Regular monthly meetings of the City Council on the first Monday of each month, at the City Council rooms at 7.30 P.M.

Regular monthly meetings of the Committee on Accounts, to examine bills, the fifth day of each month, or if the fifth comes on Sunday, then on the preceding day, at the Treasurer's office at 7.30 P.M.

MAYOR'S ADDRESS.

Gentlemen of the City Government:

I trust that, as we meet here this morning to begin the duties entrusted to us by the citizens of our city, we realize our responsibility, and that we are determined to do our best throughout the year.

The officers to be elected to-day should be well qualified to fill the positions for which they are chosen.

I wish to impress upon you all the necessity of punctual attendance upon all city meetings and also the meetings of the different committees to which you may be appointed. Those of you who have been in the city government before, know how much time is actually wasted by the absence or tardiness of some members. No man should allow himself to be elected to any city office, unless he is determined to do his whole duty.

FINANCIAL.

Liabilities.

City bonded indebtedness, exclusive of water loan, as follows:

4 % bonds,	\$188,000 00
3½ % bonds,	30,000 00
Bonds due and not presented for payment,	1,000 00
Temporary loans,	97,100 00
	<hr/>
	\$316,100 00
Water loan bonds, 5 % (due July 1, 1905),	58,700 00
Water loan bonds 4 % (due May 20, 1913),	30,000 00
	<hr/>
Total debt,	\$404,800 00

Resources.

L. & A. R. R. stock,	\$75,000 00
Due from G. T. R. R.,	5,930 63
Uncollected taxes,	38,131 84

CITY OF AUBURN.

Uncollected sewer assessments,	\$546 50
Uncollected sidewalk assessments,	223 13
Tax deeds,	4,130 42
Cash in treasury,	23,244 74
Water loan bonds on which the interest is paid by the Water Com.,	88,700 00
	<hr/>
Total resources,	\$235,907 26
	<hr/>
Net debt,	\$168,892 74

WATER WORKS.

The Water Commissioners have received for water rents during the last year, \$30,200. The city pays them directly for water \$3,650, beside the annual appropriation of \$3,000, which goes to the sinking fund. The Water Commissioners should make the charges against the city for water as low as possible, and we hope they will see their way clear to make a reduction in rates to the city this year.

The Water Works' sinking fund at the present time amounts to \$48,197.63, invested as follows:

Auburn Water Commissioners, 4 % bonds,	\$23,500 00
City of Auburn, 4 % bonds,	1,000 00
Water Loan, 5 % bonds,	1,000 00
Water Loan, 4 % bonds,	500 00
City of Everett, 4 % bonds,	4,000 00
City of Newton, 6 % bonds,	7,000 00
City of Lansing, 4½ % bonds,	4,000 00
Town of Leominster, 4 % bonds,	7,000 00
Cash deposited in Auburn Savings Bank,	197 63
	<hr/>
	\$48,197 63

The yearly addition to the sinking fund from interest alone, as it now stands, is \$2,090. This amount, together with the amount carried to the sinking fund each year by the city and the commissioners will easily retire the \$60,000, commissioners' bonds (due July 1, 1905), and leave at least \$15,000 balance.

HIGHWAYS.

The expenses of this department for the past year have been \$22,695.08, appropriation \$20,000, receipts \$614.18, making an over-draft of \$2,080.90. The cost of the wall and fill on North River Road, amounting to about \$2,375, was charged to this department instead of to Permanent Improvements, as it should have been. Deducting this amount from the expenses would leave the account in good shape, notwithstanding the many washouts last spring and the large amount of bills of 1900 paid this year. We hope to collect the bill of \$2,375, just mentioned, of the Paper Company, as the washout was caused by the building of their dam.

Thirteen hundred lineal feet of macadamized road was built on Hampshire Street, westerly from the Maine Central Railroad, at cost of \$2,550; included on this item is \$1,000 worth of stone from North Jay. Had this stone been crushed by the city, the cost would have been about \$500 less, or little more than \$2,000.

The cost of stone crusher and boiler, purchased last year, was \$2,000; this includes setting up and covering.

SIDEWALKS.

We should do all possible each year on permanent walks. Auburn is sadly deficient in this respect. Good work has been done in recent years on our walks, and I trust that it will continue this year.

Two hundred and thirty-nine feet of brick and two hundred and fifty-nine feet of concrete walks have been built this year.

SEWERS.

There has been one thousand, six hundred and eighty-two feet of twelve-inch sewers laid, and eight catch-basins built during 1901, at a cost of \$1,570.59.

New sewers are needed in various parts of the city. Perhaps Goff Hill is as needy in this respect as any place in the city.

POOR.

There are twenty persons now on city farm, and four insane poor at Augusta Hospital. Fifty-five persons are

receiving more or less aid from the city, outside those on the farm, and one hundred and four have been given aid during the year.

The cost of maintenance at the farm averaged in 1901 about \$69.25 per person; this is the actual cost, and in this estimate no cost of expense of repairs on buildings is included. Auburn has always been fortunate in the expense of this department, being much less than in most cities of its size.

PUBLIC BUILDINGS.

The public buildings of Auburn are in fair condition. The roof of Auburn Hall leaks, and needs repairs. The old armory store has recently been repaired, and leased for two years. All rents of the city are now taken, and the annual rental amounts to \$1,090. The amount received from the rental of the Hall this year was \$344.

I recommend that a new heating arrangement be placed in the Davis building. The furnace now in use there never was sufficient to properly heat the building, and now it is broken down and worn out. Five tons of coal per month have been used this winter, and even then we have not been warm on cold days.

HIGH SCHOOL ADDITION.

The sum of \$5,600 has been expended on the addition to the High School building, and contracts for plumbing, piping, etc., have already been placed, which will bring the cost to \$10,000, the amount authorized by the last city government. Probably a new boiler of sufficient capacity to heat the whole building will be necessary.

Our schools are in a very good condition, and, under the good management of the Committee and Superintendent, will continue to improve.

Some years ago the pay of the teachers for three weeks and two days of the winter term was carried forward to the next year, presumably to save an over-draft in that department. This has been continued each year since, until one year ago, when the pay for one week and one day more was carried over (perhaps for the same purpose), which makes

four weeks and three days of the term just closed to be paid out of the appropriation for 1902, unless it is carried forward again next spring. This method of doing business makes much confusion in the treasurer's accounts, and also mixes things up generally. I recommend that the school appropriation be made large enough to take care of at least a part of this amount, which is about \$3,000. If this can be done this year, and the balance provided for next year, it would be much better all around.

The number of non-resident pupils attending the High School is good evidence of its popularity and excellence. The introduction of a commercial course will require at least one more instructor there. The furniture at the Webster Grammar School is old and out of date. If possible, we should make a beginning in the refurnishing of this building.

FIRE DEPARTMENT.

We are fortunate in having had no bad fires during the year. This fact is due, in a measure, to the efficiency of the department. This department has been enveloped in more or less smoke recently, but I trust that it will clear away, and under the good management of the Commissioners, it will continue to improve.

CONCLUSION.

In concluding, I wish to impress upon the tax assessors the necessity of making a more complete description of real estate assessed. A description sufficient to locate and identify such property is necessary to make good a tax deed, should the collector be obliged to sell for non-payment of taxes. The necessity of this is plain from the fact that the tax sales have increased from \$600 in 1896 to \$2,150 in 1900. If the collector does his duty, there will be no need of selling so much real estate each year (but this fact in no way lessens the duty of the assessors), and the city would not have so much money tied up in what have usually been called available assets—in many cases bad bills would be a better name. Should these deeds be contested, they would be found not worth the paper upon which they are made.

I would recommend that the assessors be in open session at their office for at least four days preceding the twentieth of August, which is the last day of the five per cent. discount, and that they meet one-half day each month from September to March. I am confident that this would be much easier for them and also please the public. This would give every one an opportunity to be heard.

And now I sincerely hope and pray that we shall so perform the duties of our various positions, that no one will ever have a cause to regret our election.

E. G. EVELETH.

TREASURER'S REPORT.

To the Mayor and Members of the City Government:

GENTLEMEN:—I herewith submit my report as Treasurer of Auburn for the year ending February 28, 1902.

RECEIPTS.

LIABILITIES AND RESOURCES.

LIABILITIES.

