STANDING COMMITTEES

OF COMMON COUNCIL.

ELECTION RETURNS—E. C. True, H. H. Houghton, C. G. Ross.

CONTINGENT EXPENSES—W. A. Paul, J. A. Langen, L. P. Parker.

Regular monthly meetings of the City Council on the first Monday of each month, at the City Council Rooms at 7.30 P.M.

Regular monthly meetings of the Committee on Accounts, to examine bills, on the fifth day of each month, or if the fifth comes on Sunday, then on the preceding day, at the Treasurer's Office at 7.30 P.M.

MAYOR'S ADDRESS

Gentlemen of the City Council:

In accordance with law, there was held on Monday, March 5th, an election in the several wards of the city, at which time and place all political differences were buried, the people of these wards selected from among their numbers certain men to act as their servants and to represent them—the people—in the city government for the ensuing year.

Gentlemen, this is the proud title, with which we may surround ourselves, on this, our inaugural day, servants of the people of the city of Auburn for the ensuing year.

The object of our selection is that we may form ourselves into a thorough working machine, without noise or friction, and take up the burdens of our predecessors in office, and give to them that stability of purpose and soundness of judgment, that will always revert to the very best interests of the city of Auburn, and to the people therein.

The success of all committee meetings for the transaction of business, depends upon the prompt attendance of all the members of these committees.

While the motto all along the line of the United States Government is to advance, Auburn must not be found wanting, yet the tax payers or people, if you please, demand to be heard, and they insist that you be so conservative in your appropriations, as not to increase the rate or burden of taxation one iota, but rather make a good substantial decrease, if it is possible to do so.

Let our motto be, "Economy the watchword, the city government the watchman."

At this time I do not deem it advisable or profitable to submit a lengthy discourse for your consideration, and until a thorough examination of the various departments and financial conditions of the city has been made, it is absolutely impossible to lay down a complete course of action.

From the treasurer's report I submit the full statement of the financial condition of the city.

LIABILITIES.

4 % bonds, due 1906 to 1925,	\$124,500 00
3½ per cent. bonds due 1920 to 1925,	93,500 00
Bond No. 9 due July 1, 1897 not presented,	500 00
Water Loan bond No. 113, due July 1, 1905,	500 00
	<hr/>
	\$219,000 00
Temporary Loan,	\$58,400 00
4 per cent. Water Loan bonds, due May 20, 1913,	30,000 00
3½ per cent. Water Loan bonds due July 1, 1925,	58,700 00
	<hr/>
	\$88,700 00
Sarah S. Preble burial lot fund,	150 00
	<hr/>
	\$366,250 00

RESOURCES.

Uncollected taxes,	\$29,786 14
Uncollected tax deeds,	995 22
Uncollected sewer assessments,	450 00
Uncollected sidewalk assessments,	435 22
Amount in water works,	88,700 00
Lewiston & Auburn R. R. stock,	75,000 00
Cash in treasury,	2,774 84
	<hr/>
	\$198,141 42
Present net debt of city March 1, 1906,	\$168,108 58
Debt of city March 1, 1905,	171,845 32
	<hr/>
Reduction of	\$3,736 74

There are \$18,000.00 of 4 per cent. bonds due July 1, 1906. The payment of these bonds can probably be provided for by a new issue of the same and at 3½ per cent.

Valuation from which to levy taxes:

Real estate,	\$5,891,610 00
Personal estate,	928,965 00
	<hr/>
	\$6,820,575 00

HIGHWAYS.

Upon the question of good roads too much that is favorable cannot be said. It is vital to all tax payers, whether from the rural section or the centers of population, that every cent that it is possible to divert from other channels to the appropriation for permanent roads should find its way to this appropriation. The permanent improvement, or better still, the good roads question concerns not only the farmer, with his load of produce bound for market, the doctor in his midnight drive through the country, the merchant dispensing his wares through the town, the bicyclist doing his first century run, but also the possessor of our more modern conveyances, the auto touring car. As a means of building permanent roads at a minimum cost, I would refer you to Chapter 126 of the Public Laws of 1905. Should you deem it advisable to resort to such a course, in connection with our improved machinery, it must of necessity give us more miles of road, with less money expended. I recommended for your consideration a good liberal appropriation for permanent roads.

SEWERS.

I find upon examination of the several reports, that a beginning of the Goff Hill sewer has been made but still lacks an appropriation to complete the same, and make it effective in the sense that it was designed. I wish to ask your co-operation in providing funds to advance this job, even if we are unable to complete it.

FIRE DEPARTMENT.

In conversation with your chief of the department I find this department in excellent condition, having had several improvements made during the past year. Their particular wants are new hose, which means more effective fire fighting which is of vital importance to all, and I would ask you to consider this matter in making up your appropriation for this department.

POOR DEPARTMENT.

Auburn's unfortunates, quartered at the city farm, are well cared for, and as contented as people in such conditions

usually are. Most of the inmates are very old, or extremely feeble people to such an extent, that it is not deemed advisable or safe by the superintendent at the farm to allow them kerosene oil lamps in their rooms, for fear of fire, leaving the inmates, although old and feeble, in darkness for a long period, and in case of sickness or feeble health seems to be rank injustice.

I would recommend for your consideration, installing with electricity, the buildings at the city farm, not only to add to the comforts of the inmates and efficiency of the service rendered, but to lessen the fire risk and insurance rates.

That consideration will be given to every proper request for assistance from the city's poor, who are not on the farm is to be taken for granted and we hope all deserving cases have been given the proper assistance. We must not economize at the expense of human suffering.

SCHOOLS.

Of the several departments with which it falls to my lot to come in contact, there is no department in which I am more vitally proud to say, that when called upon so to do, Auburn has always responded liberally to this branch of her government.

Within the past ten years, the capacity of her Primary Schools has been increased by a half, her High School has been provided with a generous addition, nearly doubling its capacity, but in the Grammar School grade, we find it so cramped for room by being confined to an absolutely old structure in the uptown section, as to create almost a libel on good government.

This building in my opinion, should be overhauled from foundation to ridge-pole, under the keen eye of an architect, and a change made in the same, from its present twenty-five-year-old condition to a modern structure, adequate to the present time.

Whether it is possible or advisable for this present government to attempt any such changes, I leave for your consideration. For a detailed report of your schools, I refer you to the report of the School Superintendent.

WATER WORKS.

I should hope to be conservative in any discussion of this question, as I find in this department, an unusual condition of things existing.

A condition of the city through its Water Works Commission, bringing a suit at law for over \$5,000 against the city proper for non-payment of hydrant assessments. To me, it certainly seems that the city in any event, regardless of the action of the court must pay the expenses of litigation in addition to the original bill. I understand that the opinion of the present city solicitor is, that the city is liable for the payment of the Water Commissioners' bill for hydrant service.

To illustrate, if a bill is presented to me and payment demanded and my lawyer advises that the bill is collectable against me, the quicker a settlement can be effected and payment made, the less money it takes to do so and short settlements make long friends.

I regard this matter as the most serious of any confronting us and calling for immediate action and a settlement effected upon the most equitable terms possible, as it is the tax payers' money that you are juggling with and not your own. To stop this action should be the first duty of this present government.

CONCLUSION.

In commenting upon the several departments, time permits me only to touch upon the more important questions and as I see them, and in my recommendations, if I have been too strenuous or have overstepped the bounds of propriety I ask your pardon. If I have paused at mole hills instead of the mountains beyond, I again ask your pardon. I trust that when our organization is complete and in running order, we will give the people of Auburn an administration that they may be proud of, both for economy and businesslike methods governing our actions throughout the year.

TREASURER'S REPORT

To the Mayor and Members of the City Government:

GENTLEMEN—I herewith submit my report as Treasurer of the City of Auburn for the year ending February 28, 1906.

By vote of the City Council September 11, 1905, the sum of \$1,500 00 was transferred from the Contingent appropriation to the appropriation for Sewers, Goff Hill; and which does not appear as transferred in the Tabulated Statement.

Respectfully submitted,

MURRAY B. WATSON,

City Auditor.

REPORT OF OVERSEERS OF THE POOR

To the Honorable City Council of the City of Auburn:

The Overseers of the Poor have the honor to submit the following report for the year ending February 28, 1906:

The amount appropriated by the City	
Council for support of the poor,	\$4,000 00
Total receipts from City Farm,	1,715 59
Total receipts from outside sources,	497 21
	\$6,212 80
Cost of maintaining the poor and insane	
for the year ending February 28,	
1906,	\$6,297 77
Appropriation overdrawn,	\$84 97
The following amounts are due the	
department from other towns and	
cities,	\$136 60
Total expenditure for the City Farm was,	\$3,713 98
The net cost of maintaining same,	1,998 39
Total expenditure for assistance rendered per-	
sons outside City Farm,	2,583 79
Net cost for same was,	2,086 58

There are now nineteen inmates of the City Farm; two deaths having occurred during the year.

The buildings at the Farm have been kept in good condition and very little in the way of repairs will be needed the coming year.

The following is a detailed statement of the stock and other property now on the Farm:

14 cows,	2 horses,
1 bull,	4 shoats,
100 bushels of potatoes,	30 hens.
10 bu. of vegetables,	38 cords of wood,
3 bu. of beans,	5 tons of coal,
5 barrels of apples,	45 tons of hay,
2 barrels of vinegar,	3 tons of straw,
	40 tons of ice.

A pair of young horses have been purchased for this department this year at a cost of \$450 and same have proven very satisfactory.

Everything about the place, both in and outside of the buildings gives evidence of the conscientious and well regulated endeavors of the Superintendent and Matron, Mr. and Mrs. C. E. Emerson.

In closing, we would earnestly recommend that a system of electric lighting be installed in the Farm Buildings, on account of both its safety and convenience.

A. Q. MILLER,
I. L. MERRILL,
J. F. LARRABEE,
L. E. FLANDERS,
W. S. WALKER,
P. P. THIBAULT.

FRANK BARTLETT,

Died

September 10, 1905.

