Transfer credit may be granted for graduate coursework completed prior to entering the program, but strict limitations apply. The Ed. S. in School Psychology degree program involves a minimum of three years of intensive study. Though it is possible to complete the first year of the curriculum on a part-time basis, please note that practicum during the second year involves two days per week working in a school with a school psychologist, and internship is a yearlong fulltime supervised experience. Consequently, full-time study is recommended and preferred. Graduates of the program are immediately eligible for School Psychologist Certification from the Missouri Department of Elementary and Secondary Education and the Nationally Certified School Psychologist credential from the National Association of School Psychologists. As such, graduates from the program will meet or exceed certification requirements in the majority if not all states in the country.

## Educational Specialist in School Psychology (Ed.S.) Curriculum

First Year			
Fall	Hours Spring	Hours Summer	Hours
ED PSY 6222 or 6210	3 ED PSY 6310	3 ED PSY 6115	3
ED PSY 6530	3 ED PSY 6550	3 ED REM 6719	3
ED PSY 6532	3 ED REM 6710	3	
ED PSY 6545	3 ED REM 6718	3	
	12	12	6
Second Year			
Fall	Hours Spring	Hours	
ED PSY 6540	3 ED PSY 6536	3	
ED PSY 6590	3 ED PSY 6542	3	
ED REM 6730	3 ED PSY 6591	3	
SPEC ED 6437 or 6325	3 ED REM 6732	3	
	12	12	

Third Year		
Fall	Hours Spring	Hours
ED PSY 6598	3 ED PSY 6599	3
	3	3
Total Hours: 60		

In addition to completion of the 60-hour curriculum listed above, candidates for the Ed.S. in School Psychology degree must receive passing scores on the following programmatic assessments: Praxis School Psychologist Examination, two Problem-Solving Case Studies (one academic, one behavioral), and Comprehensive Examination.

## Graduate Certificate in Program Evaluation in Education

The graduate Certificate in Program Evaluation in Education provides specialized study in the theory and practice of program evaluation. The program will build on the content area knowledge base of the individual's bachelors and masters degree. The focus of the Program Evaluation in Education certificate will be on the skills delineated in the standards and guidelines of the American Evaluation Association and the Joint Committee on Standards in Educational Evaluation.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/BqE>

The certificate will consist of 18 hours of core courses and internship experiences. Graduate credits earned in equivalent courses in Education or related Social Science disciplines may meet some of these requirements.

Research Methods		
ED REM 6750	Advanced Research Design In Education	3
ED REM 7771	Quantitative Research Methods I	3
ED REM 7781	Qualitative Methods In Educational Research I	3
Program Evaluation		
ED REM 6730	Educational Program Evaluation	3
ED REM 6732	Advanced Theory And Practice In Educational Program Evaluation	3
ED REM 6990	Internship	1-10
Total Hours		16-25

Graduate Certificate programs are a minimum of 18 credit hours.

## Educational Psychology Courses

**ED PSY 2212 Introduction To Learners And Learning: 3 semester hours**  
Prerequisite: PSYCH 1003. This course examines, discusses and applies theories on infant, child, and adolescent development; examines student growth in various domains, including cognitive, linguistic, physical, and socio-emotional; and analyzes how different cultural contexts affect learning. Through readings, in-class activities, and field assignments outside of class time, students will consider how to apply these theories to create appropriate learning environments.

**ED PSY 3312 Psychology of Learning, Instruction, and Assessment: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212 or equivalents and admission to Teacher Education program. Application of educational psychology theories and research to learning, instruction, and assessment.

Candidates will gain experience working with individuals and groups in settings that will provide the opportunity to design and evaluate instruction and assessment. Field assignments outside of class hours required.

**ED PSY 6030 Instruction, Learning And Assessment: 3 semester hours**

Prerequisite: Admission to Graduate School. Reviews cognitive theories and research to examine how teachers can improve the design of classroom instruction, including the development of units, lesson plans, and assessment strategies. Students will critically evaluate current educational practices, design appropriate assessments based on instructional goals, and assess their own professional development as teachers.

**ED PSY 6111 Psychology Of Education: 3 semester hours**

Current psychological theories and research that guide inquiry and decision making in education. Topics surveyed include behavior, development, learning, instruction.

**ED PSY 6113 Psychopathology And Diagnosis: 3 semester hours**

Same as CNS ED 6070. Prerequisites: Graduate Standing. Covers etiology, assessment and diagnosis of mental disorders using contemporary diagnostic systems. Course materials and assignments address the dynamics of adjustment and treatment implications for counselors, school psychologists, and others in the helping professions.

**ED PSY 6115 Personality And Social Development: 3 semester hours**

Prerequisites: Graduate standing. A foundational course integrating major theoretical perspectives on personality and social development. Emphasis is on the dynamic interplay of sociocultural influences on personality and identity development, including the impact of social contexts such as the school on development.

**ED PSY 6210 Life-Span: Individual and Family Development: 3 semester hours**

Prerequisites: Graduate Standing. Critical analyses of theories of human development including readings from empirical research and cross-cultural comparisons focusing on strategies to enhance developmental outcomes through relationship and environmental opportunity.

**ED PSY 6215 Psychology Of Early Childhood Development: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. A survey of the theories, concepts and research which inform the field of early childhood development and help caregivers and teachers understand the cognitive, social, and emotional changes that take place from birth through the primary years of schooling.

**ED PSY 6217 Foundations Of Citizenship Education: 3 semester hours**

Prerequisites: Graduate Standing. Introduction to citizenship education providing a range of knowledge of civic participation, concepts of democracy, the democratic purposes of education, and the developmental of civic identity and political thinking, attitudes, and engagement. Comparison of historical and contemporary approaches to democratic citizenship education in the United States.

**ED PSY 6222 Advanced Studies in Child and Adolescent Development: 3 semester hours**

Prerequisites: Graduate Standing. Investigates current psychological theories and research regarding the physical, cognitive, and social-emotional development of children and adolescents.

**ED PSY 6225 The Psychology Of Adolescence: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. Current research on the psychological changes which occur during adolescence. Attention is paid to the family, school, peer groups, and contemporary settings that practitioners must understand to help young people meet the psychosocial challenges of adolescence.

**ED PSY 6310 Psychology Of Learning Processes: 3 semester hours**

Prerequisites: ED PSY 6111. Advanced study of learning and instructional theories. The historical and theoretical bases of instructional practice are examined.

**ED PSY 6404 Seminar: 1-10 semester hours**

**ED PSY 6417 Current Perspectives On Citizenship Education: 3 semester hours**

Prerequisite: ED PSY 6217. Seminar extends students' understanding of theory and research in citizenship education by applying it to practical programs in the US and abroad. Analysis of assumptions underlying methods of citizenship education and its goals. Exploration of research on methods that promote, facilitate, or inhibit civic participation and citizenship competence.

**ED PSY 6444 Cognition And Technology: 3 semester hours**

Same as ED TECH 6444. Prerequisites: ED PSY 6111 or consent of instructor. Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED PSY 6445 Character Education And Development: 3 semester hours**

Prerequisites: ED PSY 6111 and ED PSY 6220 or ED PSY 6225. Critical survey of theories of character development and models for character education in childhood and adolescence. Includes empirical and conceptual study of the nature of moral character how it develops, and how it can be fostered in schools.

**ED PSY 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Same as ED TECH 6448. Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of Instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as to the role of instructors.

**ED PSY 6450 Advanced Methods In Character Education: 3 semester hours**

Prerequisites: ED PSY 6445. Advanced exploration of methods for promoting character development in schools: class meetings, democratic processes, cross-age learning and character curriculum development. Methods will be critically examined for their empirical and theoretical justifications.

**ED PSY 6497 Problems: 1-10 semester hours**

**ED PSY 6530 Foundations Of School Psychology: 3 semester hours**

Prerequisites: Admission to the School Psychology Program or consent of instructor. Examines the professional roles, responsibilities, and functions of psychologists in schools. Focuses on educational foundations of school psychology including the history of the profession, organization and operation of schools, and diversity among students and their families.

**ED PSY 6532 Psychoeducational Differences: 3 semester hours**

Prerequisites: Graduate Standing. Examination of classification systems used with children and adolescents in the diagnosis and treatment of educational and physical disabilities, mental disorders, and other developmental challenges.

**ED PSY 6536 Biological Bases Of Behavior: 3 semester hours**

Prerequisites: Graduate Standing. Examination of biological factors affecting human behavior. Includes an overview of neuroscience, developmental psychophysiology, and basic psychopharmacology. Implications for psychological and educational interventions are considered.

**ED PSY 6540 Psychoeducational Interventions: 3 semester hours**

Prerequisites: Grades of B- or better in ED PSY 6545 and ED REM 6718; or consent of instructor. Examines academic and instructional interventions, both preventive and remedial, that are delivered in schools and related settings with children and adolescents. Emphasizes linking assessment and intervention via use of direct and indirect service delivery.

**ED PSY 6542 Social-Emotional and Behavior Interventions: 3 semester hours**

Prerequisites: Grade of B- or better in SPEC ED 6325 or SPEC ED 6437; or consent of instructor. Provides instruction and practice in the use of the problem-solving model to address common social-emotional and behavior problems found in schools. Special emphasis is given to research-based, early intervention and targeted intervention techniques that improve student behavior. Concurrent placement in a school or related setting is necessary to complete course assignments.

**ED PSY 6545 Consultation In Schools And Related Settings: 3 semester hours**

Prerequisites: Admission to the School Psychology or Special Education Program, or consent of instructor. Examines the theories, research, and legal/ethical issues related to consultation in schools and related settings. Emphasis on understanding the process of consultation using a problem-solving approach. Includes instruction in interviewing, observation, and development and evaluation of interventions.

**ED PSY 6550 Professional Issues In School Psychology: 3 semester hours**

Prerequisites: Grade of B- or better in ED PSY 6530 or consent of instructor. Advanced examination of professional issues - specifically the legal, ethical, and cultural factors - that influence the practice of school psychology.

**ED PSY 6590 School Psychology Practicum I: 3 semester hours**

Prerequisites: Grades of B or better in ED PSY 6550 and ED REM 6718. Introductory supervised experience in psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6591 School Psychology Practicum II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6590. Advanced supervised experience in consultation, problem solving, psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6598 School Psychology Internship I: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6591. Supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6599 School Psychology Internship II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6598. Advanced supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6990 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED PSY 7210 Theories of Development and the Life Course: 3 semester hours**

Prerequisites: Doctoral standing and at least one course in human development (e.g., ED PSY 6210 or ED PSY 6225), or consent of instructor. This advanced course examines the historical, ecological, cultural, and individual factors that shape developmental and educational experiences. Diverse families and their trajectories will be highlighted to demonstrate the intersecting spheres that shape human development. Students will critique research from multiple disciplines, analyze policy issues, and design a study to deepen their understanding of traditional and current theories on the life course.

**ED PSY 7640 Changing Perspectives In Educational Psychology: 3 semester hours**

Prerequisites: Doctoral Student Standing or consent of instructor. The advanced exploration of foundational issues in educational psychology. Topics include theoretical perspectives on modes of analysis used in the investigation of psychological theories and concepts in education.

**ED PSY 7647 Teaching For Learning In The University: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. An examination of current research in learning, instruction, motivation, and assessment as it pertains to teaching and learning in post-secondary settings. Designed to guide graduate students to promote active and meaningful learning in college classrooms to develop college students' critical thinking skills. Graduate students across the disciplines may enroll.

## Educational Research And Evaluation Method Courses

**ED REM 3721 Psychoeducational Assessment and Evaluation: 3 semester hours**

Review of measurement concepts and use of psychoeducational assessment data gathered via interview, observation, norm-referenced, and curriculum-based assessment methods. Special emphasis on progress monitoring and data-based decision making.

**ED REM 6040 Educational Research for Teachers: 3 semester hours**

Prerequisites: TCH ED 6010 and TCH ED 6020. This course provides the basic knowledge and skills needed by educators to understand and engage in educational research. Educators will learn and use both analytic and practical tools for studying teaching, learning, and assessment in educational contexts, including their own classroom.

**ED REM 6497 Problems: 1-10 semester hours**

Prerequisite: At least one previous ED REM course and consent of course supervisor. Individual study on topics pertaining to educational measurement, evaluation, statistics and research design.

**ED REM 6707 Classroom Measurement And Evaluation: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course to classroom testing and evaluation. Topic areas include comparison of criterion-and norm-referenced theory and technique; classical test theory, reliability, validity, and associated descriptive statistics; derived and transformed scores; preparation of instructional objectives for use in developing the classroom test, performance evaluations, and portfolio rubrics; use of evaluation to assess student achievement and instructional effectiveness.

**ED REM 6709 Educational And Psychological Measurement: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course in testing and measurement theory: reliability, validity, and associated descriptive statistics; correlation and simple regression; derived and transformed scores; interpretation of test scores; measurement of aptitude, vocational interests, and personal-social adjustment.

**ED REM 6710 Educational Research Methods and Design: 3 semester hours**

Prerequisites: An introductory statistics course or an introductory research design course; or consent of instructor. Covers educational research methodology: comparison of various types of qualitative and quantitative educational research, threats to internal/external validity, sampling methods, data analyses, and components of research reports.

**ED REM 6716 Academic Assessment and Intervention: 3 semester hours**

Prerequisites: Graduate Standing. Provides instruction in measurement concepts, interpretation of cognitive ability tests, and use of norm-referenced and curriculum-based assessment techniques in developing academic interventions. Special attention is given to data-based decision making and the links among instruction, assessment, and intervention.

**ED REM 6718 Psychoeducational Assessment And Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6530 or CNS ED 6050, or consent of instructor. Reviews measurement concepts and covers administration, scoring, interpretation, and reporting of individually administered tests of academic and cognitive abilities. Special attention is given to the link between assessment and intervention.

**ED REM 6719 Advanced Psychoeducational Assessment and Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED REM 6718 or consent of instructor. Instruction is provided in advanced and specialized assessment, diagnostic, and intervention techniques for individuals with intellectual disabilities, emotional or behavior disorders, and other low incidence disabilities experienced by children and youth.

**ED REM 6730 Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6710, ED REM 6750; or consent of instructor. Covers principles and procedures for developing and assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and system changes in educational settings.

**ED REM 6732 Advanced Theory And Practice In Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6730 or consent of the instructor. Extension of the principles, attributes, and practice of program evaluation to contemporary problems and settings. Study will include the comparison of examples of the program evaluation process. Focus will be on adherence to the Program Evaluation Standards endorsed by leading professional research and evaluation associations.

**ED REM 6735 Statistical Analysis For Education Research: 3 semester hours**

Prerequisites: Graduate Standing. Provides students with a fundamental intermediate understanding of quantitative methods and their relationship to social science research in education. This course is designed to provide statistical background to students who will pursue advanced degrees in education. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

**ED REM 6750 Advanced Research Design In Education: 3 semester hours**

Prerequisites: ED REM 6735 or consent of instructor. Course is designed to provide students with a thorough background in the fundamental principles of research design in education, and the knowledge and skills necessary to design and carry out studies appropriate to a wide variety of research problems. It focuses on tailoring the research design and methodology to most effectively address the problem or issue of concern, including qualitative, quantitative, and mixed-method designs. This is an experiential course designed around active discussion by students each week, and requires each student to develop a detailed research proposal for conducting a study to examine an appropriate educational research problem.

**ED REM 6990 Internship: 1-10 semester hours**

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED REM 7712 Discourse Analysis In Education: 3 semester hours**

Prerequisites: Graduate Standing. The role of language in social life is of paramount concern to educational researchers. The purpose of this course is to introduce students to theories and methods of discourse analysis. Students will become familiar with the methods used in conversation analysis, critical discourse analysis and mediated or multimodal discourse analysis. Topics include transcription theory and practice, the role of context in discourse analysis, the ethics of representation and the place of action in discourse analysis. Students will engage with the theories and methods for analyzing educational interactions such as small-group discussions, education documents, classroom scenes, in-depth interviews, and naturally occurring conversations.

**ED REM 7740 Historical Research Methods in Education: 3 semester hours**

Prerequisites: Doctoral Standing. Survey of the methodology of historical research in education and historical writing about educational issues. Specific topics will include the historiography of education; working with primary and secondary documents; oral history as method and documentation; quantitative approaches to history; constructing historical narratives; and the question of interpretation.

**ED REM 7771 Quantitative Research Methods I: 3 semester hours**

Prerequisites: ED REM 6735. A second course in advanced Educational research methods sequence, with focus on multiple regression analysis and its applications to educational and psychological research.

**ED REM 7772 Quantitative Research Methods II: 3 semester hours**

Prerequisites: ED REM 7771 or consent of instructor. An advanced educational research methods course: multivariate analysis of variance, canonical correlation, discriminant function analysis, factor analysis, cluster analysis, advanced topics in multiple linear regression; and associated research design issues.

**ED REM 7773 Quantitative Research Methods III: 3 semester hours**

Prerequisites: ED REM 7772. An advanced educational research methods course using multiple linear regression models, path analysis, and structural equation modeling. Focus is on the theory, issues and application of these advanced data analysis techniques.

**ED REM 7781 Qualitative Methods In Educational Research I: 3 semester hours**

Prerequisites: ED REM 6750 or consent of instructor. An introductory qualitative research methods course in education to develop skill in forming research questions, writing field notes, and collecting, organizing, and analyzing a variety of data. The design issues of triangulation subjectivity, and trustworthiness are explored. Ethics and ethical issues in qualitative research are presented.

**ED REM 7782 Qualitative Methods In Educational Research II: 3 semester hours**

Prerequisites: ED REM 7781 or consent of instructor. An advanced qualitative educational research methods course to address the issues of sampling strategies, observational and interview techniques, questionnaire construction, and data analysis. Requires access to a field setting to conduct a qualitative research study.

## Educator Preparation, Innovation and Research

### General Information

The Department of Educator Preparation, Innovation and Research offers coursework leading to two bachelor degrees, three master's degrees, four graduate certificates and two doctoral degrees. Students may also choose to pursue the Bachelor of Arts (B.A.) degree in the College of Arts and Sciences or the College of Fine Arts and Communication and take the education courses in the department that are required for teacher certification in high school English, mathematics, social studies, science, music or art.

Information for the bachelor's and master's degrees is found in this section of the Bulletin while specific information on the doctoral degrees is presented in this Bulletin in the general College of Education listing.

Through the integration of content in general, special, and second language learning, candidates gain knowledge and valued skills that make them highly qualified and marketable. Nationally-recognized research faculty teach undergraduate and graduate courses that prepare future educators in curriculum, instruction, assessment, and educational technology with a strong foundation in working with diverse, urban populations.

The following Department of Educator Preparation, Innovation and Research degrees have been accredited by the National Council for Accreditation of Teacher Education (NCATE), now called the Council

for the Accreditation of Educator Preparation (CAEP), and the Missouri Department of Elementary and Secondary Education (DESE):

**Undergraduate degrees:**

- Bachelor of Educational Studies (BES)
- Bachelor of Science in Education (B.S. Ed) in Early Childhood Education
- Bachelor of Science in Education (B.S. Ed) in Elementary Education
- Bachelor of Science in Education (B.S. Ed) in Physical Education
- Bachelor of Science in Education (B.S. Ed) in Secondary Education

**Graduate degrees:**

- Master of Education (M.Ed.) in Elementary Education
- Master of Education (M.Ed.) in Secondary Education
- Master of Education (M.Ed.) in Special Education

**Graduate Certificates in:**

- Autism Studies
- Secondary School Teaching
- Teaching English to Speakers of Other Languages (TESOL)
- Teaching of Writing, Gateway Writing Project

**Mission**

Our mission is to advance scholarship and promote teaching and learning as a lifelong process for all.

**Goals**

Through undergraduate and graduate programs and faculty engagement, the Department of Educator Preparation, Innovation and Research seeks to:

- Create new ideas about and knowledge of teaching and learning processes.
- Utilize general, content, and pedagogical knowledge to design curriculum and enact instruction.
- Reflect on and evaluate teaching practices and research to improve learning.
- Develop educators who model the dispositions necessary to teach all students in a diverse society.
- Integrate learning tools by adapting instruction to changing technologies.
- Apply current research on assessment in culturally responsive ways to document and facilitate learning.
- Engage with community members to promote justice and develop active democratic citizens in a global world.
- Foster learning communities through collaboration with partner families, peers, and communities.

**Career Outlook**

The Bachelor of Educational Studies (BES) is for students excited about education, but looking for challenges outside the traditional classroom such as a career as an educator in many community agencies. Wherever education happens outside the classroom, BES graduates will be prepared to be skilled and confident leaders and innovators. Many institutions emphasize informal learning and many different settings. Employers at these institutions are eager to hire people who have training and relevant experience in education, management, marketing, and technology.

UMSL's College of Education, responding to this need, has designed a creative, flexible, and inter-disciplinary bachelor's degree that emphasizes practical skills in multiple settings. UMSL's BES is distinctive. Students who want a broad view of education, and who are willing to grow into new positions will be particularly interested in what UMSL's BES degree.

Undergraduate and graduate degrees in elementary secondary and special education are most directly applicable to teaching at the level appropriate to the program emphasis. Demand for career-ready educators who have significant clinical experience working with youngsters, and who demonstrate contemporary, best-practice knowledge, skills, and strategies continue to create employment opportunities for UMSL graduates. As in the past, elementary education graduates are attractive candidates for employment in varied positions that require preparation and training in social and behavioral sciences. Positions that serve the general public, such as sales, service, public relations, and general business, are common examples. Future expansions of opportunities in schools are tied to population growth, increased specialization of services, and reduction in ratios between professional staff and children served.

The employment outlook for special education teachers continues to be favorable, as they are in great demand among certain regions of the country. In addition to inclusion classroom teaching, graduates are typically employed as resource-room or self-contained classroom teachers, clinical diagnostic personnel, itinerant teachers, educational resource teachers, curriculum and/or behavior specialists, consultants, educational therapists, job coaches, supported employment and sheltered workshop evaluators, and in various supervisory and administrative positions among agencies and schools. In combination with related areas of expertise in systems supports, assessment, and educational psychology, for example, occupations exist nation- and worldwide that incorporate the skills, interventions knowledge, insightfulness, and programmatic expertise learned in the UMSL Master's Degree of Special Education.

The employment outlook in the middle and high schools continues to be positive, especially in mathematics, sciences and modern languages. Recent placement years have yielded excellent employment opportunities to UMSL graduates. In addition to middle school, and high school teaching, more limited opportunities exist in athletic training, dance, research, sports management, and exercise leadership fields serving persons of all age categories.

## Undergraduate Study

### General Information

Through the integration of content in general, special, and second language learning, candidates may earn certifications and endorsements with valued skills that make them highly qualified and marketable. Nationally-recognized research faculty teach undergraduate courses that prepare future educators in instruction and assessment with a strong foundation in working with diverse, urban populations.

Educator candidates actively engage in unique practicum experiences in the Studio School Model for clinical practice. As Missouri's leader, the College partners with 36 different public, private, and charter schools. As a College, we take great pride in preparing "community educators" who are well-experienced to impact all students in a wide variety of settings, and with a much broader understanding of education's role in society. Our candidates make a collective impact as faculty members in the differentiated staffing model. Sought after by partner districts and

agencies, many of our graduates are hired directly into the studio schools or districts where they complete their clinical preparation.

Educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. Early course-based experiences provide candidates with practical understanding of how youth learn subject matter in a variety of informal settings. Every future educator is guided through about 100 clock hours of volunteer academic instruction and support for a local partnering community youth-serving agencies (hotlink to community page). The community-based experiences broadens candidates' understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Drawing on their studies during carefully sequenced course work, teacher candidates enter their final two-semester clinical experience as collaborative teams of 6-14 candidates and work in a Studio School. In Studio Schools, candidates work with experienced teachers to deepen learning and increase student achievement. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one, this process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads weekly seminars, conducts observations and provides candidates with regular feedback to guide their growth.

Teacher Candidates inquire deeply into how their students are learning, and use data to inform their instruction. All participate in appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a school, not a just a temporary teacher candidate. We believe that these community and school - based experiences create educators who understand learning in a broader context. In short, graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

The following Department of Educator Preparation, Innovation and Research degrees have been accredited by the National Council for Accreditation of Teacher Education (NCATE), now called the Council for the Accreditation of Educator Preparation (CAEP), and the Missouri Department of Elementary and Secondary Education (DESE):

#### Undergraduate degrees:

- Bachelor of Educational Studies (BES)
- Bachelor of Science in Education (B.S. Ed) in Early Childhood
- Bachelor of Science in Education (B.S. Ed) in Elementary Education
  - Special Education TESOL emphasis
  - Special Education emphasis
  - TESOL emphasis
  - Middle School Certification for English
  - Middle School Certification for Mathematics
  - Middle School Certification for Science
  - Middle School Certification for Social Studies
- Bachelor of Science in Education (B.S. Ed) in Physical Education
- Bachelor of Science in Education (B.S. Ed) in Secondary Education

- Biology concentration
- Chemistry concentration
- English concentration
- Mathematics concentration
- Modern Language, French K-12
- Modern Language, German K-12
- Modern Language, Spanish K-12
- Physics concentration
- Social Studies concentration

**Certifications:**

- Teacher Certification in Music
- Teacher Certification in Art

## General Information

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broadens candidates' understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

The Bachelor of Science in Education (B.S.Ed.) in Early Childhood Education prepares those who desire to teach birth through grade 3. Students electing this program will work directly with young children as a part of the professional courses offered. The curriculum provides learning background, applied knowledge, and best practice interventions for children of diverse populations who demonstrate varied abilities and levels of developmental growth.

Dual certification in both Early Childhood Education and Early Childhood Special Education can be achieved with courses satisfactorily completed in this program of study. The core courses are combined with the emphasis area in Early Childhood Special Education. Please see the degree requirements listed below.

## Bachelor of Science in Education in Early Childhood Education

### General Education Requirements

Students who enter college for the first time in Fall 2002 or later should refer to the General Regulations section of this Bulletin for their General Education Requirements (p. 34).

**Core Areas:****First Year Writing**

ENGL 1100	First-Year Writing	3
-----------	--------------------	---

**Math Proficiency**

MATH 1030	College Algebra	3
-----------	-----------------	---

**Communication Proficiency**

COMM 1040	Introduction To Public Speaking	3
-----------	---------------------------------	---

**Information Literacy**

SOC 2280	Technology And Society	3
----------	------------------------	---

**American History and Government**

HIST 1001	American Civilization To 1865	3
or HIST 1002	American Civilization 1865 To Present	

**Explore Areas:****Humanities and Fine Arts** 9

Three courses from two of the following fields: art, music, philosophy, and literature.

**Social Science**

PSYCH 1003	General Psychology	3
------------	--------------------	---

ANTHRO 1011	Introduction To Cultural Anthropology	3
-------------	---------------------------------------	---

or ANTHRO 1025 World Cultures

GEOG 1001	Introduction To Geography	3
-----------	---------------------------	---

or GEOG 1002 World Regions

ECON 1000	Introduction To The American Economy	3
-----------	--------------------------------------	---

or POL SCI 1100 Introduction To American Politics

## Program Requirements

All students must complete the program requirements as well as the emphasis area courses.

Professional education courses must be completed with a grade point average of 2.5 and no grade lower than a C.

**Note:** Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Students must pass the relevant exit test to receive the B.S.Ed. degree.

Level I: Education in Community Contexts	6

SPEC ED 4323	Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings	3

## Emphasis in Early Childhood Special Education

All candidates must enroll in a program that includes levels I, II, and III course work above in the College of Education. In addition, students must complete the following Early Childhood Special Education courses:

ECH ED 3301 (p. 357)	Early Childhood Special Education Processes and Trends	3
SPEC ED 4315 (p. 357)	Speech And Language Of Exceptional Children	3
SPEC ED 3346 (p. 357)	Literacy Assessment and Reading for Students with Special Needs	3
TCH ED 3212 (p. 357)	Sociolinguistics and communication in the Classroom	3
ECH ED 4989 (p. 357)	Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience	3
ECH ED 4990 (p. 357)	Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience	12

**Total for the B.S.Ed. in Early Childhood:** minimum of 129 hours

## Elementary Education

The Bachelor of Science in Education (B.S.Ed.) in Elementary Education prepares those who desire to teach grades 1 - 6. The core courses are combined with one of three emphasis areas: **Special Education**, **Teaching English to Speakers of Other Languages (TESOL)**, or **Middle School**. It is also possible to select the Special Education emphasis area and take the TESOL courses for TESOL endorsement. Please see each of the Emphasis Area Requirements listed below.

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broadens candidates' understanding of their own identity as educators as

well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one, this process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads a weekly seminar, conducts observations and provides candidates with regular feedback to guide their growth.

The focus of candidates' work is to explore challenges of student learning, envision solutions based on their research-based course work, recent school initiatives, and carefully studied practices, and then enact innovative solutions to increase student learning. Candidates inquire deeply into how their students are learning, and use data to inform their instruction. All teacher candidates participate in all appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a studio school, not a just a temporary teacher candidate. Graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

## Bachelor of Science in Education in Elementary Education

### General Education Requirements

Students who enter college for the first time in Fall 2002 or later should refer to the General Regulations section of this Bulletin for their General Education Requirements (p. 34).

#### Core Areas:

##### First Year Writing

ENGL 1100	First-Year Writing	3
-----------	--------------------	---

##### Math Proficiency

MATH 1030	College Algebra	3
-----------	-----------------	---

##### Communication Proficiency

COMM 1040	Introduction To Public Speaking	3
-----------	---------------------------------	---

##### Information Literacy

SOC 2280	Technology And Society	3
----------	------------------------	---

##### American History or Government

HIST 1001	American Civilization To 1865	3
or HIST 1002	American Civilization 1865 To Present	

#### Explore Areas:

##### Humanities and Fine Arts

Three courses from two of the following fields: art, music, philosophy, and literature.

##### Social Science

PSYCH 1003	General Psychology	3
ANTHRO 1011	Introduction To Cultural Anthropology	3
or ANTHRO 1025	World Cultures	
GEOG 1001	Introduction To Geography	3
or GEOG 1002	World Regions	
ECON 1000	Introduction To The American Economy	3
or POL SCI 1100	Introduction To American Politics	
or SOC 1010	Introduction To Sociology	

**Math and Life/Natural Sciences**

MATH 1150	Introduction to the Structure Of Mathematical Systems	3
MATH 2510	Structure Of Mathematical Systems II	3
BIOL 1012 & BIOL 1013	General Biology and General Biology Laboratory	5
Physics or Chemistry Course		4

**Related Area Requirements**

HLTH PE 3432	Teaching Health and Physical Education in the Elementary School	4
MUS ED 3770	An Introduction To Music For The Elementary School Teacher	3
ART ED 2179	Art Activities for Elementary School	3
EDUC 1000	Building Community, Culture, and Learning in Education	3
ENGL 3100	Junior-Level Writing	3

**Program Requirements**

All students in the B.S.Ed. in Elementary Education program should take the following Level I, Level II, and Level III courses. Each student should then select an emphasis area and complete the required courses for that emphasis area.

**Note for all emphasis areas:**

Professional Education courses must be completed with a grade point average of 2.5 and no grade lower than a C.

Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Students must pass the relevant exit test to receive the B.S.Ed. degree.

**Level I: Education in Community Contexts**

TCH ED 2209	Foundations of Teaching in American Schools	3
ED PSY 2212	Introduction To Learners And Learning	3

**Level II: Teaching and Learning Across Context and Clinical Experiences**

SPEC ED 3318	Inclusive Classrooms	3
ED TECH 3135	Technology for Educators	1
ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
ELE ED 3337	Teaching and Learning Literacy in the Elementary Classroom	4

**Level III: Instructional Application in Studio Schools**

ELE ED 3338	Literacy Assessment and Learning	3
ELE ED 4246	Teaching Mathematics In The Elementary School	3
ELE ED 4253	Teaching Of Social Studies In The Elementary School	3
ELE ED 4341	Teaching Science In The Elementary School	3
SPEC ED 4323	Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings	3

**Emphasis Area in Special Education**

All candidates must complete levels I, II, and III course work above in the College of Education. In addition, students must complete the following Emphasis Area courses:

SPEC ED 4315 (p. 357)	Speech And Language Of Exceptional Children	3
SPEC ED 3346 (p. 357)	Literacy Assessment and Reading for Students with Special Needs	3
SPEC ED 4342 (p. 357)	Transition Issues And Planning	3
TCH ED 3212 (p. 357)	Sociolinguistics and communication in the Classroom	3
ELE ED 4342 (p. 357)	Addressing Needs In Mathematics Teaching And Learning	3
SPEC ED 3349 (p. 357)	Cross Categorical Special Education II	3-6
ELE ED 4989 (p. 357)	Practicum I: Elementary/Special Education Site Based Experience	3
ELE ED 4990 (p. 357)	Practicum II: Elementary/Special Education Site Based Experience	12

Total for the B.S.Ed. in Elementary Education with Emphasis in Special Education: **minimum of 126 hours.**

**Emphasis Area in Special Education and Teaching English to Speakers of Other Languages**

All candidates must complete levels I, II, and III course work above in the College of Education. In addition, students must complete the following Special Education and TESOL courses:

SPEC ED 4342 (p. 357)	Transition Issues And Planning	3
SPEC ED 4315 (p. 357)	Speech And Language Of Exceptional Children	3
SPEC ED 3346 (p. 357)	Literacy Assessment and Reading for Students with Special Needs	3
TCH ED 3212 (p. 357)	Sociolinguistics and communication in the Classroom	3
ELE ED 4342 (p. 357)	Addressing Needs In Mathematics Teaching And Learning	3
SPEC ED 3349 (p. 357)	Cross Categorical Special Education II	3-6
TCH ED 3210 (p. 357)	General Linguistics in Teaching English to Speakers of Other Languages	3
TCH ED 4391 (p. 357)	Literacy for Adolescent Learners in Content Areas	3
TCH ED 3211 (p. 357)	Basic Principles of Second and Foreign Language Acquisition	3
TCH ED 3213 (p. 357)	Performance-based Assessment for TESOL	3
TCH ED 3214 (p. 357)	Material Development and Methods for TESOL	3
ELE ED 4992 (p. 357)	Practicum I: Elementary/Special Education/TESOL Site Based Experience	3

Total for the B.S.Ed. in Elementary Education with Emphasis in Special Education and Teaching English to Speakers of Other Languages:

**minimum of 141 hours**

## Emphasis Area in Teaching English to Speakers of Other Languages

All candidates must complete Levels I, II, and III course work above in the College of Education. In addition, students must complete the following TESOL courses:

TCH ED 3210	General Linguistics in Teaching English to Speakers of Other Languages	3
TCH ED 3211	Basic Principles of Second and Foreign Language Acquisition	3
TCH ED 3213	Performance-based Assessment for TESOL	3
TCH ED 3214	Material Development and Methods for TESOL	3
ELE ED 4994	Practicum I: Elementary/TESOL Site Based Experience	3
ELE ED 4995	Practicum II: Elementary/TESOL Site Based Experience	12

Total for the B.S.Ed. in Elementary Education with Emphasis in Teaching English to Speakers of Other Languages:**minimum of 126 hours**

## Bachelor of Science in Education: Elementary Education (Middle School Certification)

This area of specialization in elementary education prepares students to teach in grades 5-9.

### General Education Requirements

General education (p. 34) requirements are the same as for elementary education.

### Program Requirements

#### Level I: Exploring Education as a Profession

ED PSY 2212	Introduction To Learners And Learning	3
TCH ED 2209	Foundations of Teaching in American Schools	3

#### Related Area Requirements

EDUC 1000	Building Community, Culture, and Learning in Education	3
ENGL 3100	Junior-Level Writing	3
HLTH PE 3432	Teaching Health and Physical Education in the Elementary School	

#### Level II: Analyzing the Nature and Processes of Education

Must be admitted to the Teacher Education Program to enroll in the following courses:

ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
ED TECH 3135	Technology for Educators	1
MID ED 4315	The Middle Level School	3
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 3213	Performance-based Assessment for TESOL	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3

#### Level III: Synthesizing Theory and Practice in Education

Entrance into Level III is based on successful completion of all course work in Levels I and II, as well as any prerequisite courses required by advanced methods courses.

MID ED 4316	Middle Level Curriculum And Instruction	3
MID ED 4317	The Middle-Level Child	3
Methods Course in Certification Area		
SEC ED 4880	Writing For Teachers	3
SPEC ED 3346	Literacy Assessment and Reading for Students with Special Needs	3
MID ED 4989	Practicum I: Middle Level Education Site Based Experience	3
MID ED 4990	Practicum II: Middle Level Education Site Based Experience	12

#### Area of Concentration for State Certification

Middle School 5-9 requires a minimum of 21 hours for certification in one specific content area (math, science, social studies or language arts). Content requirements are listed on our website.

**Total:** minimum 120 hours

## Secondary Education

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broadens candidates' understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one, this process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads a weekly seminar, conducts observations and provides candidates with regular feedback to guide their growth.

The focus of candidates' work is to explore challenges of student learning, envision solutions based on their research-based course work, recent school initiatives, and carefully studied practices, and then enact innovative solutions to increase student learning. Candidates inquire deeply into how their students are learning, and use data to inform their instruction. All teacher candidates participate in all appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a studio school, not a just a temporary teacher candidate. Graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

## Bachelor of Science in Education: Secondary Education

Two secondary Education programs prepare students to teach in grades 9 through 12: Bachelor of Science in Secondary Education through the College of Education (B.S.Ed.) OR Bachelor of Arts (B.A.) in a

department of the College of Arts and Sciences or College of Fine Arts and Communication with certification in Secondary Education.

## General Education Requirements

B.S.Ed. degree candidates must complete the following General Education courses (p. 34) required by the College of Education and the Missouri Department of Elementary and Secondary Education.

### Core Areas:

#### First Year Writing

ENGL 1100	First-Year Writing	3-4
or HIST 1111	Reacting to the Past	

#### Math Proficiency

MATH 1020	Contemporary Mathematics	3
or MATH 1030	College Algebra	
or MATH 1021	Choice and Chance	

#### Communication Proficiency

COMM 1040	Introduction To Public Speaking	3
-----------	---------------------------------	---

#### Information Literacy

SOC 2280	Technology And Society	3
----------	------------------------	---

#### American History or Government

HIST 1001	American Civilization To 1865	3
or HIST 1002	American Civilization 1865 To Present	

#### Explore Areas:

#### Humanities and Fine Arts

Three courses from two of the following fields: art, foreign language, music (excluding applied music), philosophy, theater, dance, and literature.

#### Social Science

PSYCH 1003	General Psychology	3
ANTHRO 1011	Introduction To Cultural Anthropology	3
or ANTHRO 1025	World Cultures	
GEOG 1001	Introduction To Geography	3
or GEOG 1002	World Regions	
ECON 1000	Introduction To The American Economy	3
or POL SCI 1100	Introduction To American Politics	
or SOC 1010	Introduction To Sociology	

#### Math and Life/Natural Sciences

BIOL 1012	General Biology	5
& BIOL 1013	and General Biology Laboratory	
PHYSICS 1001	How Things Work	3
One additional 1000-2000 level course in Math and Life/Natural Sciences Explore Area		3

**Total Hours** 47-48

Note All of the courses above must be a minimum of 2 semester hours.

## Program Requirements

B.S.Ed. and B.A. degrees with certification candidates must complete the following courses:

### Level I: Exploring Education as a Profession

TCH ED 2209	Foundations of Teaching in American Schools	3
ED PSY 2212	Introduction To Learners And Learning	3

EDUC 1000	Building Community, Culture, and Learning in Education	3
-----------	--	---

### Level II: Analyzing the Nature and Process of Education

ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
ED TECH 3135	Technology for Educators	1
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3
TCH ED 3310	Methods of Teaching With Technology	2

### Level III: Synthesizing Theory and Practice in Education

SEC ED 4XXX	Curriculum and Methods of Teaching (specific subject area)	3
SEC ED 4989	Practicum I: Site Based Experience	3
SEC ED 4990	Practicum II: Site Based Experience	12
SEC ED 4XXX	Student Teaching Intern Seminar (specific subject area)	3

**Total Hours** 42

## Attention Education majors

Professional Education courses must be completed with a grade point average of 2.5 and no grade lower than a C.

Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Students must pass the relevant exit test to receive the B.S.Ed. degree.

## Emphasis Areas:

B.S.Ed. candidates must complete 30 to 50 hours of specific subject requirements in one of the following fields:

### English

Please see the Bachelor of Art in English with Certification for Secondary Education for a list of required courses in the content area (p. 106) for teacher certification.

### Foreign language (French or Spanish)

Please see the Bachelor of Science in Education for the list of required courses in the specific language content area (p. 158) for teacher certification.

### Mathematics

Please see the Bachelor of Science in Secondary Education with an emphasis in mathematics for a list of the courses in content area (p. 175) required courses for teacher certification.

## Unified Science (biology, chemistry, or physics endorsement)

- Please see the Bachelor of Art in Biology with Teacher Certification or Bachelor of Science in Education with an emphasis in biology for a list of the courses in the content area (p. 56) required for teacher certification.
- Please see Degrees with Certification to Teach Chemistry in Secondary Schools for the list of courses in the content area (p. 77) required for teacher certification.

- Please see B.S. degree in Physics, Physics Education Option and B. S. degree in Secondary Education with an Emphasis in Physics for a list of the courses in the content area (p. 208) required for teacher certification.

## Music Education

Please see the Bachelor of Music in Music Education for the list of courses in the content area (p. 470) required for teacher certification. Students take the following courses during the same semester: SEC ED 4993, Student Teaching in Music Education K#6, and SEC ED 4994, Student Teaching in Music Education 7#12.

## Art Education

Please see Art Education for a list of the art content area (p. 435) courses required for teacher certification. Students take the following courses during the same semester: SEC ED 4996, Practicum I: Site based Experience in Elementary Art and SEC ED 4997, Practicum I: site based Experience in Secondary Art.

## Social Studies

Certification students must complete a major or an equivalent in hours in one of the following disciplines: anthropology, economics, geography, history, political science, psychology, or sociology. They must meet these minimum social science requirements:

- American history, 12 hours including SEC ED 4013 (p. 357) European or world history, 9 hours including
- United States and/or state government, 6 hours including POL SCI 4090 (p. 357)/SEC ED 4090 (p. 357) Behavioral science, 6 hours
- Economics, 3 hours
- Geography, 3 hours
- 2 hours of elective social studies credit.
- Social science methods courses are SEC ED 4011 (p. 357)

## Bachelor of Educational Studies (BES)

The Bachelor of Educational Studies (BES) is perfect for students excited about education, but looking for challenges outside the traditional classroom. The BES will prepare you for a career as an educator in many agencies. Many institutions emphasize informal learning and many different settings. Employers at these institutions are eager to hire people who have training and relevant experience in education, management, marketing, and technology. This degree is designed to be a creative, flexible, and inter-disciplinary bachelor's degree that emphasizes practical skills in multiple settings.

## Bachelor of Educational Studies

*The B. E. S. is a professional degree designed for individuals who wish to study Education as a scholarly discipline and who want to prepare for a career in one of the following areas: (1) Information Science and Cultural Education, (2) Human Services and Development (3) Early Childhood or (4) Exercise Science.*

Students follow the University's General Education Requirements (p. 34), Mathematical Skills, Advanced Expository Writing, American History and Government, and Cultural Diversity Requirements. Due to prerequisites of required courses all students must take PSYCH 1003 and POL SCI 1100. Students pursuing the Exercise Science emphasis area must take BIOL 1012, BIOL 1013, and MATH 1030.

## Foundations (Required Courses)

EDUC 1000	Building Community, Culture, and Learning in Education	3
EDUC 2222	Interpretation: Connecting Audiences and Meaning	3
ED FND 3251	Black Americans In Education	3
ED FND 4330	History Of American Education through the Lens of Social Justice	
ED PSY 2212	Introduction To Learners And Learning	3
ED REM 3721	Psychoeducational Assessment and Evaluation <sup>1</sup>	3
or PHY ED 3330	Designing Physical Activity Programs	
ED TECH 4436	Computer-Mediated Teaching and Learning in Education	3
ED TECH 4302	Educational Technology Instruction in Educational Agencies	3
MKTG 3700	Basic Marketing	3
<b>Total Hours</b>		<b>24</b>

- <sup>1</sup> PHY ED 3330 required for students in Exercise Science program instead of ED REM 3721.

## Recommended Foundation Courses (Elective Courses)

MEDIA ST 2211	Introduction To Digital Multimedia Production	3
MEDIA ST 2222	Convergence and Digital Media	3
MGMT/SOC 3600	Management And Organizational Behavior	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
MKTG 3722	Introduction to Social Media Marketing	3
SOC WK 2000	Social Work And Social Issues	3

## Emphasis Areas (Choose One)

### Informal Science and Cultural Education

ANTHRO/PHIL 1163	Disagreement, Difference, Diversity	6
ANTHRO/FGN LANG 2100/SOC 2200	Languages and World View <sup>1</sup>	3
ENGL 1175/HIST 1175/M H L T 1175/ART HS 1175/ PHIL 1175/ TH DAN 1175	Arts and Ideas <sup>2</sup>	3
HIST/INTDSC 1999	Big History: From the Big Bang to the Present	3
PHIL 2254	Business Ethics	3
PHIL 2255	Environmental Ethics	3
PHIL 2256	Bioethics	3
<b>Total Hours</b>		<b>24</b>

- <sup>1</sup> This course has a prerequisite of two semesters of one foreign language at the college level.
- <sup>2</sup> This course will not be offered in 2015-2016. Please contact the department for more information.

## Human Services and Development

A Minor or Undergraduate Certificate in any area.

Recommended Certificates

Gender Studies Certificate (p. 119)

Child Advocacy Studies Certificate (p. 144)

## Early Childhood Education

ECH ED 3300	Introduction To Early Childhood Education	3
ECH ED 3301	Early Childhood Special Education Processes and Trends	3
ECH ED 3303	Curriculum And Practice Laboratory: Infant/Toddler	1
ECH ED 3304	Curriculum And Practice Laboratory: Preschool	1
ECH ED 3313	Curriculum And Practice: Infant/Toddler	2
ECH ED 3314	Curriculum And Practice: Preschool Education	2
ECH ED 3332	Literacy, Learning and Instruction For The Young Child	3
ECH ED 3350	Child/Family and Education and Community Involvement	3
ECH ED 4317	Implementation, Evaluation, and Assessment in Early Childhood Education	3
SPEC ED 3318	Inclusive Classrooms	3
<b>Total Hours</b>		<b>24</b>

## Exercise Science

HLTH PE 3280	Human Anatomy and Physiology	5
HLTH PE 3284	Physiology Of Human Exercise	3
HLTH PE 3285	Safety and Emergency Care for Health & Physical Education	3
HLTH PE 3380	Introduction to Nutrition for Health and Performance	3
HLTH PE 3434	Teaching of Health and Wellness	4
PHY ED 1124	Principles & Practice In 1St Aid & Cardiopulmonary Resuscitation	1
PHY ED 2134	Personal Physical Fitness	3
PHY ED 3283	Kinesiology	3
PHY ED 3287	Seminar In Exercise Science	1
PHY ED 3931	Adult Exercise Leadership	3
<b>Total Hours</b>		<b>29</b>

## Clinical Experience (Required)

EDUC 4989	Internship I	3
EDUC 4990	Internship II	6
EDUC 4991	Internship III	6

## Degree Requirements - Early Childhood Emphasis

### Mathematical Skills

MATH 1030	College Algebra	3
(p. 357)		
MATH 1150	Structure Of Mathematical Systems I	3
(p. 357)		

### Level I: Exploring Education as a Profession

CMP SCI 1010	Introduction To Computers And The Internet	3
(p. 357)		
ED PSY 2212	Introduction To Learners And Learning	3
(p. 357)		
PSYCH 2270	Developmental Psychology: Infancy, Childhood And Adolescence	3
(p. 357)		
TCH ED 2211	Introduction To American Schools	3
(p. 357)		
TCH ED 2209	Foundations of Teaching in American Schools	3
(p. 357)		

### Level II: Analyzing the Nature and Processes of Education

ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
(p. 357)		
TCH ED 3310	Introduction To Instructional Methods	3
(p. 357)		
TCH ED 3313	Psychology of the Exceptional Child	3
(p. 357)		

### Level III: Synthesizing Theory and Practice in Education

ECH ED 3300	Introduction To Early Childhood Education	3
(p. 357)		
ECH ED 3303	Curriculum And Practice Laboratory: Infant/Toddler	1
(p. 357)		
ECH ED 3304	Curriculum And Practice Laboratory: Preschool	1
(p. 357)		
ECH ED 3313	Curriculum And Practice: Infant/Toddler	2
(p. 357)		
ECH ED 3314	Curriculum And Practice: Preschool Education	2
(p. 357)		
ECH ED 3332	Literacy, Learning and Instruction For The Young Child	3
(p. 357)		
ECH ED 4317	Implementation, Evaluation, and Assessment in Early Childhood Education	3
(p. 357)		
ECH ED 4320	Classroom Management	3
(p. 357)		
ECH ED 4348	The Acquisition Of Mathematical and Science Concepts	3
(p. 357)		
EDUC 2290	Internship I	6
(p. 357)		
EDUC 2291	Internship II	6
(p. 357)		
PHY ED 3282	Physical Growth And Motor Development	3
(p. 357)		
SEC ED 4880	Writing For Teachers	3
(p. 357)		

### Second Concentration

Electives to total 12 hours to be chosen from ECH ED, ELE ED, SPEC ED, ED TECH, ED REM, or an area chosen in consultation with the adviser.

## Degree Requirements - Professional Education Studies

### Mathematical Skills

MATH 1020	Contemporary Mathematics	3
MATH 1030	College Algebra	3

### Managing Information Skills - Goal 2 (one course) <sup>1</sup>

**Level I: Exploring Education as Profession**

CMP SCI 1010	Introduction To Computers And The Internet	3
ED PSY 2212	Introduction To Learners And Learning	3
TCH ED 2209	Foundations of Teaching in American Schools	3

**Level II: Analyzing the Nature and Process of Education**

COMM 2231	Communication In The Organization	3
ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
TCH ED 3313	Psychology of the Exceptional Child	3

**Level III: Synthesizing Theory and Practice in Education**

Entrance into Level III is based on successful completion of all course work in Levels I and II.

A second series of courses in education or as approved by the advisor including a minimum of 15 hours of electives (see possible options below).

<sup>1</sup> See General Education Section (p. 34) of the Bulletin.

## Bachelor of Science in Education: Physical Education

Through this degree teacher candidates are prepared to effectively teach health and physical education. Teacher candidates can select either a K-grade 9 option or K- grade 12 option. the requirements are listed below.

### Grades PK-9 Emphasis Program Requirements

**Level I: Exploring Education as a Profession**

13 hours to be completed before advancement to Level II:

ED PSY 2212	Introduction To Learners And Learning	3
EDUC 1000	Effective Career Decision Making for Educators	3
TCH ED 2209	Foundations of Teaching in American Schools	3
HLTH PE 3277	Foundations of Health & Physical Education Programs	2
HLTH PE 3280	Human Anatomy And Physiology	5

**Level II: Analyzing the Nature and Process of Education**

21 hours to be completed before enrollement in any Level III courses:

ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3
HLTH PE 3275	Psychological Aspects Of Physical Education	3
HLTH PE 3285	Safety and Emergency Care for Health & Physical Education	3
HLTH PE 3433	Health Education Concepts and Skills	3
PHY ED 3282	Physical Growth And Motor Development	3
PHY ED 3283	Kinesiology	3

HLTH PE 3284	Physiology Of Human Exercise	3
--------------	------------------------------	---

(p. 357)

8 hours can be taken concurrently with Level III courses:

HLTH PE 3434	Teaching of Health and Wellness	4
PHY ED 3261	Physical Activity For The Exceptional Learner	2
PHY ED 3468	Curriculum And Methods Of Teaching Physical Education	3

**Level III: Synthesizing Theory and Practice in Education**

HLTH PE 4989	Physical Education Professional Internship	2
HLTH PE 4990	Practicum II: Health and Physical Education, Grades PK-5	6
HLTH PE 4991	Practicum II: Health and Physical Education Grades 5-9	6
PHY ED 3422	Teaching Of Skills: Grades Pk-4	4
PHY ED 3423	Teaching Of Skills: Grades 5-9	3
PHY ED 3425	Teaching Skills: Movement, Dance, And Rhythms	3

**Total Hours** **76**

Total: 121 hours

### Grades K through 12 Emphasis Program Requirements

General education requirements are the same as for K-9

**Level I: Exploring Education as a Profession**

13 hours to be completed before advancement to Level II

EDUC 1000	Effective Career Decision Making for Educators	3
ED PSY 2212	Introduction To Learners And Learning	3
TCH ED 2209	Foundations of Teaching in American Schools	3
HLTH PE 3277	Foundations of Health & Physical Education Programs	2
HLTH PE 3280	Human Anatomy And Physiology	5

**Level II: Analyzing the Nature and Process of Education**

21 hours to be completed before enrollement in any Level III courses:

ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3
HLTH PE 3275	Psychological Aspects Of Physical Education	3
HLTH PE 3285	Safety and Emergency Care for Health & Physical Education	3
HLTH PE 3433	Health Education Concepts and Skills	3

PHY ED 3282 (p. 357)	Physical Growth And Motor Development	3
PHY ED 3283 (p. 357)	Kinesiology	3
9 hours can be taken concurrently with Level III courses:		
HLTH PE 3434 (p. 357)	Teaching of Health and Wellness	4
PHY ED 3261 (p. 357)	Physical Activity For The Exceptional Learner	2
PHY ED 3468 (p. 357)	Curriculum And Methods Of Teaching Physical Education	3
<b>Level III: Synthesizing Theory and Practice in Education</b>		
The following Health and Physical Education courses are required:		
HLTH PE 4989 (p. 357)	Physical Education Professional Internship	2
HLTH PE 4990 (p. 357)	Practicum II: Health and Physical Education, Grades PK-5	6
HLTH PE 4992 (p. 357)	Practicum II: Health and Physical Education Grades 9-12	6
PHY ED 3422 (p. 357)	Teaching Of Skills: Grades Pk-4	4
PHY ED 3423 (p. 357)	Teaching Of Skills: Grades 5-9	3
PHY ED 3424 (p. 357)	Teaching Of Skills: Grades 9-12	3
PHY ED 3425 (p. 357)	Teaching Skills: Movement, Dance, And Rhythms	3
<b>Total Hours</b>		<b>76</b>

Minimum 124 hours

## Health Certification

For those with a valid teaching certificate in Physical Education, courses are available to obtain an additional endorsement in Health Education.

## Music Teacher Certification

Students interested in teaching Music in grades K-12 must earn a bachelor's degree in Music Education in the College of Fine Arts and Communication and take the required courses in the College of Education to meet the certification requirements. Please see the Bachelor of Music in Music Education for the list of courses in the Music content area (p. 470) and those required for teacher certification. Students take the following courses during the same semester: SEC ED 4993 (p. 357), Student Teaching in Music Education K#6, and SEC ED 4994 (p. 357), Student Teaching in Music Education 7#12.

## Art Teacher Certification

Students interested in teaching Art in grades K-12 must earn a bachelor's degree in Fine Arts in the College of Fine Arts and Communication and take the required courses in the College of Education to meet the certification requirements. Please see Art Education for a list of the Art content area (p. 435) courses and those required for teacher certification. Students take the following courses during the same semester: SEC ED 4996 (p. 357), Practicum I: Site based Experience in Elementary Art and SEC ED 4997 (p. 357), Practicum I: site based Experience in Secondary Art.

## Minors in the College of Education

### Minor in Teaching English to Speakers of Other Languages K-12

A minor in Teaching English to Speakers of Other Languages (TESOL) can be earned by successfully completing 18 hours of coursework that is identified to prepare the student to earn a TESOL teaching endorsement as an additional area of teaching certification by the Missouri Department of Elementary and Secondary Education (DESE).

TCH ED 3210 (p. 357)	General Linguistics in Teaching English to Speakers of Other Languages	3
TCH ED 3211 (p. 357)	Basic Principles of Second and Foreign Language Acquisition	3
TCH ED 3212 (p. 357)	Sociolinguistics and communication in the Classroom	3
TCH ED 3213 (p. 357)	Performance-based Assessment for TESOL	3
TCH ED 3214 (p. 357)	Material Development and Methods for TESOL	3
TCH ED 3215 (p. 357)	Field Experiences in TESOL	3

### Athletic Coaching Minor

An athletic coaching minor is available (minimum of 20 hours). The following courses are required:

PHY ED 3283	Kinesiology	3
PHY ED 3424	Teaching Of Skills: Grades 9-12	3
PHY ED 5312	Management of Sports Programs <sup>1</sup>	
PHY ED 3330	Designing Physical Activity Programs	3
<b>Total Hours</b>		<b>9</b>

<sup>1</sup> This course will not be offered in 2014-2015. Please contact the department for more information.

## Sample Four Year Plans

BSEd Early Childhood Special Education (p. 367)

BSEd Elementary Education

- Special Education TESOL emphasis (p. 367)
- Special Education emphasis (p. 367)
- TESOL emphasis (p. 368)
- Middle School Certification for English (p. 368)
- Middle School Certification for Mathematics (p. 369)
- Middle School Certification for Science (p. 369)
- Middle School Certification for Social Studies (p. 373)

BSEd Physical Education (p. 370)

BSEd Secondary Education

- Biology concentration (p. 370)
- Chemistry concentration (p. 370)
- English concentration (p. 371)
- Mathematics concentration (p. 371)
- Modern Language, French K-12 (p. 372)
- Modern Language, German K-12 (p. 372)

- Modern Language, Spanish K-12 (p. 372)
- Physics concentration (p. 373)
- Social Studies concentration (p. 373)

## Early Childhood Education Courses

### ***ECH ED 3300 Introduction To Early Childhood Education: 3 semester hours***

Prerequisites: Level I. Students will use theoretical bases as well as on site observations to develop an awareness of teaching learning strategies appropriate for the developmental needs of children from birth through age eight. Scheduling, classroom arrangement, and child management practices will be considered. Students will develop their own philosophy of early childhood education.

### ***ECH ED 3301 Early Childhood Special Education Processes and Trends: 3 semester hours***

Prerequisites: Completion of Level 1 requirements. Focus on the history and federal laws related to the early childhood special education process. Examination of child development theories and assessment to determine if developmental delays exist. Emphasis on the importance of collaboration between teachers and therapists for service delivery, designing effective transition plans and integrating intervention services into a developmentally appropriate curriculum.

### ***ECH ED 3303 Curriculum And Practice Laboratory: Infant/Toddler: 1 semester hour***

Classroom experience in infant or toddler classrooms under directions of University personnel. Must be taken concurrently with ECH ED 3313 Curriculum and Practice: Infant/Toddler.

### ***ECH ED 3304 Curriculum And Practice Laboratory: Preschool: 1 semester hour***

Classroom experience in preschool classrooms under direction of university personnel. Must be taken concurrently with ECH ED 3314 Curriculum and Practice: Preschool.

### ***ECH ED 3313 Curriculum And Practice: Infant/Toddler: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for children from birth to 30 months. Must be taken concurrently with ECH ED 3303.

### ***ECH ED 3314 Curriculum And Practice: Preschool Education: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for the inclusive preschool classroom with emphasis on science, social studies, creative activities and technology. Must be taken concurrently with ECH ED 3304.

### ***ECH ED 3332 Literacy, Learning and Instruction For The Young Child: 3 semester hours***

Prerequisites: Level I. Attention on the home language and environment of young children as they construct knowledge of print from birth to age eight. Critical examination of the range of opportunities for early literacy learning available to children from economically advantaged and disadvantaged communities. Emphasis on meaningful, culturally, and developmentally appropriate activities for fostering beginning reading and writing. Focus on strategies for involving families and capitalizing on community resources in promoting language and literacy learning for young children. This course may be applied toward a Literacy Minor.

### ***ECH ED 3350 Child/Family and Education and Community Involvement: 3 semester hours***

Prerequisites: ECH ED 3300. Formal Admission to the Teacher Education Program. This course is designed to provide students with the knowledge and skills needed to work successfully with diverse families and family groups in individual and community settings. The focus will be on strengthening adult-child relationships and family-staff relationships in the home, school, and community settings. Family involvement in early childhood programs and sharing information with families will be stressed.

### ***ECH ED 4317 Implementation, Evaluation, and Assessment in Early Childhood Education: 3 semester hours***

Prerequisites: Level I and Level II, admission to the teacher education program, ECH ED 3300. Techniques of observing children and using assessment instruments to plan and implement individual program plans for early childhood. Practicum experience required.

### ***ECH ED 4320 Classroom Management: 3 semester hours***

Same as SEC ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

### ***ECH ED 4348 The Acquisition Of Mathematical and Science Concepts: 3 semester hours***

Prerequisites: Formal admission to the Teacher Education Program, ED PSY 3312, and MATH 1150. Applications of the major theorists to mathematics reasoning and scientific inquiry. Content is appropriate for pre-K to third grade learners. Research and its implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered.

### ***ECH ED 4989 Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in a preschool and elementary (as applicable) setting with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit .

***ECH ED 4990 Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ECH ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ECH ED 4991 Student Teaching In Early Childhood Education II: 6 semester hours***

Prerequisites: Level II, ECH ED 3313, ECH ED 3314, ECH ED 4989, Must be taken with ECH ED 4991, and must immediately precede ECH ED 4991 in the semester. Must follow ECH ED 4990 in the same semester. Clinical teaching experience in early childhood education classrooms in the schools under University and school supervision. Assignments will be in different school districts buildings, serving families of different socio-economic and cultural backgrounds, and at different age/grade levels from those of the ECH ED 4990 assignments. Required of all majors in early childhood education. Not available for graduate credit.

***ECH ED 5989 Practicum I: Early Childhood/Early Childhood Special Education Site Based Experience: 2 semester hours***

Prerequisites: Level I and Level II requirements. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods courses assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ECH ED 5990 Practicum II: Early Childhood/Early Childhood Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ECH ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Teacher candidates collect data for a research project.

***ECH ED 6321 Parent And Community Resources In Early Childhood Education: 3 semester hours***

Prerequisite: Graduate Standing. Competencies for working with parents and community agencies will be developed through a study of community and community resources. Procedures for parent participation and use of service agencies in the education of all young children, including those with special needs, will be examined.

***ECH ED 6348 Understanding and Supporting Children's Math and Science Inquiry: 2 semester hours***

Prerequisites: ED PSY 6215, ECH ED 6412. Advanced study of current cognitive theory to support the development of children's inquiry skills. Curriculum development and implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. National and state standards in math and science will provide a framework for teaching strategies.

***ECH ED 6412 Foundations Of Early Childhood Education: 3 semester hours***

Prerequisite: A course in child psychology or equivalent. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention will also be directed to the implementation of such programs, problems of parent involvement and the social environment of the children.

***ECH ED 6413 Educational Role Of Play: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Emphasizes play as a constructive process with application to cognitive and social development. Special attention to facilitating play in early childhood classrooms.

***ECH ED 6415 Organization And Development Of Early Childhood Programs: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Strategies for the effective organization and development of programs for children from diverse cultures, ages birth through age eight years, will be studied. Research and theory in funding and budgeting, staffing and professional development, and selection, development, and assessment of program curriculum will be emphasized. Long-range planning for program stability and involvement in advocacy issues will be covered.

***ECH ED 6490 Internship: 1-10 semester hours***

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation and related professional activities.

***ECH ED 6497 Problems: 1-10 semester hours***

Prerequisite: Graduate standing. Individual study on topics pertaining to early childhood education.

***ECH ED 6535 Assessment, Curriculum, and Research Based Practice Birth-Grade 3: 2 semester hours***

Prerequisites: ED PSY 6030 or ECH ED 6412. Advanced studies in curriculum design, assessment, and research based practice for children from birth through eight years, with primary emphasis on birth through 5 years. Students will learn to develop curriculum based upon observation of children and their interests; child development theory and research; as well as the diverse needs of children by considering culture, context, and family relationships. Must take concurrently with ECH ED 6536.

***ECH ED 6536 Early Childhood Pre-Primary Practicum: 2 semester hours***

Prerequisites: ED PSY 6215, ELE ED 5310A or ECH ED 6412. The focus of this practicum is observation of and participation in classrooms of children birth through five years. Concurrent registration in ECH ED 6535 required.

## Educational Technology Courses

### **ED TECH 3135 Technology for Educators: 1 semester hour**

This course will instruct teacher candidates in the use of digital tools in education. Candidates will develop strategies for incorporating current technology developments and social media in educational practice.

### **ED TECH 4302 Educational Technology Instruction in Educational Agencies: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how educators can facilitate inquiry-based learning, and on the design and implementation of technology-rich activities and projects. Practices to be explored include making presentations; searching for information and educational resources; organizing, writing, and displaying information and data. Students may not receive credit for both ED TECH 4302 and ED TECH 5301.

### **ED TECH 4436 Computer-Mediated Teaching and Learning in Education: 3 semester hours**

Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Education could be formal or informal, in an institutional setting or not. Students will get experience with several different technologies during the semester.

### **ED TECH 5301 Introduction To Computers And The Internet In Education: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how teachers can facilitate learning in inquiry-based, technology-rich classrooms; and on the design and implementation of technology-rich activities and projects. Introduces students to the networked computer as an instructional tool. Course participants will be introduced to how teachers and their students can use computer tools in appropriate ways for different context areas and educational levels. Practices to be explored include making presentations; searching for information and educational resources; organizing writing, and displaying information and data.

### **ED TECH 5340 Selection And Utilization Of Educational Multimedia: 3 semester hours**

Prerequisites: ED TECH 5301 or consent of instructor. Prepares students for selecting and utilizing multimedia technologies for learning. Students will conduct projects involving educational multimedia programs available on computers or over telecommunications networks. The projects will incorporate graphics, sound, and video. The goal of working on these projects is to prepare students to facilitate others' use of multimedia in classrooms and other educational contexts.

### **ED TECH 6135 Technology for Preparing Inquiry-Based Teaching: 1 semester hour**

Prerequisites: Graduate standing. This course instructs teacher candidates in the use of digital tools in their teaching practice. Candidates develop strategies for incorporating current technology developments and social media in educational practice. Technology for educators challenges the candidates to think about the underlying principles, terms, and concepts of educational technology. Students are introduced to the different methods teachers can use to integrate technology into classroom instruction for varying grade levels and content areas. Activities undertaken in this course include learning about educational technology tools and applying some of them to create the academic instructional materials through interactive collaboration.

### **ED TECH 6404 Seminar: 1-10 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Seminar in educational technology addressing special issues and topics not normally included in the regular educational technology courses.

### **ED TECH 6416 Teaching & Learning With Technology: Graphical Representational Tools: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor Examines how graphical representation tools can be used to enhance teaching and learning. Students will learn about techniques for visualizing and organizing information and data in science, math, the social sciences, and humanities, and will become familiar with research and practice pertaining to their use in a variety of learning activities and projects.

### **ED TECH 6434 Technology and Privilege: 3 semester hours**

Prerequisites: Graduate standing. Covers issues relating to the digital divide in schools and the society. The focus will be on technology in education with an emphasis on the ways that policies and practices perpetuate the divide. To examine this phenomenon, Critical Race Theory (CRT) will be one lens to examine the inequality.

### **ED TECH 6435 Instructional Technology And Education Reform: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Students will learn how to foster changes in uses of technology for learning in schools, based on a historical understanding of previous technology reforms, and a critical assessment of recent reforms. Questions addressed included: What did stakeholders predict and hope for with earlier educational technologies, early uses of the computer and networking, and present technological innovations? What actually happened? Why? How can teachers and other educators help foster and spread effective use of technology for learning?.

### **ED TECH 6436 Computer-Mediated Communication In Education: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Learning environments including elementary, secondary, higher, and adult education will be considered.

### **ED TECH 6437 Distance Learning Via Networks And Telecommunications: 3 semester hours**

Prerequisites: Graduate Standing The course is an investigation in the ways that learning and teaching across the barriers of time and distance are similar to and different from face to face learning and teaching. Students will study the influence of interactive media: videoconferencing, asynchronous discussions and other commonly used methods.

### **ED TECH 6444 Cognition And Technology: 3 semester hours**

Same as ED PSY 6444. Prerequisites: ED PSY 6111 or consent of instructor Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

### **ED TECH 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, and pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as the role of instructors.

**ED TECH 6449 Using Technology In Administration Processes: 3 semester hours**

Same as ED ADM 6449. Prerequisites: A course in measurement, statistics or evaluation, or consent of instructor. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED TECH 6452 Educational Multimedia Design: 3 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Examines principles and techniques for the design of visually and functionally effective multimedia educational resources. Emphasis will be placed on techniques for the computer-based production of materials incorporating text, graphics, and video. Rapid prototyping and evaluation techniques will be incorporated.

**ED TECH 6454 Instructional Video Production: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Elements of digital video production will be studied and used to produce video for a variety of formats. Students will develop the skill to produce and stream programs for school news programs, video annuals, documentaries and staff development programs.

**ED TECH 6460 Technology Coordination In Schools: 3 semester hours**

Prerequisites: ED TECH 5340, ED TECH 6444, and ED TECH 6448 or consent of instructor. The course provides theoretical and practical knowledge for implementing technology in schools. A major focus will be placed on analyzing the total cost of implementations and methods for measuring educational success.

**ED TECH 6462 Technical System Implementation For Educational Technology - Part 1: 3 semester hours**

Prerequisites: ED TECH 5340. Provides a foundational understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will learn theory and practice enabling them to install, troubleshoot and configure networked computers for educational purposes.

**ED TECH 6463 Technical System Implementation for Educational Technology Part 2: 3 semester hours**

Prerequisites: ED TECH 6462. Provides an in-depth understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will extend their knowledge of theory and practice, and will install, troubleshoot, configure networked computers for educational purposes.

**ED TECH 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED TECH 6497 Problems: 1-10 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Individual study on topics pertaining to educational technology.

**ED TECH 7070 Higher Education and Technology: Theory and Practice: 3 semester hours**

Prerequisites: Doctoral standing or consent of instructor. Students explore recent research of classical learning theories and pedagogy in order to incorporate advanced technology. Students apply both theory and practice to develop and present lesson modules that explore research in this area, and illustrate the use of technology in teaching. Detailed constructive criticism is used with the presentations.

**Elementary Education Courses****ELE ED 2192 Educational Laboratory/Field Experience: 1-3 semester hours**

A laboratory/field experience requiring systematic observation and/or participation in appropriate educational settings. To precede student teaching. May be repeated to maximum of three hours.

**ELE ED 3330 Literacy, Literature And The Learner: 3 semester hours**

Prerequisites: Level I requirements. Exploration of literature and literacy-related resources available to teachers for children and young people. Emphasis on critical reading of literature for a variety of purposes, including communication, instruction, information, and recreation. Focus on the development of criteria for evaluating and selecting culturally and developmentally appropriate materials for motivating students to read in school and at home, as well as strategies for using literature to build family and school partnerships around reading. Twelve hours of participation in a school classroom setting are required. This course may be applied toward a Literacy Minor.

**ELE ED 3336 Communication Arts Learning And Instruction: 3 semester hours**

Prerequisites: Level I and Level II requirements. Analysis of the six communication arts (listening, speaking, viewing, visually representing, writing, and reading) across content areas. Attention on understanding children's home language and how children learn and develop communication skills. Special emphasis on strategies for assessing and teaching reading and writing, including workshop models, spelling, grammar, and grand conversations to meet the needs of every child. This course may be applied toward a Literacy Minor.

**ELE ED 3337 Teaching and Learning Literacy in the Elementary Classroom: 4 semester hours**

Prerequisite: Level I. The course, emphasizing literacy development, literacy instruction and children's literature, is the first in a sequence of two courses on teaching reading and writing. The purposes of this course are to survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work and phonics alongside matching texts (print and digital) and readers. Assessment strategies that inform these instructional practices will be introduced. Particular attention will be given to learning to teach literacy within diverse contexts and with multicultural groups of students.

**ELE ED 3338 Literacy Assessment and Learning: 3 semester hours**

Prerequisites: Level II and ELE ED 3337. The purposes of this course are to address issues of the differences and difficulties that may occur in literacy processes, evaluation of students' literacy skills, analysis of texts for their use by readers, and to design classroom literacy engagements that utilize a variety of instructional strategies and materials. Assessment practices explored will include running records, qualitative reading inventories, spelling inventories and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

**ELE ED 3389 Classroom Based Assessment To Guide Literacy Instruction: 3 semester hours**

Prerequisites: TCH ED 3315 or TCH ED 4391 or equivalent reading methods course. Analysis of strategies for differentiating instruction for a range of readers and writers across content areas. Focus on cultural and language considerations in the assessment of students' literacy skills. Emphasis on meeting the needs of individual readers and writers in the context of whole class instruction. This course may be applied toward a Literacy Minor.

**ELE ED 4246 Teaching Mathematics In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of mathematics requirements in General Education. Organization and implementation of a modern elementary school mathematics program. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4253 Teaching Of Social Studies In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of social science requirements in general education. Study of elementary school social studies emphasizing the current social studies curricular content, methods of teaching and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, the K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, SEC ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**ELE ED 4341 Teaching Science In The Elementary School: 3 semester hours**

Prerequisites: Level I and Level II requirements. An analysis of teaching science to K-6 students with emphasis on current science education trends, science curricular materials, and strategies of instruction. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4342 Addressing Needs In Mathematics Teaching And Learning: 3 semester hours**

Prerequisite: ELE ED 4246. Instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. Course requires that students participate in K-12 classrooms for a minimum of 10 hours, in addition to university class schedule.

**ELE ED 4989 Practicum I: Elementary/Special Education Site Based Experience: 3 semester hours**

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**ELE ED 4990 Practicum II: Elementary/Special Education Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in ELE ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

**ELE ED 4991 Elementary School Student Teaching II: 6 semester hours**

Prerequisite: Completion of Level III courses. Clinical teaching experience in elementary school classrooms under university and school supervision. Required for all majors in elementary education. Not available for graduate credit.

**ELE ED 4992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 3 semester hours**

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**ELE ED 4993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not for graduate credit.

**ELE ED 4994 Practicum I: Elementary/TESOL Site Based Experience: 3 semester hours**

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**ELE ED 4995 Practicum II: Elementary/TESOL Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Not for graduate credit.

**ELE ED 5989 Practicum I: Elementary/Special Education Site Based Experience: 1-2 semester hours**

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

**ELE ED 5990 Practicum II: Elementary/Special Education Site Based Experience: 8 semester hours**

Prerequisites: Grade of B- or higher in ELE ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

**ELE ED 5992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 2 semester hours**

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

**ELE ED 5993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 8 semester hours**

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

**ELE ED 5994 Practicum I: Elementary/TESOL Site Based Experience: 2 semester hours**

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

**ELE ED 5995 Practicum II: Elementary/TESOL Site Based Experience: 8 semester hours**

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Teacher candidates collect data for a research project.

**ELE ED 6241 Science Content, Inquiry-Based Instruction, and Assessment: STEM-Integrated Pedagogy: 2 semester hours**

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. The course is designed to provide teacher candidates with research-based theories and practices focused upon the teaching and learning of science. Candidates will acquire skills to plan and implement lessons to facilitate each learner's ability to conceptualize science concepts. The course will integrate related disciplines, such as technology, engineering and mathematics, in order to provide prospective teachers with a context for understanding the content of science, how science knowledge is acquired and understood, and how the sciences are connected across disciplines. Through course experiences and scholarly readings, prospective teachers will realize that to become an effective teacher one must acquire a positive attitude toward learning science, technology, engineering and mathematics; know how to acquire scientific information; and know how to facilitate learners' construction of scientific understandings.

**ELE ED 6246 Math Content Pedagogy, Inquiry-Based Instruction, and Assessment: 3 semester hours**

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. This course provides the teacher candidate with math content and math pedagogical techniques to lead them to prepare and deliver best practices of teaching that are aligned with the elementary math learning standards and research-based practices. The students are encouraged to adopt interdisciplinary resources including multicultural children's literature and coping strategies for diverse students in the classroom settings. The students will develop lessons that entail using inquiry-based instructional materials, and reflective practice with assessment data.

***ELE ED 6253 Teaching Social Studies through Reading, Writing, and English Language Learners: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. Examines the teaching of social studies through reading elementary children's literature about U.S. history and examines writing instruction as a complex and dynamic process. The course integrates a standards-based, backward-planning approach; authentic literacy instruction through the lens of social studies; attention to the linguistic and cultural demands of social studies; and differentiation in instruction so that each student has access to meaningful and challenging learning opportunities using Sheltered Instruction Observation Protocol (SIOP). It focuses on essential attributes of effective literacy and content teachers, including the ability to draw upon students' cultural and linguistic backgrounds, help students make connections between new information and previous knowledge and skills that are research-based, and support students to transfer new information to real-life contexts and environments using critical thinking skills.

***ELE ED 6337 Teaching and Learning Literacy in the Elementary Classrooms: Teaching Reading and Writing: 4 semester hours***

Prerequisites: Level I courses. Emphasizes literacy development, literacy instruction, and children's literature in the process of teaching reading and writing. Students survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to effectively utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work, and phonics alongside matching texts (print and digital) and readers. Includes readings of academic research articles and book chapters that promote critical thinking in the design and implementation of literacy instruction. Particular attention will be given to learning to teach literacy within diverse contexts and with linguistically and culturally diverse students.

***ELE ED 6338 Literacy Assessment for Guided Instruction: 3 semester hours***

Prerequisites: Level I and ELE ED 6337. Addresses assessment issues that include examining the differences and difficulties that may occur in literacy learning processes. Topics covered include the effective use and evaluation of assessment instruments to prevent student literacy difficulties and promote accelerated learning. Students design classroom literacy engagements utilizing a variety of instructional strategies and materials. Includes reading peer-reviewed research articles and book chapters that promote critical thinking in the assessment and evaluation of literacy achievement. Assessment practices explored include running records of oral reading, an observation survey of early literacy behaviors (e.g., phonemic awareness, letter identification), qualitative reading inventories, spelling inventories, and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

***ELE ED 6342 Addressing the Mathematical Needs of Students: 3 semester hours***

Prerequisites: Graduate standing and ELE ED 6246. Educators will learn instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. The course will cover research based approaches to help develop assessments and strategies for addressing needs of students who have difficulties understanding and becoming proficient in mathematics.

***ELE ED 6387 Literacy Acquisition And Learning For Diverse Students: 3 semester hours***

Prerequisite: Graduate Standing. Designed to extend teacher understanding of children's literacy acquisition, development, and learning through the elementary grades. Emphasis on development of a teaching philosophy and skills which include maintaining effective literacy learning environments in diverse classrooms, fostering culturally responsive classroom communities, understanding social and environmental issues that affect the literacy learning of diverse learners, using effective methods and materials to develop engaged and literate students, and fostering children's participation in literacy activities.

***ELE ED 6410 Current Research In Early Childhood And Elementary Programs: 3 semester hours***

Prerequisites: Graduate Admission. A systematic examination of research related to early childhood and elementary school programs. Student will be expected to become effective consumers of educational research and to utilize appropriate research findings in their decision-making processes when planning instruction.

***ELE ED 6411 Curriculum Leadership Elementary Programs: 3 semester hours***

Prerequisite: ED PSY 6030. Learn strategies for development and implementation of up-to date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

***ELE ED 6422 Curriculum Design of Elementary Programs: 3 semester hours***

Prerequisites: ED PSY 6030, ELE ED 6411 or consent of instructor. A study of current and classic curricular design models of elementary education. Students will select a grade level or subject area curriculum and develop an integrated or differentiated curriculum based on the Common Core and national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instructional practices to student performance.

***ELE ED 6423 Learning Through Inquiry: 3 semester hours***

Prerequisites: ED PSY 6030 or consent of instructor. Students will learn to improve their instruction through using various inquiry models of teaching which develop the thinking skills required by the Common Core standards. Prior instructional experience is recommended.

***ELE ED 6426 Elementary School Curriculum Reform In The Earth/Space Sciences: 1-4 semester hours***

Prerequisites: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the earth/space sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

***ELE ED 6428 Elementary School Curriculum Reform In The Life Sciences: 1-4 semester hours***

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. This course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for maximum of 4 credit hours.

***ELE ED 6429 Elementary School Curriculum Reform In The Physical Sciences: 1-4 semester hours***

Prerequisite: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry science activities that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for a maximum of 4 credit hours.

***ELE ED 6436 Children's Literature I: Survey And Analysis: 3 semester hours***

Prerequisite: ELE ED 3330 or equivalent. A survey of children's literature published in the last ten years. Special emphasis will be placed on the relationship between children's literature and contemporary issues of society. Students will experience the materials themselves rather than reading about books. In addition, students will begin to study the literary elements that make literature interesting and meaningful for children.

***ELE ED 6441 Problems And Research In Teaching Elementary School Science: 3 semester hours***

Prerequisite: Eight hours of science, ELE ED 6441, ED PSY 6111. A thorough examination of research related to elementary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional literature.

***ELE ED 6445 Problems Of Teaching Mathematics In The Elementary School: 3 semester hours***

A study of the mathematics program in the elementary school from the viewpoint of goals, content, techniques, and evaluation.

***ELE ED 6447 Problems And Research In Teaching Elementary School Mathematics: 3 semester hours***

Prerequisite: ELE ED 6445. A thorough examination of research related to recurrent problems in elementary school mathematics instruction, as well as current problems arising within modern programs. Includes methodology appropriate to investigation of such problems and techniques for assessment of the literature.

***ELE ED 6448 Diagnosis And Remediation Of Disabilities In Learning Mathematics: 3 semester hours***

Prerequisite: ELE ED 6445. Causes of mathematical disabilities. Materials and techniques for diagnoses and corrective programs for children and youth.

***ELE ED 6450 Problems Of Teaching Social Studies In The Elementary School: 3 semester hours***

A classroom-oriented study of curricular and instructional problems encountered in social studies. Emphasis is placed upon development of materials, techniques, and resources.

***ELE ED 6482 Problems And Research In Teaching Elementary School: 3 semester hours***

This is the capstone course for the Master of Elementary Education-Emphasis in Reading. To be taken in the last 9 hours of Masters Program. The three foci for this course are (1) systematic study of research as it focuses on the problems of teaching reading in the elementary school, (2) innovations in the field, and (3) action research. Each student designs and completes an action research project related to literacy.

***ELE ED 6490 Internship: 1-10 semester hours***

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

***ELE ED 6493 Reading Specialist Practicum I: 3 semester hours***

Prerequisites: ELE ED 6684, ELE ED 6686, and ED REM 6707, ED REM 6709, or ED REM 6716. Application of reading theory and research in a supervised setting. Emphasis on assessing and analyzing the literacy strengths, needs, and interests of a range of readers with the goal of improving their reading abilities and attitudes. Focus is on establishing reading support for children with the assistance of formal and informal assessments, reading professionals, educators, and children's families.

***ELE ED 6494 Reading Specialist Practicum II: 3 semester hours***

Prerequisite: ELE ED 6493. Application of reading theory and research in a supervised setting. Emphasis on using appropriate materials and providing effective instructional techniques to address children's assessed literacy strengths, needs, and interests with the goal of improving their reading abilities and attitudes. Focus is on sustaining reading support for children with the assistance of other reading professionals, educators, and children's families.

***ELE ED 6495 Supervision Of Practicum In Clinical Reading: 3 semester hours***

Prerequisites: ELE ED 6486, ELE ED 6494, ED REM 6716 or consent of instructor. Supervising graduate students in diagnosis and remedial process within the reading clinic.

***ELE ED 6497 Problems: 1-10 semester hours***

Selected problems to meet the needs of individual students.

***ELE ED 6684 Instructional Strategies For Teaching Reading: 3 semester hours***

Prerequisites: Graduate standing. Designed to extend teacher knowledge of effective instructional strategies for teaching reading. Emphasis on development of a teaching philosophy which acknowledges children gain considerable knowledge about reading from their families and communities, long before they encounter formal reading instruction. Focus on fostering culturally responsive classrooms using children's prior experiences, their language systems, cross-cultural literature, authentic texts, and other print materials familiar to children's home environments, as well as on teaching effective strategies to promote children's reading success.

**ELE ED 6686 Analysis And Correction Of Reading Disabilities: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and at least one graduate level literacy course. Designed to develop teacher understanding of the roles and responsibilities of the teacher of reading, Reading Specialist, and Literary Coach. Emphasis on the nature of specific reading difficulties, distinguishing reading difficulty/ disability from language difference, becoming familiar with a range of tools for assessing reading skills and strategies, and developing a critical orientation for evaluating the purpose and utility of various literacy assessment tools. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

**ELE ED 6688 Literacy Assessment To Guide Instruction: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and ELE ED 6686. Designed to apply teacher knowledge of the roles and responsibilities of the teacher of reading, Reading Specialist and Literary Coach. Emphasis on using literacy assessment tools and techniques to guide instruction for a range of children, especially in the areas of writing, comprehension, and vocabulary. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

**Health and Physical Education Courses****HLTH PE 3275 Psychological Aspects Of Physical Education: 3 semester hours**

Prerequisite: PSYCH 1003. A study of the psychological processes underlying the learning and performance of motor skills and participation in physical activity. Covers how humans learn skilled actions, how principles of motor performance and learning can be applied to teaching, and how teachers can create positive motivational climates.

**HLTH PE 3277 Foundations of Health & Physical Education Programs: 2 semester hours**

Prerequisites: Junior standing. A study of the historical, philosophical, and cultural influences and issues related to health education and physical education programs.

**HLTH PE 3285 Safety and Emergency Care for Health & Physical Education: 3 semester hours**

Prerequisites: HLTH PE 3280 or equivalent. A study of safety issues relating to health and physical education, including prevention and treatment of physical activity-related injuries. Emphasis will be given to emergency responses, including CPR certification.

**HLTH PE 3380 Introduction to Nutrition for Health and Performance: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Study of human nutrition and its relationship to healthy lifestyles and exercise performance. Includes study of nutrients, food sources, healthy weight and body composition, energy intake and expenditure, fluid and electrolyte balance, and ergogenic aids.

**HLTH PE 3432 Teaching Health and Physical Education in the Elementary School: 4 semester hours**

Prerequisites: Admission to the Teacher Education Program. A study of health and physical education programs in the elementary school. Emphasis is given to the teacher's roles and responsibilities as they relate to the content and services found in the coordinated school health program.

**HLTH PE 3433 Health Education Concepts and Skills: 3 semester hours**

Prerequisites: Junior Standing. A study of health concepts and lifestyle skills found in K-12 health education strands, including mental health, sexuality education, drug education, nutrition, personal health and disease prevention.

**HLTH PE 3434 Teaching of Health and Wellness: 4 semester hours**

Prerequisites: HLTH PE 3280 or the equivalent, or consent of the instructor. Study of concepts and issues related to health and active lifestyle behavior development, with emphasis given to the design and preparation of appropriate instructional experiences and techniques.

**HLTH PE 4989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. This course is an intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Not available for graduate credit.

**HLTH PE 4990 Practicum II: Health and Physical Education, Grades PK-5: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Not available for graduate credit.

**HLTH PE 4991 Practicum II: Health and Physical Education Grades 5-9: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Not available for graduate credit.

**HLTH PE 4992 Practicum II: Health and Physical Education Grades 9-12: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Not available for graduate credit.

**HLTH PE 5989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. An intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Activities to acquire research skills will be included.

**HLTH PE 5990 Practicum II: Health and Physical Education, Grades PK-6: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Teacher candidates collect data for a research project.

**HLTH PE 5991 Practicum II: Health and Physical Education Grades 5-9: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Teacher candidates collect data for a research project.

**HLTH PE 5992 Practicum II: Health and Physical Education Grades 9-12: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Teacher candidates collect data for a research project.

## Middle Education Courses

**MID ED 4246 Teaching Mathematics In The Middle School: 3 semester hours**

Prerequisites: Level 1 and Level 2 and completion of mathematics area of concentration A study of the middle school math curriculum with state standards and appropriate instructional strategies, materials, and assessments.

**MID ED 4253 Teaching Social Studies In The Middle School: 3 semester hours**

Prerequisites: Completion of level 1 and level 2 courses. Study of middle school social studies emphasizing current social studies curricular content, methods of teaching, and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, middle school based field experiences are required in addition to scheduled course time.

**MID ED 4315 The Middle Level School: 3 semester hours**

Prerequisites: level 1 and admission to teacher education program. An in-depth study of the philosophical and historical basis of the goals and organization of middle level schools, including a review of research as the basis for current trends and practices.

**MID ED 4316 Middle Level Curriculum And Instruction: 3 semester hours**

Prerequisites: Completion of Level 1 and MID ED 4315. Preparation for teaching and learning in a middle school, grades 5-9. Content focuses on curriculum development, methods, techniques, materials, planning, organization, and assessment in middle level education for early adolescents.

**MID ED 4317 The Middle-Level Child: 3 semester hours**

Prerequisites: Completion of level 2. Developmental characteristics and needs of early adolescents are studied through field experience in middle school classrooms. The relationship between needs and behavior is explored and skills for effective student teacher relationships are highlighted. This course to be taken concurrently with MID ED 4989.

**MID ED 4350 Teaching Science In The Middle School: 3 semester hours**

Prerequisites: Level I and Level 2 or equivalent preparation. Students will analyze both methodology and content, apply appropriate teaching and learning strategies, and become acquainted with technological advances in teaching science. Students will use informal and formal assessment as well as design and implement original science activities and instruction for all areas of science. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then middle school based field experiences are required in addition to scheduled course time.

