ELECTIONS—Rowell, Provost, McFadden.

LICENSES—Provost, McFadden, Ross.

OF COMMON COUNCIL.

ELECTION RETURNS—Carver, Bowie, Merrow.

CONTINGENT EXPENSES—Chase, Brown, Rendall.

Regular monthly meetings of the City Council on the first Monday of each month, at the City Council Rooms at 7.30 P. M.

Regular monthly meetings of the Committee on Accounts, to examine bills, on the fifth day of each month, or if the fifth comes on Sunday, then on the preceding day, at the Treasurer's office at 7.30 P. M.

MAYOR'S ADDRESS

Gentlemen of the City Council:

The smoke of another political battle has cleared away, and as a result of that conflict, we are assembled here this morning for the purpose of organizing a new City Government for the City of Auburn.

Two weeks ago this morning, two great political parties were arrayed against each other in a struggle for supremacy. The contest was a fair one and the victory decisive. All political differences should now be buried and we should one and all feel that we are from this time on, the servants, not of a party, but of the citizens of Auburn.

We have now taken the oaths in obedience to law which will legally qualify us to assume the responsibilities and undertake the duties to which we have been called by the suffrages of our fellow-citizens. I trust that we shall always bear in mind that the city over whose affairs we are placed in charge and for whose prosperity we must in a large measure become responsible, is simply a great business corporation of which we have been chosen directors. It becomes the duty of each of us to exercise toward this corporation the same strict attention to business, the same scrupulous fidelity, the same prudence and wise economy that we would exercise toward our own private affairs. I ask you one and all to unite with me in an effort to conduct the affairs of this municipality during the ensuing year on strict business principles so that we may not only secure the very best results attainable but may secure them in the most practical and economical manner. The close of this municipal year upon whose threshold we are now standing, will complete the fortieth year of the life of this municipality as a city.

It is my ambition and should be the ambition of every member of this City Council, that when the reports are

made up for the year they may compare favorably with those of any of the thirty-nine which have preceded it. The strictest economy must be practiced in all departments and by economy, I do not mean simply the expenditure of the smallest amount of money possible, but I do mean a united effort on the part of all to see to it that the city of Auburn shall receive for every dollar expended its full value in repairs, improvements, materials and protection.

From time to time, it has seemed wise and expedient by the majority of our citizens to place various departments under the control of commissions or governing boards. To such an extent has this been carried on that all of our departments with the exception of the Police Department are now so governed or controlled. This places the City Council in the most unpleasant and unsatisfactory position of being called upon to appropriate and become responsible for the money necessary to defray the expenses of these various departments and at the same time, it has no legal authority to direct the expenditure of the money appropriated. While I concede that the theory of conducting these various departments through the supervision of a commission is well founded and commendable, I must admit that in some departments the results have not been as satisfactory as they should have been. Divided responsibility can never result in the highest degree of success.

So great has become the dissatisfaction with our present system of government that the Board of Trade has been agitating of late an entire change in the charter, whereby the parties appropriating and spending the public funds shall become directly responsible for their own acts and the results.

I recommend that a strictly non-partisan committee, consisting of able representatives from all political parties now represented in our city, be raised by the city committees as early as convenient, for the purpose of investigating so called improved methods of governing cities now in actual operation. I would recommend that this committee be asked, after such investigation, to draft such revision of our charter as will in their opinion more fully meet the requirements and serve the needs of the present time

in this city and submit the same for the consideration of our next legislature.

I trust that I bespeak the sentiment of every member of this City Council when I say that we shall hail with joy the introduction of any improved form of government which shall prove beneficial to the City of Auburn. It is our duty, however, until a new system is instituted to get the very best results possible out of the present system. While we have but limited control over these various commissions, it is within the power of the City Council to do something toward the personnel of each commission.

We are called upon to-day to select from the citizens of Auburn a member of the Water Board, a member of the Board of Public Works and a member of the Board of Fire Commissioners. You are nearly all familiar, I doubt not, with the duties that must be performed by these men. Let your good judgment prevail and elect to these various offices men who are thoroughly qualified for the performance of the duties devolving upon them. Personal friendship or party affiliation should not have any influence upon you in making your selections. This likewise applies in electing the various other officers necessary to complete the organization of the City Government for the ensuing year. Keep in mind solely the prosperity and welfare of our city and you will make no grave mistake in the selection of the men who are to fill these responsible positions.

While we have these Commissions as a part of our system of government, it is important that the City Council work in harmony with them. I recommend that you carefully study the reports of each department in order that you may become familiar with the work done by each the past year and with the knowledge thereby gained, you will be in a position to better judge of the requirements of the several departments. I shall ask each governing board to submit to this City Council their plans for the coming year and estimated cost of carrying out the same. I shall recommend an appropriation sufficient to meet these estimates and shall then insist that each department govern its expenditures in such a manner as to keep within the appropriation.

FINANCIAL

In order that we may enter upon our duties with a clear understanding of the financial condition of our city, I have carefully examined the Treasurer's books and submit the following facts which I have obtained from them for your consideration.

LIABILITIES

4 per cent. Bonds,	\$ 96,500 00
3½ per cent. Bonds,	111,500 00
Bond No. 9, due July 1, 1897	500 00
3½ per cent. Bonds on which Water Commissioners pay interest,	58,700 00
4 per cent. Bonds on which Water Commissioners pay interest,	30,000 00
Temporary loan,	63,600 00
Sarah S. Preble Burial Lot Fund,	150 00
Francena Robinson Burial Lot Fund,	100 00
	—————\$ 361,050 00

RESOURCES

Lewiston & Auburn Railroad Stock,	\$75,000 00
Uncollected taxes, 1900,	12 00
Uncollected taxes, 1904,	715 74
Uncollected taxes, 1905,	1,679 84
Uncollected taxes, 1906,	3,766 95
Uncollected taxes, 1907,	9,480 13
Tax deeds,	1,709 89
Sewer Assessments,	1,497 74
Sidewalk Assessments,	63 21
Amount in Water Works,	88,700 00
Cash in Treasury,	21,830 12
Municipal Sinking Fund,	10,408 40
	—————\$ 214,882 02

Net debt of city, Feb. 29, 1908,	\$ 146,167 98
Net debt of city, Feb. 28, 1907,	169,601 15
Decrease in city debt during the year,	23,433 17

Valuation, Apr. 1, 1907:	
Real estate,	\$6,141,715 00
Personal estate,	1,011,835 00
	<hr/> \$7,153,550 00

Valuation, Apr. 1, 1906:	
Real estate,	\$5,921,720 00
Personal estate,	920,250 00
	<hr/> \$6,841,970 00

Increase in valuation,	\$ 311,580 00
------------------------	---------------

It is safe to count our population at this time at 15,000. With a net debt of \$146,167.98, it will give us a debt per capita of only \$9.75. In other words, if every citizen of Auburn would contribute to the public treasury, the sum of \$9.75, it would wipe out the entire indebtedness of the city.

TAXATION.

This always has been and no doubt always will be the source from which arises many discussions resulting from different views upon this great and important subject.

The citizenship of Auburn is of a high order of intelligence and the taxpayers as a whole readily discriminate between false economy and the wise expenditure of public funds. At the same time, each man has a right to ask and expect that his neighbor should be taxed on an equal basis with himself. This city has both rural and city property and I believe it to be a fair representative of the average property of the State and of the New England States. A careful comparison of the ratio between real and personal property as assessed in Auburn and other similar cities in New England leads me to believe that an unjust burden of taxation in this city is borne by the real estate. This is open and exposed to view. None of it can escape taxation. If any of the personal property is so covered up as to escape taxation, then more than a just burden falls upon the citizen who has the great part of his wealth invested in the farm or city home. While I have

only words of commendation for the men who have so faithfully served the city in the past in the most important office of assessor, yet I do feel to urge those who may fill this position in the future to be ever vigilant in their efforts to have all forms of visible property fairly and equally as well as equitably assessed. The public records are open for inspection and through them much valuable information should be obtained on this subject. I believe in keeping our tax rate at the lowest possible figure which will give us the necessary revenue with which to meet the expenses of the city. It requires no special knowledge of finance to understand that it makes no difference to the tax payer whether he pays 22 mills on a valuation of \$2,000 or whether he pays 20 mills on a valuation of \$2,200. The tax paid is \$44.00 in either case. It does make a great difference, however, to the capitalist who is seeking a field in which to invest his money in commercial or manufacturing enterprise. It does make a difference to the man of moderate means who is seeking a home where he may economically live and educate his children; it does make a difference to the farmer who offers his property for sale. To be told that a tax rate is 22 mills on the dollar has a tendency to keep out capital which would be invested at a lower tax rate and we are the losers. If my assumption that much personal property escapes just taxation is correct, it will materially aid in solving the problem of keeping our tax rate at a figure which will rapidly increase our valuation by establishing new industries and building up new homes. While speaking of this subject, I cannot refrain from saying, that in my opinion, the assessors are inadequately paid for the proper performance of the work necessary to the efficient assessment of taxes in the City of Auburn.

I hope and trust that in making up the salary resolve for the coming year this matter will receive serious consideration. No office is of more importance to the prosperity of the city than that of assessor. Let us see to it that we select men who are amply qualified for the place and then pay them for and require of them efficient service. Let us assemble on our Board of Assessors as far forth as possible, men of diversified business interests in order that

they may be more fully qualified to place a just valuation upon our various industries and properties.

SPRINKLING

This question has been much discussed during the past year and our predecessors have labored hard to justly apply the law passed by our last legislature. We all acknowledge the necessity of sprinkling our streets, both for comfort and the preservation of health. The great problem to be solved is the proper apportionment of the expense so that each abutter may pay in proportion to the benefits which he derives. As I understand the law, it provides an assessment pro rata on the linear feet of frontage sprinkled. Suppose it is found that \$.05 per foot will pay the expense of sprinkling the territory to be sprinkled. If we follow this law literally, the merchant doing many thousands of dollars of business on a lot with a twenty-five foot frontage pays \$1.25 for sprinkling while the poor mechanic with a comfortable cottage home on a lot with a fifty foot frontage pays \$2.50 for sprinkling. This is clearly an injustice. The injustice, however, is in the law and not in the assessment.

As a good sound business proposition, I believe that the city should own its sprinklers and annually let the contract for the work to the lowest bidder, the expense to be borne by the abutters in direct proportion to the value of the property sprinkled or the benefits derived. We shall soon have this problem to face for the present year and I urge you to give the matter early and serious consideration. Confer with your constituents and get from them as nearly as you can an expression of their wishes in order that when the times comes you may act wisely and judiciously.

