Regular monthly meetings of the City Council on the first Monday of each month, at the City Council rooms at 7.30 P.M.

Regular monthly meeting of the Committee on Accounts, to examine bills, on the fifth day of each month, or if the fifth comes on Sunday, then on the preceding day, at the Treasurer's office, at 7.30 P.M.

Mayor's Address

Gentlemen of the City Council:

We meet to-day as representatives of the citizens of Auburn chosen to attend to the affairs of a bustling, growing city. Our positions call for an expenditure of time and thought far out of proportion to any financial reward to be received; yet, by accepting such positions, we are pledged to assume great responsibilities and to give the affairs of the city, however burdensome they may be, all the time, all the impartial and unbiased consideration necessary to transact them in a business-like manner.

In order to do this we must lay aside all partisan and selfish interests and consider first and at all times the interests of the city. As self-respecting men, having accepted such responsibilities we shall do no less than our very best to make the present year one to which we may look back with satisfaction.

FINANCIAL

In this connection it should be stated that notwithstanding the unusual expenses in consequence of the small-pox epidemic, the increased expense of removing the nests of the browntail moths and a larger abatement of taxes than usual, there has been an overdraw of only \$594.52, on an expenditure of over \$275,000.

The treasurer furnishes the following statement of the finances of the city:

LIABILITIES

FOUR PER CENT. BONDS

Due July 1, 1912,	\$7,000 00
Due July 1, 1917,	15,000 00

SCHOOLS

No department of the business of the city government is more important than that of its public schools, calling as it does for the expenditure of one-fifth of the total appropriation, more than double any other outlay except that of public works.

Good schools not only attract desirable home-makers, but are commonly considered indicative of general prosperity.

Such schools cannot be maintained without good teachers, good buildings and good accessories. These cost money, but, if wisely expended, no outlay of the city will bring better returns. A liberal policy in school expenditures is therefore good business economy. Good teachers may be secured, but they cannot be kept unless well paid and nothing hurts the school like frequent changes of teachers. Our teachers are doing excellent work and for that reason are being sought by other cities. Our schools are among the best. Let us keep them so by meeting the suggestions of our school board regarding salaries and other expenditures in a liberal spirit, knowing that they are working solely for the good of the city.

The maximum salary of the teachers in the grades below the high school, should be raised to \$600. The maximum now, \$500, is below that of cities with which we wish to be compared. The increase in the amount to be paid in tuitions will be sufficient in all probability to take care of the increases in the salaries of the high school teachers.

The amount received from the State for common schools will be increased materially. In 1912, for the first time, two-thirds of the amount paid for salaries of evening school teachers will be reimbursed.

To keep the schools up to a satisfactory standard, an increase of about \$500 in appropriations will be needed and should be readily granted.

The city has shown foresight and good business economy in purchasing a lot for the Webster grammar school, but before building another matter must be considered.

The land on which the Chamberlain school building stands is wanted by the Maine Central Railroad. They are preparing to extend their tracks in that vicinity to such an extent as to make it necessary to secure another lot within the year. When that is done a new building will be necessary. This must be attended to at once. If in addition to this, it is thought best to build for the Webster school, there need be no delay.

HIGHWAYS

So much is said about good roads that some opinions on that subject may not be out of place at this time.

A good road is one which is in good condition for use from snow to snow again, whether it is made of the material at hand or is macadamized.

The former may be as good in every way as the latter, numerous stretches of gravel roads attest. To have all the main travelled roads leading into the city put and kept in the best condition possible with the materials at hand would be much better for the city than to have an asphalt road running thru it direct from Portland to Augusta.

The direct State road is desirable, but good roads on all routes leading to the city benefiting all our citizens to the greatest extent, are much more desirable and should receive more consideration and outlay.

By draining and shaping much may be done and all roads should receive this attention. Clay roads should be gravelled and sandy roads should be clayed. However, the most important requirement for good roads, and apparently the one receiving least consideration, is that of keeping them in good condition after they are built. To keep a road in good condition after it has once been thoroughly made, there is nothing to compare with the use of the log

drag after every rain. This, no one who has watched the effect of such a procedure can well deny.

We can have good roads for our farmers as well as our automobilists with comparatively little increase in our outlay, by gradually making good roads with materials at hand and constantly keeping them good. A road goes back more from a little neglect after a heavy rain than from all other causes combined.

The city should be divided into districts and men engaged to regularly and thoroly inspect and keep smooth the roads under their care.

We expend annually, on our streets about \$40,000, by far the largest item in our appropriations. This sum should do more than keep roads passable, and the time is fast approaching, if it has not actually arrived, when such an important part of the affairs of the city should be in charge of an expert on road building and maintaining.

TAXES, ASSESSORS AND VALUATION

Much criticism is made regarding taxes, particularly since recent valuation.

Most of such criticism is on the ground that the valuation is not equable—the objecting being that one is taxed as much as his neighbor who has considerably more property in sight.

It seems that little objection would be made to raising by taxation all the funds needed by a thriving city, provided the valuation was carefully and justly made. There should be no discriminating on the part of the assessors. Taxable property of all kinds should be appraised by them at its market value: then if it is best to abate certain taxes, wholly or in part, definite rules should be made by the city council to cover these cases.

The recent State law requiring all valuation of land to be made entirely separate from other valuations, should mean for us a complete and thorough revision of the taxable property of the city.

It would allay objections to taxes, make tax-payers more willing to support measures tending to give Auburn the

standing it should have, and we would all be working together for the good of our city, if we could feel that the valuation on which our taxes are based, was made in a thorough manner. "The value of buildings cannot be fairly estimated by glancing at the outside," is now a common criticism.

We have had competent men in the past as assessors, but the pay has been so entirely out of proportion to the work which should be done that it has become customary to devote to it as little time as possible and it is generally admitted that many inequalities in valuation have resulted.

Why not try the reasonable way, and pay a liberal sum to obtain the valuation which would form a just and solid basis on which to raise the money necessary to carry on every form of municipal activity—the very life blood of the city?

WATER WORKS

During the past year the annual hydrant rent has been reduced from \$20 to \$10 per year—a reduction of \$30 per year in all since the water works came into the hands of the commission.

The total amount collected increases each year and last year amounted to \$37,219.80, yielding a net income of \$11,813.29.

It is the intention of the Board to lay a new line of 12-inch pipe from the pumping station, thru Court and Union Streets to Troy Street, for the purpose of supplying better protection from fire to the factories in that vicinity.

FIRE DEPARTMENT

Our fire department is well equipped and in charge of efficient men.

It sometimes happens that while the men and horses are out at a fire, the alarm of another fire calls for attention. The response would be much more prompt if another pair of horses were provided.

The efficiency of the department would be still further protected if the Chief were paid an adequate salary, so he

could be permanently stationed at the engine house, ready at all times for duty.

We should give the recommendations of the Chief of this department careful consideration, and as far as possible take measures to carry them out.

POOR DEPARTMENT

The report of the Overseers of the Poor shows that the city poor have been cared for at an expense of about \$1200, a remarkable showing and one that does credit to the management of that department.

The City Farm, under the efficient management of Mr. and Mrs. Irish, has contributed materially to the reduction of expenses.

POLICE DEPARTMENT

The work of this important department has been highly creditable, and so far as possible the present officers should be retained.

BOARD OF HEALTH

The Board of Health officers have had a thankless task in caring for the small pox and other epidemics.

Their work has been well and thoroughly done in an unselfish spirit and has saved the city much expense. The expenses of this department should, therefore, be willingly met and the work of its members commended and sustained.

SCHOOL PHYSICIAN

The importance of the work done by this officer of the city is, perhaps, hardly appreciated by the public. But his work is being done well and time will prove that such work is very necessary to the success of many individual pupils and of the schools as well.

CONCLUSION

Now, Gentlemen of the City Council, if anything has been suggested which does not meet with your approval,

give the matter fair consideration and, when it comes up for discussion we can, at least, agree to disagree. Let us make all the questions coming before us matters of study and investigation, then cheerfully abide by the decision of the majority. With mutual respect and a willingness to work in harmony for the good of the city, we shall look back at the close of the year and see that our work has been well done.

CHAS. E. WILLIAMS.

Treasurer's Report

To the Mayor and City Council of the City of Auburn:

GENTLEMEN—I herewith submit my report as City Treasurer for the year ending Feb'y 29, 1912.

Report of Auburn Water Commissioners

BOARD OF WATER COMMISSIONERS

ROBERT HASKELL, <i>President</i>	One year
MARK H. MERROW.....	Two years
ALONZO Q. MILLER.....	Three years.
HORATIO G. FOSS.....	Four years
ANDREW F. WARREN.....	Five years
EBEN G. EVELETH.....	Six years
MAYOR, <i>ex officio</i> member, during term of office	
ANDREW W. P. COBB.....	<i>Clerk</i>
EBEN G. EVELETH.....	<i>Treasurer</i>
FORREST E. BISBEE.....	<i>Superintendent</i>
WILLIS P. ATWOOD.....	<i>Auditor</i>
LESTER L. RAND.....	<i>Engineer</i>

To the Honorable Mayor and City Council:

GENTLEMEN: The Board of Water Commissioners herewith submit their nineteenth (19) annual report.