**MID ED 4989 Practicum I: Middle LEvel Education Site Based Experience: 3 semester hours**

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in grades 6-8 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceeding Practicum II. Not available for graduate credit.

**MID ED 4990 Practicum II: Middle Level Education Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in MID ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in grades 6-8 school settings in the subject area of certification. Not available for graduate credit.

## Physical Education Courses

**PHY ED 1124 Principles & Practice In 1St Aid & Cardiopulmonary Resuscitation: 1 semester hour**

The course provides theory and supervised practice in first aid and cardiopulmonary resuscitation leading to American Red Cross certification in those areas.

**PHY ED 2134 Personal Physical Fitness: 3 semester hours**

Prerequisite: Consent of instructor. A study of the relationship between vigorous physical activity and individual well-being. Emphasis will be placed on an individualized analysis of health fitness, resulting in a prescribed program to develop optimal levels of physical fitness, including aerobic fitness, strength, muscular endurance, flexibility, body composition, and lifetime sports considerations.

**PHY ED 3204 Special Topics In Physical Education: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, field study or research.

**PHY ED 3261 Physical Activity For The Exceptional Learner: 2 semester hours**

Prerequisite: SPEC ED 3311 and TCH ED 3313. A study of the special physical activity and exercise needs, interests, and problems of the exceptional learner, with considerable emphasis on the development of methods and competencies, in modifying physical activities.

**PHY ED 3282 Physical Growth And Motor Development: 3 semester hours**

Prerequisite: PSYCH 2270 and PHY ED 3465. An examination of the physical growth and aging, and motor development of the human being over the life span. Emphasis on evaluative tools, techniques and studies of research findings. Laboratory field experience for observing individuals. Attention is directed toward acquisition of basic skills, perceptual-motor development, fitness development, and age-related changes in information processing. A Required course for Physical Education majors; an elective course for early childhood, special, and Elementary Education majors.

**PHY ED 3283 Kinesiology: 3 semester hours**

Prerequisite: HLTH PE 3280 and math proficiency. Study of the biomechanics of human motion with particular application to performance in sport activities.

**PHY ED 3287 Seminar In Exercise Science: 1-3 semester hours**

Prerequisites: HLTH PE 3284 or consent of instructor. Study of current topics in the research and practice of exercise science, especially those required for certifications in the field. An emphasis will be placed on application of research to professional situations. Some field experience may be required. May be repeated as long as the topic is different for a maximum of 6 credit hours.

**PHY ED 3422 Teaching Of Skills: Grades Pk-4: 4 semester hours**

Prerequisites: Completion of 15 hours of level II courses. Study of developmental movement activities and appropriate learning experiences found in PK-4 grade level programs, with emphasis on developmental sequencing and the design of appropriate learning activities, materials, and effective pedagogical skills.

**PHY ED 3423 Teaching Of Skills: Grades 5-9: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sports and physical activities commonly found in the curriculum for grades 5-9, with emphasis on critical cues analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3424 Teaching Of Skills: Grades 9-12: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sport and physical activities predominately found in physical education programs at these grade levels, with emphasis given to critical cue analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3425 Teaching Skills: Movement, Dance, And Rhythms: 3 semester hours**

Prerequisites: Completion of 15 credit hrs of Level II courses. Study of movement analysis and techniques of teaching fundamental movement skills, rhythmic activities, creative movement, and dance forms commonly taught in school settings. Emphasis will be given to developmental sequencing and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3465 Physical Education Activities In The Elementary School: 3 semester hours**

Objectives of physical education for the elementary school child with applications of choice of activities, organization of program, theory, practices.

**PHY ED 3468 Curriculum And Methods Of Teaching Physical Education: 3 semester hours**

Prerequisite: PHY ED 101 or TCH ED 3213. Study of the scope and sequence of the school program in physical education with emphasis on planning processes, content selection, management procedures, instructional strategies, and program assessment.

**PHY ED 5380 Nutrition For Human Performance: 3 semester hours**

A study of human nutrition and its relationship to human performance. Consideration is given to nutrients - function, food source, health concerns and implications energy intake and expenditure; special considerations - body composition including weight gain and loss ergogenic aides competitive athletes, older adults, children and teens, pregnant women, disease risk, fluid and electrolyte balance, and specific sport activities.

**PHY ED 6462 The Physical Education Curriculum: 3 semester hours**

Prerequisite: Consent of instructor. A study of current practices, problems, trends and research involved in the analysis and development of the physical education curriculum.

**PHY ED 6464 Analysis Of Teaching In Physical Education: 3 semester hours**

Prerequisite: Consent of instructor. A study of trends and research relating to teaching methodology, teacher effectiveness, and supervision of instruction in physical education. Emphasis will be given to the application of research on teacher effectiveness in the instructional process in physical education.

**PHY ED 6478 Problems And Research In Physical Education: 3 semester hours**

A study of potential research problems and research processes in specific physical education subdisciplines. A research project will be completed in the student's physical education subdiscipline interest area.

**PHY ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**PHY ED 7492 Directed Readings In Curriculum And Instruction: 1-6 semester hours**

Prerequisites: Graduate Standing, one graduate course in Curriculum and Instruction, and permission of the instructor. Independent study into the current research, literature, and issues in the areas of physical education curriculum and instruction.

**PHY ED 7494 Directed Readings In Motor Behavior: 1-6 semester hours**

Prerequisites: Graduate standing, one graduate course in motor behavior, and permission of the instructor. Independent study into the current research, literature, and issues in the area of motor behavior.

## Secondary Education Courses

**SEC ED 3240 Curriculum And Methods Of Teaching Physical Sciences: 3 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in the subject area. A study of the scope and sequence of the physical science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of science. To be taken concurrently with Practicum I. This course must be completed in residence.

**SEC ED 4011 The Curriculum And Methods Of Teaching History And Social Studies: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of history and social studies courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. May not count toward history hours required for history major. Must be completed prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4012 Social Studies Teaching Seminar: 1 semester hour**

Prerequisites: SEC ED 4989. Must be taken concurrently with student teaching. Addresses the application of teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 4013 United States History For The Secondary Classroom: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of American history to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of American history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies certification. Not available for graduate credit.

**SEC ED 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as POL SCI 4090. Prerequisites: POL SCI 4090/ SEC ED 4090 must be taken concurrently with SEC ED 4011 except with special consent of the School Studies Coordinator. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

**SEC ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**SEC ED 4589 Curriculum And Methods Of Teaching Foreign Languages: 3 semester hours**

Same as FGN LANG 4589. Prerequisites: TCH ED 3310 or TCH ED 5310 and passing the departmental language skill test. A study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of foreign language. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4590 Foreign Language Teaching Seminar: 2 semester hours**

Same as FGN LANG 4589. Prerequisite: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of SEC ED 4589, Curriculum & Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

**SEC ED 4646 The Curriculum And Methods Of Teaching Math: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of the mathematics courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of mathematics. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4648 Mathematics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4989. Must be taken concurrently with SEC ED 4990. A seminar in the integration of mathematics curricula, Educational philosophy, teaching strategies, and instructional technology in the classroom setting. Not available for graduate credit.

**SEC ED 4837 Chemistry/Physics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 3240 and SEC ED 4989. A seminar to accompany practice teaching covering integration of physical science curricula and methods into the classroom setting. To be taken concurrently with SEC ED 4990. Two-hour discussion per week.

**SEC ED 4880 Writing For Teachers: 3 semester hours**

Prerequisite: ENGL 3090 or junior level English. Same as ENGL 4880. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**SEC ED 4885 The Curriculum And Methods Of Teaching English: 3 semester hours**

Prerequisites: Completion of Level II education courses and a near major in English. A study of the scope and sequence of the English courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experiences and theory to practice. To be taken prior to student teaching and concurrently with Practicum I, SEC ED 4989.

**SEC ED 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as TH DAN 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communications or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989; Secondary Education Professional Internship. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4888 English Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4885 and a near major in the subject area. A seminar in the integration of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with Practicum II, SEC ED 4990. Not available for graduate credit.

**SEC ED 4985 Curriculum And Methods Of Teaching Life Sciences: 4 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in biology. A study of the scope and sequence of the life science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. The analysis of teaching/learning and field experience observations in secondary school classrooms will be integrated into classroom activities and discussions. Take concurrently with SEC ED 4989. This course must be completed in residence.

**SEC ED 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences.

**SEC ED 4989 Practicum I: Site Based Experience: 3 semester hours**

Prerequisites: Level I & II requirements. This course is an intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teaching in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Not available for graduate credit.

**SEC ED 4990 Practicum II: Site Based Experience: 12 semester hours**

Prerequisites: SEC ED 4989 and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Not available for graduate credit.

**SEC ED 4993 Practicum II: Site Based Experience in Elementary (K-6) Music: 6 semester hours**

Prerequisites: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4994. Not available for graduate credit.

**SEC ED 4994 Practicum II: Site Based Experience in Secondary (7-12) Music: 6 semester hours**

Prerequisite: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4993. Not available for graduate credit.

**SEC ED 4996 Practicum II: Site Based Experience in Elementary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Intensive clinical teaching experience under university and school supervision, with seminar included. Must be taken "in block" with SEC ED 4997. Not available for graduate credit.

**SEC ED 4997 Practicum II: Site Based Experience in Secondary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Clinical teaching experience under university and school supervision in middle/junior high and/or high school, with seminar included. Must be taken in block with SEC ED 4996. Not available for graduate credit.

**SEC ED 4999 Biology Science Teaching Seminar: 3 semester hours**

Prerequisites: SEC ED 4985 and SEC ED 4986. The application of Educational philosophy, science curriculum, teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 5000 Teacher Practicum Research: 1 semester hour**

Prerequisites: Admission into Student Teaching. Students conduct research on their own teaching in order to modify their instruction, curriculum and assessment practices. Concurrent enrollment in SEC ED 4990, Secondary Student Teaching.

**SEC ED 5012 Social Studies Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of social studies curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5374 Foreign Language Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of foreign language curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5648 Mathematics Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of mathematics curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5888 English Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5989 Practicum I: Site Based Experience: 2 semester hours**

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Activities to acquire research skills will be included.

**SEC ED 5990 Practicum II: Site Based Experience: 8 semester hours**

Prerequisites: SEC ED 5989 with a B- or better and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Teacher candidates collect data for a research project.

**SEC ED 5999 Biology Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of science curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 6404 Seminar: 1-10 semester hours****SEC ED 6415 Curriculum Leadership in Education: 3 semester hours**

Prerequisites: ED PSY 6030 or consent of instructor. Strategies for developing and implementing up-to-date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

**SEC ED 6416 Curriculum Design for Educational Programs: 3 semester hours**

Prerequisites: ED PSY 6030, SEC ED 6415 or consent of instructor. Principles of curriculum design and development for a formal or informal educational setting. Students may choose to develop an integrated or differentiated curriculum using the Common Core or national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instruction practices to learner performance.

**SEC ED 6420 Improving Teaching and Learning: 3 semester hours**

Prerequisites: ED PSY 6030, or consent of instructor. Students will learn to improve their teaching effectiveness through the use of various models of instruction that are based on current learning theories and research in teaching methodology to improve the achievement of diverse learners. Focus on inquiry models that prepare educators for effectively teaching the Common Core standards. Prior instructional experience is recommended.

**SEC ED 6428 Secondary School Curriculum Reform In The Life Sciences: 1-4 semester hours**

Prerequisites: Graduate Standing. Field-based experiences in improving the district level secondary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6441 Problems and Research in Teaching Secondary School Science: 3 semester hours**

Prerequisites: Graduate Standing & science education experience. A thorough examination of research related to middle and secondary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional research literature.

**SEC ED 6485 Secondary School Curriculum Reform In The Physical Sciences: 1-4 semester hours**

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level secondary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**SEC ED 6497 Problems: 1-10 semester hours**

## Special Education Courses

**SPEC ED 3318 Inclusive Classrooms: 3 semester hours**

Prerequisites: Completion of Level I courses. This class is an introductory overview of inclusive education, the characteristics of special populations in diverse classrooms, and issues related to compliance with state and federal law in serving students with varying needs. In addition, Individualized Education Plans (IEPs) and the eligibility process will be emphasized. Applicable strategies for the successful inclusion of all students that enhance collaboration among relevant stakeholders will be provided.

**SPEC ED 3345 Cross Categorical Special Education I: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Ed Program. Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 3346 Literacy Assessment and Reading for Students with Special Needs: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Must be taken during the same semester as SPEC ED 4989. Examination of current research and issues specific to educating students with disabilities in the area of reading. Topics include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction.

**SPEC ED 3349 Cross-Categorical Special Education: 3-6 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Study of research-based instructional, behavior, and IEP writing strategies used to assist students with cross-categorical disabilities. Students take this during the same semester as their Practicum I course.

**SPEC ED 4315 Speech And Language Of Exceptional Children: 3 semester hours**

Prerequisites: SPEC ED 3318 and Admission to the Teacher Education Program. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning. Not available for graduate credit.

**SPEC ED 4323 Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings: 3 semester hours**

Prerequisites: Completion of Level I and Level II courses. This course establishes healthy and culturally appropriate teacher-student relationships that build successful classroom community and enhance student learning. Teacher candidates develop a culturally appropriate classroom management plan that includes rules, procedures, and expected behaviors and uses problem-solving strategies to resolve behavior problems. In addition, teacher candidates will develop skills to assess, design and implement extensive, individualized, positive behavioral supports. Emphasis is on the candidates developing the social competence of PreK-12 students within diverse inclusive classrooms and engaging families in supportive interactions. Not available for Graduate Credit.

**SPEC ED 4325 Behavior Management: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II Education courses. Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 4342 Transition Issues And Planning: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Education Program. This course provides information to teachers and human service professionals who work closely with adolescents and young adults with disabilities. Emphasis is placed on understanding and planning for the transition from school to adult life for students with disabilities. Transition outcomes include employment, residential options, and other developmental concerns. Topics include self-determination, career education and planning, interagency collaboration, vocational and residential issues and resources, and family support and involvement.

**SPEC ED 4989 Special Education Professional Internship: 3 semester hours**

Prerequisites: Level I & Level II requirements and ELE ED 4989. This course is an intensive professional development experience (9 hours per week for 14 weeks) working in a school setting with students with disabilities. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding student teaching. This course is to be taken in conjunction with SPEC ED 3349. Assignments from this course are carried out in the Internship, and Internship experiences inform the activities and discussions in this course. Not available for graduate credit.

**SPEC ED 4990 Special Education Student Teaching I: 6 semester hours**

Prerequisites: Completion of Level I, II & III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experience in elementary level special education program under university and school supervision. Required of all special education majors; must be taken during the same semester as SPEC ED 4991. Not available for graduate credit.

**SPEC ED 4991 Special Education Student Teaching II: 12 semester hours**

Prerequisites: Completion of all Level I, II and III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experiences in secondary school classrooms under university and school supervision. Must be taken during the same semester as SPEC ED 4990. Required for all majors in special education. Not available for graduate credit.

**SPEC ED 5305 Planning And Managing The Teaching And Learning Environment: 3 semester hours**

Prerequisites: SPEC ED 4303 or consent of instructor This course provides an in-depth exploration of various behavior management techniques that are particularly applicable for students in cross-categorical placements. Projects on functional behavioral assessment and behavior support plans will be conducted.

**SPEC ED 6315 Understanding/Implementing Speech & Language Interventions that Assist Children w/ Special Needs: 3 semester hours**

Prerequisites: Graduate Standing. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning.

**SPEC ED 6325 Advanced Studies in Classroom & Behavior Management: 3 semester hours**

Prerequisite: Graduate Standing. Advanced study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 6345 Characteristics and Education of Students with High-Incidence Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of the exceptional child. Advanced study of characteristics of students with high-incidence and cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 6346 Reading Instruction and Intervention in Special Education: 3 semester hours**

Prerequisites: Graduate Standing. This course examines current research and issues specific to educating students with disabilities in the area of reading. Topics will include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction. (No credit earned if credit previously earned from SPEC ED 3346).

**SPEC ED 6372 Screening And Diagnosis Of Developmental Delays: Birth To 5 Years: 3 semester hours**

Prerequisite: ED REM 3721. This course addresses the content, techniques, and special problems related to the assessment of children at risk for developmental delays in the birth to five year age range. Students gain experience in construction, administration and interpretation of assessment tools used with young children. Required for certification in severe handicaps and early childhood-special education.

***SPEC ED 6412 Psychology Of Exceptional Children: 3 semester hours***

An in-depth analysis of the unique psychological problems of exceptional children and youth. Current psychological theories and research emphasized.

***SPEC ED 6415 The Law And Special Education: 3 semester hours***

Prerequisite: Graduate Standing. Special education is governed by an elaborate and extensive body of statutes, regulations, and court decisions. This course will focus on the requirements, history, and evolution of laws impacting special education services; current legal requirements in providing a free appropriate public education (FAPE) to students with disabilities and the procedures to obtain legal information in law libraries and on the Internet; and how to conduct legal research using a variety of sources.

***SPEC ED 6430 Characteristics and Education of Individuals with Low-Incidence Disabilities: 3 semester hours***

Prerequisites: TCH ED 3313 or equivalent course in psychology of the exceptional child; graduate standing. An advanced study of the theoretical and methodological problems related to autism and developmental (low-incidence) disabilities. Particular emphasis on the application of current research findings to issues confronting individuals with autism and developmental disabilities, and family-and community-systems dynamics. Required course for concentration area: Autism and Development Disabilities.

***SPEC ED 6437 Applied Behavior Analysis: Functional Assessment and Interventions: 3 semester hours***

Prerequisites: Graduate Standing. Study of the evidence-based, best practice principles and interventions of applied behavior analysis strategies. Exploration of approaches that prove effective when designing and implementing functional behavior assessments, positive behavior support techniques, and behavior intervention plans.

***SPEC ED 6440 Disability, Schooling And Culture: 3 semester hours***

Prerequisites: TCH ED 3313 or equivalent. An advanced course that will examine foundational issues in social and educational policy for students with disabilities. The course explores the historical, philosophical, sociological and economic dimensions of the recent emphasis on inclusive and community-based support systems for individuals with disabilities and their families. The course will review recent research and experience in the U.S. (primarily) concerning the evolving roles and relationships of families, teachers, administrators, and students with and without disabilities in disabilities in increasingly diverse schools and communities.

***SPEC ED 6443 Characteristics and Education of Students with Learning Disabilities: 3 semester hours***

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the theoretical and methodological problems related to learning disabilities. Particular emphasis on the application of current research findings to the problems confronting learners with learning disabilities.

***SPEC ED 6450 Characteristics and Education of Students with Emotional/Behavioral Disorders: 3 semester hours***

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the problems and characteristics of learners with emotional/behavioral disorders. Particular emphasis on the application of current research findings to problems confronting learners with emotional/behavioral disorders.

***SPEC ED 6462 Introduction To Early Childhood Special Education: 3 semester hours***

Prerequisites: SPEC ED 3313 or equivalent. Study of issues and concepts central to special education of young children with disabilities, and at-risk for disabilities, and their families. Focus on program models, screening and assessment procedures, and curriculum concepts. An ecological perspective is emphasized.

***SPEC ED 6463 Curriculum, Methods, And Materials For Early Childhood Special Ed: 3 semester hours***

Prerequisites: SPEC ED 6462. In-depth study of integrated assessment-based curriculum development for learners in early childhood special education. Emphasis on individualized educational planning and implementation for learners and their families.

***SPEC ED 6492 Practicum In Special Education: 3-6 semester hours***

Prerequisites: Two courses in the area of concentration (developmental disabilities, early childhood special education, emotional/behavioral disorders, or learning disabilities). Supervised experience in the education of learners with disabilities in a school or other appropriate setting.

***SPEC ED 6497 Problems: 1-10 semester hours***

Prerequisites: TCH ED 3313 or equivalent and consent of instructor. Investigation of a selected problem related to the education of learners with disabilities. To be conducted under the direction of a graduate faculty member.

***SPEC ED 6510 History Of Disability And Special Education: 3 semester hours***

Prerequisite: Consent of Instructor. Provides a historical context for approaching contemporary issues in the education and support of people with disabilities and their families. Requires students to become familiar with methods of retrieval and analysis of historical material.

***SPEC ED 6610 Foundations of Autism Spectrum Disorder: Research to Practice: 3 semester hours***

Prerequisites: Teaching Certificate and SPEC ED 6437 with a grade of B or higher, or Consent of Instructor. The course focuses on characteristics of children and youth with autism spectrum disorders (ASD); trends and issues connected with ASD; and effective practices and strategies for structuring, managing, and promoting functional/behavioral skills development and interaction among children and youth with ASD.

***SPEC ED 6620 Assessment and Interventions for Children and Youth with Autism Spectrum Disorder: 3 semester hours***

Prerequisites: SPEC ED 6610 with a grade of B or higher and Teaching Certificate, or Consent of Instructor. The course reviews functions of behavior as a foundation for understanding and completing functional behavior assessments; entails interpreting and graphing collected data; and incorporates intervention practice and applied curriculum modifications.

***SPEC ED 6630 Principles of Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6620 with a grade of B or higher or Consent of Instructor. Provides a detailed look at the theories, philosophy, and principles of applied behavior analysis. Focus is on applying these principles to assess behavior and develop and implement best practice interventions for reducing problem behaviors and teaching new behaviors to individuals with autism and other developmental disabilities in a variety of settings. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6650 Practicum I in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 with a grade of B or higher or Consent of Instructor. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of National Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6660 Advanced Applications of Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 and SPEC ED 6650, each with a grade of B or higher or Consent of Instructor. Provides a detailed look at methods of data collection, teaching new skills, and evaluating teaching strategies. Focus is on applying these methods to develop and implement best practice strategies that teach new behaviors to individuals with autism and other developmental disabilities, and evaluating the efficacy of these methods. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6670 Practicum II in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630, SPEC ED 6650, and SPEC ED 6660. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6675 Ethics and Professionalism in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. The course prepares students in the BCBA Program for the ethical and professional practice of Applied Behavior Analysis. Students will learn about the foundations of professional and ethical behavior that ensures high quality of practice in behavior analysis. The course will prepare students for the national Behavior Analyst Certification Board Exam. Students will primarily receive instruction in Ethical Considerations (Content Area #1), but also Behavioral Assessment, Experimental Evaluation of Interventions, and Selecting Intervention Outcomes and Strategies (Content Areas #4, 5, and 8) of the Behavior Analysis Task List – Third Edition.

**SPEC ED 6685 Analysis of Verbal Behavior: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. Provides a detailed look at B.F. Skinner's analysis of verbal behavior and the behavior analytic and functional approach to teaching language. Focuses on the behavior analytic view of speaking, thinking, writing, feeling, reading, and other verbal behavior. In addition, provides information on how to assess and teach verbal behavior to individuals with developmental disabilities.

## Teacher Education Courses

**TCH ED 2209 Foundations of Teaching in American Schools: 3 semester hours**

Explores the multiple roles and functions of professional teaching including: communication, leadership, management skills, use of technology, identification of needs of diverse populations and an examination of other selected concepts and philosophies underlying American public education. Portfolio preparation will be introduced. A minimum of 15 field experience hours required.

**TCH ED 3100 Education for Social & Civic Responsibility: 3 semester hours**

Equips students with the knowledge and skills needed to integrate an emphasis on civic and social responsibility, including social justice, into their own teaching. Includes a service learning project and requires reflection on project and in-class experiences, course readings, and personal and professional goals and development.

**TCH ED 3210 General Linguistics in Tchg English to Speakers of Other Languages: 3 semester hours**

Prerequisites: Completion of Level I. An introduction to the historical, legal and pedagogical frameworks relating to Teaching English to Speakers of Other Languages (TESOL), and bilingualism. Students explore principles of language systems including English and the function of language in social and academic settings.

**TCH ED 3211 Basic Principles of Second and Foreign Language Acquisition: 3 semester hours**

Prerequisites: TCH ED 3210. Covers the principles of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors in relation to second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics, and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 3212 Sociolinguistics and communication in the Classroom: 3 semester hours**

Prerequisites: TCH ED 3210 and admission to Teacher Education Program. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intracultural communication. Students develop strategies to enhance home, school and community relations and impact of culture on perceptions, communication, behaviors, and learning.

**TCH ED 3213 Performance-based Assessment for TOSOL: 3 semester hours**

Prerequisite: TCH ED 3210. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can reinforce instruction.

**TCH ED 3214 Material Development and Methods for TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3211, TCH ED 3212, TCH ED 3213, and TCH ED 4391. Students integrate knowledge of second language acquisition research in instructional methodologies in this course. Students will also incorporate theories of linguistics, assessment models, and instructional technology into their material development to meet the needs of diverse English language learners.

**TCH ED 3215 Field Experiences in TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3212, and TCH ED 3214 or concurrently taking TCH ED 3214. Students observe and reflect on actual classroom practices as well as complete a student's needs analysis and placement tests. The students implement the strategies for advocating an collaborating on behalf of students from diverse language backgrounds. This is a supervised field experience.

***TCH ED 3310 Methods of Teaching With Technology: 2 semester hours***

Prerequisite: TCH ED 2209, ED PSY 2212, or equivalent and admission to Teacher Education Program. Skill development in transforming content into instruction through various teaching methods and educational technologies. Emphasis on differentiating instruction, inquiry learning, and reflecting on practice. Recommended that this course be taken concurrently with ED TECH 3135.

***TCH ED 3313 Psychology of the Exceptional Child: 3 semester hours***

Prerequisites: level I or equivalent. Introductory overview of the field of special education including historical developments, characteristics of special populations, and compliance with state and federal regulations.

***TCH ED 3315 Literacy Learning And Instruction: 3 semester hours***

Prerequisites: Admission to Teacher Education program. May take concurrently with ED PSY 3312 and TCH ED 3313 or equivalents; may not be taken before ED PSY 3312 and TCH ED 3313 or equivalents. Analysis of methods, materials, frameworks, and technology for the effective teaching of literacy to young children, children with special needs, and children in PreK-6 education settings. Emphasis on the role of language experience, phonics, semantics, syntactics, pragmatics, schema theory, and metacognition in literacy development. A total of 20 field experience hours including observation, assessing children's literacy interests and development, and teaching lessons in a school classroom setting are required in addition to scheduled course time. This course may be applied toward a Literacy Minor.

***TCH ED 3316 The Professional Portfolio: 1 semester hour***

Prerequisites: Junior standing or consent of instructor. Students learn the knowledge and skills to develop an electronic teaching portfolio, writing reflective rationales for standards and choosing appropriate artifacts and using technology tools for successful presentation.

***TCH ED 4391 Literacy for Adolescent Learners in Content Areas: 3 semester hours***

Prerequisites: Admission to the Teacher Education Program. Examines the teaching of multiple literacies including reading, writing, speaking and critical thinking in the content areas. Implications of diverse cultures and languages and their relationship to reading will be explored. Field experience hours are required in addition to scheduled course time.

***TCH ED 4988 Teaching and Learning in Urban Schools: 3 semester hours***

Prerequisites: Enrollment in the Minor in Urban Education or permission of the instructor. The capstone course for the Minor in Urban Education. Students design and implement a classroom-based, action research project in an urban school that integrates differentiated instruction, culturally relevant and sensitive teaching strategies, assessing children's learning to meet individual needs, and implementing inquiry-based projects.

***TCH ED 5310 Instructional Design: 3 semester hours***

Prerequisites: Graduate standing, TCH ED 5311, participation in an initial teacher preparation program, and consent of instructor. Students learn to design instruction using different teaching models, plan a teaching unit, select content, design assessment, and develop classroom climate and management strategies. Professional skills are developed through reflecting on one's own practice, using educational technology, and developing a professional portfolio. Ten hours of field experience are required outside of class time.

***TCH ED 5311 Foundations Of Education: 3 semester hours***

Prerequisite: Graduate standing. Students will learn the history of public education, the role of the teacher as a change agent, the influence of technology, and the impact of diversity of American classrooms. Ten clock hours of field work required.

***TCH ED 5312 Differentiated Instruction: 3 semester hours***

Prerequisites: Graduate Standing. Explores differentiated instruction as an approach to meeting the diverse instructional needs of all students in the classroom. Differentiated instruction can be used to enhance literacy developments of adolescent learners in functional literacy, content literacy, technological literacy and creative/innovative literacy. Twenty hours of field experience are required in addition to scheduled course time.

***TCH ED 5850 Topics In The Teaching Of Writing: 1-3 semester hours***

Same as ENGL 4850. Prerequisite: ENGL 3100 or equivalent.

***TCH ED 6010 Examining History, Community And Social Justice In Education: 3 semester hours***

Addresses the issues of equity and social justice from the context of personal and educational history. Students will develop a cultural understanding of their own previous school, community and family experiences and generalize those findings to their current work as educators. They will develop an understanding of the historical foundations of American education and the role of the teacher to be a catalyst for change. Curriculum, instruction and learning will be examined through a variety of lenses including race, class, gender, ability, sexual orientation and religion to become culturally responsive teachers.

***TCH ED 6020 Teacher Action, Advocacy And Leadership: 3 semester hours***

Investigates the relationships among students, general and special education teachers, counselors, principals, parents, and other support and specialist personnel typically present in schools in Missouri and the changing roles of all these individuals as a consequence of general and special education reform initiatives. Develop systemic action plans and become advocates and leaders within the school and larger community for children, families, and the profession. Assists teachers to analyze and improve their management, planning and record keeping systems and professional development planning.

***TCH ED 6115 Historical Thinking in Theory and Practice I: 3 semester hours***

Same as HIST 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

***TCH ED 6116 Historical Thinking in Theory and Practice II: 3 semester hours***

Same as HIST 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115/ TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

**TCH ED 6200 Building Character and Competence with Diverse Learners: 3 semester hours**

Prerequisites: Graduate Standing. This course introduces theories and offers research-based strategies, materials, and resources designed to meet the needs of diverse learners in elementary school settings, including those with special needs and English language learners. Students will also learn ways to promote character and citizenship development, cross-cultural communication, and positive behavior supports.

**TCH ED 6210 Foundations Of Teaching English To Speakers Of Other Languages: 3 semester hours**

Prerequisites: Graduate Standing. This course is an introduction to the historical, legal and pedagogical frameworks relating to Teaching English to speakers of Other Languages (TESOL) and bilingualism. Students explore current issues, trends and influential factors in second language acquisition (SLA) instructional and assessment models.

**TCH ED 6220 Principles Of Second/Foreign Language Acquisition: 3 semester hours**

Prerequisite: TCH ED 6210. This course is a research-based study of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors, as well as linguistic research about second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 6230 Cross-Cultural Communication In The Classroom: 3 semester hours**

Prerequisite: TCH ED 6210. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intra-cultural communication. Within this theoretical context, students recognize their own socio-cultural identity and its impact on teaching models. Students develop strategies to enhance home, school and community relations.

**TCH ED 6240 Assessment for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6210 and TCH ED 6220 are recommended. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can inform instruction.

**TCH ED 6250 Methods and Materials for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, and TCH ED 6240, or consent from instructor. Students integrate knowledge of second language acquisition research in instructional methodologies, linguistics, assessment models, and awareness of socio-cultural dynamics, in order to design and critique a unit plan including materials and needed technology support.

**TCH ED 6260 Practicum in Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, TCH ED 6240, and TCH ED 6250 or concurrently taking TCH ED 6250. Students observe and reflect on actual classroom practices, complete a student's needs analysis and placement test, and implement a unit plan in the classroom with reflection. This is a supervised field experience.

**TCH ED 6350 Gender, Language & Identity: 3 semester hours**

Same as GS 6350. Prerequisites: Graduate level standing. An interdisciplinary look at the ways gendered and racial identities are developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**TCH ED 6440 Experiential Education: 3 semester hours**

Prerequisites: TCH ED 6010. This course addresses facets of experiential learning beginning with the theoretical background. Reflection will be examined as a key component of the experiential learning cycle and reflective questioning techniques developed and practiced. Adventure education, cultural journalism, apprenticeship education and related areas will be investigated as approaches to experiential learning. Students will develop an understanding of the relationship between experience and learning and develop techniques for using that relationship to enhance learning in their own teaching situation.

**TCH ED 6442 Outdoor Education Leadership: 3 semester hours**

Prerequisite: TCH ED 6010 or permission of instructor. Explore concept of a bioregion and development of a sense of place using historic journals, land based essays, outdoor activities, research, discussion and personal reflection. Planning, teambuilding, outdoor leadership skills, regional ecology and culture will be addressed. A 3 day field experience will explore stream, canyon, forest, and cave ecosystems in cooperation with resource professionals. Cultural and economic folkways of the region will be considered.

**TCH ED 6444 Environmental Education: 3 semester hours**

Activity-oriented coursework in developing environmental awareness, field and/or laboratory skills and techniques, and the use of environmental curricula. Materials and activities appropriate for a variety of educational settings, including outdoor locales, will be developed. This course is designed to give educators experience in developing and implementing environmental education curricula, especially in an outdoor setting.

**TCH ED 6565 Enriching Learning through Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisite: Graduate standing. Surveys the association between academic achievement and student participation in art, music, health, and physical education. Review research pertaining to the relationship between participation in the arts and physical education and language development, memory, creativity and learning in other subject areas.

**TCH ED 6566 Cross-Curricular Connections with Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisites: Graduate standing. Surveys research-based methods and strategies for implementing cross-curricular learning activities between the core subject areas and the arts, health, and physical education.

**TCH ED 6880 Gateway Writing Project: 3-6 semester hours**

Same as ENGL 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. may be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

***TCH ED 6890 Seminar In Professional Writing For Teachers: 3 semester hours***

Prerequisites: TCH ED 6880 and near completion of Graduate Certificate in the Teaching of Writing. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/ writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher's own evolution as a writer. Seminar meetings will include both face-to-face and on-line communication.

***TCH ED 6909 Teacher Action Research I: 3 semester hours***

Prerequisites: Graduate Standing Minimal of 21 hours of M.Ed coursework completed. Students learn the knowledge, skills and tools for systematic reflective practice in preparation for completing the Masters Capstone Action Research project in TCH ED 6910.

***TCH ED 6910 Teacher Action Research Capstone: 3 semester hours***

Prerequisites: TCH ED 6909 for teachers and all but the last 6 hours of the M.Ed. program or TCH ED 6909 or ED REM 6040 for non teachers. Students apply research knowledge, skills, and dispositions developed in TCH ED 6909 to an Action Research project, reflecting on and evaluating an aspect of one's own practice within a situated context. Students identify focused questions, collect and analyze data, using both analytic and practice tools, and review literature to research multiple factors in order to improve student learning. The research findings and insights will be shared in a public forum as a capstone for the M.Ed.

***TCH ED 7100 Research in Literacy Studies: 3 semester hours***

Prerequisites: Admission to the doctoral program. Participants will critically examine foundational, theoretical and historical work in the intersection of language, literacy and culture. An analysis of seminal research will explore related traditions and contemporary theories in literacy (K-12).

***TCH ED 7200 Historical and Theoretical Foundations of Curriculum and Instruction: 3 semester hours***

Prerequisites: Admission to the doctoral program. Examines foundational, theoretical and historical work in the field of Curriculum and Instruction. Students will read and analyze key texts, engage in discussions with peers and divisional faculty, build coherent and well-informed arguments, and apply new understandings to problems of practice.

***TCH ED 7210 Issues And Trends in Content and Language Acquisition for English Language Learners: 3 semester hours***

Prerequisites: Doctoral Standing. Analysis of current issues on simultaneous development of academic content and English language learning. Current trends in teaching English to Speakers of Other Languages (TESOL) include Sheltered Instruction Observation Protocol (SIOP), Teaching and Learning Cycle, Teaching Proficiency through Reading and Story Telling (TPRS), and English as an international language. Students will identify an area of inquiry, and design and complete a research project.

## Graduate Study

### Graduate Studies

The Department of Educator Preparation offers three Masters degrees, sixteen concentration areas, four Graduate Certificate programs, and join with the College of Education Faculty to offer two Doctoral degrees.

## Master of Education (M.Ed): A minimum of 33 credit hours is required.

Become a distinguished educator. Whether you are a PreK-12 classroom teacher, a school administrator, or an educator/trainer in a museum, business or youth serving organization, the new concentration areas provide a broad spectrum of interests that gives a path to expertise.

The Masters of Education Degree programs and Graduate Certificate programs are designed for graduates to attain the following learning outcomes:

- Understand the major theories in the discipline of study.
- Attain a solid foundation in the overall field of education in general, including areas of social justice, educational leadership and advocacy, educational psychology and research.
- Attain a depth of knowledge in the primary discipline.
- Think critically.
- Develop skills as a reflective practitioner to be able to create and sustain change.
- Conduct teacher research.

The Master's Degree consists of:

- 9 credit hours of foundations courses that examine history, the impact of community on our youth, issues of social justice, teacher leadership and student advocacy;
- two 9 credit hour concentrations areas that provide the core of expertise in the areas you choose and give you the depth and expertise in areas that match the needs of your students;
- and a two-semester, 6 credit hour capstone where you become a researcher in your own organization or classroom to really understand how to ask the right questions, collect meaningful data, and analyze and present it in a way that informs others.

A minimum of 33 credit hours is required.

The non-degree option is suited for those who have a Master's Degree or aren't quite ready, and simply want to gain more in-depth knowledge about a particular area listed in the concentrations below.

### Elementary Education

The M.Ed. program in elementary education has a General program option, an emphasis in Reading option, and an Early Childhood education option (18 credit hours) as well as focused concentrations in a variety of interest areas listed below. Additional hours may be necessary for reading specialist certification.

### Secondary Education

The M.Ed. program in Secondary Education has several areas of specialization: General, Curriculum and Instruction, Middle Level Education, Reading, and Teaching English to Speakers of Other Languages (TESOL) as well as focused concentrations in a variety of interest areas listed below. Additionally, students may seek initial teacher certification while also studying for the M.Ed. A set of prescribed courses needed for certification fill the emphasis area. A minimum of 33 credit hours is required.

### Special Education

The M. Ed. Program in special education includes a representation of the important core knowledge in Special Education. The primary goal is to

empower professionals to be thoughtful teachers who use best practice when working with students with disabilities. Research and data-based decision making are emphasized throughout the program. Graduate students will translate research into practice in their courses, and learn to analyze multiple types of assessment data. The M. Ed. Program in Special Education consists of an initial required core of courses; an opportunity to develop an area of specialization; and a capstone or exit course.

#### Available Concentration Areas are:

a) Early Childhood Concentrations, b) Curriculum and Instruction Concentration, c) Literacy Concentrations, d) Special Education Concentration, e) Social Justice Issues Concentration, f) Assessing & Documenting Learning Concentration, g) Media and Learning in a Digital Society Concentration, h) Leadership in Education Concentration, i) Character and Citizenship Education Concentration, j) STEM Concentration, k) Experiential Education Concentration, l) Physical Education / Health and Wellness Concentration, m) Discipline Content Area Concentration, n) Elective Concentration, o) Supporting Language Learners: TESOL Concentration, and p) Middle School Education Concentration.

### Graduate Certificate Programs: A minimum of 18 credit hours is required.

Graduate Certificate programs are specialized programs of study that are not degree programs but are shown on the academic transcript so that readers are aware of the concentrated program of study. Graduate Certificates are unrelated to teaching certificates.

Graduate Certificate ([https://coe.umsl.edu/mycoe/index.cfm?event=p2\\_pe:viewProgram&program\\_id=GC](https://coe.umsl.edu/mycoe/index.cfm?event=p2_pe:viewProgram&program_id=GC)) Areas are: Autism Studies Certificate ([https://coe.umsl.edu/mycoe/index.cfm?event=p2\\_pe:viewProgram&program\\_id=GC.AutismStudies](https://coe.umsl.edu/mycoe/index.cfm?event=p2_pe:viewProgram&program_id=GC.AutismStudies)); History Education Certificate ([https://coe.umsl.edu/mycoe/index.cfm?event=p2\\_pe:viewProgram&program\\_id=GC.HistEd](https://coe.umsl.edu/mycoe/index.cfm?event=p2_pe:viewProgram&program_id=GC.HistEd)); Teaching English to Speakers of Other Languages (TESOL) Certificate ([https://coe.umsl.edu/mycoe/index.cfm?event=p2\\_pe:viewProgram&program\\_id=GC.TESOL](https://coe.umsl.edu/mycoe/index.cfm?event=p2_pe:viewProgram&program_id=GC.TESOL)); and Teaching of Writing Certificate ([https://coe.umsl.edu/mycoe/index.cfm?event=p2\\_pe:viewProgram&program\\_id=GC.TeachWriting](https://coe.umsl.edu/mycoe/index.cfm?event=p2_pe:viewProgram&program_id=GC.TeachWriting)).

### Doctoral Program

#### Doctor of Education (Ed.D) Program: BRIDGE THEORY AND PRACTICE WITH SCHOLARSHIP

The Doctor of Education in Educational Practice is a doctoral degree intended for practitioners. Areas of study available are the themes around which learning communities are formed. Members of the learning communities advance through the program as a cohort in three to three-and-one-half years. The program is 80 credits with the Master's degree included in the 80. A Dissertation in Practice is the capstone. The program applies an *Inquiry as Practice* model of scholarship. Graduates gain the ability to use data to inform decision-making and enhance their practice by gathering, organizing, judging, aggregating, and analyzing situations, literature, and data. The intention is to prepare scholarly practitioners in their professional work. As such, the Doctor of Education degree de-emphasizes research for theory building and preparation for the professoriate in higher education.

The curriculum of the Doctor of Education degree is intended to prepare practicing professionals to transform both their practice and the field by working *in community*, just as practitioners collaborate with key stakeholders to address complex problems of practice. Students are

admitted to the degree program and simultaneously to a learning community of practice formed around a theme such as language, literacy, and culture (LLC), curriculum and instruction (C & I), and STEM. The learning community and a mentor team of faculty and practitioners stay together and work together throughout the program by meeting in a learning community seminar every semester. The skills to work collaboratively to develop, test, and advance innovative solutions to high-leverage problems of practice are fostered throughout the program.

In addition to the thematic learning community of practice format, the curriculum features Laboratories of Practice and a Dissertation in Practice as culminating activities. The Laboratories of Practice take the doctoral studies away from the University campus and to a context where theory, inquiry, and practice can intersect and the implementation of practice can be measured. The Dissertation in Practice allows the learning community to address a high leverage problem of practice through collaborative and connected work beyond what a single individual could do alone. Individuals contribute work that feeds into group work. The Dissertation of Practice is characterized by generative impact.

The University of Missouri-St. Louis College of Education is a member of the Carnegie Project on the Education Doctorate, a national group of over fifty universities re-designing and re-orienting the Doctor of Education degree as a program distinct from Doctor of Philosophy in Education degree programs. Our program reflects our commitment to the work of the Carnegie Project and its working principles.

#### Doctor of Philosophy of Education (Ph.D)

The Ph.D. degree in education, offered in cooperation with the School of Education at the University of Missouri- Kansas City and the College of Education at the University of Missouri-Columbia, is designed for educators who desire directed research experience promoting scholarly inquiry in education.

The Ph.D. program is designed for graduates to attain the following learning outcomes:

- Understand the major theories in their primary and secondary disciplines.
- Attain a breadth of knowledge in education in general and a depth of knowledge in the primary discipline.
- Think critically.
- Locate literature in the primary and secondary disciplines.
- Understand research methods in education.
- Conduct research.
- Demonstrate leadership skills and attributes.

Categories of Course Work and Credits Required are: 1. Foundations (9-12 hrs.); 2. Research Methods (15-18 hrs.); 3. Major Specialization (21-27 hrs., 16 in residence as Ph.D. student); 4. Minor Specialization (12-15 hrs.); 5. Research Internship (6-9 hrs.); 6. Exit Course (EDUC 7950; 3hrs.); 7. Comprehensive Examination; and 8. Dissertation Research (12 hrs.).

The minimum total credit hour requirement to complete the Ph.D. in Education degree is 90 hours post-baccalaureate. Up to 44 hours of graduate work, typically the Master's degree hours plus post-Master's hours) can be applied to the foundations, research methods, and minor specialization categories as appropriate.

The Master's degree work can usually be applied without regard to the age of the degree but post-Master's work should be recent (4 to 6 years old). There is an 8-year time limit for completing the Ph.D. in Education.

The final program configuration, including how previous course work is used in the various categories, is determined at a meeting of the student, the student's advisor, and to additional faculty members in the area of study. This meeting takes place 2 to 3 semesters after program entry.

## Master of Education: Elementary Education

- Early Childhood emphasis
- General emphasis
- Reading emphasis

The Masters in Elementary Education is appropriate for early childhood and elementary teachers, specialists, department chairpersons, and those who work in informal or international educational settings. Candidates choose two 9 hour concentration areas that will support their personal growth and development as an educational leader. It is important that both students and advisors plan ahead to insure courses in concentration areas are taken when they are offered in the 3 year rotation schedule. Programs must be planned with the academic advisor and meet the approval of the faculty advisor, adhering to the College of Education and UMSL Graduate School policies.

Concentration area choices will appear at the end of the M.Ed. transcript. The M-1 Program of Study form should be completed in the first year of study (12 hours) and signed by your advisor before submitting to program (departmental) chairs.

### General Emphasis Program for ELE ED

The M.Ed. in Elementary Education consists of 15 required hours (5 courses) plus student choice of two 9 hour concentrations from the list below. The General emphasis requirements are met by (a) completing three required foundational courses (9 hrs.) toward the beginning of the M.Ed. program, (b) completing the coursework for two choice concentration areas (2\*9 hrs each), and (c) completing the two exit capstone research classes (6 hrs.) for a total of 33 hours.

Concentration areas indicate zero to three REQUIRED courses; some then offer a list of course CHOICE selections as a menu to choose your remaining hours for that concentration. ALL Concentration choices total nine hours of graduate credit.

An Elective Concentration allows students, with advisor sign-off, to construct an individualized set of target courses for 1 of their 2 concentration areas. Transfer graduate credit from another institution could also fit into this concentration choice. Finally, those who want to take 9 graduate hours in an academic content area may use the Discipline Content Area Concentration to integrate this advanced work into their M.Ed. program.

### Reading and Early Childhood Emphasis Areas for ELE ED

Students who applied to the reading or early childhood emphasis areas and wish to focus intensively (e.g. 18 hrs) in one area of expertise are required to sign up for two sequential 9 hour concentrations. Those in reading should select the Literacy I and II concentrations. Those in early childhood should select the Early Childhood I and II concentrations. Additional coursework may be required for licensure.

### 1) Required Core (9 hours)

Students are required to complete the following courses within the first 15 hours of study.

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6020	Teacher Action, Advocacy And Leadership	3
ED PSY 6030	Instruction, Learning And Assessment	3

### 2) Required Research Course (6 hours)

These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

TCH ED 6909	Teacher Action Research I	3
TCH ED 6910	Teacher Action Research Capstone <sup>1</sup>	3

<sup>1</sup> This course is not offered in summer sessions.

### 3) 9 hour Concentration Choices (CHOOSE 2 or both Concentrations I & II under an emphasis option as indicated)

- Early Childhood Concentrations I and II (Option A or B)
- Curriculum and Instruction Concentration
- Literacy Concentrations I and II (Certificates in Reading and Writing available)
- Special Education Concentration
- Social Justice Issues Concentration (Social Justice in Education Certificate available)
- Assessing & Documenting Learning Concentration
- Media and Learning in a Digital Society Concentration
- Leadership in Education Concentration
- Character and Citizenship Education Concentration
- STEM Concentration
- Experiential Education Concentration
- Physical Education / Health and Wellness Concentration
- Discipline Content Area Concentration
- Elective Concentration
- Supporting Language Learners: TESOL Concentration I (DESE TESOL endorsement available under SEC ED)
- Middle School Education Concentration

### Early Childhood Education Concentration I and II (Options A & B): 9 hours each

Designed to enable candidates to further their competencies as teachers or program administrators in public and private early childhood program, early childhood education also prepares people for positions in community agencies that support families and young children. Job opportunities working with young children continue to expand. New research tools have altered our understanding of learning processes in young children with the plasticity of the brain and children's gift for inquiry in systematic ways. Language acquisition and numeracy are acquired in social communities of practice. Explore this exciting field. Concentration I is designed for those who want to increase knowledge and skills in working with young children in school, after school, and home settings. Concentration II is geared for professionals in field.

### Early Childhood Concentration I: \*Courses offered online\*

Required Courses:

ECH ED 6412	Foundations Of Early Childhood Education	3
ECH ED 6413	Educational Role Of Play	3
ED PSY 6215	Psychology Of Early Childhood Development	3

### Early Childhood Concentration II: Choice A: 9 hours \*Courses offered online\*

ECH ED 6321	Parent And Community Resources In Early Childhood Education	3
ECH ED 6415	Organization And Development Of Early Childhood Programs	3
EDUC 6404	Seminar	1-10

### Early Childhood Special Education Concentration II: Choice B: 9 hours \*Courses are NOT offered on line\*

SPEC ED 6372	Screening And Diagnosis Of Developmental Delays: Birth To 5 Years	3
SPEC ED 6462	Introduction To Early Childhood Special Education	3
SPEC ED 6463	Curriculum, Methods, And Materials For Early Childhood Special Ed	3

### Curriculum and Instruction Concentration: 9 hours

In order for all students to optimally achieve, teachers must develop integrated, standards-based, innovative curriculum delivered as engaging instruction that equips students to develop the knowledge and skills for a global society. This concentration explores common issues in curriculum design and implementation. Educators will create curriculum and design instruction for their own educational settings.

ELE ED 6411	Curriculum Leadership Elementary Programs	3
ELE ED 6422	Curriculum Design of Elementary Programs	3
ELE ED 6423	Learning Through Inquiry	3

### Literacy Concentrations I: 9 hours

Concentration I is designed for educators who want a deeper understanding of reading and writing processes across the lifespan. This area emphasizes the preparation of leaders in a wide range of school and community settings, including literacy coaches or grade-level leaders. Concentration I emphasizes cutting-edge theory, research and instructional practices in literacy education. Concentration II, for those wanting a Literacy endorsement, applies these understandings through a variety of readings, writings and experiences, both in Clinical and online settings. There are two choices for Concentration II: Writing and Reading. Students who complete Concentrations I and II in Literacy can apply these courses to a K-12 DESE reading certificate or the UMSL Graduate Certificate in the Teaching of Writing, but additional coursework may be required.

ELE ED 6387	Literacy Acquisition And Learning For Diverse Students	3
ELE ED 6684	Instructional Strategies For Teaching Reading	3
ELE ED 6686	Analysis And Correction Of Reading Disabilities	3

### Literacy Concentration II: 9 hours Choice A: Courses to complete the Reading Emphasis Certification

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialists in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. Concentration II enables a student to earn a master's degree in education with credit towards an emphasis in reading as per requirements laid out by the Department of Elementary and Secondary Education (DESE) for special reading certification in Missouri. Students must complete the required 15 hours of M.Ed. courses, an educational psychology course, plus 18 hours of literacy courses.

ELE ED 6493	Reading Specialist Practicum I	3
ELE ED 6494	Reading Specialist Practicum II	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3

### Concentration II: 9 hours Choice B:

#### Courses to complete the Graduate Certificate in the Teaching of Writing

Admission

Applicants who wish to earn a Graduate Certificate in the Teaching of Writing must apply for admission to the certificate program. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

TCH ED 6880	Gateway Writing Project	6
TCH ED 6890	Seminar In Professional Writing For Teachers	3

### Special Education Concentration: 9 hours

For educators who are not receiving a degree in Special Education, but would like to expand their understanding of Special Education law and the needs of students with cross-categorical disabilities and those with Autism Spectrum Disorders, this concentration offers coursework on the characteristics and effective strategies for teaching students with varied abilities in educational settings. Those interested in the M.Ed. in Special Education or the Graduate Certificate in Autism and Developmental Disabilities should choose concentrations in those designated programs under the Masters in Special Education (p. 407) or Autism Certificate links in Bulletin.

Choose three of the following:		9
SPEC ED 6325	Advanced Studies in Classroom & Behavior Management	3
SPEC ED 6345	Characteristics and Education of Students with High-Incidence Disabilities	3
SPEC ED 6415	The Law And Special Education	3
SPEC ED 6437	Individual and Schoolwide Systems of Positive Behavior Support	3

### Social Justice Issues Concentration: 9 hours

Educators need to challenge themselves to understand the variety of assets diverse students and their families bring to educational contexts. An interdisciplinary group of courses is offered for this concentration that invite personal growth and academic knowledge in the area of social

justice. An emphasis on engagement and action permeates the course activities. (With completion of TCH ED 6010, TCH ED 6020 and TCH ED 6910 and 9 hours from the list below, students will meet requirements for the Social Justice in Education Certificate. (Applicants who wish to earn a Graduate Certificate in Social Justice in Education must apply for admission to the certificate program.)

Choose three of the following:

TCH ED 6350	Gender, Language & Identity	3
ED FND 6440	Critical Race Theory in Education <sup>1</sup>	3
CNS ED 6850	Social Class and Poverty Issues In Counseling	3
ED ADM 6203	Political Contexts Of Education	3
ED TECH 6434	Technology and Privilege	3
GS 5053	Advanced Studies In African-American History	3
TCH ED 6230	Cross-Cultural Communication In The Classroom	3

<sup>1</sup> Course pending Faculty Senate approval

## Assessing & Documenting Learning Concentration: 9 hours

Educators need to continue to update their knowledge and skills in assessment theory and processes to build teacher leadership capacity and improve outcomes for learners. Deep knowledge of how to leverage formative and summative assessment practices to document learning, how to differentiate instruction, how to help learners to become self-directed by setting goals and tracking progress are essential to optimized learning outcomes. This set of courses will provide information on how to manage assessment strategies.

Required Courses:

ED REM 6707	Classroom Measurement And Evaluation	3
ED REM 6716	Academic Assessment and Intervention	3

Choose one of the following:

ED TECH 6449	Using Technology In Administration Processes	3
ELE ED 6448	Diagnosis And Remediation Of Disabilities In Learning Mathematics	3
ELE ED 6686	Analysis And Correction Of Reading Disabilities	3

## Media and Learning in a Digital Society Concentration: 9 hours

As today's students increasingly grow up in a media saturated world, teachers need to think creatively about how to harness the affordances of media and technology for learning while helping consumers become critical about the sources of information and how to verify Internet information in responsible ways. This concentration insures that educators will be up-to-date in technology integration as well as being able to share this learning with colleagues.

Required Courses:

ED TECH 5340	Selection And Utilization Of Educational Multimedia	3
ED TECH 6436	Computer-Mediated Communication In Education	3

Choose one of the following:

ED TECH 6435	Instructional Technology And Education Reform	3
ED TECH 6444	Cognition And Technology	3
ED TECH 6448	Technology-Supported Inquiry Learning	3
ED TECH 6452	Educational Multimedia Design	3

## Leadership in Education Concentration: 9 hours

Organizations need leaders who understand the complexities of systems and working with diverse staff and families within situated communities in a dynamic and changing educational environment. Leadership skills can be taught and nurtured. This Leadership in Education concentration allows educators in various roles and career levels to apply principles of leadership to creating effective communities of practice.

Required Courses:

ED ADM 6503	Organizational Change In Education	3
-------------	------------------------------------	---

Choose two of the following:

ED ADM 6200	Demographic Contexts of Education	3
ED ADM 6203	Political Contexts Of Education	3
ED ADM 6205	Legal Contexts Of Education	3
ED ADM 6401	School Staff Development And Supervision	3

## Character and Citizenship Education Concentration: 9 hours

The Character and Citizenship Education concentration is designed for those interested in understanding and applying the theory and practice of character and citizenship education by analyzing research on effective character and citizenship practice.

Required Courses:

ED PSY 6217	Foundations Of Citizenship Education	3
ED PSY 6445	Character Education And Development	3

Choose one of the following:

ED PSY 6417	Current Perspectives On Citizenship Education	3
ED PSY 6450	Advanced Methods In Character Education	3
TCH ED 6200	Building Character and Competence with Diverse Learners	3

## STEM Concentration: 9 hours

Many challenges remain in the attraction and preparation of youth for the careers in fields of science, technology, engineering and mathematics (STEM). Those who teach in these areas need to continually work toward developing and implementing relevant curricula and develop new instructional strategies as well as revise and upgrade current methodology. The STEM Concentration focuses on professional development with respect to instructional research and best practices for all involved in enhancing STEM literacy.

Choose three of the following:

ELE ED 6428	Elementary School Curriculum Reform In The Life Sciences	1-4
ELE ED 6429	Elementary School Curriculum Reform In The Physical Sciences	1-4
ELE ED 6441	Problems And Research In Teaching Elementary School Science	3
ELE ED 6447	Problems And Research In Teaching Elementary School Mathematics	3

## Experiential Education Concentration: 9 hours

Increasingly it is important to connect students to the physical world and to intentionally build the skills, knowledge and dispositions of leadership by challenging oneself in new ways. Open new pathways to learning for you and your students through taking this concentration area in experiential education – you will have a great adventure with like-minded educators.

This concentration is especially relevant for those wanting to use hands-on, experiential and outdoor approaches to education at any level.

TCH ED 6440	Experiential Education	3
TCH ED 6442	Outdoor Education Leadership	3
TCH ED 6444	Environmental Education	3

### Physical Education / Health and Wellness: 9 hours

Healthful physical and motor development of children and youth has become a focus in the US with high obesity rates, emotional stress levels, and poor nutrition and exercise habits. Educators are on the forefront of re-educating children, youth and their families about holistic approaches to life-long wellness. This concentration offers a range of topics to be explored.

Required Courses:

PHY ED 6462	The Physical Education Curriculum	3
-------------	-----------------------------------	---

Choose two of the following:

PHY ED 5248	Teaching Health In The Secondary School: Grades 9-12	3
PHY ED 5380	Nutrition For Human Performance	3
PHY ED 6464	Analysis Of Teaching In Physical Education	3
PHY ED 6478	Problems And Research In Physical Education	3

### Discipline Content Area Concentration: 9 hours

Educators recognize the importance of staying current in their field of teaching. This Discipline Content Concentration allows for 9 hours of graduate level credit in a content area related to one's field of practice. This includes graduate credit in areas such as history, English, math, science, foreign language, health and PE, and art and music. Courses for this concentration need to be approved by advisors before they are included on the M-1 program form.

### Elective Concentration: 9 hours

To insure maximum flexibility in course selection to meet the individual needs of professional educator's development, this concentration represents an opportunity to select three unique courses from the various concentration areas in an eclectic and personalized way. Choices to include in this concentration need to be approved by advisors and signed off on by the program director.

### Supporting Language Learners: TESOL Concentration I: 9 hours

This concentration is designed for those who want to better understand Second Language Acquisition (SLA) and Teaching English to Speakers of Other Languages (TESOL) processes. Courses emphasize the theoretical foundations of Second Language Acquisition and TESOL and their practical application to practice. Concentration I is open to all Masters in Education students. A TESOL endorsement from DESE is available under the SEC ED M.Ed. (p. 401) options.

TCH ED 6210	Foundations Of Teaching English To Speakers Of Other Languages	3
TCH ED 6220	Principles Of Second/Foreign Language Acquisition	3
TCH ED 6230	Cross-Cultural Communication In The Classroom	3

### Middle School Education Concentration: 9 hours

The concentration in middle level education is designed for graduate students who would like to further their competencies as a middle level educator.

Choose three of the following:

ED ADM 6303	Middle School Administration	3
ED ADM 6315	Middle School Educational Philosophy	3
ED ADM 6317	Supervision And The Middle School Child	3
ED PSY 6225	The Psychology Of Adolescence	3

### Emphasis in Reading

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialist in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. The following program enables the student to earn a M.Ed. with an emphasis in Reading while fulfilling the Department of Elementary and Secondary Education's requirements for special reading certification in Missouri. Students must complete the first two levels of the Required Core, an educational psychology course, an approved educational research course, 18 hours of literacy courses, and an action research capstone course. The minimum required and recommended courses are as follows:

#### Required Core (9 hours)

TCH ED 6010 (p. 393)	Examining History, Community And Social Justice In Education	3
TCH ED 6020 (p. 393)	Teacher Action, Advocacy And Leadership	3
ED PSY 6030 (p. 393)	Instruction, Learning And Assessment <sup>1</sup>	3

#### Required Research Course – Evaluation of Abilities and Achievement (3 hours)

Choose one course. Dependent on student needs and interests.		3
ED REM 6707 (p. 393)	Classroom Measurement And Evaluation	
ED REM 6709 (p. 393)	Educational And Psychological Measurement	
ED REM 6716 (p. 393)	Academic Assessment and Intervention	

#### Reading Concentration (18 hours):

Required Courses

ELE ED 6387 (p. 393)	Literacy Acquisition And Learning For Diverse Students	3
ELE ED 6684 (p. 393)	Instructional Strategies For Teaching Reading	3
ELE ED 6686 (p. 393)	Analysis And Correction Of Reading Disabilities	3
ELE ED 6493 (p. 393)	Reading Specialist Practicum I	3
ELE ED 6494 (p. 393)	Reading Specialist Practicum II	3

And at least one course from the literacy-related elective list or from the certification-related elective list below (min. 3 hrs):

Literacy Related Electives

ELE ED 6436 (p. 393)	Children's Literature I: Survey And Analysis	3
ELE ED 6688 (p. 393)	Literacy Assessment To Guide Instruction	3
ENGL 6880 (p. 393)	Gateway Writing Project	3-6
TCH ED 5312 (p. 393)	Differentiated Instruction	4
Capstone Course (3 hours)		
ELE ED 6482 (p. 393)	Problems And Research In Teaching Elementary School	3

<sup>1</sup> A graduate level course in child psychology or adolescent psychology may be substituted if needed for certification.

To be recommended for Missouri Department of Elementary and Secondary Education special reading certification, teachers must have a valid Missouri teacher's certificate and two years of classroom teaching experience, and they must have had the following at either the undergraduate or graduate level: two additional courses in reading; language acquisition or development; classroom management techniques; counseling techniques (to include exceptional children and their families: child AND adolescent psychology; and testing, evaluation, and achievement. These certification requirements might be in addition to the courses listed in the program of study above. See your graduate advisor for information about these courses. M. Ed. Students needing any of the above can elect to take these courses at the graduate level where available and apply them to their concentration area.

### Certification Related Electives

CNS ED 3220	Counseling Individuals With Special Needs	3
ED PSY 6225	The Psychology Of Adolescence	3
ED REM 6707	Classroom Measurement And Evaluation	3
ED REM 6709	Educational And Psychological Measurement	3

\*Only one 4000 level course can be applied to the M.Ed.

### Elementary Education Option in Early Childhood Teacher Certification

(pending CBHE approval)

#### Admission Requirements for the Option in Elementary Teacher Certification:

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

#### Education Core Courses

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6200	Building Character and Competence with Diverse Learners	4
ED PSY 6030	Instruction, Learning And Assessment	3
TCH ED 6909	Teacher Action Research I	3

TCH ED 6910	Teacher Action Research Capstone	3
<b>Total Hours</b>		<b>16</b>

Early Childhood Education (39 Hours): These are the courses required for the early childhood teaching (Birth to 3rd Grade)

## MED Elementary Education with Elementary and Special Education Teacher Certification

(pending CBHE approval)

### M.Ed in Elementary Education with Elementary and Special Education Teacher Certification

This program of study is for individuals with a Bachelor's degree who would like to prepare for teacher certification in Elementary Education and Special Education. This option leads to Missouri Initial Teacher Certification in Elementary Teaching 1-6 with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education.

### Admission Requirements for the Option in Elementary Teacher Certification with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education:

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by The Graduate School

#### Education Core Courses Required for M.Ed.

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6200	Building Character and Competence with Diverse Learners	4
ED PSY 6030	Instruction, Learning And Assessment	3
TCH ED 6909	Teacher Action Research I	3
TCH ED 6910	Teacher Action Research Capstone	3
<b>Total Hours</b>		<b>16</b>

### Elementary and Special Education (53 Hrs.= 38 Elementary Education + 15 Special Education)

These are the courses that are required for the elementary school teaching (1-6 grades) licensure.

#### Related Area Requirements

<b>Total Hours</b>		<b>28</b>

## Early Childhood Education Emphasis

The M.Ed. program with an emphasis in early childhood education is designed to enable candidates to further their competencies as teachers or program administrators in public and private early childhood program. The program also prepares them for positions in community agencies that support families and young children. The minimum required and recommended courses are as follows. Students must complete the required Core Competencies and Capstone Course as listed above.

Required:

ECH ED 6412 (p. 393)	Foundations Of Early Childhood Education	3
ECH ED 6413 (p. 393)	Educational Role Of Play	3
ECH ED 6415 (p. 393)	Organization And Development Of Early Childhood Programs	3
Elective hours		6

Total: 33 hours

## Master of Education: Elementary or Secondary Education with Physical Education as Teaching Field

A significant number of graduate students choose physical Education as the teaching field within one of the master of Education degree options. Most are currently employed as teachers of health and/or physical Education. Certification requirements in Missouri mandate the completion of a master's degree to professionalize the certificate. Therefore, a full complement of graduate courses relating to teaching in physical Education is available to meet this need. For many who need to pursue teacher certification in physical Education while pursuing the master's degree, most course work needed to meet state certification requirements can be taken in the master's program. For those employed outside Education, an emphasis in exercise science is also available, providing a foundation of course work designed to prepare a person in this area. Specific information is available regarding each of these degree programs. Please consult with your graduate adviser to discuss the specific options and requirements.

## Master of Education: Secondary Education

- General
- Curriculum and Instruction
- Reading
- Teaching English to Speakers of Other Language
- Middle Level Education

The Masters in Secondary Education, General emphasis program, is appropriate for secondary teachers, specialists, department chairpersons,

and those who work in informal learning or international educational settings. Candidates choose concentration areas that will support their personal growth and development as an educational leader. It is important that both students and advisors plan ahead to insure courses in concentration areas are taken when they are offered in the schedule. Programs must be planned with the academic advisor and meet the approval of the faculty advisor, adhering to the College of Education and UMSL Graduate School policies.

Concentration area choices will appear at the end of the M.Ed. transcript. The M-1 Program of Study form should be completed in the first year of study (12 hours) and signed by your advisor before submitting to program (departmental) chairs.

General Curricular Program for SEC ED areas

The M.Ed. in Secondary Education consists of 15 required hours (5 courses) plus student choice of two 9 hour concentrations from the list below. The general program option requirements are met by (a) completing three required foundation courses (9 hrs.) toward the beginning of the M.Ed. program, (b) completing the coursework for two choice concentration areas (18 hrs.), and (c) completing the two exit research capstone classes (6 hrs.) for a total of 33 hours.

Most concentration areas indicate 0-3 REQUIRED courses; a list of course CHOICE selections are then provided as a menu to choose your remaining hours for that concentration. In addition, an Elective Concentration allows students, with advisor sign-off, to construct an individualized set of target courses for 1 of their 2 concentration areas. Transfer graduate credit from another institution could also fit into this concentration choice. Finally, those who want to take 9 graduate hours in an academic content area may use the Discipline Content Area Concentration to integrate this advanced work into their M.Ed. program.

Students who wish to focus intensively (18 hrs) in one area of expertise may choose a concentration that has two sequential Concentration blocks I & II. **Emphasis areas** offered in SEC ED include Reading, Teaching English to Speakers of Other Languages (TESOL), Teaching of Writing, and Middle Level Education. Reading and TESOL require signing up for two 9 hour sequenced concentrations (Literacy I and II and TESOL I and II, respectively) and may require additional coursework for licensure, as noted. For a C & I emphasis, students just select the C & I concentration and an additional choice concentration. The Middle Level Education emphasis curriculum follows.

Required 15 hours of M.Ed. core courses plus two 9-Hour Concentrations

### Required Core

Students are required to complete the following courses within the first 15 hours of study:

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6020	Teacher Action, Advocacy And Leadership	3
ED PSY 6030	Instruction, Learning And Assessment	3

### Required Research Courses

These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

TCH ED 6909	Teacher Action Research I (Take semester prior to Teacher Action Research Capstone, TCH ED 6910.)	3
-------------	---	---

TCH ED 6910	Teacher Action Research Capstone <sup>1</sup>	3
<b>Total Hours</b>		<b>15</b>

<sup>1</sup> This course not offered in summer sessions.

Students seeking a professional Masters in Education Degree choose two 9-hour concentrations in consultation with their advisors that will enhance teacher leadership capacity in practice. The following 9-hour concentrations include an interdepartmental range of concentration areas that can support a candidate's development of a broad range of skills, knowledge, and dispositions.

### 3) 9 hour Concentration Choices

- a.) Curriculum and Instruction Concentration
- b.) Literacy Concentrations I and II (Certificates in Reading and Writing available)
- c.) Special Education Concentration
- d.) Social Justice Issues Concentration (College of Education Social Justice Certificate available)
- e.) Assessing & Documenting Learning Concentration
- f.) Media and Learning in a Digital Society Concentration
- g.) Leadership in Education Concentration
- h.) Supporting Language Learners: TESOL Concentrations I and II (DESE TESOL endorsement available)
- i.) Character and Citizenship Education Concentration (Certificate available through ED PSYdepartment.)
- j.) STEM Concentration
- k.) Experiential Education Concentration
- l.) Physical Education/Health and Wellness Concentration
- m.) Discipline Content Area Concentration
- n) Elective Concentration
- o) Middle School Education Concentration

### Curriculum and Instruction:

In order for all students to optimally achieve, teachers must develop integrated, standards based, innovative curriculum delivered as engaging instruction that equips students to develop the knowledge and skills for a global society. This concentration explores common issues in curriculum design and implementation. Educators will create curriculum and design instruction for their own educational settings.

SEC ED 6415	Curriculum Leadership in Education	3
SEC ED 6416	Curriculum Design for Educational Programs	3
SEC ED 6420	Improving Teaching and Learning	3

### Literacy Concentrations I and II: 9 hours Each

Concentration I is designed for educators who want a deeper understanding of reading and writing processes across the lifespan. This area emphasizes the preparation of leaders in a wide range of school and community settings, including literacy coaches or grade-level leaders. Concentration I emphasizes cutting-edge theory, research and instructional practices in literacy education. Concentration II, for those wanting a Literacy endorsement, applies these understandings through a variety of readings, writings and experiences, both in Clinical and online settings. There are two choices for Concentration II: Writing and Reading. Students who complete Concentrations I and II in Literacy can apply these courses to a K-12 DESE Reading Certificate or the UMSL Graduate Certificate in the Teaching of Writing, but additional coursework may be required.

### Literacy Concentration I:

ELE ED 6387	Literacy Acquisition And Learning For Diverse Students	3
ELE ED 6684	Instructional Strategies For Teaching Reading	3
ELE ED 6686	Analysis And Correction Of Reading Disabilities	3

### Concentration II: Choice A:

#### Courses to complete the Reading Certification emphasis

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialists in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. Concentration II enables a student to earn a master's degree in education with credit towards an emphasis in reading as per requirements laid out by the Department of Elementary and Secondary Education (DESE) for special reading certification in Missouri. Students must complete the required 15 hours of M.Ed. courses, an educational psychology course, plus 18 hours of literacy courses.

ELE ED 6493	Reading Specialist Practicum I	3
ELE ED 6494	Reading Specialist Practicum II	3
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3

### Concentration II: Choice B:

#### Courses to complete the Graduate Certificate in the Teaching of Writing

##### Admission

Applicants who wish to earn a Graduate Certificate in the Teaching of Writing must apply for admission to the certificate program. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

TCH ED 6880	Gateway Writing Project	6
TCH ED 6890	Seminar In Professional Writing For Teachers	3

### Special Education:

For educators who are not receiving a degree in Special Education, but would like to expand their understanding of Special Education law and the needs of students with cross-categorical disabilities and those with Autism Spectrum Disorders, this concentration offers coursework on the characteristics and effective strategies for teaching students with varied abilities in educational settings. Those interested in the M.Ed. in Special Education or the Graduate Certificate in Autism and Developmental Disabilities should choose concentrations in those designated programs under the Masters in Special Education (p. 407).

Choose three of the following:

SPEC ED 6325	Advanced Studies in Classroom & Behavior Management	3
SPEC ED 6345	Characteristics and Education of Students with High-Incidence Disabilities	3
SPEC ED 6415	The Law And Special Education	3
SPEC ED 6610	Foundations of Autism Spectrum Disorder: Research to Practice	3

## Social Justice Issues:

Educators need to challenge themselves to understand the variety of assets diverse students and their families bring to educational contexts. An interdisciplinary group of courses is offered for this concentration that invite personal growth and academic knowledge in the area of social justice. An emphasis on engagement and action permeates the course activities.

With completion of TCH ED 6010, TCH ED 6020 and TCH ED 6910 and these 9 hours, students will meet the requirements for the Social Justice in Education Certificate. Applicants who wish to earn a Graduate Certificate in Social Justice in Education must apply for admission to the certificate program.

Choose three of the following:

TCH ED 6350	Gender, Language & Identity	3
EDUC 6420	Critical Race Theory in Education	3
CNS ED 6850	Social Class and Poverty Issues In Counseling	3
ED ADM 6203	Political Contexts Of Education	3
ED TECH 6434	Technology and Privilege	3
GS 5053	Advanced Studies In African-American History	3
TCH ED 6230	Cross-Cultural Communication In The Classroom	3

## Assessing & Documenting Learning:

Educators need to continue to update their knowledge and skills in assessment theory and processes to build teacher leadership capacity and improve outcomes for learners. Deep knowledge of how to leverage formative and summative assessment practices to document learning, how to differentiate instruction, how to help learners to become self-directed by setting goals and tracking progress are essential to optimized learning outcomes. This set of courses will provide information on how to manage assessment strategies.

Required Courses:

ED REM 6707	Classroom Measurement And Evaluation	3
ED REM 6716	Academic Assessment and Intervention	3
Choose one of the following:		
ED TECH 6449	Using Technology In Administration Processes	3
ELE ED 6448	Diagnosis And Remediation Of Disabilities In Learning Mathematics	3
SEC ED	Analysis And Correction Of Reading Disabilities <sup>1</sup>	

<sup>1</sup> This course will not be offered in 2014-2015. Please contact the department for more information.

## Media and Learning in a Digital Society:

As today's students increasingly grow up in a media saturated world, teachers need to think creatively about how to harness the affordances of media and technology for learning while helping consumers become critical about the sources of information and how to verify Internet information in responsible ways. This concentration insures that educators will be up-to-date in technology integration as well as being able to share this learning with colleagues.

Required Courses:

ED TECH 5340	Selection And Utilization Of Educational Multimedia	3
ED TECH 6436	Computer-Mediated Communication In Education	3
Choose one of the following:		
ED TECH 6435	Instructional Technology And Education Reform	3

ED TECH 6444	Cognition And Technology	3
ED TECH 6448	Technology-Supported Inquiry Learning	3
ED TECH 6452	Educational Multimedia Design	3

## Leadership in Education:

Organizations need leaders who understand the complexities of systems and working with diverse staff and families within situated communities in a dynamic and changing educational environment. Leadership skills can be taught and nurtured. This Leadership in Education concentration allows educators in various roles and career levels to apply principles of leadership to creating effective communities of practice.

Required Courses:

ED ADM 6503	Organizational Change In Education	3
Choose two of the following:		
ED ADM 6200	Demographic Contexts of Education	3
ED ADM 6203	Political Contexts Of Education	3
ED ADM 6205	Legal Contexts Of Education	3
ED ADM 6401	School Staff Development And Supervision	3

## Supporting Language Learners: TESOL Concentrations I and II: 9 hours each

This concentration is designed for those who want to better understand Second Language Acquisition (SLA) and Teaching English to Speakers of Other Languages (TESOL) processes. Courses emphasize the theoretical foundations of Second Language Acquisition and TESOL and their practical application to practice. Concentration I is open to all Masters in Education students.

In order to get a Missouri TESOL endorsement, complete BOTH Concentration I and Concentration II (18 hours). The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is intended for individuals with a bachelor's degree who would like to advance their knowledge about language learning in culturally and linguistically diverse classrooms. The program is a combination of theory and practice, covering the key concepts, issues and innovative strategies required to apply this knowledge. Students may seek this Graduate Certificate simultaneously with the M.Ed. in Secondary Education with a specialization in TESOL.

### Admission

Applicants who wish to earn a Graduate Certificate in TESOL must apply for admission to the certificate program and to the Graduate School at the UM-St. Louis as a non-degree student or as a master's or doctoral student. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

### Requirements

Students must maintain a minimum GPA of 3.0 to remain in the certificate program. The DESE endorsement is awarded after completion of Concentrations I and II. A program of study, or M-1, should be filed in the first one-third of the program. Students should file the Intent to Complete a Graduate Certificate form at the beginning of their last semester. The Graduate Certificate in TESOL requires 18 credit hours of course work, including an entry course.

## TESOL Concentration I:

TCH ED 6210	Foundations Of Teaching English To Speakers Of Other Languages	3
TCH ED 6220	Principles Of Second/Foreign Language Acquisition	3
TCH ED 6230	Cross-Cultural Communication In The Classroom	3

## TESOL Concentration II:

TCH ED 6240	Assessment for Teaching English to Speakers of Other Languages	3
TCH ED 6250	Methods and Materials for Teaching English to Speakers of Other Languages	3
TCH ED 6260	Practicum in Teaching English to Speakers of Other Languages	3

## Character and Citizenship Education:

The Character and Citizenship Education concentration is designed for those interested in understanding and applying the theory and practice of character and citizenship education by analyzing research on effective character and citizenship practice. Students who complete this 9-hour concentration can apply these hours to the 18 hour Character and Citizenship Education Certificate if desired. Details can be found under the Department of Educational Psychology, Research & Evaluation (p. 349) website.

Choose three of the following:

ED PSY 6217	Foundations Of Citizenship Education	3
ED PSY 6218	Coaching Sports For Character <sup>1</sup>	3
ED PSY 6417	Current Perspectives On Citizenship Education	3
ED PSY 6440	Moral Development And Education <sup>1</sup>	3
ED PSY 6445	Character Education And Development	3
TCH ED 6200	Building Character and Competence with Diverse Learners	4

<sup>1</sup> This course is not offered in 2014-2015. Please contact the department for more information.

## STEM Concentration:

Many challenges remain in the attraction and preparation of youth for the careers in fields of science, technology, engineering and mathematics (STEM). Those who teach in these areas need to continually work toward developing and implementing relevant curricula and develop new instructional strategies as well as revise and upgrade current methodology. The STEM Concentration focuses on professional development with respect to instructional research and best practices for all involved in enhancing STEM literacy.

Choose three of the following:

SEC ED 6426	Secondary School Curriculum Reform In The Earth/ Space Sciences <sup>1</sup>	1-4
SEC ED 6428	Secondary School Curriculum Reform In The Life Sciences	1-4
SEC ED 6441	Problems And Research In Teaching Secondary School Science	3
SEC ED 6485	Secondary School Curriculum Reform In The Physical Sciences	1-4

<sup>1</sup> This course is not offered in 2014-2015. Please contact the department for more information.

## Experiential Education:

Increasingly it is important to connect students to the physical world and to intentionally build the skills, knowledge and dispositions of leadership by challenging oneself in new ways. Open new pathways to learning for you and your students through taking this concentration area in experiential

education – you will have a great adventure as well with like-minded educators. This concentration is especially relevant for those wanting to use hands-on, experiential and outdoor approaches to education at any level.

TCH ED 6440	Experiential Education	3
TCH ED 6442	Outdoor Education Leadership	3
TCH ED 6444	Environmental Education	3

## Physical Education / Health and Wellness:

Healthful physical and motor development of children and youth has become a focus in the US with high obesity rates, emotional stress levels, and poor nutrition and exercise habits. Educators are on the forefront of re-educating children, youth and their families about holistic approaches to life-long wellness. This concentration offers a range of topics to be explored.

Choose three of the following:

PHY ED 5380	Nutrition For Human Performance	3
PHY ED 6462	The Physical Education Curriculum	3
PHY ED 6464	Analysis Of Teaching In Physical Education	3
PHY ED 6478	Problems And Research In Physical Education	3
PHY ED 6482	Life Span Perceptual And Motor Development <sup>1</sup>	3

<sup>1</sup> This course is not offered in 2014-2015. Please contact the department for more information.

## Discipline Content Area Concentration:

Educators recognize the importance of staying current in their field of teaching. This Discipline Content Concentration allows for 9 hours of graduate level credit in a content area related to one's field of practice. This includes graduate credit in areas such as history, English, math, science, foreign language, health and PE, and art and music. Courses for this concentration need to be approved by advisors before they are included on the M-1 program form.

## Elective Concentration:

To insure maximum flexibility in course selection to meet the individual needs of professional educator's development, this concentration represents an opportunity to select three unique courses from the various concentration areas in an eclectic and personalized way. Choices to include in this concentration need to be approved by advisors and signed off on by the program director.

## Middle School Education Concentration:

This concentration in the middle level of education is designed for the graduate students who would like to further their competencies as a middle level educator.

Choose three of the following:

ED ADM 6303	Middle School Administration	3
ED ADM 6315	Middle School Educational Philosophy	3
ED ADM 6317	Supervision And The Middle School Child	3
ED PSY 6225	The Psychology Of Adolescence	3

## Master of Education: Secondary Education with Emphasis in Curriculum and Instruction

The M.Ed. with an emphasis in curriculum and instruction is designed for graduate students who wish to further their competencies as teacher or curriculum specialist or instructional leaders.

### Required Core requirements

Students are required to complete the following courses within the first 15 hours of study

TCH ED 6010 (p. 393)	Examining History, Community And Social Justice In Education	3
TCH ED 6020 (p. 393)	Teacher Action, Advocacy And Leadership	3
ED PSY 6030 (p. 393)	Instruction, Learning And Assessment	3

### Curriculum and Instruction Core

SEC ED 6415 (p. 393)	The Secondary School Curriculum	3
SEC ED 6416 (p. 393)	Curriculum Construction For Secondary Schools	3
SEC ED 6420 (p. 393)	The Improvement Of Secondary School Teaching	3

### Specialization Areas (Optional) 6

Same as above

### Electives

Students can elect hours in their teaching field or other areas such as: Character Education, Assessment, or Problems courses.

### Required Research Course

TCH ED 6909 (p. 393)	Teacher Action Research I (Take semester prior to Teacher Action Research Capstone, TCH ED 6910.)	3
-------------------------	---	---

### Action Research Capstone Course

Students must enroll in their capstone course during their last semester and after completing Teacher Research. TCH ED 6909 (p. 393).

TCH ED 6910 (p. 393)	Teacher Action Research Capstone <sup>1</sup>	3
-------------------------	---	---

### Total Hours 30

<sup>1</sup> This course is not offered in summer sessions.

## Master of Education: Secondary Education with Emphasis in Middle Level Education

The M.Ed. with an emphasis in middle level education is designed for graduate students who would like to further their competencies as a middle level educator.

### Required Core Requirements 9

Students are required to complete the following courses within the first 15 hours of study:

TCH ED 6010	Examining History, Community And Social Justice In Education	
TCH ED 6020	Teacher Action, Advocacy And Leadership	
ED PSY 6030	Instruction, Learning And Assessment	

### Middle Level Education Core 12

Students should select a curriculum course and at least 9 hours from the following:

ED ADM 6303	Middle School Administration	
SEC ED 6420	Improving Teaching and Learning	
ED PSY 6222	Advanced Studies in Child and Adolescent Development	
SPEC ED 6325	Advanced Studies in Classroom & Behavior Management	
TCH ED 5312	Differentiated Instruction	

### Electives 6

### Required Research Courses 6

TCH ED 6909	Teacher Action Research I	
Take semester prior to Teacher Action Research Capstone, TCH ED 6910.		
TCH ED 6910	Teacher Action Research Capstone <sup>1</sup>	

Students must enroll in the capstone course during their last semester and after completing TCH ED 6909, Teacher Action Research.

### Total Hours 33

<sup>1</sup> This course is not offered in summer sessions.

## Master of Education: Secondary Education with Emphasis in Reading

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing and other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialist in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. The following program enables the student to earn a M.Ed. with an emphasis in Reading while fulfilling the Department of Elementary and Secondary Education's requirements for special reading certification in Missouri. A course in reading in the content area is required for secondary certification. If this has not been taken as an undergraduate, it must be selected as an elective in the program for a Masters in Secondary Education with a Reading Emphasis. The minimum required and recommended courses are as follows:

### Required Core requirements

Students are required to complete the following courses within the first 15 hours of study:

TCH ED 6010 (p. 393)	Examining History, Community And Social Justice In Education	3
TCH ED 6020 (p. 393)	Teacher Action, Advocacy And Leadership	3
ED PSY 6030 (p. 393)	Instruction, Learning And Assessment	3

### Required Research Course - Evaluation of Abilities and Achievement 3

Select one of the following:

ED REM 6707 (p. 393)	Classroom Measurement And Evaluation	
ED REM 6709 (p. 393)	Educational And Psychological Measurement	
ED REM 6716 (p. 393)	Academic Assessment and Intervention	

**Reading Concentration**

ELE ED 6684 (p. 393)	Instructional Strategies For Teaching Reading	3
ELE ED 6686 (p. 393)	Analysis And Correction Of Reading Disabilities	3
SEC ED 6387 (p. 393)	Literacy Acquisition And Learning For Urban Students	3
SEC ED 6493 (p. 393)	Reading Specialist Practicum I	3
SEC ED 6494 (p. 393)	Reading Specialist Practicum II	3

And at least one course from the literacy-related elective list or from the certification-related elective list below:

**Literacy Related Electives include:**

ELE ED 6436 (p. 393)	Children's Literature I: Survey And Analysis	
ELE ED 6688 (p. 393)	Literacy Assessment To Guide Instruction	
ENGL/TCH ED 6880 (p. 393)	Gateway Writing Project	
TCH ED 4391 (p. 393)	Literacy for Adolescent Learners in Content Areas	

One course needed to complete certification <sup>1</sup>

**Certification Related Electives include:**

CNS ED 3220 (p. 393)	Counseling Individuals With Special Needs	
ED PSY 6220 (p. 393)	Psychology Of The Elementary School Child	
ED PSY 6225 (p. 393)	The Psychology Of Adolescence	
ED REM 6707 (p. 393)	Classroom Measurement And Evaluation	
ED REM 6709 (p. 393)	Educational And Psychological Measurement	
SPEC ED 4315 (p. 393)	Speech And Language Of Exceptional Children	

**Capstone Course**

SEC ED 6482 (p. 393)	Problems And Research In Teaching Secondary Reading	3
-------------------------	---	---

**Total Hours** **33**

<sup>1</sup> To be recommended for Missouri Department of Elementary and Secondary Education special reading certification, teachers must have a valid Missouri teacher's certificate and two years of classroom teaching experience, and they must have had the following at either the undergraduate or graduate level: two additional courses in reading; language acquisition or development; classroom management techniques; counseling techniques (to include exceptional children and their families: child AND adolescent psychology; and testing, evaluation, and achievement. These certification requirements might be in addition to the courses listed in the program of study above. See your graduate advisor for information about these courses. M.Ed. Students needing any of the above can elect to take these courses at the graduate level where available and apply them to their concentration area.

Note: Only one 4000 level course can be applied to the M.Ed.

## Master of Education: Secondary Education with Emphasis in Teaching English to Speakers of Others Languages (TESOL)

The M.Ed. program with emphasis in TESOL is designed to meet the need for teachers who can apply knowledge about language learning to their culturally and linguistically diverse classrooms. This program meets the requirements for a Missouri Department of Elementary and Secondary Education Teaching endorsement in English to Speakers of Other Languages (ESOL).

**Required Core**

Students are required to complete the following courses within the first 15 hours of study:

TCH ED 6010 (p. 393)	Examining History, Community And Social Justice In Education	3
TCH ED 6020 (p. 393)	Teacher Action, Advocacy And Leadership	3
ED PSY 6030 (p. 393)	Instruction, Learning And Assessment	3

**TESOL Core**

TCH ED 6210 (p. 393)	Foundations Of Teaching English To Speakers Of Other Languages	3
TCH ED 6220 (p. 393)	Principles Of Second/Foreign Language Acquisition	3
TCH ED 6230 (p. 393)	Cross-Cultural Communication In The Classroom	3
TCH ED 6240 (p. 393)	Assessment for Teaching English to Speakers of Other Languages	3
TCH ED 6250 (p. 393)	Methods and Materials for Teaching English to Speakers of Other Languages	3
TCH ED 6260 (p. 393)	Practicum in Teaching English to Speakers of Other Languages	3

**Required Research Course**

TCH ED 6909 (p. 393)	Teacher Action Research I (Take semester prior to Teacher Action Research Capstone, TCH ED 6910.)	3
-------------------------	---	---

**Action Research Capstone Course**

Students must enroll in the capstone course during their last semester and after completing TCH ED 6909 (p. 393), Teacher Action Research I.

TCH ED 6910 Teacher Action Research Capstone <sup>1</sup>  
(p. 393)

<sup>1</sup> This course is not offered in summer sessions.

## Master of Education: Secondary Education Option in Teacher and Certification

(pending CBHE approval)

Those holding a baccalaureate degree or major in the teaching field who would like to pursue initial teacher preparation and a Master's degree can take the following program. The exact number of hours required will depend upon hours needed by the student to meet certification requirements for the chosen teaching field.

