# Mayor's Address

---

*Gentlemen of the City Council:*

Our meeting this morning is for the purpose of organizing the city government for the ensuing Municipal Year. I take this opportunity of expressing my heartiest thanks to the people who have thus honored me, and of saying, it shall be my constant and wholly unselfish and impartial purpose to serve the city to the best of my ability, but with one end in view, to do those things which will make for the welfare and prosperity of our city.

In the management of the affairs which have been placed in our hands for the coming year, it should be our aim to give our best efforts, keeping in mind the best interests of the entire city, and eliminating personal feelings for good business principles.

It is easy to criticize; it is as easy to hinder as to help, and requires less effort; it is easy to advise, suggest and plan, but to execute the duties of our several offices to the satisfaction of every one in every way, is, owing to the difference in people, impossible. It only remains for you and for me to act in all matters, in accordance with our best judgment, after careful consideration.

## FINANCES

The financial question is always the most interesting, and most discussed by the taxpayers in any city, and I will call attention to a few matters for your consideration.

From an examination of the city treasurer's report, the finances of the city appear to be in excellent condition. The gross liabilities of the city at the close of the fiscal year were \$393,837.64, and the gross assets \$215,689.43, leaving a net city debt of \$178,148.21, a decrease during the past year of \$7,558.77.

We should endeavor to decrease this city debt as much as possible each year. With this decrease, there has been expended the past year for permanent improvements of streets, sidewalks and sewers, approximately \$16,000.

Our outstanding interest bearing debt amounts to \$371,976.48, consisting of bonds \$272,850, certificates of deposit \$99,126.48, requiring an appropriation (approximately) of \$13,000 for interest.

On account of new laws, our state and county taxes have increased the past few years from about \$17,000 to about \$30,000, State tax; and from about \$5,600 to about \$8,500, county tax.

It is only fair to say that as regards the State Tax, our returns from the State have been increased, but not in proportion to the increase of taxes.

## SCHOOLS

The schools of our city should have our special attention, recognizing the fact that the public schools are the groundwork of our whole social system, and in them we are building for the future as well as the present. I have no doubt you will provide for this department in a liberal manner and in accordance with its important needs. I would suggest that in making your appropriations, you make an appropriation for repairs and care of school buildings and furniture, and that it be expended under the direction of the school board.

## STREETS AND HIGHWAYS

I wish to call your attention to the improvement of Sea

street, considerable of the preliminary work of which has been done during the past year, and I would suggest that you give this matter your immediate attention. We should endeavor to continue the work of permanently improving our streets as much as possible. I would suggest that in this department, when making your appropriations, you make a separate appropriation for taking care of the streets and highways during the snow season.

### POOR DEPARTMENT

There are always unforeseen demands on this department, but in the hands of our present board of overseers, I think the interests of the city will be well looked after, and at the same time the wants of those whom it is a city's duty to help in times of distress and need, will be carefully attended to. I would suggest that all revenues from the city farm, and any other source connected therewith, be credited to this department; and that all bills for repairs on buildings, tools, or machinery, belonging to this department, be charged to same account.

### DRAINS AND SEWERS

This department shows results, the past year, that speak well for its management. I think the time has come when the city should start permanent improvement of the Lindsey brook, in order to take care of the surface drainage and relieve the sewer system of the surface water.

The reports of the different departments which will soon be printed and ready for distribution, will give complete information concerning the amount of money expended and the purposes for which it has been used, and I refer you to them for further particulars.

There is another matter to which I wish to call your special attention. The Grand Army and its affiliated bodies have for several years been trying to raise a fund for a Soldiers' Memo-

rial or monument and they are now making an effort to increase this fund to an amount sufficient to erect a suitable memorial to commemorate the memory of our citizens who so bravely defended our Union in the Civil War. I think the time has come when the city should give some financial aid to this cause.

In conclusion, gentlemen, may the year's record be one that will satisfy ourselves and meet the approval of our fellow-citizens. There are responsibilities resting upon you as well as upon me, and I especially urge upon those who are appointed on the standing committees of the several departments, to keep themselves, at all times, well informed in the affairs of their departments, and see that the expenses are kept well within the appropriations.

By working together in harmony, and giving careful consideration to all demands upon us, we can so conduct the affairs of the city, that our people will feel well satisfied upon receipt of their notice from the tax collector.

G. H. BLETHEN,  
Mayor.

# Report of City Treasurer

---

*To the Honorable Mayor and City Council:*

Gentlemen:—I herewith submit my report as City Treasurer for the municipal year 1910-1911.

## RECEIPTS

Balance from fiscal year, 1909-10,	\$12,551 28

Respectfully submitted,

S. A. ADAMS,

*City Treasurer.*

## Report of Public Library Trustees

---

*To the Mayor and City Council:*

The Trustees of the Rockland Public Library have the honor to submit herewith their report for the municipal year of 1910-1911.

Your trustees are pleased to announce that the finials have been placed on the library building and add much to the beauty of the structure. The building now is a completed structure and continues to be a source of pride and satisfaction to all our citizens.

It has not been necessary to make any extensive repairs on the structure the past year, and we are pleased to announce that in all its departments the library is in a most satisfactory condition.

The library force has changed some since last year, much to the regret of the trustees. Miss Lenora S. Keniston presented her resignation as assistant librarian and severed her connection with the library. She has served the library in various capacities for a number of years, and always with satisfaction, and your trustees regretted to lose her valuable services. We were most fortunate in securing the services of Miss Marion N. Cobb, who was elected to fill the vacancy and who has given excellent satisfaction in the position. She had previously served as assistant in the library, and was therefore well qualified to assume the duties of assistant librarian.

