From <https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=DEC_10_SF1_P13&prodType=table>

The screenshot shows the American FactFinder website interface. The browser address bar displays the URL: <https://factfinder.census.gov/faces/nav/jsf/pages/searchresults.xhtml?refresh=t#none>. The page header includes the United States Census Bureau logo and navigation tabs: MAIN, COMMUNITY FACTS, GUIDED SEARCH, ADVANCED SEARCH, and DOWNLOAD CENTER. A search bar is present with the text "Search - Use the options on the left (topics, geographies, ...) to narrow your search results".

On the left side, under "Your Selections", the search criteria are: Search: Median Age, State: South Dakota, and Census Tract: All Census Tracts within South Dakota. Below this, there are sections for "Search using the options below:" with expandable categories: Topics, Geographies, Race and Ethnic Groups, Industry Codes, and EEO Occupation Codes.

The main content area shows "Search Results: 1-19 of 19 tables and other products match 'Your Selections'". A "Refine your search results" section includes input fields for "topic or table name" and "state, county or place (optional)", along with a "GO" button and radio buttons for "topics", "race/ancestry", "industries", and "occupations".

Below the search bar, there are action buttons: View, Download, Compare, Clear All, and Reset Sort. The results are displayed in a table with columns: ID, Table, File or Document Title, Dataset, and About. The first result is selected and highlighted in yellow.

Select any hyperlinked data point.