The indebtedness of the city February 28, 1902, is as follows:

For outstanding four per cent. bonds due as follows:

July 2, 1903,	\$25,000 00
July 1, 1904,	23,500 00
July 1, 1905,	15,000 00
July 1, 1906,	18,000 00
July 1, 1907,	10,000 00
July 1, 1909,	14,000 00
July 1, 1910,	13,000 00
July 1, 1911,	13,000 00
January 1, 1912,	4,000 00
July 1, 1912,	7,000 00
July 1, 1917,	15,000 00
June 1, 1923,	16,000 00
January 1, 1925,	14,500 00

Outstanding three and one-half per cent. bonds due as follows:

July 1, 1920,	15,000 00	
January 1, 1922,	15,000 00	
	<u> </u>	\$218,000 00
Bond No. 9, due July 1, 1897, not presented for payment,	500 00	
Bond due Jan. 1, 1902, not presented for payment,	500 00	
	<u> </u>	\$1,000 00
		<u> </u>
		\$219,000 00
Temporary loan,		97,100 00
		<u> </u>
		\$316,100 00

Debt of the city incurred by the purchase of water works, on which the interest is paid by water commissioners as follows:

Water loan bonds, 5 %, due July		
1, 1905,	\$58,700	00
Water loan bonds, 4 %, due May 20,		
1923,	30,000	00
	<hr/>	\$88,700 00
		<hr/>
		\$404,800 00

RESOURCES.

29th,	\$161,031 56	
Supplemental tax,	595 09	
Interest paid,	05	
	<hr/>	\$161,626 70

By abatements allowed,	\$3,040 32	
Discounts allowed,	5,747 94	
Treasurer's receipts,	122,150 00	
Cash on hand and commission,	1,272 00	
Balance of tax uncollected,	29,416 44	
	<hr/>	\$161,626 70

Respectfully submitted,

CHAS. F. CURTIS, *Tax Collector.*

I have examined the accounts of the Collector for the year ending February 28, 1902, and find them properly vouched for and hereby approve the same.

WM. M. GREENLEAF, *Auditor.*

AUDITOR'S REPORT.

WM. M. GREENLEAF, Auditor.

REPORT OF OVERSEERS OF THE POOR.

To the Honorable City Council of the City of Auburn:

The Overseers of the Poor have the honor to submit the following report for the year ending February 28, 1902.

The cost of maintaining the Poor Department for the year ending Feb. 28, 1902, has been		\$6,154 19
Appropriations for 1901-1902,	\$4,300 00	
Total receipts from City Farm,	1,505 23	
Total receipts outside City Farm,	470 07	
Total receipts,	<u>\$6,275 30</u>	
	6,154 19	
Total cash left undrawn,		<u>\$121 11</u>

There is due this department, uncollected accounts, the following sums:

From the City of Lewiston,	\$13 85
From the Town of Poland,	32 98
From W. C. Briggs,	5 90
From Joseph E. Yeaton, note,	75 00
From Street Department,	6 25
	<u>\$133 98</u>
Money unexpended,	121 11
	<u>\$255 09</u>

Of the above rights and credits Town of Poland and W. C. Briggs have paid since the books of this department were closed.

The total cost of maintaining the City Farm for the year ending was	\$3,306 26
The net cost for the same was	1,801 03

The total cost of maintaining or helping persons not on the City Farm was	\$2,847 93
The net cost in the above was	2,377 86

The Poor Department has had some extra expenditures in the way of permanent improvements, repairs, and an expensive law suit, which we take the liberty to mention in this report, viz.:

The City Farm buildings were painted at a cost of	\$165 00
New beds, mattresses, springs, etc., at City Farm,	76 20
Replacing and repairing old blinds,	15 17
Laying hardwood floor,	18 87
New bedding,	25 00
Hydraulic ram, new piping and steel water tank,	132 28
	<hr/>
Total improvement on City Farm,	\$432 52

OUTSIDE CITY FARM.

Law suit, City of Auburn vs. Town of Turner (Asa K. Staples suit),	\$132 62
The funeral expenses of three persons not on the City Farm,	71 50
Desk for the clerk,	20 00
Extra salary for clerk,	140 00
	<hr/>
	\$364 12
(Salary in year of 1901-1902 was \$300. Previous years was \$160.)	432 52
	<hr/>
Total,	\$796 64
Bills contracted in previous years, but not presented for payment until 1901-1902,	\$88 31

We have now at the Maine Insane Hospital four patients, two of which may be able to be taken home in May, viz.: Jeremiah McCarthy and Mary Driscoll.

OUTSIDE POOR.

Under this head are included such persons as have had any assistance, such as wearing apparel, groceries, fuel, rent

or medicine, etc., but not medical attendance, and not chargeable to other cities or towns.

The Poor Department has helped this year thirty-one families, and including in all one hundred and twenty-three persons. Four persons which would have become paupers signified a desire of going back to their relatives in Canada. The Clerk of the Poor Department solicited contributions enough to send them back without any cost to the City of Auburn.

CITY FARM.

There are now twenty persons on the City Farm, the most of which are entirely helpless, as far as manual labor is concerned.

We are pleased to say that no child has been placed upon the City Farm the past year.

Stock on the City Farm February 28, 1902:

2 horses,	1 bull,
11 cows,	4 hogs,
5 2-year-old heifers,	14 shoats,
3 yearlings,	40 hens,

Produce, etc., on City Farm February 28, 1902:

46 tons good hay,	100 lbs. salt pork,
17½ bu. corn,	40 tons ice,
50 bu. oats,	25 cords wood,
15 bu. beans,	1,000 lumber,
100 bu. potatoes,	100 lbs. corn beef,

The Board of Overseers of the Poor are grateful to N. W. Harris, City Solicitor, for his careful attention to all legal matters in which this department has been involved the past year. We are also thankful for the efficient services of the City Physician, J. W. Beede, M.D., in caring so well for the sick in this department.

To Mrs. Swett, the Police Matron, we not only extend our thanks, but acknowledge that she is an indispensable factor in this department. Her untiring energy and careful search for needy ones is to be commended by all. With her assistance we feel that no deserving ones have gone

uncared for, and that no stone has been given where bread was needed.

The various railway systems running through our city were solicited for assistance in the actual work of transporting paupers or the clerk of this department.

The Grand Trunk Railway alone responded. To the Grand Trunk Railway we feel indebted and extend our thanks for its generous assistance.

J. S. P. H. WILSON,
D. R. HASTINGS,
W. E. DINGLEY,
A. H. COOPER,

Overseers of the Poor

H. C. ROYAL, *Clerk.*

REPORT OF
AUBURN WATER COMMISSIONERS.

To the City Council of Auburn, Maine:

GENTLEMEN:—The Board of Water Commissioners herewith submit their ninth annual report.

At the annual meeting of the board held March 25, 1901, Mr. A. M. Pulsifer was elected president of the board, Andrew W. P. Cobb was re-elected clerk, and Forest E. Bisbee was re-elected superintendent.

It has become apparent during the last few years that our supply from the company's well near the lake was not quite sufficient to meet at all points the growing wants of the water takers. The commissioners deemed it best to meet this deficient supply by making a connection with the Lewiston water main. The right to make this connection with an 8-inch pipe was granted by the City of Lewiston for a yearly rental of \$1,000.00.

This connection gives our people an abundant supply of water and can undoubtedly continue indefinitely at the above rate.

Your commissioners, however, believe that \$1,000.00 yearly rental for the above privilege is exorbitant and that unless it can be obtained at a much reduced rental it is for the city's interest to lay its own pipe at an early date from the Logan, so called, to its well.

With this in view the commissioners are now endeavoring to negotiate a settlement with the owners of the land over which the requisite pipe would have to be laid.

The following statement shows the net income of the works for the year ending February 28, 1902, also a detailed statement of the assets and liabilities. We also give a condensed statement of the entire income for the nine years that the city has enjoyed municipal ownership.

It will be of interest to all our people to note that the Sinking Fund has reached the gratifying amount of \$48,197.61.

Water rents collected during the		
year,	\$30,246 89	
Licenses, fines, etc.,	20 00	
	<hr/>	\$30,266 89
Water bill uncollected February 28, 1902,		669 97
		<hr/>
		\$30,936 86
Less rents uncollected February 28, 1901,		752 00
		<hr/>
Gross earnings for the year ending February 28, 1902,		\$30,184 86
Less operating expenses as follows:		
General expenses,	\$6,978 94	
Repairs,	1,563 94	
Interest,	13,085 00	
Discount on bills due Feb. 28, 1901,	101 61	
	<hr/>	\$21,729 49
Net income for the year,		8,455 37
Net income to March 1, 1901,		65,984 67
		<hr/>
Net income to March 1, 1902,		\$74,440 04

ASSETS:

Auburn Water Commissioners.

ANDREW W. P. COBB, *Clerk.*

Auburn, Me., March 15, 1902.

REPORT OF SUPERINTENDENT OF WATER WORKS.

AUBURN, February 28, 1902.

To the Honorable Board of Water Commissioners:

GENTLEMEN:—I herewith present to you the ninth annual report of work done under your direction, the care, maintenance, and operation of same for the year ending February 28, 1902.

STATION AND MACHINERY.

The engine and pump-room has been varnished.

The boilers were inspected in December, 1901, by the Hartford Boiler Insurance Inspector and found to be in good working order.

Pump No. 2 has been repaired by a set of Tobin bronze piston rods, new water piston and rings, valves and springs. The pumps are working fine. The cost of supplies and labor was \$153.69.

IMPROVEMENTS.

