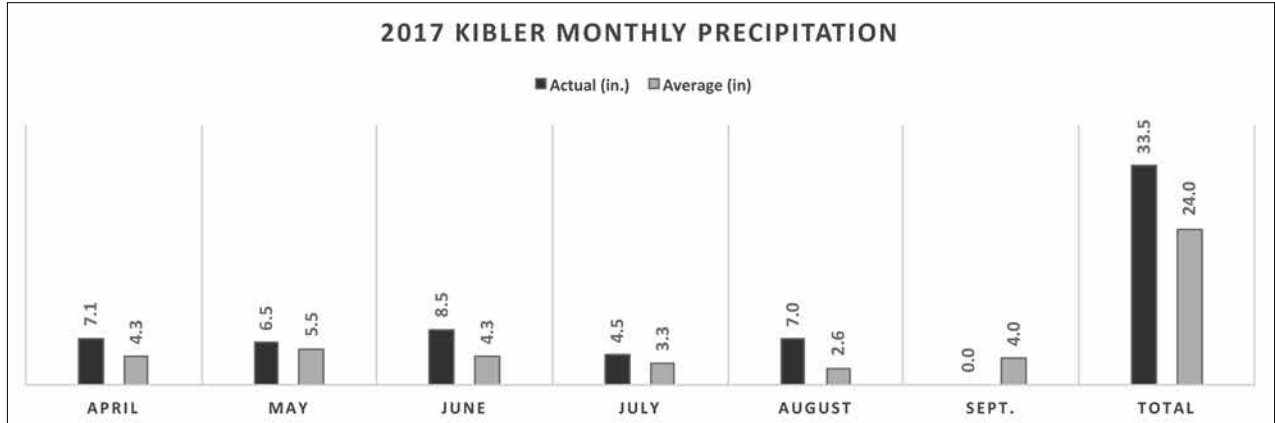

<sup>b</sup> Average Yield from 2013, 2015, 2017.

<sup>c</sup> 1 = Almost all plants erect. 2 = Either all plants leaning slightly, or a few plants down. 3 = Either all plants leaning moderately, or 25-50% of plants down. 4 = Either all plants leaning considerably, or 50-80% of plants down. 5 = All plants down badly.

<sup>d</sup> 1 = No shattering. 2 = 1-3% shattered. 3 = 4-8% shattered. 4 = 9-19% shattered 5 = 20% or more shattered.

## Kibler: Vegetable Research Station (VRS)

### Irrigated, Full-Season Soybean Varieties and Strains, 2017

Kibler Irrigated Full-Season

**Soil Series:** Roxanna silt loam  
**Previous Crop:** Soybean  
**Row Width:** 36"  
**Planting Date:** May 30  
**Irrigation Dates:** June 28  
 July 18, 24  
 September 5, 13

**Herbicide Application(s):** Dual Magnum + Pursuit May 30  
 Dual Magnum + Reflex June 27  
**Harvest Date:** Early MG 4 October 12  
 Mid MG 4 October 12  
 Late MG 4 October 17  
 Early MG 5 October 20  
 Late MG 5 October 20
