THE COLLEGE BUILDING.

The College occupies its own building, which is a five-story and basement structure of Bedford stone, pressed brick and terra-cotta; its location is ideal. Standing in the center of the great medical college and hospital district of Chicago, our students are thus, from the very start of their course, brought into close contact with not only the professional teaching of their own school, but the atmosphere of student life which permeates the entire locality.

The ease with which students can secure desirable and comfortable rooming and boarding places within easy walking distance of the College is a very important point for consideration. Ashland Boulevard is three blocks east of the College; Twelfth Street Boulevard is four blocks south; Oakley Boulevard is six blocks west, and Washington Boulevard is seven blocks north. The district bounded by these four Boulevards comprises a portion of the best residence district of the West Side, and in it the students find their boarding and rooming places, thus avoiding the expenses and annoyance incident to the use of crowded street cars.

## Special Notice to Students—Requirements for Admission

The minimum preliminary educational requirement of this College shall be a certificate showing graduation from a high school, or its equivalent, the preliminary examination to be placed in the hands of any State Superintendent of Public Instruction. In Chicago there is one deputy of the State Superintendent of Public Instruction.

Where there is no official bearing the title of State Superintendent of Public Instruction, that title shall be construed to apply to the highest educational official in that State, or his appointee.

*Students from foreign countries will be required to present a certified English translation of their credentials.*

Students having diplomas, literary or otherwise, who desire to matriculate, should present them to the College for inspection.

## Requirements for Admission to Advanced Standing

Graduates of reputable medical colleges are admitted to this College without examination, and may become candidates for the degree of Doctor of Dental Surgery at the end of two full courses of instruction. They will be excused from the lectures and examinations in general anatomy, chemistry, histology, physiology, and pathology. They will be required to take the course in operative and prosthetic technics, dental pathology, and histology.

Graduates of dental schools in good standing may become candidates for the degree of D. D. S. after attendance upon one full course of instruction.

Students presenting credentials showing that they have attended one or more courses in a dental college, which maintains an equal or similar standard of requirements to this college, will be admitted and given the credit to which they are entitled.

All applicants presenting such credentials shall, at the option of the Faculty, submit to a preliminary examination.

## Time Requirements

*To receive credit for a full course of instruction, students must be in attendance within ten days after the opening of the Annual Winter Course as announced in this catalogue.*

## College Calendar—Session of 1913-1914

1913.

Tuesday, October 7—Annual Winter Course begins. The opening exercises will be held in the large amphitheater of the College at 8:00 P. M.

Thanksgiving Day—Entertainment at the College by the students.

December 23—Holiday vacation begins.

1914.

January 1—Holiday vacation ends.

February 23—Washington's Birthday (legal holiday).

May 11 to 23—Freshmen and Junior Examinations. Final examinations for the Degree of Doctor of Dental Surgery.

June 1—Annual meeting of the Alumni Association for the election of officers, transaction of business and presentation of papers.

All graduates are earnestly requested to be present.

June 2—Commencement Exercises, 2:30 P. M. Annual Banquet, 7:00 P. M.

June 4—The Spring and Summer Infirmary Course opens.

October 31—Spring and Summer Infirmary Course closes.

The Dental Infirmary is open during the entire year.

## Post-Graduate Course

During the month of June each year a special course is given to Practitioners. Lectures, demonstrations and practical work are included in this course.

The Course begins on the Second Tuesday in June. Those interested should write to the College for further particulars.

## Faculty—Session 1913-1914

Henry B. Brown, A. M., President of Valparaiso University.

---

Truman W. Brophy, M. D., D. D. S., LL. D., Dean of Faculty.  
Professor and Head of Department of Oral Surgery.  
81 East Madison St., Chicago.

C. N. Johnson, M. A., L. D. S., D. D. S., Dean of Students.  
Professor and Head of Department of Operative Dentistry.  
22 East Washington St., Chicago.

W. L. Copeland, M. D., C. M., M. R. C. S., Secretary.  
Professor and Head of Department of Anatomy.  
31 N. State St., Chicago.

Calvin S. Case, M. D., D. D. S.  
Professor and Head of Department of Orthodontia.  
108 N. State St., Chicago.

J. Newton Roe, A. M., Sc. D.  
Professor and Head of Department of Chemistry and Metallurgy.  
706 South Lincoln St., Chicago.

W. H. G. Logan, M. D., D. D. S.  
Professor and Head of Department of Oral Pathology, Oral Hygiene,  
Associate Professor of Oral Surgery and Radiography.  
29 East Madison St., Chicago.

J. P. Buckley, Ph. G., D. D. S.  
Professor and Head of Department of Materia Medica and Therapeutics.  
39 South State St., Chicago.

Charles H. DeWitt, A. B., M. S.  
Professor and Head of Department of Bacteriology and Histology.  
706 South Lincoln St., Chicago.

F. E. Roach, D. D. S.  
Professor of Porcelain Art.  
132 N. Wabash Ave., Chicago.

Donald M. Gallie, D. D. S.  
Clinical Professor of Operative Dentistry.  
32 N. State St., Chicago.

William D. Zoethout, A. M., Ph. D.  
Professor and Head of Department of Physiology.  
706 South Lincoln St., Chicago.

George W. Dittmar, D. D. S.  
Professor and Head of Department of Prosthetic Dentistry.  
59 East Madison St., Chicago.

William E. Putz, M. D.  
Professor and Head of Department of Physical Diagnosis.  
1852 Blue Island Ave., Chicago.

- Elmore W. Elliott, Ph. G., D. D. S.  
Associate Professor of Materia Medica and Therapeutics.  
39 South State St., Chicago.
- J. E. Schaefer, D. D. S., LL. B.  
Professor and Head of Department of Dental Jurisprudence, Instructor  
in Prosthetic Dentistry, Ethics, Economics.  
1747 W. Harrison St., Chicago.
- P. G. Puterbaugh, M. D., D. D. S.  
Professor of Oral Bacteriology, Lecturer on Anaesthesia, and Instructor  
in Operative Dentistry.  
2460 North Clark St., Chicago.
- E. D. Coolidge, D. D. S.  
Professor of Dental Anatomy and Instructor in Operative Technics.  
59 East Madison St., Chicago.
- T. L. Grisamore, Ph. G., D. D. S.  
Associate Professor in Dental Orthopedia.  
29 East Madison St., Chicago.
- R. E. MacBoyle, D. D. S.  
Associate Professor of Prosthetic Dentistry in Crown and Bridge Depart-  
ment, and Instructor in Operative Dentistry.

