Job placement for the class of 1971 remains poor

Job placement for members of last year there were less than 20. And the class of 1971 "has not picked up not half the graduates in the College director of career planning and placement, said Wednesday.

As of June 30, 524 January, June and August graduates were still pick up. Now all we can say is that seeking placement, out of about 1,100 registered with the placement

Sewall said the placement figures are "much lower than last year.

"Tech students are hurting pretty badly," he said. There are 69 who have yet to be placed. At this time

this summer the way we thought it of Education have been placed. This class of 1971, who received, or 119 in teaching.

"Across the board, we've slipped quite a bit this year. Last spring we we hope it picks up in the late summer, although it doesn't look like

office want to see students getting employment. Students are willing to take any meaningful job. But they have little going for them.

Not just jobs

expect to receive next month, associate, bachelor and higher degrees further study, 40 into the military, at UMO, have been placed.

Ed Hewes, UMO classified employee, talks about the University and family life. Story, p. 7.

The word "placement" means "Of course, we in the planning either that the student has found a job in teaching or in industry, plans to go on to further study, has signed up for military service, or has decided to become a home-maker.

Out of the 405 placed so far, 243 have found jobs; 124 in industry, and

A total of 97 will go on for Technology, 107 out of 225. and 27 into home-making.

The number of graduates from with the placement office is as administration, 23. follows: Arts and Sciences out of

37 placed out of 103; Education 105 out of 250; Life Sciences and Agriculture, 74 out of 186; and

The breakdown by college of graduates finding jobs is as follows: Education, 84; Technology, 60; Life each college who have been placed, Sciences and Agriculture, 46; Arts compared with the number registered and Sciences, 30; and Business

Sewall said a follow-up study will 329, 82 have been placed, 187 are be conducted next month to seeking placement, and 60 have lost determine the number of students contact with the placement office by who, having lost contact with the not sending post-graduate forwarding placement office, may have found addresses; Business Administration; jobs. These students number 164.

The University of Maine Board of office and all the campuses of the Trustees will decide next Wednesday whether the classified employees will

In the meantime, a union group is conducting an investigation of the entire University--- especially the budget and the administration.

Robert E. Montminy, executive director of Council 74 of the American Federation of State, County and Municipal Employees (AFL-CIO), of which the UMO classified employees union is an affiliate, ordered the investigation.

The investigation began "a couple of weeks ago," Montminy said, and a written report is due "within a month." One person is working full-time on the investigation. The investigative committee is made up of four persons.

Montminy would not disclose who is on the committee.

"The people on the committee, I will say, are not connected with University employment." Montminy said he ordered the

investigation as a direct result of the fight of the classified employees for a pay raise. "I want to see those in authority bring relief and justice to the classified employees," he siad. He asserted that many persons

are disturbed because they feel the classified employees are on a lower pay scale than the regular state employees because too much money going toward administration heavy at the top," Montminy said.

He said that the investigators are let alone the programs and the convincing them that we are spending investigating both the chancellor's policies." Three UMO professors assess significance of Pentagon Papers

Monday, July 5, the ninth and three UMO professors to add their last installment of the Pentagon Papers was published by the New York Times. The first of the series began almost a month ago. During newspapers across the country were restrained by the government from constituting a questionable violation Chinese. of the first amendment guaranteeing a free press.

The government was unable to prove "a clear and present danger" to the security of the country to the satisfaction of the Supreme Court, resulting in a decision in favor of the press that was not so much a landmark as a disappointment for the newspapers involved: Disappointing because the door was left open by the court for future attempts by the government to again prevent the press from publishing material they consider detrimental to the security of the United State.

The SUMMER CAMPUS asked

comments on the papers and the significance they hold for us all

John J. Nolde, dean of the the intervening time, several College of Arts and Sciences, who exceptional events occurred. Four discusses the historical perspective of the Papers, has been to the Far East twice in the past 20 years to study in further publication of the papers, Hong Kong, and speaks and reads

Here, in part, is what he has to

John J. Nolde

"First of all, it is clear that little effort was made by the planners of the Vietnam War to put that affair in its proper historical perspective. Little reference is made in the documents I have seen to the historical roots of the turmoil in that troubled part of the world.