The library continues to serve the scholars of the public schools as a valuable helper in their various studies. Many of

the teachers have voluntarily acknowledged its usefulness in this direction. It has been noticeable this present year that the scholars have rapidly learned the use of the various books of reference, and now investigate for themselves what heretofore they usually required the library force to look up for them. This in itself is an education, and shows the advance that is steadily being made along the lines of educational work by the public schools of our city.

The library has been most fortunate in its gifts the past year. In October T. Raymond Pierce and Miss Alice M. Pierce presented a bust of Abraham Lincoln with pedestal to the public library as a memorial to their parents, Henry N. Pierce and Lenora F. Pierce, who lived practically their whole lives in the city of Rockland, and who were always ready to assist in every movement for its spiritual, intellectual and moral betterment. Your trustees acknowledged this valuable gift by passing suitable resolutions and the bust and pedestal now ornament the west reference room, and are a decided addition to the interior of the library.

This winter the library was further favored by the gift from Mrs. E. A. Butler of a framed copy of Guido's "Aurora" which was installed in the vacant place over the fire-place and was just what was needed to complete the ornamentation of the north reading room. Your trustees suitably acknowledged the receipt of this valuable gift and expressed their appreciation to the donor.

The library has also been favored by the gift of many volumes, particularly from the Half Hour Club, Harry W. Davis of Boston and other friends of the library. The Half Hour Club have a standing rule which sets aside all funds accruing from fines to the purchase of standard works for the library, and in this way some of the most valuable books on the library shelves have been received from this Club. The example of this organization is worthy of emulation by other associations in the city and serves the purpose of the trustees in emphasizing to the public the necessity for these gifts. The means at the

disposal of the trustees for the purchase of books being limited, we must depend upon the good will of the public for gifts of books.

The library force now consists of Miss Nancy I. Burbank, librarian, Miss Cobb, assistant librarian, and Donald Karl as janitor.

What has been said in previous reports concerning the efficiency of Miss Burbank can now be repeated. Her interest in the library is unabated, and her devotion to the library continues as of yore. The janitor service also continues to be rendered in a manner satisfactory to your trustees and the public.

We beg to submit herewith as a part of our report, the reports of the Librarian and Treasurer, which will give you full information so far as the statistics are concerned.

Respectfully submitted,

W. T. COBB,  
E. T. BUTLER,  
D. J. STRYKER,  
W. A. HILL,  
W. W. CASE,  
A. I. MATHER,  
E. K. GOULD,  
H. I. HIX,  
A. P. WARDWELL,

# Report of School Board

---

*To the City Council:*

We herewith submit for your consideration our annual report of the condition and progress of the public schools for the current municipal years, and the needs and demands for the immediate future. The year just closed has been one of quiet and repose. Nothing has occurred to disturb the orderly conduct of affairs and to divert the peaceful currents of school management. The pupils in all the schools have been respectful and obedient to those in authority, and, on the whole, with the usual exceptions, however, imbued with a desire and purpose to do their best to maintain the standard of scholarship and efficiency which has characterized preceding classes. All the grades are being strengthened with the end in view of a better and more intelligent preparation of the work of the pupils when they enter the High school.

A few years ago the High school was made a member, for a limited time, of the New England College Certificate Board, entitling its graduates to enter any college in New England, save three, without first being required to take the prescribed entrance examination. This membership was made possible by the applicant having attained, in his own school, the rank required for admission, and certified to by the principal. Last year the membership was extended three years. Recently the standard of scholarship was raised, requiring an 85 per cent rank in each study. Members of the High school who are preparing to enter college will find it necessary hereafter to devote more attention to their studies and less to athletics and social functions.

We trust that Rockland will not duplicate the condition of affairs which exist in Bangor. Recently the school committee of that city addressed a circular letter to the parents of all the students in the Bangor High school calling attention to the fact that many of the pupils were not keeping up to the standard of scholarship and declaring that too much social life was permitted.

Nearly all the school buildings are in a good state of repair. The basement of the Tyler building should be rebuilt, and the urinals replaced by something more modern and sanitary. As now existing and used they are a menace to the health of pupils, and are as unsightly as they are archaic. The desks and furniture in many of the schoolrooms are showing the effects of time and use, and should receive attention during the summer vacation.

In previous reports we have called the attention of the city government to the surroundings and sanitary conditions of the Crescent Street schoolhouse. We deem it necessary to sound another note of warning. We cannot better describe conditions than to quote the language of a former report:

“A recent inspection of the building by a special committee from the school board was made for the purpose of ascertaining the cause of water remaining in the basement. The sewer provided to take care of water flowing therein fails to carry it off. The committee has views of its own regarding the difficulty, but prefers to withhold them until the committee on city property has an opportunity to make a proper inspection of the premises. This defect calls for immediate attention as it is a source of annoyance to those who frequent the basement, besides being more or less detrimental to the health and comfort of those who occupy the building.

“Directly in rear of the schoolhouse is a small lot of land, presumably owned by private parties, of a low, marshy nature, covered with water during some seasons of the year. It is possible that this is the source of some of the water that finds its way into the basement of the building. Some arrangements

ought to be made looking towards the proper and speedy drainage of this property, as its stagnant waters may in time become a fruitful source of disease which must eventually affect the health of teachers and pupils.”

Better lighting facilities are needed in many of the rooms in the High school building. The last half of the afternoon sessions during the winter season, especially when the weather is inclement, is so dark that pupils find it difficult to continue their studies, and frequently work has to be discontinued. The natural result of such a condition of affairs is the gradual and permanent impairment of the sight. It frequently becomes necessary to resort to artificial lighting, but this does not afford an adequate remedy, as there is either a scarcity of gas equipment, or the lights already installed are placed too far from the desks. Instead of calling attention to each specific need, we would recommend that the committee on city property examine the several rooms in company with the principal and superintendent, who can give the committee all the needed information to enable them to apply a remedy to existing evils.

