South Dakota Population, Housing, and Farm Census Facts

Don Arwood, James Satterlee, Pat Joffer, and Jenny Sowell
Census Data Center
Department of Rural Sociology
Agricultural Experiment Station
South Dakota State University

Every day, school board officials, county agents, legislators, mayors, teachers, business men and women, and other community leaders make decisions that need to be based on reliable, up-to-date information. This report, an update of an earlier publication, provides **social indicators**—facts and trends which describe the social landscape—for each county in South Dakota.

How many people of different races and ethnic groups live here? Are they young or old? How many children do they have? How much income do they have? How many are poor? How much education do they have? What are their houses worth? How much do they pay in rent? How many live in mobile homes?

How many farms and ranches are there? How large are they? How much income is derived from farming and ranching activities?

This report provides **facts** which describe the social terrain for each county in South Dakota.

It also provides information on **trends** which describe changes in the social landscape. Because changes may produce social problems which need to be resolved, community leaders must know the trends occurring in the state and in their communities.

Revenues drop because out-migration means fewer taxpayers. Poverty rates rise or fall, either strengthening or lessening the demand for welfare and human services. Birth rates shift up and down, either producing a greater or lesser demand for day care and educational services. Changes in age structures transform the social landscape—more elderly in a community, for example, produce a shift in consumer needs and demands. These are trends you might pick up from the data in this publication.

If we did nothing, these changes would affect us—with a likelihood that the impact would be negative. If, however, we act, our actions should be based on knowledge. Trend setters, community leaders, and citizens can find in this pub-

lication much of the information they need to shape new and positive social, economic, and demographic trends in their communities.

Each county's ranking for each indicator or trend is provided in the tables. This ranking allows you to compare the relative position of each county. For example, you can tell if your county is gaining or losing population at a rate similar to or different from other counties. State averages or totals are also provided. You can compare your county with these values.

A complete listing of the kinds of social indicators found in this data book can be found on the "contents page" and in the following table. This table includes a listing of all social indicators in this publication, the value for each social indicator for the state as a whole, and the county ranked #1 for each indicator.

Incidentally, Minnehaha County is ranked #1 for 26 of the 68 social indicators. Its #1 ranking is largely a result of a large population. Sioux Falls, the state's largest city (100,814 people), is located in

Minnehaha County.

But, unknown to many, Minnehaha County also has the largest rural population with 17,582 residents. The county also ranks #1 in many farm categories: It has the largest farm population (3,242 people). It has the most farms (1,382) of any county in the state. It leads in the number of farms with annual farm sales less than \$10,000 (388), farms with annual sales of \$40,000+ (582), and farms with annual sales of \$100,000+ (247).

The information contained in this publication is based on the most recent census data available. The primary source for population data is the *1990 Census of Population and Housing, Summary Tape File 1A, Vol 1 (CD-ROM)*. For housing data, it is the *1990 Census of Population and Housing, Summary Population and Housing Characteristics, South Dakota, CPH-1-43*. And for farm facts, it is the *Census of Agriculture, 1987, Vol 1, South Dakota State and County Data, Part 41*. The Census of Agriculture, like other economic censuses, reports information for the years ending with 2 and 7. Data from the 1992 farm census will be released as soon as it is available.