"Secondly, I am surprised at how little the advice of Asian scholars was solicited in the determination of our Vietnam policy. Rarely, if ever, do their names appear.

With reference tothe first point, several observations might be made: Clearly, the problem of Vietnam did not begin with the Tet Offensive' of 1968, or the Tonkin Gulf Affair' of 1964, or even the Geneva Conference of 1954.

2. The story really begins in the 19th century with the extension of European political and economic control over most of South and Southeast Asia.

"3. It continues with the emergence

of Asian nationalism as a reaction against this control.

"4. It proceeds to the growth of the revolutionary movement in the manifestations of which appear strategy or the historical context in before the outbreak of World War

"5. The revolutionary movement, in turn, was accelerated by Japan's invasion of Vietnam in 1940 and the extension of Japanese power over the entire area during 1941 and 1942

"6. Its most modern phase began with the defeat of Japan and the establishment of a native of Vietnam government in 1945, free of either Japanese or European control.

"7. The civil war, the latest chapter of which we now witness, began which the events were taking place." in all its ferocity in 1946.

"Rarely are these points touched upon in the papers I have seen. The ETV's Maine News and Comment, Vietnam War becomes, instead, an integral part of the cold war thinking in America, and the all pervasive

anti-communist crusade. Policy makers in Washington looked upon the conflict primarily as an exercist in anti-communist military strategy, early 20th century, the first with little reference to policital

Court decision means to the press: "The principle of 'no prior restraint' (which means simply that a publication cannot legally be prevented or censored before publication) which has been the constitutional guideline for nearly 200 years is reaffirmed. The reaffirmation, however, should not necessarily be considered good for all

"Nearly all the Supreme Court justices writing opinions showed their minds were seriously troubled by government contentions that the country's security could be so easily breeched, and while they agreed this breech did not affect the safety of the republic they obviously felt another case might arise in the future where that safety could be affected.

So while at first glance the 'no prior restraint' problem is reaffirmed. I feel that a new precedent has been established for the government to feel free to ask the courts to referee disputes of this kind again in the

"Everyone should read all of the opinions written by the various justices; do not forget that the Court's decision was very brief, but that there were a total of seven additional concurring or dissenting opinions representing the thoughts of the justices in much greater detail.

"A close reading of all seven concurring and dissenting opinions is very revealing ... Perhaps most revealing of all were the dissenting decisions by the Chief Justice, by Justice Harlan, and by Justice Blackmun.

at issue have apparently already completely with Prof. Hamilton's warrants after publication, the fact assessment:

"What remains is this question: were the assumptions on which the Vietnam policy was based correct one or not? I happen to think not. Yet the 'Pentagon Papers' don't help us very much in finding the answer to

What they do record is a history of a policy failure, not because the assumptions behind the policy have been revealed as bankrupt, but because, as Max Frankel observes in the New York Times, the 'nation simply pursued excessive aims with insufficient means.'

"One question has arisen from this affair which will be around long after the 'Pentagon Papers' have been forgotten. This is the question relating to the 'right' of newspapers and magazines to publish material free from prior restraint. While it is true that criminal action may be taken against the press if evidence

remains that publication of much material that is classified, including files of investigative bodies, could lead to an intolerable invasion of privacy, to say nothing of character

"That the 'responsible' press can be trusted to employ high standards of discretion and fairness is small comfort with the nation overrun by publications whose sole justification for existence is sensationalism of the crudest sort.

"Clearly, the system of classification used by government is a sham. Yet, the problem remains that there are sound reasons for some system of classification. It really is unthinkable that we can live very long with a situation whereby government documents, no matter how sensitive, may be published. regardless of the consequences, with impunity.

This new car is the best reason not to buy a Volkswagen Beetle.

In a year when every car maker seems to be giving you one reason or another not to buy a Volkswagen Beetle, it might be a good idea to listen to the best reason: Volkswagen's Super Beetle.