Two years ago a Manual Training and a Domestic Science Course were established. A year later another important change was made by the introduction of a Commercial Department, believing it important to give an advanced business education to those pupils who desire to enter business life. Special attention is given in English, commercial arithmetic, penmanship and spelling. During the third and fourth years, pupils may take stenography and typewriting, or their equivalent from another course. Your committee was very fortunate in securing the services of Nelson Cardwell, a graduate of the Springfield Technical High school, to take charge of this important department. Following his graduation, he engaged in business for one year, after which he took the regular business course, covering two years, at the Salem Normal school. He is doing excellent work and is much liked by his pupils.

At the November meeting of the Board, a numerous signed petition by members of the High school was received asking

that a single daily session be inaugurated. In order to afford the petitioners and their advocates an opportunity to present their reasons for the proposed change, a special meeting was held Wednesday evening, December 7, to which members and teachers of the High school, parents and the public generally were invited to attend. A notice of this meeting was published in the city papers. The attendance was disappointingly small and out of all proportion in comparison with the numerous names subscribed to the petition. Very few parents were present, and of those who addressed the committee, the majority recorded themselves as strongly opposed to any change in school sessions being made.

Not wishing to act hastily on the petition, and desirous of obtaining all the information possible as to the comparative merits of the two systems, the views of many prominent educators and school officials in Maine have been solicited. The replies received, and they have been many, are very full and complete. In arriving at a decision, which will soon be made public, whether the prayer of the petitioners shall be granted or refused, it will be based in great measure upon the knowledge and advice of those who have had an opportunity to observe the workings and practical results of the single session plan.

As it is customary for the Superintendent of Schools, the Director of Drawing, the Director of Music, the Principal of the High School, the Director of Domestic Science, and the Director of Manual Training and Mechanical Drawing to submit an annual report to the School Board, and as these several reports are incorporated in and made a part of our report, it is unnecessary for your committee to make any special reference to these departments. These reports deal with the work done and the needs and demands of each department for the coming year.

In view of the large expense to maintain the Camden Street school and of the fact that the attendance was growing less each year on account of the steady decrease of the school pop-

ulation, it was deemed advisable to discontinue the school and transfer the pupils to the Tyler building. This school consists of two grades, and at the time of its discontinuance there were only sixteen pupils in the school. By doing this the salary of the teacher and the running expenses were saved to be expended to better advantage in other directions.

During the year the public schools of Rockland suffered a distinct loss in the death of Miss Inez M. Hall, who had charge of the ninth grade, in the McLain building. Her career as a teacher covered a period of more than thirty-five years of active and intelligent service. For efficiency, faithfulness and discipline she was regarded as one of the best teachers the city ever had. Her work was carried on in the face of physical misfortunes which would have disheartened a woman of less plucky spirit, but she met her duties uncomplainingly, and with sublime courage and heroism.

Rockland has always taken special pride in its school system, and has been particularly solicitous that the children should receive every advantage of a progressive education. The City Council has always been generous in its appropriations for the support and maintenance of the school department. The Board fully appreciates this broad and liberal policy, and in the distribution of the funds placed at its disposal, it has endeavored to wisely and economically apply them.

Respectfully submitted,

A. C. McLOON,

Chairman, ex-officio,

FRANK B. MILLER,

C. DOHERTY,

L. B. KEEN,

H. A. BUFFUM,

H. E. GRIBBIN,

C. F. SIMMONS,

*School Committee of Rockland.*

## Superintendent's Report

---

*Gentlemen of the School Board:*

Since the report of the School Board touches on the most important subjects and there are, besides, the report of the High School Principal and the reports of each of the special teachers concerning his or her own department, there is not much left for the Superintendent unless he delivers an address on Education in general. There are, at present, so many who are airing their special educational panaceas that I think it better that you receive my educational belief by observing the work done in the schools. To this end I invite every parent—this means the father as well as the mother—to visit the schools and learn the real conditions, then make suggestions which they may have to the Superintendent. Only when the parents, teachers and school officials work together, each learning the viewpoint of the others, can the best work be done.

There is, however, one subject, in some respects the most important in educational work, to which I wish to call special attention. The State Law requires an examination of the sight and hearing of all scholars once each year. So far this has been done, in Rockland, by the teachers. I believe it is time to have it done under the direction of specialists in the subjects. Diseases of the mouth and throat, the presence of adenoids and other kindred ailments are receiving attention by school officials, as never before. According to the best authorities, the mouth and particularly the teeth contain usually germs that under certain physical conditions produce many of the most dreaded

diseases. We are now placing sanitary drinking-fountains in each building. Should we not go a step further and make arrangements at least with the specialists and dentists to visit the different school buildings and make examinations as suggested, reporting the results to the teachers, who in turn shall report to the parents or guardians? I believe this can be done without much cost. The parents will then be informed of the needs and can employ whom they wish.

During the last term we lost from our midst, a teacher of long and successful experience, Miss Inez M. Hall. Financially, a teacher's remuneration is not large, but her chief reward is in work well and faithfully performed. Judging from words of praise by her pupils and associates, Miss Hall's reward is ample and should be an encouragement to every teacher.

I take this opportunity to thank the people of Rockland for their sympathy and kindness during my recent illness. Mind is more than Matter and the knowledge when one is ill, that a whole community is anxious for his recovery, is even more efficacious than a physician's remedies.

The teachers are earnest workers and are doing a service the worth of which can be estimated only in the future lives of your children. This kind of reward does not count financially, however, so please remember that even teachers, if you are to have them the following year, must live during vacations and that while the school year is thirty-six weeks, we have not yet been able to shorten the solar year of fifty-two weeks or three hundred and sixty-five days, five hours, forty-eight minutes, forty-nine and seven-tenths seconds, and that we mortals are neither hibernating nor summernating animals.

