## SAVING IN PLEDGE PAYMENTS OFFERED SUBSCRIBERS

MEMORIAL FUND COMMITTEE TO ALLOW DEDUCTIONS FROM REMITTANCES IF PAID BY APRIL 1 OR PRIOR TO JUNE 1—"PAY AS YOU GO" POLICY ADOPTED—APPEAL IS MADE TO LOYAL MAINE MEN AND WOMEN TO HELP COMPLETE PAYMENTS ON INDOOR FIELD UNIT AND MAKE EARLY CONSTRUCTION OF NEEDED GYMNASIUM UNIT POSSIBLE

Announcement has been made by the Memorial Fund Committee of an offer to all subscribers to the fund, which will effect a savings for the subscribers, if pledge payments are made in advance of their due dates, before April 1, or between now and June 1, 1926.

The offer comes from the committee after a careful study of the situation in which it finds itself, in that there is a need at the present time for ready cash with which to meet a loan of \$65,000 borrowed in anticipation of pledge receipts, to complete payments to the contractors and building supply houses, for bills incurred in the construction of the Indoor Field Unit, the completed section of the Memorial Gymnasium-Armory Building, now being used daily by the undergraduates of Maine.

The committee proposes to pay subscribers to the fund the interest it would ordinarily have to pay the banks, by allowing subscribers to make deduction from their pledges, if the payments are made prior to April 1 or June 1, 1926, in advance of the pledge period, whenever that might be, and varying in individual cases. The discounts have been figured at the rate of 6% per annum, this being the rate of interest which will have to be paid on all bank loans required by the committee to complete payments on the first unit, already erected.

If paid April 1, subscriptions can be discounted as follows:—

### EXAMPLE, \$100 ANNUAL PAYMENT

Payment Due	Deduct	Reduced To
June, 1926	1%	\$99
June, 1927	7%	93
June, 1928	13%	87
		<hr/>
		\$279

### SAVING \$21

If paid June 1, subscriptions can be discounted as follows:—

Payment Due	Deduct	Reduced To
June, 1927	6%	\$94
June, 1928	12%	88
		<hr/>
		\$182

### SAVING \$18

It is the hope of the Memorial Fund Committee that the success of the proposed offer may make possible the completion of all payments due on the Indoor Field Unit of the Memorial Gymnasium-Armory Building, prior to Commencement this year. The committee states that in order to fulfill these expectations there will necessarily have to be a generous response to this suggested saving plan, made by discounting pledge payments due in the future. In short, the committee has adopted a "pay as you go" plan which will be adhered to in the future.

Many inquiries have been received as to when construction of the Gymnasium section of the building will be commenced, and to all inquirers the committee has stated that the work will not be undertaken until the money is in sight. It is realized that the Gymnasium section is needed to supplement the Indoor Field and give to those who are now using the completed section the facilities for dressing, baths, etc. which are needed, but which now are no nearer to the Indoor Field than Alumni Hall.

But before construction can be started on the Gymnasium section, the Indoor Field must be paid for, and the money for the Gymnasium must be in hand. On these points, the committee is in accord in the interest of good business and with a realization that the "pay as you go" policy is the best to follow.

Loyal Maine men and women who have never failed when called upon to help, can be of great assistance at this time, by cooperating with the committee and effecting a savings for themselves at the same time, in making their pledge payments to the fund by April 1, if possible, or if not possible then, prior to June 1, 1926.

**THE JOB IS HALF DONE. HELP COMPLETE IT. DO IT FOR MAINE.**

## ACTING PRESIDENT BOARDMAN ADDRESSES ALUMNI GROUPS

Acting President Harold S. Boardman,—Alumnus,—Dean, now in charge of the University's administration, and at all times, the University's friend, and Alumni Secretary Robert P. Clark, '15, carried the 1926 message of the University of Maine to alumni in New York City, Schenectady, Philadelphia, Washington, and Boston on a trip of one-night stands which has been completed recently.

At every hand, great interest in the University's present and future problems was found and all of the meetings of the associations in the above-named cities were reported as "the best ever." The New York group received President Boardman with enthusiasm and passed a resolution favoring him for president of the University. His reception over the entire "circuit" was sincere, and those who helped make their local get-togethers record-breakers, were well repaid. "Boardy" as he is familiarly known to all Maine men and women, spoke on the present day problems of the University and what the future may hold in store.

The alumni's representative on the campus, "Bob" Clark, painted a current-event picture of 1926 university undergraduate life, touching on important events of the year, and stressing particularly on the interesting information he had compiled on the status of the Memorial Gymnasium-Armory. He told of the Indoor Field, the completed unit, now in use and urged alumni wherever he spoke, to do their bit by making their payments as early as possible that the "job might be completed" by the construction of the gymnasium section.

*(Local association reports are printed separately, and in order that those who were not privileged to hear Acting President Boardman, may learn his views on the present day situation of the University, parts of his address as delivered on the recent trip, are reprinted as part of this article.)*

"It is with much pleasure and pride that I represent our University at this time. Most of my life has voluntarily been spent in Maine, and as a native of the State, I have always loved her woods and mountains, her lakes and streams, and I have spent many happy hours among them. My favorite haunt has always been in the vicinity of Mt Katahdin, and for many nights I have lain under the stars at the edge of the timber line listening to the sound of the wind as it came from the distance, roaring overhead in the tree-tops, and vanished. Many trout I have taken out of those most alluring streams and many miles I have paddled in canoe on lake and river. Opportunity for this kind of a life, which appeals so strongly to me, has been the deciding factor many times when I have been tempted to change my work to other fields. Had it not been possible, however, for me to keep in close touch with matters pertaining to my profession as an engineer and to education in general, even this would not have kept me

"An alumnus of the University, for twenty-three years I have also been a member of the faculty, serving the institution, as you know, in various capacities from the grade of instructor to that of its acting chief executive. This connection has bred in me an abiding faith in the institution and a desire to see it become of the greatest possible service to the State. What is this service? Perhaps some would define it in magnificent terms placing size and endowment first. Others might think in terms of social activities and athletic victories, while others would demand quality of scholarship. All kinds of ideas have been advanced as to what kind of an institution we should attempt to develop. The problem has never been definitely solved, or what is perhaps a

Acting President Boardman

more nearly correct statement, no solution has ever been advanced which has met with the approval of all concerned.

"I have often wondered if our love for our Alma Mater has blinded us, so that we have been unable to see and to think logically and clearly. Do not misunderstand me. I am not belittling our institution. The past is a record of which we are proud, but the future is before us and higher education is undergoing a nationwide scrutiny.

"I would not go so far as to say that it must justify its existence, but many economic questions of vital importance must be answered in the near future.

"It is well known that immediately following the world war there was a general movement toward higher education that taxed the capacity of the educational

facilities of the country. Various predictions were made regarding its duration, the most conservative being that a reaction would appear within a short time. Although a decline was noticed, pre-war conditions have not yet been approached, nor is there any indication that they will be. Many problems, however, some new, and some of previous origin, have suddenly appeared and they must not be passed lightly by. Some of them are of a local nature, while others are of national importance.

"Nearly thirty years ago the name of our institution was changed from Maine State College to University of Maine. Dr. Harris, who was then president, had a vision of the future development of education and foresaw a greater field of possible service under the new name. As a matter of fact, however, the original charter was broad enough to allow any reasonable expansion, for very few additional powers were asked for or granted under the more dignified name of University. Although the Legislature of 1897 apparently settled for all time the status of the institution, we are annoyed from time to time by isolated attacks upon our position.

