This Event is brought to you for free and open access by ScholarWorks@UNO. It has been accepted for inclusion in Coastal Resilience Workshop by an authorized administrator of ScholarWorks@UNO. For more information, please contact scholarworks@uno.edu.

Online Resources

The following online resources form a foundation for discussions during the workshop, “Understanding Risk and Resilience in Complex Coastal Systems,” scheduled from 26-28 October 2015 in Broward County, FL. Familiarization with the online resources provides background material for challenge discussions that will be relevant to the scenario entitled, “A Hypothetical Scenario: Broward County Florida in the Storms of 2035.” Challenge discussions are as follows:

Challenge 1: Roles of Universities in Resilience Planning and Emergency Response/Preparation

Challenge 2: Community Resilience in Dania Beach

Challenge 3: Allocating resources/redistributing functions across community (property transfer, light rail?)

Challenge 4: Water Resource Contamination (linking hydrodynamic and hydrologic models)