At the annual meeting held March 20, 1911, the Board organized by choosing Mr. E. G. Eveleth as President, Andrew W. P. Cobb re-elected clerk, Forrest E. Bisbee Superintendent, and L. L. Rand Engineer at the pumping station.

During the year an Allis-Chalmers Co. electric pump has been installed at the pumping station to replace the old steam pump removed. The new pump and connections cost about \$2,500.00. It delivers at the reservoir about 1,300 gallons of water per minute, being double the capacity of one of the old pumps at about the same cost for pumping and is giving the best of satisfaction. One of the old steam pumps is retained to be used in case of accident to the new electric pump.

The new line of pipe from the pumping station to the reservoir has been completed this year, other relays and extensions have been made during the year, details of which can be learned by referring to the report of the Superintendent.

It is the intention of the Board to lay a new line of twelve-inch pipe from the pumping station through Court and Union Streets to Troy Street for the purpose of supplying the shoe factories with better sprinkler service for fire protection, the present supply being entirely inadequate. The pipe for this work has already been purchased to be delivered May next.

During the year the annual hydrant rent has been reduced from \$20.00 to \$10.00 per year, making since the Water Works come into the hands of the Commissioners a reduction of \$30.00 per year on the rent of each hydrant.

The sinking funds of this department, as may be seen by with the interest and annual appropriations from year to year, will be sufficient to meet our bonds as they become due.

With deep sorrow this Board records the death of our beloved member and Mayor, Mr. Irving L. Merrill, which occurred on December 5, 1911. Mr. Merrill became a member of the Auburn Water Board, by virtue of his office as Mayor, on March 16, 1908, and served continuously until his death. Recognizing the peculiar responsibility of an office which has in its keeping the water supply of the community, he gave to it his best endeavor, invaluable judgment and unfailing courtesy.

By his death the City of Auburn has suffered a great loss, which will be especially manifested to his former associates in this department, where his sterling qualities were so well known.

In the midst of his busy life he passed from sight, from the labor and the conflict into silence and shadow, into the peace, we trust, which passeth understanding.

Resolved, That in the death of our esteemed member this Board has lost a faithful associate and valuable

Counselor and the City of Auburn has been deprived of the services of a zealous and conscientious officer.

Resolved, That a copy of these resolutions be sent to the family of the deceased and spread upon our records.

Water rents collected during the year,	\$37,219 80	
Licenses and fines,	20 00

	<u>\$490,111 51</u>

We herewith append a classification of water supplied as per service book. viz:—

Families,	3,112
Water closets,	2,810
Bath tubs,	1,130
Hand hose,	1,075
Horses and cows (not supplied by meters),	591
Stores and offices,	310
Boarders,	189
Barbers,	26
Bakeries,	9
Restaurants,	11
Schools,	10
Churches,	9
Fish tanks,	6
Laundries,	5
Specials,	112
Meters,	45
Hydrants,	128
Watering troughs,	4

ANNUAL WATER RATES

Private dwelling house, one family, one year,	\$6 00
Each additional family, one year,	5 00
Water closets, self-closing, one year.	2 00
Water closets, not self-closing, one year,	3 00
Water closets, two or more families in same dwelling, each,	1 50
Bath tubs,	2 00
Hand hose, per year payable May 1st,	3 00
(Hours for lawn sprinkling, 4 to 8 A.M., 5 to 10 P.M.)	
Private stable, one horse or cow, one year,	2 00
Each additional horse or cow, per year,	1 00
Fountains as defined in rules and regulations, 8 hours each day, for the season, payable May 1st,	6 00
Sink or water closet, in store, each,	4 00 and 5 00
Sink or water closet, in office, each,	3 00
Fish tank in store,	20 00
Barbers, for each workman, one year,	3 00

For further matters of detail we refer you to the reports of the Treasurer and Superintendent herewith connected.

Trusting that you gentlemen and the citizens generally will appreciate our efforts in behalf of the city, we are

Very truly yours,

E. G. EVELETH,
 ROBERT HASKELL,
 M. H. MERROW,
 A. Q. MILLER,
 H. G. FOSS,
 A. F. WARREN,
 FRANK A. RENDALL,

Water Commissioners.

ANDREW W. P. COBB, *Clerk.*

Report of Treasurer

The following is a statement of the receipts and expenditures of the Auburn Water Commissioners for the year ending February 29, 1912.

	Receipts	Expenditures

Respectfully submitted,

F. L. LEAVITT, *Treasurer.*

AUBURN, MAINE, March 15, 1912.

This is to certify that I have examined and audited the books of F. L. Leavitt, Treasurer, and Andrew W. P. Cobb, Clerk of Auburn Water Commissioners. and find them correct and hereby approve the same.

WILLIS P. ATWOOD, *Auditor.*

Report of Superintendent of Water Works

AUBURN, MAINE, March 1, 1912.

To the Board of Water Commissioners:

GENTLEMEN—The nineteenth annual report of the Superintendent for the year ending February 29, 1912, is herewith presented, this completes eighteen consecutive annual reports written by your present superintendent.

The following improvements have been made, viz: The stable has been repaired by a new brick foundation, new floor timbers and new floor, and the stable and pumping station painted.

An Allis-Chalmers Company's 90 H. P. 440 volt, 60 cycle 2 phase motor direct, connected to an eight (8) inch centrifugal pump discharging 78,000 gallons per hour working under a head of one hundred and twenty (120) lbs., the pump is working fine and is giving no trouble.

A new heating plant has been installed in the pumping station to heat the same, as we are not using the steam boiler.

The last leg of the pipe line between the Pumping Station and the Reservoir on Merrill Hill is finished, giving a direct main pipe line up Court Street being of size 16, 20 and 24 inch. Should the old 12-inch pipe line fail you would have a direct fire pipe line on to the city through the new line.

A six-inch pipe has been relaid on Loring Avenue and a hydrant set.

A six-inch pipe on Grove Street from Center to Vernon Street, and a hydrant.

A six-inch pipe on Lake Street north of Davis Avenue.

The eight-inch pipe line in the pumping station yard and South Goff Street has been reinforced with a twelve-inch pipe to be used in connection with the twelve-inch line

to be laid in Court and Union Streets, to reinforce the six-inch pipe high service to Cushman-Hollis Co., Dingley-Foss Shoe Co., Field Bros. & Gross and National Shoemakers, with two, three way and two four way hydrants.

A New Hydrant at the corner of Court and Highland Streets. Four new hydrants have taken the place of four old Boston hydrants.

IMPROVEMENTS

With the twelve-inch pipe line to the shoe factories, you have a call for an extension on Coburn Street of three hundred feet to a new house, and if you should vote to build the same I would recommend a six-inch pipe, as the land is a high point and the lake pressure is low.

You also have a call for a pipe line on Broad Street nineteen hundred and fifty (1950) feet to Archie Greenwood's and three others this side.

NEW SERVICES

The plant has grown by the addition of forty-eight (48) new services.

We have relaid one hundred and eleven (111) services to the water takers.

LEAKS

Two leaks in a two-inch pipe and five in corporations.

STATION AND PUMPING PLANT

A new pump has been installed taking the place of the old Worthington No. 1 Pump. The No. 2 Worthington Pump is in fair condition to be used if the Electric Pump should fail to work.

The Steam Boiler No. 2 of one hundred H. P. was inspected Nov. 8, 1911, by C. H. Powers of the Maryland Casualty Co. of Baltimore, Md., and found to be in good condition.

FREEZES FOR THE YEAR

This is a very cold winter and we have had six services frozen in the street and two on private land.

The Ross Regulator Valve that was set in the twenty (20) inch pipe line at the corner of Court and Dexter Streets in the fall of 1907 has been repacked and adjusted, this regular has not failed to work since the same was set.

In closing my report I wish to express my appreciation of the confidence and support you have given me in the discharge of my duties as Superintendent.

Respectfully submitted,

FORREST E. BISBEE, *Superintendent.*

ANALYSIS

AUGUSTA, MAINE, Apr. 24, 1911.

Water Commissioners, Auburn, Me.

GENTLEMEN—The analysis of the spring sample of water from your public supply, sent to me on the 18th instant, shows the water to be free from all chemical and bacterial evidence of sewage pollution. As is natural at this time of the year there is considerable snow water and surface water entering the lake, and the sample shows evidence of this condition; but the entrance of this wash will in no way affect the drinking qualities of the water, which, in its present condition, is a first-class one in every respect, and one well fitted to use for all domestic and manufacturing purposes.

Enclosed are the results of the present analysis.

Very truly yours,

H. D. EVANS, *Director.*

MAINE LABORATORY OF HYGIENE

WATER ANALYSIS

Parts in 100,000, No. 4,403; date of collection, April 18, 1911; date of examination, April 19, 1911.

Residue on Evaporation—Total, 3.00; loss on ignition, 1.30; fixed, 1.70.

Ammonia—Free, .0016; Albuminoid, Total in Solution, 0.0106.

Chlorine—0.23.

Nitrogen—As Nitrates, 0; Nitrites, 0.

Oxygen Consumed—0.11; Hardness, 1.80; Alkalinity, 1.30; Iron, .009; Lead, 0.

B. Coli—0.1 c. c., 0; c. c., 0; 10 c. c., 0.

Bacteria pr. c. c., 440.

AUGUSTA, Maine, July 24, 1911.

Water Commissioners, Auburn, Me.

