Boston University

MUGAR GREENE SCHOLARS MISSION STATEMENT

Educate members of the larger university community through graphic design, film and social media about issues important to Boston University Libraries, including those around use of the library and scholarly research. Illuminate concerns, like free speech and banned books, about which librarians are passionate.

Connect students across the university with the Boston University Libraries by integrating student experiences, voices and creativity into the life of the library, leading to increased student engagement with the library, and encouraging students across the university to encounter ideas and create culture through the library.