My thanks are extended to the teachers for their hearty cooperation and the excellent work accomplished and to the School Committee for the favorable consideration of recommendations made, also for their uniform kindness and courtesy.

Respectfully submitted,

G. A. STUART,  
*Superintendent.*

## REPORT OF PRINCIPAL OF HIGH SCHOOL

---

*Mr. G. A. Stuart, Superintendent:*

Dear Sir:—The High School opened with a registration of 214 pupils which steadily increased until the daily number belonging reached 230, 238 different pupils having registered up to date. We have at present 228 belonging to the school. These figures present an unusual condition in that the school opened much smaller than last year but numbers more now than a year ago this time.

It was found necessary to rearrange the course of study in order to include the commercial work because there was a danger of having too many classes. By the readjustment the Commercial course was installed with no additional teaching force. This arrangement was made possible by offering certain subjects as electives. The General and Commercial courses permit of one elective each term, the College course offers no elective the first two years, two the third and one the fourth year. In the fall of 1911 the Junior work in the Commercial course will give additional classes in Book-keeping, Commercial Law, Stenography and Typewriting; thus a further readjustment in distribution of work will be necessary.

Each course has its proportionate share of pupils with the tendency toward the Commercial, which is natural because of its newness. The boys continue to elect Manual Training and Mechanical Drawing. Several of them put in extra time outside of class work. Domestic Science seems to be proving attractive to the girls of the High School the second year and according to present indications that course has made for itself a permanent place in the High School curriculum. Twenty of the Fourth class who had the work as Ninth Grade pupils elected it again this year.

No permanent improvements have been made in the High

School building the past two years. Several are needed badly. Some arrangement ought to be made that will enable the students to dry their clothing when they reach school on stormy days. The steam pipes which now are the only means of so doing are most inadequate to meet the situation. The second great need is more light. Teachers and pupils unite in asking that all the rooms be provided with artificial light. The desks, mentioned in my report of a year ago, have been removed and ordinary settees substituted. The regular recitation settees are much more convenient for the pupils when taking written work. The Board is respectfully asked to purchase for us six classroom settees. As you are doubtlessly aware 230 boys and girls passing to and from their own rooms every forty minutes make considerable noise with their feet. Some sort of a silencer in the halls and on the stairs would help much to remedy this.

In closing I would make one suggestion concerning the length of the fall term of the High School. Many of the boys and girls plan to work in the stores during the holiday season. Their parents consent to their absence from school. Now, in order that their class standing be kept the work has to be made up, which involves much extra effort on the part of the teacher. By closing the term one week earlier it would convenience the pupils and lighten the burden of the teachers.

Respectfully submitted,

L. P. KNAPP,

*Principal.*

## REPORT ON PENMANSHIP COURSE

---

*The School Board, Rockland, Maine.*

Gentlemen:—It gives me great pleasure to hand you herewith my report on the subject of Penmanship as introduced by me into the grades and High School of Rockland, Me.

Realizing the difficulty in introducing an entirely new system of Penmanship into the grades, I have endeavored to work out the following scheme.

Grades I, II, III. The simple small and capital letters as introduced in Doner's Lessons in Practical Writing have been taken up. The work in these grades has been slow, for the youthful muscles are too pliable to expect the steady arm movement possible in older pupils. The work has been, therefore, along the lines of very large oval and push and pull movements and the teaching of the correct form of letters. Pencil is used the first month or two and is then supplanted by the pen.

Grades IV, V, VI. The subject of pure arm movement has been taken up more rigidly in these grades. Many oval and push and pull movements have been taken up. The actual use of the arm movement has been introduced and the letters, both capital and small, taken up as rapidly as the character of the classes will permit. While no definite point has been set, the object of the work is to give the essentials of good penmanship.

Grades VII, VIII, IX. Owing to the maturity of the students in these grades, I have endeavored to give a complete course of penmanship. Oval and push and pull movements have been followed by actual arm movement writing, strengthened by much practice and introduction of sentences and words. The main object of this course has been to more firmly establish the arm movement writing introduced into the lower grades,

I have also had two classes in the freshman class at High School. The work has been identical with that of the ninth grade.

In the grades from the first to the sixth the work has been mainly carried on by the class-room teacher after observing methods in weekly penmanship meetings for teachers at the McLain School. Once a month I visited and taught in each grade in the city.

To the pupils of the seventh, eighth and ninth grades I have given one lesson of fifteen minutes weekly in each room. The teachers in these respective grades taught the lessons on the four remaining days of each week.

I am much pleased to report that the work has progressed very favorably. Many evidences of improvement in handwriting are noticeable, especially among the older pupils.

I have, however, labored under great difficulty through the lack of time for the teaching of penmanship in the freshman class in the High School and the absence of texts in penmanship in the upper grades.

If penmanship could be given two or three periods per week for one-half a year in the freshman class much better results would be obtained than can be gotten under the present schedule of one period for two-thirds of the year.

I suggest that each pupil in the seventh, eighth and ninth grades and the freshman class at High School be furnished with a copy of Doner's Lessons in Practical Writing.

In closing I desire to thank the school board for the hearty interest it has shown in the progress and advancement of the work and for the material aid it has given me.

Very truly yours,

NELSON H. CARDWELL,

*Supervisor of Penmanship.*

## REPORT OF TEACHER OF MANUAL TRAINING

---

*To the Superintendent and Members of the School Board:*

Gentlemen:—For the second time I have the pleasure of addressing an annual report to you on the condition and work of the Department of Manual Training and Mechanical Drawing. Work in the department has progressed with very satisfactory results. Manual Training seems to be fully as popular as it was a year ago, and this means more than it did then, for now the student knows what he is giving his allegiance to. Mechanical Drawing is gaining in popularity. The students are realizing its usefulness and possibilities. Two good classes have been formed in the High School, composed of Seniors and Juniors who asked for the course. Manual Training is taught in each of the lower classes. All four of these classes spend a double period in the department each week. The work is wholly individual and a great variety of useful articles is being made, such as towel rollers and racks, necktie boxes and collar boxes, tabourettes, folding screens, and one boy has been working all the year on a canoe frame.

