Mayor's Address

Gentlemen of the City Council:

In most convincing tones, the voice of the people has been heard demanding a strict business administration of their affairs.

We shall be held individually and collectively responsible for each and every act of this administration, for the same expression of confidence was given you as was given me by the voter—and you must remember the same votes elected us all—therefore, it behooves each and every one of us to do individually everything within our power to give a good accounting of our stewardship to the citizens of Bangor.

It is evident that the deep concern of our people is that they may have full knowledge of every act of this administration, and to do this, a first necessity is to open the doors and let in the light on all affairs which the people have a right to know about.

We are never so proper in our conduct as when everybody can look in and see exactly what we are doing.

I firmly hold the opinion that the administration of municipal affairs, being essentially public business, should be transacted in the open and that it is the duty of each and every one of us to explain to the citizens, whenever opportunity offers, exactly what is going on in City Hall.

An organized city is a municipal corporation. Its charter is its franchise, prescribing its privileges and duties. The true meaning of municipal is—the undertaking of services—and has reference to the responsibilities certain citizens assume in the way of local government.

A corporation is an artificial person created by law to accomplish certain purposes; as banking, manufacturing or transportation. The function of a municipal corporation is to provide for the welfare of its citizens.

A business corporation has its stockholders who put up the capital and share in its gains or losses. The municipal corporation consists of its citizens who through their taxes—poll and property—pay regular assessments to keep the business going and expect the return in protection from disease, fire, crime, etc., and in opportunities for individual enterprise.

As the stockholders in a corporation transact their business through selected agents, directors and officers—so the citizens of a municipality are compelled to elect officials to carry on their governmental business. The principle is exactly the same, whether the business is making and selling paper, stoves, etc., or building streets and sewers, guarding the health, protection from fire or crime or providing lights or water.

In both cases the prosperity of the corporation depends upon the efficiency of the agents who manage the business.

We have been chosen to act as trustees of this municipal corporation and we have just taken our solemn oaths to protect and further its interests above all else—therefore let us not in

any instance commit one single act that will in the slightest degree weaken the confidence our citizens now have in us.

There has been in the past an entire lack of harmony and understanding between the upper and lower boards on almost all business transacted.

The true remedy for this unbusinesslike situation is to be found in Section 12, of Joint Rules of City Council, which reads:—"No new order, ordinance or resolve shall be in order at any meeting of the City Council unless said order, ordinance or resolve shall have been filed with the City Clerk at or before twelve o'clock noon of the day prior to said meeting of the City Council; and previous to the time for calling such meeting to order, each member of the City Council shall be furnished with a list of such orders, ordinances and resolves giving descriptive titles of same and the name of the member by whom such order, ordinance or resolve is introduced."

You will readily understand that the above rule is intended to give publicity to all business coming before the City Council, so that the taxpayers can if they desire personally appear to protest, as well as give the members of the City Council an opportunity of acquiring information on every measure.

This rule has been given little or no attention during my two years in the City Council and the failure to enforce it has resulted in legislation in some instances, detrimental to the City's interests.

I shall insist on the strict enforcement of this rule.

I shall call a joint session of the two boards, at the beginning of each meeting, to discuss the various measures to be presented for action, so that a full understanding may be had of every point of business to be transacted. I will take you into my confidence and we shall have such a full and complete understanding of all measures, that I do not feel there will be a single instance of where I shall be compelled to use my power of veto.

I also propose to have frequent meetings with you to discuss informally the various problems confronting us, also to take up separately the various departments and analyze them fully so that every member of the City Council may have an intelligent idea of the workings of all municipal affairs.

We should insist on the practice of rigid economy in every department during the entire year. I do not mean by this that any necessary needs or improvement should be checked merely to accomplish an apparent temporary saving. This would be false economy. All necessary public work should be undertaken with a view of securing the best possible results at reasonable cost, always bearing in mind the City's need for real economy.

In taking upon our shoulders the grave responsibility of administering the affairs of the City, we must first of all have a full and complete knowledge, in minute detail, of the assets of each department. This cannot be had under existing conditions, as the present method of bookkeeping is crude and obsolete. In making this statement I cast no reflection on the management of any department.

To accomplish this, I ask that one of your very first acts be the passing of an order directing a complete auditing of each department and the passing of an Ordinance establishing the office of City Auditor.

In support of this, I quote you in part the report of Charles P. Hatch—President of the Bankers Audit Co.—Portland, who submitted said report to the City Council, Nov. 10th, 1913, after having made an investigation of several departments.

“OLD AND NEW METHODS”

“It is needless for us to dwell at any length on the present loose and old fashioned methods now in vogue, as this subject has been so recently before the Council that the conditions must be plainly apparent to all. It is well recognized that simplicity and efficiency must always be foremost in the consideration of a plan or scheme which will permit the City to conduct its business with the greatest economy, promptness and safety, that the results thereof may be intelligently presented to the ready understanding of the ordinary citizen.”

“To conduct the business of the City with economy and safety, each Department should be able to meet its requirements as satisfactorily and as promptly as would any commercial enterprise. The expenses should be incurred only as necessary, and payments should be made promptly.”

“This can not be done under the present system of auditing and paying accounts only upon vote of the City Council and order of the Mayor. Very frequently it is not possible to show

what savings have been made by improved methods, because you can scarcely measure the loss which might have been sustained by former methods."

"OFFICE OF CITY AUDITOR SUGGESTED"

"We suggest first the manifest importance of creating the office of City Auditor, and clothing that officer with sufficient authority to enable him to carefully supervise all of the financial affairs of the City; keep all of the controlling accounts and direct the methods of keeping the details by the various Departments."

"Modern practice in municipal affairs has demonstrated the necessity of delegating this authority to some competent person who is always obtainable when the numerous emergencies arise involving prompt settlements."

"The office of City Auditor properly regulated, and well conducted, will relieve the City Council of onerous duties, the Mayor, the City Clerk, City Treasurer, and all other principal Departments, of the mass of detail and segregated results, and center them in the one Department, which would always be available for information, and which should simply, but efficiently, record all financial transactions, and assign all charges to the proper accounts, avoid duplications, and promote simplicity of procedure throughout the entire municipal organization."

"The City Auditor, being an officer charged with an expenditure only for department expenses, in which he is guarded

by the Council Committee on Claims, is in a position to scrupulously scrutinize all expenses of the City, thus having a check on all departments, and he centralizes the accounting, develops proper expense data, and informs each department of its available funds, while at the same time his aim is to secure procedure in matters of detail which will contribute to the final outcome in the most simple yet effective manner."

"When such an ordinance becomes effective, all claims and accounts can be promptly paid, and all purchase discounts can be availed of, more advantageous purchases be made, and many useless details be eliminated."

When the Order is passed directing the auditing of the various departments, I shall immediately have taken a minute and complete inventory of every department, giving as nearly as possible the assets of said department—also a listing with valuation of all city property, so that we may have an accurate account of all the City's assets.

In our present system of accounting, accurate inventories have been entirely ignored and it has been impossible to make any statement of expenses comparable with previous years so that a comprehensive idea may be had of the gains or losses in the various departments.

Our Street Commissioner should be a man of technical training and of experience, and the salary of this office should be increased sufficiently to attract such a man. Considering the

large amount of money expended in recent years on our streets and highways, I attribute their present deplorable condition largely to the fact that the various commissioners have not been men qualified for the work by technical training. I believe that all new street and sidewalk construction should be carried out through the direct work of this department and not let out by contract.

In considering the several phases of our present situation, I am seriously impressed with the thought that not we alone are assuming a deep obligation to the City—there is also the obligation of the people to the City.

A broader public spirit, a striving for higher efficiency in the conduct of every day affairs, a willingness to co-operate to the end that as a commercial center the City shall attain the position which is its due, whether regarded from the moral or the material standpoint, is our greatest need.

A generous public spirit is of infinite value to a community. It is on such a public spirit that the well being of our city must depend, and while I earnestly hope that we may progress along those material and particular lines representing the City's particular needs, I shall regard it as the especial triumph of this administration if through your co-operation, we can bring about that united effort which will mean a betterment, in some degree, of the conditions under which we live.

In unity there is strength, and in co-operation and neighborliness, there is growth.

Considering the material well being and prosperity of Bangor, I am convinced we have not always fully appreciated the advantages of our position, when we consider the vast stretch of country surrounding us of which we are the largest centre of population and of commercial activity.

All this vast territory is undergoing development. I believe it will develop much more rapidly in the future than in the past. We should grow and develop with it.

An enlightened self-interest should compel us to lend our aid and influence throughout this section. Highways, trolleys, railroads, the sounding the praises of the natural beauties and advantage of this region should have our aid and encouragement.

Loyalty to city finds its expression in practical ways, and one way in particular confers material benefit on the city as a whole and on its citizens individually. Home industry calls for the patronage of home people, not because of sentiment, but because of the invariable law of economics.

No man can be entirely independent of the community where he lives and works. The grand volume of prosperity of the city is reflected in his own prosperity.

Every considerable loss of trade from this city that logically belongs here is a reduction of so much in the total volume of trade, which reacts upon the employment of all classes of labor and the general prosperity of all our people. No man is either so high or so low as not to feel the effects of a trade movement either to or from his city.

The man who deprives home industry of the support it ought to have stands in his own light. He takes just so much from the credit balance of the prosperity of this city—a part of that balance belongs to him.

Therefore, it behooves each and every one of us to consider Bangor's interests first. Eat Bangor made bread, smoke Bangor made cigars, trade with Bangor merchants. Lay aside petty jealousies, envy, individual differences and past troubles in the broad co-operative spirit of helping the whole city.

In conclusion, let us remember that the well ordered city will attract the stranger to its door, therefore let us not be lacking in a cordial and hospitable welcome to him. It needs but our best efforts and a thorough belief in the future of our city to make Bangor justly entitled to become the "Queen City" of all New England.

J. G. UTTERBACK, Mayor.

Report of the City Treasurer

TREASURER'S REPORT

Dr. HENRY O. PIERCE, City Treasurer

1913

March 1. To cash on hand	\$ 92,330 55

Report of the Commissioners of the Sinking Fund

To the City Council:

In accordance with Sec. 4 of the City Ordinance creating a sinking fund the Commissioners herewith respectfully submit their twenty-third annual report.

The present Board received from their predecessors one European and North American R. R. Co. bond of \$1,000, due January 1st, 1894, and unpaid coupons attached due prior to January, 1883, amounting to \$420.00 as described in the annual report of March 1st, 1913.

In accordance with Sec. 8, chapter 56, of City Ordinances there has been transferred from the Water Department account to the Sinking fund account the sum of \$12,000.00.

F. O. BEAL,
JOS. E. FRIEND,
JOHN G. UTTERBACK,
H. O. PIERCE,
Commissioners of the Sinking Fund.

REPORT OF SUPERINTENDENT Department of Supplies

BANGOR, ME., February 1, 1914.

To His Honor the Mayor, and City Council:

GENTLEMEN:—I herewith submit the first report of the Department of Supplies which was placed in active operation on the first day of December, nineteen hundred and thirteen, and in spite of the general impression of the public that I was likely to meet with obstacles and opposition, I am happy to say that I have been generously treated by the heads of the different departments; the principal difficulty in operating a new department at first is the upsetting of old established customs and adopting new ones. *“The belief that things are sacred because they are Old, or Dangerous because they are New, arises like a Mountain Chain across the Path of Progress.”*

This Department being put in operation so late in the municipal year, and so little actual information readily obtainable concerning previous purchases of supplies, no full comparison can be rendered without an endless search through the vouchers and files in the Treasurer's office for information; it is however a matter of record that recent purchases are at a lower price than formerly charged for the same goods, resulting from the stimulus of competition. A few comparisons follow:—

Item I.	Old price.....	\$ 1 10	Now.....	\$ 66 $\frac{2}{3}$
Item II	Old price.....	4 50	Now.....	4 00
Item III.	Old price.....	6 00	Now.....	4 00
Item IV.	Old price.....	12	Now.....	02 $\frac{1}{2}$

Item V.	Old price.....	15	Now.....	08
Item VI.	Old price.....	1 35	Now.....	1 00

and innumerable other instances can be cited by reference to the city files.

One Bangor dealer made the statement that I could save \$300.00 on one commodity handled by him, but is opposed to this department. WHY? He claims that he is entitled to this additional profit so that it might help out on his taxes, regardless of the fact that 90% of the taxpayers do not sell any goods to the city and would not be benefitted to the same extent that he would be. Even at the lower price that I am now buying goods there are other dealers glad to have the business at a smaller profit. If \$300.00 could be saved on each of the many commodities purchased for the city, the saving would be stupendous, while it would only require ten such items to more than save the cost of administrating this department. On one item alone I made a saving of \$89.20 and on another \$76.00. It is and has been my policy to buy from Bangor dealers whenever possible.

I have not yet been provided with a suitable office, and without a clerk or assistant I am necessarily confined too closely to City Hall when I might be busy elsewhere to good advantage.

I have established a system by which ready reference may be made now to a record of any purchase made through this department, giving requisition number; order number; from whom purchased; commodity; price; for what department; amount; previous purchase; whether bill has been approved for payment; etc. The records of this office are at all times open to the inspection of those who may have a direct desire for information pertaining to any transaction. In addition, I plan a more detailed record so that any disputed account may be promptly checked and settled; this would avoid a repetition of a circumstance in February wherein the Treasurer was put

to a great inconvenience in searching and checking to straighten out an account running throughout the year of 1913. This class of work and fret should not be imposed on the Treasurer causing the delay of other more important matters, therefore I have suggested a change in routine of accounting by an amendment to the Ordinance on "Accounts and Claims" under which the present routine is conducted, the amendment to also provide to give authority to the Treasurer to make prompt payments and obtain discounts. Also an amendment to the ordinance on "Department of Supplies" giving the Superintendent authority for clerk hire, authority to condemn property requiring repairs if in his judgment the repairs would not justify the outlay, and to use his discretion in buying in excess of \$300. without advertising, provided that the approval of the Committee of the department making requisition and Committee of Department of Supplies is obtained. For example I have reported to the Board of Aldermen an instance wherein the Fire Department requisitioned one piece of apparatus costing \$150.00 singly, and another piece costing \$230.00 singly; both being patented articles, manufactured by one concern only, no competition and no benefit to be derived from advertising. No opposition being made to taking advantage of the opportunity of buying these two pieces together at a price of \$304.00 net instead of \$380.00 if bought singly, trade will be completed at a saving of \$76.00.

I recommend that the Street Commissioner to be elected in March, 1914, take into consideration the purchase of ten new sets of harness, for the reason that those now in use at the Highway Department have been continually repaired during 1913 and have been a constant bill of expense; with new harnesses and the elimination of repair bills and lost time much saving should be made.

I also recommend that the head of each department, as soon as he can make a schedule of his requirements, furnish this department with an estimate of quantities of commodities required in his department so that purchases may be made in quantities in advance at lower figures by taking advantage of market conditions—not waiting until goods are actually needed before making requisitions.

I also recommend that no contract or purchase of any description be made, nor any verbal order of the Mayor, Highway Commissioner or Street Engineers be carried out without being made a record of this department, thus avoiding the possibility of later disputes; this applies to contracts for street paving, sprinkling, sidewalk construction, hauling gravel, etc., and *particularly* to the Deputy Highway Commissioners or Road Agents of the different outlying districts—that when such “Road Agents” are appointed, notification be sent to this department, and that they be required to report weekly of work done or being done.

I have already accomplished much of the desired improvement regarding supplies, repairs, etc., and if my recommendations are carried out and I am given sufficient authority, I can promise still further improvement.

The number of orders issued from December first to February 28th was 1331, and covering only the last quarter of the municipal year when all appropriations are practically exhausted does not represent the normal volume of purchases as compared with the first quarter.

To those of our citizens who have been acquainted in the past with the system by which purchases of supplies for the city were made, a knowledge of the present system can not help but meet with general approval.

That there has been only *one* complaint lodged against the department, and that this one complainant declined to be a

party to any investigation, having announced that he was fully satisfied, reflects credit upon the department and establishes the integrity of the system beyond a doubt.

Respectfully submitted,

F. H. MEINECKE.

Superintendent of Supplies.

Report of the Fire Chief

To His Honor, the Mayor, and Members of the City Government:

GENTLEMEN:—In accordance with the requirements of the City Ordinance it becomes my duty as Chief Engineer to present to you for your approval the annual report of the Fire Department of the City of Bangor for the year ending February 28, 1914.

There is presented in this report a complete number of the fires that have occurred in the past year or those that have had the attention of the department together with the losses on the same and insurance thereon; also, an inventory of the apparatus and the condition of the same and a statement of the cost of maintaining the Fire Department, etc.

Expenditures.....	\$ 49,272 60
Appropriations and Credits.....	48,361 49
	<hr/>
Overdraw.....	\$ 911 11

APPARATUS

The department has at the present time three engines, four hose wagons, one combination chemical and hose wagon, one combination chemical hose and ladder wagon, one aerial truck, 2 ladder trucks and also chief's wagon and pung, which are in need of a general overhauling.

HORSES

There are at present twenty-six horses in the department. During the past year we have purchased one, one has died and

one was exchanged. At the present time the horses that are used on Hose 5 wagon are long past their usefulness and should be replaced by a younger pair. These horses have been in the department thirteen years and in my opinion should not be traded for new ones but taken care of.

HOSE

At present we have 13,950 feet of hose, of which 9,500 feet is in first-class condition and the other 4,500 feet is second-class. We used during the past year 45,900.

FIRE ESCAPES

Fire escapes erected in the past year:

Odd Fellows Building

Bijou Theatre

1 Allen Street School House

1 Pond Street School House

1 Pearl Street School House

J. P. Bass Building, Exchange Street, in process.

MANUAL FORCE

The manual force of the department consists of the following: Chief Engineer, three district chiefs, four engineers of steamers, seventy-seven call men and twenty-four permanent men stationed as follows:

Fourteen central station, two Hose 2, two Hose 3, four Hose 4, five Hose 5, four Hose 6.

Four hose companies, one ladder company, one chemical and hose company, one chemical, hose and ladder company.

ALARMS

The department in the past year responded to 249 calls, of which 92 were bell alarms, 157 still calls.

Of these fires 167 were in wooden buildings, 47 in brick or stone buildings, 26 grass or dump fires, 2 in automobiles, 2 in freight cars and four false alarms.

We also responded to a call from East Hampden.

VALUATION OF PROPERTY

Valuation of property involved in the fires of the past year was \$1,543,212.47, insurance on property \$908,155.00, the loss on same was \$127,758.90.

During this past year we have suffered by two serious fires, the Opera House and Daily News fires.

Inspections have been carried on in the past year to a large extent and by so doing things are kept in the most satisfactory condition.

RECOMMENDATIONS

I wish to recommend the purchase of 3,000 feet of hose; at the present time we have 13,950 feet which is 700 feet less than we had a year ago.

I also wish to recommend the purchase of one pair of horses for Hose 5, those there now are past their service.

RAISE IN SALARY

The question of allowing the members of the department more pay has been brought before the Council during the past year. The call men were allowed a raise of \$50.00 which was very reasonable.

The permanent men also asked for an increase but on account of the financial condition of the city it wasn't deemed advisable. But I hope during this next year that it will have your approval which I believe to be reasonable and should be complied with.

CONCLUSIONS

In conclusion, I wish to extend my thanks to His Honor, the Mayor, and the members of the Council, for the interest taken in the department, and in all matters pertaining to it.

To the department of police I extend my thanks for their valuable aid given at fires, and all other times when desired. To the press and reporters, I take this opportunity to express my thanks for the reports given to the public of the workings of the department, and to all citizens aiding the department at times of fire, or other times, and also the New England Tel. & Tel. Co. for the efficient service that they have rendered this department at all times.

The officers and men of the department have my commendation and my many thanks are extended for their faithful and valuable services given at all times.

Respectfully submitted,

W. S. MASON,

Chief Engineer.

Report of Harbor Master

To the Mayor and the City Council of the City of Bangor:

GENTLEMEN:—

The Harbor Master respectfully submits his report for 1913-14.

The ice left the river Saturday, March 22nd, and the port closed to navigation Sunday, December 28th, 1913; open to navigation 282 days.

During which time 989 vessels arrived, classified as follows: 437 steamers, 405 schooners, 113 barges, 32 steam and gasolene yachts, 1 rock drill, 1 dredge, with a total gross tonnage of 751,400 tons.

Foreign vessels arrived 2, arrived from Foreign Ports 2, cleared for Foreign Ports 3.

During the year merchandise as follows arrived by vessels: 350,049 tons of coal, 78,500 barrels kerosene and gasolene, 10,025 casks of lime, 2 tons of white lead, 970 tons sand and gravel, 339 tons of paper, 31,280 casks of cement, 208 M lumber, 100 tons of pig and bar iron, 3,786 tons of phosphate, 29,196 bushels of salt, 2 ton putty, 3 ton sheet lead, 161 bundles wagon fellows, 4 ton paint, 40 barrels oil, 89 boxes window glass, 16 barrels whiting, 100 barrels fishing bait, 60 crates axle grease, 14 packages croquet sets, 37 tons poultry feed, 2 ton lead pipe, 60 cases doors, 3 barrels shellac, 2 ton steel, 1 barrel brimstone, 1 barrell saltpetre, 15 bundles cans, 10 bundles sand paper, 3 bundles emery paper, 836 ton stone, 70 cases ammunition, 144 cases rifles, etc., 66 M hoops, 180 ton clay, 500 empty oil

1914]

CITY OF BANGOR

109

barrels, 512 ton oyster shells, and 190,590 lbs., and 1,160 barrels of fish.

Respectfully submitted,
JOHN C. WILSON,
Harbor Master.

Report of Street Commissioner

To the Honorable Mayor and City Council, City of Bangor, Maine:

GENTLEMEN:—Herewith I submit my report as street commissioner for the year 1913.

Last March when I was elected to the office of street commissioner, I found the streets and highways in a seriously worn out condition. Some two or three inches of the top had been worn to dust and blown away, leaving the cobble stones sticking up and making it very hard to ride over, as well as dangerous. The King split log drags, which the city had and used to smooth the rough roads in the spring of the year, had all been cut up and used for firewood and the chains with which they were hauled were also missing, so we had to make new ones before the work of smoothing up could be done. There was no gravel that could be had until well into the summer. The only material we had for repairing streets was crushed rock, which is very expensive, costing much more than gravel. Of this material we used upon the streets during the past season 4,621 square yards at a cost, when spread upon the streets, of \$13,863. We used upon the streets 22,423 yards of gravel at an expense of \$33,634.50. We also used upon the sidewalks this winter 1200 yards of sand at an expense of \$2400.

The City Council in making the appropriations, appropriated for the maintenance of streets and highways \$55,000. In previous years it had cost about \$75,000.

The City Council then proceeded at each meeting to vote away money upon improvements, such as crosswalks, sidewalks, curbing and woodblock paving to the extent of \$59,708.15,

none of which was contemplated when the appropriation was made. They seemed to have a mania for charging all they could think of to the highway department, even going so far as to vote to pay half the cost of cellar walls that adjoined the streets and have that charged to the highway department. They kept on voting away money and having it charged to this department until the department had been charged with over \$125,000. This department seemed to be a sort of dumping ground with some members of the City Council for everything that seemed to be questionable.

We set about one mile of curbing this year which cost from \$1.50 to \$4 per foot when set.

The concrete voted by the city council cost over \$10,000.

The special work ordered by the city council and charged to the highway department was:—

Concrete	\$10,000 00
Auto Truck	3,400 00
Exchange St. woodblock paving	8,760 00
State St. paving	11,182 00
Hancock St. paving	3,190 00
Harlow St. paving	11,811 00
Special curbing and paving gutters	10,000 00
Retaining walls	1,500 00
Central street	500 00
Old bills for 1912	1,700 00
Total	<u>\$62,763 00</u>

The total amount charged to the highway department is \$129,521.67. Deduct from this the amount expended by orders of the city council and we find the amount spent by the Street Commissioner is \$66,758.57. In 1912 the street commissioner expended \$76,794.86. which is \$10,035.71 more than was spent this year, notwithstanding we sprinkled many streets with oil and removed a large amount of rubbish. Three two-horse teams with twelve men worked 95 days hauling garbage, hauling in all

5,695 two-horse loads. The road machine worked 119 days; the steam roller 111 days; the auto truck 145 days; we had eight men cleaning crosswalks, 230 days.

It has been very hard keeping the streets in good conditions on account of the large amount of rain we had during the summer and fall. We had a great many snowstorms this winter with heavy winds, thus making it very expensive to keep the streets in good condition.

F. O. BEAL, Commissioner.

Report of the Trustees of Income of the Hersey Fund

BANGOR, January 31, 1914.

To the City Council of the City of Bangor:

The Trustees of the Income of the Hersey Fund submit their annual report. They have received from the City Treasurer the sum of four thousand dollars (\$4,000) in quarterly payments, which have been paid to the Treasurer of the Board of Managers of the Bangor Public Library.

They also submit, herewith, the annual reports of the Treasurer of the Board of Managers of the Bangor Public Library, and the Treasurer of the Board of Trustees of said Library, and of the Purchasing Committee, and of the Librarian, together with the By-laws of the Board of Managers and the Rules of the Library now in force.