GENTLEMEN—The analysis of the sample of water from public supply, sent to me on the 17th instant, shows the water to be in its usual first-class condition. There is no chemical or bacterial evidence of contact of this water with sewage, or with other drainage wastes; and, in spite of the long drought and low water, this water is in its usual condition for this season of the year. It is a first-class water in every respect.

Enclosed are the results of the present analysis.

Very truly yours,

H. D. EVANS, *Director.*

MAINE LABORATORY OF HYGIENE

WATER ANALYSIS

Parts in 100,000, No. 4,707; date of collection, July 17, 1911; date of examination, July 18, 1911.

Appearance—Turbidity, 0; Sediment, 0; Color, 0.2.

Odor—Cold, 0; Hot, Slight.

Residue on Evaporation—Total, 3.80; Loss on Ignition, 1.50; Fixed, 2.30.

Ammonia—Free, .0056; Albuminoid, Total in Solution, 0.0098.

Chlorine—0.20.

Nitrogen—As Nitrates, 0; Nitrites, 0.

Oxygen Consumed—0.13; Hardness, 2.10; Alkalinity, 1.60; Iron, .009; Lead, 0.

Bacteria pr. c. c., 102.

AUGUSTA, Maine, Oct. 23, 1911.

Water Commissioners, Auburn, Me.

GENTLEMEN—The analysis of the fall sample of water from your public supply, sent to me on the 16th instant, shows the water to be in its usual good condition. Both chemically and bacterially this water is free from evidence of contact with sewage wastes. In its present condition it is a little turbid from iron rust from the pipes, but, of course, this is but a temporary condition in the particular service from which the sample was drawn. The water would be considered a first-class one to use for all domestic purposes, including drinking.

Enclosed are the results of the analysis.

Very truly yours,

H. D. EVANS, *Director.*

AUGUSTA, MAINE, Jan. 29, 1912.

Water Commissioners, Auburn, Maine.

GENTLEMEN: The analysis of the winter sample of water from your public supply, sent to me on the 22d instant, shows the water to be in its usual first-class condition. The water contains a little more vegetable material in solution than is usual for this season of the year, but this will in no way affect the drinking qualities of the water. No chemical or bacterial evidence of contact of this water with sewage wastes was to be found. The water is, as usual, a first-class one in every way.

Enclosed are the results of the present analysis.

Very truly yours,

H. D. EVANS, *Director.*

FEBRUARY 28, 1912.

EXTERNAL

Safety Valve Load 15 lbs. Pressure Allowed 15 lbs.
Boiler No. 2 at Pumping Station.

Auburn Water Commission, Court Street, Auburn, Me.

DEAR SIR: We beg to advise that on Feb. 23d, 1912, our inspector, Mr. C. H. Powers, made an external examination of your Steam Boiler, No. 2, insured under Policy No. 147486, and reports boiler was examined while under a steam pressure and showed no evidence of leakage or distress. All appurtenances were in good working order.

Yours truly,

J. W. RAUSCH, *Manager.*

Respectfully submitted,

HARRY W. ROWE, *Supt. of Hacks.*

February 29, 1912.

Report of Police Matron

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN: In accordance with the usual custom I submit to you the report of my work as Police Matron for the year ending March 10, 1912. I little thought in October, 1908, when I consented to take the position of Police Matron for the remainder of that year, that I should now be writing my fourth report.

The few months lengthened into three and a half years. The years have passed swiftly by and seem but a very short time that I have been serving the city in this capacity. I know my labors have not been in vain because I can see good results.

I can point out to you families who are wholly self-supporting now, who four years ago were going to the City Matron for most of their clothing. It seemed to be a habit with a number of families to go to the Matron for every little thing *wanted*, say nothing about their needs. I found children were asking for things they never used, but sold them for a few pennies to get candy or to go to the Nickel. I went to their homes and forbade the parents sending one and two, and sometimes three children, to my home every day for something. I put a stop to this at once, insisting that they come only when absolutely necessary, as I had planned to visit the homes often and learn their needs myself. It seems a pity to bring up children to have no pride or self-reliance. I have tried very hard to instill a little pride into the hearts of men and women who were getting everything they could out of the city. They expected me to loan them money, furnish food and fuel as well as clothing.

There seemed to be very little effort made to support the family. It's not so to-day. If we can teach people to have self-respect and self-reliance it will go a good ways in making them self-supporting.

The children and very old people have had my special attention during my entire service. This has been a most prosperous year in our city and our poor people have been very comfortable.

Thanksgiving and Christmas the poor were bountifully supplied with all that goes to make these holidays pleasant and enjoyable. The churches, W. C. T. U., East Auburn Benevolent Society, Missions, Clubs, Sunshine Societies, Sunday School classes, school children, secret orders, shoe manufacturers, confectioners, fruit dealers, individual friends of the poor, and my personal friends, *all* gave liberally and willingly. My heart is full of gratitude for all of this help, without it I could do very little. On account of so many contagious diseases in our midst this winter, the Christmas tree was discarded and large family boxes or bundles of many needful things were taken to the homes. A nice lot of furniture and bedding has been given where most needed. Not so many pieces of clothing given out this year because some of the large families moved away last fall, nevertheless, over 2,500 pieces have passed through my hands to those who needed them. Have secured work for many women and girls and some men.

A large amount of good literature has been distributed.

"The Emergency Fund" under the care of the "Charitable Committee" which is made up of representative women from all the churches in our city, has been an un-failing supply in times of great need, such as shoes and rubbers for the school children, food and clothing for the shut-ins and board of little ones while waiting to be put into a home, etc., etc.

I hope this Charitable Committee with its Fund or something better, will be a permanent source of help for our Police Matron in the years to come, as it is so hard to do so much without financial aid. The churches have my sincere thanks for their splendid help given through this Committee.

Our beloved and much mourned Mayor, the late Irving L. Merrill, was always most helpful with words of counsel and appreciation. Our other officers have been most kind and patient with me, for which I am profoundly thankful.

I congratulate the people of Auburn on securing such a man as Dr. Chas. E. Williams for Mayor. He has promised us a *clean* city, and I believe he will do his part. We should all esteem it a privilege to labor with him with this end in view.

I am sorry to feel obliged to give up the work at this time, but when I tell you besides doing the city work I have sat up nights to write hundreds of letters and post cards and help plan the work of eight different departments of work in the church, missions and W. C. T. U., besides the care of a home, you will not wonder that I don't care to be appointed to the work another year, but *want* and *need* a rest.

May God's richest blessings rest upon you who guide the affairs of our beautiful city and all who seek a home within its borders.

Respectfully submitted,

NELLIE E. FELLOWS,

City Matron.

Report of Superintendent of Streets and Sewers

To the Mayor and City Council of the City of Auburn:

	\$1,042 45

For the season of 1912 I recommend the following:

\$25,000 00 for Highways.

3,000 00 for Bridges.

6,000 00 for Permanent Improvements.

4,000 00 for Permanent Walks.

4,000 00 for New Sewers.

1,500 00 for Cutting Bushes.

500 00 for Trimming Trees.

1,000 00 for Old Sewers.

A new sewer should be built on Harris St.

A new sewer should be built on Center St.

Two new teams should be purchased.

Three new harnesses should be purchased.

South Main Street, from end of present paving to the Little River Bridge should be paved.

A sewer should be put in North Main Street and this street should be paved.

The macadam road on Center Street should be resurfaced.

The same amount of Iron pipe should be bought for culverts as was used last year.

The city stables should be moved to Turner Street if a lot can be purchased for a reasonable price.

The bituminous pavement should be continued from Goff Street to Dennison, Dennison to Turner, and from Turner to Centre Streets.

The Electric Road should be ordered to lay paving rails on Turner and Dennison Streets at once.

A large sized stone crusher should be installed on the Franklin lot.

A steam drill, derrick, and boiler should be bought.

The North Bridge, Oak, and Littlefield Bridge should be painted.

Would recommend that the stone at Mt. Apatite be tried on the Minot Road.

tried on the Minot Road.

A tar concrete walk should be built to Mt. Auburn cemetery on Summer St.

The State Road should be continued from Turner Street up Centre Street this year.

A permanent walk should be built on the westerly side of Gamage Avenue from Goff Street to Shepley Street.

The paving on Main Street should be relaid from Court Street to the Grand Trunk Bridge.

Respectfully submitted,

G. A. FIELD, *Supt. of Streets and Sewers.*

Report of Overseers of the Poor

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN: I herewith submit my report as Clerk of the Overseers of the Poor for the municipal year ending February 29, 1912, including the support to the inmates of the City Farm and Outside Poor during the year.

Amount appropriated by City Council,	\$2,500 00
Total receipts from City Farm,	3,061 74
Total receipts from outside sources,	861 41
	\$6,423 15
Total amount expended,	5,207 58
	\$1,215 57

The expenses are divided as follows:

City Farm,	\$3,485 65
Outside Poor,	1,721 93
	\$423 91
Net expense City Farm,	860 52
Net expense outside,	1,284 43
	1,215 57
Balance in favor Dept.,	\$2,500 00

There are now twelve inmates of the City Farm. Average number during the year eleven. From five of this number we receive the sum of Forty-five dollars per month. There have been three deaths at the City Farm during the year.

The team at the Farm has earned two hundred (\$200.-00) dollars outside during the year.