The Work Shop with a tenement over the same was out of repair, and as the building set on posts the committee decided to raise the building up four feet and move the same four feet south, so as to improve the entrance to the tenement and build a brick basement under the same to keep supplies in, at a cost of \$372.13.

The city has outgrown the 10-inch and 12-inch pipe lines coming from the screen well on the city farm to the junction of Turner and Summer streets. When the pumps are running the pressure on the gauge at the Pumping Station on Court and Goff streets would drop from 23 lbs. down to 8 lbs. and some of the tenements on Fourth and Fifth streets in

New Auburn, Rowe Street in Perryville, the Upper Turner Street, Summer, Winter and Harvard streets, could not get water on the second floor of houses at those hours.

The Water Commissioners decided to improve the water supply by starting a 20-inch main toward the screen well at the city farm, and they did construct the pipe line from the junction of Turner and Pleasant streets to the "Logan," so called, a distance of 2,224 feet, and made a temporary connection with the city of Lewiston's 24-inch pipe from the lake, at a cost of \$4,152.93. After the connection was made with the Lewiston pipe when the pumps are running at full capacity the pressure gauge at Pumping Station registers 21 lbs., and we have no complaint from the water takers for lack of water.

An extension of 635 feet of 2-inch pipe on Minot Avenue, south of Park Hill school-house, at a cost of \$145.07.

A survey has been made from Lagoon to the screen well and a plan has been made by the city engineer. The line will cross the land of several parties. The city solicitor has settled with a part of the land-owners. If he cannot get a settlement with the rest he will condemn the land and let the law take its course.

REPORT OF WATER AT THE LAKE.

High water is	167.5
Low water is	160.5

The height of water was:

March 1, 1901,	162.2
April 5, 1901,	164.5
April 8, 1901,	166.2
October 16, 1901,	165.8
December 16, 1901,	165.4
January 18, 1902,	165.11
February 11, 1902,	166.4
February 25, 1902,	165.11½
March 1, 1902,	166.8

REMARKS.

The high water mark of 167.5 feet is a level of 167.5 feet above the outlet of the water at the Androscoggin Mills. The Main Street bridge road-bed is 50 feet and a bench mark on the corner of the stone work at the Lewiston Gate House is 80. In taking levels for heights it is reckoned from that unit point.

FREEZES.

So far we have had 13 freezes; 11 on the street and two on private land. This is the coldest winter for water pipes that we have had since I have been with this company. The ground in Lake Street is frozen down six feet and we have had a 2-inch pipe frozen at that depth.

LEAKS.

The leaks have been light this year, only eleven, and they are old corporations lead.

RELAY OF SERVICES.

Fifty-eight house services have been relaid.

NEW SERVICES.

Fourteen (14) new services have been added this year.

GATES.

The gates are in good repair, having been examined in the fall of 1901.

HYDRANTS.

The city owns 102 hydrants, and private manufacturing companies 11, making a total of 113. One hydrant was broken at a fire on Second Street, causing a great deal of street talk. Just as though a hydrant could not fail to act. All mechanical works fail at times.

RECOMMENDATIONS.

I would recommend that the pipe line on Seventh Street be changed from a 2-inch pipe to a 6-inch pipe, commencing

at the corner of Roak, running south to Loring Avenue, or Foster Avenue, setting two hydrants for fire use. The cost would be to Loring Avenue about \$1,000. To Foster Avenue \$1,300.

In the tables annexed will be found a classification of water supply, monthly, and yearly pumping records, location and size of meters, location of mains extended and gates set, inventory of stock and tools.

Respectfully submitted,

FOREST E. BISBEE, *Superintendent.*

LIST OF HYDRANTS AND LOCATION.

1. Academy Street, corner of High Street.
2. Broad Street, corner of Second Street.
3. Broad Street, corner of Fifth Street.
4. Broad Street, corner of First Street.
5. Brook Street, corner of First Street.
6. Blake Street, corner of Winter Street.
7. Center Street, near Henry Noyes' house.

During the past year 14 women (6 of them insane) have been under restraint in this department, and a cell especially for women is very much needed.

In concluding this, my first annual report, I desire to express my thanks to His Honor, the Mayor, to your Honorable Board, and to the Committee on Police for courtesies received; to the Judge and Clerk of the Municipal Court I am under many obligations for advice and assistance in the discharge of my duties. To the officers of the force I am deeply grateful for their hearty co-operation and support.

I especially desire to thank our Police Matron, Mrs. Swett, for the assistance she has given me during the year, and I also take this opportunity to thank the Committee on Public Property who have seen some of the needs of this department and have enlarged and improved our headquarters so that they are now a credit to the city and to the committee.

Respectfully submitted,

F. B. TAYLOR, *City Marshal.*

Auburn, Me., March 1, 1902.

REPORT OF POLICE MATRON.

*To the Honorable Mayor and City Government of the City of
Auburn:*

GENTLEMEN:—I herewith submit to you an account of my work for the year ending February 28, 1902. In making this my eighth annual report I am glad to note a gradual but very perceptible improvement among many of those whom it has been my duty to relieve and assist in years past. Not a few families to whom I have ministered in years gone by are now entirely self-supporting and gladly give of what they have to spare to help others who are less fortunate than themselves.

The condition of our poor people is generally more favorable than the preceding year at this time; there have been no serious epidemics among the children, and through the winter months no one has gone cold or hungry. Through the generosity of the Auburn W. C. T. U. all needy children were supplied with new shoes and rubbers for the fall term of school. The winter term has been provided for, both in the matter of shoes and clothing by the Associated Charities.

No case of non-attendance at the public schools for want of suitable clothing has been reported to me without receiving prompt attention. Besides these societies I have received a large amount of good comfortable clothing from our kind-hearted citizens which has been distributed wherever needed all over the city and rural districts.

Five families have been burned out since cold weather, in the heart of the city, besides the family at North Auburn. These people were self-supporting and it seemed hard to see all their property going up in smoke; some of them were insured. In this calamity our more fortunate citizens flocked to their assistance, clothing, bedding and furniture were freely donated to those unfortunate ones who had been able to save but little from the flames and water. In one case a

widow with four little girls who were living in an attic barely escaped with their lives.

Last August our city children enjoyed another of those delightful outings at Lake Grove. Through the kindness of the managers of the Electric Railway free transportation was given to about one hundred and fifty folks. An able corps of W. C. T. U. ladies went up with us to assist in caring for so large a company. A bountiful dinner with fruit and ice cream in abundance was served at noon, after which the children amused themselves with games, recitations and singing until the time for the entertainment arrived; this was furnished by the electric road folks who never do anything by the halves, and sent up a first-class show with reserved seats for our company. After a day of unalloyed happiness the children were all taken home without an accident, and no cases of sickness from over-eating on that day were reported to me afterwards.

At Thanksgiving time the churches, missions, and various other societies provided bountiful dinners for our poor people. Those who were not remembered in that way were provided for by private individuals, and it is safe to say that not a needy family within our city limits was forgotten. At Christmas an entertainment and Christmas tree were provided for the city children by the W. C. T. U., many of our merchants and private citizens contributing to make the affair a success; that it was a success was abundantly demonstrated by the happiness depicted on each little face as it pressed forward to receive the gifts so lavishly bestowed by the far-sighted Santa Claus, who seemed to know just what the children wished for. Christmas dinners were provided for many worthy families and many little folks were invited to partake of Christmas cheer by their more fortunate neighbors. The Salvation Army officers sent me fifty dinner tickets which were distributed in various parts of the city. I was informed by those officers that Auburn contributed very generously for their banquet. During the year homes have been secured for 13 children, four of whom have been legally adopted. Several children have been temporarily cared for by the W. C. T. U. Under the auspices of this organization we have a free temporary home for deserving women. During the year this has

been opened 34 nights, besides sheltering two children while looking for homes for them. I have made occasional visits to our City Farm and have found our people generally contented and happy. Religious services have been held there nearly every Sunday afternoon since October last. No children have been taken to the farm. Whenever any child through death or other misfortune has been left uncared for, a temporary home has been secured at once until a permanent one could be found. In caring for the needy sick ones in our midst I have been greatly aided by contributions of fruit and other delicacies bestowed by thoughtful friends; also many needful articles of clothing and bedding. A large amount of pure literature has been given me which I have endeavored to place in the hands of those who would appreciate it. During the year I have made 3,625 calls, I have distributed 3,554 articles of clothing, besides many needful presents at Christmas time, also many packages of toys, books and confectionery to the children in the outlying district who could not come in to the Christmas tree. I have written 295 business letters and distributed food in many families donated by the managers of church suppers and banquets of the various societies in the city. I have found employment for 110 women and girls, besides day labor for many men and women. In the Department of Social Purity I have been constantly supported by the W. C. T. U. and Reform League; time and space forbid my going into the details of this very important part of my work, but I am thankful to say that there have been many instances of complete reformation among those who were sunk low down in sin. From the Associated Charities I have received a large amount of coal, wood, groceries and new clothing, for which I am very grateful. In connection with this society a sewing school for girls was established about eight years ago which has been in successful operation every winter up to the present time. This school is designed especially for the children of mothers who are obliged to work the greater part of the day away from home and thus have no time to instruct their little daughters in the use of the needle. The garments, when completed, are given the children as a reward for their diligence and interest in the work. My relations with Mr.

