ENVIRONMENTAL SURVEILLANCE
MASTER SAMPLING SCHEDULE

L. E. Bisping

January 1992

Prepared for
the U.S. Department of Energy
under Contract DE-AC06-76RLD 1830

Pacific Northwest Laboratory
Richland, Washington 99352

SUMMARY

Environmental surveillance of the Hanford Site and surrounding areas is conducted by the Pacific Northwest Laboratory (PNL)^(a) for the U.S. Department of Energy (DOE). This document contains the planned schedule for routine sample collection for the Surface Environmental Surveillance Project (SESP) and Ground-Water Monitoring Project. The routine sampling plan for the SESP has been revised this year to reflect changing site operations and priorities. Some sampling previously performed at least annually has been reduced in frequency, and some new sampling to be performed at a less than annual frequency has been added. Therefore, the SESP schedule reflects sampling to be conducted in calendar year 1992 as well as future years. The ground-water sampling schedule is for 1992. This schedule is subject to modification during the year in response to changes in Site operations, program requirements, and the nature of the observed results. Operational limitations such as weather, mechanical failures, sample availability, etc., may also require schedule modifications. Changes will be documented in the respective project files, but this plan will not be reissued.

The purpose of these monitoring projects is to evaluate levels of radioactive and nonradioactive pollutants in the Hanford environs, as required in DOE Order 5400.1, "General Environmental Protection Program," DOE Order 5400.5, "Radiation Protection of the Public and the Environment." The sampling methods will be the same as those described in the Environmental Monitoring Plan United States Department of Energy Richland Field Office, DOE/RL 91-50, U.S. Department of Energy, Richland, Washington.

This schedule includes ground-water sampling performed by PNL for environmental surveillance of the Hanford Site. It also identify samples that are collected and analyzed by other ground-water monitoring programs at Hanford (e.g. RCRA or CERCLA). They are indicated by a zero in the analysis column of the ground-water tables. Additional detail on the rational for ground-water sampling is

(a) Pacific Northwest Laboratory is operated by Battelle Memorial Institute for the U.S. Department of Energy under Contract DE-AC06-76RLO 1830.

presented in Bryce, R. W., J. C. Evans, and K. B. Olsen. 1991. Ground-Water Sample Collection and Analysis Plan for the Hanford Site Ground-Water Surveillance Project. PNL-7872, Pacific Northwest Laboratory, Richland, Washington.

Environmental and ground-water samples that are split with the Washington State Department of Health are indicated in the schedule as well as environmental samples that are split with the U.S. Food and Drug Administration.

Questions can be directed to Rodger Woodruff, Manager, Surface Environmental Surveillance Project, and Robert Bryce, Manager, Ground-Water Environmental Surveillance Project.

ABBREVIATIONS

FREQUENCY SYMBOLS USED

A - annually
BA - biannually
BM - bimonthly (every 2 months)
BW - biweekly (every 2 weeks)
M - monthly
M Comp - monthly composite
Q - quarterly
SA - semiannually
W - weekly

ANALYSIS SYMBOLS USED

Generally, standard elements, chemical, and isotope designations are used to indicate the analyses performed. Other analyses designations used are:

Alpha - gross alpha activity of sample
Beta - gross beta activity of sample
BOD - biological oxygen demand
DO - dissolved oxygen
Gamma Scan - analysis of photon energy spectrum for individual photon-emitting radionuclides, including ^{22}Na , ^{60}Co , ^{65}Zn , ^{106}Ru , ^{131}I , and ^{137}Cs
U - natural uranium
Isotopic uranium - ^{234}U , ^{235}U , ^{238}U
Isotopic plutonium - ^{238}Pu , $^{239-240}\text{Pu}$
Lo ^3H - analytical procedure includes electrolytic enrichment
WQ - water quality - nonradiological
LEP - samples analyzed by Low Energy Photon System
NRA - not routinely analyzed
Comp. Only - sample analyzed as part of composite only

PORTABLE INSTRUMENTS SYMBOLS USED

BICRON - Micro rem meter
GM - Geiger-Müller counter
PIC - Pressurized Ionization Chamber

COMMENT ABBREVIATIONS USED

Source - well being samples to monitor a contaminant source area

Plume - well used to track and define known contaminant plumes.