FLAVIUS O. BEAL

ARTHUR CHAPIN

FREDERIC W. ADAMS

WILLIAM F. CURRAN

HENRY O. PIERCE

Trustees of the Income of the Hersey Fund.

THE LIBRARY BOARDS

Under terms of the will of Hon. Samuel F. Hersey, who died in 1875, the City of Bangor was left a certain part of his estate, to become available in 1900 as a fund for educational purposes. The sum of \$100,000 was accepted by the City in 1883 in full of all claims against the Hersey estate, and the city government voted to use the entire sum for the establishment of a Public Library. The management of the legacy was entrusted to a board of five members, known as the "Trustees of the Income of the Hersey Fund," and consisting of the Mayor, the City Treasurer and three others, one elected each year by the City Council.

These Trustees agreed with the "Bangor Mechanic Association" (which had for many years maintained a library and reading room for its members) to combine interests and establish the "Bangor Public Library", with the 20,000 volumes of the Mechanic Association as a nucleus, and its \$12,000 of invested funds and the \$100,000 Hersey fund as endowments. The "Trustees of the Income of the Hersey Fund" and four representatives chosen annually by the "Bangor Mechanic Association" constitute the "Board of Managers of the Bangor Public Library."

When in 1893 the question of erecting a library building began to be agitated, the "Board of Managers" was incorporated under state law as the "Board of Trustees of the Bangor Public Library" with power to acquire and hold real estate; the personnel of the two bodies being the same but their functions quite distinct.

Library, and find it correctly stated and sufficiently vouched, and the balance, \$172.27, deposited in Bangor Savings Bank, and the Securities, \$4,000, in his custody as stated.

BERNHARD POL, Auditor.

BANGOR, MAINE, Jany. 19, 1914.

Report of Purchasing Committee

To the Board of Managers of the Bangor Public Library:

The Purchasing Committee respectfully submits the following report of expenditures for books and repair of books during the year 1913.

Three thousand and sixty-nine volumes were purchased during the year at a cost of \$6,120.19. The amount for binding was \$479.48. The cost of the magazines supplied to the Library \$269.44.

The Patten Fund, the income of which is used for the acquirement chiefly of books valuable for reference, paid \$138.36 for a number of volumes included in the above enumeration.

The library of the late General Hamlin, which has been in the McLaughlin Storage Warehouse since its purchase, has now been placed upon the shelves in the new Library Building.

Books purchased are classified as follows:

	Volumes
General Works.....	462
Philosophy.....	34
Religion.....	106
Sociology.....	338
Philology.....	2
Natural science.....	93
Useful arts.....	69
Fine arts.....	213
Poetry and Drama.....	45
General literature.....	110
Travels.....	191

Biography.....	307
History.....	851
Fiction.....	248

Mrs. Mary H. Curran prepared lists of books for purchase until her resignation in the autumn of 1913. Her resignation after many years of faithful care of the interests of the Library, was occasioned by her unwillingness to assume increased responsibilities on account of the uncertain condition of her health.

After the resignation of Mrs. Curran, Mr. Charles A. Flagg, for some time connected with the Library of Congress, was elected Librarian, Mrs. Curran retaining a position in the Library with the title Associate Librarian.

Since Mr. Flagg's election he has prepared the lists of books for purchase, for which duty he is admirably fitted by his fondness for books and his long experience in the Congressional Library.

Respectfully submitted,
 THOMAS UPHAM COE.

Report of the Librarian

To the Board of Managers of the Bangor Public Library:

I have the honor to submit the 31st annual report of the Bangor Public Library, covering the calendar year 1913. For the last eight months the Library has been under my charge, and during the closing eleven days of December in our magnificent new building on Harlow Street.

SIZE AND GROWTH

The number of volumes in the Library on Jan. 1, 1913, was 13,208. During the year there has been a gain of 9,074 volumes. The largest sources of increase were purchases of 3069 volumes, gifts of 1827 volumes, periodicals bound 338 volumes and the Hamlin Library of 3930 volumes bought in 1911 but now first recorded.

Number of volumes in the Library, Jan. 1, 1914, was 22,282. In addition, pamphlets have increased from 5,662 to 7,875.

No account is made of the mass of unrecorded material: about 50 boxes of books and pamphlets; also several thousands of loose, unbound magazines presented by Bangor people and held till space in the new building should render it possible to sort and arrange for binding. We expect that 1914 will see all this matter assimilated as well as the current accessions of the year.

With no reading or reference room, shelf space long exhausted, our collection scattered in various places and thousands of

books not catalogued at all, no systematic buying has been practicable. Such purchases as were made came chiefly under three heads: desirable older standard books offered at rates which made their purchase advisable; a few valuable and expensive reference sets for future use in the new building; and certain books of the day in special immediate demand.

Statistics may be found in Appendix A, D, and I.

PAMPHLETS

Statistics for pamphlets appear as such for the last time in this report. All pamphlets of a serial nature are now listed on serial record cards like magazines, and pamphlets of an independent or monographic character are being treated as books, and accessioned and catalogued accordingly.

Henceforth certain pamphlets of special value will be sent to the bindery, regardless of size; for others likely to receive somewhat less use we have provided a supply of inexpensive board covers of various sizes and easily applied; while the remainder, not important enough to deserve any binding, will be placed in their proper order on the shelves in manila envelopes, properly inscribed. See Appendix E.

SERIALS

All unbound publications of a serial nature, whether periodicals or issued at irregular intervals, are now listed, as received, on specially ruled record cards, each card showing exactly what the Library has and date of its receipt.

In our new building the leading popular magazines for reading room use have been placed in new magazine cases, accessible to readers. All other serials are alphabetically arranged in the stack room until bound, when they are classified as books.

The practice of purchasing extra copies of the leading magazines and circulating them is still continued.

Number of serials recorded during 1913, 1,820.

An alphabetical list of our current serials may be found in Appendix K.

OPENING, REGISTRATION AND CIRCULATION, 1913

The Library has been open every day from 9 a. m. during the year except Sundays, holidays and Dec. 19, when it was closed for a single day on account of moving. Before the removal the hour of closing was 6 p. m.; in the new building, 9 p. m. The children's room closes at 6 p. m. During the past summer the Library closed at 1 p. m. on Saturday.

5,576 cards were issued during the year; one card to a non-resident.

The total circulation for the year was 57,918; being an average of 10 and 38-100 books per card, during the year, or 2 and 34-100 books for every inhabitant of Bangor, or an average circulation of 4 and 38-100 times for each book in the library at the opening of the year.

Of the works issued 7,520 were unbound magazines, and 41,591, or almost exactly 70 per cent, were fiction.

Statistics of circulation are given in Appendix F-G.

DELINQUENT BORROWERS

There has been about the average amount of trouble with overdue books, requiring postal notices, occasional second notices and in a few cases special messengers. The record shows a loss by borrowers of 15 books of which 9 were replaced.

It seemed wise on the opening of our new building to remit all accrued fines and penalties, and notice to that effect was printed in the daily press. Thus every resident of Bangor has

begun the new year 1914 with public library privileges available. It may be needless to add that this is a special concession to signalize our removal; the Library rules are now strictly enforced.

Statistics are given in Appendix H.

GIFTS

The Library has been the recipient of many useful and valuable works during 1913. The various departments and bureaus of the United States government, the Maine State Library, etc., have contributed material as usual.

Among important individual gifts we would mention: a set of the first series of the "Manual of conchology," 17 volumes from Dr. Thomas Upham Coe; nearly 200 volumes from the Maine Historical Society including "Official records of the war of the rebellion" and "Maine farmers' almanacs;" (which do not appear in the gift list as they have not been unpacked); 26 volumes from Prof. Francis G. Benedict and wife of Boston; 109 volumes from Miss Elizabeth Talcott, from the library of her father (including some magnificent examples of early printing and especially "Questiones disputate" by Saint Thomas Aquinas, printed at Lubeck by Johannes Koelhoeff, 1475 and "Epistolae" of St. Jerome, in two large folio volumes printed at Parma 1480, and understood to have belonged to the celebrated Melanchthon, with notes in his handwriting); 190 volumes from Dr. William S. Dennett of New York, formerly of Bangor; 50 volumes of reports of the Massachusetts State Board of Health, sent at the request of a member, Hiram F. Mills, formerly of Bangor to replace the set destroyed in the fire; 36 new books on European life in the 16th century bought and presented by the Shakespeare Club; Grove's "History of music and musicians" given in memory of Mrs. June P. Roberts;

80 miscellaneous works from Miss Katherine Patten of Minneapolis; a large number of books and magazines from J. Putnam Walker; 225 volumes mostly medical from the estate of Dr. Atwell W. Swett; 7 volumes from Miss Jane B. Pickering; 114 volumes from Samuel D. Thompson of East Orange, N. J., from the library of his father; 32 miscellaneous works from Mrs. Abby C. Philbrook; the second volume of Judge Williamson's "History of Belfast" published since his death and presented by his children; and many others. Total additions by gift were: books, 1,862; pamphlets and magazines, 3,602; A complete list of givers is printed in Appendix J.

CLASSIFICATION AND CATALOGUING

The classification and accession of additions continues to be in charge of Mrs. Curran. The 8th or 1913 edition of Dewey's "Decimal classification" is now our standard, with certain specified modifications.

In our card catalogues the printed Library of Congress cards have been used to some extent from their first issue in 1898; and are now sent for in the case of every accession; typewritten entries being made on a similar plan for such works as are not represented in the Library of Congress stock. This has brought about such a divergence from the older usage that a new card catalogue has been started. Its nucleus was the card catalogue of the Hamlin collection made during the summer and fall under the direct charge of the librarian, and since November all cards for new books have been filed in it, while the old card catalogue will be revised and incorporated in it as rapidly as possible.

The actual work on the card catalogues requires full time of one assistant and partial time of two others.

PUBLICATIONS

During the year the "Bangor daily news" has printed classified lists of our accessions, of which several copies have been clipped and pasted in scrap-books for library use.

Our only special publications have been the "Annual report" for 1912 and "Handbook of the Bangor Public Library, 1st edition" issued in December at the time the new building was occupied.

STAFF

Mrs. Mary H. Curran, the faithful and efficient head of the Library for 25 years past, having asked to be relieved of the executive responsibility, Charles A. Flagg of the Library of Congress was elected Librarian on Feb. 10, 1913, and began his duties May 1, Mrs. Curran becoming Associate librarian at the same time.

Four assistants have been on duty during the entire year. During the summer and fall it became necessary to employ two of our substitutes as temporary assistants, and on moving to our new quarters it has been found expedient to engage two more.

At the present time our roll of substitutes includes five, in addition to the four regularly employed in the Library.

THE OLD QUARTERS IN THE COURT HOUSE

Throughout nearly the entire year the Library has been housed in the rooms at the Court House placed at its disposal by the County Commissioners of Penobscot County—two small rooms in the rear of the basement used as office and as stack and delivery room respectively; supplemented by one, and since May 1913, by two large unfurnished rooms for storage on the top floor.

The inconvenience of this arrangement, can scarcely be overstated: basement rooms overcrowded; books on the top floor heaped up in piles or at best arranged in rows on the floor, while hundreds were boxed and not available at all, with three long flights of public stairs the only communication between the parts of our collection.

The pleasant feature of the situation has been the courtesy of the County officials and the general consideration for our comfort shown by occupants of the building.

REMOVAL TO NEW BUILDING

The event of the year, from a Library standpoint, has been the completion and occupancy of the new building on Harlow Street.

During the week of December 8th, all our books and other property on the top floor of the Court House and all boxes of books and magazines stored in the basement were transferred to the new home.

Meanwhile the library rooms were open as usual from 9 to 6 and so continued through Dec. 18.

The new building was open for public inspection from 1 to 9 p. m. on Dec. 16, 17 and 18, the librarian and five assistants being on duty there to guide and explain, during those hours. Dec. 19 both buildings were closed to the public while the process of moving was completed.

On Saturday, Dec. 20, 1913, the edifice was opened as a library, from 9 to 9 and has since been regularly open between those hours.

The physical labor of moving between 25,000 and 30,000 volumes and various other material and fittings is no slight one, increased as it was in this case by the fact that a large part of the books must be brought down from the top floor.

As the collection was only partially in order in the old quarters the work of arrangement was an arduous one, requiring all the assistance we could procure for several days.

CONCLUSION

The opening of the new year finds the Bangor Public Library in its new home with a splendid mechanical equipment furnished by the Library Bureau, and desirous of enlarging its field of usefulness in the community in many directions. Its history since the fire has been necessarily one of obscurity and repression. Some new lines of development and extension are already inaugurated and others are planned. This, however, is not a prospectus for 1914 but a report for 1913.

Respectfully submitted,

CHARLES A. FLAGG, Librarian.

BANGOR, Jan. 16, 1914.

APPENDIX K

SERIALS TAKEN AT THE LIBRARY

This list does not include annuals nor works appearing in parts. In the case of a few of the popular magazines several copies are subscribed for and the extra copies circulated. These are indicated by a * in the margin, the number of copies subscribed for following the title.

- A. L. A. book list. *Monthly*.
American Iron and Steel Institute. Monthly Bulletin. *Monthly*. (*presented*).
American journal of science. *Monthly*.
American labor legislation review. *Quarterly*.
American Library Association *see* A. L. A.
American monthly magazine. (*presented*).
*American review of reviews. (3 copies). *Monthly*.
*Atlantic monthly (4 copies). *Monthly*.
Atlantic Deeper Waterways Association. Bulletin. *Monthly*. (*presented*).
Blackwood's Edinburgh magazine. *Monthly*.
Book review digest. *Monthly*.
Boston evening transcript. *3 times a week*.
Brooklyn Public Library. Bulletin. *Quarterly*. (*presented*).
Brown alumni monthly. (*presented*).
Bulletin of bibliography and Dramatic index. *Quarterly*.
Bulletin of the Pan American Union *see* Pan American Union.
Bureau of Railway Economics. Summary of revenues and expenses. *Monthly*. (*presented*).
*Century. (8 copies). *Monthly*.
Christian Science journal. *Monthly*. (*presented*).
Christian Science sentinel. *Weekly*. (*presented*).
Contemporary review. *Monthly*.
Craftsman. *Monthly*.
Dramatic index. *see* Bulletin of bibliography.

- Dramatist. *Quarterly*.
Edinburgh review. *Quarterly*.
Essex Institute historical collections. *Quarterly*.
Experiment station record. *see U. S. Dept. of agriculture. Office of experiment stations.*
Filipino people. *Monthly. (presented)*.
Fortnightly review. *Monthly*.
*Forum. (2 copies). *Monthly*.
Good government. *Monthly. (presented)*.
Good housekeeping. *Monthly*.
Gospel trumpet. *Weekly. (presented)*.
*Harper's magazine. (8 copies).
Harper's weekly. *(presented)*.
Hartford Library bulletin. *Quarterly. (presented)*.
Hawaii Agricultural Experiment Station. Bulletin. *Irregular. (presented)*.
*Home Needlework. (2 copies). *Monthly*.
Index to dates. *Monthly*.

- *World's work. (2 copies.) *Monthly.*
- Das Wort. *Monthly.* (presented).
- *Youth's companion. (2 copies.) *Weekly.*

BY-LAWS OF THE BOARD OF MANAGERS OF THE BANGOR PUBLIC LIBRARY

ARTICLE I.

OFFICERS

The officers of the Board shall be a President, Vice President, Secretary and Treasurer.

The Mayor of the City shall be, ex-officio, President of the Board, as provided in the contract between the Trustees of the Hersey Fund and the Mechanic Association.

The President of the Mechanic Association shall be, ex-officio, Vice President of the Board.

The Secretary and Treasurer shall be chosen by the Board, by ballot, at the annual meeting, and shall serve for one year and until others are chosen and qualified in their stead.

ARTICLE II.

PRESIDENT

The President shall preside at all meetings of the Board at which he is present.

ARTICLE III.

VICE-PRESIDENT

The Vice President shall preside in the absence of the President, and if both are absent, a President pro tempore shall be chosen.

ARTICLE IV.

VOTE OF PRESIDING OFFICER

The Presiding Officer shall not be entitled to vote at any meeting, unless a tie occurs, in which case he shall throw the casting vote.

ARTICLE V.

SECRETARY

The Secretary shall keep a faithful record of the doings of the Board and shall have the custody of all documents, except those relating to financial matters, and shall give due notice of all meetings of the Board and perform all other duties properly appertaining to his office.

ARTICLE VI.

TREASURER

The Treasurer shall have the custody of all funds of the Board, and all documents relating thereto. He shall pay all bills approved by the Finance Committee under authorization of the Board. He shall keep an accurate account of receipts and expenditures and make a report to the Board at the annual meeting. He shall give a bond, if required.

ARTICLE VII.

COMMITTEES

The Board shall choose from its own number, by ballot, at the annual meeting, a Library Committee, a Purchasing Committee, a Finance Committee, and an Auditing Committee.

The Library Committee shall consist of three members, and each of the other committees of one member.

All the Committees shall serve for one year and until others are elected in their stead. They shall act under the direction of the Board and shall report to the Board from time to time, and all measures proposed by them shall be submitted to the Board for approval.

ARTICLE VIII.

LIBRARY COMMITTEE

The Library Committee shall have supervision of all business relating to the Library and Reading Room and the keeping, cataloguing and delivery of books, and the work of the Librarian.

ARTICLE IX.

PURCHASING COMMITTEE

The Purchasing Committee shall expend such sums as the Board may from time to time appropriate, in the purchase of such books and periodicals as may be needed for the Library and Reading Room. The Committee shall also make a report to the Board at the annual meeting.

ARTICLE X.

FINANCE COMMITTEE

The Finance Committee shall examine all bills and report a list of the same at each quarterly meeting, and, after the acceptance of the report by the Board, the bills shall be approved by the Finance Committee and paid by the Treasurer.

ARTICLE XI.

AUDITING COMMITTEE

The Auditing Committee shall examine annually the Treasurer's account and certify its correctness.

ARTICLE XII.

LIBRARIAN

At the annual meeting or as soon after as may be convenient, the Board shall elect, by ballot, for a term not to exceed one year, a Librarian and a sufficient number of assistants. The salaries of the Librarian and assistants shall be fixed at the time of their election. Their duties shall be such as the Board may, from time to time, determine.

ARTICLE XIII.

USE OF LIBRARY

All citizens of Bangor shall be entitled to the use of the Library and Reading Room on equal terms, under such rules as the Board may, from time to time, ordain.

ARTICLE XIV.

MEETINGS

The annual meeting of the Board shall be held on the third Tuesday in January, and regular quarterly meetings shall be held on the third Tuesday of April, July and October of each year. Special meetings shall be called by the Secretary, at any time, by direction of the President, or by request of two members of the Board.

ARTICLE XV.

QUORUM

Five members of the Board shall constitute a quorum for the transaction of business.

ARTICLE XVI.

AMENDMENTS

These by-laws may be amended by vote of a majority of those present at any meeting of the Board, written notice of the proposed amendment having been submitted to the Board at the previous meeting.

RULES OF THE LIBRARY

ARTICLE I.

OPENING AND CLOSING

Unless otherwise ordered by the Board of Managers, the Library and Reading Room shall be open every day, except Sundays, and legal holidays observed by the banks, from 9 a. m. to 9 p. m. The Children's Room shall close at 6 p. m.

ARTICLE II.

READING ROOMS

The use of books and periodicals in the Reading Rooms is free to all persons of proper behavior. Certain books are available without any formality: the entire reference collection shelved in the Reference Room; unbound magazines in the periodical cases; 2d or reserved copies of the newest accessions, and such special collections as are displayed on tables or in cases in the Reading Room.

When a book from the main collection in the stack is wanted, its title and call number, together with the name and residence of the borrower must be written on a special slip furnished for that purpose, and left with an attendant. If table is designated on this slip, books will be delivered there. These slips are arranged in a drawer and when any book is returned, the corresponding slip shall be taken out and cancelled. Every book issued should be returned by the borrower before leaving the room, as his or her responsibility ceases only with cancellation of charging slip. A reader may have any number of

books needed, subject to the provision that no one may retain a book not in actual use when another reader calls for it.

There are study rooms on the lower floor for the use of students and investigators who may require a considerable number of works day after day.

The Children's room is reserved for the use of children, with special attendants in charge. It closes at 6 p. m. The books on the shelves of this room may be examined and taken down for use in the room or drawn out for home use under the Library rules. Children may also draw books from the main collection. Those of High School age, desirous of consulting reference books or pursuing serious research may be admitted to the main library.

Records shall be kept of all books brought from the stack for use in any reading room.

ARTICLE III.

REGISTRATION

Any resident of Bangor is entitled to have from the Library one Library card. This privilege shall be extended to any person whose business address is Bangor, and to any student in the Bangor schools.

Applicants for library cards must make application personally at the Library or authorize some person, in writing, to apply as their representative.

Residents of neighboring towns may be allowed home use of books, on approval of the Library Committee, on applying in writing and making payment of three dollars for each Library card issued before the first day of July in any year, and one dollar and fifty cents for each card issued on or after the first day of July; payment to be made when cards are delivered.

The Librarian shall have authority to require of any applicant a satisfactory reference, or a deposit of money, when necessary for the protection of the Library.

Cards are not to be issued until at least twenty-four hours after application is made.

Each card shall entitle the holder to home use of one volume at a time, under the rules of the Library, until the first day of January next ensuing after the date of the card.

Library cards are not transferable, and a Library card entitles the registered holder and members of the family of the registered holder, in the same household, to home use of books.

Immediate notice of any change of residence should be given at the Library. The registered holder of a card is, in all cases, responsible for books taken with it.

Books may be issued on any card to any applicant having written authority from the registered holder of the card; but books so issued are only for the home use of the registered holder of the card.

All cards shall be numbered in the order of their issue, and the numbers shall be entered in order, in the Record of Library Cards, and the name and address of the holder and date of issue shall be noted opposite each number.

Cardholders may have special cards for purposes of study without special registration. No book of fiction shall ever be issued on a special card. These cards shall be numbered in order of their issue and the list of special cards shall be transferred to the Record of Library Cards at the end of each year.

ARTICLE IV.

HOME USE OF BOOKS

The date of issue and return of each volume taken with a Library card, shall be stamped thereon, and a corresponding

slip, containing the call number of the volume and day and month of its issue and the name and address of its borrower shall be preserved.

The slips for each day shall be placed in the numerical order of the call numbers in a dated compartment of the drawer used for their preservation. When a book is returned the corresponding slip shall be taken from the drawer and cancelled.

Books taken from the Library must be returned or renewed within fourteen days. Periodicals must be returned or renewed within three days. Books and periodicals must be returned to the Library after one renewal. No book or periodical returned to the Library shall be re-issued until it has been returned to the shelves. Persons returning books should always deliver them to one of the attendants.

Any person who retains a volume longer than the regulations permit shall be fined two cents for each day of detention. When a book becomes overdue, not being returned within fourteen days from and after the day on which it was taken, (or three days in case of an unbound magazine) a notice shall be sent to the holder, by mail, on the day the book becomes overdue, requesting its return. If it is not returned within seven days from and after the date of the first notice, a second notice shall be sent, and if the book is not returned within seven days from the date of the second notice, a messenger may be sent for it, the cost of sending being charged to the holder of the book. If, however, a book becomes due on Sunday, it may be returned without fine, on the next day following.

No person shall be allowed to take a book from the Library who appears by the records to be accountable for a book taken, or for a fine imposed.

Books shall not be issued to members of households in which contagious disease is known to exist.

All persons having books from the Library, will be held responsible for their injury or loss, and when injury or loss to any book occurs, the registered holder of the card, with which book was taken, shall replace the book or pay the amount determined by the Librarian.

If any holder of a Library Card neglects or violates the rules of the Library, the Librarian shall have authority to cancel the card for the remainder of the year for which it is issued, and when a card is cancelled for this reason, the holder of the card shall not be entitled to further use of the Library until authorized by the Library Committee.

When all the spaces on a Library Card are stamped, a new card shall be issued, on the surrender of the old one, provided the time for which the card was issued has not expired.

When a card is lost, the Librarian may issue a new one seven days after notice of the loss has been given at the Library, but the loss of a card will not remove the owner's responsibility for its subsequent use. If a lost card is recovered after a new one has been issued in its stead, the duplicate must be immediately returned to the Library.

A record shall be kept of the number of books issued daily from each class for home use.

ARTICLE V.

CATALOGUES AND OTHER RECORDS

Works added to the Library, whether by purchase or gift, shall be entered, when received, in the Accession Book.

There shall also be a Serial record kept for all magazines or other serials, until the completed volumes are bound and entered on the Accession Book.

The Gift record on cards shall show what each individual or corporate body has given to the Library.

The Removal record lists the works lost, worn out or for any other reason removed; the exact number of pieces belonging to the Library at any moment being found by subtracting the last number in the Removal book from the last number in the Accession book.

The Shelf List is a record on cards of all books, in the order in which they belong on the shelves.

The main public catalogues* are on cards in the dictionary form—i. e., authors, subjects and titles in one alphabet, with separate alphabet for fiction.

Lists of new books shall be posted from time to time on the public bulletin boards.

ARTICLE VI.

THE BOOKS

The main collection is classified by the Dewey "Decimal classification" with some modifications, and is shelved in the stack building.

The following classes of books are permanently removed from places:—

The children's collection in the Children's room.

"Restricted" books; works of rarity or value or for other reason removed from circulation and shelved in the vault.