Royal, the Clerk of the Overseers of the Poor, during the past year, have been most pleasant and I have always received the most courteous treatment whenever I have brought any matter to his attention. To the City Marshal and Deputy I wish to extend my most grateful thanks for their ready helpfulness in every time of need, and also for the courteous treatment which I have always received from them and every other member of the police force.

Respectfully submitted,

MARIA SWETT, *Police Matron.*

February 28, 1902.

REPORT OF STREET COMMISSIONER.

*To the Honorable Mayor and City Council of the City of
Auburn, Me.:*

GENTLEMEN:—I herewith submit to you my first annual report as Street Commissioner of the City of Auburn for the year ending February 28, 1902, together with a few recommendations.

Immediately after assuming the duties of this office an unusual amount of heavy rains caused much damage to the streets and roads through the city and destroyed many culverts in the rural sections. The most expensive washout was on the North River Road at what is known as Googin Dam, and was caused by the building of said dam. The road was repaired by building 475 yards of bank wall and a dirt fill, at a cost of \$2,375.72. This work was done under contract with the Committee on Streets and Bridges by Messrs. Cobb & Foster of Lisbon, this firm being the lowest of several bidders.

The expense of this washout will undoubtedly be paid to the city by the present owners of the dam. Both the North and South bridges have been partially painted under the direction of the Committee on Streets and Bridges at a net cost of \$477.88. The South bridge and the Main Street bridge over the Little Androscoggin River have been newly planked, costing \$631.57, also bills amounting to \$785.57, which were left unpaid by my predecessor, have been paid from this year's appropriation.

For the past six years the appropriation recommended by the different street commissioners have been either twenty-three or twenty-five thousand dollars, and I would earnestly recommend \$23,000.00 for the ensuing year, a sum little enough for the city of Auburn with its 250 miles of roads and the many miles of sidewalk. Also from this year's appropriation must be bought new harnesses, a new double dump cart, and many tools. An exchange of at least one pair of horses

must be made; the sleds must be repaired and the carts should be painted; furthermore, a suitable building should be built in which to store the carts in winter and the sleds and plows in summer, as the cellar under the Armory, our present place for storage, is so damp as to cause injury to them. I also recommend the paving of North Main Street from Court to the northerly line of A. W. Penley's lot. The city has nearly enough paving block on hand to do this. The paving on Main Street between Elm and Academy streets, should be relaid this year as it is in very bad condition. No street in the city needs permanent repair more than does Broad, from the bridge to Mill Street. A stone culvert not less than six by eight feet, should be built at Carver brook on the Mechanic Falls road, and one in the Hunnewell district. The stone for the latter has been hauled there ready for use. I have had hauled this winter 655 loads of gravel and 307 loads of ashes ready for spring use and piled as follows, viz.:

Minot Avenue loads of gravel,	325
Minot Avenue loads of ashes,	163
Goff Hill loads of gravel,	200
Goff Hill loads of ashes,	144
French Street loads of gravel,	130

STREETS AND BRIDGES.

Appropriation,	\$20,000 00	
Receipts,	614 18	
Total,	<u> </u>	\$20,614 18

EXPENDITURES.

Repairs on North River Road, at Googin Dam,	\$2,375 22
New plank, South Bridge,	450 49
New plank, Main Street Bridge, over Little Androscoggin,	181 08
New plank bridges on Taylor and Bob Mills brooks,	56 88

Total,	<hr/> \$3,134 34
Overdrawn,	30 97

PERMANENT ROADS.

After years of discussion among road builders and experimenting with materials and manners of building roads, in our larger cities, it seems to be a well settled fact that for the State of Maine there are two kinds of road that can be built and made satisfactory. I refer to the granite paving block for business streets, and a macadam for our residential streets, and for roads in the rural sections. Auburn has quite a lot of paving laid which is proving satisfactory. This year we have made a beginning on macadam, by buying a stone crusher and engine; and as a result from our first year's work, we have macadamized a large portion of Hampshire Street, which hitherto has been one of our muddiest streets. In view of this fact, I would recommend that the city build as much macadam road each year, as its finances will permit. There are pieces of road in our rural sections which are very sandy, and it is impossible to keep them in a satisfactory condition. I would refer, in particular, to the Poland Spring road just beyond Lewiston Junction, where I would advise the building of a Telford road (as the best for this place) as soon as possible. I feel sure that our farmers would be glad to give the

necessary rocks, from their stone wall and fields, to feed the crusher, that they may get better roads. A steam roller is as necessary as the stone crusher, and the city should buy one at once; then we would be fully equipped to build permanent roads.

Appropriation, \$4,000 00

EXPENDITURES.

Cost of stone crusher, 15 horse power engine, and 20 horse power boiler, and suitable buildings over same,	\$2,004 32	
Cost of macadamizing 1,301 lineal feet on Hampshire Street, all completed except the last 275 feet which is nearly finished,	1,549 40	
Total,	—————	\$3,553 72
Balance,		446 28

There was due the city, from the Maine and New Hampshire Granite Company, crushed rock to the amount of \$1,050.38 which was received and used on Hampshire Street in addition to the \$1,549.40. The same amount of rock received from this company could have been crushed by the city for one-half that amount.

HARRY W. ROWE, *Street Commissioner.*

REPORT OF CHIEF ENGINEER.

To the Board of Fire Commissioners of the City of Auburn:

I herewith submit the annual report of the condition of the Fire Department for the year ending February 28, 1902.

The force of the department consists of chief engineer, four assistant engineers, twenty-five hosemen, twelve ladder men, engineer and stoker of steamer, five drivers.

The number of alarms the department has responded to from March 1, 1901, to February 28, 1902, are as follows:

Bell alarms, 15; still, 21; total, 36.

The following is a statement for each month of alarms:

March, 3; April, 5; May, 4; June, 5; July, 1; August, 1; September, 4; October, 2; November, 2; December, 2; January, 2; February, 5.

Property loss by fire, \$1,498.00. Value saved, \$67,050.00.

Respectfully submitted,

A. W. MILLER, *Chief Engineer*

REPORT OF BOARD OF HEALTH.

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN:—The Board of Health submit to you their Annual Report for the year ending February 28, 1902. The membership of the Board was changed at the commencement of the year by J. W. Beede, M.D., retiring, and Mr. A. C. Rich taking his place. Dr. Beede has been a very efficient member, intelligent and conscientious in this important work. A prominent health officer says "that one of the things which render the work of local boards of health less valuable than it should be, is the too frequent loss from the public health service of the conscientious local officer who has carefully informed himself regarding the duties of his office and has done them well. The value of the work of such a man is so great that a city should, at any reasonable cost, retain such service when it is evident that the right man for the place has been found. The best men in the city are none too good to look out for the interests of life and health, and to do it economically—the more likely to be done economically when it is done promptly and rightly."

At the annual meeting, April 2, 1901, Otis J. Cook was elected president and A. M. Peables secretary for the ensuing year. On May 6th the board elected Charles E. Marvell inspector of plumbing.

There has been no outbreak of contagious or infectious diseases since our last report, worthy of special notice; nevertheless, almost every week there has been reported to the secretary of this Board, a patient ill either with diphtheria, scarlet fever, measles, whooping cough, typhoid fever, consumption or some other contagious or infectious disease. All cases reported have been carefully looked after, believing that

disinfection of the rooms and things used by consumptives is of vital importance.

Twelve nuisances have been reported and removed. Seventeen cases of diphtheria, twelve of scarlet fever, eight of whooping cough, thirteen of measles and seven of typhoid fever have been reported to the Board, all of which have recovered. Antitoxin was used in every case of diphtheria with good results. Suggestions:

The great need for cleanliness and particularly during the summer months, cannot be too strongly urged upon the citizens of our city. Filth should not be tolerated at any season, but in months when frequent and great heat makes decomposition rapid, more than ordinary attention should be given to sanitary cleansing of both public and private premises. It is not only the filth that is ordinarily seen on the streets, but that which accumulates in the alleys and back yards which remains, and worse the cess-pools, sinks, garbage barrels and neglected excrete buckets that cause trouble and by fermentation and putrefaction give forth their noxious odors and gases to which can be attributed much of our sickness in the summer months. Never permit your swill and garbage barrel to remain over twenty-four hours without being emptied, thoroughly cleansed and disinfected. The products of animal decomposition are inimical to the human being, and invariably those who persist in neglect of attention to warnings of this nature, and do not take steps to keep their premises neat and sweet pay the penalty for their indifference to sanitary laws by frequent sickness in their families.

