# Pacific Rim Legal Bibliography: A Guide to Legal Information Sources†

The information contained herein was initially prepared for business librarians. With the encouragement of the editor of this Journal, Professor Robert E. Lutz, it was recast into a bibliographic guide for use by the legal practitioner. Although highly selective and not comprehensive, this bibliography can be a guide to the legal literature of, and research in, the Pacific Rim area.

The term "Pacific Rim" is a relatively new expression. Related terms are "Pacific Basin," "Pacific Community," "Asia-Pacific Region," "Pacific Economy," and "Asian-Pacific Economic Community." No doubt, there will be other such expressions in the future.

These terms are based upon geographical, political and economic concepts. If one were to apply geographical concepts only, the "Pacific Rim" or "Pacific Basin" could be defined as those nations and territories with Pacific Ocean borders. Other definitions limit these terms to market-economy countries only or to market-economy countries plus "Communist" China. Another writer has suggested vagueness of definition is, at least for a while, preferable to a rigid definition. "I would encourage a kind of creative ambiguity in our use of [the term] 'Pacific Community' . . ." (Statement of *Everett Kleinjans*, in *The Pacific Community Idea*, at 106, cited *infra*). In a paper prepared for the Senate Committee on Foreign Relations by the Library of Congress Congressional Research Service, Peter A. Drysdale and Hugh Patrick defined the concept as follows:

Alternative geographic, political and economic definitions of the Asia-Pacific region are possible, depending upon the purposes of definition and criteria of selection. One way to classify the various components of the Asian-Pacific economy most broadly defined is in the following categories:

1. The fourteen major Pacific Basin market-oriented economies:
  - (a) The five advanced countries: the United States, Japan, Australia, Canada, and New Zealand.
  - (b) The five ASEAN nations: Indonesia, Malaysia, the Philippines, Singapore, and Thailand.

†This bibliographic guide is an expanded and edited version of a presentation made at the Workshop on Information for Business: The Pacific Rim Countries, sponsored by the Pacific Northwest Chapter of the Special Librarians Association, Business and Finance Division, April 1986 in Seattle, Washington.

(c) The three Northeast Asian developing economies: South Korea, Taiwan, and Hong Kong.

(d) Papua New Guinea and the small South West Pacific states as a group (the countries of the South Pacific Bureau for Economic Cooperation excluding Australia and New Zealand).

2. The South Asian nations: Bangladesh, Burma, India, Pakistan, Sri Lanka.

3. The Latin American Pacific nations: Mexico, the Central American states, Colombia, Ecuador, Peru, Chile, and in terms of economic interaction, Brazil.

4. The Communist nations: China, Vietnam, Cambodia, Laos, North Korea, and the Soviet Union.

(An Asian-Pacific Regional Economic Organization: An Exploratory Concept, at 21-22, cited *infra*).

The theoretical or geo-political background of the "Pacific Rim" concepts can be found in three U.S. Congressional documents. Each title has its SUDOC number (*i.e.*, the Superintendent of Documents number at the end of each citation):

*The Pacific Community Idea: Hearings before the Subcomm. on Asian and Pacific Affairs of the House Comm. on Foreign Affairs*, 96th Cong., 1st Sess., July 18; Oct. 23 and 31, 1979. (Y4.F76/1 : P11/2)

*An Asian-Pacific Regional Economic Organization: An Exploratory Concept Paper: Prepared for the Sen. Comm. on Foreign Relations*, by the Congressional Research Service, Library of Congress, July 1979. (Y4.F76/2 : As 4/21)

*Pacific Region Interdependencies: A Compendium of Papers Submitted to the Joint Economic Comm. of Congress*, June 15, 1981. (Y4.Ec7 : P11)

The items contained in this bibliography are only a tiny fraction of published materials. Each country in the Pacific Rim has its own legal literature and legal bibliographic tools. There is no attempt to be more than pragmatic, citing titles that I have found to be useful in my work as the Foreign and International Law Librarian at the Los Angeles County Law Library. Your own local law libraries can assist you in locating much other useful materials.

There are two works that are essential research tools in the general area of international law and in the specific area of treaty research. They are:

J. W. WILLIAMS, *Research Tips in International Law*, J. INT'L L. AND ECON. 1-32 (1981). (K3.J82.)

Accompanying the Williams article are extensive "Bibliographic Notes," at pp. 32-321. This is really a "must" item. Also, note that the name of the journal is now THE GEORGE WASHINGTON JOURNAL OF LAW AND ECONOMICS. A different and much abbreviated version of the Williams article is available at Williams, *Undertaking Effective Research in International Law*, 17 INT'L LAW. 381 (1983).

A. SPRUDZS, *TREATY SOURCES IN LEGAL AND POLITICAL RESEARCH: TOOLS, TECHNIQUES, AND PROBLEMS, THE CONVENTIONAL AND THE NEW* (1971) (Published in Tucson, by the University of Arizona Press) (KJ221.S7.RESf). This 63-page booklet is the best guide to researching treaties. Mr. Sprudz is the Foreign Law Librarian at the University of Chicago School of Law.

The bibliographic materials and research sources are arranged under the following categories: general reference, directories, monographs, periodicals, and organizations.

#### IV. PERIODICALS

The legal periodicals now available are so numerous that it is, in my opinion, impossible to be comprehensive, even with the aid of computer indexing. Yet, the literature contained in periodicals is essential. Indeed, for developing areas of law, it is usually the only thing available. Therefore, it is necessary to have access to the *Index to Legal Periodicals*, the *Index to Foreign Legal Periodicals*, the *Legal Resource Index*, and many others. Outside of law, the number of indexes is impossible to calculate.

Wherever possible the frequency of publication is shown by a number followed by "x," e.g., 4x equals four times per year or volume. Where prices are indicated, be prepared for increases as time goes by and the dollar goes lower *vis-à-vis* foreign currencies.
