South Dakota Municipalities: 1986 Population Estimates

by
James L. Satterlee
and
Donald E. Arwood
Department of Rural Sociology

More South Dakota towns lost people during the 6 years between 1980 and 1986 than during the 1970s. During the 70s 55% (171 of 312) of towns lost population. During the following 6 years, 63.8% (197 of 309) declined in population.

In spite of these losses, the total population of South Dakota municipalities grew by 3.3% (14,526 persons). Metropolitan cities (Sioux Falls and Rapid City) grew by 19,995, offsetting much of the losses of the 197 municipalities that lost population.

MAJOR POPULATION CHANGES

* South Dakota has 2 metropolitan cities (population 50,000 or more), 22 urban cities (2,500 to 49,999), and 285 rural municipalities. The two metropolitan cities make up 21.3% of South Dakota's population. The 22 urban cities make up 24.7% of the total, while the 285 rural towns account for 18.5% of the state's population. People in the remaining 36% of the population live in communities that are not incorporated, in homes in the country, and on farms (see figure 1 for comparison between 1980 and 1986).

* Central cities (Sioux Falls and Rapid City) of metropolitan places (Minnehaha and Pennington counties) grew by 84.4% since 1980. The significant increase in the population of metropolitan places was due to Rapid City's rise to the metropolitan status since 1980. That is, its population is now above 50,000.

Because Rapid City is no longer an urban city, the proportion of the South Dakota population living in urban places has declined - from 32.3% in 1980 to 24.7% in 1986. The total number of persons living in rural places - town, nonincorporated places, open country homes, and farms - experienced little change between 1980 and 1986.

* See Tables 1 through 12 for further analyses of 1986 population estimates.

METHODOLOGY USED TO DERIVE POPULATION ESTIMATES

The administrative records method was used to calculate population estimates of subcounty areas. This procedure takes components of population change and administrative factors into account. These components are:

- (1) natural change - birth and death statistics.
- (2) migration - based on federal income tax information for localities.
- (3) adjustments for special populations - based on estimates of persons living in institutions, college dormitories, or military barracks.
- (4) adjustments of the 1984 estimate - based on perceived errors and challenges by local governments.
- (5) annexations since 1980.

Data based on these components cover the time period July 1, 1984, to July 1, 1986. These were added to the 1984 base period estimates to determine the 1986 estimates. Estimates were calculated by

the U.S. Bureau of the Census and are reported in:

U.S. Bureau of the Census, current population reports, series P-26, No. 86-WNC-SC, West North Central - 1986 population and 1985 per capita income estimates for counties and incorporated places, GPO, Washington, DC, 1988.

ACCURACY OF ESTIMATES

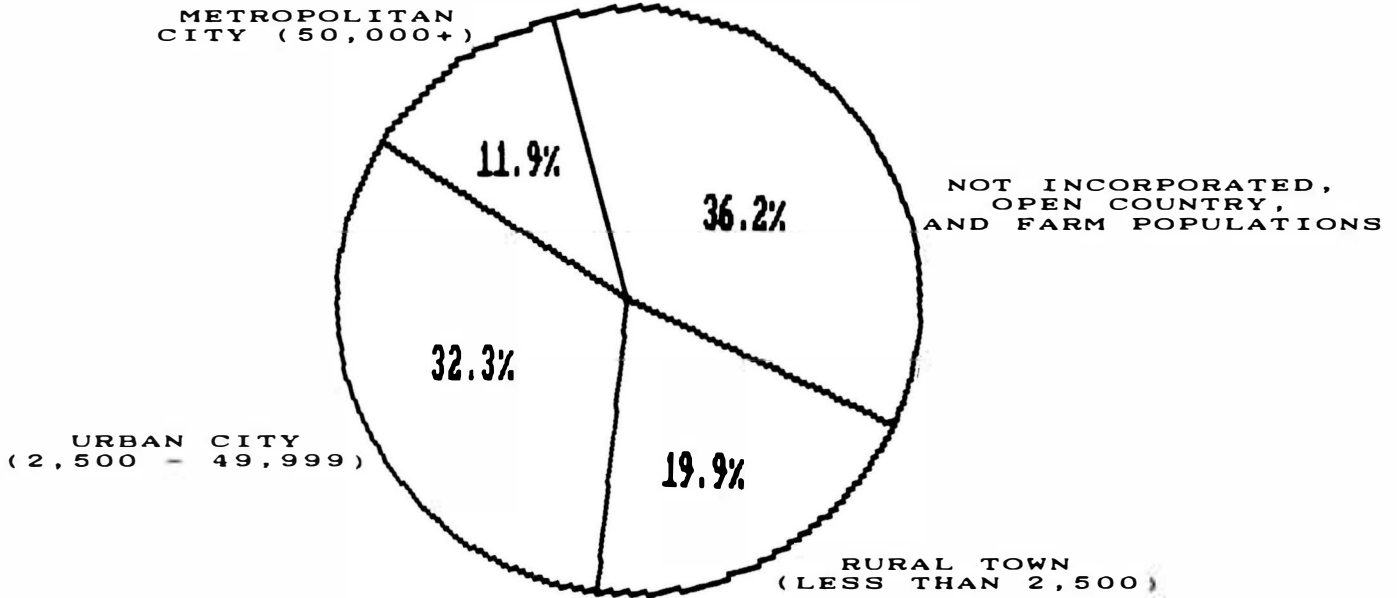

The possibility of error gets higher as the size of place gets smaller. National statistics reveal an average error for places greater than 100,000 to be about 4%. For places greater than 2,500 the average error is approximately 8%. For places less than 100 persons, the error could be as high as 35%.

TABLE 1. CHANGE IN THE TOTAL POPULATION OF DIFFERENT TYPES OF PLACES, 1980-1986

	1986	1980	1970	1960
Metropolitan				
Central City (50,000+)	150,030 (21.3%)	81,343 (11.8%)	72,488 (10.9%)	65,466 (9.6%)
Non-metropolitan				
Urban (2,500 to 49,999)	174,530 (24.7%)	222,831 (32.3%)	221,024 (33.2%)	199,855 (29.4%)
Rural (less than 2,500)	131,254 (18.5%)	137,114 (19.8%)	131,644 (19.8%)	133,684 (19.6%)
Not incorporated, Open Country, and Farm	252,183 (35.6%)	249,480 (36.1%)	241,101 (36.2%)	281,509 (41.4%)
Total	707,997	690,768	606,257	680,514
