DURHAM, NH – President Barack Obama approval ratings in New Hampshire have stabilized after dropping since his inauguration. Support has increased among Democrats and independents since the passage of health care reform legislation.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Five hundred (512) randomly selected New Hampshire adults were interviewed by telephone between April 18 and April 28, 2010. The margin of sampling error for the survey is +/- 4.4 percent.

Presidential Approval

After declining in every Granite State Poll since his election, President Obama's approval ratings in New Hampshire have stabilized. In the most recent Granite State Poll, 50% of New Hampshire adults say they approve of the job Obama is doing as president, 46% disapprove, and 4% are neutral. These figures are similar to his national ratings, a Gallup poll taken during the same time period showed 49% of U.S. residents approved of the job Obama is doing as President.

^{*} We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Obama's approval rating has stabilized as support from Democrats and Independents has rebounded slightly since the passage of health care reform legislation. Currently, 45% of independents in New Hampshire say they approve of the job Obama is doing as President, up from 39% in February, but down 20 percentage points since October 2009. Support among self identified Democrats has rebounded to October levels while Obama's job approval among Republicans continues to decline.

Obama's personal favorability ratings have continued to decline. Obama is currently viewed favorably by 50% of New Hampshire adults, 44% have an unfavorable opinion of him, and 4% are neutral. Obama's net favorability rating, the percentage having a favorable opinion minus the percentage having an unfavorable opinion, is +6%, the lowest since he became president.

Democrats continue to like Obama with 91% saying they have a favorable opinion of him, but only 42% of political independents and 12% of Republicans have a favorable opinion of the President.

Economic Approval Rating

The bad economy continues to be a drag on the Obama Administration. Despite modestly good news about economic improvements, most New Hampshire residents disapprove of how the administration is handling the economy. Currently, 46% of New Hampshire adults approve of how Obama is handling the economy, 50% disapprove, and 3% are neutral. As with other approval measures, there is a considerable partisan gap in approval of Obama's handling of the economy. Democrats (84%) approve of Obama's job handling of the economy while only 38% of independents and 11% of Republicans approve.

Foreign Affairs

Support for Obama's handling of foreign affairs has remained steady since last fall. Currently, 52% approve of how Obama is handling foreign affairs, 42% disapprove, and 6% are neutral. There is also a partisan divide in approval of Obama's handling of foreign affairs with 86% of Democrats, but only 18% of Republicans approve. It is significant that approval among independents dropped from 61% in October to 48% in the most recent poll.

Presidential Approval - Health Care Policy

Approval of the administrations handling of health care has improved somewhat since the historic health care reform legislation passed in March, but most residents still disapprove. Currently, 43% of New Hampshire residents approve of Obama's handling of health care policy, 52% disapprove, and 6% are neutral. Eighty-five percent of Democrats approve of his handling of health care policy, up from 69% in February, only 28% of political independents approve (up slightly from 23% in October), and 7% of Republicans approve.

Presidential Approval in NH on Health Care by Party Identification

The health care reform legislation that is currently stalled in Congress is much more popular in New Hampshire now that it has passed than it was prior to passage, although most residents oppose the legislation. The improvement in support has come largely from Democrats. Currently, 40% say they favor the new law, 49% oppose, and 10% are neutral or don't know enough about it to say. Support for the legislation has increased among Democrats, from 52% in February to 78% in April. Support among independents has also increased somewhat, from 19% in February to 28% in April.

Favor / Oppose Health Care Reform Legislation by Party Identification

Right Direction - Wrong Track

Granite Staters remain pessimistic about the direction the county is heading. Currently, 44% of New Hampshire adults think things in this country are generally going in the right direction, 51% think things are seriously off on the wrong track, and 4% don't know. Democrats are the most optimistic about the county's direction with 78% thinking the US is headed in the right direction while only 35% of independents and 15% of Republicans think this is the case.

Granite State Poll Methodology

These findings are based on the latest **WMUR Granite State Poll**, conducted by the University of New Hampshire Survey Center. Five hundred (512) randomly selected New Hampshire adults were interviewed by telephone between April 18 and April 28, 2010. The margin of sampling error for the survey is +/- 4.4 percent.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.