CAS - well part of a confined aquifer study.

Water Supply - Water supply wells and wells near water supplies

DOH - Wells co-sampled with the Washington State Department of Health

Boundary - wells at the Hanford Site boundary used to monitor the quality of water as it enters or leaves the Site.

Background - wells in uncontaminated areas of the site used to identify concentrations of constituents in areas unaffected by Hanford operations

Offsite - wells sampled to determine water quality off the Site

Screen - wells being sampled as part of a new effort

3D-Char - wells being screened to support an effort to characterize contaminant distribution in three dimensions

	Muscle	0464	3	October	^U ^(d) , Gamma Scan
	Liver	0465	3	October	NRA ^(c)
	Bone	0466	3	October	NRA ^(c)
Yakima County ^(e)	Pheasant				
	Muscle	--	20	September	⁹⁰ Sr, ^U ^(d) , Gamma Scan
	Liver	--	20	September	^{Pu} ^(f)
	Bone	--	20	September	⁹⁰ Sr

(a) Refer to Wildlife Surveillance Location Map.

(b) Pheasant preferred; chukar or quail acceptable if pheasant is unavailable.

(c) Not Routinely Analyzed (NRA) - Retain liver and bone to be analyzed for isotopic plutonium and ⁹⁰Sr, respectively, if ¹³⁷Cs exceeds 100 pCi/g (wet weight) in muscle.

(d) Isotopic uranium.

(e) Background samples to be collected at least every 5 years and will next be collected in 1994. Sample numbers will be assigned prior to collecting sample.

(f) Isotopic plutonium.

1.12.4 Deer

<u>Location (a)</u>	<u>Species/ Sample</u>	<u>Sample Number</u>	<u>Number of Samples</u>	<u>Collection Period</u>	<u>Analyses</u>
100-N Area	Mule				
	Muscle	6250	2	December	Gamma Scan, DOH ^(b)
	Liver	6251	2	December	Pu ^(c)
	Bone	6303	2	December	90Sr
200 Ponds	Mule				
	Muscle	0369	2	December	Gamma Scan
	Liver	0370	2	December	Pu ^(c)
	Bone	0371	2	December	90Sr
Road Kill at Onsite Locations ^(d)	Mule				
	Muscle	ATL ^(e)	6	Annual	Gamma Scan
	Liver	ATL	6	Annual	Pu ^(c)
Ellensburg ^(f)	Mule				
	Muscle	--	2	October	Gamma Scan, DOH ^(b)
	Liver	--	2	October	Pu ^(c)
	Bone	--	2	October	90Sr

(a) Refer to Wildlife Surveillance Location Map.

(b) Duplicate samples sent to the Washington State Department of Health.

(c) Isotopic plutonium.

(d) As available.

(e) ATL - according to location.

(f) Background samples to be collected at least every 5 years and will next be collected in 1995.
Sample numbers will be assigned prior to collecting samples.