Admission Requirements for the Option in Teacher Certification:

1. A passing score on the designated Missouri Content Examination or an approved program of study
2. A 2.75 or higher overall GPA
3. Approved results of the Family Care Safety Registry
4. A clear TB test or chest x-ray, if appropriate

Application Deadline: April 1st

### Required Certification Courses

30

TCH ED 5311 Foundations Of Education

TCH ED 5310 Instructional Design

TCH ED 5312 Differentiated Instruction

ED PSY 6222 Advanced Studies in Child and Adolescent Development

SEC ED/ Curriculum Methods of Teaching [Subject Area]  
CoFAC 4XXX

SEC ED 5XXX Advanced Teaching Seminar [Subject Area]

SEC ED 5989 Practicum I: Site Based Experience

SEC ED 5990 Practicum II: Site Based Experience

### Master of Education Required Core Courses

9

Students should complete initial teacher certification courses before enrolling in the following:

TCH ED 6010 Examining History, Community And Social Justice In Education

TCH ED 6020 Teacher Action, Advocacy And Leadership

ED PSY 6030 Instruction, Learning And Assessment

Required Research Courses

6

TCH ED 6909 Teacher Action Research I

Take semester prior to Teacher Action Capstone, TCH ED 6910.

TCH ED 6910 Teacher Action Research Capstone <sup>1</sup>

3

Students must enroll in the capstone course during their last semester and after completing Teacher Action Research TCH ED 6909

**Total Hours**

48

<sup>1</sup> This course is not offered in summer sessions.

## Master of Education: Elementary or Secondary Education with Physical Education as Teaching Field

A significant number of graduate students choose physical Education as the teaching field within one of the master of Education degree options. Most are currently employed as teachers of health and/or physical Education. Certification requirements in Missouri mandate the completion of a master's degree to professionalize the certificate. Therefore, a full complement of graduate courses relating to teaching in physical Education is available to meet this need. For many who need to pursue teacher certification in physical Education while pursuing the master's degree, most course work needed to meet state certification requirements can be taken in the master's program. For those employed outside Education, an emphasis in exercise science is also available, providing a foundation of course work designed to prepare a person in this area. Specific information is available regarding each of these degree programs. Please consult with your graduate adviser to discuss the specific options and requirements.

## Master of Education: Special Education

- Cross Categorical Disabilities
- Autism and Developmental Disabilities
- Early Childhood Special Education

The M. Ed. Program in Special Education includes a representation of the important core knowledge in Special Education. The primary goal is to empower professionals to be thoughtful educators who use best practices when working with students with disabilities. Research and data-based decision-making are emphasized throughout the program. Graduate students will translate research into practice in their courses, and learn to analyze multiple types of assessment data. The M.Ed. Program in Special Education consists of an initial required core of courses, a concentration area corresponding to the chosen emphasis area, and a capstone or exit course block.

When graduate students are accepted into the program, their transcripts are analyzed to identify compliance with state education certification guidelines. Students who wish to be certified in the education of children with cross-categorical disabilities will be required to fulfill general certification requirements, as well as graduate coursework. Upon completion of this advanced degree, professionals will have developed an in-depth knowledge-base related to

- various learning contexts within and outside of the school setting
- the multiple influences on educational practices in schools
- the characteristics and instructional needs of learners with disabilities
- assessment strategies for monitoring instruction
- instructional best practices
- using research to inform practice in the classroom
- diversity awareness
- contexts that affect student learning
- the powerful interactions between setting events and specific learner outcomes
- a life-perspective of students with exceptional learning needs, both young children who transition into kindergarten and those transitioning into adulthood.

**1) Required Foundation Courses (9 hours)**

Students are required to complete the following courses within the first 15 hours of study.

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6020	Teacher Action, Advocacy And Leadership	3
ED PSY 6030	Instruction, Learning And Assessment	3

**2) Required Research Courses (6 hours)**

These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

TCH ED 6909	Teacher Action Research I	3
TCH ED 6910	Teacher Action Research Capstone <sup>1</sup>	3

**3) 9-hour Concentration Choices****A. Special Education Concentration I: 9 hours**

ED PSY 6545	Consultation In Schools And Related Settings	3
SPEC ED 6325	Advanced Studies in Classroom & Behavior Management <sup>2</sup>	3
or SPEC ED 6437	Applied Behavior Analysis: Functional Assessment and Interventions	
SPEC ED 6415	The Law And Special Education	3

**B. Special Education Concentration II Electives 9 hours**

Students have the option of enrolling in a 3 credit hour course from either the Early Childhood Special Education or Autism Studies concentrations, or enrolling in an additional course in the Cross-Categorical concentration in order to meet the 9 credit hour course requirement for Concentration II.

**i. Cross Categorical Disabilities Concentration II: 6 +3 hours from i, ii, or iii.**

CHOOSE 2 + 1 from this or another designated Concentration II area

SPEC ED 6345	Characteristics and Education of Students with High-Incidence Disabilities	3
SPEC ED 6346	Reading Instruction and Intervention in Special Education	3
SPEC ED 6443	Characteristics and Education of Students with Learning Disabilities	3
SPEC ED 6450	Characteristics and Education of Students with Emotional/Behavioral Disorders	3
ED PSY 6542	Social-Emotional and Behavior Interventions	3

**ii. Autism and Developmental Disabilities Concentration II (9 hours)**

SPEC ED 6430	Characteristics and Education of Individuals with Low-Incidence Disabilities	3
SPEC ED 6610	Foundations of Autism Spectrum Disorder: Research to Practice	3
SPEC ED 6620	Assessment and Interventions for Children and Youth with Autism Spectrum Disorder	3

**iii. Early Childhood Special Education Concentration II (9 hours)**

SPEC ED 6372	Screening And Diagnosis Of Developmental Delays: Birth To 5 Years	3
SPEC ED 6462	Introduction To Early Childhood Special Education	3

SPEC ED 6463	Curriculum, Methods, And Materials For Early Childhood Special Ed	3
--------------	---	---

<sup>1</sup> This course is not offered in summer sessions.

<sup>2</sup> SPEC ED 6437 is required for the Autism concentration and certificate and the Applied Behavior Analysis certificate.

Total hours: minimum 33 credit hours

**Graduate Certificates**

Graduate Certificates are appropriate for teachers, specialists, department chairpersons, and those who work in informal learning or international educational settings who may have a Master's degree and desire further education in a specialized area.. Candidates choose the certificate that will support their personal growth and development as an educational leader. Combined with five core courses a certificate could result in a Master's Degree. The following Graduate Certificates are described here.

- **Applied Behavior Analysis (pending CBHE approval)**
- **Autism Studies**
- **Early Childhood Teaching (pending CBHE approval)**
- **Elementary School Teaching (pending CBHE approval)**
- **Graduate Certificate in Elementary and Special Education Teaching (pending CBHE approval)**
- **Secondary School Teaching**
- **Social Justice in Education (pending CBHE approval)**
- **Teaching English to Speakers of Other Languages (TESOL)**
- **Teaching of Writing, Gateway Writing Project**

**Graduate Certificate in Applied Behavior Analysis**

(pending CBHE approval)

**Prerequisite Courses:**

SPEC ED 6437	Applied Behavior Analysis: Functional Assessment and Interventions	3
SPEC ED 6610	Foundations of Autism Spectrum Disorder: Research to Practice	3
SPEC ED 6620	Assessment and Interventions for Children and Youth with Autism Spectrum Disorder	3

**Required Courses:**

SPEC ED 6630	Principles of Applied Behavior Analysis	3
SPEC ED 6650	Practicum I in Applied Behavior Analysis	3

SPEC ED 6660	Advanced Applications of Applied Behavior Analysis	3
SPEC ED 6670	Practicum II in Applied Behavior Analysis	3
SPEC ED 6675	Ethics and Professionalism in Applied Behavior Analysis	3
SPEC ED 6685	Analysis of Verbal Behavior	3

**Total Hours** **18**

## Graduate Certificate in Autism Studies

The mission of the certificate program is:

- To improve current preparation of teachers and related educational practitioners in the greater St. Louis area with dedicated coursework that increases program participants' understanding and skills necessary to providing comprehensive and holistic programming (in areas of academic, social, functional, and life skills) that addresses the unique characteristics of individuals with Autism.
- To provide contemporary, best practices-based preparation of professionals who specialize in the treatment of individuals with autism spectrum disorders (ASD) and/or who work collaboratively with school personnel to recognize and follow the ASD profile that best educates the students
- To gain greater understanding of challenges faced by families of individuals with ASD
- To prepare personnel to educate and support individuals with ASD, which includes autism, Asperger Syndrome, and other pervasive developmental disorders
- To address the complex needs of students with ASD, including those who require intensive and highly individualized programs, to those who require less intensive modifications to succeed in their educational, functional, and life goals
- To increase the current body of scholarly and applied knowledge pertaining to the science and practice in areas of cognitive disability studies.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bof>.

Total Hours: Minimum 18 credit hours

## Graduate Certificate in Early Childhood Teaching

(pending CBHE approval)

The Graduate Certificate in Early Childhood Teaching prepares those with at least a bachelor's degree, who are not pursuing an M.Ed., for teaching in the Early Childhood classroom.

### Admission Requirements for the Graduate Certificate in Early Childhood Teacher Certification:

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by The Graduate School

## Graduate Certificate in Elementary and Special Education

(56 Credit Hours = 41 Elementary + 15 Special Education)

This program of study is for individuals with a Bachelor's degree who would like to prepare for teacher certification in Elementary Education and Special Education. This graduate certificate program option leads to Missouri Initial Teacher Certification in Elementary Teaching 1-6 with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education. These courses are also what DESE requires for the elementary and special education certifications.

### Admission Requirements for the Graduate Certificate in Elementary and Special Education School Teaching:

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

## Graduate Certificate in Secondary School Teaching

The Graduate Certificate in Secondary School Teaching prepares those with at least a bachelor's degree for teaching in high school. Normally this Graduate Certificate is taken by students who are not simultaneously pursuing the M.Ed. and teacher certification.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/BqS>.

### Admission

Applicants must meet the university's academic requirements in their teaching field and consult an adviser in OASIS (116 SCC) to learn about prerequisites, assessments, and other requirements that may be set by the state or the university. An overall GPA of at least 2.75 is required for admission to the Graduate School.

### Requirements:

#### Graduate Level Certification Courses

TCH ED 5310	Instructional Design	3
TCH ED 5311	Foundations Of Education	4
TCH ED 5312	Differentiated Instruction	4
ED PSY 6222	Advanced Studies in Child and Adolescent Development	3

SEC ED 5XXX	Teaching Seminar [Subject Area]	1-3
SEC ED 5989	Practicum I: Site Based Experience	2
SEC ED 5990	Practicum II: Site Based Experience	8

Total minimum 18 graduate hours.

## Graduate Certificate in Social Justice in Education

(pending CBHE approval)

The College of Education Certificate in Social Justice is organized to support the understanding, knowledge and skills needed to create a just and equitable society. The curriculum focuses on both institutional and personal processes, values, attitudes and behaviors that sustain injustice while encouraging the development of positive educational, familial, community-centric, and social group advocacy and action.

The Graduate Certificate in Social Justice is an 18 credit hour program. To earn a certificate, one must a) complete 6 credit hours in the Foundations Choice Sequence, b) complete 12 credit hours in the Elective Choice Sequences, and as a capstone c) submit during the final semester of the program, for review by a faculty panel, an artifact/assignment from a Certificate course together with a written reflection that articulates in what ways it represents one's learning to become more culturally competent and socially just.

Foundations Sequence	6
Select 2 of 3 courses	
ED FND 6430	Critical Race Theory in Education

TCH ED 6010 Examining History, Community And Social Justice In Education

TCH ED 6350 Gender, Language & Identity

Social Justice Electives 12

Select four courses from the list of electives. The elective courses are organized into three categories: Social Justice and Action, Diversity, and Culture and Context. You may select your electives from any or all categories.

#### Social Justice and Action Elective Courses

CNS ED 6830 Counseling African American Clients

CNS ED 6840 Counseling Sexual Minorities

CNS ED 6850 Social Class and Poverty Issues In Counseling

TCH ED 6020 Teacher Action, Advocacy And Leadership

Or other approved elective

#### Diversity Elective Courses

CNS ED 6030 Foundations for Multicultural Counseling

ED FND 6430 Critical Race Theory in Education <sup>1</sup>

GS 4100 Introduction to Feminist and Gender Theory

TCH ED 6010 Examining History, Community And Social Justice In Education <sup>1</sup>

TCH ED 6350 Gender, Language & Identity <sup>1</sup>

Or other approve elective

#### Culture and Context Elective Courses

CNS ED 6220 Current Issues In Counseling Special Needs Populations

ED ADM 6200 Demographic Contexts of Education

ED ADM 6203 Political Contexts Of Education

ED FND 6430 Critical Race Theory in Education

ED REM 7712 Discourse Analysis In Education

ED TECH 6434 Technology and Privilege

Or other approved elective

**Total Hours 18**

<sup>1</sup> Course not taken for the Foundations Sequence requirement may be taken as an Elective course.

## Graduate Certificate in Teaching English to Speakers of Other Languages

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is intended for individuals with a bachelor's degree who would like to advance their knowledge about language learning in culturally and linguistically diverse classrooms. The program is a combination of theory and practice, covering the key concepts, issues and innovative strategies required to apply this knowledge. Students may seek this Graduate Certificate simultaneously with the M.Ed. in Secondary Education with a specialization in TESOL.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bq7>.

## Admission

Applicants who wish to earn a Graduate Certificate in TESOL must apply for admission to the certificate program and to the Graduate School at the University of Missouri –St. Louis as a non-degree student or as a Master's or doctoral student. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

## Requirements

Students must maintain a minimum GPA of 3.0 to remain in the certificate program. The certificate is awarded after completion of the courses listed below. A program of study, or M-1, should be filed in the first one-third of the program. Students should file an Intent to Complete a Graduate Certificate at the beginning of their last semester. The Graduate Certificate in TESOL requires 18 credit hours of course work, including an entry course (TCH ED 6210):

TCH ED 6210	Foundations Of Teaching English To Speakers Of Other Languages	3
TCH ED 6220	Principles Of Second/Foreign Language Acquisition	3
TCH ED 6230	Cross-Cultural Communication In The Classroom	3
TCH ED 6240	Assessment for Teaching English to Speakers of Other Languages	3
TCH ED 6250	Methods and Materials for Teaching English to Speakers of Other Languages	3
TCH ED 6260	Practicum in Teaching English to Speakers of Other Languages	3
<b>Total Hours</b>		<b>18</b>

## Graduate Certificate in the Teaching of Writing, Gateway Writing Project

Jointly housed in the Division of Teaching and Learning and the Department of English, this Graduate Certificate prepares teachers at all levels (K-12, college, adult) to improve their students' performance in writing. The program also emphasizes using writing as a means to promote learning in all content areas. All courses provide opportunities for teachers to write, revise, share feedback, and reflect on their own writing development. Based on the National Writing Project's core belief that teachers of writing must themselves be writers, the Graduate Certificate in the Teaching of Writing brings together sound pedagogy, composition theory, and writing practice.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bre>.

The Certificate is an 18-hour program through the Gateway Writing Project (GWP); it may also be coordinated with other graduate programs. Certificate courses may be applicable to the M.A. in English with emphasis in composition or to various M.Ed. programs. The GWP Certificate is especially appropriate for post-master's candidates who wish to pursue a specialization in teaching writing. The Graduate Certificate in the Teaching of Writing requires a 12 semester-hour core of courses developed by the Gateway Writing Project: The GWP invitational institute (6 hrs), a designated "topics" course (3 hrs.), and an exit course (3 hrs.). The Certificate requires a minimum of 12 semester hours at the 5000 or 6000 level or above. Electives (6 semester hours) may be chosen from approved offerings in English or Education.

## Admission

Applicants must be admitted to Graduate School and be selected by the faculty admissions committee for the Gateway Writing Project's Certificate in the Teaching of Writing. The committee will review candidates on the basis of an interview, an application essay, and supporting documentation. Criteria include experience teaching writing at any level and academic record, especially in writing and the teaching of writing.

## Prerequisites:

ENGL 4880/SEC ED 4880, "Writing for Teachers" or an equivalent course in teaching writing.

Coursework or competency in basic computer application.

## Required Core Courses (12 semester hours)

ENGL 4850/TCH ED 5850 Topics In The Teaching Of Writing 1-3

ENGL/TCH ED 6880 Gateway Writing Project 3-6

TCH ED 6890 Seminar In Professional Writing For Teachers 3

**Electives** 6

Electives may be chosen from other Gateway Writing Project offerings or from courses offered by the appropriate academic department with advisor's approval. These electives must include at least one more 5000-6000 level course.

Suggested electives applicable to an MA in English with writing emphasis

ENGL 5800 Modern Linguistics

ENGL 5840 Theories Of Writing

ENGL 5860 Writing/Reading Theory

ENGL 5860 Writing/Reading Theory

ENGL 5890 Teaching College Writing

Suggested electives applicable to an M.Ed. in Elementary or Secondary Education

ED REM 6714 Action Research In Education

ELE ED 6387 Literacy Acquisition And Learning For Diverse Students

ELE ED 6482 Problems And Research In Teaching Elementary School

Courses in adult and higher education may also be appropriate

For complete information, see The Gateway Writing Project's Graduate Certificate in Teaching Writing.

## Early Childhood Education Courses

**ECH ED 3300 Introduction To Early Childhood Education: 3 semester hours**

Prerequisites: Level I. Students will use theoretical bases as well as on site observations to develop an awareness of teaching learning strategies appropriate for the developmental needs of children from birth through age eight. Scheduling, classroom arrangement, and child management practices will be considered. Students will develop their own philosophy of early childhood education.

***ECH ED 3301 Early Childhood Special Education Processes and Trends: 3 semester hours***

Prerequisites: Completion of Level 1 requirements. Focus on the history and federal laws related to the early childhood special education process. Examination of child development theories and assessment to determine if developmental delays exist. Emphasis on the importance of collaboration between teachers and therapists for service delivery, designing effective transition plans and integrating intervention services into a developmentally appropriate curriculum.

***ECH ED 3303 Curriculum And Practice Laboratory: Infant/Toddler: 1 semester hour***

Classroom experience in infant or toddler classrooms under directions of University personnel. Must be taken concurrently with ECH ED 3313 Curriculum and Practice: Infant/Toddler.

***ECH ED 3304 Curriculum And Practice Laboratory: Preschool: 1 semester hour***

Classroom experience in preschool classrooms under direction of university personnel. Must be taken concurrently with ECH ED 3314 Curriculum and Practice: Preschool.

***ECH ED 3313 Curriculum And Practice: Infant/Toddler: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for children from birth to 30 months. Must be taken concurrently with ECH ED 3303.

***ECH ED 3314 Curriculum And Practice: Preschool Education: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for the inclusive preschool classroom with emphasis on science, social studies, creative activities and technology. Must be taken concurrently with ECH ED 3304.

***ECH ED 3332 Literacy, Learning and Instruction For The Young Child: 3 semester hours***

Prerequisites: Level I. Attention on the home language and environment of young children as they construct knowledge of print from birth to age eight. Critical examination of the range of opportunities for early literacy learning available to children from economically advantaged and disadvantaged communities. Emphasis on meaningful, culturally, and developmentally appropriate activities for fostering beginning reading and writing. Focus on strategies for involving families and capitalizing on community resources in promoting language and literacy learning for young children. This course may be applied toward a Literacy Minor.

***ECH ED 3350 Child/Family and Education and Community Involvement: 3 semester hours***

Prerequisites: ECH ED 3300. Formal Admission to the Teacher Education Program. This course is designed to provide students with the knowledge and skills needed to work successfully with diverse families and family groups in individual and community settings. The focus will be on strengthening adult-child relationships and family-staff relationships in the home, school, and community settings. Family involvement in early childhood programs and sharing information with families will be stressed.

***ECH ED 4317 Implementation, Evaluation, and Assessment in Early Childhood Education: 3 semester hours***

Prerequisites: Level I and Level II, admission to the teacher education program, ECH ED 3300. Techniques of observing children and using assessment instruments to plan and implement individual program plans for early childhood. Practicum experience required.

***ECH ED 4320 Classroom Management: 3 semester hours***

Same as SEC ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

***ECH ED 4348 The Acquisition Of Mathematical and Science Concepts: 3 semester hours***

Prerequisites: Formal admission to the Teacher Education Program, ED PSY 3312, and MATH 1150. Applications of the major theorists to mathematics reasoning and scientific inquiry. Content is appropriate for pre-K to third grade learners. Research and its implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered.

***ECH ED 4989 Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in a preschool and elementary (as applicable) setting with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit .

***ECH ED 4990 Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ECH ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ECH ED 4991 Student Teaching In Early Childhood Education II: 6 semester hours***

Prerequisites: Level II, ECH ED 3313, ECH ED 3314, ECH ED 4989, Must be taken with ECH ED 4991, and must immediately precede ECH ED 4991 in the semester. Must follow ECH ED 4990 in the same semester. Clinical teaching experience in early childhood education classrooms in the schools under University and school supervision. Assignments will be in different school districts buildings, serving families of different socio-economic and cultural backgrounds, and at different age/grade levels from those of the ECH ED 4990 assignments. Required of all majors in early childhood education. Not available for graduate credit.

***ECH ED 5989 Practicum I: Early Childhood/Early Childhood Special Education Site Based Experience: 2 semester hours***

Prerequisites: Level I and Level II requirements. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods courses assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ECH ED 5990 Practicum II: Early Childhood/Early Childhood Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ECH ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Teacher candidates collect data for a research project.

***ECH ED 6321 Parent And Community Resources In Early Childhood Education: 3 semester hours***

Prerequisite: Graduate Standing. Competencies for working with parents and community agencies will be developed through a study of community and community resources. Procedures for parent participation and use of service agencies in the education of all young children, including those with special needs, will be examined.

***ECH ED 6348 Understanding and Supporting Children's Math and Science Inquiry: 2 semester hours***

Prerequisites: ED PSY 6215, ECH ED 6412. Advanced study of current cognitive theory to support the development of children's inquiry skills. Curriculum development and implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. National and state standards in math and science will provide a framework for teaching strategies.

***ECH ED 6412 Foundations Of Early Childhood Education: 3 semester hours***

Prerequisite: A course in child psychology or equivalent. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention will also be directed to the implementation of such programs, problems of parent involvement and the social environment of the children.

***ECH ED 6413 Educational Role Of Play: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Emphasizes play as a constructive process with application to cognitive and social development. Special attention to facilitating play in early childhood classrooms.

***ECH ED 6415 Organization And Development Of Early Childhood Programs: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Strategies for the effective organization and development of programs for children from diverse cultures, ages birth through age eight years, will be studied. Research and theory in funding and budgeting, staffing and professional development, and selection, development, and assessment of program curriculum will be emphasized. Long-range planning for program stability and involvement in advocacy issues will be covered.

***ECH ED 6490 Internship: 1-10 semester hours***

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation and related professional activities.

***ECH ED 6497 Problems: 1-10 semester hours***

Prerequisite: Graduate standing. Individual study on topics pertaining to early childhood education.

***ECH ED 6535 Assessment, Curriculum, and Research Based Practice Birth-Grade 3: 2 semester hours***

Prerequisites: ED PSY 6030 or ECH ED 6412. Advanced studies in curriculum design, assessment, and research based practice for children from birth through eight years, with primary emphasis on birth through 5 years. Students will learn to develop curriculum based upon observation of children and their interests; child development theory and research; as well as the diverse needs of children by considering culture, context, and family relationships. Must take concurrently with ECH ED 6536.

***ECH ED 6536 Early Childhood Pre-Primary Practicum: 2 semester hours***

Prerequisites: ED PSY 6215, ELE ED 5310A or ECH ED 6412. The focus of this practicum is observation of and participation in classrooms of children birth through five years. Concurrent registration in ECH ED 6535 required.

## Educational Technology Courses

***ED TECH 3135 Technology for Educators: 1 semester hour***

This course will instruct teacher candidates in the use of digital tools in education. Candidates will develop strategies for incorporating current technology developments and social media in educational practice.

***ED TECH 4302 Educational Technology Instruction in Educational Agencies: 3 semester hours***

The course focuses on how computers and the internet have changed teaching and learning; how educators can facilitate inquiry-based learning, and on the design and implementation of technology-rich activities and projects. Practices to be explored include making presentations; searching for information and educational resources; organizing, writing, and displaying information and data. Students may not receive credit for both ED TECH 4302 and ED TECH 5301.

***ED TECH 4436 Computer-Mediated Teaching and Learning in Education: 3 semester hours***

Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Education could be formal or informal, in an institutional setting or not. Students will get experience with several different technologies during the semester.

***ED TECH 5301 Introduction To Computers And The Internet In Education: 3 semester hours***

The course focuses on how computers and the internet have changed teaching and learning; how teachers can facilitate learning in inquiry-based, technology-rich classrooms; and on the design and implementation of technology-rich activities and projects. Introduces students to the networked computer as an instructional tool. Course participants will be introduced to how teachers and their students can use computer tools in appropriate ways for different context areas and educational levels. Practices to be explored include making presentations; searching for information and educational resources; organizing writing, and displaying information and data.

**ED TECH 5340 Selection And Utilization Of Educational Multimedia: 3 semester hours**

Prerequisites: ED TECH 5301 or consent of instructor. Prepares students for selecting and utilizing multimedia technologies for learning. Students will conduct projects involving educational multimedia programs available on computers or over telecommunications networks. The projects will incorporate graphics, sound, and video. The goal of working on these projects is to prepare students to facilitate others' use of multimedia in classrooms and other educational contexts.

**ED TECH 6135 Technology for Preparing Inquiry-Based Teaching: 1 semester hour**

Prerequisites: Graduate standing. This course instructs teacher candidates in the use of digital tools in their teaching practice. Candidates develop strategies for incorporating current technology developments and social media in educational practice. Technology for educators challenges the candidates to think about the underlying principles, terms, and concepts of educational technology. Students are introduced to the different methods teachers can use to integrate technology into classroom instruction for varying grade levels and content areas. Activities undertaken in this course include learning about educational technology tools and applying some of them to create the academic instructional materials through interactive collaboration.

**ED TECH 6404 Seminar: 1-10 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Seminar in educational technology addressing special issues and topics not normally included in the regular educational technology courses.

**ED TECH 6416 Teaching & Learning With Technology: Graphical Representational Tools: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor Examines how graphical representation tools can be used to enhance teaching and learning. Students will learn about techniques for visualizing and organizing information and data in science, math, the social sciences, and humanities, and will become familiar with research and practice pertaining to their use in a variety of learning activities and projects.

**ED TECH 6434 Technology and Privilege: 3 semester hours**

Prerequisites: Graduate standing. Covers issues relating to the digital divide in schools and the society. The focus will be on technology in education with an emphasis on the ways that policies and practices perpetuate the divide. To examine this phenomenon, Critical Race Theory (CRT) will be one lens to examine the inequality.

**ED TECH 6435 Instructional Technology And Education Reform: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Students will learn how to foster changes in uses of technology for learning in schools, based on a historical understanding of previous technology reforms, and a critical assessment of recent reforms. Questions addressed included: What did stakeholders predict and hope for with earlier educational technologies, early uses of the computer and networking, and present technological innovations? What actually happened? Why? How can teachers and other educators help foster and spread effective use of technology for learning?.

**ED TECH 6436 Computer-Mediated Communication In Education: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Explores the theory, research, and practice of using computermediated communication and computer-supported collaborative learning in education. Learning environments including elementary, secondary, higher, and adult education will be considered.

**ED TECH 6437 Distance Learning Via Networks And Telecommunications: 3 semester hours**

Prerequisites: Graduate Standing The course is an investigation in the ways that learning and teaching across the barriers of time and distance are similar to and different from face to face learning and teaching. Students will study the influence of interactive media: videoconferencing, asynchronous discussions and other commonly used methods.

**ED TECH 6444 Cognition And Technology: 3 semester hours**

Same as ED PSY 6444. Prerequisites: ED PSY 6111 or consent of instructor Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED TECH 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, and pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as the role of instructors.

**ED TECH 6449 Using Technology In Administration Processes: 3 semester hours**

Same as ED ADM 6449. Prerequisites: A course in measurement, statistics or evaluation, or consent of instructor. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED TECH 6452 Educational Multimedia Design: 3 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Examines principles and techniques for the design of visually and functionally effective multimedia educational resources. Emphasis will be placed on techniques for the computer-based production of materials incorporating text, graphics, and video Rapid prototyping and evaluation techniques will be incorporated.

**ED TECH 6454 Instructional Video Production: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Elements of digital video production will be studied and used to produce video for a variety of formats. Students will develop the skill to produce and stream programs for school news programs, video annuals, documentaries and staff development programs.

**ED TECH 6460 Technology Coordination In Schools: 3 semester hours**

Prerequisites: ED TECH 5340, ED TECH 6444, and ED TECH 6448 or consent of instructor. The course provides theoretical and practical knowledge for implementing technology in schools. A major focus will be placed on analyzing the total cost of implementations and methods for measuring educational success.

**ED TECH 6462 Technical System Implementation For Educational Technology - Part 1: 3 semester hours**

Prerequisites: ED TECH 5340. Provides a foundational understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will learn theory and practice enabling them to install, troubleshoot and configure networked computers for educational purposes.

**ED TECH 6463 Technical System Implementation for Educational Technology Part 2: 3 semester hours**

Prerequisites: ED TECH 6462. Provides an in-depth understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will extend their knowledge of theory and practice, and will install, troubleshoot, configure networked computers for educational purposes.

**ED TECH 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED TECH 6497 Problems: 1-10 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Individual study on topics pertaining to educational technology.

**ED TECH 7070 Higher Education and Technology: Theory and Practice: 3 semester hours**

Prerequisites: Doctoral standing or consent of instructor. Students explore recent research of classical learning theories and pedagogy in order to incorporate advanced technology. Students apply both theory and practice to develop and present lesson modules that explore research in this area, and illustrate the use of technology in teaching. Detailed constructive criticism is used with the presentations.

## Elementary Education Courses

**ELE ED 2192 Educational Laboratory/Field Experience: 1-3 semester hours**

A laboratory/field experience requiring systematic observation and/or participation in appropriate educational settings. To precede student teaching. May be repeated to maximum of three hours.

**ELE ED 3330 Literacy, Literature And The Learner: 3 semester hours**

Prerequisites: Level I requirements. Exploration of literature and literacy-related resources available to teachers for children and young people. Emphasis on critical reading of literature for a variety of purposes, including communication, instruction, information, and recreation. Focus on the development of criteria for evaluating and selecting culturally and developmentally appropriate materials for motivating students to read in school and at home, as well as strategies for using literature to build family and school partnerships around reading. Twelve hours of participation in a school classroom setting are required. This course may be applied toward a Literacy Minor.

**ELE ED 3336 Communication Arts Learning And Instruction: 3 semester hours**

Prerequisites: Level I and Level II requirements. Analysis of the six communication arts (listening, speaking, viewing, visually representing, writing, and reading) across content areas. Attention on understanding children's home language and how children learn and develop communication skills. Special emphasis on strategies for assessing and teaching reading and writing, including workshop models, spelling, grammar, and grand conversations to meet the needs of every child. This course may be applied toward a Literacy Minor.

**ELE ED 3337 Teaching and Learning Literacy in the Elementary Classroom: 4 semester hours**

Prerequisite: Level I. The course, emphasizing literacy development, literacy instruction and children's literature, is the first in a sequence of two courses on teaching reading and writing. The purposes of this course are to survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work and phonics alongside matching texts (print and digital) and readers. Assessment strategies that inform these instructional practices will be introduced. Particular attention will be given to learning to teach literacy within diverse contexts and with multicultural groups of student.s.

**ELE ED 3338 Literacy Assessment and Learning: 3 semester hours**

Prerequisites: Level II and ELE ED 3337. The purposes of this course are to address issues of the differences and difficulties that may occur in literacy processes, evaluation of students' literacy skills, analysis of texts for their use by readers, and to design classroom literacy engagements that utilize a variety of instructional strategies and materials. Assessment practices explored will include running records, qualitative reading inventories, spelling inventories and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

**ELE ED 3389 Classroom Based Assessment To Guide Literacy Instruction: 3 semester hours**

Prerequisites: TCH ED 3315 or TCH ED 4391 or equivalent reading methods course. Analysis of strategies for differentiating instruction for a range of readers and writers across content areas. Focus on cultural and language considerations in the assessment of students' literacy skills. Emphasis on meeting the needs of individual readers and writers in the context of whole class instruction. This course may be applied toward a Literacy Minor.

**ELE ED 4246 Teaching Mathematics In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of mathematics requirements in General Education. Organization and implementation of a modern elementary school mathematics program. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4253 Teaching Of Social Studies In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of social science requirements in general education. Study of elementary school social studies emphasizing the current social studies curricular content, methods of teaching and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, the K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, SEC ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

***ELE ED 4341 Teaching Science In The Elementary School: 3 semester hours***

Prerequisites: Level I and Level II requirements. An analysis of teaching science to K-6 students with emphasis on current science education trends, science curricular materials, and strategies of instruction. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

***ELE ED 4342 Addressing Needs In Mathematics Teaching And Learning: 3 semester hours***

Prerequisite: ELE ED 4246. Instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. Course requires that students participate in K-12 classrooms for a minimum of 10 hours, in addition to university class schedule.

***ELE ED 4989 Practicum I: Elementary/Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4990 Practicum II: Elementary/Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ELE ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ELE ED 4991 Elementary School Student Teaching II: 6 semester hours***

Prerequisite: Completion of Level III courses. Clinical teaching experience in elementary school classrooms under university and school supervision. Required for all majors in elementary education. Not available for graduate credit.

***ELE ED 4992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 3 semester hours***

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not for graduate credit.

***ELE ED 4994 Practicum I: Elementary/TESOL Site Based Experience: 3 semester hours***

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4995 Practicum II: Elementary/TESOL Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Not for graduate credit.

***ELE ED 5989 Practicum I: Elementary/Special Education Site Based Experience: 1-2 semester hours***

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5990 Practicum II: Elementary/Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ELE ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5994 Practicum I: Elementary/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5995 Practicum II: Elementary/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Teacher candidates collect data for a research project.

***ELE ED 6241 Science Content, Inquiry-Based Instruction, and Assessment: STEM-Integrated Pedagogy: 2 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. The course is designed to provide teacher candidates with research-based theories and practices focused upon the teaching and learning of science. Candidates will acquire skills to plan and implement lessons to facilitate each learner's ability to conceptualize science concepts. The course will integrate related disciplines, such as technology, engineering and mathematics, in order to provide prospective teachers with a context for understanding the content of science, how science knowledge is acquired and understood, and how the sciences are connected across disciplines. Through course experiences and scholarly readings, prospective teachers will realize that to become an effective teacher one must acquire a positive attitude toward learning science, technology, engineering and mathematics; know how to acquire scientific information; and know how to facilitate learners' construction of scientific understandings.

***ELE ED 6246 Math Content Pedagogy, Inquiry-Based Instruction, and Assessment: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. This course provides the teacher candidate with math content and math pedagogical techniques to lead them to prepare and deliver best practices of teaching that are aligned with the elementary math learning standards and research-based practices. The students are encouraged to adopt interdisciplinary resources including multicultural children's literature and coping strategies for diverse students in the classroom settings. The students will develop lessons that entail using inquiry-based instructional materials, and reflective practice with assessment data.

***ELE ED 6253 Teaching Social Studies through Reading, Writing, and English Language Learners: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. Examines the teaching of social studies through reading elementary children's literature about U.S. history and examines writing instruction as a complex and dynamic process. The course integrates a standards-based, backward-planning approach; authentic literacy instruction through the lens of social studies; attention to the linguistic and cultural demands of social studies; and differentiation in instruction so that each student has access to meaningful and challenging learning opportunities using Sheltered Instruction Observation Protocol (SIOP). It focuses on essential attributes of effective literacy and content teachers, including the ability to draw upon students' cultural and linguistic backgrounds, help students make connections between new information and previous knowledge and skills that are research-based, and support students to transfer new information to real-life contexts and environments using critical thinking skills.

***ELE ED 6337 Teaching and Learning Literacy in the Elementary Classrooms: Teaching Reading and Writing: 4 semester hours***

Prerequisites: Level I courses. Emphasizes literacy development, literacy instruction, and children's literature in the process of teaching reading and writing. Students survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to effectively utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work, and phonics alongside matching texts (print and digital) and readers. Includes readings of academic research articles and book chapters that promote critical thinking in the design and implementation of literacy instruction. Particular attention will be given to learning to teach literacy within diverse contexts and with linguistically and culturally diverse students.

***ELE ED 6338 Literacy Assessment for Guided Instruction: 3 semester hours***

Prerequisites: Level I and ELE ED 6337. Addresses assessment issues that include examining the differences and difficulties that may occur in literacy learning processes. Topics covered include the effective use and evaluation of assessment instruments to prevent student literacy difficulties and promote accelerated learning. Students design classroom literacy engagements utilizing a variety of instructional strategies and materials. Includes reading peer-reviewed research articles and book chapters that promote critical thinking in the assessment and evaluation of literacy achievement. Assessment practices explored include running records of oral reading, an observation survey of early literacy behaviors (e.g., phonemic awareness, letter identification), qualitative reading inventories, spelling inventories, and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

**ELE ED 6342 Addressing the Mathematical Needs of Students: 3 semester hours**

Prerequisites: Graduate standing and ELE ED 6246. Educators will learn instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. The course will cover research based approaches to help develop assessments and strategies for addressing needs of students who have difficulties understanding and becoming proficient in mathematics.

**ELE ED 6387 Literacy Acquisition And Learning For Diverse Students: 3 semester hours**

Prerequisite: Graduate Standing. Designed to extend teacher understanding of children's literacy acquisition, development, and learning through the elementary grades. Emphasis on development of a teaching philosophy and skills which include maintaining effective literacy learning environments in diverse classrooms, fostering culturally responsive classroom communities, understanding social and environmental issues that affect the literacy learning of diverse learners, using effective methods and materials to develop engaged and literate students, and fostering children's participation in literacy activities.

**ELE ED 6410 Current Research In Early Childhood And Elementary Programs: 3 semester hours**

Prerequisites: Graduate Admission. A systematic examination of research related to early childhood and elementary school programs. Student will be expected to become effective consumers of educational research and to utilize appropriate research findings in their decision-making processes when planning instruction.

**ELE ED 6411 Curriculum Leadership Elementary Programs: 3 semester hours**

Prerequisite: ED PSY 6030. Learn strategies for development and implementation of up-to date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

**ELE ED 6422 Curriculum Design of Elementary Programs: 3 semester hours**

Prerequisites: ED PSY 6030, ELE ED 6411 or consent of instructor. A study of current and classic curricular design models of elementary education. Students will select a grade level or subject area curriculum and develop an integrated or differentiated curriculum based on the Common Core and national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instructional practices to student performance.

**ELE ED 6423 Learning Through Inquiry: 3 semester hours**

Prerequisites: ED PSY 6030 or consent of instructor. Students will learn to improve their instruction through using various inquiry models of teaching which develop the thinking skills required by the Common Core standards. Prior instructional experience is recommended.

**ELE ED 6426 Elementary School Curriculum Reform In The Earth/Space Sciences: 1-4 semester hours**

Prerequisites: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the earth/space sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**ELE ED 6428 Elementary School Curriculum Reform In The Life Sciences: 1-4 semester hours**

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. This course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for maximum of 4 credit hours.

**ELE ED 6429 Elementary School Curriculum Reform In The Physical Sciences: 1-4 semester hours**

Prerequisite: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry science activities that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for a maximum of 4 credit hours.

**ELE ED 6436 Children's Literature I: Survey And Analysis: 3 semester hours**

Prerequisite: ELE ED 3330 or equivalent. A survey of children's literature published in the last ten years. Special emphasis will be placed on the relationship between children's literature and contemporary issues of society. Students will experience the materials themselves rather than reading about books. In addition, students will begin to study the literary elements that make literature interesting and meaningful for children.

**ELE ED 6441 Problems And Research In Teaching Elementary School Science: 3 semester hours**

Prerequisite: Eight hours of science, ELE ED 6441, ED PSY 6111. A thorough examination of research related to elementary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional literature.

**ELE ED 6445 Problems Of Teaching Mathematics In The Elementary School: 3 semester hours**

A study of the mathematics program in the elementary school from the viewpoint of goals, content, techniques, and evaluation.

**ELE ED 6447 Problems And Research In Teaching Elementary School Mathematics: 3 semester hours**

Prerequisite: ELE ED 6445. A thorough examination of research related to recurrent problems in elementary school mathematics instruction, as well as current problems arising within modern programs. Includes methodology appropriate to investigation of such problems and techniques for assessment of the literature.

**ELE ED 6448 Diagnosis And Remediation Of Disabilities In Learning Mathematics: 3 semester hours**

Prerequisite: ELE ED 6445. Causes of mathematical disabilities. Materials and techniques for diagnoses and corrective programs for children and youth.

**ELE ED 6450 Problems Of Teaching Social Studies In The Elementary School: 3 semester hours**

A classroom-oriented study of curricular and instructional problems encountered in social studies. Emphasis is placed upon development of materials, techniques, and resources.

**ELE ED 6482 Problems And Research In Teaching Elementary School: 3 semester hours**

This is the capstone course for the Master of Elementary Education-Emphasis in Reading. To be taken in the last 9 hours of Masters Program. The three foci for this course are (1) systematic study of research as it focuses on the problems of teaching reading in the elementary school, (2) innovations in the field, and (3) action research. Each student designs and completes an action research project related to literacy.

**ELE ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ELE ED 6493 Reading Specialist Practicum I: 3 semester hours**

Prerequisites: ELE ED 6684, ELE ED 6686, and ED REM 6707, ED REM 6709, or ED REM 6716. Application of reading theory and research in a supervised setting. Emphasis on assessing and analyzing the literacy strengths, needs, and interests of a range of readers with the goal of improving their reading abilities and attitudes. Focus is on establishing reading support for children with the assistance of formal and informal assessments, reading professionals, educators, and children's families.

**ELE ED 6494 Reading Specialist Practicum II: 3 semester hours**

Prerequisite: ELE ED 6493. Application of reading theory and research in a supervised setting. Emphasis on using appropriate materials and providing effective instructional techniques to address children's assessed literacy strengths, needs, and interests with the goal of improving their reading abilities and attitudes. Focus is on sustaining reading support for children with the assistance of other reading professionals, educators, and children's families.

**ELE ED 6495 Supervision Of Practicum In Clinical Reading: 3 semester hours**

Prerequisites: ELE ED 6486, ELE ED 6494, ED REM 6716 or consent of instructor. Supervising graduate students in diagnosis and remedial process within the reading clinic.

**ELE ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**ELE ED 6684 Instructional Strategies For Teaching Reading: 3 semester hours**

Prerequisites: Graduate standing. Designed to extend teacher knowledge of effective instructional strategies for teaching reading. Emphasis on development of a teaching philosophy which acknowledges children gain considerable knowledge about reading from their families and communities, long before they encounter formal reading instruction. Focus on fostering culturally responsive classrooms using children's prior experiences, their language systems, cross-cultural literature, authentic texts, and other print materials familiar to children's home environments, as well as on teaching effective strategies to promote children's reading success.

**ELE ED 6686 Analysis And Correction Of Reading Disabilities: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and at least one graduate level literacy course. Designed to develop teacher understanding of the roles and responsibilities of the teacher of reading, Reading Specialist, and Literary Coach. Emphasis on the nature of specific reading difficulties, distinguishing reading difficulty/ disability from language difference, becoming familiar with a range of tools for assessing reading skills and strategies, and developing a critical orientation for evaluating the purpose and utility of various literacy assessment tools. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

**ELE ED 6688 Literacy Assessment To Guide Instruction: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and ELE ED 6686. Designed to apply teacher knowledge of the roles and responsibilities of the teacher of reading, Reading Specialist and Literary Coach. Emphasis on using literacy assessment tools and techniques to guide instruction for a range of children, especially in the areas of writing, comprehension, and vocabulary. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

## Health and Physical Education Courses

**HLTH PE 3275 Psychological Aspects Of Physical Education: 3 semester hours**

Prerequisite: PSYCH 1003. A study of the psychological processes underlying the learning and performance of motor skills and participation in physical activity. Covers how humans learn skilled actions, how principles of motor performance and learning can be applied to teaching, and how teachers can create positive motivational climates.

**HLTH PE 3277 Foundations of Health & Physical Education Programs: 2 semester hours**

Prerequisites: Junior standing. A study of the historical, philosophical, and cultural influences and issues related to health education and physical education programs.

**HLTH PE 3285 Safety and Emergency Care for Health & Physical Education: 3 semester hours**

Prerequisites: HLTH PE 3280 or equivalent. A study of safety issues relating to health and physical education, including prevention and treatment of physical activity-related injuries. Emphasis will be given to emergency responses, including CPR certification.

**HLTH PE 3380 Introduction to Nutrition for Health and Performance: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Study of human nutrition and its relationship to healthy lifestyles and exercise performance. Includes study of nutrients, food sources, healthy weight and body composition, energy intake and expenditure, fluid and electrolyte balance, and ergogenic aids.

**HLTH PE 3432 Teaching Health and Physical Education in the Elementary School: 4 semester hours**

Prerequisites: Admission to the Teacher Education Program. A study of health and physical education programs in the elementary school. Emphasis is given to the teacher's roles and responsibilities as they relate to the content and services found in the coordinated school health program.

**HLTH PE 3433 Health Education Concepts and Skills: 3 semester hours**

Prerequisites: Junior Standing. A study of health concepts and lifestyle skills found in K-12 health education strands, including mental health, sexuality education, drug education, nutrition, personal health and disease prevention.

**HLTH PE 3434 Teaching of Health and Wellness: 4 semester hours**

Prerequisites: HLTH PE 3280 or the equivalent, or consent of the instructor. Study of concepts and issues related to health and active lifestyle behavior development, with emphasis given to the design and preparation of appropriate instructional experiences and techniques.

**HLTH PE 4989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. This course is an intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Not available for graduate credit.

**HLTH PE 4990 Practicum II: Health and Physical Education, Grades PK-5: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Not available for graduate credit.

**HLTH PE 4991 Practicum II: Health and Physical Education Grades 5-9: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Not available for graduate credit.

**HLTH PE 4992 Practicum II: Health and Physical Education Grades 9-12: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Not available for graduate credit.

**HLTH PE 5989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. An intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Activities to acquire research skills will be included.

**HLTH PE 5990 Practicum II: Health and Physical Education, Grades PK-6: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Teacher candidates collect data for a research project.

**HLTH PE 5991 Practicum II: Health and Physical Education Grades 5-9: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Teacher candidates collect data for a research project.

**HLTH PE 5992 Practicum II: Health and Physical Education Grades 9-12: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Teacher candidates collect data for a research project.

## Middle Education Courses

**MID ED 4246 Teaching Mathematics In The Middle School: 3 semester hours**

Prerequisites: Level 1 and Level 2 and completion of mathematics area of concentration A study of the middle school math curriculum with state standards and appropriate instructional strategies, materials, and assessments.

**MID ED 4253 Teaching Social Studies In The Middle School: 3 semester hours**

Prerequisites: Completion of level 1 and level 2 courses. Study of middle school social studies emphasizing current social studies curricular content, methods of teaching, and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, middle school based field experiences are required in addition to scheduled course time.

**MID ED 4315 The Middle Level School: 3 semester hours**

Prerequisites: level 1 and admission to teacher education program. An in-depth study of the philosophical and historical basis of the goals and organization of middle level schools, including a review of research as the basis for current trends and practices.

**MID ED 4316 Middle Level Curriculum And Instruction: 3 semester hours**

Prerequisites: Completion of Level 1 and MID ED 4315. Preparation for teaching and learning in a middle school, grades 5-9. Content focuses on curriculum development, methods, techniques, materials, planning, organization, and assessment in middle level education for early adolescents.

**MID ED 4317 The Middle-Level Child: 3 semester hours**

Prerequisites: Completion of level 2. Developmental characteristics and needs of early adolescents are studied through field experience in middle school classrooms. The relationship between needs and behavior is explored and skills for effective student teacher relationships are highlighted. This course to be taken concurrently with MID ED 4989.

**MID ED 4350 Teaching Science In The Middle School: 3 semester hours**

Prerequisites: Level I and Level 2 or equivalent preparation. Students will analyze both methodology and content, apply appropriate teaching and learning strategies, and become acquainted with technological advances in teaching science. Students will use informal and formal assessment as well as design and implement original science activities and instruction for all areas of science. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then middle school based field experiences are required in addition to scheduled course time.

**MID ED 4989 Practicum I: Middle Level Education Site Based Experience: 3 semester hours**

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in grades 6-8 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceeding Practicum II. Not available for graduate credit.

**MID ED 4990 Practicum II: Middle Level Education Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in MID ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in grades 6-8 school settings in the subject area of certification. Not available for graduate credit.

## Physical Education Courses

**PHY ED 1124 Principles & Practice In 1St Aid & Cardiopulmonary Resuscitation: 1 semester hour**

The course provides theory and supervised practice in first aid and cardiopulmonary resuscitation leading to American Red Cross certification in those areas.

**PHY ED 2134 Personal Physical Fitness: 3 semester hours**

Prerequisite: Consent of instructor. A study of the relationship between vigorous physical activity and individual well-being. Emphasis will be placed on an individualized analysis of health fitness, resulting in a prescribed program to develop optimal levels of physical fitness, including aerobic fitness, strength, muscular endurance, flexibility, body composition, and lifetime sports considerations.

**PHY ED 3204 Special Topics In Physical Education: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, field study or research.

**PHY ED 3261 Physical Activity For The Exceptional Learner: 2 semester hours**

Prerequisite: SPEC ED 3311 and TCH ED 3313. A study of the special physical activity and exercise needs, interests, and problems of the exceptional learner, with considerable emphasis on the development of methods and competencies, in modifying physical activities.

**PHY ED 3282 Physical Growth And Motor Development: 3 semester hours**

Prerequisite: PSYCH 2270 and PHY ED 3465. An examination of the physical growth and aging, and motor development of the human being over the life span. Emphasis on evaluative tools, techniques and studies of research findings. Laboratory field experience for observing individuals. Attention is directed toward acquisition of basic skills, perceptual-motor development, fitness development, and age-related changes in information processing. A Required course for Physical Education majors; an elective course for early childhood, special, and Elementary Education majors.

**PHY ED 3283 Kinesiology: 3 semester hours**

Prerequisite: HLTH PE 3280 and math proficiency. Study of the biomechanics of human motion with particular application to performance in sport activities.

**PHY ED 3287 Seminar In Exercise Science: 1-3 semester hours**

Prerequisites: HLTH PE 3284 or consent of instructor. Study of current topics in the research and practice of exercise science, especially those required for certifications in the field. An emphasis will be placed on application of research to professional situations. Some field experience may be required. May be repeated as long as the topic is different for a maximum of 6 credit hours.

**PHY ED 3422 Teaching Of Skills: Grades Pk-4: 4 semester hours**

Prerequisites: Completion of 15 hours of level II courses. Study of developmental movement activities and appropriate learning experiences found in PK-4 grade level programs, with emphasis on developmental sequencing and the design of appropriate learning activities, materials, and effective pedagogical skills.

**PHY ED 3423 Teaching Of Skills: Grades 5-9: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sports and physical activities commonly found in the curriculum for grades 5-9, with emphasis on critical cues analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3424 Teaching Of Skills: Grades 9-12: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sport and physical activities predominately found in physical education programs at these grade levels, with emphasis given to critical cue analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3425 Teaching Skills: Movement, Dance, And Rhythms: 3 semester hours**

Prerequisites: Completion of 15 credit hrs of Level II courses. Study of movement analysis and techniques of teaching fundamental movement skills, rhythmic activities, creative movement, and dance forms commonly taught in school settings. Emphasis will be given to developmental sequencing and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3465 Physical Education Activities In The Elementary School: 3 semester hours**

Objectives of physical education for the elementary school child with applications of choice of activities, organization of program, theory, practices.

**PHY ED 3468 Curriculum And Methods Of Teaching Physical Education: 3 semester hours**

Prerequisite: PHY ED 101 or TCH ED 3213. Study of the scope and sequence of the school program in physical education with emphasis on planning processes, content selection, management procedures, instructional strategies, and program assessment.

**PHY ED 5380 Nutrition For Human Performance: 3 semester hours**

A study of human nutrition and its relationship to human performance. Consideration is given to nutrients - function, food source, health concerns and implications energy intake and expenditure; special considerations - body composition including weight gain and loss ergogenic aides competitive athletes, older adults, children and teens, pregnant women, disease risk, fluid and electrolyte balance, and specific sport activities.

**PHY ED 6462 The Physical Education Curriculum: 3 semester hours**

Prerequisite: Consent of instructor. A study of current practices, problems, trends and research involved in the analysis and development of the physical education curriculum.

**PHY ED 6464 Analysis Of Teaching In Physical Education: 3 semester hours**

Prerequisite: Consent of instructor. A study of trends and research relating to teaching methodology, teacher effectiveness, and supervision of instruction in physical education. Emphasis will be given to the application of research on teacher effectiveness in the instructional process in physical education.

**PHY ED 6478 Problems And Research In Physical Education: 3 semester hours**

A study of potential research problems and research processes in specific physical education subdisciplines. A research project will be completed in the student's physical education subdiscipline interest area.

**PHY ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**PHY ED 7492 Directed Readings In Curriculum And Instruction: 1-6 semester hours**

Prerequisites: Graduate Standing, one graduate course in Curriculum and Instruction, and permission of the instructor. Independent study into the current research, literature, and issues in the areas of physical education curriculum and instruction.

**PHY ED 7494 Directed Readings In Motor Behavior: 1-6 semester hours**

Prerequisites: Graduate standing, one graduate course in motor behavior, and permission of the instructor. Independent study into the current research, literature, and issues in the area of motor behavior.

## Secondary Education Courses

**SEC ED 3240 Curriculum And Methods Of Teaching Physical Sciences: 3 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in the subject area. A study of the scope and sequence of the physical science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of science. To be taken concurrently with Practicum I. This course must be completed in residence.

**SEC ED 4011 The Curriculum And Methods Of Teaching History And Social Studies: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of history and social studies courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. May not count toward history hours required for history major. Must be completed prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4012 Social Studies Teaching Seminar: 1 semester hour**

Prerequisites: SEC ED 4989. Must be taken concurrently with student teaching. Addresses the application of teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 4013 United States History For The Secondary Classroom: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of American history to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of American history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies certification. Not available for graduate credit.

**SEC ED 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as POL SCI 4090. Prerequisites: POL SCI 4090/ SEC ED 4090 must be taken concurrently with SEC ED 4011 except with special consent of the School Studies Coordinator. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

**SEC ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**SEC ED 4589 Curriculum And Methods Of Teaching Foreign Languages: 3 semester hours**

Same as FGN LANG 4589. Prerequisites: TCH ED 3310 or TCH ED 5310 and passing the departmental language skill test. A study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of foreign language. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4590 Foreign Language Teaching Seminar: 2 semester hours**

Same as FGN LANG 4589. Prerequisite: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of SEC ED 4589, Curriculum & Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

**SEC ED 4646 The Curriculum And Methods Of Teaching Math: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of the mathematics courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of mathematics. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4648 Mathematics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4989. Must be taken concurrently with SEC ED 4990. A seminar in the integration of mathematics curricula, Educational philosophy, teaching strategies, and instructional technology in the classroom setting. Not available for graduate credit.

**SEC ED 4837 Chemistry/Physics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 3240 and SEC ED 4989. A seminar to accompany practice teaching covering integration of physical science curricula and methods into the classroom setting. To be taken concurrently with SEC ED 4990. Two-hour discussion per week.

**SEC ED 4880 Writing For Teachers: 3 semester hours**

Prerequisite: ENGL 3090 or junior level English. Same as ENGL 4880. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**SEC ED 4885 The Curriculum And Methods Of Teaching English: 3 semester hours**

Prerequisites: Completion of Level II education courses and a near major in English. A study of the scope and sequence of the English courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experiences and theory to practice. To be taken prior to student teaching and concurrently with Practicum I, SEC ED 4989.

**SEC ED 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as TH DAN 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communications or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989; Secondary Education Professional Internship. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4888 English Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4885 and a near major in the subject area. A seminar in the integration of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with Practicum II, SEC ED 4990. Not available for graduate credit.

**SEC ED 4985 Curriculum And Methods Of Teaching Life Sciences: 4 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in biology. A study of the scope and sequence of the life science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. The analysis of teaching/learning and field experience observations in secondary school classrooms will be integrated into classroom activities and discussions. Take concurrently with SEC ED 4989. This course must be completed in residence.

**SEC ED 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences.

**SEC ED 4989 Practicum I: Site Based Experience: 3 semester hours**

Prerequisites: Level I & II requirements. This course is an intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teaching in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course(s) in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Not available for graduate credit.

**SEC ED 4990 Practicum II: Site Based Experience: 12 semester hours**

Prerequisites: SEC ED 4989 and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Not available for graduate credit.

**SEC ED 4993 Practicum II: Site Based Experience in Elementary (K-6) Music: 6 semester hours**

Prerequisites: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4994. Not available for graduate credit.

**SEC ED 4994 Practicum II: Site Based Experience in Secondary (7-12) Music: 6 semester hours**

Prerequisite: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4993. Not available for graduate credit.

**SEC ED 4996 Practicum II: Site Based Experience in Elementary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Intensive clinical teaching experience under university and school supervision, with seminar included. Must be taken "in block" with SEC ED 4997. Not available for graduate credit.

**SEC ED 4997 Practicum II: Site Based Experience in Secondary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Clinical teaching experience under university and school supervision in middle/junior high and/or high school, with seminar included. Must be taken in block with SEC ED 4996. Not available for graduate credit.

**SEC ED 4999 Biology Science Teaching Seminar: 3 semester hours**

Prerequisites: SEC ED 4985 and SEC ED 4986. The application of Educational philosophy, science curriculum, teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 5000 Teacher Practicum Research: 1 semester hour**

Prerequisites: Admission into Student Teaching. Students conduct research on their own teaching in order to modify their instruction, curriculum and assessment practices. Concurrent enrollment in SEC ED 4990, Secondary Student Teaching.

**SEC ED 5012 Social Studies Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of social studies curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5374 Foreign Language Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of foreign language curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5648 Mathematics Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of mathematics curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5888 English Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5989 Practicum I: Site Based Experience: 2 semester hours**

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Activities to acquire research skills will be included.

**SEC ED 5990 Practicum II: Site Based Experience: 8 semester hours**

Prerequisites: SEC ED 5989 with a B- or better and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Teacher candidates collect data for a research project.

**SEC ED 5999 Biology Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of science curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 6404 Seminar: 1-10 semester hours**

.

**SEC ED 6415 Curriculum Leadership in Education: 3 semester hours**

Prerequisites: ED PSY 6030 or consent of instructor. Strategies for developing and implementing up-to-date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

**SEC ED 6416 Curriculum Design for Educational Programs: 3 semester hours**

Prerequisites: ED PSY 6030, SEC ED 6415 or consent of instructor. Principles of curriculum design and development for a formal or informal educational setting. Students may choose to develop an integrated or differentiated curriculum using the Common Core or national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instruction practices to learner performance.

**SEC ED 6420 Improving Teaching and Learning: 3 semester hours**

Prerequisites: ED PSY 6030, or consent of instructor. Students will learn to improve their teaching effectiveness through the use of various models of instruction that are based on current learning theories and research in teaching methodology to improve the achievement of diverse learners. Focus on inquiry models that prepare educators for effectively teaching the Common Core standards. Prior instructional experience is recommended.

**SEC ED 6428 Secondary School Curriculum Reform In The Life Sciences: 1-4 semester hours**

Prerequisites: Graduate Standing. Field-based experiences in improving the district level secondary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6441 Problems and Research in Teaching Secondary School Science: 3 semester hours**

Prerequisites: Graduate Standing & science education experience. A thorough examination of research related to middle and secondary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional research literature.

**SEC ED 6485 Secondary School Curriculum Reform In The Physical Sciences: 1-4 semester hours**

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level secondary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**SEC ED 6497 Problems: 1-10 semester hours**

## Special Education Courses

**SPEC ED 3318 Inclusive Classrooms: 3 semester hours**

Prerequisites: Completion of Level I courses. This class is an introductory overview of inclusive education, the characteristics of special populations in diverse classrooms, and issues related to compliance with state and federal law in serving students with varying needs. In addition, Individualized Education Plans (IEPs) and the eligibility process will be emphasized. Applicable strategies for the successful inclusion of all students that enhance collaboration among relevant stakeholders will be provided.

**SPEC ED 3345 Cross Categorical Special Education I: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Ed Program. Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 3346 Literacy Assessment and Reading for Students with Special Needs: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Must be taken during the same semester as SPEC ED 4989. Examination of current research and issues specific to educating students with disabilities in the area of reading. Topics include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction.

**SPEC ED 3349 Cross-Categorical Special Education: 3-6 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Study of research-based instructional, behavior, and IEP writing strategies used to assist students with cross-categorical disabilities. Students take this during the same semester as their Practicum I course.

**SPEC ED 4315 Speech And Language Of Exceptional Children: 3 semester hours**

Prerequisites: SPEC ED 3318 and Admission to the Teacher Education Program. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning. Not available for graduate credit.

**SPEC ED 4323 Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings: 3 semester hours**

Prerequisites: Completion of Level I and Level II courses. This course establishes healthy and culturally appropriate teacher-student relationships that build successful classroom community and enhance student learning. Teacher candidates develop a culturally appropriate classroom management plan that includes rules, procedures, and expected behaviors and uses problem-solving strategies to resolve behavior problems. In addition, teacher candidates will develop skills to assess, design and implement extensive, individualized, positive behavioral supports. Emphasis is on the candidates developing the social competence of PreK-12 students within diverse inclusive classrooms and engaging families in supportive interactions. Not available for Graduate Credit.

**SPEC ED 4325 Behavior Management: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II Education courses. Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 4342 Transition Issues And Planning: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Education Program. This course provides information to teachers and human service professionals who work closely with adolescents and young adults with disabilities. Emphasis is placed on understanding and planning for the transition from school to adult life for students with disabilities. Transition outcomes include employment, residential options, and other developmental concerns. Topics include self-determination, career education and planning, interagency collaboration, vocational and residential issues and resources, and family support and involvement.

**SPEC ED 4989 Special Education Professional Internship: 3 semester hours**

Prerequisites: Level I & Level II requirements and ELE ED 4989. This course is an intensive professional development experience (9 hours per week for 14 weeks) working in a school setting with students with disabilities. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding student teaching. This course is to be taken in conjunction with SPEC ED 3349. Assignments from this course are carried out in the Internship, and Internship experiences inform the activities and discussions in this course. Not available for graduate credit.

**SPEC ED 4990 Special Education Student Teaching I: 6 semester hours**

Prerequisites: Completion of Level I, II & III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experience in elementary level special education program under university and school supervision. Required of all special education majors; must be taken during the same semester as SPEC ED 4991. Not available for graduate credit.

**SPEC ED 4991 Special Education Student Teaching II: 12 semester hours**

Prerequisites: Completion of all Level I, II and III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experiences in secondary school classrooms under university and school supervision. Must be taken during the same semester as SPEC ED 4990. Required for all majors in special education. Not available for graduate credit.

**SPEC ED 5305 Planning And Managing The Teaching And Learning Environment: 3 semester hours**

Prerequisites: SPEC ED 4303 or consent of instructor This course provides an in-depth exploration of various behavior management techniques that are particularly applicable for students in cross-categorical placements. Projects on functional behavioral assessment and behavior support plans will be conducted.

**SPEC ED 6315 Understanding/Implementing Speech & Language Interventions that Assist Children w/ Sp Needs: 3 semester hours**

Prerequisites: Graduate Standing. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning.

**SPEC ED 6325 Advanced Studies in Classroom & Behavior Management: 3 semester hours**

Prerequisite: Graduate Standing. Advanced study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 6345 Characteristics and Education of Students with High-Incidence Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of the exceptional child. Advanced study of characteristics of students with high-incidence and cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 6346 Reading Instruction and Intervention in Special Education: 3 semester hours**

Prerequisites: Graduate Standing. This course examines current research and issues specific to educating students with disabilities in the area of reading. Topics will include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction. (No credit earned if credit previously earned from SPEC ED 3346).

**SPEC ED 6372 Screening And Diagnosis Of Developmental Delays: Birth To 5 Years: 3 semester hours**

Prerequisite: ED REM 3721. This course addresses the content, techniques, and special problems related to the assessment of children at risk for developmental delays in the birth to five year age range. Students gain experience in construction, administration and interpretation of assessment tools used with young children. Required for certification in severe handicaps and early childhood-special education.

**SPEC ED 6412 Psychology Of Exceptional Children: 3 semester hours**

An in-depth analysis of the unique psychological problems of exceptional children and youth. Current psychological theories and research emphasized.

**SPEC ED 6415 The Law And Special Education: 3 semester hours**

Prerequisite: Graduate Standing. Special education is governed by an elaborate and extensive body of statutes, regulations, and court decisions. This course will focus on the requirements, history, and evolution of laws impacting special education services; current legal requirements in providing a free appropriate public education (FAPE) to students with disabilities and the procedures to obtain legal information in law libraries and on the Internet; and how to conduct legal research using a variety of sources.

**SPEC ED 6430 Characteristics and Education of Individuals with Low-Incidence Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or equivalent course in psychology of the exceptional child; graduate standing. An advanced study of the theoretical and methodological problems related to autism and developmental (low-incidence) disabilities. Particular emphasis on the application of current research findings to issues confronting individuals with autism and developmental disabilities, and family-and community-systems dynamics. Required course for concentration area: Autism and Development Disabilities.

**SPEC ED 6437 Applied Behavior Analysis: Functional Assessment and Interventions: 3 semester hours**

Prerequisites: Graduate Standing. Study of the evidence-based, best practice principles and interventions of applied behavior analysis strategies. Exploration of approaches that prove effective when designing and implementing functional behavior assessments, positive behavior support techniques, and behavior intervention plans.

**SPEC ED 6440 Disability, Schooling And Culture: 3 semester hours**

Prerequisites: TCH ED 3313 or equivalent. An advanced course that will examine foundational issues in social and educational policy for students with disabilities. The course explores the historical, philosophical, sociological and economic dimensions of the recent emphasis on inclusive and community-based support systems for individuals with disabilities and their families. The course will review recent research and experience in the U.S. (primarily) concerning the evolving roles and relationships of families, teachers, administrators, and students with and without disabilities in disabilities in increasingly diverse schools and communities.

**SPEC ED 6443 Characteristics and Education of Students with Learning Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the theoretical and methodological problems related to learning disabilities. Particular emphasis on the application of current research findings to the problems confronting learners with learning disabilities.

**SPEC ED 6450 Characteristics and Education of Students with Emotional/Behavioral Disorders: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the problems and characteristics of learners with emotional/behavioral disorders. Particular emphasis on the application of current research findings to problems confronting learners with emotional/behavioral disorders.

**SPEC ED 6462 Introduction To Early Childhood Special Education: 3 semester hours**

Prerequisites: SPEC ED 3313 or equivalent. Study of issues and concepts central to special education of young children with disabilities, and at-risk for disabilities, and their families. Focus on program models, screening and assessment procedures, and curriculum concepts. An ecological perspective is emphasized.

**SPEC ED 6463 Curriculum, Methods, And Materials For Early Childhood Special Ed: 3 semester hours**

Prerequisites: SPEC ED 6462. In-depth study of integrated assessment-based curriculum development for learners in early childhood special education. Emphasis on individualized educational planning and implementation for learners and their families.

**SPEC ED 6492 Practicum In Special Education: 3-6 semester hours**

Prerequisites: Two courses in the area of concentration (developmental disabilities, early childhood special education, emotional/behavioral disorders, or learning disabilities). Supervised experience in the education of learners with disabilities in a school or other appropriate setting.

**SPEC ED 6497 Problems: 1-10 semester hours**

Prerequisites: TCH ED 3313 or equivalent and consent of instructor. Investigation of a selected problem related to the education of learners with disabilities. To be conducted under the direction of a graduate faculty member.

**SPEC ED 6510 History Of Disability And Special Education: 3 semester hours**

Prerequisite: Consent of Instructor. Provides a historical context for approaching contemporary issues in the education and support of people with disabilities and their families. Requires students to become familiar with methods of retrieval and analysis of historical material.

**SPEC ED 6610 Foundations of Autism Spectrum Disorder: Research to Practice: 3 semester hours**

Prerequisites: Teaching Certificate and SPEC ED 6437 with a grade of B or higher, or Consent of Instructor. The course focuses on characteristics of children and youth with autism spectrum disorders (ASD); trends and issues connected with ASD; and effective practices and strategies for structuring, managing, and promoting functional/behavioral skills development and interaction among children and youth with ASD.

**SPEC ED 6620 Assessment and Interventions for Children and Youth with Autism Spectrum Disorder: 3 semester hours**

Prerequisites: SPEC ED 6610 with a grade of B or higher and Teaching Certificate, or Consent of Instructor. The course reviews functions of behavior as a foundation for understanding and completing functional behavior assessments; entails interpreting and graphing collected data; and incorporates intervention practice and applied curriculum modifications.

**SPEC ED 6630 Principles of Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6620 with a grade of B or higher or Consent of Instructor. Provides a detailed look at the theories, philosophy, and principles of applied behavior analysis. Focus is on applying these principles to assess behavior and develop and implement best practice interventions for reducing problem behaviors and teaching new behaviors to individuals with autism and other developmental disabilities in a variety of settings. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6650 Practicum I in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 with a grade of B or higher or Consent of Instructor. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, on-going evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of National Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6660 Advanced Applications of Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 and SPEC ED 6650, each with a grade of B or higher or Consent of Instructor. Provides a detailed look at methods of data collection, teaching new skills, and evaluating teaching strategies. Focus is on applying these methods to develop and implement best practice strategies that teach new behaviors to individuals with autism and other developmental disabilities, and evaluating the efficacy of these methods. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6670 Practicum II in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630, SPEC ED 6650, and SPEC ED 6660. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6675 Ethics and Professionalism in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. The course prepares students in the BCBA Program for the ethical and professional practice of Applied Behavior Analysis. Students will learn about the foundations of professional and ethical behavior that ensures high quality of practice in behavior analysis. The course will prepare students for the national Behavior Analyst Certification Board Exam. Students will primarily receive instruction in Ethical Considerations (Content Area #1), but also Behavioral Assessment, Experimental Evaluation of Interventions, and Selecting Intervention Outcomes and Strategies (Content Areas #4, 5, and 8) of the Behavior Analysis Task List – Third Edition.

**SPEC ED 6685 Analysis of Verbal Behavior: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. Provides a detailed look at B.F. Skinner's analysis of verbal behavior and the behavior analytic and functional approach to teaching language. Focuses on the behavior analytic view of speaking, thinking, writing, feeling, reading, and other verbal behavior. In addition, provides information on how to assess and teach verbal behavior to individuals with developmental disabilities.

## Teacher Education Courses

**TCH ED 2209 Foundations of Teaching in American Schools: 3 semester hours**

Explores the multiple roles and functions of professional teaching including: communication, leadership, management skills, use of technology, identification of needs of diverse populations and an examination of other selected concepts and philosophies underlying American public education. Portfolio preparation will be introduced. A minimum of 15 field experience hours required.

**TCH ED 3100 Education for Social & Civic Responsibility: 3 semester hours**

Equips students with the knowledge and skills needed to integrate an emphasis on civic and social responsibility, including social justice, into their own teaching. Includes a service learning project and requires reflection on project and in-class experiences, course readings, and personal and professional goals and development.

**TCH ED 3210 General Linguistics in Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: Completion of Level I. An introduction to the historical, legal and pedagogical frameworks relating to Teaching English to Speakers of Other Languages (TESOL), and bilingualism. Students explore principles of language systems including English and the function of language in social and academic settings.

**TCH ED 3211 Basic Principles of Second and Foreign Language Acquisition: 3 semester hours**

Prerequisites: TCH ED 3210. Covers the principles of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors in relation to second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics, and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 3212 Sociolinguistics and communication in the Classroom: 3 semester hours**

Prerequisites: TCH ED 3210 and admission to Teacher Education Program. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intracultural communication. Students develop strategies to enhance home, school and community relations and impact of culture on perceptions, communication, behaviors, and learning.

**TCH ED 3213 Performance-based Assessment for TOSOL: 3 semester hours**

Prerequisite: TCH ED 3210. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can reinforce instruction.

**TCH ED 3214 Material Development and Methods for TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3211, TCH ED 3212, TCH ED 3213, and TCH ED 4391. Students integrate knowledge of second language acquisition research in instructional methodologies in this course. Students will also incorporate theories of linguistics, assessment models, and instructional technology into their material development to meet the needs of diverse English language learners.

**TCH ED 3215 Field Experiences in TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3212, and TCH ED 3214 or concurrently taking TCH ED 3214. Students observe and reflect on actual classroom practices as well as complete a student's needs analysis and placement tests. The students implement the strategies for advocating an collaborating on behalf of students from diverse language backgrounds. This is a supervised field experience.

**TCH ED 3310 Methods of Teaching With Technology: 2 semester hours**

Prerequisite: TCH ED 2209, ED PSY 2212, or equivalent and admission to Teacher Education Program. Skill development in transforming content into instruction through various teaching methods and educational technologies. Emphasis on differentiating instruction, inquiry learning, and reflecting on practice. Recommended that this course be taken concurrently with ED TECH 3135.

**TCH ED 3313 Psychology of the Exceptional Child: 3 semester hours**

Prerequisites: level I or equivalent. Introductory overview of the field of special education including historical developments, characteristics of special populations, and compliance with state and federal regulations.

**TCH ED 3315 Literacy Learning And Instruction: 3 semester hours**

Prerequisites: Admission to Teacher Education program. May take concurrently with ED PSY 3312 and TCH ED 3313 or equivalents; may not be taken before ED PSY 3312 and TCH ED 3313 or equivalents. Analysis of methods, materials, frameworks, and technology for the effective teaching of literacy to young children, children with special needs, and children in PreK-6 education settings. Emphasis on the role of language experience, phonics, semantics, syntactics, pragmatics, schema theory, and metacognition in literacy development. A total of 20 field experience hours including observation, assessing children's literacy interests and development, and teaching lessons in a school classroom setting are required in addition to scheduled course time. This course may be applied toward a Literacy Minor.

**TCH ED 3316 The Professional Portfolio: 1 semester hour**

Prerequisites: Junior standing or consent of instructor. Students learn the knowledge and skills to develop an electronic teaching portfolio, writing reflective rationales for standards and choosing appropriate artifacts and using technology tools for successful presentation.

**TCH ED 4391 Literacy for Adolescent Learners in Content Areas: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. Examines the teaching of multiple literacies including reading, writing, speaking and critical thinking in the content areas. Implications of diverse cultures and languages and their relationship to reading will be explored. Field experience hours are required in addition to scheduled course time.

**TCH ED 4988 Teaching and Learning in Urban Schools: 3 semester hours**

Prerequisites: Enrollment in the Minor in Urban Education or permission of the instructor. The capstone course for the Minor in Urban Education. Students design and implement a classroom-based, action research project in an urban school that integrates differentiated instruction, culturally relevant and sensitive teaching strategies, assessing children's learning to meet individual needs, and implementing inquiry-based projects.

**TCH ED 5310 Instructional Design: 3 semester hours**

Prerequisites: Graduate standing, TCH ED 5311, participation in an initial teacher preparation program, and consent of instructor. Students learn to design instruction using different teaching models, plan a teaching unit, select content, design assessment, and develop classroom climate and management strategies. Professional skills are developed through reflecting on one's own practice, using educational technology, and developing a professional portfolio. Ten hours of field experience are required outside of class time.

**TCH ED 5311 Foundations Of Education: 3 semester hours**

Prerequisite: Graduate standing. Students will learn the history of public education, the role of the teacher as a change agent, the influence of technology, and the impact of diversity of American classrooms. Ten clock hours of field work required.

**TCH ED 5312 Differentiated Instruction: 3 semester hours**

Prerequisites: Graduate Standing. Explores differentiated instruction as an approach to meeting the diverse instructional needs of all students in the classroom. Differentiated instruction can be used to enhance literacy developments of adolescent learners in functional literacy, content literacy, technological literacy and creative/innovative literacy. Twenty hours of field experience are required in addition to scheduled course time.

**TCH ED 5850 Topics In The Teaching Of Writing: 1-3 semester hours**

Same as ENGL 4850. Prerequisite: ENGL 3100 or equivalent.

**TCH ED 6010 Examining History, Community And Social Justice In Education: 3 semester hours**

Addresses the issues of equity and social justice from the context of personal and educational history. Students will develop a cultural understanding of their own previous school, community and family experiences and generalize those findings to their current work as educators. They will develop an understanding of the historical foundations of American education and the role of the teacher to be a catalyst for change. Curriculum, instruction and learning will be examined through a variety of lenses including race, class, gender, ability, sexual orientation and religion to become culturally responsive teachers.

**TCH ED 6020 Teacher Action, Advocacy And Leadership: 3 semester hours**

Investigates the relationships among students, general and special education teachers, counselors, principals, parents, and other support and specialist personnel typically present in schools in Missouri and the changing roles of all these individuals as a consequence of general and special education reform initiatives. Develop systemic action plans and become advocates and leaders within the school and larger community for children, families, and the profession. Assists teachers to analyze and improve their management, planning and record keeping systems and professional development planning.

**TCH ED 6115 Historical Thinking in Theory and Practice I: 3 semester hours**

Same as HIST 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

**TCH ED 6116 Historical Thinking in Theory and Practice II: 3 semester hours**

Same as HIST 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115/ TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

**TCH ED 6200 Building Character and Competence with Diverse Learners: 3 semester hours**

Prerequisites: Graduate Standing. This course introduces theories and offers research-based strategies, materials, and resources designed to meet the needs of diverse learners in elementary school settings, including those with special needs and English language learners. Students will also learn ways to promote character and citizenship development, cross-cultural communication, and positive behavior supports.

**TCH ED 6210 Foundations Of Teaching English To Speakers Of Other Languages: 3 semester hours**

Prerequisites: Graduate Standing. This course is an introduction to the historical, legal and pedagogical frameworks relating to Teaching English to speakers of Other Languages (TESOL) and bilingualism. Students explore current issues, trends and influential factors in second language acquisition (SLA) instructional and assessment models.

**TCH ED 6220 Principles Of Second/Foreign Language Acquisition: 3 semester hours**

Prerequisite: TCH ED 6210. This course is a research-based study of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors, as well as linguistic research about second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 6230 Cross-Cultural Communication In The Classroom: 3 semester hours**

Prerequisite: TCH ED 6210. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intra-cultural communication. Within this theoretical context, students recognize their own socio-cultural identity and its impact on teaching models. Students develop strategies to enhance home, school and community relations.

**TCH ED 6240 Assessment for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6210 and TCH ED 6220 are recommended. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can inform instruction.

**TCH ED 6250 Methods and Materials for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, and TCH ED 6240, or consent from instructor. Students integrate knowledge of second language acquisition research in instructional methodologies, linguistics, assessment models, and awareness of socio-cultural dynamics, in order to design and critique a unit plan including materials and needed technology support.

**TCH ED 6260 Practicum in Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, TCH ED 6240, and TCH ED 6250 or concurrently taking TCH ED 6250. Students observe and reflect on actual classroom practices, complete a student's needs analysis and placement test, and implement a unit plan in the classroom with reflection. This is a supervised field experience.

**TCH ED 6350 Gender, Language & Identity: 3 semester hours**

Same as GS 6350. Prerequisites: Graduate level standing. An interdisciplinary look at the ways gendered and racial identities are developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**TCH ED 6440 Experiential Education: 3 semester hours**

Prerequisites: TCH ED 6010. This course addresses facets of experiential learning beginning with the theoretical background. Reflection will be examined as a key component of the experiential learning cycle and reflective questioning techniques developed and practiced. Adventure education, cultural journalism, apprenticeship education and related areas will be investigated as approaches to experiential learning. Students will develop an understanding of the relationship between experience and learning and develop techniques for using that relationship to enhance learning in their own teaching situation.

**TCH ED 6442 Outdoor Education Leadership: 3 semester hours**

Prerequisite: TCH ED 6010 or permission of instructor. Explore concept of a bioregion and development of a sense of place using historic journals, land based essays, outdoor activities, research, discussion and personal reflection. Planning, teambuilding, outdoor leadership skills, regional ecology and culture will be addressed. A 3 day field experience will explore stream, canyon, forest, and cave ecosystems in cooperation with resource professionals. Cultural and economic folkways of the region will be considered.

**TCH ED 6444 Environmental Education: 3 semester hours**

Activity-oriented coursework in developing environmental awareness, field and/or laboratory skills and techniques, and the use of environmental curricula. Materials and activities appropriate for a variety of educational settings, including outdoor locales, will be developed. This course is designed to give educators experience in developing and implementing environmental education curricula, especially in an outdoor setting.

**TCH ED 6565 Enriching Learning through Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisite: Graduate standing. Surveys the association between academic achievement and student participation in art, music, health, and physical education. Review research pertaining to the relationship between participation in the arts and physical education and language development, memory, creativity and learning in other subject areas.

**TCH ED 6566 Cross-Curricular Connections with Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisites: Graduate standing. Surveys research-based methods and strategies for implementing cross-curricular learning activities between the core subject areas and the arts, health, and physical education.

**TCH ED 6880 Gateway Writing Project: 3-6 semester hours**

Same as ENGL 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. may be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

**TCH ED 6890 Seminar In Professional Writing For Teachers: 3 semester hours**

Prerequisites: TCH ED 6880 and near completion of Graduate Certificate in the Teaching of Writing. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/ writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher's own evolution as a writer. Seminar meetings will include both face-to-face and on-line communication.

**TCH ED 6909 Teacher Action Research I: 3 semester hours**

Prerequisites: Graduate Standing Minimal of 21 hours of M.Ed coursework completed. Students learn the knowledge, skills and tools for systematic reflective practice in preparation for completing the Masters Capstone Action Research project in TCH ED 6910.

**TCH ED 6910 Teacher Action Research Capstone: 3 semester hours**

Prerequisites: TCH ED 6909 for teachers and all but the last 6 hours of the M.Ed. program or TCH ED 6909 or ED REM 6040 for non teachers. Students apply research knowledge, skills, and dispositions developed in TCH ED 6909 to an Action Research project, reflecting on and evaluating an aspect of one's own practice within a situated context. Students identify focused questions, collect and analyze data, using both analytic and practice tools, and review literature to research multiple factors in order to improve student learning. The research findings and insights will be shared in a public forum as a capstone for the M.Ed.

**TCH ED 7100 Research in Literacy Studies: 3 semester hours**

Prerequisites: Admission to the doctoral program. Participants will critically examine foundational, theoretical and historical work in the intersection of language, literacy and culture. An analysis of seminal research will explore related traditions and contemporary theories in literacy (K-12).

***TCH ED 7200 Historical and Theoretical Foundations of Curriculum and Instruction: 3 semester hours***

Prerequisites: Admission to the doctoral program. Examines foundational, theoretical and historical work in the field of Curriculum and Instruction. Students will read and analyze key texts, engage in discussions with peers and divisional faculty, build coherent and well-informed arguments, and apply new understandings to problems of practice.

***TCH ED 7210 Issues And Trends in Content and Language Acquisition for English Language Learners: 3 semester hours***

Prerequisites: Doctoral Standing. Analysis of current issues on simultaneous development of academic content and English language learning. Current trends in teaching English to Speakers of Other Languages (TESOL) include Sheltered Instruction Observation Protocol (SIOP), Teaching and Learning Cycle, Teaching Proficiency through Reading and Story Telling (TPRS), and English as an international language. Students will identify an area of inquiry, and design and complete a research project.

# College of Fine Arts and Communication

## General Information

The College of Fine Arts and Communication at the University of Missouri-St. Louis offers undergraduate degree programs in Art, Art History, Communication, Media Studies, Music, and Theatre & Dance. Graduate study degree programs, administered through the Graduate School, are also offered in the Departments of Communication and Music.

The faculty and alumni of this college have distinguished themselves as scholars, visual artists, teachers, and performers. Students of the college pursue their activities in a variety of campus locations including the Arts Administration Building, the Fine Arts Building, Lucas Hall, the Music Building, UMSL at Grand Center, and the Touhill Performing Arts Center, which affords two world-class venues for performances by university students and faculty, campus ensembles, and visiting artists. In addition, Gallery 210 and Gallery FAB offer visual arts programming of regional, national and international importance. Gallery VISIO in the Millennium Student Center showcases work by students and faculty.

The College of Fine Arts and Communication consists of some 50 full-time faculty members and is distinguished by its collaboration with the community. Six endowed professorships link the University to the Saint Louis Symphony, the Saint Louis Art Museum, Opera Theatre of Saint Louis, Laumeier Sculpture Park, and other local cultural institutions. The Des Lee Fine Arts Education Collaborative connects the University and a variety of partner cultural institutions to local school districts.

All the departments of the College of Fine Arts and Communication offer coursework in the evening or in other non-traditional modes (i.e. on-line and/or video). The Department of Communication offers sufficient coursework to complete its degree program in the evening. Consult the website of the department in which you are interested for details on degree requirements and a 3-year schedule of planned course offerings.

## Requirements for Undergraduate Study

All majors in the College of Fine Arts and Communication must meet the following requirements:

- Requirements of their chosen baccalaureate degree (i.e., B.A., B.F.A., B.M., etc.) in accordance with the policies of the College of Fine Arts and Communication, explained below.
- Requirements of the department for their selected major or interdisciplinary program.
- Requirements for the University's general education & university requirements.
- Completion of INTDSC 1003 (<https://nextbulletin.umsl.edu/collegeoffineartsandcommunication>) Code University Studies for all students admitted to UMSL with fewer than 24 academic credit hours.

## Cultural Diversity Requirement

To expand cultural awareness, students in some academic units may be required to complete a course that emphasizes Asian, African, Middle Eastern, Latin American, Pacific aboriginal, Native American, or a comparable culture. Courses that satisfy this requirement involve substantial material independent of the cultures' interactions with European cultures. If a course focuses on one facet of a culture, it must

treat the topic within the context of the culture as a whole. These courses are coded with the initials [CD] for Cultural Diversity. A list of courses which fulfill the Cultural Diversity requirement may be found in the introductory section of this Bulletin.

## Academic Policies

### Grade Requirements

To graduate, all majors in the college must satisfy one of the following grade point options:

Earn 120 hours with a C grade or better, which constitutes a complete degree program. Neither a grade of C- nor a satisfactory grade may be counted.

Have a minimum UMSL grade point average of 2.0 and have met all other Grade Point restrictions that are required for the degree program and the major.

### Residency Requirements

Transfer students must complete at least 30 of the last 36 hours of their degree program in residence at the University of Missouri-St. Louis.

Unless otherwise specified, a transfer student must complete 12 hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each major.

Unless otherwise specified, a transfer student must complete at least six hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each minor. Students should consult the minor department for specific residency and grade requirements.

## Specific Baccalaureate Degree Requirements

### Course Requirements

After fulfilling the general education and specific major degree requirements, students are to take the remaining hours required to complete the bachelor's degree from courses from one or more of the following areas at UMSL or university-quality equivalents at other institutions: anthropology/archaeology, art (appreciation, history, studio), astronomy, biology, chemistry, communication, criminology and criminal justice, economics, English, foreign languages/literatures, geology, history, mathematics/computer science, media studies, music (appreciation, history, performance), philosophy, physics, political science, psychology, social work, sociology, theatre and dance, business, education, engineering, or interdisciplinary. Other areas or courses not listed require approval by the chair of the student's department.

## Bachelor of Arts (B.A.)

The College offers the B.A. degree in art history, communication, music, and theatre and dance. All B.A. degree candidates must successfully complete a curriculum that includes a departmental major or an approved interdisciplinary field. A major must include at least 30 credit hours but no more than 45 hours.

## Foreign Language Requirement

Candidates for the B.A. degree are required to complete 13 credit hours or the equivalent in proficiency in one foreign language. Foreign language guidelines are as follows:

1. Students entering with no high school language units must enroll in Language 1001 or may enroll in the 2115 series (see no. 4).
2. Students with the degree of proficiency equivalent to 13 hours of college-level work in French, German or Spanish may obtain exemption by passing the department's placement exam. The specific dates for the exam are posted on-line (<http://www.umsl.edu/divisions/artscience/forlanglit/Academics/lang%20req%20and%20placement%20testing.html>) or may be obtained from Languages and Cultures in the Department of Anthropology, Sociology, and Languages (<http://www.umsl.edu/divisions/artscience/forlanglit>) at 314-516-6240.
3. Native speakers of language other than English may meet the foreign language requirement by presenting a transcript from a university or secondary school of their native country. The department will certify native speakers of those languages which are taught at the university. Those who are proficient in other languages must submit certification of competence to the college.
4. Language 2115 A, B, C (Intensive) will satisfy the foreign language requirement. Aptitude testing is required prior to enrollment. For more information, call Languages and Cultures at 314-516-6240
5. Students may not repeat, for either credit or quality points, an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

## Bachelor of Fine Arts (B.F.A.)

The College offers the B.F.A. degree in studio art. A foreign language is not required. Students choosing an emphasis in drawing, graphic design, painting, photography, printmaking or general fine arts must take at least 75 credit hours in studio art (including 30 hours in the foundation art program). Students seeking K-12 art teacher certification take a minimum of 50 credit hours in studio art (including 30 hours in the foundation art program) and must fulfill the General Education Requirements in both the College of Education and the College of Fine Arts and Communication.