## Instructors and Demonstrators

- Leonard C. Borland, M. D., L. P., Instructor in Anatomy.
- J. R. Watt, D. D. S., Instructor in Prosthetic Technics.
- S. P. Starr, D. D. S., Instructor in Prosthetic Technics.
- A. J. Krombas, D. D. S., Assistant in Clinical Surgery.
- A. Brom. Allen, D. D. S., Demonstrator of Extracting.
- Robert I. Wood, D. D. S., Demonstrator in Infirmary and Instructor in Oper-  
ative and Prosthetic Dentistry.
- Carl A. Halle, D. D. S., Demonstrator in Infirmary.
- Gordon M. Abbott, D. D. S., Demonstrator in Infirmary.
- John S. Grimson, D. D. S., Demonstrator in Infirmary.
- John E. Kolar, D. D. S., Demonstrator in Infirmary.
- Jesse L. Meredith, D. D. S., Demonstrator in Infirmary.
- John C. McGuire, D. D. S., Demonstrator in Infirmary.
- R. E. Moyer, M. E., M. D., Registrar, Instructor in Bacteriology and Path-  
ology Laboratories.

## Recitation Masters

- A. E. DeReimer, D. D. S., Oral Surgery.
- J. E. Schaefer, D. D. S., LL. B., Anatomy.
- J. R. Watt, D. D. S., Chemistry.
- E. W. Elliott, Ph. G., D. D. S., Materia Medica and Therapeutics.
- M. L. Schmitz, D. D. S., Oral Pathology.
- Robert I. Wood, D. D. S., Oral Pathology.
- John C. McGuire, D. D. S., Oral Pathology.

## Department of Surgery

In the Senior year a complete course is given in Oral Surgery, both didactic and clinical, embracing the discussion and presentation of surgical diseases, as well as the underlying principles of surgical practice. At the surgical clinic, which is held every Tuesday, and which is very large and replete with interesting cases, a variety of operations are performed in the presence of the class. To illustrate:

During three clinics, eighteen cases were considered, eleven of which were operated upon as follows:

Double cleft palate and hare-lip, child three weeks old; same operation on a child eleven weeks old; operation for single cleft palate and hare lip, man twenty-seven years of age; operation for cure of empyema of maxillary sinus on woman of twenty-seven; same operation on a woman of twenty-one; operation for necrotic condition of superior maxilla; operation for tuberculosis of inferior maxilla; operation for removal of cicatricial tissue from cheek to relieve partial ankylosis of the temporo-maxillary articulation; operation for carcinoma of inferior maxilla; operation for removal of mucoid cyst on lower lip.

During the months of February and March of each session, the oral surgery clinics will be given by the Associate Professor of Oral Surgery.

A course in Oral Surgery on the Cadaver will be given during the Senior year to all students who have become eligible by reason of having served as Assistant Demonstrator of Anatomy and made the complete dissection on the human cadaver as described in the Department of Anatomy section.

This course consists of six practical demonstrations of the operations that a dentist is most frequently called upon to perform.

*First*—Demonstration of the method of procedure for reduction of dislocation of the lower jaw.

*Second*—Demonstration: ligation of lingual, facial, and internal maxillary arteries; operation of cutting the frenulum; amputation of part or all of the tongue; operation for ranula, salivary calculus, and salivary fistula.

*Third*—Demonstration: operation upon inferior dental and infra-orbital nerves, and Meckel's ganglion.

*Fourth*—Demonstration: operation upon hare-lip.

*Fifth*—Demonstration: operation for cleft, soft and hard palate.

*Sixth*—Demonstration: operation upon the Antrum of Highmore, fracture of the lower jaw, and the various surgical methods to obtain union of the same.

## Department of Anatomy

*In the Freshman Year*, the course consists of the Anatomy of the Bones, Ligaments, Muscles and Viscera. In this department three lectures are given each week, each being illustrated in the most practical manner on a cadaver, manikins, plates or blackboards. The lower extremity is dissected the first year.

*In the Junior, or Second Year*, the course consists in a study of the Anatomy of the Arteries, Veins, Lymphatics, Nerves and Organs of special sense. The latter are prominently dwelt upon. The upper extremity is dissected this year.

### Dissecting

The work in practical anatomy is arranged with special reference to the requirements of the dental student.

The room in which this work is performed is commodious, with high skylight and perfect ventilation.

As there is no mingling of medical and dental students in this work, it is possible, and it is considered advisable, to devote more attention to the oral cavity and the parts immediately adjacent thereto than would be practical where students of the two professions were using the same subjects.

Before making a dissection, the student is required to make a drawing of the particular region, with a careful study of the text-book regarding it; the dissection is then made, all who are in the room working on the same region at the same time.

This is of great advantage to the students, as it affords them an opportunity of seeing the parts under consideration a great many times, thus becoming very familiar with them.

Special dissections are made of the pharynx, palate, oral, nasal and antral cavities.

Special attention is also given the parts on which surgical operations are most frequently performed, and instruction given regarding the various operations of the oral cavity.

Provision has been made for those students who desire to take advanced work in Anatomy for the purpose of fitting themselves to do Oral Surgery to act as Assistant Demonstrators of Anatomy during their senior year. Material will be provided for them to make complete dissection, including the parts not included in the regular anatomical course, *i. e.*, Articulations and Perineum, etc., for which a certificate will be issued. The holders of these certificates will then be permitted to take the course on Oral Surgery upon cadaver at their option and upon completion a certificate will be given.

## Department of Dental Anatomy

In this department the student will be taught, not only the anatomy of the human teeth, but their homologues as well. The general subject of Dentition in all the orders of animals will be considered and the scientific, as well as the

practical, aspect presented, comprising in the Freshman Year, Dental Anatomy, and in the Junior Year, Comparative Anatomy, each study being completed at the end of the year.

The course of lectures in this Department will be illustrated by a large collection of skulls and dentitions, representing all the principal orders of the vertebrate world, and also by stereopticon.

## Department of Oral Pathology

The lectures in Oral Pathology will be prefaced by a discussion of the preparation of tissues for microscopical study, while a few of the more important subjects in the course are embraced in the following summary:

Changes in the circulation of the blood, hyperemia and anemia, hemorrhage and transudation, thrombosis and embolism.

Tissue changes occurring in hypertrophy, hyperplasia, metaplasia and regeneration, general character and limitation of cell regeneration, tumors, cysts, etc., regeneration of special tissues.

A full consideration of the entire field of inflammation, types of inflammation with reaction of the body to injury, the healing of wounds, special phases of inflammation with a survey of their significance.

The infectious diseases of tuberculosis and syphilis, because of their frequent presentation in practice, are thoroughly discussed.

In special pathology, instruction is given covering the blood and the blood-forming organs, the circulatory system, atrophy and hypertrophy of the blood vessels, rupture and wounds in arteries, acute and chronic arteritis.

Diseases of the nose and mouth and their associated sinuses are dealt with in such a manner that the student will have a thorough understanding of the tissue changes occurring in the various diseases presented.

The morbid anatomy and changes occurring in and about the teeth will be taught in detail from this chair.