HIGHWAYS AND SEWERS

In this department are included 135 miles of country roads and 128 miles of city streets, also sidewalks, bridges, culverts and those great underground drains, the sewers, so essentially necessary to the convenience and health of our people. Every City Council since the organization

of our first City Government has been confronted with problems in this department, which were solved with the greatest difficulty. No matter how much good judgment and wise deliberation may have been manifested in the solving of these problems, the fact remains that the result was too often met with unfavorable criticism. As a result, our people went to the State Legislature and obtained legislation by which this department was placed under the control of a board of directors known as the Board of Public Works. Some of our brightest and best business men now constitute that board and their predecessors in office have in no way been inferior to them. Still the fact remains that the results obtained in this department are far from universally satisfactory. I am not convinced, however, that our people are yet ready to return to the old system. The municipal campaign one year ago was fought out by the two great parties on the one issue, that of retaining the Board of Public Works or returning to the old system. The candidate pledged to the system, as we now have it, won by a substantial majority which would seem to speak well for the Board of Public Works. Be this as it may, if the system is to be changed, it must be in the State Legislature and not by the City Council. While the Board of Public Works continues in authority in this department, it is our duty to work in harmony with this board for the best interests of our city. In order that you may fully understand the amount of money used in this department and the purpose for which it has been expended, I wish to submit the following interesting figures.

Total appropriation for this de-		
partment,	\$34,500	00
Received from sewer assessments,	1,918	05
Received from permanent walks as-		
essment,	211	64
Received from sundry other sources,	724	81
		\$ 37,354 50
Expended for permanent walks,	\$ 579	75
Expended for new sewers,	8,443	37
Expended for repairing and cleaning		
old sewers,	957	61

Expended for highways, inside,	14,303 84	
Expended for highways, outside,	8,868 77	
Feed and care of teams,	3,223 70	
Exchange of horses,	940 00	
		\$ 37,317 04
		<hr/>
Balance on hand unexpended,	\$	37 46

For a more detailed account of the manner in which this money has been expended, I will refer you to the report of the Board of Public Works. I recommend that you study it carefully in order that you may become familiar with the many demands upon this department.

There is an urgent need of a suitable building in which may be kept the horses belonging to this department and in which may be stored the sleds, carts and other equipment. If a farmer allows his farm machinery to remain exposed to the weather and neglected, he is at once counted as slothful and incompetent and yet that is what the City of Auburn is forced to do at this time because of the lack of room. The present quarters are entirely inadequate for the demands of the present day. I recommend that you give this matter serious consideration and that an appropriation be made to provide suitable quarters for our street department. The present quarters being centrally located ought to be salable at a price which would go a long ways in paying the expense of the new quarters. It may be possible to remodel the present building so that sufficient storage room and stabling may be had. I also recommend for your consideration the advisability of a definite appropriation for the continuance of the Goff Hill sewer system for which the people of that section have been waiting so long and patiently. I would also ask each one of you to make yourself familiar with the new State Road Law which was passed by our last Legislature and which went into effect January first of the present year.

In my opinion, this law is an unjust one by which Auburn and all similar cities are the losers. I hope that sufficient indignation may be aroused to secure the repeal or revision of this law at the next session of our State

Legislature so that property taxed at 20 or 22½ mills on the dollar, of nearly full valuation, may not be called upon to contribute to the building of roads for the development of property which is paying a low tax rate on an extremely low valuation. Probably no other city in this State is more over-burdened by its mileage of streets and highways than is Auburn. To take out of our tax payers' pockets some \$1,500 annually to build roads in other parts of the State is little better than "highway robbery." I do not propose at this time to discuss national issues but I hope that our people will awaken to the great need of better roads and the millions of our people that would be benefited thereby. While our senators and representatives are lavishly appropriating for the improvements of our harbors and rivers and freely discussing the necessity of building up our Merchant Marine, may they be reminded by their constituents of the great help that an annual appropriation for permanent roads would be to this country.

WATER WORKS.

Fifteen years ago we purchased the property belonging to the Auburn Aqueduct Co. at an appraised value of \$250,000. This plant was in poor condition and entirely inadequate to supply the demands of our rapidly increasing population.

This called for the expenditure of large sums of money to reconstruct, extend, and properly equip this plant. Our debt limit had been exceeded and some means must be devised by which the Water Works could be properly extended and equipped without increasing the city's indebtedness. A corporation known as the Auburn Water Commissioners was therefore formed and to this body was entrusted the management of this important department of our city. The wisdom of this plan is plainly demonstrated by the following facts: The plant has increased in value from \$250,000, the purchase price, to \$427,435.81, its present estimated value, and the bonded indebtedness has been decreased \$22,000. There is at this time as by the Water Commissioners' report a sinking of \$40,820.63.

There is cash on hand to the amount of \$9,495.99. The net income from this plant for the year ending February 29, 1908, was \$13,635.25 and the total net income since the purchase of the plant to February 29, 1908, was \$137,494.14.

The beautiful and capacious new reservoir on Merrill Hill has been completed and made operative the past year. To the careful and able management of the Superintendent, Mr. F. E. Bisbee and the Construction Engineer, Mr. S. K. Kneeland, are we largely indebted for the dispatch, thoroughness and economy with which this valuable and necessary addition to our magnificent plant was brought to completion. While we are all justly proud of the good showing made by this department and while we all agree that in the Auburn Water Works we have a very valuable piece of property, I cannot refrain from calling your attention to the fact that we are annually contributing to the sinking fund of this department the sum of \$3,000 and in addition, we are paying \$20 per hydrant, amounting to \$2,180 for hydrant service. This amount comes out of the tax payers' pocket and is shared equally by the urban and suburban resident. I consider this an injustice and believe that the hydrant service should be free to the city. This plant has passed beyond the experimental stage and is now a self-supporting and revenue-producing plant. I cannot see why the over-burdened tax payer should be called upon to contribute any more to the support of this plant than the statutory provision of \$3,000. I recommend that a committee be raised early this year to confer with the Board of Water Commissioners in an effort to secure free hydrant service to the city.

FIRE DEPARTMENT

This is one of the departments which is under the direct supervision of an efficient Fire Commission. I learn from the chief that a new Hose Truck has recently been purchased which will be available for use early in April. I also learn that the department is very much in need of a modern Ladder Truck. The one now in use has been used for the past thirty years and is inadequate for the efficient

handling of fires, should they occur in some of our largest buildings. I hope and trust that means may be provided whereby this much needed piece of apparatus may be added to the equipment of the Auburn Fire Department during the coming year. I also recommend that some suitable place be provided in which the Fire Commissioners may hold their meetings and keep the office supplies incident to the proper conduct of the business affairs pertaining to this department. There is now a small unoccupied room in the City Building which can be fitted up for this purpose at little expense.

I want the Fire Commissioners and department to feel that they have our hearty support not only in maintaining the present high standard of this department but in improving it as our growth may require and means permit. By maintaining this department at a high standard of efficiency we may reasonably hope to secure lower insurance rates which will benefit everybody within hydrant districts. The salaries of the permanent men in the department have recently been increased which action I heartily approve. It would seem that if possible this department should have a slightly increased appropriation for the coming year and that some arrangement may be perfected which will give the regular men one evening in each week as their own in which to enjoy their homes and companionship of their fellows.

POOR DEPARTMENT

In this department the City of Auburn has an example of excellent business management equalled by few, if any cities in New England and excelled by none. For two years, while a member of the Board of Aldermen, I was intimately associated with Mr. J. M. Stevens, the present Clerk of the Overseers of the Poor and I wish to say to you, gentlemen of the City Council, that the knowledge which he has gained by years of experience in this department, coupled with his good judgment and keen business foresight, renders his services of almost inestimable value to this city. I certainly hope that he may be retained in his present position as long as he will consent to do the work.

Last year there was appropriated for this department the sum of \$4,000. The auditor's account shows a slight overdraw but there are outstanding accounts due the city which will more than take care of this overdraw and in addition, we have more stock at the farm than we had one year ago, all of which shows that the poor of this city of nearly 15,000 inhabitants has been well cared for at a cost to the city of not over \$4,000. It is also a fact that over one-third of this amount has been expended in caring for our insane at Augusta. We have now only sixteen inmates at the home but these are well cared for and as happy and contented as people in such circumstances could possibly be. In Mr. and Mrs. Irish, we have an ideal couple for the management of such an institution. I recommend that each member of this City Council take time in the near future to visit this home for our unfortunate, in order that you may see for yourselves the good work being done there, and more fully understand and appreciate the needs and requirements of the institution.

POLICE DEPARTMENT

I feel that Auburn can justly be congratulated on not only the efficiency of its Police Force but on the character and intelligence of the men composing that force. I believe that no man should ever be appointed to the Police Force of this, or any other city, who is not thoroughly qualified both mentally and physically to perform the work devolving upon him. I also believe that he should be a man of good, honest, upright character who is respected by his fellow-citizens.

To these custodians of the peace, we entrust the dearest things of life: Our property, our homes and our children. No good citizen, no matter what his political preferences may be, wants to entrust these earthly treasures to the guardianship of men whose sole recommendation is their ability to get out a large vote on election day. While I would deprive no man of his rights as a citizen, because of any office he may hold, yet I do hope that in the near future, a custom will be established in Auburn which will cause police officers to refrain from acting as members of

our City Committee. I recommend that Lake Auburn be properly patrolled during the season in order that the waters of the lake may in no way become polluted by the fishermen and cottagers who frequent the place. A sufficient appropriation to take care of this extra expense must be made. It has been suggested that we might, by using our special officer more in the city work, during the summer season, patrol the lake with our regular force. The feasibility of this plan we will discuss and consider later.

SCHOOLS

Of all the departments over which the City Government exercises control there is none of greater importance than our schools. It is here that we are educating the boys who will shortly become the men who are to take our places in directing the affairs of city, state and nation. On these boys and the character of their education hangs the future destiny of our great nation. It is here that we are shaping the lives of the girls who are to be the mothers of a generation yet unborn and who by their character and teaching will shed an influence for good or evil far into the future.

In the schools, the urban and the suburban resident, the rich and the poor, the democrat and the republican, have a common and united interest. While our schools are well equipped and our teachers are among the best that can be secured, I feel that we are not quite keeping up to the requirements of these progressive times. We are educating the mind without training the hand. The results are becoming more and more apparent each year. The professions are crowded and the demands for skilled labor can hardly be supplied. Many a good mechanic or artisan has been sacrificed for a poor lawyer, doctor or minister. I believe that immediate action should be taken which will enable us to permanently install a course in Manual Training and Domestic Science in our school system. Our last Legislature enacted a law increasing the so-called Mill Tax upon which our revenue from the State for the support of schools is based from one to one and one-half mills. This increased mill tax will give us enough revenue to defray the expense of installing and maintaining a course in Man-

ual Training and Domestic Science without making any special appropriation.

Manual Training helps to make mechanics and I regard mechanics as being of the greatest importance and service to the world, for they have given us, and still continue to give us a very large proportion of all that contributes to our comfort and happiness. We want to teach our boys to be self-supporting and as a very large per cent. of those who enter the common schools get all their formal education in the Grammar grades, it follows that here should be concentrated our most earnest efforts toward realizing the fundamental purpose of all school training which is independent self-support.

The school buildings are generally in good repair throughout the city. The Webster Grammar school building, however, is an exception. The basement of this building is reported as in an unsanitary condition and should be thoroughly overhauled and renovated before the beginning of another school year. I do not recommend the expenditure of any more on this building than is necessary to render it sanitary, comfortable and safe. The building is old and its location because of its proximity to the railroad not a desirable one. I certainly believe that this progressive city will, within a few years, procure a suitable lot and erect upon it a thoroughly modern and up-to-date school building which will combine and accommodate the Webster, Franklin and Chamberlain schools. I recommend that suitable fire escapes be immediately placed upon our school buildings where needed, in order that we may avoid the possibility of the occurrence in this community of such a horror as recently befell one of our Western cities. The yard at the Wilson school in New Auburn is ungraded and unsightly. The Washburn school building needs to be painted in the interests of economy. I shall recommend an appropriation in this department sufficient to meet these requirements. I believe that the money which we expend in the education of our children is a safe and paying investment.