In the Grammar School, the work in Manual Training and Mechanical Drawing is carried on in the Eighth and Ninth Grades and Mechanical Drawing is carried on in the Seventh. The Ninth Grades have a double period in Manual Training and a single one in Mechanical Drawing each week and the same arrangement exists in the Eighth. However, since the Eighth Grades number over twenty pupils in each room and our shop equipment only accommodates twenty, part of each class is obliged to stay in the grade room each week and every pupil must lose a lesson once in three weeks. Nevertheless some very good work is being done in each of these grades. The features of the Eighth Grade work are the Brush-broom Holder and the Coat Hanger. The features in the Ninth Grade

are the Suit Hanger and the Collar Box. One of the Seventh Grades was given a short course in Manual Training the first part of the year by request of the Superintendent and considerable ability was found there. Mechanical Drawing is taught in each of the Seventh Grades, one of them coming to the department for its lesson and the other receiving it in the regular grade room. Mr. William Healey of the Junior High School class is rendering very valuable help by assisting in these Seventh Grade drawing classes.

I would recommend that Manual Training be offered in only two years of the High School course and two double periods be given to it each week instead of one. I would also suggest that an Industrial Course similar to that adopted by other High Schools would be very advantageous and quite feasible. This course is designed to prepare boys to go from the High School into the different trades and industrial pursuits. I would also recommend that five more benches with equipment be added in order that we may be able to accommodate the larger grade classes which we will undoubtedly have next year. Two more sections should be added to the locker system for the same reason. The High School work could be extended very profitably by adding equipment for bench work in copper and brass.

In closing I wish to thank the members of the School Board for their kindly interest and help in my work and to express a desire that they may find it possible to visit the department more often.

Respectfully submitted,

CHARLES W. BRADLEE, JR.,

*Director of Manual Training and Mechanical Drawing.*

## REPORT OF TEACHER OF COMMERCIAL COURSE

---

*To the Superintendent and Members of the School Board,  
Rockland, Maine:*

Gentlemen:—I take pleasure in handing you herewith a brief report on the Commercial Department of the Rockland High School.

As this department is a new addition to the High School, the commercial work proper extends at present over only two years, the Sophomore and the Freshman.

The commercial subjects introduced in the Freshman Class are, Commercial Arithmetic, Spelling and Penmanship.

Commercial Arithmetic as studied in the First Year has taken up the practical, everyday problems of business life. The daily work has endeavored to introduce the following subjects as taken up in Moore and Miner's Practical Arithmetic, Rapid Addition, Subtraction, Division, Common and Decimal Fractions, Percentage and its branches, and Interest and its branches. As I have mentioned before, the problems selected have been those that have applied directly to everyday, Rockland life.

I have endeavored, as in Arithmetic, to take up Spelling from the practical standpoint, selecting those words most used in the business world. The spelling was taken up in connection with the Penmanship Course, and was introduced at least once a week in the writing classes.

The Sophomore year treats of various Commercial subjects, such as Physical and Commercial Geography, Commercial Correspondence, Penmanship and Bookkeeping.

In Physical Geography, the work was derived mainly from Tarr's Physical Geography. The students were intensely interested in this study, for it concerned things of everyday interest. The work has been carefully selected with reference to the Commercial Geography taken up in the last half of the

year. Thus the work has been made a unit, and the relation of the physical to the productive features of the earth made evident.

The end sought is to give a deep insight into man's relation to the earth upon which he lives. The same interest shown in the Physical Geography is evidenced by the clippings brought to class and the everyday subjects discussed.

In Commercial Correspondence, the course has endeavored to teach the student to write the short, concise, but complete business letter. This has been accomplished by the study of models and the working out of representative types of letters. The pupils find Belden's Commercial Correspondence excellent in its simplicity of expression and fullness of detail.

Perhaps the subject which has attracted the students of this department the most is the Bookkeeping. The bringing of the subject down to the practical working basis by the introduction of actual business transactions in which real business papers were used and the entering of these transactions in real books, has held the student's attention. Then, too, the possession of the special desks has made the work seem more real.

The first year's work is designed to teach the use of the simpler forms of the Journal, Sales and Cash-book, posting to the simple ledgers and uses of checks and notes. This will serve as a foundation to the more complex and intricate corporation and commission businesses taken up in the second year of Bookkeeping.

As I have mentioned before, the Commercial work is taken only in the Freshman and Sophomore years. Next year, however, a new year's work will be added. In this Junior year, Advanced Bookkeeping, Shorthand, Typewriting, and Commercial Law will be studied. The class will number about 30 in all subjects, and this leads me to suggest that at least ten typewriters be added to allow one machine for three students. This will enable each one to get ample time for actual and practice work.

The introduction of this department is filling a long neglected

part of the modern school education. The present pupils will, in years to come, look back and thank the School Board for thus starting them on the road to Success.

There is but one suggestion for improvement for this department. It would be to the greatest advantage of all if the Commercial Department be removed to a room having better light and acoustic powers. In the present Assembly Hall, where the Bookkeeping work is carried on, the light comes from three different sides of the room. This makes it very disagreeable because of the shadows caused. Then, too, during the long winter days the light is extremely poor and artificial light has to be used. The acoustic properties of the room are very strange, for one's voice is thrown back from all four sides of the room together. This makes it very difficult for recitation, both for teacher and pupil.

In closing, I wish to thank you for your encouragement in this all-important work, and extend to you my hearty invitation to visit the department and inspect the work done there when your leisure will permit you.