Mr. Irish has also done butchering for outside parties to the amount of forty-one (\$41.00) dollars.

Mr. and Mrs. Irish are entitled to much credit for the manner in which they have performed their duties both on the Farm and in the House.

One of the horses having died this spring it will be necessary to buy a mate for the one we have or sell the one we have, and buy a pair of good young horses, as the one that is left is getting old, and I would recommend buying a pair and disposing of the old horse.

The building needs painting badly.

The stable and shed connecting will have to be repaired this season.

Respectfully submitted,

J. M. STEVENS,

Clerk of Overseers of Poor.

Auburn, Maine, March 18, 1912.

Following is detailed statement of Stock and other Property on the Farm:

10 cows	1 bull
1 horse	125 hens
10 hogs	2½ bbls. flour
2 bbls. salt pork	100 lbs. lard

1 wheat harrow	1 spring-tooth harrow
1 plow	1 sulky plow
1 team sled	1 corn planter
1 jigger	1 pair large street blan-
2 hay forks	· kets
2 one-year-old heifers	

Report of City Solicitor

*To the Honorable Mayor and City Council of the City of
Auburn:*

I herewith submit my report for the municipal year now ending:

I have drawn all such legal papers as have been required, have passed upon bonds given by city officials, and have prepared amendments to ordinances which have been adopted during the present year.

Several claims for damages have been made against the City, which I have investigated, and upon which I have submitted an opinion. I have been consulted by the Mayor and the heads of all the various departments of the City, from time to time, and have rendered such legal services as were required. I have, whenever requested, acted as prosecuting officer in the Municipal Court.

The only litigation pending at the beginning of the present year was an appeal to the County Commissioners, by A. L. Kavanagh, from the location of Shepley Street. Because of my prior connection with this matter, I did not act as counsel for the City in this particular case, and withdrew also from the other side. By arrangement of the Mayor, former City Solicitor Henry W. Oakes, represented the City. The County Commissioners awarded damages against the City and an appeal was taken to the Supreme Judicial Court. The case has since been compromised and a settlement effected.

The suits now pending in the Supreme Judicial Court are:

Emma A. Heath, for personal injuries caused by an alleged defect in the sidewalk. This case cannot be tried for some time probably, by reason of the disability of the plaintiff, not, however arising from the accident.

City of Auburn vs. E. S. Paul, for recovery of sewer assessments amounting to \$1,680. The evidence was taken

out in this case at the January term and it was reported to the coming June term of the Law Court for decision upon the legal questions involved.

Newton S. Coan et als. vs. Auburn Water Commissioners. This case is for damages caused by blasting. It was tried at the January term, and a verdict of \$429 awarded the plaintiff. A motion for a new trial has been made and the case is in a position to go to the Law Court.

Harriet C. Pulsifer vs. City of Auburn. This is an appeal for the valuation of real estate by the assessors. It was entered at the January term and continued because of the death of the petitioner, and the fact that no administrator of her estate had been appointed.

The only other unsettled matter, referred to me, is a claim of Charles P. Loring for work done in connection with the Board of Registration, the bill for the same, not having been approved by the Mayor and Committee on Accounts. No suit has been brought upon this claim.

Respectfully submitted,

HARRY MANSER, *City Solicitor.*

Auburn, March 14, 1912.

Librarian's Report

To the City Council of the City of Auburn:

The Librarian of the Auburn Public Library herewith submits her twenty-first annual report, March 1, 1911-March 1, 1912.

No. of volumes recorded in the accession book, Mar. 1, 1911,	18,244
No. of volumes added during the year,	960
Total number of volumes to date,	19,204
No. of volumes lost during the year,	43
No. of volumes destroyed,	3
No. of volumes exchanged for new editions,	33
No. of volumes worn out,	255
Total number of volumes removed,	334
Net gain for the year,	626
Total number of volumes lost, worn out, or otherwise removed since the Library was founded,	2,077
Total number of volumes at present belonging to the Library,	17,127
No. of pamphlets added during the year,	144
Total number of pamphlets,	2,042
No. of journals and periodicals regularly received,	63
No. of days the Library has been open,	282
No. of days, including holidays, the Library has been closed,	32
No. of new readers' cards issued during the year,	647
Total number of readers' cards issued since Aug. 8, 1904,	6,407
No. of readers' cards used during the year,	3,132
No. of reminder cards sent for overdue books,	570
No. of books charged for the year,	46,693
Monthly average,	4,245
Daily average,	165
Juvenile books, 25.08% of circulation.	
Adult fiction, 62.03% of circulation.	

Non-fiction, juvenile and adult, 14.08% of circulation.	
No. of visitors to the Library,	49,867
Monthly average,	4,533
Daily average,	177

What is in effect a new registration, begun March 1, 1911, shows that 3,132 different persons have used cards during the year, this number including the 647 new readers as well as former users of the Library. At least half as many more readers' cards are still in force to be used when asked for, as some of them are every day. As each adult may and often does take two books at a time, and as each book is usually read by more than one person every time it goes out, it is easy to see that the use of the Library is widespread.

The figures given are for eleven months, the Library having been unavoidably closed for one month. This time was used for much-needed re-arrangement and repair of books which were all called in. That the health of the readers might be safeguarded, all necessary fumigation was attended to. If we had not known it before, we should have found out, by closing at the busiest time of the year, how large a place the Library fills in the life of the city. Fortunately the schools were closed too, but some of the club work and much private study had to come to a partial standstill.

Comparison with the corresponding months of last year shows an increase in circulation of some five hundred volumes, with indications that the increase would have been much larger if the Library had been open the full time.

The juvenile circulation is increased somewhat, the adult fiction is proportionately decreased, while the circulated non-fiction remains about the same. Here the figures are most misleading, as non-fiction books are always kept out longer than fiction and consequently are not counted so often. Many days during the study season, the non-fiction amounts to 25%, 30%, or even more of the circulation for the day. Then, too, there is no feasible method for finding out just how many books are consulted or read in the building because so many volumes are on open shelves for

use without asking. But a conservative estimate would show that at least half as many books are used in the building as go out of it. These books are nearly all non-fiction, whether they are used for study or simply for the pleasure of reading.

The increasing interest in the human phase of all activities is more marked than ever. It is shown by the popular demand for books which emphasize this phase, and by the almost universal willingness of the present day writers to supply this demand. Theories and dogmas have no longer a place in philosophy, religion, or sociology, except as they may be applied to immediate and concrete human betterment. Books that tell of such application are much read. Essays, poetry, and the drama always take account of this element, and are therefore always read. History, biography, and travel, which also of necessity have the basic personal note, show an increase this year of 20% in use by our readers.

It is largely the presence of this human element which prolongs the life of the so-called standard books of poetry and fiction, and which keeps them in constant demand year after year. For this reason, the Library, while not neglecting the new, must ever look to its supply of the old. Every year many, single volumes and sets of this class are purchased as a matter of course. We aim to keep one good set of each standard author with reasonable duplication, even to the extent of four or five copies of some of the titles, just as we do of the current popular fiction. This year we have had to buy the complete works of Bryant, Longfellow, Field, Whittier, Cooper, Mrs. Stowe, and Stevenson, in some cases to replace worn out copies, in others for needed duplication. At least as many more will need attention the coming year. In partial answer to inquiry as to how much such books are used, investigation shows that for a period of seven consecutive years some books by Cooper have been charged on an average of every third day, of Stevenson every second day, and of Mrs. Stowe somewhat oftener still—a good showing of the steady demand for authors no longer immediately popular. The use of the works of many other authors would stand an

equal or better test, as all of our standard poetry and fiction is much used. We have also, as usual, purchased both popular and permanently valuable books in all departments. The most important for purely reference use are the new editions of the Encyclopedia Britannica, and the Century Dictionary; and an encyclopedia for children's use, known as the Book of Knowledge, in 24 volumes, has been purchased.

Our work with the schools has been even more satisfactory than usual. Some of the High School pupils come every day during the school year, and in the afternoon they often crowd the reference room to its limit. Many of them show much ability in the use of books. The grade pupils also come in large numbers, especially at noon and after school in the afternoon. The school children of Auburn are fortunate in that the Library is so centrally located that the greater part of them may easily visit it. In many places, the children must use small branches, or school libraries, or go without altogether because of the distance. This frequent use of good books is of inestimable value to the young people, helping them to form reading habits which will be of lifelong benefit to them.

Our friends have remembered us generously, as usual, with gifts of books, pamphlets, newspapers and periodicals. There are ninety-seven names on the list, of which forty-five are of local people. We take this occasion to thank them publicly, in addition to the private thanks that each has already received.

Miss Helen Whitehouse and Miss Helen Percival have been the assistants for this year also. They have performed their duties with courtesy and interest, and with the added efficiency which practice brings.

The new year starts with every indication that we may be still more useful to the best interests of the city.

Respectfully submitted,

ANNIE PRESCOTT, *Librarian.*

Report of Treasurer of Auburn Public Library

To the City Council of the City of Auburn:

The undersigned, Treasurer of the Auburn Public Library, herewith submits his report of the receipts and disbursements on account of the Library, for the year ending February 29, 1912.

	<hr/> <hr/> <hr/>

In the total expenses for the purchase of books, \$957.41, the sum of \$168.34 is included, expended for replacing worn out books.