In closing, I wish to say that in what I have said to you concerning the different departments, I have endeavored to briefly call to your mind the things most needed in those

departments. I do not presume to say at this time that we can accomplish this year all the things necessary which I have suggested, without imposing upon our people too great a burden of taxation. I desire, however, that you give each due consideration and if all can not be accomplished, select from among them those most important and make them the object of your special effort. I heartily recommend that all repairs and improvements, involving the expenditure of any considerable amount of money, shall be based on proper specifications and contracts awarded to the lowest, responsible bidder who is fitted and qualified to do the work.

The business outlook in Auburn is certainly most encouraging and pleasing. The United States Government is about to erect a beautiful and expensive building as a home for the Postoffice Department. We learn with pleasure that several large and modern business blocks are to be erected this season which will add materially to the beauty and wealth of our city. The energy and thrift of our citizens; our accessibility to the great centers of trade; our splendid railroad and trolley line connections; our excellent and well-governed schools; our beautiful churches; our general freedom from vice; our reputation for temperance and good morals; all these have annually attracted to our midst those who were seeking to invest capital in commercial and manufacturing enterprises, and who were seeking homes in pleasant and healthy surroundings in which to live and educate their families. This has given our city a healthful and steady growth. It is our privilege and duty to do all in our power to make possible the continuance of this condition. And now, gentlemen, we are brought face to face with our duties. I wish for you during the year, harmony of feeling, wisdom of action, and as much unanimity of counsel, as is consistent with independent and deliberate thought, and for each of you at the end of your term of office, I wish the commendation of your fellow-citizens and the hearty approval of a wise, intelligent and God-fearing conscience.

IRVING L. MERRILL.

Mar. 16, 1908.

TREASURER'S REPORT

To the Mayor and City Council of the City of Auburn:

GENTLEMEN:—I herewith submit my report as Treasurer of the City of Auburn for the year ending February 29, A. D., 1908.

By vote of the City Council this amount was transferred to the Sinking Fund.

Respectfully submitted,

HARRIE L. WEBBER, *City Auditor.*

REPORT OF
AUBURN WATER COMMISSIONERS

*To the Honorable Mayor and City Council of the City of
Auburn, Maine:*

GENTLEMEN:—The Board of Water Commissioners herewith submit their fifteenth annual report.

At the annual meeting of the Board, held March 18th, 1907, Mr. M. H. Merrow was elected president of the Board, Andrew W. P. Cobb re-elected clerk; Forrest E. Bisbee re-elected superintendent; and L. L. Rand re-elected engineer.

During the past year we have completed the reservoir on Merrill Hill at a total cost of \$51,459.37, which includes purchase price of the lot and the pipe line from the old reservoir to the new and all labor and material to date. The above includes the \$25,000 paid Messrs. J. A. Greenleaf & Son for building the reservoir itself.

As stated in our last annual report, permission was obtained from the State Legislature to issue \$25,000 in reservoir bonds for the completion of this work, but it was found necessary to issue and sell only \$15,000 of this amount. \$3,000 of a previous issue were sold for this purpose, the balance being paid from the earnings of the Water Works.

We feel that the new reservoir is built in a thorough and workman like manner and will serve all the needs of the city for many years to come for fire protection and all domestic purposes.

Improvements in the way of extensions have been decided upon for the coming year and the stock has been purchased for this work.

Water rents collected during the year,	\$32,833 30
Licenses and fines,	12 00
	<hr/> \$ 32,845 30
Water rents uncollected February 29, '08,	637 39

City of Auburn, note No. 125, dated March 3rd, 1906,	3,000 00
City of Auburn, note No. 135, dated March 14th, 1907,	5,000 00
Cash deposited in Auburn Savings Bank,	1,820 63
	<hr/>
	\$40,320 63

RESERVOIR SINKING FUND

Amount deposited in Auburn Savings Bank, \$500 00

Respectfully submitted,

E. G. EVELETH, *Treasurer.*

Auburn, Me., March 10th, 1908.

AUDITOR'S REPORT

This is to certify that I have examined the accounts of Andrew W. P. Cobb, Clerk of the Auburn Water Commissioners and find them to be accurately kept.

The entries on the Cash Book are correctly cast and entered on the Service Book and the abatements properly entered.

I find the amounts turned over by Andrew W. P. Cobb, Clerk, to E. G. Eveleth, Treasurer, to correspond correctly with his receipts.

HARRIE L. WEBBER, *Auditor.*

REPORT OF SUPERINTENDENT OF WATER WORKS

Auburn, Maine, March 1st, 1908.

*To the Honorable Board of Water Commissioners of the
City of Auburn:*

GENTLEMEN:—I have the honor to report to you the fifteenth (15) annual report of the improvements and working of this plant.

STATION AND MACHINERY

The boilers and pumps are in fine working order. The boilers were inspected by the Maryland Casualty Co. of Baltimore, Md., Oct. 24, '07, and found to be in good condition, care and management.

RELAY OF SERVICES

A relay of fifty-four (54) services have been made at a cost of stock and labor—\$323.50.

NEW SERVICES

An extension of the plant was twenty-five (25) new services at a cost of \$192.88.

FROZEN PIPES IN 1907.

Up to date we have had four (4) frozen water pipes. Three of this number were house services and with the thawing machine it takes, after the current is turned on, from five to ten minutes. The fourth one was a six inch main on Third Street, south of Brook Street. I think that the grade has been cut down on the street, thus the

cause, cutting out twelve (12) house services. We run 1,600 feet of cable from the Electric Light Co. line to the machine, then 600 feet of wire so to connect from the point of live water in the 6 inch pipe to the other end of the pipe line, made a connection on the hydrant at the live water end, also on the faucet in the last house without water, set the machine at work and in sixty-two (62) minutes the water was flowing O. K.

HYDRANTS

The city has 109 hydrants of the following make, viz:—
Chapman, 21; Corey, 7; Mathews, 37; Boston, 37;
Carr, 6.

The Boston and Carr hydrants were set in 1881 and 1882 and at that date the companies were not making hydrants and we cannot get fittings to repair the same. I would recommend that the city purchase six new hydrants to take the place of the Carr's with up to date hydrants, also two to set on upper Court Street, one near No. 451, and one near No. 481. The tees and gates were left on the twenty (20) inch main to receive the same.

LEAKS.

The number of leaks have been few, two in the Court Street lines caused by the old sewer breaking down, letting the pavement down on to the cross pipe. Six corporation lead leaks.

RESERVOIR AND PIPE LINE CONSTRUCTION

In 1897 the Merrill Hill reservoir lot was bought of Mr. Simon Merrill at a cost of \$2,500, with six acres of land and a right of way 50 feet in width from the lot to Court Street.

In 1900 the 20 inch pipe line was started at Dexter Avenue, on Court Street, to the reservoir lot, to Lake Avenue, a distance of 1,450 feet, at a cost of \$4,944.54.

In 1901 the 24 inch pipe line was constructed from Lake Avenue and Court Street to the reservoir basin, a distance of 1,095 feet, at a cost of \$5803.54.

In 1906 construction was commenced for the reservoir, the cost to remove 3,240 yards of earth and 8,000 yards of stone from the pit to the outside of the grounds was \$6,590.56.

In 1907 the Commissioners contracted with Messrs. J. A. Greenleaf & Son to furnish machinery for crushing the stone and making the concrete and building the walls of the reservoir on a percentage, the Commissioners furnishing the clay, sand, stone and other material, also doing the piping, brick work, back filling, at a cost of \$6,422.78. Adding the cost of the cement work done under the contract of Messrs. Greenleaf & Son of \$25,197.97, making a total cost of the lot, pipe line and reservoir \$51,459.37.

The water was let into the reservoir Oct. 20th, '07, the walls and floor washed and the water was let on the city service Nov. 9th, '07, and the system is working fine.

IMPROVEMENTS

FOR 1908.

It is always best to have the water supply so that it can be pumped two ways to the reservoir, and on the return to the city two ways. The Commissioners thought best to connect the 8 inch pipe on Minot Avenue with the 8 inch pipe that is a dead end on South Goff Street. They purchased a right of way for a pipe line over the land of S. K. Ballard and Henry Young, a distance of 200 feet. When this is connected, in case of trouble on the Court Street hill, the water can be pumped to the reservoir through the 8 inch pipe coming down Western Avenue, Minot Avenue and South Goff Street to the 12 inch pipe on Court Street. The pipe and specials are ordered and will arrive in the month of April. As soon as the stock arrives, the extension will be made.

An extension of 6000 feet of 6 inch pipe is ordered for an extension on Minot Avenue, west from the hydrant near W. W. Stetson's, to Sheridan Avenue, and a connection left for a hydrant at that point, giving a reduction of 20 per cent. in the insurance to twelve houses.

ANALYSES.

Augusta, Maine, Oct. 28, 1907.

Auburn Water Commissioners,
Auburn, Maine.

GENTLEMEN:—I enclose the results of the analysis of the sample of water sent to me on the 22nd instant, and taken from your public supply.

The analysis shows that the water is free from evidence of sewage pollution, both chemical and bacterial. In its present condition I regard the water as a fit and safe one to use for drinking purposes.

In the case of a water taken from a lake which has such a summer colony as has Lake Auburn, if the purity of the water is to be maintained, constant attention must be paid to keeping the sewage from the cottages from entering the lake by maintaining proper cesspools back from the water. I cannot see why, if this sewage is kept from the lake, you should not have the same high grade water that you now have.

Very truly yours,

H. D. EVANS, *Director.*

MAINE LABORATORY OF HYGIENE

WATER ANALYSIS

Parts in 100,000; No. 1,202; date of collection, Oct. 22, 1907; date of examination, Oct. 23; 1907.

Appearance.—Turbidity 0, Sediment 0, Color 0.5.

Odor.—Cold 0, Hot, slight.

Residue on Evaporation.—Total 3.0, Loss on Ignition 1.6, Fixed 1.4, Free .006.

Ammonia.—Albumenoid. Total in Solution; in Suspension .0090; Chlorine 0.20.

Nitrogen As.—Nitrates 0, Nitrites 0.

Oxygen Consumed 13, Hardness 2.3, Iron .016, Lead 0,
Colon Bacillus, absent.

Bacteria.—Perc. C. equals 73.

H. D. EVANS, *Chemist*.

Augusta, Maine, Jan. 20, 1908.

Auburn Water Commissioners,
Auburn, Maine.

GENTLEMEN:—I enclose the results of the analysis of
the sample of water from your public supply, sent to me
on the 13th instant.

The analysis shows the water to be in its usual first-
class condition, and differing from the results obtained
from the fall analysis in no particular. Both bacterially
and chemically it is a fine water.

Very truly yours,

H. D. EVANS, *Director*.

No. of patients committed to Insane Hospital,	10

MISCELLANEOUS.