Very truly yours,

NELSON H. CARDWELL,  
*Director of Commercial Work.*

## REPORT OF DIRECTOR OF DOMESTIC SCIENCE

---

*Mr. G. A. Stuart, Superintendent of Schools, Rockland, Maine.*

My Dear Sir:—I herewith submit my first report of the Domestic Science Department. The interest in the course seems to be increasing, and more and more the work taken up in the laboratory is being practiced in the homes.

This year, the High School classes were given their choice of Cooking or Sewing, and as all the divisions elected Cooking, Sewing is taught in the grades only. There are two divisions from the seventh, eighth, and ninth grades, making six sewing classes, each having forty-minute periods. The seventh grade work has been, of course, largely elemental, although as soon as the stitches are mastered, simple articles are made showing their practical applications, including towels and dusters for use in the laboratory, button bags and cooking caps. The eighth and ninth grades have taken more advanced work, learning kinds of seams and their uses, button-holing, tucking and ruffling. Aprons have been made of white lawn with a view to making the necessity for fine and careful sewing felt. At present the girls are beginning to use patterns, to cut and fit, and are making garments for themselves. A sewing machine has recently been added to the equipment, which is proving of great help in the work.

In Cooking, there are four High School divisions, one from each class; two divisions from the eighth and ninth grades, and one seventh and eighth grade class, making altogether nine divisions, each having an eighty-minute lesson once a week. In the beginning classes, the course of last year is being followed quite closely, and in the other classes more advanced work is being done. In the High School divisions especially, aside from learning to cook, emphasis is being placed on food values, both from the money and the health standpoint, and combina-

tions of the different types of food are being taught, also the sources and preparation of some of the principal food-stuffs. Well balanced menus are being planned and meals prepared and served, and in this connection some reference is made to Therapeutic Cookery. As is always the case in a course of this kind, cleanliness and economy are shown to be of the greatest importance.

In the department there are 204 pupils, 125 having the Sewing and 161 the Cooking. The milk bill has averaged \$1.35 per month, the grocery bill \$5.84 per month, making the total average \$7.19 per month, or \$0.45 per pupil per month.

I wish to thank the Superintendent and School Board for their assistance in the department, and the teachers and citizens for their interest and support. I am glad to have those who are interested visit the laboratory at any time.

Respectfully submitted,

KATHERINE P. JOHNSON,

*Director of Domestic Science.*

---

## REPORT OF DIRECTOR OF DRAWING

---

*Mr. G. A. Stuart, Superintendent of Schools:*

Permit me to submit the following report on Drawing. The principal feature of the work of this year is the introduction of the subject into the High School.

A brief outline of the work to be accomplished in the High

School is as follows: A course in Home Design, which includes the designing of wall papers, rugs, fireplaces, furniture, portieres, sofa pillows, window curtains, etc., all with the idea of unity in the furnishing of a single room and of the proper combination of colors in the same. Pictorial Drawing, which includes drawing from still life, from the human figure, and from landscape, with the idea of composition and illustration. Miscellaneous Design, including book and magazine covers, etc.

This work in the High School I feel to be necessary to complete the work done in the grades and also as a preparation for those who wish to carry the subject farther and enter an art school.

In the grades the work has progressed very well. A change was made in the visits of supervision in the grades below the eighth from two weekly to monthly. The success of the work here is dependent largely on the conscientious efforts of the grade teachers. In this respect I wish to express a word of appreciation for the work of Miss Inez Hall, who, in this, just as much as in all other studies, showed her wonderful ability as a teacher and by her zeal and enthusiasm inspired her pupils to do their best.

Very truly yours,

LENA F. CLEVELAND,

*Drawing Supervisor.*

## REPORT OF SUPERVISOR OF MUSIC

---

*To the Superintendent of Schools:*

The music has been carried on this year along the same lines as those followed last year, everywhere except in the eighth grade. Here we have made a much-needed innovation by introducing the F clef, thus giving the scholars two years' familiarity with tenor and bass instead of one, and also furnishing the changed and changing voices with something to do. To make this possible, the ninth grade material was passed down to the eighth grade, and the ninth grade has been a new and most excellent song collection—"The School Song Book," edited and arranged by Osbourne McConathy. Nothing contributes more to the success of the music than good material to work with, and such songs as these delight and inspire both teachers and pupils.

At its recital last March and at the graduation in June, the High School showed of what it was capable, and won the approval of all who heard the selections rendered. The same gratifying interest in the music mentioned in my last report, was shown at the beginning of the present school year when 200 out of 232 elected that subject.

We are most fortunate in retaining the interested and accomplished services of Miss Alice Fiske as accompanist. Her accurate and spirited playing adds no small amount to the enjoyment and success of both director and chorus.

Respectfully submitted,

MARGARET GEORGE RUGGLES,

*Supervisor of Music.*

## RESOLUTIONS

ADOPTED BY THE SCHOOL BOARD AND TEACHERS IN MEMORY OF MISS INEZ M. HALL, WHOSE DECEASE OCCURRED JAN. 16, 1911.

Whereas, The Great Teacher of the Universe has removed from her sphere of activity and usefulness Miss Inez M. Hall, long a valued and efficient teacher in the public schools of the city of Rockland;

And Whereas, the members of the Rockland School Board have learned with the deepest regret of her untimely death;

Now, Therefore, be it Resolved, that we extend to her family and friends our profound sympathy in the loss which they have sustained;

And, be it further Resolved, that these resolutions be spread upon the records of the School Board as a tribute to her memory, and that a copy of the same, attested by the Superintendent of Schools, be sent to the family of the deceased.

---

BY THE TEACHERS

Whereas, the Divine Ruler has removed from our midst a valued friend and co-worker; one who gave the best of her life to those intrusted to her care, ever striving to make them wiser and better fitted to assume the duties of life, therefore be it

Resolved, That in the death of Miss Inez M. Hall the teachers of the city of Rockland have lost a faithful friend, the pupils of the public schools an efficient and talented instructor and the whole community a most worthy and noble member.