It has almost twice the luggage space as the Beetle of yesteryear.

It has a longer-lasting, more powerful engine.

It has a new suspension system for a smoother ride.

It has a flow-through ventilation system to bring in fresh air when the windows are

The interior is, to be honest, much nicer.

The floor of the Super Beetle, for example, is fully carpeted.

In all, it has 89 things you could never find on a Beetle.

So of all the claims you'll hear this year by car makers that their cars are "better than a Beetle," there's only one car maker with 25 years experience in small cars to back it up.

The opinions expressed in this paper are not necessarily those of the University of Maine

More student aid

The story in this week's SUMMER CAMPUS on the Upward Bound program should remind those in the University's administration who decide on budgetary matters that it is becoming increasingly difficult for low-income students to enjoy the benefits of higher education.

The Upward Bound program is obviously commendable.

And so are others, including Onwards. But last semester the UMO student body voted 1,046 to 747 against the imposition of an extra \$5 tax to support the Onwards program, which gives academic scholarships to low-income students.

It is difficult to analyze the reasoning behind this defeat, although several students said that the average UMO student, having financial difficulties of his own, felt that the state should fund programs such as Onwards, and offer more in the way of other student tuition aid

This argument, i.e., that more state money should be used for student aid, cannot be

And although the University will have to cut back on operating expenses over the next two years, part of the money that has been

appropriated for the biennium can and should be transferred from various University programs into student aid.

For example, for the 1970-71 academic year, the program budget shows that 14.3 percent of the budget went towards administration. One percent went towards student aid.

High administration officials will argue that administrators' salaries are high because the University of Maine "wants to attract the most competent people.'

But some of the money which goes toward administration can be diverted towards other programs, especially student aid.

For example, there is no reason why the student handbook should have such an elaborate color cover.

The purpose of a university is to educate. The duty of a state university is to educate as many people from the state as possible.

Students who cannot pay college expenses should not be denied a college education.

The University's "competent administrators" should strive to open the University's doors to a greater number of competent students who are unable to pay their way through them.

Dr. Richard G. Emerick.

Notes on man and society

Of all living things Man has the most remarkable adaptive potential. For him adjustment to the inevitable ethnographic record has itself had variations in environment is not a matter of awaiting the gradual Not only has each cultural system manifestation of genetically based facilitated the adaptation of some physiological or structural responses particular group of men to their which may be present in the gene

Man, by virtue of his genetically based endowment can make adaptive behavorial responses the permutation Samoans' which represents an and combinations of which are almost limitless.

This head and hands kind of adaptive feature in Man is, of course, called culture and its rich tapestry of variation is what has given us the ethnographic record which cultural heterogeneity is important recording

live out their lives in terms of the certainly our sympathy. values and practices of that culture. These days with films and television and the myriad magazines superficially picturing other people and other ways of life it is possible for nearly everyone to recognize the fact and see something of the scope of Man's cultural diversity.

Some individuals, however, have enjoyed the privilege of living within the framework of other cultures for periods of time and have thus come to know what it means to Eskimos to Polynesians to be Polynesians and such persons may even have gained but we have not learned how to themselves to be Americans, for pluralism in a world whose distances

In observing the relationship between a people and their culture one thing becomes very clear. People achieve their humanity through their culture. They live and move and have their being in terms of it. Their way of life is not merely a colorful behaviorial affectation which makes their interestingly different from would we live in these days and it other people.

It is their very definition of themselves. No one should be surprised, therefore, to see people hostility.

The diversity of life ways one perceives when surveying the enormous adaptive utility for Man. special needs and circumstances, but the resultant rich variety of cultures. as different from each other as the Eskimos' is from that of the accumulated cultural pool within which the human animal can, it would seem, find the necessary resources to fashion his survival in the future.

It appears that the preservation of anthropologists have pioneered in and the fiercely passionate nationalism or tribalism, particularly Most men are born into a of small societies or minority groups particular cultural system and then may win our approbation and

> The young American Indian today finds his definition of himself in his Indianness. To save himself from the obliteration the human spirit has always done battle with, he must assert himself as an Indian and work to preserve or even to rediscover his cultural heritage. In so doing it would appear that he ultimately enhances the survival potential of Man by thus maintaining cultural heterogeneity.