Reference collection, shelved in the Reference room.

Cataloguers' collection, shelved in the Cataloguing Room.

Other works are temporarily out of place:—

Books loaned.

Books in use by readers in the building.

*At present there are unfortunately two card catalogues, each supplementing the other. Additions are made to the newer one only, and in time the old catalogue will be incorporated in it also.

Material at bindery.

New books in "New book cases."

Books on special reference lists in Reading Room.

Patrons of the Library are requested to recommend for purchase books which would seem to be desirable additions to the collection. If it is decided to make such purchase, notice is sent to the person making the recommendation.

ARTICLE VII.

ORDER IN THE BUILDING. PENALTIES

Conversation, avoidable noise and disorderly conduct are prohibited. Dogs or other pets are not allowed in the building.

Attendants are required to check irregularity of any kind and report if necessary to the Librarian.

Those unwilling to abide by the Library rules will be debarred from use of the building.

Injury to Library property is covered by Section 21, chapter 128 of the Revised Statutes of the state of Maine: "Whoever wantonly mars, defaces or injures a book, picture, statue or painting, belonging to any public library, or library of any association open to the public, or to any literary or educational institution, or any statue erected in any public park or square, or upon any ground open to the public, shall be punished by imprisonment for not more than three months, or by a fine not exceeding fifty dollars."

Report of the City Electrician

Report of the City Electrician

BANGOR, MAINE, March 2, 1914.

TO HIS HONOR, THE MAYOR, AND THE CITY COUNCIL:

GENTLEMEN:

I respectfully submit the report of the City Electrician for the year ending Feb. 28th, 1914.

This year has been the most busy one that I can recall in the past ten years. Not only did we have an immense amount of line work to do in the way of repairs, but there has been a large amount of new construction overhead and also underground. This has involved an immense amount of money, which looks exceedingly bad in the monthly reports and tend to give a City Electrician the name of being extravagant.

However a careful summing up of the following report, will I think, remove this idea in the minds of all persons that have followed the doings of this Dept. for the past twelve months.

This report will, I expect, vary a little from the City Treasurer's as he has not at this date received all the credits due this department, and it is also impossible for him to give me any credit for work that has been ordered done by the City Government, and that did not have an appropriation to go with it.

I have endeavored to fulfill every wish of the Council, in all matters that I knew were a permanent benefit to the citizens of Bangor, especially those in the outer ends of the wards, that can receive nothing for their tax money, but light. I sincerely believe that all avenues leading to the city should be lighted to the boundry lines. There is no better advertisement than light. Well lighted streets, bring people into town in the evening that would never come were the streets dark.

The following figures will show what each division of this department has cost the past year:

Line maintenance.....	\$6,425 55
Salaries.....	14,348 71
Fire alarm.....	362 44
Police.....	993 98
Team equipment.....	574 59
Inside wiring.....	1,901 01
Inspection.....	20 12
Insurance.....	263 78
Meals.....	35 50
Office supplies.....	49 45
Power station.....	2,394 07
Trucking.....	102 80
Telephones.....	177 35
Telegraph.....	13 67
Coal and wood.....	1,298 24
Express.....	63 86
Freight.....	327 01
Incandescent lamps.....	1,509 68
Instruments.....	574 89
Street lights.....	4,548 24
Sub-station.....	1,342 10
Underground.....	3,256 40
	————— \$40,583 44

In the above classification the charges have been made from the bills for material and labor that have actually been used in their respective places, and anyone can verify them by looking at my books which are open to anyone that will call at my office.

As to credits from bills that I have rendered other departments I should receive the following:

CREDITS THAT I SHOULD HAVE ALLOWED

Pond St. school.....	\$ 21 03
Bower St. school.....	14 75
Pine St. school.....	2 95
Palm St. school.....	65 12

Valentine school.....	77	
Material delivered to Cluff for schools.....	13 14	
Union Square school.....	1 15	
High school.....	2,474 39	
Larkin St. school.....	1 58	
Pearl St. school.....	32	
City Hall.....	117 72	
Police Dept.....	405 60	
City Farm.....	68 26	
Armory.....	3 07	
Central fire station.....	170 60	
Hose 5.....	51 28	
Hose 6.....	26 65	
Hose 2.....	9 54	
Hose 4.....	11 99	
Hose 3.....	36 05	
City stable.....	9 17	
Water Works.....	78 44	
Geo. H. Wilbur.....	23 36	
Dept. of Supplies.....	1 00	
City of Brewer.....	97 50	
Public Library.....	930 74	
Street department, rock crusher.....	1,704 01	
Chamber of Commerce, for Main St. lights.....	1,152 37	
Credits through the department of supplies.....	1,000 89	
		<hr/>
Amounting to.....		\$8,493 44
The Central Street job (no appropriation) cost.....		863 56
The Main Street job (no appropriation) cost.....		3,745 86
Stock on hand, all paid for.....	\$7,966 66	
Less amount of 1912 stock.....	4,883 51	
		<hr/>
		3,083 15
		<hr/>
Total amount of credits that should be allowed.....		\$16,186 01
Amount of appropriation.....	\$22,000 00	
Amount of credits.....	16,186 01	
		<hr/>
		\$38,186 01
Amount expended.....	\$40,583 44	
Appropriation and credits.....	38,186 01	
		<hr/>
Overdraw.....		\$2,397 43

Against this overdraw I have the following unlooked for expenses:

New clutch on engine at works.....	\$ 762 00
Connection from B. R. E. Co., sub-station to ours.	544 37
Main street drill and points.....	94 00
Extra tools used on Main St.....	31 15
Chain hoist at sub-station.....	56 00
Rewiring Water Works from arc lights to tungsten	419 03
Water piping at sub-station to cool Main St.	
lighting tub.....	46 98
Measuring instruments at sub-station.....	574 89
	<hr/>
Necessary purchases that were unexpected....	\$2,528 42
Amount of overdraw.....	2,397 43
	<hr/>
Balance on hand.....	\$ 130 99

The above I am simply putting in to show that I am not wasting the city money, and by good rights, should have a balance instead of an overdraw. In addition to the above my line maintenance has been double what I expected, as I had to change over a large number of lights and rewire the circuits so that I could take care of the extra load that we are carrying. This load is double what we had a year ago.

I also paid \$65.00 for a jigger, \$29.43 for a pung, \$50.00 for a remote control on the water wheel governor and a dozen other small things that were necessary but not thought of at the beginning of the year.

It was not my intention to make this report so long that a man would get tired of reading it, but as there are several things that the public should know about, I feel it my duty to print them in the report.

POWER STATION AT THE WATER WORKS

Without going into the small details that occur in Electrical Stations, I will say that we have reached the capacity of fuses

at 2300 volts on our generators and it has been necessary to install two three phase oil circuit breakers that operate when there is an overload or short circuit on the transmission line. These accomplish the same result as a fuse would, that is, they disconnect the machines from the line until the trouble is repaired. They cannot be kept in as long as there is trouble on the wires, unless a man stands at the switch and holds the handle.

The engine has been fully overhauled and a new clutch put on between the engine and generator; this we are just getting into operation.

Cost of clutch \$762. Repairs on engine were contracted with the Union Iron Works for \$250.00

The wires from the switchboard at present go up through the ceiling and out through an old cupola. It is impossible to get into this space in case of fire and I am at present removing the wires and running them out the front of the building on the ground floor, where they can be seen at all times. This wire is fire proof and much better than the old rubber covered that we are replacing.

Where the wires cross the Maine Central tracks it has been necessary to set two heavy forty-five foot poles and make a new crossing as the old one was not of sufficient height and was all rotten.

The output here has been greatly increased during the past year, by the addition of the Main Street lighting, the Library, the High School and the motor at the rock crusher.

	Kilo-watt hours
The average night load at present is for the year	1,540,000
The average day load at present is for the year	242,780
	<hr/>
Yearly total	1,782,780

Divide the total cost of running the plant which is \$7,212.31 by 1,782,780 kilo-watts gives us a price of four mills per kilo-watt. This is the actual cost of manufacture.

Now take the entire amount of money expended by this department for the past year, which includes everything, and don't allow any credits for any of the new permanent work, police signal, fire alarm or work done for other departments. Take this sum of \$40,583.44 and divide it by 1,782,780 kilo-watt hours and it gives us a price of 2 $\frac{1}{4}$ cents a kilo-watt.

The above is not taken from guesswork but is the actual readings from high priced electrical instruments.

Our total connected load is as follows:

	Watts
High school, lights.....	47.000
High school, motors.....	62.000
Library lights.....	22.000
Library, motors.....	13.000
Union St. Grammar school.....	5.000
Bower St. school.....	.480
Pond St. school.....	.360
Palm St. school.....	18.440

Sub-station, motors.....	5.500
Brewer bridge.....	2.400
Standpipe.....	6.000
Rock crusher, motor.....	50.000
City stables and Court St. buildings.....	2.000
Armory.....	4.000
Central St. lights.....	9.000
All series alternating street lights, including Main St.....	355.000
	<hr/>
	811.998

811.998 Watts equals 812 Kilo-Watts.

This 812 kilo-watts is the amount of electricity that it would take per hour to run the motors and lights that belong to the city, if they were all running at once. That is, this amount of power would have to be delivered at the apparatus. Outside of this there must be taken into consideration the line and transformer losses.

Our generators are rated at 250 kilo-watt each and would carry 25% overload. This makes our station good for 625 kilo-watt. As one machine is good for only half of this, it would be impossible to run our full load if one of the machines burned out. We very often have a load of 425 kilo-watt during the first part of the evening.

NEW CONSTRUCTION

In order to supply current to the high school and library it was necessary to change over a large part of the circuits in the city which took several miles of wire and a lot of cross arms. All this work had to be charged to line maintenance, and a glance at last year's report will show that I only laid out \$1,334.-59 on lines and this year it has cost \$6,425.55.

There has been a 50 horse power motor installed at the rock crusher which is going to save the street department two or

three thousand dollars a year in the future. This is a 2300 volt motor, and requires no other attention than that of throwing in the switch. This job took between seven and eight miles of line wire and cost \$1,704.01.

MAIN STREET ORNAMENTAL LIGHTING SYSTEM

To let the citizens understand fully the cost of this system I will submit it as I put it down in my day book.

- November 9. Order passed to install system.
- November 17. Started two men digging holes.
- November 29. Had nine men at work.
- December 1. Started laying cable.
- December 2. Hired 15 men making 24 on job.
- December 4. Hired 6 men making 30 on job.
- December 7. Let 13 men go.
- December 11. Let 4 men go.
- December 19. Started all the lights without trouble, at 6.45 P. M.
- December 19. Let 3 men go.
- December 20. Let 4 men go.
- December 22. Started bonding the cable sheath and poles together.
- January 6. Finished bonding.
- January 11. Finished for the winter, by wedging in poles and closing up sidewalks as much as possible.

ITEMIZED COST OF JOB

Rectifier outfit at station, good for 50 lights.....	\$1,239 25
Cost of labor.....	1,091 75
40 loads gravel.....	60 00
108 bags cement.....	51 30
Hemlock lumber.....	137 97
3100 feet cable at .202 cents.....	626 20
Bonding wire.....	30 00
73 bonding bolts and clamps.....	18 25
15 lbs. compound tape.....	15 00
31 lbs. friction tape.....	7 75
2 gals. asphaltum.....	2 00
25 lbs. nails.....	1 00

Cost of hauling away dirt.....	37 75
Horse hire.....	64 00
John Ward, bill for relaying brick.....	123 19
731 lbs. No. 6 line wire.....	139 77
10 6-pin cross arms.....	10 50
Lightning arresters.....	31 50
Labor at station.....	12 00
Cutters bill for pine forms.....	46 68
	<hr/>
	\$3,745 86

In addition to the above there will be a week's work for three men cementing the pole in the center of the concrete form and leading in the sub-bases.

CENTRAL STREET JOB

Amount of labor, Central St.....	\$ 168 00
Amount of labor, Harlow St.....	62 00
Hemlock lumber.....	25 00
12 bags cement.....	5 70
7 loads sand.....	10 50
20 lamps.....	13 00
Glassware.....	45 06
1511 feet cable.....	315 00
Cut-outs.....	2 50
30 fuses.....	1 05
2 automatic switches.....	48 00
Two 10 K. V. A. transformers.....	167 75
	<hr/>
Total.....	\$ 863 56

Here I wish to state that had these jobs been started a little earlier the cost would have been less, as the streets had to be kept in condition for snow and everything had to be picked up each night and carried to the sub-station. My police protection amounted to \$45.30.

Total number installed..... 185

Seventy of the above number are 200 candle power lamps and the rest are sixty and eighty candle. There are none under sixty candle in the city.

Street lights removed.....66 Arcs
Bryant's Pole, Main St.....5 Street Series

LAMPS INSTALLED

185 Street series.

16 5-light multiple clusters on Central and Harlow streets.

33 Magnetite direct current arcs on Main street.

There is about 92 miles of street lighting wire in the city.

FIRE ALARM AND TAPPERS

Owing to the large amount of extra work this year it has been impossible to get all the underground cable connected up, but the cable is all pulled in and will be finished this coming summer.

Have installed new boxes number 111 at State and Forest Avenue, and number 313 at Buck and Webster Avenue. A box has been ordered also for Wiley street but has not yet arrived.

Number of tappers installed, 103.

There are 27 miles of fire-alarm wire and 32 miles tapper circuits.

Loop wire remains the same, being about 9 miles.

POLICE SYSTEM

Have had no trouble worth mentioning with this system. The cable is most all underground but not all working. This will be finished this year.

INSPECTION

Owing to my getting out a new Electrical Ordinance I have done nothing the past year in this department on inspection.

Now that this Ordinance is passed the inspection will be resumed under a payment basis.

REMARKS AND RECOMMENDATIONS

As predicted in last year's report it has been necessary for me to run a three phase auxiliary circuit from this station to the Bangor Railway & Electric sub-station, in order to have a little power on the peak of the tide, or when repairing my engine. Ordinarily I do not need any current from them, as the engine will now carry the load, it having been put in first-class shape and properly lined with the generator shafting, a thing that was never accomplished before.

Now I wish to state here that whoever is City Electrician for the year 1914, cannot add with safety any more than seventy-five horse power to this plant. We have reached the limit and I want the City Government to take notice of this fact. If my word cannot be taken, send away and pay an engineer of established standing to prove it.

If we ever burn out a generator, we will have to take about a quarter of the load from the Bangor Railway & Electric Company until repairs can be made.

At the power station I strongly urge that the flume be divided so that we can be independent of the Water Works department, and I would like to have a committee appointed to look into this and report their findings to the City Government, as I can see a way to fix up the present station at small expense so that we can run as we are for a number of years.

In closing I wish to thank his honor the Mayor, the members of the City Council, the heads of the different departments, the

1914]

CITY OF BANGOR

179

officials of the Telephone & Telegraph companies, the Bangor Railway & Electric Co., and especially the members of my crew and my committee.

Respectfully submitted,

R. N. BICKNELL,

City Electrician.

March 11, 1914.

Horse hire for the season.....	150 00
W. H. Holman, drain.....	19 05
Harry French's drain repaired.....	26 00
Repairs on iron stairs of M. C. Peirce.....	132 02
Damages, P. J. Byrnes.....	100 00
	<hr/>
Total amount of expenditures.....	\$15,673 38

AMOUNT OF NEW SEWER BUILT

Fifteenth Street.....	750 feet 10 inch pipe
Tyler Ave.....	445 feet 10 inch pipe
Birch Street.....	430 feet 10 inch pipe
Jackson Street.....	366 feet 10 inch pipe
Union Street.....	995 feet 10 inch pipe
Poplar Street.....	165 feet 10 inch pipe
Meadow Brook.....	290 feet 3½ feet brick
Harlow Street.....	174 feet 10 inch pipe
Water and Broad Streets.....	150 feet 15 inch pipe
Harlow Street.....	100 feet 5 inch pipe
Buck Street.....	125 feet 12 inch pipe
Leighton Street.....	18 feet 8 inch pipe
Fruit Street.....	180 feet 8 inch pipe
Pickering Square.....	65 feet 12 inch pipe
Ohio Street drain.....	40 feet 10 inch pipe
Connections.....	758 feet 8 inch pipe
	<hr/>
Total.....	5,051 feet

The necessary Catch Basins and Manholes have been built in connection with all new sewers; two catch basins and two manholes on Union street; one catch basin and one manhole on Fifteenth street; two catch basins and two manholes on Jackson street, two catch basins and one manhole on Birch street, one catch basin on Harlow Street. This makes the total number of catch basins built this year forty-three; thirty-four on old sewers and nine on new sewers, making the total number of catch basins in the City 1229. There have been 7 manholes

and 5051 feet of new sewer built during the year which makes about 45 miles of sewer in the City.

A larger number of catch basins have been built on old sewers than in any previous year, and many more have been asked or petitioned for which it was not deemed advisable to build this year although they are much needed, not alone for the convenience of the people in their locality but in my opinion would greatly assist in keeping the roads in condition, by allowing the water a chance to drain off.

All the sewers petitioned for this year have been built with the exception of those on Hersey Ave., and Upper Broadway, where the water service which is necessary to keep a sewer clear does not extend at present; and a sewer from Lincoln to Larkin streets, the survey for which was made but too late for it to be built this year. I would recommend this sewer be built the coming season.

The Jackson and Union street sewers built this year were expensive, owing to the large amount of ledge encountered, it being necessary to cut through from six to eight feet of ledge for a considerable distance. All of the sewers were constructed below the estimated cost. Six of the catch basins in other sections of the City were located where it was necessary to excavate from solid ledge.

The Meadow Brook sewer was extended this year 290 feet at a cost of \$1268.00 which brings it about 400 feet from Milford Street. I would recommend it be continued to Milford Street the coming season.

The sewers at the foot of Water and Buck streets which formerly discharged at highwater mark and were very offensive to the people in those sections when the tide was out, and a menace to the health of the community, were extended this year by laying iron pipe to the low water mark.

There have been about 65 houses connected with the sewer this year.

All the catch basins in the City have been cleaned once, and those where it was necessary twice and some three, four, five and six times at a cost of \$2754.46.

For a schedule of property in the possession of this department I would refer you to the report of the Committee on City Property.

Respectfully submitted,

WM. E. GIVREN,

Supt. of Sewers.

Report of Water Board

To the City Council of Bangor:

The Water Board herewith submits its thirty-ninth annual report together with the reports of its superintendent, chief engineer and clerk and collector.

The department has had a very satisfactory year. The most serious interruption to its service was on February 19th, when a bad break was discovered in the 20 inch force main on Garland Street at the corner of Birch. The frozen ground and cold weather made digging very difficult, but on February 21st the damage was repaired. This incident calls attention to the need at no distant date of additional facilities for water storage, probably by means of another stand pipe.

The most important street work has been the laying of 2752 feet of twelve inch main in French street to the junction of Broadway providing a very much needed feeder for the mains leading off from it in that vicinity.

The total amount of distributing mains now in the system is about $54\frac{1}{2}$ miles, while connected therewith are 5100 service pipes.

Some repairs will be necessary at the pumping station, including an extension of the concrete retaining wall, and replacements on the east side of the sluiceway.

Including appropriations from the City the yearly revenue was \$102,888.18, while the actual cash receipts were \$90,178.09. Systematic inspections of fixtures have been made, the inspector making reports on 7293 fixtures at houses and various places of business, the highest record ever made in the department.

The pumps have supplied 1,452,007,600 gallons of water to the city, a daily average of nearly four million gallons, the highest amount being 6,549,855 gallons on February 13th and the smallest 3,145,325 gallons on April 6th. A marked increase in consumption is shown for January and February, indicating very clearly a great waste, caused by takers leaving their fixtures open to prevent freezing. It is a difficult problem to prevent this needless use of water without the introduction of meters. It is a severe strain on the system to be obliged to pump nearly double the amount actually needed for legitimate purposes, not to mention the serious danger of shortage of water should a big fire occur. The board trusts that the water takers will safeguard their fixtures during the coming year, so that this menace to our system may be done away with.

The new filters have given entire satisfaction. The report of the Chemist contains many interesting facts and will show the general efficiency of the department under his charge.

During the coming year it is proposed to install a new low lift pump at the works of ten million gallons capacity, the ones now in use being hardly sufficient to supply the water needed on extraordinary occasions.

F. O. BEAL, Mayor

B. M. KIRSTEIN

MILTON S. CLIFFORD

Water Board.

Report of the Superintendent

March 1, 1914.

To the Bangor Water Board:

Gentlemen: I respectfully submit to you for your consideration the thirty-ninth annual report of the Superintendent for the fiscal year ending February 28th, 1914.

EXTENSIONS OF STREET MAINS

The street distribution mains are all in good condition. Several have been relaid to larger sizes to increase the supply in the different districts which they serve. The following table gives the extension for the year.

Location	Size	Feet
Parkview Ave., from end of old main, south	2"	135
Thirteenth St. from end of old main, north	6"	215
Poplar, from Leighton to Fountain	6"	210
Center, from Congress north	6"	262
Catell, from Hubbard north	6"	190
Fountain, from Poplar south	6"	126
Congress, from French to Center	8"	319
French, from Cumberland to West Park	12"	1410
French, from Congress to junct. of French and Broadway	12"	1342
Total number of feet laid		4209
		Feet
Total number of 2" laid		135
Total number of 6" laid		1003
Total number of 8" laid		319
Total number of 12" laid		2752
Total number of miles connected with Distribution System, 54 2581-5280.		

The relaid distribution mains appear as follows:—French St., from 6" to 12"; Centre St., from 4" to 6"; and Congress St., from 4" to 8".

The 12" cast iron force main on French St. has been extended from Cumberland and French Sts. to West Park St. This new line opens a direct high pressure fire line to the "Little City" and greatly increases the general service in that locality. I earnestly recommend that this size line be extended from the junction of Broadway and Centre Sts. to French and Broadway; this will discontinue "dead ends" and allow a much needed circulation. The 6" main on Boutelle Road should be extended to Webster Ave. also that on Royal Road.

BREAKS AND LEAKS

Three breaks have occurred in the mains the past year; one in the 4" main on Centre St. one in the 4" main on Kenduskeag Ave. and the most serious one occurred in the 20" force main on Garland St. at the corner of Birch St. on the afternoon of Feb. 19th, water was shut off at 1.30 P. M. and repairs were made and turned on Saturday morning Feb. 21. Eighteen service leaks have been repaired also.

VALVES

Each valve in the entire system has been inspected the past year, and is in good condition. It will be absolutely necessary this summer to renew many of the wooden valve boxes with the regulation iron box.

The setting for the year have been as follows:—

Location	Size
York and Exchange.....	4"
Harlow and Haynes Court (A. P. Smith valve).....	6"
State and Park (A. P. Smith valve).....	6"
Broad St. Snow & Neally Co. (A. P. Smith valve).....	6"
Centre and Congress north.....	6"

Poplar and Leighton west.....	6"
French and West Park.....	6"
French and Cumberland.....	6"
French and Garland.....	6"
Garland and French, east.....	6"
French and South Park.....	6"
So. Park and French, east.....	6"
Broadway and French.....	6"
French 500 ft. north of Congress.....	6"
French and Congress.....	6"
Hammond and Seventh.....	6"
Congress and Centre, east.....	6"
French and Cumberland, north.....	12"
French and Cumberland (A. P. Smith Valve).....	12"
French and Garland, north.....	12"
French and Congress, north.....	12"
Total number set during the Year.....	21

VALVE DATA

Size	Total number set to date, 550								
	1 $\frac{1}{4}$ "	2"	4"	6"	8"	12"	16"	20"	24"
No.	1	32	135	310	40	15	5	11	1

FIRE HYDRANTS

All fire hydrants have been tested at the regular periods, and are as usual in the best of condition for service. Three have been added the past year at the following locations:

Location	Pressure per Sq. in.	Pattern
French and Congress.....	65	M
French 500 ft. north of Congress.....	60	M
Harlow, near Haynes Ct.....	100	M

Total number of Distribution System, 312

SERVICES

The service department has installed fifty-five (55), renewed eighty-five (85), and discontinued twenty-three (23), services

during the year. The total number of services connected with the system at present is 5100.

METERS

All meters in service are in good repair and are registering in a creditable manner. The following table gives the entire setting for the Dept.

Total, 121.

Size.....	$\frac{5}{8}$ "	$\frac{3}{4}$ "	1"	1 $\frac{1}{2}$ "	2"	3"	4"	6"

Warren and Fourth
West Broadway and Hammond
Ohio, near George

STANDPIPE

At present the standpipe and super-structure are in good condition. The super-structure has been painted during the year; and it will be very necessary to renew the deck canvass another year for it is wearing badly.

DEPARTMENT BUILDINGS

The department buildings are in fair condition; some painting ought to be done within a year or two, but I earnestly recommend that the store house on Second St. be painted early the coming summer.

DAM AND PIERS

The concrete retaining wall east of the Engineer's dwelling should be extended to the pumping station building, the wooden wall now in place is decaying fast and will cause trouble very soon.

At present (February) our crews are repairing the "head-gates," upon first examination several starts were found broken.

Arrangements are being made to repair the east side of the sluiceway; this work will begin as soon as the weather will permit.

No extensive work aside from the paragraph mentioned above has been necessary on the dam and piers.

FILTER PLANT

The filter plant still continues to operate in a satisfactory manner. The old concrete alum solution tanks in the "head house" have been relined and will be used in the future for emergency should the wooden tanks become impaired.