### ANSWERS CRITICS

"Usually these attacks are based upon incorrect premises, and upon a knowledge of only a part of the story. In such cases we would welcome an opportunity to give personal information in order that conclusions may be at least logical. The chief difficulty is, however, that such persons commit themselves in print before obtaining as much information as they should, and then are usually unwilling to allow their error. The most common attack is aimed at our College of Arts and Sciences in an attempt to show that we are too ambitious. The principal objec-

tions advanced are that there is not only no call for such a division of the institution, but that our charter fails to give a right for its creation. It is also claimed that it is a useless expense, and that we are offering an unnecessary duplication of the work of the other colleges in the State. Only recently we were criticised quite harshly in the press for the construction of an Arts and Sciences building, and advised that the money should have been used to further the interests of Agriculture and Engineering. The critic apparently did not know that the chief reason for the construction of this building was for this very purpose, and that not only has a much greater efficiency resulted among the departments of the Arts College, but the space vacated by them has relieved a very grave congestion in the buildings devoted to engineering. As head of the Engineering College I fought for years to attain two ends: first, house the service departments (Arts departments) where we could use them more efficiently and second, get them out of our engineering quarters. To spend money upon engineering equipment and to expand departments in that college before we had proper space would be to say the least, poor administration. Plans are in existence for the development of the University as a whole which we would gladly present for constructive criticism, but we object to the kind of criticism which is based upon ignorance.

"Attention is called to the necessity of such courses as English, Modern Language, Physics, Mathematics, Astronomy, Biology, Psychology, Philosophy, Economics, and others, in connection with the Agricultural and Engineering curricula, and the statement was made at the Student-Faculty-Alumni Banquet in January that to abolish the College of Arts and Sciences would force the other colleges (of the University) to establish such courses. The intent of the remarks was very plain, yet the before-mentioned critic construed the statement to apply to the other colleges of the State, and suggested that only an ignorant person would not know that such courses were already offered by them. The University of Maine has friendly relations with the other Maine colleges and we do not seek to usurp their prerogatives. They each have as many students as they can properly care for. Notwithstanding this fact, our University has a registration of 1500, 688 of whom are registered in Arts and Sciences. It would appear that should our Arts College be abolished, the latter would have to go to some other State for their education or else be forced to take agriculture or engineering.

#### NOT SIDESTEPPING

"While I do not wish to take up too much time in answering criticisms I feel that it is not just or fair for the administra-

tion of our institution to be accused of sidestepping. It appears that the situation was faced squarely in the address to which reference has already been made, and I am sure that the trustees of the University heartily subscribe to the policy; and Governor Brewster, who was present, expressed his appreciation and stated that he felt that the misunderstandings of the past were at an end. The statement referred to was as follows.

"A fair and impartial examination will soon show that in order to keep our standards of excellence high we should have more buildings, pay better salaries, and obtain considerable new equipment. It is also common knowledge that our heating plant is in a very questionable condition. Where is the money coming from to meet this demand? The answer appears to be that the greater part must come from the State. How much can the State afford to give toward the support of its State University? The question has never been answered and I believe it should be and the garment should then be cut according to the cloth. The Trustees and President should not be forced to spend their time and effort in going to Augusta every two years to fight for funds. A settled policy should be decided upon and lived up to by both parties. I believe that a policy can be worked out which after the institution is once placed in a first-class condition will result in an elimination of the disagreeable misunderstandings which have too often appeared in the past."

"It is interesting to note our present registration. Total 1500, of which 84.8% are from Maine, 7.7% from Massachusetts, 2% from New Hampshire, 2.3% from the rest of the United States, and 0.8% from foreign countries. If we omit the Summer session, only 10% come from without the State.

"One of the problems which confronts the entire country is in connection with admission and elimination. What measure shall be applied to those desiring to enter college in order to determine their fitness or unfitness for college work, and how can we reduce the discard? It is very evident that this is not only an academic question but an economic one as well. Recent engineering statistics covering a period of twenty years show that from 55 to 65 per cent of those admitted to representative institutions failed to graduate and that the rate is growing higher. Approximately one half of the total elimination takes place prior to beginning the Sophomore year. The University of Maine was one of the institutions from which these conclusions were drawn, and it was found that we are near the upper limit. While definite figures are not available for students taking other curricula it has been estimated that the elimination will go as high as 50%. I wish to stress the point

that these figures are nation-wide and are not limited to Maine. What is the answer? Should we attempt to keep this discard from entering, or should we segregate them and teach them in separate classes? It is not fair to the good student to burden the class with the poor student, and that they tend to keep standards down is evident. It is a question how much benefit is gained by a boy who attends college one or two years and then finds he is not fitted to continue. It certainly costs money to keep him, and a large part of the effort of his instructors to teach him. Is the ideal institution the one which prevents him from entering, or the one which receives him and gives him a training in proportion to that which he can absorb? This question can be answered only by careful study and serious consideration.

#### BUILDING PROGRESS CITED

"I know you will be interested in the progress of our building program. I shall omit details regarding our new Memorial Gymnasium-Armory, as I am sure our Alumni Secretary will give you a complete description. I cannot refrain, however, from expressing my pride and satisfaction in a building which is a credit to the alumni who made its construction possible. I wish to assure you that it is fully appreciated by the students, and it will fill a long felt want in the development of our teams.

"Plans have been completed and accepted for a new mechanical engineering laboratory which will be built during the coming Spring and Summer. This building will contain a well-equipped hydraulic laboratory in addition to gas engine, materials and steam laboratories. Much time and study has been given to the design of the entire plant so that when it is completed and fully equipped it will compare favorably with any in the country.

"The laboratory is a wing of a proposed mechanical engineering building which we hope to obtain some time in the future. When this time arrives, we shall have one of the best engineering educational plants of its size in the United States.

"The time is fast approaching when we must make estimates and plans for our next two-year budget. It is my hope that the University and State authorities may view the situation in a calm and dispassionate manner. We are not seeking undue expansion, or development into a great university. Our desire is to meet the service required of us in an efficient and reasonable manner. The education of the boys and girls of Maine presents a financial problem which must be carefully solved. Governor Brewster has made the following statement.

"If in this half century the State shall recognize an obligation to furnish a college education to anything like the number of

# BASEBALL TEAM IS NOW HARD AT WORK AT INDOOR FIELD

"Biggest Net in Captivity" Houses Coach Brice's Pupils who are over Month Ahead of Previous Year's Practices—Prospects for Fast Team Look Bright with Many Veterans Available and Return of Perry, Star Pitcher of 1924 Nine

BY ALUMNUS

Candidates for Maine's 1926 baseball team are now working out daily in the Indoor Field, completed section of the Memorial Gymnasium-Armory Building, and thus, no longer have the track athletes a "monopoly" on the huge structure in which every alumnus, former student, friend, and undergraduate of the institution should be vitally interested.

Last month, I spoke of the work Coach Kanaly's track and relay teams were doing, all because a wonderful athletic plant had been made possible by the completion by your building committee,—and a corking good active committee at that,—of the Indoor Field. In this article, I will attempt to put across to you, my impressions gained on a recent visit to the Indoor Field in company with "Bob" Clark, your secretary on the campus, who, like myself, when in search of an "inspiration," ploughs through the snow and out across the thickly blanketed Alumni Field to the Indoor Field building.

You never saw such a net as that which separates the baseball half of the Indoor Field from that section which is being used by Coach Kanaly's field event men. I believe that the manufacturers said that the net was the largest they ever made. Again, Maine leads. Anyway, it's huge, and when dropped into place, completely screens off a "deep" baseball diamond from the remainder of the Indoor Field.

No organized practice was being held the day the writer paid his second visit to your big building, although a handful of baseball men including several veterans of last year's team and some of those who played on the freshman nine, were sharpening up their batting eyes and driving out liners into the net and past the fielders who were "shagging" the balls for the strenuously working pitcher who had taken the box. Coach Brice, busy then with basket-ball duties, planned to get his ball candidates out in earnest about February 27, and until that time, had delegated Captain Hap Crozier of Brownville, to take charge of the informal workouts.

Imagine a baseball infield enjoying practice with every man in his natural "deep" position, months prior to the first game on the New England trip!