This is where the rub comes, be Eskimos, or what it means to however. We may have learned to make it to the surface of the moon special insight into what it means to manage the maintenance of cultural are shrinking and whose human population is burgeoning. In today's cheek-by-jowl society the young Indian who asserts his Indianness will almost inevitably appear as a threat to the position and the interests of someone else.

It is the very nature of the social certainly constitutes one of our greatest current social problems. Working our way through the labyrinth of this dilemma will call for whose culture is threatened with whatever genius the social and inundation by another culture behavioral sciences can lay claim to showing signs of fear or even as well as the patience, forbearance and understanding of us all.

Trustees have problems

The University of Maine Board of Trustees will meet next Wednesday to decide how the University will spend its money over the biennium which began July 1.

The Administrative Council, consisting of the chanellor, met last Thursday to discuss to financial state of the University. They have forwarded their unpublicized recommendations to the trustees for approval.

The major problem facing the trustees is the question of a pay raise for classified employees. If the trustees approve a raise, then either the University system will have to cut back even more on operating expenses (Herbert Fowle, vice chancellor for business and financial affairs, has said that the purchase of goods and services will have to be cut back over the biennium), or else, we expect, raise tuition rates at least for the 1972-73 academic year.

In either event, a lot of pressure has been put on University Administrators.

It is difficult to see how the trustees could ignore employee demands.

The employees have threatened to initiate a petition drive for a referendum to abolish the chancellor's office -- the idea of which, while maybe attractive to many people in the state - could result in the demise of the "Super-University" system, the concept of which administrators have been working on for

Several members of the classified employees union at UMO have expressed a willingness to strike in September if their demands are not met. It is doubtful that the trustees will be able to take a chance and let this happen.

Next Wednesday's trustees meeting will be held in Bangor. Some interesting things could

\$400 roadblocks?!

The UMO department of public works should draw up a list of priorities. Although there really isn't such a department on campus, it would be difficult to convince some people.

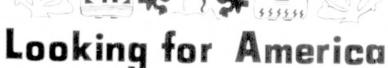

For example, the re-surfacing of the Stevens Hall parking lot could have waited.

And what about the huge cement bush pots gracing one corner of the mall? Each of the pots cost \$33. Three of them are now set up. And, according to Roscoe Clifford, superintendent of grounds and services, the

pots have been set up on an experimental basis. Clifford says they were set up for aesthetic Thanks should also go to all the state brown acid's a bummer, man" and a purposes, as well as to warn motorists that the mall is off limits to automotive traffic.

If the experiment is successful, then similar pots will be set up on the other three corners of the mall to replace the wooden roadblocks.

In all seriousness, \$400 for such gadrooned gypsum grunt-getters could be put to more picked up. useful purposes. May they crack in the winter.

Relevant non-fiction: this year's bestsellers Evolution by adaptation

could be man's salvation

Future Shock by Alvin Toffler 576 pp. New York Bantam Booke \$1.95

Our world suffers from a disease. Some call it corruption, some, Progress, others, Fate. Alvin Toffler calls it Future Shock. Future Shock is the inability of many individuals to years each, there have been about cope with the enormous rate of change continually sweeping through fully 650 were spent in caves . . . And their existence.

physical and psychological, that are a today have been developed within 3,500 years later, when the first mail great part of the shape of our present the present, the 800th, lifetime." and could have disastrous consequences on our Future if some effective way of assimilation and adaptation is not adopted soon.

read Toffler's presentation slowly 1960, there were 141, and today mph line .. by the 1960's rocket and unemotionally, if possible. Otherwise the reader may find upward at a rate of six and a half

Shock." Toffler spews a barrage of facts in the first few chapters that the rate is about 10 Q per century. give an overwhelming sense of the This means roughly that half of all speed with which he says our the energy consumed by man in the consuming, discarding.