SOUTH DAKOTA POPULATION, HOUSING, AND FARM CENSUS FACTS

INDICATOR	STATE	COUNTY RANKED #1	
1) Total population, 1980	690,768	Minnehaha	109,435
2) Total population, 1990	696,004	Minnehaha	123,809
3) Percent change in population, 1980-1990	.76	Pennington	15.61
4) Percent County is of state population	100.00	Minnehaha	17.79
5) American Indian population, 1980	44,948	Shannon	10,574
6) American Indian population, 1990	50,575	Shannon	9,374
7) Change in American Indian population, 1980-1990	5,627	Pennington	2,198
8) Net-migration in number, 1980-1990	-50,486	Minnehaha	3,360
9) Net-migration, 1980-1990 as percent of 1980 population	-7.3	Lawrence	5.8
10) Land Area in square miles	75,898	Meade	3,471
11) Population density per square mile	9.2	Minnehaha	153.0
12) Percent population under age 5, 1980	8.5	Todd	13.8
13) Percent population under age 5, 1990	7.8	Shannon	14.0
14) Total population under age 18, 1980	205,606	Minnehaha	31,444
15) Total population under age 18, 1990	198,462	Minnehaha	33,447
16) Number change of population under age 18, 1980-1990	-7144	Pennington	2,668
17) Percent population under age 18, 1980	29.76	Shannon	47.26
18) Percent population under age 18, 1990	28.51	Todd	45.10
19) Percent change of population under age 18, 1980-1990	3.47	Todd	15.41
20) Percent population ages 18-64, 1980	57.1	Clay	69.5
21) Percent population age 18-64, 1990	56.8	Clay	69.7
22) Number population age 65 and over, 1980	91,019	Minnehaha	11,596

23) Number population age 65 and over, 1990	102,331	Minnehaha	14,393
24) Percent population age 65 and over, 1980	13.2	Miner	22.0
25) Percent population age 65 and over, 1990	14.7	McPherson	27.5
26) Percent Change in Population age 65 and over, 1980-1990	12.43	Pennington	37.36
27) Median age, 1990	32.5	McPherson	47.0
28) Index of aging, 1990	60.7	McPherson	147.7
29) Young adult ratio, 1990	42.4	Clay	95.1
30) Sex ratio, 1990	96.89	Buffalo	110.41
31) Youth dependency ratio, 1990	39.7	Buffalo	71.4
32) Aged dependency ratio, 1990	24.1	McPherson	51.2
33) Total dependency ratio, 1990	63.8	Miner	91.2
34) Total number of births, 1980-1990	121,363	Minnehaha	19,812
35) Total number of deaths, 1980-1990	65,641	Minnehaha	8,798
36) Number of families, 1990	180,306	Minnehaha	31,928
37) Number of Households, 1990	259,034	Minnehaha	47,681
38) Percent change in number of households, 1980-1990	6.81	Pennington	21.43
39) Persons per household, 1990	2.59	Shannon	4.45
40) Percent total population in group quarters, 1990	3.71	Clay	19.16
41) Total number of housing units, 1980	267,997	Minnehaha	42,680
42) Total number of housing units, 1990	292,436	Minnehaha	49,780
43) Percent change in housing units, 1980-1990	5.57	Pennington	19.58
44) Number year-round housing units, 1990	284,045	Minnehaha	49,689
45) Number occupied housing units, 1990	259,034	Minnehaha	47,681
46) Number owner-occupied housing units, 1990	171,161	Minnehaha	29,690
47) Number renter-occupied housing units, 1990	87,873	Minnehaha	17,991
48) Number of year-round housing units vacant, 1990	25,011	Pennington	2,351
49) Median value owner-occupied housing units, 1990	\$45,200	Hughes	\$58,700
50) Median contract rent--specified renters, 1990	\$242	Minnehaha	\$331
51) Total number of mobile homes, 1990	34,210	Pennington	5,487
52) Number of farms, 1982	37,148	Minnehaha	1,490
53) Number of farms, 1987	36,376	Minnehaha	1,382
54) Average size of farms in acres, 1982	1,179	Shannon	9,157
55) Average size of farms in acres, 1987	1,214	Shannon	6,523

56) Average age of operator, 1987	49.7	Lawrence	55.8
57) Estimated value of land and buildings (per farm), 1987	\$326,333	Stanley	\$1,208,566
58) Change in estimated value of land and buildings, (per farm), 1982-1987	-\$92,607	Jackson	\$225,099
59) Land in farm acres, 1982	43,810,988	Meade	2,056,225
60) Land in farm acres, 1987	44,157,503	Meade	2,019,812
61) Harvested cropland acres, 1987	12,982,611	Brown	544,022
62) Number of full-owner farms, 1987	14,827	Minnehaha	611
63) Percent full-owner farms, 1987	40.76	Lawrence	59.68
64) Number of farms with sales less than \$10,000, 1987	8,098	Minnehaha	388
65) Number of farms with sales over \$40,000, 1987	16,890	Minnehaha	582
66) Number of farms with sales over \$100,000, 1987	6,782	Minnehaha	247
67) Estimated value of land and buildings (per acre), 1987	\$269	Union	\$757
68) Change in estimated value of land and buildings (per acre), 1982-1987	-\$79	Jackson	\$60