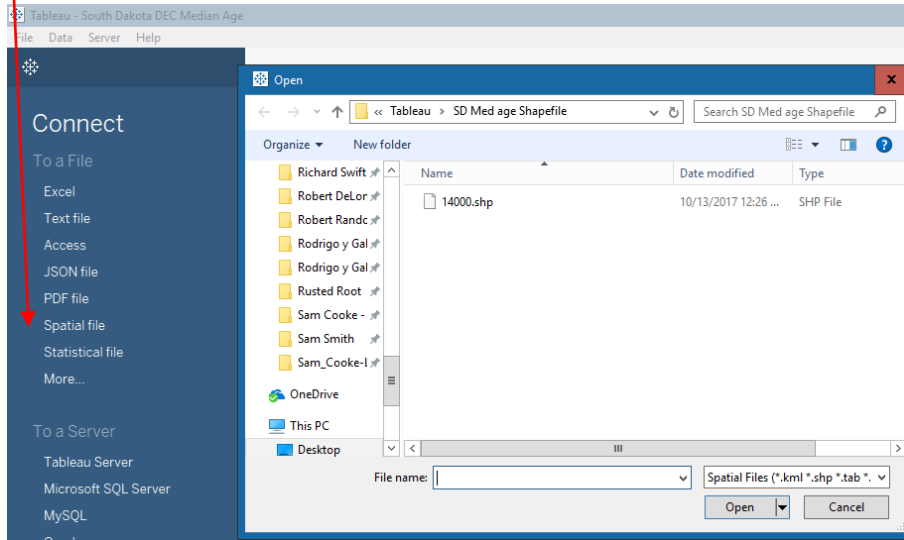

Thematic Map of Median age -- Both sexes
Geography: by Census Tract

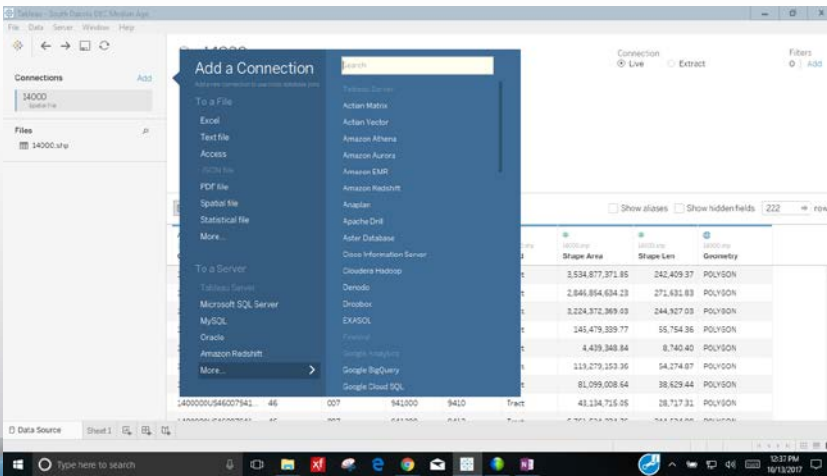

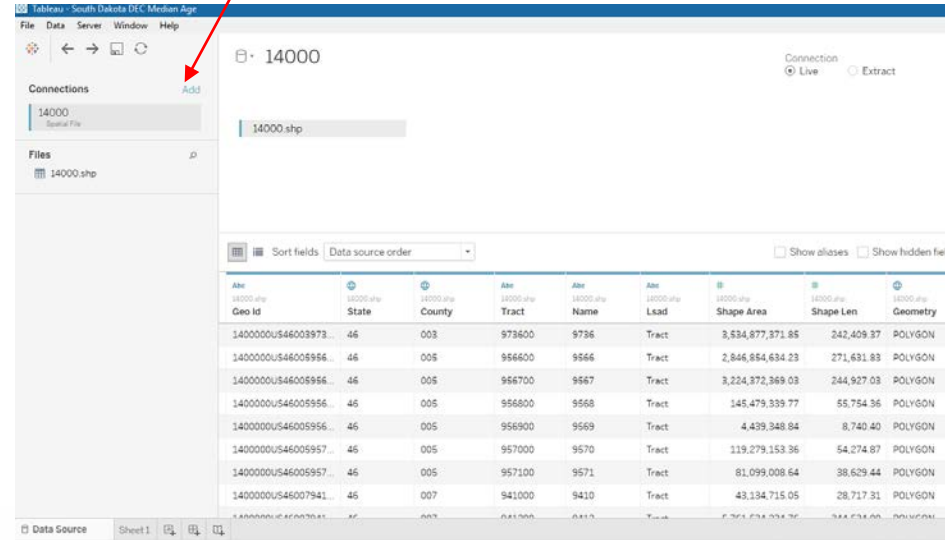

Can modify the map and add layers for visualized effect, but we just need to grab the shape file
Download the shapefile

Tableau Desktop Import Census Data and Shape files

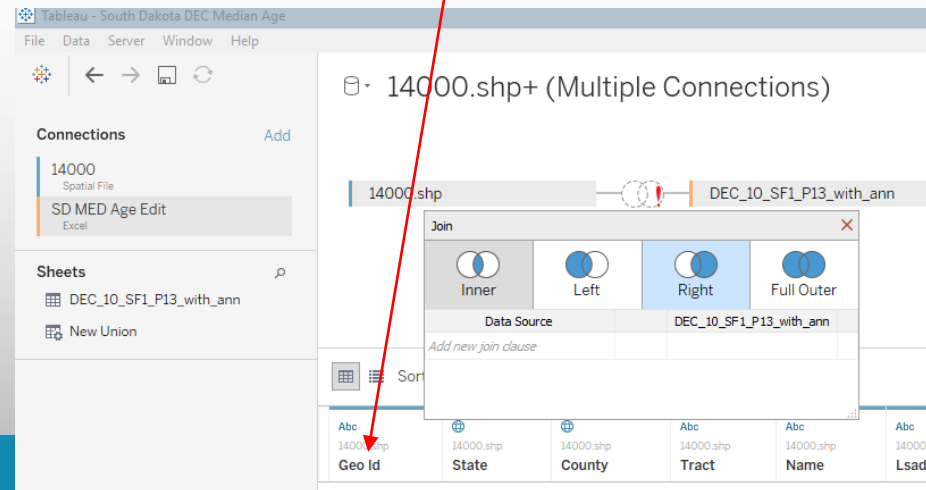

Tableau Desktop is essentially the same as Public. (Where data is stored)
As a best practice I open the shapefile first

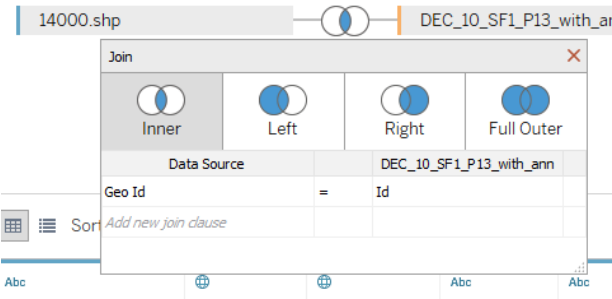

Add the excel data file connection

First Column data must match (Data not name).