General and Local Anæsthesia will be taught by special lectures, and these will be illustrated by vivisections and experiments upon living animals, to show the tissues and organs affected, and the changes during the anæsthetic state. All the principal functions of the animal will be exhibited in full action by a series of painless experiments upon different classes of animals.

## Department of Operative Dentistry

In the Department of Operative Dentistry, the object is to develop the subject in a logical sequence from the fundamental principles in the Freshman Year up to the practical details of a general office practice in the Senior Year. The practical application in the Infirmary of the theories taught in the lecture room is insisted on, and a large part of the Senior Lecture Course consists in a study of the various defects and mistakes made by the students in their Infirmary work, to the end that the failures incident to a beginner may be corrected in College before the applicant presents himself to the public for patronage. Toward the close of the Senior Year, the student, in his Infirmary

practice, is expected to study each case that is presented and in his own mind must decide as to the proper procedure to follow. After he has reached this decision, he must call an instructor and state the results of his deliberations. His decision is then affirmed or corrected. This is done for the purpose of developing in the student the habit of individual study of his case, and also to teach him to exercise his own judgment, instead of relying always on the judgment of others.

In view of the increasing importance of the subject of inlays, a very thorough course of instruction will be given in this class of work. The advantages and limitations of inlays in general, and the indications for porcelain and for gold inlays, together with their manufacture, will receive detailed and careful consideration. A true conception of the possibilities of inlays is necessary for the advanced dental practitioner of today, and this fact is recognized and met in the most practical manner in this course.

Professor Johnson will be in attendance in the Infirmary and demonstrate and pass upon operations Monday and Thursday afternoons of each week. On other days, operations will be passed upon by one of the demonstrators.

## Operative Technics

The object of this course is to afford a thorough technical training in operative procedures preparatory to practical work in the Infirmary, to develop manipulative skill, and to give the students an intimate knowledge of the tissues upon which they are to operate, of the physical qualities and adaptations of the materials to be used, and facility in the use of instruments by systematized practice upon teeth out of the mouth.

The course will embrace:

*First*—A study of the forms of teeth, and training in the discrimination of the individual characteristics of the different classes of teeth. This will be done by means of lectures, quizzes, the use of diagrams and heroic models, and the examination and dissection of the natural teeth. The students will also be made practically acquainted with the physical qualities of dentine and enamel.

Special attention will be given to a study of pulp chambers and root canals, their number, size, form, and their relation to the outer surfaces of the teeth. Sections of the natural teeth will be prepared by each student in such a manner that these features will be clearly shown.

As a further aid to this study, a number of teeth will be carved from ivory with the view of thoroughly impressing tooth form upon the mind as well as affording a valuable training in the use of instruments.

*Second*—A study of various pathological conditions involving the root canals of teeth and their management.

Natural teeth are imbedded in suitable models and their canals exposed. Remedies are then applied as in actual practice, the student thus gaining familiarity with their properties and their application. The manner and means of opening pulp chambers in the several teeth will be considered, and thorough training given in the cleansing and filling of root canals.

*Third*—A study of the forms, uses and care of instruments, the manner

of their manipulation and their adaption to the various classes of operations. Practical exercises will be given in instrument making.

*Fourth*—The preparation of cavities and the manipulation of filling materials. This will be made a special feature of the course, and will consist of a thorough technical training in operative work. The student will construct models carrying tooth forms of natural size, upon which operations will be performed as in actual practice. This will consist in the preparation of cavities and a study of their classification and forms; the study of enamel and direction of cleavage on different parts of the crowns of the several teeth, with special reference to the best form and finish of margin of cavities for filling; the cutting of dentine and the various methods employed in anchoring fillings; the removal of various tissues; the management of pits and fissures and the general shaping of the cavity. Instruction will also be given in the application of the rubber dam, the methods employed in gaining space, the use of clamps, wedges, separators, etc.

In conjunction with practice in cavity preparation, there will be a study of filling materials and their manipulation; the various filling materials in use and their physical properties, indications for their use and the relative value of each.

This course is designed to thoroughly ground the student in the principles of operative dentistry and prepare him to intelligently prosecute the practical work of the Infirmary. It is given under a special instructor and will be completed in the Freshman Year.

## Department of Physiology

The department of Physiology receives the increased attention which the subject requires. Its relation to dentistry is fully appreciated, furnishing, as it does, the basis on which we must build our pathology and practice.

The course, therefore, in Physiology comprises the subject as taught in recognized medical colleges, and extends over the first and second years.

During the first year, lectures with stereopticon illustrations and demonstrations and recitations are given each week. For recitation work, the class is divided into sections of such size that every member of the class may recite each week.

In the Freshman Year, the subjects considered are Phenomena of Cell Life, Blood Circulation, Respiration, Chemical Composition of the Body, Food, Digestion, Absorption, Excretion, Metabolism, Animal Heat, Diet and Nutrition, Production of the Voice, etc. This work is completed in the Freshman Year.

In the Junior Year, the work comprises the Nervous System and the Senses, and is completed in this year.

The Physiology of the entire Nervous System is given, thus laying the foundation for the best understanding of such special parts as Cranial Nerves.

# Histology and Bacteriology

## HISTOLOGY.

In this department; the minute structure of all the organs and tissues of the body is studied under the microscope. The student sees with his own eyes the microscopical elements, the cells, of which all tissues are composed, and learns that different tissues are made up of essentially different cells.

As a knowledge of the cellular structure of the tissues of the body is absolutely essential to the intelligent study of Physiology, we endeavor to give the student concise and accurate instruction in Histology without burdening his memory with superfluous details.

The Freshmen receive two lectures and recitations per week in Histology, but the major portion of this study is pursued in the laboratory; here sections of all tissues are stained and mounted on slides by the student himself, and then studied under the microscope, the lectures being supplementary to this practical work.

After a thorough study of the structure of normal tissues, the student in his second year takes up the microscopical structure of all classes of tumors and also the pathological changes that has occurred in diseased tissues.

The same methods of instruction are pursued in this year, the object being to get the student to do as much practical work for himself as possible.

## BACTERIOLOGY.

In the Junior Year, Practical Bacteriology will form a required course. The study of Bacteriology is inseparably connected with that of Dentistry, and as it now stands, its relation to hygiene and preventive medicine are of fundamental importance. It is, indeed, through a more intimate acquaintance with the biological activity of the unicellular vegetable micro-organisms that modern hygiene has attained the prominence and importance now justly accorded it. There is no longer any doubt that some low forms of vegetable life cause certain diseases, it having been proven with the accuracy of scientific demonstration.

In this course, the object will be to make the student perfectly familiar with the methods of detection, isolation and identification of the pathogenic micro-organisms that act as casual factors in diseases of the mouth and teeth.

The instruction will consist, first, of a didactic lecture course, supplemented by recitations, thus fitting the student to intelligently pursue the details of practical laboratory work.