Each head of a family should constitute himself or herself a sanitary inspector over his or her premises, and daily inspect for filth, and have every objectionable thing gathered up, and, if possible, burned. Fire is the best, cheapest and most thorough disinfectant known, and should be oftener used in this connection. We have often seen a pretty, tidily kept front yard, adorned with beautiful plants and a back premises that should have shamed any person, from the dirty condition of the kitchen area and the piles of rotting filth raked in one corner, a neglected hen yard and stable, too close for health to those working in the kitchen, eating in the dining-

room or sleeping in the chambers. We ask our readers to accept the advice here tendered and save the health and strength of your families. Think over these hints, it will not consume much of your time and may be the means of saving life.

Respectfully submitted,

A. M. PEABLES,
OTIS J. COOK,
A. C. RICH.

REPORT OF CITY SOLICITOR.

To His Honor, the Mayor, and the City Council of the City of Auburn:

I herewith submit my report as City Solicitor, for the municipal year closing February 28, 1902.

I have advised the officers and heads of departments in matters relating to city affairs whenever called upon during the year.

At the April term of court, 1901, the case of the City of Auburn vs. the Town of Turner, for pauper supplies furnished Asa K. Staples, was tried and decided adversely to the city. The amount of the verdict and costs was something over \$100. The pauper was taken to the town farm and has died during the year.

There is one case pending against the city in the Oxford County Supreme Court, viz: Hebron vs. Auburn. The amount involved is about \$50. This is for pauper supplies furnished one.

There is a claim for damages for personal injuries sustained by Mrs. Roberts of New Auburn, on file, but as yet no suit has been brought in this claim.

The matter which has been pending between the cities of Lewiston and Auburn as plaintiffs and the Grand Trunk Railway Company as defendant, is still unsettled and remains on the docket of the Supreme Judicial Court of this county. The railroad company claim to offset the rental of the cities of the Lewiston and Auburn branch of the railroad against taxes which is claimed to have been assessed upon the company contrary to the terms of the lease. I do not understand that there is any controversy between the railroad company and the city of Auburn, but the share of the rental of the Lewiston and Auburn branch belonging to

the city of Auburn is held awaiting the final settlement of the matter.

The claim for reimbursement of the city of Auburn for damages sustained to the highway by reason of a washout on the North River Road, near the Googin dam, so called, is unsettled. This claim amounts to about \$2,400. The washout has been repaired by the city, a retaining wall built, and fill made, after advertising for bids, and it is believed that the work has been done in a substantial and permanent manner. The owners of the dam, the damage having occurred, as the city claims, by reason of the manner in which the dam was constructed and maintained, have the matter under advisement, and it will soon be determined whether or not a settlement can be reached without suit or not.

Respectfully submitted,

NATHAN W. HARRIS, *City Solicitor.*

REPORT OF CITY PHYSICIAN.

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN:—I herewith submit my report.

Sickness among our poor aided by the city during my service has been exceptionally light. Of acute cases at the city farm there have been but three or four, and these mild and soon recovered from.

Two have died at the farm, one Josiah Larrabee, suddenly from apoplexy. The other, Asa K. Staples, from suicide. Larrabee died August 21st, in his 76th year; Staples, November 29th, in his 74th year.

The whole number of visits 60, office visits 6, only 15 visits to the farm, some of these more visits of inquiry than of necessity.

It gives me pleasure to add my appreciation of Mr. and Mrs. Hutchinson, who, it seems to me, could hardly show more tender interest in the well being of those under their care were they their personal, life-long friends.

Respectfully submitted,

J. W. BEEDE, M.D., *City Physician.*

REPORT OF LIQUOR AGENT.

*To the Honorable Mayor and Board of Aldermen of the City
of Auburn:*

GENTLEMEN:—Herewith I submit my report as Liquor Agent for the year ending February 28, 1902.

Respectfully submitted,

A. C. DUNNING, *Agent.*

REPORT OF SCHOOL COMMITTEE.

To the Citizens of Auburn:

In conformance with the annual custom, the members of the Superintending School Committee present herewith their annual report for the fiscal year ending February 28, 1902.

HIGH SCHOOL EXTENSION.

It is exceedingly gratifying to the Board to be able to report that through the liberality of the City Government steps are being taken toward relieving the crowded condition of our High School Building. This condition of affairs was early brought to the attention of the Board, and, after due deliberation, they petitioned the City Government for an appropriation sufficient to build the new addition. The city government was pleased to appropriate for this purpose ten thousand dollars, the disbursement of which was put into the hands of a Special Building Committee. The plans, as accepted, called for a six-room brick addition of a design to correspond with the main building, and provided floor space sufficient for chemical and physical laboratories and various class-rooms. At the time of writing the extension is nearing completion, and by another fall will doubtless be ready for occupancy. With such ample accommodations as will then be provided, the effectiveness of our High School courses of study will be greatly increased, and there should result a greater facility in the way in which the work is accomplished.

COMMERCIAL COURSE.

As a Board, we recommend that at an early date a commercial course be introduced in the Edward Little High School. This course should be a superior one in every respect, equal to or better than that furnished by the best business colleges. The cost of introducing such a course can

scarcely prove excessive, as it will be necessary to add but one new teacher, one who can teach shorthand and typewriting, to the teaching force, and the amount of equipment requisite to install the course may be reduced to a desirable minimum. Taking into consideration a large number of scholars who leave the city to enter business colleges elsewhere, as well as those who do not enter the High School because of its not offering courses which tend to fit for the business, we believe the successful introduction of a commercial course would serve to increase the High School attendance, and result also in a financial saving to the citizens at large.

TEXT-BOOKS.

The most important change made during the year in text-books has been the introduction of the Werner Arithmetic, the introduction being a complete one, affecting the schools throughout, both city and rural. The work as outlined in this series has therefore displaced the previous course of study in Arithmetic, and has so far resulted in better and more effective work.

New supplementary reading material for the first, second and eighth grades was bought to supply pressing needs. In the High School a new History of England (Larned's, Houghton and Mifflin), a new French Grammar (Fraser and Squair—D. C. Heath), as well as various reference books, have been purchased on recommendation of the High School Committee.

MAPS.

The condition of the schools throughout was found by us to be deplorable with respect to the kind and quality of suitable wall maps. What maps were to be found, and they were very few, bore dates of from fifteen to twenty years ago. The geographical changes at that time have of course rendered such maps worthless. This condition was adequately met by the purchase of thoroughly up-to-date maps, dust-protected and mounted on the best spring rollers. Enough maps were bought to furnish for all practical purposes all of our schools throughout the city.

SUPPLIES.

A new plan for purchasing school supplies was tried this year. Hitherto supplies had been bought at such times as they were most needed and at such prices as it seemed most convenient to pay. The result was that the city was never adequately supplied with the necessary school furnishings, and generally paid too much for what it bought. This year specifications of supplies needed were sent to the various business houses, and bids received, the contract being awarded entire to the lowest bidder. In this way, the city was enabled to buy with more economy than usual, and gained a distinct advantage in securing a uniform line of material. We are, however, not wholly satisfied with this plan, and recommend that if contracts are made this coming year, prices be stipulated in the specification, all bidders being requested to furnish samples at these prices. The quality of the material secured will in this way tend to be always better, and we shall still secure the benefits that have accrued under the old plan.

We wish to add, as a Committee, that we believe there has been a justifiable economy in the use and care of school supplies.

FINANCIAL BUDGET.

A new departure in the manner of apportioning the school fund was tried this last year, the results being most satisfactory. Early in the year a committee was appointed from the Board to apportion to each of the several departments what seemed to be its share of the general fund, the committee basing their estimates on what had been spent in the previous year. This apportionment, as accepted by the Board, rendered it easy to find at any time what part of the fund of any department remained available, and tended toward a better economy in the expenditure of the entire fund. A year's experience under this plan with its accompanying monthly statement has proven its effectiveness, and we strongly recommend its adoption by the in-coming Board. We would suggest that this year's budget be made earlier, so

that it may be presented to the City Government as an explanation of the amount of money needed for school purposes.

TRANSPORTATION.

This problem is beginning to assume serious proportions. From a total expense of transportation of a little over one hundred dollars three years ago, the expense has increased to an annual sum of over seven hundred dollars, an amount sufficient to maintain two rural schools. The committee recognizing the fact of increase, placed a limit to the distance of transportation to one mile, no student living within that distance to be transported by the city. Even this measure, however, has been disappointing, inasmuch as the increase and expense of this department has been even greater than that of the year preceding. The whole matter, therefore, becomes a problem which should receive the careful attention of the in-coming Board.

COURSES OF STUDY.

While no permanent course of study was adopted by this Board, the Superintendent was given the power to work toward a permanent course, using as a basis certain skeleton courses submitted to the Board. It has been the aim of the School Committee to make the graded course of study of the city schools effective in the rural districts, so that the schools throughout the city might be as closely connected as possible.

INSTRUCTION.