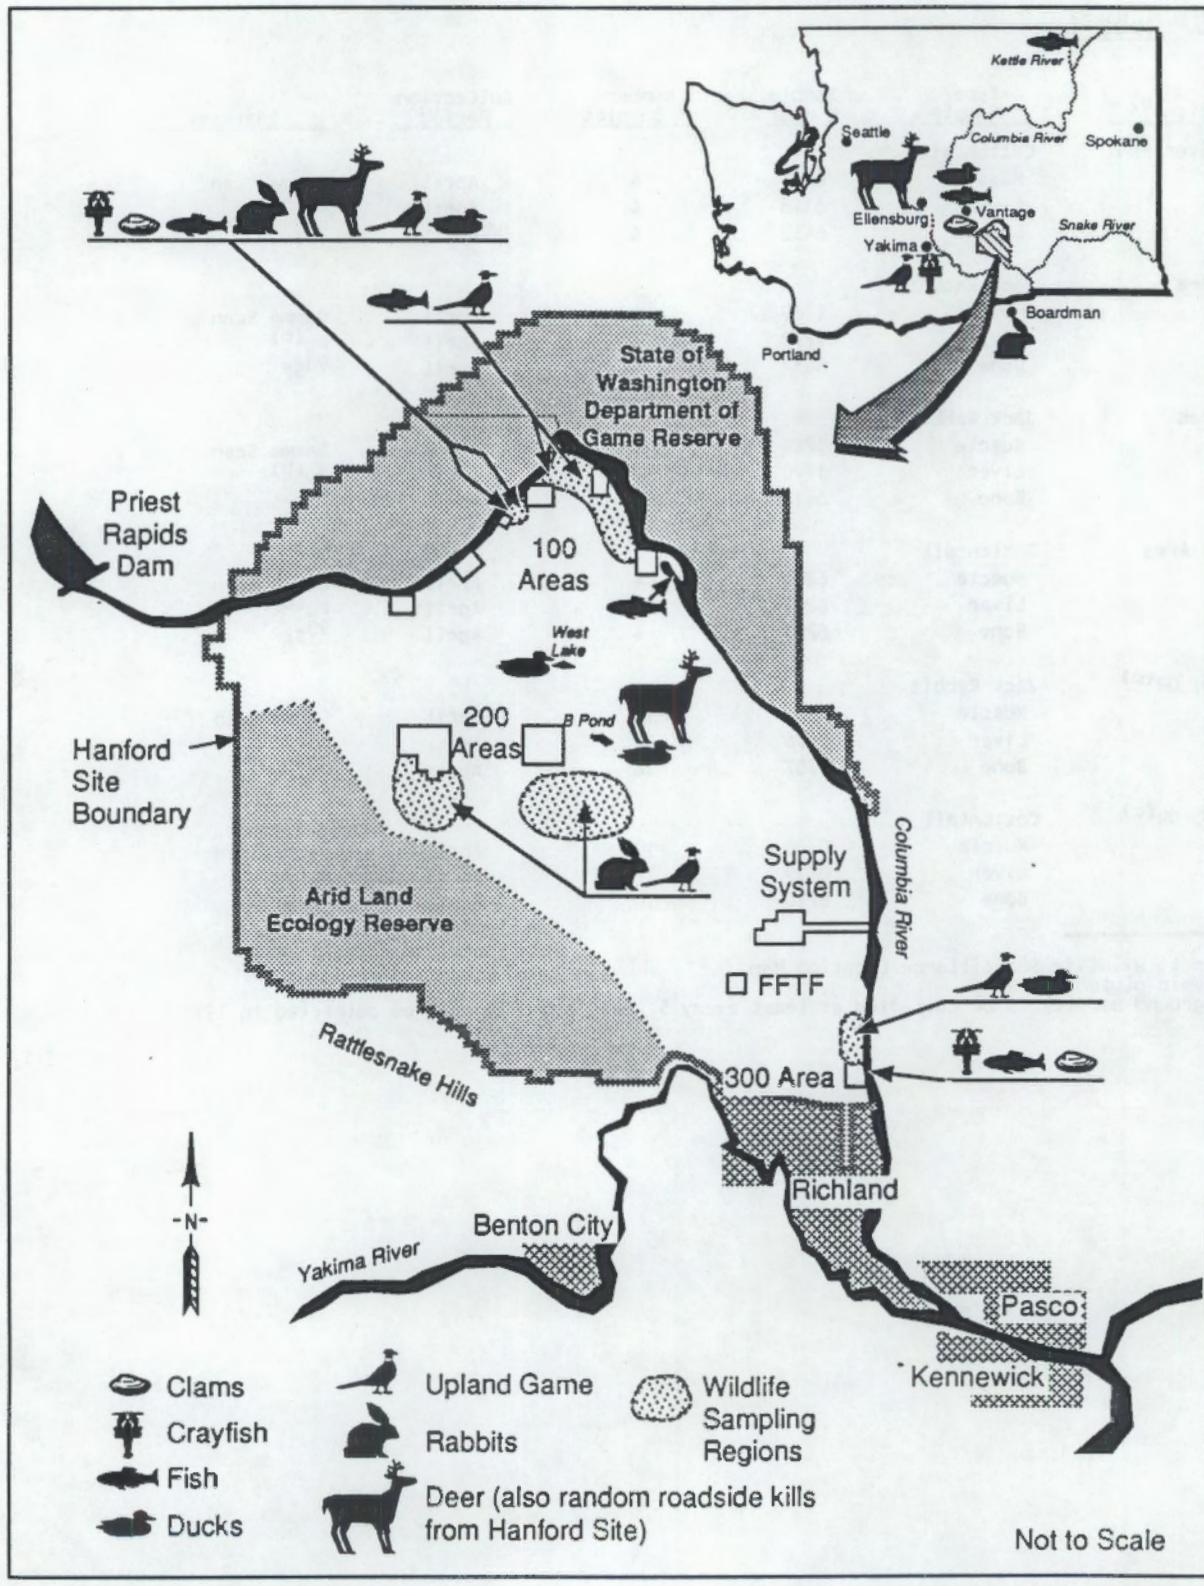

1.12.5 Rabbits

<u>Location^(a)</u>	<u>Type/ Sample</u>	<u>Sample Number</u>	<u>Number of Samples</u>	<u>Collection Period</u>	<u>Analyses</u>

300 Area Outside 300 Area Perimeter Fence; NW Corner of Pond Area; 4-S 300 Railroad Crossing; 3-N Gate Parking Lot; 4-S Cypress Street; Cypress Gate and 4-S; 3701 Badge House; N of 331 Bldg.; 3614-A Bldg.; Inside 300 Area Perimeter Fence	1810	11	Q	Road Monitor

2.3 ONSITE ROADWAY RADIATION SURVEYS (contd)

Description ^(a)	Sample Number	Identification Trip	Frequency	Instrument ^(b)
400 Area Visitor Center Access Road; Main Gate; NW Corner Parking Lot; NE Corner Parking Lot; Visitor Center; Old 4-E Monitoring Station; NE Corner Perimeter Fence; NW Corner Perimeter Fence; SW Corner Perimeter Fence; SE Corner Perimeter Fence; Main Gate	1811	12	Q	Road Monitor

(a) Refer to Road Survey Route Map.

(b) The instrument used for road monitoring consists of sodium iodide detectors with associated electronics which function as gross-gamma counters.

2.4 ONSITE RAILWAY RADIATION SURVEYS

Description ^(a)	Sample Number	Identification Trip	Frequency	Instrument ^(b)
1100 Area; Ruby Junction; 300 Area Gate; Geneva Junction; FFTF; May Junction; Willa Junction; Pearl Junction; Ethel Junction; 200-E Gate; Susie Junction; 200-W Gate	1821	2	Q	Railway Monitor
May Junction; Ruth Junction; Ginger Junction Betty Junction; Nancy Junction; 100-N Gate; Helen Junction; Audrey Junction; 100-K Gate; Susie Junction ^(c)	1822	3	Q	Railway Monitor
1100 Area; Van Giesen; Yakima River Bridge; Columbia Center ^(c)	1819	5	Q	Railway Monitor

(a) Refer to Railroad Survey Route Map.

(b) The instrument used for railway monitoring consists of sodium iodide detectors with associated electronics which function as gross-gamma counters.