Of the amounts expended for periodicals and binding, \$126.27 has been paid during the past year for subscriptions and binding of periodicals which have been placed permanently upon the shelves, and have been added to the accession record. These amounts should be considered as having been spent for new books.

By the will of Miss Nancy M. Hill, who died Oct. 18, 1911, the Library is named as one of six residuary legatees of her estate. It is expected that the Library will realize something over \$2,000 from this source, which should be made a part of its permanent invested fund.

The invested funds of the Library consist of two bonds, one for \$1,000 issued by the Syracuse, Lake Shore & Northern Railroad Company; the other for \$500 issued by the Fond du Lac Water Company, both bearing interest at five per cent.

Respectfully submitted,

JOHN A. MORRILL, *Treasurer.*

March 11, 1912.

Report of Board of Health

*To the Honorable Mayor and City Council of the City of
Auburn:*

GENTLEMEN: The Board of Health respectfully submits its 25th annual report for the municipal year ending February 29th, and mortality statistics for the year ending Dec. 31, 1911.

ORGANIZATION

The board consists of Dr. B. G. W. Cushman, Dr. D. A. Barrell and J. H. Chase.

At the annual meeting held in May, Dr. Cushman was chosen president and Dr. Barrell secretary and health officer. Mr. John J. Lawlor was appointed Inspector of Plumbing for one year at the same meeting.

CONTAGIOUS DISEASES

During the year the board has had the largest amount of contagious disease to contend with that has been recorded in recent years.

Diphtheria was very prevalent during the early part of the year and scarlet fever in the latter part, especially in the Goff Hill section.

In November, small pox appeared in town, and in spite of all precautions which we were able to take there were about one hundred and twenty-five quarantined during the year. In the latter part of the year, measles appeared in epidemic form and practically closed several of the schools.

RECOMMENDATIONS

The attention of the board has been called on numerous occasions to the terminals of both public and private sewers entering into the Androscoggin River and it is recommended that all sewer terminals be placed so that they shall enter under water at low water.

The location of the Chamberlain School on Academy Street is such that the board recommends a change of location on account of an open sewer and railroad in close proximity.

In addition to the amendments passed by the last city government, the board recommends that an amendment be passed requiring that all boarding and lodging houses shall have at least one toilet on each floor occupied.

On account of the large amount of contagious disease which has visited the city within the past year and the necessarily large amount of money expended and lost to the wage earners on account of enforced quarantine, the board earnestly recommends that the question of a satisfactory isolation hospital have your early and careful attention.

NUISANCES

The nuisances which have been reported to the board have come from lack of proper sewerage, keeping of swine, keeping of hens running at large and the improper disposal of decaying refuse. The board has made investigation of complaints made and either had them abated or removed in every case possible.

In regard to nuisances the board believes in a clean city and that every citizen should do his part, that the ordinances in regard to waste paper and rubbish in streets should be strictly enforced.

If anyone wishes to make a complaint, write out your complaint, sign your name and the board will try to abate it with fairness to all parties.

Respectfully submitted,

B. G. W. CUSHMAN, M.D.,
DANIEL A. BARRELL, M.D.,
J. H. CHASE.

Report of Chief Engineer

*To the Honorable Mayor and Board of Fire Commissioners
of the City of Auburn:*

GENTLEMEN: I herewith submit the annual report of the Fire Department for the year ending Feb. 29, 1912.

The forces of the Department consist of 55 regular and 16 substitute men as follows: Chief Engineer, four assistant engineers, twenty-five hose men, twelve ladder men, engineer and fireman of steam fire engine, two permanent men at the Court Street Station, one permanent man at New Auburn Station, who is also driver. Four other drivers of apparatus, five fire police, sixteen substitute hook and ladder men.

The roll of the men as they stand to-day is as follows:

Chief, C. H. Blethen; first assistant, W. H. Merrow; second assistant, C. A. Smith; third assistant, Geo. H. Merrill; fourth assistant, F. H. Jackson. Hose men, Court Street Station, F. W. Libby, fireman; Daniel Adams, clerk; W. E. Hunt, L. E. Rich, Jesse Gray, W. J. Walker, C. W. Spearing, S. B. Towle, M. L. Bennett, J. E. Welch, W. H. Robertson, C. H. Eveleth, H. G. Bennett, J. B. Nadeau, O. E. Towle, N. McIntosh, H. L. Sawyer, G. L. Bickford, A. M. Sadler, L. Watson, Fred Sands, L. M. Taylor, Patrick Cullinane, Richard Doyle, Fred Noel.

Hook and Ladder men: C. J. Garcelon, foreman; L. E. Smith, clerk; H. F. Ames, H. D. Strout, Geo. Eldridge, B. M. Oliver, F. G. Proctor, H. E. Fogg, F. M. Larrabee, C. B. Allen, A. Marsden, W. L. Eugley.

Engineer of steamer, J. F. Smith; fireman, A. B. Attwood.

Permanent men, Court Street Station: Chemical driver, Chas. Farrington; tank man, E. Bancroft. New Auburn station, Stephen C. Jones, driver. Driver of supply wagon, C. P. Hunt; driver of Hook and Ladder, George L. Whitney; driver of Hose No. 4, John Gould; driver of

steamer, S. Sturtevant. Substitute men, A. Jackman, John Small, H. Clifford, H. M. Getchell, L. H. Marston, B. B. King, C. H. Bean, Chester Perkins, W. Tripp, L. H. Taylor, H. M. Jones, S. Raymond, F. Hodgdon, S. H. Verrill, E. Gilman, F. Britton.

Fire Police, T. A. Bailey, foreman; H. C. Church, John Folsom, T. Cohoon, S. Raymond.

During the year the Department has responded to 170 alarms, bell, 35; still, 112; Chief's calls, 23.

The dates, nature of call, location, owner of property and cause of fires of bell alarms were as follows:

The following is a statement for each month: March, 17; April, 24; May, 25; June, 13; July, 15; August, 6; September, 8; October, 11; November, 12; December, 12; January, 17; February, 10, making a total of 170. The total loss as nearly as can be estimated, has been \$50,777.98 of which \$42,777.98 was in the fire district and \$8,000 was in the outside section.

The Department has laid during the year 38,650 ft. of hose and used 1451 gals. of chemicals.

APPARATUS.

The apparatus consists of: One steam fire engine, one two-horse combination chemical and hose wagon, two two-horse hose wagons, one two-horse hook and ladder truck, with sleds and runners for same for Winter use as has been for several years at the Court Street Station. One one-horse hose wagon, and pung at the New Auburn Station; one two-horse hose reel at the residence of C. W. Dexter, 425 Upper Court Street, also, hand hose reel at the residence of F. L. Bartlett, 305 Center Street. The different apparatus are being kept in a proper state of efficiency and repair. During the year the hose wagon at the Court Street Station has been varnished and thoroughly repaired, also the hose wagon and pung at the New Auburn Station.

The Fire Commissioners have contracted with the Combination Hook and Ladder Co. of Providence, R. I., for a new hook and ladder truck with trussed ladders, which will be put in commission in a few weeks.

EQUIPMENTS OR FURNISHINGS

At the Court Street Station are the following equipments or furnishings: 7600 feet of hose, 12 pipes with stop nozzle, 6 tips, 9 hydrant wrenches, 24 spanners, 25 ladder straps, 3 two-way gates, 6 spanner belts, 20 chemicals, 6 lanterns, 2 pipeholders, 25 coats, 3 iron bars, 3 jimmies, 4 axes, 1 two-way and holder.

The fire engine has its regular equipments of pipes, lanterns, etc., 1 ladder truck, 1 set sleds, 1 Bangor 60-foot chain extension ladder, 1 50-foot rope extension ladder, 4 stay poles for extension ladders, 2 40-foot hand extension ladders, 1 inside short extension ladder, 2 roof ladders, 2 long plaster hooks, 6 short plaster hooks, 4 axes, 3 peavies, 1 pr. wire cutters, 1 pr. rubber gloves, 4 ladder hose straps, 3 spanners, 1 grub hoe, 1 hay fork, 1 chain hook, 2 rubber blankets, 2 smoke protectors, 12 rubber coats, 200 feet police rope, 100 feet 3-8 in. rope, 150 feet other rope, 7 police bil- lies, 1 whiffletree, 1 lead bar, 1 set swing harness, 2 woolen blankets, 1 whip, 4 iron posts for holding ladders in place on sleds.

At New Auburn Station: 1500 feet of hose, 2 extinguishers, 2 lanterns, 1 patrol cover, 1 small canvass blanket, 3 pipes, 3 ladder straps, 3 spanners, 1 good coat, 1 two-way hydrant gate, 1 pipe holder, 1 axe, 1 crowbar, also ring, chain and wrench to be used at the hydrants on each carriage that carries hose, and a Detroit door opener on all except the reel.

HOSE

There is now 10,550 feet of hose, 1,000 feet of Boston Woven hose having been purchased the past year, 750 feet having been condemned for Fire Department use.

There is on hand a year's supply of chemicals. Six hand chemicals have been repaired and put in first-class condition.

There is also a runway for loading and unloading apparatus.

One new fire alarm box has been placed at Sheridan Avenue, Box 125.

ACCIDENTS

The death of Miss Nellie Dow was caused by burns received by a lamp exploding, and setting fire to her clothing, at her home, 8 Grove Street.

