# Progress in aquaculture of sea scallops (*Placopecten magellanicus*) in Maine.

### A group effort....

Marsden, Bobby and Donna Brewer – F/V Lindsay Marie

Hugh Cowperthwaite – Coastal Enterprises Inc.

Terry Gray – Grays Mussel Farm

Mark Green – Peaks Island Shellfish

Kohl Kanwit – Maine Dept. of Marine Resources

Andy Mays – F/V Lost Airmen

Dana Morse – Maine Sea Grant and UMaine Cooperative Extension

Ed Perry – F/V Rachel

Nate Perry – Pine Point Oyster

Kyle Pfau – Univ. of Maine

Kevin Scott – E+K Shellfish

Alison Sirois – Maine Dept. of Marine Resources

Peter Stocks – Calendar Island Mussels

Chris Vonderweidt – Maine Dept. of Marine Resources

Evan Young – E+K Shellfish

#### Why even think about scallops?

- Generally: looking for alternatives for income on our working waterfronts
- US catch is \$550 million-plus (Maine 1% of that)
- Potential for new products and market (niche markets already via MA and Atlantic Canada)
- Biotoxin testing (\$) is the principal challenge in sales of live/whole product

"When they are right, Maine scallops are the best on the entire global market."
- Jay Trenholm, 1999

### Aomori, 1999

## The Culture of Japanese Scallops (Patinopecten yessoensis)

Report of the Maine Delegation to Aomori Prefecture, Japan May 14-21, 1999

Delegation Members:

Brian F. Beal, Ph.D., Machias, Principal Writer & Editor Michael M. Hastings, Hampden, Delegation Leader Laura Taylor, Cumberland Tom Pottle, Perry Stephen Rappaport, East Blue Hill Dana Morse, Brunswick Kristin Porter, Cutter Susan Inches, Yarmouth Will Hopkins, Eastport Jay Trenholm, Camden

Tom Pottle, Eastport, 2000-2002

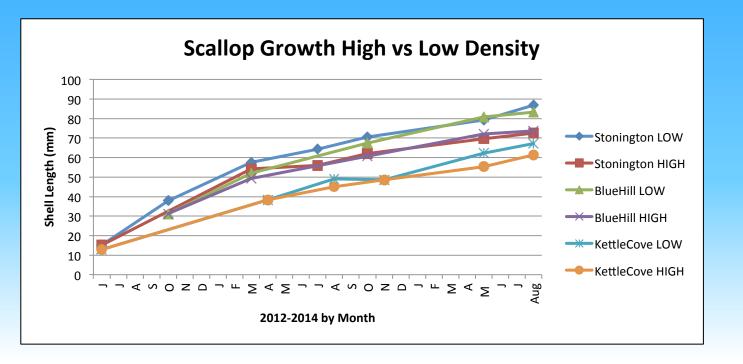

Marsden and Bobby Brewer, Stonington

Evan Young, Kevin Scott – Blue Hill

A few early trial sales of live product took place: too early to tell depth of interest though prices were favorable, in excess of \$1.00/piece.

Bottom line though: Biotoxin testing is expensive, and hampers profitability.

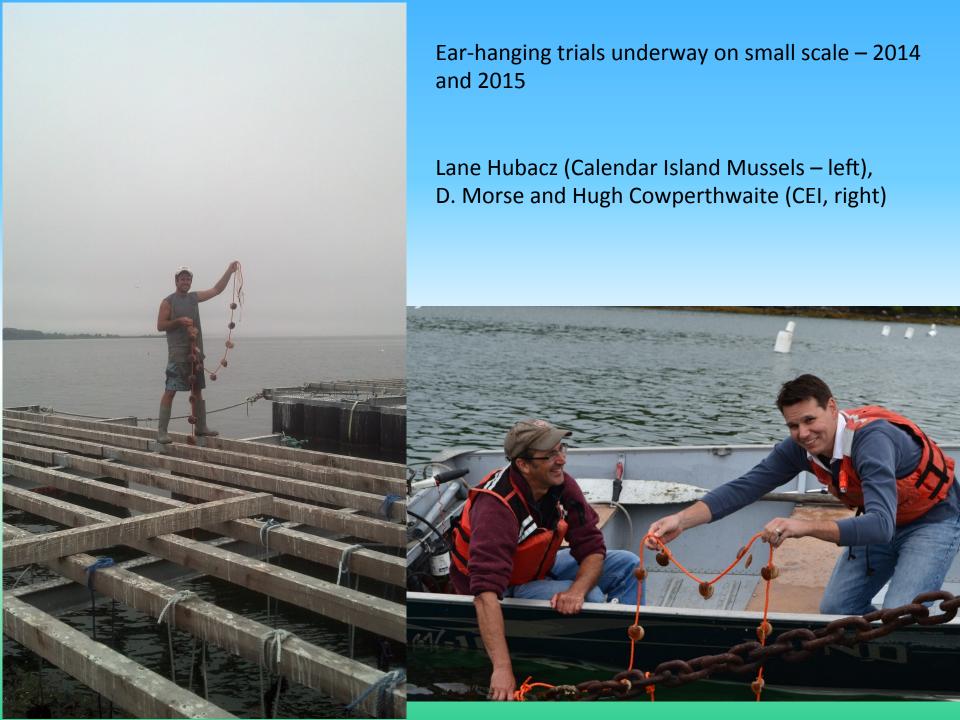

Ear-hanging lines, donated by Mr. Hiroaki Sugiyama, owner of Mutsu-Kaden Tokki LTD, Japan

### Razor Clams (Rawson, Devin, Morse, and partners)

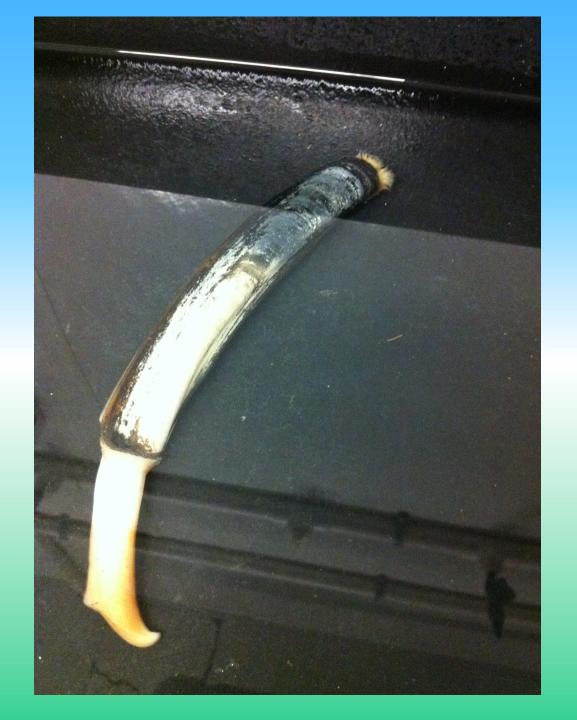

#### Razor Clams:

Sporadic market but fair prices for producers (\$2-\$6 per pound). Hatchery and nursery techniques coming along well, few techniques presently for growout.

Settlement: sand-filled trays, or in a bare tank.....

Stay Tuned!!