Frank Bartlett became a member of the Board of Water Commissioners in 1895 and continued until his death. He was a man of broad views, loved his City and took active interest in its affairs, especially the Water Works department, and it was his great desire to see the reservoir completed on Merrill Hill. Frank Bartlett was a man of absolute integrity, and had remarkable gift in winning and keeping friends. By his death this Board lost a valuable advisor and lovable associate, and the City one of its best men.

To the Honorable Mayor and City Council of the City of Auburn:

GENTLEMEN—The Board of Water Commissioners herewith submit their thirteenth annual report.

At the annual meeting of the board held March 20, 1905, Mr. S. K. Ballard was elected president of the Board, Andrew W. P. Cobb re-elected clerk, Forrest E. Bisbee re-elected superintendent, and L. L. Rand re-elected engineer.

During the past year your Commissioners have completed the 20-inch pipe line from the junction of Turner and Pleasant Streets to the Screen Well at the City Farm at a total cost of \$34,077.43. With this line completed it gives Auburn an abundant supply of water for all time.

In early spring work will be commenced on the Merrill Hill reservoir, which the Commissioners hope to complete in two years.

In July, 1905, your Commissioners retired the first payment of the bonds amounting to \$60,000.00.

Your Commissioners are pleased to report an increase in the net earnings and a decrease in the abatements during the past year.

During the past year your Commissioners lost a very able man in the death of Mr. Frank Bartlett, which occurred September 10, 1905, and Mr. Geo. B. Smith was elected to fill the unexpired term.

The following statement shows the net income of the works for the year ending February 28, 1906. Also a detailed statement of the Assets and Liabilities. We also give a condensed statement of the entire net income for the thirteen years that the City has enjoyed municipal ownership.

Water rents collected during the		
year,	\$30,839	78
Licenses, fines, etc.,	18	00
	<u> </u>	\$30,857 78

Water bills uncollected February 28, 1906, as follows:

Balance due City for hydrants to		
May 1, 1906,	\$3,960	00
Other bills,	850	69
	<u> </u>	\$4,810 69
		<u> </u>
		\$35,668 47

Less water bills uncollected February		
28, 1905,	3,142	72
	<u> </u>	
Gross earnings for the year,		\$32,525 75

Less operating expenses as follows:

General expenses,	\$6,865	94
Repairs,	604	42
Interest,	12,487	50
Allowances on bills due February 28,		
1905,	143	10
	<u> </u>	\$20,100 96

Net income for the year,		\$12,424 79
Net income to February 28, 1905,		98,916 85
Premium and accrued interest on bonds		
sold June 1, 1905,		1,385 33
	<u> </u>	
Total net income to February		
28, 1906,		\$112,726 97

ASSETS.

Water Plant,	\$388,644 89
Stock on hand February 28, 1906,	3,346 48
Tools and Fixtures,	4,065 75
Bills receivable February 28, 1906,	4,915 08
Sinking Fund,	24,104 81
City of Auburn Note No. 124,	5,000 00
City of Auburn Note No. 126,	3,500 00
Cash on hand February 28, 1906,	2,589 31
	\$436,166 32

LIABILITIES.

Water Commissioners Bonds due July 1, 1905, not presented for pay- ment,	\$1,000 00
Water Commissioners Bonds due July 1, 1910,	45,000 00
Water Commissioners Bond due July 1, 1915,	55,000 00
Water Commissioners Bonds due July 1, 1919,	50,000 00

Auburn, Me., March 14, 1906.

AUBURN, ME., March 17, 1906.

This is to certify that I have examined the books of Andrew W. P. Cobb, Clerk, and of A. C. Sprague, Treasurer, of the Board of Water Commissioners for the year ending February 28, 1906, that I find them correct and I hereby approve the same.

MURRAY B. WATSON, *Auditor.*

REPORT OF SUPERINTENDENT OF WATER WORKS

AUBURN, ME., March 1, 1906.

To the Honorable Board of Water Commissioners :

GENTLEMEN—I have the honor to report to you the thirteenth (13) annual report of the improvements and working of this plant.

This has been a fine winter to take care of the street pipe lines, we have had only one call for a freeze in the street and that was on the dead end of Second Street, cause, the street department constructed a catch basin near the pipe and the cold followed down the brick work and froze the main; after The Electric Thawing Machine was connected to the water pipe, the water was flowing in two minutes.

STATION AND MACHINERY.

The boilers and pumps are in good working order, the boilers were inspected January 23, 1906, by the Maryland Casualty Co. of Baltimore, Md., and found to be in good condition, care and management.

RELAYS OF SERVICES.

A relay of fifty-nine (59) services at a cost of labor and stock, \$612.02.

NEW SERVICES.

Twenty-one (21) new services have been connected at a cost of labor and stock, \$191.90.

LEAKS.

The number of leaks have been but a few, five in the main lines and fourteen in the lead corporations.

The Screen Well at the lake has been painted with two coats of paint and the street bridge across the Little Androscoggin river one coat at a cost of labor and stock, \$19.91, the regular men doing the work.

GATES.

The gates are all in good working order, having a total of 408 in the main pipe lines.

IMPROVEMENTS.

To extending of the main in Taylor Street with fifty-two (52) feet of two-inch pipe at a cost of stock and labor \$13.17, to one hundred and twenty (120) feet of 1½-inch pipe in Minot Avenue southwest of Geo. Whitehouse's, at a cost of stock and labor, \$24.26.

In 1901 the Board of Water Commissioners voted to bring a 20-inch pipe line from the screen well at the City Farm to the junction of Turner and Pleasant Streets, the estimated cost was \$45,259.66; in 1901 the line was commenced and built from the junction of Turner and Pleasant Streets to the Logan, so-called, at a cost of \$4,152.93; in 1904 the line was extended from the Logan to the foot of Howard's Hill at a cost of \$11,447.57, and in 1905 the line was extended from Howard's Hill to the Screen Well at the City Farm at a cost of \$18,476.93, or a total cost of \$34,077.43, or \$11,182.23 less than estimate; the work of 1905 was commenced May 24th and finished August 15th, the City of Lewiston was shut off August 15, 1905.

When the water was let in the new 20-inch pipe line the air valves gave solid water and the pressure at the pumping station came up from 15 lbs. to 23 lbs. when the pumps were running at full speed. It also changed the pressure on Fifth Street, New Auburn, which is high point on the low service, so that they have water all of the time. The pipe that feeds New Auburn on the low service from the Park down to the foot of Laurel Avenue near the iron bridge, is only six inches and you will very soon have to extend the twelve-inch pipe line that is ended at Roak Block down Main Street, over the Grand Trunk Railway to the junction of Laurel Avenue and Newbury Streets, connecting with the twelve-inch pipe line across the bridge. This will give you a good fire service in New Auburn.

PUMPING RECORDS.

The records kept of the water pumped in 1904 and 5 show a waste of 8,140,871 gallons over the winter of 1905 and 6, The winter of 1904 and 5 was a very cold winter and as the services did freeze, after they were thawed out the water had to be kept running until warm weather.

Report of H. D. Evans, Chemist to the Lewiston Journal Co. on the purity of the water of Lake Auburn.

AUGUSTA, ME., Oct. 17, 1905.

To Editors of the Lewiston Journal:

Enclosed are the results of the three analyses of water sent me on the 10th instant.

You asked that I arrange the results so that they may be compared with those of Prof. Robinson in 1889. I can do this except in the case of the mineral constituents of the water. The complete mineral examination of a water, which he reports, we do not make free of charge. In the case of the carbonate of calcium and the chloride of sodium I can come very near to the true result by reporting all of the alkilinity of the water as calcium carbonate, and calculating the chlorine found into chloride of sodium, and this I do on the enclosed sheet.

The two samples of water from the intake, and from the faucet in your office are identical.

I consider the water to be of high purity chemically, for a pond water at this time of year the dissolved organic material, which the analysis indicates as being of vegetable origin, is low in amount. There is but a slight trace of nitrate present, and the chlorine is very low; in fact is less in amount than when Prof. Robinson examined the water in 1889.

I also examined the water for the presence of the colon bacillus, and was unable to find it.

This bacillus is of intestinal origin and is usually to be found in a water polluted by human sewage.

The absence of all signs of sewage pollution, both chemical and bacterial, and the very small amount of dissolved organic material leads me to say that I consider the water a most excellent one for drinking or for any domestic purposes.

The fact that, two years ago, I made an examination of this same water with almost identical results, shows that the water is of a very permanent character, as well as very pure.

The sample from the inlet to the lake shows a larger amount of dissolved vegetable material, with a slight increase in the amount of chlorine and nitrate, but not enough to lead to any suspicion of any kind of pollution. The water at this time can be used with just as much safety as can the water in the city. The bacterial examination failed to show the presence of the colon bacillus in this sample also. This rather highly colored water is so diluted by the spring water of the lake farther down that the water at the intake is practically colorless.

From the analyses I do not think that the water shows any signs of pollution from the cottages, or any diminution of purity from that of ten years ago. In fact, I have at hand some analyses made in 1888 which show the water in practically the same condition that it is now.

The only thing to be feared from spitting is pollution by the tubercle bacillus, and I think that there is no danger to be dreaded from that as it is most easily destroyed by light and air.

Very truly yours,

(Signed),

H. D. EVANS, *Chemist.*

IMPROVEMENTS FOR 1906 AND 1907.

As the Board of Water Commissioners voted to commence work on the New Reservoir it does require me to call your attention to the age of the iron tank on Goff Hill.

In the tables annexed will be found a classification of water supply, monthly and yearly pumping records, location and size of meters, location of mains relaid and gates set, inventory of stock and tools.

Respectfully submitted,

FORREST E. BISBEE, *Superintendent.*

HIGH SERVICE REPORT FOR THE YEAR ENDING
FEBRUARY 28, 1906.

1905.

