Population Change in Incorporated Places in South Dakota, 1940-60

Donald R. Field, Assistant Professor of Rural Sociology
Robert M. Dimit, Professor of Rural Sociology

Systems of community organization often are no longer adequate to meet present needs. Changes in our way of life require adjustments in our communities.

To plan for the future, one of a community's first tasks is to assess the impact of previous population change on itself and other South Dakota small towns and cities. Information presented here is intended to help you better understand population trends in your community and compare them with other incorporated places in the state.

In table 1, incorporated places are arranged alphabetically, along with total population figures for 1940, 1950, and 1960. Percentage changes between those decades are also given. If no population number is given for any census year the place was not reported in the census and probably was not incorporated at that time.

In table 2, incorporated places with population reported in 1950 and 1960 are ranked according to percentage change over the decade. Thus, Fort Pierre had the most rapid growth of any place in the state followed by Pierre, St. Francis, Rockham, and New Underwood. At the other end of the scale, Cottonwood, followed by Esmond, Wetonka, Broadland, and Newark, had the most rapid declines.

In table 3, places are arranged by counties of the state. The counties are listed alphabetically, and places are listed in alphabetical order within counties. Population totals and percentage change are given for 1950-1960 decade for each county as well as for each incorporated place.

These tables are a part of South Dakota Agricultural Experiment Station Bulletin 571, *Population Change in South Dakota Small Towns and Cities, 1940-1960*, by Donald R. Field and Robert M. Dimit.

TABLE 1. POPULATION AND PERCENT CHANGE OF INCORPORATED PLACES IN SOUTH DAKOTA
1940 TO 1960