Doors found unlocked after closing hours, (times)	80
Dangerous places found in streets reported to Street Department,	9
Dogs killed,	9

Fire alarm rung,	1
Goods found outside of stores after closing hours, (pieces)	45
Horses taken from streets and stabled (times)	5
Horses lost and strayed from owner found and re- turned (times)	12
Horses running away, caught by officers (times)	14
Lost children found and returned to parents,	22
Mad dogs shot,	6
Number of disturbances quieted,	10
Value of goods found outside of stores after closing hours,	\$101.49

Three seizures of intoxicating liquors have been made during the year. The amounts seized are as follows:

Beer and ale,	21 bottles.
Whiskey,	32 quarts.

There is due the city from the county the sum of \$190.61.

LAKE PATROL.

The work done at Lake Auburn during the year justifies the advisability of keeping a patrol there. All cottages have been inspected and those showing any unsanitary conditions have been changed. Many of the cottages now use water tight metal lined boxes in their closets and undoubtedly all will conform to this rule soon.

Fishermen use buckets invariably while fishing. All dead fish are gathered up and buried and picnic grounds are kept clean. The knowledge that an officer is on the lake grounds seems to have a very wholesome effect with all who visit the locality.

In closing my report, I wish to extend my thanks to His Honor, the Mayor, and to each member of the city government for their support in all matters brought to their attention.

Also to City Solicitor George C. Wing, Jr., Judge Harry Manser and Clerk A. E. Verrill, I desire to express my appreciation for courtesies shown at all times.

To the officers who by their faithfulness to duty have contributed so much to the successful work of the department, I give my thanks.

Respectfully submitted,

HARRY W. ROWE, *City Marshal.*

Auburn, Maine, March 1, 1908

REPORT OF
SUPERINTENDENT OF HACKS

*To the Honorable Mayor and Board of Aldermen of the
City of Auburn:*

GENTLEMEN—I herewith submit my report as Superintendent of Hacks for the year ending February 29th, 1908.

Number of hacks and public carriages licensed,	23	
I have received for same,		\$23 00
Fees of Superintendent and City Clerk,	\$11 50	
Balance paid City Treasurer,	11 50	
		<hr/>
		\$23 00

Respectfully submitted,

HARRY W. ROWE, *Supt. of Hacks.*

Auburn, Maine, March 1, 1908.

REPORT OF POLICE MATRON

To the Honorable Mayor and City Council of the City of Auburn:

GENTLEMEN—Having completed a year of my duties as Police Matron, I herewith respectfully submit a report of my stewardship.

The work being new to me it necessarily took some time to get such a comprehensive grasp of its various phases as to enable me to accomplish some of the tasks with the greatest facility and effectiveness.

The general business depression has added to the burdens of many poor families, rendering it impossible for some to procure steady employment who were willing to perform most any kind of honorable work.

A comparatively mild winter has been a blessing in alleviating the needs of the less fortunate in our city.

It has been our aim where practicable to procure work for the needy, thus rendering public or private charity unnecessary, thereby promoting independence and self-respect by aiding all to be self-supporting.

We have helped many women in getting places in good families and others in getting washings, and work by the day or hour.

It has been our endeavor to keep in touch with the unfortunate and needy and to render such assistance as seemed most appropriate in each individual case.

We have made special effort to relieve distress and need due to accident or sickness where temporary help would bridge the party or the family over a hard place, thereby obviating the necessity of calling upon the city.

It has not been our ambition to see how much we could distribute in the way of gifts, but rather to put out clothing, food and other articles only where actually needed.

We feel that the most satisfactory and fruitful charity is help which carries encouragement to the down-hearted, and, by quickening the hope, inspires and revivifies the recipient to continued or increased effort.

There was considerable sickness in the winter with diphtheria and grip the most prevalent and troublesome diseases.

We have made 800 official calls during the year, to minister to needs of the unfortunate, besides which hundreds of calls have been made at our home where we could often better supply the needs from a large assortment of clothing and other useful articles constantly on hand, which were largely contributed by the kindness of those philanthropically disposed. The telephone has also been a material aid in the transaction of business.

We have given out 2000 articles of wearing apparel during the year.

A Thanksgiving dinner was furnished by the Auburn W. C. T. U. for all poor families not otherwise provided for.

Through the kindness of secret orders, churches societies, and missions, much food has been supplied families at times when such help has relieved want or kept the parties from calling upon the city for help. Much relief could be given and much good done if churches and all societies having suppers or dinners would notify me when they have a surplus of food.

Through the generosity of the police force, we sent two five-pound boxes of candy to the city farm at Thanksgiving time.

We wish to thank the people for their generous contributions for Christmas, and to the W. C. T. U. for \$15 in money, which with other monies given, amounted to \$31.25, also the Benevolent Society of East Auburn, for \$5.00 and a large bundle of new articles, of clothing, toys, books and games.

In addition to the numerous local contributions by the churches, individuals and societies, many boxes, bundles and articles were received from adjoining and other towns, among them: Lisbon, Mechanic Falls, Byron, Livermore Falls, and a crate of oranges given by a friend in North

Jay. Through the courtesy of Jonas Edwards the use of Mechanics' Row Mission hall was given in which to have the Christmas trees and four well-laden trees supplied about 100 children with many useful articles as well as toys and games, and many little ones were made to partake of the season's good cheer who otherwise would have been deprived of this well nigh universal pleasure. We wish to express our thanks to the teachers and children of Pine street, Washburn and Merrill schools for their thoughtfulness and help as well as the High Street Congregational Sunday school, also the gentleman who left \$5.00 at the police station for my work, and all who have so cheerfully and generously remembered the less fortunate during the holidays and throughout the year.

We cannot pass without emphasizing our gratitude to the children who have been thoughtful of the needs of others and who have unselfishly given what they could to lighten some burden and carry a ray of sunshine into some sad and needy home. At Thanksgiving time the Pine street school contributed jelly, fruit, vegetables and also furnished a tree and many gifts for Christmas.

We wish especially to thank the Auburn W. C. T. U. for its assistance and co-operation which has been ever available and manifest in the most substantial manner. A furnished room is maintained through the benevolence of this society for women and girls who need a temporary home or until work can be found. This has furnished a most benign refuge to many and been a material aid to me in many instances. Moreover the department to supply homes for homeless children, of this society, has been a most valuable aid in my work and through its co-operation homes have been found and relief afforded to those who otherwise might have become town charges.

While I do not purpose to review all instances where such aid has been most timely and effective, I give the following illustration:

At the beginning of my work five little girls were sent here from Portland for whom temporary homes had to be found as their father was at that time out of work and unable to pay their board. The W. C. T. U. paid the board

of two of them for two weeks, after which temporary homes were found for four of them at no expense. The father paying the board of the other one. At present three of the children are in good homes and the father is paying the board of the other two. Through the aid of the superintendent of the department of homes for homeless children of the W. C. T. U., two infants, one abandoned, the other unfortunate, have been legally adopted by nice families.

We feel that Mr. F. B. Elliott deserves special mention for his services which have frequently and cheerfully been given, with his team, in collecting and distributing bundles and food.

I again wish to express my appreciation for the many courtesies extended, and to thank all who have contributed or in any way assisted me in my work.

Respectfully submitted,

SUSIE E. ROGERS, *Police Matron*

March 1, 1908.

REPORT OF BOARD OF PUBLIC WORKS

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN:—The Board of Public Works herewith submits its fifth annual report for the year ending February 29, 1908.

The appropriations for this department were:

Highways,	\$22,500 00
Sidewalks,	1,500 00
Bridges,	2,500 00
Sewers, Goff Hill,	3,000 00
Sewers, Park Hill,	2,500 00
Iron pipe and culverts,	1,000 00
Fencing,	1,500 00
	—————\$ 34,500 00
Receipts from sewer and sidewalk assessments, and other sources,	\$ 2,854 50
	—————
	\$ 37,354 50
Total expenditures,	37,317 04
	—————
Balance unexpended,	\$ 37 46

The Board would have been pleased to have expended the several appropriations for the purposes indicated, but transfers became necessary owing to unforeseen conditions arising.

A new and larger outlet to the Court Street sewer seemed the only remedy for the long suffering of the abutters, whose cellars had been flooded for years; the Board has constructed this outlet by laying a 36 inch pipe from Main Street to the River, and believes it has permanently relieved the inadequacy of this part of our sewerage sys-

tem. The expense was \$2,113 98, for which there was no appropriation made.

A sewer on Second Street became necessary owing to the cutting off of a tenement house that had been entering Mill Street sewer through other parties; this was constructed at an expense of \$653.00, for which there was no appropriation. These expenses had to be met by transfers from other appropriations.

The investigation of bridges has been gone into very thoroughly during the year, an expert has inspected and reported the condition of all our iron bridges, with recommendations for their repair and maintenance; each bridge in the city having a six foot span has been examined and a record made of its condition and construction, and an estimate made of the cost of caring for all the bridges in the city, based on the above recommendations and cost during the past four years. It is the opinion of the Board that the bridges can only be kept up by an annual appropriation and expenditure of \$3,000.

The Board has substituted iron pipe for wooden box culverts in many places and believes it is a step toward permanence and economy.

The Board believes it got good results from placing a feeder and stable hand at the city stables. The repairs to the tools, carts and apparatus is quite an item, and this man we have has made nearly all of these repairs. The Board has adopted a system of requiring duplicate bills of all purchases made and filing them for reference and accuracy, this is in line with modern business methods, and is proving of value.

The utmost economy has been observed by the Board during the year; all purchases, where possible, having been made under the competitive basis, and although we wind up the affairs of the year with a balance, it is so small that nothing could be expected in the way of permanent roads with what money was given us.

The Board realizes that we have the material for good macadam roads in the rock and stones that abound in our city, but it requires money to break and crush them. Could a supply once be gotten sufficient for a season's work and

an equal amount crushed each year, results could soon be shown.

We trust the next City Council will find it possible to provide sufficient money for this purpose.

The Superintendent of Streets and Sewers' able report which we herewith append as a part of our report, shows a detailed account of the expenditures and work done during the year.

We again renew our suggestion made in former reports that a suitable lot should be purchased on which to build a stable large enough to meet the needs of the department.

Respectfully submitted,

JOHN R. WEBBER,

W. R. DILL,

C. L. TURGEON,

P. P. PULSIFER,

J. W. WHITE,

A. WALTON,

Board of Public Works.

REPORT OF
SUPERINTENDENT STREETS AND SEWERS

To the Board of Public Works of the City of Auburn:

GENTLEMEN:—I herewith submit my report as Superintendent of Streets and Sewers for the year ending February 29, A. D., 1908.

Sewer pipe on hand,	325 00
	<hr/>
	\$11,334 00

Following is some of the work that needs to be done early the coming season:

There should be a lot of land bought or rented and sheds built in which to store carts, sleds and other tools. It is surprising how fast sleds and carts rot out that are not kept under cover when not in use.

The sewer in Granite Street should be completed.

The sewer in Newbury Street should be extended to Laurel Avenue.

There should be a change made in the sewer in Mill Street from Broad to Pulsifer Street.

The culvert on Minot Road, at Indian Dump, should be lengthened out to line of road and filled to grade.

A new culvert should be built near J. H. Blanchard's, also one on Center Street, near Z. T. Newell's.