Resolved, That we, the teachers, express deep and abiding sorrow for the loss of one with whom we have been so pleas-

antly associated for many years; one whom we shall always hold in loving remembrance and whose fortitude and fidelity to duty will ever be a living inspiration.

Resolved, That we extend to her bereaved family and to all others to whom she was near and dear, our deepest sympathy in this hour of sadness.

Resolved, That a copy of these resolutions be sent to the family of the deceased and to the School Board with our request that they be embodied in the next school report, as a slight token of appreciation of her untiring courage, faithfulness and industry.

## Report of City Solicitor

---

*To the Honorable Mayor and City Council:*

I have the honor to submit my report as City Solicitor for the term ending February 20, 1911.

The several matters in which the city was interested as a party at the beginning of the municipal year have been disposed of as follows:

City of Rockland vs. Inhabitants of Bristol. This action was pending in the law court at the beginning of the year, but Bristol has since abandoned the prosecution of the case, and judgment was rendered in favor of the city. As counsel for Bristol has objected to allowing costs for the expert witnesses employed by the city to meet the issue of insanity raised by the defense in pleadings at the trial, the allowance of costs will have to be determined by the presiding justice at this April term of court. Until then payment of the judgment is suspended.

The following actions have been commenced against the city the past year:

Town of Rockport vs. City of Rockland. This is an action for pauper supplies furnished George L. Barter and family amounting to \$236.82. Action has also been brought against the town of Isle au Haut by the town of Rockport for the same bill. The case was entered at the January term of the S. J. Court and Rockland filed a demurrer which was sustained by the court, who also granted Rockport leave to amend its

writ, and the cause will be in order for trial at the April term.

Town of Rockport vs. City of Rockland. This is an action for pauper supplies furnished Mary A. Barter and son since the death of George L. Barter mentioned in the foregoing suit. The amount involved is \$33.63. Rockport has also commenced action against Isle au Haut for the same bill. This case was also entered at the January term, and the city filed a demurrer in this case as in the preceding one, which was sustained. Rockport was granted leave to amend its writ and the action will be in order for trial at the coming April term.

Owen B. Long vs. City of Rockland. This is an action to recover for the board of a pauper which was entered at the January term of the S. J. Court. The amount involved with one term costs is \$30.15, and the plaintiff has agreed that if the claim is allowed he will turn the same in to the Tax Collector to pay his taxes for the year 1910. As he is clearly entitled to some compensation, I recommend that settlement be made with him on this basis.

Additional suits pending in the Supreme Judicial Court in which the city is interested are as follows: City of Rockland in replevin vs. John W. Anderson, Martin P. Judkins and others in equity vs. City of Rockland and Theodore E. Simonton.

The following actions have been commenced the past year by the city under the written instructions of the Mayor and Treasurer, viz:

City of Rockland vs. Lucy C. Farnsworth, executor of the last will and testament of James R. Farnsworth. This is an action to recover for taxes on money at interest for the years 1907, 1908 and 1909, amounting to \$665, and was entered at the January term and will be in order for trial at the coming April term.

City of Rockland vs. Town of Vinalhaven. This was an action commenced to recover pauper supplies furnished one Charles Dyer. Before the writ was entered in court Vinalhaven settled by paying the full amount of the debt and costs, and I have paid \$44.47 to the City Treasurer on this account.

A claim against the town of Swan's Island for pauper supplies furnished one Kent was left with me for collection and the same was settled without suit, and the proceeds, \$75.82, was by me paid to the City Treasurer.

By action of the City Council the City Solicitor was made a member of the committee on the widening of Sea street, and I have attended all the meetings of the committee and under its direction prepared an agreement which has been signed by nearly all the abutting land owners to submit the question of damages to arbitration, the city to appoint one referee and the claimants for damages to appoint the other. In case of a disagreement these referees may call in a third person chosen by them, and the allowance of damages by these referees is final and binding on all parties.

I have also performed such other duties as have been required of me by the Mayor, Overseers of the Poor, and the several heads of departments.

Respectfully submitted,

EDWARD K. GOULD,

*City Solicitor.*

# Report of Overseers of the Poor

---

*To the Honorable Mayor and City Council of Rockland:*

The Overseers of the Poor herewith submit to you their annual report for the year ending Feb. 13, 1911.

## DR.

Amount of Mayor's orders to cover all bills, both domestic and foreign,	\$12,310 67

Remaining at almshouse, Feb. 13, 1911,	18
There has been collected from towns and cities and individuals and paid to City Treasurer,	\$2,459 90
There has been sold from the city as follows:	
Produce,	\$279 57
Butter,	204 21
Beef, pork and veal,	166 70
Team work,	411 48
	<hr/>
Total,	\$1,061 96

Sixteen people have died the past year.

Sixty-two persons, tramps and transients, have been assisted who have no legal settlement in the State.

The number of families who have received aid and whose residence is in other towns, but whose legal settlement is in this city, is five, numbering in all sixteen persons.

Twenty-eight families whose legal settlement is in this city have received help outside the almshouse.

The number of families having their settlement in other places but residing in Rockland and receiving assistance has been thirteen, numbering in all twenty-one people.

The city almshouse has been painted the past year and other necessary repairs made, and will not probably need any extensive repairs the coming year.

Mr. A. B. Butler, the present master, has taken much interest in the farm and under his supervision and care the sick and the aged have received kind treatment and all of their needs have been supplied, and the farm itself has been a source of income to the city.

The sick and infirm and all who have needed medical aid have been promptly and kindly attended by Dr. E. B. Silsby, the City Physician.