Instruction has been of a high order in all the schools; especial attention to the instruction in the rural schools has been given under the direction of the Superintendent. Bi-weekly meetings have been held, at which special instruction in methods of pedagogy have been conducted. The result has been a very material increase in the quality of teaching rendered by the rural teachers. A similar increase in the effectiveness of the city schools has also been brought about.

We believe that this city has reached that point in its educational history where it can afford to demand more and better qualifications on the part of those who apply for positions

in our schools. Our schools cannot attain the high standard they ought to reach in any other way. Some actual experience from teaching or an equivalent in training may well be insisted upon.

SCHOOL CENSUS.

A new plan for taking the school census was tried this year under the direction of the Board. It was thought by this method that a more complete record of the city's school children could be secured, and the result seemed to justify the plan. A detailed census of all children of school age was secured, and has been so arranged and tabulated as to be easily accessible by the Board and Superintendent.

SCHOOL REPAIRS.

It has been the custom of each succeeding Board to discuss in their annual report the matter of general school-house repairs, and that, too, in spite of the fact that these repairs are arranged for and under the special control of another committee appointed and under the immediate direction of the City Council. We see no adequate reason why in the interests of better government the duties of this committee should not be delegated to the School Committee, and we are inclined to recommend to the consideration of the City Government the advisability of transferring the duties and appropriation to the care and custody of the Board of Education.

During the year more or less extensive repairs have been made in the several school buildings. The plumbing of the Washburn building has been completely renovated. A new boiler has been adjusted to the heating apparatus at the Webster building. New floors put in at the Franklin building. Extensive grading and painting at the Chamberlain building. Various other minor repairs have been made on the other buildings, both city and rural. Among the repairs which call for immediate attention, the following are to be noticed: the painting of rural school buildings, especially the Crockett, Penley, Danville Junction, Gowell and Perkins' Ridge. For the Webster building new furniture and interior painting.

At the Franklin building, the over-crowded condition of the various rooms is demanding attention, and will offer a problem for the next City Government. New floors should be laid up stairs, a covered porch added to the front of the building, the school grounds should be raised by proper grading, and larger water pipes should be placed in the halls. At the Chamberlain building the sanitary plant warrants a careful examination. These are the more important affairs which have come to our attention.

SUPERINTENDENT.

At the annual meeting, the Board unanimously voted to re-elect Mr. Richardson Superintendent of Schools. In him we feel that the city has a man who has the interest of the schools at heart, and one who has successfully labored to raise the standard of instruction. Progressive in his ideas, he has been untiring in his efforts to promote the best interests of the schools. The Board feels under great obligations to Mr. Richardson for the able manner in which he has conducted the affairs connected with the office. Many improvements have been made—the keeping of the data concerning the schools, thereby enabling the Board to ascertain at once facts they may desire to obtain.

CENTRAL OFFICE.

Especial attention has been given this year, under the direction of the Superintendent, to the organization and equipment of the central office. This the Board has rightly deemed of first importance in their attempt to firmly establish the rest of the school system. A well organized and appointed central office, so arranged as to be closely in touch with every ramification of the other departments, is a potential factor in promoting and fostering the best interests of the schools.

Among other innovations worthy of mention has been the introduction of a card filing system which has proven of immense value in controlling the mass of detail connected with our work. Cards have been devised and printed in such a fashion as to allow of an easy and complete record to be

made of all the various facts necessary for filing. One card controls the records of the school census, each card providing an allotted space for the parent's name, the address, nationality, pupils and their ages, and where they should attend school. Other cards provide for the monthly reports of the several teachers as to their attendance, enrollment, tardiness, cases of punishment, and other facts of interest; for inventories of the books used in each school-room; for truancies and cases of corporal punishment; records of teachers; individual pupils' records showing their class standing, attendance, health, etc.

The advantages that have accrued to the Board as a result of this classification and the arrangement of details of its work are obvious from a mere cursory study of the system. Great as is its value now, it is bound to increase with each succeeding year. The statistics which the system provides will through comparison result in a much wiser control of school affairs. Its chief value is in putting the Board in direct touch with even the petty details of the school system.

In addition to the introduction to this card system, other improvements have been made, which have tended very largely toward bettering of conditions. A permanent office assistant has been supplied, one skilled in typewriting and stenography, and who is thoroughly competent to attend to the business of the office in the absence of the Superintendent. A typewriter has been purchased as well as an Edison Mimeograph; suitable shelving has been placed in the store-room, so as to make much more convenient the handling of large amounts of books and supplies. The central office, however, is not large enough to fully accommodate its needs, and if the City Government should find it advisable to make enlargements in any of the departments, we trust that the cramped condition of the office provided for the School Board will not be forgotten.

MANUAL TRAINING.

We wish to emphasize what has been said by the Superintendent in his report on the subject of Manual Training in our schools. The introduction of this sort of work into our

public schools seems to be the educational trend of to-day. We recommend to the coming Board as well worthy of their consideration the question of a more or less expensive introduction of Manual Training throughout our schools.

CONCLUSION.

In conclusion, we desire to thank the Superintendent and the teachers for the spirit of co-operation with which our work has been furthered during the past few years.

REPORT OF SUPERINTENDENT OF SCHOOLS.

To the Superintending School Committee:

GENTLEMEN:—I have the honor to present the sixteenth annual report of the Superintendent of Schools of this city.

INTRODUCTORY.

The year has been characterized by earnest, faithful work on the part of all those directly concerned with the management of the schools. School Board and teaching force have been instant in season and out of season, and every department has been a center of activity and progressive endeavor. There have been no startling innovations, no great departures from well recognized lines, no attempt to gain that which was simply new. But rather an honest endeavor to hold to that which has become well established, and to secure more satisfactory results within these limits. The results have been an increased interest in school work on the part of school officials and the community at large, an increased efficiency of the school organization, and a material increase in the potential power of the public school as the chief factor in the city's progress.

CHANGES IN TEACHING FORCE.

There have been the usual number of inevitable changes in our teaching force, most of which have occurred in the department of ungraded schools. Resignations have been due largely to matrimonial offers and the securing of better positions elsewhere. Several teachers have been granted leave of absence during the year, some for needed rest and recuperation, and others to pursue courses of study along special lines. These changes have rendered necessary the securing of many new teachers, most of which are rendering satisfac-

tory service. Our teaching force is now larger than it has ever been and on the whole is in an excellent condition.

To secure a positive permanence in any teaching force is of course a thing not to be thought of. But we may hope to secure a well-trained force whose individual members are thoroughly capable instructors, good disciplinarians and possessed of wisdom and diplomacy in their control of children. Graduation from a high school merely is no sufficient qualification for teaching in our schools. The teaching profession should be considered too important and fraught with matters of too far-reaching and vital a nature to be entered upon by a bare tyro. Teaching, contrary to the preconceived notions of many, is not an idle occupation at which any one may play. In these days it is as truly a profession as that of the doctor or lawyer, and should no more be engaged in as a pastime, or without special preparation than one would expect to take up the practice of law, without first passing an apprenticeship to qualify himself for his profession. We are in danger of making the path too smooth which leads to educational preference and prestige in our public schools. For the sake of the children whose proper training means so much for the welfare of the future, we should insist upon securing teachers whose qualifications none can call in question, who have sufficiently demonstrated their ability to teach well their particular grade of work, and who possess some better qualifications than those of mere residence in the city and a diploma of a high or grammar school. It is not too much for us to insist that candidates for position in our schools shall give proof of creditable work in some training school for teachers, or of successful work in the school room, or both, before we consider their applications in any way. It is only by thus raising the standard to which candidates must measure themselves that we can hope to see our schools do the work they ought to do. It is to be admitted, however, that we have in our teaching corps some teachers who have proven themselves among our better and more admirable instructors, and yet who have come to us with but little or no qualifications for their chosen work. Such teachers, however, are few, and they succeed not *because* of their lack of special preparation, but *in spite of it*.

TEACHERS' ASSOCIATION.

The regular monthly meetings of the Auburn Teachers' Association have been well attended by the city teachers, and been the means, directly or indirectly, of much good to the schools. Courses of study, which a year ago were in sadly disorganized condition, are now well correlated and strengthened. Grade work has been unified, class work systematized, and the standard of actual teaching raised to a level not attained before. These fruitful results are to be largely attributed, however, to the devoted spirit of the several teachers, who have brought to pass in the school-room what has been but exemplified in the general and grade meetings. We have, however, but begun to make the improvement which needs to be secured. Much still remains to be done, a condition of affairs which must, in some ways, at least, be considered fortunate, as it successfully precludes any possible stagnation in the current of school progress.

In addition to the regular monthly meetings of the association, the teachers of the rural schools have met with a good degree of regularity at the superintendent's office, Saturday forenoons. These meetings for consultation and discussion have served to increase the effectiveness of the work in our ungraded schools in many ways. It is impossible for any one man to visit sufficiently often the twenty-one outside schools and attend properly to the work at the central office and the city schools. The special teachers, in order to do successful work, have the same difficulty to contend with. These frequent meetings, therefore, at which the special teachers in drawing and music have given detailed instruction relating to their work, and which have afforded the superintendent the necessary opportunity of often seeing his teachers, have very naturally resulted in a constantly increasing improvement in the quality of instruction in the rural and ungraded schools.