It has been necessary this year as last to continue the flushing of the distribution system; the results have been very satisfactory, but it is not well to discontinue the practice for long, for trouble will ensue.

BOILER

The new horizontal tubular boiler that was ordered for the pumping station was installed by the Union Iron Works of this city. The boiler is in commission and heats the entire plant

and serves as an emergency to run the 20" centrifugal pump should the water power fail. .

In closing I wish to thank the Mayor, Water Board, and all of the Department Officers for their co-operation with me during the past year.

Respectfully submitted,
M. A. SINCLAIR, Superintendent.

Report of the Water Collector

Water Collector's Office,
Bangor, March 2, 1914.

To the Bangor Water Board:

Gentlemen:—In compliance with the requirements of the city ordinance, I herewith present the thirty-ninth annual report of the department, showing the receipts, expenditures and refunds for the year ending February 28, 1914.

CASH STATEMENT

On hand February 28th, 1913.....	\$ 589 25
Received from general water service, from March 1, 1913, to March 1, 1914.....	88,425 48
Received from fines, delinquent water customers... ..	87 20
Received from sundry parties, water used for mixing lime and cement for building purposes.....	479 57
Received from water furnished to circuses.....	25 00
	\$89,606 50
Received from sale of cast iron pipe, scrap, etc....	\$ 220 33
Received from sale of ledge rock.....	80 50
Received from sale of grass.....	16 00
Received from labor and material, trenching for water service.....	248 76
Received from use thawing machine.....	6 00
	\$90,178 09

CREDIT

By paid H. O. Pierce, City Treasurer, per receipts..	\$89,200 00
Paid water customers for vacancies and non-use of fixtures.....	237 87
Cash on hand.....	740 22
	\$90,178 09

For the seventeenth consecutive year, all water rates charged for the year ending Feb. 28, 1914, have been paid.

It is with pleasure, the collecting department expresses its appreciation to the citizens for making this record possible.

CHARGES ON WATER LEDGERS

Amount per schedule ledger, from March 1, 1913, to March 1, 1914.....	\$70,243 25
Amount per meter ledger.....	19,117 93
Amount per petty ledger.....	504 57
Amount to Charitable Institutions et als.....	2,196 00
	<hr/>
	\$92,061 75

REFUNDS

Water rates to the amount of.....	\$ 237 87
Which deducted from the receipts for water.....	88,930 05
	<hr/>
Leaves net receipts for water.....	\$88,692 18
Add the amount credited the department for water furnished to Charitable Institutions.....	2,196 00
Add the amount appropriated by City Council, and credited the department for water furnished the various departments.....	12,000 00
	<hr/>
Making the yearly revenue for water.....	\$102,888 18

TURN ON AND SHUT OFF RECORD

Nine hundred seventy-six (976) orders have been issued for turning on water and removing seals from fixtures.

Eleven hundred ninety-five (1195) orders have been issued for shutting off water on account of vacancies and seals applied to fixtures at the request of owners.

NON-PAYMENT OF WATER RATES

It has been necessary to shut off water for the non-payment of rates at two dwellings.

Water rates to the amount of \$2,691.62 have been paid in advance of April 1, 1914.

The following amounts represent the valuation of water furnished the city departments:

Incidental Account.....	\$ 921 00
School Department.....	1,610 25
Highway Department.....	1,312 50
Fire Department.....	7,651 50
Pauper Department.....	204 50
Sewer Department.....	400 90
Water Department.....	117 00
Electric Department.....	62 00
Police Department.....	111 00
Park Department.....	350 00

There were 55 new water services installed during the past year, and the fixtures connected therewith amount to \$3,659.50 classed as follows:

140 sinks	1 lawn fountain
307 water closets	11 steam boilers
123 bath tubs	1 elevator
238 wash bowls	1 motor
90 set wash trays	15 slop hoppers
18 cellar faucets	37 urinals
6 Counter faucets	2 bottle washers
46 plain faucets	2 chair bowls
12 stable faucets for	3 glass washers
25 horses and 11 cows	1 window spray
5 shower baths	1 rinse tank
104 sill faucets	1 baptismal tank

The Inspector, Mr. Cornelius O'Brien, has reported as having inspected the fixtures at 7293 places and places of business. This is the largest inspection record ever made for this department. He was unable to gain admittance at 211 dwellings and business premises.

The revenue from the number of fixtures returned by the Inspector, which had not otherwise been reported amount to

\$128.00. There were 33 premises reported where leaking fixtures were found, notices of same was sent to the respective owners and repairs promptly made.

The collecting department wishes to express its approval of the recent order, wherein, all water rates shall be paid by the property owners.

When the Department approves of a method whereby the bills will be sent direct to all property owners, it will be a benefit to both the customer and the collecting department.

YEARLY REVENUE

Statement of the yearly revenue received from water service since the introduction of the Water Works in 1875:

From introduction to March 14, 1877.....	\$ 7,198 55
From March 14, 1877, to March 14, 1878.....	11,835 75
From March 14, 1878, to March 14, 1879.....	20,269 50
From March 14, 1879, to March 1, 1880.....	20,970 50
From March 1, 1880, to March 8, 1881.....	23,133 00
From March 8, 1881, to March 15, 1882.....	26,014 00
From March 15, 1882, to March 14, 1883.....	26,408 00
From March 14, 1883, to March 14, 1884.....	26,947 61
From March 14, 1884, to March 14, 1885.....	28,052 00
From March 14, 1885, to March 16, 1886.....	35,875 75
From March 16, 1886, to March 16, 1887.....	33,465 75

Report of the Chief Engineer

Bangor, Maine, Mar. 1st, 1914.

To the Bangor Water Board:—

Gentlemen:—I beg to submit the following report:

The amount of water which has been pumped during the past year is as follows:

1913	Gallons
March.....	119,819,500
April.....	107,979,300
May.....	111,964,100
June.....	116,608,200
July.....	123,601,500
August.....	131,451,600
September.....	114,005,400
October.....	117,193,900
November.....	109,203,200
December.....	115,057,800
1914	
January	144,546,500
February.....	140,576,600
Total.....	1,452,007,600

This shows the January and February pumping to average daily practically one million gallons more than the fall months, which indicates much waste. The smallest amount of water pumped in one day was 3,145,325 gallons, April 6th. The largest 6,549,855 gallons February 13th.

The steam pump was used November 22nd, while the flumes were being cleaned, there being considerable bark, dead logs

and such in them. It was used again December 15th as anchor ice was causing trouble.

In July the Union Iron Works took out the old horizontal tubular boiler and replaced it with a new one, which has been inspected and allowed 150 lbs. pressure and could be used in connection with the water tube boiler if necessary.

In June it was necessary to renew the cogs in the mortised rim on the shafting in electric wheel room, which leads to the centrifugal pumps. In August we replaced a pair of bevel gears on the flume, and removed the cogs in mortised gear in wheel house, which transmits the power to centrifugal pump. On February 13th while pumping at a rate of seven and one-fourth millions to filters; this same gear was stripped and bridge-tree broken, which necessitated using steam to pump to filters while repairs were being made.

In October the Dean power pump was thoroughly overhauled, the valves all taken out, examined, and replaced with new valves and springs where it was deemed necessary.

Other repairs have been only such as are chargeable to ordinary wear and tear of machinery in constant use.

In closing, I wish to thank His Honor, the Mayor, the Water Board, the Superintendent, and all those connected with the department in any way for their many courtesies shown during the year.

Respectfully submitted,

J. W. DOUGHERTY, Chief Engineer.

REPORT OF
The Chemist and Bacteriologist

TROY, N. Y., March 12th, 1914.

The Honorable, The Bangor Water Board, Bangor, Maine:

GENTLEMEN:—Permit me to submit a review of the operation of the Filter Plant for the year ending February 28th, 1914.

The new filter plant has been in continuous operation since Feb. 6th, 1911 and originally consisted of six filter units, which was increased in 1912, by the equipment of the two blank units, so that at the present time the total sand area is 3,407 sq. ft.

The sand in the filters has an effective size of from .55 to .59 mm. and a uniformity coefficient of 1.25 to 1.74.

The rated capacity of this plant is 8,000,000 gallons per day but this rate can be greatly exceeded for short periods.

There has been no trouble from mechanical causes since this plant was placed in operation.

During extreme cold weather there was a little trouble due to the formation of ice in the back of the beds, but this has been entirely overcome by reducing the head of water on the beds, so that the air may circulate under the filter decks.

The water supply has been obtained from the Penobscot River since 1876, at which time the original pumps were placed in operation.

The Penobscot River has a drainage area of about 7,700 square miles above the water works intake. There is some pollution due to sewage from several localities, waste from the pulp mills and drainage from several farms.

Table Showing Water Filtered, Bangor, Me.

Year	Filtered	
1909-10.....	1,392,824,000	gallons
1910-11.....	1,453,981,000	" 4.3% inc.
1911-12.....	1,507,773,000	" 3.7% inc.
1912-13.....	1,443,578,000	" 4.1% dec.
1913-14.....	1,505,350,000	" 4.3% inc.

The average amount of water filtered during the past year was about 4,124,000 gallons per day.

Table showing water delivered to consumers, Bangor, Me.

Year	Delivered	
1909-10.....	1,252,864,000	gallons
1910-11.....	1,337,725,000	" 6.7% inc.
1911-12.....	1,492,563,000	" 11.5% inc.
1912-13.....	1,387,730,000	" 7.1% dec.
1913-14.....	1,451,986,000	" 4.6% inc.

The large increase in the consumption during 1911-12, the first year the new filters were in operation, would indicate that the quality of the water was satisfactory to the consumers and was more generally used.

The average amount of water delivered to the consumers was 3,978,000 gallons per day. As the population is about 25,000 it is seen that the per capita consumption is about 159 gallons per day which is excessive.

The general operating results of the plant will be found, by months, in the following table:

Some idea of the quality of the water may be gained from these results, and it is seen that it is a very difficult water to properly treat.

During the year 3754 filters were washed, an average of 10.2 filters per day. In washing the filters 98,562,580 gallons of water were used or 6.54% of the water filtered. The average amount of water required to wash one filter unit being 26,255 gallons.

The bacterial efficiency of the plant for the past five years is shown in the following table, these results cover a period of two years (1909-11) with the old filters and three years of the new filters. The results show a marked increase in efficiency.

	Year	Year*	Year	Year	Year†
Bacteria removed by	1909-10	1910-11	1911-12	1912-13	1913-14
Basins	62.21%	79.00%	82.66%	86.09%	88.14%
Filters.....	57.47%	53.40%	88.25%	91.24%	88.96%
Plant.....	85.63%	90.28%	97.97%	98.79%	98.67%
Total River to City Tap....	89.86%	90.71%	98.67%	99.01%	98.86%
Removed in Mains.....	29.50%	00.84%	19.41%	18.75%	12.50%

*Calcium hypo-chlorite used three months during 1910-11.

†Calcium hypo-chlorite used two months during 1913-14.

The average amount of calcium hypo-chlorite used was about 14 pounds per million gallons.

The unfiltered water always contains a high color, very little turbidity and a low alkalinity. The bacterial content varies considerably, the "intestinal bacillus" B. Coli-communis is always present.

Table showing range in COLOR in parts per million, Unfiltered Water, Bangor, Me.

Color in parts per million	Year 1909-10 Days	Year 1910-11 Days	Year 1911-12 Days	Year 1912-13 Days	Year 1913-14 Days	Avg. 5 yrs. Days
0-20	0.	0.	0.	0.	0.	0.
21-30	0.	0.	0.	0.	0.	0.
31-40	0.	0.	0.	0.	0.	0.
41-50	27.	127.	140.	95.	123.	102.
51-60	43.	180.	148.	130.	152.	131.
61-70	150.	57.	63.	41.	32.	69.
71-80	72.	0.	14.	52.	15.	31.
Over 80	71.	0.	1.	48.	43.	33.

The color of the unfiltered water was above 80 parts per million on 43 days or 11.7% of the time.

Table showing COLOR, in parts per million, Unfiltered Water Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	145.0	45.0	71.0
1910-11.....	80.0	45.0	55.7
1911-12.....	88.0	45.0	56.0
1912-13.....	135.0	45.0	66.0
1913-14.....	120.0	45.0	59.7
Avg. 5 yrs.....	117.6	45.0	61.7

The average color of the unfiltered water was 9.55% less than in the previous year, while the minimum color has never been below 45 parts per million during the past five years.

Table showing range in TURBIDITY in parts per million, Unfiltered Water, Bangor, Me.

Turbidity parts per million	Year 1909-10 Days	Year 1910-11 Days	Year 1911-12 Days	Year 1912-13 Days	Year 1913-14 Days	Avg. 5 yrs. Days

Over 50	0.	0.	0.	0.	0.	0.

During the past year the unfiltered water was free from turbidity on 322 days or 88.2% of the time.

Table showing TURBIDITY, in parts per million, Unfiltered Water, Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	50.0	0.0	2.39
1910-11.....	40.0	0.0	.37
1911-12.....	19.0	0.0	.68
1912-13.....	20.0	0.0	.89
1913-14.....	15.0	0.0	.44
Avg. 5 yrs.....	28.8	0.0	.96

The maximum turbidity of the unfiltered water has not exceeded 50 parts per million, during the past five years, while the average has been less than 1 part per million.

Table showing range in ALKALINITY, in parts per million, Unfiltered Water, Bangor, Me.

Alkalinity parts per million	Year 1909-10 Days	Year 1910-11 Days	Year 1911-12 Days	Year 1912-13 Days	Year 1913-14 Days	Avg. 5 yrs. Days
0-5	5.	0.	0.	0.	0.	1.
6-10	305.	195.	82.	117.	182.	176.
11-15	54.	162.	250.	247.	183.	179.
16-20	0.	8.	32.	0.	0.	8.
Over 20	0.	0.	1.	0.	0.	1.

The alkalinity of the unfiltered water was 10 parts per million or less on 182 days or 49.9% of the time. The alkalinity was below 16 parts per million during the entire year.

Table showing ALKALINITY, in parts per million, Unfiltered Water, Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	14.0	4.0	8.8
1910-11.....	17.0	8.0	11.4
1911-12.....	21.0	6.0	12.5
1912-13.....	15.0	7.0	11.3
1913-14.....	15.0	8.0	10.9
Avg. 5 yrs.....	16.4	6.6	10.9

The average alkalinity of the unfiltered water was 8.4% less than during the previous year.

Owing to the low alkalinity of the unfiltered water it is necessary to add lime in order to get proper coagulation.

Table showing range of BACTERIA, per c. c., Unfiltered Water, Bangor, Me.

Bacteria per c. c.	Year 1909-10 Days	Year 1910-11 Days	Year 1911-12 Days	Year 1912-13 Days	Year 1913-14 Days	Avg. 5 yrs. Days

10001-15000	6.	0.	4.	0.	2.	2.
Over 15000	1.	0.	0.	0.	0.	1.

The bacteria per c. c. in the unfiltered water were above 10,000 on 2 days during the entire year and below 1001 on one day only.

Table showing BACTERIA, per c. c., Unfiltered Water, Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	15,750.	86.	1,725.
1910-11.....	6,050.	150.	2,452.
1911-12.....	11,600.	1,400.	3,286.
1912-13.....	7,800.	1,000.	2,624.
1913-14.....	11,000.	1,000.	3,051.
Avg. 5 yrs.....	10,440.	727.	2,573.

The maximum number of bacteria in the unfiltered water was 41.0% greater than during the previous year, while the average was 16.2% greater.

Table showing tests for B. COLI-COMMUNIS, in 1 c. c. samples, Unfiltered Water, Bangor, Me.

Year	Samples examined	Positive	Percent positive
1909-10.....	1042.	644.	61.9%
1910-11.....	1041.	795.	76.4%
1911-12.....	1045.	921.	88.1%
1912-13.....	1002.	862.	86.0%
1913-14.....	1056.	921.	87.2%
	<hr/>	<hr/>	<hr/>
Avg. 5 yrs.....	1037.	829.	79.9%

B. Coli-communis was present in 1.3% more of the samples of the unfiltered water than during the previous year.

The results seem to indicate that the pollution in the river is increasing.

A mineral analysis is made every month, the results show a slight increase in the mineral content of the unfiltered water.

A complete sanitary examination of the unfiltered water is made every week, the results averaged by months will be found in the following tables:

It is to be noted that the chlorine and albuminoid ammonia content shows an increase.

The unfiltered water is pumped to the coagulation basin, which has two compartments, the combined capacity being 1,500,000 gallons.

Before the water enters the basins, the coagulants, sulphate of alumina and lime water are added. The addition of the lime water is necessary owing to the low alkalinity of the unfiltered water.

The sulphate of alumina is purchased on specifications, the requirements being as follows:

Alumina (Al_2O_3) not less than.....	17.50%
Acid (SO_3) not more than.....	37.50%
Iron (Fe_2O_3) not more than.....	.40%
Water (H_2O) not more than.....	47.00%
Insoluble matter, not more than.....	.25%

It is understood that if the Alumina (Al_2O_3) is over 17.50% the Sulphates (SO_3) and Iron (Fe_2O_3) may be increased in proportion.

If the results of the analyses show the Alumina (Al_2O_3) to be below 17.5% and above 17.0% a deduction of eight cents per hundred pounds shall be made. If the Alumina (Al_2O_3) is below 17.0% and above 16.5% a deduction of fifteen cents per hundred pounds shall be made.

For each 25% or fraction thereof of Iron (Fe_2O_3) above .40% a reduction of five cents per hundred pounds shall be made.

The sulphate of alumina shall not contain any free acid.

Table showing the percentage Composition of the various

shipments of sulphate of alumina used during the year, Bangor, Me.

Date	Alumina (Al ₂ O ₃)	Iron (Fe ₂ O ₃)	Acid (SO ₃)	Water (H ₂ O)	Insoluble
1913					
April.....	18.02%	.32%	40.93%	40.68%	.05%
May.....	17.52%	.28%	40.40%	41.71%	.09%
June.....	17.82%	.28%	40.25%	41.57%	.08%
July.....	17.50%	.24%	40.37%	41.76%	.13%

December....	17.78%	.42%	40.63%	41.08%	.09%
Jan., 1914....	17.92%	.53%	39.70%	41.75%	.10%
February.....	17.82%	.39%	40.00%	41.65%	.14%
Average..	17.82%	.37%	40.40%	41.32%	.09%

The above sulphate of alumina was furnished by the Pennsylvania Salt Mfg. Co., Philadelphia, Penna.

Table showing the average composition of sulphate of alumina used, Bangor, Me.

Year	Alumina	Iron	Acid	Water	Insoluble
1909-10.....	16.96%	1.98%	39.50%	41.18%	.10%
1910-11.....	18.18%	.82%	39.30%	41.06%	.09%
1911-12.....	17.75%	.32%	40.19%	41.36%	.16%
1912-13.....	18.49%	.37%	40.83%	40.97%	.10%
1913-14.....	17.82%	.37%	40.40%	41.32%	.09%

Since the sulphate of alumina has been purchased on specifications the composition has been more uniform and the salt has contained a high amount of alumina and small amount of iron.

Table showing average amount of sulphate of alumina and lime used, in grains per gallon, Bangor, Me.

Year	Alumina	Lime
1909-10.....	1.57	.31
1910-11.....	1.43	.23
1911-12.....	2.03	.17
1912-13.....	2.05	.14
1913-14.....	1.95	.18

During the past year the average amount of sulphate of alumina used decreased .10 grains per gallon, equal to about 14 pounds per million gallons.

The average amount of lime used increased .04 grains per gallon an increase of about 5.6 pounds per million gallons.

The coagulation basins remove a large percentage of the bacteria, and are of great value to the plant.

Table showing bacteria removed by coagulation basins, Bangor, Me.

Year	Removed
1909-10.....	66.21%
1910-11.....	79.04%
1911-12.....	82.66%
1912-13.....	88.64%
1913-14.....	88.14%

Mixing baffles were installed in 1911, after which the efficiency of the basins improved.

Table showing range of BACTERIA per c. c., coagulated water, Bangor, Me.

Bacteria per c. c.	Year 1909-10 Days	Year 1910-11 Days	Year 1911-12 Days	Year 1912-13 Days	Year 1913-14 Days	Avg. 5 yrs. Days
0-25	33.	0.	0.	0.	0.	6.
26-50	26.	0.	0.	0.	0.	5.
51-75	22.	1.	0.	0.	0.	5.
76-100	17.	24.	0.	2.	1.	9.
101-250	62.	78.	20.	129.	110.	80.
251-500	69.	114.	186.	168.	201.	148.
501-1000	51.	118.	111.	54.	44.	76.
1001-2500	47.	25.	17.	9.	9.	21.
2501-5000	10.	2.	2.	0.	0.	3.
Over 5000	3.	0.	0.	0.	0.	1.

The water passing the coagulation basin contained less than 1001 bacteria per c. c. on 356 days or 97.6% of the time.

During two months of the past year calcium hypo-chlorite was added to the water before it entered the coagulation basins, the average amount used being .10 grains per gallon or 14 pounds per million gallons.

Table showing BACTERIA, per c. c. in the water after passing the coagulation basins, Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	5,700.	4.	583.
1910-11.....	3,100.	75.	515.
1911-12.....	5,000.	185.	570.
1912-13.....	1,300.	100.	365.
1913-14.....	1,400.	100.	362.
Avg. 5 yrs.....	3,300.	93.	479.

The average number of bacteria per c. c. passing the basins was about the same as in the previous year, notwithstanding the bacteria increased 16.2% in the untreated water.

The new Filter Plant still continues to produce satisfactory water and has given no trouble in operation.

A mineral analysis of the filtered water is made every month the results of which will be found in the following table:

A sanitary analysis of the filtered water is made every week, the average results will be found in the following sheet:

These results show that the iron in the filtered water is .08 parts per million, which is 38.5% less than in the filtered water.

This amount of iron supports a growth of crenothrix in the mains and it is necessary to flush the mains at frequent intervals in order to maintain a water that is satisfactory in appearance.

The method of operation will be slightly changed during the coming year and an attempt will be made to reduce the amount of iron in the filtered water to a greater extent.

Compared with the previous year, there is an increase in the chlorine, albuminoid ammonia and carbonic acid contents.

Carbonic acid is also favorable to the growth of crenothrix.

The improved quality of the filtered water is best seen by a study of the results in detail.

Table showing range in ALKALINITY, in parts per million, Filtered Water, Bangor, Me.

Alkalinity parts per million	Year	Year	Year	Year	Year	Avg. 5 yrs. Days
	1909-10 Days	1910-11 Days	1911-12 Days	1912-13 Days	1913-14 Days	
0-5	358.	291.	331.	365.	362.	341.
6-10	6.	73.	34.	0.	3.	23.
11-15	0.	1.	0.	0.	0.	1.
Over 15	0.	0.	0.	0.	0.	0.

The alkalinity of the filtered water was below 6 parts per million on 362 days or 99.4% of the time.

The alkalinity of the filtered water is never allowed to fall below 3 parts per million.

During the coming year the alkalinity of the filtered water will be maintained a little higher than in the past.

Table showing ALKALINITY, in parts per million, Filtered Water, Bangor, Me.

Year	Maximum	Minimum	Average
1909-10.....	7.0	1.0	3.1
1910-11.....	12.0	3.0	4.6
1911-12.....	9.0	3.0	4.1

Avg. 5 yrs.....	1039.	13.	1.24%

The B. Coli-communis is also reduced in passing through the mains.

Table showing reduction in B. COLI-COMMUNIS, in passing mains, Bangor, Me.

	Percent removed
1909-10.....	78.7%
1910-11.....	56.3%
1911-12.....	77.5%
1912-13.....	89.9%
1913-14.....	75.2%
Avg. 5 yrs.....	75.5%

The reduction in B. Coli-communis is greater than that of the general bacteria.

The results, in detail, of the weekly sanitary examinations of the unfiltered, filtered and city tap water will be found annexed.

The old concrete sulphate of alumina tanks have been relined and make a duplicate system available in case of accident.

The operation of the plant is in charge of Mr. A. C. Powell, resident chemist and bacteriologist.

During the year a 10,000,000 gallon low lift filter supply pump should be installed. The present pumps have been in operation about 19 years and were not designed to discharge water to the elevation of the coagulation basins, therefore, at times it is not possible to obtain sufficient water to supply the city and wash water for the filters.

The new pump should be designed to deliver 10,000,000 gallons against a total head of 30 feet, and be equipped so that it could be operated by three powers, i. e. water, steam and electricity and in this case it would seem impossible to have any interruption in service.

At a future date it would be well to install meters on the force mains leaving the pumping station, in this way it would be possible to learn the efficiency of the various pumps at all times.

The water that is delivered to the filters is measured, but the water delivered to the city is not.

Bangor is the only city for some miles which has good hospital facilities, therefore a large number of typhoid fever cases are brought in from the surrounding country, and add to the typhoid fever death rate.

Table showing total deaths from typhoid fever, death rate per 100,000 population, and deaths from imported cases, Bangor, Me.