## Bachelor of Music (B.M.)

The College offers the B.M. degree in music education, performance and with elective studies in business. The requirements are the same as for the B.A. degree with the addition of music education courses for music majors seeking state teacher certification. Although foreign language proficiency is not required, foreign language study is required for applied voice students.

## Applied Music and Studio Art

Students not majoring in music may count no more than eight hours in music-performing organizations (EN PER 1400 (p. 433), EN PER 1410 (p. 433), EN PER 1500 (p. 433), EN PER 1520 (p. 433), etc.)

Students in the college majoring in music may count any number of hours of applied music (private lessons). Students not majoring in studio art may count any studio art course toward any degree in the college. This also includes transferred credit.

## Bachelor of Science (B.S.)

The College offers the B.S. degree in media studies. All majors must complete a minimum of 51 hours in Media Studies courses and at least 24 of these hours must be taken at UMSL. A minimum of 39 credit hours in Media Studies and a minimum of 12 credit hours in Theatre and Dance, totaling 51 credit hours, are required. At least 18 hours of coursework must be taken at the 2000 level or above at UMSL. There is no foreign language requirement, but foreign language proficiency is recommended.

## Bachelor of Liberal Studies (B.L.S.)

(See Interdisciplinary Programs (p. 144) for complete description).

## Certificate Programs

Undergraduate certificate programs are offered in Advertising, Photographic Studies, and Public Relations.

## Minors

A number of minors are available at UMSL. Some are offered by individual departments, while others, such as Classical Studies and Africana Studies, are interdisciplinary in nature and involve a number of departments. The requirements for the various minors are listed in either the departmental or interdisciplinary sections of this Bulletin.

## Art and Art History

**Campus Address:** Fine Arts (Studio Art/Art Education) - 201 Fine Arts Bldg.

**Website:** <http://art.umsl.edu>

**Main Number:** 314-516-6967

**Fax Number:** 314-516-6103

## General Information

### Degrees and Areas of Concentration

The department offers course work leading toward the Bachelor of Arts in Art History and the Bachelor of Fine Arts in Studio Art.

Courses included in the B.A. in Art History cover the arts of Asia, Africa, Europe, and North America, including Native American arts, from ancient times to the present. Courses examine the entire range of human visual expression from painting, sculpture, architecture, and photography to performance and festival arts. In each case the arts are examined within their historical, aesthetic, and cultural contexts.

The B.A. in Art History has the following learning outcomes:

- to write clearly and coherently about works of art and art historical literature;
- to possess the ability to conduct independent research on works of art and visual culture;
- to recognize and be able to apply different methodologies, recognizing that each incorporates a specific valuing system;
- to demonstrate understanding of the ethical issues surrounding cultural property;
- to analyze critically and interpret works of visual art and art historical texts;

- to demonstrate familiarity with and basic knowledge of diverse historical artworks.

The B.F.A. in Studio Art consists of a foundation art program and an emphasis area in the following: art education, drawing, graphic design, painting, photography, printmaking, and general fine arts. UMSL has a transfer agreement with the St. Louis Community College District, which offers a direct credit transfer to upper division BFA courses for students who graduate with an AFA degree from the SLCC.

The Bachelor of Fine Arts Degree in Studio Art has the following learning outcomes:

- to develop visual and verbal responses to visual phenomena, and organize perceptions and conceptualizations both rationally and intuitively;
- to become familiar with the major achievements in the history of art and design, including the works and intentions of leading artists and designers in the past and present;
- to develop the capacity to identify and/or solve problems within a variety of physical, technological, social, and cultural contexts;
- to understand and evaluate contemporary thinking about art or design;
- to become familiar with and develop competence in a number of art or design techniques;
- to make valid assessments of quality and effectiveness in design projects and works of art, especially their own.

To support its teaching and research objectives, the department maintains an extensive and expanding collection of digital images. The collection includes examples of painting, sculpture, architecture, photography and decorative arts, and is under the supervision of a professional visual resource curator, who is available for special assistance to staff and students.

## Gallery 210

Gallery 210, located in Building 7, 44 East Drive, offers visual arts programming of regional, national, and international importance. The gallery's exhibitions and related arts programming have enjoyed a long and distinguished history of service to the university and to the St. Louis community. Gallery activities are supervised by a professional gallery director.

## Gallery FAB

Located in the Fine Arts Building, Gallery FAB exhibits a range of work by artists of regional and national significance. The exhibitions are curated by members of the Studio Art Faculty and complement the teaching emphases of the Fine Arts program.

## Gallery Visio

Gallery Visio is located in room 170 Millennium Student Center. It showcases work by students and faculty, and hosts exhibitions that address cultural and contemporary issues.

## Scholarships/Internships

Several scholarships are available on a competitive basis within the department, including the Art Department/Barbara St Cyr Scholarship, the William T. Isbell Jr. Scholarship, the Aronson Scholarship, the Marie Larkin Scholarship in Art Education, and the Hilda and Roy Bergmann Scholarship for Art. The department also sponsors a variety of internships

with local arts institutions, including the Saint Louis Art Museum, Contemporary Art Museum St. Louis, and Laumeier Sculpture Park.

## Career Outlook

Study in art history broadens and enriches a general education, offering insight into the visual, architectural, and cultural artifacts left by earlier, as well as modern, civilizations. Art history graduates have found career opportunities in teaching, museums, galleries, libraries, historical societies, sales and auction houses, the legal professions, historic preservation, and arts administration.

Students with degrees in studio art find careers in teaching, advertising, public relations, graphic design, illustration, film and video production, arts administration, art restoration, product and industrial design, framing, and commercial photography.

With over 300 art teachers in the greater St. Louis region alone, there is a demand for art teachers statewide each year.

## Faculty Overview

The Department of Art and Art History has a diverse faculty actively engaged in the production of art, its historical and critical evaluation, and the training of art educators. The department prides itself on its commitments to high standards of teaching and sound research achievements. Individual faculty have been cited for their teaching excellence. Art history faculty members have written books, articles, and critical reviews, and regularly participate in national and international conferences. Studio art faculty exhibit nationally and internationally in group and solo juried and invited exhibitions.

## Undergraduate Studies

### General Education Requirements

Majors in art history must meet the college and university general education requirements (p. 34). A foreign language is required; French or German is recommended. Art history courses required for the degree may not be taken on a satisfactory/ unsatisfactory (S/U) basis.

Art history courses can be applied toward minors in Anthropology, American Studies, Classical Studies, Philosophy, and Urban Studies, or certificates in Studies in Religions, Women's and Gender Studies, Photographic Studies and African Studies.

Majors in studio art must meet the college and university general education requirements. A foreign language is not required. Studio art courses required for the degree may not be taken on a satisfactory/ unsatisfactory (S/U) basis. A minimum of 120 hours is required for graduation. Studio art courses do not fulfill the humanities general education requirement.

## Degree Requirements

### Bachelor of Arts in Art History

Art history majors must complete a minimum of 36, but no more than 45, hours in art history with no grade below C.

#### Required Courses

ART HS 1100 (p. 434)	Introduction To Western Art	3
ART HS 3395 (p. 434)	Sophomore/Junior Seminar: Research in Art History	3

ART HS 4495 Senior Seminar: Methods of Art History 3  
(p. 434)

Select one non-Western art course from the following (may be taken concurrently with 1100): 3

ART HS 1103 Pre-Columbian Art and Architecture of Meso-and South America  
(p. 434)

ART HS 1104 Indigenous Arts Of North America  
(p. 434)

ART HS 1105 Introduction To The Arts Of Africa  
(p. 434)

ART HS 1108 Introduction To The Arts Of Asia  
(p. 434)

Select a minimum of three lower-division courses, one from each of the following categories: 9

#### **Ancient and Medieval**

ART HS 2211 Art And Archaeology Of The Ancient World  
(p. 434)

ART HS 2212 Greek Art And Archaeology  
(p. 434)

ART HS 2213 Roman Art & Archaeology  
(p. 434)

ART HS 2225 Medieval Art  
(p. 434)

#### **Early Modern**

ART HS 2235 Italian And Northern European Renaissance Art  
(p. 434)

ART HS 2238 Italian Renaissance Art  
(p. 434)

ART HS 2240 French Art And Architecture 1400-1715  
(p. 434)

ART HS 2245 Baroque Art And Architecture  
(p. 434)

#### **Modern and American**

ART HS 2250 Nineteenth Century European Art  
(p. 434)

ART HS 2255 Modern Art  
(p. 434)

ART HS 2265 History Of Photography  
(p. 434)

ART HS 2270 American Art To 1876  
(p. 434)

ART HS 2272 American Art Since 1876  
(p. 434)

ART HS 2279 American Architecture  
(p. 434)

ART HS 2281 Art Since 1960  
(p. 434)

Select a minimum of three upper division courses. One course must be a 4000-level Topics course. The other two courses must be chosen from two different categories in the following list: 9

#### **Media in Art History**

ART HS 3303 Media And Technique In Art History  
(p. 434)

ART HS 3350 Studies in Design  
(p. 434)

ART HS 3360 Photography And Society  
(p. 434)

ART HS 3385 Studies In Architectural History  
(p. 434)

#### **Themes in Art History**

ART HS 3365 The Artist And The City  
(p. 434)

ART HS 3374 Philosophy Of Art  
(p. 434)

ART HS 3376 Gender in the Visual Arts  
(p. 434)

ART HS 3391 Selected Themes In Art History  
(p. 434)

ART HS 3396 The Nude In Art  
(p. 434)

ART HS 3397 Landscape Perspectives In Art  
(p. 434)

ART HS 3398 The Portrait  
(p. 434)

#### **Professional Studies**

ART HS 3387 Professional Internship  
(p. 434)

ART HS 3388 St. Louis Art Museum Internship  
(p. 434)

ART HS 3389 Visual Resources Management  
(p. 434)

ART HS 3393

#### **Topics in Art History**

Courses listed as "Topics" at the 4000 level, including but not limited to:

ART HS 4411 Topics In Ancient Art And Archaeology  
(p. 434)

ART HS 4425 Topics In Medieval Art  
(p. 434)

ART HS 4435 Topics In Renaissance Art  
(p. 434)

ART HS 4445 Topics In 17Th And 18Th Century European Art  
(p. 434)

ART HS 4455 Topics In Modern Art  
(p. 434)

ART HS 4475 Topics In American Art  
(p. 434)

ART HS 4481 Topics In Contemporary Art  
(p. 434)

ART HS 4490 Special Study  
(p. 434)

Select one course in studio art. <sup>1</sup> 3

Additional hours in art history, up to the maximum of 45, may be completed with electives at the 2000 level or above. 3

**Total Hours** 36

<sup>1</sup> Up to nine hours in studio art may be applied toward the B.A. in art history.

## Bachelor of Fine Arts in Studio Art

Candidates for the B.F.A. degree must complete a Foundation Art Program (which is largely satisfied by the A.F.A. degree) and an emphasis area in one of the following: art education, drawing, graphic design, painting, photography, printmaking or general fine arts. Studio art majors are required to take 75 hours in studio art (this includes 30 hours in the foundation art program) and 15 hours in Art History. The final 30 hours must be completed in residence at UMSL. Graduating students must also pass a faculty portfolio review.

Advanced Placement in Studio Art Classes: Studio Art Majors who have professional Graphic Design or Photographic experience may wish to submit a portfolio to a committee of studio art faculty. Depending on the nature and the quality of the student's portfolio, they may be able to obtain exemptions from selected lower level studio art courses. Students applying for these exemptions must submit their portfolios prior to the first day of class of their first semester in the BFA Program. Students will be notified in writing if an exemption is granted. Students informed of these waivers will be advised of their requirements in the studio art major. All decisions of the portfolio reviews are final.

### Foundation Art Program

The following courses are required for the Foundation Art Program:

ST ART 1020	Expanded Artforms	3
ST ART 1140	Drawing I	3
ST ART 1141	Drawing II	3
ST ART 1142	Figure Drawing I	3
ST ART 1150	Design I	3
ST ART 1151	Design II	3
ST ART 2240	Drawing III <sup>1</sup>	3
or ST ART 1143	Figure Drawing II	
Select one of the following:		3
ST ART 1030	Ceramics I	
ST ART 1132	Sculpture I	
ST ART 2251	Design III	
Studio Art Electives		6
<b>Total Hours</b>		<b>30</b>

<sup>1</sup> Those planning an emphasis in drawing or painting must take ST ART 1143.

Students must complete 45 hours in one of the following emphasis areas:

#### Drawing

ST ART 2240	Drawing III	3
ST ART 2241	Drawing IV	3
ST ART 2242	Figure Drawing III	3
ST ART 2243	Figure Drawing IV	3
ST ART 2250	Composition	3
ST ART 3340	Advanced Problems In Drawing I	3
ST ART 3341	Advanced Problems In Drawing II	3

ST ART 3371	Advanced Problems In Printmaking II	
ST ART 3380	Advanced Problems In Painting I	
ST ART 3381	Advanced Problems In Painting II	
ST ART 3391	Advanced Problems In Photography I	
ST ART 3392	Advanced Problems In Photography II	

Students must complete 15 hours of Art History, with at least 9 hours taken in residence at UMSL.

Students choosing a double major in two studio art emphasis areas must complete all the requirements for each emphasis area. If the double major includes Graphic Design, students must take four semesters of Senior Studio Seminar. This includes:

ST ART 4490	Senior Seminar In Photography I	3
ST ART 4491	Senior Seminar In Photography II	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
ST ART 4497	Senior Seminar In Graphic Design I	3
ST ART 4498	Senior Seminar In Graphic Design II	3

## Art Education

An art education emphasis leading toward K-12 Art teacher certification is available. Students choosing this option must complete degree requirements for the B.F.A. Students must complete ENGL 3100 (Advanced Expository Writing) and the General Education Requirements (G.E.R.) of the College of Education as well as the College of Fine Arts and Communication. A foreign language is not required.

Students will take a specialized program of Foundation Art (30 hours) that includes courses required for certification to teach art. They will also take studio art electives, including a minimum of three courses in one of the studio emphasis areas: drawing, graphic design, painting, photography, or printmaking. A minimum of 50 credit hours must be completed in studio art. In addition, students must complete 15 hours of art history. The final 30 hours of coursework must be completed in residence at UMSL. Major area courses, including studio art, art history, art education, teacher education, and secondary education, must be completed with a minimum

grade point average of 2.5; no grade lower than a C is acceptable in major area coursework.

Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

## I. Foundation Art for Art Education

(10 courses; 30 hours if taken at UMSL):

ST ART 1030	Ceramics I	3
ST ART 1133	Introduction To Fibers And Textiles	3
ST ART 1140	Drawing I	3
ST ART 1141	Drawing II	3
ST ART 1142	Figure Drawing I	3
ST ART 2240	Drawing III	3
or ST ART 1143	Figure Drawing II	
ST ART 1150	Design I	3
ST ART 1151	Design II	3
ST ART 1170	Printmaking I	3
or ST ART 1173	Printmaking: Screenprinting I	
ST ART 1180	Painting I	3
<b>Total Hours</b>		<b>30</b>

## II. Studio Art for Art Education (7 courses; 21 hours if taken at UMSL):

ST ART 1020	Expanded Artforms	3
ST ART 1060	Photography I	3
or ST ART 1061	Introduction to Digital Photography	
or ST ART 1210	Graphic Design I	
or ST ART 2100	Advertising Art Fundamentals	
Students planning on a Photography emphasis must take ST ART 1060. Students planning on a Graphic Design emphasis must take ST ART 1210.		
ST ART 1132	Sculpture I	3
Studio Art Electives		3
Studio Art Emphasis		9

Students must complete at least nine hours in one of the following areas: drawing, graphic design, painting, photography, or printmaking.

**Total Hours** **21**

## III. Art History for Art Education (5 courses; 15 hours if taken at UMSL):

At least 9 hours must be taken in residence at UMSL.

ART HS 1100	Introduction To Western Art	3
Art History Electives		12
<b>Total Hours</b>		<b>15</b>

## IV. Professional Preparation for Art Education

Required art education, Level II and III teacher education, and secondary education courses must be taken in residence at UMSL. Students must be admitted to the Teacher Education program of the College of Education. Students should check with the Office of Advising and Student Services

(<http://coe.umsi.edu/advising>) (OASIS) for the most complete and current admission information.

Art Education certification candidates must complete the following courses:

#### Level I: Exploring Education as a Profession

EDUC 1000	Building Community, Culture, and Learning in Education	3
TCH ED 2209	Foundations of Teaching in American Schools	3
ED PSY 2212	Introduction To Learners And Learning	3

#### Level II: Teaching and Learning Across Context and Clinical Experiences

ART ED 3328	Art Education: Theory to Practice	3
ART ED 4260	Art Museum as Teaching Resource	3
ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
ED TECH 3135	Technology for Educators	1
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 3310	Methods of Teaching With Technology	2
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3

#### Level III: Instructional Application

ART ED 4273	Curriculum and Methods of Teaching Art	3
SEC ED 4989	Practicum I: Site Based Experience	3
SEC ED 4996	Practicum II: Site Based Experience in Elementary Art	6
SEC ED 4997	Practicum II: Site Based Experience in Secondary Art	6

**Total Hours** **45**

## Minors

### Minor in Art History

A minor in art history requires the completion of at least 18 hours of art history courses with a GPA of 2.0 or better. Students must take ART HS 1100 and at least one course in non-Western art. They must also take at least 2 courses at the 2000 level and 2 courses at the 3000 level or above in Art History. A maximum of 3 hours of internship can be applied toward a minor in art history. At least nine of the 18 hours must be taken in residence at UMSL. All courses in the minor must receive a grade of C or above.

### Minor in Studio Art

Students who wish to minor in studio art must take a minimum of 18 hours with a grade point average of 2.0 or better. Six hours must be taken at the 2000 level or above, in residence at UMSL. The requirements for the minor are as follows:

ST ART 1140	Drawing I	3
(p. 434)		
ST ART 1141	Drawing II	3
(p. 434)		
ST ART 1150	Design I	3
(p. 434)		

Select two consecutive courses in any single area from the following: <sup>1</sup> 6

Painting

Printmaking (any one subfield)

Photography

Graphic Design

Advanced Drawing

Studio art elective 3

**Total Hours** **18**

## Photographic Studies Certificate

UMSL students, graduates, and post-baccalaureate candidates may obtain a certificate in photographic studies by coordinating courses in and related to photography. To be eligible for the certificate, undergraduates must complete a degree in a chosen major field. A faculty member of the Interdisciplinary Photographic Studies Committee will act as adviser to all students and will consult with the faculty adviser in the student's major to plan appropriate credits.

## Requirements

The following courses are required:

ST ART 1060	Photography I	3
(p. 434)		
ST ART 2160	Photography II	3
(p. 434)		
ART HS 2265	History Of Photography	3
(p. 434)		
ST ART 3260	Photography III	3
(p. 434)		
ART HS 3360	Photography And Society	3
(p. 434)		

Select one of the following: 3

ART HS 1100 Introduction To Western Art  
(p. 434)

ST ART 2262 Color Photography I  
(p. 434)

ST ART 2263 Digital Color Process  
(p. 434)

ST ART 2264 Non-Silver Photography  
(p. 434)

ST ART 3260 Photography III  
(p. 434)

ST ART 3263 Digital Color Portfolio  
(p. 434)

ST ART 3363 Special Topics In Photography  
(p. 434)

ST ART 3390 Special Study  
(p. 434)

ST ART 3391 Advanced Problems In Photography I  
(p. 434)

ST ART 3392 Advanced Problems In Photography II  
(p. 434)

COMM 1050 Introduction To Mass Communication  
(p. 434)

ENGL 3140/ News Writing  
MEDIA  
ST 3214  
(p. 434)

ENGL 3150 (p. 434)	Feature Writing
<b>Total Hours</b>	<b>18</b>

## Sample Four Year Plans

Art History BA (p. 440)

Studio Art, BFA

- Drawing Emphasis (p. 440)
- Graphic Design Emphasis (p. 441)
- Painting Emphasis (p. 441)
- Photography Emphasis (p. 441)
- Printmaking Emphasis (p. 442)
- General Fine Arts Emphasis (p. 442)

<b>Total Hours: 124</b>		

- 1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
- 2 This plan assumes that 12 of the 15 required Art History credit hours will satisfy the Humanities area of general education and help to fulfill the total of 42 general education hours. Student should see an academic advisor to ensure they are selecting the correct courses.
- 3 The general education courses listed assumes the U.S. History/ Government requirement and the Cultural Diversity requirement are fulfilled with Social/Behavioral Science or Humanities general education courses.

*PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.*

## Art Education Courses

### **ART ED 2179 Art Activities for Elementary School: 3 semester hours**

A study of art principles and laboratory experiences with various media and materials. Stresses curriculum planning and development of the elementary school program in art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

### **ART ED 3328 Art Education: Theory to Practice: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212 and completion of Foundation Art Program. Development and application of concepts related to comprehensive art education and standards-based curriculum in art education, with an examination of current theories, trends, publications, and on-line resources in the field.

### **ART ED 4260 Art Museum as Teaching Resource: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212, 9 hours of Art History and completion of Foundation Art Program. Should be taken concurrently with ART ED 3328. Students will learn how to strengthen K-12 Art Education by utilizing the collections and resources of the St. Louis Art Museum. A variety of teaching approaches and learning activities for galleries and classrooms will be employed, focusing on art from around the world and throughout history.

### **ART ED 4273 Curriculum and Methods of Teaching Art: 3 semester hours**

Prerequisites: ART ED 3328 and completion of, or concurrent enrollment in, TCH ED 3310, ED PSY 3312, SPEC ED 3318, or TCH ED 4391. A study of the scope and sequence of art education in the school curriculum, with emphasis on the preparation, selection, organization and application of materials and methods of instruction and assessment. Attention is also given to learning the research tools of the scholar in the field of art education. Not available for graduate credit.

### **ART ED 4290 Special Study in Art Education: 1-6 semester hours**

Prerequisites: Junior, senior, or graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit, up to a maximum of 6 credit hours.

### **ART ED 5334 Topics in Contemporary Art Education: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Intensive study for advanced students and art teachers, emphasizing specialized techniques and innovative concepts. Topics to be announced. May be repeated for credit, up to a maximum of 12 credit hours.

### **ART ED 5588 Museum Education and Visitor Research: 3 semester hours**

Prerequisites: Consent of director of Museum Studies Program. Development and operation of museum educational programs: learning theory; program design; relationships with exhibit development' programming for children and adults. Visitor research: theoretical foundations; research design; impact on programming and strategic planning.

### **ART ED 5590 Special Study in Art Education: 1-6 semester hours**

Prerequisite: Graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit.

## Art History Courses

### **ART HS 1100 Introduction To Western Art: 3 semester hours**

An introduction to major historical movements in Western art.

### **ART HS 1101 Ideas in Art History: 3 semester hours**

Prerequisites: ART HS 1100 or consent of instructor. Studies of selected works of art, with attention to the social and cultural factors surrounding their creation. May not count for a major or minor in art history.

### **ART HS 1103 Pre-Columbian Art and Architecture of Meso-and South America: 3 semester hours**

An overview of Pre-Columbian art and architecture that examines the contributions of Olmec, Toltec, Maya, Aztec, Inca, Andean and other Meso-American and South American cultures from prehistoric times until the Spanish intervention in the early 1500s.

### **ART HS 1104 Indigenous Arts Of North America: 3 semester hours**

A survey of the indigenous arts of North America from precontact through the present. Cultures to be covered include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagwath and Gitsan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored.

### **ART HS 1105 Introduction To The Arts Of Africa: 3 semester hours**

A survey of the major art forms of Africa and the African Diaspora. The course addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the cultural diversity requirement.

**ART HS 1108 Introduction To The Arts Of Asia: 3 semester hours**

A survey of the major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the cultural diversity requirement.

**ART HS 2211 Art And Archaeology Of The Ancient World: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.

**ART HS 2212 Greek Art And Archaeology: 3 semester hours**

General survey of material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

**ART HS 2225 Medieval Art: 3 semester hours**

A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

**ART HS 2235 Italian And Northern European Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. An introduction to selected artworks, artists and patrons in Italy and Northern Europe throughout the fifteenth and sixteenth centuries, beginning with Ghiberti and Van Eyck and ending with Michelangelo and Brughel.

**ART HS 2238 Italian Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Study of sculpture, paintings, and architecture in Florence, Rome, and Venice during the fourteenth, fifteenth, & sixteenth centuries as reflections of cultural, religious, philosophical, and political beliefs.

**ART HS 2240 French Art And Architecture 1400-1715: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art and architecture in France from the late medieval period to the late baroque. Topics will include the development of French chateaux and gardens, the rise of the Academy, and the influence of royal patronage on the arts.

**ART HS 2245 Baroque Art And Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. A survey of the major paintings, statues, buildings, and their artists and patrons in seventeenth-century Italy, France, Flanders, Holland, and Spain. Special attention will be given to the study of the city of Rome.

**ART HS 2248 Eighteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of the instructor. A survey of European art and architecture from 1700 to 1800, primarily in England, France, and Italy. Topics will include the Rococo and Georgian styles; the Classical and Gothic revivals; the impact of the Enlightenment; the Grand Tour and admiration of antiquity; and decorative arts, including ceramics, interior design, and gardens.

**ART HS 2250 Nineteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. A survey of European art from 1780 to 1880, focusing on developments in England, France, Germany, and Scandinavia. Topics to be addressed include Neoclassicism, Romanticism, Realism, and Impressionism.

**ART HS 2255 Modern Art: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1880 to 1960. Topics to be addressed include Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, and non-representational art.

**ART HS 2265 History Of Photography: 3 semester hours**

Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

**ART HS 2270 American Art To 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of the major developments in painting, sculpture, and the decorative arts in the United States to 1876.

**ART HS 2272 American Art Since 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. Major developments in American painting, sculpture, and the decorative arts since 1876.

**ART HS 2279 American Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of American Architectural practice from 1600 to the present.

**ART HS 2281 Art Since 1960: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1960 to present. Topics to be addressed include Pop Art, Conceptual Art, Minimalism, Performance Art, and other recent art forms and movements.

**ART HS 2291 Issues And Ideas In Art History: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Intensive studies of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. May be repeated for credit with a change of topic and permission of advisor.

**ART HS 3303 Media And Technique In Art History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Technical demonstration of and research into various materials and media used by artists. In addition to ancient media such as egg tempera and fresco, it will include modern media such as photography and video.

**ART HS 3350 Studies In Design: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

**ART HS 3360 Photography And Society: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of photography as a means of information and expression, as an influence on culture, and as a reflection of concepts in politics, science, morality, and art. This course counts toward the major.

**ART HS 3365 The Artist And The City: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Examines the role of urban centers as a locus for significant artistic activity, as a recurring theme in art, and as spatial and physical architectural realities. Aspects of urban planning, urban imagery in art and the social, political, and personal networks artists develop as a result of living in particular urban centers at particular moments in history will be among the topics discussed.

**ART HS 3374 Philosophy Of Art: 3 semester hours**

Same as PHIL 3374. A critical study of issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

**ART HS 3376 Gender in the Visual Arts: 3 semester hours**

Same as GS 3376. Prerequisites: Minimum of one 2000-level course in art history and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

**ART HS 3385 Studies In Architectural History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of selected topics in architectural history. The content of the course will vary, and the course may be repeated for credit with permission of the instructor and departmental advisor. Possible topics include the history of the castle, factory architecture, the evolution of the Gothic cathedral, and domestic and vernacular architecture.

**ART HS 3387 Professional Internship: 1-6 semester hours**

Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

**ART HS 3388 St. Louis Art Museum Internship: 3 semester hours**

Prerequisites: Art & Art History or Anthropology major, minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. Students selected by the Internship Committee will work 15-20 hours per week under the direction of staff at the St. Louis Art Museum. Projects may include research on the collection, exhibitions, and programs.

**ART HS 3389 Visual Resources Management: 1-3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and Art History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

**ART HS 3390 Special Study: 1-4 semester hours**

Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

**ART HS 3391 Selected Themes In Art History: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected themes in art history. Course content will vary; the course may be repeated for credit with a different theme, for a maximum of 6 credit hours.

**ART HS 3393 Art Museum And Gallery Management: 3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History and ENGL 3100 or consent of instructor. This course will consider the practical application of professional training in art history as it applies to not-for-profit gallery management. Topics covered will include: grant writing in the arts, the development of art exhibits, the role of the art curator, and the operation of a gallery.

**ART HS 3395 Sophomore/Junior Seminar: Research in Art History: 3 semester hours**

Prerequisite: Minimum of two 2000-level courses in Art Hist and ENGL 3100, or consent of instructor. An introduction to research and writing techniques in art history, organized around a topic to be announced. Course includes directed readings, research and writing.

**ART HS 3396 The Nude In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An exploration of the various meanings of nudity in art. The cultural, social and psychological contexts of nudity and geographic regions, both western and non-western. Representations of both males and females will be analyzed in terms of gender construction, political authority, and personal identity.

**ART HS 3397 Landscape Perspectives In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. This seminar considers the various conventions for representing landscape and nature, and human relationships to landscape, throughout history and across cultures. Issues to be considered may include: landscape as metaphor in European painting; contemporary earthworks; landscape photography; and the relationship of artist to landscape in the non-western world.

**ART HS 3398 The Portrait: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An examination of portraiture in its social, economic and political contexts. Group and individual portraits will be analyzed in terms of gender construction, social status, family history and personal and public identity throughout selected periods of western and non-Western culture.

**ART HS 4408 Topics In The Arts Of Asia: 3 semester hours**

Prerequisites: ART HS 1108 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in the arts of Asia. The content of the course will vary. May be repeated for credit with permission of instructor and advisor. This course satisfies the cultural diversity requirement.

**ART HS 4411 Topics In Ancient Art And Archaeology: 3 semester hours**

Prerequisites: ART HS 2211, ART HS 2212, or ART HS 2213, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of some aspect of ancient art and archaeology, with emphasis prior to the common era. May be repeated for credit with permission of instructor and advisor.

**ART HS 4425 Topics In Medieval Art: 3 semester hours**

Prerequisite: ART HS 2225 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of the selected topics in Medieval art. The content of the course will vary, focusing on single topics such as manuscript painting, the Gothic cathedral and its sculptural decoration, or the art of pilgrimage churches. May be repeated for credit with permission of instructor.

**ART HS 4435 Topics In Renaissance Art: 3 semester hours**

Prerequisites: ART HS 2235, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Studies of selected topics, which will vary. Subjects to be considered may include the art of Florence, the role of patronage in Renaissance Italy and Papal art. May be repeated for credit with a different topic.

**ART HS 4445 Topics In 17Th And 18Th Century European Art: 3 semester hours**

Prerequisite: ART HS 2245 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of selected topics in Baroque and Rococo art. The content of the course will vary, focusing on single areas, such as the Baroque in Rome, or on major artists; such as Bernini, Rubens and Rembrandt. May be repeated for credit with permission of instructor and advisor.

**ART HS 4455 Topics In Modern Art: 3 semester hours**

Prerequisites: ART HS 2255 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

**ART HS 4475 Topics In American Art: 3 semester hours**

Prerequisites: ART HS 2270 or ART HS 2272 or ART HS 2279 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in American art. May be repeated for credit with permission of instructor and advisor.

**ART HS 4481 Topics In Contemporary Art: 3 semester hours**

Prerequisites: ART HS 2281 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art since 1960. May be repeated for credit with permission of instructor and advisor.

**ART HS 4490 Special Study: 1-4 semester hours**

Prerequisite: Junior/Senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

**ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours**

Prerequisite: ART HS 3395, ENGL 3100 and Senior standing in art history or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

**ART HS 5578 Topics In American Art: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. This course examines a discrete aspect of the history of American art within the changing social, cultural and historical contexts of Euro-American and/or Native American experiences and traditions.

**ART HS 5590 Special Study in Art History: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.

**ART HS 5592 The History Of The Visual Arts In American Museums: 3 semester hours**

Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**ART HS 6035 Foundations In Museology I: 3 semester hours**

Same as ANTHRO 6135 and HIST 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs. meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**ART HS 6036 Foundations Of Museology II: 3 semester hours**

Same as ANTHRO 6136 and HIST 6136. Prerequisites: ART HS 6035 consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**ART HS 6037 Museum Organization and Operations: 3 semester hours**

Same as ANTHRO 6137 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**ART HS 6038 Museum Studies Master's Project: 4 semester hours**

Same as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

## Studio Art Courses

**ST ART 1020 Expanded Artforms: 3 semester hours**

A practical and theoretical exploration of contemporary art practices organized around structured assignments that will explore various modes of working in art. This course is designed to assist studio students in developing a personal, non-medium specific approach to art making and problem solving. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1025 Art of 3D Animation I: 3 semester hours**

This course will explore the principles of animation and the mechanics of spatial graphics software such as *Maya*, as well as the storytelling and visual techniques central to creating a successful animated presentation. Students will produce an animated video presentation. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1026 Art of 3D Animation II: 3 semester hours**

Prerequisites: ST ART 1025. In this production course, students will work on advanced techniques of animation and the mechanics of spatial graphics software such as *Maya*, and will study the storytelling and visual techniques central to creating a successful animated presentation. Each student will produce an animated video presentation during the class. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1030 Ceramics I: 3 semester hours**

An introduction to basic methods and theory of ceramics including work with hand-built construction, wheel techniques and glazing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1060 Photography I: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1061 Introduction to Digital Photography: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies. Students who plan to pursue a career in art should enroll in ST ART 1060 rather than ST ART 1061. ST ART 1061 does not satisfy the prerequisite requirement for other courses in Photography beyond the 2000 level, but may count towards Photography electives.

**ST ART 1080 Comics & Cartoon Illustration: 3 semester hours**

A course in creating and appreciating the world of comics and cartoons. This course will investigate the tools and techniques for creating cartoons, cartoon illustrations and the world of comics. Students will create their own cartoons with traditional media and also with computers. While designed for beginners, experienced artists will be encouraged to perfect their personal styles. The class will create and print its own comic book. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1130 Ceramics II: 3 semester hours**

Prerequisite: ST ART 1030. A continuation of ST ART 1030. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1132 Sculpture I: 3 semester hours**

An introduction to traditional and contemporary materials, aesthetics, and theories of three-dimensional art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1133 Introduction To Fibers And Textiles: 3 semester hours**

Prerequisites: ST ART 1150. Exploration of a variety of on- and off-loom weaving and other fiber and textile media and techniques. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1140 Drawing I: 3 semester hours**

An introduction to drawing through the study of figure, object, and environment. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1141 Drawing II: 3 semester hours**

Prerequisite: ST ART 1140. The development of drawing skills through continued observation and problems of invention. A further exploration of varied drawing materials and techniques including graphite, charcoal, conte crayon, and inks. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1142 Figure Drawing I: 3 semester hours**

Basic studies of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1143 Figure Drawing II: 3 semester hours**

Prerequisite: ST ART 1142. Continuation of Figure Drawing I. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1150 Design I: 3 semester hours**

Studio problems in the creative use and integration of the elements of two-dimensional design: line, form, space, texture. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1151 Design II: 3 semester hours**

Prerequisite: ST ART 1150. A continuation of ST ART 1150, two-dimensional design, with introduction to color theory. Some application of mixed media problems. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1170 Printmaking I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking techniques, materials, and theories. The course will include work in a variety of print materials. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1173 Printmaking: Screenprinting I: 3 semester hours**

Prerequisite: ST ART 1170. An introduction into the techniques, methods, and aesthetics of screenprinting. Studio problems involving uses and approaches will be emphasized. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1180 Painting I: 3 semester hours**

Prerequisite: ST ART 1140, ST ART 1150 or consent of instructor. An introduction to the use of oil and/or acrylic painting media. Studio problems to develop technical and expressive skills on various surfaces. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1181 Painting II: 3 semester hours**

Prerequisite: ST ART 1180 or consent of instructor. Continuation of basic studio problems in painting media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1210 Graphic Design I: 3 semester hours**

Prerequisite: None. Introduction to graphic design with an emphasis on fundamentals of space, emotion, shape, form, and concept. Projects in design, layout and typography will be addressed. The course is recommended to be taken concurrently with ST ART 1150, Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1220 Graphic Design II: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1210. Continuing introduction to graphic design, focusing on developing concepts and design process, typographic systems and layout systems. The course is recommended to be taken concurrently with ST ART 2220, Computer Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2100 Advertising Art Fundamentals: 3 semester hours**

Prerequisites: MEDIA ST 2090 or consent of the Coordinator for the Certificate in Advertising. This course introduces students to basic principles of production, including layout, type, color, readability, and image selection. The course is intended for students pursuing a Certificate in Advertising, and does not count towards a degree in Graphic Design.

**ST ART 2160 Photography II: 3 semester hours**

Prerequisite: ST ART 1060. An introduction to the techniques and aesthetics of black and white photography and the darkroom. Students must provide a film camera with adjustable speeds and aperture. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2201 Fundamentals of User Experience Design: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent, or consent of instructor. Through lecture and presentation, students will explore fundamental concepts of User Experience (UX) Design and specific tools and methods used throughout the process. Coursework will involve research and writing, allowing students to implement these methods. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2202 Fundamentals of Researching User Experience: 3 semester hours**

Prerequisite: ST ART 2201. In this course, students will discover in greater detail the methods for researching user experiences within interactive systems. This will include basic tools like interviews, surveys and usability studies. The course will demonstrate how to translate user research into personas, use-case scenarios, and functional requirements for software and other uses such as implementation in marketing and product design. Course work will include readings, research papers and user research. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2210 Typography: 3 semester hours**

Prerequisites: ST ART 1220 or consent of the instructor. Course intends to instill a sense of responsibility relative to typographic and production design, while developing the student's capacity for critical thinking and general typographic rules, visual hierarchy of typographic elements, classical typographic tradition, book design, awareness of typographic aesthetic.

**ST ART 2212 Image Making for Graphic Design: 3 semester hours**

Prerequisites: ST ART 1220 or instructor's consent. This course teaches skills of making images and custom type for use in visual communication. Topics covered include a survey of traditional and experimental illustration techniques with an emphasis on creation of original imagery. The class will discuss how hand images are further developed and combined on the computer for use in design. Creativity, discovery, and craft are highly emphasized. Lab fee required.

**ST ART 2220 Computer Design I: 3 semester hours**

Prerequisite: ST ART 1150 and ST ART 1210. An introduction to the use of computer graphics for the creation of artwork applicable to the graphic design industry. The course is recommended to be taken concurrently with ST ART 1220, Graphic Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2221 Computer Design II: 3 semester hours**

Prerequisite: ST ART 2220. Designed to familiarize students with the methods processes, software, and computer functions used in graphic design and illustration. The course is recommended to be taken concurrently with ST ART 3310, Graphic Design III. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2240 Drawing III: 3 semester hours**

Prerequisites: ST ART 1140 and ST ART 1141. This course offers studio problems designed to further the development of drawing skills in various media. Limited color will also be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2241 Drawing IV: 3 semester hours**

Prerequisite: ST ART 2240. Studio problems with emphasis on color and multi-material approach to drawing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2242 Figure Drawing III: 3 semester hours**

Prerequisites: ST ART 1142 and ST ART 1143. Advanced study of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2243 Figure Drawing IV: 3 semester hours**

Prerequisite: ST ART 2242. Continuation of ST ART 2242. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2250 Composition: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. An investigation of the use of formal design elements as used in historic and contemporary art. Weekly studio problems and discussions will concentrate on skills, application, and unifying effects of compositional elements on a variety of visual art forms. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2251 Design III: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. Advanced studio problems in design materials. Use of two-dimensional and three-dimensional mixed media. Experimental use of materials and media will be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2262 Color Photography I: 3 semester hours**

Prerequisite: ST ART 1060 or equivalent. An introduction to the techniques and aesthetics of color photography. Mastering the printing and finishing processes and producing a color print portfolio will be the requirements of this class. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2263 Digital Color Process: 3 semester hours**

Prerequisites: ST ART 1060. An extended study in the process of digital printing. The class will help students refine their techniques using digital color management and explore various techniques to assure the closest relationship between the image on the monitor and the resulting print. Hands-on training with different digital printers, digital media and scanning techniques will be offered. This class will involve both learning exercises and the creation of original computer-aided photographic art. Lab fee required. Students must provide a digital camera. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2264 Non-Silver Photography: 3 semester hours**

Prerequisites: ST ART 1060 and ST ART 2160. An introduction to the aesthetics and techniques of nontraditional photographic processes. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2265 Commercial Applications In Photography: Portrait Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of portrait photography. Techniques of lighting, posing, and studios equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2266 Commercial Applications in Photography: Product Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of product Photography. Techniques of lighting, posing and studio equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2267 The Constructed Photograph: 3 semester hours**

Prerequisites: ST ART 2263. An exploration of the constructed photograph through the art of digital collage. The class will survey the history of hand-created photographs. In addition, students will learn advanced Photoshop techniques in order to create original computer-aided photographic art. Lab fee required. Basic computer equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2268 Commercial Applications in Photography: Event Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of event photography. The class will focus on a variety of event photography types, including weddings, corporate and non-profit events, photobooths, concerts, etc. Special emphasis will be placed on photographing for the client. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2269 Commercial Appl in Photo: Photojournalism, Documentary, & Publ Relations Photography: 3 semester hours**

Prerequisite: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of photojournalism, documentary, and public relations photography. The class will concentrate on a variety of photographic applications focusing on news and editorial imagemaking, as well as training the student in public relations assignments. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2271 Printmaking II: 3 semester hours**

Prerequisite: ST ART 1170 or consent of instructor. A continuation of ST ART 1170. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2272 Printmaking:Lithography I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory in stone and plate lithography. Studio problems in the use of materials and equipment. Attention will be given to individual development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2273 Printmaking: Etching: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory of contemporary etching practices. Development of skills and aesthetic judgements in the media using non-toxic etching processes. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2274 Printmaking And Relief: 3 semester hours**

Prerequisites: ST ART 1170 and ST ART 2271. Advanced problems in relief printmaking. Work in wood and mixed materials. Development of skills and aesthetic judgments in the media. May be repeated for credit with consent of instructor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2280 Painting III: 3 semester hours**

Prerequisite: ST ART 1181 or consent of instructor. Advanced studio problems in painting media. Attention paid to individual development of theory, expression, and technique. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2281 Painting IV: 3 semester hours**

Prerequisite: ST ART 2280. A continuation of ST ART 2280. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2283 Watercolor Painting: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141. Beginning problems in watercolor painting. Includes the study of traditional and contemporary approaches to color, color techniques, and treatment of papers. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2290 Special Study: 1-10 semester hours**

Prerequisites: Junior/Senior standing and consent of department and instructor. Independent study through readings, reports or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3074 Special Topics In Studio Art: 3 semester hours**

Prerequisites: Minimum completion of 18 hours in Studio Art. Selected topics in studio studies. May be repeated for credit with a change of topic. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3260 Photography III: 3 semester hours**

Prerequisite: ST ART 2160. An exploration into contemporary theories and trends in photography. Advanced projects, portfolios and techniques will be expected from those enrolled. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3263 Digital Color Portfolio: 3 semester hours**

Prerequisites: ST ART 2263. Intermediate exploration of the aesthetics and techniques of digital photography including an investigation of color management in printing. Students will produce one or more portfolios of digital images. Lab fee required. Basic lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3310 Graphic Design III: 3 semester hours**

Prerequisite: ST ART 1220 and ST ART 2220. Advanced studio problems to further the understanding of design and its relationship to typographic elements, illustration, and communication. The course will encourage both conceptual and technical development of the designer. The course is recommended to be taken concurrently with ST ART 2221, Computer Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3311 Graphic Design IV: 3 semester hours**

Prerequisite: ST ART 3310 and ST ART 2221. Further studio problems in the graphic arts. The course is recommended to be taken concurrently with ST ART 2210, Typography. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3312 Advanced Topics in Graphic Design: 3 semester hours**

Prerequisites: ST ART 3311 or permission of instructor. Studies of selected topics, which will vary. May be repeated for credit with a different topic, for a maximum of 9 credit hours. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3340 Advanced Problems In Drawing I: 3 semester hours**

Prerequisite: ST ART 2241. This course is focused on professional-level art and portfolio production. It offers studio problems designed to further the development of drawing skills. Emphasis will be given to the study of drawing as an independent art form. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3341 Advanced Problems In Drawing II: 3 semester hours**

Prerequisite: ST ART 3340. A continuation of ST ART 3340. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3350 Studio Art Internship: 1-6 semester hours**

Prerequisites: Junior/Senior standing in studio art and consent of the faculty advisor. The internship provides experience in design firms, professional art studios, or comparable settings. Students will assist professionals in the diverse duties associated with studio art activities. Course assignments may include research assignments and/or reports to be reviewed by the faculty advisor and/or supervisor. May be repeated for credit, up to a maximum of 6 credit hours.

**ST ART 3363 Special Topics In Photography: 3 semester hours**

Prerequisites: ST ART 2160. Photography II & permission of advisor. Selected topics in photographic practice. May be repeated for credit with permission of advisor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3370 Advanced Problems In Printmaking I: 3 semester hours**

Prerequisite: ST ART 2274. This course is focused upon professional-level art and portfolio production. After completion of this and the preceding course, students should be ready to meet the artistic and intellectual demands of today's visual art world. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3371 Advanced Problems In Printmaking II: 3 semester hours**

Prerequisite: ST ART 3370. A continuation of ST ART 3370. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3372 Advanced Lithography: 3 semester hours**

Prerequisite: ST ART 1173. Continuing problems in lithography with problems in black and white, photolithography, and/or color. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3380 Advanced Problems In Painting I: 3 semester hours**

Prerequisite: ST ART 2281. This course is focused on professional-level art and portfolio production. Non-traditional materials might be explored. Attention is focused on individual development of painting theory, self-expression, and advanced techniques. The student is expected to assume a substantial responsibility with regard to direction, motivation, and content. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3381 Advanced Problems In Painting II: 3 semester hours**

Prerequisite: ST ART 3380. A continuation of portfolio production in ST ART 3380. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3383 Advanced Problems In Graphic Design I: 3 semester hours**

Prerequisite: ST ART 3311 and ST ART 2210. This course is focused on professional-level art and portfolio production. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3384 Advanced Problems In Graphic Design II: 3 semester hours**

Prerequisite: ST ART 3383. A continuation of ST ART 3383. The course includes the preparation of a faculty-reviewed portfolio. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3390 Special Study: 1-10 semester hours**

Prerequisite: Junior/senior standing and consent of department chairperson and instructor. Independent study through readings, reports, or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3391 Advanced Problems In Photography I: 3 semester hours**

Prerequisites: ST ART 2263 and ST ART 3260. This course is focused on professional-level art and portfolio production. Students may employ black and white, color, nonsilver, or other traditional or non-traditional press for projects in this course. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3392 Advanced Problems In Photography II: 3 semester hours**

Prerequisite: ST ART 3391. A continuation of ST ART 3391. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 4389 Graphic Design Studio: 3 semester hours**

Prerequisites: ST ART 3384 or permission of instructor. Students will work on actual client projects in a studio setting from creative concept through client presentation. Studies will include client interviews, project planning, studio operations, project budget and estimating, vendor selection, prepress preparation, working in creative groups and professional presentations.

**ST ART 4490 Senior Seminar In Photography I: 3 semester hours**

Prerequisite: Senior Standing and ST ART 3392. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall semester.

**ST ART 4491 Senior Seminar In Photography II: 3 semester hours**

Prerequisites: Senior standing and ST ART 4490. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Spring semester.

**ST ART 4495 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 3381, ST ART 3341, ST ART 3392 or ST ART 3371. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall Semester.

**ST ART 4496 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 4495. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Winter Semester.

**ST ART 4497 Senior Seminar In Graphic Design I: 3 semester hours**

Prerequisites: Senior standing and ST ART 3384. Students must pass the junior portfolio review. Weekly critiques and discussions of technical and professional issues. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 4498 Senior Seminar In Graphic Design II: 3 semester hours**

Prerequisites: ST ART 4497. Continuation of ST ART 4497. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 5590 Special Study: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through art making, readings, reports, or field research. Studio Art fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies. May be retaken for credit with consent of instructor.

## Communication and Media

**Campus Address:** Media Studies - 243 Arts Administration Building

**Web Site:** <http://mediastudies.umsl.edu>

**Main Number:** 314-516-4572

**Fax Number:** 314-516-4851

## General Information

The Department of Communication and Media reflects an area of study informed by art and science. Under the rubric of Communication, students explore the construction, delivery, and perception of purposeful messages and their consequences. Whether the intent is to inform, influence, or entertain, students use research and theory to improve effectiveness and achieve outcomes in interpersonal and mass-mediated messaging. In addition, students will find a creative outlet in Media, which focuses on the production of content and its critical and cultural significance. It encompasses the aesthetics of audio and visual media in all its forms. Students learn contemporary and historical concepts in a global context. Importantly, students can hone practical skills ranging from conceptual development to camerawork and post-production editing. Whether students want to work on a public health campaign to reduce risky behaviors or a documentary designed to educate, Communication and Media offers excellent preparation for rapidly changing world.

## The Bachelor of Arts in Communication

The B.A. in Communication is a flexible degree program that allows the student to tailor their curriculum to meet specific interests and needs while simultaneously providing a strong foundation in the major specializations of the discipline. The department encourages all students to meet early and often with their faculty advisers to select a meaningful group of courses for a coherent, career-oriented academic program. Students who seek this degree will, upon completion, understand how to communicate competently and effectively in a variety of contexts and mediums. In addition, students will develop a strong foundation in the theory and research underlying effective communication. Finally, students will demonstrate their competence through the internship and practicum requirements.

## The Bachelor of Science in Media Studies

Media Studies is a discipline that examines, in a critical fashion, a vast range of media technologies as well as the necessary skills to produce

media messages in a variety of platforms and genres, including the Internet. This will be accomplished through courses which focus on the role of media technologies and their historical, cultural, social, international, legal, ethical, or economic implications. There is a balance between theory and practice. Media Studies majors have an opportunity to gain professional experience through course work and internships. The aim of the degree is to prepare students for a wide variety of media careers in fields such as radio, television, film, broadcasting, multimedia, advertising, or further studies at the graduate level. Media Studies seeks to prepare students to be thoughtful contributors in an increasingly mediated world.

## Minors in Communication and Media Studies

The Department of Communication and Media offers two minors: A Minor in Communication and a Minor in Media Studies. Both minors provide a solid foundation of knowledge and skills that can supplement other programs of study and make students more competitive in almost any industry. Students who complete the Minor in Communication are able to understand and apply theories of effective communication in interpersonal, organizational, and mass communication contexts, while those who complete the Minor in Media Studies develop a critical understanding of content designed for distribution and consumption in a variety of media platforms and channels. For a list of requirements for the Minor in Communication and the Minor in Media Studies, please review the Undergraduate Studies section).

## Certificate in Advertising

The Certificate in Advertising provides students with a grounded approach to the theory and practice of professional advertising. Using classic and modern techniques, students explore and implement strategies designed to influence and persuade target audiences. With an emphasis on media-rich environments, students will develop a repertoire of skills needed to be successful in the industry.

## Certificate in Media Production

The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multimedia skillsets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed to be competitive in a rapidly changing media environment.

## Certificate in Public Relations

The Department of Communication offers a sequence of courses that can prepare students for a successful career in public relations. This writing-intensive certificate program includes a selection of required and elective courses that integrate practical knowledge of the PR industry with the communication theory and research that undergird it. The certificate will be valuable both to those already in the workplace, and to undergraduates pursuing a public relations career. Closely aligned with the latest recommendations from the Public Relations Society of America and the National Communication Association, the curriculum will provide students with both the public relations theoretical base and practical hands-on skills necessary to succeed in public relations.

## Other Certificate Programs

In addition to these offerings, the department supports a number of other interdisciplinary certificate programs. For more information, see Certificate Programs and Interdisciplinary Studies.

## Master of Arts in Communication

The Master of Arts degree program provides the opportunity for an advanced degree program in Communication with a strong theory and research emphasis. Students can select courses that emphasize broad categories of communication such as organizational communication and/or mass communication. The program will help students develop a strong background in communication theory and research which would allow for the pursuit of a doctorate in Communication, opportunities for professional positions, and the potential for a vertical or lateral move within an organization. Students who complete the M.A. in Communication will have a detailed understanding of the academic discipline. They will have developed critical skills for evaluating communication-related theories and research, and the ability to apply that knowledge in their own research or professional settings. For further details, please see the Graduate Studies section of the Communication Department listings.

## Career Outlook

The B.A. in Communication prepares students for careers in numerous fields. Past graduates are working in the following positions: promotion and public relations, administration, advertising, marketing, web page design, market research, corporate media, sales, training, speech writing, teaching, and research. Other students have pursued graduate education in communication programs offering the M.A. and Ph.D. degrees.

## Faculty Overview

The faculty represents many fields within the discipline of communication, including interpersonal communication, organizational communication, mass communication, public relations, and rhetoric. Most faculty members contribute to a growing body of knowledge by conducting research, publishing their results in scholarly journals, and presenting papers at national and international communication conferences. By integrating theory, research, and practice, faculty members are able to offer a comprehensive approach to contemporary communication problems.

## Undergraduate Studies

### General Education Requirements

Majors must satisfy the university and college general education requirements (p. 34). The college's foreign language requirement may be taken in any language. Communication courses may not be taken on a satisfactory/unsatisfactory basis.

## Degree Requirements

### Bachelor of Arts in Communication

Majors must complete a minimum of 36 semester hours in Communication courses. At least 18 of these must be taken at UMSL. Furthermore, at least 12 semester hours of the Communication courses completed must be numbered 3000-4999. All students must complete the required courses and earn a C or better in all communication courses applied to the degree.

## Required courses for the major

COMM 1030 (p. 451)	Interpersonal Communication I	3
COMM 1050 (p. 451)	Introduction To Mass Communication	3
COMM 2231 (p. 451)	Communication In The Organization	3
COMM 3330 (p. 451)	Research Methods In Communication I	3
COMM 3332 (p. 451)	Intercultural Communication	3
COMM 4920 (p. 451)	Practicum In Applied Communication	1-3
COMM 4950 (p. 451)	Internship In Applied Communication	3-6
<b>Total Hours</b>		<b>19-24</b>

## Bachelor of Arts in Communication with Certification in Secondary Education

In addition to the requirements for the B.A. in communication and general requirements set by the College of Education, students must meet the state requirements for certification.

The B.A. and certification for grades 7-12 can be completed by taking a minimum of 39 hours in communication, selected according to departmental recommendations. The B.A. and certification for grades 7-9 can be obtained by taking 36 hours in communication, selected according to departmental recommendations. Requirements of the College of Education include courses in professional education.

## Bachelor of Science in Media Studies

### General Education Requirements

All Media Studies majors must satisfy the University and the College of Fine Arts and Communication's 42-hour General Education core requirements, which include ENGL 1100 (p. 451) and the Math proficiency requirement.

A Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education courses or other lower- or upper level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education courses or by other lower-or-upper level courses in various departments.

There is no foreign language requirement, but foreign language proficiency is recommended.

## Degree Requirements

Media Studies majors must complete a minimum of 51 hours in the Department of Theatre, Dance, and Media Studies courses. A core of 21 hours is required of all majors. An additional 27 hours, 9 hours in Theatre and Dance classes, 9 hours in Media Studies classes at the 2000 level and 9 hours in Media Studies classes at the 3000 level, must be completed with a minimum grade of C. At least 24 of these hours must be taken at UMSL. Of the 24 hour minimum, at least 18 hours of classes must be taken at the 2000 level or above at UMSL.

In addition to the major core and required courses, students will choose elective courses to bring their total credit hours to 120. Practicum and Internship courses may be repeated for credit, but an overall limit of 20 hours in Practicum and Internship will be accepted towards the 120 hours degree.

Required Core Courses for all Media Studies majors:

MEDIA ST 1050 (p. 451)	Introduction To Media Studies	3
MEDIA ST 1065 (p. 451)	Introduction To Information Technology	3
TH DAN 1900 (p. 451)	Introduction To Theatre Technology	3
MEDIA ST 2235 (p. 451)	Media Theory	3
Select one of the following:		3

MEDIA ST 1070 (p. 451)	Introduction To Cinema	
MEDIA ST 1100 (p. 451)	Introduction To Advertising	
MEDIA ST 1110 (p. 451)	Introduction To Radio And Television Broadcasting	

Select two of the following: 6

MEDIA ST 1194 (p. 451)	Practicum In Journalism	
or MEDIA ST 2095 (p. 451)	Practicum In Advertising	
MEDIA ST 3394 (p. 451)	Internship In Journalism	
or MEDIA ST 3398 (p. 451)	Internship In Media Studies	
MEDIA ST 4400 (p. 451)	Senior Project	

**Total Hours** 21

Additional hours in Theatre, Dance and Media Studies electives are to be selected on individual students' areas of interest. The core courses of 21 hours plus the Theatre, Dance, and Media Studies electives must equal 48 hours in total for Media Studies majors.

Select any other Theatre and Dance class.	9
Select any other Media Studies class at the 2000 level or above.	9
Select any other Media Studies class at the 3000 level or above.	9

**Total Hours** 27

## Minor in Communication

Coursework for a minor in Communication consists of 15 semester hours of the core requirements for the major. Credit hours in and/or COMM 3395

(p. 451) may be substituted for credit hours listed below with written consent of the communication department chairperson.

### Core Requirements:

COMM 1030 (p. 451)	Interpersonal Communication I	3
COMM 1050 (p. 451)	Introduction To Mass Communication	3
COMM 2231 (p. 451)	Communication In The Organization	3
COMM 3330 (p. 451)	Research Methods In Communication I	3
COMM 3332 (p. 451)	Intercultural Communication	3
<b>Total Hours</b>		<b>15</b>

At least 9 of the 15 hours required for the minor must be taken at UMSL.

Students must earn at least a C for all communication courses applied to the minor. A minimum GPA of 2.5 is required in the minor.

### Minor in Media Studies

A minor in Media Studies consists of the following:

MEDIA ST 2235	Media Theory	3
Select two of the following:		6
MEDIA ST 1050	Introduction To Media Studies	
MEDIA ST 1060	Introduction to World Cinema	
MEDIA ST 1065	Internet Media	
MEDIA ST 1070	Introduction To Cinema	
MEDIA ST 1100	Introduction To Advertising	
MEDIA ST 1110	Introduction To Radio And Television Broadcasting	
MEDIA ST 2113	Media Production I	
MEDIA ST 2114	Radio Production I	
MEDIA ST 2080	Advertising Copywriting	
Select one of the following:		3
MEDIA ST 2210	Video Production I	
MEDIA ST 2211	Introduction To Digital Multimedia Production	
MEDIA ST 2212	Broadcast Writing And Reporting	
MEDIA ST 2275	Introduction To International Cinema	
MEDIA ST 2500	Introduction To Comparative International Media Systems	
MEDIA ST 3370	Documentary Film	

Select two of the following: 6

MEDIA ST 2228	Public Relations Writing	
MEDIA ST 2271	History Of American Film	
MEDIA ST 2272	Contemporary Cinema	
MEDIA ST 3035	Advanced Media Theory	
MEDIA ST 3070	International Cinema	
MEDIA ST 3150	Feature Writing	
MEDIA ST 3180	Reporting	
MEDIA ST 3214	News Writing	
MEDIA ST 3310	Video Production II	
MEDIA ST 3313	Advanced Video Editing	
MEDIA ST 3317	Radio And The Recording Industry	
MEDIA ST 3334	Advertising Media Planning	
MEDIA ST 3338	Advertising Technique	
MEDIA ST 3350	Mass Media History	
MEDIA ST 3355	Media Law And Regulation	
MEDIA ST 3356	Global Media Systems And Trends	
<b>Total Hours</b>		<b>18</b>

Media Studies Prerequisites may be waived by consent of the department.

### Certificate in Advertising

The Certificate in Advertising provides students with a grounded approach to the theory and practice of professional advertising. Using classic and modern techniques, students explore and implement strategies designed to influence and persuade target audiences. With an emphasis on media-rich environments, students will develop a repertoire of skills needed to be successful in the industry.

The Certificate in Advertising is comprised of 21 hours of coursework. At least 12 of the hours must be completed at UMSL. Students must earn at least a B in any course applied to certificate.

#### Required Courses

MEDIA ST 1100	Introduction To Advertising	3
MEDIA ST 2080	Advertising Copywriting	3
MEDIA ST 3334	Advertising Media Planning	3
MEDIA ST 2095 or MEDIA ST 3395	Practicum In Advertising Internship In Advertising	1-3

or MEDIA ST 3505 Field Experience in Advertising

The remaining hours of the certificate are comprised of electives chosen from an approved list of courses. If a student wishes to apply a course to the certificate that is not currently in the list of approved electives, he or she may request that the Certificate Coordinator evaluate the course for future consideration. If the Certificate Coordinator deems the course an acceptable alternative, it may be substituted for one of the approved electives.

#### Approved Electives

ST ART 2100	Advertising Art Fundamentals	3
MEDIA ST 2220	Promotion Essentials	3
MEDIA ST 2222	Convergence and Digital Media	3
MEDIA ST 3025	Current Issues in Advertising	3
MEDIA ST 3030	Advertising and Social Media	3
MEDIA ST 3355	Media Law And Regulation	3
MEDIA ST 3500	Advanced Advertising Seminar	3
MKTG 3700	Basic Marketing	3
MKTG 3721	Introduction to Digital Marketing Strategies	3

## The On-line Certificate Program in Film Studies

The On-line Certificate Program in Film Studies is open to all St. Louis campus undergraduate and graduate students, as well as to graduates of UM-St. Louis and other colleges and universities.

To receive a Film Studies Certificate, a student must complete the required courses (18 credit hours) with an average grade of C or better. None of the courses may be taken on a satisfactory/unsatisfactory basis. Up to six credit hours of course work may be transferred from other institutions.

#### Required

MEDIA ST 1060	Introduction to World Cinema	3
(p. 451)		
MEDIA ST 2271	History Of American Film	3
(p. 451)		
MEDIA ST 2273	Survey of Film Genres	3
(p. 451)		

#### Electives

Select three of the following:		9
MEDIA ST 1070	Introduction To Cinema	
(p. 451)		
MEDIA ST 2214	Screenwriting	
(p. 451)		
MEDIA ST 2272	Contemporary Cinema	
(p. 451)		
MEDIA ST 2275	Introduction To International Cinema	
(p. 451)		

MEDIA ST 3070 International Cinema  
(p. 451)

MEDIA ST 3370 Documentary Film  
(p. 451)

**Total Hours**

**18**

## Certificate in Media Production

(Pending CBHE approval)

The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multi-media skill sets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed in a rapidly changing media environment.

The Certificate in Media Production is comprised of 21 hours of coursework. Students must complete at least 12 hours at UMSL and earn at least a B in any course applied to the certificate.

#### Required Coursework

MEDIA ST 2113	Media Production I	3
MEDIA ST 2210	Video Production I	3
MEDIA ST 2211	Introduction To Digital Multimedia Production	3
MEDIA ST 4400	Senior Project	3-6

**Total Hours**

**12-15**

The remaining hours of the certificate are comprised of electives chosen from an approved list of courses. If a student wishes to apply a course to the certificate that is not currently in the list of approved electives, he or she may request that the Certificate Coordinator evaluate the course for future consideration. If the Certificate Coordinator deems the course an acceptable alternative, it may be substituted for one of the approved electives.

#### Approved Electives

MEDIA ST 1196	Practicum In Radio	1-3
MEDIA ST 1197	Practicum In Television/Film	1-3
MEDIA ST 2225	Live Events Media	3
MEDIA ST 3113	Media Production II	3
MEDIA ST 3215	Commercial Media Applications	3
MEDIA ST 3310	Video Production II	3
MEDIA ST 3313	Advanced Video Editing	3
MEDIA ST 3380	Feature Film Screenwriting	3

## Certificate in Public Relations

The Certificate in Public Relations integrates essential professional skills with contemporary communication theory and research to provide a grounded sequence based on the recommendations of the Public Relations Society of America and the National Communication Association. To earn the certificate, students must complete a minimum of 27 credit hours in the designated courses.

## Required Coursework

COMM 1150	Introduction To Public Relations	3
COMM 3358	Communication In Public Relations	3
COMM 3360	Media & Health Communication	3
COMM 3370	Social Media in Public Relations	3
COMM 4035	Integrated Approaches-Public Relations, Advertising, & Promotion	3
COMM 4100	Communication Campaigns	3
COMM 4199	Applied Public Relations	3
or COMM 4950	Internship In Applied Communication	
Elective Coursework (minimum of 6 credit hours required):		6
COMM 1050	Introduction To Mass Communication	
COMM 1135	Communication Theory	
COMM 2231	Communication In The Organization	
COMM 2232	Effective Communication In The Organization: Tools For Leadership	
COMM 2240	Persuasive Communication	
COMM 3330	Research Methods In Communication I	
COMM 3395	Special Topics In Communication	

**Total Hours** **27**

For more information on this certificate, please contact the Department of Communication's Public Relations Sequence Coordinator.

## Department Activities and Internships

Co-curricular projects and activities relevant to the personal, professional, and academic goals of each student are sponsored and advised by the department. Along with the traditional academic experience, students can network and develop valuable experiences through their completion of required internship or practicum courses. Students may choose from a wide-range of for-profit, nonprofit, and not-for-profit organizations. Students should visit the Department of Communication for more information regarding existing opportunities, and/or consult with the Internship and Practicum Coordinator to approve a new internship site. By tailoring the internship site to the interests of each student, the internship and practicum augment the academic experience and provide valuable opportunities for majors to apply their communication studies.

## Graduate Studies

The department offers a Master of Arts degree in Communication.

## Admission Requirements

Applicants must have a baccalaureate in communication or a related discipline by the end of the semester in which they apply. The minimum cumulative GPA required for regular admission to the graduate program in communication is 3.25 on a 4-point scale. In addition three letters of recommendation, at least two of which address the applicant's potential to succeed in graduate studies in communication, are also required. Finally, International students who are non-native speakers of English must obtain a TOEFL score of 600 on the paper-based test (or the equivalent score on other versions of the test) to be considered for admission. Applicants with GPAs that do not meet the admission criterion may elect to take the Graduate Record Exam (GRE) to offset these deficiencies. Contact the Graduate Program Coordinator for more information.

## Degree Requirements

The MA in Communication requires either 30 or 36 credit hours of coursework, depending on the exit project. Candidates approved for a thesis or internship will complete at least 30 semester hours of approved study, at least 21 of which must be taken in courses offered by the department. Candidates completing the non-thesis, non-internship option must complete 36 semester hours of approved study, 27 of which must be taken in courses offered by the department. Students who choose this option may be eligible to waive up to 6 hours if justified by prior coursework or professional experience. Please contact the Graduate Program Coordinator for additional details.

Students who choose the internship or thesis option must identify a committee chairperson and prospective committee members who will consult in development of an appropriate exit project. The expectation for each internship varies by project and committee, but submission of an essay in which the coursework and internship experiences are integrated is typically required. Internship exit projects and theses must be approved by the student's committee and assigned a grade by the advisor. The candidate must pass an oral examination conducted by student's committee regardless of exit option selected.

Students who complete a thesis or internship must complete no less than a 3 hour internship or 6 credit hour thesis

### Required Courses:

COMM 6500	Seminar In Communication Theory	3
COMM 6510	Advanced Communication Research Methods I	3
COMM 6515	Advanced Communicatin Research Methods II	3
COMM 6600	Seminar In Organizational Communication	3
COMM 6700	Seminar In Mass Communication	3

## Graduate Certificate: ACP Instructional Communication

The ACP Instructional Communication Certificate is designed for secondary educators interested in teaching public speaking and related courses to high school students for college credit through programs such as UMSL's Advanced Credit Program. The certificate combines practical application with theory and research to provide teachers with a grounded approach to delivering college appropriate courses with empirical research in communication at the foundation.

Through a combination of online courses and independent studies, students can complete the ACP Communication graduate certificate without visiting campus.

Students who earn the ACP Instructional Communication graduate certificate will be eligible to teach college level courses in public speaking at the secondary level.

**For more information about our graduation rates, the median debt of students who completed the Graduate Certificate program, and other important information, please visit our Gainful Employment Disclosure website at <http://umsl.edu/go/Bn8>.**

Requirements: Graduate Standing. To earn the ACP Communication certificate, students must complete a minimum of 18 hours. Typically, students will earn the certificate by completing the following courses in sequence<sup>1</sup>:

COMM 5000	ACP - Elements of Public Speaking ([R])	3
COMM 5010	ACP: Elements of Debate ([R])	3
COMM 5020	ACP - Persuasion and Influence ([R])	3
COMM 5050	ACP - Special Topics ([E]) <sup>2,3</sup>	3-6
COMM 5099	ACP - Observation and Implementation ([R]) <sup>2</sup>	3

**Total Hours** **15-18**

- <sup>1</sup> Other 5000+ electives may be substituted based on approval and availability. Contact the Graduate Coordinator in the Department of Communication for more information.
- <sup>2</sup> Pre-requisites: Students must have completed or currently be enrolled in each of the following courses: COMM 5000, COMM 5010, COMM 5020
- <sup>3</sup> May be repeated.

[R] Required for the certificate.

[E] Elective.

### Communication Courses

#### **COMM 1000 Effective Communication for College: 3 semester hours**

A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

#### **COMM 1030 Interpersonal Communication I: 3 semester hours**

Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.

**COMM 1040 Introduction To Public Speaking: 3 semester hours**

Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

**COMM 1041 Presentational Speaking: 3 semester hours**

Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

**COMM 1050 Introduction To Mass Communication: 3 semester hours**

Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

**COMM 1135 Communication Theory: 3 semester hours**

Survey of elements and processes critical to human communication behavior. Comparison of influential communication theories.

**COMM 1150 Introduction To Public Relations: 3 semester hours**

Publicity methods and public relations representation of profit and nonprofit institutions to the public; use of communication research and media, as applied to the public relations profession.

**COMM 1920 Applied Communication: 3 semester hours**

Prerequisites: Consent of instructor. An intermediate experience in applied communication on UMSL's campus, such as the school newspaper or radio station. Work must be done on campus, under supervision of a working professional, and in consultation with a faculty member. Repeatable, but no more than six hours of credit may be applied toward the 36-hour minimum required for the degree.

**COMM 2230 Small Group Communication: 3 semester hours**

Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

**COMM 2231 Communication In The Organization: 3 semester hours**

Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

**COMM 2232 Effective Communication In The Organization: Tools For Leadership: 3 semester hours**

This telecourse is designed to equip students with communication skills applicable to the organizational context. The course will present effective strategies for the articulation of ideas, with particular emphasis on the development of leadership skills.

**COMM 2240 Persuasive Communication: 3 semester hours**

A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.

**COMM 3130 Advanced Interpersonal Communication: 3 semester hours**

Prerequisite: COMM 1030. Continuation of COMM 1030, focusing on contemporary theories and research regarding interpersonal relationships.

**COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

**COMM 3330 Research Methods In Communication I: 3 semester hours**

Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

**COMM 3332 Intercultural Communication: 3 semester hours**

Prerequisite: Junior standing or consent of the instructor. Study of culture as a variable in both interpersonal and collective communicative situations. Emphasis upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

**COMM 3337 Male/Female Communication: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

**COMM 3352 Mass Media in Society: 3 semester hours**

Prerequisites: COMM 1050. Examination and evaluation of theories and literature concerning media content and its effect on society. Topics include the evidence relating to the effect of entertainment and information media on audiences' behavior and attitudes, the factors that contribute to individual differences in responses to media content, and the ways the organizational structure of the media industries shape the type of content that is produced.

**COMM 3355 Dangerous Messages: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

**COMM 3358 Communication In Public Relations: 3 semester hours**

Prerequisites: COMM 1150. An overview of communication within the area of public relations. Emphasis on ethics, law, professional standards and written communication. Case study approach.

**COMM 3360 Media & Health Communication: 3 semester hours**

Prerequisites: COMM 1050 or consent of the instructor. Topics include health promotion and prevention campaigns and the effect of news and entertainment media on health behaviors. Examination of the theories and literature dealing with the role of mass media in health behavior.

**COMM 3361 Interpersonal Health Communication: 3 semester hours**

Prerequisites: COMM 1030 and COMM 2231, or consent of the instructor. Examination of the theories and literature dealing with the role of interpersonal and organizational communication in health behavior and health care. Special focus on patient-provider communication, social support, and cultural conceptions of illness.

**COMM 3370 Social Media in Public Relations: 3 semester hours**

Prerequisites: COMM 3358. Overview of digital and social media in contemporary public relations. Online initiatives and related strategies will also be discussed.

**COMM 3395 Special Topics In Communication: 3 semester hours**

In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

**COMM 3400 Language And Behavior: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. Examination of language and behavior which includes etiological considerations, functions, meanings, perceptions, and process-interaction rules.

**COMM 3410 Nonverbal Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the paralinguistic cues that accompany normal communication such as facial expression, eye behavior, gestures and body movements, accents and dialects, and the impact of touch, among others. The implications for message construction, delivery, and perception are discussed.

**COMM 3500 Dysfunctional Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of some of the factors that impede effective communication. Emphasis is placed both on individual attributes such as verbal aggression and communication apprehension, as well as context-based factors found in family and romantic relationships, among others.

**COMM 3510 Communication & Conflict: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the features that contribute to effective and ineffective communication during conflicts. The course integrates communication research and theory with practical applications in negotiation and conflict resolution.

**COMM 3520 Communication Barriers I: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. A review of communication research on physical and developmental barriers that impair or impede effective communication with children. A limited number of site visits and/or off-campus experiences are required.

**COMM 3521 Communication Barriers II: 3 semester hours**

Prerequisites: COMM 3520. An extension of COMM 3520, this course focuses on effective and empathic communication with children and adults encumbered by communication barriers. A strong emphasis on high impact educational experiences is a major component of this course. Site visits and/or off-campus experiences are required.

**COMM 3600 Communication and Families: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An analysis of research and theory involving communicative attributes and phenomena unique to the family context. Communication between parent-child, siblings, and extended family members, as well as more complex family structures are addressed. Functional and effective communication techniques are also discussed.

**COMM 3610 Communication and Relationships: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the contributions of communication researchers to the study of developing and maintaining human relationships with particular focus on communication in friendships and romantic relationships.

**COMM 3700 Computer-Mediated Communication: 3 semester hours**

Prerequisites: COMM 1030, COMM 1050, junior standing or consent of the instructor. A comparison of the similarities and differences between face-to-face communication and computer-mediated communication. Synchronous and asynchronous methods of interaction are examined, as well as other characteristics unique to the digital environment.

**COMM 3800 Trends in Mass Communication: 3 semester hours**

Prerequisites: COMM 1050, junior standing or consent of the instructor. A theoretical and research-based examination of popular trends in mass communication. May be repeated once if topics are different.

**COMM 4035 Integrated Approaches-Public Relations, Advertising, & Promotion: 3 semester hours**

Prerequisites: COMM 3358 or consent of instructor. Overview of how publicity, advertising and other promotional activities can be integrated into a single cohesive communication initiative or program.

**COMM 4100 Communication Campaigns: 3 semester hours**

Prerequisite: COMM 1030, COMM 1050, COMM 1150 and junior standing or consent of the instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal, mass communication, and public relations.

**COMM 4199 Applied Public Relations: 3 semester hours**

Prerequisites: COMM 1150, COMM 3358, COMM 4035, and junior standing or consent of the instructor. This course provides students with an applied experience in public relations. The course may require on-site visits to private firms and/or the development of multi-year strategic plans.

**COMM 4900 Directed Readings: 3 semester hours**

Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

**COMM 4910 Supervised Research: 1-3 semester hours**

Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

**COMM 4920 Practicum In Applied Communication: 1-3 semester hours**

Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.

**COMM 4950 Internship In Applied Communication: 3-6 semester hours**

Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but not more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

**COMM 5000 ACP - Elements of Public Speaking: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on the delivery of theory and research based public speaking content for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5010 ACP: Elements of Debate: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a comprehensive understanding of the theory and research typically taught in college level forensics and debate courses. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5020 ACP - Persuasion and Influence: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a strong background in the research and theory that underlies attempts to persuade and influence others through the use of effective communication. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Programs.

**COMM 5050 ACP - Special Topics: 3-6 semester hours**

Prerequisites: COMM 5000, COMM 5010, and COMM 5020, Special Consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach in the Advanced Credit Program. May be repeated for a maximum of 6 credit hours.

**COMM 5099 ACP - Observation and Implementation: 3 semester hours**

Prerequisites: COMM 5000, COMM 5010, COMM 5020 and COMM 5050, Special Consent. Provides a capstone experience for teachers seeking to teach communication courses in the advanced credit program. While enrolled, participants will implement an ACP course in their school under the supervision of the Communication Department's advanced Credit Program Liaison.

**COMM 6500 Seminar In Communication Theory: 3 semester hours**

Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.

**COMM 6510 Advanced Communication Research Methods I: 3 semester hours**

Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

**COMM 6515 Advanced Communication Research Methods II: 3 semester hours**

Prerequisite: COMM 6510 or permission of instructor. Overview of the most commonly utilized methods in quantitative data analysis statistical methods in communication with an emphasis on understanding how the statistic is reported in scholarly articles and when to use that method, rather than in the mathematical computation of the method. Topics include: descriptive statistics, single and multi-factor analysis of variance, simple and multiple linear regression, basics of nonlinear regression, analysis of categorical data, meta-analysis, and non-parametric statistical methods. Required of all graduate communication students.

**COMM 6600 Seminar In Organizational Communication: 3 semester hours**

Prerequisite: Graduate standing. Explores communication theories and topics related to organizational institutional, and social system contexts and reviews the communication literature on behavior in organizations. Emphasizes a case study approach to the communication strategies used by agencies and corporations. Required of all graduate communication students.

**COMM 6650 Seminar in Health Communication: 3 semester hours**

Prerequisites: COMM 6500, COMM 6510, and COMM 6515. This course examines the theories, from communication and related disciplines, which researchers use to investigate health communication phenomena, as well as the application of those theories to understanding and solving health-related issues. Health communication theories across contexts are examined including those specific to interpersonal communication, mass communication, and organizational communication. Course topics include health campaigns, health education, health informatics, and health media use.

**COMM 6700 Seminar In Mass Communication: 3 semester hours**

Prerequisites: Graduate Standing. Examines the communication research literature pertaining to media industries, content, and effects. A broad range of media forms and possible effects are considered.

**COMM 6750 Media Reception Processes: 3 semester hours**

Prerequisites: COMM 6510 or permission of instructor. Examines how audiences select, interpret, and respond to media messages. Students, typically in a group, are involved in developing and carrying out a research study investigating the topic.

**COMM 6810 Communication Systems and Technology: 3 semester hours**

Prerequisite: Graduate Standing. Examines innovations in modern communications technologies, their impacts on individuals and society, and their implications for communication research and practice.

**COMM 6815 Persuasion and Influence in Communication: 3 semester hours**

Prerequisite: Graduate Standing. Broad-based examination of the major theories of social influence and persuasion and their practical applications.

**COMM 6830 Seminar In Special Topics In Communication: 3 semester hours**

Prerequisite: Graduate Standing. Selected topics in the study of communication. Review of the communication theory and methods appropriate to the topic. The course includes a research project. May be repeated if the topic is different.

**COMM 6900 Directed Readings In Communication: 1-6 semester hours**

Prerequisite: Graduate Standing and consent of instructor. Independent study of published research and reports relating to a specific topic in communication. May be repeated for credit with permission of advisor.

**COMM 6910 Supervised Research In Communication: 1-3 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Primary research on specific topics in communication. May involve collaborative research with a faculty member on a topic of mutual interest or data collection/analysis for a project developed by the student under the guidance of a faculty member. May be repeated for credit with permission of advisor.

**COMM 6920 Practicum In Computer-Mediated Communication: 1-3 semester hours**

Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

**COMM 6950 Graduate Internship: 3-6 semester hours**

Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

**COMM 6960 Thesis Research And Preparation: 1-10 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Individual research for and preparation of the graduate thesis.

## Media Studies Courses

**MEDIA ST 1050 Introduction To Media Studies: 3 semester hours**

Introduction to print and electronic media, as well as the Internet. Emphasis on history, theory, and role of the mass media as cultural institutions. The course also examines the Federal Communications Commission (FCC) and issues of ownership and media conglomeration.

**MEDIA ST 1055 Introduction to Social Media: 3 semester hours**

Introduction to the creation and rise of social media/networks. Course will cover the impact and influence of dominant sites along with individual, group, political, and commercial behavior changes. The course will examine how social media platforms can be integrated with other current tools. Issues such as privacy, censorship, cyber-bullying, and the use of social media for anti-social/terrorist activities will be explored.

**MEDIA ST 1060 Introduction to World Cinema: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of world cinema. International film theory and criticism will be studied as well as major genres, authors, and artists.

**MEDIA ST 1065 Internet Media: 3 semester hours**

This studio course will cover the principles of media design as they apply to the interactive world of the web. Sensitivity to the visual elements of online interfaces will be developed through analysis of the changing nature of communication technologies. Students will conceive and create their own web-based media projects.

**MEDIA ST 1070 Introduction To Cinema: 3 semester hours**

An overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. Course will discuss both the Hollywood studio system and today's independent movement. Also covered: genre, film theory, criticism, and aesthetics.

**MEDIA ST 1100 Introduction To Advertising: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of Advertising. A basic understanding of industry issues and key areas such as account management, research, strategy, creative, media, and production.

**MEDIA ST 1110 Introduction To Radio And Television Broadcasting: 3 semester hours**

An introduction to broadcasting, including the areas of history, government regulations, station operation, and program development.

**MEDIA ST 1194 Practicum In Journalism: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance, and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work in the journalism program or the student newspaper, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1196 Practicum In Radio: 1-3 semester hours**

Prerequisites: MEDIA ST 2114 or Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work at the campus radio station, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1197 Practicum In Television/Film: 1-3 semester hours**

Prerequisites: MEDIA ST 2113 or Consent of Instructor; open to Theatre, Dance and Media Studies majors only; not open to student who have delayed grades outstanding. Practical work at one of the campus television studios or for the UM-St. Louis Television/Film Club, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1198 Practicum In Media Studies: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only; not open to students who have delayed grades outstanding. Practical work in media studies, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1500 Entertainment Economics: The Movie Industry: 3 semester hours**

Same as ECON 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings.

**MEDIA ST 2080 Advertising Copywriting: 3 semester hours**

Same as ENGL 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

**MEDIA ST 2090 Creative Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explores the fundamentals of the creative process by discussing selling messages, marketplace diversity, research, strategy, layouts, and the creative brief. Emphasis on creative campaigns for radio, television, direct marketing, and the Internet.

**MEDIA ST 2095 Practicum In Advertising: 1-3 semester hours**

Prerequisites: MEDIA ST 2080 and MEDIA ST 2090 or consent of instructor. Open to Theatre, Dance, and Media Studies majors and minors only. Overall GPA of at least 2.0 or better. Not open to students who have any delayed grades outstanding. Practical work in the advertising program, the student newspaper, or an on-campus agency, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 2105 Advertising For The Arts: 3 semester hours**

Advertising for the Arts examines the theories and design principles needed to produce print and other forms of advertising to stimulate awareness of and community participation in a broad range of arts activities, including, but not limited to music, drama, dance, and the visual arts.

**MEDIA ST 2113 Media Production I: 3 semester hours**

Study of the basic skills needed to create media packages. The class will provide students with practical experience in camera operation, directing, producing, switching, audio mixing, and lighting, as well as basic non-linear editing. Lab arranged.

**MEDIA ST 2114 Radio Production I: 3 semester hours**

Prerequisites: MEDIA ST 1110. Theory and practice in the creation of radio programs. Laboratory experience included.

**MEDIA ST 2210 Video Production I: 3 semester hours**

Prerequisites: MEDIA ST 2113 or consent of instructor. Study of the basic theories of remote video production. The areas of producing and directing in the field will be examined and practiced. The course will focus on technical and aesthetic aspects of cinematic production. Lab arranged.

**MEDIA ST 2211 Introduction To Digital Multimedia Production: 3 semester hours**

Students will explore different state-of-the-art digital multimedia applications, including audio, video, and computer generated graphics, that are presently used in television, radio, CD, DVD, and online presentation. Current media related software such as QuickTime, Window Media, and Flash multimedia creation will be demonstrated and utilized to develop skill sets in those areas.

**MEDIA ST 2212 Broadcast Writing And Reporting: 3 semester hours**

Prerequisites: MEDIA ST 1110 or consent of instructor. Elementary principles and practice of writing for radio and television in varied program formats, emphasis on preparation of written materials for news and public affairs presentation. Lecture and lab.

**MEDIA ST 2214 Screenwriting: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the department. Writing fiction film narratives with particular emphasis on plot structure, theme, and character development.

**MEDIA ST 2220 Promotion Essentials: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explains the difference between advertising and sales promotion and why companies use sales promotion. Understand how companies utilize the different sales promotion techniques in each medium. Emphasis on the key sales promotion tools used by companies.

**MEDIA ST 2222 Convergence and Digital Media: 3 semester hours**

The development of new media technologies results in convergence, in which the lines between or among formerly separate media are blurred. Convergence and Digital Media focuses on the emerging media forms which result, including such new options as mobile apps for audio and video, blogs, and social media, as well as new tools for media creation for personal, social, business, and organizational expression. The course will examine emerging media technical options, effective message strategies in the context of emerging media, and basic principles associated with the practical use of tools for the creation of emerging media content. Both a lecture/discussion format and a hands-on project approach will be utilized.

**MEDIA ST 2225 Live Events Media: 3 semester hours**

Techniques and aesthetics of recording live video events. Course will include practical application training for single- and multi-camera shoots of concerts, lectures, theatre, dance, weddings, and other special events.

**MEDIA ST 2228 Public Relations Writing: 3 semester hours**

Prerequisites: ENGL 3140 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**MEDIA ST 2235 Media Theory: 3 semester hours**

Prerequisite: MEDIA ST 1050. Theory based explanation of the relationship between mass media and society. Topics will include agenda-setting, violence and television, and other current issues from a critical perspective.

**MEDIA ST 2271 History Of American Film: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the instructor. History of American film from the late nineteenth century to the present.

**MEDIA ST 2272 Contemporary Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or Consent of Instructor. History of World Cinema from the 1940s to the present day.

**MEDIA ST 2273 Survey of Film Genres: 3 semester hours**

Prerequisite: MEDIA ST 1060 or MEDIA ST 1070, or consent of instructor. This course explores the historical and aesthetic significance of film varieties. Analysis of genres may include the western, horror, science fiction, musical, detective, war, romantic comedy, and other films by type.

**MEDIA ST 2274 African-American Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or equivalent. Impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture. The history of African-American films from Oscar Micheaux in the 1920's through 1970's Blaxploitation to present directors and producers will be examined. African-American experiences and roles in films will also be discussed.

**MEDIA ST 2275 Introduction To International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 with a grade of C or better. Course provides an understanding of the art and history of international cinema; and helps to better understand film and filmmakers' intentions as well as the culture in which the film was produced. Films from Europe, Asia, South America, Africa and Australia will be examined. The artistic, technical, historical and social significance of these films, as well as their impact upon American cinema, will also be studied.

**MEDIA ST 2500 Introduction To Comparative International Media Systems: 3 semester hours**

This course introduces students to various media systems and theories around the world. It examines similarities and differences in media history, structures, and regulatory processes of developing countries, focusing on the dominant culture(s) of non-western regions. It also provides a framework for understanding and analyzing the cultural differences among global media systems in Africa, the Middle East, and Asia. In addition, the course examines aboriginal and other development media. The course fulfills the cultural diversity requirement.

**MEDIA ST 2510 Fundamentals of Mobile Design: 3 semester hours**

Building on core web languages and programming standards, this course introduces central concepts, techniques, methodologies, and best practices in the creation and deployment of mobile websites, applications, and user interface.

**MEDIA ST 3025 Current Issues in Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100, junior standing or consent of instructor. Using recent topics in advertising, students will analyze, evaluate, and critique current topics as well as prepare current campaigns for open discussion and presentation.

**MEDIA ST 3030 Advertising and Social Media: 3 semester hours**

Prerequisite: MEDIA ST 2090. Examination of advertising online with such topics as: social communities, friendvertising, virtual worlds, brand building, media democracy, online opinions, gaming, and how companies can leverage their brand using two-way interaction.

**MEDIA ST 3035 Advanced Media Theory: 3 semester hours**

Prerequisites: MEDIA ST 2235 or consent of instructor. This course examines major schools, ownership and theorists in mass media fields. The writings of the Frankfurt School, Marshall McLuhan, Ben Bagdikian, and others will be examined.

**MEDIA ST 3070 International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 and MEDIA ST 2275. Understanding international film, its properties, methods, aesthetics, and its impact on culture and society.

**MEDIA ST 3113 Media Production II: 3 semester hours**

Prerequisites: MEDIA ST 2113. Advanced study of the skills needed to create media packages. The class will provide students with a continuation of practical training in camera operations, directing, producing, switching, audio mixing, and lighting, as well as more advanced post production techniques. Lab arranged.

**MEDIA ST 3150 Feature Writing: 3 semester hours**

Same as ENGL 3150. Prerequisites: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments - journal entries, interviews, library projects, article critiques, and market reports - lead to production of full-length feature articles. May not be taken on the satisfactory/unsatisfactory option. The course counts toward the English Certificate in Writing.

**MEDIA ST 3180 Reporting: 3 semester hours**

Same as ENGL 3180. Prerequisites: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limit. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the English certificate in Writing.

