Report of the Superintendent of Schools

To the Superintending School Committee and Citizens of Jackman Plantation:

I herewith submit my annual report as superintendent of schools.

Though the past year has been considerably interrupted by absences due to diphtheria, bad colds, etc., yet on the whole a very satisfactory degree of progress has been made. The credit for this being mainly due to the excellent work of our teachers and the diligence of pupils in making up work lost through absence. I believe that the policy of our school committee in paying salaries sufficiently attractive to secure and hold teachers above the average in training and experience has been amply justified. The difference in cost between a good and an incompetent teacher being so little in comparison to the value received by the pupils as to far out weigh the additional expense.

HIGH SCHOOL

The work of the high school is progressing very satisfactorily under the capable leadership and instruction of Mr. Diehl and Miss Curtis. Thirty-two pupils have been enrolled this year, 24 from Jackman and eight from Moose River. As in the past the rate of tuition charged is the per capita cost of maintaining the school, which for the past fiscal year has averaged \$151.07 per pupil, this of course covering all expenses, including fixed charges, such as interest on the investment in the building and insurance. Due to our limited teaching force and the requirements of the State Department of Education regarding the number and length of teaching periods we are unable to offer as complete preparation for college as we would like, consequently it is not infrequently necessary for our graduates desirous of entering one of the classical colleges to take an additional year at some good preparatory school.

It is however our purpose to give thorough instruction in such subjects as we offer, so that even though our curriculum may be limited in the variety of course it offers, yet in standards of quality it may compare favorably with any secondary school.

PAYSON SMITH GRAMMAR SCHOOL

As for several years past with the exception of the school year 1926-27 this school has been taught by Mrs. Anne Nichols. Mrs. Nichols is a teacher of thorough training and long experience who has an enviable record of success both here and in other towns. The enrollment in this school has varied, but has approximated 25, nine of whom are in the eighth grade, which assures us of a fair sized freshman class in high school next year.

PAYSON SMITH PRIMARY

The enrollment here is about 20. The school is fortunate in having as its teacher a woman of Mrs. Williams' ability and experience. Probably few teachers in the state have taught so long in the same school and certainly few with equal or greater success. During the past year the pupils of the primary and grammar schools with the assistance of their teachers have purchased a set of swings for the playground and have a considerable amount of money on hand for the purchase of additional apparatus.

STATION SCHOOL

At the close of the school year Mrs. Madeline Foster resigned. This vacancy was filled by the election of Mrs. Maxie Johnson a teacher of experience and ability. The school has been smaller than usual this year, at one time having only nine pupils. Within the past few weeks however there has been an increase, so that it now seems probable that the average number for the year will not be much below the usual number.

REPAIRS, ETC.

During the past year the high school building has been painted, lights installed in the grammar school room, the position of the fire escape changed to prevent the accumulation of ice, some work done at the Station School to prevent water entering the basement, and other general repairs made. A certain amount of repair work is necessary each year to keep the buildings in proper condition, the recommendation of the committee being what is considered necessary to maintain the

buildings and fixtures in good condition. In making our recommendations for school appropriations we have carefully considered the cost of maintaining the schools at the usual standard of efficiency making due allowance for such income as we may receive from other sources. These recommendations have according to the usual custom been submitted to the budget committee for their approval.

Respectfully submitted,

RUSSELL S. TAYLOR

Preserve This Report

A sufficient number of these reports have been printed to furnish every interested citizen with a copy. An effort has been made to get them into the hands of the voters in advance. It should be borne in mind that if copies are left at home there may not be a sufficient number at the hall to go around on town meeting day. This year or any year it is desirable for you to have a copy of the annual report as soon as issued. It is also important for you to preserve it and bring it with you town meeting day morning.