Imagine what Maine should do in coming early-spring baseball competition, as compared to what she has done in the past with but one or two outdoor practice sessions, prior to starting away to her first game with Colby on Patriot's Day at Waterville.

The Indoor Field should mean the re-birth of baseball supremacy, and who knows,—a repetition of past victories over Harvard may be the direct result of all this early training under ideal conditions,—just as good as outdoors,—made possible by the Indoor Field.

And Maine should have a good team this Spring. Speaking of baseball prospects in a recent edition of the Maine Campus, Freddy Newhall, star football end, who writes of things athletic in the Maine weekly, has the following to say.—

"Maine's chances for the State title this year look extremely good. Only four letter men, two of them regulars, have been lost to the team by graduation. Captain Drew Stearns of the 1925 team and George Gruhn, shortstop and catcher, respectively, are the regulars who have passed from the ranks of college baseball. "Tim" Lawry, an outfielder, and "Al" Repscha, pitcher, are the other two letter men who will be missing this year.

"The holes at short and behind the bat will be tough ones to fill, especially since "Jack" Duffy, star shortfielder on the frosh team, and Carl Paul, sub catcher last year, did not return to college. These two had been depended upon to step into the shoes of Gruhn and Stearns, but it is evident that Brice must look elsewhere. "Pat" Peakes, who took "Jim" Blair's place at halfback so neatly last fall, will probably be called upon to fill up the hole behind the plate this spring. Peakes did the receiving on the freshman team last year and is the logical candidate for the job.

The rest of the positions will be efficiently taken care of by letter men if all goes well. The return of "Pete" Perry, star fliker two years ago, will be a big help to the team. He and Crozier will make a pair of twirlers who will be hard to beat. With the exception of the shortfield position, the 1925 infield will remain intact. Newhall, who played the last of the season at first after having been called in from the outfield, will be given a stiff battle for the job by "Jack" Sanborn, who saw service in several games last year but was forced out on account of a bad knee, and "Jack" Hammond, slugging first-sacker on the frosh team last year.

"Joe" Gay is in a class all by himself at the keystone sack, and should not experience much trouble hanging on to his job. "Moses" Nanigan, captain of the freshman outfit, will also be a candidate for the second base job.

"Mike" Cassista is the veteran at third base. He broke in in fine style at the hot corner last year and should have an even better season this spring with his year of experience behind him.

"The 'foresters' outfield' also remains intact for the coming season. Hackett, Wing, and Meserve should make up a fast combination, the former two being letter men. "Duffy" Lewis, who finished the season at Newhall's place in left field, is also a letter man and makes up the fourth of this veteran group."

Baseball was a dead issue in March up to this year. Alumni will recall so-called practice workouts in the stuffy and cramped cage in Alumni Hall, which afforded only a brief working out and limbering up of battery candidates. Practice sessions for the whole team could not be held until a few days prior to the first game, and these sessions were usually staged on the President's lawn or the Kappa Sig lawn or some dry spot which King Winter had abandoned.

And now, the Indoor Field comes into its own and votes in favor of early baseball practice. By the time another month rolls around the 1926 Maine ball nine will be well underway toward a prosperous season, and all because of the advantages afforded by the Indoor Field, which alumni have helped to give to Maine that her teams and her boys might be better fitted for competition in games, meets and in life.

Our appetites for inspiration satisfied, Bob Clark and the writer started away from the Indoor Field, taking one last look, as we crossed the track to the door, and standing for a moment, watching Artie Hillman do a turn of the cinder track,—for you see the track team works just the same, undisturbed by baseball activity, and all goes on hand in hand for a bigger and better Maine. Great stuff, this Indoor Field.

## FRESHMAN BASEBALL 1926 DATES APPROVED

April 24—Coburn at Orono.  
 April 28—Brewer at Brewer.  
 May 1—Millinocket at Orono.  
 May 5—Kent's Hill at Orono.  
 May 12—Higgins at Orono.  
 May 14—Coburn at Waterville.  
 May 19—Brewer at Orono.  
 May 22—Foxcroft at Orono.  
 May 26—M. C. I. at Orono.  
 June 5—M. C. I. at Pittsfield.  
 June 8—Higgins at Charleston.  
 June 12—N. H. Frosh at Durham.

# MAINE BEATS WEATHER MAN AND RIVALS AT CARNIVAL

Annual Mid-winter Festivities Largely Attended—Blue Winter Sports Team Shows Heels to Bates, Bowdoin and Colby—Band Concert, Masque Ball, and Basket-ball are Indoor Features

Despite two days of bad weather, the University of Maine Winter Carnival, sponsored by the Intra-Mural A. A. of the institution was a successful event and was claimed by undergraduates who participated and others who were spectators, as the best ever held. The festivities opened Thursday evening, February 18 with a band concert and play, *The Merry Wives of Windsor*. Friday, with its rain, slush and a howling wind combined, was given over to intra-mural snow and ice events, all of which were held despite the adverse conditions. Saturday's events of inter-collegiate competition followed the banner social event of Friday night, the Carnival Ball, and the week-end was concluded by the basket-ball games between the Maine 'Varsity and Freshman teams and New Hampshire's 'varisty and yealling quntets respectively.

## MAINE SNOW BIRDS PLAY HOST AND WIN

Orono, Feb. 20.—The University of Maine Winter Sport team, showing remarkable strength in both snow-shoe and ski events, swept the field in the intercollegiate competition which marked the last day of Maine's Winter Carnival.

The final results were: Maine, 45; Bates, 22; Colby, 7; Bowdoin, 4. The fifth annual carnival wound up tonight with open house parties in all fraternities. The change in weather from the slushy conditions of the day before to a cold windy day made conditions ideal for the outdoor events.

O. T. Colby, Maine freshman, was high point man of the day, taking first place in the seven mile cross country ski race, the 440-yard ski dash and ski proficiency, totaling 15 points, Noyes also a Maine freshman, was second high point man with nine points. Gray of Bates, Brown of Bates and Turner of Maine, scored seven points each.

Cups were awarded to the winners of the interfraternity events, held yesterday

between the halves of the Maine and New Hampshire basket-ball game in Alumni Hall.

The summary:

Cross Country, five-mile snow-shoe race, won by Noyes of Maine; Turner, Maine; Murdock, Maine, Brown, Bates. Time, 42 minutes.

Cross country ski race, seven miles; won by Colby of Maine; Drabble, Bates; McDoughal, Colby; Trask, Maine. Time, one hour, eight minutes, 32 seconds.

Ski jump, won by Gray, Bates, 44.8 feet; Dunbar, Bowdoin, 38.3 feet; Peaks, Maine, 45.9 feet, disqualified for falling; Sylvester, Maine 43.1 feet, disqualified for falling.

Ski proficiency, won by Colby of Maine, 16 points; time, three minutes, 27 seconds. Second, Gray of Bates, 15.66; time, three minutes, 46 seconds. Third, Drabble of Bates, 13.66; time, three minutes, 51 seconds. Fourth, Rollins, Colby, 14.75; time six minutes, six seconds.

440-yard ski dash, won by Colby, Maine; Rollins, Colby; Drabble, Bates; Andrews, Bowdoin. Time, one minute, 47.5 seconds.

440-yard snow-shoe dash, won by Scribner, Maine; Brown, Bates; Noyes, Maine; Giles, Colby. Time, one minute, 27 seconds.

100-yard ski dash, won by Turner, Maine; Brown, Bates; Noyes, Maine; Currie, Maine and Murdock, Maine. Time, 15 seconds.

## MAINE LEADS ALL AT BOWDOIN CARNIVAL

Brunswick, February 12. The University of Maine Winter Sports team cleaned up most of the points at the first annual Bowdoin Carnival here today, scoring 25 points. Bates was second with 20, Bowdoin 14, and Colby 7.

In the cross country snow-shoe race Maine won all four points, the men crossing the line almost together. Bates was strong in the cross country ski race.