**MEDIA ST 3214 News Writing: 3 semester hours**

Same as ENGL 3140. Prerequisites: ENGL 1100 or equivalent.

An introduction to news writing and reporting. Course covers basic components of news reporting principles, and news writing style and structure. Daily writing assignments include coverage of speeches, meetings and interviews, accidents, deaths, courts, sports, consumer affairs, and government. Emphasis on clarity, accuracy, and speed. The course counts toward the English Certificate in Writing. THIS COURSE WAS PREVIOUSLY COMM 3214 PRIOR TO AUGUST 2007.

**MEDIA ST 3215 Commercial Media Applications: 3 semester hours**

Prerequisites: MEDIA ST 2210, MEDIA ST 2211; or consent of instructor. An integrated application of audio, video, and digital media production techniques for commercial purposes. Emphasizing a client-centered approach, students gain practical experience in developing media applications that conform to client-defined specifications.

**MEDIA ST 3310 Video Production II: 3 semester hours**

Prerequisite: MEDIA ST 2210. Study of advanced theories of media production. Refinement of production principles learned in MEDIA ST 2210. Exploration of complex program formats, and advanced non-linear editing techniques. Lab arranged.

**MEDIA ST 3313 Advanced Video Editing: 3 semester hours**

Prerequisites: Six (6) hours of television production. Study of advanced non-linear editing techniques, animation, and advanced graphics development. Exploration of state of the art editing formats. Lab arranged.

**MEDIA ST 3317 Radio And The Recording Industry: 3 semester hours**

Prerequisite: Junior standing. Historical development and current status of the recording industry, particularly as it interacts with the broadcast industry. Impact of radio and recording technology on the development of rock and other popular music.

**MEDIA ST 3334 Advertising Media Planning: 3 semester hours**

Prerequisite: MEDIA ST 1050. A hands-on study of how to determine an advertising budget, select media and develop a strategic plan.

**MEDIA ST 3338 Advertising Technique: 3 semester hours**

Same as MKTG 3738. Prerequisite: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

**MEDIA ST 3350 Mass Media History: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Examination of the social, economic, and political factors contributing to the development of American mass media. Emphasis on significant personalities who helped shape its course; analysis of select critical works.

**MEDIA ST 3355 Media Law And Regulation: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Discussion of laws affecting the mass media. Exploration of problems and issues in legal regulation of media content, ownership, access, and accountability. Discussion of industry self-regulation and the influence of citizens' organizations.

**MEDIA ST 3356 Global Media Systems And Trends: 3 semester hours**

This course will survey major theories, global trends, and key stakeholders in the field of mass and multi-media. Designed to foster substantive comprehension of issues raised by transnational media corporations and their impact on other cultures and languages. Details about the BBC, CNN, MTV, Euro Disney, and the internet will be major components of this class.

**MEDIA ST 3357 Media Convergence: 3 semester hours**

This course will provide students with an overview of how computer technologies, telecommunication networks, and digital media are transforming contemporary culture and everyday life. Through hands-on projects on topics of social relevance, students will explore multiple platforms for reaching a variety of audiences. The course will also deal with policy issues such as regulation and competition.

**MEDIA ST 3362 Storytelling: 1-3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course gives an overview of the history of storytelling, types of tales, and appropriate uses for storytelling. The primary emphasis of the course is in developing storytelling skills through preparation, performances, and evaluation.

**MEDIA ST 3370 Documentary Film: 3 semester hours**

Prerequisite: MEDIA ST 1070. Consideration of the history, theory, and criticism of nonfiction film. Screening of representative documentary films.

**MEDIA ST 3380 Feature Film Screenwriting: 3 semester hours**

This course involves a careful examination and execution of the art and craft of feature film screenwriting from concept through completion and marketing. Students will learn aspects of proper screenplay format, developing dramatic characters, theme, and plot, with emphasis on visual storytelling.

**MEDIA ST 3394 Internship In Journalism: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in journalism, masscommunication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work with an off-campus newspaper, magazine, or other news organization, supervised by a journalism professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3395 Internship In Advertising: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in advertising; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have delayed grades. Practical work at an off-campus advertising agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3396 Internship In Radio: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in radio, broadcasting; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus radio station, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3397 Internship In Television/Film: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus television, film or video organization, supervised by a television, film or video professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3398 Internship In Media Studies: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video, radio, journalism, broadcasting, mass communication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3500 Advanced Advertising Seminar: 3 semester hours**

Prerequisites: MEDIA ST 2080, MEDIA ST 2090, and MEDIA ST 3334 or consent of instructor. Students utilize skills learned in copywriting, creative advertising, and media buying and planning. Students are graded on research and customer insights, strategy, messaging and creative media plan, advertising partnerships, and measures of effectiveness. The course final includes preparing a Plan Book for a specific client and presenting at a national competition.

**MEDIA ST 3505 Field Experience in Advertising: 3 semester hours**

Prerequisites: Junior standing and completion of 3 courses from the Certificate in Advertising or consent of instructor. Through supervised travel, students will examine current ad campaigns, media placement, and effects on consumer purchasing behaviors. They will develop a broad hands-on understanding of the industry while applying principles and practices learned in the classroom. Topics include creativity with visual images and/or photographs, copywriting, accounting planning, account services, and media planning and buying. For field experience, students will visit advertising agencies, businesses that have in-house advertising departments, vendors (such as printers), museums, and other creative venues in St. Louis and/or other cities.

**MEDIA ST 3990 Directed Readings In Media Studies: 3 semester hours**

Prerequisites: consent of instructor; not open to students who have any delayed grades. Supervised independent study involving readings, conferences, papers, in one of the department's disciplines: advertising, radio, television, film, or journalism.

**MEDIA ST 4040 Special Topics in Media Studies: 1-6 semester hours**

Prerequisites: Junior, Senior, or Graduate standing and consent of instructor. Special topics with subject matter dealing with current issues, (theoretical or applied), in the discipline of media studies. Since the topics of MEDIA ST 4040 may change from semester to semester, the course may be repeated for up to 12 credit hours.

**MEDIA ST 4270 Feature Film Writing: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of instructor. This course will include story conceptualization, development, and drafting a feature film script ready for production. Characterization, dramatic structure, thematic subtext, and visual storytelling will be emphasized.

**MEDIA ST 4271 Feature Film Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of Instructor. This course will emphasize production techniques applicable to a wide variety of audio, film, and video-based media. Students will be involved in feature film production assignments on location in addition to regularly scheduled classes.

**MEDIA ST 4272 Feature Film Post Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of instructor. This course will provide instruction in editing techniques and motivation, as well as continuity, rhythmic, graphic, and temporal editing principles. Students will work on feature film segments in addition to regularly scheduled classes.

**MEDIA ST 4392 Administration Of Co-Curricular Activities: 3 semester hours**

Prerequisites: Junior Standing or consent of instructor. A survey of skills required to administer the various co-curricular activities associated with teachers in the secondary schools, such as theatre performances and mass media centers.

**MEDIA ST 4400 Senior Project: 3-6 semester hours**

Prerequisites: Senior Status, Consent of Instructor. The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty. Repeatable up to 6 credit hours.

## Dance Program

The Dance program offers the Bachelor of Arts in Theatre and Dance, a degree program allowing students to tailor their curriculum to meet specific interests while simultaneously providing a strong foundation in the field. The minor in Theatre and Dance is also available.

Students may study a variety of movement including ballet, jazz, and modern dance; attend regular master classes with the Modern American Dance Company (MADCO), the resident dance company at the Touhill Performing Arts Center; and join periodic master classes with visiting dance companies. This growing program offers flexibility and the opportunity for students to work closely with faculty mentors.

For further information concerning the Dance major or curriculum, call at 314-516-4649.

## Bachelor of Arts in Theatre and Dance

### General Education Requirements

All Theatre and Dance majors must satisfy the University and College of Fine Arts and Communication's 42-hour General Education (p. 34) core requirements, which include ENGL 1100 and the Math proficiency requirement.

Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education (p. 34) courses or lower-or upper-level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education (p. 34) courses or by other lower-or upper-level courses in various departments.

13 hours of a foreign language.

### Degree Requirements

Theatre and Dance majors must complete a minimum of 36, but not more than 52 hours in Theatre and Dance courses. A core of 26 hours is required for all majors and 10-26 additional hours in Theatre and Dance are required. At least 24 hours in the major must be taken at UMSL and must include 6 hours at the 2000 or higher level and 9 hours at the 3000 or higher level. All courses required for the major must be completed with a minimum grade of C- to be accepted, and the overall total grade point average must be at least 2.0 to graduate. To be eligible to participate in Internship classes, each student must have an overall grade point average of 3.0

In addition to the major's required core and elective Theatre & Dance courses, students will choose elective courses to bring their total credit hours to 120. Practicum courses may be repeated for credit; an overall limit of 20 hours in Practicum courses will be accepted towards the 120 hour degree.

### Required Core Courses for all Theatre and Dance Majors

TH DAN 1210	Fundamentals Of Acting	3
TH DAN 1900	Introduction To Theatre Technology	3
TH DAN 1910	Introduction To Theatrical Design	3
TH DAN 1023	Fundamentals Of Dance	3

TH DAN 3254	Costume Production and Construction Techniques	
Select 6 hours chosen from these Practicum courses: <sup>1</sup>		6
TH DAN 2195	Practicum In Performance Studies	
TH DAN 2196	Practicum In Scenery/Lighting/Sound In Theatre Production	
TH DAN 2197	Practicum In Costume	
TH DAN 2198	Practicum In Dance	
TH DAN 3196	Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc	
TH DAN 3196	Adv Theatre Practicum: Scenery/Lighting/Sound in Theatre Production	
TH DAN 3197	Advanced Practicum In Costume	
TH DAN 3198	Advanced Practicum In Dance	
<b>Total Hours</b>		<b>26</b>

<sup>1</sup> 3 hours of which need to be above the 3000 level.

Additional hours in Theatre and Dance electives are to be selected based on individual students' areas of interest. The core courses of 26 hours plus the Theatre and Dance electives must equal a minimum of 36 hours, but not more than 52 hours, for Theatre and Dance majors.

### Minor in Theatre and Dance

Students with other majors may choose to minor in Theatre and Dance to complement their academic and career goals. The minor requires 18 hours of Theatre and Dance courses, nine of which must be taken at UMSL. A minimum GPA of 2.0 is required in the minor.

A Minor in Theatre and Dance Consists of the following:

Select one of the following Performance related courses:		3
TH DAN 2210	Ensemble Acting	
TH DAN 3305	Writing For Performance	

TH DAN 3211	Period Styles of Acting	
TH DAN 4220	Directing For The Theatre	
Select one of the following Design/Technology related courses:		3
TH DAN 2260	Introduction To Theatrical Costume Production	
TH DAN 3252	Costume Design II	
TH DAN 3260	Digital Scenography	
TH DAN 3261	Digital Lighting Design	
Select one of the following Dance related courses:		2-3
TH DAN 1006	Beginning Ballet Technique	
TH DAN 1007	Beginning Jazz Dance Tecnique	
TH DAN 1008	Beginning Modern Dance Technique	
TH DAN 2006	Intermediate Ballet Technique <sup>1</sup>	
TH DAN 2007	Intermediate Jazz Dance Technique <sup>1</sup>	
TH DAN 2008	Intermediate Modern Dance Technique <sup>1</sup>	
TH DAN 3006	Advanced Ballet Technique <sup>1</sup>	
TH DAN 3007	Advanced Jazz Dance Technique <sup>1</sup>	
TH DAN 3008	Advanced Modern Dance Technique <sup>1</sup>	
TH DAN 3009	Dance Choreography For The Stage, Television And Film	
Select one of the following Production related courses:		2
TH DAN 1060	Theatre Workshop	
TH DAN 2260	Introduction To Theatrical Costume Production	
TH DAN 3060	Advanced Theatre Workshop	
Select one of the following Practicum courses:		1
TH DAN 2195	Practicum In Performance Studies	
TH DAN 2196	Practicum In Scenery/Lighting/Sound In Theatre Production	
TH DAN 2197	Practicum In Costume	
TH DAN 2198	Practicum In Dance	
TH DAN 3195	Advanced Practicum In Performance Studies	
TH DAN 3196	Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc	
Production:		
TH DAN 3197	Advanced Practicum In Costume	
TH DAN 3198	Advanced Practicum In Dance	
Select any additional Theatre and Dance courses.		6-7

**Total Hours** **17-19**

- <sup>1</sup> Enrollment in Intermediate-and Advanced-level Dance Technique courses is by audition only. Beginning-level courses may be repeated for credit until sufficient proficiency has been achieved to advance to higher-level courses.

## Sample Four Year Plan

First Year

Elective or minor	7 Elective or minor	9
	<b>16</b>	<b>16</b>

**Total Hours: 120**

- <sup>1</sup> INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
- <sup>2</sup> This plan assumes that 3 hours of TH DAN 1210 will satisfy three hours of the Humanities area of general education and help to fulfill the total of 42 general education hours. TH DAN 2810 and TH DAN 2820 will also count towards Humanities and will reduce the number of general education courses needed and increase the number of free elective or minor coursework needed to reach 120 hours for a degree.

*PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.*

## Courses

### **TH DAN 1006 Beginning Ballet Technique: 2 semester hours**

Introduction to the art of ballet emphasizing basic movement, technique and terminology. Course of study will include basic barre exercises, center work, and across the floor progressions for proper alignment, strength, flexibility, and coordination. Prior dance experience is not required. Dance attire and ballet slippers will be required. Course may be repeated for up to 10 credit hours.

### **TH DAN 1007 Beginning Jazz Dance Tecnique: 2 semester hours**

Introduction to the art of jazz dance emphasizing basic principles of traditional and contemporary forms of jazz dance movement, technique, terminology, and style. Course will focus on increasing strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 1008 Beginning Modern Dance Technique: 2 semester hours**

Introduction to the art of Modern Dance movement, technique, and terminology. Course of study will introduce the elements of time, space, and energy through basic structured exercises and improvisation. Emphasis will be focused on alignment, strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire is required. Shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 1023 Fundamentals Of Dance: 3 semester hours**

This course provides an introductory exploration of movement through various styles of dance, emphasizing movement vocabulary, stretching, strengthening, body alignment, and creative expression. Prior dance experience is not required. Dance attire and shoes will be required.

**TH DAN 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 1210 Fundamentals Of Acting: 3 semester hours**

Course develops personal communication and presentational skills through vocal, physical, and emotional exercises designed for the beginning actor. Course emphasizes relaxation, concentration, improvisation, script analysis, characterization and scene work exercises to develop elementary performance skills.

**TH DAN 1600 Voice Ad Diction/Vocal Performance: 3 semester hours**

Course promotes development of clear, distinct enunciation and correct pronunciation for mass media communication, public address, theatre, and oral interpretation. Course includes development of oral-presentational and self promotional skills for voice acting/voice-over in contemporary theatre and media.

**TH DAN 1800 Introduction To Theatre: 3 semester hours**

A study of Theatre as an art form, emphasizing the audience's appreciation of the art of the playwright, actor, director, designers, and technicians. Major periods, genres, and dramatic forms from classical to modern to the avant garde as well as performance art will be covered. Students will attend performances and learn about how theatre functions as an art and an industry in today's world. Attendance at several live theatrical (theatre, play, musical, opera, and dance) performances, will be required.

**TH DAN 1850 Introduction To Non-Western Theatre: 3 semester hours**

Survey of theatre forms of the non-European world in which primary attention is concentrated on analysis of traditional dance drama and puppet theatres of East Asia, South Asia, the Middle East and Africa. Similar forms of European theatre will be included for comparative purposes. Focus on the development of world theatre from a visual point of view, from earliest storytelling rituals through international stage development to contemporary theatrical forms, with a view to understanding the global perspective. Course will survey visual media and writings on dance and theatre traditions found around the non-Western World. (Satisfies the Cultural Diversity requirement).

**TH DAN 1900 Introduction To Theatre Technology: 3 semester hours**

Introductory course covering the basic theories and techniques of theatre technology including stage equipment and safety, scenery, lighting, costuming, properties, sound and box office. Course includes practical application through a minimum of 25 hours of lab work in conjunction with a departmental production.

**TH DAN 1910 Introduction To Theatrical Design: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Introductory course covering the elements and principles of design in the areas of scenery, lighting, and costumes. Course will include various creative projects in two and three dimensions. Some graphic materials will be required.

**TH DAN 2006 Intermediate Ballet Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1006 or consent of instructor. Ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will be a continuation of Beginning Ballet Technique barre exercises, center work, and across the floor progressions. Dance attire and Ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2007 Intermediate Jazz Dance Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1007 or consent of instructor. Jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and expression. Course will also study unique dance styles and artists that have influenced the stage video, film and commercial media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2008 Intermediate Modern Dance Technique: 2 semester hours**

Prerequisites: 2.0 credit hours of TH DAN 1008 or consent of instructor. Modern dance movement, technique, vocabulary, and aesthetics. Course of study will be a continuation of Beginning Modern Dance Technique through incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 2020 Acting for the Camera: 3 semester hours**

An acting course that prepares the actor for work in front of a camera. Working with broadcast quality cameras, students will learn the art of language and expression. Students will learn the art and skill of communicating to an audience. Students also acquire the skills for working with other actors on camera, close-ups, working with props, continuity and hitting your mark.

**TH DAN 2112 Scene Study: 3 semester hours**

This course focuses on actor-training methodologies of Stanislavsky and other text-based approaches. Increases understanding of psychological motivation, concentration, focus of attention and clarity of physical expressiveness. Students prepare and present a minimum of three scenes.

**TH DAN 2195 Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor Provides practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 2196 Practicum In Scenery/Lighting/Sound In Theatre Production: 1-3 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions or other approved independent study projects. Running crew work will involve evening, weekend and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2197 Practicum In Costume: 1-3 semester hours**

Practicum in costume construction, cutting, draping, millinery, fabric dyeing/painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime lab hours, occasional weekend and/or evening laboratory time will be required. Appropriate clothing, personal safety and sewing equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 2198 Practicum In Dance: 1-3 semester hours**

Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work will involve evening, weekend, and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2210 Ensemble Acting: 3 semester hours**

Prerequisites: TH DAN 1210. A Laboratory acting course providing an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavsky-based actor training. Emphasis is paid to ensemble creations, physical characterization, cooperative methods and object performance. May involve practices and theories of Jerzy Grotowski, Augusto Boal, Jacques Lecoq, and/or Tadashi Suzuki.

**TH DAN 2241 Argumentation and Debate: 3 semester hours**

Prerequisite: COMM 1040, or COMM 1041, or consent of instructor. Principles of argumentation and debate with practice in preparing briefs and in delivering spoken arguments in formal debate. Emphasis on analysis of issues, logical reasoning, and audience analysis.

**TH DAN 2244 Introduction to Directing: 3 semester hours**

Prerequisite: TH DAN 2105. An overview of the analytical and creative processes that inform the director's work. Students engage in a close examination of texts, key concepts, and directorial choices in staged performances, opera, films, and video. Students will learn how to articulate responses to theatrical/film work, create and present projects, understand the history and role of the director, and unlock the imagination as an interpretive artist.

**TH DAN 2250 Scenic Fabrication: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. A survey of the theories, terminology, and practices of professional methods and equipment of scenic and properties fabrication, painting, and rigging. Students will learn current professional techniques in wood, metal, and plastic fabrication including the operation and programming of CNC production machinery. Course includes practical application through 45 hours of lab work in conjunction with department productions. Personal safety equipment will be required.

**TH DAN 2252 Costume Design I: 3 semester hours**

Prerequisites: TH DAN 1910 or consent of the instructor. Introduces students to the costume design process including researching costumes, techniques in rendering and painting for costume design, required paperwork for the costume designer, and the understanding of fabrics. Students will use introductory skills to create practical costume design projects.

**TH DAN 2260 Introduction To Theatrical Costume Production: 3 semester hours**

A survey of the theory, practices and vocabulary of theatrical costuming; the visualization and realization of the costume through the arts of pattern cutting; the construction techniques; draping; dyeing, painting, and distressing. Course includes practical application of techniques through required 45 hours of lab work in conjunction with current department productions.

**TH DAN 2270 Audio Recording for Live Production: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. This course is intended to provide an introduction to audio systems. It will include exposure to waveforms and the physical qualities of sound, as well as audio signal flow in analog and digital systems. The course is also an introduction to acoustics, both indoors and out, microphone theory and proper use, design and placement of speakers, microphones and audio recording equipment.

**TH DAN 2290 2D and 3D CAD for Live Performance: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Survey course covering the fundamental techniques of two- and three-dimensional computer aided drafting and rendering.

**TH DAN 2300 Stage Management: 3 semester hours**

Prerequisite: Consent of instructor. Course develops fundamental stage management skills needed to supervise all operative aspects of play production from auditions through performance. These skills include: interpersonal and leadership skills, conflict resolution techniques, venue and staff management/scheduling, and technical script analysis. Course includes production experience.

**TH DAN 2800 History of Costumes: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the Western history of costumes through the cultural, historical, and political influences on fashion from primitive times to the present.

**TH DAN 2810 History Of World Theatre And Drama Through The Restoration: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the history of influence of different cultures, traditions, and technologies on development of theatre as a social institution. History of Theatre and drama from ancient cultures to the Restoration period. Ritual and religious drama. Study of the origins of theatre and drama from oral tradition, myth, storytelling, Shamanism and collective ritual, Greek festival drama, and cloister drama of different cultures. Rise of secular drama, the traditions of classical Greek theatre. Study of the Renaissance, and drama in Europe, Asia, Africa, and the New World.

**TH DAN 2820 History Of World Theatre & Drama From 18th C To Contemporary Time: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. History of theatre from 18th century to contemporary times. Survey of history of influence of different cultures, traditions, and technologies on the development of theatre as a social institution. Study of realism and subsequent departures from realism in theatre, drama and performance.

**TH DAN 2840 History Of Dance To The 19th Century: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance from pre-history through the middle ages and renaissance to 19th century. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression.

**TH DAN 2841 History Of Dance From The 19Th Century To Contemporary Times: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance practice from 1850 to the present. History of modern dance: art dance from Isadora Duncan to Martha Graham.

**TH DAN 3006 Advanced Ballet Technique: 2 semester hours**

Prerequisites: TH DAN 1006 and consent of instructor. Advanced ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will include advanced barre exercises, center work, and across the floor progressions. Variations, partnering, and pointe work may be incorporated at the discretion of the instructor. Dance attire and ballet slippers will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3007 Advanced Jazz Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1007 and consent of instructor. Advanced jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and performance. Study of unique dance styles and artists that have influenced the stage, video, film and commercial and media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3008 Advanced Modern Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1008 and consent of instructor. Advanced level of modern dance movement, technique, vocabulary, and aesthetics. Incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 6 credit hours.

**TH DAN 3009 Dance Choreography For The Stage, Television And Film: 3 semester hours**

Prerequisites: 4 Credit Hours of any level and combination of TH DAN 1006, TH DAN 1007, TH DAN 1008, TH DAN 2006, TH DAN 2007, TH DAN 2008, TH DAN 3006, TH DAN 3007 and TH DAN 3008. Course will focus on directed movement studies and composition techniques for the stage, television, and film. Personal creativity and original movement inventions will be explored, as well as the creation, development, and transformation of original movement studies into completed works. Dance attire and dance shoes are required. Course may be repeated for up to 6 credit hours.

**TH DAN 3060 Advanced Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1060, TH DAN 1900 and Consent of instructor. Practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3195 Advanced Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 3196 Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work may involve evening and weekend assigned times. Additional daytime hours will vary according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3197 Advanced Practicum In Costume: 1-3 semester hours**

This course provides advanced practical experience in costume construction, cutting, draping, millinery, fabric dyeing/ painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime Lab hours, occasional weekend and/or evening laboratory time may be required. Appropriate clothing and personal safety equipment will be required. Personal equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3198 Advanced Practicum In Dance: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. May involve additional hours including evening and weekend assigned times. Credit will be based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3211 Period Styles of Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. The course will expose students to the rigorous analytical, physical, intellectual, and vocal demands of acting within a specific historical period. Students will focus on monologue and scene study from the following: Greek Tragedy, Spanish Golden Age, Elizabethan Theatre, Restoration Comedy, Italian Commedia, French Farce, and British comedy of Manners with a special focus on style distinctions between each.

**TH DAN 3218 Shakespeare and Verse Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. An intermediate acting course designed to engage students in Shakespeare's dramatic works from the point of view of the actor. Through text analysis, scene study, vocal work, and acting exercises, students explore the meaning, music and theatrical power of Shakespeare and other playwrights. Topics explored include: blank verse acting, line breath support, scansion, phrasing, word emphasis, antithesis, and imagery.

**TH DAN 3250 Costume Crafts: 3 semester hours**

Prerequisites: TH DAN 2260 or Consent of the Instructor. Develop the skills and techniques needed to execute crafts used in costume design including millinery, mask making, fabric painting and dyeing, wig manipulation, armor, and other craft work. Course may be repeated for up to 6 credit hours.

**TH DAN 3252 Costume Design II: 3 semester hours**

Prerequisites: TH DAN 2252 and TH DAN 2260, or consent of instructor. Content of course includes study of theories, styles, visualization of ideas, and techniques of costume design; discussion of principles of design, script analysis, the collaborative roles of designers in the theatrical production; research, and exploration of character representation; study of the human figure, drawing, and rendering techniques.

**TH DAN 3257 Makeup For Theatrical Productions: 2 semester hours**

Prerequisites: TH DAN 1800, TH DAN 1910, or consent of instructor. The art of makeup and its relation to production. Overview of European history and tradition of makeup. Theory, history and the practice of makeup traditions for theatre, dance and performance will be included.

**TH DAN 3260 Digital Scenography: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2250, TH DAN 2290, or consent of instructor. Survey of the professional theories and practices of scenography for live performances. This course emphasizes a digital creative process including digital sketches, CAD, three-dimensional modeling, digital rendering, and collaboration.

**TH DAN 3261 Digital Lighting Design: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2280, or consent of instructor. Survey of the theories and techniques of digital lighting design and 3D visualization for live performance. This course will emphasize current and emerging digital design practices used by professional lighting designers including 3D visualization, CAD, software-based paperwork creation and management, and collaboration in the digital age.

**TH DAN 3263 Techniques in Scenic Finishes: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, or consent of instructor. Survey of theories, materials, and professional techniques used in finishing fabricated scenery. This course will focus on traditional scenic painting, faux finishing techniques, digital graphics production and application, and design and production of digitally printed and cut drops. Course includes practical application through 45 hours of lab work in conjunction with departmental productions and class projects.

**TH DAN 3305 Writing For Performance: 3 semester hours**

Prerequisite: Consent of instructor. Introduction to writing for performance, including playwriting and dramatic adaptation. Students' particular interests will determine course content: ranging from sketch comedy or adaptation of literature for the stage, to full-length comic or dramatic plays. This course is writing intensive and may require additional laboratory hours.

**TH DAN 3399 Stage Combat: 3 semester hours**

Prerequisites: Junior or Senior standing, or consent of instructor. This is a movement course designed to expand the acting student's awareness of the body as a vehicle for the communication of emotion, action, and drama on the stage. It will introduce the skills and techniques necessary for the creation of safe and effective illusions of violence for the stage.

**TH DAN 4020 Directing for the Camera: 3 semester hours**

Prerequisites: TH DAN 2020. This directing course prepares the student director to work with both the actors and the cinematographer to achieve the directorial concept. The director will work with actors and a cinematographer to produce a short-length film/video from a prepared script. The creation of shooting scripts, story boards, and a shooting schedule are covered in the course.

**TH DAN 4040 Special Topics in Theatre: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Theatre. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4041 Special Topics in Dance: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Dance. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4220 Directing For The Theatre: 3 semester hours**

Prerequisites: TH DAN 1210 or consent of instructor. A survey of the theories and practices of theatrical directing, beginning with the theories and techniques of accomplished directors. The stage director's role in performance development will be studied through script analysis, production planning, and the rehearsal process, culminating with a live performance. Final projects are laboratory scenes or a short one-act play.

**TH DAN 4261 Advanced Projects In Design And Technology: 1-3 semester hours**

Prerequisites: TH DAN 1910 and consent of instructor. Provides opportunities for supervised advanced projects in theatre design or technology in conjunction with departmental productions, or other independent study projects. Credit assigned based on scope of project. Course may be repeated for up to 6 credit hours.

**TH DAN 4390 Theatre Internship: 1-3 semester hours**

Prerequisites: Junior level with consent of instructor. Provides opportunities for supervised projects in conjunction with off-campus professional theatre and/or dance companies in performance, management, design or technology. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4391 Dance Internship: 1-3 semester hours**

Prerequisites: Junior level with Consent of instructor. Provides credit for approved supervised projects in conjunction with off-campus professional theatre and/or dance companies. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as SEC ED 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communication or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989: Secondary Professional Internship. This course must be completed in residence. Not available for graduate credit.

**TH DAN 4900 Senior Project: 3 semester hours**

The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty.

## Music

### Performing Ensembles

Membership in Music Department performing ensembles (choral, orchestral, concert and pep band, jazz, chamber, etc.) is open to UMSL students in all majors and minors. Admission to most ensembles is by audition (consent of the instructor). EN PER 1400, University Chorus, is open to all university students without audition.

### General Information

### Degrees and Areas of Concentration

The Department of Music offers programs of study leading to the B.M. degree in music education (and state teaching certification in grades K-12); the B.M. degree with an emphasis in performance; the B.M. degree

with an emphasis in theory/composition; the B.M. degree with elective studies in business; and the B.A. degree in music.

Instruction in piano, organ, voice, and all band and orchestral instruments is given by full-time faculty and adjunct faculty who are also professional musicians. Some are members of the St. Louis Symphony Orchestra. Faculty recitals are regularly scheduled.

## Music Minors

A minor in music is available.

## Facilities

The Department's facilities, classrooms, studios, practice rooms, and listening labs are located in the Music Building. Rehearsal rooms are in the Villa. Performance spaces are in the Touhill Performing Arts Center.

## Ensembles

Fourteen performing ensembles are open to all by audition with credit optional:

EN PER 1400	University Chorus	1
EN PER 1410	The University Singers	1
EN PER 1420	University Concert Band	1
EN PER 1500	University Orchestra	1
EN PER 1520	University Symphonic Band	1
EN PER 1530	University Wind Ensemble	1
EN PER 1541	Chamber Ensemble Brass	1
EN PER 1542	Jazz Combo	1
EN PER 1543	Chamber Ensemble Percussion	1
EN PER 1544	Chamber Ensemble Strings	1
EN PER 1545	Chamber Ensemble Voice	1
EN PER 1546	Chamber Ensemble Woodwinds	1
EN PER 1550	Jazz Ensemble	1
EN PER 1560	Opera Workshop	1

Each year more than 100 student recitals and concerts are presented.

Additional information may be obtained by contacting the Department of Music: (314) 516-5980.

## Career Outlook

A music degree builds the foundation for a career in professional performance, for teaching in a school or private studio, or for serving as a church music director. A music degree may also prepare one for positions in the music industry (recording, publishing, radio programming, manufacturing, or music retail). A trained artistic mind can also be valuable in the fields of advertising, public relations, and consumer services.

A number of UMSL music graduates have been readily accepted into outstanding graduate programs, including our own Master of Music Education degree program. Many are pursuing successful careers in music education, business, and industry, or as professional performers.

## Faculty Overview

Music faculty members have received recognition for distinguished achievements in conducting, composition, and performance. The faculty is also recognized for research in musicology, music theory, and music education. Part-time applied music lecturers are professional musicians.

The Department of Music is accredited by the National Association of Schools of Music.

## Undergraduate Studies

### General Education Requirements

General education requirements (p. 34) apply to all majors, except that students in the B.M. with elective studies in business and B.M. in music education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain an overall GPA of 2.5 in all music courses to meet degree requirements.

Non-music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Singers; EN PER 1420, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

### General Education Learning Outcomes for Music Students

- Students will demonstrate enhanced aesthetic appreciation and musical discrimination.
- Students will demonstrate knowledge of a wide range of world music.
- Students will demonstrate knowledge of relationships among the arts, societal influences on music and musical influences on society.

## Degree Requirements

Admission to all music degree programs is by audition and interview to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students' prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/winter semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

## Declaring the Music Major

Upon admission to the University, a student seeking to major in music is first designated as a "pre-music major." At the end of the student's first semester, a panel of music faculty convenes to evaluate that student's efforts and accomplishments (both musical and academic) during the semester. Following this evaluation, the student receives written notification about his or her status. At this time, the student may be (a) allowed to officially declare music as his or her major, (b) asked to continue studies and a pre-music major for another semester, or (c) instructed to seek a major outside the Department of Music. If the student is asked to continue as a pre-music major, the process will repeat during

the following semester. This policy applies equally to first-time college students as well as students transferring from other institutions.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all music degree programs. Students in the bachelor of music-performance emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student's applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

Other Requirements

Music majors are required to enroll in an approved ensemble (University Symphonic Band, University Wind Ensemble, University Singers, University Chorus, or University Orchestra) each semester, to study one applied area progressively each semester, and to enroll in the appropriate pedagogy and literature seminar each semester of the degree program. Music education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and percussion students—University Symphonic Band or University Wind Ensemble;
- string students--University Orchestra;
- voice students--University Singers (or by special permission, University Chorus);
- keyboard and guitar students--any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing.
- Instrumental students may be required to participate in additional ensembles to enhance their musical development.

Majors are required to appear in performance at the department's discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or equivalent for instrumentalists; or PRACTM 3290, Piano Proficiency VI, or equivalent for vocalists.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all music majors:

Music Theory		
THRY COM 1300	Introduction to Music Theory	1
THRY COM 1301	Theory Of Music I	3
THRY COM 1302	Aural Training I	1
THRY COM 1311	Theory Of Music II	3
THRY COM 1312	Aural Training II	1
THRY COM 2301	Theory Of Music III	3
THRY COM 2302	Aural Training III	1
THRY COM 2311	Theory Of Music IV	3
THRY COM 2312	Aural Training IV	1

THRY COM 3410	Orchestration	3
Piano Proficiency		
PRACTM 1140	Piano Proficiency I	1
PRACTM 1150	Piano Proficiency II	1
PRACTM 2160	Piano Proficiency III	1
PRACTM 2180	Piano Proficiency IV	1
Conducting		
PRACTM 2510	Conducting I	2
Music History and Literature		
M H L T 1010	History Of Western Music I	3
M H L T 1020	History Of Western Music II	3
Choose one of the following:		3
M H L T 1150	Drumming Cultures of the World	
M H L T 1160	Musical Journey through Latin America	
M H L T 1170	Musical Journey through the Far East	
M H L T 1180	Musical Journal Through Africa	
Select at least one upper level history course 4000 – 4280.		3
Applied Music		
AP MUS 1460	Seminar In Pedagogy And Literature	0
AP MUS 3460	Seminar In Pedagogy And Literature	0
AP MUS 4460	Seminar In Pedagogy And Literature	0
Total Hours		38

In addition to the core curriculum, students must fulfill the requirements for the specific degree program or emphasis area as listed below:

Learning Outcomes for All Music Degrees

- Students will demonstrate the solo and ensemble performance skills necessary to become a professional musician.
- Students will demonstrate knowledge in music theory, music history, and music literature, necessary to become a professional musician.
- Students will demonstrate the ability to speak and write clearly and effectively about music.

Bachelor of Arts in Music

In addition to the required core curriculum, candidates must complete the following:

PRACTM 3920	Senior Research	2-4
Applied Area		
One hour every semester in progress toward degree with a minimum of 8 credit hours		8
Ensemble		
Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree		4
Foreign Language		
Candidates for the B.A. degree in Music are required to complete 13 credit hours or the equivalent in proficiency in one foreign language. <sup>1</sup>		13
Total Hours		40-42

<sup>1</sup> Please see the College of Fine Arts and Communication's Baccalaureate Degree Requirements for additional information about the foreign language requirement.

## Bachelor of Music with an emphasis in Music Education

In addition to the requirement for a successful audition on their primary instrument, piano and guitar students applying for the BM: Music Education program must also successfully audition for the full participation in (1) Applied Voice (six hours) and University Singers (for those seeking vocal/choral certification), or (2) Symphonic Band, Wind Ensemble or Orchestra (for those seeking instrumental certification).

In addition to the required music core curriculum, candidates must complete the following:

### Other General Education Requirements <sup>1</sup>

#### Communication Skills

Select at least two courses in English composition and one in oral communications.

#### Social Studies

Courses in American history, American government and general psychology.

#### GPA Requirement

Students enrolled in B.M. in music education must maintain minimum GPAs (2.75 cumulative; 3.00 music; and 3.00 professional education).

#### Proficiency Exam

Students working toward certification in choral/vocal or instrumental music K-12 are required to pass a keyboard proficiency examination before admission to student teaching in music, usually before or during the sixth semester of their program.

<sup>1</sup> All of the courses in the General Education Requirement Area must be a minimum of two semester hours.

### Instrumental Track

AP MUS 1410 - 3459	7
One hour every semester in progress toward degree with a minimum of 7 credit hours	
EN PER 1500 University Orchestra <sup>1</sup>	4
or EN PER 1520 University Symphonic Band	
or EN PER 1530 University Wind Ensemble	
MUS ED 3570 Curriculum And Methods Of Teaching Elementary School Music <sup>2</sup>	3
MUS ED 3680 Curriculum And Methods Of Teaching Instrumental Music I <sup>2</sup>	2
MUS ED 3700 Curriculum And Methods Of Teaching Instrumental Music II <sup>2</sup>	2
PDGOGY 1250 Brass Techniques	2
PDGOGY 1260 Woodwind Techniques	2
PDGOGY 1270 String Techniques	2
PDGOGY 1280 Percussion Instrumental Techniques	2
PRACTM 2610 Instrumental Literature Laboratory	1
PRACTM 3521 Conducting II - Instrumental	2
<b>Total Hours</b>	<b>29</b>

<sup>1</sup> One hour every semester in progress toward degree with a minimum of 4 credit hours in EN PER 1500, EN PER 1520, or EN PER 1530.

<sup>2</sup> Must be taken **in residence** before enrolling in SEC ED 4993 and SEC ED 4994.

### Vocal Track <sup>1</sup>

AP MUS 1410 - 3459	7
One hour every semester in progress toward degree with a minimum of 7 credit hours	
EN PER 1410 The University Singers <sup>2</sup>	4
MUS ED 3570 Curriculum And Methods Of Teaching Elementary School Music <sup>3</sup>	3
MUS ED 3690 Curriculum and Methods of Secondary General Music <sup>3</sup>	2
MUS ED 3710 Curriculum And Methods Of Teaching Secondary Choral Music <sup>3</sup>	2
PRACTM 1250 Singer's Diction: English, Italian And German	1
PRACTM 1260 Singer's Diction: Latin, French, And Spanish	1
PRACTM 3522 Conducting II - Choral	2
PRACTM 2611 Elementary School Choral Literature Laboratory	1
PRACTM 3621 Junior-Senior High School Choral Literature Laboratory	1
PRACTM 3190 Piano Proficiency V	1
PRACTM 3290 Piano Proficiency VI	1
THRY COM 3420 Choral Arranging	2
<b>Total Hours</b>	<b>28</b>

<sup>1</sup> Vocal certification students whose applied area is not voice must consult an advisor for additional courses.

<sup>2</sup> One hour every semester in progress toward degree with a minimum of 4 credit hours.

<sup>3</sup> Must be taken **in residence** before enrolling in SEC ED 4993 and SEC ED 4994.

## Professional Education and Student Teaching

### Level I: Exploring Education as a Profession

TCH ED 2209 Foundations of Teaching in American Schools	3
ED PSY 2212 Introduction To Learners And Learning	3

### Level II: Teaching and Learning Across Context and Clinical Experiences

TCH ED 3313 Psychology of the Exceptional Child	3
ED PSY 3312 Psychology of Learning, Instruction, and Assessment	3
TCH ED 4391 Literacy for Adolescent Learners in Content Areas	3
SEC ED 4989 Practicum I: Site Based Experience	3

### Level III: Synthesizing Theory and Practice in Education

SEC ED 4993 Practicum II: Site Based Experience in Elementary (K-6) Music	6
SEC ED 4994 Practicum II: Site Based Experience in Secondary (7-12) Music	6

**Total Hours** **30**

## Learning Outcomes for Music Education Students

- Students will demonstrate the solo and ensemble performance skills necessary to become a professional music educator.
- Students will demonstrate knowledge in music theory, music history, and music literature, necessary to become a professional music educator.
- Students will demonstrate pedagogical skills and knowledge of resources to become a professional music educator.
- Students will demonstrate the ability to speak and write clearly and effectively about music.

## Bachelor of Music with an Emphasis in Performance

In addition to the required music core curriculum, candidates must complete the following:

PDGOGY 1560	Piano Pedagogy (keyboard students only)	2
PRACTM 1250	Singer's Diction: English, Italian And German (voice majors only)	1
PRACTM 1260	Singer's Diction: Latin, French, And Spanish (voice majors only)	1
THRY COM 3110	Analysis Of Music from 1900 to Present	2
THRY COM 3120	Tonal Counterpoint	2
PRACTM 3190	Piano Proficiency V (voice majors only)	1
PRACTM 3290	Piano Proficiency VI (voice majors only)	1
PRACTM 3521	Conducting II - Instrumental	2
or PRACTM 3522	Conducting II - Choral	
PRACTM 3920	Senior Research	2-4

### Music History and Literature

Select an additional upper level course M H L T 4000-4280.

### Applied Area <sup>1</sup>

Must enroll every semester in progress toward degree with a minimum of 12 credit hours of applied music, 8 credit hours of which must be AP MUS 4440-4459 level. Junior and senior recital required.

### Ensemble

Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree.

Chamber Ensemble/Accompanying 6

### Foreign Language

Candidates pursuing this emphasis area with an applied area in voice must complete two semesters of one foreign language selected from French, German, or Italian

**Total Hours** 36-38

<sup>1</sup> Students in Applied Music must pass a junior-standing exam to confirm their level of performance skills for enrollment in AP MUS 4440 - AP MUS 4459.

## Bachelor of Music with an Emphasis in Composition

(pending CBHE approval)

In addition to the required music core curriculum, all candidates must complete the following:

### Theory and Composition

THRY COM 3110	Analysis Of Music from 1900 to Present	2
THRY COM 3120	Tonal Counterpoint	2
THRY COM 3300	Seminar In Composition	2
THRY COM 3310	Studio Composition	1
THRY COM 3420	Choral Arranging	2

### Music History and Literature

An additional upper level course MHLT 4000- MHLT 4280 is required.

### Practicum

PRACTM 3521	Conducting II - Instrumental	2
or PRACTM 3522	Conducting II - Choral	
PRACTM 3190	Piano Proficiency V	1
PRACTM 4100	Senior Project in Theory/Composition	2-4

### Applied Area

1 hour every semester in progress toward degree with a minimum of 8 credit hours 8

### Ensemble

Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree. 4

**Total Hours** 26-28

## Bachelor of Music with an Emphasis in Theory

(pending CBHE approval)

In addition to the required music core curriculum, all candidates must complete the following:

### Theory and Composition

THRY COM 3110	Analysis Of Music from 1900 to Present	2
THRY COM 3120	Tonal Counterpoint	2
THRY COM 3130	Advanced Analytical Techniques	2
THRY COM 3140	Readings in Music Theory	2
THRY COM 3420	Choral Arranging	2

### Music History and Literature

An additional upper level course MHLT 4000-MHLT 4280 is required.

### Practicum

PRACTM 3521	Conducting II - Instrumental	2
or PRACTM 3522	Conducting II - Choral	
PRACTM 3190	Piano Proficiency V	1
PRACTM 3280	Score Reading at the Keyboard	1
PRACTM 4100	Senior Project in Theory/Composition	2-4

### Applied Area

1 hour every semester in progress toward degree with a minimum of 8 credit hours. 8

### Ensemble

Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree. 4

**Total Hours** 28-30

## Bachelor of Music with Elective Studies in Business

In addition to the required music core curriculum, candidates must complete the following:

### Additional General Education Requirements <sup>1</sup>

PSYCH 1003	General Psychology	3
or SOC 1010	Introduction To Sociology	
ECON 1001	Principles Of Microeconomics	3

### Applied Area

One hour every semester in progress toward degree with a minimum of 8 credit hours.

Select one additional course from MHLT 4000 – 4459.

### Ensemble

Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree.

### Internship

PRACTM 4920	Internship (replaces PRACTM 3920 Senior Research in Core Curriculum)	1-3
-------------	--	-----

### English

Select one of the following:

ENGL 3100	Junior-Level Writing	3
ENGL 3120	Business Writing	
ENGL 3130	Technical Writing	

### Business Administration

ACCTNG 2400	Fundamentals Of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
MGMT 3600	Management And Organizational Behavior	3
MKTG 3700	Basic Marketing	3

Select two of the following:

ACCTNG 3441	Income Taxes	
BUS AD 3900	Business Law: Contracts, Sales, Secured Transactions, Bankruptcy	
BUS AD 2900	Legal Environment Of Business	
FINANCE 3500	Financial Management	
INFSYS 1800	Computers And Information Systems	
MGMT 3611	Advanced Management And Organizational Behavior	
MGMT 3621	Human Resource Management	
MGMT 3622	Industrial And Labor Relations	
MKTG 3710	Consumer Behavior	

### Total Hours

40-42

<sup>1</sup> Prerequisites to the required business administration courses.

## Curricula for Minors

### Minor in Music

Candidates must complete the following courses (27 hours):

#### Music Theory

THRY COM 1301	Theory Of Music I (p. 470)	3
---------------	----------------------------	---

THRY COM 1302	Aural Training I (p. 470)	1
---------------	---------------------------	---

THRY COM 1311	Theory Of Music II (p. 470)	3
---------------	-----------------------------	---

THRY COM 1312	Aural Training II (p. 470)	1
---------------	----------------------------	---

#### Music History and Literature

M H L T 1010	History Of Western Music I (p. 470)	3
--------------	-------------------------------------	---

or M H L T 1020	History Of Western Music II (p. 470)	
-----------------	--------------------------------------	--

Select any M H L T course	4220-4280	3
---------------------------	-----------	---

#### Applied Area

Private Lessons		4
-----------------	--	---

#### Ensemble

Ensemble (4 hours maximum credit)		2
-----------------------------------	--	---

Select six credit hours from the following:

PRACTM 2160	Piano Proficiency III (Prerequisite: PRACTM 1150) (p. 470)	
-------------	--	--

PRACTM 2180	Piano Proficiency IV (p. 470)	
-------------	-------------------------------	--

THRY COM 2301	Theory Of Music III (p. 470)	
---------------	------------------------------	--

THRY COM 2302	Aural Training III (p. 470)	
---------------	-----------------------------	--

THRY COM 2311	Theory Of Music IV (p. 470)	
---------------	-----------------------------	--

THRY COM 2312	Aural Training IV (p. 470)	
---------------	----------------------------	--

THRY COM 3410	Orchestration (p. 470)	
---------------	------------------------	--

PDGOGY 1560	Piano Pedagogy (p. 470)	
-------------	-------------------------	--

PRACTM 2160	Piano Proficiency III (Prerequisite: PRACTM 1150) (p. 470)	
-------------	--	--

PRACTM 2180	Piano Proficiency IV (p. 470)	
-------------	-------------------------------	--

THRY COM 2301	Theory Of Music III (p. 470)	
---------------	------------------------------	--

THRY COM 2302	Aural Training III (p. 470)	
---------------	-----------------------------	--

THRY COM 2311	Theory Of Music IV (p. 470)	
---------------	-----------------------------	--

THRY COM 2312	Aural Training IV (p. 470)	
---------------	----------------------------	--

THRY COM 3410 (p. 470)	Orchestration
------------------------------	---------------

**Total Hours** 26

Music education methods courses and instrumental techniques courses may not be taken to complete this minor.

Non-keyboard players are required to pass an exam of piano proficiency or equivalent.

A GPA of 2.5 for all music hours is required to complete this minor.

## Minor in Jazz Studies

Candidates must complete 23 credit hours from the following:

### Music Theory

THRY COM 1300	Introduction to Music Theory	1
(p. 470)		
THRY COM 1301	Theory Of Music I	3
(p. 470)		
THRY COM 1302	Aural Training I	1
(p. 470)		
THRY COM 1311	Theory Of Music II	3
(p. 470)		
THRY COM 1312	Aural Training II	1
(p. 470)		

### Music History and Literature

M H L T 1070	Introduction To Jazz	3
(p. 470)		

### Piano Proficiency

PRACTM 1140/1150 (p. 470)	Piano Proficiency I	1
PRACTM 1150 (p. 470)	Piano Proficiency II	1

### Applied Area

2 credit hours minimum, to be selected from this group:

PRACTM 2190 (p. 470)	Piano Jazz	
PRACTM 2191 (p. 470)	Brass Jazz	
PRACTM 2192 (p. 470)	Woodwind Jazz	
PRACTM 2193 (p. 470)	Rhythm Section Jazz	

### Pedagogy

PDGOGY 2220 (p. 470)	Jazz Pedagogy	3
-------------------------	---------------	---

### Ensemble

2 credit hours of each minimum

EN PER 1542 (p. 470)	Jazz Combo	2
EN PER 1550 (p. 470)	Jazz Ensemble	2

**Total Hours** 23

## Graduate Study

### Master of Music Education

The master of music education degree is designed to enable music specialists in grades K-12 to pursue continued professional growth in an emphasis area of their choice.

### Admission Requirements

Admission to the program requires a bachelor of music in music education (or equivalent) degree, admission to the Graduate School, and two letters of recommendation. Student should also submit a resume, a statement of purpose, and a 20 - 30 minute video of their teaching directly to the Director of the MME program.

The program requires completion of 30 hours of graduate credit, 20 of which must be earned in residence.

### Required Courses and Options:

The minimum 30-hour program includes the following requirements.

#### Music Education Core (12 credit hours)

MUS ED 5810	Foundations Of Music Education	3
MUS ED 5830	Contemporary Music Education	3
MUS ED 5910	Music Education Research	3
MUS ED 5990	Master's Project In Music Education	3

#### Music Education Electives (6 credits from following)

MUS ED 5060	Graduate Workshop In Music Education	1-5
MUS ED 5510	Graduate Instrumental Methods	3
MUS ED 5610	Graduate Choral Methods	3
MUS ED 5620	Guitar In The Classroom	3
MUS ED 5710	General Music: A Model For Multi-Faceted Learning	3
MUS ED 5840	Problems Of Urban Music Education	3
MUS ED 5920	Psychology Of Music	3
PDGOGY 5110	Graduate Jazz Pedagogy	3
PRACTM 5020	Choral Literature	3
PRACTM 5035	Instrumental Literature	3
PRACTM 5210	Graduate Conducting	3
THRY COM 5110	Scoring And Arranging	3

#### Education Electives (6 credits from the following) <sup>1</sup>

ED TECH 5301	Introduction To Computers And The Internet In Education	3
ED TECH 5340	Selection And Utilization Of Educational Multimedia	3
ED PSY 6030	Instruction, Learning And Assessment	3
ED PSY 6109	Learning And Development In Secondary School Settings	4
ED PSY 6111	Psychology Of Education	3
ED REM 6707	Classroom Measurement And Evaluation	3
ED REM 6710	Educational Research Methods and Design	3
ED REM 6716	Academic Assessment and Intervention	3
SPEC ED 6345	Characteristics and Education of Students with High-Incidence Disabilities	3
SPEC ED 6412	Psychology Of Exceptional Children	3
SEC ED 6415	Curriculum Leadership in Education	3
TCH ED 5312	Differentiated Instruction	4

TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6020	Teacher Action, Advocacy And Leadership	3
<b>Free Electives (6 credits from the following) <sup>2</sup></b>		
AP MUS 5430	Special Applied Studies <sup>3</sup>	1
AP MUS 5440	Graduate Applied Music <sup>3</sup>	1
EN PER 5310	Graduate Chamber Ensemble <sup>3</sup>	1
EN PER 5490	Graduate Ensemble <sup>3</sup>	1
MUS ED 5750	Computer Applications in Music Education	3
MUS ED 5760	Multimedia in Music Education	3
MUS ED 5770	Music Notation Software for Music Educators	3
MUS ED 5800	Musical Acoustics	3

- <sup>1</sup> Other options may be available with permission of the Director of the Master of Music Education program.
- <sup>2</sup> May choose from electives listed under Music Education and Education (above). Other graduate courses may be applied to degree program with written permission from the Director of the Master of Music Education program.
- <sup>3</sup> May be repeated for up to 3 credits.

## Career Outlook

Many graduate students in music education will already hold full-time music teaching positions. A graduate degree in music education allows for continued professional growth. Music specialists may refine their teaching expertise, add to their understanding and knowledge about music and educational processes, become more specialized in a specific emphasis area of music education (choral, instrumental, general music or music technology), or any combination of these professional growth areas.

Graduate-level work in music education is often required to renew a teacher's certificate or to satisfy professional growth requirements specified by an employing school or school district or to advance to new positions within the field of music education.

## Sample Four Year Plans

Bachelor of Arts in Music (p. 477)

Bachelor of Music:

- Music Education (p. 477), Choir
- Music Education, Instrumental (p. 478)
- Performance, Instrumental (p. 479)
- Performance, Keyboard (p. 479)
- Performance, Voice (p. 480)
- Composition (p. 480)
- Theory (p. 481)
- Elective Studies in Business (p. 481)

- <sup>1</sup> INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

*PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.*

## Applied Music Courses

### **AP MUS 1410 Secondary Applied Music: Bassoon: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1411 Secondary Applied Music: Clarinet: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1412 Secondary Applied Music: Classical Guitar: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1413 Secondary Applied Music: Euphonium: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1414 Secondary Applied Music: Flute: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1415 Secondary Applied Music: French Horn: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1417 Secondary Applied Music: Oboe: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1418 Secondary Applied Music: Organ: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1419 Secondary Applied Music: Percussion: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1420 Secondary Applied Music: Piano: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1421 Secondary Applied Music: Saxophone: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1422 Secondary Applied Music: Trombone: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1423 Secondary Applied Music: Trumpet: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1424 Secondary Applied Music: Tuba: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1425 Secondary Applied Music: Violin: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1426 Secondary Applied Music: Viola: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1427 Secondary Applied Music: Violoncello: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

### **AP MUS 1428 Secondary Applied Music: String Bass: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1429 Secondary Applied Music: Voice: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1430 Secondary Applied Music: Jazz Studies: 1 semester hour**

Prerequisite: by audition and consent of department. Individual instruction in jazz performance and literature on the designated instrument. Not applicable to the applied music requirement for music major or music minor degrees. May be repeated for credit.

**AP MUS 1440 Bassoon: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1441 Clarinet: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1442 Classical Guitar: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1443 Euphonium: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1444 Flute: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1445 French Horn: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1446 Harp: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1447 Oboe: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1448 Organ: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1449 Percussion: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1450 Piano: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1451 Saxophone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1452 Trombone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1453 Trumpet: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1454 Tuba: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1455 Violin: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1456 Viola: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1457 Violoncello: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1458 String Bass: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1459 Voice: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 3440 Bassoon: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3441 Clarinet: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3442 Classical Guitar: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3443 Euphonium: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3444 Flute: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3445 French Horn: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3446 Harp: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3447 Oboe: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3448 Organ: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3449 Percussion: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3450 Piano: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3451 Saxophone: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3452 Trombone: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3453 Trumpet: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3454 Tuba: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3455 Violin: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3456 Viola: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3457 Violoncello: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3458 String Bass: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3459 Voice: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with a parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory basis.

**AP MUS 4440 Bassoon: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4441 Clarinet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4442 Classical Guitar: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4443 Euphonium: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4444 Flute: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4445 French Horn: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4446 Harp: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4447 Oboe: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4448 Organ: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4449 Percussion: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4450 Piano: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4451 Saxophone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4452 Trombone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4453 Trumpet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4454 Tuba: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4455 Violin: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar Music 4460.

**AP MUS 4456 Viola: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4457 Violoncello: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4458 String Bass: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4459 Voice: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisite: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 4500 Honors Recital: 2-4 semester hours**

Prerequisites: Minimum of three semesters of applied music at the upper division level; completion of the required junior and/or senior degree recitals; permission of the applied music faculty. Preparation and public performance beyond the required degree recital(s) for undergraduate music programs. By approval of the applied music instructor, the Honors Recital may be a lecture-recital focusing on both the performance and the historical, analytical, and/or pedagogical aspects of selected literature, a public performance of a complete concerto or major solo work with orchestra or symphonic band, a major music theatre or opera role in a full production, a full chamber music recital, or other similar major performances.

**AP MUS 5430 Special Applied Studies: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Individual instruction in the performance and literature of an applied area other than the student's primary performance study. No jury examination is required. May be repeated for credit.

**AP MUS 5440 Graduate Applied Music: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Instruction is offered in the following areas: bassoon, clarinet, classical guitar, euphonium, flute, French horn, harp oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violin, viola, violoncello, string bass and voice. May be repeated for credit.

## Ensemble Performance Courses

### ***EN PER 1399 Music Ensemble Registration: 0 semester hours***

Prerequisite: Consent of instructor. Study, preparation, and performance of music ensemble literature. Concurrent registration in one or more of the following courses is required: Ensemble performance EN PER 1400, EN PER 1410, EN PER 1500, EN PER 1520, EN PER 1530, EN PER 1541, EN PER 1542, EN PER 1543, EN PER 1544, EN PER 1545, EN PER 1546, EN PER 1550, EN PER 1560, EN PER 1570, EN PER 4560, EN PER 5310, EN PER 5490.

### ***EN PER 1400 University Chorus: 1 semester hour***

Prerequisite: Consent of instructor. Preparation and performance of choral literature.

### ***EN PER 1410 The University Singers: 1 semester hour***

Prerequisite: Consent of instructor. The study and performance of music for vocal chamber ensemble.

### ***EN PER 1420 University Concert Band: 1 semester hour***

Prerequisites: Consent of Instructor. Study, preparation, and performance of Music for Concert Band. This course is not intended to fulfill the ensemble requirement for music majors/minors.

### ***EN PER 1500 University Orchestra: 1 semester hour***

Prerequisite: Consent of instructor. Study, preparation and performance of orchestral repertoire.

### ***EN PER 1520 University Symphonic Band: 1 semester hour***

Prerequisite: Consent of instructor. Study preparation and performance of music for the winds and percussion.

### ***EN PER 1530 University Wind Ensemble: 1 semester hour***

Prerequisite: Consent of instructor. Study, preparation, and performance of music for winds and percussion including the preparation and performance of various chamber ensembles for woodwinds and brass.

### ***EN PER 1532 University Pep Band: 1 semester hour***

Prerequisites: Consent of Department/Instructor. Study, preparation, and performance of music in diverse contemporary styles. Performances of the University Pep Band are primarily in conjunction with campus activities and athletic events.

### ***EN PER 1541 Chamber Ensemble Brass: 1 semester hour***

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

### ***EN PER 1542 Jazz Combo: 1 semester hour***

Prerequisite: Consent of instructor. Study, preparation and performance of music for small ensembles.

### ***EN PER 1543 Chamber Ensemble Percussion: 1 semester hour***

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

### ***EN PER 1544 Chamber Ensemble Strings: 1 semester hour***

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles: a) brass; b) jazz; c) percussion; d) string; e) voice; f) woodwinds.

### ***EN PER 1545 Chamber Ensemble Voice: 1 semester hour***

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

### ***EN PER 1546 Chamber Ensemble Woodwinds: 1 semester hour***

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

### ***EN PER 1550 Jazz Ensemble: 1 semester hour***

Prerequisite: Consent of instructor. Study, preparation, and performance of jazz music for big band.

### ***EN PER 1560 Opera Workshop: 1 semester hour***

Prerequisite: Consent of instructor. Instruction in movement, basic stage techniques, technical theater, repertory and performance techniques and preparation. May be repeated for credit.

### ***EN PER 2700 Seminar in Performance and Outreach: 1 semester hour***

Prerequisites: Acceptance as a music major/minor and two semesters of applied music study or by consent on instructor. Instruction in developing performance repertoire and skills for community and educational outreach programming. Student presentations of these programs in community and educational venues required. Course may be repeated.

### ***EN PER 4560 Advanced Opera Workshop: 1 semester hour***

Prerequisite: Consent of instructor. Instruction in movement stage technique, technical theater, repertory and performance based on advanced vocal skills. May be repeated for credit.

### ***EN PER 5310 Graduate Chamber Ensemble: 1 semester hour***

Prerequisites: Graduate standing in music and consent of department. Study and performance of traditional and nontraditional chamber literature.

### ***EN PER 5490 Graduate Ensemble: 1 semester hour***

Prerequisites: Graduate standing in music or consent of department. Study, preparation, and performance of ensemble literature from the choral, orchestral, or band/wind ensemble repertory. May be repeated for a total of four hours of credit.

## Music Education Courses

### ***MUS ED 3570 Curriculum And Methods Of Teaching Elementary School Music: 3 semester hours***

Prerequisites: THRY COM 2311 and THRY COM 2312 and Level I Education courses for the music education major. A study of the elementary school music curriculum emphasizing the objectives, methods of teaching and staffing music classes, and analysis of instructional materials and resources. This course must be completed in residence.

### ***MUS ED 3680 Curriculum And Methods Of Teaching Instrumental Music I: 2 semester hours***

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 2510, PRACTM 2610, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A study of the teaching techniques, materials, curriculum, and organization of the beginning instrumental music education program. Topics include student recruitment, the elementary band/orchestra, small group instruction, jazz ensemble, and marching band. This course must be completed in residence. Concurrent enrollment in MUS ED 3570 is required.

### ***MUS ED 3690 Curriculum and Methods of Secondary General Music: 2 semester hours***

Prerequisites: THRY COM 2311, THRY COM 2312, MUS ED 3570 and Level I Education courses. A study of the middle school/ junior high and high school general music program emphasizing a conceptually based curriculum: objectives, methodologies, materials, innovations, classroom organization and management. This course must be completed in residence.

***MUS ED 3700 Curriculum And Methods Of Teaching Instrumental Music II: 2 semester hours***

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 3521, MUS ED 3570, MUS ED 3680, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A continuation of MUS ED 3680. Topics include large group rehearsal techniques, program development, administrative procedures, and evaluation. This course must be completed in residence.

***MUS ED 3710 Curriculum And Methods Of Teaching Secondary Choral Music: 2 semester hours***

Prerequisites: THRY COM 2311, THRY COM 2312, MUS ED 3570. Level I Education courses. A study of the secondary school choral music program: curriculum, methods teaching techniques, organization, and administrative procedures for choral performance classes. This course must be completed in residence. Limited to music education majors.

***MUS ED 3770 An Introduction To Music For The Elementary School Teacher: 3 semester hours***

Prerequisite: None. An introduction to the elements of music and the expressive nature of music. Includes application of fundamentals to appropriate literature and activities for use with children in a classroom setting. This course will not apply toward requirements for a music major.

***MUS ED 4010 Marching Band Techniques: 3 semester hours***

Prerequisites: Junior standing or better. Techniques for organizing and training school marching bands. Content will include planning and charting shows, rehearsal problems, corps and traditional styles, and auxiliary units.

***MUS ED 4060 Advanced Workshop In Music Education: 1-5 semester hours***

Prerequisites: Junior standing and consent of instructor. An intensive variable-topic workshop in Music Education presenting knowledge and skills to supplement specific areas in existing courses.

***MUS ED 5060 Graduate Workshop in Music Education: 1-5 semester hours***

Prerequisites: Graduate standing and consent of instructor. Intensive workshop in Music Education. Variable topics. To gain skills and knowledge in specific areas not readily available in existing courses.

***MUS ED 5510 Graduate Instrumental Methods: 3 semester hours***

Prerequisites: Graduate standing in music. Development of objectives for instrumental programs and methods of achieving those objectives. Comprehensive musicianship through instrumental performance, analysis of instrumental literature, instrumental philosophies and methodologies, rehearsal organization, and recent research in instrumental music education will be discussed.

***MUS ED 5610 Graduate Choral Methods: 3 semester hours***

Prerequisites: Graduate standing in music. Development of objectives for choral programs and methods of achieving those objectives. Comprehensive musicianship through choral performance, analysis of choral literature, the changing voice, choral philosophies and methodologies, rehearsal organization, and recent research in choral music education will be discussed.

***MUS ED 5620 Guitar in the Classroom: 3 semester hours***

Prerequisites: Graduate Standing in Music. A study of guitar instruction in grades 5-12 with a focus on curricular sequence that includes chords, strums and picking patterns essential for song accompaniment skill development. Current materials, suitable for upper elementary and secondary students will be explored.

***MUS ED 5710 General Music: A Model For Multi-Faceted Learning: 3 semester hours***

Prerequisite: Graduate standing in music. An exploration of the general music class as a learning laboratory model designed to actively engage the learner in a series of comprehensive music learning experiences. Emphasizes techniques and materials that will motivate the "non-performance oriented" student.

***MUS ED 5750 Computer Applications in Music Education: 3 semester hours***

Prerequisites: Graduate standing in Music. An examination of the potential of computers in the music education field. Experiences with available hardware and software suitable for applications that include inventory, budget, music library cataloging, digital music synthesis, digital music recording and editing, music-related graphics and basic animation with music soundtracks.

***MUS ED 5760 Multimedia in Music Education: 3 semester hours***

Prerequisites: Graduate standing in Music. The development and use of interactive instructional multi-media materials for K-12 or collegiate settings. Platforms used will include presentation software and interactive whiteboard software/hardware.

***MUS ED 5770 Music Notation Software for Music Educators: 3 semester hours***

Prerequisite: Graduate standing in music. The in-depth study of a complex music notation program. The course will include various modes of notation entry, playback, music formatting and printing, MIDI-related and graphic-related functions, and the creation of music performance accompaniment and assessment files.

***MUS ED 5800 Musical Acoustics: 3 semester hours***

Prerequisite: Graduate standing in music The acoustical properties of the human voice, acoustic and electronic musical instruments, rehearsal rooms and performance spaces. Applications for musicians/teachers in the choice, design and acoustical treatment of rehearsal/performance space, requirements and techniques for quality music recordings and the use of acoustic principles in the design of original classroom musical instruments.

***MUS ED 5810 Foundations Of Music Education: 3 semester hours***

Prerequisite: Graduate standing in music. A study of the historical, philosophical, and psychological foundations of music education, includes principles necessary for development, implementation, and evaluation of total school music program.

***MUS ED 5830 Contemporary Music Education: 3 semester hours***

Prerequisite: Graduate standing in music. A study of recent trends and issues in music education.

***MUS ED 5840 Teaching Music in an Urban Setting: 3 semester hours***

Prerequisite: Graduate standing in music. An analysis of current practices, problems, trends, and research involved in developing strategies for the improvement of music programs in inner-city schools.

***MUS ED 5910 Music Education Research: 3 semester hours***

Prerequisite: Graduate standing in music. Applications of various approaches in defining and analyzing research problems in music education. Historical, experimental, descriptive, and philosophical research will be included.

***MUS ED 5920 Psychology Of Music: 3 semester hours***

Prerequisite: MUS ED 5810 and MUS ED 5910. Identify and discuss important trends within the field of psychology of music focusing specifically on applying Cognitive Psychology to music learning, perception, and performance.

***MUS ED 5950 Special Problems In Music Education: 1-3 semester hours***

Prerequisite: Graduate Standing In Music. Selected Problems To Meet The Needs Of the Individual Student.

***MUS ED 5990 Master's Project In Music Education: 3 semester hours***

Prerequisite: Graduate standing in music. A project utilizing historical, experimental, philosophical, descriptive, or analytical research techniques. The project will include a written report.

## Music History Courses

***M H L T 1001 Introduction To Music: 3 semester hours***

An historically oriented study of art music, its styles and forms from the Baroque period to the present day. This course will not apply toward requirements for a music major.

***M H L T 1010 History Of Western Music I: 3 semester hours***

Prerequisite: THRY COM 1301/ THRY COM 1302 or consent of department. A general survey of the history of western music. Includes the evolution and development of styles, forms and their social setting. This course meets the General Education requirement for Humanities and Fine Arts Knowledge and Valuing Skills.

***M H L T 1020 History Of Western Music II: 3 semester hours***

Prerequisite: THRY COM 1301/THRY COM 1302 or consent of department. A continuation of M H L T 1010. This course meets the General Education requirements for the Humanities and Fine Arts Knowledge and Valuing Skills.

***M H L T 1060 Introduction To African-American Music: 3 semester hours***

This course will survey African-American musical heritage from its African origins through its role and development in twentieth century American Society. All genres will be discussed, including African-American composers who wrote in the European tradition. This course will not apply toward requirements for music major or minor.

***M H L T 1070 Introduction To Jazz: 3 semester hours***

A survey course which examines the musical, historical and social aspects of the subject. This course will not count toward requirements for a music major.

***M H L T 1080 Introduction To Irish Traditional Music: 3 semester hours***

Will survey the rich tapestry of Irish traditional music, song and dance. Particular attention will be given to the cultural history of the traditional music maker in Irish society, as well as among the constituent communities of the Irish diaspora in Europe and North America. Will introduce students to the instruments, performance settings and regional styles of Irish traditional music. Using field recordings and archive materials collected in Ireland and North America, will focus on celebrated folk performers of the past and present, and evaluate the impact of contemporary media on their ancient, yet evolving, musical genre. No prior experience of Irish traditional music is necessary to pursue this course.

***M H L T 1090 Non-Western Music I: 3 semester hours***

The music of Oceania; folk and classical music and dance of East Asia, Tibet and Southeast Asia, the influence of Buddhism, Islam and western acculturation on the functions of music in these societies.

***M H L T 1120 The American Musical Film: 3 semester hours***

This course is a survey of the American film genre. Emphasis on themes, conventions, audience relationships, cultural values, and the synthesis of film form, music and dance. Examination of films such as Top Hat, West Side Story, Chicago, An American in Paris.

***M H L T 1130 Introduction to Music Theatre: 3 semester hours***

A study of music theatre as an art form emphasizing the contributions of the playwright, composer, lyricist, actor, musician, dancer, choreographer, director, designer, and technicians. Major stylistic periods and dramatic forms will be covered. Students will learn about how music theatre functions as an art and an industry in today's world. Attendance at live theatrical performances and/or rehearsals will be required.

***M H L T 1140 Popular Music in America: 3 semester hours***

This course is designed as a survey of major genres of American popular music - Tin Pan Alley, musical theater, ragtime, blues, early and more popular phases of jazz, country, rock, pop, hip-hop, rap, etc. Included will be a broad spectrum of cultural and historical contexts, insight into the development of the music industry, study of significant artists, and understandings of the formal and stylistic components of the music.

***M H L T 1150 Drumming Cultures of the World: 3 semester hours***

Drumming is one of the oldest forms of expression in the world and is prevalent on every continent. This course is designed as a survey of drumming throughout the world and the significance to the cultures therein. Included will be a broad spectrum of cultural and historical contexts, performance practices and hands on instruction. The major focus in this course will be the drumming practices of Africa, Asia, South America and the Caribbean. This course satisfies the cultural diversity requirement for the University.

***M H L T 1160 Musical Journey through Latin America: 3 semester hours***

Explore the diversity of this contagious music of the past and present, from the tango of Argentina, to salsa and merengue of the Caribbean, and from huayno of Amerindian cultures, to the marimba of Middle Latin America! This introduction to musical cultures of Latin America reveals the rich and wide range of musical forms, instruments, and styles that has influenced music on almost all parts of the globe today.

***M H L T 1170 Musical Journey through the Far East: 3 semester hours***

This class will explore the musical traditions and instruments of the countries of East Asia - China, Japan, and Korea. Much of the legendary founding of music and musical instruments originated on the Asian continent and transplanted along the Silk Road (trade routes from India, Persia and the Mediterranean) to the Far East. We will examine some of the world's most amazing sounds of the Orient.

***M H L T 1180 Musical Journal Through Africa: 3 semester hours***

This introduction to musical cultures of Africa provides a snapshot of African music south of the Sahara, or sub-Saharan Africa. We will explore the extraordinary rich and diverse musical traditions through the sounds and rhythms of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments from Africa.

***M H L T 1190 Musical Journey of the Native North American: 3 semester hours***

This introduction to musical cultures of the Native American provides a snapshot of the aboriginal and modern day Native American in North America. We will explore the extraordinary rich and diverse musical traditions through the sounds and cultural practices of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments of the Native American.

***M H L T 4000 Directed Studies: 1-5 semester hours***

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**M H L T 4220 Music Of The Renaissance: 3 semester hours**

Prerequisite: M H L T 1010 or consent of department. A study of the theoretical and practical impact of humanism on music, musicians, and musical thought from 1450 to 1600. Sacred and secular music; the rise of an instrumental idiom.

**M H L T 4230 Music Of The Baroque: 3 semester hours**

Prerequisite: M H L T 1010 or consent of department. A detailed study of music from 1600 to 1750. The rise of the new style, national styles in the seventeenth century and the culmination of the Baroque period.

**M H L T 4240 Music Of The Classic Period: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A study of the growth of classical style; Galant and expressive styles; Mozart, Haydn and Beethoven.

**M H L T 4250 Music Of The Romantic Period: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. Composers, forms and styles in nineteenth century music. The literary and social background of musical romanticism.

**M H L T 4260 Music from 1900 to the Present: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A detailed study of trends in modern music and of influential composers; impressionism, serial composition, electronic music and other recent techniques.

**M H L T 4270 A History Of Byzantine Music And Hymnography: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A study of the liturgical and secular music of the Byzantine Empire and post-Byzantine period during the Ottoman occupation; a historical investigation of the Oriental and Ancient Greek origins of the music along with an evolution of the types of music and poetical forms. A study of the types of notation and transcription analyses from the Medieval neumes into Western staff notation is included.

**M H L T 4280 American Music: 3 semester hours**

Prerequisites: M H L T 1010 or M H L T 1020 or consent of department. A study of the history and literature of American music, its composers, performers and influences on American and world culture. Compositions studied include classical compositions from the colonial era through contemporary times as well as literature from the gospel, blues, jazz and popular music genres.

**Music: Pedagogy Courses****PDGOGY 1250 Brass Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all brass instruments including trumpet, horn, trombone, euphonium, and tuba in the school setting.

**PDGOGY 1260 Woodwind Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all woodwind instruments including flute, clarinet, oboe, bassoon, and saxophone in the school setting.

**PDGOGY 1270 String Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all string instruments including violin, viola, cello, and bass in the school setting.

**PDGOGY 1280 Percussion Instrumental Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all percussion instruments including snare drum, tom-tom, bass drum, cymbals, drumset, timpani, mallet instruments and miscellaneous percussion instruments in the school setting.

**PDGOGY 1560 Piano Pedagogy: 2 semester hours**

Prerequisite: Equivalent of AP MUS 1361 or permission of instructor. A study of methods, repertoire, and technical problems pertaining to private studio teaching for all levels of performance ability.

**PDGOGY 2220 Jazz Pedagogy: 3 semester hours**

Students will participate in interactive sessions that will "boost the jazz teaching chops" whether students are seasoned teachers or novices in the field of jazz education. A wide range of jazz teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles, and examine and perform jazz literature from different styles.

**PDGOGY 4000 Directed Study: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**PDGOGY 5110 Graduate Jazz Pedagogy: 3 semester hours**

Students will participate in interactive sessions that will dramatically strengthen jazz teaching strategies, introduce new jazz rehearsal techniques, and examine the best in jazz education literature and materials. A wide range of jazz-teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles and examine and perform jazz literature from different styles. The course is for students who are seasoned teachers or novices in the field of jazz education. Student will complete a research paper or a big band arrangement.

**Music: Practicum Courses****PRACTM 1140 Piano Proficiency I: 1 semester hour**

Prerequisite: Permission of department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1150 Piano Proficiency II: 1 semester hour**

Prerequisite: PRACTM 1140 or Consent of Department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1250 Singer's Diction: English, Italian And German: 1 semester hour**

Prerequisites: AP MUS 1459. A study of English, Italian and German pronunciation using the International Phonetic Alphabet.

**PRACTM 1260 Singer's Diction: Latin, French, And Spanish: 1 semester hour**

Prerequisites: AP MUS 1459. A study of Latin, French, and Spanish pronunciation using the International Phonetic Alphabet.

**PRACTM 1530 Accompanying I: 1 semester hour**

Prerequisite: Consent of department. Accompanying and ensemble practices, including rehearsal techniques, for keyboard majors. Public performance of works studied is required.

**PRACTM 1540 Accompanying II: 1 semester hour**

Prerequisite: Consent of department. A continuation of PRACTM 1530.

**PRACTM 1550 Accompanying III: 1 semester hour**

Prerequisite: Consent of Department. A continuation of PRACTM 1540.

**PRACTM 1570 Piano Performance Class: 2 semester hours**

Prerequisites: Two semesters of AP MUS 1450: Piano. This class allows for additional study of repertoire, giving students greater opportunities to perform and receive critiques from instructor, adjudicators, and peers. Course may be repeated for credit.

**PRACTM 2160 Piano Proficiency III: 1 semester hour**

Prerequisite: PRACTM 1150 or permission of department. Continuation of piano proficiency study.

**PRACTM 2170 Jazz Keyboard Harmony: 1 semester hour**

Prerequisite: Prerequisites: PRACTM 1150 or consent of dept. Group keyboard instruction in the application of chordal structures and harmonic functions commonly used in mainstream jazz performance.

**PRACTM 2180 Piano Proficiency IV: 1 semester hour**

Prerequisite: PRACTM 2160 or consent of department. Continuation of piano proficiency study.

**PRACTM 2190 Piano Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registrations in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2191 Brass Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2192 Woodwind Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2193 Rhythm Section Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2510 Conducting I: 2 semester hours**

Prerequisite: THRY COM 2301. Concurrent registration in PRACTM 2610 required for Bachelor of Music in Music Education program. Techniques and problems in conducting.

**PRACTM 2610 Instrumental Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Analysis and evaluation of selected instructional and concert materials for elementary, junior and senior high school groups.

**PRACTM 2611 Elementary School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Active conducting experience while analyzing and evaluating selected instructional and concert materials for elementary grades.

**PRACTM 3190 Piano Proficiency V: 1 semester hour**

Prerequisite: PRACTM 2180 or consent of department. Continuation of piano proficiency study.

**PRACTM 3280 Score Reading at the Keyboard: 1 semester hour**

Prerequisites: PRACTM 3190, or consent of department. Practical experience in the keyboard realization of figured bass and score reading with emphasis on C-clefs, transposition, and modulation.

**PRACTM 3290 Piano Proficiency VI: 1 semester hour**

Prerequisite: PRACTM 3190 or consent of department. Continuation of piano proficiency study.

**PRACTM 3521 Conducting II - Instrumental: 2 semester hours**

Prerequisite: PRACTM 2510. Advanced study of instrumental conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3522 Conducting II - Choral: 2 semester hours**

Prerequisite: PRACTM 2510. Concurrent registration in PRACTM 3620 required for Bachelor of Music in Music Education program. Advanced study of choral conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3621 Junior-Senior High School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312. Analysis and evaluation of selected instructional and concert materials for junior and senior high school performance groups.

**PRACTM 3920 Senior Research: 2-4 semester hours**

Prerequisite: Consent of department. Required of all senior music majors. Directed readings and research in an area mutually acceptable to the student and instructor.

**PRACTM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of department. Directed independent study of selected topics in music. May be repeated, if topic is substantially different, but no more than 5 hours may be applied toward a degree.

**PRACTM 4100 Senior Project in Theory/Composition: 2-4 semester hours**

Prerequisites: Consent of department. Required of all students in the BM in Theory/Composition program. This project could take any number of forms, dependent upon mutual agreement between student and instructor. For example, a student with a focus in music theory would write a thesis of substantial depth on a theoretical/analytical topic, and a student with a focus in composition would either write a large-scale work (for orchestra, wind ensemble, etc.) or prepare and lead a recital of several of his or her own compositions.

**PRACTM 4920 Internship: 1-3 semester hours**

Prerequisite: Senior standing in B.M. Business emphasis and permission of the instructor. Supervised experience in the area of the student's career objective, as music or instrument merchandising, arts management, mass communication, publishing, manufacturing or other, as available. May be repeated once for credit in different area.

**PRACTM 5020 Choral Literature: 3 semester hours**

Prerequisite: Graduate standing in music. Study of choral literature appropriate for ensembles from elementary to senior high school. Criteria for evaluating choral literature will be developed and pedagogical implications of choral music as a means of developing comprehensive musicianship will be discussed.

**PRACTM 5035 Instrumental Literature: 3 semester hours**

Prerequisite: Graduate standing. Music Study of literature appropriate for soloists and ensembles for elementary to senior high school band, orchestra, and jazz ensemble. Criteria for evaluating the literature will be developed and related technical problems will be studied.

**PRACTM 5210 Graduate Conducting: 3 semester hours**

Prerequisites: Graduate standing in music Conducting techniques, score reading, and interpretation of choral, orchestral, and band literature.

## Theory and Composition Courses

### **THRY COM 1190 Fundamentals Of Music: 3 semester hours**

This course provides basic music vocabulary: scales, intervals, and chords, and systematic instruction in the melodic, rhythmic, and harmonic aspects of music. This course will not apply toward requirements for a music major.

### **THRY COM 1300 Introduction to Music Theory: 1 semester hour**

This course introduces the basic vocabulary of music notation and theory and rudimentary skills of ear training and sight singing. This course must be taken concurrently with THRY COM 1301, but may be waived on the basis of a successful score on the Theory Placement Exam.

### **THRY COM 1301 Theory Of Music I: 3 semester hours**

Prerequisite: Consent of department. This course introduces the basic materials of music as well as species counterpoint and diatonic harmony. Concurrent registration in THRY COM 1300 is required unless waived on the basis of a successful score on the Theory Placement Exam. Concurrent registration in THRY COM 1302 is required for music majors and minors.

### **THRY COM 1302 Aural Training I: 1 semester hour**

Prerequisite: Consent Of Department. Systematic instruction in ear training and sight singing of all material covered in THRY COM 1301. Includes diatonic melodic and rhythmic dictation, chord quality recognition, sight singing of diatonic melodies, and the reading of units and divisions of units in simple and compound meters. Concurrent registration in THRY COM 1301 is required for music majors and minors.

### **THRY COM 1311 Theory Of Music II: 3 semester hours**

Prerequisite: THRY COM 1300, THRY COM 1301, and THRY COM 1302 or consent of department. This course continues the study of diatonic harmony begun in THRY COM 1301. Harmonic function, phrase structure, harmonic sequences, secondary dominants, and simple modulation. Concurrent registration in THRY COM 1312 is required for music majors and minors.

### **THRY COM 1312 Aural Training II: 1 semester hour**

Prerequisite: THRY COM 1301 and THRY COM 1302 or consent of department. The systematic instruction in ear training and sight singing begun in THRY COM 1302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 1311. Concurrent registration in THRY COM 1311 is required for music majors and minors.

### **THRY COM 2301 Theory Of Music III: 3 semester hours**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. This course begins the study of chromatic harmony and form in music of the eighteenth and nineteenth centuries. Concurrent registration in THRY COM 2302 is required for music majors and minors.

### **THRY COM 2302 Aural Training III: 1 semester hour**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. Systematic instruction in ear training and sight singing of THRY COM 1312 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2301. Concurrent registration in THRY COM 2301 is required for music majors and minors.

### **THRY COM 2311 Theory Of Music IV: 3 semester hours**

Prerequisites: THRY COM 2301 and THRY COM 2302 or consent of department. This course continues the study of chromatic harmony of late nineteenth-century music, as well as the analysis of larger musical forms. Additionally, this course focuses on developing the ability to communicate analytical observations effectively in both written and spoken formats. Concurrent enrollment in THRY COM 2312 is required for all music majors and minors.

### **THRY COM 2312 Aural Training IV: 1 semester hour**

Prerequisite: THRY COM 2301 and THRY COM 2302 or consent of department. The systematic instruction in ear training and sight singing of THRY COM 2302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2311. Concurrent enrollment in THRY COM 2311 is required for all music majors and minors.

### **THRY COM 3110 Analysis Of Music from 1900 to Present: 2 semester hours**

Prerequisite: THRY COM 2311 / THRY COM 2312 or consent of department. This course primarily provides a study of compositional devices in atonal and serial music since 1900.

### **THRY COM 3120 Tonal Counterpoint: 2 semester hours**

Prerequisite: THRY COM 2311 and THRY COM 2312; or consent of department. Study of tonal counterpoint with emphasis on the eighteenth century style. Composition in two and three parts.

### **THRY COM 3130 Advanced Analytical Techniques: 2 semester hours**

Prerequisites: THRY COM 2311/THRY COM 2312. Close analysis, seminar discussion, and focused theoretical/analytical study of selected compositions. Repertoire studied changes from year to year at discretion of instructor.

### **THRY COM 3140 Readings in Music Theory: 2 semester hours**

Prerequisites: THRY COM 2311 and THRY COM 2312. An introduction to the primary areas of research in the field of music theory. This seminar-style course will include readings and discussion of a number of important writings in music theoretical areas including, but not limited to the following: tonal theory, post-tonal theory, mathematics and music, music cognition, and the history of music theory.

### **THRY COM 3300 Seminar In Composition: 2 semester hours**

Prerequisite: THRY COM 3110 or consent of instructor. The study of composition in theory and practice.

### **THRY COM 3310 Studio Composition: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312, or consent of department. Individual lessons in music composition. Course may be repeated for credit.

### **THRY COM 3410 Orchestration: 3 semester hours**

Prerequisite: THRY COM 2311 or consent of instructor. Study of the instruments of the brass, woodwind, percussion, and string families; scoring, transcription, and arranging for various instrumental ensembles.

### **THRY COM 3420 Choral Arranging: 2 semester hours**

Prerequisites: THRY COM 2311 or consent of department. Study of vocal ranges, characteristics and capabilities at various ages and scoring for choral ensembles comprised of singers in these varying stages of vocal development.

### **THRY COM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**THRY COM 5110 Scoring And Arranging: 3 semester hours**

Prerequisite: Graduate Standing In Music. Experience In Scoring And Arranging Music For A Variety Of Ensembles.

## Theatre

The Department of Theatre offers the Bachelor of Arts in Theatre and Dance, a degree program allowing students to tailor their curriculum to meet specific interests while simultaneously providing a strong foundation in the field. The minor in Theatre and Dance is also available. This growing program offers flexibility and the opportunity for students to work closely with faculty mentors.

The Department presents at least three main stage productions each academic year, ranging from musicals and the classics to contemporary socially conscious theatre. The UMSL Rep, a student organization, is open to any University of Missouri-St. Louis student.

For further information concerning the Department of Theatre or the Theatre and Dance curriculum, call 314-516-4572.

## Bachelor of Arts in Theatre and Dance

### General Education Requirements

All Theatre and Dance majors must satisfy the University and College of Fine Arts and Communication's 42-hour General Education (p. 34) core requirements, which include ENGL 1100 and the Math proficiency requirement.

Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education (p. 34) courses or lower-or upper-level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education (p. 34) courses or by other lower-or upper-level courses in various departments.

13 hours of a foreign language.

### Degree Requirements

Theatre and Dance majors must complete a minimum of 36, but not more than 52 hours in Theatre and Dance courses. A core of 26 hours is required for all majors and 10-26 additional hours in Theatre and Dance are required. At least 24 hours in the major must be taken at UMSL and must include 6 hours at the 2000 or higher level and 9 hours at the 3000 or higher level. All courses required for the major must be completed with a minimum grade of C- to be accepted, and the overall total grade point average must be at least 2.0 to graduate. To be eligible to participate in Internship classes, each student must have an overall grade point average of 3.0

In addition to the major's required core and elective Theatre & Dance courses, students will choose elective courses to bring their total credit hours to 120. Practicum courses may be repeated for credit; an overall limit of 20 hours in Practicum courses will be accepted towards the 120 hour degree.

### Required Core Courses for all Theatre and Dance Majors

TH DAN 1210	Fundamentals Of Acting	3
TH DAN 1900	Introduction To Theatre Technology	3

TH DAN 1910	Introduction To Theatrical Design	3
TH DAN 1023	Fundamentals Of Dance	3
TH DAN 2810	History Of World Theatre And Drama Through The Restoration	3
or TH DAN 2841	History Of Dance From The 19Th Century To Contemporary Times	
TH DAN 2820	History Of World Theatre & Drama From 18Th C To Contemporary Time	3
or TH DAN 2841	History Of Dance From The 19Th Century To Contemporary Times	
Select 2 hours from these Production related courses:		2
TH DAN 1060	Theatre Workshop	
TH DAN 2260	Introduction To Theatrical Costume Production	
TH DAN 3060	Advanced Theatre Workshop	
TH DAN 3254	Costume Production and Construction Techniques	
Select 6 hours chosen from these Practicum courses: <sup>1</sup>		6
TH DAN 2195	Practicum In Performance Studies	
TH DAN 2196	Practicum In Scenery/Lighting/Sound In Theatre Production	
TH DAN 2197	Practicum In Costume	
TH DAN 2198	Practicum In Dance	
TH DAN 3195	Advanced Practicum In Performance Studies	
TH DAN 3196	Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc	
TH DAN 3197	Advanced Practicum In Costume	
TH DAN 3198	Advanced Practicum In Dance	
<b>Total Hours</b>		<b>26</b>

<sup>1</sup> 3 hours of which need to be above the 3000 level.