For example: "If the last 50,000 years of man's existence were divided into lifetimes of approximately 62 800 such lifetimes. Of these 800, It has repercussions, both material goods we use in daily life

"In 1850, only four cities on the face of the earth had a population of

world urban population is rocketing

Institute of Social Science in The optimistic estimates, Europe was means a doubling of the earth's urban population within 11 years."

"Let us use the letter "Q" to burning some 33,000 million tons of coal. In the 181/2 centuries after Christ, the total energy consumed averaged less than one half Q per century. But by 1850, the rate had risen to one Q per century. Today existence is moving, changing, past 2,000 years has been consumed in the last one hundred."

"... In 6,000 B.C., the fastest transportation available to man over long distances was the camel caravan, averaging eight miles per hour. It was not until about 1,600 B.C. when the chariot was invented that the the overwhelming majority of all the maximum speed was raised to roughly 20 miles per hours . . . nearly coach began operating in England in 1784, it averaged a mere 10 mph.

"The first steam locomotive introduced in 1825, could muster a one million or more. By 1900 the speed of only 13 mph ... by 1938 One would be well advised to number had increased to 19. But, by airborne man was cracking the 400

"Prior to 1500, by the most transient society.

Hague. This single stark statistic producing books at a rate of 1,000 friends, home, possessions and year. . . . By the mid 60's, the output cases, no remnants remain, as the age stand for the energy derived from of books on a world scale, Europe of "throw-away" comes into figure of 1,000 titles per DAY."

Alvin Toffler

mph and men in space capsules were into the future at a rate he is able to harness change but he must himself displaying the anxiety and percent per year, according to Edgar circling the earth at 18,000 mph. unequipped to handle. The increasing develop the ability to channel it and Plotted on a graph, the line momentum is accompanied by a coexist at peace with it. This, in representing progress in the past continual metamorphosis of Toffler's opinion, is the only way we generation would leap vertically off environment. Toffler repeatedly can reach out and humanize distant emphasizes the fact that we live in a tomorrows.

The young will show the way

Nothing, including family titles per year . . . By 1950, Europe anything else you can think of, was producing 120,000 titles a remains the same. In fact, in many included, approached the prodigious maturity. Toffler cites trade-in Barbie dolls, paper wedding gowns, All of these things build up a disposable products of every sort and Rent-A-Anything as examples of the diminishing permanence of contact between men and things.

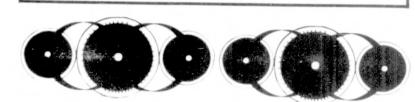

Toffler also sounds a death knell for personal relationships. The frenetic pace of the future will not allow for such old-fashioned realities as life-long marriage, friendship or family ties. Some of this can already be seen in the burgeoning divorce rate, the dissolution of the nuclear family and the rise of varying life styles such as commune living and homosexuality.

The mind is certainly not exempt from the effects of Future Shock. The overstimulation caused by constant barrage on the senses results in irrational behavior, confusion, apathy and varying degrees of irritability.

Toffler prophesizes that man will be unable to survive in his own world if he does not learn the guidance of planes approached speeds of 4,000 fantastic momentum, thrusting man his own evolution. Man may not be

Group members write there own destined to be released as a single --The name of the album is Bootleg Cellophane Lady/Nowhere to Go. Watch for it. It has a transition

The Greening of America by Charles A. Reich 433 pp. New York

Add a word to your vocabulary today. Greening. What does it mean? The obvious answer is budding, growth, vendure; all the signs of life as we humanly know it. That is one of the senses which can be applied to its use in the title of Charles Reich's book The Greening of America.

Bantam Books \$1.95

Reich looks forward to a new growth in America, the growth of blending the instruments into such a what he calls Consciousness III. delicate and accoustically clear tonal Consciousness III is the new open pattern. You find yourself thinking mind, the living, breathing freedom during each cut, "Gee, wouldn't it be of youth in this country. This nice if there were a little choral or freedom is a way of life liberated anything about it. world of mechanized monotony that

we witness daily. Rather, Reich recognizes the ability of youth to take machines for There are three in the group (two what they are -- pieces of metal included on this album) names of and then to discard or ignore them, as they see fit. In order to arrive at this conclusion, however, the reader

Webster's International Dictionary gives another definition of greening as the act of making something or someone seem green or inexperienced; in other words a trick, a hoax. That greening is the experience of America in years past.