Principals' meetings have also been held monthly, at which meetings free expressions of opinion are voiced with regard to the most effective methods of school work. Matters of school management and organization are made a matter of co-operative study, and clearer views are sought of puzzling problems.

In addition to these various gatherings, the general association meeting, the meeting of the rural school teachers, and the principals' round-table, occasional grade meetings have been called for the purpose of correlating the grade work of the several schools, and to discuss and advise with regard to details of the course of study. As a result of these meetings, our schools are more closely allied as a working unit than ever before. It is not an important desideratum that our schools be each precisely alike in their method of work or in the results that they attain; something must be left to the individual policy of the principals and the varied interpretation of details by their teachers. What is desired, is that the methods of instruction be right methods, and that one general plan shall be followed in a reasonable way.

Each principal has called frequent meetings, usually once a week, in their several buildings, for a closer discussion of the work of their own particular school, and the phases of the work peculiar to their own conditions.

The attempt is thus being made all along the line, and being made conscientiously and with purpose, to improve the quality of the instruction in our city, to work out the details of an adequate course of study, and to perfect the general organization and management of the public schools. It is not to be accomplished in a day, nor a year, nor several years, but it is nearer than it was, and the goal is certainly worth the winning.

CENTRAL OFFICE.

Back of all this multiple organization has been the central office, the work of which has necessarily increased to considerable dimensions. The lack of system of two years ago has been largely eradicated, and an office system has been devised and installed which serves to control the varied details in a most effective way.

The aim has been to make this department of the utmost service to all other departments, and to do this by keeping in touch with all the other parts of the school organism. It is not too much to say that this central office has become essential to the proper working of the rest of the machine.

It maintains a close surveillance of details, and holds itself in readiness to extend needed aid to any quarter.

The Card System, which has been introduced and made an integral part of the office economy, has proven an admirable device for the keeping of proper records. Some ten or twelve differently ruled cards serve to tabulate the various items of school transactions. Take the matter of school supplies, all of which is handled by the central office—by means of cards, one for each teacher, due record is made of all supplies and books ordered from the central office, as well as of all books, etc., returned, lost, destroyed, or sold, so that at any time the record shows at a glance exactly what and how much each teacher has or is using. A complete census of the children of school age is also maintained, which by a constant exchange of reports between principals and superintendent is kept practically correct to date. It is working as an important factor toward a practical freedom from truancy and violations of the child labor laws. Monthly reports from teachers, giving date as to attendance and registration, cases of truancy and corporal punishment, records of teachers with their qualifications and school history, records of visits by the superintendent with criticisms, individual records of pupils and their attainments, go to make up some of the many details which are adequately and easily controlled by that eureka of modern devices—the Card System.

The purchase of a mimeograph early in the year has rendered it possible for the office to serve the schools in another new and important way. Numerous bulletins containing suggestions relating to various phases of the work have been sent out from time to time, details of the courses of study have been published, outlines of work presented, bibliographies, programs, notices, etc., have been put into the teachers' hands, in a form at once attractive and worth preserving. Something of value has been accomplished in this way, I am sure, and it is believed a much greater service can still be rendered along similar lines.

HIGH SCHOOL.

For the high school this has been a year of change and of more or less confusion, owing to the protracted building of

a six-room addition to one side of the main edifice. The increase in the number of pupils in our high school reached such limits last year that it was recognized as absolutely necessary to provide more room for the pupils' accommodation. Built originally to accommodate but 250 scholars it needed little demonstration to satisfy the Board that a larger structure was necessary for a school of nearly 400. Accordingly, at the recommendation of the High School Committee, the Board memorialized the City Council in a written petition asking that suitable addition be made to the old building to fit the needs of so large a school. The council responded in a generous way and appropriated \$10,000, to be applied, under the direction of a special committee for the purpose named. The building has progressed slowly, but is now in place and ready for the interior finish. It cannot fail to materially augment the facility with which the work of the school is discharged. It is expected that the new administration will take up the good work of the present committee and carry the building on to a speedy and satisfactory completion.

Owing to this same fact of increase in attendance, divisions of recitation have long been unwieldy. This was such an evident detriment to the efficient work of the school, that beginning with the fall term it was deemed imperative to add one teacher to the force. The pressure upon teachers in certain subjects has thus been somewhat relieved, and pupils have gained the decided benefit of more frequent participation in the daily recitation.

When the new addition is completed, there will be room for what has come to be felt as a much needed adjunct to high school work in this city, viz., a business or commercial course. This course has been under more or less discussion during the year, and a growing interest in the subject has been observed in the community. As a result the conditions seem favorable for the development of a business course, the object of which, while not nearly so technical as some would prefer, should be that kind of an education which develops and strengthens the mental faculties used in business, and which provides that general knowledge which is useful in all business, and, in some cases the particular kind

of knowledge useful in a particular business. The course of study of this department must be exceedingly strong in those subjects which the 99 per cent. of those who attend will require (the essentials), and, if possible, strong in those branches which will be wanted by the 1 per cent. who are expected to become bank presidents, railroad managers, promoters of vast enterprises and the like. The studies of the course may be grouped as follows: English; mathematics; science; languages; history and civics; commercial subjects taught separately as such, including writing, bookkeeping, arithmetic, commercial law, stenography, typewriting.

The study which should assume the first place in the commercial course, is English, and should have adequate and definite treatment throughout the course. This and all other subjects should be taught by fully qualified instructors.

It will not be expedient to install any course which shall require less than the present four years' work. The cost of installing such a course will not be exorbitant. One additional teacher will be needed, who shall be qualified to give instruction in stenography and typewriting. To pay the salary of such a teacher will not necessarily imply any increase of the present high school appropriation. The actual equipment of such a department need not necessarily be a large one at first. Whatever is done, the aim of the Board should be to introduce such a course as will compare favorably with the best that is being done in the best high schools of the country. There is no reason why graduates from a business course in our high school should not attain a desirable reputation in those positions to which they will wish to aspire. The Edward Little High School has already won a name for itself here and abroad, but this fame can be materially strengthened by a really superior and effective commercial course.

In spite of the distracting and unfavorable outward conditions, the regular work of the high school has maintained its usual high and reputable standing. In the number of students entering college from the graduating class this year, we led, as usual, all the fitting schools of the State. In numbers we are the second largest high school in the State, while the attendance, considering its relation to the city's

population, is greater than that of almost any other city one can name. The teaching force of the school is doing for the most part superior work, and with the completion of the new addition, thereby affording better and more favorable conditions for work, we may rightly expect an improvement in the quantity and quality of work accomplished.

ATTENDANCE.

The attendance has been uniformly good for the past year. No serious epidemics or accidents have served to materially affect the registration. The amount of tardiness, mention of which was made in my last year's report as being unnecessarily large, has been satisfactorily reduced. A determined effort by the several teachers has accomplished its purpose. What tardiness we do have, however, is still largely unnecessary, is confined to a few, and is more often the fault of the parent than that of the child. So, too, with much of the non-attendance. Parents are greatly to blame. Petty reasons are allowed to serve as a sufficient excuse for their child's remaining away from school. This phase of the work is extremely difficult of correction, and may only be corrected when parents see their responsibility in the proper light.

Actual cases of truancy have been relatively few, and this, too, in spite of the fact that we have had no special truant officer. Principals and teachers, however, have policed their several districts in an efficient manner, and with the assistance of Deputy Marshal Hopkins we have controlled the more open offenders and reduced truancy to a desirable minimum. For other facts and statistics in regard to school attendance, you are referred to the tables and varied data appended to this report.

MANUAL TRAINING.

It is not intended at this time to set forth arguments in favor of manual training. In my last annual report space was devoted to an exploitation of such arguments, and they are now everywhere so well known and so generally accepted that a repetition is unnecessary. Suffice it to say that there

can be but little or no question as to the need and desirability of manual training in our course of study, it resolves itself to a discussion of its cost.

Before entering upon this discussion, it may be well to emphasize the fact that our schools are not, and have not been for many years, without manual training. In the primary grades, kindergarten or manual busy work plays an important part in the daily program. The drawing, paper cutting and clay modelling are all true forms of manual training. All of this is to be retained. What is proposed is to extend this kind of work, in sort adapted to the different grades, up through the grades, as far as and if possible through the high school. The work of the first four grades will require but little extension. Work in clay, paper, cardboard, wood, and cane weaving could be provided, the aim being to bring into use the larger co-ordinations of brain and hand.

The constructive work of the fifth and sixth grades may be done in the regular class rooms, each pupil being supplied with a desk tray containing the simple outfit of tools. These classes should use materials for weaving and basketry, and construct simple articles in knife work.