RECOMMENDATIONS

I would make the following recommendations: An extra pair of horses at the Court Street Station, and another permanent man. That the chemical be painted and varnished, also rubber tires for same. I recommend there be a partition between the hay loft and main part of the house for protection against fire. Also new doors and two new windows for the front of the Court Street Station.

I recommend there be a fire station on Auburn Heights. The city is growing very fast in that direction, and should be better protected against fire.

If the old hook and ladder truck cannot be disposed of to good advantage, I recommend the ladders be put on Auburn Heights and at New Auburn.

On several occasions there has been a delay in calling the Department to fires, on account of people who discovered the fire not being familiar with the location of the fire alarm boxes. I recommend there be a red light placed over every fire alarm box.

The Department has responded to two calls from Lewiston during the year, but have been fortunate in not having to call our sister city for help.

It is a pleasure to report that the two Departments are working together with the best of feelings and that each stands ready to assist the other should occasion require.

It affords me much pleasure to testify to the loyal support and assistance which I receive from every officer and member in the Department, and the satisfactory manner in which both officers and men perform their work.

In conclusion I wish to thank the Mayor and Board of Fire Commissioners for the courteous and kind treatment I have received by them, and the interest they have taken in the welfare of the Department. I wish to thank the members of the press for the kind words in relation to the work of the Department, also the citizens who have expressed their appreciation of the work of the Department during the year.

I wish to express my sincere thanks to the officers and members of the Department, for their kindness and hearty co-operation.

Respectfully submitted,

CHESTER H. BLETHEN, *Chief Engineer.*

Report of Sealer of Weights and Measures

*To the Honorable Mayor and Board of Aldermen of the
City of Auburn, Me.:*

GENTLEMEN: I herewith submit my annual report as Sealer of Weights and Measures for the year ending March 30, 1912.

I have sealed during the year:
29929 Milk and cream jars.
12 Milk measures.
5 Wagon or coal scales.
102 Scales of different description.
206 Scale weights.
4 Glass graduates.
4 Dry measures.

Condemned:
200 Milk and cream jars.
2 Milk or cream measures.
2 Oil measures.
6 Platform Scales.

Two of the platform scales condemned were sent to the manufacturer to be repaired, and when returned to the owners were found to be incorrect and had to be returned to the manufacturer a second time to be adjusted, as it could not be done without new parts that could not be had here.

In every case where found scales were not correct, or slow, it was always in favor of the purchaser.

As the Sealer of Weights and Measures is mostly for the benefit of the purchaser I think that the Sealer should be paid by the city. The city to furnish the team and helper when required.

While no one has refused to have their implements tested and sealed, several complained about paying the small fee charged.

Respectfully submitted,

CHAS. M. BENJAMIN,

Sealer of Weights and Measures.

Auburn, Me., March 30, 1912.

W. T. MERRILL, M.D., *Inspector.*

Report of City Electrician

To the City Council of the City of Auburn:

I herewith submit my report as City Electrician from Aug. 1, 1911, to Mar. 1, 1912.

No. of dwellings inspected,	52
No. of stores inspected,	10
No. of factories inspected,	7

The above were all newly wired.

I have inspected a number of buildings that have been wired some years and in some cases requested the owners to make some changes which they have readily done. There have been some poles on the streets that were not in use and the companies owning them have removed them when requested to do so. It is hoped that the coming year that when possible the Electric Light Co., Tel. Co. and Street Railway Co. will use the same poles, doing away with having two and sometimes three poles within a few feet of each other.

I would say right here that one will have to go a good way to find a better class of wiring than is being done in our two cities. I have not found a single case where I thought a workingman was trying to slight his work. With the class of materials used and the precautions for safety that are taken there is nothing in my mind as safe as electricity. I would recommend that a duplicate book of inspections be kept in the City Clerk's office and a record of all inspections be kept there.

The New England Ins. Underwriters have issued a rule that no Lighting Co. shall connect a building with electric current until a written notice is received from the inspector showing that the building has been inspected. This I think a very good idea as in some cases the Lighting Co. has had requests for electric service where the building had not been inspected.

Respectfully submitted,

ARTHUR P. HOLMAN, *City Electrician.*

W. P. ATWOOD, Auditor

Report of Board of Education

AUBURN, MAINE, February 7, 1912.

To the Citizens of Auburn:

According to the usual custom we take pleasure in submitting the following report. Judging from many and favorable reports from persons vitally interested in and in touch with our schools, we feel that the pupils of Auburn have enjoyed unusual school privileges the past year. We have a fine corps of teachers nearly all of whom have had an adequate professional training or successful teaching experience before coming to Auburn. Up-to-date text-books are in use and teachers and pupils have been liberally supplied with all working material.

In considering the physical needs of the pupils we wish to say that this Board has given and continues to give, its support to the measures adopted by the Board of Health for the purpose of stamping out the small-pox epidemic. We do this because these measures in the history of such epidemics have proved most efficient and therefore least wasteful of health and money to the community. Medical Inspection has been made more effective by employing one inspector instead of two as formerly and giving him greater authority. Needed changes have been made in the seating accommodations and, in as far as our funds would permit in making repairs, all school rooms have been made as home-like and pleasant as possible.

Extensive repairs were made on nearly all of the city buildings. The Lincoln building was shingled, painted outside, the walls of all the rooms and corridors were tinted and the ceilings whitened. Similar inside repairs were made on the Webster, Washburn and the Pine Street Schools.

We regret that on account of being obliged to make extensive repairs, which were not foreseen before the appropriations were made, this account has been overdrawn. Over \$200 was expended on the heating plant of the Wilson

School. The boiler of the Washburn building was condemned and had to be retubed at an expense of \$154. It was found that the drain pipes on the north side of the High School building were rusted out and would have to be replaced and connected with the new sewer. Extensive repairs were also made on the gutters on the east side of the building. This work amounted to about \$160. These are only a few of the list of similar items which we might mention and which were not included in making up the estimate for repairs.

We wish to heartily commend the recent action of the City Council in purchasing a new site for the Webster Grammar School. The location could not be more desirable. It is not in close proximity to any street or steam car line or factory and there is very little heavy teaming in this part of the city. It is a sandy loam and the lot includes an entire square. Again fortunately the location is more central than that of the old building. Owing to the large number of residences that have been erected in the northern and western part of the city within the past few years, the center of population has been shifting in this direction. Could a location equally desirable be secured for the Chamberlain School, we feel that the matter of school sites in Auburn would be adjusted very satisfactorily for a long term of years. For reasons stated in our report one year ago, and well known to every one interested in this school we cannot recommend too strongly that some action be taken in regard to securing a lot as early as possible.

Respectfully submitted,

Report of Superintendent of Schools

To the Superintending School Committee:

GENTLEMEN: I have the pleasure of submitting my fifth annual report which is the twenty-sixth of the series of similar reports.

It is unfortunate in some respects that the school and the fiscal years do not coincide. It would be far more logical to submit a report of this nature in June which properly marks the close of the year's work rather than in February, the ending of the fiscal year.

Owing to the excellent progress made during the greater part of the year about to close. I feel that the work of the schools as a whole, will compare favorably with that of former years notwithstanding the epidemics of small-pox and measles and the prevalence of scarlet fever, chicken-pox and diphtheria, and I anticipate that by June the usual requirements will have been met. It seems probable, however, that there will be an increase in the number of pupils conditioned or failing in promotion. This increase will depend in a large measure on the amount of work done by the pupils at home while excluded on account of not wishing to be vaccinated. Books were loaned them freely when requested and they were kept in touch with the progress of their classes in the meantime. In as far as conditions will permit, these pupils will be given special attention when returning to school.

In June, 1910, the maximum salaries of women assistants in the high school was raised from \$700 to \$750, the increase to take effect at the beginning of the fiscal year 1911. Owing to this action, we have been able to retain several strong teachers whose services have been very valuable. I find that this maximum, also the salaries paid men assistants in our high school and special instructors, com-

compares very favorably with the salaries paid in other Maine cities in a class with Auburn. I regret to say, however, that this statement would not apply to the salaries of the elementary teachers of our city.

According to the schedule adopted in 1907, the maximum for all grades and rural teachers is \$500. As an earning wage this amount is not in proportion to the incomes derived from other lines of work which require less time and expense in preparation.

Auburn has been fortunate in being able to employ and retain a very efficient corps of teachers, but conditions are changing. Other lines of employment hold out more flattering inducements to young ladies who would otherwise prepare for teaching, better salaries are being paid in other Maine cities and towns so that each year it is becoming more difficult to find desirable applicants for positions in Auburn. In view of the above facts, I earnestly recommend that this matter be considered before the appropriation is made for next year. At present sixteen teachers are receiving the maximum of \$500, and as all teachers are increased only \$25 each year by our fixed schedule, approximately \$250 would cover any increase in the maximum salary for the next fiscal year.