Year	Total	Rate	Imported	City
1892	21.	109.9	2.	19.
1893	12.	62.8	3.	9.
1894	25.	130.9	1.	24.
1895	13.	68.1	1.	11.
1896	8.	38.6	1.	7.
1897	8.	38.0	0.	8.
1898	7.	32.9	2.	5.
1899	15.	69.5	1.	14.
1900	4.	18.3	3.	1.
1901	24.	108.5	3.	21.
1902	7.	31.2	missing	7.
1903	10.	44.1	7.	3.
1904	39.	169.9	3.	36.
1905	17.	73.2	4.	13.
1906	10.	42.6	5.	5.
1907	7.	29.4	5.	2.
1908	7.	29.0	3.	4.
1909	9.	27.0	6.	3.
1910	8.	23.3	6.	2.
1911	21.	83.7	10.	11.
1912	7.	27.5	5.	2.
	<hr/> 279.	<hr/> 60.7	<hr/> 72.	<hr/> 202.

These figures show that the average typhoid fever death rate per 100,000 during 21 years was 60.7, the total number of deaths being 279 and that 72 or 25.8% of this death rate was due to imported cases.

During the year 1904 there was a typhoid fever epidemic due to typhoid fever at Millinocket, 84 miles above, on the river. In this year there were 39 deaths in Bangor, only three of which were imported. Up to this time the filter plant had been operated without any coagulants.

During the year 1909, there were 42 cases of typhoid fever, all of which claimed to have used the water from the well at Longfellow School. When this well was closed the typhoid ceased.

The original filter plant was installed in 1896 and operated without any coagulants until late in 1905.

For the five years (1892-1896) there were a total of 79 deaths from typhoid fever, 9 or 11.4% were imported. The average total deaths for that period were 15.8, imported 1.8, local 14.0

The original Warren filters were installed in 1896, and operated for 9 years without any coagulants.

For the nine years (1897-1905) there were a total of 131 deaths from typhoid fever, 23 or 17.5% were imported. The average total deaths for that period was 14.6, imported 2.6, local 12.0.

A coagulant was first used in connection with the filters late in 1905, before the settling basins were installed.

For the three years (1906-1908) there were a total of 24 deaths from typhoid fever 13 or 54.2% were imported. The average total deaths for that period was 8.0, imported 4.3, local 3.7.

The coagulation basin was placed in operation in 1908 and operated two years before the new filters were installed.

For the two years (1909-1910) there were a total of 17 deaths from typhoid fever, 12 or 70.6% were imported. The average total was 8.5, imported 6.0, local 2.5.

The results are only available for two years since the new filter plant was installed.

For the two years (1911-1912) there was a total of 28 deaths from typhoid fever, 15 or 53.5% were imported. The average total was 14, imported 7.5, local 6.5.

The improvement to the water supply began when the coagulant was used in 1905.

For the fourteen years before the coagulant was used there were a total of 210 deaths from typhoid fever, 32 of which were due to imported cases, leaving 178 of local origin. The average for this period is total 14.9, imported 2.3 local 12.6.

For the seven years that the coagulant has been used there were a total of 69 deaths from typhoid fever, 40 of which were due to imported cases, leaving 29 of local origin. The average for this period is, total 9.8, imported 5.7, local 4.1.

Since the coagulant has been used in connection with the filters there has been a reduction of 67.5% in the local deaths from typhoid fever, this does not take into consideration the increase in population during that period.

It is not the intention to convey the idea that the water was the cause of the typhoid fever, there are many other means of contracting the disease. A pure water can only prevent that typhoid which was formerly due to impure water.

Permit me to express my appreciation of the interest taken by the members of the Water Board in all matters which have been considered.

The numerous courtesies extended by all of the employees of the department has been greatly appreciated.

Respectfully submitted,

JAMES M. CAIRD.

WATER RATES

DWELLING HOUSES

- For faucet to be used by a single family, \$5.00.
- For each additional faucet to be used by the same family, \$2.00.
- Where a house is occupied by more than one family, and one faucet being used by all; for each family \$5.00.
- For first water closet, \$3.00.
- For each additional water closet, \$1.00.
- Where one water closet is used by two or more families in one house, each family, \$3.00.
- For first bath tub, \$3.00.
- For each additional bath tub, \$1.00.
- Where one bath tub is used by two or more families in one house, each family, \$3.00.
- For the first two wash bowls, each \$1.00.
- For each additional wash bowl, 50 cents.
- For set wash tubs, each \$1.00.
- For faucet in cellar for furnace use, each \$1.00.

HOTELS AND BOARDING HOUSES

- For sink faucet, \$8.00 to \$40.00.
- For each wash bowl, \$5.00.
- For each water closet, \$5.00.
- For each urinal, \$5.00.
- For each bath tub, \$5.00.
- For each wash bowl in private rooms, \$3.00.
- For each water closet in private rooms, \$2.00.
- For each bath tub in private rooms, \$3.00.

BUILDINGS**For Buildings Used for Offices**

For each office in which there is a faucet, \$3.00.

For each water closet in same office, \$2.00.

Where the faucet is so located as to be used by occupants of another office, an additional \$2.00.

Where the water closet is so located as to be used by occupants of another office, an additional \$2.00.

Barber Shops

First chair, \$5.00.

For each additional chair, \$1.00.

Photograph Galleries

First sink faucet, \$8.00 to \$10.00.

For each additional faucet, \$2.00..

For each wash bowl, \$3.00.

For each water closet, \$2.00.

STORES

For each tenement used as store or warehouse, in which there is one faucet, \$5.00.

For each additional faucet, \$2.00.

For first water closet, \$5.00.

For each additional water closet, \$2.00.

For each urinal, \$3.00.

Soda fountain glass washer, for the season, \$5.00.

MEAT AND FISH MARKETS

For each store or stall used for vending meat or fish for first faucet, \$8.00 to \$15.00.

For each additional faucet, \$5.00.

PUBLIC HALLS, SOCIETY HALLS, BILLIARD HALLS, ETC.

- For first sink faucet, \$5.00.
- For each additional sink faucet, \$2.00.
- For first water closet, \$5.00.
- For each additional water closet, \$2.00.
- For each urinal, \$3.00.
- For each wash bowl, \$3.00.

SALOONS AND EATING HOUSES

- For each saloon or eating house wherein the food consumed is cooked, for first faucet, \$8.00 to \$12.00.
- For each additional sink faucet, \$5.00.
- For each bath faucet, \$5.00.
- For each wash bowl, \$3.00.
- For first water closet, \$5.00.
- For each additional water closet, \$2.00.
- For each urinal, \$5.00.
- For each faucet for washing bottles, \$10.00.

PRIVATE STABLES

- For private stables, including water for washing carriages for one horse, \$5.00.
- For each additional horse, \$1.50.
- For one cow, \$2.00.
- For each additional cow, \$1.00.
- Truckmen's stables shall be charged for one horse, \$3.00.
- For each additional horse, \$1.00.

LIVERY STABLES

- For livery stables, for one horse, including washing carriages, \$6.00 to \$10.00.
- For each additional horse, \$1.50.

HOSE

Free for extinguishing fires.

For washing windows and sprinkling streets, \$3.00 to \$6.00.

For sprinkling lawns and gardens, \$2.00 to \$10.00.

PRINTING HOUSES

For ordinary purposes, including washing types, for each press,
\$10.00 to \$25.00.

STEAM ENGINES

Stationary steam engines working not over ten hours per day,
per H. P., \$4.00.

BUILDING PURPOSES

Special rate made.

METER RATES

Meter rates for water for other than domestic use are hereby established at five and one-half cents per one hundred cubic feet, but the minimum charge for water under meter rates shall not be less than as follows: For elevators and motors, \$6.00 per quarter; for all other uses, \$2.00 per quarter.

The term "domestic use" is hereby construed to include the use of water in private residences, public and private offices, stores, shops, and other business places where no water is used except for wash bowls and closets.

If a meter gets out of order and fails to register, the consumer will be charged at the average daily consumption as shown by the meter when in order.

All water that passes through a meter will be charged for, whether used or wasted.

This amendment to take effect on approval of City Council.

CITY ORDINANCE
RELATING TO
Bangor Water Works

Section 1. It shall be the duty of the water board of said city to cause all the hydrants connected with the water works to be examined as often as necessary to see if they are in good order, to keep them during the winter free from snow and ice, and to have them at all times in good condition for use.

Sec. 2. No person, unless authorized by said board, shall open any fire hydrant, nor remove any cap thereof, nor fasten any horse or team to or in front thereof or in any way obstruct free access to and use thereof, nor deposit any dirt or other material in any public or private shop, gate, box or stop, or in any manner commit any act tending to obstruct the use of any hydrant, gate or valve. Provided, however, in cases of fire the hydrants shall be for the time being under the entire control of the chief engineer of the fire department, who, after each fire, shall cause each hydrant used to be left in good condition for immediate use. Said engineer, may also, after having given notice to said board of his intention so to do, use said hydrants to fill the reservoirs of said city.

Sec. 3. Any person desiring a supply of water shall make application in writing to said board, stating for what use it is wanted, the location in which it is desired, and as near as may be the extent of its use.

All applications must be made by, or with the assent of the owner or agent of the premises, by whom all rates shall be paid.

Sec. 4. All pipes, valves and fixtures must be capable of sustaining a pressure of at least two hundred pounds to the square inch; and the plumber's work must be examined and tested by the superintendent of said board before the water is finally turned on.

Sec. 5. Said board will furnish and lay a service pipe from the street main to the outer edge of the sidewalk, and furnish and place at said edge of the sidewalk a stop valve and box, and shall thereafter maintain and keep it in good order and the same shall at all times be completely subject to the control of said board. No pipe shall be connected with the city service pipe, nor shall water be turned on at any time until a permit is issued therefor. All connection with main pipes shall be made by a person appointed for that service by said board.

Sec. 6. Said board is authorized to appoint an inspector of said works and define his duties. Said inspector shall at all times, when on duty, wear in a conspicuous place on his clothing, a badge furnished by the water board. He shall at all proper and reasonable time have access to, and be permitted to inspect pipes, fixtures and apparatus supplied with water, and may control the location and use of the stop and waste cock in the cellar of the building, or in whatever location it may be placed, as the interests of the city may require. It shall be the duty of the inspector of water, to inspect as often as possible the fixtures of all water takers, see that they are tight and kept in good condition. He shall notify all users of water of any waste he may discover, or of faulty plumbing, if any, and the parties so notified shall at once cause the defect to be remedied. A second notice for the same cause from the inspector shall cause a fine of one dollar to be imposed upon the

offender. A third offense for the same cause shall subject the offender to a fine of five dollars, or the shutting off of the water from his or her premises, or both, as the majority of the water board present at any meeting duly called shall elect. Any refusal to pay such fine shall be sufficient cause for shutting off the water, which shall not be turned on again until such fine is paid.

It shall be the duty of the inspector to report all irregularities under these rules to the clerk of the water board, who shall make note of the same and report to the superintendent and to the water board at their next meeting.

Sec. 7. Water will in no instance be turned on until the plumbing has been examined and approved by the superintendent of said board or reported safely and well completed in all its parts to sustain a pressure of two hundred pounds to the square inch, by a plumber licensed by the board, and approved by the superintendent; and every plumber who shall set up any pipes, fixtures or apparatus for the use of water, or shall make repairs upon or additions to those already set up, shall report to said board within two days of the completion thereof the nature of the repairs or additions which have been made to the work heretofore existing.

Sec. 8. All persons supplied with water shall keep the cocks, pipes and fixtures in good repair and protected from frost. No continuous flow to guard against freezing or for other causes will be allowed, but by special permit of said board, and by paying extra rates therefor; and no leak shall be suffered to exist in any pipe, fixture or attachment.

Sec. 9. An unnecessary use or waste of water, or allowing it to be used by parties, or for purposes not specified in the application, will subject the offender to an immediate stoppage of the water, and the payment of not less than double the rates for the quantities thus used, or wasted, as estimated by the

superintendent. And when water has been turned off from any premises for any reason above stated, or for any defect in the plumbing, the sum of one dollar will be charged for turning on.

Sec. 10. Said board may cause a meter to be attached to any premises where they have reason to believe that an unnecessary or fraudulent use of water is being made, and may assess rates upon such premises thereby. Meter rates for other than for domestic uses are hereby established at five and one-half cents per hundred cubic feet.

Sec. 11. Water supplies for hydraulic power or in large quantities for special use, will be subject to such restrictions as said board may impose; and no meter shall be put in use without the consent of said board.

Sec. 12. Each builder or superintendent of building using city water, shall, on the first day of each month, return to said board at their office, a full and true account of all water used by him during the month previous, and he shall at that time pay for the water so used.

Sec. 13. All the water rates, except for building purposes, meter rates, lawn and street sprinklers, shall be due and payable at the office of said board, quarterly in advance, on the first day each of January, April, July and October. Meter rates will be due and payable at the same place on the first day of the succeeding quarter, and rates for garden, lawn and street sprinklers will be due and payable in advance at said office on the first day of April and July of each year. The amount of each rate remaining unpaid twenty days after it is due, will be increased ten per cent; and one per cent per month interest on the original amount due will be charged in addition therefor, until paid, together with costs of collection.

Sec. 14. Not more than twenty-five per cent discount will be made from regular rates when supplies of water are

taken by special permit from yard fixtures, or from sources without the premises; and in no case shall such supplies be taken from fire hydrants.

Sec. 15. Said board reserves the right to shut off water for the purposes of making extensions, alterations or necessary repairs. And they will shut off water from premises when the users shall disregard the rules for its supply, neglect to pay the rates therefor promptly, or shall sell or permit any unauthorized use of water. Any person receiving water through a stop in common with another person, will be liable to have his supply shut off in consequence of the violation of the rules by the other person or party.

Sec. 16. The regular rates for fountains and jets will be based upon their use for six hours per day for one hundred days in the year, or equivalent to that time; and shall not exceed in size in locations not over one hundred feet above the pumping house floor, three-sixteenths of an inch in diameter. And for floor localities not over one hundred and fifty feet above said floor, one-fourth of an inch in diameter; and in no case over three-eighths of an inch in diameter.

Sec. 17. The regular rates for street and garden sprinklers and for yard and lawn hydrants, will be based upon their use for one hour per day for ninety days in the year; and are not to be used to the inconvenience or injury of persons passing in the streets, and only at such hours as said board may direct. Yard and garden hydrants must not be converted into jets; and neither the sprinklers or hydrants are to be used for wetting other premises than the ones defined in the application without permission of said board, and payment for said additional use. The size of the stream permitted in all case be fixed by the board and the increasing of the size by the user shall be sufficient cause for turning off of the water. The board may designate the hours during which the sprinklers

or hydrants may be used. Their use while a fire is raging is positively forbidden, except in case of danger of the premises from fire.

Sec. 18. All valves for water closets and urinals must be self-closing, and are to be submitted to and approved by the superintendent of the board. Tanks receiving water direct from the mains are to be fitted with approval self-acting float valves.

Sec. 19. Any person who shall violate any of the provisions of this ordinance, shall forfeit and pay the sum of not less than one nor more than thirty dollars, to be recovered by action of debt in the name of the city treasurer for the use of the city or by complaint for the use of the city before the municipal court, or any other court that may hereafter have jurisdiction of the same.

PLUMBING

Sec. 1. No plumbing shall hereafter be done on any pipes or fixtures for the use of water from the city water works, unless by a plumber licensed by the water board of said city. Said board are authorized to grant and revoke licenses.

Sec. 2. Every plumber who shall set up any pipes or fixtures for the use of water from said city water works, or shall make repairs upon, additions to, or alterations of any pipes or fixtures set up previous thereto, shall, between the first and tenth day of the succeeding month, fill up and return to said board a report, stating particularly what new pipes and fixtures he has set up the previous month, and what repairs, additions and alterations he has made upon or to those previously set up.

Sec. 3. For every misrepresentation or omission in the report of the work done, said plumber shall be liable to have his license revoked by said board, and to pay a fine of not less than five nor more than twenty dollars, to be recovered in an action of debt in the name of the city treasurer, before the municipal court of said city.

Sec. 4. If any plumber or person not duly licensed, shall set up any pipes or fixtures for the use of water from the water works of said city, or make any repairs upon, additions to, or alterations of any pipes or fixtures previously thereto set up, he shall forfeit and pay a sum not less than five nor more than twenty dollars, to be recovered by complaint, or in an action of debt in the name of the city treasurer, before the municipal court of said city.

Report of Milk Inspector

BANGOR, March 2nd, 1914.

To His Honor the Mayor, and City Council:

I herewith submit my annual report as Milk Inspector for the City of Bangor, for the year ending in March, 1914.

In looking over annual reports of officials having supervision of the handling and sale of dairy products in cities and towns in our own state and other sections of the country, and from observations during inspection of premises, and of methods employed, and habits of people connected with, and carrying on the business, I am led to the belief that the chief and most common fact to be found with milk supplies, is too much dirt, other faults being of secondary consideration in comparison.

Reports published in the quarterly bulletins of the Agricultural Department of the State of Maine during the past year show that 36 samples have been taken from the wagons of Bangor milkmen for analyses; two of said samples were found to have been dirty, and four slightly dirty. The result of the analyses would indicate that only one-sixth of the samples contain dirt to a greater or less degree; one sample was found to have been watered, and one sample had been skimmed; three samples were below standard in solids, not fat. The inspectors of the State Department of Agriculture have also taken during the year from other parts of the State, not including Bangor, 482 samples of milk from milkmen while on their respective routes; after analyzing them 160 samples were found to be slightly dirty, 36 samples to have been dirty, 16 samples to

have been watered, 9 samples to have been skimmed, and 105 samples below standard in solids, not fat.

It is a very easy matter by looking over these figures, to see that the milk supply of Bangor averages better than any other city or town in the State.

There are about 1240 cows that furnish the milk and cream for the city of Bangor. There are 56 milkmen that run milk wagons into Bangor that supply our people with milk and cream, 58 men that sell milk to milkmen who run these wagons. They live from one to eight miles from the city. I have visited these farms from three to six times this year; some three times; some four times; some six times. Have been received very kindly by the people, and they have been ready to comply with suggestions that I have made to them, and seemed to want to do things right. I go to farms and look the barns and milk rooms over, and find out about the water supply, which I think is very important. Also look the cows over to see that they are well and healthy. I find that the people are getting in quite a lot of blooded stock and are making improvements in their barns and milk rooms, and seem to be trying to have things right; but there is most always chance for improvement.

To the careful observer there is little doubt as to the source of so much dirt; it is due chiefly to the careless and hurried milking and unclean cows. It is impossible for a person to take clean milk from a cow if she is not kept clean by her keeper; no amount of straining will remove all dirt or much of its effects from milk. It is hard for farmers and milkmen to get good help for farm work and it is most impossible for milkmen to get help that will be good to their cattle and careful about milking; some of the milkmen are using the milking machine and like it very much, and think it is going to be a good thing for them in many ways. They say that it will insure clean milk and lessen the amount of help in doing their work. The milkman

who strives to please his customers and give them good and clean milk, and who succeeds in so doing most of the time, should receive the support of the public. The one who is indifferent and makes no effort and repeatedly delivers poor and dirty milk to his trade, should be dropped and discouraged from continuing in the business; there are a sufficient number of up-to-date milkmen supplying this city who are worthy of encouragement and who take pride in trying to have things up-to-date who can supply first-class milk to all who are willing to pay a fair price for it.

The grade of cows owned by the dairy men supplying Bangor, average very good; the variety and quality of food found in their barns, the labor, care and expense in cultivating and purchasing it, indicates an effort to produce good milk.

I consider it very important that rooms used for washing bottles, straining and bottling milk, should be carefully screened for protection against flies, for most of such rooms are located near the stables.

One important fact that the consumer does not seem to take into consideration, that is a good many do not seem to, is the care of their milk after they receive it; milk is one of the most delicate articles of food product, also the most abused, causing it to become one of the most dangerous mediums for spreading disease. These facts known should be a strong incentive to all to take the utmost pains in its care.

Respectfully submitted,

JOHN GOLDTHWAIT,

Milk Inspector.

Report of Building Inspector

To the Honorable Mayor, and City Council of Bangor, Maine:

I herewith submit my report as Building Inspector for the year ending March 16, 1914.

The expense of the City Building department for the year has shown a vast reduction from that of last year.

The repairs on the seven fire stations have been comparatively small, the greater amount being expended in repairs at the City Farm, City Building on Court street, City Stable, Armory, and in City Hall. The transfer of the repair work on all school buildings to the School Department this year has helped to reduce the expense of this department somewhat.

The total expense of the building department for the year, including labor, supplies, trucking, and the salary (\$50 per month) of the man kept for job work about the city buildings, is \$4,467.00.

There has been no expense for team hire for the year, although heretofore \$100 has been appropriated for such use.

During the year I have issued 110 permits, over 90 being for new buildings, and repair work.

I give herewith a list, as near as could be compiled, showing the approximate value of all carpenter work done in the city during the year.

Report of Park Commission

BANGOR, MAINE, March 18, 1914.

To the Honorable Mayor and City Government:—

The Park Commissioners hereby submit the following report:

Amount appropriated and credit	\$4,669 00
Amount expended	5,258 88
	\$ 598 88

This has been a very busy year for this department and we have tried to keep inside the amount set aside for us, but on account of a large amount of forestry work and the expense of destroying brown-tail moth nests we had to overdraw. This work will take about three weeks more and has been done in a very thorough manner.

The parks are all in good shape for the coming year. We have set out one hundred and fifty trees of different kinds in Broadway Park and they have made a big improvement.

A rustic bridge and moving the house from Summit Park have beautified this natural park.

Fairmount has been all made over and seeded and this summer ought to look better than ever before. We would recommend that the street that goes through this park be discontinued and the land graded and added to the park.

It seems as though a start ought to be made to set out some trees in the district that was burned at the time of the great

fire. We believe that an appropriation should be made this year for this purpose.

The smaller parks have all received careful attention and outside of the expense for taking care of them will not cost very much this year.

Every year there is an expense of about \$300 for plants for the different parks and in the fall of the year these plants are all given away or allowed to die and rot. It seems as if some way could be found so that we could have a place to store these so that we could use them again and thereby save quite an expense each year.

The pool in Chapin Park is another bill of expense every year. The granite blocks that form the walls are just laid in the ground and every spring the cracks and holes have to be repaired. If a backing of cement was put in it would no doubt prevent this and be an improvement. This pool is a nice place for the children, and sometimes as many as twenty-five or thirty are in bathing at one time, and it keeps them away from the river.

The fountain in Davenport Park is in bad shape. If a sanitary bubbling drinking fountain was put in in its place we believe it would be very much appreciated in that section, as these fountains are an ornament to any park and are being installed in parks all over the country.

We made a start towards a ball field in the rear of Broadway Park, thereby doing away with the one in the park, which is both unsightly and dangerous to people using the walks in that vicinity. We are in hopes to get it ready for the boys to use this spring and summer.

Through the efforts of Alderman Matheson we received the use of a large field from Mr. Wingate of New York and the diamond can be laid out at a small expense.

We hope that the new administration will be as liberal as possible in their appropriation to us so that we can make some more permanent improvements this year.

Respectfully submitted,
BOARD OF PARK COMMISSIONERS,
ASHLEY B. WOOD, Secretary.

Report of Chief of Police

BANGOR, ME., March 1, 1914.

To His Honor the Mayor and to the City Government:

I herewith submit a report of the work of the Police Department for the past Municipal Year:

Report of the City Engineer

OUTLINE OF REPORT

I. INTRODUCTION.

II. STREETS AND HIGHWAYS:

1. Lines and grades determined.
2. Streets and grades established.
3. Street monuments.
4. Street openings.
5. Street numbers.
6. Street sprinkling.
7. Tar concrete walks.
8. Paving.

III. BRIDGES:

1. Bangor-Brewer Bridge:
 - a. New spans.
 - b. Abutment.
 - c. Brewer approach.
 - d. Paving middle span.
2. Central Street Bridge:
 - a. Brought to grade.
 - b. Abutment.
3. Kenduskeag Bridge, painting.
4. Merrill's Mills Bridge, re-floored and painted.
5. General repairs.

IV. SEWERS:

1. Surveys, plans and reports.
2. Sewer books brought to date.
3. Sewer maps brought to date.

V. HIGH SCHOOL EXCAVATION.

VI. POST OFFICE RETAINING WALL.

VII. NORUMBEGA SITE WALLS.

VIII. ASSESSORS' MAP:

1. This year's work.
2. Last year's work completed this year.
3. Projected work.
4. Recommendations for appropriations.

IX. MISCELLANEOUS:

1. School Department.
2. Water Department.
3. General Work.

X. NEW FILING SYSTEM.

XI. COPYING RECORDS,

1. Work completed last year.
2. Recommendations of future work.

XII. SCHEDULE OF CONTRACT WORK.

XIII. COST OF ENGINEERING.

XIV. PROPERTY LIST.

XV. CONCLUSION.

Report of the City Engineer

BANGOR, MAINE, March 1, 1914.

