Resurrecting My Revolution

Using Social Link Neighborhood in Bringing Context
to the Disappearing Web

Hany M. SalahEldeen & Michael L. Nelson

Old Dominion University

Department of Computer Science
Web Science and Digital Libraries Lab.

TPDL 2013

Six Socially Significant Events

- From Twitter, Websites, Books:
 - The Egyptian revolution.
- From Twitter Only:
 - Stanford's SNAP dataset:
 - Iranian elections.
 - H1N1 virus outbreak.
 - Michael Jackson's death.
 - Obama's Nobel Peace Prize.
 - Twitter API:
 - The Syrian uprising.

Social Events Having a Bimodal Time Distribution

Resources Missing & Archived

Collection	Percentage Missing	Percentage Archived
Michael Jackson	36.24%	39.45%
	31.62%	30.78%
Iran	26.98%	43.08%
	24.47%	36.26%
H1N1 Outbreak	23.49%	41.65%
	25.64%	43.87%
Obama	24.59%	47.87%
	26.15%	46.15%
Egypt	10.48%	20.18%
Syria	7.04%	5.35%

Missing and Archived Percentages Across Time

Previous Conclusions

Content Lost Percentage = 0.02(Age in days) + 4.20

Content Archived Percentage = 0.04(Age in days) + 6.74

- Measured 21,625 resources from 6 data sets in archives & live web.
- After a year from publishing about **11%** of content shared on social media will be gone.
- After this we are losing roughly **0.02%** daily.

New Research Questions

- **Validity:** is our estimation model still valid?
- **Existence Stability:** do resources on the live web remain missing?
- **Archival Stability:** do resources in public archives persist?
- **Social Context:** how can we extract social context of missing resources and potential replacements?

Revisiting Existence

- From previous study:

$$\text{Content Lost Percentage} = 0.02(\text{Age in days}) + 4.20 \quad (1)$$

- Rerunning after a year:

	MJ		Iran		H1N1		Obama		Egypt	Syria
Measured	37.10%	37.50%	28.17%	30.56%	26.29%	31.62%	32.47%	24.64%	7.55%	12.68%
Predicted	31.72%	31.42%	31.96%	30.98%	30.16%	29.68%	29.60%	28.36%	19.80%	11.54%
Error	5.38%	6.08%	3.79%	0.42%	3.87%	1.94%	2.87%	3.72%	12.25%	1.14%

Average Prediction Error = 4.15%

Revisiting Archival

- From previous study:

$$\text{Content Archived Percentage} = 0.04(\text{Age in days}) + 6.74 \quad (2)$$

- Rerunning after a year:

	MJ		Iran		H1N1		Obama		Egypt	Syria
Measured	48.61%	40.32%	60.80%	55.04%	47.97%	52.14%	48.38%	40.58%	23.73%	0.56%
Predicted	61.78%	61.18%	62.26%	60.30%	58.66%	57.70%	57.54%	55.06%	37.94%	21.42%
Error	13.17%	20.86%	1.46%	5.26%	10.69%	5.56%	9.16%	14.48%	14.21%	20.86%

Average Prediction Error = 11.57%

in all cases, **our archival predictions were too optimistic**

Measured Vs. Predicted

Percentages missing from the live web and percentages archived in public archives, measured and predicted

Interesting Phenomenon: Reappearance On The Live Web And Disappearance From The Archives

Event	MJ	Iran	Obama	H1N1	Egypt	Syria	Average
% Re-appearing on the web	11.29%	11.48%	6.63%	3.68%	4.21%	1.97%	6.54%
% Disappearing from archives	9.98%	11.17%	15.65%	5.46%	2.81%	2.25%	7.89%
% Going from 1 memento to 0	2.72%	2.89%	4.24%	1.96%	0.23%	0.28%	2.05%

Missing = Disappearance – Reappearance

Reappearing And Disappearance Predictions

$$\text{LiveContent Reappearing} = 0.01(\text{Age in days}) - 1.42$$

$$\text{Mementos Disappearing} = 0.01(\text{Age in days}) - 2.22$$

Tweet Existence

Problem:

We don't have the URIs of most of the tweets

Solution:

compute loss of other tweets linking to the URI:

for each resource in the datasets:

- Extract all the tweets that link to the resource using Topsy API (up to 500 tweets)
- Check existence of each tweet.
 - (Topsy (mostly) does not delete indexed tweets)

Using Topsy API

Percentages of social Posts Disappearing from the Live Web

Context Discovery And Shared Resource Replacement

Problem:

140 characters limits the description of the linked resource. If it went missing, can we get the next best thing?