Bob Turner, captain of the team, cleaned up all the points in the events in which he entered and did much by his snow-shoeing to bring up Maine's score.

The team consisted of Bob Turner, captain '26, Murdock '27, Noyes '26, Trask '27, Donovan '26, Peakes '28, Sylvester '27 and Colby '29.

## BATES SKI ARTISTS CAPTURE TOURNEY

Lewiston, February 13.—Bates with a total of 40 points won the Maine Inter-collegiate Winter Sports Meet here this afternoon. Maine, with 28 points, was second; Bowdoin with six was third, and Colby failed to score.

Matsunaga's superiority on the skis enabled Bates to win, the Japanese student finishing first in the jump and the efficiency test and third in the ski race. Matsunaga was high individual point scorer with 12.

Bagley of Bates and Turner of Maine tied for second with ten each.

Bates won three of the five events, Turner of Maine capturing both snow-shoe races, the 150-yard dash and the cross country run.

Summary:

Ski cross country run—won by L. Bagley, Bates; Colby of Maine; Frost, Bates; Scammon, Bates. Time, 51 minutes.

Snow-shoe dash, 150 yards—won by Turner, Maine; Scott, Bowdoin; Wills, Bates; Brown, Bates.

Snow-shoe cross country run—Won by Turner, Maine; Murdock, Maine; Brown, Bates; Day, Maine.

Ski race, one mile—Won by L. Bagley, Bates; Scammon, Bates; Matsunaga, Bates; Colby of Maine.

Ski efficiency test—Won by Matsunaga, Bates, 57.8 points; Scammon, Bates, 45.77 points; Colby of Maine, 40 points; Andrews, Bowdoin, 39.65 points.

Ski jump—Won by Matsunaga, Bates; Gray, Bates; Larkum, Bowdoin; Carlson, Bates.

Ring, 1925, L. B. Rogers, 1913, S. M. Shultz, 1924, L. J. St. Clair, 1923, E. E. Stickland, 1904.

New Hampshire State has instituted the "Time Unit Plan" whereby each student will be obliged to do fifty hours' work each week in order to pass the regular four-year course. The plan will go into effect with the incoming freshman class.

## MAINE MEN ON AIR FROM WGY STATION

Following are the names of the University of Maine men now in the employ of the General Electric Company, Schenectady, N. Y., who participated in the International Intercollegiate Broadcasting Program from Station WGY, on the evenings of February 27th and March 6th:

E. P. Bassett, 1899, W. D. Bearce, 1906, B. Bradbury, 1916, H. R. Butler, 1920, R. H. Carlton, 1899, H. W. Chadbourne, 1902, H. J. Chase, 1924, B. R. Cornell, 1902, K. Cyphers, 1925, H. A. Dolley, 1895, M. R. Driscoll, 1925, H. D. Dunton, 1890, E. G. Glidden, 1896, R. H. Hawthorn, 1918, E. L. Judkins, 1907, B. V. Kelly, 1902, H. P. Mayo, 1899, W. L. Merrill, 1900, W. C. Plumer, 1921, C. A. Priest, 1922, Carl

# LOCAL ALUMNI GROUPS HOLD MEETINGS

## PHILADELPHIA

In spite of inclement weather twenty of the local alumni turned out for the annual banquet which was held at the Manufacturers' Club, Broad and Walnut Street, Philadelphia, Wednesday evening, February 10th

The guests of honor were Acting-President Boardman, and Alumni Secretary Clark. Our local weatherman was on the job and provided the worst snow storm in several years to greet the visitors, in order that they might feel perfectly at home

Following a very tasty meal, the President C H Lombard, '00, introduced J A Hayes, '00, who acted as toastmaster. Mr Hayes in the name of the association welcomed our visitors to the city and introduced first—Secretary Clark, and then Acting-President Boardman, who spoke regarding the conditions at the University and problems connected with it. The meeting was then thrown open to a round-table talk which was enjoyed by all

Our association is indebted to L G Paine of the Class of '85, for making arrangements for this banquet. Unfortunately, however, Mr Paine was obliged to miss the banquet, being out of the city at the time. Mention is made of W W Crosby, of Class '93, at present connected with the State Highway Department, at Harrisburg, who came 150 miles to attend the banquet. The following were present—

A W Drew, '90, W A Valentine, '91, W W Crosby, '93, A Moulton, '95, F E Weymouth, '96, G S Frost, '98, M B Downing, '99, J A Hayes, '00, C H Lombard, '00, M Ross, '01, C H Pritham, '01, A D Case, '04, J H Elms, '06, E A Stanford, '06, W A Fogler, '09, E C Drew, M S, '12, G M Caulton, '18, R G Conforth, '20, C A McKee-man, '23; H W Raymond, '24; G S Frost, '98