APPENDIX

EXPLANATION OF TABLES

- Table 3. **Percent Change:** Calculated by taking the difference in the population for 1980 and 1990 and dividing it by the 1980 population.
- Table 5. **American Indian Population:** The number of persons who indicated their race as American Indian.
- Table 8. **Migration:** Migration as represented is **net** migration. Net migration of the population is the balance of out-migration offset by in-migration. Net migration is calculated by subtracting the potential 1990 population (1980 population plus births minus deaths during the decade) from the actual 1990 Census count. If the potential population is larger than the actual 1990 Census count, the result is a negative number that indicates an estimated net out-migration. If the resulting population is a positive number, (smaller than the actual count) this indicates an estimated amount of net in-migration.
- Table 27. **Median Age:** This represents the middle value in a distribution, or a value that is exceeded (or preceded) by as many values as it exceeds (or precedes). It divides the measure into two equal parts in a way that one-half are larger and one-half are smaller than the median.
- Table 28. **Index of Aging:** A ratio of the old to the young segment of a population. It is a fairly sensitive indicator of the aging process. This is calculated by dividing the number of persons 65 years of age and older by the number of persons under 15 years of age. The result is multiplied by 100.
- Table 29. **Young Adult Ratio:** This is a measure that focuses attention on that segment of the population that are potentially or actually in the early stages of the family building process. The ratio is calculated by dividing the number of persons 15-34 years of age by the sum of persons 0-14 years of age and persons 35 years of age and over. The result is then multiplied by 100.
- Table 30. **Sex Ratio:** The number of males per 100 females. This ratio is generated by dividing the number of males by the number of females. The result is multiplied by 100.

- Table 31. **Youth Dependency Ratio:** This is based on the assumption that there is an approximate lower limit of productive power (age 15 in this instance) and theoretically, all persons aged younger than this limit are economically dependent upon the economically productive proportion of the population. The ratio is generated by dividing the number of persons aged 15-64 into the number of persons aged 14 years of age or less. The result is multiplied by 100. A ratio of 48 means that there are 48 persons under the age of 15 for every 100 persons aged 15-64.
- Table 32. **Aged Dependency Ratio:** This ratio is based on the assumption that there is an upper limit of productive power. In this instance, those aged 65 years and over. Persons who are older than this limit are considered to be economically dependent upon the economically productive proportion of the population. The ratio is generated by dividing the number of persons aged 15-64 into the number of persons aged 65 years and older. The result is multiplied by 100. A ratio of 10 means that there are 10 persons aged 65 years and over to every 100 persons aged 15-64.
- Table 33. **Total Dependency Ratio:** This ratio is based on the assumption that there are certain age groups in the population that are generally economically productive. In contrast, the other age groups are generally considered to be dependent upon the efforts of a productive age group. The term dependent is somewhat arbitrary however, and there will be some exceptions. Nevertheless, it has become customary to refer to the population under 15 and the population aged 65 and over as the **dependent population** and the population aged 15-64 as the **productive population**. The ratio is generated by adding the number of persons 0-14 years of age and the number of persons 65 years of age and over. The resulting number is then divided by the number of persons ages 15-64 years of age and multiplied by 100.
- Table 34. **Births:** This is the number of recorded live resident births occurring between January 1, 1980 and December 31, 1990. This information was obtained from the **South Dakota Department of Public Health, Office of Vital Statistics**.
- Table 35. **Deaths:** This is the number of recorded resident deaths occurring between January 1, 1980 and December 31, 1990. This information was obtained from the **South Dakota Department of Public Health, Office of Vital Statistics**.