Solution:

- Shared links typically have several tweets, responses, and retweets
- We can mine these traces for context and viable replacements

Context Discovery

Marco Pepe @ilthemadcap

"18 Days In Egypt" a collaborative documentary project about Egypt's ongoing revolution. 18daysinegypt.com

3 months ago Reply Retweet Favorite

Linking to:

<http://beta.18daysinegypt.com/>

The screenshot shows the homepage of 18DAYSINEGYPT. At the top, there is a navigation bar with the site name and links for 'EXPLORE', 'ABOUT', 'HOW TO PARTICIPATE', and 'HELP'. On the right side of the navigation bar are links for 'REGISTER', 'LOGIN', and an Arabic language option. Below the navigation bar, the main heading reads 'You witnessed it, you recorded it. Now, let's write our country's history.' followed by 'Join 18 Days In Egypt in documenting Egypt's ongoing revolution.' To the right of this text are social media icons for Twitter, Facebook, YouTube, and a fourth icon. Below the main heading, there are two columns of content. The left column is titled 'Your story matters' and includes the text 'We all have stories to share. Learn how you can join the effort to document Egypt's history.' with a 'Watch Video' link. The right column is titled 'Participate' and includes the text 'Did you take photos or videos, or tweet and post to facebook? Add your story for future generations to see.' with a 'Sign Up Now' link. There are four small images of people: a man in a white headscarf, a woman, a man with a camera, and a man with a mustache. A vertical 'Feedback' button is visible on the left side of the page.

The screenshot shows a Vimeo video player interface. At the top left is the Vimeo logo and navigation links: Join, Log In, Create, Watch, Upload. A search bar is on the right. The video player itself has a dark background with the text '18DAYS INEGYPT' in white and '18 يوم في مصر' in Arabic. Below this is the subtitle 'A COLLABORATIVE DOCUMENTARY PROJECT ABOUT THE REVOLUTION'. On the right side of the player are icons for Like, Later, and Share. At the bottom, there is a play button, a progress bar showing 01:09, and a caption: '18 Days in Egypt | Call to Action - Subtitled' from '18DaysInEgypt Team' 1 year ago.

The screenshot shows the website for '18DAYS IN EGYPT'. The header includes the site name and navigation links: EXPLORE, ABOUT, HOW TO PARTICIPATE, HELP, REGISTER, LOGIN, and an Arabic link. The main content area features the text: 'You witnessed it, you recorded it. Now, let's write our country's history. Join 18 Days In Egypt in documenting Egypt's ongoing revolution.' There are social media icons for Twitter, Facebook, YouTube, and RSS. A 'Feedback' button is on the left. Below the main text is a 'Your story matters' section with a video thumbnail and the text: 'We all have stories to share. Learn how you can join the effort to document Egypt's history. Watch Video'. To the right is a 'Participate' section with a grid of photos of people and the text: 'Did you take photos or videos, or tweet and post to facebook? Add your story for future generations to see. Others are
good replacement
candidates

The original
resource

Recommendation Evaluation

We extract a dataset of resources that are currently available:

- Pretend these resources no longer exist (for a baseline)
- Each of the resources are textual based
- Each resource have at least 30 retrievable tweets.

→ Extracted 731 unique resources

Recommendation Evaluation

We use boiler plate removal library* to remove the template from the:

- linked resources
- top 10 retrieved results from Google

→ We use *cosine similarity* to compare the documents

* <https://github.com/misja/python-boilerpipe>

Similarity Measures In Resource Replacements

Results

- 41% of the test cases we can find a replacement page with at least 70% similarity to the original missing resource
- The search results provide a mean reciprocal rank of 0.43

Conclusions

- We validated our model in predicting the resource existence on the current web with $\sim 4\%$ error after one year.
- The archival prediction on the other hand produced a large error $\sim 11.5\%$
- We explored a phenomenon of reappearing on the web after disappearing (6.54%), and disappearing from the archives too (7.89%).
- The removal of search engine caches in the most recent Memento revision could be a possible explanation of the disappearance from the archives.

Cont. Conclusions

- Measured the estimated percentage missing from the tweets ~10.5%.
- Utilized Topsy API to extract context information about tweets with missing resources.
- Investigated the viability of finding a replacement resource to the missing one.
- In 41% of the cases we were able to extract a replacement resource that is 70% or more similar to the missing resource.