In the laboratory, the student is required to prepare the various culture media, to cultivate and become familiar with the growth and microscopic appearance of the various bacteria and molds, methods of sterilization and disinfection, bacteriological examination of water, articles of food, saliva, sputum, pus, etc.

Models are required from each Junior, showing the relation of the normal and abnormal structures as found in the teeth. These include caries, putrescent pulps, inflammation of pulps, abscesses and pericementoses.

This course also includes a practical treatise on the biological and chemical characteristics of germs that stand in etiological relation with dental caries.

## Department of Materia Medica and Therapeutics

The teachings under this chair will be made as thoroughly interesting and practicable as possible.

The course will begin in the Freshman Year, and will be graded and systematic. In this year, Meteria Medica will be taught by means of recitations conducted by competent quiz-masters. This course will include a study of definitions, terms and abbreviations used, together with a study of the drugs used in dental practice; their history, habitat, source, constituents, properties, dose, etc.

In the Junior Year, one lecture a week will be given. Pharmacology will receive especial attention, *i.e.*, the *actions* of drugs and medicines upon the tissues, organs and functions of the body will be explained as fully as possible. The art of preparing medicine, illustrating the properties, characteristics and application of drugs, together with a classification of the pharmaceutical preparations will be considered. Poisons will be studied and attention given to their chemical and physiological antidotes or antagonists. Students will be taught how to test for the identity, quality and strength of the drugs and remedies used in the practice of dentistry. Prescription writing will also be considered in this year, and will be given the dignity and importance this subject deserves in a dental course. This will include a discussion of *incompatibility*, and an exposition of physical and chemical laws and their practical application in Pharmacy and Therapeutics, insofar as it relates to dental practice.

In the Senior Year, one lecture a week will be given, supplemented by experiments and demonstrations on practical Dental Therapeutics. In these lectures will be considered the most recent and successful methods known to dentistry and medicine of treating the various diseased conditions of the oral region. The practical application of the methods taught in the lecture room is insisted on in the Infirmary. To this end, the professor of this department will be in the Infirmary one-half day of each week to personally demonstrate Clinical Therapeutics and observe the progress made in the department. A record will be kept of each student's progress. Senior students are required to study carefully each case presented for treatment, note all pathological conditions, suggest the remedies to be used, and the method of applying the same in aiding nature to readjust the abnormal to the normal condition. Whenever indicated, practical prescriptions are written for the patient to use while under treatment.

The value of quizzes in all teaching is recognized and they are held at the discretion of the chair.

## Department of Prosthetic Dentistry

In this department, the teaching embraces a systematic and well rounded course of didactic and practical instruction, which is in every way designed to be commensurate with the requirements of the highly important, and yet often much neglected, department of dental education.

In the didactic instruction in the Junior and Senior years, special emphasis is given to the history and development of dental prosthesis; to its broad and useful field of possibilities; to the cultivation of artistic and mechanical attainments, which are so essential to success; and to the underlying principles involved in the various procedures incident to the application and construction of all of the modern approved methods of restoring impaired and substituting lost dental organs.

The restoration of the normal outline of the middle feature of the face, and of impaired normal functions, and the laws governing the arrangement, articulation and occlusion of the teeth, all of which have such an important bearing upon the subject, are comprehensively elucidated from a practical and scientific viewpoint, with the aid of stereopticon, charts, models, etc.

Crown and bridge work in gold and porcelain; continuous gum, swaged and cast metal, vulcanite and celluloid dentures; and the construction of obturators and artificial vela, will each receive the attention which the acknowledged recognition of its importance demands.

The mechanical treatment of maxillary fractures, including all forms of inter-dental splints, is also especially emphasized and exhaustively treated. Such didactic teaching is further supplemented and embellished by the facilities afforded by official connection with the Cook County Hospital, which facilities offer an abundance of clinical work and unsurpassed opportunities for acquiring practical experience of inestimable value to the dentist in this important subject.

## Technic

The value of a thorough, practical primary training is so apparent that special effort is made to make the course in Prosthetic Technics, which extends through the Freshman and Junior Years, comprehensive and complete in every detail, thus giving the students every opportunity and facility for acquiring manipulative dexterity and ability, and for becoming thoroughly familiar with the underlying principles, previous to their practical application.

The course embraces in detail the experimental construction of all the various forms of artificial dentures and appliances now in use, including the taking of impressions and manipulation of the different materials used; the arrangement of artificial teeth, and the construction of dentures on bases of Platinum, Gold, Swaged and Cast Aluminum; Fusible Alloys and Vulcanite; Crown and Bridge work of every approved method in Metal and Porcelain; Metallurgy, the art of Soldering, characteristics of the various metals used and the compounding of Solders, Alloys, Fluxes, etc.

## Porcelain Technology

A thorough and complete course in porcelain technology is given in the Junior Year. This embraces the experimental study of the composition, characteristics, and manipulation of porcelain compounds, the application of porcelain to its various uses in dentistry, including continuous gum, crown, bridge and inlay work, and a consideration of the various furnaces employed.

## Department of Dental Orthopedia

Under this head comes one of the most interesting branches of Dentistry; teaching, as it does, the correction of irregularities of the teeth and dentofacial deformities.

The course extends through the Junior and Senior years and will be made very practical.

In the Junior year, the preparation of material, construction of regulating appliances, and mechanical technics will be taught. Special attention will be given to the fundamental principles of applied force in all its relations in Orthodontia. This work gives the student splendid training in assembling the different parts of the apparatus and soldering them without investment, using high and low fusing solders.

In the Senior year, the practical application and management of regulating appliances will be demonstrated in the Infirmary. Each student will be required to do a practical case, and the work will be given all the attention possible, so that the case may be completed, or so far advanced that the student may see the results of his efforts. The didactic instruction in this department will be conducted by means of lectures and recitations based upon the text-book. There will be illustrations by stereopticon views, models, appliances, drawings, etc., from cases in practice, showing every variety of dental and facial irregularity and practical methods of correcting the same.

## Department of Chemistry and Physics

The course in Chemistry is both theoretical and practical. The lectures are delivered always in connection with demonstrations of the subject under consideration. The course is continued throughout both the Freshman and Junior years. During the Freshman year, the elements of Inorganic Chemistry receive attention in connection with the study of the non-metals.

The Junior year embraces the Chemistry of the Metals, Metallurgy, Organic Chemistry and special chemistry topics of interest to the practical dentist.

The work in the Chemical Laboratory is continued from the beginning throughout both years. Besides much that is experimental, the student is taught to make chemical analysis of unknown substances, to prepare alloys, and cement materials, and to make practical analysis of urine, saliva and other physiological products.

The work in physics consists of lectures and demonstrations in elementary physics, dealing in a practical way with the principles of mechanics, heat, light and electricity; especially employed in dental processes.