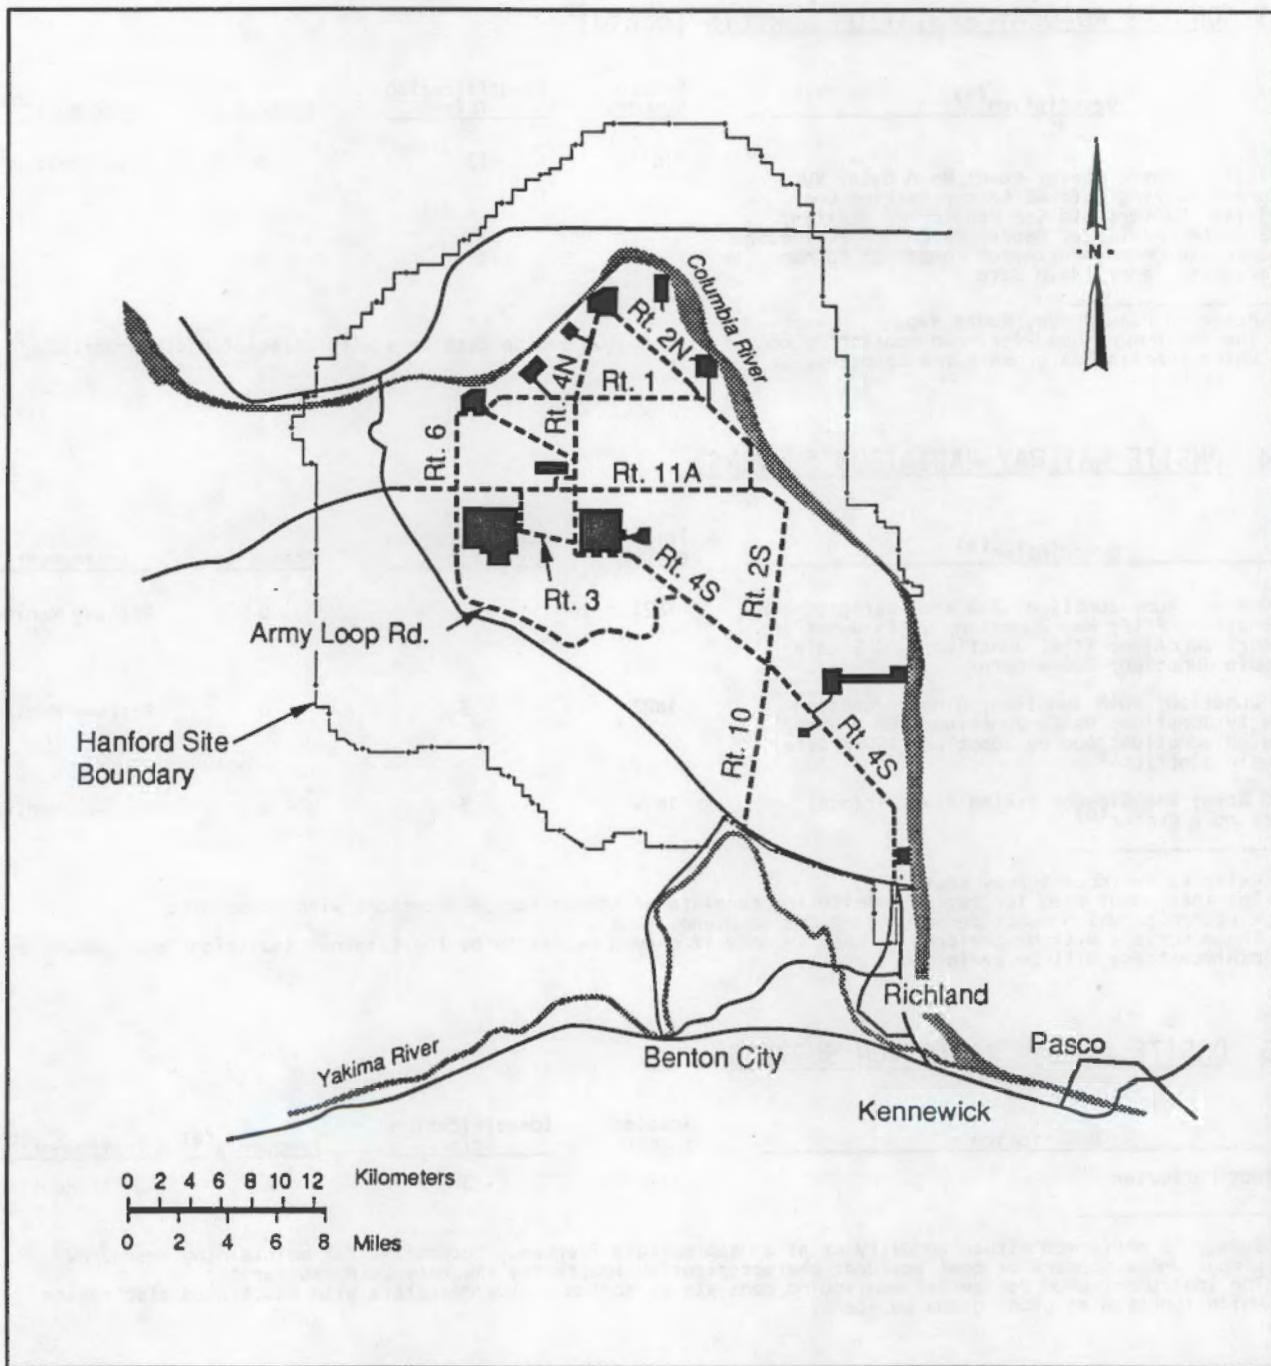

(c) These surveys will be performed quarterly only if deemed necessary by the External Radiation Task Leader; at a minimum these will be performed annually.

2.5 ONSITE AERIAL RADIATION SURVEYS

Description	Sample Number	Identification Trip	Frequency ^(a)	Instrument ^(b)
Project Perimeter	1820	3	A	Aerial Monitor