To His Honor, the Mayor, and the City Council of Bangor:

Gentlemen:—

In compliance with the City Ordinance requiring a report on the work executed by the City Engineering Department, I beg leave to submit the following for the year ending March 1, 1914:

STREET LINES AND GRADES

The following street lines and grades have been surveyed and designated, when needed by the highway department, electrical department, contractors for street maintenance or construction, and upon the request of property owners:

STREET LINES

Bellevue	Grant
Broadway	Hammond
Cedar	Hancock
Central	Highland Court
Clinton Court	Highland Lane
Columbia	James
Congress	Kittredge Road
Cottage	Linden
Dayton	Main
Elm	Maple
Exchange	Montgomery
Fern	Mount Hope Avenue
Fountain	New Street
French	Newbury
Fremont	Norfolk
Garland	North
Garland Street Extension	North Park

Oak	South
Ohio	South Park
Pine	State
Poplar	Stetson Sq.
Prospect	Third
Sanford	Williams
Sixth	York

STREET GRADES

Bellevue	Maple
Catell	Montgomery
Central	Oak
Elm	Pine
Exchange	Sixth
Fountain	State
French	Stetson Square
Grant	Stillwater Avenue
Hancock	Williams
Holland	York

STREETS AND GRADES ESTABLISHED

The following streets and grades have been laid out by the Board of Street Engineers, accepted and established by the City Council, surveys, plans and profiles being made by this department:

- Fountain Street (Montgomery to Linden).
- Fountain Street—grade (re-established Linden to Poplar).
- Lafayette Street (Leighton to Fountain).
- Pine Street Extension (Stillwater Ave. to Milford Street).
- A Public Way (Harlow to Park).

Proper record of this work has been placed in the road and plan books of the department.

STREET MONUMENTS

Monument set at northeasterly corner of Pine Street and Stillwater Avenue.

Monument set at northwesterly corner of Pine Street and North Park Street.

Monument set at southeasterly corner of Pine Street and Milford Street.

Monument reset at first angle on Cottage Street westerly from Ohio Street, southerly side of Cottage Street.

Monument reset at southwesterly corner of Egery Street and Garland Street.

Temporary marks were placed at all corners established by the Assessors' map survey.

STREET OPENINGS

During the year 148 permits for street openings have been issued by this office. \$324.75 has been collected by the Treasurer and \$174.31 expended for repairs and engineering.

STREET NUMBERS

During the year 88 houses were numbered with a total issue of 97 numbers. Many of these were public buildings and numbers were determined for the Water Department. The following numbering plans were made:

Bates Street	Lafayette Street
Colby Street	Pine Street Extension
Dayton Street	Russell Street
Dole Court	Rutland Street
Earle Avenue	Savage Street Extension
Francis Street	Tyler Avenue
Jordan Road	Williams Street
"L" Street	

STREET SPRINKLING

Street sprinkling in the city was done by contract, as for several years past. The total amount of the contract for sprinkling about 27.5 miles of varying widths of roadway was \$7,336.61. The property benefitted was assessed according to valuation. The oil sprinkling of last year which proved very satisfactory was continued by sprinkling approximately twelve miles of roadway, of which nearly five miles was sprinkled the second time. The work was done by the Standard Oil Company for $1\frac{1}{4}$ cents per square yard, at a total expense of \$3,896.45.

TAR CONCRETE WALKS

Measurements have been made for the following walks. Certificates were filed with the Treasurer for one-half payment by the abutting property owners for all new walks:

LIST OF WALKS, SHOWING YARDAGE

Streets,	Surface Sq. yds.	Cost		Remarks

WOOD BLOCK PAVING

Surveys, plans and specifications were made and contracts let for the following wood block paving jobs:

DATA ON WOOD BLOCK PAVEMENT LAID IN THE CITY OF BANGOR
SEASON 1913

Job	Date		Length Feet	Surface Sq. yds.	Cost		Curbing
	Start	Finish			City	B. R. & E.	
State St.	Sept. 12	Oct. 25	531.6	2599.00	\$7,002.79	\$4,180.16	783.44
Exchange St.	Aug. 15	Sept. 12	630.0	2613.88	5,026.56	4,412.31	
Hancock St.	Oct. 25	Nov. 21	241.0	826.87	3,233.06		
Harlow St.	Oct. 25	Nov. 28	716.5	3085.60	9,761.11	2,521.36	71.32
Bangor-Brewer Bridge	Oct. 1	Oct. 22	198.4	705.4	4,309.99		
	Total		2317.50	9830.75	\$29,333.51	\$11,113.83	\$ 854.76

The state road work was continued on State Street and the City received \$2,601.26 from the State towards this work.

The right of way of the Bangor Railway & Electric Company was paved at their expense.

BRIDGES

By order of the City Council the Board of Street Engineers had plans and specifications prepared for the construction of two new approach spans of the Bangor Brewer bridge. As Mr. Greenwood, Consulting Engineer, Skowhegan, Maine, during 1912 had made preliminary plans and studies for these approach spans, it was considered best, in order to save time, to have him complete the plans, and accordingly his services were obtained. Bids for construction and erection were received from five large bridge concerns, and the contract for \$15,417 was awarded to the Canton Bridge Company of Groton, New York. These new spans are to be of the same width as the others recently erected and capable of supporting electric car traffic. Owing to the fact that the Maine Central Railroad Company did not prepare their detail plans for their approach span until late in the year and erect their steel pier, upon which one end of our span rests, it was impossible for the Canton Bridge Company to complete the contract during this fiscal year. For this reason it was considered advisable to postpone the erection until the spring of 1914, although all of the material was shipped and is now stored here in the city.

It was necessary to extend one of the masonry shore piers of the Bangor-Brewer bridge on the Bangor side about five feet up stream in order to support the new span. Plans and specifications were prepared by this department and bids received from three local contractors. The contract was awarded to the lowest bidder at the total cost of \$1,356.00.

The need of a different approach at the Brewer end of the Bangor-Brewer bridge has been keenly felt since the new steel spans were erected in 1911, which raised the grade of the bridge floor, the old plank approach being very rough and always in the need of repairs. A survey was made and found that the grade of the approach could be decreased. Plans and specifica-

tions were prepared for a retaining wall on the two sides and the river end of the approach. The work was completed at a cost of \$2,143.77. At present the roadway is surfaced with gravel but should be paved with creosoted wooden blocks.

The middle span of the Bangor and Brewer bridge erected in 1902, was constantly in need of repairs to the plank roadway in order to insure safety. By order of the City Council a survey was made, plans and specifications prepared for paving this space with wooden blocks and replacing all timber below the floor with creosoted lumber. This work was done by contract at a cost of \$4,309.99.

It was considered advisable by the highway department to raise Central Street to the established grade which necessitated bringing the floor of the Central Street bridge to grade also. This was done by laying a system of floor beams and stringers on the old flooring. Timbers taken from the old toll bridge were used for this work, at small expense.

The failure of the old Post Office site wall necessitated the construction of a twenty foot extension of the westerly abutment under the easterly span of the Central Street bridge. Surveys, plans and specifications were made for a permanent abutment. The contract was awarded in conjunction with one for the construction of the Post Office retaining wall.

It was necessary to paint the Kenduskeag bridge to prevent corrosion and improve the appearance.

At the beginning of the season the floor of the Merrill's Mills bridge was in a dangerous condition and required a new flooring. The superstructure above the floor was given one coat of paint. This work and all other bridge repairs were done as necessary, so that at present all bridges are in good condition.

SEWERS

Surveys, plans and profiles were made, and reports submitted for the following sewers constructed during the past season,

which also required frequent lines and levels from this department:

Union St.	995.0 ft. beyond Sixteenth St.
Jackson St.	325.0 ft. easterly from Union St.
Poplar St.	150.0 ft. westerly from Norfolk St.
Birch St.	430.0 ft. northerly from Mt. Hope Avenue.
Tyler Ave.	425.0 ft. northerly from Jordan Road.
Fifteenth St.	1000.0 ft. westerly from Ohio St.
Meadow Brook	290.0 ft. northerly from Essex St.
Harlow St.	274.0 ft. southerly from Central St.

Preliminary surveys, plans, cost estimates and reports were made for sewers on Lincoln St., also between Larkin and Third Sts.

All new construction and property assessments have been duly recorded in the plan books of the department. The two large sewer maps were carefully corrected and extensions added.

HIGH SCHOOL EXCAVATION

To improve the appearance of the High School and Library lots, extensive excavation was necessary. A cross-section survey was made and the amount of excavation estimated. Plans showing the location of the earth and specifications for removal were prepared. The contract was awarded to the lowest bidder, and 11,077.33 cubic yards of earth and stone were removed.

POST OFFICE RETAINING WALL

The City Government ordered that the old Post Office ruins be torn down, but did not provide for removal from the site. This work was done and the material which was necessarily piled near the stream to allow operations caused the rupture of the easterly wall near Central Street. After the debris was removed from the stream it was necessary to rebuild the wall. Surveys, plans and specifications were prepared and bids re-

ceived. The contract was awarded and the wall satisfactorily completed January 1, 1914.

NORUMBEGA SITE

By order of the City Council the various possibilities of repairing the Norumbega site walls were thoroughly investigated. Repairing the old crib work, constructing a concrete wall, also a granite faced wall, were all carefully considered, the cost estimated and a report submitted.

ASSESSORS' MAP

At the regular May meeting, the City Council appropriated \$1500 for continuing the work of surveying the city and making an Assessors' map.

During the season 160 acres were completed, which included the business section on the west side of the city. The deeds were secured of 620 lots which were carefully plotted on the map. The houses on these lots were located, but upon advice of the assessors they will be omitted from the map. This change is made to avoid confusion in the dimensions of the lots, which is most important, and to allow the area to be shown on each lot. It will also eliminate the congested appearance of the map in general.

This change necessitated the re-plotting of all of last year's work.

During the winter approximate maps of the sections to be surveyed during the coming season were plotted from the various records in the office and the Penobscot Registry of Deeds. All data on the street lines was incorporated and the lot lines were roughly determined by use of the deeds secured at the Registry of Deeds. These maps will be a great help and saving of time in the field work of the next season.

The sum of \$1,500 is not sufficient to keep a crew in the field continually during the whole season and prepare the map for the Assessors during the winter. I have been forced by the lack of funds to have one crew do the general engineering field work in conjunction with the assessors' map. This method is very inefficient and I would suggest that a larger sum be appropriated for this work during the coming season. The necessary help for a year's continuous work could be retained for about \$2,500, which would very greatly increase the returns and hasten the completion of this much needed work.

MISCELLANEOUS SURVEYS, PLANS AND REPORTS SCHOOL DEPARTMENT

Survey, design, plans and estimate on cost of a retaining wall in the rear of High School building and on Spring Street.

Laid out tennis court and basketball lines in the High School gymnasium.

Surveyed and laid out the football field for High School team.

Surveyed Cottage Street lot.

Surveyed and placed temporary marks at the corners of the school lot at the junction of Stillwater Avenue and Kittredge Road.

WATER DEPARTMENT

The two large maps of the department were carefully corrected and the last three years' work added.

A map was compiled of the district northeasterly of Broadway which showed lotting and contemplated streets.

A survey and plan was made and temporary marks placed at the corners of the water works property lying on both sides of the river.

GENERAL WORK

Surveyed and staked out lots in Finson road and Church road cemeteries.

Determined area of Bangor House property and the Stetson property on Hammond and Central Streets for the Assessors.

At the request of the City Solicitor the following street lines were surveyed and encroachments determined: North, South, Ohio, James.

Surveyed Hammond Street and reported on the advisability of allowing a movable show-case in front of Bangor Dye House.

Survey and specifications were made and contract let for granolithic sidewalk on York Street.

Survey of granolithic walks on following streets: Main, State, Exchange, corner of York and Oak, Stetson Square.

Survey was made of Pine Street 130 ft. northerly of North Park Street and records produced to prove that it had been accepted.

Survey, plans and estimate of cost of necessary retaining walls for new street.

Surveys, plans and profiles were made and grades determined for curbing on the following streets: Exchange, State, Central.

Surveyed and placed temporary marks at the corners of the city property on Pine Street extension.

Surveyed and estimated flooring necessary for repairs on the Hichborn Hill sidewalk.

Street signs were placed where necessary.

NEW FILING SYSTEM

The development of the department and the amount of data on record in this office has long since outgrown the filing system and facilities, so that this year it was necessary to install new filing cabinets in the vault and adopt a new method of filing.

The cabinets were purchased by order of the City Council and will be installed during the month of March. Much care and time was spent in the study of a system by which any record can be easily and quickly produced.

COPYING OF RECORDS

Last year an appropriation was made for the copying of records, which should be placed in safe deposit vaults. The road records were copied and this year placed in safe deposit vaults at the Bangor Savings Bank. There still remains several volumes of street and sewer plans which should be copied. Volume I of the street plans is in very bad condition and will soon be beyond use.

SCHEDULE OF CONTRACT WORK

The following table shows the general contract work of the city, done under the direction of the Street Engineers, and superintended by this department. This table does not include expense of superintendence or general engineering work.

CONTRACT WORK TABLE

CITY OF BANGOR

303

In the following table is given the cost of engineering, exclusive of the city engineer's salary, as charged against the various departments and appropriations:

Department	Amount
*General	\$ 1,006.50
Assessors' Map	1,369.38
Bridge	113.30
School	59.50
Sprinkling	179.82
Street openings	85.20
Water	110.16
Electrical	6.92
Total	\$ 2,930.78

*General includes work done for the sewer department, highway department, street numbering, and street lines and grades for property owners, etc.

For a schedule of property belonging to the City Engineer's office and the bridge department, see report of Committee on City property.

In closing I wish to thank the members of the City Council for their co-operation in the work of this department and their unfailing courtesy which they have extended to me at all times.

Respectfully submitted,

FRANK E. PRESSEY,

City Engineer.

Report of Overseers of the Poor

REPORT OF THE
Superintending School Committee

BANGOR, ME., June 19, 1914.

To His Honor the Mayor, and the City Council of Bangor:

The Superintending School Committee begs leave to submit its annual report upon the past year's work of the schools.

Bangor Schools have for years, in Maine and New England educational circles, been considered excellent, and the results of the past year's work will show that the high standards hitherto attained have been maintained.

The most important feature of the past year is, of course, the occupancy, at the beginning of the school year in September, of the new High School building. The building and its equipment have proved to be admirably adapted to the needs of the work and the increase in enrollment of the school from 595, the previous year, to 682 the past year, vindicates the judgment of the building committee in providing, as they did, for substantial growth in the school. Still further increase in the size of this school in the immediate future is indicated. In all departments of the High School, excellent work has been done and your committee feel that, whether the pupil is to enter higher institutions or is to go to work upon graduating, the varied courses as planned and executed here will give him liberal training for his future.

In the grammar schools, too, excellent work has been done and the large number of graduates from the ninth grade and their excellent ranks attest the intelligent interest, ability and hard work of principals, teachers and scholars.

The rural schools are doing thoroughly good work and much credit is due to these rural school teachers, many of whom work under disadvantages, having in one room classes in every grade from the sub-primary to the ninth.

The kindergartens are growing and this department is maintaining its high standards and becoming still more valuable an adjunct to the work of the lower grades.

The enrollment the past year was as follows:

High School.....	682
Graded Schools.....	2951
Rural Schools.....	264
Kindergartens.....	321

4218

The amount of repair work done on the buildings for a number of years had been so small that many of them had become sadly dilapidated and in need of extensive repairs. Important repairs were made during the summer vacation to the following buildings: Odlin Road, North Bangor, Tyler, Hillside, Stillwater Ave., Bower St., Pond St., Lincoln and Longfellow and these buildings are now in better condition than for years. Extensive repairs to other buildings are, however, imperatively necessary and liberal appropriations for repairs will be necessary for several years to come, after which in our opinion, a much smaller expenditure will keep the buildings in excellent condition.

The growth of the city in the upper Hammond and upper Centre Street sections will make new buildings in these localities necessary in the near future and it is suggested that land for

this purpose be secured in these localities as soon as may be possible and while the valuations are no higher than at the present time. Two kindergartens are at present inconveniently housed in hired quarters and in many of the grades teachers have larger numbers of pupils than is consistent with best work. This committee recommended in last year's report the erection of an eight-room building in the vicinity of upper Hammond Street and this need is growing still more apparent. A kindergarten is now housed in rented property in this section.

It would be possible to relieve the crowded conditions in the Longfellow district and also provide for the indicated growth in this kindergarten by the erection of an inexpensive two-room bungalow in this vicinity for the kindergarten, thus releasing one room in the Longfellow building for the use of the grades.

It is suggested that a committee be appointed to investigate these two propositions and report to you at an early date.

At the new High School building, the property adjoining in the rear should be acquired, the necessary grading and terracing should be done and the retaining wall on the Spring Street side should be built. These would make more practical and more beautiful this important building and action should not be deferred longer than is absolutely necessary.

The Newbury Street property which was purchased by the city in the fall has been turned over to this committee for school purposes. This property was purchased without the recommendation of this committee and upon examination the building proved to be unsuitable for school purposes.

Appended is a report of the expenditures for the year, as per the books of the Superintendent's office, and an estimate of the cost of operating the schools for the year 1914-1915; also a list of the teaching force.

For the details of the work you are referred to the reports of the Superintendent, the Principals of the High School, and the

Grammar Schools, the Director of the Kindergarten and the School Agent.

Respectfully submitted,

PRESCOTT H. VOSE

DANIEL McCANN

THE FRENCH MEDALS

For Scholarship

A medal will be given to the member of the graduating class who has attained the highest rank in scholarship throughout the four years' course, and to the one who has attained the next highest rank.

For Graduating Essays

Medals will be given to the girl and the boy in the graduating class who present the best essay.

Stenography and Typewriting

A medal will be given to the member of the graduating class who excels in stenography and typewriting, the result to be determined by competitive examination.

Declamation

Medals will be given to a girl and a boy in the Junior Class for excellence in declamation at the Junior exhibition.

In no case shall two medals be awarded the same pupil.

No pupil, who has not been a member of the school for four years, shall receive a Senior medal.

No pupil who has not been a member of the school for three years, shall receive a Junior medal.

No pupil, whose scholarship or deportment has been unsatisfactory, shall receive a medal.

For Scholarship

One medal will be given in each 9th grade room for the highest rank in scholarship throughout the four years in the grammar grades. Also one medal will be given each year in the 9th grade rural schools.

REPORT OF THE
Superintendent of Schools

To the Superintending School Committee, Bangor, Maine:

Gentlemen:—I have the honor to submit for your consideration the twenty-fourth annual report, in the series, of the Superintendent of Schools, for the school year ending July 1, 1914. This is the second report by the present Superintendent.

This school year has been one of unusual activity, and there is evidence of marked progress in the conduct and management of the schools. The interest and encouragement shown by the Superintending School Committee and the liberal support given by the general public, have afforded opportunities for improvements; and, while there is room for further advancement and much still to be accomplished in order that the best kind of training may be provided for all of the children of the community, the progress made thus far is gratifying.

In efficiency of teaching force, in methods of work, in the course of study and in organization, the schools are keeping abreast of the times. The essentials necessary for the success of any system are a good working plan and the intelligent and hearty co-operation of all in carrying out that plan.

The attitude of the teachers has been professionally good in the main during the year just closed. Most of our teachers have their hearts in their work and they have been faithful to the trust reposed in them. We have, however, a few teachers who are unsympathetic in their dealings with pupils, teachers

who fail to realize fully that the schools are for the pupils and not for the teachers.

Changes in the teaching corps during the past school year are as follows:

HIGH SCHOOL

HIGH SCHOOL

The High School opened Sept. 15, 1913, in the new building and I am sure all connected with this school feel indebted to the tax payers for the splendid building and equipment.

The teaching force numbers thirty. Of these, a man as director over the boys and a woman as director over the girls

have special charge of the physical welfare of the High School pupils. At an exhibition given in Assembly Hall the drills by the boys and the folk dancing in particular by the girls were excellent. I speak of this feature for I feel confident that this particular training should be introduced into the Grammar schools. It is true that the High School Gymnasium was used by the ninth grades last winter by the boys and I hope in the near future it will be possible for the ninth grade girls to use the gymnasium at least once each week during the winter term.

I should like very much to see what might be termed a department of physical education. The Medical Inspectors and the physical culture teachers should have in charge the entire physical welfare of the children of our schools. It should include the entire range of such subjects as sanitation, heat, light, ventilation; instruction in hygiene; physical training, including both formal exercises and games; supervision of school playgrounds and recreation centers. The only thing which could be said against the immediate establishment of such a department is the ever present need of more money for the support of the schools. For information in regard to the High School, I refer you to the report of the Principal.

BOOKS

About one year ago we adopted the Progressive Road to Reading as a basal book for the City of Bangor. This system is proving very satisfactory, as far as I can learn, and promises a marked advance in reading in the future. With the introduction of this system we have practically a uniform system of reading throughout the city.

A Home Geography has been introduced into the IV grade and the elementary geography is now completed in the VI grade.

The Carpenter's geographical readers have been placed in the schools in the upper grammar grades and the Around the

World series in the lower grades. These books supplement the study of geography.

The Montgomery's Beginners' History is now used in the VI grade and the Elementary in the VII grade and the large history is taken in the VIII and IX grades.

The Gulick's series of physiologies are used in the following grades:—Grade IV Good Health, Grade V Emergencies, Grade VI Town and City, Grade VII The Body at Work.

These changes and adoptions were recommended by the Superintendent last year.

The Hamilton's Arithmetic, which was introduced two years ago, is proving to be just the book needed. This book is used from the third to the sixth grades inclusive.

The schools are now provided with suitable and uniform text books.

It will be necessary another year to provide a few reference books for the upper grammar grades, also a few maps and globes.

THE NIGHT SCHOOL

Our system of schools will not meet the demands of a large number of young men and young women in our community until we shall have established a night school in this City.

This Public night school has occupied a considerable portion of my thought during the past two years.

There are many reasons why our school system should have a night school as one of its integral parts, providing the City sees fit to furnish a suitable amount of money for its maintenance and a proper spirit is shown in attending it. These reasons are the same ones which have moved other cities to establish this very important branch in the educational scheme.

The chief argument in favor of the night school is that it provides a means of education for the working youth of our city, the class that most deserves an education.

Who can dispute this proposition? Our compulsory school law requires that children shall remain in school until they are fifteen years of age, unless the Superintendent of Schools, or some other authorized person, shall, for some good reason, excuse them. But at the present time many families are so situated as to require at the earliest possible age the services and earnings of each child. The result is that many a child drops out of school, just as soon as he has reached the end of compulsory school age, yet, some of these same children would continue in a night school, if there were one.

The night school would greatly ameliorate the present social conditions by providing a place for these boys to spend their evenings profitably instead of wasting their time on the street or in other loafing places. It would even be possible for many of our older scholars to obtain some kind of paid work for a part of the day and attend school in the evening.

SPECIAL TEACHERS

The music of the schools has been conducted very efficiently this year with Miss Gale Littlefield as instructor and director. Besides the regular work in the schools, there has been a fine school orchestra which the people of Bangor have had a special opportunity of hearing as it has furnished music at the play, school exhibition and such public performances. It has certainly been a year of great progress and it is hoped that in the near future a Boys' and also a Girls' Glee Club may be formed, an organization which has been worked out successfully in many schools of the state.

The Drawing and Writing Teachers, Miss Dealing and Miss Alexander, have also given us the best of results in their re-

spective Departments. I wish at this time to call your attention to the reports of the Principals and Heads of the different Departments.

In concluding this report, I wish to give public expression of my appreciation of the loyal and sympathetic support of the teachers. Their attitude has been one of interest and helpfulness.

Also, I wish to thank the members of the Superintending School Committee especially, and the citizens in general for the loyal and unselfish way in which they have upheld the schools during the year. Bangor Citizens are proud of their schools, and cherish a school sentiment far above the ordinary. I shall endeavor to do faithful and conscientious work in the future as in the past. I certainly feel that I am the servant of all the people and not any class or faction. I represent the interests of six thousand school children, and have had placed upon me to a great extent the responsibilities of the development of that number of future citizens of our City and of our great common country.

Respectfully submitted,

D. LYMAN WORMWOOD,

Superintendent of Schools

July 6, 1914.

Repairs on School Buildings

The *Bagley School* building needs the shed and closets moved to the rear of the main building. Paint the woodwork inside, whiten the ceiling and tint the walls. This school room should have new desks and chairs.

The *Sherburne School* building needs the woodwork inside painted and the ceiling whitened, the walls tinted and the hall put in condition for the clothing. Either repair the fence or remove it.

The *Central School* building needs the main building painted inside and outside, the outhouse repaired and painted. This building should have a flag pole and flag. Fence needed.

The *Crosbyville* building needs to be painted inside and outside, walls tinted and ceiling whitened.

The *Avenue School* needs to be painted inside and outside, walls tinted and ceiling whitened.

Union Square—Radiators or better coils in the rooms on the first floor, and a few slate blackboards. Reseat two or three rooms each year. Teachers' desks and chairs are needed.

Palm Street—Varnish the woodwork on the inside and a few minor repairs. Fence rebuilt.

Longfellow—Two new steel ceilings on the second floor and steel ceilings in basement.

Valentine—Put in one large steam boiler to heat the whole building, whiten the ceilings and tint the walls.

Center—Needs to be painted. New windows for the old part at least, repairs on the inside, slate blackboards in the lower rooms.

Elm and State Streets—Whiten ceilings, tint walls, and varnish the woodwork.

Larkin—Put in more radiation in the two cold rooms, whiten the ceilings and tint the walls.

Pearl, Cottage and Allen—Paint these buildings on the outside and whiten the ceilings and tint the walls. Give the woodwork one coat of paint inside. Fences repaired.