## Department of Physical Diagnosis

The course of Physical Diagnosis consists of one lecture a week during the entire Senior Year. Subjects are selected that relate directly to dentistry, so that the student, when graduated, will be familiar with the normal location

and uses of the thoracic and abdominal organs, enabling him to recognize abnormalities and pathological changes and the effect such changes produce upon the general system, and directly or indirectly malformations of the mouth, unsightly and unsanitary conditions of the teeth, so as to prevent systemic diseases as well as premature decay of the teeth. The early diagnosis of diseases of the nose, pharynx and mouth. The deleterious effect of mouth breathing upon the system, how it produces mal-nutrition and early decay of the teeth, as well as deformity of the oral cavity and adjacent organs.

The diagnosis of abnormal heart and respiratory sounds, the effect upon the patient and precautions to be taken by the operator when dental work is sought.

Diagnosis of odontalgia and facial neuralgia, due to pregnancy, cause of decay of teeth during pregnancy, precaution to be exercised in dental care of patient. Odontalgia and early decay of teeth due to general systemic diseases. Care of patient and treatment for prevention of further decay. Examination of the blood and effect of impoverished circulatory fluids upon the teeth.

Examination of the urine, and destruction of the teeth, due to renal diseases.

Effect of stomach and intestinal diseases upon the system and teeth.

Examination of the stomach contents.

Effect of local and general anæsthesia upon the system. Precautions in the selection of general anæsthesia.

Care of and treatment of patient in accident or collapse.

For the practical course, the class is divided into sections not to exceed fifteen students. Each section meets in a special room for practical demonstrations. Each student is required first to familiarize himself with the normal heart and respiratory sounds; when this is done, patients suffering from pathological conditions of the heart and lungs are presented, and each student is required to examine the pathological sounds, possible cause of the condition and effect of prolonged mental or nervous strain upon the patient.

Each section meets a sufficient number of times for each student to have ample opportunity to become familiar with heart and lung sounds.

## Department of Dental Jurisprudence

Organization of Courts—Procedure in Trial of Cases—Evidence, Kind and Nature—Expert Testimony—Methods of Identifying Dead Bodies—Kinds of Death and Methods of Determining Same—Poisons—Wounds—Anæsthetics—The Law Governing Malpractice, Negligent and Ignorant—Insanity.

## Topical Statement of Work for Session of 1913-1914

### FIRST YEAR.

During the Freshman Year, the studies taken up are: Theoretical and Practical Chemistry, Anatomy, including Dissecting, Physiology, Materia Medica, Dental Anatomy, Histology, and Operative and Prosthetic Technics.

Recitations in this course are conducted daily in commodious rooms especially arranged for this method of teaching. Stated lessons assigned from ap-

proved text-books supplement the didactic lectures and work of the laboratories.

#### SECOND YEAR.

During the Junior Year, students complete the work of Anatomy, Physiology, Bacteriology, Chemistry, and Histology. In addition to this, they receive instruction in Comparative Dental Anatomy, Crown and Bridge Work, Regulating Appliances, Splints, and all kinds of Plate Work, and operate in the Infirmary.

#### THIRD YEAR.

During the Senior Year, the students listen to lectures on Oral Surgery, Therapeutics, Operative and Prosthetic Dentistry, Pathology, Orthodontia, Physical Diagnosis, Dental Jurisprudence, and attend Clinics. In addition to the lectures, each student is required to construct and use regulating appliances, operate in the Infirmary, and perform practical work in Prosthetic Dentistry.

The Faculty reserves the right to retain for the College Museum, one piece of the technic work of each student in each department, and these to be selected by the heads of the departments in which they are made.

The statements which follow, as to conditions, fees, and course of lectures, relate to the year ending June 3rd, 1914, only. Changes in the corps of instructors and curriculum of the College are made at any time when it seems to the Directors necessary and desirable.

### Fees for Regular Winter Course Good Until June 3, 1914

#### FRESHMAN YEAR, 1913-1914.

Registration Fee .....	\$ 5.00
General Ticket .....	150.00
	<hr/>
	\$155.00

#### JUNIOR YEAR, 1913-1914.

Registration Fee .....	\$ 5.00
General Ticket .....	150.00
	<hr/>
	\$155.00

#### SENIOR YEAR, 1913-1914.

Registration Fee .....	\$ 5.00
General Ticket .....	150.00
Final Examination Fee .....	15.00
	<hr/>
	\$170.00

There will be no separate fees for Clinical, Histological, and Bacteriological Laboratory Work or Dissecting.

The Registration, Tuition, and Breakage Fees are payable at the beginning of the school year, and not later than October 20. A general breakage deposit of five dollars will be required of each student. This is to cover the

expense necessary for repairs for any damages to the building or equipment during the session. A refund will be made of such part of this deposit as remains after cost of such repairs have been determined.

The Final Examination Fee of the Senior Class is payable at the beginning of the examinations, and before the candidate for graduation can be admitted to them. All other fees must be paid in full not later than May first of each year to be considered as an applicant for final examinations and graduation.

The Tuition Fee may, at the option of the student, be paid in two or three installments. If paid in two installments, \$78.00 must be paid not later than October 20, and \$75.00 on January 20. If paid in three installments, \$55.00 must be paid not later than October 20, \$50.00 on January 20, and \$50.00 on April 20. Additional interest is charged if payments vary from the foregoing.

## The Expense of Living

This is usually an important item to the College student, and many have the impression that life in a large city is very expensive. Such is not the case. In fact, there are very few places where a person can live more comfortably with the same outlay.

Furnished rooms, including heat and light, can be secured for from one to three dollars per week, the price varying according to the location and furnishings. Table board can be secured for from \$2.50 to \$5.00 per week. There are also many places where room with board can be obtained at an expense of from \$4.50 to \$6.00 per week. Very many of our students, who find it necessary to economize closely, find positions which they can fill without taking time from their college work. Some who have experience as salesmen in stores get positions in drug stores or, during the rush hours on Saturday evenings, in some of the large shoe or furnishing goods stores, thus materially increasing their income without interfering with their college work.

## Requirements for Graduation Class for 1914

The candidate for graduation must be twenty-one years of age, and must possess a good moral character, including good deportment while at College.

Students will be required to attend, before graduation, three full courses of lectures, the last of which must be in this institution.

Every candidate must present for inspection practical operations performed by himself in this College, give evidence of his skill and ability in treating patients that may be submitted, and sustain an examination satisfactory to the Faculty in all the branches taught.

No one will be considered for graduation unless all fees have been paid.

## List of Books with Prices

FOR FRESHMAN YEAR.

Cunningham's Anatomy (\$6.00); Howell's Physiology (\$4.00); Newth's Inorganic Chemistry, Roe edition (\$2.00); Roe's Practical Chemistry (\$1.00); Bailey's Text-Book of Histology (\$3.50); Buckley's Modern Dental Materia

A VIEW OF THE INFIRMARY OFFICE

NORTH VIEW OF INFIRMARY—DENTAL COLLEGE

Medica, Pharmacology, and Therapeutics (\$2.50); Stedman's Dictionary (\$4.50).