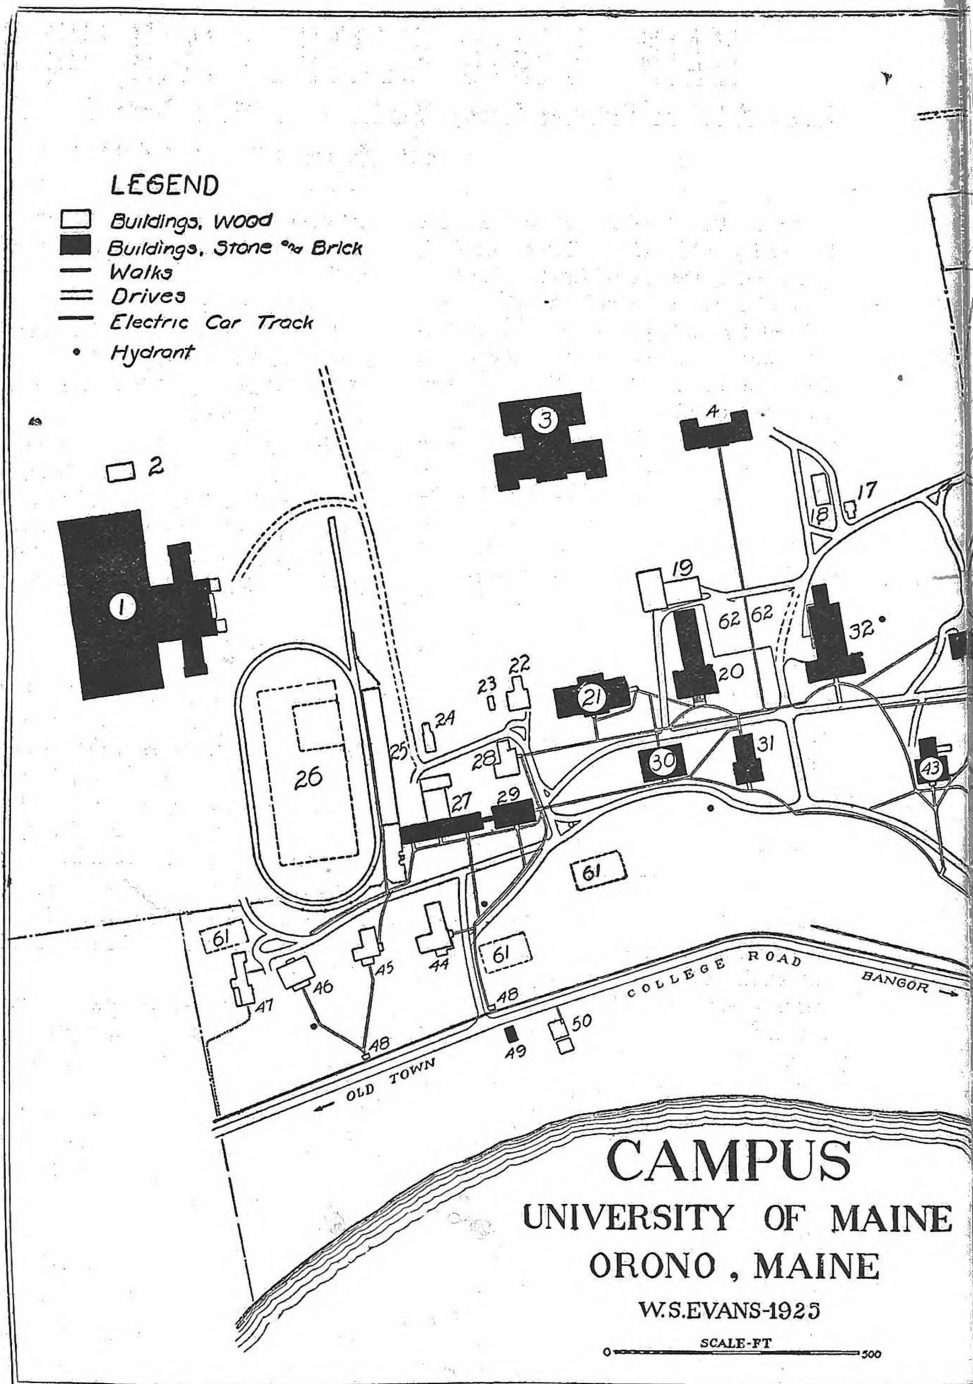

Reported by W A Fogler, '09, Secretary-Treasurer of the U of M Alumni Association of Philadelphia

## SCHENECTADY

The Eastern New York Alumni Association met at the Mohawk Club, Schenectady, Monday evening, February 8th, for its annual meeting and banquet. Wesley C Plumer, '21, was elected President of the Association. Daniel Chase, '08, made a very efficient toastmaster

Following talks by Alumni Secretary, Robert P Clark and Acting-President H S Boardman an informal discussion took place. The meeting was a success in spite of bad weather

# NEW CAMPUS DRAWING SHOWS LOCATION

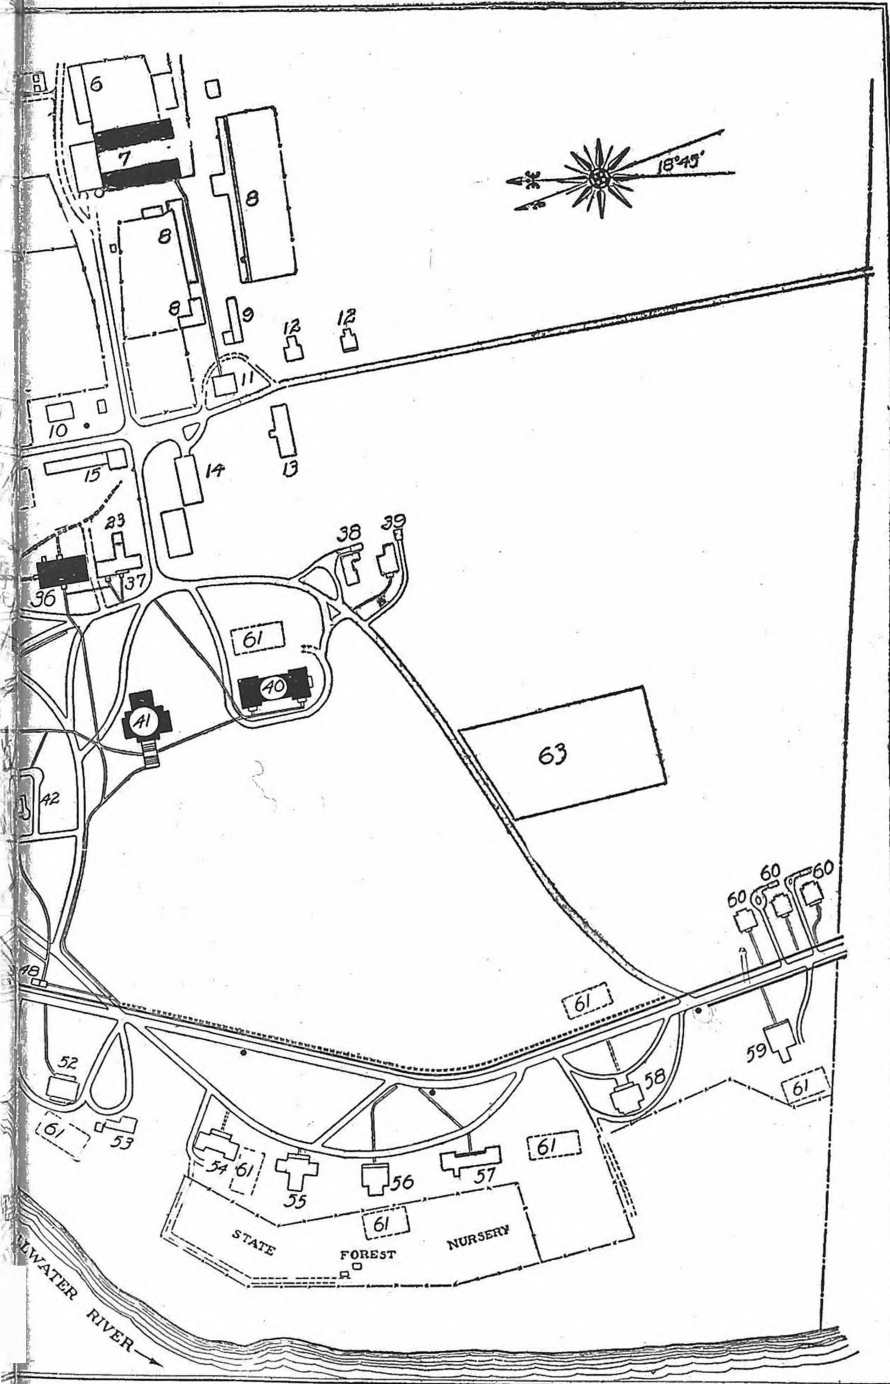

Through the kindness of the University administration, the ALUMNUS prints the Campus Legend which was incorporated in the recent edition of the 1925-26 University catalogue. This is of interest to every one connected with the University, and alumni will be interested particularly in the location of Building No. 1,—the Memorial Gymnasium-Armory, its size as compared to that of other buildings, and also in the location and size of the proposed Mechanical Engineering Building, front elevation cut of which the ALUMNUS printed on its cover in the December-January issue.

The key to the above cut is as follows —

- 1 Memorial Gymnasium-Armory Building
- 2 Temporary Heating Plant
- 3 Mechanical Engineering Building (Proposed)
- 4 Arts and Sciences Building
- 5 Pig Pens
- 6 Sheep Shed
- 7 Cow Barns
- 8 Poultry Plant
- 9 Ice House
- 10 Farm Equipment Storehouse
- 11 Creamery
- 12 Farm Residences
- 13 Greenhouse
- 14 Stable
- 15 Tool Shed
- 16 Flower Garden
- 17 Observatory
- 18 Carpenter Shop
- 19 Garage
- 20 Lord Hall
- 21 Aubert Hall

# D SIZE OF GYMNASIUM ARMORY

- Print Shop
- Hose House
- Infirmary
- Grand Stand
- Athletic Field
- Hannibal Hamlin Hall
- M C A Building
- Oak Hall
- Wingate Hall
- Fernald Hall
- Alumni Hall
- Horticultural Building
- Holmes Hall—Experiment Station
- Stock Judging Pavilion
- Winslow Hall
- Home Economics Laboratory
- Residence of Supt of Grounds
- Residence of Professor Corbett
- Balentine Hall
- Library

- 42 President's House
- 43 Coburn Hall
- 44 Beta Theta Pi House
- 45 Theta Chi House
- 46 Sigma Nu House
- 47 North Hall
- 48 Waiting Room for Electric Cars
- 49 Old Pumping Station
- 50 Plumber's Residence
- 51 Heating Plant
- 52 Sigma Alpha Epsilon House
- 53 Dean Merrill's Residence
- 54 Delta Tau Delta House
- 55 Kappa Sigma House
- 56 Phi Eta Kappa House
- 57 Mount Vernon House
- 59 Phi Kappa Sigma House
- 60 Faculty Houses
- 61 Tennis Courts
- 62 Parking Space
- 63 Girls' Athletic Field

## N. Y. ENDORSES 'PRES.' BOARDMAN

The annual banquet of University of Maine alumni in greater New York was held at the Fraternity Club, Friday, February 5th. In spite of the fact that the city had just been swept by the worst blizzard of the winter, 65 sat down to the banquet.