March, gallons pumped,	9,323,553
April, gallons pumped,	7,239,277
May, gallons pumped,	7,000,620
June, gallons pumped	6,873,336
July, gallons pumped,	7,700,682
August, gallons pumped,	7,462,024
September, gallons pumped,	6,857,425
October, gallons pumped,	6,873,336
November, gallons pumped,	6,300,558
December, gallons pumped,	6,841,515

1906.

January, gallons pumped,	7,276,402
February, gallons pumped,	6,555,126

Total, \$86,303,854

WATER RECORD AT THE LAKE, 1905 AND 1906.

High water, 167.5.

Low water, 160.5.

1905.

March 1,	161.6 feet.
April 1,	162.7 feet.
May 1,	163.6 feet.
June 1,	163.5 feet.
July 1,	163.4 feet.
August 1,	163.3 feet.
September 4,	163.4 feet.
October 10,	163.3 feet.
November 30,	162.8 feet.
December 15,	162.8 feet.

1906.

January 11,	163.2 feet.
February 28,	163.6 feet.

Or 1 ft. 8 in. higher than February 28, 1905.

GATES SET IN THE MAIN LINE 1905.

1 2-inch Gate Center Street.	
1 2-inch Gate, Howard's Hill.

Wine,	5 gallons.
Whiskey,	2 gallons.
Ale,	16 gallons.
Beer,	12 bottles.

There is due the city from the County the sum of \$154.60.

In concluding my report, I wish to extend my thanks to the Honorable Mayor and Board of Aldermen for their hearty support and courtesies shown me, and to His Honor, Judge Manser and Clerk Verrill of our Municipal Court, I am under obligations for kindly assistance.

The aid rendered by the Lewiston Police Department has been invaluable. Marshal Wing, Deputy Marshal Leader and members of their force have given every assistance for the best interests of both cities.

To each and every officer, who by faithfulness to duty has contributed so much to the successful work of this department, I give my thanks.

Respectfully submitted,

HARRY W. ROWE, *City Marshal.*

Auburn, March 1, 1906.

REPORT OF POLICE MATRON

To the Honorable Mayor and Members of the City Government:

GENTLEMEN—I herewith submit to you an account of my work as Police Matron for the year ending February 28, 1906. There has been no serious epidemic of sickness among the poor of our city, and their condition compares favorably with that of last year. In special cases of need our citizens have responded most generously to calls for aid, and I know of no worthy appeal for assistance which has been neglected. The moral conditions are also encouraging. Several new missions and societies for the benefit of our people have been organized and it is safe to say that in this respect our city will compare favorably with any of its size in the State.

At Thanksgiving all needy families were provided with bountiful dinners donated by the churches, missions, W. C. T. U. and private individuals. No one was passed by whether deserving or otherwise.

My thanks are due to the East Auburn Benevolent Society for a large bundle of new clothing and five dollars in money, sent down for our city poor at Christmas time. About this time I received many boxes and parcels of clothing from other sources. Also provisions, apples, and vegetables which helped out in dispensing Christmas cheer to the needy ones. The city children were provided with a Christmas tree, in fact, two trees, loaded to the tops with all the good things which so delight the heart of a child.

Mr. L. W. Haskell gave us the free use of the hall over his store. About 125 children were present and 500 new articles of clothing, including shoes and rubbers were distributed, beside books, games and toys of every description. Every child received a bag of candy and pop corn. To our generous citizens who by their thoughtfulness made this Christmas tree the success it was, I tender my heart-felt thanks. The annual trolley ride and entertainment at Lake

Grove occurred about the first of August, when two hundred poor children with mothers and grandmothers, went up out of the hot, dusty city to enjoy the cool breezes by the shores of Lake Auburn. To the manager of the electric railroad and to our citizens generally who gave our city children such a delightful outing, I feel very grateful. Last fall I received from the W. C. T. U. \$20.00 to purchase shoes and rubbers for needy school children. And again at Christmas \$15.00 more for the Christmas tree. At various other times I have received financial aid from the same source to tide over some unforeseen emergency. From the Associated Charities I have received many articles of new clothing and bedding. Also orders for wood, coal, and groceries. From church suppers and banquets of various orders and societies I have received quantities of nice food which I have gladly placed where it was most needed. Many of our well-to-do citizens have donated clothing, bedding and furniture which has found its way into many destitute homes where it has been thankfully received. Our free temporary home which is under the auspices of the Auburn W. C. T. U., has been open nearly all the time during the winter months and has proved a real blessing to many a weary, discouraged woman. Whenever possible I have been at the railroad stations and have frequently been able to assist young women, strangers coming to our city in search of employment, to obtain a good situation in the city. In the work of moral reform I have been constantly supported by the W. C. T. U., Woman's Reform League, and the churches.

In the pursuance of this branch of my work I have witnessed many instances of real reformation in the lives of those who have sunk low down in sin. Much of this work must, of necessity, be excluded from this report, but a faithful record of all these cases is kept in my diary and any proper person is at liberty to peruse its pages. In caring for the sick I have been greatly aided by contributions of suitable clothing and delicacies, for which I am most truly grateful. I have endeavored at all times to supplement the efforts of the Truant Officer in looking after delinquents from the public schools and whenever any case of non-attendance is due to lack of proper clothing, I have been able to supply

this want from the supply donated by the Charitable Society or from the garments given by our well-to-do citizens.

During the year I have made 2,977 calls; distributed 4,219 articles of clothing, furniture and bedding, beside 500 new articles of clothing given at the Christmas tree. I have secured employment for 107 women and girls, beside day labor for men and women. I have written 313 business letters for the city, and placed four destitute children in permanent homes. Many others have been provided with temporary homes, and several more sent into the country and seashore during the hot months of summer. I have endeavored at all times to relieve any case of distress reported to me and in this connection I wish to express my appreciation of the New England telephone which was placed in my house last year through the generosity of my friends and which I find greatly facilitates my work. To our citizens, who have so generously responded to my frequent appeals for assistance, thereby expressing their confidence in my methods of work, I desire to render thanks. To the members of the city government and the officials, to the city marshal and police force, I tender my most sincere thanks for their unfailing kindness and courtesy at all times and in all places.

Respectfully submitted,

MARIA M. SWETT, *Police Matron.*

February 28, 1906.

REPORT OF BOARD OF PUBLIC WORKS

To the Honorable Mayor and City Council of the City of Auburn :

GENTLEMEN—The Board of Public Works of the City of Auburn hereby submit their third annual report for the year ending February 28, A.D., 1906.

The amounts appropriated by the City Council and receipts from other sources are as follows:

Appropriation for highways and bridges,	\$21,000 00
Appropriation for permanent roads,	1,500 00
Appropriation for paving,	1,500 00
Appropriation for sewers,	2,000 00
Appropriation for permanent sidewalks,	1,000 00
Appropriation for Goff Hill sewer,	3,000 00
Receipts from sewer and sidewalk assessments, sewer entrance fees, material sold, etc.,	1,339 41
Transferred from appropriation for contingent expenses to appropriation for Goff Hill sewer,	1,500 00
	<hr/>
Total receipts,	\$32,839 41
The total amount expended by the Board in all departments has been,	\$33,322 03
	<hr/>
Overdrawn,	\$482 62

During the year a large amount of grading and rolling was done upon the road leading from East Auburn to the Turner line, also upon Washington Street leading to Danville Junction.

A piece of new paving has been laid on Broad Street and several hundred yards of paving relaid on Main, Court and Turner Streets.

There has been quite an extension made to the Permanent Sidewalks, also the macadam road on Center Street has been extended 1,050 feet.

For several years there has been an urgent need for a sewer upon Auburn Heights, so called. A petition generally signed by the property holders of that locality was presented to the Board, who after a careful consideration of the matter had the territory surveyed and a plan of a sewerage system extending to the river made, which plan together with estimates of cost was submitted to the City Council who approved the same and made a special appropriation with which to begin the work. The Board has expended \$3,689.65 on this sewerage system which we firmly believe should be continued each year until the whole system is completed.

For a detailed account of the work done and the expenditures, we refer to the report of the Superintendent of Streets and Sewers which we hereto append.

A. Q. MILLER,
W. R. DILL,
F. B. GROVES,
B. F. STURGIS,
J. P. HUTCHINSON,
A. WALTON,

Board of Public Works.

REPORT OF SUPERINTENDENT STREETS AND SEWERS

To the Board of Public Works:

RECOMMENDATIONS.

I recommend paving one side of Mill Street from R. W. Burnham's Drug Store to A. W. Miller's Grocery Store, also the square of Mill and Second Street near A. Walton's store; also recommend appropriation for building Seventh Street between Cook and South Main Streets.

The stables will have to be shingled this year or new ones built. I would also recommend an appropriation for permanent sidewalks of \$3,000.00; also I would recommend the building of two bridges near Stevens Mill as the old bridges are in bad condition; there should be an exchange of two carts and one pair of harnesses.

I also recommend the building of more Permanent Roads.

The sewer on Goff Hill should be continued this year.

I would recommend an appropriation of \$25,000.00 for Streets and Bridges, also an appropriation to build the Danville Junction Road, as in all probability it will have to be built this year.

Respectfully submitted,

FRANK F. GOSS,

Supt. of Streets and Sewers.

REPORT OF CITY SOLICITOR

To the Honorable City Council of the City of Auburn :

I herewith submit my annual report as City Solicitor of the City of Auburn for the year ending March 19, 1906.

There is at present only one suit pending in the Courts in which the City of Auburn is interested. That is the case of St. Albans vs. Auburn in the Supreme Court of Somerset County. This case was begun over a year and a half ago and has been continued from term to term by the plaintiff and I think I can safely prophecy that it will never be tried. The action is to recover for pauper supplies furnished Elmer Southard whom the plaintiffs claim gained a settlement in Auburn between 1889 and 1895. By agreement of counsel this case has been continued till the September term of the Somerset Court and will be in order for trial then.