The following bridges will have to be built over this year:

One on Merrill Hill road, near the Charles Stevens place; one at Stevens Mills, near the cemetery; one at North Auburn; one at Soper's Mill; one at W. H. H. Goding's; and one on Turkey Lane Road.

There should be some blasting on the ledge in the North

River Road, near Googin dam, as the road is very narrow and dangerous at this place. The stable on Troy Street will have to have all new floors laid. I would also suggest that some carpenter tools and lumber be bought so the stable man can repair carts, sleds and other tools which will make quite a saving to the department during the year.

Respectfully submitted,

FRANK F. GOSS,

Superintendent of Streets and Sewers.

REPORT OF OVERSEERS OF POOR

To the Honorable City Council of the City of Auburn:

The Overseers of the Poor have the honor to submit the following report for the year ending Feb. 29, 1908:—

The amount appropriated by the city council	
for support of poor and insane,	\$4,000 00
Total receipts from city farm,	2,235 25
Total receipts from outside sources,	1,512 66
	\$7,747 91
Cost of maintaining the poor and insane,	\$7,962 23
Amount overdrawn,	214 32
Total expenditure for City Farm,	\$4,316 32
The net cost of maintaining the same,	2,081 07
Total expenditures outside City Farm,	\$3,645 91
Net cost of insane,	1,359 24
Net cost of families assisted,	774 01

There are now due the department the following amounts:—

City of Lewiston,	\$ 51 40
Town of Winslow,	106 00
State of Maine,	92 26
Town of Unity,	13 50
Town of Mechanic Falls,	42 25
Catherine Collins,	52 74
	\$358 15

These bills were contracted late in the year and could not be collected so as to render in this report, could they have been collected it would have left a balance in favor of the department of \$143.83.

There are now sixteen inmates of the City Farm, five

deaths having occurred during the year. Average of inmates seventeen.

The water system at the City Farm has been very much improved, new conductors and gutters have been placed on the buildings, a new manure spreader, horse hoe and farmer's boiler has been purchased.

The following is a detailed statement of the stock and other property now on the farm:—

14 Cows,	1 Bull,
40 Shoats,	2 Horses,
8 Brood Sows,	16 Pigs,
65 Hens,	200 bu. Potatoes
25 bu. Vegetables,	10 bu. Beans,
1 bbl. Flour,	5 bu. Red Kidney Beans,
$\frac{3}{4}$ bbl. Salt Pork,	15 bbls. Apples,
30 gals. Molasses,	6 bbls. Vinegar,
150 Cans of Corn,	50 lbs. Dried Apples,
1 bbl. Crackers,	40 Cords of Wood,
4 Tons of Coal,	20 Tons of Hay,
4 Tons of Straw,	40 Tons of Ice,
100 bus. of Oats.	

The added expense of the department outside is due to the increase in cost of maintaining our insane at Augusta and an unusual amount of sickness in the form of diphtheria among poor families.

The added expense at the City Farm is more than taken care of in the additional number and value of hogs.

Mr. Henry Irish and wife, superintendent and matron, at the City Farm have given satisfaction.

The Board of Overseers would recommend procuring them for another year.

JOHN R. WEBBER,
HARRY E. BUMPUS,
A. A. ROWELL,
H. F. WHITEHOUSE,
WARREN MCFADDEN,
P. E. PROVOST,
Overseers of Poor

J. M. STEVENS, *Clerk.*
Auburn, Maine, March 14, 1908.

REPORT OF MILK INSPECTOR

*To the Honorable Mayor and Board of Aldermen of the
City of Auburn:*

GENTLEMEN:—I herewith submit my annual report as Milk Inspector for the year ending March 31, 1908.

No. of licenses issued to milk dealers,	67
No. of dealers delivering milk,	57
No. of stores selling milk,	10
No. of samples of milk tested,	162
No. of barns inspected,	50
No. of places where milk is stored inspected,	36
No. cows examined physically,	573
No. of cows examined for tuberculosis with the tuberculin test,	84
No. of cows found diseased with tuberculosis,	22
No. of cows owned by milk dealers,	673
No. of quarts of milk sold daily,	7,632

The condition of the cows, places where they are kept, how they are kept and the care of the milk articles are the most important part of dairy and milk inspection.

The rapid progress in which tuberculosis is advancing in cattle and the human family makes it very important that something should be done to check it in some way, as it can easily be transmitted from cattle to man by eating tubercular meat and more especially drinking the milk from tubercular cows.

It is very hard to come to any accurate estimate of the number of cows which produce the milk to the City of Auburn, as there are more dealers who sell milk which they buy than those that produce and sell their own. For instance, the Turner Centre Creamery sell about 1,000 quarts a day, and do not own a cow. But there must be about 1,200 cows which produce the milk for the city and

probably not one quarter of that number has received a physical examination by a reliable veterinarian, and not one per cent. have received the tuberculin test which is the only way to tell if they have tuberculosis or not, which is the most dreaded disease in the world today. It is impossible to detect the disease upon physical examination only in advanced stages and cows will have it bad enough to disease the milk which look and appear perfectly healthy.

The Portland Board of Health passed a law two years ago which required all cows which produced milk to the City of Portland to be subjected to the tuberculin test at least once a year. The first year they were tested there were about 15 per cent. diseased and last year they only found about 3 per cent., which shows they are getting a cleaner milk supply than they were. As far as physical examination goes nearly all the cows I have inspected this year are good healthy looking animals and in good condition and clean. Most of them are brushed down before milking and the flanks and udders wiped or washed off. In a few instances I have seen them milk without wiping or washing, but I told them not to do so and they have always complied with my request. Once in a while I find the cows dirty and the barn with a disagreeable odor. In such cases it is impossible to milk without getting dirt in the pail or being scented by the barn.

The barns as a whole are very fair and I think will compare very favorable with any in the State, and our State Inspector says our barns are as good as any in the Union. Of course there are some which are old, low posted, close, ill-ventilated and impossible to keep sanitary. I have seen barns with so many cows in it that there was not room to go between or behind them and not air space enough for one quarter of the number. But the owner intends to build a new and larger barn as soon as he can. Then again I have found farmers who do not do as well as they might but after instructing them how they ought to do it they have invariably done better. But it will be a long while before the old barns will be torn down and new ones built in their places and to have everything sanitary as the United States Dept. of Agriculture

would like to have; but since I have been inspector I can see a change for the better, both in the sanitary conditions of the barns and the health and care of the cows. I do not think there is a milk dealer in the city who would sell one drop of milk from a tubercular cow if he knew it, but it is some expense to find out and they do not care to spend the money, for they do not get very rich at the prices hay and grain are now. There are a few barns which are almost perfect as far as sanitary conditions. In the greater number of barns the manure is thrown through scuttles into the cellars, although some have sheds they put it in and keep it away from the cows, which is much better for then there is no odor enters the tie-up and scent the milk.

The milk rooms are in different places about the buildings but none are close enough to the tie-ups to get the odor from the cows. Most of the milk rooms are in sheds connected with the houses. Some are in corners of the barns, away from the cows; some in back rooms in the houses and a few have milk rooms by themselves. In nearly all cases the milk is poured into 8 quart cans and cooled in metal lined tanks or tubs with covers to prevent the introduction of dust or dirt into the cans or water. All are supplied with ice to cool the milk properly.

All cans and milk utensils which are used in the handling of milk which I have inspected are always washed and scalded in a satisfactory and sanitary manner; but all farmers are not supplied yet with steam washers and blowers for this purpose and have to do it by hand.

All my inspection of cow barns, milk rooms, utensils, etc., have been done when I have been out in the country making professional calls and have stopped in and looked the stock, etc. over, as I could not afford to take the time to do it for the salary paid the inspector.

Nearly all the places where milk is stored is in the refrigerators from stores and are all clean and sanitary. Only once in a while there may be something in the refrigerators to scent the milk to some extent.

All the cows which I have tested with the tuberculin test for the milk men were at their request, as I have no authority to do otherwise. They suspected they had some

diseased animals and wanted to find out. When I found any diseased I notified the State Board of Cattle Commissioners and they came and appraised and killed them and disinfected the barns.

The samples of milk I have tested have all been of a fair quality. Some milk men have certain breeds of cows which do not give so rich a milk as others which accounts for one dealer having richer milk than another. I have had some little trouble with adulterations, although not a great deal. When I have found any I have notified them that it must be stopped and the next time I have taken a sample I have invariably found it all right.

GEO. R. INGLIS, *Milk Inspector.*

REPORT OF CITY PHYSICIAN

*To the Honorable Mayor and Board of Aldermen of the
City of Auburn:*

GENTLEMEN:—I herewith submit to you the annual report of the City Physician for the year ending March 16, 1908.

The indigent who have received medical treatment from the City Physician are as follows:

Those living at the City Farm:

Dorcas Witham, nephritis.

Mary J. Hoxie, intestinal toxaemia.

John Spaulding, neurasthenia.

Ernest Bragg, ulcerated tooth.

Anna Johnson, ulcer of foot.

Cyrus Jordan, chronic myelitis.

Benj. Caswell, fatty degeneration of heart.

Joseph H. Merrill, cardiac asthma.

Ellura Skelton, apoplexy.

Kate Regan, acute mania.

Clara Ellis, gastric catarrh.

Those living away from the farm:

Thos. Taylor, appendicitis.

Mrs. Susan Carey, septic hand.

Mrs. Toomey, gastric catarrh.

Baby Toomey, bronchitis.

Baby King, eczema.

Mary E. Jackson, apoplexy.

Jennie Fisher, tonsilitis.

Mrs. Geo. Maloon, bronchitis.

Napoleon Dussault, bronchitis.

Firman Dussault, chronic eczema.

Miranci Dussault, bronchitis.

Samuel Clark, epididymitis.

R. Shereskewsky, influenza.
 A. A. Hines, acute mania.
 Mathlaine Hammond, diphtheria.
 Linwood Haines, diphtheria.
 Johnie Degerdin, ulcer on leg.
 Chas. E. Patten, diphtheria.
 Arthur C. Patten, diphtheria.
 Chas. H. Robinson, diphtheria.
 Amber G. Robinson, diphtheria.
 Archie G. Robinson, diphtheria.
 Ernest Woodsum, diphtheria.
 Frank Campbell, diphtheria.
 Myrtle Mathews, diphtheria.

The following deaths have occurred:

Benj. Caswell, June 13, 1907, degeneration of heart.
 Cyrus H. Jordan, Sept. 6, 1907, chronic myelitis.
 Joseph H. Merrill, Sept. 23, 1907, cardiac asthma.
 Ellura Skelton, Oct. 11, 1907, apoplexy.
 Clara M. Hammond, Jan. 15, 1908.

The following have been committed to the Insane Asylum at Augusta:

Mary Fahey.
 Sarah Greenhalgh.
 Harlan P. Staples.
 Kate Regan.
 Joseph Ouelette was examined but not committed.

The sick at the farm have received kind and efficient treatment and careful nursing from Mr. and Mrs. Irish.

Respectfully submitted,

RALPH M. PARKER, M. D., *City Physician.*

REPORT OF
LIBRARIAN OF AUBURN PUBLIC LIBRARY

To the City Council of the City of Auburn:

The Librarian of Auburn Public Library herewith submits her 17th annual report, March 1, 1907-March 1, 1908.