Roger Castle, '21, led the cheering while the singing was led by Anderson, author of "Sweet Adeline."

Pies Mason, '09, introduced "Prexy" Monohon, '14, as toastmaster.

Alumni Secretary, Robert P. Clark, '15, spoke on current events at the University. Dr. Ralph H. McKee, now of Columbia and formerly professor of Chemistry at the University of Maine, then spoke on "Engineering Education." The principal speaker was Acting-President H. S. Boardman of the University who held the attention of the gathering by his talk, parts of which appear elsewhere in this issue.

The New York alumni were very enthusiastic over the possibility of "Boardy" becoming President of the University and the meeting unanimously went on record as endorsing him for that position.

### BOSTON

Over one hundred members of the Boston Alumni Association attended the annual banquet at the Hotel Westminster on Friday, Feb. 12. Acting President Boardman and Alumni Secretary Clark were guests from Orono.

Other speakers at the dinner were Rev. Dr. Harry Crane of Malden Methodist Church, Robert Clark, '15, secretary of the General Alumni Association, at Orono, Me., also commander of the American Legion in Maine, and Oren "Ginger" Fraser, the University's football captain, under whom the team won the Maine Championship last season.

Harry E. Sutton, '09, president of the General Alumni Association and toastmaster, was introduced by the local alumni president, F. D. Knight, '09.

Of about 30 fathers of students at U of M invited to attend the dinner, 12 were present, and were uproariously cheered by the gathering at the behest of "Joe" McCusker, '17, cheerleader and cheer leader.

A letter from A. W. Stevens, '07, in the United States flying service, champion parachute jumper, was read.

A letter from Dr. Clarence C. Little, who gave up the presidency of the University last summer to go to Wisconsin University, stated that his love for U of M has increased with absence.

A committee of three drafted a return message and sent it to Dr. Little.

## The Maine Alumnus

Published monthly by the General Alumni Association of the University of Maine during October, November, December, February, March, April, May and June.

Subscription, \$1 per year. Single copies, 20 cents

Editorial and business office, Orono, Me  
Office of Publication, Burr Printing Co.,  
46 Columbia St., Bangor, Me

### Editorial

You have read in earlier editions of the ALUMNUS of activities within Indoor Field, completed unit of the Memorial Gymnasium-Armory Building. Additional word pictures will be painted through this medium for you in the future and every effort will be made to keep you posted on the status of the building, its use, and what's new at the Indoor Field on the Campus. It is the aim of the Memorial Fund Committee and its Building Committee that each and every alumnus, former student, and friend of the University who expressed an interest in this building by means of a subscription pledge, will be given the whole story of the progress made. In this connection a vital message which everybody should read, think over, and take action upon, is printed on Page 51 of this issue. As has been said before, the job is but half done, there is much to do yet, and while you have given the undergraduates at Maine an opportunity of which they never dreamed, the big task of doing it for Maine and completing the structure which will always stand as a memorial for those who did their stuff for us, must be carried on. The individual cooperation of every subscriber is necessary to bring the Memorial building to completion and the first appeal for your support is made at this time. May you realize the situation, and do your part by acting promptly.

At the time of mid-year examinations, the first week in February, there appeared on the Track Bulletin Board in the Indoor Field the following notice, signed by Frank Kanaly, coach of track, and which is printed here that the alumni of Maine may fully realize the spirit of the coaching staff at Maine, for this is just another example of the cooperation the athletic instructors are giving the University:—

#### A FINE EXAMPLE OF MAINE SPIRIT

Better results in the examinations should be experienced by omitting regular assignments of training. But there will be normal exercise, and I shall be here at my usual hours, 8 to 12 and 1 to 6, to meet all. No assignment boards will be up, as we do not want any one to feel that we are urging training, for fear of being misunderstood. Meet the examination in the spirit of track competition. Good Luck.

(Signed) FRANK KANALY,  
Coach of Track

Passing up this splendid example of good spirit without comment, and failing to pass it along to the alumni of the University, would be nothing but pure neglect on our part. Coming as it does in these days when we hear and read so much on the over-emphasis of intercollegiate athletics and the improper balance of athletics in college and university life, it cannot but make us all feel just a little bit proud of the man who wrote the notice and the spirit he showed in so doing. We cannot do more than repeat past expressions of faith to the alumni that athletics are on a sound and level-headed basis at the University of Maine, and that the instruction in all branches of sport is in the hands of capable men,—and gentlemen—every one of them.

Whether it was in New York, Schenectady, Philadelphia, Washington or Boston, Acting President Harold S. Boardman, and Alumni Secretary Robert P. Clark, report a fine reception from the local associations visited, the friendly Maine hello, handshake and increased interest in the present-day University, its problems, and hopes for the future being manifest at all

times. It was the writer's privilege to be present at the Boston Alumni Association's banquet and get-together and from personal observation, the Boston bunch put over its meeting in big-league style. An innovation was the entertaining of thirty-two fathers of undergraduates residing in Boston and vicinity. The "dads" were enthusiastically received and from the looks on their faces, they enjoyed every minute of a very successful meeting. Other associations would do well by taking a few leaves from the book of plans of the banquet committee in Boston.

Through oversight, the football schedule for 1926 was omitted in the December-January ALUMNUS

but is made a part of this issue and is printed with the 'varsity and freshman cross country schedules for next Fall, thereby making a convenient Fall Sports Schedule for the alumni of the University. We suggest that you cut out the schedule and pin it to your calendar, that you will remember more easily when Fall rolls around, just when you should come back to Orono, or follow the Bears on foreign fields, as they go out to meet our competitors.

#### FALL OF 1926 ATHLETIC CALENDAR

#### VARSITY FOOTBALL

Sept. 25—Fort Williams at Orono.  
Oct. 2—Rhode Island at Orono.  
Oct. 9—St. Stephen at Anondale, N. Y.  
Oct. 16—Conn. Aggies at Orono.  
Oct. 23—Bates at Orono.  
Oct. 30—Colby at Orono.  
Nov. 6—Bowdoin at Brunswick  
Nov. 13—New Hampshire at Durham or Manchester.

#### VARSITY CROSS COUNTRY

Oct. 15—New Hampshire at Durham.  
Oct. 29—State Meet at Lewiston.  
Nov. 3—Alfred at Orono.  
Nov. 15—New England at Boston.  
Nov. 22—Nationals at New York.

#### FROSH CROSS COUNTRY

Oct. 23—Edward Little at Orono.  
Oct. 29—Lee Academy at Lee.  
Nov. 5—Brewer at Orono.  
Nov. 15—New England at Boston.

### U. OF M. BROADCASTING STATION WGBX IS BUSY

The University of Maine's Broadcasting Station WGBX is now in operation with a power of 100 watts on a wave length of 252 meters. The first program was given on January 24th. Interesting musical numbers, lectures and basket-ball games have been broadcast, and a real start has been made toward radio service to the people of the State.

A committee of faculty members composed of Prof. L. J. Pollard, chairman, Dean W. J. Creamer of the College of Technology, Director A. W. Sprague of the Department of Music, and Lester H. Shibles, of the Extension Service has been appointed to take charge of the arrangements for future broadcasts. Prof. Pollard is the director of the new Division of University Extension which is planning to use the local station to carry its work to the people of the State. This committee planned the concert broadcast by the Maine band on Tuesday, Feb. 23. Concerts by the Glee Club, and faculty and student quartets will be sent out on the air at early dates. The band concert consisted chiefly of old time melodies which have proved their popularity with the radio audiences.