- Table 36. **Family:** A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage or adoption. All persons in a household who are related to the householder are regarded as members of his or her family.
- Table 37. **Household:** A household, according to the 1990 Census, includes all persons who occupy a group of rooms or a single room which constitutes a housing unit. Members of a household need not be related to one another. A family is a particular type of household.
- Table 40. **Group Quarters:** All persons who are not living in households are classified as living in group quarters. Group quarters are living arrangements for institutional inmates or other persons in noninstitutional settings. Living arrangements containing ten or more unrelated individuals whose quarters are not divided into separate housing units are considered noninstitutional group quarters. Some examples of noninstitutional group quarters are: emergency shelters for the homeless, lodging and boarding houses, military barracks and college dormitories.
- Table 41. **Housing Unit:** A housing unit is a house, apartment, mobile home or other such dwelling that is intended for occupancy as a separate living quarter. A housing unit can either be occupied or vacant.
- Table 44. **Year-Round Housing Units:** All occupied units plus vacant units which are intended for year-round use.
- Table 45. **Occupied Housing Unit:** A housing unit is considered occupied if a person or a group of persons are living in it at the time of enumeration, or if the occupants are temporarily absent (vacation).
- Table 46. **Owner Occupied Housing Unit:** A housing unit is owner occupied if the owner or co-owner lives in the unit, even if the unit is mortgaged. A cooperative or condominium unit is owner occupied only if the owner or co-owner lives in it.
- Table 47. **Renter Occupied Housing Unit:** All occupied housing units not classified as owner occupied are classified as renter occupied. These include units leased for cash rent and those occupied without payment of cash rent.

- Table 48. **Year-Round Housing Units Vacant:** (See explanation for Table 44.) **Vacant:** A housing unit is considered vacant if no one was living in it at the time of enumeration, unless its occupants were only temporarily absent at the time of enumeration.
- Table 49. **Median:** See explanation for Table 27.
Owner Occupied Units: See explanation for Table 46.
- Table 50. **Median:** See explanation for Table 27.
Contract Rent: The monthly rent agreed to, or contracted for, regardless of any furnishings, utilities or services that might be included.
- Table 52. **Farm:** The United States Census defines a farm as any place from which \$1,000 or more of agricultural products were sold or produced or would have normally been sold or produced during the Census year.
- Table 56. **Farm Operator:** The term farm operator is used to designate a person who operates a farm either doing the work himself/herself or directly supervised the work. He/she may be the owner, a member of the owner's household, a hired manager, or a tenant, renter or sharecropper. In the case of a partnership only one partner is considered an operator. The number of farm operators is considered to be the same as the number of farms.
- Table 57. **Estimated Value of Land and Buildings (per farm):** This is the current market value of land and buildings owned, rented or leased from others and rented or leased to others as estimated by the individual respondent.
- Table 62. **Full Owner Farms:** Individuals who operate only the land that they own.
- Table 64. **Number of Farms With Sales Less Than \$10,000:** This represents the gross market value of all agricultural products sold before taxes and expenses in the Census year. The sales include livestock, poultry and their products, crops including hay and nursery crops.
- Table 67. **Estimated Value of Land and Buildings (per acre):** See explanation for table 57.
- Table 69. **Farm Population:** Consists of persons in households who live in farm residences. Excluded are persons who reside in group quarters or in a multi-unit building. Farm residences are housing units located on at least one acre of land and produce at least \$1,000 worth of agricultural products.

Nonfarm Population: Consists of persons who reside in rural areas but do not live in farm residences.

Rural: Consists of territory, persons and housing units not in places of 2,500 or more persons in incorporated areas, census designated places of 2,500 or more persons, or other territory, incorporated or unincorporated, included in urbanized areas.

Urban: Consists of territory, persons and housing units in places of 2,500 or more persons in incorporated areas, census designated places of 2,500 or more persons, or other territory, incorporated or unincorporated, included in urbanized areas.