No. of volumes recorded in the accession book Mar. 1, 1907,	14,387
No. of volumes added during the year,	1,005
No. of volumes lost during the year, 10	
No. of volumes worn out, 106	
No. of volumes removed for other reasons, 13	
<hr style="width: 10%;"/>	
Total No. of volumes removed during year, 129	
Net gain for the year, 876	
Total No. of volumes to date,	15,392
Total No. of volumes lost, worn out, or other- wise removed since the library was founded,	1,251
Total No. of volumes at present belonging to the library,	14,141
No. of pamphlets added during the year,	253
Total No. of pamphlets,	1,369
No. of journals and periodicals regularly re- ceived,	45
No. of days the library has been open,	297
No of days the library has been closed,	
Holidays,	8
For varnishing floor,	9
<hr style="width: 10%;"/>	
No. of borrowers' cards issued during the year,	621
No. of borrowers' cards issued since Aug. 8, 1904,	3,902

No. of borrowers who have used their cards during the year,		2,600
No. of postal cards sent for overdue books,		530
No. of books charged,		46,806
Monthly average,	3,900	
Largest month, February,	4,805	
Daily average,	158	
Daily average for February,	200	
Largest day, April 6,	354	

Juvenile books (13,611) 29 per cent. of whole circulation.

Adult fiction (27,746) 59 per cent. of whole circulation.

Non-fiction, juvenile and adult, 17.4 per cent. of whole circulation.

No. of books in actual circulation Mar. 1, 1907,	1,151
No. of books in actual circulation Mar. 1, 1908,	1,342
Non-fiction in actual circulation Mar. 1, 1908,	23.1 per cent.

No. of visitors to the library,		51,318
Monthly average,	4,276	
Largest month, January,	5,185	
Daily average,	170	
Daily average for February,	214	
Largest days, Apr. 6, Jan. 11 and 25,	370	

The figures show an increase of 1,800 volumes in the circulation over that of last year. There was some decrease in the early part of the year, but it was more than made up later. Beginning with November, the increase has been very marked, the figures showing a much larger monthly average than we have ever had before. The circulation has never, before February, sustained a daily average of 200 volumes for a whole month. There are no very large daily charges, but the work is well distributed. For the last five months, but four days show that fewer than 100 volumes were charged, the lowest number being 77. The books in actual circulation on March first of this year were nearly 200 more than have been recorded on any previous date. This record is made on the first day of every month.

Each year the use of the different classes of books changes somewhat, according to the prevailing interest. This year there has been a marked increase in the reading of history and books of travel. The children have also selected more books of the non-fiction varieties than they have been accustomed to do. The books of all classes that are placed upon the open shelves are looked over with much interest, and nearly all of them are selected for home reading. Admission to the stacks, with the exception of those shelves holding the fiction and juvenile books, is permitted upon request, as has always been the custom.

The fiction charges, 27,746 volumes, would seem to show that we are furnishing a reasonable amount of this class of reading. And yet, there are still a few people who do not realize the insistant demands for the other classes of books which must receive attention. For two reasons, the non-fiction percentage of the total circulation does not adequately show the demand for these books. In the first place, many of them are used chiefly in the library building, and of this use no record is kept. This is as true for the books that may be taken home as it is for the purely reference books. Again, when books of this kind are taken from the library, they are usually kept the full limit of time allowed, while a book of fiction is seldom retained more than a few days, often not more than one. For this reason the use of fiction seems to be disproportionately large. Except in the summer months, it is usual for the non-fiction classes to represent from 20 to 25 per cent. of all the books that may be out in circulation at a given time.

The library, as a quiet place for reading and study, is more fully appreciated each year, and its serious use for these purposes is seen to be constantly increasing. Its location makes it a convenient place, during the noon hour, for those who are employed in the nearby shops, and for those pupils at the Webster school who live so far away that they cannot go home at noon. The school pupils, of all but the lowest grades, make large use of the library for voluntary as well as required supplementary work.

The 2,600 different people who have taken books from

the library for home use represent 20 per cent. of the entire population of the city. When we consider that each adult may, and often does, take two books at a time; when we know that these books are usually read by more than one person before they are returned, and are frequently at least looked over by the whole family; also, when we take into account the numbers of people who come to the library for reading and study but whose names do not appear on our lists at all, we may feel sure that the influence of our books must reach fully half of the town's people.

As usual, the selection of books has been made with regard to the most urgent needs of the readers, and with continued attention to keeping our collection well rounded for all uses. Some noteworthy purchases, to mention but few, are a set of Ibsen, an additional set of the "Nature Library" for circulation, many additional volumes of the "International Library of Technology," and about fifty volumes in the French language.

The library has always been fortunate in its friends, and it is no less so this year than heretofore. Seventy-five different names appear on our list of donors, in most cases the gifts being periodicals, books, newspapers and pamphlets. The Lincoln Memorial Tablet presented in February by Alfred King of Arlington, N. J., together with the Auburn members of Co. K. of the 17th Maine Regiment of Volunteers, is indeed a valuable addition to our permanent decorations.

As usual, the librarian has made it a point to visit the other libraries when possible, and she also attended the meeting of the State Library Association at Portland. Many librarians and library trustees also come to see us. We have had perhaps more than the usual number of letters of inquiry, some of them from outside the State, and even from outside New England. From the first, ours has been considered a typical and progressive library for a small city, and its methods and results are watched with interest.

We recorded in the report of last year the special attention given to various activities such as the acquisition and

arrangement of pictures the making and display of picture bulletins, the keeping of clipping files, the adoption of a new system of arrangement of pamphlets, the checking of bibliographical lists, and several other additions and improvements in our service to the public. All of these things have continued to receive attention, and others have been added, of which I will mention two only. We are so fortunate as to own as nearly complete sets as can be obtained of the publication of the U. S. Geological Survey and of the Forest service. In order to make available the large amount of valuable material which these publications contain, the hundreds of cards, printed by the Library of Congress for this purpose, have been purchased, the subject headings have been supplied, and the cards arranged for ready reference. We also have a large collection of the publications of the State of Maine with many books about the state of both a general and local nature. Our original arrangement of these books having proved inadequate, we have devised and effected an entirely new classification for shelving them. This includes nine distinct departments with the books arranged alphabetically in each. The sets of State reports have been filled so far as may be for the present. The greatly increased ease with which these books are consulted, has already justified the time spent upon them. It is the intention to prepare an exhaustive catalog, the beginning of which has been made.

Early in the year, Miss, Wiggin felt obliged to resign her position as assistant. The resignation was accepted with regret as her term of service and consequent familiarity with the work had made her very efficient. Fortunately we have been able to retain Miss Spooner, who is a very effective and capable assistant, doing her work with ease and rapidity. Since September, Miss Helen Percival has been employed for four hours during the busiest part of each day. Miss Percival's work has been entirely at the desk where the visitors have found her very agreeable and obliging.

A report, at best, can show but ineffectively the work of such an institution as a library. Our best results we

may never know. Much that we see cannot record. We can but serve each individual as best we may. But the contribution of a library is not alone by direct action upon the individual. If the individual receives benefit, he cannot fail to become a better citizen and a more efficient worker, whatever his occupation and wherever he may be.

Respectfully submitted,

ANNIE PRESCOTT, *Librarian.*

Auburn, Maine, March 16th, 1908.

REPORT OF
TREASURER OF PUBLIC LIBRARY

To the City Council of the City of Auburn:

The undersigned, treasurer of the Auburn Public Library, herewith submits his report of the receipts and disbursements on account of the library for the year ending February 29, 1908.

RECEIPTS.

In the total expenses for the purchase of books, \$526.23, the sum of \$92.12 is included, expended for replacing worn out books.

The invested funds of the library consist of two bonds of five hundred dollars each, issued by the Lewiston & Auburn Electric Light Company, 6s, and one five hundred dollar bond of the Fond du Lac Water Company, 5s.

JOHN A. MORRILL.

Auburn, Maine, March 11, 1908.

To the City Council of the City of Auburn:

The undersigned respectfully reports that he has examined the books of the treasurer of the Auburn Public Library for the year ending February 29, 1908; that he finds the accounts of said treasurer to be properly kept, and his disbursements supported by proper vouchers, and that the funds of the association in the hands of the treasurer, Feb. 29, 1908, are as follows:

Cash in hands of librarian, Feb. 29, 1908,	\$ 70
Balance in National Shoe & Leather Bank,	326 55
	<hr/>
	\$327 25

That the invested funds of the library consist of two bonds of five hundred dollars each, issued by the Lewiston & Auburn Electric Light Company, 6s, and one five hundred dollar bond of the Fond du Lac Water Company, 5s.

Respectfully submitted,

MURRAY B. WATSON, Auditor.

Auburn, Maine, March 11, 1908. —

REPORT OF
SUPERINTENDING SCHOOL COMMITTEE

Auburn, Maine, Feb. 5th, 1908.

To the Inhabitants of the City of Auburn:—

We hereby make our annual report of the schools of this city and incorporate therein the reports of the Superintendent of Schools, special instructors and statistics relating to the school finance and attendance which we believe will be of a general interest to the public.

Last spring the Board was very sorry to receive the declination of Mr. Payson Smith to accept a re-election as Supt. of Schools of this city. After a careful canvass of the available candidates for the place (numbering between 30 and 40) we selected Mr. Henry H. Randall of Rockland, Maine, to fill the vacancy caused by Mr. Smith's appointment to the position of State Superintendent of Schools, and we felt that the city is to be congratulated in the way Mr. Randall is taking hold of his work.

The report of the Superintendent of Schools contains many definite suggestions and recommendations and we urge a careful reading thereof.

Most of the rural school buildings are now in fair condition and will not need any important repairs this year. The city school buildings are in fair condition excepting the Webster Grammar School and will not require any extensive repairs. The Washburn School should be painted. The Webster Grammar School must be carefully looked to, especially the conditions existing in the basement and the corridor floors. These matters should be at once taken up before the incoming Board and City Government and definite contracts should be made in May or by the first day of June so that the workmen may commence work there the Monday after school closes in June.

In the High School we were confronted with the neces-

sity of a change in principals of that school, and the same has been made with good results. This same step necessitated the purchase of physical and chemical apparatus for the school. For many years past the city has hired the apparatus used of Prof. Moody at the rate of \$100 per year. The same has been purchased or so much thereof as was deemed necessary by your Board for the sum of \$600, one-half paid January 1st, 1908, the balance to draw interest from that date until paid. The increased number taking the Commercial Course in the High School necessitated the hiring of additional teachers at the cost of \$350, which mainly explains the overdraw in the High School accounts.

We note with pleasure that the Board of Fire Engineers have taken the necessary steps to compel the City Government to equip the High School properly with the necessary fire escapes, in accordance with the recommendation of this Board to the City Council some time ago and which it turned down. We further note that the escape has been completed.

Last year we recommended to the City Government very strongly the making of an appropriation for the introduction of Manual Training and no appropriation was made. We now renew that recommendation and urge that the City Council make a sufficient appropriation for the installation of a suitable course in Manual Training for the boys and sewing and cooking for the girls. Practically all cities the size of Auburn have Manual Training in their schools, and Auburn must have it soon or the standard of our schools will drop from head of the list into the second rate schools. The annual cost will not be far from \$2,500. We feel that this amount invested in our girls and boys will never be regretted by our thoughtful citizens. \$2,000 will probably be enough to run it for the first year as it is believed that the initial cost will not be very heavy, after suitable rooms are obtained. Of course, we do not include rent of rooms in estimate, but do include equipment of rooms.