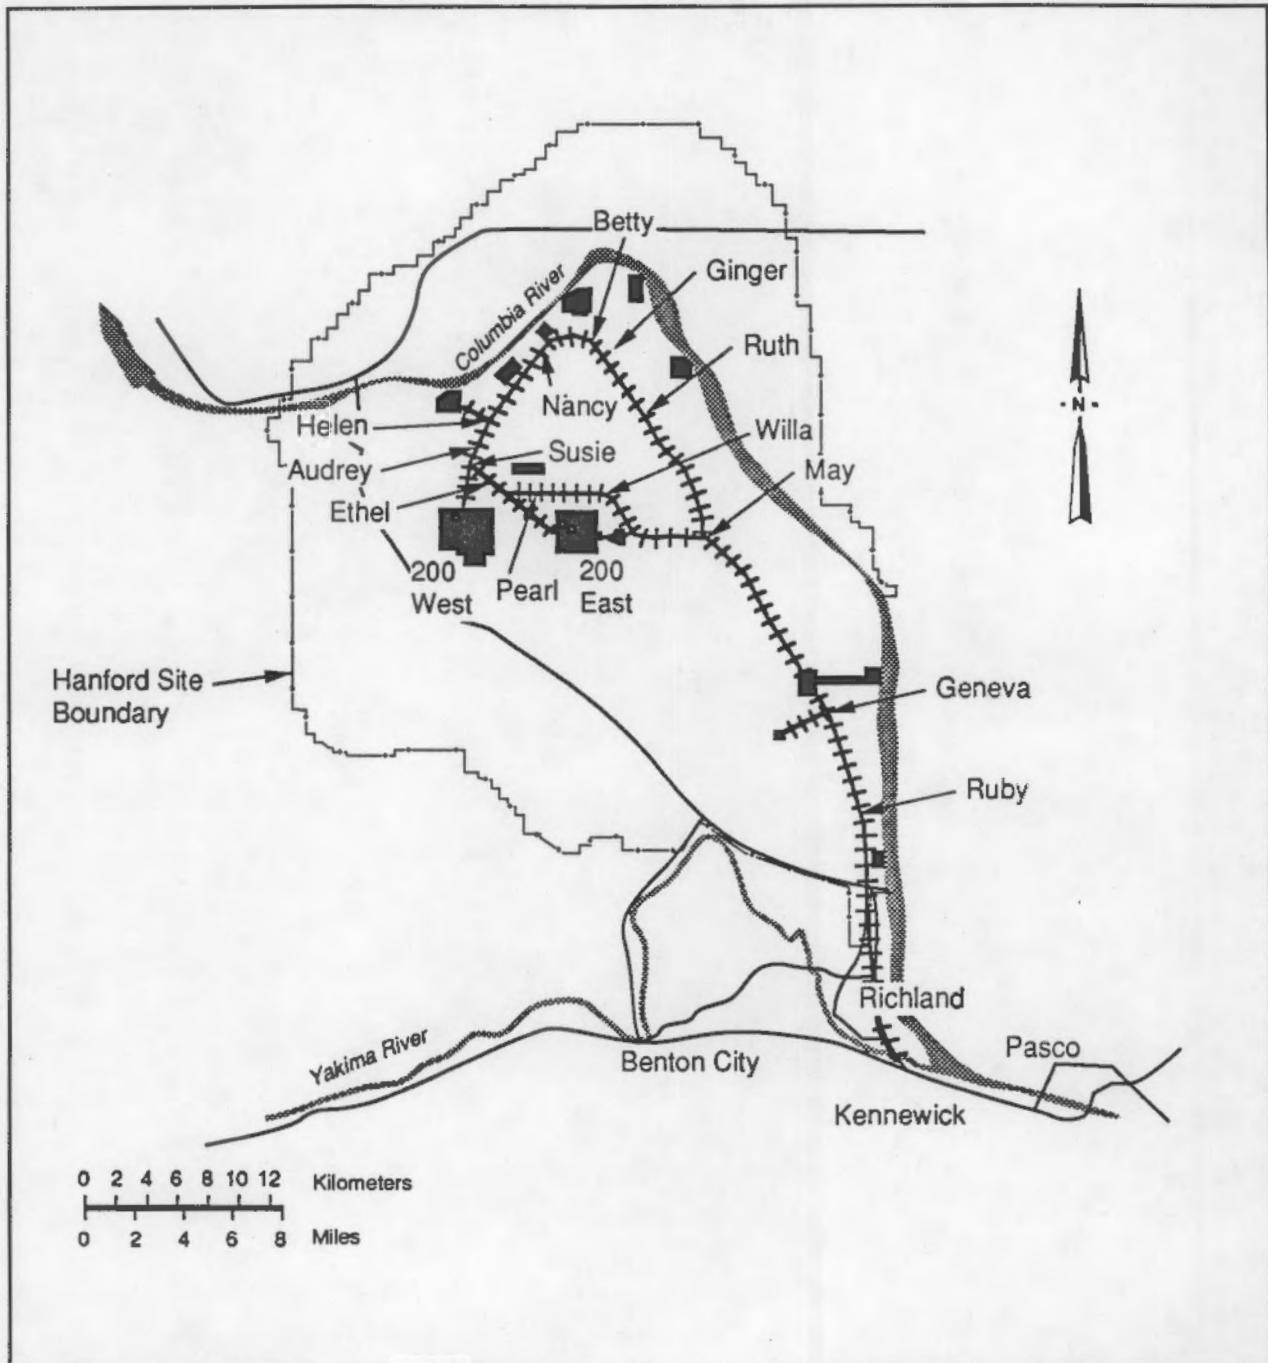

(a) Survey is performed either annually or at an appropriate frequency determined for maintaining emergency preparedness support or post-accident characterization (currently the only purposes for it).

(b) The instrument used for aerial monitoring consists of sodium iodide detectors with associated electronics which function as gross-gamma counters.