For the upper grammar grades and possibly including the aforesaid fifth and sixth grades, two rooms—one in the basement of the Webster, the other at the Wilson School—would need to be fitted up and furnished with proper work benches and accompanying tools. The work would be largely in wood at first, but later such materials as leather, brass, copper, cloth, tin, and Venetian iron could be called into requisition. The rooms for these two centers of work are available, and would require practically no special preparatory cost. Now as to the expense of equipment, a wrong impression of which serves to hinder the adoption of manual training in most small communities.

Basing my estimates upon an experiment tried in a western city, I wish to offer the following plan for equipping the basement room of the Webster School. For a class of twenty-four pupils, six suitable benches, each accommodating four pupils, would cost \$45.00. Twenty-four kits of necessary tools at \$3.18 would cost \$76.32. A further expenditure of \$30 for a grindstone and tools for general use would make

the total cost \$151.32. Four classes per day, giving 90 minutes to each class, could use the tools. One lesson per class per week would permit 480 pupils to receive instruction, the full number attending the Webster School, boys and girls. Allowing 33 1-3 cents per pupil for material, the expenditure would be \$160 for 480 pupils. The total expenditure for installing manual training according to this plan is \$311.32, not including, of course, the cost of instruction. If only the boys were to receive this instruction, the girls pursuing some line of domestic economies, this estimate would be more than large enough for installing the system in both the Webster and Wilson buildings. Such a cost is scarcely prohibitive, especially in this enlightened day, when the end of education is recognized as not bare book-lore, but the development of the individual,—to establish his relation to the outside world and the universe, and when, too, we are beginning to realize that the training of hand and mind are alike necessary. It is to be hoped this matter may at least have the earnest consideration of the school board and their constituencies.

SCHOOL DECORATION.

Material additions have been made to many of our school buildings during the past year in the way of mural decoration. It is a step in the right direction. The establishment of School Improvement Leagues in many of the rural schools has resulted in remarkable changes in the external and interior appearance of the buildings. School yards have been levelled and graded, walks gravelled, walls and ceilings tinted, and pictures, flags, etc., added to the school furnishings.

The city schools have shown an equal interest and something is being done each year to give the school rooms a true artistic touch. It is a pity that our city fathers do not find themselves able to take in hand the matter of beautifying the school grounds of the various schools. With comparatively little expense these school yards could be made among the most attractive spots of the city without destroying the children's space for recess and recreation. Broad

lawns and shrubbery, children's gardens and shade trees are among the possibilities. Here is a field for the women's clubs, a worthy object, and one right to their hands.

NEEDS.

I again wish to urge upon the Board for their consideration the need for a special appropriation for the purchase of reference books and school help for the teachers. We need such a provision that our teachers may be properly in touch with all that is latest and best in methods of school work.

Our course of study should be revised and collaborated and put into a printed form for the convenience of school officials.

The rules and regulations of school committee need to be thoroughly revised, as amended by the School Board from time to time. The form in which they now exist is far from representing the rules which are now in force.

It would be advisable to print in one pamphlet the rules of the School Board and the course of study.

There is need of an efficient method of securing and filing specimens of the work of the public schools. Hitherto nothing of this sort has been attempted, so that to-day we have nothing of the past with which to compare the standards of the present. For this purpose there would be need of a suitable filing cabinet at the central office.

A generous amount of money should be expended upon text-book account during the coming year in the purchase of more supplementary reading material for the primary grades and the addition of suitable text-books in commercial geography and English history for ninth grammar grades. A part of this appropriation should especially be devoted to the repair of worn-out books.

Nothing as yet has been done to secure a no-school signal on the fire alarm apparatus. There is no doubt but what an alarm rung in on the fire whistle would render far better service than do the bells which now sound the no-school signal.

CONCLUSION.

In concluding, I wish to express my appreciation of the cordial support given me by the Board in the administration of school affairs. I desire also to thank the principals and teachers for their co-operation, without which no degree of success would be possible.

Respectfully submitted,

B. C. RICHARDSON,

Superintendent of Schools.

Auburn, Me., March 5, 1902.

REPORT OF DIRECTOR OF MUSIC.

To the Superintendent of Schools:

It gives me pleasure to report to you a successful year in the musical work of the Auburn schools.

The School Music Festival, which occurred May 3, 1901, showed in a satisfactory manner that music as a study is worth as much or more than any other study in waking up the mind of the child and making him brighter, better and happier.

The first four grades showed work in the forenoon, the grammar grades in the afternoon and the high school in the evening.

All the work was so well done that no apology or comment is needed, from me.

The teachers' meetings which have been held during the year have given me an opportunity to present methods of teaching music and outline the work to good advantage.

Your director of music is expected to visit all schools that have an average of twelve scholars. Over seventy visits have been made this year to schools that have less than that number.

Each teacher is responsible for the success of music in her room, and the drill work must be done by her. Your director of music must *direct* and your teachers must *teach*, to get best results.

Quite a number of Edward Little graduates are teaching in the rural schools; having become familiar with music in their own school work, they are now teaching it in a satisfactory manner.

Where teachers have had no training in music, the work cannot be good, and the children lose what rightfully belongs to them.

Individual work is receiving more attention than formerly, especially in the lower grades, and it is found that

after a little practice, children are just as free to sing alone as they are to read alone; in this way individual faults can be corrected and encouragement given.

There is need of something as supplementary work in the eighth grade, to give more practice for the bass voices that are generally found in this grade.

The codas and octavo music at the high school have been bound and are in good condition. I would suggest that some work in cantata form be taken up another year.

I wish to express here, my appreciation of the hearty co-operation of the teachers, the principals, the Superintendent, and the School Committee in my work.

Respectfully submitted,

N. L. MOWER, *Director of Music.*

REPORT OF SUPERVISOR OF DRAWING.

Supt. B. C. Richardson, Auburn, Me.:

DEAR SIR:—We forget much after we leave the school-room and enter the world. Taste and the power of weighing the relations of things are perhaps the only qualities which we find of much use to us after all, and upon these the teacher should pour forth her best efforts. In teaching drawing in the public schools one purpose should be kept in mind. We cannot expect to find equal power in each child, all cannot become artists. One strong aim in the teaching of drawing this year has been to lead the children to not only *see* but create beauty, as discovered all about them in Nature. Much has been done in the way of original designing. We must remember that most of our pupils will be the purchasing public of the future, and it is of as much importance for them to buy intelligently as for the designer to create intelligently. The general plan of work for the year is for September and October nature work from flowers and fruits, using as mediums, brush with color, brush and ink and pencil; November and December, designing and mechanical drawing; January and February, historic ornament and mechanical drawing; March and April, object drawing and design; May and June, nature work. My program is to visit each room in the city schools once each week, and each rural school as often as the time will allow, making visits into the country two half days of each week. Children remember longest what they learn with pleasure. I have discovered that children, with hardly an exception, find true pleasure in their work in drawing. Through the principles learned in composition and design, not a few pupils have composed pictures and originated designs with commendable results

Our work at the High School has been greatly handicapped by having no suitable room for the work, yet great interest has been manifested within small quarters.

"Wal, I don't see how heaven can be any handsomer than this!" said the old lady from Nebraska at the Pan-American Exposition. "It's like the New Jerusalem!" answered her husband. And yet we have always been told that in America the people don't care for Art.

Is life so crowded that a moment cannot be spent each day admiring some beautiful thing?—a bit of color, a cloud-shadow, a flower, a moth, a verse of a poem, a rich chord of music,—“Whatsoever things are lovely, think on these things.”

Respectfully submitted,

IDA L. SMITH.

Auburn, Me., April 28, 1902.

REPORT OF INSTRUCTOR IN ELOCUTION AND PHYSICAL CULTURE.

Supt. B. C. Richardson, Auburn, Me.:

DEAR SIR:—I herewith submit my annual report as teacher of elocution and physical culture.

There is nothing so conducive to health, nothing so replete with attractive interest to pupils as physical class-drilling. It strengthens their bodies, gives ease of motion and control of their limbs, remedies incorrect and ungainly postures, inculcates promptness and obedience, and most of all, amuses them.

As heretofore the Swedish and Delsarte systems of physical culture have been used in all grades. Gymnastic plays and games, pedagogical, æsthetic and vocal gymnastics have been conducted during the school year. The work in Action Poems which was introduced for the first time last year has proved to be the most interesting feature of the work, much individual work being done in this line. A smaller number of pupils have remained seated during these exercises this year than ever before, which proves that both parents and physicians appreciate more than ever the value of the work done in this department.

I hope that soon each child as he enters school will be examined physically. At present the child is examined as to his mental attainments; but physical qualifications, other than an immunity from small-pox by vaccination, are not considered.

The teachers are becoming more familiar each year with the work, consequently the results are more pleasing.

Respectfully submitted,

CARRIE LINWOOD PEABLES,

Instructor Elocution and Physical Culture.