What other than a giant hoax, a

land of the free?' napalm, grenades and machine guns? and Thursday. Or maybe it refers to National Guardsmen defending themselves against unarmed students with loaded of Maine and is shown for the

Orientation movie is free and it's even pleasant but it isn't any masterpiece

If you are besieged with the cruel trick, could have made problem of what to do in the faults; one being the lack of winter 'America the Beautiful" into the evenings, provided, of course, that place where we live today? What you have finished your four hours of happened to "Home of the brave, dedicated homework, you might try going to the movies. There is this The brave. Does that refer to movie, and it's FREE, and it's on men, trained by their government to campus, and it's shown in 137 kill women and children with Bennett Hall at 8:30 p.m. on Monday

> The movie is about the University freshmen orientation students and

It seems to have two glaring shots and the other being that the film is only about 15 minutes long. But it's pleasant.

The parents love it, of course After all, the University is all rosey to them, until they find out about 12-hour parietals. Freshmen reaction was mixed. They seemed to like the music most of all. I'm sure they got more out of the 15-minute film that the grand bus tour.

But for all regular UMO students and faculty and employees who sit The movie is pleasant and around and read the SUMMER about the origins of an undeclared although no masterpiece, an CAMPUS and watch TV every night, war? How about the crowds of enjoyable collage of filmed moods set why not go to the movies Monday Americans beaten and tear-gassed by to familiar music. Filmed by a special night (or Thursday). After all, it's Boss Daley's troops because they had seminar class last spring the film tries free. How many things in life besides the audacity to want a say in the to explore the many moods one TV and the SUMMER CAMPUS are

Inland east: land of lakes and hills

One of the most underrated on these bodies of water varies, but is route one on the Canadian border scenic areas of Maine is one of the most cherished by those who are familiar with it. Every year, a small fraternity of fishermen and hunters returns to the hills and forests east of the Penobscot River for some of the best fishing and hunting in the state.

This area, though now used mostly as a sportsman's haunt, has much to offer to someone interested only in scenery, peace and quiet. There is plenty of that between here hardly over-fished. To the north of

Route 9, which can be reached by going across the Penobscot River Ponds, as well as Nicassis, Sepanic either at Bangor or Old Town and following route 178 to a point almost directly across from Veazie. From there route 9, the "airline road" as it is known locally, heads east.

In East Eddington, the road begins to climb out of the Penobscot Valley and soon is meandering through the narrow valleys of the Clifton Hill, Chemo (Ke-mo) Pond is just to the north, and along one stretch of the road which balances precariously on a narrow ridge, a tributary stream and marsh become

Wildlife in this area is plentiful, and despite the fact that Bangor is hardly a dozen miles distant, it is not unlikely that you might find a moose wading around in the marsh.

Even if there is nothing that spectacular, you won't need a sign to tell you "Civilization ends here.

Perhaps the activity that the airline road area is most conducive to is hill-climbing. The hills all vary in height and character, but one property common to many is that they are close enough to the road that a long walk to the base is not

Some hills seem to rise straight up over the road. The highest hill is not necessarily the best, and there are many factors which might determined which view is the one you eant. Also, climbing conditions must be taken into account: some hills are covered with thick underbrush while others are almost

About halfway between Clifton and Aurora is Peaked Mountain. That is, there is a peaked mountain, but it is only one of several so named hills in the state. This particular one is 1.200 feet high and overlooks the Penobscot Valley, as well as all the surrounding area. However, about 40 miles further is Peaked Mountain (938 feet). That looks up at nearby Pleasant Mountain (1,378) and Lead Mountain (1.475).