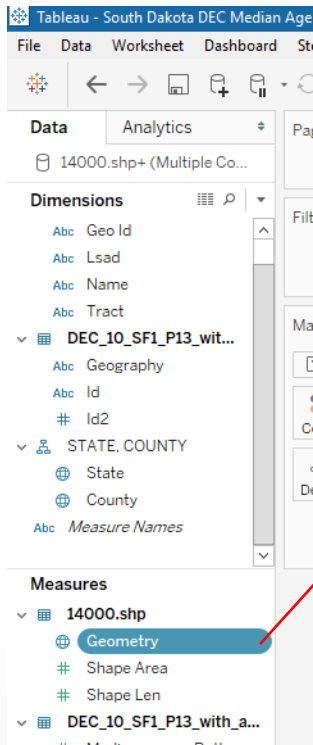

14000.shp+ (Multiple Connections)

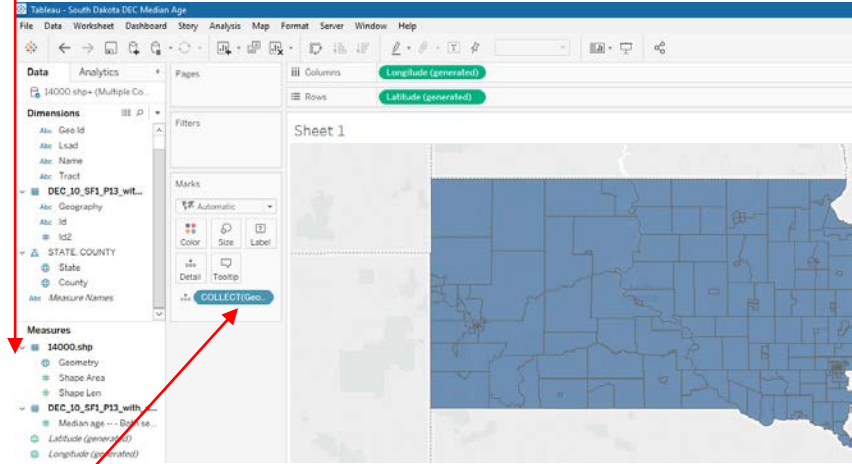

Select tab sheet 1 (at Bottom left)

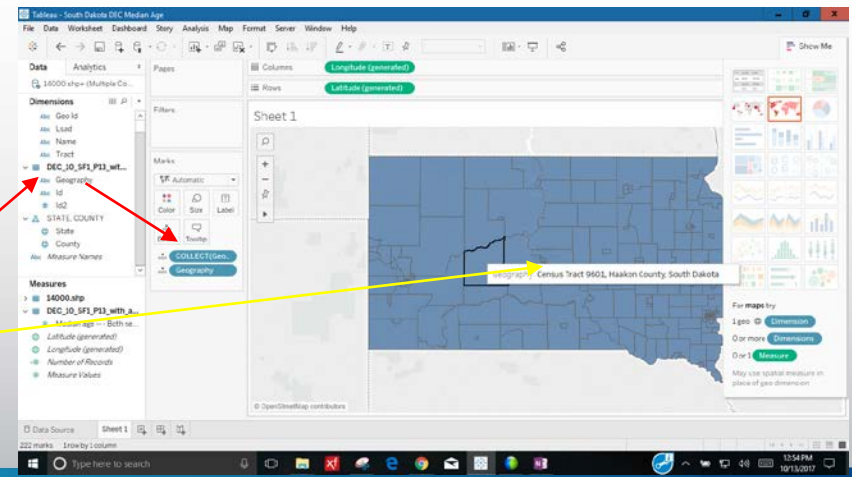

Select Geography from left menu (from 1400.shp)