We have adopted a gradual increase of salary for the teachers in our graded and rural schools which will go into full force the coming year and will, we believe, give our teachers a fair compensation for their services. In the

past we have lost many good teachers on this ground, which we may now reasonably expect to retain.

We wish to call the attention of the parents to the fact that many of the scholars from the first grade in the Primary School to seniors in the High School come to the buildings in the morning tired and sleepy. In this age of pleasure too long evenings, not too many, are spent by the children in the quest of enjoyment and not enough time in study. We urge upon the parents the careful consideration of the above suggestion if they wish their children to make the most out of their chances in the public schools.

We recommend to the incoming Board that early in the year they consider the question of restricting or doing away with the annual drama given by the graduating class in the High School to raise money to defray graduating expenses. The time used in the preparation for that drama is needed in the school work, and the time can be profitably spent in other school activities.

We wish to express our appreciation of the good work done by our teachers and the hearty and practically unanimous support given them and the Board by the citizens of our city.

REPORT OF
SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee:—

GENTLEMEN:—I have the honor of submitting for your consideration my first annual report, the same being the twenty-seventh of the Auburn school reports of the City of Auburn.

Since beginning my duties in July my time in a large measure has been consumed in getting in touch with the many and varied interests of your schools.

One of the most gratifying features of my work has been the cordial welcome given me by the teachers. As a body I find them loyal and conscientious. The spirit with which criticisms and suggestions have been received and acted upon deserve hearty commendation. I would add also that the prevailing sentiment manifested on the part of all more directly interested in the work of the schools and for which I feel that in a large measure my predecessor, Hon. Payson Smith, is responsible, is all that could be desired. I take this opportunity of expressing my appreciation of the suggestion and helpful advice given me by Mr. Smith.

THE HIGH SCHOOL

The progress and tone of the work of our High School under the management of Prin. R. J. Sisk is gratifying.

Investigation shows that a majority of the pupils are not giving sufficient time to preparation of their work. Primarily the school is maintained for the benefit of those who are able and wish to profit by what it has to offer. Prevailing conditions are such, however, that with a large percentage of pupils the demands of the college and counting room determine in a large measure the fitness for grad-

uation. In order that the average pupil may meet these requirements, pursue a course with credit, and thereby derive the greatest benefit, he should give not less than three hours daily to home study. The school is a place of business and, if the work be done satisfactorily, time must be given it.

Before the beginning of another school year several changes should be made in the course of study. The work in English especially should be extended and modified and more time should be given to mathematics. The course of the Commercial Department should also receive careful consideration.

A large number of reference books are needed for use in the school and provision should be made for a more suitable and better equipped laboratory, office fixtures, etc. For a more detailed recommendation as to the immediate needs of the schools I refer you to the following extract from the report of Prin. Sisk:

THE CREDIT SYSTEM

I recommend for the consideration of the Board, the system of graduation by points or credits, now so commonly used in the best schools. This is really a promotion by subjects, and would enable pupils to work at a pace suited to their abilities. It would allow a pupil credit for a course once passed and in a measure do away with the discouragement, and lack of interest so common in pupils who fail to attain promotion. It would enable a pupil, whose health or other condition made the strain of High School work too great, an opportunity to take fewer subjects and graduate in five years. It would allow others a chance to complete in less time according to their abilities, but no pupil could complete the course in less than four years.

Instead of taking six subjects, some of which come but twice a week, I believe better results would follow a course involving four studies at the same time, each of which come every day.

COMMERCIAL

The rapid increase in the commercial course has made necessary the employment of an extra teacher. We have two points to guard in this course. First, that pupils may not undervalue it, and elect it as an easy course, a last resort, or a short cut to earning a weekly wage. Second, that we may not fail to check our work by tests of actual ability, and so turn out pupils stamped with the seal of our approval, who may be found inefficient when employed by business men. I advise a change in course so that we may have more time for Commercial Geography, penmanship, business practice and correspondence.

ATHLETICS

I prefer to say little on this subject now. I believe heartily in school athletics, under rigid supervision with respect to professionalism, finances, and good standing in school work. All accounts should be audited by a committee containing at least one practical business man not connected with the schools; and all reports, receipts and expenditures made public. The Athletic Association is at present in debt to the extent of about \$300, and not only is rigid economy necessary, but something must be done to clear the debt. "If you can't pay, don't go," is a maxim still worth following.

SOCIAL FUNCTIONS

We have, beyond a doubt, more of these than are good for our boys and girls. They make serious inroads on the time of the pupil, and have a still greater effect on his attitude toward school work. I find that the time required to prepare for the drama given by the seniors has been so much as to interfere with the work of those in the cast. Many people and parents have an idea that all dances or events attended by High School pupils are sanctioned and supervised by the teachers. This is not true. We cannot attend all parties, even all to which we are invited. I believe every school party held at any place except a pri-

vate residence, should be under the direction of at least two parents and two teachers. There should be an understanding with these on the part of the pupils and the principal before such party takes place.

TARDINESS

We have had over 400 cases of tardiness during the first term of this year. Subsequent records have been as bad. I have tried to reduce the number of cases of tardiness but have met with indifferent success. I feel that indifference on the part of many parents has worked against better results. I earnestly ask parents to see to it that pupils get to school on time. This is one of the practical ways in which you can help us in our work. We need also greater assistance from the parents in the matter of home study. A parent complains that his boy does no studying and does not attend to his school work. He seems to expect us here by some wonderful means unknown to him, to compel his boy to stay at home afternoons and study his lessons. We do try to induce the pupil to do this. But parents must share the responsibility and insist that their children give us the necessary home study. That should be on an average of three hours per day. If parents can not control the conduct of their boys and girls, they are not justified in expecting us to control that conduct. They cannot shift the burden to our shoulders. We will bear a part of it, but not all.

I believe in hard work for boys and girls of High School age. Nothing can take its place. No new methods, no psychological process can replace this one vital educational necessity. I do not mean relentless slaughter of slowminded pupils. I do not mean merely driving on distasteful lessons. I regret every case where a pupil leaves school. But we cannot lower our standard to keep him. I have no hesitation in saying that a boy who is fooling away his time here, who does not attend to his studies and do his work, would better be at work in other fields. The idea that as long as a boy is in school he must, of course, be learning much, is not correct. We will try to make our

work worth while. We will spare no pains to make our subject and the value of it, clear to the pupil, but he must be willing to do some work himself, or he cannot even understand what we are explaining to him, and our best efforts will fail.

I wish to thank the teachers who have been especially loyal and faithful, the pupils, superintendent, School Board and citizens who have so kindly assisted me in taking up the work in a new position.

MANUAL TRAINING

Records for several years past show that Manual Training has been agitated each year. I wish most heartily to endorse all that has been said in favor of introducing the work into the schools. The advisability of establishing a course has not been questioned, the only objections being raised were lack of funds and need of suitable quarters. Could not one or more of the unoccupied rooms on the second floor of the Wilson building be utilized very nicely for that purpose, at least as temporary quarters. The objection to the location of the building could be overcome in the main by a well-arranged programme whereby a pupil might go directly from his home to the building, or return, as the case might be, or again the utilizing the recess periods in getting back and forth to his respective building.

A course such as recommended would include wood working for the boys of grades seven, eight and nine; sewing for the girls of grades seven and eight and cooking for the ninth grade girls and those of the high school who might wish to elect the subject. Instruction in sewing and a part of that in cooking would be given in the regular class rooms and during the periods when the boys would be absent for their work.

The cost of establishing and maintaining such a course would not exceed \$2,000 for the first year and for the subsequent years the amount would be considerably less.

If Auburn wishes to maintain her distinction as an educational centre it is imperative that manual training be included in the curriculum of her schools. Therefore, I

cannot recommend too earnestly that the matter receive due consideration and in the immediate future.

THE WEBSTER SCHOOL

Several rooms of the Webster building are poorly lighted. The upper floor in the corridor and many of the stair treads are worn through. Then, owing to the close proximity to the main line of the railroad, the location is very undesirable. At times the noise from passing trains is so great the teachers in a number of the rooms are obliged to suspend oral work. Again, the building is overcrowded and the indications are that the number of pupils will increase considerably in the course of the next few years. As regards location, the Chamberlain School is even more undesirable than the Webster. I wish to say at this point, however, that in the opinion of the Board of Health and of prominent physicians, the outbreak of diphtheria during the Fall Term in the Chamberlain School was not due to unsanitary conditions either in or around the building. Nevertheless, a lot adjoining a city dump and bound on another side by a railroad is not by any means a desirable location for a school building.

The Franklin building is also another old structure and should be abandoned for school purposes as soon as possible. Now the question arises as to what shall be done with these buildings. In answering I wish to endorse the suggestion covering the matter and made by Mr. Smith in his report of last year: That is, would it not be possible to dispose of these buildings and replace them with one large, modern and centrally located building with suitable quarters for Manual Training?

THE "NO SCHOOL" SIGNAL

The new regulation governing attendance on stormy days went into effect at the opening of the present year, but as the signal has been given only once, I am not in a position to pass judgment as to the feasibility of the plan. As the regulation is not understood by many of the parents, I wish to quote it here in full:

SIGNALS FOR CLOSING SCHOOL

On and after Sept. 1, 1907, the schools shall not be suspended on stormy days. In case of severe storms, the Superintendent of Schools may cause to be sounded signals as at present provided, such signals to indicate that for that day no record of attendance is to be kept, the attendance of pupils at school to be entirely optional with parents. Under this rule excuses for absence as a guarantee against truancy shall be required as for other days.

TEXTBOOKS

Several changes have been made in textbooks during the year. Newell's Experimental Chemistry has been adopted for use in the High School; Adams' Commercial Geography replaces the Physical Geography in the ninth grade; and the Scott-Southworth Language Book, Part I, has been adopted for use in grades IV-VII, inclusive.

MUSIC AND DRAWING

As there have been no radical changes during the year in the departments of music and drawing, I have followed the established custom of not calling for a report from the heads of these departments. Auburn is indeed fortunate in being able to retain the services of Mr. Mower and Miss Smith.

HIGH SCHOOL FUNDS

The High School Fund will be overdrawn approximately \$600. This is due in part to meeting a bill of \$300, in part payment for apparatus purchased of Mr. Moody. Then an additional teacher has been employed during the year and her salary to date amounts to \$190. Also owing to a ruling of our State Auditor, \$125 is due Auburn from the State. In order to provide for the balance of \$300 due Mr. Moody, the increase in salaries and approximately \$200 to be paid the present additional teacher for the balance of a full year, I would recommend that the High School appropriation be increased \$1000.

The changes in the teaching corps are shown in a table which is appended.

In closing I wish to express my appreciation of the confidence and support you have given me in the discharge of my duties as superintendent.

Respectfully submitted,

H. H. RANDALL.

REPORT OF BOARD OF HEALTH

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN:—The Board of Health respectfully submits its twenty-first annual report for the municipal year ending Feb. 29, 1908, and mortality statistics for the year ending Dec. 31, 1907.

