**TWENTY-EIGHTH**

**SPACE CONGRESS**

**PROGRAM**

Cocoa Beach, Florida April 23, 24, 25, 26, 1991

## Chairman's Message

**"Space Achievement: A Global Destiny"** has been chosen as the theme of our **28th Annual Space Congress**. With the extraordinary international events of the past year, and with continued planning for cooperative space ventures, we feel that space accomplishments in the future will truly be a global enterprise. Once again, the Space Congress has attracted an outstanding group of leaders in the civilian and military space programs who will share their vision of the future for space achievement. The Space Congress will be bigger and better; including international participation, and a new additional exhibit area. Please join us in Cocoa Beach on **April 23-26, 1991**, for an exciting and interesting program.

The **28th Space Congress** is sponsored by the Canaveral Council of Technical Societies (CCTS) and supported by the National Aeronautics and Space Administration (NASA) and the Department of Defense (DoD). Extensive involvement of local aerospace contractors and the Space Coast communities have helped the Space Congress maintain its well-deserved reputation as the premier conference on space technology.

This year's panel sessions focus on current and future space exploration initiatives, the Space Station Freedom Program, DoD Operations and DoD Research and Development. Technical paper sessions will provide detailed information on such topics as Commercialization of Space, Interstellar Initiatives, Space Education, Science Payloads, Space Shuttle and Space Station. In addition, special briefing sessions using technical posters will be presented on international initiatives, by recognized space authorities throughout the congress.

We have a truly distinguished group of speakers for Space Congress this year. We will have Dr. Mark Albrecht as the keynote speaker. Other speakers include Arnie Aldrich, NASA Associate Administrator for Aeronautics and Space Technology; Brig. Gen. Jimmey Morrell, 9th Space Division Commander; Lt. Gen. Thomas S. Moorman, Commander Air Force Space Command; Dr. Lynn Weaver, President, Florida Institute of Technology; Lt. Gen. Don Cromer, Commander Space Systems Division; and Mr. Dick Kohrs, NASA Director for the Space Station Freedom Program. Lt. Gen. Forrest McCartney will introduce the "Meet the Astronauts" Panel. In addition, an outstanding group of leaders will be chairing the paper sessions.

On behalf of the committee, I invite you to join the **28th Space Congress** in April and I am looking forward to seeing you there.

*Bill McCaslin*

## John W. Young NASA Astronaut

John W. Young was born September 24, 1930, in San Francisco, California.

He graduated from Orlando High School, Orlando, Florida and received a Bachelor of Science degree in Aeronautical Engineering with highest honors from the Georgia Institute of Technology in 1952.

Upon graduation from Georgia Tech, Young entered the United States Navy. After serving on the west coast destroyer U.S.S. Laws for a year, he was sent to flight training in props, jets and helicopters. He was then assigned to 'Flight Squadron 103' for four years, flying Cougar and Crusader aircraft.

After test pilot training at the U.S. Navy Test Pilot School in 1959, he was assigned to the Naval Air Test Center for three years. In 1962, he set world time-to-climb records to 3,000- and 25,000-meter altitudes.

Young was selected as an astronaut in 1962. His missions include:

- Gemini 3, the first manned Gemini mission, where he operated the first computer on a manned spacecraft in 1965.
- He was commander of Gemini 10, which involved a dual rendezvous with two separate Agena target vehicles.
- He was command module pilot of Apollo 10, which orbited the moon and completed a lunar rendezvous in 1966.
- He was spacecraft commander of Apollo 16, a lunar exploration mission in 1972. Two hundred pounds of rocks were collected during this mission while on the moon.
- He was spacecraft commander of STS-1, the first flight of the Space Shuttle Columbia in 1981. Columbia was the first manned spaceship to be flown into orbit without the benefit of previous unmanned orbital testing. Columbia was also the first winged reentry vehicle to return from space to a runway landing.
- He was spacecraft commander of STS-9, the first Spacelab mission in 1983. This 10-day mission performed over 70 experiments, and returned more scientific and technical data than all previous Apollo and Skylab missions.

Young retired from the Navy as a Captain in 1976, after completing almost 25 years of active military service and logging more than 11,700 hours flying time, including 835 hours in six space flights. He is the first person to fly in space six times.

John Young has been awarded the Congressional Space Medal of Honor, three NASA Distinguished Service Medals, two Navy Distinguished Service Medals, and three Navy Distinguished Flying Crosses. He was also the recipient of more than 65 other major awards, including four honorary doctorate degrees, and was inducted into the National Aviation Hall of Fame in 1988.

He is married to the former Susy Feldman of St. Louis, Missouri. They have two children; Sandy, born April 30, 1957 and John, born January 17, 1959.

His recreational interests include wind surfing and bicycling.