FOR JUNIOR AND SENIOR YEAR.

McConnell's Pathology (\$2.50); Essig's Prosthetic Dentistry (\$5.50); Johnson's Operative Dentistry (\$6.00); Goslee's Principles and Practice of Crown and Bridge Work (\$5.00); Modern Dental Materia Medica, Pharmacology, and Therapeutics, Buckley's (\$2.50); Case's Dental Orthopedica (\$4.00); Hewitt Anæsthesia (\$5.00).

All books may be purchased at the College Library of the Librarian. Those desiring to secure their books before the term opens should address the Librarian, care of the College.

## Instruments

Before beginning his work, each student will be required to procure the instruments necessary for his use. Those for the Freshman and Junior technic work will cost from \$35.00 to \$45.00, and when he is ready to take up the practical work in the Junior Year, he will require the complete outfit. This includes a dental engine, and gives the student a practical outfit, so that he can start into practice on finishing his course without much additional expense for instruments. A list of the instruments is furnished the students on his arrival.

## Directions to Students

MATRICULATION BY MAIL.

Students may matriculate by mail, sending money order or draft, either on Chicago or New York. Seats are selected by students in order of matriculation, and each student is required to occupy the seat selected during the session.

Lockers are provided for the convenience of students, but the College will not be responsible for any personal losses.

As far as possible, students should have their mail directed to their lodgings.

The College vaults furnish a safe place in which students may deposit their funds. Money may be drawn subject to order.

The College Registrar will aid in obtaining board and room.

## The Spring and Summer Infirmary Course

The Spring and Summer Course of instruction is thoroughly practical.

Students who attend will engage in practical work during the entire term.

The value of this course cannot be overestimated.

No amount of scientific knowledge can compensate for lack of skill in practice; therefore the College Infirmary affords students the best possible means of acquiring skill by actual practice upon patients.

Students who attend this course will be awarded a certificate of honor upon graduation from this College.

Students will be admitted to this course upon payment of the matriculation

fee and \$20.00. Those who attend only one month will be required to pay the matriculation fee and \$10.00. The amount paid during the Spring and Summer course will be deducted from the fees of the following Winter session.

## The Student's Library

The attention of the profession is called to the students' library.

It is hoped that the members of the profession will take an active interest in this very important adjunct to our educational work. We will be glad to receive contributions of books and journals which are of interest to dental students. In case duplicates are received, we can arrange for exchanges. Complete files of the various dental journals, etc., will be very acceptable, indeed. We will place permanently in each volume retained an inscription as follows, giving the donor credit for the gift:

"Presented to the Students' Library of the Chicago College of  
Dental Surgery by . . . . ."

We would especially emphasize this to our Alumni, and hope to receive at least one recent good book from each graduate of our school.

## Young Men's Christian Association

Our College branch of this great Association is very strong and active, and enjoys the distinction of being one of the strongest college branches in the city. It has the exclusive use of a commodious room in the building, which is very nicely furnished.

Regular meetings are held, the work being well organized under competent committees. The Association is closely identified with the social side of student life, and arranges for a number of entertainments during the winter, including lectures, musicals, etc., during the session.

One of the important features of the work of the Association at the opening of the term is the preparation of a list of desirable rooming and boarding places, to which new students may be directed. The rooms are visited and inspected by some members of the committee and notation made showing location, general style of furnishings, and price for which it rents.

Any one wishing further information regarding the work of the Association, or to be met by their Committee, or to secure a room through them, should address the Secretary at the College.

## To the Profession

In the Department of Operative Technics, a great number of teeth are required for the purpose of dissection, study, etc.

The study of the forms of teeth and their central canals, practice in the cleavage of enamel, the preparation and filling of cavities in teeth invested in plaster molds, constitute one of the most important branches of the Freshman year, and it has been found exceedingly difficult at times to obtain a requisite number for this work.

If, therefore, you should find it convenient to assist us in the matter, the favor will be highly appreciated.

Any teeth which you may see fit to send will be gladly accepted by the Demonstrator in this Department, and will be of great service to him. He will be pleased to have them forwarded at your earliest convenience, as they will be especially useful at this time and during the coming season. Send direct to the College, where all express charges will be paid.

## Alumni Association

### OFFICERS AND COMMITTEES.

*President, J. E. Schaefer.*

*Secretary, P. G. Puterbaugh.*

*Treasurer, A. M. Hewett.*

#### *Executive Committee:*

*P. G. Puterbaugh, W. D. N. Moore, V. W. Watt, W. H. Dunn.*

### OBJECT AND MEMBERSHIP.

The object of this Association shall be to assemble at stated intervals for mutual counsel and social intercourse; to revive and continue pleasant memories, and exchange new pledges of brotherhood and friendship.

The membership shall consist of graduates and those who have received any honorary degree in the Chicago College of Dental Surgery, providing they are in good standing in the profession, and shall subscribe to these articles and pay the annual dues. The Faculty of the College shall be honorary members of the Association.

The Association paper, *The Bur*, will be mailed to all members bi-monthly. The object of the paper is to bring the members more in touch with each other, and to acquaint them with what is being done by their Alma Mater. All members are requested to forward items of interest connected with the Association and its members to *The Bur*, 2046 W. Monroe Street, Chicago.

 \*Walson, A. W.  
 Yackee, E. H.  
 Zajewski, W.  
 Zun, Jacob

## Graduates to 1913

Baldwin, Aristides E., M. D.

Armitage, A. Austin, M. D.  
 Barnum, Harry Lean, M. D.  
 Cady, Edward Everett  
 Cary, Warren, M. D.  
 \*Call, E. B.  
 Dunn, Jesse Austin  
 Gray, Astor Gerard  
 Hasselrus, Rudolph Theo.

Carson, Harry Fenn  
 Cheadle, Emory Melville,  
 M. D.  
 Clussman, Louis  
 Entsminger, Gilbert Walter

Bacon, DeWitt Clinton  
 Ballard, Henry Cliff  
 Bently, Charles Edwin  
 Broadbent, Thos. Albert  
 Calkins, Chas. Dibble, M. D.  
 Coltrin, Charles Wilkins  
 Conn, Walter Scott  
 Damon, William Henry  
 Davis, Ernest Edward  
 Demning, Charles Perry  
 Dodge, Frank Armstrong  
 Goodearle, Joseph Henry  
 Hart, Edmund Jerome

Alderson, John Wesley  
 Barclay, John Charles  
 Becker, George Heinrich  
 Bennett, Clayton William  
 Bennett, Orrin George  
 Cadv, Frank William  
 Chappell, Sherman Lee  
 Clark, Frank Beaumont  
 Crissman, Rush Eugene  
 Dalrymple, Wm. Gould  
 Darling, Charles Henry

GRADUATES OF 1883-4.  
 Carson, Clayton W., M. D.