Additional hours in Theatre and Dance electives are to be selected based on individual students' areas of interest. The core courses of 26 hours plus the Theatre and Dance electives must equal a minimum of 36 hours, but not more than 52 hours, for Theatre and Dance majors.

### Minor in Theatre and Dance

Students with other majors may choose to minor in Theatre and Dance to complement their academic and career goals. The minor requires 18 hours of Theatre and Dance courses, nine of which must be taken at UMSL. A minimum GPA of 2.0 is required in the minor.

A Minor in Theatre and Dance Consists of the following:

Select one of the following Performance related courses:		3
TH DAN 2210	Ensemble Acting	
TH DAN 3305	Writing For Performance	
TH DAN 3211	Period Styles of Acting	
TH DAN 4220	Directing For The Theatre

Elective or minor	7 Elective or minor	9
	<b>16</b>	<b>16</b>
<b>Total Hours: 120</b>		

- <sup>1</sup> INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
- <sup>2</sup> This plan assumes that 3 hours of TH DAN 1210 will satisfy three hours of the Humanities area of general education and help to fulfill the total of 42 general education hours. TH DAN 2810 and TH DAN 2820 will also count towards Humanities and will reduce the number of general education courses needed and increase the number of free elective or minor coursework needed to reach 120 hours for a degree.
- <sup>3</sup> The general education courses listed assumes the U.S. History/ Government requirement and the Cultural Diversity requirement are fulfilled with Social/Behavioral Science or Humanities general education courses.

*PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.*

## Theatre and Dance Courses

### TH DAN 1006 Beginning Ballet Technique: 2 semester hours

Introduction to the art of ballet emphasizing basic movement, technique and terminology. Course of study will include basic barre exercises, center work, and across the floor progressions for proper alignment, strength, flexibility, and coordination. Prior dance experience is not required. Dance attire and ballet slippers will be required. Course may be repeated for up to 10 credit hours.

### TH DAN 1007 Beginning Jazz Dance Tecnique: 2 semester hours

Introduction to the art of jazz dance emphasizing basic principles of traditional and contemporary forms of jazz dance movement, technique, terminology, and style. Course will focus on increasing strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

### TH DAN 1008 Beginning Modern Dance Technique: 2 semester hours

Introduction to the art of Modern Dance movement, technique, and terminology. Course of study will introduce the elements of time, space, and energy through basic structured exercises and improvisation. Emphasis will be focused on alignment, strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire is required. Shoes are not required. Course may be repeated for up to 10 credit hours.

### TH DAN 1023 Fundamentals Of Dance: 3 semester hours

This course provides an introductory exploration of movement through various styles of dance, emphasizing movement vocabulary, stretching, strengthening, body alignment, and creative expression. Prior dance experience is not required. Dance attire and shoes will be required.

**TH DAN 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 1210 Fundamentals Of Acting: 3 semester hours**

Course develops personal communication and presentational skills through vocal, physical, and emotional exercises designed for the beginning actor. Course emphasizes relaxation, concentration, improvisation, script analysis, characterization and scene work exercises to develop elementary performance skills.

**TH DAN 1600 Voice Ad Diction/Vocal Performance: 3 semester hours**

Course promotes development of clear, distinct enunciation and correct pronunciation for mass media communication, public address, theatre, and oral interpretation. Course includes development of oral-presentational and self promotional skills for voice acting/voice-over in contemporary theatre and media.

**TH DAN 1800 Introduction To Theatre: 3 semester hours**

A study of Theatre as an art form, emphasizing the audience's appreciation of the art of the playwright, actor, director, designers, and technicians. Major periods, genres, and dramatic forms from classical to modern to the avant garde as well as performance art will be covered. Students will attend performances and learn about how theatre functions as an art and an industry in today's world. Attendance at several live theatrical (theatre, play, musical, opera, and dance) performances, will be required.

**TH DAN 1850 Introduction To Non-Western Theatre: 3 semester hours**

Survey of theatre forms of the non-European world in which primary attention is concentrated on analysis of traditional dance drama and puppet theatres of East Asia, South Asia, the Middle East and Africa. Similar forms of European theatre will be included for comparative purposes. Focus on the development of world theatre from a visual point of view, from earliest storytelling rituals through international stage development to contemporary theatrical forms, with a view to understanding the global perspective. Course will survey visual media and writings on dance and theatre traditions found around the non-Western World. (Satisfies the Cultural Diversity requirement).

**TH DAN 1900 Introduction To Theatre Technology: 3 semester hours**

Introductory course covering the basic theories and techniques of theatre technology including stage equipment and safety, scenery, lighting, costuming, properties, sound and box office. Course includes practical application through a minimum of 25 hours of lab work in conjunction with a departmental production.

**TH DAN 1910 Introduction To Theatrical Design: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Introductory course covering the elements and principles of design in the areas of scenery, lighting, and costumes. Course will include various creative projects in two and three dimensions. Some graphic materials will be required.

**TH DAN 2006 Intermediate Ballet Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1006 or consent of instructor. Ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will be a continuation of Beginning Ballet Technique barre exercises, center work, and across the floor progressions. Dance attire and Ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2007 Intermediate Jazz Dance Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1007 or consent of instructor. Jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and expression. Course will also study unique dance styles and artists that have influenced the stage video, film and commercial media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2008 Intermediate Modern Dance Technique: 2 semester hours**

Prerequisites: 2.0 credit hours of TH DAN 1008 or consent of instructor. Modern dance movement, technique, vocabulary, and aesthetics. Course of study will be a continuation of Beginning Modern Dance Technique through incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 2020 Acting for the Camera: 3 semester hours**

An acting course that prepares the actor for work in front of a camera. Working with broadcast quality cameras, students will learn the art of language and expression. Students will learn the art and skill of communicating to an audience. Students also acquire the skills for working with other actors on camera, close-ups, working with props, continuity and hitting your mark.

**TH DAN 2112 Scene Study: 3 semester hours**

This course focuses on actor-training methodologies of Stanislavsky and other text-based approaches. Increases understanding of psychological motivation, concentration, focus of attention and clarity of physical expressiveness. Students prepare and present a minimum of three scenes.

**TH DAN 2195 Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor Provides practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 2196 Practicum In Scenery/Lighting/Sound In Theatre Production: 1-3 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions or other approved independent study projects. Running crew work will involve evening, weekend and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2197 Practicum In Costume: 1-3 semester hours**

Practicum in costume construction, cutting, draping, millinery, fabric dyeing/painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime lab hours, occasional weekend and/or evening laboratory time will be required. Appropriate clothing, personal safety and sewing equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 2198 Practicum In Dance: 1-3 semester hours**

Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work will involve evening, weekend, and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2210 Ensemble Acting: 3 semester hours**

Prerequisites: TH DAN 1210. A Laboratory acting course providing an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavsky-based actor training. Emphasis is paid to ensemble creations, physical characterization, cooperative methods and object performance. May involve practices and theories of Jerzy Grotowski, Augusto Boal, Jacques Lecoq, and/or Tadashi Suzuki.

**TH DAN 2241 Argumentation and Debate: 3 semester hours**

Prerequisite: COMM 1040, or COMM 1041, or consent of instructor. Principles of argumentation and debate with practice in preparing briefs and in delivering spoken arguments in formal debate. Emphasis on analysis of issues, logical reasoning, and audience analysis.

**TH DAN 2244 Introduction to Directing: 3 semester hours**

Prerequisite: TH DAN 2105. An overview of the analytical and creative processes that inform the director's work. Students engage in a close examination of texts, key concepts, and directorial choices in staged performances, opera, films, and video. Students will learn how to articulate responses to theatrical/film work, create and present projects, understand the history and role of the director, and unlock the imagination as an interpretive artist.

**TH DAN 2250 Scenic Fabrication: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. A survey of the theories, terminology, and practices of professional methods and equipment of scenic and properties fabrication, painting, and rigging. Students will learn current professional techniques in wood, metal, and plastic fabrication including the operation and programming of CNC production machinery. Course includes practical application through 45 hours of lab work in conjunction with department productions. Personal safety equipment will be required.

**TH DAN 2252 Costume Design I: 3 semester hours**

Prerequisites: TH DAN 1910 or consent of the instructor. Introduces students to the costume design process including researching costumes, techniques in rendering and painting for costume design, required paperwork for the costume designer, and the understanding of fabrics. Students will use introductory skills to create practical costume design projects.

**TH DAN 2260 Introduction To Theatrical Costume Production: 3 semester hours**

A survey of the theory, practices and vocabulary of theatrical costuming; the visualization and realization of the costume through the arts of pattern cutting; the construction techniques; draping; dyeing, painting, and distressing. Course includes practical application of techniques through required 45 hours of lab work in conjunction with current department productions.

**TH DAN 2270 Audio Recording for Live Production: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. This course is intended to provide an introduction to audio systems. It will include exposure to waveforms and the physical qualities of sound, as well as audio signal flow in analog and digital systems. The course is also an introduction to acoustics, both indoors and out, microphone theory and proper use, design and placement of speakers, microphones and audio recording equipment.

**TH DAN 2290 2D and 3D CAD for Live Performance: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Survey course covering the fundamental techniques of two- and three-dimensional computer aided drafting and rendering.

**TH DAN 2300 Stage Management: 3 semester hours**

Prerequisite: Consent of instructor. Course develops fundamental stage management skills needed to supervise all operative aspects of play production from auditions through performance. These skills include: interpersonal and leadership skills, conflict resolution techniques, venue and staff management/scheduling, and technical script analysis. Course includes production experience.

**TH DAN 2800 History of Costumes: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the Western history of costumes through the cultural, historical, and political influences on fashion from primitive times to the present.

**TH DAN 2810 History Of World Theatre And Drama Through The Restoration: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the history of influence of different cultures, traditions, and technologies on development of theatre as a social institution. History of Theatre and drama from ancient cultures to the Restoration period. Ritual and religious drama. Study of the origins of theatre and drama from oral tradition, myth, storytelling, Shamanism and collective ritual, Greek festival drama, and cloister drama of different cultures. Rise of secular drama, the traditions of classical Greek theatre. Study of the Renaissance, and drama in Europe, Asia, Africa, and the New World.

**TH DAN 2820 History Of World Theatre & Drama From 18Th C To Contemporary Time: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. History of theatre from 18th century to contemporary times. Survey of history of influence of different cultures, traditions, and technologies on the development of theatre as a social institution. Study of realism and subsequent departures from realism in theatre, drama and performance.

**TH DAN 2840 History Of Dance To The 19Th Century: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance from pre-history through the middle ages and renaissance to 19th century. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression.

**TH DAN 2841 History Of Dance From The 19Th Century To Contemporary Times: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance practice from 1850 to the present. History of modern dance: art dance from Isadora Duncan to Martha Graham.

**TH DAN 3006 Advanced Ballet Technique: 2 semester hours**

Prerequisites: TH DAN 1006 and consent of instructor. Advanced ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will include advanced barre exercises, center work, and across the floor progressions. Variations, partnering, and pointe work may be incorporated at the discretion of the instructor. Dance attire and ballet slippers will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3007 Advanced Jazz Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1007 and consent of instructor. Advanced jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and performance. Study of unique dance styles and artists that have influenced the stage, video, film and commercial and media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3008 Advanced Modern Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1008 and consent of instructor. Advanced level of modern dance movement, technique, vocabulary, and aesthetics. Incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 6 credit hours.

**TH DAN 3009 Dance Choreography For The Stage, Television And Film: 3 semester hours**

Prerequisites: 4 Credit Hours of any level and combination of TH DAN 1006, TH DAN 1007, TH DAN 1008, TH DAN 2006, TH DAN 2007, TH DAN 2008, TH DAN 3006, TH DAN 3007 and TH DAN 3008. Course will focus on directed movement studies and composition techniques for the stage, television, and film. Personal creativity and original movement inventions will be explored, as well as the creation, development, and transformation of original movement studies into completed works. Dance attire and dance shoes are required. Course may be repeated for up to 6 credit hours.

**TH DAN 3060 Advanced Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1060, TH DAN 1900 and Consent of instructor. Practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3195 Advanced Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 3196 Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work may involve evening and weekend assigned times. Additional daytime hours will vary according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3197 Advanced Practicum In Costume: 1-3 semester hours**

This course provides advanced practical experience in costume construction, cutting, draping, millinery, fabric dyeing/ painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime Lab hours, occasional weekend and/or evening laboratory time may be required. Appropriate clothing and personal safety equipment will be required. Personal equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3198 Advanced Practicum In Dance: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. May involve additional hours including evening and weekend assigned times. Credit will be based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3211 Period Styles of Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. The course will expose students to the rigorous analytical, physical, intellectual, and vocal demands of acting within a specific historical period. Students will focus on monologue and scene study from the following: Greek Tragedy, Spanish Golden Age, Elizabethan Theatre, Restoration Comedy, Italian Commedia, French Farce, and British comedy of Manners with a special focus on style distinctions between each.

**TH DAN 3218 Shakespeare and Verse Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. An intermediate acting course designed to engage students in Shakespeare's dramatic works from the point of view of the actor. Through text analysis, scene study, vocal work, and acting exercises, students explore the meaning, music and theatrical power of Shakespeare and other playwrights. Topics explored include: blank verse acting, line breath support, scansion, phrasing, word emphasis, antithesis, and imagery.

**TH DAN 3250 Costume Crafts: 3 semester hours**

Prerequisites: TH DAN 2260 or Consent of the Instructor. Develop the skills and techniques needed to execute crafts used in costume design including millinery, mask making, fabric painting and dyeing, wig manipulation, armor, and other craft work. Course may be repeated for up to 6 credit hours.

**TH DAN 3252 Costume Design II: 3 semester hours**

Prerequisites: TH DAN 2252 and TH DAN 2260, or consent of instructor. Content of course includes study of theories, styles, visualization of ideas, and techniques of costume design; discussion of principles of design, script analysis, the collaborative roles of designers in the theatrical production; research, and exploration of character representation; study of the human figure, drawing, and rendering techniques.

**TH DAN 3257 Makeup For Theatrical Productions: 2 semester hours**

Prerequisites: TH DAN 1800, TH DAN 1910, or consent of instructor. The art of makeup and its relation to production. Overview of European history and tradition of makeup. Theory, history and the practice of makeup traditions for theatre, dance and performance will be included.

**TH DAN 3260 Digital Scenography: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2250, TH DAN 2290, or consent of instructor. Survey of the professional theories and practices of scenography for live performances. This course emphasizes a digital creative process including digital sketches, CAD, three-dimensional modeling, digital rendering, and collaboration.

**TH DAN 3261 Digital Lighting Design: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2280, or consent of instructor. Survey of the theories and techniques of digital lighting design and 3D visualization for live performance. This course will emphasize current and emerging digital design practices used by professional lighting designers including 3D visualization, CAD, software-based paperwork creation and management, and collaboration in the digital age.

**TH DAN 3263 Techniques in Scenic Finishes: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, or consent of instructor. Survey of theories, materials, and professional techniques used in finishing fabricated scenery. This course will focus on traditional scenic painting, faux finishing techniques, digital graphics production and application, and design and production of digitally printed and cut drops. Course includes practical application through 45 hours of lab work in conjunction with departmental productions and class projects.

**TH DAN 3305 Writing For Performance: 3 semester hours**

Prerequisite: Consent of instructor. Introduction to writing for performance, including playwriting and dramatic adaptation. Students' particular interests will determine course content: ranging from sketch comedy or adaptation of literature for the stage, to full-length comic or dramatic plays. This course is writing intensive and may require additional laboratory hours.

**TH DAN 3399 Stage Combat: 3 semester hours**

Prerequisites: Junior or Senior standing, or consent of instructor. This is a movement course designed to expand the acting student's awareness of the body as a vehicle for the communication of emotion, action, and drama on the stage. It will introduce the skills and techniques necessary for the creation of safe and effective illusions of violence for the stage.

**TH DAN 4020 Directing for the Camera: 3 semester hours**

Prerequisites: TH DAN 2020. This directing course prepares the student director to work with both the actors and the cinematographer to achieve the directorial concept. The director will work with actors and a cinematographer to produce a short-length film/video from a prepared script. The creation of shooting scripts, story boards, and a shooting schedule are covered in the course.

**TH DAN 4040 Special Topics in Theatre: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Theatre. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4041 Special Topics in Dance: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Dance. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4220 Directing For The Theatre: 3 semester hours**

Prerequisites: TH DAN 1210 or consent of instructor. A survey of the theories and practices of theatrical directing, beginning with the theories and techniques of accomplished directors. The stage director's role in performance development will be studied through script analysis, production planning, and the rehearsal process, culminating with a live performance. Final projects are laboratory scenes or a short one-act play.

**TH DAN 4261 Advanced Projects In Design And Technology: 1-3 semester hours**

Prerequisites: TH DAN 1910 and consent of instructor. Provides opportunities for supervised advanced projects in theatre design or technology in conjunction with departmental productions, or other independent study projects. Credit assigned based on scope of project. Course may be repeated for up to 6 credit hours.

**TH DAN 4390 Theatre Internship: 1-3 semester hours**

Prerequisites: Junior level with consent of instructor. Provides opportunities for supervised projects in conjunction with off-campus professional theatre and/or dance companies in performance, management, design or technology. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4391 Dance Internship: 1-3 semester hours**

Prerequisites: Junior level with Consent of instructor. Provides credit for approved supervised projects in conjunction with off-campus professional theatre and/or dance companies. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as SEC ED 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communication or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989: Secondary Professional Internship. This course must be completed in residence. Not available for graduate credit.

**TH DAN 4900 Senior Project: 3 semester hours**

The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related faculty.

## Theatre Courses

**THEATR 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**THEATR 3230 Aesthetics Of Theatrical Styles: 3 semester hours**

Prerequisite: THEATR 1230. analysis of the development of dramatic and artistic styles as they affect the visual presentation of ideas in theatre.

**THEATR 3240 Movement For Musical Theatre: 3 semester hours**

Prerequisite: THEATR 2240 or consent of instructor. Specialized training in movement and dance techniques for musical theatre.

**THEATR 3610 Readers Theatre: 3 semester hours**

Prerequisite: COMM 1160. Study of the oral interpretation of literature as a theatrical experience. Study of theory, techniques, and performance.

**THEATR 3810 Theatre From The Ancient Greeks To The Restoration: 3 semester hours**

Prerequisite: THEATR 1800 or consent of instructor. History of theatre and drama from Classical Greek to the Restoration period.

# College of Nursing

## General Information

The College of Nursing offers academic nursing programs at the undergraduate and graduate levels. Knowledge and skills needed to complete the professional licensure examination to become a registered nurse are available through the traditional baccalaureate option. A part-time, evening and weekend scheduling option is available, as is an accelerated option for students with degrees in other fields or who meet the admission criteria for this intensive option. Nurses who have obtained their basic nursing education through associate degree or diploma nursing programs may fulfill the requirements for the BSN completion option without repetition of previous nursing education. The Master of Science in nursing program offers areas of emphasis in the roles of nurse educator and advanced practice nursing. The Ph.D. program in Nursing is offered in cooperation with the schools of nursing at the University of Missouri-Columbia and the University of Missouri-Kansas City. Admission to the Ph.D. program is available at the post BSN and MSN levels. The Doctor of Nursing Practice program also is offered in cooperation with the schools of nursing at the University of Missouri-Columbia and the University of Missouri-Kansas City, and prepares students for the highest level of advanced clinical nursing practice.

## International Students

All students with International or Permanent Resident status are required to complete an English as a second language (ESL) assessment with the UMSL ESL office. Based upon this assessment students may be required to complete recommended ESL courses before enrolling in nursing courses.

## Continuing Education-Extension and Outreach

Both credit and noncredit continuing education offerings in nursing are presented to provide nurses with new information, techniques, and trends within the nursing profession. Some of these offerings are in outreach sites as part of the college's commitment to working in collaboration with community partners to provide higher education for nurses.

## Professional Organizations

### Sigma Theta Tau International Honor Society for Nursing

Nu Chi is the College of Nursing's official chapter of Sigma Theta Tau International Honor Society. Membership is offered by invitation to nursing students in the upper third of their class and to nurses recognized as outstanding community nursing leaders.

### Student Nurses' Association

The College of Nursing is a constituent of the National Student Nurses' Association. The purpose of the organization is to provide baccalaureate students an opportunity to connect with the nursing profession through service and professional development activities. The organization is open to all nursing majors and clinical nursing majors.

### Minority Student Nurses' Association

The College of Nursing is a constituent of the Black Student Nurses' Association. The purpose of this organization is to provide black nursing

students in the prelicensure baccalaureate program the opportunity to serve as a support group for African-American students, collaborate with other African-American groups to compile archives relevant to African-American nurses, and to promote participation in interdisciplinary activities.

## Undergraduate Study

### Undergraduate Studies

The College of Nursing provides coursework leading to the Bachelor of Science in nursing (BSN). The program is accredited by the Commission on Collegiate Nursing Education and the pre-licensure tracks are fully approved by the Missouri State Board of Nursing. The undergraduate program offers two means for achieving the bachelor's degree in nursing: studies that are preparatory for completion of the professional nurse licensure examination (pre-licensure track) and advanced placement for the professional registered nurse without repetition of fundamental nursing and clinical courses (RN to BSN track). An accelerated pre-licensure option is available for qualified persons who hold earned degrees in non-nursing fields, or outstanding students who have completed all prescribed general education and science course work. The traditional (non-accelerated) BSN pre-licensure option can be completed on a full-time basis or through a part-time evening/weekend program. Students must meet university and College of Nursing requirements. Baccalaureate students meeting admission criteria may participate in the Pierre Laclede Honors College. **Students who have been dismissed from another nursing program are not eligible for admission to the pre-licensure BSN program.**

Faculty maintain the right to make appropriate curriculum changes to comply with standards for accreditation and approval as stipulated by the Commission on Collegiate Nursing Education and the Missouri State Board of Nursing's minimum standards. For that reason, students receive exceptional advising support from college advisors.

### Degree Requirements for B.S.N.

The Bachelor of Science in nursing degree requires comprehensive course work in general education and nursing. Basic undergraduate nursing course work includes theory, on-campus laboratory and clinical activities. Clinical experiences require weekday, evening, and/or weekend commitments. Full-time study in the pre-licensure baccalaureate track can be completed in four academic years. Part-time study is available with nursing classes in the evenings and clinical hours during the week or on weekends. The nursing clinical curriculum can be completed in ten semesters following completion of general education courses. The pre-licensure accelerated track requires full-time study and can be completed in 15 months. The RN to BSN track is offered at selected metropolitan sites, on-campus, and by Internet. Clinical activities in the RN to BSN Program are community-based and may be completed in the student's home community.

Upon completion of the BSN program, students are expected to have achieved the following learning outcomes:

- Integrate into practice theories and evidence-based concepts from nursing, the arts, sciences, and humanities to provide comprehensive nursing care in a variety of settings.
- Integrate clinical reasoning and problem solving in professional practice.

- Administer culturally competent, compassionate, holistic care to promote healthy outcomes for diverse individuals, families, communities, and populations during all life phases.
- Use evidence-based practices to promote health, manage illness, and prevent injury among individuals, families, communities, and populations.
- Utilize communication skills to enhance relationships with patients and families and collaboration among members of the health care team.
- Assume responsibility and accountability for decisions and actions based on professional intrapersonal values, ethical and legal obligations, standards of practice, social justice, and economics.
- Integrate principles of health education, management, leadership, quality care, and patient safety when organizing, coordinating, and engaging in professional practice.
- Demonstrate knowledge of health care policies and finance in a regulatory environment and their influence on health care access and quality.
- Exhibit motivation and self-direction in activities that contribute to lifelong personal, professional, and intellectual development.
- Utilize health care technology and information management systems to promote quality care and patient safety.

## Satisfactory/Unsatisfactory (Pass/Fail) Grading

Undergraduate nursing majors may not take required prerequisite general education or nursing courses on a satisfactory/unsatisfactory basis.

## Undergraduate Degree Requirements

### General Education Requirements

Nursing majors must complete all general education requirements (p. 34) of the university as outlined in this Bulletin.

In addition to meeting the university's general education requirements, the prerequisite courses listed under 1) Natural science course work, 2) Behavioral and social science course work, 3) Humanities, and 4) Nursing, must be completed prior to beginning the clinical major. See a curriculum planning guide for specific courses and proper sequencing.

#### 1) Natural science course work

BIOL 1131	Human Physiology And Anatomy I	4
BIOL 1141	Human Physiology And Anatomy II	4
BIOL 1162	General Microbiology	3
CHEM 1052	Chemistry For The Health Professions (or equivalent)	4

#### 2) Behavioral and social science course work

PSYCH 1003	General Psychology	3
PSYCH 1268	Human Growth And Development	3
ECON 1000	Introduction To The American Economy (or equivalent)	3

Social science elective

#### 3) Humanities

Any Philosophy course (as part of the University's 3 humanities requirement)

#### 4) Nursing

NURSE 2103	Nutrition And Health (or equivalent)	3
NURSE 2105	Communication In The Nursing Profession	3

NURSE 3799	Quantitative Analysis In The Health Sciences (or equivalent)	3
------------	--	---

#### Nursing Course Work Requirements

PRE-LICENSURE - 4 year traditional and part-time evening and weekend options

NURSE 2101	Introduction to Nursing	2
NURSE 3101	Nursing And Health <sup>1</sup>	6
NURSE 3106	Assessment Of Clients In Health And Illness <sup>1</sup>	4
NURSE 3110	Pathophysiological Bases Of Nursing Practice	3
NURSE 3111	Pharmacotherapeutics In Nursing Practice	3
NURSE 3205	Adult Health Nursing I <sup>1</sup>	5
NURSE 3206	Adult Health Nursing II <sup>1</sup>	5
NURSE 3214	Psychiatric Mental Health Nursing <sup>1</sup>	4
NURSE 3215	Nursing Of Women And Childbearing Families <sup>1</sup>	4
NURSE 3216	Child And Family Health Nursing <sup>1</sup>	4
NURSE 3804	Ethical And Legal Dimensions Of Nursing Practice	3
NURSE 3807	Nursing Research - Evidence Based Nursing Practice	3
NURSE 3808	Management And Leadership In Nursing	2-3
NURSE 3817	Introduction To Nursing And Health Informatics	3
NURSE 4300	Community Health Nursing <sup>1</sup>	4
NURSE 4310	Senior Synthesis <sup>1</sup>	6

Nursing elective (required for 4 year traditional track students thorough Spring 2014 graduating cohort)

**Total Hours** **94-95**

<sup>1</sup> Includes a laboratory and/or clinical component

Students are required to furnish their own transportation to and from campus and clinical agencies. Students must have automobile access for all community experiences through the program. Students are required to complete standardized assessment exams throughout the program and at completion as part of the program evaluation.

## Traditional BSN Program

The College of Nursing provides coursework leading to the Bachelor of Science in Nursing (BSN) through traditional full-time and part-time studies.

### Traditional Full-Time BSN Admission Criteria Pre-Clinical Admission Criteria

Admission to UMSL as a pre-clinical nursing student does not guarantee admission into the clinical track of any of the Pre-Licensure BSN Options (Traditional, Accelerated or Part-Time Evening/Weekend), unless a student is admitted to the Traditional BSN Option under the Freshman Guaranteed Clinical Criteria.

### Freshman Guaranteed Clinical Criteria

First-time freshmen and applicants with fewer than 24 transferable college credit hours from a regionally accredited college or university who meet the following minimum criteria may earn a *guaranteed* clinical space in the Traditional BSN Option:

- Admission to UMSL
- Minimum ACT score of 22
- Minimum high school GPA of 2.9 (as calculated by UMSL's Office of Admissions)

In order to keep their guaranteed clinical space, students must maintain the following minimum criteria upon enrollment at UMSL:

- Full-time enrollment at UMSL
- Minimum cumulative GPA of 2.75 (GPA is calculated on all attempts of all undergraduate courses)
- Minimum science GPA of 2.75 (GPA is calculated on first attempts only of: Chemistry, Anatomy & Physiology I, Anatomy & Physiology II and Microbiology)
- Completion of all general education course requirements (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/sample-plans-of-study/BSNtrad.gened.pdf>)
- Grade of C- or higher in all *prerequisite* courses except as listed for science courses

## Freshman General Admission Criteria

First-time freshmen and applicants with fewer than 24 transferable college credit hours<sup>1</sup> from a regionally accredited college or university who do not qualify for a Guaranteed Clinical Space but do meet the following minimum criteria may still qualify for admission to the nursing major as a pre-clinical student:

- Admission to UMSL
- Minimum ACT score of 21
- Minimum high school GPA of 2.5 (as calculated by UMSL's Office of Admissions)

Students admitted under the Freshman General Admission Criteria must still apply competitively for a clinical space during their sophomore year (see Clinical Admission Criteria below).

**Effective Fall 2013, all first-time freshmen and transfer students with fewer than 24 transferable college credit hours who are admissible to UMSL may declare themselves to the Nursing major. UMSL's admission criteria for first-time college students can be found on the website for the Office of Admissions. These students will still have to apply competitively for admission to the clinical track, unless they meet the requirements to earn a guaranteed clinical space (above).**

## Transfer Student Admission Criteria

Applicants with 24 or more transferable college credit hours<sup>1</sup> from a regionally accredited college or university who meet the following minimum criteria may qualify for admission to the nursing major as a pre-clinical student:

- Admission to UMSL
- Minimum cumulative GPA of 2.5 (GPA is calculated on all attempts of all transferable undergraduate courses)

<sup>1</sup> Once an applicant has earned 24 or more transferable college credit hours from a regionally accredited college or university, we do not take ACT score and/or high school GPA into consideration for admissions purposes.

## Clinical Admission Criteria

Clinical spaces are awarded on a competitive and space-available basis for each admission period. Admission to the University of Missouri St. Louis does not guarantee admission into the clinical track of the Traditional BSN Option unless a student meets the Freshman Guaranteed Clinical Criteria (see above).

Applicants must meet the following *minimum* criteria to apply for a clinical space in the Traditional BSN Option:

- Admission to UMSL
- Minimum cumulative GPA of 2.5 (GPA is calculated on all attempts of all transferable undergraduate courses)
- Minimum science GPA of 2.5 (GPA is calculated on first attempts only of: Chemistry, Anatomy & Physiology I, Anatomy & Physiology II and Microbiology)
- Required science courses (listed above) completed within 10 years prior to enrollment
- Completion of all general education course requirements (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/sample-plans-of-study/BSNtrad.gened.pdf>)
- Grade of C- or higher in all *prerequisite* courses except stated above for science courses

## Traditional Part-Time BSN Admission Criteria Pre-Clinical Admission Criteria

Applicants who plan to complete their general education / prerequisite coursework at UMSL must apply to the university as a pre-clinical nursing student. It is important to note that admission as a pre-clinical nursing student does not guarantee admission into the clinical track of any of the Pre-Licensure BSN Options (Traditional, Accelerated or Part-Time Evening/Weekend), unless a student is admitted to the Traditional BSN Option under the Freshman Guaranteed Clinical Criteria (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/admission-criteria-guaranteed.html>).

Applicants with 24 or more transferable college credit hours<sup>1</sup> from a regionally accredited college or university who meet the following minimum criteria may qualify for admission to the nursing major as a pre-clinical student:

- Admission to UMSL
- Minimum cumulative GPA of 2.5 (calculated on all attempts of all transferable undergraduate courses)

<sup>1</sup> Once an applicant has earned 24 or more transferable college credit hours from a regionally accredited college or university, we do not take ACT score and/or high school GPA into consideration for admissions purposes.

Students admitted under the Pre-Clinical Admission Criteria must still apply competitively for a clinical space (see below).

## Clinical Admission Criteria

Clinical spaces are awarded on a competitive basis for each admission period. Admission to UMSL does not guarantee admission into the clinical track of the Part-Time BSN Option.

Applicants must meet the following *minimum* criteria to apply for a clinical space in the Part-Time BSN Option:

- Admission to UMSL
- Minimum cumulative GPA of 2.5 (GPA is calculated on all attempts of all transferable undergraduate courses)
- Minimum science GPA of 2.5 (GPA is calculated on first attempts only of: Chemistry, Anatomy & Physiology I, Anatomy & Physiology II and Microbiology)
- Required science courses (listed above) completed within 10 years prior to enrollment
- Completion of all general education course requirements (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/sample-plans-of-study/BSNtrad.gened.pdf>)
- Grade of C- or higher in all *prerequisite* courses

## BSN Traditional Application Procedure To Apply For Nursing Major (Pre-clinical)

First-time freshmen and applicants with fewer than 24 transferable college credit hours, send the following:

- Completed University application
- Official high school transcripts or GED score
- Official ACT or SAT score
- Official college transcripts, if applicable

Applicants with 24 or more transferable college credit hours, send the following:

- Completed University application
- Official college transcripts

## To Apply For Clinical Major in the 4 Year Traditional BSN Track

To be considered for the clinical major, students must file a separate clinical major application available through the College's website or Office of Student Services and send it directly to the College of Nursing. Students must complete an application for the Clinical Major during their last semester of enrollment in prerequisite coursework and send the following:

- Completed University application
- Completed College of Nursing Clinical Major application
- Official college transcripts

## Application deadlines for the clinical major

To be admitted to the clinical nursing major all material must be submitted to the College of Nursing, Office of Student services by the following dates:

- Fall admission – February 1st
- Spring admission – October 1st

## Accelerated BSN Program

In addition to the traditional full-time and part-time options, the College of Nursing offers coursework leading to the Bachelor of Science in nursing (BSN) through an accelerated program. The program is designed for students to complete degree studies in 15 months.

## Pre-Clinical Admission Criteria

Applicants who plan to complete their general education/prerequisite coursework at the University of Missouri-St. Louis must apply to the university as pre-clinical nursing students. It is important to note that admission as a pre-clinical nursing student does not guarantee admission into the clinical track of any of the pre-licensure BSN options (Traditional full-time, Traditional part-time, or Accelerated), unless a student is admitted to the traditional BSN option under the Freshman Guaranteed Clinical Criteria (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/admission-criteria-guaranteed.html>).

Applicants with 24 or more transferable college credit hours<sup>1</sup> from a regionally accredited college or university who meet the following minimum criteria may qualify for admission to the nursing major as a pre-clinical student:

- Admission to UMSL
- Minimum cumulative GPA of 2.5 (calculated on all attempts of all transferable undergraduate courses)

<sup>1</sup> Once an applicant has earned 24 or more transferable college credit hours from a regionally accredited college or university, we do not take ACT score and/or high school GPA into consideration for admissions purposes.

Students admitted under the pre-clinical admission criteria must still apply competitively for a clinical space (see below).

## Clinical Admission Criteria

Clinical spaces are awarded on a competitive basis for each admission period. Admission to the University of Missouri-St. Louis does not guarantee admission into the clinical track of the Accelerated BSN option.

Applicants must meet the following *minimum* criteria to apply for a clinical space in the Accelerated BSN Option:

- Admission to UMSL
- A Baccalaureate Degree in another field of study from a regionally accredited college or university or completion of at least 62 college credit hours before the start of the program
- Minimum cumulative GPA of 3.0 for applicants with a Baccalaureate Degree or minimum cumulative GPA of 3.2 for applicants without a Baccalaureate Degree (GPA is calculated based on all attempts of all transferable undergraduate courses)
- Completion of all general education course requirements (<http://www.umsi.edu/divisions/nursing/Pre-Licensure%20BSN%20Programs/sample-plans-of-study/BSNacc.gened.pdf>)
- Grade of C or higher in all *prerequisite* courses
- Required science courses (Chemistry, Anatomy & Physiology I, Anatomy & Physiology II and Microbiology) completed within 10 years prior to enrollment

## Application deadlines for the Accelerated track

To be admitted to the accelerated track that begins in May of each year only, all materials must be submitted to the College of Nursing, Office of Student Services by the following dates:

- Early acceptance deadline - September 15
- After September 15, on a space-available basis

For specific information regarding the B.S.N. degree program, contact Office of Student Services at (314) 516-6066 or 1-888-NURSEUM or visit the College of Nursing website.

## Credit by Transfer and Examination

Credit may be granted for selected general studies. See Admission and Application Procedure section in this Bulletin for credit information.

## Pre-Licensure-15 month accelerated option

## Post Licensure RN to BSN

The RN to BSN curriculum is designed to be completed in six consecutive semesters and takes two years to complete. The innovative program offers flexibility and accessibility in a part-time program. The program allows students to choose to complete their BSN with coursework online, on campus, or at various outreach sites in the St. Louis area.

## Admission Criteria

Admission Requirements RN to BSN include:

- Admission to the University.
- Graduate of either an accredited diploma or associate degree program in nursing.
- Evidence of current licensure as a registered nurse with eligibility for licensure in Missouri.
- Cumulative grade point average of 2.5 (4.0 scale) on a minimum of 30 transferable credit hours (excluding nursing course work)

RN to BSN required nursing courses:

NURSE 3807 (p. 498)	Nursing Research - Evidence Based Nursing Practice	3
------------------------	--	---

NURSE 3808 (p. 498)	Management And Leadership In Nursing	2-3
NURSE 3817 (p. 498)	Introduction To Nursing And Health Informatics	3
NURSE 3900 (p. 498)	Dimensions Of Professional Nursing	3
NURSE 3920 (p. 498)	Health Assessment <sup>1</sup>	3
NURSE 4901 (p. 498)	Family And Community Nursing <sup>1</sup>	5
NURSE 4905 (p. 498)	Values In Professional Nursing <sup>1</sup>	3
NURSE 4911 (p. 498)	Synthesis In Nursing Practice <sup>1</sup>	5

**Total Hours** **27-28**

<sup>1</sup> Includes a laboratory and/or clinical component

RN to BSN students are required to complete a standardized assessment exam during the final part of the program evaluation.

## Sample Degree Completion Plans

BSN Traditional Full-Time (p. 502) BSN Accelerated (p. 503)

BSN Traditional Part-Time (p. 503) RN to BSN (p. 503)

## BSN Traditional Full-Time Study Plan

Students Admitted as Freshmen with Guaranteed Clinical Space

It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.*

## Courses

### **NURSE 1010 Orientation To Nursing: 0 semester hours**

Prerequisites: Admission to four-year baccalaureate program. This mandatory eight-week introduction to the nursing program provides a comprehensive orientation to the program. Students are introduced to the academic and clinical expectations of the curriculum. Concerns critical for academic success (i.e., time management, effective study skills, stress management and dealing with test anxiety) are addressed.

### **NURSE 2101 Introduction to Nursing: 2 semester hours**

This course introduces the historical and theoretical development of nursing as a discipline. Nursing is examined as a dynamic practice profession. Variables that influence nursing and health care are discussed. Concepts and skills introduced in this course guide the student's educational experience within the nursing major.

**NURSE 2103 Nutrition And Health: 3 semester hours**

This course examines nutritional needs throughout the life span with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients and cultural and economic influences on dietary practices.

**NURSE 2105 Communication In The Nursing Profession: 3 semester hours**

This course focuses on the development of communication abilities utilized in professional nursing. The individual's relationship with self, others and groups is discussed. Students learn verbal and non-verbal communication skills, self-awareness, and sensitivity to others. Interpersonal skills are introduced to enable the student to develop effective human caring relationships with a diverse population of clients and colleagues.

**NURSE 3101 Nursing And Health: 6 semester hours**

Prerequisites: BIOL 1131; BIOL 1141; CHEM 1052; NURSE 1010, NURSE 3106; NURSE 3110; NURSE 3111. An introduction to the discipline of nursing, the historical and theoretical development of nursing is explored with an emphasis on critical thinking, the teaching/learning process, and foundational practice concepts. Through modular laboratory experiences, the student acquires psychomotor skills to provide safe and effective nursing care to clients promoting health and wellness. Includes classroom, laboratory and clinical experiences.

**NURSE 3106 Assessment Of Clients In Health And Illness: 4 semester hours**

Prerequisites: BIOL 1131; BIOL 1141; BIOL 1162; CHEM 1052; PSYCH 1268; NURSE 1010. This course integrates theoretical knowledge and interpersonal skills in the assessment of clients, focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking and cultural competency in identifying multidimensional health variations across the life span. The course includes classroom and laboratory experiences.

**NURSE 3110 Pathophysiological Bases Of Nursing Practice: 3 semester hours**

Prerequisites: BIOL 1131, BIOL 1141, BIOL 1162, CHEM 1052 (or equivalent); NURSE 1010. This course focuses on the nature of disease, its causes and the bodily changes that accompany it. The course includes a study of general principles of disease, specific diseases of individual organs and systems and the clinical implications.

**NURSE 3111 Pharmacotherapeutics In Nursing Practice: 3 semester hours**

Prerequisites: BIOL 1141, BIOL 1162, CHEM 1052, NURSE 1010; pre/co requisite: NURSE 3110. This course introduces key terminology, legal foundations, general principles and clinical applications of pharmacology.

**NURSE 3120 Foundations of Nursing: 7 semester hours**

Prerequisites: All general education requirements and accelerated nursing option prerequisite non-nursing courses. This course introduces the student to the theoretical concepts and foundations of professional nursing practice. Utilizing an integrated approach, health promotion and protection throughout the lifespan are explored and supported using theories of nursing practice, health assessment of well individuals, and general principles and concepts of pharmacology and critical thinking.

**NURSE 3121 Clinical Foundations of Nursing: 3 semester hours**

Prerequisites: NURSE 3120. This course assists in the development and application of clinical reasoning in the lab, clinical agency, and simulation environments. Through clinical learning experiences, the student acquires basic psychomotor, communication, and medication administration skills. The student applies these skills in the provision of safe and effective nursing care to clients while promoting health, wellness, and clinical reasoning.

**NURSE 3205 Adult Health Nursing I: 5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to immune responses, problems of oxygenation: ventilation, transport and perfusion: kidney function; regulatory mechanisms and digestion absorption and elimination. emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

**NURSE 3206 Adult Health Nursing II: 5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

**NURSE 3214 Psychiatric Mental Health Nursing: 4 semester hours**

Prerequisites: All 3100-level nursing courses; PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic emotional and psychosocial difficulties and psychiatric illnesses. The course emphasizes development of students' decisional capabilities, self-awareness and professional behaviors as they utilize theory and research from nursing, psychology and related disciplines for the provision of nursing care to individuals, families, & groups. Clinical experiences in community and acute care settings are designed for students to engage in individual and group strategies that promote and maintain mental health. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3215 Nursing Of Women And Childbearing Families: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. Focuses on the childbearing family and women's reproductive health, including family dynamics and growth and development. Health promotion, protection, maintenance and restoration are covered in experiences that include hospital and community settings. Health care policy and systems as relevant to these populations are included. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3216 Child And Family Health Nursing: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. This course focuses on pediatric health and illness with emphasis on family dynamics, growth and development and communication with children and their families. Health promotion, protection, restoration, maintenance and support concepts are covered in experiences that include hospital and community settings. Health care policy and systems are studied as relevant to this population. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3324 Sociology Of The Family: 3 semester hours**

Same as SOC 3224. Prerequisite: SOC 1010 or consent of instructor. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include: love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure.

**NURSE 3330 Nursing of Adults I: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing health problems affecting body regulatory mechanisms. These mechanisms are related to perioperative processes, immune processes, problems of oxygenation, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system and genetics, oncology and hematology problems. This course also incorporates relevant concepts of pharmacology and pathophysiology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support as well as the continued development of the nurse-client relationship, clinical reasoning, and evidence-based nursing practice across the adult life span.

**NURSE 3331 Clinical Nursing of Adults I: 3 semester hours**

Prerequisites: NURSE 3330. This course focuses on the nursing care of adults in the lab, clinical agency, and simulation environments. Utilizing an integrated approach, advanced nursing skills and assessment techniques for adult clients are mastered in perioperative processes, immune processes, problems of oxygenation, hematology, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system, genetics and oncology problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients across the health/illness continuum.

**NURSE 3340 Behavioral Health Nursing: 2.5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic psychosocial and behavioral health issues and specific psychiatric illnesses. An emphasis is placed on the nurse/client relationship in behavioral health promotion, restoration, maintenance and support.

**NURSE 3341 Clinical Behavioral Health Nursing: 1.5 semester hour**

Prerequisites: NURSE 3340. In this course students utilize theory and evidence from nursing and related disciplines in the provision of nursing care to individuals, families, and groups with psychiatric and behavioral health problems. Clinical experiences in community and acute care settings are designed so that students can engage in individual and group strategies that promote and maintain mental health.

**NURSE 3350 Nursing of Adults II: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3351 Clinical Nursing of Adults II: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3360 Maternal-Child Nursing: 5 semester hours**

Prerequisites: PSYCH 1268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3799 Quantitative Analysis In The Health Sciences: 3 semester hours**

Prerequisites: MATH 1030 or equivalent. This course focuses on concepts and applications of statistics in the health sciences. Topics include descriptive and inferential statistics, probability distributions of random variables, sampling and estimation. The course uses examples and content from health sciences to provide the basic concept structure for quantitative analysis.

**NURSE 3804 Ethical And Legal Dimensions Of Nursing Practice: 3 semester hours**

Prerequisites: Philosophy (3 credits). This course explores the ethical and legal dimensions of nursing practice. The relationship between ethical and legal issues is examined within nursing situations. The student participates in dialogue addressing ethical-legal issues in professional nursing practice to explore personal values, increase sensitivity to others and to develop ethical reasoning abilities.

**NURSE 3807 Nursing Research - Evidence Based Nursing Practice: 3 semester hours**

Prerequisite: NURSE 3799 (or equivalent). This course prepares nurses to provide evidence based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

**NURSE 3808 Management And Leadership In Nursing: 2-3 semester hours**

Prerequisites: All 3000 level nursing courses; ECON 1000 or (equivalent)  
This course prepares the nurse to coordinate and manage client care in diverse health care settings. Emphasis is placed on leadership and management theory and related skills, collaboration, delegation, coordination, and evaluation of multi-disciplinary work and the application of outcome-based nursing practice.

**NURSE 3817 Introduction To Nursing And Health Informatics: 3 semester hours**

This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

**NURSE 3820 Introduction to Evidence-Based Nursing Practice and Informatics: 5 semester hours**

Prerequisites: NURSE 3799 or equivalent statistics course. This course will focus on current review of qualitative and quantitative nursing literature and research utilization through evidence-based practice and establish competency in fundamental information management and technology. Students will examine the research and evidence-based process through analysis and critique of nursing literature; critically evaluate technology, information, and its sources; use decision support systems designed for clinical and ethical decision making; and focus on the presentation of nursing data, information, and knowledge.

**NURSE 3873 Guided Study In Nursing: 1-3 semester hours**

This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

**NURSE 3900 Dimensions Of Professional Nursing: 3 semester hours**

Prerequisites: Admission to the College as RN This course investigates the roles and responsibilities of the professional nurse within a rapidly changing health care delivery system. Key issues are explored with emphasis on health promotion and health. Graduates of diploma nursing programs will be awarded college credit for successful validation of basic nursing knowledge as part of this course.

**NURSE 3920 Health Assessment: 3 semester hours**

Prerequisites: NURSE 3900 and NURSE 3817 (may be taken concurrently) or consent of instructor. This laboratory course focuses on the knowledge, communication abilities, and technical skills necessary for comprehensive assessment of individuals of all ages.

**NURSE 4300 Community Health Nursing: 4 semester hours**

Prerequisites: All 3000 level nursing courses. This course provides a conceptual foundation for nursing that recognizes the community as client in society. The course examines socioeconomic, environmental, epidemiological, and legislative influences, ethical/legal issues, and the impact of health beliefs and practices on health promotion and protection in communities and society. The student applies various theories and concepts when encountering families, groups and communities with diverse value systems and cultural backgrounds. Course includes classroom and clinical activities in a variety of settings.

**NURSE 4310 Senior Synthesis: 6 semester hours**

Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 3808 may be taken concurrently. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Within a seminar context, students explore a variety of clinical and professional nursing topics. The course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Course includes classroom and clinical experiences in a variety of settings. Not for graduate credit.

**NURSE 4520 Population Focused Nursing: 2 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course provides a conceptual foundation for nursing that recognizes populations in society. The course examines the effect of socioeconomic and environmental, epidemiological factors, and the impact of health beliefs and practices on health promotion and protection in populations. This course also focuses on epidemiological factors and legislative influences in diverse populations.

**NURSE 4521 Clinical Population Focused Nursing: 2 semester hours**

Prerequisites: NURSE 4520. This clinical course focuses on the nursing care of populations in various settings. The student applies population-based theories and concepts when encountering individuals, families, groups and populations with diverse value systems and cultural backgrounds.

**NURSE 4530 Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Topics will include leadership, management theory and related skills, collaboration, delegation, coordination, and evaluation of outcome based interdisciplinary nursing practice.

**NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

**NURSE 4720 Perioperative Nursing: 3 semester hours**

Prerequisite: Consent of the instructor. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

**NURSE 4722 Transcultural Nursing: 3 semester hours**

Prerequisite: Consent of the Instructor. Examines transcultural nursing concepts, theories and practices in relationship to human caring. Focuses on application and analysis of health care and scope of practice within selected cultural contexts. Includes practicum experiences.

**NURSE 4723 Nurse Externship: 3 semester hours**

Prerequisite: Senior level status; GPA 3.0 (4.0 scale). This course provides the opportunity to apply theoretical and conceptual knowledge and skills in a structured clinical environment under the guidance of a mentor.

**NURSE 4724 Emergency/Trauma Nursing: 3 semester hours**

Prerequisites: NURSE 3205 and NURSE 3206 or consent of instructor.

This course provides a framework for the roles and responsibilities of the professional registered nurse in Emergency and Trauma nursing care.

**NURSE 4726 Parish Nursing: 3 semester hours**

Prerequisites: All 2000 level nursing courses, NURSE 3205 and NURSE 3214.

This course provides a conceptual foundation that recognizes a speciality of nursing practice that combines professional nursing and health ministry. It examines four major concepts: professionalism; health and wholeness; spirituality; and community as it relates to culture and diversity. The course includes classroom discussion, individual reflection and community based learning experiences.

**NURSE 4730 Nursing Care At The End Of Life: 3 semester hours**

Prerequisites for Nursing Students NURSE 3205 and NURSE 3214. All others by consent of instructor. This course focuses on the nursing care of terminally ill patients and their families. Topics explored will include the impact of personal values and beliefs about death, physiology of end stage disease processes, symptom assessment and management, psychosocial and spiritual support, consideration in special patient populations, societal issues and trends in end of life care, ethical considerations in caring for the dying patient, grief and bereavement processes, and the role nursing in end of life care across settings.

**NURSE 4741 Advanced Nrsng Assmt & Mgt Of Clients W/Cardiac Dysrhythmias: 3 semester hours**

Prerequisite: Senior status. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

**NURSE 4742 Critical Care Nursing Of The Adult: 3 semester hours**

Prerequisites: RN or completion of NURSE 3205 and NURSE 3206 (or equivalent). Focuses on health restoration, health maintenance, and health support of individuals with dysfunctions or trauma to major organ systems. Emphasis is on understanding pathophysiology and psychosocial processes related to nursing and collaborative interventions, and the development of a functional framework for data organization and analysis.

**NURSE 4901 Family And Community Nursing: 5 semester hours**

Prerequisites: NURSE 3900, NURSE 3817 and NURSE 3920. This practicum course introduces the concepts, principles, skills, and professional nursing roles essential to practice community-based professional nursing with families and groups.

**NURSE 4905 Values In Professional Nursing: 3 semester hours**

Prerequisites: All 3000 level RN/BSN nursing courses or consent of instructor. Explores values and beliefs as they shape professional nursing practice and influence clinical decision making and interventions in the evolving health care system. Attention is given to the impact of sociocultural factors and health/illness beliefs and practices of the diverse populations served by the professional nurse. Students examine their own understanding of the moral nature of professional nursing within the context of a diverse society.

**NURSE 4911 Synthesis In Nursing Practice: 5 semester hours**

Prerequisites: NURSE 4901. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities with selected populations determined to be at risk for a variety of health related problems. The course includes assessment of cognitive and affective growth achieved while in the BSN Completion Program.

**NURSE 6000 Statistics in Nursing & Health Sciences: 3 semester hours**

Prerequisites: Admission to graduate study in nursing or consent of instructor. Provides students with a graduate level understanding of quantitative methods and their relationship to research in nursing and health sciences. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

**NURSE 6106 Policy, Organization And Financing In Health Care: 3 semester hours**

Prerequisite: Admission to MSN program. This course presents an overview of health care policy, organization, and financing with emphasis on current health care trends. The focus is on the design and implementation of health care delivery systems with the goal of providing safe, quality, and informatics driven cost-effective care. Emphasis is placed on the development of a leadership role in managing human, financial, and physical health care resources. The format includes pertinent information concerning primary health care and public health issues, the relationship between these issues, and improving health care delivery and outcomes.

**NURSE 6111 Healthcare Systems Concepts and Theory: 3 semester hours**

Prerequisites: Consent of Program Director. Healthcare Systems Concepts and Theory introduces the historical development, current U.S. healthcare structure, and projected transformation of the U.S. health care system and practice professions. This is a foundational course that provides the student with an understanding of the complex nature of the healthcare sector. This course content prepares the student to assess organized efforts to influence health delivery and policy formulation, the impact of these efforts on the administrator, leader, or policy analyst of a healthcare organization, and the role of societal values and individual behaviors in healthcare system's performance, reform efforts, and the health status of the U.S. population.

**NURSE 6112 Nursing Research Methods: 3 semester hours**

Prerequisites: NURSE 3799 or equivalent; NURSE 6111 may be taken concurrently. This course is designed to provide the student with the skills required to be a consumer of nursing research. These include the fundamentals of scientific inquiry in nursing as well as the information necessary to understand and evaluate nursing research. Principles and techniques common to scientific investigation are applied to nursing. Researchable problems are developed.

**NURSE 6114 Evidence-Based Nursing: 3 semester hours**

Prerequisite: NURSE 6112. This course prepares nurses to review existing nursing research about a nursing practice problem and to propose appropriate changes in current nursing practice. The theoretical basis for evidence-based nursing with respect to screening, diagnosis, selection of treatment alternatives, and prognosis are examined. Research designs such as case control and cohort studies are included. Practical application of change in nursing is examined, including formative and summative aspects of evaluation. Opportunities are provided to develop a plan to implement evidence-based change in an area of nursing practice.

***NURSE 6120 Population-Based Foundations of Health: 3 semester hours***

Prerequisite: Admission to MSN. The purpose of this course is to provide students with an advanced nursing practice perspective on providing population-based nursing care. This course includes an evaluation of human and cultural diversity in the health-illness continuum. Core concepts include ethics; theories of health and health promotion, protection, restoration, and maintenance; and the support needed for a peaceful death. Coursework will focus on community/population-based data on epidemiology, disease and injury prevention, health education, growth and development, and family systems.

***NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides opportunities to examine the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will have opportunities to develop skills needed to critically analyze scientific literature foundational to implementing evidence-based practice projects.

***NURSE 6144 Health Promotion and Cultural Diversity: 3 semester hours***

Prerequisites: Admission to the MSN Program. This course provides graduate nursing students with knowledge related to the concepts of health promotion, health protection, cultural diversity, and moral/ethical influences across the lifespan. Core concepts for the course include theories of health and health promotion and protection, epidemiology, disease and injury prevention, health education, cultural diversity, growth and development, nutrition and family systems. The students will explore values clarification and ethical analysis.

***NURSE 6309 Role Of The Nurse Educator: 3 semester hours***

Prerequisites: Admission to the MSN program or consent of instructor. This course will explore the roles, responsibilities, and functions of the nurse educator. Emphasis will be placed on the development and evaluation of the interactive nature of teaching and learning in a variety of settings.

***NURSE 6320 Learning And Curriculum Development In Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

***NURSE 6321 Instructional Strategies In Nursing: 3 semester hours***

Prerequisites: NURSE 6309 or consent of Instructor; must be taken concurrently with NURSE 6320. This course focuses on the development and analysis of teaching and learning strategies in nursing education. Adult learning principles of teaching and learning will be incorporated into the innovative strategies developed within this course. Integration of new technology in instructional design and delivery will be highlighted. Evaluation methods of both teacher and learner will be explored.

***NURSE 6322 Evaluation Strategies in Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course provides students the opportunity to learn evaluation concepts, including testing and measurement in nursing education at the didactic, clinical and programmatic levels. Content includes strategies to assess and evaluate learning in the cognitive, psychomotor and affective domains. Quality improvements, as well as legal and ethical considerations are explored. Key concepts include criterion and norm referenced theory and technique; reliability, validity, and the associated descriptive statistics; preparation of instrumental objectives for use in developing classroom tests and clinical nursing performance evaluations.

***NURSE 6409 Role Of The Nurse Leader: 3 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of the instructor. Analysis of the roles and responsibilities of the nurse executive in a complex healthcare system. This course explores the roles and challenges of the clinical nurse leader. Emphasis will be placed on the responsibilities of the clinical nurse and clinical nurse leader in a complex healthcare system.

***NURSE 6418 Organizational Behavior in Healthcare: 3 semester hours***

Prerequisites: Consent of Program Director. This course applies theory and concepts from organizational behavior to the healthcare system and incorporates organizational theory and behavioral sciences as a framework for improving organization performance. Students will understand interpersonal and interprofessional relationships in healthcare and factors that influence effectiveness and employee and patient satisfaction. Areas of particular focus will include psychosocial factors impacting recruitment selection, training and development of employees, healthcare organizational leadership, theories of employee performance, effective management theory and practice, engaging and involving employees in organizational processes, motivation, teamwork, and managing change.

***NURSE 6420 Healthcare Law and Regulation: 3 semester hours***

Prerequisites: Consent of Program Director. This course introduces and examines a wide range of topics in the area of health law and regulation, and discusses how laws and regulations can promote or impede health and well-being. Students will explore concepts that inform healthcare policy, potential legal problems in various health care settings, issues and rights that are implicated, and the role of law in healthcare and policy. Students will identify issues and propose solutions or plans of action. The emphasis will be on formulating analyses of federal, state, and local law related to healthcare and public health. Specific topics will include the role that policy and law have played in areas such as tobacco regulation, managed care, healthcare reform, and laws utilized for emergency use of drugs and during public health emergencies.

***NURSE 6424 Social Determinants of Health: 3 semester hours***

This course covers health disparities in the U.S. that adversely impact individual health, population health outcomes, and the productivity of the workforce. Developing an appropriate response to what will be treated as an epidemic requires an understanding of factors that adversely influence vulnerability and behavior. Patterns of poverty and life expectancy serve as one vehicle for understanding social disparities. The goal of this course is to provide students with the skills to critically reflect on current strategies to stem the health disparities through a sociological approach to understanding epidemiological patterns. Understanding the impact of poverty, racism, and stigma and the processes of migration, incarceration, social interaction that influences vulnerability, access to care, and participation in wellness activities will be addressed. This course will have an extensive interdisciplinary approach that will challenge students to create solutions that address elements of the structural and social environment impacting health disparities. Students will work with individuals in the community to assess existing disparities, the current and the past approaches to mitigating the factors leading to disparities.

***NURSE 6425 Managed Care Services: 3 semester hours***

Prerequisites: Admission to the MSN or consent of instructor. Provides an analysis of the health care environment in managed care and its impact on the nurse's role.

***NURSE 6426 Health Resources Management: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on the roles and responsibilities of the nurse leader for fiscal and human resource management in both public and private sectors. Includes analysis of the environment, healthcare organization within the system and impact of resource management on nursing and health care.

***NURSE 6428 Theory And Practice In Nursing Leadership: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on theories and practices of advanced nursing leadership and management practice within complex healthcare systems. This course will also compare to global healthcare systems. Particular focus will be on the application/effectiveness assessments of the practices within healthcare organizations. Patient safety and quality management theory practices in healthcare will be discussed in depth and compared to other industries' safety and quality management programs theory/practices.

***NURSE 6509 Role Of The Clinical Nurse Specialist/Nurse Practitioner: 2 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of instructor. This course will focus on issues affecting the emerging roles of the nurse practitioner and clinical nurse specialist. It is designed to facilitate the role development of nurses who desire to function as primary care providers and/or as specialists within a specific clinical area of advanced nursing practice. Emphasis include sub-roles of advanced practice (leader, consultant, expert, researcher, educator), legal and professional issues, change theories, and standards of practice.

***NURSE 6518 Pathophysiology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnosis within physiological systems of sub-cellular and cellular origin, biochemical, and anatomical changes across the life span.

***NURSE 6519 Advanced Pediatric Pathophysiology: 3 semester hours***

This course focuses on embryology of the major organ systems, as well as specific physiologic and pathophysiologic processes relevant to the child from birth through age 18. Implications for advanced nursing practice which result from alterations of normal physiologic functioning in cellular, tissue, and organ systems are examined. Emphasis is placed on the relationship between pathophysiology, decision making and standards of advanced nursing practice.

***NURSE 6520 Pharmacology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: NURSE 6518 or consent of Program Director. This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

***NURSE 6524 Health Assessment For Advanced Nursing Practice: 3 semester hours***

Prerequisite: NURSE 6518 or consent of Program Director. This course provides a systematic approach to advanced physical assessment as well as psychological, sociocultural, developmental, and spiritual assessment of individuals across the life span. This course builds upon basic health assessment knowledge and skills, laboratory work interpretation, validation, documentation, and analysis of assessment findings. This course includes mandatory didactic and clinical experiences.

***NURSE 6526 Advanced Health Assessment For Pediatric Nursing Practice: 3 semester hours***

Co-requisite: NURSE 6519 or permission of the instructor. Comprehensive assessment of children through adolescence, including those with significant health and/or developmental deviations, using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation, and documentation of findings.

***NURSE 6529 Advanced Pharmacology For Pediatric Nursing Practice: 3 semester hours***

Prerequisites: Admission to Master of Science in Nursing or permission of the instructor. This course is a clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary health care management of children from birth to young adulthood by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific illness. The Missouri Laws for advanced practice nurse prescriptive authority will be addressed. Core concepts include pharmacodynamics, pharmacokinetics, health related information, medication compliance and issues that pertain to the prescribing of medication in advanced nursing practice.

***NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides an introduction to the interpretation and appropriate use of diagnostic measures for advanced practice nurses in primary care settings. Special attention is paid to laboratory, radiographic and diagnostic testing. In addition, clinical opportunities will be provided to gain clinical interventional skills for advanced practice nursing.

***NURSE 6660 Introduction to Health Systems Management, and Policy for Underserved: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides a comprehensive survey of the U.S. health care system, healthcare policy, integrative care practice models, and management principles useful in primary care settings dedicated to underserved populations. Selected topics include health behaviors, health maintenance and the management of primary healthcare in underserved populations, access to mental health care and substance abuse treatment, the U.S. healthcare system (both public and private sectors), the legal and ethical bases for caring for the underserved, the public policy-making process, and management principles of strategic planning, marketing, and project management in clinics serving the underserved. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations will be incorporated into a community based experience.

***NURSE 6730 Leadership in Population Health I: 4 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6731 Leadership in Population Health II: 4 semester hours***

Prerequisites: NURSE 6730 or consent of Program Director. This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6737 Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan experiencing psychiatric-mental health concerns. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6738 Psychiatric-Mental Health II: Diagnosis & Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6737 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic, and mental health problems in this population.

***NURSE 6739 Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6740 Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6739 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6741 Family Health I: Diagnosis and Management of Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6742 Family Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6741 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6743 Child Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6578, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute and chronic health and mental health problems in this population.

***NURSE 6744 Child Health II: Diagnosis and Management in Advanced Practice Nurse: 4-5 semester hours***

Prerequisites: NURSE 6743 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology, and advanced physical assessment to prepare students to assume roles in advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply previous strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6746 Women's Health I: Diagnosis & Management in Advanced Practice Nursing: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of women across the life span, with a focus on reproductive health, including male sexual and reproductive health. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within the defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6747 Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6870 Special Topics In Advanced Practice Nursing: 1-3 semester hours***

Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate MSN or PhD levels.

***NURSE 6875 Special Study In Graduate Nursing: 1-3 semester hours***

Prerequisites: Admission to MSN prog or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

***NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 3 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

***NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 3-6 semester hours***

This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, health systems leadership, policy and evidence-based care populations.

***NURSE 6950 Advanced Nursing Practice: 4 semester hours***

Prerequisites: NURSE 6739, NURSE 6743, NURSE 6746. Advanced nursing practice examines different nursing and interdisciplinary models of case management of acute and chronic problems across the lifespan. The intensive clinical experience focuses on the student's specialty care area: adults, pediatric or women's health.

***NURSE 6951 Advanced Intensive Clinical for the Nurse Educator: 2 semester hours***

Prerequisites: NURSE 6520, NURSE 6524, NURSE 6309. This course provides a concentrated opportunity to function in an advanced nursing role as a nurse educator incorporating an intensive clinical experience focusing on the student's chosen population.

***NURSE 6952 Synthesis Practicum: 3 semester hours***

Prerequisites: All required courses in the Nurse Educator or Nursing Leadership of Health Systems option or consent of instructor. This clinical course is a concentrated opportunity to function in an advanced nursing role as a nurse administrator, integrating clinical and functional role activities within a chosen setting. Emphasis includes educator or administrator nursing practice, functional role responsibilities, and activities with emphasis on their relationship to client outcomes.

***NURSE 6954 Advanced Practice Nursing: Residency I: 3-4 semester hours***

Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744, NURSE 6747 or the consent of the Program Director. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 6955 Advanced Practice Nursing: Residency II: 3-6 semester hours***

Prerequisites: NURSE 6954 or the consent of the Program Director. This clinical course provides a continuation of precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

**NURSE 7209 Role of the DNP: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to synthesize and analyze knowledge of the DNP role within a specified population focus and role. The overview of selected theories and frameworks that can be used to guide advanced practice nurses and nursing leaders in facilitating the use of evidence-based practice, understanding cultural aspects of care, and framing situational awareness. Core concepts include the regulatory, legislative, and professional influences of advanced nursing practice. Emphasis includes sub-roles of the doctorally prepared nurse including: Advanced Practice Registered Nurse (APRN), leader, consultant, expert, researcher, and educator.

**NURSE 7211 Biostatistics I: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides a foundational understanding of the use of biostatistics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

**NURSE 7212 Biostatistics II: 3 semester hours**

Prerequisites: Admission to PhD program. This course builds on statistical procedures and advances the student's understanding of advanced statistical methods including design and measurement.

**NURSE 7220 Leadership in Practice: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to develop and refine critical leadership skills by focusing on improving the health of individuals and populations. The course uses a combination of didactic lectures, case-based learning and experiential exercises to explore leadership competencies including change management, strategy implementation, quality improvement, effective communication, team dynamics, and systems thinking. Emphasis is on using models and theories that facilitate inter-professional collaboration to achieve optimal health outcomes. The focus is effective communication and leadership methods necessary to establish successful inter-professional teams. Students will enhance skills in verbal, written and electronic communication; team leadership; and creating and sustaining health related initiatives. Through advanced understanding of the inter-professional dimension of healthcare, students will facilitate collaboration and remove barriers to providing safe, timely, effective, efficient, equitable and patient centered care in healthcare systems.

**NURSE 7230 Epidemiology: 3 semester hours**

Prerequisite: NURSE 7211 or Consent of Program Director. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

**NURSE 7240 Health Informatics: 3 semester hours**

Prerequisites: Consent of the Program Director. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

**NURSE 7251 Healthcare Economics: 3 semester hours**

Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

**NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours**

Prerequisite: None. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

**NURSE 7270 Policy Application for Improved Health Outcomes: 3 semester hours**

Prerequisites: NURSE 6106 or equivalent and NURSE 7230. Students learn how to effectively translate and disseminate knowledge from nursing and other health sciences to policy makers and stakeholders in order to form collaborations to affect change at various levels of the policy process. Topics to be covered include policy analysis, policy development, collaboration and negotiation specific to the policy process, building social and political capital and garnering resources to assure effective policy implementation. Students will utilize population health data, policy analysis, and policy development skills to define, shape and implement culturally competent health policy.

**NURSE 7291 DNP Capstone I: 3 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7292 DNP Capstone II: 3 semester hours***

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7293 DNP Capstone III: 2 semester hours***

Prerequisites: Consent of Program Director. This experience provides additional opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7299 DNP Seminar: 1-3 semester hours***

Prerequisites: All DNP required course work or Consent of Instructor. This seminar provides students with the opportunity to synthesize and analyze knowledge within the context of the emerging DNP role. Analysis of practice issues may include reflective practice, collaboration, health systems technology, ethics and policy.

***NURSE 7300 Prevention of Injury and Disability: 3 semester hours***

Prerequisites: Graduate status or consent of instructor. This course will examine trends in injury and disability nationally and internationally, relevant theories and conceptual models, the definition and measurement of key concepts, and analysis of interventions proposed for preventing injury and mitigating disability. The role of information and computer technologies in the management of disability will also be considered. Specific content will include age-related injury and disability, disability associated with cardiovascular and other chronic diseases, and the psychosocial contexts of disability, including traumatic stress and its outcomes.

***NURSE 7401 Research Institute I: 2 semester hours***

Prerequisites: Admission to Doctorial Study in Nursing. This course provides an introduction to the process of becoming a research scientist or translational investigator. Content will include the responsible conduct of research, its core elements, relevant policies and procedures, and relevant research. This course also includes the culture of nursing, literature reviews, scholarly writing, technology in the research process, developing a program of scholarship and effective time management.

***NURSE 7403 Developer of the Nurse Scientist: 3 semester hours***

Prerequisite: Admission to doctoral study in nursing. This course addresses the role of the PhD-prepared nurse as scientist, leader, academician, and policy maker. Students will analyze strategies for lifelong learning and development as nurse scientists and will explore avenues for building their programs of scholarship, funding opportunities, and contributing to nursing science in policy and clinical practice. Students will examine ways to collaborate effectively in order to improve health care and health outcomes.

***NURSE 7443 Healthcare Policy: 3 semester hours***

Prerequisites: Graduate Standing and Consent of the Program Director. This is a survey course examining current issues in healthcare policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in healthcare policy are explored.

***NURSE 7480 Guided Nursing Research Seminar: 1-6 semester hours***

Prerequisite: Consent of instructor. Provides opportunity to work in collaboration with faculty and peers on a focused research topic relevant to nursing.

***NURSE 7481 Development Of Nursing Science And Theory: 3 semester hours***

Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

***NURSE 7488 Qualitative Methods In Nursing Research: 3 semester hours***

Prerequisites: Admission to PhD program. Examines the relationship between theoretical and philosophical perspectives and selection of appropriate methodologies in research design. Critically explores issues related to innovations in traditional qualitative designs and emerging technologies, rigor and validity, and role of interpretive research in nursing science.

***NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours***

Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

***NURSE 7491 Advanced Nursing Theory Development And Validation: 3 semester hours***

Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

***NURSE 7498 Doctoral Seminar: 1-12 semester hours***

Prerequisite: Consent of instructor. Presentation and discussion of pertinent methodological and clinical issues related to doctoral research.

***NURSE 7499 Dissertation Research: 1-12 semester hours***

Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

***NURSE 7530 Assessment of Community Health and Infrastructure: 3 semester hours***

Prerequisites: Consent of Program Director. This course will introduce community health assessment and community infrastructure assessment. Participants will be introduced to the information and the resources available to secure and improve resilience in the community's healthcare and public health infrastructure. Participants will also be given an opportunity to work on a community-based health assessment project in conjunction with a community partner. Much of the experience will be practical and hands-on. Participants may be asked to work with a new project or join in an ongoing project.

**NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 3-6 semester hours**

Prerequisites: Consent of Program Director. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

**Graduate Study**  
**Advanced Nursing Education**  
**MSN**

The College of Nursing offers master's degree nursing studies in two advanced practice roles: Nurse Educator and Nurse Practitioner. Current Nurse Practitioner emphasis areas include Adult-Geriatric Nurse Practitioner, Family Nurse Practitioner, Psych-Mental Health Nurse Practitioner, Pediatric Nurse Practitioner and Women's Health Nurse Practitioner.

**Post-MSN Graduate Certificates**

Students with master's degrees in nursing who wish to pursue Nurse Practitioner specialization may complete one of the post-MSN graduate certificates. Post-MSN emphasis areas available for study are: Nurse Educator, Adult-Geriatric Nurse Practitioner, Family Nurse Practitioner, Pediatric Nurse Practitioner, Psych-Mental Health Nurse Practitioner, and Women's Health Nurse Practitioner.

**DNP**

The DNP program prepares graduates for the highest level of clinical practice, including clinical and translational analysis for improved practice outcomes.

**PhD**

The PhD program prepares nurses to pursue theoretical inquiry and conduct original research.

**Master of Science in Nursing**

The College of Nursing offers master's degree nursing studies in two advanced practice roles: nurse educator, and nurse practitioner. Students with master's degrees in nursing who wish to pursue one of the nurse practitioner specializations or nurse educator focus may complete one of the Post-MSN graduate certificates. All MSN students complete the MSN core curriculum and functional role required courses. The MSN program is accredited by the Commission on Collegiate Nursing Education.

This graduate program offers students two tracks of study: 1) nurse educators complete a minimum of 41 credit hours with emphasis in the role of the nurse educator; and nurse practitioner's advanced practice nurses (APN) complete a minimum of 43 credit hours with emphasis in a population focus. Graduates with advanced practice nurse practitioner functional roles will be eligible to complete national board certification examinations in their emphasis area functional roles. Current nurse practitioner emphasis areas include Adult Nurse Practitioner, Family Health Nurse Practitioner, Psych-Mental Health Nurse Practitioner, Pediatric Nurse Practitioner and Women's Health Nurse Practitioner. Graduates completing the nurse practitioner options are eligible for recognition as advanced practice nurses in Missouri. Graduates with

the Educator functional role preparation will be eligible to sit for the certification exam by the National League for Nursing. Upon completion of the MSN degree requirements, this degree is awarded by the UMSL Graduate School. Building on baccalaureate nursing education, and upon completion of the MSN program or post MSN graduate certificate options, students will be able to:

- Demonstrate integration of advanced knowledge and skills within the context of an advanced professional.
- Provide leadership with interprofessional colleagues engaging strategic partners to improve health care outcomes and patient safety.
- Integrate informatics in the design, implementation and evaluation of population-specific interventions.
- Evaluate research findings to implement and disseminate evidence based professional nursing practice.
- Provide ethically grounded, culturally competent health promotion with diverse populations.

**MSN and Post-MSN Program Requirements**

- BSN or MSN from a nationally accredited nursing program
- Minimum cumulative grade point average of 3.0 (4.0 scale)
- Current professional licensure with eligibility for Missouri license
- Successful completion of an undergraduate general statistics course
- Successful completion of an undergraduate health assessment course or equivalent
- Two letters of reference regarding the applicant's academic potential (NP option)
- Narrative outlining goals (NP functional role or nurse educator)
- Two years of clinical experience with chosen population are preferred prior to starting clinicals. (NP functional role)
- Computer literacy and access
- Must reside in the United States

Availability of clinical resources may limit the number of applicants accepted to the practitioner options. Students are required to suggest their own preceptors for the Nurse Practitioner Clinical Courses NURSE 6954 (p. 498) and NURSE 6955 (p. 498). Deadline for fall admission is February 15th.

**Degree Requirements**

**Core Content**

Completion of the MSN Nurse Practitioner and Nurse Educator programs require the completion of the following core content for all emphasis areas:

NURSE 6106	Policy, Organization And Financing In Health Care	3
NURSE 6111	Healthcare Systems Concepts and Theory	3
NURSE 6120	Population-Based Foundations of Health	3
NURSE 6130	Research, Interventions and Evidence-Based Practice	3
NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	2
NURSE 7443	Healthcare Policy	

## Advanced Nursing Practice Nurse Educator Emphasis area

NURSE 6309 (p. 514)	Role Of The Nurse Educator	3
NURSE 6320 (p. 514)	Learning And Curriculum Development In Nursing	3
NURSE 6321 (p. 514)	Instructional Strategies In Nursing	3
NURSE 6322 (p. 514)	Evaluation Strategies in Nursing	3
NURSE 6518 (p. 514)	Pathophysiology For Advanced Nursing Practice	3
NURSE 6520 (p. 514)	Pharmacology For Advanced Nursing Practice	3
NURSE 6524 (p. 514)	Health Assessment For Advanced Nursing Practice	3
NURSE 6951 (p. 514)	Advanced Intensive Clinical for the Nurse Educator	2
NURSE 6952 (p. 514)	Synthesis Practicum	3
ADULT ED 6410 (p. 514)	The Adult Learner	3
<b>Total Hours</b>		<b>29</b>

## Advance Practice Nurse Leader Emphasis area <sup>1</sup>

NURSE 6409	Role Of The Nurse Leader	3
NURSE 6425	Managed Care Services	3
NURSE 6426	Health Resources Management	3
NURSE 6428	Theory And Practice In Nursing Leadership	3
NURSE 6952	Synthesis Practicum	3
MGMT 5600	Managing People in Organizations	3

<sup>1</sup> The College of Nursing will not be accepting applications to the Nurse Leader program during the 2015-2016 academic year.

## Advance Practice Nurse Practitioner Emphasis area

(Emphasis areas for adult-geriatric nurse practitioner, family nurse practitioner, pediatric nurse practitioner, and women's health nurse practitioner)

NURSE 6509 (p. 514)	Role Of The Clinical Nurse Specialist/Nurse Practitioner	2
NURSE 6518 (p. 514)	Pathophysiology For Advanced Nursing Practice <sup>1</sup>	3
NURSE 6520 (p. 514)	Pharmacology For Advanced Nursing Practice <sup>2</sup>	3
NURSE 6524 (p. 514)	Health Assessment For Advanced Nursing Practice <sup>3</sup>	3
NURSE 6530 (p. 514)	Clinical diagnostics for Advanced Nursing Practice	2

Select one of the following:

NURSE 6739 (p. 514) & NURSE 6740 (p. 514)	Diagnosis and Management of the Adult-Geriatric Patient I and Diagnosis & Mgmt of the Adult-Geriatric Patient II	
--	---	--

NURSE 6741 (p. 514) & NURSE 6742 (p. 514)	Family Health 1 and Family Health II: Diagnosis & Management In Adv Nursing Practice	
--	--	--

NURSE 6743 (p. 514) & NURSE 6744 (p. 514)	Child Health 1 and Child Health II: Diagnosis & Mgmt In Advanced Nursing Practice	
--	---	--

NURSE 6746 (p. 514) & NURSE 6747 (p. 514)	Women's Health 1 and Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice	
--	---	--

NURSE 6954 (p. 514)	Advanced Practice Nursing: Internship 1	4
------------------------	---	---

NURSE 6955 (p. 514)	Advanced Practice Nursing: Internship 2	4
------------------------	---	---

<sup>1</sup> Pediatric Nurse Practitioner students take NURSE 6519 (p. 514) Advanced Pediatric Pathophysiology

<sup>2</sup> Pediatric Nurse Practitioner students take NURSE 6529 (p. 514), Advanced Pharmacology for Pediatric Practice

<sup>3</sup> Pediatric Nurse Practitioner students may take NURSE 6526 (p. 514), Advanced Pediatric Physical Assessment

## Advanced Practice Nurse Neonate Nurse Emphasis area

Students in this emphasis area complete the MSN Core Courses on the UMSL campus and the following neonatal specialty courses through UMKC:

N5547N	Neonatal Assessment	
N5548N	Neonatal Physiology/Pathophysiology	
N5549N	Neonatal Pharmacology	
N5564N	Neonatal Nursing I	
N5566N	Neonatal Nursing II	
N5572NI	Preceptorship I	
N5574II	Preceptorship II	

## Psychiatric-Mental Health Emphasis Area

NURSE 6509	Role Of The Clinical Nurse Specialist/Nurse Practitioner	2
NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	2
NURSE 6737	Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice	5
NURSE 6738	Psychiatric-Mental Health II: Diagnosis & Management in Advanced Practice Nursing	5

NURSE 6954	Advanced Practice Nursing: Residency I	4
NURSE 6955	Advanced Practice Nursing: Residency II	4
<b>Total Hours</b>		<b>31</b>

## Post-MSN Graduate Certificates

Post-MSN Graduate Certificate requirements are tailored to the individual student, depending on past academic work, experience, the student's goals, and specialty requirements. Upon completion of the post-MSN requirements, a graduate certificate is awarded by the College of Nursing and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared. Post-MSN emphasis areas available for study are:

- Nurse Educator, Adult-Geriatric Nurse Practitioner, Family Nurse Practitioner, Pediatric Nurse Practitioner, Psych-Mental Health Nurse Practitioner, and Women's Health Nurse Practitioner.
- Students may be awarded credit for previous MSN core courses based upon successful completion of equivalent courses in their prior master's program, if these courses were completed less than 6 years ago.
- A minimum of 18 graduate credit hours are required for the post-MSN Graduate Certificate as stipulated in the Graduate School policies.

## Post-MSN Adult-Geriatric Nurse Practitioner Certificate

NURSE 6509	Role Of The Clinical Nurse Specialist/Nurse Practitioner	2
NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	3
NURSE 6739	Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice	5
NURSE 6740	Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice	5
NURSE 6954	Advanced Practice Nursing: Residency I	4
NURSE 6955	Advanced Practice Nursing: Residency II	4

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bqc>.

## Post-MSN Family Nurse Practitioner Certificate

NURSE 6509	Role Of The Clinical Nurse Specialist/Nurse Practitioner	2
NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	3
NURSE 6741	Family Health I: Diagnosis and Management of Advanced Nursing Practice	5
NURSE 6742	Family Health II: Diagnosis and Management in Advanced Nursing Practice	5

NURSE 6954	Advanced Practice Nursing: Residency I	4
NURSE 6955	Advanced Practice Nursing: Residency II	4

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bqj>.

## Post-MSN Pediatric Nurse Practitioner Certificate

NURSE 6509	Role Of The Clinical Nurse Specialist/Nurse Practitioner	2
NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	3
NURSE 6743	Child Health I: Diagnosis and Management in Advanced Nursing Practice	5
NURSE 6744	Child Health II: Diagnosis and Management in Advanced Practice Nurse	5
NURSE 6954	Advanced Practice Nursing: Residency I	4
NURSE 6955	Advanced Practice Nursing: Residency II	4

## Doctor of Nursing Practice (DNP)

The DNP program is an online program that focuses on the preparation of leaders in clinical nursing who can improve quality of care for individuals and populations through advanced practice and through improving systems of care. The curriculum is based on national standards for DNP education. The DNP is offered cooperatively with the University of Missouri-Kansas City and the University of Missouri-Columbia and is based on the needs of each campus and their communities of interest. The DNP program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

The DNP program is designed for graduates to attain the following program outcomes:

- Integrate nursing science, informatics, research and ethical and legal principles to provide excellence in advanced clinical nursing practice.
- Translate research science to improve healthcare delivery and health outcomes.
- Provide multidisciplinary leadership through analysis of critical indicators and/or health care delivery systems to optimize patient care and safety.
- Influence health policy-making to improve health outcomes, shape healthcare delivery, and remove barriers to healthcare.
- Develop and evaluate strategies to establish best practices in a specific setting.

Courses are designed to support nursing science, clinical research, leadership and a specialty area. Concepts woven throughout the courses include methodologies for translating research into practice, using culturally competent leadership techniques with diverse and underserved populations, advanced nursing science and clinical scholarship, clinical prevention, advanced nursing practice and clinical decision

making, understanding organizational systems and change, and policy development. The DNP program is available for certification-eligible advanced practice nurses who have completed an accredited MSN degree or post-MSN certification program. This program is administered by the UMSL Graduate School.

## Admission Requirements

The deadline for DNP applications for admission is April 1. Admission may be considered at a later date depending on space.

- GPA of 3.0 or higher at the BSN or MSN level
- 2 reference letters
- A proposed DNP project that matches faculty expertise
- Interview by invitation
- Evidence of an RN license in the state of Missouri or compact state.
- If entering with an MSN as an APRN, advanced practice certification or current certification in an advanced practice role
- Current or eligible for advanced practice nursing recognition in Missouri or eligible for recognition as an advanced practice nurse in Missouri

The DNP Curriculum focuses on three tiers:

1. Foundational Concepts
2. Clinical Expertise
3. Integration of Practice

## Degree Requirements

### Core Content

Completion of the DNP program requires the completion of the following core content for all emphasis areas:

NURSE 6111	Healthcare Systems Concepts and Theory	3
NURSE 7211	Biostatistics I	3
NURSE 7230	Epidemiology	3
NURSE 7209	Role of the DNP	
NURSE 7443	Healthcare Policy	
NURSE 7240	Health Informatics	3
NURSE 6130	Research, Interventions and Evidence-Based Practice	3
NURSE 6660	Introduction to Health Systems Management, and Policy for Underserved	
NURSE 7200	State of the Science (or nursing elective)	3
NURSE 7260	Program Evaluation and Quality Management in Healthcare	3
NURSE 7220	Leadership in Practice	3
NURSE 7251	Healthcare Economics	3
NURSE 7291	DNP Capstone I	3
NURSE 7292	DNP Capstone II	3
NURSE 7293	DNP Capstone III	3

### Total Hours

**36**

Prior to completion of the DNP Program, students will complete a clinically focused scholarly project that satisfies the graduate school requirements.

The minimum hours to complete a DNP if entering with an MSN is 36 hours. If entering with a BSN, the DNP requires 71-76 hours based upon emphasis area.

## Advance Practice Nursing Emphasis

For all Nurse Practitioner emphasis areas, a student must complete both focus content and specialty courses based on area of specialty as listed below.

### Focus content for all Nurse Practitioners:

NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
NURSE 6530	Clinical Diagnostics for Advanced Nursing Practice	3
NURSE 6954	Advanced Practice Nursing: Residency I	3-4
NURSE 6955	Advanced Practice Nursing: Residency II	3-6

### Specialty Courses Based on Emphasis Area

#### Advanced Practice Nurse – Family Nurse Practitioner specialty courses

NURSE 6741	Family Health I: Diagnosis and Management of Advanced Nursing Practice	4-5
NURSE 6742	Family Health II: Diagnosis and Management in Advanced Nursing Practice	4-5

#### Advanced Practice Nurse – Adult-Gerontology Nurse Practitioner specialty courses

NURSE 6739	Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice	4-5
NURSE 6740	Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice	4-5

#### Advanced Practice Nurse – Women's Health Nurse Practitioner specialty courses

NURSE 6746	Women's Health I: Diagnosis & Management in Advanced Practice Nursing	4-5
NURSE 6747	Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice	4-5

#### Advanced Practice Nurse – Psychiatric Mental Health Practitioner specialty courses

NURSE 6737	Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice	4-5
NURSE 6738	Psychiatric-Mental Health II: Diagnosis & Management in Advanced Nursing Practice	4-5

#### Advanced Practice Nurse – Pediatric Nurse Practitioner

NURSE 6743	Child Health I: Diagnosis and Management in Advanced Nursing Practice	4-5
NURSE 6744	Child Health II: Diagnosis and Management in Advanced Practice Nurse	4-5

## Leadership in Population Health and Healthcare Systems

(pending CBHE approval)

For the Leadership in Population Health and Healthcare Systems emphasis area, a student must complete the focus content and specialty courses listed below.

### Focus Content for all Population Health:

NURSE 6518	Pathophysiology For Advanced Nursing Practice	3
or NURSE 6418	Organizational Behavior	
NURSE 6520	Pharmacology For Advanced Nursing Practice	3
or NURSE 6420	Healthcare Law and Regulation	
NURSE 6524	Health Assessment For Advanced Nursing Practice	3
or NURSE 6424	Social Determinants of Health	

### Leadership in Population Health Specialty Courses:

NURSE 6934	Leadership in Population Health and Healthcare Systems Residency I	
NURSE 6935	Leadership in Population Health and Healthcare Systems Residency II	
NURSE 7530	Community Health/Infrastructure Assessment	
NURSE 7934	Leadership in Population Health and Healthcare Systems Residency III	

## Doctor of Philosophy in Nursing (Ph.D.)

The Ph.D. in nursing program at the University of Missouri–St. Louis affords students with academic, clinical, and research resources of the University of Missouri system through a cooperative arrangement with the schools of nursing at the University of Missouri. Upon completion of all degree requirements, the Ph.D. degree is awarded by the UMSL Graduate School.

The Ph.D. in nursing curriculum is divided into these general categories: nursing science and theory, nursing research methods and statistics, cognates and dissertation. The Ph.D. program is designed for graduates to attain the following outcomes:

- Develop skills and knowledge to establish a program of research and scholarship.
- Design, conduct and disseminate a dissertation that contributes to nursing knowledge.
- Translate nursing research into practice and policy.
- Assume leadership roles in health care by collaborations and partnerships with institutions in the greater St. Louis region.
- Improve the health care quality of life of individuals/families/communities regionally, nationally and internationally.

## Admission Requirements

Students are admitted each semester depending on space. Admission may be considered at a later date depending on space.

Applicants are evaluated based on the following criteria:

- Graduation from a nationally accredited baccalaureate program with 3.2 minimum GPA (4.0 scale). (BSN to PhD track) OR from a

nationally accredited master's program with a 3.5 minimum GPA (4.0 scale) or equivalent for non-nurse applicants. (MSN to PhD track)

- Satisfactory Graduate Record Examination (GRE) scores
- Two letters of reference
- Original essay on professional goals and research interests
- Interview by invitation

International applicants must meet minimum requirements on tests of written and spoken English (TOEFL, Minimum 550 or better is desired). International students must also apply through the International Student Services Office.