NUMBER OF SCHOOL BUILDINGS IN THE CITY, 30

The High School, with an enrollment of 682 pupils, has:

- 17 Class Rooms
- 6 Recitation Rooms
- A Bookkeeping and Banking Room
- A Stenography Room
- A Typewriting Room
- A Science Lecture Room, equipped with stereopticon
- A Biology Laboratory
- A Physiography Laboratory
- A Chemical Laboratory
- A Physics Laboratory
- A Drawing Room for Mechanical Drawing
- A Drawing Room for Freehand Drawing
- 2 Dark Rooms for Photography
- 1 Wood Working Room
- 1 Metal Working Room
- 1 Cooking Room with pantry and dining room connected
- A Sewing Room
- A Room for the grammar school Manual Training work.
- 12 Storerooms
- 2 Teachers' Offices.
- 2 Teachers' Reception rooms.
- A Medical Room
- A Library
- A Lunch Room
- 2 Locker Rooms
- 2 Toilet Rooms
- A Gymnasium with two dressing rooms adjoining
- An Assembly Hall with two ante-rooms adjoining stage
- Offices for the Principal
- Offices for the Superintendent of Schools.

Report of the Principal of the High School

BANGOR, MAINE, June 8, 1914.

To the Superintendent of Schools:—

The year 1913 and 1914 has been an epoch making year in the history of the High School. It has marked the opening of the new building and has made possible the introduction of new courses and lines of work, which heretofore could not be undertaken. Although, when school opened in September, many parts of the building were not completed and many inconveniences resulted from this condition for several months, yet, very wisely, I believe, was the school work begun at the appointed time. The registration this year has shown an increased attendance. At the time of the issuing of the annual catalog we had a registration of 682 students, or about 90 more than in the preceding year. For the first time for several years the advantages of the High School have been available to pupils from other towns and nearly fifty boys and girls have taken advantage of this opportunity.

In the fall several teachers were added to the faculty to care for the increased size of the school and the newly created departments. The school opened in September with but one of the faculty of the previous year absent. Miss Alice Bucknam, because of ill health, was unable to resume her work and died in the following December. Miss Bucknam had spent many years as a public school teacher in this city and for the past sixteen years had been an assistant in the High school. She was an earnest, faithful teacher, of high ideals and devoted to

the best interests of her pupils. Her death was a distinct loss to the school.

I am pleased to report at this time that the new building has, after a year's service, proven to be entirely satisfactory in its arrangements and finely adapted to school work. During one of the most severe winters in recent years we have found our heating system adequate for our entire building. We feel that due acknowledgement should be made of the efficiency of our head engineer, whose care and skill has been so large a factor in this result.

Last June we graduated seventy-eight students, fifty-one girls and twenty-seven boys. Nearly forty-five percent of this class have entered some higher institution for advanced study. The institutions represented are Bowdoin, Maine, Dartmouth, Smith, Exeter, Anapolis, West Point and Gorham, Castine and Machias Normal Schools.

The number of students in the various courses is as follows: Classical 136; Scientific 151; Technical 87; Industrial 6; General 88; Commercial 202. The number selecting the various studies is, English 682; Latin 215; Greek 5; French 235; German 73; Algebra 289; Geometry 134; Trigonometry 24; Chemistry 42; Physics 49; Physiography 19; Botany 24; Elementary Science 39; Hygiene 20; Ancient History 172; American History and Civics 72; English History 28; Modern History 16; Bookkeeping 144; Stenography and Typewriting 125; Commercial Law and Geography 41; Shopwork and Drawing 84; Domestic Science 68. The average size of the classes has been 23, the smallest class (Greek) 2. The number of pupils per teacher has been 25.

The lunch counter established about January first has been an undoubted success. It has been well patronized and thoroughly appreciated. The prices have been as low as consistent with a high quality of food and a slight profit. With

distinct advantage to both departments, the accounts have been kept entirely by the Commercial department. This correlation of departments has relieved the one and enabled the other to receive a most valuable training in actual business. A full set of books has been kept by the students, bank accounts opened and those advanced students assisting in the work have had a practical experience of the greatest value.

The Commercial department intends, as soon as convenient, to secure a complete list of recent graduates with such further information as may be advisable and possible. With this information the department hopes to serve more fully its graduates and the business men of the city who may from time to time need help. This service will be free to all parties.

An important part of our new building is the library. We have at present a very small but useful list of books. We have been able this year to have the room open only a part of the time, owing to the crowded condition of our schedule. It is hoped that another year it may be possible for a teacher to be in the room at all times to act as librarian and help all students desiring to do extra reading. Our thanks are due the Librarian of the Bangor Public Library for books placed on our shelves as needed, and for his very evident desire to cooperate with the school in making both libraries more useful to students and teachers.

The inauguration, in December, of courses in physical training marked the beginning of an endeavor to give all pupils some systematic work along this line. This year the work has been regularly required once a week for all members of the three lower classes and elective for the seniors. The gymnasium has also been open in the afternoon for boys and girls, on alternate days, who desired extra work. The students have been much interested in this part of their school life and beneficial results have been attained. Next year the teachers in this depart-

ment should be able to devote some part of their time to corrective work.

We have been able this year, for the first time, to offer work in domestic science to High School pupils. The regular first year class in this subject has been of good size and manifested much interest in this work. Such has been, however, the demand for instruction along his line that, in addition, special afternoon classes have been formed. These classes, composed of pupils of all grades and from several courses, were willing to devote extra time each week in order to secure training along this line of school work. A full Household Arts course should be adopted.

The school has received many gifts from various classes and clubs, and the interest thus manifested has been a great source of gratification to all connected with the school. The building, beautiful in itself, is gradually being enriched by these gifts and rendered more attractive and more and more a source of inspiration. We acknowledge, with thanks, the receipt of the following: Statue of Demosthenes, Class of 1891; Statue of Minerva, Bangor Teachers' Club; Bust of Augustus Caesar and Apollo, Class of 1900; Alexandrian Frieze, Oracle Boards of 1911-12 and 1912-13; Bust of Shakespeare, Athene Club; Bust of Homer and two pictures, The Departure (Abbey) and Woodland Path, (Carot), Home Culture Club; Head of Dante, Louise Hanson; Portrait of Hannibal Hamlin, Mrs. Hannibal Hamlin; The Evolution of the Book, (six pictures) Class of 1901. Other classes have under consideration further gifts.

During the past year we have been crowded in the two departments of science and manual training. The probability is that the number of students in these departments will be still further increased during the coming year. To care for this growth there should be added to our faculty two men.

To supervise a large school properly, the principal must be out of his office much of the time during the school session. Thus a clerk is most necessary to issue supplies, receive visitors and answer telephone calls. She would also be of great assistance in the care of the records and the correspondence. No school, so far as I know, which approaches this one in size is without such help. Such a person, trained as she would be along commercial lines, could also serve as a substitute teacher in the commercial department.

In order that our splendid equipment may be utilized as much as possible and be of the greatest service to the community, I believe that the city should, at an early date, establish a summer session of the high school. The summer school is not an experiment but has demonstrated its usefulness not only in the colleges but among nearly all grades of the public school system. Expenses for such a school would be comparatively small, since the heating expense is eliminated and the janitor service lessened. Only a part of the building need be utilized and but few teachers employed. The objects of such a school would be; first, to allow students with incomplete work to finish the same and thereby secure regular promotion; second,—to allow students who have failed in some of their work to be given an opportunity to remove the conditions; third,—to allow any who may desire to enter college to review desired subjects or secure additional credits. The usual examinations given at the opening of the fall term to remove deficiencies would then be omitted. Such examinations are always more or less unsatisfactory. The classes of this summer session would probably be small, and in a few weeks much work could be accomplished and we would have fewer yearly failures and fewer pupils leaving school.

In reviewing the work of the year we feel that it has been very satisfactory. It has been a year of conscientious labor on

the part of the teachers and of faithful endeavor on the part of most of the pupils. In almost all lines has the work accomplished been largely increased, due in part, to the lengthened recitation periods but largely to the better facilities offered. Not in recent years has there been so little sickness among the teachers, consequently less interruption in the work. Neither parental desires, nor the advice of teachers nor fine equipments are able to secure from some pupils a desire and purpose to prepare themselves properly for usefulness in the community. A very large percentage of the student body has, however, been imbued with an earnest desire to make the most of the advantages offered.

It is our pleasure and privilege to extend to parents, School Board and Superintendent our thanks for assistance rendered in the work of the year.

Respectfully submitted,

GEORGE H. LARRABEE,

Principal.

COURSES OF STUDY

CLASSICAL COURSE

The Classical Course prepares for any College; it gives an all round Academic Course, strong in languages.

First Year	Required—English 5. Algebra 5. Latin 5. Ancient History 2½.
Second Year	Required—English 5. Latin 5. Geometry 5. <i>Elect one—Greek 5. German 5. French 5.</i>
Third Year	Required—English and History 5. Latin 5. Algebra 5. <i>Elect one—Greek 5. German 5. French 5.</i>
Fourth Year	Required—English and History 5. Latin 5. <i>Elect two—Greek 5. German 5. French 5. Mathematics 2½ or 5. Chemistry 5. Physics 5.</i>

TECHNICAL COURSE

The Technical Course fits for Scientific and Technical Schools and gives an all round Technical education.

First Year	Required—Shopwork and Drawing 10=5. Algebra 5. English 5. Ancient History 2½ or Science 2½.
Second Year	Required—Shopwork and Drawing 10=5 English 5. Geometry 5. <i>Elect one—German 5. French 5. Botany 5. Physiography 5.</i>
Third Year	Required—English and History 5. Algebra 5. Physics 5. <i>Elect one—German 5. French 5.</i>
Fourth Year	Required—English 2½. Mathematics 5. American History 5. <i>Elect one—French 5. German 5. Chemistry 5.</i>

SCIENTIFIC COURSE

The Scientific Course fits for admission to Schools of Technology, and to the Scientific Departments of other Colleges.

First Year	Required—English 5. Latin 5, or French 5. Algebra 5. Ancient History $2\frac{1}{2}$ or Science $2\frac{1}{2}$.
Second Year	Required—English 5. Latin 5 or French 5. <i>Elect two—Geometry 5. Physiography 5. Botany 5. French 5. German 5.</i>
Third Year	Required—English and History 5. Physics 5. <i>Elect two—Algebra 5. French 5. German 5. English History 5.</i>
Fourth Year	Required—English and History 5. Chemistry 5. <i>Elect two—French 5. German 5. American History and Civics 5. Mathematics $2\frac{1}{2}$ or 5.</i>

GENERAL COURSE

The General Course is intended to give a broad general training to those pupils who do not intend to enter a higher institution.

First Year	Required—English 5. Algebra 5. <i>Elect one—Ancient History $2\frac{1}{2}$. Elementary Science $2\frac{1}{2}$. Drawing 5=$2\frac{1}{2}$. Domestic Science 5=$2\frac{1}{2}$. <i>Elect one—Arithmetic 5. French 5. Latin 5.</i></i>
Second Year	Required—English 5. <i>Elect one—Modern History $2\frac{1}{2}$. Drawing 5=$2\frac{1}{2}$. Commercial Correspondence $2\frac{1}{2}$. Domestic Science 5=$2\frac{1}{2}$. <i>Elect two—Geometry 5. Botany 5. Physiography 5. Latin 5. French 5. German 5. Bookkeeping 5.</i></i>

GENERAL COURSE—Continued

Third Year	Required—English 5. English History $2\frac{1}{2}$. <i>Elect two—Physics 5. French 5. German 5. Algebra 5. Bookkeeping 5. Drawing 10=5. Latin 5.</i>
Fourth Year	Required—English 5. Physiology and Hygiene $2\frac{1}{2}$. <i>Elect two—Chemistry 5. French 5. German 5. Mathematics 5. American History 5. Bookkeeping 5.</i>

COMMERCIAL COURSE

The Commercial Course gives a thorough and broad business training.

First Year	Required—English 5. Algebra 5 or Algebra $2\frac{1}{2}$ and Science $2\frac{1}{2}$. Arithmetic 5. Penmanship and Spelling $2\frac{1}{2}$.
Second Year	Required—English and Commercial Correspondence 5. Bookkeeping 5. Typewriting $5=2\frac{1}{2}$. <i>Elect one—Stenography 5. French 5. German 5. Geometry 5. Physiography 5. Botany 5.</i>
Third Year	Required—English 5. Bookkeeping 5. Commercial Law $2\frac{1}{2}$. Commercial Geography $2\frac{1}{2}$. <i>Elect one—Stenography and Typewriting 5. English History 5. French 5. German 5. Physics 5.</i>
Fourth Year	Required—English 5. American History and Civics 5. <i>Elect two—Stenography and Typewriting 5. Bookkeeping 5. French 5. German 5. Chemistry 5.</i>

INDUSTRIAL COURSE

The Industrial Course is designed to enable the pupil who does not intend to enter College, to make himself of greater value along industrial lines.

First Year	Required—English 5. Algebra and Arithmetic 5. Shopwork and Drawing 10=5. Penmanship and Spelling 2½.
Second Year	Required—English 5. Bookkeeping 5. Geometry 5 or Physiography 5. Shopwork and Drawing 10=5.
Third Year	Required—English 5. Commercial Law 2½. <i>Elect two—Bookkeeping 5. English History 5. French 5 or German 5. Physics 5.</i>
Fourth Year	Required—English 5. American History and Civics 5. Typewriting 5=2½. <i>Elect one—Bookkeeping 5. French 5 or German 5. Chemistry 5.</i>

NOTES ON THE COURSES OF STUDY

1. The figure after each subject indicates the number of recitation periods per week, which is, in general, the same as the number of credits allowed. Exceptions are found in several studies. In this case the diploma value is indicated after the sign =.

2. A pupil in course for a diploma must take studies representing at least seventeen and one-half credits for the year.

3. The minimum number of points to secure a diploma is seventy.

4. Only one foreign language may be begun in the same year and it should be continued for at least two years if the pupil is proficient.

5. Pupils who are preparing to enter college or scientific schools have little choice in regard to studies. The requirements of the institution which the pupil is to enter, fix the subjects to be taken. It is important that the choice of college be made as early as the beginning of the second year, and pupils should then find out exactly the requirements for admission to the college chosen.

6. There must be a sufficient number of pupils desiring a certain elective to warrant the formation of a class in that subject.

7. Pupils unable to take the full course of seventeen and one-half periods a week, may, by consultation with the principal, arrange a course for five years.

8. The selection of studies is subject to the approval of parents and principal and, whenever necessary, of the superintendent. After studies have been selected, pupils will not be allowed to make changes until permission has been granted by the principal or superintendent. The three upper classes select their studies before the close of the preceding year.

9. No credit will be given a pupil unless a study has been pursued at least a year, or unless the amount required in the course is completed.

10. The school is provided with excellent chemical and physical laboratories. Pupils who are to enter colleges where such work is allowed as part of their preparation, are advised to take one year of science.

11. The Commercial Department has all necessary appliances, and offers thorough instruction in all the branches taken in the best commercial colleges. At present the school has thirty typewriters of the highest grade.

High School Athletics

In order to put the Athletics of the Bangor High School on a firmer basis the School Board appointed as Committee, C. Parker Crowell and the Superintendent. In accordance with the suggestions embodied in their report the following Constitution has been drawn up:—

CONSTITUTION OF ATHLETIC COUNCIL OF BANGOR HIGH SCHOOL

ARTICLE I

NAME

The name of this Body shall be "The Athletic Council of Bangor High School."

ARTICLE II

PURPOSE

The purpose of this Body shall be:

1. To promote the various branches of Athletics and to supervise and direct the same.
2. To see that the various athletic contests are arranged and conducted for the best interests of the School.
3. To represent the Faculty, Alumni and Student interests in the active supervision of Athletics in Bangor High School.

The Athletic Council shall at all times be subject to the control of, and shall be responsible for its acts to the Superintending School Committee of Bangor. Subject to such control

by the School Committee, the Athletic Council shall have full jurisdiction over all matters relating to, or in any way connected with, the Athletic interests of the Bangor High School.

ARTICLE III

MEMBERS

The Athletic Council shall consist of nine (9) members, as follows:

Three (3) members of the Faculty.

Three (3) members of the Alumni or former students.

Three (3) members of the Student Body.

ARTICLE IV

ELECTION OF MEMBERS

The Faculty members of the Council shall be the Principal of the School, the Physical Director and one other member elected by the Faculty. The Alumni members of the Council shall be elected by the School Committee except that in the event of an active Alumni Association of the School being formed, such Alumni Association shall elect the alumni members. The Student members, one from each of the three upper classes, shall be elected by their respective classes by ballot.

The Principal of the School shall be Ex-Officio Chairman of the Athletic Council.

The election of alumni members shall be held at the regular meeting of the School Committee in June.

The election of student and faculty members of the Athletic Council shall be held annually during the week in June following the first Monday at the close of the school year, and all members shall hold office until their successors are elected.

ARTICLE V

JURISDICTION AND DUTIES

SECTION 1. This Body shall have full jurisdiction over all matters relating to or in any way connected with the Athletic interests of Bangor High School, including the power to declare a vacancy in the office of Manager or Captain of any team whenever in the judgment of this Body the administration thereof is contrary to the Athletic interests of the school.

SECTION 2. It shall be the duty of this Body immediately subsequent to its election, to organize and elect a member of the Faculty of the School, who may or may not be a member of this Body, as Secretary and Treasurer, and the said Secretary and Treasurer shall act as custodian of all records and other property belonging to or in any way connected with each Athletic department, and the said Secretary and Treasurer shall hold subject to the direction of this Body, all original estimates and reports laid before it by each manager during the period of his management, together with all Books of Record and all funds remaining as balance to the credit of each Athletic department at the end of its respective season. It shall be the duty of the Secretary and Treasurer to pay all properly contracted and approved bills of the several athletic departments and to supervise all advertising and printing of aforesaid departments. The Athletic Council shall make a written report to the School Committee in June each year, including therein the Secretary and Treasurer's report for the year. All original estimates and reports, together with a statement of the finances of the different departments shall be on file in the office of the Secretary and Treasurer and at all times accessible to members of this Body and the Superintending School Committee. It shall be the duty of the Secretary and Treasurer of this Body to call meetings thereof at any time upon request of any member.

Section 3. It shall be the duty of this body immediately subsequent to its organization to elect an auditing committee consisting of one Faculty member, one Alumni member and one Student member whose duty it shall be to Audit the books of the Secretary and Treasurer and report before the first Monday in June.

SECTION 4. It shall be the duty of this Body to keep fully advised at all times of the exact financial conditions of the several Athletic departments and for this purpose it shall have the power to require the Secretary and Treasurer to submit a statement of the finances of the several departments at any time. And it shall further be the duty of this Body to withhold from any manager permission to engage in any game or contest whenever in the judgment of this Body the conditions warrant such action.

SECTION 5. It shall be the duty of this Body to publish over the signature of its Treasurer in that issue of the Bangor High School Oracle next subsequent to the close of each Athletic season a statement of the financial conditions of that department audited by the Auditing Committee of this Body.

SECTION 6. It shall be the duty of this Body to nominate from the members of the incoming Senior Class not less than two (2) candidates for Manager and from the incoming Junior class not less than two (2) candidates for Assistant Manager, of each Athletic team from whom a choice must be made by a vote of the entire student body. The baseball and track managers shall be elected in October, the football managers in January and the Basketball managers in June of each year.

ARTICLE VI

ELECTION OF CAPTAINS

1. The captain of the football team shall be elected by those members of the football squad who win their B's.

2. The captain of the basketball team shall be elected by those members of the basketball team who win their B's.

3. The captain of the baseball team shall be elected by those members of the baseball team who win their B's.

4. The captain of the track team shall be elected by those members of the track team who have won their B's.

5. The election of the captains of the various teams shall be held at the High School Building. The Physical director shall call and preside over the same. Seven days' notice in writing shall be given. This election shall be held not later than 30 days after the close of each season.

ARTICLE VII.

AWARDING OF LETTERS

Any member of the school who has participated in parts of three or two entire games of football or in parts of four or three entire and regularly scheduled games of baseball; or in parts of four or three entire and regularly scheduled games of basketball; or who has won a point in the Bowdoin or Maine Invitation Track Meet shall be entitled to the "B" of the Bangor High School. The Manager of each team shall be awarded a manager's "B."

REGULATIONS

All students are required to take three full studies and conform to all school regulations. No relaxation of this rule will be permitted except for physical disability or in the case of Post-Graduates who hold diplomas.

For tardiness or absence, the teacher shall require a written excuse from the parent or guardian, and in default of it, may inflict such penalty as may be approved by the Committee.

If a scholar is absent three days in any one month, the teacher may require the excuse to be signed by the Committee.

A scholar, who is absent from school *five successive days* or from examination, without a good excuse, or who withdraws from the school, cannot be admitted to his class until he has obtained a written permission from the Committee or from the Superintendent, and made up the lost lessons to the satisfaction of the teacher.

A rank of 65 in each study is required for promotion.

Scholars who fail of promotion will be classed and seated with the grade in which the failure occurs until all deficiencies are made up.

There is one session of the High school each day of the term, continuing from 8 a. m. to 12.45 p. m.

Any pupils, who for any reason need extra work, may, at the discretion of the principal be called to the High school on Friday afternoon.

OUTLINE OF MANUAL TRAINING

First grade—Paper folding and raphia.

Second grade—Rule and pencil, cardboard and raphia.

Third grade—Cardboard construction and raphia.

Fourth grade—Cardboard construction and raphia.

Fifth grade—Geometric forms in cardboard, basketry and weaving.

Sixth grade—Geometric forms, basketry, weaving and whittling.

Models should be centered around various interests.

Suggestive centers—Home interests, school interests, occupations, games, New Year's, Valentine's Day, Washington's Birthday, Easter, May Day, vacation, Thanksgiving, Christmas, election, the weather, transportation, shops and nature study.

Report of the Abraham Lincoln School

Mr. D. Lyman Wormwood, Superintendent of Schools:

An examination of the teachers' registers shows that nearly all the marks for absence during the past year stand against the names of a few pupils. The most of these are chronic cases and due mainly to a spirit of indifference on the part of parent or guardian. A child permitted to remain at home on some trivial excuse, finds it easy to repeat the offense at an early date. Especially, if he finds the work beginning to go a bit hard because of lost recitations. One day may seem a mere trifle to a parent, but many times it is sufficient to destroy the child's interest in a study.

The cases of actual truancy have been remarkably few considering the large number of pupils attending. The spirit of the school is against such folly. The pupils, themselves, consider one playing truant, dishonest to himself and to his school, a weakling, and to be pitied rather than praised.

Outside of measles we have been quite free from contagious diseases. So that absence from that cause has been a small factor.

The large number entering from the primary schools necessitated making an extra fourth grade and crowding the first three grades back into two rooms. The number of pupils to a room is as a whole too large to permit the best work being done. Too much of the teacher's energy is used in controlling so large a body, especially during the spring term.

At the beginning of the year, our textbooks were in an extremely dilapidated condition because of taking them home

to meet the urgent demand for outside study due to the one session day. Though our petitions have been graciously granted, we have felt timid in making such wholesale demands upon your appropriation and are glad to state that each pupil is now well equipped with a good working outfit.

Advancing the Elementary history to its proper grade, the seventh, and placing the Beginner's in the hands of the sixth, has put the work on a far better standing. A good knowledge of these two books, containing as they do the salient features of our country's development, satisfactorily fits the pupil for the broader work carried on in greater detail in the eighth and ninth grades. A similar adjustment in geography has succeeded equally as well. One cannot listen to a recitation in Home Geography, without realizing the increased efficiency from a text appropriate to the grade.

The physiologies introduced into the fourth to seventh grades inclusive, have proved not only intensely interesting but exceedingly fruitful. For instance, pupil inspection, adopted from the author's suggestion, has largely done away with the necessity of sending pupils from the room to wash the face and hands. Scores of children hitherto ignoring teeth and nails are now proudly exhibiting both for approval. This early development is just the thing needed to prepare for properly handling the higher text which heretofore has proved a heavy burden.

The geographical readers throughout the grades, have filled a long felt want in furnishing interesting descriptive matter to supplement the regular text. Emphasizing as they do the usable side of the subject, a pupil almost unconsciously assimilates a vast store of general knowledge.

The introduction of a classic into the eighth grade is a step in the right direction. We hope to see others follow.

A number of excellent maps have been added to our equipment. The lower grades are now well taken care of for the present. The upper grades, especially the seventh and eighth, need a few more to cover the work as outlined for the coming year.

Supplying each pupil with drawing crayons and each grade with brushes and scissors has done away with much delay and confusion.

Calcimining the ceilings and walls has much improved the appearance of the building inside. The woodwork needs re-vernishing, and the walls and partitions of the toilet rooms cleansing.

The inkwells need to be put in order. Many are either cracked or chipped so as to allow the ink to run over and injure the books beneath.

Four of the rubber mats are worn through enough to trip people in passing and might prove dangerous in a fire drill.

It would be possible to keep the floors much cleaner if the boys' yard were properly graded and gravelled.

We hope to see the promised fence installed at an early date. The improvement in discipline and satisfaction to the public will well repay the expense.

We feel that the year's work has been very satisfactory. A good spirit of cooperation has prevailed throughout. We heartily thank you for your generous and kindly consideration of our needs.

Respectfully submitted,

HERBERT POOLE, *Principal.*

Report of Hannibal Hamlin School

To the Superintendent of Schools:—

In accordance with your request, I hereby submit my first report of the Hannibal Hamlin School for the year 1913-14.