In the matter of the Danville Junction Crossing case which was carried to the highest court by the Railway, the Law Court sustained the findings of Mr. Justice Savage and the Railroad Commissioners. There is no further appeal and I think that we will be safe in assuming that the Railway will go ahead and build the bridge. The City of Auburn's share of the cost of the bridge was fixed at \$3,000.-00 which is about one-fourth (1-4) the total cost of the bridge.

The two suits Gastonguay vs. the Assessors of Auburn to recover for false arrest, claiming that he was not a citizen of Auburn at the time he was assessed a poll tax, are off the docket, the plaintiff backing down and accepting an entry on the docket of "neither party no further action." This disposes of the actions forever.

Nathan Pulsifer vs. the City of Auburn and Janet D. Pulsifer vs. the City of Auburn have been settled by the payment of \$325.00 and costs amounting to \$17.88 in both cases, and the Pulsifers give a deed of the small triangle so

called in the rear of the Provost barn. This seems to be a very fair settlement in view of the price the City paid for the adjoining lot (\$1,000.00).

At the request of the Poor Department I have once more brought suit against Samuel Cloutier of Lewiston, for the support of his wife, now an inmate of the City Farm. I secured a judgment February 27th in favor of the City and hope to be able to collect a little something on it.

I have been called into the Municipal Court several times to prosecute criminal matters which should have been attended to by the County Attorney. Many of the cases if not most of the cases which have taken me into the Municipal Court were cases arising at Mechanic Falls, and which it does not seem to me that the City of Auburn should be called upon to prosecute. I believe that it is ill-advised to ask or require the City Solicitor the duties of the County Attorney.

I have advised the Mayor, member of the City Government and various departments when requested to do so. I believe that every duty imposed upon me has been attended to and that there are now no matters remaining undetermined in my hands.

Since writing the above I have noticed in the daily papers that the City has been sued by the Water Commissioners for the unpaid balance on the hydrant rate. It is to be deeply regretted by every citizen of Auburn that either the City Government should lay the bill on the table, or that the Water Commissioners should bring suit thereon, especially in view of the fact that the matter had been once referred to this office and I had reported thereon, and also that there appeared to be no defence to the bill.

Respectfully submitted,

REUEL W. SMITH,

City Solicitor.

March 19, 1906.

REPORT OF TREASURER AUBURN PUBLIC LIBRARY

To the City Council of the City of Auburn:

The undersigned, treasurer of the Auburn Public Library, herewith submits his report of the receipts and disbursements on account of the library for the year ending February 28, 1906.

Cash in hands of Librarian Feb. 28, 1906,		5 00
Balance in Nat. Shoe & Leather Bank,		537 66
		<u> </u>
		\$3,872 73

In the total expenses for the purchase of books, \$922.84, the sum of \$123.45 is included, expended for replacing worn-

out books. During the past year the standing committee on the purchase of books has endeavored to systematically replace each month books which have become unfit for circulation and have for that reason been retired.

The invested funds of the Library consist of two bonds of five hundred dollars each, issued by the Lewiston & Auburn Electric Light Company, 6's, and one five-hundred dollar bond of the Fond du Lac Water Company, 5's.

JOHN A. MORRILL.

Auburn, Me., March 16, 1906.

To the City Council of the City of Auburn:

The undersigned respectfully reports that he has examined the books of the Treasurer of the Auburn Public Library for the year ending February 28, 1906; that he finds the accounts of said Treasurer to be properly kept, and his disbursements supported by proper vouchers, and that the funds of the association in the hands of the Treasurer February 28, 1906, are as follows:

Cash in hands of Librarian Feb. 28, 1906,	\$5 00
Balance in Nat. Shoe & Leather Bank,	537 66
	<hr/>
	\$542 66

That the invested funds of the Library consist of two bonds of five hundred dollars each, issued by the Lewiston & Auburn Electric Light Company, 6's, and one five hundred dollar bond of the Fond du Lac Water Company, 5's.

Respectfully submitted,

MURRAY B. WATSON, *Auditor.*

REPORT OF LIBRARIAN AUBURN PUBLIC LIBRARY

To the City Council of the City of Auburn:

In accordance with a vote of the Auburn Public Library passed at its annual meeting held on the 5th inst., the librarian herewith submits a report of the work of the library for the year March 1, 1905, to March 1, 1906.

No. of volumes recorded in the accession book, March 1, 1905,	12,473
No. of volumes added during the year,	1,058
Total number of volumes to date,	13,531
No. of volumes lost during the year,	11
No. of volumes worn out during the year,	215
Net gain for the year,	832
Total number of volumes lost, worn out, or otherwise removed since the library was founded,	816
Total number of volumes at present belonging to the library,	12,715
No. of pamphlets catalogued,	126
Total number of pamphlets catalogued to date,	743
No. of journals and periodicals regularly received,	39
No. of days the library has been open,	299
No. of holidays the library has been closed,	8
No. of days the library was closed for varnishing the floor,	6
No. of borrowers' cards issued during the year,	821
No. of borrowers' cards issued since Aug. 8, 1904,	2,609
No. of postal cards sent for overdue books,	216
No. of books charged,	43,327
Monthly average,	3,611
Largest month, March,	4,692
Daily average,	145
Largest day, February 10,	363

Per cent. juvenile 30, 18% non-fiction, 82% fiction.

Per cent. adult 70, 22% non-fiction, 78% fiction.

Total, 100, 20% non-fiction, 80% fiction.

No. of books in actual circulation March 1, 1905,	1093
No. of books in actual circulation March 1, 1906,	1155
No. of visitors to the library,	46,698
Monthly average,	3,891
Largest month, March,	5,064
Daily average,	156
Largest day, Feb. 10,	370
No. of students in the reference room,	2,615

As this is the first full year that the library has occupied the new building, there is no previous year with which the quantity and quality of the work accomplished may properly be compared. It is noted, however, that 794 more volumes were charged from August to February, inclusive of this year, than of last, both in the new building. The figures for this year show a total of 12,056 more volumes circulated than in the last full year in the old building. The percentage of increase seems to be pretty evenly divided among all the classes of books.

The figures given are merely an indication of the amount of work done in the library, much of which, from its nature, cannot be tabulated. Records are kept of the most obvious items only.

The average charge of 145 volumes per day for the whole year is large. The average for February was 183, the largest for a single month in the history of the library. The use of the library is always much less in the summer, particularly so in the case of the children, less than half the number of juvenile books being charged in July than in March. In July, the juvenile circulation was but 23 per cent. of the whole, while in December it was 35 per cent.

Respectfully submitted,

ANNIE PRESCOTT, *Librarian.*

REPORT OF CITY ELECTRICIAN

To the Honorable Mayor and City Council of the City of Auburn :

GENTLEMEN—I herewith submit my report for the year ending March 1, 1906. During the past year there has been no fires or accidents caused by poor work or wiring. The different companies have been notified several times of broken and hazardous wires which have had prompt attention. The usual troubles have occurred from the private line telephone wires, which have been looked after.

I have inspected 37 places of new wiring to which I have made personal visits each from two to six times, besides several stores, shops and mills, where poor wiring has been found and repaired. The outside line wiring system has been much improved the last year. There are, however, several other places which will need looking after as soon as the frost is out of the ground. On the whole the wiring system is in fairly good condition.

Respectfully submitted,

HENRY J. DAVIS,

City Electrician.

REPORT OF CHIEF ENGINEER

AUBURN ME., March 1, 1906.

To the Board of Fire Commissioners of the City of Auburn:

GENTLEMEN—I present the following as my report of the condition of the Fire Department for year ending February 28, 1906.

The force of the department consists of 57 men, as follows

Chief Engineer, four Assistant Engineers, twenty-five hose men, twelve ladder men, engineer and fireman of steam fire engine, two permanent men at Court Street station, one permanent man at New Auburn station, five drivers of apparatus, and five special fire police.

The number of fire alarms the department have responded to from March 1, 1905, to February 28, 1906, were as follows: Bell or general alarms 15, still or telephone calls 93, total 108. There were also 7 fires in the rural section of the city, making a total for the entire city of 115. The time, nature, location, owner of property and cause of fire so far as I have been able to ascertain was as per list.

The total loss so far as could be learned was \$27,869.00, of which \$14,284.00 was in the city fire district, and \$13,675.00 in the outside section; which amount is about the average for the three preceding years, but is considerably more than one year ago.

The department have laid during the year 28,500 feet of hose, and used 1,086 gallons of chemicals.

The apparatus at the present time consists of the following, to wit: One steam fire engine, one combination chemical and hose wagon, one two-horse hose wagon, one one-horse hose wagon, one two-horse hose reel and one hook and ladder truck, and also for winter use a set of sleds with body suitable to carry the ladders, a one- and a two-horse pung for hose and a set of hub runners for the combination wagon.

All the above are equipped with the most up-to-date swing harness, and are in all respects in first-class condition. There are two permanent horses at the Court street station and one permanent horse at New Auburn.

On the several pieces above mentioned or at the stations are the following equipments and furnishings, two roof ladders, two hand extension ladders, one short extension ladder, one Bangor chain extension ladder, four stay poles for extension ladders (and five ladders in reserve), nine hand chemicals, two patent door openers, fourteen N. P. brass fire lanterns, one police flash light, one life line and hook, three Eastman pipe holders, twenty-four spanners, seventeen hydrant wrenches, twenty-two ladder straps, three hose patches, four two-way hydrant chucks, ten Callahan stop

nozzles, two spray nozzles, two Eastman nozzles, fourteen Boston play pipes, and four old pipes not in general use, six crowbars, nine short plaster hooks, four long plaster hooks, one long chain hook, three cantdogs, seven axes, one pick and grub, one Eastman two-way deluge set, four 12 by 18 rubber patrol covers, sixteen Globe firecoats, twenty-four rubber fire coats, five engineers' rubber fire coats, twenty-three rubber coats in very good condition (having been lately repaired), seven police billies, six hundred feet fire police rope, and at the stations there are a set of recoupling tools, a tap and die for cutting thread on hose couplings, eight beds and bedding for same, four tables, eighteen chairs, six settees, two stoves, thirteen horse blankets, five whips, one clipper, one hundred feet of hand hose, two hand hose reels, one step ladder, one writing desk, one mop wringer, besides the small utensils required about the rooms and stables.

