Contents

Chapter 1: Introduction

- 1.1: The Historical Development of Calculus
- 1.2: Preliminaries

Chapter 2: Limits & Continuity

- 2.1: The Velocity Problem
- 2.2: Defining and Evaluating Limits
- 2.3: Infinite Limits
- 2.4: Limits at Infinity
- 2.5: Continuity
- 2.6: Exploring Continuity
- 2.7: The Velocity Problem, Revisited

Chapter 3: The Derivative

- 3.1: The Tangent Line Problem
- 3.2: Defining the Derivative
- 3.3: The Derivative Function
- 3.4: Derivative Formulas
- 3.5: Higher Derivatives
- 3.6: Antiderivatives
- 3.7: Differential Equations and Initial Value Problems

Chapter 4: Computing Derivatives and Antiderivatives

- 4.1: Trigonometric Functions
- 4.2: Exponential Functions
- 4.3: Products
- 4.4: Differentials
- 4.5: Compositions
- 4.6: Implicit Differentiation
- 4.7: Derivatives of Inverse Functions
- 4.8: Related Rates

Chapter 5: Areas & Definite Integrals

- 5.1: Introduction
- 5.2: Riemann Sums

- 5.3: The Definite Integral
- 5.4: The Fundamental Theorem of Calculus
- 5.5: Applications of the Fundamental Theorem of Calculus
- 5.6: Numerical Integration

Chapter 6: Applications

- 6.1: Optimization
- 6.2: Separable Differential Equations

Interlude: Rigor in Calculus

- I.1: Historical Considerations
- I.2: Derivatives
- I.3: Definite Integrals
- I.4: Infinite Series
- I.5: Precise Definition of Limit

Chapter 7: Precise Definition of Limit

- 7.1: Introduction
- 7.2: Forming a Precise Definition of a Limit
- 7.3: A Systematic Method for Determining δ
- 7.4: Limits at Infinity and Infinite Limits
- 7.5: Proofs of the Limit Laws

Chapter 8: Continuity

- 8.1: Continuity Proofs
- 8.2: Derivatives of Trigonometric Functions

Chapter 9: Mean Value Theorem and Fundamental Theorem of Calculus

- 9.1: Mean Value Theorem
- 9.2: Fundamental Theorem of Calculus

Chapter 10: Applications of Derivatives and Integrals

- 10.1: Limits
- 10.2: The Method of Slicing
- 10.3: Average Value

Chapter 11: Techniques of Integration

- 11.1: Trigonometric Substitution
- 11.2: Integrating Rational Functions
- 11.3: Improper Integrals

Chapter 12: Series

- 12.1: Introduction
- 12.2: Sequences
- 12.3: Series
- 12.4: Telescoping Series
- 12.5: Geometric Series
- 12.6: Test for Divergence
- 12.7: Integral Test
- 12.8: Comparison Tests
- 12.9: Series with Positive and Negative Terms
- 12.10: Ratio and Root Tests
- 12.11: Power Series
- 12.12: Taylor Series
- 12.13: Shortcuts for Finding Taylor Series
- 12.14: Using Taylor Series