GRADUATES OF 1884-5.

Hickey, Joseph  
 Hinkins, John Edward  
 Hudson, A. Melville  
 Johnson, Charles Nelson,  
 L. D. S.  
 Lambert, Edmund  
 Lane, Asa Holt  
 Lewis, Charles William

GRADUATES OF 1885-6.

Esbaugh, Frank  
 \*Emery, Joseph Grant  
 Huxman, Ernest August  
 Mertes, Joseph Perry  
 Moon, Robert Ellsworth

GRADUATES OF 1886-7.

Haskins, Geo. William  
 Henderson, Luther David  
 Keefe, James Eucherius  
 Leggett, John  
 Mawhinney, Elgin  
 Morris, William Evans  
 Nelson, Arthur  
 \*Norton, M. Eugene  
 O'Brien, Henry  
 Pugin, James Richard  
 Pitt, Harry Norris  
 Reed, John Henry  
 Rosenkranz, C. Christian

GRADUATES OF 1887-8.

Davis, Frank Henry  
 Duncan, Samuel Finley  
 Fortuin, William A.  
 Freeman, Clarence B.  
 Gardner, Robert Curtis  
 Gardner, Thomas Dimma  
 Goodrich, Grant Arthur  
 Gudex, Valentine A.  
 Hebert, Alfred Ward  
 Hendershott, Peter M.  
 Henkel, Albert Frank

\*Noyes, Edmund

McCandless, Archibald S.  
 Moody, Joseph Donahey  
 Nichols, Amos Jedd  
 Prun, Charles Putnam  
 Reed, Joseph J.  
 Wachter, Charles Henry  
 Whitefield, George W.  
 \*Deceased.

Molt, Theodore Felix  
 Marcoux, Henry Frederick  
 Stewart, James  
 Stahele, Otto Henry  
 Whipple, Ellsworth Otis

Sleglitz, Otto Eberhart  
 Stover, Frank Garner  
 Underwood, Chester James  
 Wade, Harry Elmer  
 Wadsworth, Henry Palmer  
 Waschkuhn, Julius Albert  
 Wermuth, Frank Charles  
 West, George Nelson  
 Wilson, Harry N.  
 Wheeler, Thomas Benton  
 Wilcox, Alfred Rogers  
 \*Witt, William  
 Zinn, Frank H.

Henry, Thomas Francis  
 Herman, Richard  
 House, James Ward  
 Kerman, Henry K.  
 Kessel, R.  
 Kuester, William  
 Lattan, Louis Frank  
 Long, George Edward  
 Lowther, Alfred  
 Mann, Anthony  
 Marshall, Clare Winshel

McIntosh, Edward M.  
Merriman, Charles James  
Morris, E. VanD., M. D.  
Nordahl, Hans Theodore

Aldrich, William Seward  
Barber, Heber Bingham  
Bates, Harvey Herbert  
Billig, Hal Clair  
\*Brownlee, Wm. Graham,  
M. B., C. M.  
Capener, Arthur Erwin  
Cheseman, Frank Eugene  
Cochran, James Agnew  
Cowan, W. Henry Caldwell  
Curry, James Albert  
Edmunds, Nelson Denique  
Eiles, Frank Stanley  
Ellis, Follen Peabody  
Eshelman, Benj. Franklin  
Farrell, Edward James  
Fisher, Vincent  
Fletcher, Frank F.  
Flynn, Edward J.  
Fox, Horace Eugene  
Fredericks, Enos Morse  
Gleason, Clarence Albert

Austin, Chas. Edw., B. S.  
Axton, Frederick Douglas  
Banes, James Downs  
Bottorf, Daniel Wesley  
Chase, John Henry  
Dostal, Joseph Williams  
Emmons, William Edward,  
L. D. S.  
Fernald, Allen Benjamin  
Follansbee, Harvey Everett  
Gibson, Obe Edward  
Goodearle, Sineus Melbourn  
Gould, Earl Emlin  
Green, Frank Albert  
Howard, Edwin Grant  
Heer, Frank Sylvester  
Jones, Will Lloyd  
Kempter, Richard  
Kinney, Halbert Eaton  
Kolar, Frank

Adams, Charles Gant  
Allen, Frank Caruthers  
Bailey, Evan  
Baker, Claude Gibson  
Baluff, William Henry  
Ball, Horace Howard  
Bigelow, Charles Sumner  
\*Birchmeier, Frederick  
Herman  
Boughton, Chas. Horatio  
Bowman, David Arnold  
Boyer, Raymond W.  
Bozer, Francis Martin  
Bradley, Clare Smith  
Brightfield, Oscar Franklin  
Burns, John Bradley  
Cameron, James Warren,  
M. D.  
Chaffee, Frank, M. D.  
Clark, James Ellery  
Cotterman, David Frank-  
lin  
Criscup, George Mortimer  
Davis, Albert Miller  
Dean, Henry Franklin  
Davendorf, F. Chittenden  
De Vore, Wesley G.

Peck, Adelbert Henry  
Reedy, George  
Russell, Frank M.  
Staley, Harry Reid

#### GRADUATES OF 1888-9.

Gorsline, William Preston  
Harrison, Arthur Grant  
Harter, Charles Wesley  
Henry, Charles Cole  
Hoffman, Will Ellsworth  
Johnson, Frank Milton  
\*Kautcky, Emil John  
Logan, Horace Greeley  
McCawley, Wm. Fletcher  
McConnell, Frank Tyler  
Merrill, Frederick Burdette  
Meyer, Lewis Albert  
Morris, Frederick E.  
Morse, Ralph Waldo  
Mueller, William Henry  
Nelles, Byron Alonzo  
\*Oakley, Alfred John  
O'Brien, George Howard  
Phillips, William Judson  
Powell, Roscoe Robert  
Reed, Anderson Franklin,  
M. D.

#### GRADUATES OF 1889-90.

Knapp, Ernest Lincoln  
Lane, Frank Ambrose  
Leininger, Michael  
Lenington, Jas. Truman  
\*Moffett, Almon Green  
Magill, Chas. Beatty  
Maguire, James Ralph  
Martin, George Bruce  
Prickett, Harry Monroe  
Pountain, John James  
Putnam, John Willett  
Ream, Fred Kent  
Russell, Edmund Walter  
Ruthenberg, Otto August  
Ryan, Charles Carver  
Roberts, Grant John  
Salisbury, Fenwick Earl  
Schadel, Frank Steece  
Shoemaker, James Adam  
Seeglitz, Albert Gustave

#### GRADUATES OF 1890-91.

Dwight, Willis H.  
Evey, David Henry  
Fancher, Walter Harvey  
Fraser, Manfred S.  
Gallie, Donald McKay  
Gibson, Henry Irven  
Girlin, Winthrop  
\*Godfrey, Walter John  
Grout, John J.  
Guenther, Hans Alfred  
Hart, Joseph Edwin  
Hamer, Augustus Antonius  
Hubretus  
Harned, James Edmund  
Hawkins, George Elmer  
Henry, George Edward  
\*Hunt, Charles Francis  
Kaye, Edgar Cowen  
Keefe, Edward Francis  
Keehn, Charles Grant  
Knapp, Sidney De Bruce  
Lyon, Elmore David  
Martin, James Freeman  
McLean, Felix Randolph  
McNeil, Hugh  
Michaelis, Will F.  
McDermand, C. Augustus

Stewart, Henry  
Treen, Rupert DeGeorge  
Whedon, Samuel A.