The Hose in the department at the present time consists of 2,000 feet of new or that that is in first-class condition, 8,400 feet in good condition, 350 feet that is doubtful, and 950 feet that is only suitable for the Street department to flush sewers with, or that has been entirely condemned. There has been sold during the year 300 feet of the old condemned hose. As above it will be seen that there is 10,400 feet that the department can rely upon at this time, and as another year will make some of that so as to be condemned, I shall recommend that the Commission ask that more be purchased this year.

The number of hydrants connected with the water service is 122, an addition of one during the year, near the corner of Ninth and Cook Street; of that number 107 are the property of the city, and the other 15 are private. There is at the water works storehouse a 5-inch Chapman hydrant in fair order belonging to the fire department. There are a number of hydrants that should be changed as soon as the city can do so, as some of the old first ones put in were small and second-hand at time of setting. I will call your attention to the one at the corner of Broad and Second Street, which has a four-inch connection, and the one at the corner of Pleasant and Hampshire Streets. There are others though not in places where the same amount of property is

adjacent. It is my opinion that all the old cheap hydrants should be changed so as to have them all as up-to-date and frost-proof as possible. As regards places at the river where water might be taken in case of a large fire I will simply call attention to my last two reports.

One fire-alarm box has been added to the alarm system viz.: Box No. 225 at the corner of Hampshire and Oak Street. In this connection I desire to call your attention to the fact that many additions to the fire alarm system have been made to the original repeater which was installed at the very start, and that now with the number of boxes, tappers, and small bells Auburn's part should be in at least three circuits instead of one. A severe storm or accident is now liable to put the entire system of Auburn out of commission until the trouble can be located and remedied, whereas were there three circuits only one-third would be affected so far as locating a trouble is concerned.

I can report that very little of the engine coal was used during the year and that we have 12 or 13 tons now on hand.

In the year past the Committee on Public Property have had the old spruce floor in the apparatus part of the Court Street and New Auburn stations taken up and new hardwood floors laid, with drains under each piece to take the water from washing, etc., to the sewer. They also have finished off a larger sleeping room at the New Auburn station, with bath, etc., connected so that after this time three men can be accommodated there instead of two as has been the case in the last few years. This year I trust the commission will purchase three new beds like those at the Court Street station and dispose of the old wooden ones now there. And also ask that the floors in hall and sleeping room at Court Street be laid with hard wood.

When the heating apparatus was installed at the Court Street station the boiler was small for what work was required of it, and now since the ladder apartments have been added it requires so much fuel to maintain the heat that it would be more economical to have a different one, and as the New Auburn House is being heated with two stoves I recommend that the old boiler be put in good condition and placed in the New Auburn station.

The number of men in the hose companies as before stated is 25, twenty of whom respond to all general alarms, and the others only to certain boxes on a first alarm. It was asked that the pay of all be made alike and to have all respond to every general alarm, but the city council did not decide to make it so. I still think the request was right, and that if the whole number responded it would give as few as we can reasonably do the work with, as the general alarms are each year more likely to be for quite a fire, for the reason that the calls for chimneys and small fires are now telephoned to the stations and are being taken care of by the combination, or hose wagon and extinguished with chemicals.

The Auburn and Lewiston departments have during the past year had occasion to call the other once each.

It is a well-established fact that the saving of great loss by fire in any city, is in having everything in readiness to respond when a fire first starts, or before it gets under very much headway, and everything that tends to that end is for the well being, and good name of its department. Therefore, while I would not do anything to injure our public library building, and believing that the general looks of it would be improved by making a good looking entrance to basement at the Spring Street end, and knowing that it is a nuisance and an injury to the fire department to be obliged to take down the swing harnesses and set the apparatus out into the street every election day, when a room there could be arranged without its being in any way detrimental to the good and well being of the library, I will again make the recommendation that an entrance be made to the Spring Street end of the library building and a portion of the basement be arranged for a ward room for Ward Four.

In conclusion I wish to herein express my appreciation and thanks to the officers and members of the department, the City Council, His Honor, the Mayor, and the Commission for the many favors granted, and for the support and assistance which have been so generously bestowed upon me.

Respectfully submitted,

L. W. HASSELL,

Chief Engineer.

REPORT OF LIQUOR AGENT

To the Honorable Mayor and City Council of the City of Auburn:

GENTLEMEN—I herewith submit my report as Liquor Agent for the year ending February 28, 1906.

CR.

By cash paid Treasurer for liquors	
sold,	\$19,789 11
Empty bbls.,	71 75
Liquors on hand March 1, 1906,	1,470 97

REPORT OF MILK INSPECTOR

To the Honorable Mayor and Board of Aldermen :

GENTLEMEN—I herewith submit my yearly report as Milk Inspector for the year ending March 31, '06.

Number of licenses granted to milk dealers,	64
Number of samples of milk tested,	212
Number of barns inspected,	64
Number of places where milk is stored inspected,	94
Number of quarts of milk sold daily (average),	5,500

For results of tests and inspections see monthly reports.

GEO. R. INGLIS,

Milk Inspector.

REPORT OF
SUPERINTENDENT OF HACKS

*To the Honorable Mayor and Board of Aldermen of the City
of Auburn:*

GENTLEMEN—I herewith submit my report as Superintendent of Hacks for the year ending February 28, 1906.

Number of hacks and public carriages licensed,	27
I have received for same,	\$27 00
Fees of Superintendent and City Clerk, \$13 50	
Balance paid City Treasurer,	13 50
	<hr/>
	\$27 00

Respectfully submitted,

HARRY W. ROWE,

Superintendent of Hacks.

Auburn, February 28, 1906.

REPORT OF SCHOOL COMMITTEE

To the Citizens of Auburn:

We hereby render you our annual Report, which includes likewise the reports of the Superintendent of Schools, the Supervisors of Music and Drawing and detailed statements covering all points of finance and school statistics.

The Superintendent's Report has been accepted and adopted by this Board and the items included therein will therefore require no further reference.

FINANCIAL.

The Committee finds special satisfaction in being able to report that notwithstanding necessary increased expenditures in certain directions yet through a careful limitation of other expenditures the department as a whole makes a better financial showing than has been possible for some time. Last year it was found necessary to overdraw the High School Account several hundred dollars, this year, notwithstanding the appropriation was five hundred dollars less, the close of fiscal year finds all the bills of the Department paid and the account overdrawn only about seven dollars.

The expenditures under the Common School Account come entirely within the sum appropriated notwithstanding that it was found necessary to employ additional teachers during the year.

The Repairs Account it was found necessary to overdraw. Certain repairs, referred to in the Report of the Superintendent, became absolutely necessary. These were entirely unexpected and in part account for the deficit. The rebuilding of the Danville Junction Schoolhouse is responsible for the balance of this deficit. Since there was no regular appropriation to cover this expense, the cost of the new building was charged in the Repairs Account and the amount received from insurance, six hundred dollars, was

credited to the same. The total cost approximating thirteen hundred dollars caused an additional deficit in the account.

The Salary Schedule which was adopted June, 1904, has been found to operate most satisfactorily. It was expected, at the time of its adoption, that it would increase slightly from year to year the amount expended for teachers' salaries, but in actual practice it is observed that this increase is less than has often been the case when the increases of salary were given without regard to a stated regulation.

The Common School Teachers' pay-roll for the month ending October 31, 1904, was \$2,815.11, the same pay-roll for the corresponding month of 1905, was \$2,856.92, a difference of \$41.81. More teachers were employed in the latter case than in the former and the pay of this additional number of teachers would more than make up the difference.

FIRE ESCAPES.

This Board desires to call attention again to the fact that after a careful investigation it made a recommendation to the City Government that fire escapes be placed on the Webster and the High School Buildings.

In the Webster School approximately three hundred children are on the second and third floors. In the High School Building there is only one main stairway which affords exit and this is somewhat inaccessible from certain portions of the building.

While the rules require that fire drills be given at frequent intervals and while the pupils are under good discipline in this respect yet this Committee believes the extra precaution which would be afforded by fire escapes would be well worth the cost of constructing them.

MANUAL TRAINING.

Much attention has been given to Manual Training and its value in school work and the citizens of Auburn have through officials and otherwise expressed the desire that this

branch of school work be incorporated into the course. During the past year a special committee including R. W. Smith, W. W. Bolster, Jr., and J. W. Stetson was appointed to make a thorough investigation of the desirability of introducing this work and of the probable expense of making the introduction. This committee visited Manual Training Schools in several cities and carried on an extended correspondence relative to the matter. As a result of this investigation the committee rendered an exhaustive report to this Board, and a unanimous report in favor of the introduction of this branch was made.

It will be recalled, likewise, that a petition signed by somewhat more than five hundred citizens was presented in favor of it. The recommendation was presented to the City Government and an appropriation of fifteen hundred dollars was asked for. However, the City Government, believing either that the time was not ripe for the introduction of the subject or that for the present year the finances of the city would not permit it, rejected the measure.

REDUCTION OF THE SCHOOL BOARD MEMBERSHIP.

There was included in the Report of this Board last year a statement of the reasons which led to the unanimous recommendation of a reduction of its membership. It was believed by the members that the measure which was proposed would prove an important advance step and would do much towards insuring a stable, conservative school administration.

The fact that similar measures have been advocated and adopted in many cities throughout the country would appear to be an indication that the policy is gaining favor.

The bill providing for the reduction of this Board was referred to popular vote. While only a small number of citizens registered any choice in the matter, of those voting a small majority proved to be opposed, thus defeating the measure.

SCHOOL CONSOLIDATION.

