Collegian

1980-1982 Index

The SDSU Collegian
September 1980-July 1982 Index

1983

Introduction

The purpose of this index is to provide a subject guide to the SDSU Collegian. Included are all articles written by the staff as well as wire-service news stories. Excluded are brief announcements, notices, and minor sport events.

This issue cumulates two publishing years, September 1980-July 1982. A future index also will be published biennially at the end of every other academic year, including any summer issues.

Although this is a computer-assisted index, subject headings are not automatically assigned from key-words out of headlines. Whenever the headline words do not accurately reflect the content of the article, appropriate subject heading(s) are assigned. Names of the editor, columnists, and staff writers on the opinion page are included in subject headings. Excluded are names of letter writers (to the editor) and other reporters.

Subject entries are limited to eighteen characters, including spacing. Thus, abbreviations and incomplete headings are sometimes necessary. For example, Student Association Elections are listed as SA-Elections. A cross reference is made whenever necessary, for example, Student Association see SA. Place names in subject entries are also abbreviated to save space (cities and states in two letters; counties in three letters) but are spelled out in the notation whenever possible—e.g.:

Chamber of Comm—BR

801026

SDSU, Brookings endorse Mutual Sounding Board.

The following abbreviations are used throughout the index:

- * An asterisk at the beginning of a notation indicates that an illustration accompanies the story.
- (L) At the end of a notation denotes a letter to the editor.
- (Ed) At the end of a notation denotes an editorial.
- () Whenever space allows, a reporter's name is included in parenthesis at the end of notation.

Instructions For Use

Subject headings are arranged alphabetically under each main heading. The entries are arranged chronologically. The input record is composed of three fields:

1. Subject headings—e.g.; SA-Elections
2. A nine-digit code containing the date (year, month, and day) and pagination (section, page, and column)—e.g.:

820303 012

82 = 1982

03 = March

03 = the day

01 = the page

2 = the column

* = illustration

3. The headline notation—e.g.: "Candidates stress involvement." Thus an entry composed of the above units would read:

SA-Elections

820303

012

*Candidates stress involvement.