ORGANIZATION

The Board consists of the following members: J. H. Chase, Dr. B. G. W. Cushman and Dr. D. A. Barrell. At the annual meeting held in May, 1907, J. H. Chase was chosen chairman and B. G. W. Cushman secretary and health officer. At the same meeting John J. Lawler was appointed inspector of plumbing for one year.

CONTAGIOUS DISEASES

Diphtheria, Scarlet Fever, Measles and Cerebro-spinal Meningitis have prevailed during the past year. A severe epidemic of measles had nearly ended as the year began, only one death occurred from this disease as compared with ten during the preceding year. But the death rate from contagious diseases has been higher than the the average in our community. Three deaths occurred from whooping cough, four from cerebro-spinal meningitis and six from diphtheria. A few cases of scarlet fever were reported. These were of a mild form and all recovered. A few scattered cases of typhoid have prevailed; but there have been no deaths from this disease. The total of deaths from the diseases mentioned was fourteen, a much higher rate than for several years, excepting the preceding year. Considerable anxiety was caused by the unusual prevalence of

diphtheria during the month of December, and the Board was obliged to close one school for a short time. This disease prevailed quite extensively in many communities throughout the State. It is usually communicated by direct contagion from one person to another; and most of the cases, which occurred in our city, could be traced from some mild neglected case of sore throat. The segregation of children in the schools and public places of amusement afford ample opportunity for spreading the disease in this way. A public charge that the epidemic was due to unsanitary conditions about the schoolhouses was investigated by this Board in conjunction with several local physicians and found to be untrue. No cases of small pox were reported during the year.

DISINFECTION

The formaldehyde permanganate process used for the last two or three years has been continued with good success during the present year. Disinfection has been made in all cases quarantined for contagious diseases, and for the few cases of tuberculosis reported to this Board. Thirty-two deaths, more than one-seventh of the total number, were caused by tuberculosis, which is more and more regarded as a preventable disease; yet not one-third of these was reported to this Board. Physicians, householders and citizens are asked by us to report these cases, so that proper means may be taken to prevent this terrible disease. What has been said in recent reports in regard to the improvement of our sewer system is again called to your attention.

Respectfully submitted,

J. H. CHASE,
B. G. W. CUSHMAN,
D. A. BARRELL,

Board of Health.

REPORT OF CITY SOLICITOR

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN:—In accordance with sec. 8 of chapt. 10 of the Charter and Revised Ordinances of the City of Auburn I herewith submit my report as City Solicitor for the year ending March 16, 1908.

There is but one suit pending in which the city is a party, namely the International Textbook Company vs. Inhabitants of the City of Auburn, No 611 on the equity docket of the Circuit Court of the United States for the District of Maine. The plaintiff in this suit seeks to enjoin the city by its officials from enforcing its ordinances prohibiting the passing of hand bills. The court on hearing on the motion for interlocutory injunction refused to grant the same in accordance with the prayer in the plaintiff's bill. The court's decision by Judge Putnam is reported in the 155 Fed. Rep. 986. The plaintiff now desires a trial on the merits. For this purpose the testimony in the cause is all taken out and the case will be in order for trial within a few months.

Whenever requested by the Judge of the Municipal Court and the City Marshal I have served the court as its prosecuting officer. I have advised from time to time the various city officers who have consulted me. I have attended hearings in the matter of the Danville Junction Road, so called, with the Mayor, and I have endeavored at all times to hold myself in readiness to serve the officials of the city in my capacity as Solicitor.

I have been the recipient of many courtesies and much consideration at the hands of the officers of the city for which I desire at this time to express my appreciation.

Respectfully submitted,

GEORGE C. WING, JR.

REPORT OF LIQUOR AGENT

*To the Honorable Mayor and City Council of the City of

REPORT OF CITY ELECTRICIAN

Auburn, Maine, March 23, 1908.

To the Honorable Mayor and City Council:

I herewith submit my report for the past year as Inspector of Wires.

I have inspected twenty-seven dwellings and ten factories for new wiring; also a few factories and dwellings where the rules called for a better class of wiring, and found the owners were willing to comply with the rules which shows a better tendency toward a better class of work in this line. I would especially recommend to your honorable body the great improvements the Lewiston & Auburn Electric Light Co. are making on the outside as well as the inside wiring under the careful supervision of Mr. Fred D. Gordon. The Lewiston, Augusta & Waterville Street Railway are also making improvements in their method of wiring under the supervision of Mr. Walter Parker, especially on the Mechanic Falls line, which seems all that can be desired.

There has been added to the city's industries the past year one hundred thirty-eight horse power in motors, and the equivalent of six hundred sixteen candle power lights in the factories, stores and dwellings of our city, which shows a healthy increase in this line of our industries.

There seems to be no intent on the part of any of the workmen of the several companies to evade any of the rules and regulations laid down for their guidance. They seem to vie with each other in doing the best work possible, which shows that there is no immediate danger of our fair city being consumed with that dangerous current called electricity.

Respectfully submitted,

JOHN J. HELLEN, *City Electrician.*

REPORT OF CHIEF ENGINEER

Auburn, March 1, 1908.

To the Board of Fire Commissioners of the City of Auburn:

GENTLEMEN:—I present the following as my report as Chief Engineer, of the condition of the Fire Department for the year ending March 1, 1908. The force of the department consists of 58 regular and 14 substitute men as follows:—

Chief engineer, four assistant engineers, twenty-five hose men, twelve ladder men, engineer, assistant engineer and fireman of steam fire engine, two permanent men at the Court Street station, one permanent man at the New Auburn station, five drivers of apparatus, five fire police and fourteen substitute hose and ladder men.

The number of fire alarms the department has responded to from Mar. 1, 1907, to February 29, 1908, were as follows:—

Bell or general alarms, 24; still or telephone calls, 109. There were also 20 small fires in the fire district where no alarm was given and 9 fires in the rural or outside section, making the total number for the entire city 162, against 133 for the previous year.

The date, nature of call, location, owner of property and cause of fire so far as I have been able to ascertain were as per list:—

The number of fires for each month was: Mar., 16; Apr., 18; May, 20; June, 16; July, 11; Aug., 10; Sept., 8; Oct., 14; Nov., 11; Dec., 7; Jan., 19; Feb., 12; or a total as before given for the year, 162.

The total loss so far as could be learned was \$86,635,

of which \$34,095 was in the fire district and \$52,540 in the section outside.

The department has laid during the year 29,850 feet of hose and used 1,207 gallons of chemical, which is 14,150 feet of hose and 353 gallons of chemical more than the preceding year.

The apparatus at the present time consists of the following, to wit:—

One steam fire engine, one combination chemical and hose wagon, one two-horse hose wagon, one one-horse hose wagon, one two-horse hose reel and one hook and ladder truck, and also for winter use a set of sleds with attachments for carrying the ladders, etc., a one and a two-horse pump for hose, and a set of hub runners for the combination wagon.

As I before reported, all the above are equipped with up-to-date swing harness, which have been well taken care of so that I now report them in good condition. Also, as the year before, there are two permanent horses at the Court Street station, and one permanent horse at New Auburn.

On the several pieces above mentioned, or at the stations, are the following equipments or furnishings: the same amount of ladders as per last inventory, eleven hand chemical extinguishers, one coil rope, one large wire cutter, one pair rubber gloves, one large chain hook, seven short pike poles, two long pike poles, two short handled forks, three cantdogs, one life belt, thirty-six rubber coats, fifteen canvas coats, one Eastman Siamese deluge set, twenty ladder straps, twenty-seven hose spanners, sixteen hydrant wrenches, fourteen Callahan stop nozzles, thirteen Boston play pipes, one rubber, one wire wound and two long play pipes, four Eastman pipe holders, nine axes, five bars, fourteen lanterns, four ring chain and wrenches for hydrants, four two-way hydrant gates, two Detroit door openers, two short play pipes and four plain nozzles, four rubber patrol covers, eight fire police clubs. In the sleeping rooms there are nine white iron beds, nine mattresses, twenty-five double blankets, twelve single blankets, twenty-four sheets, twenty-

eight pillow slips, twenty pillows, thirteen towels, ten bath towels, nine white bed spreads.

In the stables there is a full equipment of articles necessary to properly wash and care for the apparatus, horses and rooms.

In all the different rooms, tables, chairs and settees are of sufficient number for all requirements and are all in good condition, excepting the chairs in the lower room of the Court Street station, which are more or less broken.

We have on hand about ten or twelve tons of English coal for the fire engine, nearly a full carboy of sulphuric acid and a keg and a half of soda.

One year ago I reported we had a little over 11,000 feet of hose. There was no hose bought this year as the requirements of the city called more urgently for a new hose wagon, and as we did not have to condemn but little, I can now report the hose in serviceable condition, 10,800 feet. I understand that the new hose wagon ordered will be received by the city on or about May 1. This will put the department, so far as the hose is concerned, in very good condition, so that now our most serious want is to change our out-of-date ladder truck to a modern one, which I hope the City Council will feel able this year to do.

All the pieces of apparatus are now in good condition except the combination wagon and New Auburn hose pump, which need painting.

In regard to hydrants, fire alarm boxes, the fire alarm system of the city, and the use of the fire station on election day, I will respectfully call your attention to my report of last year, with the statement that those are still my views.

There has been quite an advancement made the past year as regards fire escapes, many having been put up by the parties without orders from the Board of Engineers, and all of those which were ordered were put on agreeable to the wishes of the Board, except one, which was only good for one year on account of the party making the platform of wood instead of iron. The coming year that will have to be changed before a certificate is given.

There is quite an amount of feeling being aroused by

the local papers and individuals in regard to the school-houses of Auburn, and especially the Webster school, as many who only know or hear one side of the question, and do not know in what condition the janitor (Mr. Miller) keeps the rooms and basement, and who do not appreciate to what a degree of proficiency those who have the management of the schools has brought the fire drill (they being able to empty the building with about four hundred and fifty pupils in less than two minutes) may think that there is a great negligence on the part of the Board of Engineers, and as this matter may be called to your attention perhaps it may be well to give in this report the Board's view on the matter.

That building having two wide run of stairs with good front and rear exits, and the entire house being kept clear of all kinds of rubbish, with a well-organized fire drill, the Board thinks it is safer as at present than with any ordinary fire escape, and that with the best escape that can be made it is more safe with fire drill as at present than it would be with such an escape without the drill.

We think it would be more conducive to the safety of the children to establish in the basement a complete system of automatic sprinklers so that a fire cannot gain great headway than to put up any kind of fire escape. The law gives the Board no authority to order sprinklers, but I, as one of the Board, believe they should be installed.

With a fire escape on both the north and south end of the building made with stairways of iron, with the risers of the stairs of not greater height than the present inside stairs, after having the window openings cut down to the level of the floors, with doors that open out and not interfere with clear passageway to the different platforms or landings, your present Board would cheerfully approve such plan although we don't feel justified in giving an imperative order that it shall be done.

In conclusion I wish to return my sincere thanks to the City Council, the entire membership of the Fire Department, and to the Commission for kindly aid and assistance.

Respectfully submitted,

L. W. HASKELL, *Chief Engineer.*