During the past year no schools have been discontinued excepting in two cases where by the process of law schools were closed. At the present time the Young's Corner and the Jordan Schools are not in session and the pupils of these schools are registered in others.

While this Board is by no means prepared to recommend the wholesale discontinuance of rural schools, yet, it believes by a wise consolidation much improved facilities could be given the pupils of the rural sections of the city.

If the money at present expended on the rural schools could be distributed over a smaller number of schools higher salaries could be paid teachers; larger classes and consequently greater interest and enthusiasm would also be possible and the school equipment throughout could be kept at a higher point of efficiency.

It is interesting to note that there are more rural schools in Auburn than in any other town or city in Maine, that these schools are maintained eight weeks longer than the average school year for the State and that the weekly salaries paid in these schools average considerably higher than the average for the State. Therefore, it is perfectly clear that the disposition of the school authorities is to give to the pupils in the rural schools the widest possible opportunities. This Board would, in no case, recommend that the amount expended on the rural schools be made less. It is possible, however, that the amount now spent could be expended to a greater advantage, provided some of the smallest schools could be united with neighboring ones.

As an educational measure solely and not as a financial one we believe this ought to have the serious consideration of those parents whose children attend the rural schools.

CONCLUSION.

In conclusion this Board wishes to place on record our appreciation of the efficient services rendered by our Superintendent of Schools, the conscientious work of our teachers

and our recognition of the cordial and intelligent support which has been given by the people of Auburn to the important interests which have been entrusted to us.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of Auburn:

GENTLEMEN—I herewith submit for your consideration the annual report of the progress and condition of the public schools of this city. This Report is the twentieth in the series.

It should be borne in mind that much of the work of the schools is of a kind that it is impossible to tabulate and place on record. The larger and more important results of education appear in the years when the child shall have become grown, his character formed and his abilities shall have reached their full development. In this larger sense the report of our schools is to be read in the kind and quality of our citizenship and in the civic, industrial, and social life of the community.

However, as a business house finds each year methods of extending its interests, and as a manufacturing establishment aims to secure an improved output so should a school system be able each year to record steps of advancement and progress in respect to the things for which it stands. Such steps I am able to report. With these I shall endeavor to call your attention to the needs of our schools in order that provision for them may be made.

ATTENDANCE.

Referring to the tables which show the attendance you will note that there is a considerable increase in the several schools. The School Census taken last April showed an increase of persons between the ages of five and twenty-one of 234 over the preceding year. There have been enrolled in the schools the proportionate number of these pupils.

Auburn has a distinctly favorable record in the matter of school attendance. This record reflects creditably upon the

support given to the schools by parents and citizens and the confidence placed by them in our institutions. Truancy constitutes with us a problem of secondary importance.

To deal with the increased attendance, which was mainly in the New Auburn Schools, it was found necessary to open in the Lincoln School a second division of the first grade. Later this division was transferred to the Wilson School in order to provide for the separation of the eighth and ninth grades which had hitherto been together in one room but under the instruction of two teachers. As a further provision for the relief of overcrowded rooms at New Auburn a fourth room was opened at the beginning of the winter term and in this room were placed divisions of the second and third grades. The opportunities for better work in all these cases have been materially increased.

In the Park Hill School at the opening of the winter term an arrangement similar to that made last year in the Merrill School was brought about so that in the Park Hill School there are now three regular teachers employed with the classes which are divided into five grades.

THE TEACHING CORPS.

So important is the place of the teacher in the economy of the schools that it would be unfair to allow this Report to go before the citizens without special reference to our teaching force. It is the more agreeable to make this reference since it is possible to record favorable criticism of it.

The teaching profession generally is marked by a conscientious fidelity to duty, a spirit of progress, a rare enthusiasm, and an unselfish consideration of the claims made upon time and strength. In all these respects our teachers hold an attitude which is creditable to them and is encouraging to those who are intimately interested in the schools. The number of teachers who give only a perfunctory service or regard their profession in a narrow light or decline to take measures for self-improvement is so small as to be hardly discernible.

The changes which have taken place in the teaching force are indicated in the tables which are included as a part of this report.

TEXT-BOOKS.

In the text-books used in the elementary schools there have been no important changes during the past year.

However, extended purchases were necessary on account of the introduction of the Morton Geography which was begun in December, 1903, and of the New Walsh Arithmetic which was begun in September, 1904. We have now very nearly a full supply of both these texts. The supply of text-books on hand is in very good condition.

No radical changes will probably be needed during the ensuing year, although attention may profitably be given to the material used in the several grades in United States History, Language, Penmanship and Physical Geography.

In the High School no changes in important texts have been made. Considerable purchases have been necessary to replenish the material in the departments of Mathematics, History and English.

TRAINING COURSE.

The Training Course for teachers instituted in September, 1904, and now in its second year, promises fully to justify its existence. This Course without adding any expense whatever to the city is providing a satisfactory means of equipping teachers for their work. The members of the Training Classes are required to make a systematic and careful study of school methods and management and they are given a training in the several grades which cannot fail to give them a practical knowledge of the duties of the teacher.

SELECTION OF TEACHERS.

In view of the provision of the Training Course special mention should perhaps be made of the principles which ought to obtain in the selection of teachers. It would be most unwise, not to say disastrous, for any community to adopt the plan of supplying its teachers altogether from one source. A policy of this kind invariably results in a narrow and provincial school system. It is well always to have the teaching force representative of the widest possible condi-

tions of training provided only that they all be good. Breadth and progress are most likely to exist in a school system wherein the teaching force is representative of a wide variety of methods.

It must and should continue to hold that a very large number of Auburn teachers will always be made up of those trained in our own schools. The teachers of our present force who were so trained reflect credit upon the conditions under which they were educated and are among our most progressive teachers. However, any policy which should look solely to a local supply of teachers could be regarded only as mistaken.

To supply the best possible training for all our local candidates and to select the best possible ones from the outside field are the two points of a policy which, taken together, will be productive of the best results.

COURSE OF STUDY.

I stated in my report last year the conditions relative to the Course of Study. The revision of the Course which was at that time in progress, has been completed and there has been printed a pamphlet stating the work which is to be covered in the various subjects in the several grades. In constructing this outline I have endeavored to eliminate all unnecessary detail and at the same time to make it so definite that it will be of practical service to the teachers and a source of positive information to citizens and parents who may wish to make inquiry concerning it.

It is not to be expected that a course of study can be permanently arranged. Conditions change from year to year and the work of the schools is at any time an outgrowth of the work that has been done in the preceding years.

It is satisfactory to note that out of recent agitation has come a tendency towards the simplification of the work of the schools. It has happily come to be accepted both by teachers and parents that the work of education is to develop in pupils the power to deal with the conditions of life, and it is generally acknowledged that through constant drill and practice on a few fundamental subjects and on a few impor-

tant phases of those subjects there will come this increased power. The notion which for a time appeared to prevail that the schools must cram the heads of the children with the largest number possible facts is passing away. There is, therefore, being cut out of the studies in the schools all unnecessary and extraneous detail.

INDIVIDUAL INSTRUCTION.

One of the great questions confronting those who have to do with the graded school system has been how to break the so-called "lock-step" apparently made necessary by the uniform treatment of large groups and classes of children. It has been claimed, and with much truth, that under the group system the welfare of many children has been sacrificed owing to the fact that in such a system the aim of the work must be to meet the requirement of the average pupil, allowing the exceptionally bright child or the unusually slow one to be held back or pushed forward, as the case might be, to the average standard.

Many devices have been employed to overcome this disadvantage. In certain large cities where a number of different classes of the same grade may be found in the same building, groups have been formed, based upon the ability of the children to go on in advance of the average or upon the necessity of making adaptations to any who may fall below the average.

In some cities provision has been made for semi-annual promotions, thus permitting greater flexibility of grading.

Another device which is employed with some degree of success is the establishment of ungraded rooms in which are collected abnormal cases for special treatment. However, this last arrangement has done little more than to provide for a very small number of pupils *unusually* exceptional either in point of defect or special ability. It has not provided for that large number of children who stand just above or just below the average of the class. Moreover, it has, likewise, resulted in taking children out of classes so that they have lost the inspiration and enthusiasm which come as the result of contact with their fellows. To be uniformly

efficacious ungraded rooms should be established so that children of different sections of the city would have the advantage of them. So to establish them implies the considerable additional expenditure which is justified only in case the result sought can be produced in no other way. Several other special plans for meeting this difficulty have been adapted to conditions in various cities.

A plan which has been much commended and widely adopted in recent years is a plan of individual instruction combined with class recitation, sometimes termed the Batavia Plan.

The aim under this arrangement is to keep the pupils together in classes for recitation and to provide opportunity for the teacher to give special instruction to those pupils who stand in need of it. It is clear that much time is wasted by taking from all members of a class the time allotted to recitation for the instruction of a few pupils who fail to understand the principles covered. By taking a few minutes outside the recitation period to meet the special difficulties encountered by an individual pupil, the interests of the individual are served and the time of the majority is saved. This last plan was introduced in a few classes in Auburn at the opening of the fall term. It was given a thorough and conscientious trial. All the teachers who made use of the plan expressed their unqualified approval of it.

At the beginning of the winter term its use was farther extended so that at the present time more than half of the teachers of the city are employing it.

We hope under this arrangement to be able to continue to serve the interests of the vast majority which represents the average pupils and at the same time to help that important minority which under other arrangements has been necessarily neglected.

The accomplishment of the result at which we are aiming is certainly worth the expenditure of all the thought and attention which our teachers are giving to the solution of the problem.

TEACHERS' MEETINGS.

There have been continued through the year the usual teachers' meetings of the several kinds. Meetings have been held for the teachers of the several grades and groups. At these have been discussed the problems relating to the grades represented.

