E⁴ Wiki Model

Phase	Task
1	<p><u>E</u>stablish/ Create</p> <p>Begin to research and write about your chosen/ assigned Wiki topic. Keep in mind that your goal is to synthesize the information and all sources need to be carefully evaluated based on criteria we develop in class. In this phase, you are expected to focus on scholarly work such as peer reviewed research or practitioner articles found in library data bases such ERIC or JSTOR. Summary and synthesis will need to demonstrate ethical and fair use of cited information as you develop your original work. The expectation is that you will use a variety of peer reviewed resources and aim for 2-3 well-developed paragraphs. Be sure to cite all resource you include in accurate APA style.</p>
2	<p><u>E</u>xtend/ Elaborate</p> <p>After you receive the Wiki entry you will read over the entry and determine what additional information would be helpful for a practitioner. You will need to find additional on-line resources such as websites, general publications, and blogs to continue developing text. Keep in mind that new research must be evaluated based on criteria we develop in class and your summary and synthesis will need to demonstrate ethical and fair use of cited information as you develop your original work. Aim for an additional 2-3 additional paragraphs. If you find information that contradicts previously posted research, you will need to indicate the discrepancy and begin to draw conclusions. Be sure to cite all resource you include in accurate APA style.</p>
3	<p><u>E</u>laborate/ Embellish</p> <p>This week, your job is to elaborate on an assigned Wiki entry. After analyzing the posted information, locate additional media such as YouTube instructional videos, podcasts, hyperlinks, videos, additional websites, etc. that help to clarify the topic and link these to the entry. Given the topic of the Wiki and the evaluation criteria we developed in class, evaluate what sources would best support your topic in this phase of development. In addition, add graphics (images/ pictures) or create a concept map that enhances the Wiki entry. Be sure to cite all resource you include in accurate APA style.</p>
4	<p><u>E</u>dit</p> <p>After receiving your editing assignment (your work from phase 1), evaluate the Wiki entry as a whole unit. Identify the additional resources that were added in the development process and evaluate their contribution to the project. You will be asked to assess peers in the context of the ethical and fair use of sources as well as the effectiveness of their summarization and synthesis of the material. In this editing phase, you are to change any unclear language, or edit anything that you feel needs to be changed. You are encouraged to open dialogue with peers who contributed at various phases of Wiki development. Verify that resources are included using correct APA style, that there are embedded hyperlinks that are working, and that there are graphics and/ or videos that support the entry. If the entry is unclear or lacking in any way, locate other information and add additional notes. Finally, read over the existing entry and make any necessary changes/ revisions.</p>

WIKI Development: Self and Peer Evaluation Rubric

Student Name _____

Phase **1** **2** **3** (circle one)

Use the following criteria to evaluate your work for each phase of the Wiki development. For phase 1, provide a self evaluation. For all other phases, complete a rubric for peers who contributed to the topic just prior to you taking over that topic. Use a separate rubric for each individual involved in the project.

Performance Area	Levels of Skill Development		
	Beginning 1-2	Developing 3-4	Exemplary 5-6
Research <i>Access & Evaluation of Resources</i>	Evaluation of sources is based on minimal criteria developed in class. Several sources are not relevant to the topic.	Evaluation of sources is evaluated on a majority of the designated criteria developed in class. Most sources are relevant to the topic, but may not extend content knowledge.	Evaluation of sources is evaluated on the designated criteria developed in class. Sources include essential knowledge about the topic.
Ethical Use <i>Accurate Citations and Effective Use of Ideas</i>	Most citations do not follow APA style and are not well-organized. Utilized sources are minimally incorporated into the overall understanding of the topic.	Citations follow APA style with limited errors and are effectively synthesized into the overall text Utilized sources are incorporated into the overall understanding of the topic.	APA style is accurately used with no formatting errors and synthesized text supports Wiki content. Utilized sources are clearly incorporated into the overall context of the Wiki which serves to extend the readers' understanding of the topic.
Written Communication <i>Grammar, Style, and Flow</i>	Multiple issues exist with spelling, grammar, and/or punctuation. Revisions are needed. Headings do not serve to guide the reader or are not included.	Attention has been paid to the spelling, grammar, and punctuation, although there are several errors. Wiki content is easy to follow as headings and titles guide the reader.	Accurate grammar, spelling, and punctuation is used. Ideas are well-organized, and entries are clear, coherent, and reader friendly. Headings and titles facilitate the clarity of the Wiki.
(Phase 3 only) Multimedia <i>Hyperlinks and Graphics</i>	Fewer than 2 hyperlinks, images, and/or videos have been correctly uploaded/ included. Addition of the digital resources does not add to the overall understanding of the Wiki content.	More than 2 hyperlinks, images, and/or videos have been correctly uploaded/ included. Addition of the digital resources adds to the overall understanding of the Wiki content.	Multiple Images, videos, hyperlinks, and/ or graphics are included. Addition of the digital resources clearly enhances the Wiki development and increases understanding of the Wiki content.
