A WORD ABOUT OUR

3RD ANNUAL GRADUATE RESEARCH SYMPOSIUM

At the graduate level, research and inquiry are an integral part of all programs and concentrations. Graduate students develop research skills, practice research in the field, and become contributors and leaders in their profession.

By looking at research and inquiry across disciplines, we learn about and gain more respect and understanding for everyone's field of study.

Join us today in learning and inspiration as our graduate students share their hard work and knowledge. Please ask questions and engage with the material presented today.