The Auburn Teachers' Association has continued and extended its work of usefulness during this year and an effort has been made to give its meetings stronger educational tone and to make them of greater service to the teachers. Among the persons who have addressed the Association during the year with the subjects on which they spoke have been Miss Grace M. Fickett, of the Gorham Normal School, on "Langauge;" Mr. W. J. Corthell of the Gorham Normal School, on "The Ends of Education;" Supt. S. H. Holmes of Haverhill, Mass., on "Individual Instruction;" Prof. William T. Foster of Bowdoin College, on "The Compensations of the Teacher;" and State Supt. W. W. Stetson on "Educational Values."

The Teachers' Association also held a social meeting at New Meadows Inn which was heartily enjoyed by its members.

In addition to these local meetings Auburn was largely represented at the meeting of the American Institute of Instruction in Portland last July, and at the State Teachers' Convention in the same city in October.

From all these meetings it is believed the teachers have gained a broader outlook upon their profession and have received an inspiration which has been helpful to them in the discharge of their duties.

HIGH SCHOOL.

It is always pleasant to speak favorably of an institution concerning which the citizens take so much pride as is true in the case of the Edward Little High School.

This school is loyally supported by the citizens; it has an honorable record as a preparatory school and it has a wide influence in the community and State. It is entitled to the words of praise which it is possible to speak concerning it.

It would be a mistake, however, to imply that because of these things there should be no discussions of measures for its improvement, in fact, these conditions themselves give the best excuse for the most careful consideration of its conditions and possible future needs.

Recently several steps have been taken which, in the opinion of Principal Moody and the teachers, as well as in my own, have strengthened its courses. Last year the departments of Mathematics and English were placed under the directions of certain head teachers who were to be held responsible in a measure, under the direction of the Principal and Superintendent, for the conduct of those subjects. This arrangement has worked to a more satisfactory uniformity in the studies mentioned. I would recommend that this plan be extended at once to other branches. Of course, certain subjects naturally fall at present into a similar class because of the fact that they are taught entirely by one teacher. In all cases where this is not true I believe the work will be better conducted by the arrangement already successfully tried in English and Mathematics.

This year the Course of Study has been amended and, I think, improved, by striking from the Course certain subjects which had been taken by only a comparatively small number of students, and the substitution for these of other subjects already in the school. This is in the direction of simplifying the school's work, and cannot fail to produce satisfactory results.

Mr. E. J. Winslow, who for a number of years efficiently served as the sub-master of the High School, resigned at the close of the last school year. Mr. Winslow in a great degree embodied the spirit of the student and the skill of the instructor; he gave of his time and energy generously for the upbuilding of his department and likewise for the promotion of scientific study in the community. In his place was elected Mr. Fred N. Stone, a graduate of Amherst College and a teacher of several years successful experience in high schools of excellent standing.

The school was also so unfortunate as to lose by resignation at the close of the last school year, Mr. Herbert E. Congdon, who successfully instituted and for three years

conducted the Commercial Course. Mr. Congdon resigned to accept a more lucrative position in another state. Mr. Congdon's place was filled by the election of Mr. Ralph C. Benedict who brings to his work adequate preparation and much enthusiasm.

In addition to these changes another was made through the resignation of Miss Hazel Donham, who, as head of the Mathematics Department, had rendered the school most satisfactory service. Miss Donham resigned to accept a position at a higher salary in New York. Upon her resignation Mrs. Jennie M. Sweetser who had already proven her ability in the school, was transferred to the Department of Mathematics, and in her place was elected Miss Marion B. Frank who graduated with high standing in the Class of 1905 at Smith College.

It is appropriate to refer here to a matter which received the attention of your Board and of citizens, that of discouraging the extension of the secret "fraternities" which had been established in the school.

The public schools are supported, through taxation, by all the citizens. They are presumably open on equal terms to all boys and girls of the city. The honors and the opportunities they have to offer should be for all alike, poor as well as rich, and no one should receive consideration above another. Anything which acts in opposition to this idea is a menace to the democratic principle on which our free school system and government are founded.

The secret fraternity, as it has operated in all public schools, has tended so radically to destroy the welfare of the schools through the introduction of snobbish ideas of exclusiveness and class superiority, that educators are almost unanimous in condemning it.

From a *questionnaire* sent to a large number of school officials and principals, a large amount of documentary evidence against these organizations is available. Letters from leading superintendents and principals indicate a widespread sentiment against them.

While several secret organizations had been formed in our high school, it is perfectly clear that these were formed without serious thought of the principles involved.

Circular letters stating the objections to the fraternities were sent to parents of all high school and ninth grade pupils. The co-operation of parents and students in removing the organizations was invited. The result indicates that a wholesome sentiment against the fraternities has been developed both in the student body and among parents and citizens.

The agitation against the fraternities should not be construed as opposition to the idea of young people's organizations. It is helpful both to pupils and to the school that there should be different organizations standing for the several interests in which young people engage. But such organizations should be open to any members of the school, they should be subject to the advice and control of school officers and they should be open to the inspection of parents.

It would be highly desirable if there could be formed in the high school several literary, debating and other societies. Such societies, if formed, would be given use of the rooms at the school building and would receive the hearty and cordial support of teachers and officials.

GRADUATIONS.

It is eminently proper that an important epoch in school life should be observed with fitting ceremony. Graduation as marking the close of school days is an event of significance both to the young person who is concerned and to his parents and friends.

However, I believe this function, important as it is, has too often been accompanied with circumstances which are subversive of educational ideas.

It happens that in each class there are those members who without personal sacrifice, are able to indulge in the expenditure of considerable sums of money for personal adornment and for graduation functions. Other members of the class less able financially to bear this burden are led, through personal pride, to assume expenses which ought not to be imposed upon them. Thus it often happens that the graduation season comes with serious burden to parents and as a time of discontent and unhappiness to many graduates.

Moreover, there have come to my personal attention not a few instances where young people have left school before the completion of their courses in order to escape the necessity of incurring the expenses incident to graduation. These conditions should not exist. It ought to be possible to make of the graduation a ceremony which should stand for better things than extravagance and the gratification of personal vanity. Any radical change in conditions must, however, be wrought by parents. If those parents who are able to bear the financial cost of expensive graduation finery would counsel their daughters to set an example which would be helpful for their classmates and if those parents who are unable or unwilling to incur such expenses would bravely stand out against them the problem would at once be solved. It is certainly of sufficient moment to be worthy of attention.

With respect to grammar school graduations, I would suggest, the propriety of abolishing the public ceremony and restricting them to simple and appropriate exercises in the several school rooms.

MANUAL TRAINING.

The school reports of Auburn have for several years contained distinct recommendations for the introduction of Manual Training into the schools. The arguments in favor of the introduction of this subject have been so often presented that it is doubtless hardly necessary to repeat them. It may be sufficient to say that teachers, educators and parents are agreed that in the education of all persons there should be provided some means for the training of the hand as well as means for the training of the head. It is true, as even a casual observer must see, that for boys, particularly, living in the city there is no opportunity to get a training of this kind. In most city homes there are no duties even which can be found for physical employment of the boys. Under these circumstances it is not strange that youthful energy runs to excess in athletics or that the loafing habit is cultivated. I have personally known cases where the educational salvation of boys has been wrought through the giving of some form of Manual Training.

Teachers in schools where Manual Training has been introduced uniformly testify that many boys are awakened and brought to a position in which they do good work in other school branches because of their interest first having been aroused through Manual Training.

Again, it should perhaps be stated that the purpose of Manual Training is not to train boys to become carpenters or to fill any other distinct occupation. Its sole object is to provide a means for the education of that part of the child's powers which are neglected so long as attention is given solely to the acquisition of book knowledge. The demand of this age is for a "practical education" and this is an eminently sensible demand. However, a practical education, be it understood, is the kind of education which turns to the highest account all the talents which each individual may possess and makes them of highest possible service to himself and his fellows. There can be no doubt that our present system of education provides only for the development of one set of faculties. Others are either entirely neglected or left to chance. There can be no doubt either that many boys, and girls as well, have been defrauded of their chance by having been obliged to cast their education entirely in the same mould as that provided for the "bookish" child.

Prof. James in a recent work says:

"The most colossal improvement which recent years have seen in education lies in the introduction of the manual training schools; not because they will give us a people handy and practical for domestic life and better skilled in trades, but because they will give us citizens with an entirely different intellectual fibre. Laboratory work and shop work engender a habit of observation, a knowledge of the difference between accuracy and vagueness, and an insight into nature's complexity and into the inadequacy of all abstract verbal accounts of real phenomena, which once wrought into the mind, remain there as lifelong possessions. They confer precision; because, if you are doing a thing, you must do it definitely right or definitely wrong. They give honesty; for, when you express yourself by making things, and not by using words, it becomes impossible to dissimulate your vagueness or ignorance by ambiguity. They beget a habit

of self-reliance; they keep the interest and attention always cheerfully engaged, and reduce the teacher's disciplinary functions to a minimum."

During the past year considerable attention was given by your Board to making an arrangement whereby Manual Training for both boys and girls might be introduced into the Auburn schools. However, the means for its introduction did not appear to the City Government to be available and no practical result can come of the recommendation.

I may say that the cities and towns of the State are rapidly making introduction of Manual Training courses. Auburn is now among the last of the Maine cities to introduce this form of school work. I earnestly recommend that continued attention be given to this subject and that at the earliest date possible some beginning in the direction indicated be made.

REPAIRS.

Several important repairs have been made in the course of the past year. Investigation revealed a most unsatisfactory condition in the plumbing of the Franklin School, therefore during the summer months an entirely new system was put in.

There unexpectedly developed a weakness in the construction of the main stairway in the high school building. Repairs were made in this at a considerable cost. Architect W. A. Miller inspected the conditions in the High School and gave, without expense to the city, the advantage of his advice regarding it. For this generosity our gratitude is expressed.

The shingling of several other schoolbuildings, the painting of the Lincoln School, together with the usual number of minor repairs resulted in an overdrawn appropriation. Some of these repairs were unexpected and unprovided for in the estimate yet they were all absolutely necessary and unavoidable.

