CHANGE YOUR WORLD!!!

Change the World Event

On October 5th from 3–5 PM REMP will be sponsoring the first of many change the world events. This event will be held in the McDonald Lounge. This kickoff event will show how much energy you can save just by switching from incandescent bulbs to compact fluorescent ones.

The Change the World campaign will be all

Bulb for a Bulb Makes the Whole World See

In the next couple of weeks, resource representatives will be handing out compact fluorescent light bulbs to the students in the towers in exchange for their incandescent bulbs. Compact fluorescent bulbs use 66% less energy and last ten times longer than incandescent ones. All old usable incandescent bulbs will be donated, the ones that don't work will be properly disposed of.

We are starting this program off in the towers to see how much energy is reduced with the use of the CFLBs. The towers are also the most

Ways to Save with Lighting...

1) **Get 1 instead of 10**, since CFLBs last ten times longer than your normal incandescents, you save yourself 10 trips to the supermarket when your bulb burns out.

2) **Look to Lumens (not watts for light)**, lumens are a measurement for light output. Energy efficient lighting provides the same output of light with fewer watts.

3) **Consider the environmental savings!** Your room produces a significant amount of greenhouse gases because of the energy that is used. Efficient light bulbs reduce pollution!