Raymond, Frank J.  
Rivenberg, Alfred  
Robinson, Edward Gilbert  
Rogers, Andrew William  
\*Runkle, David William  
Sackett, Henry Reed  
\*Silliman, Herbert Haynes  
Smith, Henry Patrick  
Smith, John Wesley  
Straub, Eli Slifer  
\*Swasey, Joseph Atwood  
\*||Swasey, James Atwood  
Tabor, Fred Strong, M. D.  
Taylor, David  
Upson, Irvin Francis  
Vernay, Charles Edward  
\*Ward, Electus Backus,  
M. D.  
Welch, Justus Allen  
Willard, Simon, M. D.  
Woodward, Frank Vincent  
Wright, C. Huntington

\*Swaggitt, Frederick Rich'd  
Swartz, Melville Welling-  
ton  
Smyser, Jacob Hamlin  
Tenny, Lewis Solomon  
Thompson, Orrin  
Toles, George Wilson  
Thompen, Cornelius Nich.  
Tuller, Rollin Brede  
Ubellar, James Quigley  
Waterhouse, Chas. Herbert,  
M. D.  
Whitenack, Chas. Augustus  
Williams, Edward Everett  
Weissler, Wm. H. Conrad  
West, Herbert Cameron  
White, Charles Edward  
Zinn, Geo. Edwin, B. S.

\*Deceased.

veff, Edwin Dorland  
Odell, Charles  
Paine, Frank Adelbert  
Pape, Herman G.  
Parker, John Isherwood  
Pierce, Stephen Clark  
Pearce, Robt. McChayne  
Powell, Frank James  
\*Pover, Ulysses Grant  
Ramsey, John Hollis  
Reed, Ed Shelby  
Reed, Wm. Augustus  
Reeves, Wm. Titworth  
Riebe, Paul Albert  
\*Rimes, Mervin B.  
Ringdorf, Warren Mayo  
Robinson, Cyrus Harvey  
\*Rodman, Archer West  
Russ, Peter Hansen  
Saucerman, John Martin  
Schnell, Philip John Val-  
entine  
Schuyler, Colfax  
Schultz, Louis Albert  
Simmons, William Hale  
Smith, Howard Taylor  
Smith, Oscar Robert

\*Stetson, Fred'k Augustus  
Strayer, William W.  
Strong, Henry Clement  
Taylor, Sherman Tecumseh  
Thompson, Charles N.  
Thorelius, Peter Wm.  
Trickey, Frank Samuel

Allen, Albert B.  
Allshouse, Clarence E.  
Anderson, George H.  
Anderson, Gustave  
Atwater, Hubbard G.  
Allin, Ernst  
\*Birge, Manning A.  
Borland, Thomas J.  
Burns, Jabez B.  
Bingham, John L.  
Buck, Lemuel F.  
Besore, Calvin F.  
Bents, Albert L.  
Brierley, Mark R.  
Barber, Benjamin D.  
Beetham, John W.

Eagles, Albert E.  
Ervin, William E.  
Fox, Walter H.  
Ford, Lewis E.  
Freeman, Allen J.  
Finley, Frank O.  
Fisher, Herman P.  
Fezer, Lawrence S.

Buchanan, Robt. Finley  
Barnes, Frank Firestone  
Briggs, Frank Courtney  
Clemens, Samuel George  
Davis, William Crosbie  
Davis, Alva Curtis  
Franz, Hugo  
Houser, William Oliver  
Kirkepatric, Elmer Ellsworth

Baker, Frank H.  
Bauth, Carl Otto  
Brown, John Roy  
Burkhardt, Frederick H.  
Cole, Herbert B.  
Czolbe, Ewald Henry  
Davis, Arthur Preston  
Denison, George Hiram  
Dick, Arnold Ernest  
Eberhart, Walter Washington  
Eddy, Orlan Thomas  
Edgerton, Geo. Harrison  
Fickensher, Eno Louis

Tucker, Wallace E.  
Van Nostrand, Wm. Starr  
Welch, Patrick Henry  
Wendell, Adolph Andrew  
Wenker, Raymond Jos.  
Wetherbee, Jarvis Wm.

#### GRADUATES OF 1891-2.

Frank, George E.  
Fernandez, E. M. S.  
Guild, George R.  
Geary, John J.  
Good, Robert  
Gouchenour, Jeremiah  
Gray, Francis M.  
Momfeld, Alfred J.  
Hixon, Julian F.  
Henning, Augustus F.  
Hebbard, A. G.  
Higgins, Marion L.  
Howell, Robert A.  
Ironside, Fred A.  
Johnston, Albert H.  
Johnson, Albert G.  
James, Austin F.  
King, Frank  
Kautsky, E. V.  
Leu, William F.  
LaPierre, Lewis S.  
Lane, Frank L.  
\*Lewis, William A.  
Lie, Hallvard  
Lumpkin, William C.  
Meyer, Oscar E.  
McCrea, John F.  
Martin, William E.  
Minges, Herman  
McQueen, John S.  
Mason, John B.  
Meade, Henry B.  
Morrow, Walter J.  
Muenster, John H.  
Neilson, Samuel A.  
Newsome, Bert  
New, James T.  
Nyman, John E.  
Oakman, Charles H.  
Palmer, Charles F.  
Prescott, Albert J.  
Palmer, James L.  
Penn, William A.

#### GRADUATES OF 1892-3.

Martin, John Wesley  
Morey, Albert Elwin  
Muzzey, Delbert Anderson  
McElwain, Park William  
Oakley, Washington Joe  
Powell, T. Elhnan  
Perkins, Robert Sanford  
Rohrer, Edward John  
Schoenbrod, Isaac

#### GRADUATES OF 1893-4.

Cowan, William Clarence  
\*Gratello, Jos. Edward  
Gebhardt, Robt. Charles  
Haas, Alfred Lincoln  
Hare, David Arthur  
Harris, Geo. Washington  
Harold, Ralph Waldo  
Harrison, Albert Matthew  
Heniple, Fred J. Randolph  
Hickman, Edward Hicks  
Houston, Franklin Reuben  
James, Charles William  
Johnson, John Wesley