During the coming year I would recommend that the Webster School be carefully inspected and provision made for such repairs as may appear to be necessary. This building has been for a long time without important repairs and

I believe it would be in the interest of economy to give attention to it at this time.

The inside paint of a number of buildings including the Washburn should be refinished at a very early date.

DANVILLE JUNCTION SCHOOL.

Last November the schoolhouse at Danville Junction was destroyed by fire. This schoolhouse was a two-story building and while only one room had been in use a large number of scholars was enrolled and the interruption to the work of the school was serious. After carefully investigating all the conditions it was finally decided to recommend the immediate re-building of the schoolhouse. This recommendation was finally carried out by the City Government and the construction was immediately begun. At the time of this report the building is nearly finished and will be opened in time for the continuance of the winter term. There was an insurance of six hundred dollars on the old building. The new one, including furnishings and apparatus, will probably cost not much over twelve hundred dollars.

WASHINGTON STREET SCHOOL.

There has sprung up within a few years a considerable school population in the neighborhood known as the Washington Street Extension. This population became so large during this year that it was impossible to provide for its accommodation in any other schools and a petition was presented from the neighborhood asking for a new school building. Arrangements were made by the School Committee and the City Government for opening a school for the remainder of this present school year in temporary school quarters. A good attendance has been maintained since the opening of the school and it will doubtless seem advisable to make an arrangement for a permanent school in this neighborhood.

DISCONTINUANCE OF SCHOOLS.

For the school year ending June 15, 1905, the Young's Corner, Jordan and Plummer Schools failed to maintain the attendance required by law. It was decided to discontinue entirely the Young's Corner School and to unite the Plummer and Jordan Schools. It was at first decided that the last two should unite in the Jordan School, but owing to changed conditions the arrangement was reversed at the opening of the winter term, so that at the present time the Jordan and Plummer neighborhoods are united in the Plummer School.

MUSIC AND DRAWING.

In another part of this report are communications from the supervisors of Music and Drawing. I invite your attention to these.

In passing, mention should be made of the high quality of work done in both these departments.

In Music the instruction from the first grade to the High School is fundamental and thorough. I believe I can say with confidence no city produces more satisfactory results in this department than does Auburn. This is due in a large measure to the wise enthusiasm and skilful direction given by Mr. Mower.

In drawing, likewise, Miss Smith makes an earnest and successful effort to give her department thorough treatment and produces permanent results which show that the work is done in a manner that trains to a cultivation of taste and to a high degree of skill in its concrete expression.

CONCLUSION.

The efficiency of our schools depends very largely upon the harmonious relationship of the several factors included in their management.

The sympathetic interest of parents and citizens and the

cordial co-operation of school officials are certainly among the most important things requisite for the maintenance of a high standard of school work.

I have felt very strongly the existence of these favorable conditions and take this opportunity to thank you and through you the citizens of Auburn for the personal assistance I have received in the pursuance of my duties.

Respectfully submitted,

PAYSON SMITH.

To Mr. Payson Smith, Superintendent of Schools:

While we may feel well pleased with the results of the work in music, there are a few things which will help to make the work easier and more satisfactory.

The Harmonic Music Readers are excellent drill books, but we need more song material in the upper grades. This could be secured by the use of supplementary music sheets at a small cost.

It is desirable that a book be placed in the ungraded schools which contains a complete course of school music. The book now in use is a primary grade book.

The great need of a school building which contains two or more rooms of the same grade, like the Webster School, is an assembly room with a piano where the classes can be combined for chorus work.

Although we have an assembly room and piano at the High School, it is seldom that the music class can have it all to themselves as it has to be used for a study room most of the time.

The boys and girls of the High School have each formed glee clubs and are doing good work. The volunteer chorus is as good if not better, than any chorus of preceding years.

I cannot speak too highly of the influence of the School Music Festival which, so far as I know, originated with us in the form that we hold it. It is not to the influence on the public which it has as an entertainment that I refer, but to the influence on the children who take part in it and who are musically awakened by it. It is well worth the patronage of all parents and citizens for that reason alone.

Respectfully submitted,

N. L. MOWER,

Supervisor of Music.

To Mr. Payson Smith, Superintendent of Schools:

DEAR SIR—Again it becomes my privilege to make my yearly report of the work attempted and done in drawing. It has been my aim to keep in touch with the best methods and results, in my branch of work. This has not only been possible through interested and sympathetic study but I have personally visited many of the best schools in Boston and surrounding towns, also in the Portland schools, and with renewed confidence, I bring to you my conclusions. Our boys and girls are abreast with the best, in the sense of appreciation and the power of execution and application. To me, no study seems to afford a better opportunity for bringing a child face to face with his mental power to *see*, to *appreciate* and moreover to test his physical ability of portraying with his hand what many times the power of speech failed to do.

The smallest children need the opportunity for free expression. I have endeavored to allow them to do this work and they eagerly apply themselves and with unlimited confidence they draw, and draw all facts and fancies that may have come into their short lives. This stage passed they are better fitted to accept guidance and criticism. With the older children, drawing is sympathetically correlated with all school work. In no way can children learn to feel and see the genius in all works of art; all design behind our material life; the effect of color in all its various phases, than by touching the elements of it all in these school days. I only regret that more time cannot be given us. My weekly visits to the several rooms within the city limits, I believe, bring mutual delight, and I cannot put too strongly my sincere appreciation of the unfaltering inspiration the teachers, without exception, give me in maintaining constant harmony.

The school board has responded willingly to the various applications for material, and always with uniform co-operation success is assured. Although my visits to the rural

schools are less frequent, yet the work is faithfully carried on by the teachers. Instruction to the rural teachers is given each month at the meetings for such instruction. The schools are equipped with the same material for drawing as our city schools. I would recommend better furnishings for the drawing room at the high school.

Respectfully submitted,

IDA L. SMITH.

REPORT OF BOARD OF HEALTH

To the Honorable Mayor and Board of Aldermen of the City of Auburn:

GENTLEMEN—The Board of Health respectfully submits the nineteenth annual report for the municipal year ending February 28, 1906, and the mortality statistics for the year ending December 31, 1905.

ORGANIZATION.

The board consists of the following members: Dr. B. G. W. Cushman, Dr. D. A. Barrell, and J. H. Chase. The meeting for organization was held May 13, 1905, at which time D. A. Barrell was elected chairman, and B. G. W. Cushman secretary and health officer. John J. Lawler was appointed inspector of plumbing for one year.

CONTAGIOUS DISEASES.

The number of contagious diseases at any one time has not been large, but there has been very little time during the year when there was not a case under quarantine. There has been only one death from diseases requiring a strict quarantine, viz.: one from diphtheria.

SMALL-POX.

In the spring of 1905, as in the two preceding springs, we had an outbreak of small-pox. There were only six cases, infecting four houses, and two suspects who were temporarily quarantined; yet the expense to the city was about \$1,000, one-half the expense of the Board of Health department for the entire year. The primary cases, four in number, were all employes of one mill in Lewiston. Probably there was an infection of some of the materials used in the mill as the cases developed from several different rooms. The two secondary cases developed in persons not protected by vaccination. All exposed persons, who were promptly vaccinated, escaped the disease. Some of the mill opera-

tives and school children were vaccinated at the city's expense. The increasing indifference of our citizens in regard to the matter of vaccination renders it probable that these outbreaks of small-pox will become more frequent. During the epidemic, the Board excluded all unvaccinated children from the public schools. This practice effects the vaccination of most of our school children and is the principal protection of our community against the expense and possible fatalities of this loathsome disease. Unbelievers in vaccination are requested to note the ease with which health officers stamp out an epidemic of small-pox compared with epidemics of scarlatina and diphtheria. Vaccination in addition to quarantine makes this possible. Of the six cases mentioned, the mildest, a case of varioloid, had six pustules on the entire body; the severest, occurring in a person who had never been vaccinated, had 180 on the face alone. The former patient acquired the disease from the latter.

All the patients, with one exception, were treated at a quarantine station established in a building located on the city farm and owned by the city. We recommend that this building be underpinned and put in such shape as to be suitable in cold weather. An epidemic occurring in cold weather, if patients were obliged to be treated at home, would cost much more than the needed repairs, in additional nurses, police, supplies, etc., and the danger of further spread of the disease would be greater.

OTHER CONTAGIOUS DISEASES.

Scarlet fever has prevailed in a mild form, but there have been fewer cases than in the preceding year. Diphtheria was quite prevalent and severe in its character during the fall and early winter. There were a few scattered cases of typhoid fever, most of them originating from sources outside the city.

DISINFECTION.

The policy and methods of the Board in regard to disinfection have been the same as last year. Formaldehyde gas has been the disinfectant. The permanganate process has been used in generating this gas instead of the Novy generator. It is quicker and safer as regards fires and explosions; but requires a little more material.

NUISANCES.

A larger number of nuisances have been reported than in the preceding year. Where it was possible, these have been removed or the conditions improved.

SEWERS.

The Board heartily endorses the work begun by the city government on the Goff Hill sewer. It also calls the attention of the same to the dangers at Lake Grove which is near our water supply. This must be kept pure at any cost.

CONTAGIOUS DISEASES IN ANIMALS.

After investigation of a case of tuberculosis in a cow, the Board adopted the following rule:

"Every person killing any cattle, horses, sheep or swine that are affected with tuberculosis, pleuro-pneumonia, foot and mouth disease or any other infectious or contagious disease, shall at once report the same in writing to the Board of Health, together with the name of the owner thereof." This rule has been approved by a justice of the Supreme Court and recorded with the City Clerk, and thereby becomes one of the regulations of the Board of Health.

PLUMBING.

Our inspector of plumbing has done efficient work for the year. All new, altered or repaired plumbing has been done in accordance with the regulations of the Board.

B. G. W. CUSHMAN,
D. A. BARRELL,
J. H. CHASE.