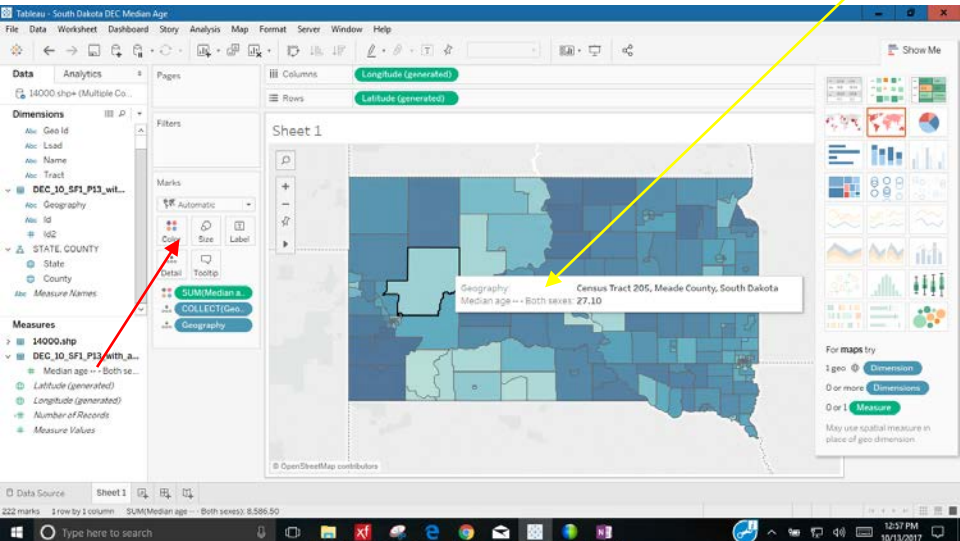

Double click Geometry then minimize 14000.shp menu

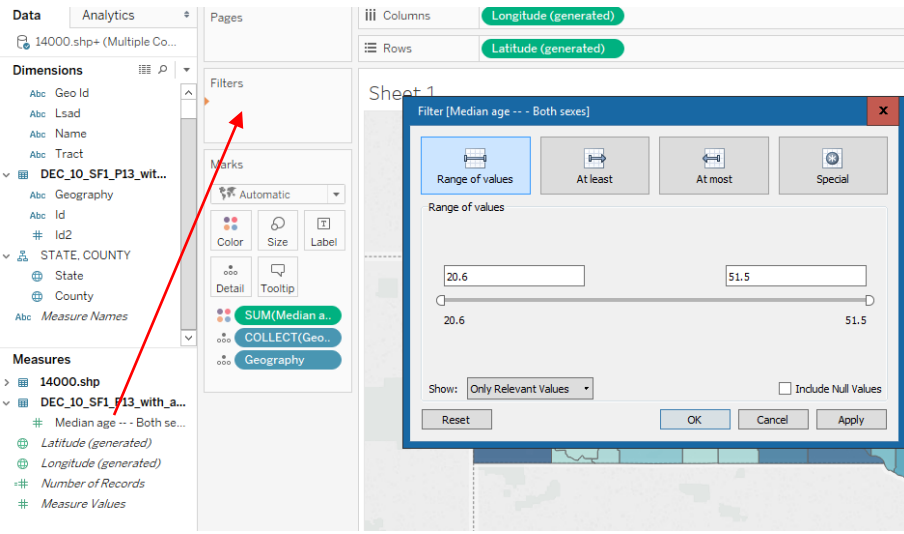

Drag Dec Geography and drop on detail. Now Mouse over name is displayed

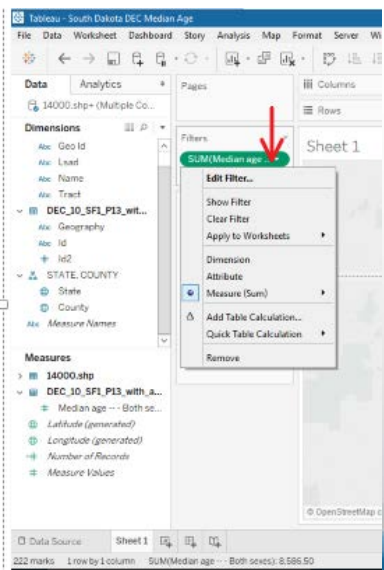

Drag Median age to color. Mouse over now displays data and tract info

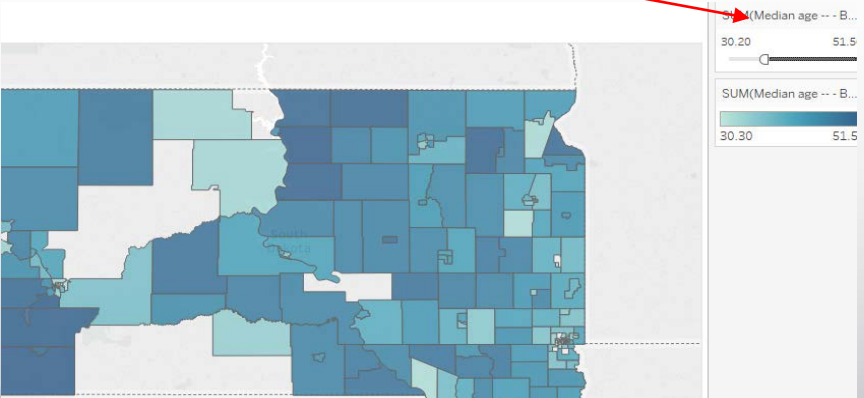

Drag Median age to filter

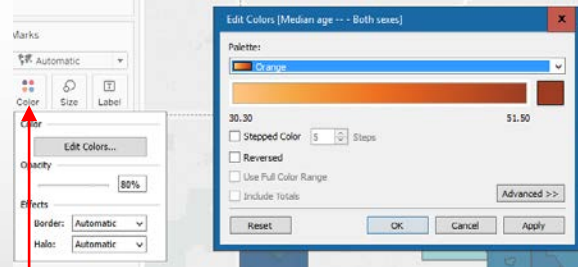

Click on filter name, Select show filter

Adjust range to be displayed

Edit Map Colors

Using ACS Data, to identify low Edu attainment. the Key is cleaning the data and using short name

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.
