

Session 1, Room 3: Certification – Aircraft

- Process clarification – How do we certify new designs?
- Requirements – What requirements do I need to meet? Set by:
 - The aircraft (size, energy, performance)
 - It's proposed use (Concept of Operation/Mission)
 - Intended Area of Operation (Airspace Integration)
- Operational Influence – Why do Commercial Ops and Hobbyists have different standards?
 - Risk exposure
 - Pressure to operate
 - Public expectation