Respectfully submitted,

RICHARD C. HALL,  
ISRAEL SNOW,

*Overseers of the Poor.*

---

Rockland, February 20, 1911.

This certifies that I have examined the accounts of the Overseers of the Poor for the municipal year ending February 13, 1911, that I find the same correctly kept, supported by the proper vouchers, and they are hereby approved.

FRANK B. MILLER,

*City Auditor.*

# Road Commissioner's Report,

Stock on hand February 14, 1911,	\$911 67
Sales during the year,	7,567 08
	<hr/>
	\$8,478 75
Stock on hand February 14, 1910,	\$1,089 59
Purchases during the year,	6,453 62
Balance,	935 54
	<hr/>
	\$8,478 75

Respectfully submitted,

ALFRED S. BLACK,  
HENRY L. HIGGINS,

*Committee.*

## Report of City Liquor Agent

---

To the Mayor and Aldermen of the City of Rockland:

Amount of sales and expenses of the City Liquor Agency, from February 15th, 1910, to February 13th, 1911, (both inclusive):

Whole amount of sales,	\$7,655 56	
“ “ “ empty bbls.,	17 93	
	<hr/>	
	\$7,673 49	
Less freight and cartage,	\$78 57	
“ labor,	3 40	
“ stationery, etc.,	2 53	
“ sundries,	3 95	
“ city orders,	18 56	
	<hr/>	
	\$107 01	
	<hr/>	
		\$7,566 48
Amount deposited with City Treasurer,		\$7,566 48
I have also sold from the City Store empty packages and sundry groceries for which I have turned over to R. C. Hall of the Overseers of the Poor, as per his receipt,		\$40 77

Respectfully submitted,

F. E. AYLWARD,

City Liquor Agent.

# Report of Chief Engineer

---

*To His Honor the Mayor and Gentlemen of the City Government of Rockland, Maine:*

I herewith submit my report as Chief Engineer of the Fire Department.

Total number of fire alarms for the year are twenty-seven; of this number two were false and five were still alarms, leaving twenty fires of more or less consequence.

The department has been ready and willing at all times to respond to all demands made upon it.

There are 5,600 feet of hose in the department at the present time in different stages of wear, the greater part of it being in good condition.

I would report the apparatus of the department all in good condition.

I would recommend that the city exchange the Sears hose wagon for a combination hose and chemical wagon, as a large part of the fires which we have here could be handled by a chemical and not have as much water damage as we now have.

Respectfully submitted,

I. B. SIMMONS,

*Chief Engineer.*

# Report of Inspector of Buildings

---

*To His Honor the Mayor and Gentlemen of the City Government of Rockland, Maine:*

I herewith submit my yearly report as Building Inspector.

Eight buildings, consisting of six dwelling houses, an opera house, and a two-story sardine factory, have been constructed. A one-story addition has been built at the rear of the Wiloughby Block. The Pilsbury Block has been remodeled into a department store. The Farwell Opera House has been remodeled into a Masonic Temple and many other buildings have been repaired. Upon suggestion, as a protection against fire, many chimneys have been repaired.

Respectfully submitted,

I. B. SIMMONS,  
*Building Inspector.*

## Report of City Physician

---

*To the Mayor and City Council of Rockland:*

The following is my report as City Physician, for the year ending Feb. 20, 1911.

There has been nearly as much sickness among the poor of the city as in previous years, and my services have been required for forty-five different people, exclusive of those at the almshouse and police station. There have been fewer cases of contagious diseases than last year, but other conditions have been about the same. Careful attention has been given to the sick and injured at the police station, and no comfort or care, necessary, has been withheld from those at the almshouse.

Respectfully submitted,

E. B. SILSBY,

*City Physician.*

# Report of Board of Health

---

*To the Honorable Mayor and City Council:*

The Board of Health herewith present their annual report for the year ending Feb. 13, 1911.

Number of nuisances reported,	29
Number of nuisances abated,	26
Number of nuisances not abated,	3
Number of communicable diseases,	39
Number of cases of scarlet fever,	7
Number of cases of diphtheria,	2
Number of cases of typhoid fever,	5
Number of cases of measles,	18
Number of cases of infantile paralysis,	3
Number of cases of tuberculosis,	4

At present these are no communicable diseases in our city.

Total number of deaths from all causes, 144

The three nuisances not abated are in localities where there are no sewers.

Respectfully submitted,

L. W. BENNER,

*Secretary Board of Health.*

# Report of Tax Collector

---

*To His Honor the Mayor and the City Council of the City of  
Rockland:*

I respectfully submit the following report to February 14,  
1911, as Tax Collector for the year 1910.

The amount of the original warrant was	\$128,147 00	
The amount of the supplemental,	258 16	
Permanent improvements,	2,739 46	
	<hr/>	\$131,144 62
Abated by Assessors,	\$1,085 99	
Sold to city,	2,457 15	
Collected on taxes year 1910 paid City Treasurer,	120,100 60	
	<hr/>	123,643 74
		<hr/>
Amount to be collected,		\$7,500 88
Interest collected on taxes year 1910 and paid City Treasurer,		\$73 14
Collected since February 15, 1910, on 1909 taxes and paid City Treasurer,		\$3,385 00

Respectfully submitted,

H. M. BROWN,

*Tax Collector.*

# Report of City Marshal

---

*To His Honor the Mayor and City Council of the City of  
Rockland:*

## Report of City Auditor

---

Office of City Auditor,  
February 20, 1911.

*To the Honorable Mayor and City Council of the City of  
Rockland:*

Gentlemen:—This is to certify that I have examined the accounts of the officers of the city authorized by law to receive and disburse monies on account of said city, find all of them correctly kept, all monies properly accounted for, sustained by the proper vouchers, and hereby approve them.

Respectfully submitted,

FRANK B. MILLER,  
*City Auditor.*