I take pleasure in calling your attention especially to the report of Principal Moulton of the high school. He has taken up thoroughly the more essential features relative to the activities, interests and work of the year. One of the many encouraging features relative to the school is the increase in the number of tuition pupils. Four years ago sixteen were registered and the total amount collected for tuition was \$430. The number has gradually increased each year until at present we have sixty-four registered representing eighteen different towns and the income derived from this source for the year will not fall below \$1,800. As the tuition for each pupil is \$30 a year, the amount paid by towns not supporting a standard high school, while the average cost per pupil exceeds \$40 it may seem that the rate is too low, but before reaching a conclusion we should take into consideration the fixed charges of the school: the use of the school plant, heating, janitor service, etc. By exclud-

ing these amounts, we would find that the average cost would fall considerably below \$30. While no inducements have been held out to influence pupils to come to Auburn, I feel that as long as the accommodations will permit, tuition pupils should not be discouraged. It speaks well for the school and we are drawing a class of desirable pupils, several of whom are post-graduates who wish to take additional work before entering higher institutions.

Our Medical Inspector, Dr. H. E. Hitchcock, has recommended that a printed pamphlet, authorized for use in Massachusetts schools, be revised to meet our conditions and that a copy be put into the hands of each teacher. He would recommend also that return postal cards be used when notifying the parent or guardian in regard to abnormal conditions which should receive the attention of the family physician who would fill out the return card and forward it to Dr. Hitchcock. By this method he would be able to follow up and to keep in touch intelligently with each case. The work of Dr. Hitchcock deserves hearty commendation.

Early in the year I recommended that some action be taken in regard to considering the advisability of establishing a continuation course in connection with Edward Little High. Two conferences were held with representatives of nearly all of the leading boot and shoe firms of the city. Prin. Moulton was present at the second and while the manufacturers were heartily interested in the movement and expressed a willingness to do all they could consistently to forward it, it was concluded that Edward Little High is not prepared at present to offer the kind of instruction demanded by the manufacturers. In my opinion, in the near future liberal training along these lines will be demanded in the public schools and especially in the larger manufacturing centers.

We were fortunate in being able to secure the services of Mr. J. L. Higgins for the position as Instructor in Manual Training and Mechanical Drawing. He has had an excellent training, is practical in his ideas and the boys have fullest confidence in him.

Mr. Congdon is getting excellent results in his work in permanship in the grades. During the year his supervision

has extended to include the fourth grades. He is also instructing both classes of the Training Course. During the past eighteen months I have not heard an unfavorable comment relative to the work in penmanship in the city schools. Prior to this time complaints were rife.

I am of the opinion that Mr. Congdon's supervision should be extended as early as possible to include the lower grades and that the full arm muscular movement should be taught from the very first. The idea is psychologically sound and there is much to be said in favor of it.

I have referred to the reports of Prin. Moulton and Mr. Higgins, I wish also to call your attention to the reports of Miss Smith, Miss Stoughton and Mr. Mower, all of which deserve careful reading. The work of each of these departments speaks for itself.

In conclusion I wish to express my gratitude to the teachers for the earnestness of purpose manifested in their work and their hearty co-operation, and to you as members of the Board of Education for your general consideration and advice.

Respectfully submitted,

H. H. RANDALL.

Superintendent of Schools.

Mr. H. H. Randall, Supt. of Schools:

DEAR SIR: I have the pleasure of submitting to you my third annual report of Edward Little.

The school was opened last fall under unusually favorable circumstances. With only one exception the teachers returned to take up the work of the previous year and carry it forward without interruption. Miss Dinsmore, who was appointed to fill the vacancy in the English department, quickly found her place in the faculty and is an efficient teacher.

The registration this year has been large. We have enrolled 391 students, 64 of whom were tuition pupils coming from 18 different towns. This large enrollment made the program for some of the teachers too hard for good results. The employment of Miss Beulah F. Hackett as an auxiliary teacher relieved the situation in a large measure. I was glad to give this modified form of the Batavia plan a trial. Miss Hackett has done her work in a satisfactory manner. Yet I doubt if any plan equals our system of having all teachers come back two afternoons a week to supplement the regular work. But in fairness to them the average number of pupils per teacher should not be allowed to greatly exceed 25, so that the results of their faithfulness may be a higher standard of work.

The new course in mechanical drawing and manual training is popular and its practical value is evident from the products we are already obtaining. I would recommend that it be extended to a two-year course, and also that a similar course be started for the girls for combining free-hand drawing and domestic science.

A more careful consideration of the election of studies must be brought about if we are to get the best results from the high school. Although our modern language department has had for a long time a wide reputation for its excellent work, only about one-half of those who begin French derive any benefit from the study other than a disciplinary one and many drop it at the end of the first year. A large number are influenced to take it by a desire to know something about the language of the greater part of the foreign population of Lewiston and Auburn. A little

investigation on the part of parents should prove beyond doubt that only those pupils who have a natural language sense and continue the subject for two or three years can make any use of the French studied in the high school. I would not discourage in the least the study of any language by pupils who want it for an accomplishment; but I would bring to the attention of parents, and all who are interested in the high school, the loss in time, money and energy to both the school and the individual due to misfits in the courses. We are furnishing the colleges and the business houses with good products; but our training for the home lacks purpose and thoughtful consideration. The fault does not lie so much in the school as in the fact that the public is not awake to the progress that is being made elsewhere in secondary education to make more efficient citizens.

The social side of high school life is nearly always a perplexing problem. Pupils must have recreation and their social organizations. While many of their games are too strenuous to be wholly beneficial and their entertainments held too late to be free from some criticism, yet too much restraint in these matters often drives them to seek amusement from far less desirable sources. The committee in its decision to send an instructor with athletic teams on their trips did much to strengthen and improve them. If some colleges find it advisable to employ graduate managers, we should not leave our students in any of their school activities without the moral support and encouragement not only of teachers but of all good citizens. Pupils derive pleasure from two sources in either study or play: one, the enjoyment gained from self-activity in something of vital interest to them; the other, the satisfaction experienced from winning the approbation of those who are most interested in their activities. I cannot emphasize in this report to you too strongly the influence that all good citizens exert by their timely approval of what is clean and wholesome and vigorous in pupils' own activities.

While I trust that the sphere of influence of the high school is unbounded, yet I feel that the limits of responsibility should be clearly defined. The school attempts to

supervise only the organizations whose membership is open to all pupils of the school or a class. These include at the present time the Athletic Association with its regularly established team organizations, the Athenian Society, and the four classes.

There are numerous social clubs or societies among the young people of the city made up mostly of students of the school and those who have been recently connected with it. The feeling between the members of these clubs and the teachers is very friendly and cordial. It should be understood, however, that they are not under the control of the school. The only recognition they receive is that reports of their activities appear in the news columns of the ORACLE. They have no meetings at school nor do they interfere in the least with its management. The harm that comes to the school from these societies is the individual loss which results from pupils becoming too deeply absorbed in matters which should be purely recreative. The seat of all their activities being in the home, these clubs should not be classed with the secret societies that are working so much harm in many high schools.

I am pleased to report that a large number of pupils are ambitious for a higher education. Probably not less than eighteen will go from Edward Little to college next fall and several will enter normal schools. From the present indications they will be certified with very few conditions.

I wish to thank you and members of the committee for many helpful suggestions and advice, and express my appreciation of faithful work of my teachers.

Respectfully submitted,

L. E. MOULTON.

REPORT OF SUPERVISOR OF MUSIC

To the Superintendent of Schools:

It gives me pleasure to report the work in music for the past year as being satisfactory.

In this subject there is one problem which requires and is receiving special attention. I refer to those pupils in every

class who are willing to let some one do their musical thinking for them. It is a simple matter for children to sing after some one has sung for them, just as it is an easy thing for a child to pronounce a word after some one has pronounced it first. Parrot-like repetition, however, is not teaching or learning in music any more than it is in reading. As a student of music and a chorus conductor for many years, I may say that the ability to read music rapidly without the aid of an instrument or other voices is a comparatively rare accomplishment and it is along this line that the music in our schools must improve. Because a class can sing well it does not always follow that the work is satisfactory. The teachers for the most part are thoroughly awake to this idea and are successfully working out the problem.

The chorus class of the High School needs new supplementary music and I would suggest that it be provided in book form as this seems to be more convenient and in the end, more economical.

The High School Orchestra has become more than an experiment and under the direction of Mrs. Locke is doing good work.

On account of no suitable place to hold it, the Auburn School Music Festival will be omitted this year. The Festival has grown so large that Auburn Hall is far too small to accommodate the people who wish to attend.

It is earnestly hoped that in the near future Auburn will provide a place where a chorus of five or six hundred of her school children can sing to five times that number of her citizens without danger or inconvenience.

The following is a short outline of the course of study in music:

First Grade

Rote Songs. Blackboard exercises. Study of the staff. Tone formation. Scale Songs.

- *Second Grade*

Study Songs by words and by syllables. Note reading from the blackboard and chart. Study of the scale. Interval practice. Beating time.

Third Grade

Note reading from books. Names of staff degrees. Two, three and four part measure. Key signatures. Seven positions of the scale. Interval study.

Fourth Grade

Nine keys. Six part measure. Evenly divided beat. Sharp four, Flat seven. Position of Key signatures. Two part music.

Fifth Grade

All keys. Chromatic tones. Pitch names of different scales. Unevenly divided beat. The catch note. Songs in Minor Keys.

Sixth Grade

Chromatic Scale. Minor keys. Twice divided beat. Triplets. Three part music.

Seventh Grade

Minor Scales. Study of difficult intervals. Major and chords. Syncopation. Testing voices. Review of key signatures and time marks.