During Farmers' Week, the last part of March, it is planned to broadcast the lectures given in connection with the event in order that farmers in all parts of the State may listen in on what is going on in Orono.

Programs are broadcast regularly on Wednesday evenings at 7:30 o'clock and Sunday afternoons at 2:00 o'clock.

For its Wednesday evening programs, in addition to musical numbers, and readings, instructive talks on economics, agriculture, engineering, education, and home economics are being arranged.

For its Sunday afternoon programs in the future, the stations will broadcast musical selections, and occasionally short talks in keeping with the character of the day.

By the time the ALUMNUS is off the press, the station will probably have been allowed to increase its power to 500 watts. The increase in power will make it necessary to reduce the wave length from 252 to 234 meters to minimize interference with the Portland Station WCSH. This wave length assignment, it is believed, is only temporary, and it is hoped that a higher and more easily received wave length may be obtained within a few weeks.

With the steel framework completed, work on the masonry of the new University Club in Boston has been started. The building is located on Stuart Street, to the rear of the Copley Plaza and Westminster Hotels.

### PENOBSCOT VALLEY ALUMNI ASSOCIATION NOTICE

To the Members of the Penobscot Valley Alumni Association —

By the recent mailing of post paid announcements requesting payment of dues in order that the work of our association may be carried on, there has grown a slight misunderstanding, explanation of which will be made through the columns of the ALUMNUS for the benefit of those who comprise our association.

Requests have been made that a payment of \$4.00 be made to Ralph Whittier, treasurer of the association. This amount consists of dues of \$2.00 each for the years 1925 and 1926. No dues were collected in 1925. No notices were sent to the members, and accordingly the first notice which was mailed during the last week in January, was the first notice of the 1925 indebtedness, as well as that of 1926. It is hoped that members will respond to this call for funds without the necessity of another notice and further expense to our treasury.

The payment of dues provides the only revenue of the association, which is used largely to pay for the two scholarships of \$50 each which are awarded at Commencement to two members of the student body, residing in the county, who have improved their scholastic standing and have been active in the undergraduate life of the University. The balance of our income is used in payment of incidental expenses in connection with the annual Fall buffet supper and the Spring banquet at annual meeting time. We have no other source of revenue than from collection of dues and accordingly, if we are to function at all, it is necessary that request for payment of dues be met cheerfully and promptly.

Attention to our members is called to the fact that once a graduate or former student leaves the University and takes up residence in Penobscot County, he or she automatically becomes a member of our association, in a like manner as he or she automatically becomes a member of the General Alumni Association. In mailing notices concerning meetings, banquets, or asking for payment of dues, we use the Addressograph plates of the Alumni Secretary's office, and every alumnus or former student of the University, living within the boundaries of the county receives our notice. Every one in the county is a member of the association whether dues are paid or not. In the past we have looked upon our association as a divided body, composed of one hand of the active, and on the other hand, of the non-active members. The active member is the one who pays his dues and comes around to the meetings whenever called. We want more active members and broadcast this plea for help at this time.

### MAINE SCIENTIST MAKES IMPOR- TANT DISCOVERY

Dr. Edith M. Patch, state entomologist, has discovered the source of annual infestation of the melon. From Russia to South Africa, from England to India, on remote islands in the Pacific, as well as from our own State of Maine, reports of the damage done by tiny plant lice—officially known as aphids—have been gathered. Finally it was discovered that the aphid that works on melons is the same species all over the world, but aphids have peculiar life habits. During the summer they live on one kind of plant, but as fall comes near they fly over to a totally different plant where they lay their eggs. These eggs hatch, and an aphid appears that looks somewhat different, and that lives during the winter. In the spring the winged form is again produced and flies back to the summer plant. Each species of aphid has its own particular plants on which it thus spends its life.

For three years Dr. Patch worked with the melon aphid trying to find its winter habitat. At the end of that time, her search was rewarded. The common weed—live-for-ever—was guilty of harboring the pest during the winter season. Only by the aid of this common plant, can "aphis gossypii" carry on its deadly work on the melons. Elimination of these weeds will eliminate the lice.

### UNIVERSITY OF MAINE SPONSORS STUDENT CONFERENCE

A Student Conference composed of delegates from Bowdoin, Bates and Colby, and also State Normal Schools was held at the University Feb. 26-28. The Conference was under the auspices of the M. C. A. and Y. W. C. A. and was the first of its kind in the State and similar to the one held annually at Northfield, Mass. The great advantage of this Conference is that more students will be able to become interested in the Christian affairs of the day. It is estimated that 150 delegates from the colleges and normal schools of the State attended.

The much quoted "a chain is no stronger than its weakest link" applies to our situation. The success of the General Alumni Association can be well measured in a way by the success of the local groups, members of which form the big alumni family of the University of Maine. Let's all cooperate to make the Penobscot Valley association one of the strongest links in this big chain. Your individual support will certainly be appreciated.

JOHN P. RAMSAY, Ex-'18, Pres.

Penobscot Valley Association.

## MAINE ONE-MILE RELAY QUARTET BREAKS EVEN IN TWO BIG RACES

Losing to Boston College, one of the fastest relay outfits in the East, at the K of C games in Boston, January 30, and winning from New Hampshire University, fast becoming one of Maine's most friendly and deadly rivals, at the B A A games on February 6, were the early lot of the U of M fliers of Frank Kanaly's tutelage.

Boston College is always represented by a whirlwind team, and the four which met Capt. Henry Eaton and his baton-passers proved no exception. Dailey, the Eagles' lead-off man, took the lead from "Bucky" Rounsville, gaining the jump at the first corner. His successor, Ingoldsby, was able to increase the gap over Allen Burnham of Maine, and Rider and Higgins were fast enough to hold their own over Torrey and Capt. Eaton. The winning time was 3:08 2-5.

Maine had better luck at the B A A games, winning from New Hampshire in the annual scrap between the two colleges. Atkins, the New Hampshire lead-off man, had a bad fall, and Rounsville benefited by this mishap and popped into the lead. Thereafter Maine was never headed, Burn-

ham, Torrey and Eaton all running beautiful races. The New Hampshire outfit consisted of Atkins, Daland, Toolin and Atkins. The winning time was 3 36 6-10 seconds, which was a fifth of a second faster than that made by Bowdoin's team which lost to Maryland.

The Maine four, Rounsville, Torrey, Burnham and Eaton, have proven to be a well-balanced, fast team, one of the best which has run for Maine in years, and it is little short of tragedy that the team was not matched at the Portland A L Meet, Feb. 15, for such was the case.

Maine's two-mile outfit lost to Bates with Artie Hillman, Forrest Taylor, McDougal and Henry Eaton carrying Maine's colors in a close race.

Forrest Taylor, Captain-elect of the 1926 cross country team took fifth place in the two-mile event at the K of C games.

Hobson, pole vaulter, failed to place at the B A A meet but cleared the bar at 11 feet. The event was won and world's record broken by Charley Hoff, Norwegian star athlete who cleared thirteen feet, one and one half inches.

### DR. LITTLE TO HEAD BIOLOGICAL SCHOOL

Announcement was made recently by Professor Ellis, in charge of the University of Maine Summer School, that Dr. Clarence C. Little, President of University of Michigan, and former Maine administrative head would be in charge of the Biological Station at Bar Harbor during the Summer of 1926. This will be good news to many Maine men and women,— alumni, faculty, and students, and will give opportunity to many to see Dr. Little and renew old acquaintances.

### WASHINGTON

The Washington Alumni Association was very glad to have the opportunity to entertain Acting-President H. S. Boardman and Alumni Secretary Robert P. Clark on Thursday evening, February 11, at the Chevy Chase Library.

Earle O. Whittier, Vice President of the Association, called the meeting to order and all alumni present were glad to hear of the progress of the Memorial Gymnasium-Almoxy pictures of which Mr. Clark exhibited.