At the beginning of the year the crowded conditions of the sixth grades made it necessary to employ another teacher and make use of the room in the basement known as the sewing room. This was done at the opening of the winter term and Miss Evelyn Harvey was employed as teacher.

The regular work has been carried on in a very satisfactory manner and good work has been done in all the grades.

The school is well supplied with text books and with one or two exceptions the rooms are well provided with wall maps.

Two new charts are needed for the work in Physiology.

Many of the rooms need to be reseated and as this fact has been mentioned to the School Board I will not dwell further on it here.

The stairs, on one side of the building, need new treads as those in use now are badly worn and very loose.

Some step should be taken to prevent the birds from perching under the eaves and over the windows as they have already become a nuisance and are beginning to give the building an unsightly appearance.

The windows should be screened to better the sanitary conditions of the building.

On election days, the teams and automobiles should not be allowed in the school yard. There were several near accidents

this spring and some step ought to be taken to avoid this unnecessary danger to the pupils.

I wish to take this opportunity to thank the teachers, the School Board and yourself for courtesy and help extended to me throughout the year.

Respectfully submitted,

CHARLES P. ALLEN,
Principal, Hannibal Hamlin School.

Report of the Supervisor of Kindergartens

To Supt. D. Lyman Wormwood:

I submit my annual report for the year closing June 19, 1914.

It has been a year comparatively free from trying experiences unless the hindrances to regular work, which come from the ills common to the life of little children, may be spoken of as trying. At the end of the year it is possible to see more accomplished than was thought probable during those periods of interruption.

The kindergarten has no way of determining the amount of knowledge acquired by the four and five year old children as has the elementary school, neither is it necessary, but I sometimes wish it was possible to measure the contents of their little minds and mark it down upon a card. Surprises would await every parent, especially the fathers and mothers of the children little inclined to reveal themselves. Of course the things they can talk about are not many, the things they can do are not so very big in themselves, but the kindergarten children are not very big, and these acts, whether physical, mental or moral, suited to their ability at four or five years, mean greater and better things at eight and ten. When they leave kindergarten at six years of age they know much about form and color, about number to eight as a whole and in its simple fractional parts, they can count to ten both forward and backward, they have good *fundamental notions* of music, drawing, reading and writing, they have a larger vocabulary than the child from the home, they can think and act, they have a considerable fund of information and they are interested in

and alive to the beauty of life around them as is evidenced by the following:

On June nineteenth the Bangor Railway and Electric Company gave the children of our eight kindergartens a car ride into the country for a nominal sum. Men at work in the fields or by the roadsides waved to them as they passed. The pleasant smiles and greetings all along the way meant those children are having a *good time*; the parents were glad to have them go because of the *good time*; it was the last day of school, and to the ordinary thinker simply a happy release for both teacher and child. This it *may* have been, but it was on the contrary, one of the richest days of the entire year. Better teaching was done on that last day by some of the teachers aboard the cars, and more was personally learned by the children of others than on any other one day of the spring term. One discovered a bird house perched on a high pole; another the tiny openings—bird doors—in the gable of a barn; they saw the lambs in the pastures, the horses and cows turned out to graze, the chickens running around the coop, or “incubator” as one boy called it; they were excited over the logs in the river and especially pleased with the bridges they crossed; they exclaimed again and again over the different bits of natural scenery. It was surely a rare day. Every child is a lover of Nature. What a pity that the time ever comes when he ceases to be a lover! Indeed it would never come if those who arrange our school courses would only plan for less book study in a man made school house and more personal investigation in the great school house of Nature. I want the parents of our children to realize that these times of escape from the school room, whether for a walk or a car ride, are strictly educational and in accordance with the ideas of the great founder of the kindergarten.

So much has been said, through the columns of the daily papers, about the meetings for the mothers and of the desire to so increase the value of them that they, whose children are in the higher grades, will wish to become constant attendants, that I will simply express to you at this time my appreciation of your assistance, especially in arranging for the use of Assembly Hall, in securing printed blanks to be used in extending notices of meetings, and for the permission to reach the mothers through the grade children.

During the past year I have kept a careful record of each day's work. It would be impossible to incorporate it into this report, even if it was a suitable thing to do, but this I may say; the pages of my Daily Reminder show continuous activity, both in school hours and out, in the work of my department. At the opening of the school year I imposed many tasks upon myself, some of which have not been accomplished but I hope to bring them to completion in due time. No teacher has been asked to perform a duty which I am unwilling to perform myself or have not performed many times over.

One valuable director and two assistants who have served the department for a long time have, as you know, resigned their position; two to become home makers, one a grade teacher. Although I shall welcome to the ranks the workers elected by the School Board I await their decision with interest, because it is true that the personality, the professional attitude and the teaching ability of the persons placed over the children just passing from the home to the school will be felt in the Bangor High school. The boy and girl needs an earnest teacher in every grade along the way, I admit, but the little kindergarten child needs such a teacher the most. He is like the warm, soft iron, so easy to mold but so soon cold, defying the blows of the hammer. The teachers we need for the kindergarten and first

grade are hard to find but should be sought and once found should be secured.

For the unusual opportunity so courteously granted by you to all the kindergarten teachers, and accepted by some, I heartily thank you. Reference is made to the very rare privilege of attending the convention of the International Kindergarten Union held in Springfield, Mass., last April. Those who attended received inspiration and an uplift that will be felt in their schoolrooms for many months. Personally I wish to express appreciation for the privilege of visiting the model kindergarten at Wellesley, Mass., the school for defective children in Providence, the Montessori school in Augusta, Maine, and for the special arrangement made to present the need of universal kindergarten work in Maine to the Maine Federation of Women's Clubs in their midwinter session. It has been a year of greater opportunity for the kindergarten department than is often possible; in return I believe I can pledge higher aims and truer efforts.

Respectfully submitted,

NELLIE E. BROWN,

Supervisor of Kindergartens.

Report of Medical Inspectors

To the Superintending School Committee:

Gentlemen:—Your medical inspectors have made the required examination of each pupil in the public schools during the first term of the year, and have made the monthly inspections according to your rules. The results of such examination and inspection appear in the detailed reports of each inspector. The general health of the pupils has been good during the year, though measles has been prevalent in several localities. It is the opinion of the board of inspectors that the period of greatest contagion for most contagious diseases is during the first few days of the disease, when the patient is not ill enough to be kept out of school and when very few symptoms of the disease have appeared, and this is the time when the disease is most frequently spread. We would suggest that teachers ask their pupils to tell them whenever they hear of a contagious disease among the school children or in the neighborhood of the schools, and that teachers immediately notify the Superintendent or inspector of the schools of such reported cases. That the School Board make arrangements whereby the "district nurse" when notified of such a case by the superintendent or inspector may visit the place and see if proper care is taken to prevent the spread of the disease. It would be better of course if there were a "school" nurse employed for such purpose but until such can be provided the services of the district nurse might be utilized at small expense. In this way the danger of the spread of contagious diseases will be much lessened. We would also suggest that the grounds about the suburban schools be in-

creased so that an adequate playground would be provided for these schools and that special instructors visit them regularly and give them instruction in physical culture and teach them such games as are appropriate for such pupils. This would add to the attractiveness and efficiency of the suburban schools. It is not right for a community to make laws compelling children to attend school, and not take every precaution that modern science suggests for the protection of the health of the pupils while in the schools. Therefore it is incumbent upon those having the care of the schools to provide such inspection by those having special knowledge as will best conserve the health and comfort of the pupils during their school days. We would therefore suggest that in addition to the yearly "examination" and the monthly "inspection" that there should be regular "visits" by the inspector to each school at least every two weeks during the school year. This is necessary in order to make school inspection the protection that it is intended and ought to be.

Respectfully submitted,

D. A. ROBINSON,

Ch. Board of Inspectors.

Medical Inspection Statistics

To the Superintendent of Schools:

Whole number of children examined 4218

Respective number of children excluded from school on account of the following diseases:

Measles	188
Diphtheria	1
Scarlet Fever	2
Whooping Cough	7
Mumps	30
Vermin	57
Skin Diseases	28
Tonsilitis	24
Tuberculosis	1
Chicken Pox	3
Not Vaccinated, (Given time)	169
Respective number of cases found not demanding exclusion from school:	
Adenoids	137
Defective Vision	255
Defective Hearing	28
Enlarged Cervical Glands	7
Non-contagious Skin Diseases	24
Nervous Diseases	4
Non-contagious Eye Diseases	4
Non-contagious Ear Diseases	4
Enlarged Tonsils	341
Defective Teeth	213
Deformities	1

Report of Domestic Science Department

Mr. D. Lyman Wormwood, Superintendent of Schools:

Owing to the fact the Domestic Science department was not completed at the beginning of the year, class work was not begun until the last of October.

At present the grades go to the High School for their cookery and sewing classes. With the growth of the department it will be necessary to equip a room for their use in one of the grammar buildings.

The work in Sewing begins in the sixth grade and continues through the eighth. Following is the course:

GRADE VI

SEWING PROBLEMS

1. Sewing Bag
2. Hem a Towel
3. Pillow Case
4. Sewing Apron

Position in Sewing; directions for use of needle; thread; scissors.

Sample of Stitches

Even, Uneven, Long and Short Basting

Running

Overhanding

Overcasting

Cross Stitching

Models

French Seams
French Fell Seam
Folding a Hem
Mitering
Garment and True Bias
Putting on Bands
Plackets
Gathering and Sewing on Ruffles

GARDE VII

Problems

1. Hemstitched Handkerchief
2. Corset Cover or Chemise
3. Drawers

Machine Instruction

Use and Care of Machine
Use of Hemmer

Models

Button Holes
Whipped Seam
Sewing on hooks, eyes, tape
Darning Stockings
Tucking (Machine)

Instruction throughout the year in the manufacture of needles, pins, thread, scissors.

GRADE VIII

Problems:

Kimono Apron or Nightgown
Petticoat or Slip
Cooking Apron and Cap
Embroidery (collars, jabots, doilies)

Models:

Three Cornered Darn	} Teach as Models Apply on Articles brought from home.
Straightway Darn	
Hemmed on Patch	
Overhanded Patch	

Instruction in source and manufacture of cotton, linen, silk and wool.

The Ninth grades have Cookery and take the following Course:

- I. List and Care of Equipment.
- II. a. The Range—Care, cleaning, management of gas supply, practice of economy, use and care of individual stoves.
b. The Ice Box—construction; advantages; care.
- III. Beverages—Making of tea, coffee or chocolate.
- IV. Fruits—Stewed fruits; stewed prunes, apple sauce or baked apples.
- V. Vegetables—Experiments to show cellulose and starch; Prepare one sweet juice vegetable. Make white sauce.
- VI. Vegetables—Prepare two strong juice vegetables.
- VII. Vegetable Soups—One Cream Soup, One Puree with Crackers.
- VIII. Review and Written Lesson.
- IX. Starch—Experiments showing starch test; effect of heat and water. Prepare one corn-starch dessert.
- X. Sugar—Make one candy.
- XI. Cereals—Preparation of two cereals with and without fruit.
- XII. Scalloped Dishes—Preparation of one scalloped vegetable and one dessert.
- XIII. Milk—Prepare Cottage Cheese and Junket.
- XIV. Milk Products—Making of butter in a bowl.

XV. Cheese—Preparation of macaroni, rice or potatoes with cheese.

XVI. Eggs—Preparation of eggs cooked in water and directly over the fire.

XVII. Milk and Egg Combination—Preparation of one baked and one boiled custard.

XVIII. Meat—Study chart of cuts and uses. Have pupils draw an illustration of Boston Cuts.

XIX. Meat Continued—Broiling—Preparation of Chops and Hamburger Steak.

XX. Gelatine—The preparation of at least one gelatine dessert.

XXI. Fish—Prepare Fish Chowder.

XXII. Fish—Preparation of left-over fish in two ways.

XXIII. Flour Mixtures—Experiments with acids and an alkali to show formation of carbon dioxide gas. Prepare Sweet and Sour Milk Griddles.

XXIV. Flour—Test flour for gluten and starch. Prepare muffins.

XXV. Soft Doughs—Prepare Baking Powder Biscuits. Prepare Sour Milk Biscuits.

XXVI. Yeast Bread—Experiments with yeast. Preparation of Raised Rolls.

XXVII. Breads—Preparation of Rye or Entire Wheat Bread.

XXVIII. Invalid Cookery—Diets; Preparation of an Invalid's tray.

XXIX. Home Nursing—Care of sick room; care of patient. First Aid to the Injured. Household Sanitation. Disinfectants.

XXX. Cakes—Preparation and Baking of a simple cake.

XXXI. Salads—Preparation of two Salads using French and Boiled Dressing.

XXXII. Frozen Desserts—Preparation of two Ices.

XXXIII. Housekeeping—Sweeping, cleaning; dusting, dangers of vermin, disinfection.

XXXIV. Table Setting and Serving—Method and precision, Immaculateness of linen, Brightness of silver and glass, Noiseless Serving, Mock Service.

XXXV, XXXVI. Preparation and serving of a breakfast and luncheon by the class.

With this practical work they are taught also something of the composition and nutritive values of foods and their places in the diet.

The High School class devote three double periods a week to Domestic Science—one for Sewing and two for Cookery.

The work in cookery includes a knowledge of the fundamental principles of cookery with laboratory, experimental, and recitation work. This covers a study of the nutritive value, composition of cereals, and cereal products, vegetables, sugars, starches, fish, meats, batters and doughs. Throughout the year food values and dietetaries are discussed. Toward the close of the year simple menus are planned and served by the class.

In addition to the regular classes three afternoon classes were formed which registered fifty pupils.

The course in Sewing includes a review of the work in the grades. Undergarments, waists and skirts were made. This work is supplemented throughout the year with recitations on Shelter and Clothing.

A four years' course has been outlined which intends to give the girls a practical education in the Household Arts.

Miss Rebecca Chilcott has taken the grade classes and through her enthusiasm and ability has gained very good results.

Respectfully submitted,

ARRA L. SUTTON.

Report of the School Agent

BANGOR, MAINE, March 17, 1914.

To the City Council:

I herewith submit my annual report as School Agent for the year ending March 1, 1914:

The act of the last legislature requiring school boards to have charge of the repairs and work on all school property made it necessary for the Superintending School Committee to ask for an additional appropriation of \$7,000. I believe this was a step in the right direction because the school officials are better in touch with the needs of the buildings and are not hampered with an outside appropriation from which, in former years, they were obliged to take what they could get. The money has been economically spent and satisfactory results obtained. Plans and specifications were made and bids advertised for most of the work done during the vacation and although started a little late everything was satisfactorily completed for the fall term.

The temporary wooden buildings on Forest Avenue and Harlow Street used by the High School, Manual Training and Domestic Science departments since the fire were sold at auction and have been torn down or moved away.

The most important work done on the school buildings is as follows:

Abraham Lincoln Schoolhouse—The walls and ceilings in all the rooms and corridors were kalsomined, the partitions in the

assembly hall and basement removed, the old iron fence taken down and the lot on Forest Avenue filled with loam and gravel.

Hannibal Hamlin Schoolhouse—New electric lights have been installed, the doors to the rooms changed to open outward and new stair treads laid.

Pond Street Schoolhouse—This building received two coats of paint outside, a new fire escape was added, new windows put in and repairs were made on the roof and gutters.

State Street Schoolhouse—New Electric lights have been installed in all the rooms and some minor improvements made.

Longfellow Schoolhouse—Two new steel ceilings were built and the rooms and halls painted and kalsomined.

Bower Street Schoolhouse—The outside of the building received two coats of paint and the ceilings and walls of the rooms and halls were painted and kalsomined. A new fire escape was placed on the building and other minor work done.

Pearl Street Schoolhouse—New hardwood floors were laid in the rooms downstairs and a fire escape placed on the building.

Allen Street Schoolhouse—A new fire escape extending from the upstairs room was built and minor repairs made.

Cottage Street Schoolhouse—A new hardwood floor was laid in the room downstairs, a fire escape built, and other improvements made.

SUBURBAN SCHOOL BUILDINGS

These school buildings have received much needed attention during the past year and with one or two exceptions are in first class condition. Some of the buildings have been remodelled and new additions made.

Stillwater Avenue Schoolhouse—An addition for wood and toilets was built onto this schoolhouse, the roof was shingled, the outside received two coats of paint, the inside was painted and kalsomined, and an extra door was built leading into the entry, and some of the windows and outside shutters replaced.

Hillside Schoolhouse—A new addition for the wood and toilets, the shingling of the roof, two coats of paint inside and outside, new seats and new windows and outside shutters were among the improvements made on this building.

North Bangor Schoolhouse—Two coats of paint inside and outside, a new hardwood floor, outside shutters and minor repairs have placed this building in first class condition.

Odlin Schoolhouse—The old seats were replaced with new ones, the entry remodelled and the schoolroom and shed were painted.

Tyler Schoolhouse—The addition to the building to house the wood and toilets, two coats of paint inside and outside, the remodeling of the entry and several minor improvements have added greatly to the appearance and usefulness of this schoolhouse.

RECOMMENDATIONS

Among the recommendations I would suggest the following for this year:

The grounds about the High School should be graded and concrete laid around the entire building. This, I believe, would shed much of the surface water, which in time, under the present conditions, is bound to be injurious to the rear foundation.

The boiler house of the High School should be remodelled. At present, during the cold weather, only one day's supply of coal can be stored there and in case of a big storm it would be impossible to haul coal to the building. Another serious condition there is that all the pumps and controllers are now exposed to the coal dust. These machines are very valuable and with the exposure they are now subjected to would soon be worthless. I would suggest that a special appropriation be made for the work to be done on and about this building.

At the Abraham Lincoln School the grounds on the Forest

Avenue side should be graded and a substantial iron fence built around it.

At the Valentine Schoolhouse I would suggest a new heating plant. The extreme cold weather of the past winter has proven that the furnaces now installed there will not do the work satisfactorily. With existing conditions, I believe the change could be made for about \$1500. The saving in coal would soon pay for the new installation. Another condition I wish to call your attention to is the gutters on the First Street side of this building. During the winter large icicles hang over the sidewalk endangering the lives of the pupils and passers-by, and although no accidents have occurred thus far, something serious may happen at any time. If possible this year, the rooms and corridors should be kalsomined.

The rooms and corridors of the State Street building should be kalsomined, the boiler room covered with sheet iron and the plaster in the basement rooms repaired.

Should the Mt. Hope Schoolhouse be used this year, I would suggest that an addition be built similar to the ones built on some of the suburban schoolhouses last year.

There are numerous minor repairs to be made on some of the other schoolhouses which I will not mention in detail now.

I wish to take this opportunity to thank the Superintendent of Schools and School Committee for the many courtesies extended to me.

Respectfully submitted,

GEORGE W. CLUFF,

School Agent.

Rules and Regulations of School Agent

Adopted June 2, 1914.

DUTIES OF THE SCHOOL AGENT

1. It shall be the duty of the School Agent to visit all school buildings in the City at least twice each month, and the rural schools at least twice each term.
2. The School Agent shall look over the buildings and grounds, correcting, through the janitors, any neglect of their duties. He shall also see to it that the closets, outbuildings and fences are kept in proper shape.
3. The School Agent shall act as inspector of all repairs on school property. He shall impress upon the janitors the necessity of keeping the basements clean and free from waste paper and other material liable to cause fire.
4. It shall be the duty of the School Agent to see that all school buildings are supplied with flags and poles properly equipped for displaying the flag.
5. When a vacancy occurs in any school building by reason of sickness or absence of any janitor, it shall be the duty of said janitor to notify the School Agent who shall procure a substitute during such absence.
6. When such absence occurs the School Agent shall notify the Superintendent of any temporary change.
7. He shall make a report of schools visited and his findings monthly to the Superintendent.
8. The Agent shall perform the duties herein stated and any other duties which the School Board may direct.
9. The rules and regulations to take effect when approved by the School Board.

Truant Officer's Report

BANGOR, MAINE, March 24, 1914.

To the City Council:

I herewith submit my annual report as Truant Officer for the year ending Feb. 28, 1914.

During the year 157 cases have been reported to me, most of which have been caused by sickness. One arrest was made and the boy discharged by the court on the promise of good behavior.

Respectfully submitted,

GEORGE W. CLUFF,

Truant Officer.

Music By Paul T. White

O list to the voice of the future—
 Its accents sweet and clear;
 "Your playing days are over;
 Real working time is near."

The brook must flow on to the river,
 The child become the man;
 Let us promise the voice that is calling
 To give to it all that we can.

Let each wear a face filled with brightness,
 Bear a heart filled with hope and with truth;
 Let the seeds of our four years of high school
 Grow into full blossoms of youth!

The four happy years are now ended;
 Our teachers and friends we must leave,
 May we cheerfully shoulder our burdens;
 To school-day ideals ever cleave!

Elizabeth Rattray

Music by Abraham F. Goldberg

Borne onward by soft springtime zephyrs,
 Announced by the carolling birds,
 Enshrouded in fragrance and color
 Comes June with her wonderful words.

She tells us of joys and of sadness
 To be ours in the days close at hand:
 The joys are her music and flowers;
 The sadness, that we must disband.

This June is our June; and we listen
 With reverence, half fearing to hear,
 Now lo! It is ours, the soft message;
 We know that our parting is near.

Four years we have shared the dear feeling
 That Friendship alone can impart,
 But now as the last hour draws nearer
 A sorrow creeps into each heart.

A sorrow that's not wholly darkness,
 A sorrow that's not wholly pain;
 Ever bright in the Realm of the Future
 Shall the memories of school-life remain.

Report of City Solicitor

BANGOR, MAINE, March 16, 1914.

To the Mayor and City Council of the City of Bangor, Maine:

The following report of the City Solicitor is submitted for the year 1913-14:

CASES IN COURT

At the beginning of my term of office there were pending in the Supreme Judicial Court appealed cases from awards of damages for land taken for the New Street, so called, which runs from the junction of Harlow and Center Streets to Market and Cumberland Streets, the following: Ellen W. French, Earl W. Wilde, and Charles S. Gibbs. Upon the advice and recommendation of my predecessor in office and by vote of the City Council these cases were settled and at the April term of the Supreme Judicial Court, 1913, proper entries were made in the aforesaid cases, thereby getting these finally disposed of.

In the matter of heirs of Mathew Moriarty, Hannah Kane, and Augusta V. Lawson, wherein damages were awarded to the several parties interested for the laying out of said New Street, settlements have been made with each, and the deeds properly executed and delivered to the City of Bangor and the damages paid.

In re Joseph P. Bass vs. City of Bangor, being an appeal from the assessment on the Central Street widening, argued at the June Law Court held at Bangor, in 1913, I beg leave to report that the case was decided by the Law Court in favor of the City of Bangor and that the action is now pending and will

be in order for trial at the April Term of the Supreme Judicial Court, 1914, upon the measure of damages.

In the matter of the case City of Bangor vs. Town of Veazie, being an action to recover for pauper supplies furnished certain Spencer children, report that this action was argued at the July term in Portland and by decision recently handed down the position of the City of Bangor is sustained and judgment rendered to the City in the sum of \$114.85, debt, with costs of Court taxed at \$52.78.

Suit was brought against the town of Clifton to recover pauper supplies furnished Charles Stillings and family. Suit was entered and the matter adjusted without trial and entry made in Court protecting Bangor from liability henceforth.

In the matter of the claim of Penobscot Machinery Co. vs. City of Bangor, being a claim for damages caused by the refusal of the City of Bangor to allow the Penobscot Machinery Co. to rebuild upon premises it held by leasehold at No. 104 Franklin Street. This matter has finally been settled by the City Council passing a resolution requesting the abatement of taxes in favor of the Penobscot Machinery Co. for a term of years.

Hogan & Callan brought suit against the City of Bangor to recover for certain furnishings placed in the Bangor Municipal Court. This suit was entered in Court and was in order for trial at the January Term, 1914. Upon recommendation of the Mayor and by vote of the City Council the matter was settled without proceedings in Court, the bill paid and vouchers on file with the City Treasurer.

In closing I wish to extend my thanks to my predecessor Brother Hugo Clark, for the very efficient manner in which all papers pertaining to my department, briefs upon the law and statement of facts were in when turned over to me. Certainly it was a great help to me to have all these in such excellent form.

1914]

CITY OF BANGOR

417

I also wish to extend my thanks to the members of the various departments for their willingness and readiness in furnishing information called for.

Respectfully submitted,

B. W. BLANCHARD.

City Solicitor.

Report of the City Missionary

To His Honor, the Mayor, and Members of the City Council:

I herewith submit my report for the municipal year 1913-14.

I have responded to 992 calls for aid; placed 19 children in homes and institutions; removed 19 girls from bad surroundings; provided transportation for 7 stranded individuals; furnished day's outing for 1122 children.

The receipts have been as follows:

Stetson fund	\$187 50
Charity Dance	200 00
Fire Relief	51 00
Hon. E. H. Blake	25 00
Elks	10 00
Friends	22 25
	<hr/>
	\$495 75

The city missionary's office has furnished bedding, clothing, fuel, food and medicine for those needing it. Mrs. Johnson wishes to thank all who have aided her in her work.

Thanks are given to C. S. Jones for furnishing fish and food supplies and physicians for the aid they have given.

Respectfully submitted,

JENNIE M. JOHNSON,
City Missionary.