Eighth and Ninth Grades

Bass Clef. Scale formation and transposition. Phrasing Alto tenors. Bass voices. Chorus drill.

High School

Chorus drill. Musical interpretation and appreciation.

Respectfully submitted,

N. L. MOWER, *Supervisor of Music.*

Auburn, Me., Feb. 1, 1912.

REPORT OF INSTRUCTOR IN DRAWING

H. H. Randall, Superintendent of Schools:

DEAR SIR: As a special teacher in drawing, my years of experience have taught me that this subject has been a means of bringing pleasure and joy into our courses of study. Children will have their pleasure. By substituting the finer delights, suitable to satisfy a natural craving, we eliminate degradation and vicious pleasures.

Although a drawing course seems to be based on a development of itself, the child ought to be the basis of development. Education should produce an all round man, a perfected, harmonious character.

My aim has been to lead the children to discover and recognize colors, forms and lines in common things not as such, but as an inspiration, an appeal to their finer emotions. Let them feel a sense of strength and courage in the grand old mountains and trees, both in color and line, and a sense of tenderness and refinement in a flit of sunlight or a new blade of grass. This is not art for art's sake, but art for the sake of the child.

The months as they come suggest my outlines for the year.

September and October—Plant Drawing and Color.

November and December—Construction Drawing and Design.

January and February and March—Representation and Composition.

April, May and June—Plant Drawing, Color and Design.

As these subjects suggest new and varied ways of presentation, it seems narrow to name to you any particular method. I most courteously and earnestly invite any one to become acquainted with our work through observing it.

I visit the grammar grades and high school once each week, the primary grades once in two weeks, and the rural schools with the exception of the smaller ones, twice each term.

As I consult the daily programs of the teachers, I find less time devoted to my subject than any other, general or

special. Considering this fact, I think the results certainly encouraging.

I would suggest that a small amount of money be expended in furnishing suitable pictures for many of the rooms, and that these pictures not only be good reproductions from our best masters, but that they also be good reproductions in color.

I wish to thank you, Mr. Randall, and your advisors, for your sensible and hearty cooperation in my work.

To the teachers I want to say that the best part of our results are through your direct and indirect influence with the children.

And I want to say to the children, all the way from Danville to North Auburn, that I am glad that we understand each other.

Very respectfully,

IDA L. SMITH,

Instructor in Drawing.

Auburn, Maine, Feb. 2, 1912.

REPORT OF INSTRUCTOR OF DOMESTIC SCIENCE

H. H. Randall, Superintendent of Schools:

DEAR SIR: I herewith submit the following report of Department of Domestic Science.

The outlines of the work in both cooking and sewing remain practically the same as last year.

The classes in Cookery are working in groups of two and individually. In this way they take more interest in their work and obtain better results with but little additional expense.

Besides the regular work the pupils in the ninth grades have had practical experience in applying the lessons given by preparing and serving the banquet for the Auburn Teachers' Association.

We are looking forward to having a dining table and a set of dishes as the work in Domestic Science cannot be complete without lessons in table setting and serving.

We aim to do practical work but at the same time to leave it attractive and pleasing to the eye.

I hope in time to come it will be possible to schedule cooking in the High School as a regular study, giving the girls an opportunity to continue their study of Cookery and to do work in other branches of Domestic Science such as Practical Dietetics, Household Management and Household Sanitation.

In closing I wish to thank the Members of the School Committee, the principals, and the teachers for the interest they have shown in my work.

Respectfully submitted,

RUTH STOUGHTON,

Instructor of Domestic Science.

REPORT OF INSTRUCTOR OF MANUAL TRAINING

To the Superintendent of Schools:

Manual Training is required of all boys in grades seven, eight and nine. At first elementary problems in carpentry are given. As the boys gain skill they make chiefly simple furniture and other articles for the home. They are allowed to choose to a considerable extent what they will make. The needs and ability of the individual are taken into consideration when giving a boy a problem, and the work is made as practical, as varied, and as likable as possible. Lumber used in making large pieces is paid for by the boys.

Some of the things made are: Simple shelves, tool-boxes, book-shelves, magazine racks, tables, hall-trees, etc. Sets of shelves for school use have been made, and as the boys become better workmen it is hoped that more of this work can be done.

At the High School this year a combined course in Mechanical Drawing and Shopwork was established. The course in drawing comprises the following: Use of instruments, construction of geometrical figures, lettering, dimen-

sioning, orthographic projection, intersections of solids, developments and sections, isometric drawing. Pupils of ability do a good deal of inking, tracing and blue-printing.

The purpose of the course is to make students able to interpret and work from blue-prints, to design and draw articles of furniture, interior fittings, etc., and to serve as a foundation for any future work in shop or drafting.

Much of the drafting is directly connected with the shop-work. Articles made in the shop are drawn in class and drawings are made for use in the shop. Drawing, three periods a week; shop-work, four periods.

Should an advanced course in Mechanical Drawing be given next year, scale drawings of machine parts such as bolts, nuts, screws, springs, engine cranks, pulleys, gears, etc., should be made, teaching systems of dimensioning and conventional representation, also inking, tracing, blue-printing. A gas engine should be studied. Dimensioned detail sketches be made directly from parts, and afterward an assembly drawing. Considerable designing should be included and very likely an advanced course in shop-work in connection with the course in drawing.

Respectfully submitted,

JOHN S. HIGGENS,

Instructor in Manual Training.

Auburn. Me., Feb. 1, 1912.

Resolutions

Resolutions relative to the death of our late Mayor, the Hon. Irving L. Merrill, *ex officio*, Chairman of the Board of Education, whose death occurred December the fifth, Nineteen Hundred and Eleven:

Whereas, An all wise Providence has seen fit to remove from our midst, in the prime of life and at the height of his usefulness, our friend, associate and honored Mayor, Irving L. Merrill,

We bow to His Will and express to the wife and son of our late brother, the high esteem and personal regard in which we held him.

As friends, we appreciated his genial ways. As fellow-servants of our beloved city we admired his sterling integrity, high ideals and marked ability. He has left us an example we may well strive to emulate.

In behalf of the Auburn School Board,

W. P. BRENEMAN,
C. E. WILLIAMS,

Committee.

Resolutions

On December twenty-fourth death removed from the teaching corps Miss Helen A. Hayes who served the city ten years as a teacher of the New Auburn schools. The following resolutions were adopted by the School Board:

Whereas, The recent death of Miss Helen A. Hayes has removed from our midst a most estimable lady and from the teaching force of the Auburn public schools one of our valued teachers, be it

Resolved, That we, members of the Auburn School Board deplore the loss of one who had endeared herself to parents and pupils alike for her high personal qualities as well as her exceptional qualities as teacher;

Resolved, That we extend to her family our sincere sympathy and express our deepest appreciation for her high character and for her work as a teacher;

Resolved, That these resolutions be placed upon the records of the School Board and that a copy be forwarded the bereaved family.

COMMITTEE ON RESOLUTIONS,

Auburn School Board.

Signed W. P. BRENEMAN,
HENRY E. PACKARD,
GEORGE J. UNSWORTH.

In Memoriam

The Honorable Irving L. Merrill, who died December 5, 1911, at the age of forty-seven, was one honored, respected and highly esteemed by his fellow-men.

In public life he served this city two years as alderman from Ward One. In that capacity he distinguished himself by mastering the city's affairs so well to the satisfaction of its citizens that he was elected Mayor and was serving his fourth term at the time of death.

He performed the duties of the various offices to which he had been elected, with great credit to himself and eminent satisfaction to all.

He was genial, courteous and unselfish, and in every day life, honored and respected by his fellow-citizens. His generosity and cordial greetings were characteristics worthy of especial mention.

He was industrious, and his industry was especially noticeable in all the lines of his private and public activity, for he faithfully performed all duties as they came before him.

Whereas, The Supreme Architect of the Universe has chosen to call our late companion from our midst, we, as citizens of Auburn, feel that we have met with a great loss, and

Whereas, This Board of Aldermen and Common Council lament the death of our honored Chief Executive, who was continually seeking to attain improvement for the betterment of our Municipality, be it

Resolved, That in Mayor Merrill's death, Auburn loses one of its foremost citizens, prominent in public and fraternal as well as in commercial life.

Resolved, That by his death the city loses a valuable, industrious and patriotic citizen; the community an honored, respected and useful neighbor; his immediate family a loving and devoted husband and father. May we, who survive him, anticipate our approaching fate and be more strongly cemented in the ties of union and friendship; so that, during the short space allotted to our present existence, we may wisely and usefully employ our time; and, in the reciprocal intercourse of kindly acts, mutually promote the welfare and happiness of each other.

“This bright strong soul, whom 'twas joy to meet,
Our Mayor loved, whom all were glad to greet,
How can we help but mourn this spirit rare,
And say with tears ‘We miss him everywhere.’

Those hours of counsel we shall not forget,
When with the members of the ‘Board’ he met;
Kindly toward everyone, to all a friend,
Ready in each good cause a hand to lend.

Oh, may his mantle fall on us who stay!
Thank God, we walked with him a little way,
Heaven’s radiant country has one charm the more,
Because this friend we loved has reached its shore.”

Resolved, That these resolutions be made a part of the records and copy be sent to the family of the deceased.

JOHN H. MERRILL,
FRED. P. TARR,
FRANK L. BEALS.