Acting-President Boardman's analysis of the aims which he will put before the Legislature and his method of surmounting any difficulties, made the members feel that the trustees had not misplaced their confidence in putting the running of the University into his hands.

(Signed) MILDRED H. MERRILL,  
Secretary and Treasurer

### JANUARY 'MAINIAC' IS CLEVER NUMBER

The last number of the *Mainiac*, the January number, made a big hit on the campus. Due to the originality of its humorous material and the large number of excellent cartoons the issue is nearly sold out. The cover is printed in four colors and is very attractive as well as catchy.

Several letters have been received complimenting the editorial board on the splendid result of its efforts. One alumnus states "it is as large an issue as has appeared for several years, and there is a wealth of original humor in its pages."

The *Mainiac* board intends to maintain if not to better the standard set by this year's numbers, and hopes that the alumni will help them do so by subscribing immediately. A check for one dollar sent to the business manager will assure the prompt delivery of the next five issues to their door. Address: S. A. Maxwell, Business Mgr. *Mainiac*, U of M, Orono, Maine.

*Editor's Note*—*The Mainiac* is a humorous magazine published by the undergraduates at Maine.

### BUILDING PROGRESS CITED

Continued from Page 53

students for whom it has recognized the obligation to furnish a high school education in the last half century, we shall be enrolling in our colleges for a liberal education over 15,000 of our boys and girls at an

expense to the State of over \$3,500,000 each year, judged by present standards alone. This presents a profound educational, social and economic problem and may as well be faced with open eyes.

"I wonder if it is generally known that over \$3,000,000 is spent annually in Maine under the direction of our Board of Charities and Corrections? This includes the support of the insane, the mentally weak, mothers' aid, and homes for wayward boys and girls. This is not said in a spirit of criticism but only to call attention to one of the factors of the problem, for if we are forced to spend so much upon what may be termed actual liabilities of the State, what should our duty be to its greatest asset, its children?"

"In concluding, I wish to say a word of appreciation of the fine spirit shown among faculty and students during the current year. I could not ask for better support from either. My relations with the Board of Trustees have also been most cordial. They are a body of serious-minded men who realize the magnitude of the problem which faces them, and I am sure that they will do their utmost to solve it."

### 'PREXY' FELLOWS TO SPEAK AT 1926 COMMENCEMENT

Dr. George Emory Fellows, former president of the University and now head of the Department of History and Political Science at the University of Utah, Salt Lake City, will be the Commencement speaker at the University in June, it has been announced by Acting President Harold S. Boardman. At the same time, President Boardman announced that Dr. Fellows is to become a member of the faculty of the Maine Summer Session in 1926, and will offer courses in Modern European and American History.

Professor Fellows was president of the University from January, 1902, to September, 1910, leaving to accept his present post at Utah. He has maintained a summer residence in Maine for several years, having purchased a home at Ellsworth where he spends the summers with his family.

### DEBATING FOR GIRLS IS NEW ACTIVITY

Professor Bailey of the Public Speaking department has urged that the girls come out for debating this year. Debating for girls is new at the University and Professor Bailey hopes that it will be successful. A debate was arranged with the University of New Hampshire for March 5, at Orono. Plans are also being made for a debate with the University of New Brunswick.

**MAINE LASSIES LOSE TO POSSE NISSEN 38-11**

**Boston, February 20.**—The Posse Nissen girls' basket-ball team beat the University of Maine girls' team, 38 to 11, here today. Captain Fifield of the winners shot nine baskets from the floor; the other regular Posse forward, Miss Kohler, made eight, and Miss Smith subbing for Kohler, two. Miss Hunt, Maine's right forward, scored four times from the floor, and the other basket was made by Miss Fuller. Miss Hunt added the eleventh point on a free try.

**MAINE 29, P. A. C. 14**

**Orono, February 6.**—Resuming basket-ball after a layoff of two weeks and with both 'varsity centers missing because of injuries, the U. of M hoop tossers won an easy game from the Portland Athletic Club here tonight, 29-14. Maine had beaten the same team three weeks previous in Portland. The game was a listless affair, the visitors failing to put up much opposition to Maine's attack. Swede Olson, a guard, moved up to center to take the place of Speed Branscome and Beatty who watched the battle, and with Captain Lake did most of the scoring for Maine.

**MAINE QUINTET LOSES TO TWO FAST N. E. CONFERENCE VISITORS AT HOME**

**NEW HAMPSHIRE FIVE TAKES MAINE BY 36-23**

**Orono, February 20.**—The University of New Hampshire basket-ball team found its stride in the last half here tonight and won from the Maine quintet 36-23. The Pale Blue hoopmen trailed closely throughout the first two frames and at the half the score stood 19 to 17, New Hampshire. But the Granite Staters, led by Nicora and Davis, opened up in the last two frames and annexed 17 more points while holding Maine to six.

Kamenkovitz, high point man of the game with nine, starred for the U of M aggregation. His work with Lake was one of the outstanding features of the battle.

In a preliminary game, the Maine Frosh nosed out the New Hampshire yearlings, 26 to 25. The Blue five started with a bang and caged 12 points before their rivals had talked. But the Granite State team staged a strong comeback in the second period, tying the score and trailing at the end of the half by only one point, 13 to 12. From here to the last whistle the game was nip and tuck.

**MAINE HOLDS CONN. AGGIES TO 34-26 WIN**

**Orono, February 12.**—Conn Aggies defeated Maine here tonight in a fast game of basket-ball, 34-26. It was a battle from start to finish. The Nutmeggers had beaten Harvard and N. H. and expected to win handily from The Bears. Captain "Mac" Lake put up a splendid game for the locals while Eddy was the star for the probable New England College Conference Champions.

'24—The engagement of F Edward Handy and Miss Winifred Richardson has been announced recently The date of the marriage has not been set

'24—Elijah E Harris is Superintendent of Schools for the towns of Washburn, Wade and Perham in Aroostook County, and resides at Washburn

## What Is The Matter With Your Job?

Are there too many men ahead of you? Is your salary equal to your efforts?

Does the time-clock system of life get on your nerves?

There are many reasons for discontent in the minds of those who desire a decent money return for their time.

*It is worth while to reconsider your job before circumstances or habit make it too late.*

And when you do reconsider, remember that selling life insurance for a company like the John Hancock Mutual is a most suitable profession for anyone who cares for freedom of initiative, returns instantly commensurable with the quality of work done, and a connection with a business which is not only financially sound but philosophically reasonable.

*You can obtain complete information, confidentially, and with no obligation, by calling on one of our General Agents or by writing to the "Inquiry Bureau", John Hancock Mutual Life Insurance Company, 197 Clarendon Street, Boston, Mass.*

*John Hancock*

'25—Raymond S Finley is rt Palermo recovering from a serious operation performed last June

You must look closely to see the most important part of this picture—the cables on the ground which bring power from a substation operated from generators ninety miles away.

## Digging coal by wire

**T**O the Northern Pacific Railway belongs the credit for this thrifty achievement in supplying its own coal.

At Colstrip, Montana, the railroad owned a 180-acre bed of coal, lying almost on the surface—a cheap, convenient source of fuel for transcontinental trains.

To help industry and the railroad do their work more economically is an important service, but to save human energy is even more important. The General Electric Company designs and manufactures the equipment by which electricity does both.

But the mining of it offered peculiar problems. The water of the district was so alkaline it could not be used in steam engines. The coal slacked so quickly that it could not be stored.

A power line ninety miles long solved the difficulties. Electric shovels that require no water now strip the surface earth—tons at a time—mine the coal and load it. Giant storage battery locomotives of 60 tons capacity haul the loaded trains to the main line, for immediate use.

Industry after industry owes a similar debt to electricity. It is continually tapping natural resources that mankind could not otherwise have enjoyed for another hundred years.

# GENERAL ELECTRIC