Obviously, the hills and mountains along route 9 are far too numerous to mention, but you lowbush blueberries that are raked needn't know the name of a hill to each year by the migrant Indians who

Of course, the strenuous exer afternoon, so a retreat to a quiet lake

Just past Aurora (don't blink, you'll miss it), you are presented 179 passes through Waltham and near Webb Lake and offers access to Molasses Pond, Georges Pond, and finally ends up intersecting route 182 in Franklin. From there Donnel

most part beaches are uncrowded and

For fishing, the best lakes lie to the north of route 9. In Aurora, just a mile or so past the route 179 intersection is an unnumbered road that turns up to Great Pond. From a rare commodity, but neighboring Brandy pond and Alligator lakws are them, accessible only by distant route 188 are Eskutassis and Dick

usually limited. However, for the there are no towns that compare with the vast urban sprawl of Veazie. Not until Woodland and Calais is there anythingresembling civilization. However, if civilization is what you're after, number nine is not the suggested route.

Route 9 terminates in the eastern here, ground transportation becomes end of Washington County, just inland from Eastport and Passamaquoddy Bay. In this, the easternmost corner of the United States, there is quite a variety of things that make you wonder about the axiom that America was settled from east to west.

it now tands, astride route 179 near Calais is the Passamaquoddy Indian refuge. reservation. Nearby, the names of towns and lakes bear their touch; Pocamoonshine Lakes, Quoddy Village

To the north, past Woodland, is Princeton with its network of

Either civilization never reached secondary and sub-secondary roads here or it just skipped by. Perhaps it that connect the pavement with the is just as well, as some of the more Machias Lakes - - six in all - which are colorful Indian names might have considered by many to be the best been changed to those never-ending lakes for fresh-water fishing in the English and French "New's ---." As state. To the south of Woodland is the Moosehorn National Wildlife

Throughout this region between the Penobscot and Canada are Meddybemps, Cathance and hundreds of square miles of uninterrupted forest, hills seldom Pennamaquam, Cobscook, and climbed by anyone until their trees are ready for harvest, and scores of unpolluted streams and lakes. All things considered, it is precisely the type of area that conservationists across the nation are trying to save.

> If you are from Newark, N.J.: Lawrence, Mass.; or Westbrook, Me., here is an opportunity to see nature as it can be found in few places south of here on the east coast. Unlike the walk through the woods that ends abruptly after three miles at the side of yet another road, from the airline road you can actually walk 30 or 40 miles in most every direction without hitting pavement.

Your trip down route 9 may take a while. To make the most of a good thing, it would be advisable to plan overnight accommodations somewhere down East. Lodging is somewhat sketchy on the airline, but in the Passmaquoddy bay area, where tourists are more of a prized commodity, there is usually adequate service.

If you plan to leave summer session for a weekend in the woods, a tent could be put to some use. However, it should be remembered that most of the forest land you will see is owned by the paper companies and is therefore private property. However, there are many places where camping is permitted in the area. Whether you choose this or the cozy comfort of a motel room, the scenery outside is still the same.

WEEKEND RESIDENCE - - Campers park along the shore of a northeastern Maine lake.

To described each of these individually would require volumes. However their mere remoteness lends them a quality that will never be found in Sebago or Moosehead. Most lie within the seemingly endless pine forests which are owned by the timber and paper companies. The area is mostly hilly and almost entirely unpopulated. It is the antithesis to the teeming hordes of the megalopolis shopping center or the Cony Island beaches.

For a different kind of solitude, a turn down route 193 in Beddington will take you to the Dublois-Cherryfield blueberry barrens. On these vast rolling glacial deposits are miles and miles of set up shanty towns thereon.

is privately owned, but is usually travelled as frequently as the public roads to the state fish hatchery or the summer camps on Schoodic Lake.

The berries usually ripen in early with a choice. On the right, route August and the odor of fresh blueberries rising from the billions of Graham Lake. Route 200 goes past berries that turn the fields blue on a hot August day is delectable - - if you like blueberries.

Aside from a few buildings in Pond, Runk and Spring River lakes Beddington, route 9 is a wildernes road from Aurora to tiny Wesley. The availability of public beaches Even over the remaining 30 miles to