## Degree Requirements

While each program of study is individualized, BSN to PhD students complete a minimum of 65 hours of graduate-level course work. MSN to PhD students complete 47 credit hours and 18 to a maximum of 30 M.S.N. hours, which support the program of study, are individually evaluated to determine eligibility for the application of candidacy. The overall Ph.D. in nursing program design includes nursing science and theory, research methods and statistics, cognates or support courses and dissertation.

Nursing Science, Theory, and Discipline of Nursing: 26 or more nursing credits including:

- Nursing science
- Advanced nursing theory development and validation
- Discipline of nursing

Nursing Research Methods: 12 or more nursing credits including:

- Quantitative Methods in nursing
- Qualitative Methods in nursing
- Biostatistics

Cognates: 15 or more credits outside of the discipline of nursing which support the selected dissertation topic.

Dissertation: Minimum is 12 credits.

## Courses

### ***NURSE 1010 Orientation To Nursing: 0 semester hours***

Prerequisites: Admission to four-year baccalaureate program. This mandatory eight-week introduction to the nursing program provides a comprehensive orientation to the program. Students are introduced to the academic and clinical expectations of the curriculum. Concerns critical for academic success (i.e., time management, effective study skills, stress management and dealing with test anxiety) are addressed.

### ***NURSE 2101 Introduction to Nursing: 2 semester hours***

This course introduces the historical and theoretical development of nursing as a discipline. Nursing is examined as a dynamic practice profession. Variables that influence nursing and health care are discussed. Concepts and skills introduced in this course guide the student's educational experience within the nursing major.

### ***NURSE 2103 Nutrition And Health: 3 semester hours***

This course examines nutritional needs throughout the life span with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients and cultural and economic influences on dietary practices.

### ***NURSE 2105 Communication In The Nursing Profession: 3 semester hours***

This course focuses on the development of communication abilities utilized in professional nursing. The individual's relationship with self, others and groups is discussed. Students learn verbal and non-verbal communication skills, self-awareness, and sensitivity to others. Interpersonal skills are introduced to enable the student to develop effective human caring relationships with a diverse population of clients and colleagues.

### ***NURSE 3101 Nursing And Health: 6 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; CHEM 1052; NURSE 1010, NURSE 3106; NURSE 3110; NURSE 3111. An introduction to the discipline of nursing, the historical and theoretical development of nursing is explored with an emphasis on critical thinking, the teaching/learning process, and foundational practice concepts. Through modular laboratory experiences, the student acquires psychomotor skills to provide safe and effective nursing care to clients promoting health and wellness. Includes classroom, laboratory and clinical experiences.

### ***NURSE 3106 Assessment Of Clients In Health And Illness: 4 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; BIOL 1162; CHEM 1052; PSYCH 1268; NURSE 1010. This course integrates theoretical knowledge and interpersonal skills in the assessment of clients, focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking and cultural competency in identifying multidimensional health variations across the life span. The course includes classroom and laboratory experiences.

### ***NURSE 3110 Pathophysiological Bases Of Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1131, BIOL 1141, BIOL 1162, CHEM 1052 (or equivalent); NURSE 1010. This course focuses on the nature of disease, its causes and the bodily changes that accompany it. The course includes a study of general principles of disease, specific diseases of individual organs and systems and the clinical implications.

### ***NURSE 3111 Pharmacotherapeutics In Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1141, BIOL 1162, CHEM 1052, NURSE 1010; pre/co requisite: NURSE 3110. This course introduces key terminology, legal foundations, general principles and clinical applications of pharmacology.

### ***NURSE 3120 Foundations of Nursing: 7 semester hours***

Prerequisites: All general education requirements and accelerated nursing option prerequisite non-nursing courses. This course introduces the student to the theoretical concepts and foundations of professional nursing practice. Utilizing an integrated approach, health promotion and protection throughout the lifespan are explored and supported using theories of nursing practice, health assessment of well individuals, and general principles and concepts of pharmacology and critical thinking.

### ***NURSE 3121 Clinical Foundations of Nursing: 3 semester hours***

Prerequisites: NURSE 3120. This course assists in the development and application of clinical reasoning in the lab, clinical agency, and simulation environments. Through clinical learning experiences, the student acquires basic psychomotor, communication, and medication administration skills. The student applies these skills in the provision of safe and effective nursing care to clients while promoting health, wellness, and clinical reasoning.

**NURSE 3205 Adult Health Nursing I: 5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to immune responses, problems of oxygenation: ventilation, transport and perfusion: kidney function; regulatory mechanisms and digestion absorption and elimination. emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

**NURSE 3206 Adult Health Nursing II: 5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

**NURSE 3214 Psychiatric Mental Health Nursing: 4 semester hours**

Prerequisites: All 3100-level nursing courses; PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic emotional and psychosocial difficulties and psychiatric illnesses. The course emphasizes development of students' decisional capabilities, self-awareness and professional behaviors as they utilize theory and research from nursing, psychology and related disciplines for the provision of nursing care to individuals, families, & groups. Clinical experiences in community and acute care settings are designed for students to engage in individual and group strategies that promote and maintain mental health. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3215 Nursing Of Women And Childbearing Families: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. Focuses on the childbearing family and women's reproductive health, including family dynamics and growth and development. Health promotion, protection, maintenance and restoration are covered in experiences that include hospital and community settings. Health care policy and systems as relevant to these populations are included. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3216 Child And Family Health Nursing: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. This course focuses on pediatric health and illness with emphasis on family dynamics, growth and development and communication with children and their families. Health promotion, protection, restoration, maintenance and support concepts are covered in experiences that include hospital and community settings. Health care policy and systems are studied as relevant to this population. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3324 Sociology Of The Family: 3 semester hours**

Same as SOC 3224. Prerequisite: SOC 1010 or consent of instructor. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include: love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure.

**NURSE 3330 Nursing of Adults I: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing health problems affecting body regulatory mechanisms. These mechanisms are related to perioperative processes, immune processes, problems of oxygenation, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system and genetics, oncology and hematology problems. This course also incorporates relevant concepts of pharmacology and pathophysiology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support as well as the continued development of the nurse-client relationship, clinical reasoning, and evidence-based nursing practice across the adult life span.

**NURSE 3331 Clinical Nursing of Adults I: 3 semester hours**

Prerequisites: NURSE 3330. This course focuses on the nursing care of adults in the lab, clinical agency, and simulation environments. Utilizing an integrated approach, advanced nursing skills and assessment techniques for adult clients are mastered in perioperative processes, immune processes, problems of oxygenation, hematology, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system, genetics and oncology problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients across the health/illness continuum.

**NURSE 3340 Behavioral Health Nursing: 2.5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic psychosocial and behavioral health issues and specific psychiatric illnesses. An emphasis is placed on the nurse/client relationship in behavioral health promotion, restoration, maintenance and support.

**NURSE 3341 Clinical Behavioral Health Nursing: 1.5 semester hour**

Prerequisites: NURSE 3340. In this course students utilize theory and evidence from nursing and related disciplines in the provision of nursing care to individuals, families, and groups with psychiatric and behavioral health problems. Clinical experiences in community and acute care settings are designed so that students can engage in individual and group strategies that promote and maintain mental health.

**NURSE 3350 Nursing of Adults II: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3351 Clinical Nursing of Adults II: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3360 Maternal-Child Nursing: 5 semester hours**

Prerequisites: PSYCH 1268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3799 Quantitative Analysis In The Health Sciences: 3 semester hours**

Prerequisites: MATH 1030 or equivalent. This course focuses on concepts and applications of statistics in the health sciences. Topics include descriptive and inferential statistics, probability distributions of random variables, sampling and estimation. The course uses examples and content from health sciences to provide the basic concept structure for quantitative analysis.

**NURSE 3804 Ethical And Legal Dimensions Of Nursing Practice: 3 semester hours**

Prerequisites: Philosophy (3 credits). This course explores the ethical and legal dimensions of nursing practice. The relationship between ethical and legal issues is examined within nursing situations. The student participates in dialogue addressing ethical-legal issues in professional nursing practice to explore personal values, increase sensitivity to others and to develop ethical reasoning abilities.

**NURSE 3807 Nursing Research - Evidence Based Nursing Practice: 3 semester hours**

Prerequisite: NURSE 3799 (or equivalent). This course prepares nurses to provide evidence based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

**NURSE 3808 Management And Leadership In Nursing: 2-3 semester hours**

Prerequisites: All 3000 level nursing courses; ECON 1000 or (equivalent) This course prepares the nurse to coordinate and manage client care in diverse health care settings. Emphasis is placed on leadership and management theory and related skills, collaboration, delegation, coordination, and evaluation of multi-disciplinary work and the application of outcome-based nursing practice.

**NURSE 3817 Introduction To Nursing And Health Informatics: 3 semester hours**

This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

**NURSE 3820 Introduction to Evidence-Based Nursing Practice and Informatics: 5 semester hours**

Prerequisites: NURSE 3799 or equivalent statistics course. This course will focus on current review of qualitative and quantitative nursing literature and research utilization through evidence-based practice and establish competency in fundamental information management and technology. Students will examine the research and evidence-based process through analysis and critique of nursing literature; critically evaluate technology, information, and its sources; use decision support systems designed for clinical and ethical decision making; and focus on the presentation of nursing data, information, and knowledge.

**NURSE 3873 Guided Study In Nursing: 1-3 semester hours**

This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

**NURSE 3900 Dimensions Of Professional Nursing: 3 semester hours**

Prerequisites: Admission to the College as RN This course investigates the roles and responsibilities of the professional nurse within a rapidly changing health care delivery system. Key issues are explored with emphasis on health promotion and health. Graduates of diploma nursing programs will be awarded college credit for successful validation of basic nursing knowledge as part of this course.

**NURSE 3920 Health Assessment: 3 semester hours**

Prerequisites: NURSE 3900 and NURSE 3817 (may be taken concurrently) or consent of instructor. This laboratory course focuses on the knowledge, communication abilities, and technical skills necessary for comprehensive assessment of individuals of all ages.

**NURSE 4300 Community Health Nursing: 4 semester hours**

Prerequisites: All 3000 level nursing courses. This course provides a conceptual foundation for nursing that recognizes the community as client in society. The course examines socioeconomic, environmental, epidemiological, and legislative influences, ethical/legal issues, and the impact of health beliefs and practices on health promotion and protection in communities and society. The student applies various theories and concepts when encountering families, groups and communities with diverse value systems and cultural backgrounds. Course includes classroom and clinical activities in a variety of settings.

**NURSE 4310 Senior Synthesis: 6 semester hours**

Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 3808 may be taken concurrently. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Within a seminar context, students explore a variety of clinical and professional nursing topics. The course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Course includes classroom and clinical experiences in a variety of settings. Not for graduate credit.

**NURSE 4520 Population Focused Nursing: 2 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course provides a conceptual foundation for nursing that recognizes populations in society. The course examines the effect of socioeconomic and environmental, epidemiological factors, and the impact of health beliefs and practices on health promotion and protection in populations. This course also focuses on epidemiological factors and legislative influences in diverse populations.

**NURSE 4521 Clinical Population Focused Nursing: 2 semester hours**

Prerequisites: NURSE 4520. This clinical course focuses on the nursing care of populations in various settings. The student applies population-based theories and concepts when encountering individuals, families, groups and populations with diverse value systems and cultural backgrounds.

**NURSE 4530 Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Topics will include leadership, management theory and related skills, collaboration, delegation, coordination, and evaluation of outcome based interdisciplinary nursing practice.

**NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

**NURSE 4720 Perioperative Nursing: 3 semester hours**

Prerequisite: Consent of the instructor. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

**NURSE 4722 Transcultural Nursing: 3 semester hours**

Prerequisite: Consent of the Instructor. Examines transcultural nursing concepts, theories and practices in relationship to human caring. Focuses on application and analysis of health care and scope of practice within selected cultural contexts. Includes practicum experiences.

**NURSE 4723 Nurse Externship: 3 semester hours**

Prerequisite: Senior level status; GPA 3.0 (4.0 scale). This course provides the opportunity to apply theoretical and conceptual knowledge and skills in a structured clinical environment under the guidance of a mentor.

**NURSE 4724 Emergency/Trauma Nursing: 3 semester hours**

Prerequisites: NURSE 3205 and NURSE 3206 or consent of instructor. This course provides a framework for the roles and responsibilities of the professional registered nurse in Emergency and Trauma nursing care.

**NURSE 4726 Parish Nursing: 3 semester hours**

Prerequisites: All 2000 level nursing courses, NURSE 3205 and NURSE 3214. This course provides a conceptual foundation that recognizes a speciality of nursing practice that combines professional nursing and health ministry. It examines four major concepts: professionalism; health and wholeness; spirituality; and community as it relates to culture and diversity. The course includes classroom discussion, individual reflection and community based learning experiences.

**NURSE 4730 Nursing Care At The End Of Life: 3 semester hours**

Prerequisites for Nursing Students NURSE 3205 and NURSE 3214. All others by consent of instructor. This course focuses on the nursing care of terminally ill patients and their families. Topics explored will include the impact of personal values and beliefs about death, physiology of end stage disease processes, symptom assessment and management, psychosocial and spiritual support, consideration in special patient populations, societal issues and trends in end of life care, ethical considerations in caring for the dying patient, grief and bereavement processes, and the role nursing in end of life care across settings.

**NURSE 4741 Advanced Nrsng Assmt & Mgt Of Clients W/Cardiac Dysrhythmias: 3 semester hours**

Prerequisite: Senior status. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

**NURSE 4742 Critical Care Nursing Of The Adult: 3 semester hours**

Prerequisites: RN or completion of NURSE 3205 and NURSE 3206 (or equivalent). Focuses on health restoration, health maintenance, and health support of individuals with dysfunctions or trauma to major organ systems. Emphasis is on understanding pathophysiology and psychosocial processes related to nursing and collaborative interventions, and the development of a functional framework for data organization and analysis.

**NURSE 4901 Family And Community Nursing: 5 semester hours**

Prerequisites: NURSE 3900, NURSE 3817 and NURSE 3920. This practicum course introduces the concepts, principles, skills, and professional nursing roles essential to practice community-based professional nursing with families and groups.

**NURSE 4905 Values In Professional Nursing: 3 semester hours**

Prerequisites: All 3000 level RN/BSN nursing courses or consent of instructor. Explores values and beliefs as they shape professional nursing practice and influence clinical decision making and interventions in the evolving health care system. Attention is given to the impact of sociocultural factors and health/illness beliefs and practices of the diverse populations served by the professional nurse. Students examine their own understanding of the moral nature of professional nursing within the context of a diverse society.

**NURSE 4911 Synthesis In Nursing Practice: 5 semester hours**

Prerequisites: NURSE 4901. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities with selected populations determined to be at risk for a variety of health related problems. The course includes assessment of cognitive and affective growth achieved while in the BSN Completion Program.

***NURSE 6000 Statistics in Nursing & Health Sciences: 3 semester hours***

Prerequisites: Admission to graduate study in nursing or consent of instructor. Provides students with a graduate level understanding of quantitative methods and their relationship to research in nursing and health sciences. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

***NURSE 6106 Policy, Organization And Financing In Health Care: 3 semester hours***

Prerequisite: Admission to MSN program. This course presents an overview of health care policy, organization, and financing with emphasis on current health care trends. The focus is on the design and implementation of health care delivery systems with the goal of providing safe, quality, and informatics driven cost-effective care. Emphasis is placed on the development of a leadership role in managing human, financial, and physical health care resources. The format includes pertinent information concerning primary health care and public health issues, the relationship between these issues, and improving health care delivery and outcomes.

***NURSE 6111 Healthcare Systems Concepts and Theory: 3 semester hours***

Prerequisites: Consent of Program Director. Healthcare Systems Concepts and Theory introduces the historical development, current U.S. healthcare structure, and projected transformation of the U.S. health care system and practice professions. This is a foundational course that provides the student with an understanding of the complex nature of the healthcare sector. This course content prepares the student to assess organized efforts to influence health delivery and policy formulation, the impact of these efforts on the administrator, leader, or policy analyst of a healthcare organization, and the role of societal values and individual behaviors in healthcare system's performance, reform efforts, and the health status of the U.S. population.

***NURSE 6112 Nursing Research Methods: 3 semester hours***

Prerequisites: NURSE 3799 or equivalent; NURSE 6111 may be taken concurrently. This course is designed to provide the student with the skills required to be a consumer of nursing research. These include the fundamentals of scientific inquiry in nursing as well as the information necessary to understand and evaluate nursing research. Principles and techniques common to scientific investigation are applied to nursing. Researchable problems are developed.

***NURSE 6114 Evidence-Based Nursing: 3 semester hours***

Prerequisite: NURSE 6112. This course prepares nurses to review existing nursing research about a nursing practice problem and to propose appropriate changes in current nursing practice. The theoretical basis for evidence-based nursing with respect to screening, diagnosis, selection of treatment alternatives, and prognosis are examined. Research designs such as case control and cohort studies are included. Practical application of change in nursing is examined, including formative and summative aspects of evaluation. Opportunities are provided to develop a plan to implement evidence-based change in an area of nursing practice.

***NURSE 6120 Population-Based Foundations of Health: 3 semester hours***

Prerequisite: Admission to MSN. The purpose of this course is to provide students with an advanced nursing practice perspective on providing population-based nursing care. This course includes an evaluation of human and cultural diversity in the health-illness continuum. Core concepts include ethics; theories of health and health promotion, protection, restoration, and maintenance; and the support needed for a peaceful death. Coursework will focus on community/population-based data on epidemiology, disease and injury prevention, health education, growth and development, and family systems.

***NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides opportunities to examine the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will have opportunities to develop skills needed to critically analyze scientific literature foundational to implementing evidence-based practice projects.

***NURSE 6144 Health Promotion and Cultural Diversity: 3 semester hours***

Prerequisites: Admission to the MSN Program. This course provides graduate nursing students with knowledge related to the concepts of health promotion, health protection, cultural diversity, and moral/ethical influences across the lifespan. Core concepts for the course include theories of health and health promotion and protection, epidemiology, disease and injury prevention, health education, cultural diversity, growth and development, nutrition and family systems. The students will explore values clarification and ethical analysis.

***NURSE 6309 Role Of The Nurse Educator: 3 semester hours***

Prerequisites: Admission to the MSN program or consent of instructor. This course will explore the roles, responsibilities, and functions of the nurse educator. Emphasis will be placed on the development and evaluation of the interactive nature of teaching and learning in a variety of settings.

***NURSE 6320 Learning And Curriculum Development In Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

***NURSE 6321 Instructional Strategies In Nursing: 3 semester hours***

Prerequisites: NURSE 6309 or consent of Instructor; must be taken concurrently with NURSE 6320. This course focuses on the development and analysis of teaching and learning strategies in nursing education. Adult learning principles of teaching and learning will be incorporated into the innovative strategies developed within this course. Integration of new technology in instructional design and delivery will be highlighted. Evaluation methods of both teacher and learner will be explored.

**NURSE 6322 Evaluation Strategies in Nursing: 3 semester hours**

Prerequisites: NURSE 6309. This course provides students the opportunity to learn evaluation concepts, including testing and measurement in nursing education at the didactic, clinical and programmatic levels. Content includes strategies to assess and evaluate learning in the cognitive, psychomotor and affective domains. Quality improvements, as well as legal and ethical considerations are explored. Key concepts include criterion and norm referenced theory and technique; reliability, validity, and the associated descriptive statistics; preparation of instrumental objectives for use in developing classroom tests and clinical nursing performance evaluations.

**NURSE 6409 Role Of The Nurse Leader: 3 semester hours**

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of the instructor. Analysis of the roles and responsibilities of the nurse executive in a complex healthcare system. This course explores the roles and challenges of the clinical nurse leader. Emphasis will be placed on the responsibilities of the clinical nurse and clinical nurse leader in a complex healthcare system.

**NURSE 6418 Organizational Behavior in Healthcare: 3 semester hours**

Prerequisites: Consent of Program Director. This course applies theory and concepts from organizational behavior to the healthcare system and incorporates organizational theory and behavioral sciences as a framework for improving organization performance. Students will understand interpersonal and interprofessional relationships in healthcare and factors that influence effectiveness and employee and patient satisfaction. Areas of particular focus will include psychosocial factors impacting recruitment selection, training and development of employees, healthcare organizational leadership, theories of employee performance, effective management theory and practice, engaging and involving employees in organizational processes, motivation, teamwork, and managing change.

**NURSE 6420 Healthcare Law and Regulation: 3 semester hours**

Prerequisites: Consent of Program Director. This course introduces and examines a wide range of topics in the area of health law and regulation, and discusses how laws and regulations can promote or impede health and well-being. Students will explore concepts that inform healthcare policy, potential legal problems in various health care settings, issues and rights that are implicated, and the role of law in healthcare and policy. Students will identify issues and propose solutions or plans of action. The emphasis will be on formulating analyses of federal, state, and local law related to healthcare and public health. Specific topics will include the role that policy and law have played in areas such as tobacco regulation, managed care, healthcare reform, and laws utilized for emergency use of drugs and during public health emergencies.

**NURSE 6424 Social Determinants of Health: 3 semester hours**

This course covers health disparities in the U.S. that adversely impact individual health, population health outcomes, and the productivity of the workforce. Developing an appropriate response to what will be treated as an epidemic requires an understanding of factors that adversely influence vulnerability and behavior. Patterns of poverty and life expectancy serve as one vehicle for understanding social disparities. The goal of this course is to provide students with the skills to critically reflect on current strategies to stem the health disparities through a sociological approach to understanding epidemiological patterns. Understanding the impact of poverty, racism, and stigma and the processes of migration, incarceration, social interaction that influences vulnerability, access to care, and participation in wellness activities will be addressed. This course will have an extensive interdisciplinary approach that will challenge students to create solutions that address elements of the structural and social environment impacting health disparities. Students will work with individuals in the community to assess existing disparities, the current and the past approaches to mitigating the factors leading to disparities.

**NURSE 6425 Managed Care Services: 3 semester hours**

Prerequisites: Admission to the MSN or consent of instructor. Provides an analysis of the health care environment in managed care and its impact on the nurse's role.

**NURSE 6426 Health Resources Management: 3 semester hours**

Prerequisite: NURSE 6409. This course focuses on the roles and responsibilities of the nurse leader for fiscal and human resource management in both public and private sectors. Includes analysis of the environment, healthcare organization within the system and impact of resource management on nursing and health care.

**NURSE 6428 Theory And Practice In Nursing Leadership: 3 semester hours**

Prerequisite: NURSE 6409. This course focuses on theories and practices of advanced nursing leadership and management practice within complex healthcare systems. This course will also compare to global healthcare systems. Particular focus will be on the application/effectiveness assessments of the practices within healthcare organizations. Patient safety and quality management theory practices in healthcare will be discussed in depth and compared to other industries' safety and quality management programs theory/practices.

**NURSE 6509 Role Of The Clinical Nurse Specialist/Nurse Practitioner: 2 semester hours**

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of instructor. This course will focus on issues affecting the emerging roles of the nurse practitioner and clinical nurse specialist. It is designed to facilitate the role development of nurses who desire to function as primary care providers and/or as specialists within a specific clinical area of advanced nursing practice. Emphasis include sub-roles of advanced practice (leader, consultant, expert, researcher, educator), legal and professional issues, change theories, and standards of practice.

**NURSE 6518 Pathophysiology For Advanced Nursing Practice: 3 semester hours**

Prerequisites: Consent of Program Director. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnosis within physiological systems of sub-cellular and cellular origin, biochemical, and anatomical changes across the life span.

***NURSE 6519 Advanced Pediatric Pathophysiology: 3 semester hours***

This course focuses on embryology of the major organ systems, as well as specific physiologic and pathophysiologic processes relevant to the child from birth through age 18. Implications for advanced nursing practice which result from alterations of normal physiologic functioning in cellular, tissue, and organ systems are examined. Emphasis is placed on the relationship between pathophysiology, decision making and standards of advanced nursing practice.

***NURSE 6520 Pharmacology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: NURSE 6518 or consent of Program Director. This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

***NURSE 6524 Health Assessment For Advanced Nursing Practice: 3 semester hours***

Prerequisite: NURSE 6518 or consent of Program Director. This course provides a systematic approach to advanced physical assessment as well as psychological, sociocultural, developmental, and spiritual assessment of individuals across the life span. This course builds upon basic health assessment knowledge and skills, laboratory work interpretation, validation, documentation, and analysis of assessment findings. This course includes mandatory didactic and clinical experiences.

***NURSE 6526 Advanced Health Assessment For Pediatric Nursing Practice: 3 semester hours***

Co-requisite: NURSE 6519 or permission of the instructor. Comprehensive assessment of children through adolescence, including those with significant health and/or developmental deviations, using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation, and documentation of findings.

***NURSE 6529 Advanced Pharmacology For Pediatric Nursing Practice: 3 semester hours***

Prerequisites: Admission to Master of Science in Nursing or permission of the instructor. This course is a clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary health care management of children from birth to young adulthood by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific illness. The Missouri Laws for advanced practice nurse prescriptive authority will be addressed. Core concepts include pharmacodynamics, pharmacokinetics, health related information, medication compliance and issues that pertain to the prescribing of medication in advanced nursing practice.

***NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides an introduction to the interpretation and appropriate use of diagnostic measures for advanced practice nurses in primary care settings. Special attention is paid to laboratory, radiographic and diagnostic testing. In addition, clinical opportunities will be provided to gain clinical interventional skills for advanced practice nursing.

***NURSE 6660 Introduction to Health Systems Management, and Policy for Underserved: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides a comprehensive survey of the U.S. health care system, healthcare policy, integrative care practice models, and management principles useful in primary care settings dedicated to underserved populations. Selected topics include health behaviors, health maintenance and the management of primary healthcare in underserved populations, access to mental health care and substance abuse treatment, the U.S. healthcare system (both public and private sectors), the legal and ethical bases for caring for the underserved, the public policy-making process, and management principles of strategic planning, marketing, and project management in clinics serving the underserved. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations will be incorporated into a community based experience.

***NURSE 6730 Leadership in Population Health I: 4 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6731 Leadership in Population Health II: 4 semester hours***

Prerequisites: NURSE 6730 or consent of Program Director. This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6737 Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan experiencing psychiatric-mental health concerns. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6738 Psychiatric-Mental Health II: Diagnosis & Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6737 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic, and mental health problems in this population.

***NURSE 6739 Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6740 Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6739 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6741 Family Health I: Diagnosis and Management of Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6742 Family Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6741 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6743 Child Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6578, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute and chronic health and mental health problems in this population.

***NURSE 6744 Child Health II: Diagnosis and Management in Advanced Practice Nurse: 4-5 semester hours***

Prerequisites: NURSE 6743 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology, and advanced physical assessment to prepare students to assume roles in advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply previous strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6746 Women's Health I: Diagnosis & Management in Advanced Practice Nursing: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of women across the life span, with a focus on reproductive health, including male sexual and reproductive health. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within the defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6747 Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6870 Special Topics In Advanced Practice Nursing: 1-3 semester hours***

Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate MSN or PhD levels.

***NURSE 6875 Special Study In Graduate Nursing: 1-3 semester hours***

Prerequisites: Admission to MSN prog or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

***NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 3 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

***NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 3-6 semester hours***

This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, health systems leadership, policy and evidence-based care populations.

***NURSE 6950 Advanced Nursing Practice: 4 semester hours***

Prerequisites: NURSE 6739, NURSE 6743, NURSE 6746. Advanced nursing practice examines different nursing and interdisciplinary models of case management of acute and chronic problems across the lifespan. The intensive clinical experience focuses on the student's specialty care area: adults, pediatric or women's health.

***NURSE 6951 Advanced Intensive Clinical for the Nurse Educator: 2 semester hours***

Prerequisites: NURSE 6520, NURSE 6524, NURSE 6309. This course provides a concentrated opportunity to function in an advanced nursing role as a nurse educator incorporating an intensive clinical experience focusing on the student's chosen population.

***NURSE 6952 Synthesis Practicum: 3 semester hours***

Prerequisites: All required courses in the Nurse Educator or Nursing Leadership of Health Systems option or consent of instructor. This clinical course is a concentrated opportunity to function in an advanced nursing role as a nurse administrator, integrating clinical and functional role activities within a chosen setting. Emphasis includes educator or administrator nursing practice, functional role responsibilities, and activities with emphasis on their relationship to client outcomes.

***NURSE 6954 Advanced Practice Nursing: Residency I: 3-4 semester hours***

Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744, NURSE 6747 or the consent of the Program Director. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 6955 Advanced Practice Nursing: Residency II: 3-6 semester hours***

Prerequisites: NURSE 6954 or the consent of the Program Director. This clinical course provides a continuation of precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

***NURSE 7209 Role of the DNP: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides students with the opportunity to synthesize and analyze knowledge of the DNP role within a specified population focus and role. The overview of selected theories and frameworks that can be used to guide advanced practice nurses and nursing leaders in facilitating the use of evidence-based practice, understanding cultural aspects of care, and framing situational awareness. Core concepts include the regulatory, legislative, and professional influences of advanced nursing practice. Emphasis includes sub-roles of the doctorally prepared nurse including: Advanced Practice Registered Nurse (APRN), leader, consultant, expert, researcher, and educator.

***NURSE 7211 Biostatistics I: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides a foundational understanding of the use of biostatistics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

***NURSE 7212 Biostatistics II: 3 semester hours***

Prerequisites: Admission to PhD program. This course builds on statistical procedures and advances the student's understanding of advanced statistical methods including design and measurement.

***NURSE 7220 Leadership in Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides students with the opportunity to develop and refine critical leadership skills by focusing on improving the health of individuals and populations. The course uses a combination of didactic lectures, case-based learning and experiential exercises to explore leadership competencies including change management, strategy implementation, quality improvement, effective communication, team dynamics, and systems thinking. Emphasis is on using models and theories that facilitate inter-professional collaboration to achieve optimal health outcomes. The focus is effective communication and leadership methods necessary to establish successful inter-professional teams. Students will enhance skills in verbal, written and electronic communication; team leadership; and creating and sustaining health related initiatives. Through advanced understanding of the inter-professional dimension of healthcare, students will facilitate collaboration and remove barriers to providing safe, timely, effective, efficient, equitable and patient centered care in healthcare systems.

***NURSE 7230 Epidemiology: 3 semester hours***

Prerequisite: NURSE 7211 or Consent of Program Director. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

**NURSE 7240 Health Informatics: 3 semester hours**

Prerequisites: Consent of the Program Director. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

**NURSE 7251 Healthcare Economics: 3 semester hours**

Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

**NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours**

Prerequisite: None. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

**NURSE 7270 Policy Application for Improved Health Outcomes: 3 semester hours**

Prerequisites: NURSE 6106 or equivalent and NURSE 7230. Students learn how to effectively translate and disseminate knowledge from nursing and other health sciences to policy makers and stakeholders in order to form collaborations to affect change at various levels of the policy process. Topics to be covered include policy analysis, policy development, collaboration and negotiation specific to the policy process, building social and political capital and garnering resources to assure effective policy implementation. Students will utilize population health data, policy analysis, and policy development skills to define, shape and implement culturally competent health policy.

**NURSE 7291 DNP Capstone I: 3 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7292 DNP Capstone II: 3 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7293 DNP Capstone III: 2 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7299 DNP Seminar: 1-3 semester hours**

Prerequisites: All DNP required course work or Consent of Instructor. This seminar provides students with the opportunity to synthesize and analyze knowledge within the context of the emerging DNP role. Analysis of practice issues may include reflective practice, collaboration, health systems technology, ethics and policy.

**NURSE 7300 Prevention of Injury and Disability: 3 semester hours**

Prerequisites: Graduate status or consent of instructor. This course will examine trends in injury and disability nationally and internationally, relevant theories and conceptual models, the definition and measurement of key concepts, and analysis of interventions proposed for preventing injury and mitigating disability. The role of information and computer technologies in the management of disability will also be considered. Specific content will include age-related injury and disability, disability associated with cardiovascular and other chronic diseases, and the psychosocial contexts of disability, including traumatic stress and its outcomes.

**NURSE 7401 Research Institute I: 2 semester hours**

Prerequisites: Admission to Doctorial Study in Nursing. This course provides an introduction to the process of becoming a research scientist or translational investigator. Content will include the responsible conduct of research, its core elements, relevant policies and procedures, and relevant research. This course also includes the culture of nursing, literature reviews, scholarly writing, technology in the research process, developing a program of scholarship and effective time management.

**NURSE 7403 Developer of the Nurse Scientist: 3 semester hours**

Prerequisite: Admission to doctoral study in nursing. This course addresses the role of the PhD-prepared nurse as scientist, leader, academician, and policy maker. Students will analyze strategies for lifelong learning and development as nurse scientists and will explore avenues for building their programs of scholarship, funding opportunities, and contributing to nursing science in policy and clinical practice. Students will examine ways to collaborate effectively in order to improve health care and health outcomes.

**NURSE 7443 Healthcare Policy: 3 semester hours**

Prerequisites: Graduate Standing and Consent of the Program Director. This is a survey course examining current issues in healthcare policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in healthcare policy are explored.

***NURSE 7480 Guided Nursing Research Seminar: 1-6 semester hours***

Prerequisite: Consent of instructor. Provides opportunity to work in collaboration with faculty and peers on a focused research topic relevant to nursing.

***NURSE 7481 Development Of Nursing Science And Theory: 3 semester hours***

Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

***NURSE 7488 Qualitative Methods In Nursing Research: 3 semester hours***

Prerequisites: Admission to PhD program. Examines the relationship between theoretical and philosophical perspectives and selection of appropriate methodologies in research design. Critically explores issues related to innovations in traditional qualitative designs and emerging technologies, rigor and validity, and role of interpretive research in nursing science.

***NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours***

Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

***NURSE 7491 Advanced Nursing Theory Development And Validation: 3 semester hours***

Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

***NURSE 7498 Doctoral Seminar: 1-12 semester hours***

Prerequisite: Consent of instructor. Presentation and discussion of pertinent methodological and clinical issues related to doctoral research.

***NURSE 7499 Dissertation Research: 1-12 semester hours***

Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

***NURSE 7530 Assessment of Community Health and Infrastructure: 3 semester hours***

Prerequisites: Consent of Program Director. This course will introduce community health assessment and community infrastructure assessment. Participants will be introduced to the information and the resources available to secure and improve resilience in the community's healthcare and public health infrastructure. Participants will also be given an opportunity to work on a community-based health assessment project in conjunction with a community partner. Much of the experience will be practical and hands-on. Participants may be asked to work with a new project or join in an ongoing project.

***NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 3-6 semester hours***

Prerequisites: Consent of Program Director. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

# College of Optometry

---

This section contains an abbreviated version of the College of Optometry Bulletin. Some information is omitted.

For the most complete and accurate information regarding the Optometry program at UMSL, please go to the College of Optometry Home Page.

## General Information

The UMSL College of Optometry enrolled its first class in 1980, graduating 32 students in May 1984. The College is located on the South Campus complex of the University of Missouri-St Louis at 7800 Natural Bridge Road. A five-story building houses the College's classrooms, laboratories, research facilities, administrative offices, and the Center for Eye Care campus facility (the University Eye Center).

The College of Optometry is a member of the Association of Schools and Colleges of Optometry (ASCO) and is accredited by the Accreditation Council on Optometry Education (ACOE).

## The Doctor of Optometry (O.D.) Degree

A student who satisfactorily completes all four years of the professional curriculum will be eligible to receive the Doctor of Optometry degree.

The training and clinical experience optometry students receive at UMSL qualifies graduates to practice optometry in any state in the nation.

## Center for Eye Care

The Center for Eye Care provides a patient care environment for upper level optometry students and postdoctoral residents. The Center for Eye Care includes three locations: the University Eye Center on the UMSL South Campus, the Lindell Eye Center in the Central West End of the city of St. Louis, and the East St. Louis Eye Center on the campus of East St. Louis Community College Center. These and other affiliated health centers in the St. Louis area provide an instructional setting where student interns are exposed to a wide variety of patients under the direct supervision of College of Optometry faculty. Equally important is that these Centers provide exemplary, comprehensive and state-of-the-art eye and vision care to their patients.

The Centers provide a full range of optometric services including adult primary eye care, contact lens, pediatrics, binocular vision, low vision, and eye health management. Specialized testing of color vision and electrophysiology are also available.

Situated in Missouri's largest metropolitan area, the College of Optometry enjoys the region's strong community and professional support. The urban setting offers many opportunities for outreach programs, expanding the scope of optometric education and making possible a highly diverse program of clinical training. Another asset of the College is its proximity to the national headquarters of the American Optometric Association, located just a few miles from campus.

The curriculum leading to the doctor of optometry degree is a four-year, full-time program of study. The first year of the professional curriculum emphasizes basic and biomedical sciences and introduces students to optics of the visual system. The second year pertains to vision science and instruction in clinical examination techniques. The third year emphasizes patient care and introduces the student to specialty areas within optometry, such as contact lenses, pediatrics and geriatric vision care, binocular vision and vision therapy, and low vision rehabilitation. The

second and third years also include course work and clinical instruction in ocular disease and pharmacology. The fourth year includes six rotations through the externship program, giving the student added experience in the management of eye diseases, as well as valuable experience in other optometric clinical specialties.

## Fourth-Year Externship Program

In addition to the patient care experiences available through the University Eye Center, Optometric Center, the East St. Louis Center, the College of Optometry also has a diverse Externship Program. Students must receive approval from the faculty and the Director of Externships for assignments to each Externship site. This program allows fourth-year students to spend a portion of their final year of training in a variety of patient care environments (i.e., military bases, Veterans Administration Hospitals, Indian Health Services Hospitals, various specialty practices and private practices).

These six (6), eight (8) week externships are selected and scheduled with consideration given to the individual student's interest, needs and future practice intentions. Externship Rotations are located throughout the United States and select international sites. In this program, students leave the academic environment and begin working with selected eye care professionals while continuing to be monitored by the faculty through bi-weekly reports of patient encounters, therapies, and activities. The externship rotations are designed to give students exposure in the following areas:

- Pediatric/Binocular Vision Patient Care
- Contact Lens Patient Care
- Low Vision Patient Care
- General (Primary Optometric) Patient Care
- Refractive Management Patient Care
- Eye Health Management Patient Care
- Geriatric Patient Care
- Sports Vision Patient Care
- Optometric Rehabilitation Patient Care

## Student Organizations & Activities

All optometry students enrolled in the University of Missouri-St. Louis College of Optometry are eligible for membership in the various student optometric associations, including The Missouri Optometric Student Association (MOSA) and The American Optometric Student Association (AOSA). Through these organizations, and many others, students become involved in local and national optometric activities. The organizations provide an environment for the cultivation of professional leadership skills, and members have organized and participated in a variety of community service activities, including community health screenings and vision care to residents of nursing homes, convalescent hospitals, and mental institutions. Furthermore, optometry students have formed local chapters of Student Volunteer Optometric Services to Humanity (SVOSH), an international organization of optometrists providing free vision care to people in impoverished nations, and the National Optometric Student Association (NOSA), which strives to recruit minority students into optometry and encourages retention of minority students.

In addition to the many activities through the College of Optometry, optometry students are able to take advantage of all the activities provided by the university to the entire university community. These include intramural sports, movies and cultural activities, a modern, fully-equipped

fitness center and gymnasium, and access to many social and cultural opportunities in St. Louis at reduced cost.

## Pre-Optometry Programs

The University of Missouri-St. Louis offers a four-year program of study leading to the doctor of optometry degree; this professional degree is administered by the College of Optometry. It is one of only 22 accredited programs in the United States and the only one in the state of Missouri. This program, as a result, makes UMSL an ideal institution for pre-optometry education. Various programs are available for pre-optometry as noted below.

Students may pursue a traditional 4 + 4 program, which is a bachelor's degree followed by the four-year graduate optometry program. In this case, students may pursue any bachelor's degree, as long as the pre-optometry requirements are met in biology, chemistry, mathematics, physics, psychology and English.

Alternatively, the Department of Biology, sponsors a 3+4 Programs for the UMSL College of Optometry, for which a student may be admitted to the College of Optometry after completing three years (90 semester hours) of study in their respective majors and successful completion of the Optometry Admission Test (OAT). For more information, please contact Joe Southerland [southerlandj@umsl.edu](mailto:southerlandj@umsl.edu) or by phone: 314-516-5501 | Pre-Health Advising for specific requirements. You can also visit the Pre-Health Advising Website for additional information at: <http://bit.ly/1Ko7fHU>

The Pierre Laclède Honors College and the College of Optometry also offer the Scholars Program, which allows a student to complete both the undergraduate and doctor of optometry degrees in seven years. To qualify for this program, a student must be a senior in high school; score a minimum composite of 27 on the ACT; and be accepted to the UMSL Pierre Laclède Honors College program. For more information about the Scholars Program, contact the Pierre Laclède Honors College, (314) 516-7769.

For the programs described above (Scholars or 3+4), the undergraduate degree is granted when the student satisfactorily completes the first year of the professional program and has met all of the conditions for the specific undergraduate degree for which the student has applied.

In some cases, students are admitted to the optometry program without a degree.

### Admission Requirements

- Semester:
  - English - 2
  - Biology (including laboratory)<sup>1</sup> - 3
  - Physics (including laboratory) - 2
  - Chemistry<sup>2</sup>
  - General (including laboratory) - 2
  - Organic (including laboratory) - 1
  - Mathematics<sup>3</sup>
  - Calculus - 1
  - Statistics - 1
  - Psychology - 2
  - Liberal Arts - 2
- Quarter :

- English - 3
- Biology (including laboratory)<sup>1</sup> - 4
- Physics (including laboratory) - 3
- Chemistry<sup>2</sup>
- General (including laboratory) - 3
- Organic (including laboratory) - 2
- Mathematics<sup>3</sup>
- Calculus - 1
- Statistics - 1
- Psychology - 2
- Liberal Arts - 2<sup>2</sup>

- 1 One semester (or one quarter) of Microbiology with laboratory is a requirement. One semester of Anatomy or Physiology is strongly recommended.
- 2 One semester of Biochemistry, Cell Biology or Human/Comparative Physiology is strongly recommended.
- 3 Trigonometry as a prerequisite course for Calculus must be completed, either in high school (official high school transcripts required as proof), or college.

The College of Optometry uses a rolling admissions process. All courses used to satisfy the admission requirements must have been taken at an institution fully accredited by one of the Department of Education regional accreditation bodies. Specific prerequisite courses must be taken for a letter grade; they cannot be taken as an audit or on a pass/fail or satisfactory/unsatisfactory basis. Applicants must have completed 90 semester or 135 quarter hours (the equivalent of three years of college education) before the start of classes. In order to process financial aid awards it is strongly recommended that students complete all prerequisite courses the spring prior to admission. The applicant cannot apply more than 60 semester hours or 90 quarter hours which were earned at a two year institution toward the credit-hour requirement. Applicants holding a bachelor's degree will be given preference over applicants with similar academic credentials who do not have a degree. Applicants to the college come from a variety of undergraduate backgrounds, such as biological sciences, chemistry, psychology, education, and business.

### Advanced Placement Credit (AP) Policy (effective July 1, 2014)

A total of 10 hours of AP credit is acceptable if the applicant scored 4 or greater in the subject on the AP Exam. An official transcript is required.

For science courses, in addition to the 10 hour limit and a score of 4 or higher achieved on the exam, the applicant must score a 330 or higher in that particular subject on the OAT exam.

## Admission Test

Students should work with their undergraduate advisors as well as their academic advisor in optometry, to insure that all pre-requisite courses are taken prior to taking the Optometry Admission Test (OAT), which is required prior to being offered an interview for consideration for admission to the College of Optometry.

All applicants are required to take the Optometry Admission Test (OAT). The OAT is now offered through computer sites. As the computerized version may be scheduled at any time, please plan to take the OAT by June of the year you plan to apply in order to be considered for early

admission. Official test scores are acceptable for up to three years from the testing date.

Applicants are encouraged to take the examination by June of the year of application to the College of Optometry. If applicants wish to enhance their scores, the examination may be repeated. For OAT information, contact:

### Optometry Admission Testing Program

211 East Chicago Ave.  
Suite 1846  
Chicago, IL 60611  
(312) 440-2693  
<http://www.opted.org>

To apply to take the OAT, please click on the OAT link on [www.opted.org](http://www.opted.org) (<http://www.opted.org>) (on right).

### Application Procedures

The Admissions Committee begins to process applications on July 1 for the class entering the following year. An applicant's file will be considered complete and ready for consideration by the Admission Committee when the following material has been received:

\*Asterisked items are processed by Centralized Application Service:

- \*Application through Centralized Application Service.
- Supplemental Application through UMSL with a \$50.00 non-refundable application fee.

Please send directly to OptomCAS:

- \*Official high school and college transcripts, followed by updated transcripts as they become available. (Exception: graduates of international programs see deadline requirement for all transcripts).
- \*A composite evaluation prepared by the pre-professional advisory committee at the educational institution the applicant is attending. Those applicants not currently attending college or who are at an institution that does not offer a committee evaluation will be required to submit three letters of recommendation (which includes one letter of recommendation from an optometrist who is not related to you).

Students must release official Optometry Admission Test (OAT) results to UMSL.

Official transcripts not already submitted to OptomCAS must be mailed from every college attended, regardless of whether or not credit was earned, once an applicant has accepted our offer of admission.

Letters of recommendation must be emailed or mailed directly to the Centralized Application Service center by the originator. It is the applicant's responsibility to ensure all application materials are received by the Centralized Application Service center by February 15 (International students: transcripts by December 15 year prior) to be considered for admission to the class entering in August of the same year. Facsimile (faxed) application material will be accepted or acknowledged. Application material received after February 15 will not be evaluated for the class entering in August of the same year. To insure that all materials will be processed in time, we strongly encourage students to complete his/her OptomCAS application and insure all transcripts and letters of recommendation are received at OptomCAS prior to January 15. To be considered for merit scholarships, there is an early enrollment deadline. All materials must be received by January 5 in order to be considered for the early application deadline. Applications received after that time

will still be considered for admission but not additional awards, e.g. merit scholarships, state seat contracts.

### International Students

International students whose native language is not English and who have spent less than two of the last three years in an English-speaking country are required to submit scores from an internationally accepted standardized examination before a decision is made on admission.

To complete their credential file, applicants are required to furnish original and official transcripts before December 15th the year prior to admission from each school and college attended both in this country and abroad. The Educational Credentials Evaluators, Inc. or the World Education Services must evaluate all foreign school and college transcripts and their evaluation submitted as part of the application requirement. For information contact:

### Educational Credentials Evaluators, Inc.

Post Office Box 514070  
Milwaukee, WI 53203-3470  
(414) 289-3400  
Fax: (414) 289-3411  
Email: [eval@ece.org](mailto:eval@ece.org)  
Web site: <https://www.ece.org>

### World Education Services

P.O. Box 5087  
New York, N.Y. 10274-5087  
(212) 966-6311  
Fax: (212) 939-6100  
Email: [info@wes.org](mailto:info@wes.org)

The University of Missouri-St. Louis maintains an Office of International Student Services to assist applicants who have been offered admission. All new international students are required to attend a formal orientation program before matriculation. For more information, contact:

### University of Missouri-St. Louis

Office of International Student Services  
One University Blvd.  
St. Louis, MO 63121-4499  
(314) 516-5229  
Email: [iss@umsl.edu](mailto:iss@umsl.edu)

### Selection Procedures

Applications are reviewed beginning in August with interviews scheduled and initiated starting in September. The college uses a 'rolling admissions' process that allows qualified applicants to be admitted on an ongoing basis until the class is filled. Therefore, applicants are encouraged to apply as early as possible to ensure full consideration for admission.

The Admissions Committee has the responsibility to review and evaluate all applicants and select the best qualified candidates. The committee considers: an applicant's overall grade point average, the grade point achieved in the sciences, any grade trends over the years in college, and the scores on the OAT. Concurrently, candidates are evaluated on less quantitative measures such as extracurricular activities and interests, related or unrelated work experience, written narrative, and letters of recommendation.

Those applicants whom the committee feels to be most competitive will be invited for an on-campus interview. The on-campus interview facilitates an assessment of the applicant's communication skills, interests, motivation, and personal characteristics. In addition, the on-campus interview allows the applicant to tour the facilities, meet with currently enrolled students, present questions regarding financial aid and housing, and learn more about the University of Missouri-St. Louis and the College of Optometry. From this group of interviewed applicants, the entering class of 44 students will be selected.

Once an offer of admission is made to an applicant, the applicant will be contacted by OptomCAS to complete a background check. We encourage applicants to review the criteria for background check on the OptomCAS website. [www.optomcas.org](http://www.optomcas.org) (<http://www.optomcas.org>)

The policies of the University of Missouri-St. Louis and the College of Optometry comply with the provisions under those laws that forbid discrimination on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability or status as a Vietnam era veteran.

## Admission Process

Notices of acceptance may be received as late as July of the year in which the students enter the program. If acceptance to the class is conditional, the terms of the condition must be completed prior to matriculation. Applicants who have indicated that degree requirements will be completed prior to matriculation, and who have been selected for admission, may receive a conditional offer of acceptance contingent upon completion of the degree and any outstanding prerequisites.

Students offered admission have 20 days from the date on the offer of admission letter to make a required \$500 acceptance deposit. The \$500 deposit will be credited toward tuition when the student matriculates. If the student withdraws from consideration prior to May 15th, \$250 will be refunded. After May 15th, no refunds will be given. There is a \$250 administrative fee.

A certain number of applicants are placed on an alternate list. If an applicant who has been offered admission declines the offer, their position will be allocated to the next individual on the alternate list.

Notification of denial is sent by mail. Applicants who do not receive an offer of admission may reapply the following year through OptomCAS.

## Financial Aid

The University of Missouri-St. Louis maintains an Office of Student Financial Aid to assist students with the cost of their education.

Financial assistance is available in the form of loans, scholarships, and work-study. Funds for these programs are available from federal, private, state, and institutional resources. To apply for financial aid, students must complete a Free Application for Federal Student Aid (FAFSA). Preference will be given to those students who have completed the FAFSA by March 1. Preference means that the Student Financial Aid Office will begin awarding FWS (Federal College Work-Study), and maximum government allowable funding under subsidized loans. A completed financial aid application means that the Financial Aid Office has received an official Student Aid Report from the Federal Processing Center. Information about Federal loan programs and FAFSA are available at [www.fafsa.ed.gov](http://www.fafsa.ed.gov)

The Student Financial Aid Office maintains a Web site at [www.umsll.edu/services/finaid](http://www.umsll.edu/services/finaid), where students will find useful information along with the

ability to contact the office electronically via e-mail. Also included is a scholarship directory that is updated annually.

To be considered for all university scholarships offered through the Financial Aid Office, a student must be accepted for admission.

Many state optometric associations and their auxiliaries offer scholarships and grants. Application is generally made directly to the state association or auxiliary and selection is generally made on the basis of state residence and other criteria. Information may be obtained by writing to the various state optometric associations and/or auxiliaries.

The College of Optometry will provide additional information about scholarships and the college's Handbook of Loans, Scholarships, Grants, and Awards to applicants after being admitted. Many of the College's scholarships are listed on the College Website.

## Fees

Detailed information regarding current fees and residency regulations is furnished on the UMSL Cashier's website.

The university reserves the right to change fees and other charges at any time without advance notice.

## Education Fees

All students enrolled in the University must pay educational fees based on either the schedule for Missouri residents or the schedule for non-residents. All optometry students will be required to pay the non-resident educational fee if they do not meet the University of Missouri residency requirements at the time of enrollment.

For current fees and costs, please check the fee section of the Cashier's Website and be certain to select appropriately optometry resident / nonresident.

A Summer Session is required following the second and third professional year.

## Other Required Fees

All students are required to pay the following fees each semester: Information Technology Fee; Student Facility, Activity, and Health Fee. In addition, the Patient Care Center fee is applied to the Fall and Spring semesters. Please refer to the Fees Section of the Cashier's website for current fees and caps on fees.

## Student Health Insurance (optional)

An Accident and Sickness Insurance plan is available to students and their dependents. Information concerning premiums and coverage is available upon request from University Health Services or call (314) 516-5671. For students registered at UMSL College of Optometry, health insurance is available through the American Optometric Student Association.

## Nonresident Students

Optometry students who do not meet the residency requirements must pay the nonresident educational fee according to the schedule above. A definition of "residency" is outlined in Tuition and Residency Rules, available in the cashier's office. (314-516-5151) Students are responsible for registering under the proper residence and paying the proper educational fees.

Twelve positions (average of three each year) are allocated by state reciprocal agreement with the State of Kansas for residents of Kansas. Individuals who are admitted under these agreements will pay reduced non-resident fees. To apply for this award, applicants must be certified as a bona fide Kansas resident and meet financial need (FAFSA). Seats are not offered until after FAFSA data is available. Additionally, Kansas residents accepting a seat are required to return to Kansas to practice following graduation or completion of a residency program. For additional information, contact:

## Kansas Board of Regents

Kansas Optometry Service Scholarship  
1000 S.W. Jackson St., Suite 520  
Topeka, KS 66612-1368  
(785) 296-3518.

## Four-Year Professional Degree (O.D.) Curriculum

### Curricular Outcomes

#### Entry Level Standards

Doctors of Optometry must have an established knowledge of the basic and clinical sciences in order to provide quality eye and vision care to their patients. The academic foundation must be broad and include the biological, medical, vision and optical sciences, as well as a basic understanding of the health care delivery system. A Doctor of Optometry must recognize the dynamic nature of knowledge and possess the commitment and skills needed to responsibly assess and apply new information and treatment strategies throughout their career.

The UMSL College of Optometry shall ensure that before graduation each student will effectively utilize and demonstrate a working knowledge in patient care within each of the following areas:

#### I. PATIENT HISTORY

1. the basic elements of a comprehensive patient history
2. the ability to obtain an efficient patient history necessary for a problem oriented examination
3. the proper standard of recording patient history in EHR
4. the ability to relate patient history to examination findings

#### II. OPTOMETRIC KNOWLEDGE

1. basic body systems, with special emphasis on the ocular and visual system and their interrelationships to the body as a whole;
2. the impact of genes and their interaction with behavior, diet and the environment on human health;
3. the various processes and causes that lead to dysfunction and disease and the effect that these processes can have on the body and its major organ systems, with special emphasis on the ocular and visual systems;
4. the mechanisms of actions of the various classes of pharmaceutical agents, including injectable agents, and their interactions;
5. the structures and processes contributing to the development of refractive error and other optical or perceptual abnormalities of the visual system;
6. the optics of the eye and ophthalmic lens systems - including spectacles, contact lenses, and low vision devices;

7. ophthalmic lasers in the management of refractive error and other anomalies of the eye;

#### III. PATIENT CARE

1. ophthalmic lens systems used to correct refractive, oculomotor and other vision disorders;
2. visual development and vision function with respect to deviation and enhancement of conditions such as, but not limited to, strabismus, amblyopia, ocular motility, accommodation, vergence and visual perception;
3. vision therapy and other rehabilitative methods used for the management of common visual disorders;
4. the detection, diagnosis, treatment and management of ocular disease and ocular manifestations of systemic disease;
5. the safe and effective use of pharmaceutical agents for the treatment of disease and conditions affecting the eye and visual system, and recognize adverse reactions;
6. the utilization of injectable agents for the management of ocular and systemic diseases
7. the concepts of refractive surgery and its management;
8. basic life support skills for prevention and response to life-threatening emergencies;
9. the use of ophthalmic lasers in the management of refractive error and other anomalies of the eye;

#### IV. CLINICAL SKILLS

1. the importance of performing necessary examination techniques competently and efficiently
2. the capacity to adapt the administration of clinical tests to meet the needs of the patient
3. the obligation to maintain clinical skills through practice and repetition

#### V. INTERPERSONAL AND COMMUNICATION SKILLS

1. the critical elements of verbal and written communications with patients and other health care professionals;
2. the psychosocial dynamics of the doctor/patient relationship;
3. the need for clear, accurate and appropriate documentation of patient encounters;

#### VI. INTRA/INTER PROFESSIONAL CONSULTATION/PRACTICE

1. when there is a requirement for intra/inter professional consultation
2. the process of coordination among professionals involved in a patient's care

#### VII. PROFESSIONALISM

1. the need for a commitment to uphold the ethical obligations of the Optometric Oath;
2. the provisions to guarantee patient privacy and medical record security as expressed by HIPAA regulations;
3. the manner in which people of diverse cultures and belief systems perceive human health and illness and respond to various symptoms, diseases and treatments;
4. inter-professional values, related ethics and relationships among the professions;

#### VIII. SYSTEMS-BASED PRACTICE

1. the practice management structure and strategies as they pertain to different practice settings;
2. the broad-based, multidisciplinary nature of the health care delivery system;
3. the role of the optometrist as a primary health care provider;

#### IX. PRACTICE-BASED LEARNING

1. the conscientious use of current best practices in patient care decision making;
2. the necessity for a commitment to lifelong learning;
3. information management systems and technology used in the delivery of eye and health care.

## Grades

All courses taken for credit in the professional program must be passed with a "C-" or better in order for a student to qualify for graduation. The College of Optometry does not recognize a "D" grade for courses taken for degree credit; and for a student enrolled in a patient care course. Therefore, any grades lower than a "C-" will be recorded as an "F" and have 0 grade points. Furthermore, in order to qualify for graduation, a student must be in good academic standing and the cumulative professional Grade Point Average (GPA) must be 2.50 or higher. Students must submit evidence to the Office of Student Services that they have taken the 3 part NBEO examinations prior to graduation. Such evidence may include a copy of the score report received from NBEO.

To assure graduating at the end of a specific semester, all work for that semester and any delayed grades from previous semesters must be completed with the grades sent to the Office of Student Services no later than the official date for submission of final semester grades.

## Time limitations

All of the required courses during the first six (6) semesters of first course enrollment and all required courses for the O.D. degree must be completed within six (6) years after the first course enrollment.

## Continuing Education

The College of Optometry offers continuing education programs for optometrists throughout the Midwest region as well as nationwide. Courses on nutrition, management of ocular diseases, ocular anomalies, and visual skills are held on a frequent basis. In addition to College of Optometry faculty, optometric specialists, medical educators, and researchers have input into course development as well as participation in course presentations. All CE courses offered by the college are COPE approved and accepted by those states requiring continuing education credit for re-licensure.

Continuing Education course information may be obtained by contacting:

## Career Outlook

### Doctor of Optometry Degree

According to the American Optometric Association, Doctors of Optometry (OD's) are the independent primary health care professionals for the eye. Optometrists examine, diagnose, treat, and manage diseases, injuries, and disorders of the visual system, the eye, and associated structures as well as identify related systemic conditions affecting the eye.

- Doctors of Optometry prescribe medications, low vision rehabilitation, vision therapy, spectacle lenses, contact lenses, and perform certain surgical procedures.
- Optometrists counsel their patients regarding surgical and non-surgical options that meet their visual needs related to their occupations, avocations, and lifestyle.
- An optometrist has completed pre-professional undergraduate education in a college or university and four years of professional education at a college of optometry, leading to the doctor of optometry (O.D.) degree. Some optometrist's complete an optional residency in a specific area of practice.
- Optometrists are eye health care professionals state-licensed to diagnose and treat diseases and disorders of the eye and visual system.

--Approved by the AOA Board of Trustees, 2012

As primary eye care providers, Doctors of Optometry are an integral part of the health care team and an entry point into the health care system. They are skilled in the co-management of care that affects the eye health and vision of their patients and an excellent source of referral to other health care professionals.

The scope of optometric practice requires an understanding of the development and maintenance of vision from infancy through adulthood, and the therapeutic and rehabilitative methods required to care for eye and vision abnormalities that affect people of any age.

Optometry is the largest eye care profession and one of the largest independent health care professions in the United States. Currently, some 34,000 Doctors of Optometry practice in America. They are widely distributed across the nation, practicing in more than 7,100 different municipalities. In more than 4,300 of these communities, they are the only primary care provider. As such, Doctors of Optometry provide the major portion of primary eye care services in the United States.

Studies have indicated that a ratio of one practicing Doctor of Optometry to every 7,000 people (a ratio of 14.3 practicing doctors of optometry per 100,000 populations) is a reasonable average for the United States. Despite recent growth in the profession, few states meet this criterion.

As our society becomes more technically oriented, vision requirements become more exacting. The number of persons needing professional help for reading and other near-point visual tasks, and computer usage among all people including young children, is steadily growing. Increased demands for vision care result not only from population growth but also from increased understanding of how quality vision relates to industrial production, student achievement, adjustments to aging, and other areas crucial to modern society.

As a result the patients have more varied and challenging needs. On any given day, a Doctor of Optometry could be involved in restoring functional vision to a partially sighted patient; fitting glasses for a child whose vision problem is affecting academic achievement; treating an eye

infection with antibiotics; improving the function of a patient's eyes through vision training; helping an elderly patient in a nursing home cope with changing vision through critical eye health education; co-managing eye or systemic health problems with a physician specialist; and performing comprehensive eye examinations for those who need glasses or contact lenses to correct astigmatism, nearsightedness, and numerous other vision problems.

The practice of optometry offers independence, flexibility, and diversity. Doctors of Optometry have a wide range of modes of practice. They may choose to practice in the inner cities, suburbs, and rural areas. Opportunities exist for solo practice, associateship, optometric or multidisciplinary group practice, government or military service, clinical or hospital practice, teaching, and research.

Optometry is a rewarding career, both economically and personally. Based on data from the Bureau of Labor Statistics and surveys by professional associations, optometry is one of the top 10 income-earning professions in the country.

## Optometry Courses

### ***OPTOM 8010 Anatomy, Physiology and Disease Processes I: 5 semester hours***

First in a two-semester course sequence that will detail the general anatomy of the human body along with the histology (microanatomy), physiology and disease processes of major organ systems. Course content will be presented in a modular format. Areas of discussion will include cardiovascular, respiratory, endocrine, digestive, reproductive, integumentary and peripheral and autonomic nervous systems. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

### ***OPTOM 8020 Basic and Clinical Optics I: 4 semester hours***

Prerequisites: Consent of instructor. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined.

### ***OPTOM 8030 Introduction to Optometry: 1 semester hour***

An introduction to the profession of optometry, including a consideration of the characteristics of a profession, the behaviors and attitudes of a professional, the history of optometry, the profession's legal basis, the major optometric organizations and sources and types of information available to optometrists. One hour of lecture per week.

### ***OPTOM 8040 Neuroanatomy: 4 semester hours***

Prerequisites: Consent of instructor. Detailed gross and microscopic anatomy of human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system.

### ***OPTOM 8060 Biochemistry: 3 semester hours***

Basic concepts of general and cellular biochemistry. Study of nomenclature, structure, and reactions of organic molecules. Some emphasis on visual system - tears, intraocular fluids, lens, and photochemistry.

### ***OPTOM 8090 Case Based Discovery For The Developing Clinician: 1 semester hour***

Students acquire curricular competencies appropriate for the professional year in which they are enrolled via in depth individual and group discovery via case based presentations. The experience will provide students the opportunity to assimilate and recognize the relationships among diverse topics emphasized within the optometric curriculum. Participants work in groups of no more than 10.

### ***OPTOM 8110 Anatomy, Physiology And Disease Process II: 5 semester hours***

Prerequisite: OPTOM 8010. Continuation of OPTOM 8010 Anatomy, Physiology and Disease Processes I.

### ***OPTOM 8120 Basic & Clinical Optics II: 5 semester hours***

Prerequisite: OPTOM 8020. Radiometry and photometry, polarization, scattering, emmetropia, myopia, hyperopia, astigmatism, models of experimental myopia, accommodation, diffraction, retinal image size, entoptic phenomena, aberrations, lasers and the eye, apertures, and optical instruments.

### ***OPTOM 8160 Anatomy And Physiology Of The Eye: 5 semester hours***

Prerequisites: OPTOM 8040, OPTOM 8010 or consent of instructor. Vegetative anatomy and physiology of the eye, optic nerve, orbit, and adnexa will be discussed. This includes discussion of embryology and the dynamics of ocular fluids. Four lecture hours and a two-hour laboratory per week.

### ***OPTOM 8180 Clinical Optometry I: 5 semester hours***

Prerequisite: OPTOM 8030. Selected tests for ocular assessment including case history, visual acuity, ophthalmoscopy, refraction, and binocular integration. The course format is two 75-minute lectures and two 2-hour laboratories.

### ***OPTOM 8190 Introduction to Clinical Diagnostic Reasoning: 1 semester hour***

Prerequisite: OPTOM 8090. Introduction to clinical diagnostic reasoning by individual and group case-based learning. Scenarios give students an understanding of the relationship between basic and clinical sciences and provide an introduction to established best practices.

### ***OPTOM 8220 Ophthalmic Optics: 4 semester hours***

Prerequisites: OPTOM 8120. Ophthalmic materials, physical characteristics of lenses and frames, paraxial optics of ophthalmic lenses, ophthalmic prisms, lens specifications, special lenses, multifocal lenses, unique designs, aniseikonic lenses, aberration theory and its application to lens design, lenses for low vision, protective eyewear.

### ***OPTOM 8230 Interpersonal Communications: 2 semester hours***

Prerequisites: OPTOM 8030. Principles of human interpersonal relationships. The enhancement of listening and verbal skills will be provided. Emphasis will be preparing the student to understand and manage the many human interpersonal relationships necessary in the practice of optometry. Two hours of lecture per week.

### ***OPTOM 8240 Ocular Motility: 2 semester hours***

Prerequisites: OPTOM 8040 or consent of instructor. The anatomy, physiology, neurology, measurement, characteristic, and control of the intra- and extraocular system.

### ***OPTOM 8250 Monocular Sensory Processes: 5 semester hours***

Prerequisite: OPTOM 8160 or consent of instructor. Monocular sensory processes of vision: phototransduction, visual neurophysiology, spatial and temporal vision, acuity, light adaptation and discrimination, color, motion, objects and attention. Sensory processes are considered from both the psychophysical aspects and neurophysiological bases, including the changes during development, adulthood and aging. Four hours of lecture and two hours of laboratory per week.

**OPTOM 8260 Foundations of Ocular and Systemic Disease and Management I: 4 semester hours**

Prerequisites: OPTOM 8110, OPTOM 8160, OPTOM 8180. The first in a comprehensive series of courses that address disease processes involving the eye and systemic disease. Emphasis is on pharmacology of the eye and specified organ systems. Clinical diagnoses, and optometric and medical management of ocular and systemic disease are discussed. Diagnostic procedures for assessing the health of the eye including binocular indirect ophthalmoscopy are taught in the laboratory.

**OPTOM 8280 Clinical Optometry II: 5 semester hours**

Prerequisites: OPTOM 8180. Continuation of clinical optometry. Patient care in the areas of refraction, binocular integration, perimetry, and biomicroscopy.

**OPTOM 8320 Ophthalmic Dispensing: 1 semester hour**

Prerequisites: OPTOM 8220. Clinical experience in verification and dispensing of ophthalmic materials.

**OPTOM 8340 Binocular Vision And Space Perception: 4 semester hours**

Prerequisites: OPTOM 8240, OPTOM 8280 and OPTOM 8250 or consent of instructor. Binocular vision and space perception. Visual direction, theory of correspondence, fusion, rivalry, ocular dominance, and stereopsis. Developmental aspects and neurophysiological mechanisms.

**OPTOM 8350 Epidemiology: 2 semester hours**

A review of descriptive statistics, probability sampling, correlation, and prediction. The essentials of epidemiological study procedures and a discussion of the epidemiology of vision disorders.

**OPTOM 8370 Foundations of Ocular and Systemic Disease and Management II: 5 semester hours**

Prerequisite: OPTOM 8260. The second in the series of courses that address diseases of the eye, clinical diagnoses, and optometric and medical management of ocular and systemic disease. The laboratories emphasize diagnostic techniques and treatment skills, preparation for the initial clinic privileging examination and augment important concepts introduced in the classroom environment.

**OPTOM 8380 Clinical Optometry III: 2 semester hours**

Prerequisites: OPTOM 8280. Continuation of Clinical Optometry II. Diagnosis, prognosis and management of visual problems. Emphasis on conducting comprehensive eye exams in preparation for the initial clinical privileging examination.

**OPTOM 8390 Specialty Clinic Laboratory: 1 semester hour**

Prerequisite: OPTOM 8280. Students acquire and practice skills for pediatric, binocular vision, low vision, and contact lens examinations. The course format is one 2-hour laboratory per week.

**OPTOM 8391 Clinical Topics in Contact Lenses: 1 semester hour**

Prerequisite: OPTOM 8280. This is the first in a series of 3 courses addressing contact lenses. The focus is on contact lens care and evaluation. The course format is one 50-minute lecture per week.

**OPTOM 8392 Clinical Topics in Binocular Vision and Pediatric Optometry: 1 semester hour**

Prerequisite: OPTOM 8240 and OPTOM 8280. This course presents clinical diagnostic and management skills for both pediatric patients and those with binocular vision anomalies. The course format is lecture.

**OPTOM 8393 Clinical Topics in Low Vision: 1 semester hour**

Prerequisite: OPTOM 8280. This course presents clinical diagnostic and management skills for patients with low vision. The course format is one 50-minute lecture per week.

**OPTOM 8400 Directed Readings: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent literature review of a specific topic in any area of basic or clinical vision science guided by a full time faculty member with appropriate interests. Credit is awarded upon approval of a written paper regarding the selected topic. This elective may be repeated up to a total of 3 credit hours.

**OPTOM 8410 Directed Research: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent research. Projects may be laboratory, library, or clinically based research in any area of vision science. Projects will be supervised by one or more full time faculty members. This elective may be repeated up to a total of 6 credit hours.

**OPTOM 8450 Introduction to Primary Care Clinic: 4 semester hours**

Prerequisites: OPTOM 8230, OPTOM 8320, OPTOM 8340, OPTOM 8370, OPTOM 8380, OPTOM 8390, OPTOM 8391, OPTOM 8392, OPTOM 8393, OPTOM 8560, and successful completion of the Clinical Proficiency Examination. The first in a series of adult primary care courses. Students perform comprehensive examinations, make diagnoses, and develop management plans with patient education under supervision of a faculty attending. Students participate in accompanying clinic seminar discussion groups.

**OPTOM 8460 Foundations of Ocular and Systemic Disease and Management III: 2 semester hours**

Prerequisites: OPTOM 8370. The third course in the foundation series that addresses ocular and systemic diseases and their management.

**OPTOM 8500 Primary Care Clinic I: 6 semester hours**

Prerequisites: OPTOM 8450. The second in a series of adult primary care courses. Students examine and care for patients under supervision of a faculty attending. Students are expected to become more independent in decision-making. Diagnostic coding is introduced.

**OPTOM 8520 Contact Lenses I: 3 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8391. Historical development of the contact lens and its use. Basic lens terminology, specifications, physiochemical characteristics, optics, fabrication, and verification. Preliminary patient evaluation, indications and contraindications for contact lenses. Basic fitting philosophies for all lens types. Lens care and patient education. Patient and practice management considerations.

**OPTOM 8540 Binocular Vision Anomalies: 4 semester hours**

Prerequisites: OPTOM 8340, OPTOM 8380 and OPTOM 8392 or consent of instructor. The etiology, epidemiology, symptoms, signs, and course sequelae of the obstacles to binocular vision-sensory, integrative, and motor. The detection, diagnosis, prognosis, and orthoptic treatment of such anomalies. Clinical care of aniseikonas.

**OPTOM 8550 Low Vision: 2 semester hours**

Prerequisite: OPTOM 8380 and OPTOM 8393. The etiology, epidemiology, symptoms, signs, course, and sequelae of low vision problems. Methods of testing, prognosis, selection of therapy, design of environmental and optical aids, problems of rehabilitation. Agencies, laws, public and social assistance for the partially sighted and blind. The course format is lecture and 1 two-hour laboratory per week.

**OPTOM 8560 Public Health: 2 semester hours**

A review of local, state and federal organizations involved in health care, comprehensive health planning, new trends in health care delivery. The assessment of the quality of health care delivery. The relationship of vision care to these topics is emphasized.

**OPTOM 8570 Advanced Topics In Ocular And Systemic Disease And Management: 6 semester hours**

Prerequisite: OPTOM 8370. The third semester of a comprehensive, systems based course sequence. Advanced topics in diagnoses as well as optometric and medical management of ocular and systemic disease will be discussed. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

**OPTOM 8600 Primary Care Clinic II: 6 semester hours**

Prerequisites: OPTOM 8500, OPTOM 8520, OPTOM 8540, OPTOM 8550, OPTOM 8570, and OPTOM 8650. The final course in the adult primary care sequence. Students examine and care for patients under supervision of a faculty attending. Students are expected to function nearly independently in final preparation for the Externship Program.

**OPTOM 8610 Environmental Vision: 2 semester hours**

Prerequisites: OPTOM 8500. This course considers the relationship of the eye and vision to all aspects of one's environment including home, work, recreation, and transportation. Emphasis will be placed on protecting the eye from injury and maximizing vision performance.

**OPTOM 8620 Contact Lenses II: 2 semester hours**

Prerequisites: OPTOM 8520. Advanced contact lens fitting, theories, and clinical methods for astigmatic, presbyopic, keratoconic, and aphakic designs. Special considerations include the use of corneal topography, orthokeratology, disposable lenses, lenses for extended wear and lenses for color deficiencies. The course format is one lecture per week.

**OPTOM 8630 Practice Management III: 3 semester hours**

Prerequisites: OPTOM 8030 and OPTOM 8230. The development and management of an optometric practice from a patient and community service point of view - office design, office routine, patient care administration, personnel management, recall systems. The establishment, development and management of an optometric practice from a business point of view. Legal developments, governmental regulations, legislation and the legislative process, malpractice, professional ethics, taxes, fee structures, insurance and accounting methods.

**OPTOM 8640 Pediatric Optometry: 2 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8540. Special examination and management considerations of the pediatric patient. Psychological, physiological, social, and demographic aspects of early visual development. Discussion of the optometric considerations of children with learning and reading disabilities. The course format is two lecture/discussions per week.

**OPTOM 8650 Geriatric Optometry: 2 semester hours**

Prerequisite: OPTOM 8380. Special examination and management considerations of the geriatric patient will be discussed. Psychological, physiological, social, and demographic aspects of aging, as well as ocular changes associated with the aging process will be taught.

**OPTOM 8660 Contact Lens Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8391. The clinical examination and care of patients in the optometric specialty area of contact lenses.

**OPTOM 8670 Comprehensive Case Review and analysis: 1 semester hour**

Prerequisites: Enrollment in OPTOM 8500 or OPTOM 8600. Discussion of the diagnosis and management of common clinic patient encounters via Socratic teaching techniques. Interns are encouraged to present actual cases which have been particularly challenging for them. The course format is a weekly seminar.

**OPTOM 8680 Ophthalmic Lasers: 1 semester hour**

Prerequisites: OPTOM 8570. Principles and applications of lasers for ophthalmic use. Emphasis will be placed on demonstration where possible. Topics will include the principles, physics and safety concerns of ophthalmic lasers. Lasers used in retinal imaging, and in the care of glaucoma, cataract, refractive conditions, and cosmetic conditions will be discussed and demonstrated. Co-management of patients requiring ophthalmic laser treatment will also be covered.

**OPTOM 8690 Pediatric/Binocular Vision Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8392. The clinical examination and care of patients in the optometric specialty areas of binocular vision and pediatric vision.

**OPTOM 8700 UM-St. Louis Pediatric/Binocular Vision Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients in pediatric/binocular vision clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8710 and OPTOM 8720.

**OPTOM 8710 UM-St. Louis Contact Lens Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework required Comprehensive clinical care in the contact lens clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8720.

**OPTOM 8720 UMSL Eye Health Management Patient Care: 1 semester hour**

Prerequisites: Successful completion of all first, second, and third year course work. Comprehensive clinical care in the eye health management clinic with ophthalmologists at the University of Missouri-St. Louis University Eye Center. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8710.

**OPTOM 8730 Community Service Patient Care Rotation A: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8750 Community Service Patient Care Rotation B: 7 semester hours**

Prerequisite: Successful completion of all first, second, and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8760 Community Service Patient Care Rotation D: 7 semester hours**

Prerequisite: Successful completion of all first, second and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8770 Community Service Patient Care Rotation C: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8780 External Rotation In Institutional Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of primary care patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8790 External Rotation In Ocular Disease Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients with ocular disease at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8800 External Rotation In Pediatric/Binocular Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of pediatric/binocular vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8810 External Rotation In Contact Lens Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of contact lens patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8811 External Rotation In Ophthalmic Surgical Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Ophthalmic Surgical Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8812 External Rotation In Geriatric Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Geriatric Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8813 External Rotation In Ophthalmic Sports Vision: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Sports Vision Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8814 External Rotation In Primary Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Primary Care Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8815 External Rotation In Pathology And Treatment: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in pathology and treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8816 External Rotation In Ophthalmic Laser Treatment: 7 semester hours**

Prerequisites: Successful Completion of all second and third year coursework. Comprehensive clinical care in ophthalmic laser treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8817 External Rotation In Rehabilitative Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in Rehabilitative Patient Care at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8820 External Rotation In Low Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of low vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8830 External Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of a general population of optometric patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8840 External Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at external site approved by the School of Optometry's Externship Council.

**OPTOM 8850 Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at the UM-St. Louis Center for Eye Care, UM-St. Louis Optometric Center, or the UM-St. Louis East St. Louis Eye Center.

**OPTOM 8870 Practice Management IV: 2 semester hours**

Prerequisites: Successful completion of all first, second and third year. Further in-depth discussion in practice management.

**OPTOM 8880 Clinic Seminar: 1 semester hour**

Prerequisites: Successful completion of all first, second and third year. Presentation and discussion of interesting clinical patients. Additional clinical testing techniques and concepts. Further discussion of patient data analysis-the process of determining diagnosis, prognosis, and therapy. Further discussions in the optometric specialties.

**OPTOM 8970 Geriatric Patient Care Delivery: 3-6 semester hours**

Prerequisite: Consent of Geriatric Residency Instructors. Direct optometric patient care to a population that is largely geriatric. Emphasis will be on integrating specialty care available for these patients to provide comprehensive vision care. Two hours of direct patient care per week are required per hour of credit. In addition, the student will attend weekly supervisory meetings. May be repeated with consent of instructor for a total of 18 credits. Patient care will become more independent of direct supervision and the type of patients seen will be more varied with each repeat.

## Vision Science Courses

### **VIS SCI 6400 Sensory Processes And Perception: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor. Current views on the encoding of various aspects of the visual stimulus (intensity, space, time, and wavelength) that give rise to the perceptions of brightness, contour, motion and color will be considered in this course. The psychophysical tools available to examine visual encoding will be emphasized. Other topics will include binocular vision and depth perception, information processing approaches to visual pattern recognition, and the similarities and interactions of the visual system with the other sensory modalities.

### **VIS SCI 6401 Visual Optics: 3 semester hours**

Prerequisite: graduate standing in vision science or consent of instructor. This course deals with the optical properties of the eye. Included are a review of general optics including physical optics, paraxial and nonparaxial geometric optics, image quality, radiometry and photometry, and optical instrumentation. Topics in visual optics will include schematic eyes, measurement of the refractive errors, visual axes, spectral absorption by the ocular media, and the optical performance of the eye.

### **VIS SCI 6402 Ocular Anatomy And Physiology: 3 semester hours**

Prerequisite: graduate standing in vision science or consent of instructor. The structures and fluids of the eye and orbit, their interactions and functions are considered in this course. Specific topics include the eyelids. Tearfilm, conjunctiva, cornea. Iris, ciliary body, vasculature, aqueous humor, vitreous body, and the retina.

### **VIS SCI 6403 Psychophysical Methods And Experimental Design: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor. Advanced methodology for the design and analysis of experiments in a variety of areas of visual science are considered in this course. Both basic and applied topics will be considered. Special emphasis will be placed on psychophysical methodology, signal detection analysis, and scaling techniques.

### **VIS SCI 6404 Sensory Neuroscience: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor. This course will deal with the neural organization of the sensory system with an emphasis on vision. It will include a review of general neurophysiology and neuroanatomy as they relate to the processing of environmental stimuli into neural information as well as experimental approaches utilized in neurobiology. Topics to be covered include: neural transduction and sensory coding by receptors and neurons, constraints on perception defined by the functional organization of the nervous system, sensory development and plasticity as related to neural development, and evolution of sensory systems.

### **VIS SCI 6405 Neuroanatomy: 5 semester hours**

Prerequisite: Graduate standing. Detailed gross and microscopic anatomy of the human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system. Students may not receive credit for both VIS SCI 6405 and OPTOM 8040.

### **VIS SCI 6406 Geometric Optics: 5 semester hours**

Prerequisite: Graduate Standing. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined. A student may not receive credit for both VIS SCI 6406 and OPTOM 8020.

### **VIS SCI 6470 Individual Studies In Vision Science: 2 semester hours**

Prerequisite: Consent of instructor. This course designation can be used to cover a variety of topics in visual science. In general, very specific topics of limited interest will be presented as individual studies. Individual studies and advanced topics enable the student's course of study to be sharply tuned to his or her major area of interest.

### **VIS SCI 6490 Graduate Research In Vision Science: 1-15 semester hours**

Prerequisite: Consent of instructor. Research in an area selected by the student in consultation with faculty members. May be taken to a maximum of ten hours for the M.S. and 15 hours for the Ph.D.

### **VIS SCI 6497 Interdisciplinary Geriatric Care: 3 semester hours**

Same as GERON 6497. Prerequisites: Consent of instructor. Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

### **VIS SCI 6499 Current Topics In Optometry And Vision Science: 1 semester hour**

Prerequisite: Consent of instructor this seminar course examines and analyzes current publications in eye care and vision research.

## Curriculum

### First Year

## For the Class of 2016:

### First Year

#### Fall Semester

Semester	Credit Hours	Lecture	Lab
8010 Anatomy, Physiology and Disease Processes I	5	4	1
8020 Basic and Clinical Optics I	4	3	1
8030 Introduction to Optometry	1	1	
8040 Neuroanatomy	4	3	1
8060 Biochemistry	3	3	
8090 Case Based Discovery for the Developing Clinician	1	1	
8350 Epidemiology	2	2	

#### Spring Semester

Semester	Credit Hours	Lecture	Lab
8090 Case-Based Discovery for the Developing Clinician	1	1	

8110 Anatomy, Physiology and Disease Processes II	5	4	1
8120 Basic and Clinical Optics II	5	4	1
8160 Anatomy and Physiology of the Eye	5	4	1
8180 Clinical Optometry I	5	3	2

## Second Year

### Fall Semester

Semester	Credit Hours	Lecture	Lab
8220 Ophthalmic Optics	4	3	1
8230 Interpersonal Communications	2	2	
8240 Ocular Motility	2	2	
8250 Monocular Sensory Processes	5	4	1
8260 Foundations of Ocular and Systemic Disease and Management I	4	3	1
8280 Clinical Optometry II	5	3	2

### Spring Semester

Semester	Credit Hours	Lecture	Lab
8320 Ophthalmic Dispensing	1		1
8340 Binocular Vision and Space Perception	4	3	1
8370 Foundations of Ocular and Systemic Disease and Management II	7	6	1
8380 Clinical Optometry III	2	1	1
8390 Specialty Clinic Laboratory	1		1
8391 Clinical Topics in Contact Lenses	1	1	
8392 Clinical Topics in Binocular Vision and Pediatric Optometry	1	1	

8393 Clinical Topics in Low Vision	1	1	
8560 Public Health	2	2	

## Third Year

### Fall Semester

Semester	Credit Hours	Lecture	Lab
8500 Primary Care Clinic I	6		6
8520 Contact Lenses I	3	2	1
8540 Binocular Vision Anomalies	4	3	1
8550 Low Vision	2	1	1
8570 Advanced Topics in Ocular and Systemic Disease and Management	6	5	1
8650 Geriatric Optometry	2	2	

### Spring Semester

Semester	Credit Hours	Lecture	Lab
8600 Primary Care Clinic II	6		6
8610 Environmental Vision	2	2	
8620 Contact Lenses II	2	2	
8630 Practice Management III	3	3	
8640 Pediatric Optometry	2	2	
8645 Neurologic Disorders of the Eye and Visual System	2	2	
8660 Contact Lens Specialty Clinic	1		1
8670 Comprehensive Case Review and Analysis	1	1	
8680 Ophthalmic Lasers	1	1	
8690 Pediatric / Binocular Vision Specialty Clinic I	1		1

## Fourth Year

### Category 1 UMSL

Note: Must enroll in 8700, 8710 and 8720 concurrently

Semester	Credit Hours	Lecture	Lab
8700 UMSL Pediatric/ Binocular Vision Patient Care	3		6
8710 UMSL Contact Lens Patient Care	3		6
8720 UMSL Eye Health Management Patient Care	1		2

### Category 2 Institutional

Semester	Credit Hours	Lecture	Lab
8780 External Rotation in Institutional Patient Care	7		14

### Category 3 Ocular Disease

Semester	Credit Hours	Lecture	Lab
8790 External Rotation in Ocular Disease Patient Care	7		14

### Category 4 Intern

Semester	Credit Hours	Lecture	Lab
8730 Community Service Patient Care Rotation A	7		14
8750 Community Service Patient Care Rotation B	7		14
8760 Harvester Eye Center Patient Care	7		14
8770 Community Service Patient Care Rotation C	7		14

### Category 5 Specialty

Semester	Credit Hours	Lecture	Lab
8800 External Rotation in Pediatric/ Binocular Vision Patient Care	7		14

8810 External Rotation in Contact Lens Patient Care	7		14
8811 External Rotation in Ophthalmic Surgical Patient Care	7		14
8812 External Rotation in Geriatric Patient Care	7		14
8813 External Rotation in Ophthalmic Sports vision	7		14
8814 External Rotation In Primary Care	7		14
8815 External Rotation in Pathology and Treatment	7		14
8816 External Rotation in Ophthalmic Laser Treatment	7		14
8817 External Rotation in Rehabilitative Patient Care	7		14
8820 External Rotation in Low Vision Patient Care	7		14

### Category 6 Elective

Semester	Credit Hours	Lecture	Lab
8830 External Rotation in General Patient Care	7		14
8840 External Supplementary Rotation in General Patient Care	7		14
8850 Supplementary Rotation in General Patient Care	7		14

### Required Courses

Semester	Credit Hours	Lecture	Lab
8870 Practice Management IV	2	2	

8880 Clinical Seminar	1	1
-----------------------	---	---

Due to advances in the optometric profession, sequencing of courses may change. The courses listed above are subject to change through normal academic procedures.

Elective Courses in the College of Optometry

OPTOM 8400	Directed Readings	1-3
OPTOM 8410	Directed Research	1-3
OPTOM 8970	Geriatric Patient Care Delivery	3-6

# The Graduate School

The Graduate School of the University of Missouri-St. Louis serves over 3000 students in 30 master's programs and over 600 students in 14 doctoral programs by managing assistantship, fellowship, and research programs. Graduate School staff seek ways to enhance students' relationships with the university, from the time they are admitted until they graduate. To maintain quality, staff also assure that policies established by the graduate faculty are followed.

## Graduate Programs

<http://www.umsml.edu/divisions/graduate/future/index.html>

## Graduate School Policies

<http://bulletin.umsml.edu/generalregulations/graduatestudy/>

## Public Policy Administration

### General Information

The University of Missouri-St. Louis' Public Policy Administration (P P ADM) program has three components: the Master of Public Policy Administration (MPPA) degree program, the Nonprofit Management and Leadership Program (NPML), and the Local Government Partnership (LGP).

The Master of Public Policy Administration (MPPA) is an interdisciplinary program designed to prepare students for managerial and policy analysis positions in the public and nonprofit sectors or related organizations. The MPPA is part of the Public Policy Administration Program, an independent unit of the UMSL Graduate School, and is accredited by the Network of Schools of Public Policy, Affairs, and Administration (<http://nasppaa.org>) (NASPPAA).

### Mission Statement

The MPPA program educates students to become leaders in improving our communities and society and to make informed policy decisions. We use an interdisciplinary approach to prepare students for careers in public policy, public administration, and nonprofit administration.

In carrying out our **mission**, we embrace and enact these core values (**IDEAS**):

- **Integrity** - We promote ethical, deliberate, and transparent decision making
- **Diversity** - We promote inclusiveness and respect for a diversity of perspectives
- **Effectiveness** - We strive to create value in our communities and be good stewards of public and community resources
- **Accountability** - We strive to recognize and respond to the needs of our varied stakeholders
- **Service** - We promote the above values in order to exemplify the ideals of public service

In addition to the MPPA program, PPA offers Graduate Certificates in Nonprofit Management and Leadership, Local Government Management, and Policy and Program Evaluation.

A key strength of the program is the experienced faculty, who are all committed to the success of our students. Core faculty members hold joint appointments in public policy administration and related departments, such as economics, political science, and business administration. Adjunct instructors also have considerable professional, educational, and teaching experience and play an important role in connecting our students with the professional community.

The full facilities of Campus Computing and the Laboratory for Quantitative Analysis are available. UMSL is a member of the Inter-University Consortium for Political and Social Research, the Association for Public Policy & Management (APPAM), and is the only full-member of the Nonprofit Academic Centers Council (NACC) in the St. Louis region.

### Career Outlook

The current outlook for graduates of the interdisciplinary Master of Public Policy Administration Program is quite promising. Recent graduates of this program have taken positions as city managers, transportation planners, managers with local, regional, state, and federal agencies, and management positions in nonprofit organizations, such as development officers, volunteer managers, and executive directors.

### Admissions Requirements

Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

By the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission. Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration.

Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor. Written letters of recommendation must accompany the downloadable recommendation forms from the Graduate School. These materials should be sent by the letter writer directly to the MPPA program.

Applicants are required to submit a 2-3 page personal statement to demonstrate competence in writing. The statement should explain how the MPPA program fits in with the applicant's educational and professional goals. This personal statement should be sent directly to the MPPA program; the statement of purpose in the web-based admission application is not sufficient.

Applicants must submit official transcripts to the graduate admissions office documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

### Degree Requirements

The MPPA degree consists of 40 credit hours, 28 of which are taken as part of the core curriculum and 12 that are electives. Students who complete the degree must demonstrate the following:

- Design, research, write, and defend analyses of substantive public policy problems and/or potential solutions

- Use data and sophisticated analytic tools (qualitative and quantitative) to conduct research in public policy and administration
- Understand the policy and internal/external environments of public and nonprofit organizations
- Develop expertise in a substantive area of public policy administration

## Core Curriculum

All candidates for the MPPA degree must complete 28 hours in the core curriculum sequence composed of the following public policy administration courses:

### Policy Analysis and Economics

P P ADM 6000 (p. 544)	Introduction To Policy Analysis	3
P P ADM 6080 (p. 544)	Microeconomics For Policy Analysis	3
P P ADM 6210 (p. 544)	Public Sector Microeconomics	3
P P ADM 6900 (p. 544)	Cases In Public Policy Administration	3

### Public Administration and Budgeting

P P ADM 6400 (p. 544)	Proseminar In Public Administration	3
P P ADM 6600 (p. 544)	Organizational Behavior And Administrative Processes	3
P P ADM 6180 (p. 544)	Governmental Budgeting And Financial Control	3

### Statistics, Research Methods, and Information Technology

P P ADM 6010 (p. 544)	Introduction To Policy Research	3
P P ADM 6750 (p. 544)	Introduction To Evaluation Research Methods	3
P P ADM 6850 (p. 544)	Information Technology and The Public and Nonprofit Sectors	1

**Total Hours** **28**

A thesis is not required to complete the program. However, writing is an important component of the degree, and students will complete written analyses as part of their coursework and/or internship.

P P ADM 6000 (p. 544) should be taken at the beginning of the program. It is strongly recommended that P P ADM 6010 (p. 544) and P P ADM 6080 (p. 544) be taken early in a student's course plan. P P ADM 6900 (p. 544) is a capstone course and must be taken toward the end of the program.

Students may select one of four emphasis areas in which to concentrate their advanced studies:

1. Managing Human Resources and Organizations,
2. Policy Research and Analysis,
3. Local Government Management,
4. Nonprofit Organization Management.

Students may also select an individualized emphasis area in consultation with their advisor and with approval of the Director.

Prior to the completion of 15 hours in the MPPA program, students should identify an emphasis area. In each of the emphasis areas students may be

able to substitute another course for a specified elective, with the MPPA Director's approval. Specific requirements for each emphasis area are as follows:

### Managing Human Resources and Organizations

#### a. Required

P P ADM 6490 (p. 544)	Human Resources In The Public Sector	3
--------------------------	--------------------------------------	---

#### b. Electives

Select three of the following: **9**

ECON 5400 (p. 544)	Labor Economics: Theory And Public Policy	
MGMT 5611 (p. 544)	Advanced Organizational Behavior And Administrative Processes	
MGMT 5622 (p. 544)	Union-Management Relations And Collective Bargaining	
MGMT 5625 (p. 544)	Selected Topics In Human Resource Management	
P P ADM 6500 (p. 544)	Selected Topics in Public Policy Administration (when topic is relevant to Human Resource and Organized Behavior)	
P P ADM 6680 (p. 544)	Negotiating Workplace Conflict	
P P ADM 6950 (p. 544)	Internship (in assignment relevant to emphasis area)	
POL SCI 3470 (p. 544)	Collective Bargaining	

**Total Hours** **12**

### Policy Research and Analysis

#### a. Required

POL SCI 6402 (p. 544)	Intermediate Techniques In Policy Research	3
or ECON 4100 (p. 544)	Introduction To Econometrics	

#### b. Electives

Select three of the following: **9**

POL SCI 6403 (p. 544)	Advanced Techniques In Policy Research	
or ECON 4110 (p. 544)	Applied Econometrics	
ECON 4160 (p. 544)	Geospatial Analysis In The Social Sciences	
ECON 4170 (p. 544)	Fundamentals Of Cost-Benefit Analysis	
ECON 4550 (p. 544)	Natural Resource Economics	
ECON 5400 (p. 544)	Labor Economics: Theory And Public Policy	
ECON 5640 (p. 544)	Transportation Economics	
ECON 5700 (p. 544)	Urban and Real Estate Economics	
ECON 5720 (p. 544)	Real Estate Economics	

ECON 5760	Health Economics	(p. 544)
ECON 5900	Advanced Topics In Economic Analysis	(p. 544)
POL SCI 6404	Multi-Method Research Design	(p. 544)
POL SCI 6422	Law, Courts And Public Policy	(p. 544)
POL SCI 6444	Seminar In Public Policy And Aging	(p. 544)
POL SCI 6452	Public Policy Of Conservation And Sustainable Development	(p. 544)
SOC 4040	Survey Research Practicum for Sociology	(p. 544)
SOC WK/ POL SCI 6443	Health Care Policy	(p. 544)
P P ADM 6950	Internship (in assignment relevant to the emphasis area)	(p. 544)

**Total Hours** **12**

#### Local Government Management

##### a. Required <sup>1</sup>

P P ADM 6340	Seminar In City Administration	3
(p. 544)		
or P P ADM 6350	Issues In Urban Management	
(p. 544)		
POL SCI 6470	Proseminar In Urban Politics	3
(p. 544)		
or POL SCI 6471	Seminar In Urban Politics	
(p. 544)		

##### b. Electives <sup>2</sup>

Select two of the following: **6**

P P ADM 6300	Leadership and Management in Nonprofit Organizations	
(p. 544)		
P P ADM 6340	Seminar In City Administration	
(p. 544)		
P P ADM 6350	Issues In Urban Management	
(p. 544)		
P P ADM 6490	Human Resources In The Public Sector	
(p. 544)		
P P ADM 6510	Urban And Regional Planning And Public Policy	
(p. 544)		
P P ADM 6680	Negotiating Workplace Conflict	
(p. 544)		
P P ADM 6950	Internship (in assignment relevant to emphasis area)	
(p. 544)		
ECON 4160	Geospatial Analysis In The Social Sciences	
(p. 544)		
ECON 5510	Public Choice	
(p. 544)		
ECON 5700	Urban and Real Estate Economics	
(p. 544)		
POL SCI 4460	Urban Planning And Politics	
(p. 544)		

POL SCI 6470	Proseminar In Urban Politics	(p. 544)
POL SCI 6471	Seminar In Urban Politics	(p. 544)
<b>Total Hours</b>		<b>12</b>

- For Local Government Management specialization, a course not taken to fulfill the "required 6 hours" may be taken as an elective.
- NOTE: Students interested in careers in local government management are strongly encouraged to take P P ADM 6490 (p. 544), Human Resources in the Public Sector, as one of their electives.

#### Nonprofit Organization Management and Leadership

##### a. Required

P P ADM 6300	Leadership and Management in Nonprofit Organizations	3
(p. 544)		
P P ADM 6310	American Philanthropy and Nonprofit Resources Development	3
(p. 544)		
P P ADM 6311	Staff Management Issues in Nonprofit Organizations	1
(p. 544)		
P P ADM 6312	Legal Issues in Managing Nonprofit Organizations	1
(p. 544)		
P P ADM 6313	Financial Issues In Managing Nonprofit Organizations	1
(p. 544)		

##### b. Electives

Select one of the following:		3
ACCTNG 3451	Accounting For Governmental And Not-For-Profit Entities	
(p. 544)		
BUS AD 5100	Managerial Communication	
(p. 544)		
BUS AD 5900	Law, Ethics And Business	
(p. 544)		
MKTG 5700	Contemporary Marketing Concepts	
(p. 544)		
P P ADM 6490	Human Resources In The Public Sector	
(p. 544)		
P P ADM 6501	Selected Topics in Nonprofit Management and Leadership	
(p. 544)		
P P ADM 6550	Strategic And Program Planning For Non Profit Organizations	
(p. 544)		
P P ADM 6680	Negotiating Workplace Conflict	
(p. 544)		
P P ADM 6950	Internship (in assignment relevant to the emphasis area)	
(p. 544)		
PSYCH 7412	Social Psychology	
(p. 544)		

**Total Hours** **12**

#### Individualized Emphasis Area

Prior to the completion of 15 hours in the MPPA program, the student must present a proposal for 12 hours of specific coursework for approval by the MPPA faculty. The 12 hours must include P P ADM 6950 (p. 544), Internship (in an assignment relevant to the emphasis area) unless the student has significant public or nonprofit sector experience.

## Internships

An internship is required for students without substantial experience in the public or nonprofit sectors. Interns may be placed in planning agencies, city managers' offices, administrative departments, or nonprofit agencies. Credit is granted after successful completion of the internship and a written paper at the end of the semester.

MPPA students currently employed in public agencies or nonprofit organizations can receive 3 hours of credit for internships with their employer. To do so, students must develop, in consultation with their advisors, special research projects outside the scope of their regular employment duties.

Students who have significant relevant experience in the public or nonprofit sector may request that the internship requirement be waived. To request a waiver, students must submit a written request outlining the student's professional or managerial field experience with appropriate documentation. Any request for a waiver from the internship requirement must be approved by the program director. Students who receive a waiver must take an additional 3 hours of electives in lieu of the internship.

## BSPPA/MPPA 2+3 Program in Public Policy Administration

The BSPPA / MPPA 2+3 program is an accelerated program that allows outstanding BSPPA students to complete a baccalaureate degree and Master of Public Policy Administration (MPPA) degree in five years. The program allows students to apply 12 of the MPPA credit hours towards the BS, reducing the overall required hours for the two degrees from the standard 160 – 120 for the BS plus 40 for the MPPA – to 148 hours.

## Core Curriculum

All candidates for the MPPA degree must complete 28 hours in the core curriculum sequence composed of the following public policy administration courses:

### Policy Analysis and Economics

P P ADM 6000 (p. 544)	Introduction To Policy Analysis	3
P P ADM 6080 (p. 544)	Microeconomics For Policy Analysis	3
P P ADM 6210 (p. 544)	Public Sector Microeconomics	3
P P ADM 6900 (p. 544)	Cases In Public Policy Administration	3

### Public Administration and Budgeting

P P ADM 6180 (p. 544)	Governmental Budgeting And Financial Control	3
P P ADM 6400 (p. 544)	Proseminar In Public Administration	3
P P ADM 6600 (p. 544)	Organizational Behavior And Administrative Processes	3

### Statistics, Research Methods, and Information Technology

P P ADM 6010 (p. 544)	Introduction To Policy Research	3
P P ADM 6750 (p. 544)	Introduction To Evaluation Research Methods	3

P P ADM 6850 (p. 544)	Information Technology and The Public and Nonprofit Sectors	1
<b>Total Hours</b>		<b>28</b>

A thesis is not required to complete the program. However, writing is an important component of the degree, and students will complete written analyses as part of their coursework and/or internships.

## Electives

Twelve credit hours are taken as electives based on a student's interest. The electives are organized into emphasis areas, listed above in the MPPA program.

For each student in this program, the MPPA Director and the BSPPA Advisor in the Department of Political Science, will jointly identify and approve four MPPA courses (totaling 12 credits) that cover, at a more advanced level, undergraduate courses that would otherwise be taken for the BSPPA degree. These courses will substitute for (and should not duplicate) BSPPA courses, and will count toward completion of both BSPPA and MPPA requirements.

Degree requirements remain the same for the two degrees, but students admitted into this accelerated program will be able to earn 12 graduate credits prior to completing their undergraduate degrees. Upon completion of 120 credit hours (including all other undergraduate degree requirements) the BSPPA degree will be awarded.

## Admission Requirements

BSPPA majors must have completed between 60 and 108 credit hours before applying for admission into this dual degree program. It is recommended that applicants apply after completing 90 credit hours. Applicants must have a minimum 3.0 overall GPA as well as a minimum 3.0 GPA in the major. Applications will be submitted to the Master of Public Policy Administration program and decisions will be made by the director in consultation with the BSPPA advisor in the Department of Political Science. Applicants must demonstrate proficiency in college algebra or equivalent. The application must be accompanied by three letters of recommendation, including one from a current, full-time faculty member, and by a two- to three-page statement explaining how the BSPPA/MPPA program fits in with the applicant's educational and professional goals.

## Graduate Certificate Program in Nonprofit Organization Management and Leadership (NPML)

Through the Public Policy Administration Program, UMSL offers the Graduate Certificate in Nonprofit Organization Management and Leadership for students who are current professional staff, board members, and other leaders of nonprofit and voluntary organizations, as well as those who plan to work in the field. The NPML certificate is the only nonprofit program in the St. Louis region that has full membership in the Nonprofit Academic Centers Council (NACC). The certificate can be taken by itself or in conjunction with the Master of Public Policy Administration degree or a graduate degree in another field. Course credits earned in the certificate program can be applied to the MPPA, but a separate application is required.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and**

**other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/BpC>.

The graduate certificate in nonprofit management and leadership requires the completion of 18 credit hours. Nine of these are the following core courses:

P P ADM/SOC WK 6300	Leadership and Management in Nonprofit Organizations	3
P P ADM/SOC WK 6310	American Philanthropy and Nonprofit Resources Development	3
P P ADM/SOC WK 6311	Staff Management Issues in Nonprofit Organizations	1
P P ADM/SOC WK 6312	Legal Issues in Managing Nonprofit Organizations	1
P P ADM/SOC WK 6313	Financial Issues In Managing Nonprofit Organizations	1
<b>Total Hours</b>		<b>9</b>

Six hours of electives are to be taken from approved courses in accounting, business administration, economics, management, marketing, political science, psychology, public policy administration, and sociology. A student may choose among these courses or other courses approved by the program director.

Three hours of internship are also required, or graduate students should demonstrate the equivalent professional field experience. Any request for an exemption from the internship requirement must be approved by the nonprofit program director after a review of the student's professional or managerial field experience with appropriate documentation. Students who receive an exemption must take another 3 hours of electives from the selection in section B (below).

The internship will include learning activities in management and governance processes in nonprofit organizations, as well as a seminar in which students will critically reflect on their field experience with a faculty supervisor.

Requirements for admission to the graduate certificate program include an undergraduate degree and a GPA of 3.0 or better. Applicants must obtain two letters of recommendation. At least one of the letters must be from a current or former college-level instructor. The letters should be sent directly to the NPML office.

## Graduate Certificate Program in Local Government Management

The Graduate Certificate in Local Government Management is designed for current professional staff, elected or non-elected local government officials, and those who are interested in pursuing a career in the local government sector. The certificate can be taken by itself or in conjunction with the Master of Public Policy Administration degree or other graduate degree. A separate application for the certificate program may be required when students in a degree program wish to incorporate the certificate program.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/BpC>.

The graduate certificate in local government management requires the completion of 18 credit hours. Twelve of these are the following core courses:

P P ADM 6180	Governmental Budgeting And Financial Control	3
P P ADM 6340	Seminar In City Administration	3
or P P ADM 6350	Issues In Urban Management	
P P ADM 6490	Human Resources In The Public Sector	3
POL SCI 6470	Proseminar In Urban Politics	3
or POL SCI 6471	Seminar In Urban Politics	
<b>Total Hours</b>		<b>12</b>

Three hours of electives are to be taken from selected courses in, business administration, criminal justice, economics, political science, public policy administration, and sociology. A student may choose among these courses or other courses approved by the program director. Electives will be chosen from the following:

Select one of the following: <sup>1</sup>		3
CRIMIN 6442	Communities And Crime	
ECON 4160	Geospatial Analysis In The Social Sciences	
ECON 5700	Urban and Real Estate Economics	
POL SCI 6470	Proseminar In Urban Politics	
POL SCI 6471	Seminar In Urban Politics	
P P ADM/SOC WK 6300	Leadership and Management in Nonprofit Organizations	
P P ADM 6340	Seminar In City Administration	
P P ADM 6350	Issues In Urban Management	
P P ADM 6400	Proseminar In Public Administration	
P P ADM 6510	Urban And Regional Planning And Public Policy	
P P ADM 6600	Organizational Behavior And Administrative Processes	
P P ADM 6680/MGMT 5612	Negotiating Workplace Conflict	
<b>Total Hours</b>		<b>3</b>

Three hours of internship or equivalent professional experience are also required but may be waived. Any request for an exemption from the internship requirement must be approved by the local government program director after a review of the student's professional or managerial field experience with appropriate documentation. Students who receive an exemption must take another three hours of electives from courses listed in section 2 (above). The internship will include learning activities in management and governance processes in local government jurisdictions, as well as a seminar in which students will critically reflect on their field experience with a faculty supervisor.

<sup>1</sup> Other courses may be added as advisors deem appropriate for content.

Requirements for admission to the graduate certificate program include an undergraduate degree and a GPA of 3.0 or better. Applicants must obtain two letters of recommendation. At least one of the letters must be from a current or former college-level instructor. Applicants must submit a two-page personal statement explaining how the certificate program fits in with the applicant's educational and professional goals. The letters

and the personal statement should be sent directly to the Public Policy Administration Program.

## Graduate Certificate Program in Policy and Program Evaluation

The Graduate Certificate in Policy and Program Evaluation (PPE) provides students the opportunity to gain expertise in policy and program evaluation methods, including completion of an applied evaluation project. In addition to the public and nonprofit sectors, the certificate is appropriate for individuals in disciplines such as education, economics, gerontology, social work, and sociology who need to conduct assessments of the programs for which they are responsible.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://www.umsi.edu/divisions/graduate/Graduate%20Programs/gedt-002519-44.0501.htm>

This program consists of a six-course sequence (18 credits): 4 required courses (12 credits) and 2 electives (6 credits). The Certificate may be taken by non-degree students or in conjunction with 1) the Master's in Public Policy Administration degree program; 2) the Master's in Social Work/Master's in Gerontology degree programs; or 3) the Master's in Economics.

Students with sufficient job experience in program/policy evaluation may submit a written request to waive the Applied Evaluation Project requirement. If granted, this requirement will be replaced with a three-credit elective.

Students pursuing a graduate degree along with the certificate should check with their graduate advisor regarding which courses will also count towards their degree.

A maximum of two courses at the 4000 level can count towards the Certificate.

At least 12 of the 18 credits must be taken in residence at UMSL.

Required Courses:		12
P P ADM 6000	Introduction To Policy Analysis	3
P P ADM 6010	Introduction To Policy Research	3
or SOC WK 5450	Social Work Research Methods And Analysis II	
or ECON 4100	Introduction To Econometrics	
or ECON 5100	Econometric Theory and Methods	
P P ADM 6750	Introduction To Evaluation Research Methods	3
or SOC WK 6400	Practice And Program Evaluation	
P P ADM 6950	Internship (which must include an evaluation project) <sup>1</sup>	3
or P P ADM 6751	Applied Evaluation Project

<sup>1</sup> SOC WK 6800 or SOC WK 6850 must include an evaluation project.

<sup>2</sup> This course may count for credit toward the certificate when it is offered as "Gender, Ethnicity, and Welfare States."

Requirements for admission to the graduate certificate program include an undergraduate degree and a GPA of 3.0 or better. Applicants must obtain two letters of recommendation. Applicants must submit a personal statement explaining how the certificate program fits in with the applicant's educational and professional goals. The letters and the personal statement should be sent directly to the Public Policy Administration Program.

## Courses

**P P ADM 6000 Introduction to Policy Analysis: 3 semester hours**  
Same as POL SCI 6410. Systematic development of a critical/analytic base for dealing with public policy.

**P P ADM 6010 Introduction to Policy Research: 3 semester hours**  
Same as POL SCI 6401. Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

**P P ADM 6080 Microeconomics for Policy Analysis: 3 semester hours**  
Same as ECON 5010. Prerequisite: Graduate student standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields.

***P P ADM 6150 Directed Readings and Research in Public Policy: 1-10 semester hours***

Same as POL SCI 6415. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

***P P ADM 6180 Governmental Budgeting and Financial Control: 3 semester hours***

Same as BUS AD 5450. Prerequisite: ACCTNG 5400 a study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

***P P ADM 6210 Public Sector Microeconomics: 3 semester hours***

Same as ECON 5500. Prerequisites: ECON 3001 or BUS AD 5001 or P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost/benefit analysis.

***P P ADM 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours***

Same as POL SCI 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

***P P ADM 6310 American Philanthropy and Nonprofit Resources Development: 3 semester hours***

Same as SOC WK 6310. Prerequisites: Graduate Standing Required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

***P P ADM 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour***

Same as SOC WK 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff' legal issues that affect these processes.

***P P ADM 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour***

Same as SOC WK 6312. Prerequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

***P P ADM 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour***

Same as SOC WK 6313. Prerequisite: Graduate standing required. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

***P P ADM 6340 Seminar in City Administration: 3 semester hours***

This course provides an overview of the working environment of a city administrator and is jointly sponsored by the local city managers association. Professional city personnel make presentations to the students on six major topics: political structure, organizational structure, service delivery, finance, personnel policies and practices, and leadership. The course provides direct observation of city council meetings, visits to various city facilities, exposure to different philosophies and styles of city management, and provides students a chance to assemble facts, evaluate options, and present policy recommendations for real problems that local administrators face.

***P P ADM 6350 Issues in Urban Management: 3 semester hours***

Designed to evaluate management issues that confront managers in local government from a political perspective. The format will include an intense review and discussion of original case studies from actual local government situations. The specific focus of this course will vary. Course may be repeated.

***P P ADM 6400 Proseminar in Public Administration: 3 semester hours***

Same as POL SCI 6440. Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impact. Specific topics may include administrative accountability, inter-governmental relations, public private interaction, implementation processes, bureaucratic expertise, the legal environment of public administration, and public service and merit issue.

***P P ADM 6430 Health Care Policy: 3 semester hours***

Same as GERON 6443, POL SCI 6443, and SOC WK 6443. Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

***P P ADM 6444 Seminar in Public Policy and Aging: 3 semester hours***

Same as GERON 6444 and POL SCI 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

***P P ADM 6460 Selected Topics in Health Care Policy: 3 semester hours***

Same as POL SCI 6446. Prerequisite: consent of instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

***P P ADM 6470 Proseminar in Urban Politics: 3 semester hours***

Same As: POL SCI 6470. Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

**P P ADM 6471 Seminar In Urban Politics: 3 semester hours**

Same As: POL SCI 6471. Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

**P P ADM 6490 Human Resources in the Public Sector: 3 semester hours**

Same as POL SCI 6449 and SOC WK 6449. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

**P P ADM 6500 Selected Topics in Public Policy Administration: 3 semester hours**

Prerequisites: Graduate Standing. Permission of instructor may be required. A seminar of selected issues and methods relating to public policy administration. May be repeated for credit, provided the subject matter is different.

**P P ADM 6501 Selected Topics in Nonprofit Management and Leadership: 3 semester hours**

Prerequisites: Graduate standing. Permission of instructor may be required. A seminar of selected issues and methods relating to nonprofit management and leadership. May be repeated for credit, provided the subject matter is different.

**P P ADM 6510 Urban and Regional Planning and Public Policy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. This course focuses on the interdependent processes of urbanization and public policy. Students will acquire an understanding of urban planning and public policy processes in North America.

**P P ADM 6550 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and SOC WK 6491. Prerequisite: Graduate Standing or Consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**P P ADM 6600 Managing People in Organizations: 3 semester hours**

Same as MGMT 5600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**P P ADM 6680 Negotiating Workplace Conflict: 3 semester hours**

Same as MGMT 5612. Prerequisites: P P ADM 6600 / MGMT 5600 and Graduate Standing. Examines conflict and cooperation between individuals, groups and organizations over the control of work. A central theme is how this conflict is expressed, controlled, and resolved. Students will participate in exercises to learn the basics of two-party negotiations.

**P P ADM 6750 Introduction to Evaluation Research Methods: 3 semester hours**

Prerequisites: At least one course in research design and statistics at the graduate level. A comparative study of research strategies with regard to data sources, data collection, and modes of analysis that are appropriate for program evaluation research. Attention is given to observational, survey, and quasi-experimental methodologies.

**P P ADM 6751 Applied Evaluation Project: 3 semester hours**

Prerequisites: P P ADM 6000, P P ADM 6010 or equivalents, P P ADM 6750 or equivalents. Independent study involving an evaluation project with an appropriate public or private or nonprofit agency.

**P P ADM 6800 Management Information Systems: 3 semester hours**

Same as INFSYS 5800. This course provides an overview of the established and contemporary issues related to information systems within organizations. Topics include the practices and tools associated with topics such as the management of IS-based investment projects, the design and implementation of IS, the alignment of IS strategy with organizational strategy, information security and privacy, and gaining a competitive advantage through IS.

**P P ADM 6850 Information Technology and the Public and Nonprofit Sectors: 1 semester hour**

Prerequisite: Graduate Standing. This course addresses information technology in the public sector from a managerial perspective. Course goals include an increase in student's knowledge and understanding of basic hardware, software, data, and information management issues from a managerial perspective. These topics include, but are not limited to: web portal design, geographic information systems, database management, e-government, strategic design, and the use of information technology to address public policy questions.

**P P ADM 6900 Cases in Public Policy Administration: 3 semester hours**

Prerequisites: 24 hours of public policy administration courses, at least 15 of which are in core courses. This capstone course intensively analyzes public policy administration cases drawn from a variety of issues and settings.

**P P ADM 6950 Internship: 3 semester hours**

Independent study involving work with an appropriate public or private or nonprofit agency.

## Graduate Certificate in Cybersecurity

Information security is currently one of the most critical issues facing individuals, organizations, governments, and society. Media reports are replete with breaches of information security and the adverse consequences for all stakeholders involved. Thus, demand for professionals who understand the managerial and technical aspects of information security is growing. However, security is a rather broad field and includes a plethora of interconnected sub-specialties. Students or professionals seeking an entry into this field are often overwhelmed by its vastness. Further, since security is both a management issue and a technological issue, it is critical that students think about it from both perspectives and develop skills at their intersection.

This multidisciplinary certificate program is designed for students from diverse backgrounds who wish to get a foundation in information security. Given its flexible structure, it allows students to pursue either more technical courses throughout their program or have a mixture of technical and non-technical courses to match their interests and skill-sets.

For more information, please visit <http://cybersecurity.umsl.edu> or contact the program directors at [cybersecurityUMSL@umsl.edu](mailto:cybersecurityUMSL@umsl.edu).

Admissions Requirements

Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

By the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission. Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration.

Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor. Written letters of recommendation must accompany the downloadable recommendation forms from the Graduate School. These materials should be sent by the letter writer directly to the Cybersecurity program director of either Computer Science or Information Systems.

Applicants must submit official transcripts to the graduate admissions office documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

The Graduate Certificate in Cybersecurity is a six-course (18 credit hours) multidisciplinary program housed in the Graduate School. It is designed to help students from all backgrounds achieve a foundation in information security. It provides students the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with a bachelor's degree. A prior background in information security is not required to enter this program.

Requirements

(Pending CBHE approval)

All students must take three required courses and three electives (at least one elective course must be in Computer Science).

Required Courses

INFSYS 6828	Principles of Information Security	3
CMP SCI 4730	Computer Networks and Communications	3
or INFSYS 6836	Management of Data Networks and Security	
CMP SCI 5782	Advanced Information Security	3
or INFSYS 6858	Advanced Cybersecurity Concepts	

Electives

Choose three of the following (at least one must be a CMP SCI course):	9
--	---

CMP SCI 4700	Computer Forensics
CMP SCI 4780	Computer and Network Security
CMP SCI 5750	Cloud Computing
INFSYS 6868	Software Assurance
INFSYS 6878	Management of Information Security

CMP SCI 5020 Android Apps: Android Fundamentals	
CMP SCI 5222 Advanced iOS Apps	
<b>Total Hours</b>	<b>18</b>

Students may substitute the above courses with other courses upon approval by the graduate program director of either the Computer Science or Information Systems Department. In all cases, 18 hours are needed to complete the Graduate Certificate in Cybersecurity.

A maximum of two (2) 4000-level courses can be taken as part of the graduate certificate. A minimum of four courses must be taken in residence at UMSL. Students may not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at [cybersecurityUMSL@umsl.edu](mailto:cybersecurityUMSL@umsl.edu).

# Pierre Laclede Honors College

The Pierre Laclede Honors College mission is to enrich the educational experience of a select group of highly motivated and intelligent undergraduates. With this in mind, it enrolls students who are ready to accept academic challenges and become creatively involved in the learning process.

The college has a unique structure and identity. Unlike the university's other colleges, it has no academic departments and it grants no degrees. Instead, it brings together a cross section of students and teachers in a special curriculum, designed to meet a portion of the students' general education and various other requirements. Programs are available to four-year and transfer students, and successful completion of the program requirements results in earning the honors certificate upon graduation.

The four year program is open to entering freshmen and extends over a student's entire undergraduate career.

The two year program is open to select third year students who are either continuing at or have transferred to the university, and a two-plus program is available for transferring sophomores.

Honors College courses are generally taught seminar style, with a stress on reading, small group discussion, and writing.

Honors College students are highly qualified and motivated individuals from a broad range of public and private secondary schools and colleges. They enter the college with diverse backgrounds and interests and remain part of it while simultaneously enrolling in classes and pursuing bachelor's degrees in other academic divisions of the university.

Most honors students major in traditional liberal arts disciplines spanning the humanities, social sciences, mathematics, and natural sciences, but well over a third use their undergraduate education to prepare for careers in business, education, nursing, or engineering. Most Honors College students plan to go on to graduate study or professional schools, although a significant number successfully seek employment immediately after graduation. Honors faculty and staff provide advice and guidance in both course choice and career plans.

## The Honors College Writing Program

Both two- and four-year programs include participation in the Honors College writing program, writing through the curriculum, which involves writing in most honors seminars, as well as formal courses in composition (including HONORS 1100 and HONORS 3100 or HONORS 3160). In the final year, this culminates in the compilation of a personal Honors College writing portfolio (HONORS 4100).

## Independent Study Requirement

All Honors College students, whether in the four-year or the two-year program, must fulfill a 6-credit-hour independent study requirement. This can be met in several ways, including supervised research, guided reading, internships, and in many cases capstone courses in the major.

## Faculty Overview

Honors College instructors are drawn from university faculty in all academic divisions but mainly from the "traditional disciplines" of the Arts, Humanities, Social Sciences, and Sciences. These teachers share a

desire to work closely with intellectually curious, high-achieving students. Faculty design courses directed toward such an audience and based on small discussion seminars. Thus the honors faculty grows each year as new faculty join the honors project. Their talents add to the Honors College's rich instructional pool of more than 100 regular and full-time faculty, many of whose teaching and scholarship have been singled out for special awards.

In addition, the Honors College has seven full-time academic faculty members whose responsibilities (besides instruction) include admissions, student advising, and curricular design.

## Honors College Certificate

### Four Year Program (40 credit hours total):

Approximately one-third of the 120 hours honors students earn toward graduation are taken in the Honors College. Most of these credits are associated with a sequence of honors courses designed specifically for the college, the majority of which are taken during the first two years. During this period, these students fulfill virtually all of the university's general education requirements (p. 34), usually in innovative ways. In their junior and senior years, honors students also may earn honors credit for work done within their major fields, work which includes the possibility of internships, independent study projects, and advanced undergraduate research.

### First Year

Students take HONORS 1100, HONORS 1200, and HONORS 1201, and one course each from the Western Traditions and Non-Western Traditions seminar series. Students may take a seminar from the American Traditions series as an elective or in place of the Western Traditions seminar.

HONORS 1110	Western Traditions: Humanities	3
HONORS 1200	Freshman Symposium: Cultural Traditions I	3
HONORS 1201	Freshman Symposium: Cultural Traditions II	3
HONORS 1130	Western Traditions: Social And Behavioral Sciences	3
HONORS 1230	American Traditions: Social And Behavioral Sciences <sup>1</sup>	3
HONORS 1310	Non-Western Traditions Series Humanities	3
HONORS 1330	Non-Western Traditions Series-Social Sciences	3

<sup>1</sup> Elective as an alternate to Western Traditions.

### Second Year

Students take two of the following Honors classes:

HONORS 2010	Inquiries In The Humanities	3
HONORS 2020	Inquiries In The Fine And Performing Arts	3
HONORS 2030	Inquiries In The Social And Behavioral Sciences	3
HONORS 2050	Inquiries In The Natural Sciences	1-3
HONORS 2060	Inquiries In Business	3
HONORS 2070	Inquiries In Education	3
HONORS 2071	Inquiries in Education	4
HONORS 2080	Inquiries In Nursing	3

During the first two years, honors students will take additional course work in other areas, such as mathematics, natural science, foreign language,

and major prerequisite classes to satisfy various university, Honors College, and specific degree requirements.

### Third and Fourth Years

Honors students in the four-year program take at least four seminars (12 credit hours) from the Advanced Seminar (3000 level series) and/or Research Seminar (HONORS 3530 or HONORS 3535). They may take more where this is compatible with their major and/or minor requirements. Honors students in the four year program who take HONORS 3100 ("Writing the City") or HONORS 3160 ("Writing in the Sciences") may present it for their honors certificate as one of their 3000-level seminars. They may also, depending on their major, present it to meet their graduation requirement for Junior-level composition.

HONORS 3010	Advanced Honors Seminar In The Humanities	3
HONORS 3020	Advanced Honors Seminar In The Fine And Performing Arts	3
HONORS 3030	Advanced Honors Seminar In The Social And Behavioral Sciences	3
HONORS 3100	Honors Advanced Composition: Writing The City	3
HONORS 3160	Honors Writing In The Sciences	3
HONORS 3530		3
HONORS 3535		4

In addition, honors students do 6 credit hours in independent study projects, normally in or closely related to their major field. These independent study projects normally carry credit in the major, but can be done as Honors College independent study or research projects (HONORS 4900, HONORS 4910, HONORS 4915). During the final year, students also take HONORS 4100, a one-hour capstone for the Honors College writing program; HONORS 4100 may be taken for two hours.

### Two year Program (22 credit hours total):

Students in this program will take a combination of Honors College seminars and honors independent study credit (usually for work done in their major fields). The 22 credit hours must include 6 credits of independent study, as for the four-year program.

#### Third Year

During the first year of the two-year program, students take three honors seminars, including HONORS 3100 (p. 553), Writing the City or HONORS 3160 (p. 553), Writing in the Sciences; one course from the Inquiries series (2000 level); one course from either the Advanced Seminar (3000 level) or Research Seminar (HONORS 3530 (p. 553) or HONORS 3535 (p. 553)). In addition, 3 credit hours of independent study may be taken during this year, normally in or closely related to their major.

#### Fourth Year

The final year of the two-year program involves three courses chosen from the 3000 and 4000 level options, including HONORS 4100 (p. 553), the honors writing portfolio, and at least one course chosen from the 3000 level. In addition, students will complete their independent study requirements with 3 or 6 hours of project, internship, or research work.

### Honors and Nursing; Honors and Engineering

Because of the extensive professional requirements for both Nursing and Engineering, the Honors College has, with the support of the relevant

faculties, created special programs for Nursing and Engineering majors who wish to pursue the Honors College certificate. Both programs feature reduced Honors College credit hour requirements but retain the core of the Honors program and give students ample opportunities to experience interdisciplinary inquiry, seminar-based learning, and take part in the Honors College Writing Program.

### Honors and the Bachelor of Liberal Studies (BLS)

Pierre LaCade Honors College students who wish to present the honors Certificate as a minor for the BLS must complete the Honors Capstone (HONORS 4100, one or two credit hours) and also direct three to six hours of their Honors independent study requirement as part of their BLS program. Students should consult the BLS faculty advisor in the Honors College about this requirement, as well as an Arts and Sciences advisor.

### Pierre LaCade Honors College Student Learning Outcomes.

Both four- and two-year programs share the same learning agendas:

- Through coursework comparing and contrasting diverse cultural viewpoints, academic disciplinary approaches and information, Honors students will demonstrate the ability to synthesize knowledge from various perspectives.
- Honors students will exhibit the ability to communicate effectively in speech and writing:
  - by speaking in groups to present, reflect on and evaluate information and perspectives.
  - by completing the written assignments required in all Honors courses that focus on various perspectives, audiences and disciplinary approaches(demonstrating effective writing that employs correct diction, syntax, usage, grammar and mechanics.
- Honors students will demonstrate skills in higher-order thinking, valuing and managing information:
  - by exhibiting the ability to distinguish among opinions, facts and inferences; by identifying underlying or implicit ins assumptions; by making informed judgments; and by solving problems through applying evaluative standards.
  - by locating, accessing, synthesizing and annotating information from print, electronic, and other sources; by distinguishing between scholarly and non-scholarly sources in preparation for higher-order thinking.
  - by analyzing and synthesizing information from a variety of sources, applying the results to resolving complex situations and problems, and defending conclusions using relevant evidence and reasoned argument.
  - by utilizing cultural, behavioral, and historical knowledge to clarify and articulate a personal value system while recognizing the ramifications of personal value decisions on the self and others.
  - by identifying conflicts within and between multiple perspectives and value systems; by recognizing and analyzing ethical issues in a variety of contexts; and by employing standards of logic to formulate a reasonable position among multiple perspectives.
- Honors students will select and participate in Honors courses in various disciplines and will demonstrate essential skills and approaches relevant to those disciplines: Students participating in Honors courses in disciplines such as the social sciences, life and physical sciences that rely upon the understanding of fundamental mathematical concepts and their applications will display a level of

quantitative literacy that would enable them to understand and analyze quantitative data, draw conclusions, and solve problems.

- Students participating in Honors courses in the social and behavioral sciences will exhibit understanding of themselves and the world around them through the study of the content and methodologies used by historians and social and behavioral scientists to discover, describe, explain, and predict human behavior and social systems; they will demonstrate understanding of the diversities and complexities of the cultural and social world, past and present, and come to an informed sense of self and others.
- Students participating in Honors courses in the humanities and fine arts will exhibit understanding and critical analysis of the ways in which people have addressed their condition through literature and art; they will demonstrate their understanding of these cultural works and their historical circumstances; they will formulate aesthetic judgments of these works.
- Students participating in Honors courses focusing on life and physical sciences will demonstrate knowledge of scientific principles, research procedures and empirical methods of scientific enquiry; they will display their understanding of how scientific discoveries affect and are affected by theoretical views of the world and human history.
- Honors students will complete specific Honors requirements designed to develop their awareness of career and advanced study opportunities:
  - by participating in internships, independent study and undergraduate research to develop and demonstrate advanced knowledge in a discipline, professional skills, and greater understanding of career and educational goals.
  - by creating an Honors Writing Portfolio that demonstrates the ability to assess their writing skills and development; by devising and revising documents for employment searches or graduate school applications to enhance their ability to formulate and pursue specific career goals.

## Other Academic Features and Requirements

### Satisfactory/Unsatisfactory

The satisfactory/unsatisfactory option does not apply to any course work undertaken for Honors College credit.

### Admission and Retention

To be considered for admission to either the two-year or four-year honors program, a candidate must file a special Honors College application, as well as a general university application. These application forms and additional information concerning scholarship awards, general eligibility guidelines, and the admissions process are available from the Honors College admissions office at (314) 516-7769 or from the University Admissions. See also the Honors College website.

### Scholarships

Every new freshman or transfer student admitted in good standing to the Honors College receives academic scholarship support. Students continue to receive these awards as long as they meet the criteria associated with their particular scholarship.

Good academic standing To remain in good standing, a student must maintain a cumulative GPA, in all his or her UMSL courses, of at least 3.2, and must continue to meet the requirements of the honors program for which he or she was initially admitted. Unless other arrangements have

been made, Honors College students are also expected to be full time, that is, to register for and satisfactorily complete at least 12 credit hours per semester. Students wishing to enter the Honors College as part-time students or to change to part-time status must make prior arrangements with the Honors College dean or associate dean.

## UMSL: An Urban Land Grant Institution

Given its location in St. Louis, and because it is part of an urban land grant university, Pierre Laclede Honors College seeks to encourage awareness of the manifold benefits of pursuing an undergraduate education in a dynamic and varied urban community. This is accomplished partly through the Honors Curriculum through facilitating cultural and other outings in the city, and by encouraging students to include in their academic program courses, research projects, and/or internships which exploit the university's manifold connections with city people and its partnerships with leading city institutions such as the Missouri Botanical Gardens, the Missouri Historical Society, and the Mercantile Library of St. Louis. Many honors students fulfill all or part of their independent study requirements working through such partnerships.

International Study and Other Exchange Programs Honors students are encouraged to consider a semester's or a year's study at another institution. This can be done through the University's Center for International Studies, which administers exchanges with more than 70 universities in Europe, Africa, Asia, Australia, and South and Central America as well as the Missouri-in-London program. Students not wishing to go abroad may, through the National Student Exchange, attend any one of more than 100 universities in the United States, Puerto Rico, Guam, and Canada. Students should contact International Studies and Programs if they are interested in the National Student Exchange Program.

Please note that students in the Honors and International Business program are normally required to spend their exchange study through the Center for International Studies.

## Courses

### ***HONORS 1100 Freshman Composition: 3 semester hours***

Prerequisite: Consent of the Dean of the Honors College. Theory and practice of writing expository prose. Emphasis on individual tutorial. Assignment will be linked with topics discussed in honors 101.

### ***HONORS 1110 Western Traditions: Humanities: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

### ***HONORS 1130 Western Traditions: Social And Behavioral Sciences: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

***HONORS 1200 Freshman Symposium: Cultural Traditions I: 3 semester hours***

Course surveys Western and Non-Western cultural Traditions from their beginnings until 1800. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

***HONORS 1201 Freshman Symposium: Cultural Traditions II: 3 semester hours***

Prerequisite: Consent of the Dean of the Honors College. Course surveys Western and Non-Western Cultural Traditions from the 1800's to current times. It will introduce intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

***HONORS 1230 American Traditions: Social And Behavioral Sciences: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Honors seminars in the American Traditions series involve reading and discussion of texts of major importance in the development of the culture, politics, ideologies, and values which are or have been characteristic of the United States of America. Every American Traditions seminar will cover a broad range of time, and each may include contemporary issues. HONORS 1230 (Social Sciences) satisfies the American history and government requirement, and any course in the American Traditions sequence may be taken to satisfy one of the 'core' requirements for the American Studies Minor.

***HONORS 1310 Non-Western Traditions Series Humanities: 3 semester hours***

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the humanities but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

***HONORS 1330 Non-Western Traditions Series-Social Sciences: 3 semester hours***

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the social sciences but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

***HONORS 1410 Freshman Seminar In Humanities: 3 semester hours***

Seminars focus on different topics in the humanities but address themes and problems in the western cultural traditions that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading and discussion, and students will produce formal papers and participate in individual or small group presentations.

***HONORS 2010 Inquiries In The Humanities: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one of more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

***HONORS 2020 Inquiries In The Fine And Performing Arts: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

***HONORS 2030 Inquiries In The Social And Behavioral Sciences: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

***HONORS 2050 Inquiries In The Natural Sciences: 1-3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

***HONORS 2051 Inquiries in the Sciences: Laboratory or Field Work: 1 semester hour***

Prerequisites: Permission of Honors Dean. This course develops students' understanding of how the experimental procedures of the life and physical sciences are used to collect data and to develop and test scientific hypotheses. HONORS 2051 is taken as a required companion course to specific sections of HONORS 2050, (Inquiries in the Sciences), when laboratory or field work experience is essential to students' understanding of and competence in the scientific subject matter of the companion section of HONORS 2050.

***HONORS 2060 Inquiries In Business: 3 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2070 Inquiries In Education: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors. College Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2071 Inquiries in Education: 4 semester hours**

Prerequisite: Consent of the dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate, laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. HONORS 2071 meets College of Education requirements for TCH ED 2209.

**HONORS 2080 Inquiries In Nursing: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2310 Cultural Diversity In The Humanities: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the humanities.

**HONORS 2330 Cultural Diversity In The Social Sciences: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the social sciences.

**HONORS 3010 Advanced Honors Seminar In The Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3020 Advanced Honors Seminar In The Fine And Performing Arts: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3030 Advanced Honors Seminar In The Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3075 Reflective Research in Education: 2-3 semester hours**

Prerequisites: Consent of Honors College Dean. Students will explore issues and trends in educational research from the perspectives offered by their own classroom experiences (as students and/or as teaching interns). Through individual research projects, discussions, and periodic status reviews, students will gain in understanding how major educational research issues arise from and interact with curriculum design and classroom pedagogy. Students who have already taken HONORS 2071 (Foundations of Teaching in American Schools) will take the course for two (2) credits.

**HONORS 3100 Honors Advanced Composition: Writing The City: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Enhances critical thinking, research, discussion and writing skills by focusing on the city of St. Louis and on the specific fields of study of those enrolled in the course. Issues such as depth and development of content, voice, style, tone, correct expression, and research techniques are among the topics emphasized. Students maintain a Commonplace Book of journals, drafts, and creative writings; they also submit a minimum of four formal papers. This course is required for transfer students (two-year Honors Program) and an elective for students on the four-year program. For students on either program, HONORS 3100 meets the Advanced Composition requirement of the University.

**HONORS 3160 Honors Writing In The Sciences: 3 semester hours**

Prerequisites: Junior-level standing. This honors course, designed to meet the needs for students in the science disciplines, will satisfy the campus junior-level writing requirement. The course will stress writing observation reports, academic journals, laboratory reports and a major project suited to the specific area of study of each student enrolled in the class. Instruction will include correct documentation of science sources, synthesis techniques of research information, technology-based research skills and effective laboratory reporting methods. Four formal papers, including one large project, and several informal papers will be required for this challenging course.

***HONORS 4100 Independent Portfolio Writing: 1-2 semester hours***

Prerequisites: Senior status. Students in this course will meet with their instructor on a regular basis to discuss and revise their writing portfolio and write their master resume, career or academic resume, personal statements for graduate school, or other projects for careers or their futures. The course is required to be at least one hour and may be taken for two hours to allow for more personal time and assistance from the instructor.

***HONORS 4900 Independent Study In Honors: 1-6 semester hours***

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Most Honors students will fulfill their Honors independent study requirements in another department or division of the university. Where this is not possible, and where academic credit seems an appropriate reward for the independent study in question, the project may be undertaken as HONORS 4900, normally as a 3-credit course. This will involve substantial reading, research, and/or field work, and will be supervised by a permanent member of the Honors College academic staff. Completed proposal forms for this course must be submitted to the Honors College not later than the deadline for university registration.

***HONORS 4910 Independent Study: Internships: 1-6 semester hours***

***HONORS 4915 Honors Independent Off-Campus Internship: 1-6 semester hours***

Prerequisites: Approval from Honors Dean. This course is designed for 1 to 6 hours for an outside internship, approved by the Honors College. The student will not be on campus for the hours of this internship and most work for the internship will be submitted online to the Honors Internship Faculty Member.

# School of Social Work

## General Information

### Degrees and Areas of Concentration

The Social Work program offers courses leading to a bachelor of social work (B.S.W.), a master of social work (M.S.W.), and a minor in social work. The B.S.W. and the M.S.W. programs are fully accredited by the Council on Social Work Education. The programs stress the critical, empirical, and applied aspects of social work, incorporating a liberal arts perspective throughout the curriculum. There is a strong accent on community and agency field work as an integral part of the program. Professional social work education enables students to integrate the knowledge, values, and skills of the profession into competent practice.

Students must apply for admission into the B.S.W. and the M.S.W. programs. After admission, undergraduate social work majors and Master's students should obtain a copy of the Student Handbook (available on the School of Social Work's web page). Students in both programs must meet with a social work adviser for advisement each semester, and must set up an appointment with the practicum office and attend a series of pre-practicum orientation sessions one semester prior to enrolling in the practicum.

### Career Outlook

The bachelor of social work program prepares persons for entry-level employment in social welfare agencies, schools, hospitals, correctional institutions, social action and community organizations, and day care, geriatric, or rehabilitation and residential centers. The master of social work program prepares professionals for advanced social work practice with individuals, families, groups, organizations, and communities. Individuals currently working in social welfare can develop skills and increase employment and job advancement opportunities with the B.S.W. and M.S.W. degrees.

## Undergraduate Studies

### Objectives of the BSW Program

The BSW program has the following educational outcomes. Students who graduate with a BSW will be generalist practitioners who:

- Identify as professional social worker and conduct themselves accordingly.
- Understand the values and ethics of the social work profession and the relationship between personal beliefs and values, professional values and ethics, and professional social work practice.
- Utilize critical thinking, capacity building, analytical and communication skills to synthesize and analyze information to inform social work practice.
- Understand the importance of diversity, difference, power, and privilege in shaping life experiences for diversity competent practice.
- Possess the knowledge and skills to fight effectively against human oppression, discrimination, and social inequity and to formulate and foster social change initiatives to advance social and economic justice.
- Engage in research-informed practice and practice-informed research to evaluate professional practice and /or the professional practice of others.

- Apply knowledge of human behavior and the social environment to guide assessment and intervention.
- Understand major social and welfare policies and analyze and formulate policies to advocate for social and economic justice.
- Use leadership skills to respond to the changing context of social work practice.
- Utilize skills of engagement, assessment, intervention and evaluation, including theory and practice skills, across all levels of practice.

### General Education Requirements

Majors must satisfy the university and college general education requirements (p. 34), although proficiency in a foreign language is recommended but not required.

Courses required for the B.S.W. degree may not be taken on a satisfactory/unsatisfactory basis except SOC WK 4800 (p. 559) and SOC WK 4850 (p. 559).

### Admission Requirements

Students entering UMSL as freshman and as transfer students should indicate a pre-social work major. Students must apply to the program concurrently with SOC WK 3100 (p. 559). Admission to the program is conditional upon the successful completion of all necessary requirements.

Requirements for Admission to the Social Work program:

- Junior standing
- Have a GPA of 2.75 or higher in social work related areas.
- Submission of:
  - Application for admission to the social work program.
  - Two letters of reference: one from a college or university professor and one other from a work or volunteer experience supervisor.
- Completion of SOC WK 2000 (p. 559), SOC WK 2001 (p. 559), and SOC WK 2200 (p. 559) or their equivalents or completion of an A.A. in Human Services.
- Satisfactory completion of all courses listed as prerequisites for , SOC WK 3210 (p. 559), and SOC WK 3510 (p. 559).

Applicants may be asked to meet with the social work Admissions Committee.

### Bachelor of Social Work

Students must have a minimum GPA of 2.5 in social work and related-area requirement courses to enter field practicum. Candidates for this degree program must complete the core requirements including the following social work courses:

SOC WK 2000 (p. 559)	Social Work And Social Issues	3
SOC WK 2001 (p. 559)	Social Work and Social Issues Lab	1
SOC WK 2200 (p. 559)	Social Welfare As A Social Institution	3
SOC WK 3100 (p. 559)	Introduction To Strategies for Social Work Practice	3
SOC WK 3210 (p. 559)	Social Issues And Social Policy Development	3
Select one of the following:		3

SOC WK 3410	Research Design In Social Work (p. 559)	
SOC 3230	Research Methods (p. 559)	
PSYCH 2219	Research Methods (p. 559)	
CRIMIN 2210	Research Methods In Criminology And Criminal Justice (p. 559)	
SOC WK 3510	Human Behavior In The Social Environment (p. 559)	3
SOC WK 3700	Diversity And Social Justice (p. 559)	3
SOC WK 4110	Social Work Practice with Individuals, Families, and Groups (p. 559)	3
SOC WK 4300	Social Work Practice with Communities (p. 559)	3
SOC WK 4350	Human Service Organizations (p. 559)	3
SOC WK 4800 & SOC WK 4850	Supervised Field Experience In Social Work I and Supervised Field Experience In Social Work II (p. 559)	8
SOC WK 4801 & SOC WK 4851	Integrative Field Experience Seminar I and Integrative Field Seminar II (p. 559)	4
<b>Total Hours</b>		<b>43</b>

A minimum of 43 hours or a maximum of 50 hours must be taken in social work. A minimum of 30 hours is required in related area departments.

Evaluation of social work transfer credits will be done by a social work adviser on an individual basis.

## Related Area Requirements

The following courses, or their alternatives, are required:

ECON 1000	Introduction To The American Economy (p. 559)	3
or ECON 1005	Family Economics and Household Development (p. 559)	
POL SCI 1100	Introduction To American Politics (p. 559)	3
PSYCH 1003	General Psychology (p. 559)	3
<b>Biology</b>		
Select one of the following:		3-4
BIOL 1102	Human Biology (p. 559)	
BIOL 1131	Human Physiology And Anatomy I (p. 559)	
BIOL 1141	Human Physiology And Anatomy II (p. 559)	
BIOL 1202	Environmental Biology (p. 559)	
<b>Sociology</b>		
SOC 1010	Introduction To Sociology (p. 559)	3

SOC 2160	Social Psychology (p. 559)	3
Select one of the following:		3-4
SOC 3220	Social Statistics (p. 559)	
PSYCH 2201	Psychological Statistics (p. 559)	
CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice (p. 559)	

At least 9 additional hours must be taken in social work, sociology, political science, psychology, gender studies, anthropology, criminology and criminal justice, or economics at the 2000 level or above.

**Total Hours** **30-32**

Hours taken in social work will apply toward the maximum of 50 hours that may be taken in social work courses. The Social Work program may require students to pass a placement test to enroll in the next level course, provided this test or its equivalent is administered to all students seeking to enroll in that course.

Social work majors must have a grade of C- or better and maintain a cumulative grade point average of 2.5 or better in all course work specifically required for the major, with satisfactory grades in practicum.

Note: Anthropology, biological sciences, economics, and Spanish courses are strongly recommended by graduate schools of social work.

## Requirements for the Minor in Social Work

Candidates must complete the following social work courses:

SOC WK 2000	Social Work And Social Issues (p. 559)	3
SOC WK 2200	Social Welfare As A Social Institution (p. 559)	3
SOC WK 3100	Introduction To Strategies for Social Work Practice (p. 559)	3
SOC WK 3210	Social Issues And Social Policy Development (p. 559)	3
Select one additional social work course at the 3000 level or above.		3
<b>Total Hours</b>		<b>15</b>

## Graduate Studies

### Goals of the Master of Social Work

The goals of the M.S.W. program of the University of Missouri- St. Louis are consistent with the land-grant public service mission of the University, the MSW feasibility study, and the educational policy statement of CSWE and are to:

- Prepare students with the professional knowledge, skills, values and ethics for effective social work practice.
- Prepare students to utilize critical thinking and capacity building skills at all levels of social work practice.
- Prepare students to analyze and address dynamic issues and challenges facing diverse populations and to promote social justice and positive social change.

- Prepare students to conduct and utilize research to respond effectively to dynamic social contexts, issues and problems found in social work practice.
- Assist and support faculty in the advancement of social work knowledge, teaching and service.
- Develop and participate in collaborative activities with social agencies, communities, organizations, and governments that will enhance student learning, enrich faculty research and teaching, and promote human and societal well-being.

## Master of Social Work

### Admission Requirements

Admission to the M.S.W. Program requires admission to the University of Missouri-St. Louis Graduate School and acceptance by the School of Social Work. Applicants to the program must meet the following requirements to be considered for admission:

- Completion of a bachelor's degree from a college or university accredited by a recognized regional accrediting organization.
- Completion of a liberal arts education including courses in the humanities, the social and behavioral sciences, and the physical sciences. These courses must include one in human biology and one in statistics.
- Attainment of a cumulative grade point average of at least 3.0 on a 4.0 scale for all undergraduate course work and a grade point average of 3.0 on a 4.0 scale in the major field.
- Submission of the following documents by the admission deadline:
- A completed application to the UMSL Graduate School and a completed M.S.W. supplemental application
- Three written essays.
- Three letters of reference. – One from a professor in your major field of study, and one from a work or volunteer supervisor or other professional reference. Letters from employees/supervisees, friends, and family may not be used.
- Official transcripts from all colleges and university attended.
- Applicable fees.

### Application Deadline

The deadline for application to the MSW program is February 15 for admission in the following fall semester. See School of Social Work's website, for more details.

### Admissions to the Advanced Standing Program

Applicants with a B.S.W., B.A.S.W., or B.S.S.W., from an accredited social work program may be given up to 24 credit hours of advanced standing for foundation social work courses. Admission to the advanced standing program is available to applicants who meet the general admission requirements and who:

1. have earned a bachelor's degree in social work from a program accredited by the Council on Social Work Education within five years of applying to the M.S.W. Program, and
2. have earned a grade point average of at least 3.0 on a 4.0 scale in the social work foundation curriculum, and no less than a B in all courses that are applicable.

### Course Waivers

A student who does not have a bachelor's degree in social work but who can document successful completion (with at least a B) of foundation courses from an accredited B.S.W. program within the last five years will be given course waivers and be allowed to replace these courses with electives.

Students from non-accredited B.S.W. programs or students who have taken comparable course work in other undergraduate programs may take place-out examinations for select foundation courses; waivers will be given if students successfully pass place-out examinations. The waiver does not provide graduate credit; it is a mechanism for allowing elective courses to be substituted for required foundation courses.

Academic credit cannot be given for life experience and/or previous work experience, in whole or in part, in lieu of field practicum or foundation year courses.

### Degree Requirements

The M.S.W. is a two-year program comprising a foundation year and a concentration year. All students are required to take the foundation year courses. These provide a common base of knowledge across all practice settings and populations. Beyond the general requirements of the Graduate School, the department requires a minimum of 60 semester hours of course work, of which 48 must be at the 5000 or 6000 level and 48 must be in social work or cross-listed with social work, including the following foundation courses:

SOC WK 5100	Generalist Social Work Practice	3
SOC WK 5200	Social Policy And Social Services	3
SOC WK 5300	Community Practice And Social Change	3
SOC WK 5350	Social Work And Human Service Organizations	3
SOC WK 5410	Social Work Research Methods And Analysis I	3
SOC WK 5450	Social Work Research Methods And Analysis II	3
SOC WK 5500	Foundations Of Human Behavior In The Social Environment	3
SOC WK 5700	Diversity and Social Justice for Social Work	3
SOC WK 5800	Graduate Field Practicum I	4
SOC WK 5801	Foundation Field Practicum Seminar	2

**Total Hours** **30**

Upon completion of the 30 credits of foundation year requirements, students move into a year of specialization, called the concentration. The concentration year requires 30 hours of course work that includes up to 12 hours of elective graduate-level courses approved by the adviser. Students plan their degree program to reflect their career interests in the following concentration areas:

- Family Practice
- Social Work Leadership and Management
- Gerontology

The MSW program has organized courses into areas of emphasis which are suggested courses based on interest.

To remain in good standing, students must maintain a cumulative GPA of 3.0 or better.

The field practicum is an integral part of the concentration year. Students will complete 300 hours (20 hours of full-time work each week) of M.S.W.

supervised practice in an agency during the second semester of the foundation year, and 600 hours total (20 hours of full-time work per week) in the concentration year. A student must receive a grade of B or better in the first-year field practicum course in order to be eligible to enter the second year field practicum. S/U grades are given for the concentration practicum.

## Part Time Status

Students who enter the program as part-time students complete the foundation year in two years and the concentration course work in an additional two years.

All students must complete the M.S.W. in four years.

## Sample Four Year Plan

First Year			
Fall	Hours	Spring	Hours
BIOL 1012	3	ECON 1000 or 1005	3
SOC 1010	3	BIOL 1102	3
ENGL 1100	3	MATH 1020 or 1030	3
PSYCH 1003	3	General Education	3
General Education	3	Elective or minor	3
	15		15
Second Year			
Fall	Hours	Spring	Hours
SOC WK 2000	3	SOC WK 2200	3
SOC WK 2001	1	PSYCH 2160	3
POL SCI 1100	3	Social Science elective <sup>1</sup>	3
General Education	6	General Education	3
Elective or minor	3	Elective or minor	3
	16		15
Third Year			
Fall	Hours	Spring	Hours
SOC WK 3100	3	SOC WK 3210	3
SOC WK 3510	3	SOC WK 3700	3
SOC 3220, CRIMIN 2220, or PSYCH 2201	3-4	SOC WK 4110	3
ENGL 3100	3	SOC WK 3410, CRIMIN 2210, or PSYCH 2219	3
Social Science elective <sup>1</sup>	3	Social Science Elective <sup>1</sup>	3
	15-16		15
Fourth Year			
Fall	Hours	Spring	Hours
SOC WK 4300	3	SOC WK 4850	4
SOC WK 4350	3	SOC WK 4851	2
SOC WK 4800	4	Elective or minor	9
SOC WK 4801	2		
Elective or minor	3		
	15		15
Total Hours: 121-122			

<sup>1</sup> Nine hours must be taken in SOC WK, SOC, PSYCH, POL SCI, CRIMIN, ANTHRO, ECON or GS at the 2000 level or above.

*Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.*

## Gerontology Courses

### **GERON 1220 Special Topics In Gerontology: 3 semester hours**

Same as INTDSC 1220. Selected topics dealing with various aspects of gerontology. The specific contents of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology director.

### **GERON 2256 Bioethics: 3 semester hours**

Same as PHIL 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

### **GERON 2272 Developmental Psychology: Adulthood And Aging: 3 semester hours**

Same as PSYCH 2272. Prerequisites: PSYCH 1003. Personality social and physiological development from the onset of early adulthood through maturity and old age.

### **GERON 2280 Psychology Of Death And Dying: 3 semester hours**

Same as PSYCH 2280. Prerequisite: PSYCH 1003. A beginning exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

### **GERON 3215 Aging Across Cultures: 3 semester hours**

Same as ANTHRO 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wideranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

### **GERON 4361 Social Gerontology: 3 semester hours**

Same as SOC 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include: sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

### **GERON 4376 Mental Health And Aging: 3 semester hours**

Same as PSYCH 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

### **GERON 4490 Directed Readings: 1-3 semester hours**

Prerequisites: Consent of instructor. Directed reading and research or field work. May be repeated for a maximum of three hours.

### **GERON 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as SOC WK 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

**GERON 4700 Successful Aging: Individual & Societal Perspectives: 3 semester hours**

This course addresses key components of successful aging including avoidance of disease, maintenance of good mental and physical function, and sustained engagement in life. Students become familiar with the different intra- and extra-personal determinants of successful aging and learn to distinguish between the concepts of successful and productive aging. Also discussed is the impact of societal, economic and political context on success in aging (e.g. health care delivery, entitlement programs, technology, globalization, volunteerism, and culture).

**GERON 5200 Gerontological Practice with Aging Veterans: 3 semester hours**

Prerequisites: Graduate standing or permission of the instructor. Aging veterans often demonstrate different social, health and psychological support needs. This practice-oriented course reviews and frames gerontological interventions for different veteran subpopulations, including those residing at home, in senior housing, and under Veterans Administration (VA) care. The impacts of age cohort, gender, service during war or peacetime, post-traumatic stress status, substance abuse and addiction, military culture, and pension and service-connected compensation are studied. Special opportunities and challenges for social service providers in the VA health system are also reviewed.

**GERON 5320 Gender & Aging: 3 semester hours**

Same as GS 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

**GERON 5361 Advanced Social Gerontology: 3 semester hours**

Prerequisites: Graduate Standing. An examination of sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

**GERON 5376 Psychopathology And Aging: 3 semester hours**

Prerequisites: Graduate Standing. Recent theory and research in mental health issues for older populations. The primary focus is on major psychological disorders prevalent among older adults and in assessment and treatment approaches for aging populations.

**GERON 5420 Research Methods and Analysis I: 3 semester hours**

Prerequisites: Admission to the MSG Program or graduate standing. The first of a two-course sequence designed to provide students with the knowledge base and skills for using the scientific method to advance gerontological knowledge, theory and evidence-based practice. Focuses on research methods employed in aging-related studies, with a special emphasis on the critical evaluation of academic studies and the evidentiary basis of key findings. Covers quantitative and qualitative approaches, research design, sampling procedures, measurement, use of results, impact of research, and ethical considerations.

**GERON 5440 Cultural Aspects Of Aging: 3 semester hours**

Same as ANTHRO 5440. Prerequisites: Graduate status or consent of the instructor. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

**GERON 5450 Research Methods and Analysis II: 3 semester hours**

Prerequisites: GERON 5420 or equivalent. An advanced course focused on the framing and analysis of qualitative and quantitative data to advance gerontological knowledge, theory, and evidence-based practice. Students learn to use and interpret various statistical procedures for analyzing qualitative and quantitative data (including bivariate and multivariate analyses). Students apply various analytic techniques using computer software applications.

**GERON 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as SOC WK 5610 and PSYCH 5610. Prerequisites: Graduate standing and BIOL 1102 or equivalent. (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**GERON 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as SOC WK 5611 and PSYCH 5611. Prerequisites: GERON 5610 or SOC WK 5610 or PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**GERON 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as SOC WK 5612 and PSYCH 5612. Prerequisites: GERON 5610 and GERON 5611 or SOC WK 5610 and SOC WK 5611 or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**GERON 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as SOC WK 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice, and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**GERON 6120 Theory and Practice with Older Adults: 3 semester hours**

Same as SOC WK 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**GERON 6130 Interviewing Older Adults And Life Review: 3 semester hours**

Same as SOC WK 6130. Prerequisite: Graduate Standing. This course combines training in interviewing techniques with video editing/production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**GERON 6441 Aging And Health Behavior: 3 semester hours**

Same as PSYCH 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

**GERON 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, POL SCI 6443, and SOC WK 6443.

Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**GERON 6444 Seminar In Public Policy And Aging: 3 semester hours**

Same as P P ADM 6444, and POL SCI 6444. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**GERON 6449 Issues In Retirement: 3 semester hours**

Prerequisites: Graduate standing. This course examines macro and micro issues of retirement in the United States--its processes, causes, and consequences--in relation to economic market conditions, demographic changes, and programs and policies that are targeted to support the elderly (e.g., Social Security). It also examines issues relating to older women and retirement.

**GERON 6450 Gerontological Assessment: 3 semester hours**

Same as SOC WK 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**GERON 6460 Long Term Care Administration: 3 semester hours**

Prerequisite: Graduate Standing This course provides an overview of long term care programs and services for older adults. Administrative issues are reviewed, including patient services, state licensure requirements, human resource management, and reimbursement practices. Characteristics of well-functioning facilities are addressed, as well as consultation with families during the placement decision process.

**GERON 6470 Epidemiology of Aging: 3 semester hours**

Prerequisites: Graduate Standing. This course reviews the distribution and determinants of health-related conditions and functional concerns in older populations. An emphasis is placed on key concepts and methodological considerations for conducting epidemiological studies. Students learn about the epidemiology of selected diseases, syndromes and conditions common to older age, including various trajectories of physical and cognitive decline. Also discussed are the roles that epidemiological data play in the development of interventions to control and prevent age-related disease and inform public health decision-making and evidence-based geriatric practice.

**GERON 6490 Directed Study: 1-3 semester hours**

Prerequisite: Consent of Instructor. Designed to give the student an opportunity to pursue a more in-depth study of a problem area in gerontology than is normally covered in more formal courses. May be repeated for a total of six credit hours.

**GERON 6495 Practicum In Gerontology: 3 semester hours**

This course provides supervised work experience in an agency that serves older adults. Students are required to complete a minimum of 150 clock hours at the practicum site.

**GERON 6496 Advanced Practicum In Gerontology: 3 semester hours**

Prerequisites: GERON 6495 and consent of instructor This course provides advanced practicum experience beyond GERON 6495. Students must complete a minimum of 150 clock hours of supervised field work (service or research) with older adults.

**GERON 6497 Interdisciplinary Geriatric Care: 3 semester hours**

Prerequisites: Consent of instructor. Same as VIS SCI 6497.

Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

**GERON 6498 Advanced Seminar In Gerontology: 3 semester hours**

Prerequisite: Graduate standing. This course will provide in-depth analysis of specialized topics in gerontology which are not covered in required courses. (Course may be repeated for a maximum of nine credits, assuming topics are different.).

**GERON 6499 Topics In Gerontology: 1-3 semester hours**

Prerequisite: Graduate standing. Analysis of a current problem in gerontology. (Course may be repeated for maximum of five credits, assuming topics are different.).

**GERON 6500 Practicum in Gerontological Research: 3 semester hours**

Prerequisites: GERON 6495 and consent of the instructor. A supervised social science research experience involving a combination of two or more of the following activities: literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

**GERON 6510 Directed Research in Aging: 1-3 semester hours**

Prerequisites: Consent of the instructor. Designed to give the student an opportunity to explore a question of interest from a qualitative and/or quantitative research perspective. This supervised experience may include one or more of the following activities (depending on enrolled hours): literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

**Social Work Courses****SOC WK 2000 Social Work And Social Issues: 3 semester hours**

Prerequisites: SOC 1010 or PSYCH 1003. Examination of the network of social programs and services developed in response to social problems in modern urban communities and the various roles and functions performed by the helping professions. Students will be introduced to basic values, skills, and training involved in a helping relationship as well as the characteristics of clients seeking help and professionals engaged in the helping process.

**SOC WK 2001 Social Work and Social Issues Lab: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2000. The lab session will be used for field trips to social agencies which will allow students to better understand the many roles social workers are involved in. This course is required for social work majors.

**SOC WK 2102 Introduction To Gender Studies: 3 semester hours**

Same as HIST 2102, SOC 2102, and GS 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**SOC WK 2200 Social Welfare As A Social Institution: 3 semester hours**

Prerequisite: SOC WK 2000 or consent of instructor. A study of the: 1) development of social welfare service and the philosophy underlying the present practices and systems, 2) present social welfare programs with particular emphasis given to public income maintenance provisions, 3) special welfare needs of the black, elderly, women, indian and hispanic americans, and 4) Development of social work as a profession. This course may be taken by non-social work majors.

**SOC WK 2201 Social Welfare As A Social Institution Laboratory: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2200. The lab session will be used for field trips to social agencies. This course is required for all Social Work majors.

**SOC WK 2330 Asians In Migration: 3 semester hours**

This course is a comparative analysis of the social and cultural diversity of the peoples of East, South, and Southeast Asia. Study focuses on their reasons for migration and the extent and quality of the social and cultural connections they maintain to their homelands. Implications of these cultures for students in a variety of disciplines are explored. This course satisfies the cultural diversity requirement.

**SOC WK 3100 Introduction To Strategies for Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 2200, SOC 1010 and PSYCH 1003 or permission of instructor. A presentation of basic knowledge, skills, and theory used for entry-level professional practice, such as problem assessment, interviewing skills, crisis intervention and referral procedures. The course objectives will also be to teach students how to help clients negotiate systems effectively, and to use resources, services, and opportunities.

**SOC WK 3210 Social Issues And Social Policy Development: 3 semester hours**

Prerequisites: SOC WK 2200, POL SCI 1100, and ECON 1000. The identification of issues concerning governmental provisions to meet contemporary social needs, with analysis of the principles and values underlying alternative solutions. A study of the processes by which citizen opinions and public policies evolve and are implemented in areas such as income maintenance, crime and delinquency, employment, family and child welfare, and public mental health.

**SOC WK 3410 Research Design In Social Work: 3 semester hours**

Prerequisites: Satisfaction of Math Proficiency requirement and either SOC 3220, CRIMIN 2220, or PSYCH 2201. Students explore research concepts and procedures (hypothesis testing, sampling, measurement, and design) emphasizing issues in social work research. Students learn to collect, analyze and present data.

**SOC WK 3510 Human Behavior In The Social Environment: 3 semester hours**

Prerequisites: BIOL 1012 and SOC 2160 or PSYCH 2160 or permission of instructor. This course will focus on the normative stages in the life span, and specifically, how human development is affected by the physical environment and social status characteristics. Empirical information and theoretical views on human development will be included. Human development will be viewed as a complex interaction of individual developmental stages with family, social, and community systems.

**SOC WK 3700 Diversity And Social Justice: 3 semester hours**

Same as GS 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 4110 Social Work Practice with Individuals, Families, and Groups: 3 semester hours**

Prerequisites: SOC WK 3100, SOC WK 3510, and SOC WK 3700 taken prior to or concurrently. This course continues the presentation of basic knowledge and practice skills for entry level professional practice begun in SOC WK 3100. It builds on the generalized helping model, incorporating specialized skills for working with specific groups of clients (e.g., children, aged, mentally ill, and physically handicapped), with families and small groups.

**SOC WK 4300 Social Work Practice with Communities: 3 semester hours**

Prerequisites: SOC WK 3210 taken prior to or concurrently, senior standing. Continuation of basic practice skills with emphasis given to analysis and intervention at the community level. Includes assessment of community assets and needs and the development of community-level interventions. Emphasis is also placed on helping the practitioner evaluate the impact of intervention.

**SOC WK 4350 Human Service Organizations: 3 semester hours**

Prerequisite: POL SCI 1100; PSYCH 2160 or SOC 2160 and admission to the BSW program or consent from instructor. This course seeks to help develop knowledge of organizational functioning and an understanding of organizational history, principles and philosophy of effective administration. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, organizational structure, goals, membership, leadership, motivation, technology and organizational culture. They will learn to develop a budget and to submit proposals for grant funding. Using a systemic perspective with organizations as settings for practice students learn to function in and through organizations.

**SOC WK 4376 Mental Health And Aging: 3 semester hours**

Same as GERON 4376 and PSYCH 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**SOC WK 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

Same As PSYCH 4398 and CAST 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**SOC WK 4601 Abused And Neglected Children: 3 semester hours**

Prerequisites: SOC WK 3510 or equivalent. This course explores the major concepts necessary for understanding abused and neglected children and their families. Emphasis is placed on (1) defining the problem, including societal stresses which contribute to the abuse and neglect; (2) examining existing practice methods; and (3) understanding the role of the social worker on interdisciplinary teams.

**SOC WK 4610 Intimate Partner Violence: 3 semester hours**

Same as GS 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

**SOC WK 4620 Addictions: Assessment And Intervention In Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent, (or are taking concurrently), or consent of instructor. This class examines the interface of psychological, physical, social, and spiritual aspects of addiction. This practice class is designed to deepen students' abilities to address clients' issues related to addictions and addictive behaviors, including: prevention, assessment, and intervention. It builds on the generalized helping model within a systems perspective, and it introduces specialized skills for working with individuals, with specific groups of clients, with families, and with small groups.

**SOC WK 4630 Gender Issues in Social Work: 3 semester hours**

Same as GS 4630. Prerequisites: SOC WK 3700, GS 2102, or graduate standing. This course will help students become more sensitive to the social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

**SOC WK 4641 Crisis Intervention: 1 semester hour**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent (or are taking concurrently), or consent of instructor. This course introduces students to the theoretical framework as well as the skills needed to understand and engage in effective crisis intervention. Students will learn a specialized model for assessment and intervention with people in crisis and will have an opportunity to apply this model to a variety of case situations.

**SOC WK 4642 Non-Violent Crisis Intervention: 1 semester hour**

Prerequisites: Senior or Graduate Standing. Nonviolent Crisis Intervention is a nonharmful behavior management system designed to aid human service professionals in the management of disruptive and assaultive people. These techniques are used to reduce tension in agitated people, control anxiety during interventions, determine alternative approaches if a person becomes violent. Students will learn how to use nonverbal, paraverbal, verbal and physical intervention skills to maintain the best care and safety for clients.

**SOC WK 4643 Social Work Practice with Individuals with Development Disabilities: 1 semester hour**

Prerequisites: Senior Standing This evidence based course exposes students to the diverse issues related to the services and support needed by individuals with development issues. Students will explore the complex social contexts in which this population lives and the appropriate interventions to meet the unique challenges facing these individuals.

**SOC WK 4645 Social Work in Mental Health: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4110 or the equivalent. The role of social work in the field of behavioral health has evolved over the last thirty years as the setting for service activity has shifted from inpatient facilities to community-based care and treatment. This course will integrate the basic components of good social work practice with the contemporary role of the social worker in the field of behavioral healthcare. This course will focus on practical applications of social work in the context of working with individuals and families dealing with mental health and/or addiction disorders with an emphasis on consumer empowerment and recovery.

**SOC WK 4670 Cross Cultural Perspectives On Social Policy: 3 semester hours**

Prerequisites: SOC WK 3210 or equivalent. This course examines social policies in different countries, which may include social insurance, social assistance, health care, and social services. Using a comparative framework, the course examines the nature of government involvement, and public and private sector relations. It examines adequacy, equity, inclusiveness, comprehensiveness, effectiveness, and efficiency of social policies in the countries being studied.

**SOC WK 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as GERON 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

**SOC WK 4800 Supervised Field Experience In Social Work I: 4 semester hours**

Prerequisite: SOC WK 3100, SOC WK 4110. SOC WK 4110 must be taken prior to or concurrently with SOC WK 4801; consent of instructor. This course provides students practice experience in social service agencies. Students work at the agencies approximately 20 hours per week. The purpose of this experience is to familiarize students with agency operations. Selection of the agency is based on student education needs.

**SOC WK 4801 Integrative Field Experience Seminar I: 2 semester hours**

Prerequisite: Consent of instructor and concurrent registration in SOC WK 4800. This seminar provides an opportunity for students to integrate previous course work with their experience in social work agencies. Classroom discussion will emphasize direct practice issues.

**SOC WK 4850 Supervised Field Experience In Social Work II: 4 semester hours**

Prerequisite: SOC WK 4800, SOC WK 4801 and consent of instructor. This is a continuation of agency practice experience. Students work at the agency approximately 20 hours per week and continue at the same agency as SOC WK 4800 or change agencies with the consent of the instructor.

**SOC WK 4851 Integrative Field Seminar II: 2 semester hours**

Prerequisites: Consent of instructor and concurrent registration in SOC WK 4850. This seminar is a continuation of SOC WK 4801. Classroom discussion will emphasize administration and community organization issues.

**SOC WK 4900 Special Study: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through advanced readings in method and philosophy on a topic of particular interest, or field research in an agency.

**SOC WK 5100 Generalist Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or equiv or admission to MSW program. Using a problem-solving approach, students develop theoretical and empirical understanding and practical application of generalist social work methods. Students gain knowledge and skills that include interviewing, assessment, crisis and shortterm intervention, contracting, resource development, and case documentation needed for competent direct practice with diverse populations.

**SOC WK 5200 Social Policy And Social Services: 3 semester hours**

Prerequisites: SOC WK 3210 or POL SCI 2420 or POL SCI 3460 or equivalent or admission to the MSW program. Covers the history and development of social welfare policies, legislative processes, and existing social welfare programs. Examines frameworks for social policy analysis, analyzes how social and economic conditions impact the process of social policy development and implementation, and introduces policy practice in social work.

**SOC WK 5300 Community Practice And Social Change: 3 semester hours**

Prerequisites: SOC WK 3300, or SOC 3344, or equivalent or admission to the MSW program. Focuses on economic, social, and political theory and research on communities and social change. Examines conceptual models of community practice within the generalist model and develops skills in organizing, advocacy, and planning.

**SOC WK 5350 Social Work And Human Service Organizations: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4300 or PSYCH 3318 or MGMT 3611 or equivalent or admission to the MSW program. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, structure, goals, membership, leadership, motivation, technology and organizational culture. Using organizations as settings for social work practice and as targets for change, students learn strategies and skills for assessment and intervention.

**SOC WK 5410 Social Work Research Methods And Analysis I: 3 semester hours**

Prerequisites: SOC WK 3410 or SOC 3230 and SOC 3231 or equivalent and SOC 3220 or equivalent or admission to MSW program. The first of a two-course sequence designed to provide students with the knowledge base and skills for using scientific method to advance social practice, knowledge, and theory. Focuses on research methods at different levels (e.g., individual, group, organization, and community) and critical analysis and synthesis of academic literature necessary for effective, evidence-based social work practice. Covers quantitative and qualitative methods, research design, sampling, measurement, use of results, impact of research, and ethical considerations.

**SOC WK 5450 Social Work Research Methods And Analysis II: 3 semester hours**

Prerequisites: SOC WK 5410 or equivalent. Advanced course, focusing on analysis of qualitative and quantitative data to advanced social work practice, knowledge, and theory. Students learn to use and interpret various statistical procedures for analyzing quantitative data, including bivariate and multivariate analysis, and content and statistical analysis for qualitative data. Students apply these analytic techniques to social work case material using computer software applications.

**SOC WK 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours**

Same as GS 5500. Prerequisites: SOC WK 3510 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

**SOC WK 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as GERON 5610 and PSYCH 5610. Prerequisites: Graduate Standing and BIOL 1102 or equivalent (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**SOC WK 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as GERON 5611 and PSYCH 5611. Prerequisites: SOC WK 5610, GERON 5610, PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**SOC WK 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as GERON 5612 and PSYCH 5612. Prerequisites: SOC WK 5610 and SOC WK 5611, or GERON 5610 and GERON 5611, or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**SOC WK 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as GERON 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**SOC WK 5635 Social Work Practice with Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours**

Same as GS 5635. Prerequisites: SOC WK 5100 and SOC WK 5500. This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

**SOC WK 5700 Diversity and Social Justice for Social Work: 3 semester hours**

Same as GS 5700. Prerequisite: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 5800 Graduate Field Practicum I: 4 semester hours**

Prerequisites: Graduate standing and consent of academic advisor. Provides integrative field experience in generalist social work practice.

**SOC WK 5801 Foundation Field Practicum Seminar: 2 semester hours**

Prerequisite: Graduate standing and consent of instructor. Integrates academic content from foundation course work and experiential learning in field placements. Goals are to conceptualize the problem solving process in field practice, synthesize theory into a social work approach that encourages creative use of self, and underscore ethics and service to diverse groups in practices.

**SOC WK 6120 Theory And Practice With Older Adults: 3 semester hours**

Same as GERON 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**SOC WK 6130 Interviewing Older Adults and Life Review: 3 semester hours**

Same as GERON 6130. Prerequisites: Graduate Standing. This course combines training in interviewing techniques with video production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**SOC WK 6150 Theory And Practice With Families: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent, graduate standing and departmental approval. This course will examine theoretical approaches to social work with families, including the impact of the social environment. Skills will include assessment and multi-disciplinary intervention with multi-problem families. Special emphasis will be given to poverty, chemical dependency, intra-familial violence, physical and mental illnesses, and working with family members of diverse cultures, socioeconomic backgrounds, races, sexual orientation, and ability. Values and ethics will be emphasized.

**SOC WK 6160 Advanced Social Work Practice Across the Life Span: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Examines theory and empirically-based assessment and intervention strategies for diverse populations across the life span. Students will gain basic mastery of behavioral, cognitive-behavioral, brief therapeutic and supportive psychotherapeutic techniques and their appropriate use with children, adolescents, and young, middle and older adults. The course will also consider the effects of family, peers, and societal context (e.g. poverty, racism, and ageism) in understanding psycho-social stressors particular to each life era, including academic failure and delinquency, substance abuse, physical and mental illness, family disruption and instability, and grief and loss issues.

**SOC WK 6200 Family Policy: 3 semester hours**

Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines policy development, implementation and impact of social policies on children, youth, and families. International, national, and state policies that affect basic family needs will be the focus, including topics such as economic support, health care, child care and protection, and child and youth development. Intended and unintended consequences of existing policies on the family will be examined as well as future policy directions.

**SOC WK 6250 Social And Economic Development Policy: 3 semester hours**

Same as POL SCI 6418. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

**SOC WK 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours**

Same as P P ADM 6300 and POL SCI 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions, and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

**SOC WK 6310 American Philanthropy and Nonprofit Resource Development: 3 semester hours**

Same as P P ADM 6310. Prerequisites: Graduate standing required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

**SOC WK 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff' legal issues that affect these processes.

**SOC WK 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6312. Preequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

**SOC WK 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6313. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

**SOC WK 6400 Practice And Program Evaluation: 3 semester hours**

Prerequisites: SOC WK 5410 and SOC WK 5450 or equivalent or consent of instructor. Provides specialized knowledge in the use of qualitative and quantitative research skills to evaluate the effectiveness of social work practice. Topics will include single system design, group designs, and program evaluation. Students will design and conduct a research project associated with their advanced social work practicum. Results will be presented to the class and the agency. Value and ethical issues, particularly those relevant to client race and gender will be emphasized as students develop and conduct their research.

**SOC WK 6443 Health Care Policy: 3 semester hours**

Same as POL SCI 6443, P P ADM 6430, GERON 6443. Prerequisites: Graduate Standing and consent of instructor. (MSW students will normally take the social policy foundation course prior to enrolling in this course.) Survey course examining current issues in health care policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**SOC WK 6449 Human Resources In The Public Sector: 3 semester hours**

Same as POL SCI 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel & labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation, and labor relations including grievance arbitration and collective bargaining.

**SOC WK 6450 Gerontological Assessment: 3 semester hours**

Same as GERON 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**SOC WK 6491 Strategic And Program Planning For Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and P P ADM 6550. Prerequisites: Graduate Standing or consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**SOC WK 6601 Evid Bsd Approaches in Direct SW Practice: Cog & Rational Emotive Behavioral Therapy Models: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Cognitive Behavioral and Rational Emotive Behavioral therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

***SOC WK 6602 Evid Based Approaches in Dir SWork Practice: Sol Focused Therapy Model: 1 semester hour***

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Solution Focus therapy model. Students will utilize this theory to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

***SOC WK 6603 Evid Based Approaches in Dir SWork Practice: Play and Interactive Models: 1 semester hour***

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Play and Interactive therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

***SOC WK 6604 Introduction to Motivational Interviewing: 1 semester hour***

Prerequisites: SOC WK 5100 and SOC WK 6160, or consent of instructor, and graduate standing. This course focuses on skill development in Motivational Interviewing (MI), a specific style of interaction used to help clients/patients increase internal motivation to change behavior. The course will include theoretical underpinnings of MI, including a review of research establishing MI as an evidence-based intervention for a number of behavior areas. The course will also review a model of learning MI and provide specific opportunities for students to practice the skill. The broad objective of this course is to provide social work students an overview of Motivational Interviewing and its application to various domains of social work.

***SOC WK 6630 Diagnosis And Related Pharmacology For Social Work Practice: 3 semester hours***

Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Course is designed for social work students, and will provide an overview of the development and treatment of selected mental health disorders classified by Diagnostic and Statistical Manual of Mental Disorders. In particular, the course will examine, from a systems perspective, the psychological and neuropsychological etiologies of mood, psychotic, personality and other disorders and their preferred pharmacological treatment.

***SOC WK 6640 School Social Work Practice in Public Schools: 3 semester hours***

Prerequisites: SOC WK 5100 or equivalent or graduate standing and consent of instructor. Examines the role of the social worker in school settings and includes work with youth, families, and communities in relation to the child or adolescent's functioning in school.

***SOC WK 6645 Hospital Social Work: 3 semester hours***

Prerequisites: SOC WK 5100 and SOC WK 5500 or equivalent. This course focuses the key issues and practices of providing social work services through an interdisciplinary model in a large academic urban hospital setting. Practice issues will include discharge planning (housing, transportation, insurance and finances, medications and social/community supports) with focus on cultural competence and health literacy. The course will also review the following aspects of hospital social work: inpatient medicine, inpatient psychiatry, forensic social work, emergency department social work, transplant social work and clinic social work. Class discussions will integrate information concerning current health care economics.

***SOC WK 6800 Graduate Field Practicum II: 3 semester hours***

Prerequisites: SOC WK 5800 and SOC WK 5801 and consent of academic advisor. Provides integrative field experience in student's graduate social work practice concentration. May be taken concurrently with SOC WK 6850 with special permission.

***SOC WK 6850 Graduate Field Practicum III: 3 semester hours***

Prerequisites: SOC WK 6800. Provides advanced integrative field experience in students' graduate social work concentration.

***SOC WK 6900 Directed Study In Professional Social Work: 1-10 semester hours***

Prerequisite: Graduate standing and consent of instructor. Independent graduate-level study on a topic of particular interest through readings, reports, and field work under faculty supervision.

# UMSL/Washington University Joint Undergraduate Engineering Program

## General Information

The Joint Undergraduate Engineering Program of UMSL and Washington University was approved in 1993 by the University of Missouri and the Coordinating Board for Higher Education. The program is designed to offer course work beyond the pre-engineering courses at UMSL and the area community colleges. Pre-engineering and general education courses are offered at UMSL, and upper-level engineering courses are offered in the late afternoons, evenings and on Saturdays on the Washington University campus: this schedule permits students to co-op during the day at local engineering firms. Students will be admitted to the upper-division program only after they have completed an acceptable pre-engineering program. They can earn a bachelor of science in civil engineering (B.S.C.E.), a bachelor of science in electrical engineering (B.S.E.E.), or a bachelor of science in mechanical engineering (B.S.M.E.).

## Mission Statement

The mission of the University of Missouri-St. Louis/Washington University Joint Undergraduate Engineering Program is to provide a high quality civil, mechanical, and electrical engineering education leading to a well-trained, sophisticated work force primarily for the St. Louis region. The program strives to excite and nurture the intellectual, technical, professional and personal development of the students through a partnership which provides a mechanism for Washington University to share its campus, resources and personnel with the UMSL students, many of whom are place-bound individuals. The Joint Program reflects the commitment of both institutions to work together to provide for the civil, mechanical and electrical engineering needs of the St. Louis community.

## Program Educational Objectives

The University of Missouri-St. Louis/Washington University Joint Undergraduate Engineering Program aspires to make positive, substantive and lasting contributions to the lives of our students. The nontraditional and traditional students in the civil, mechanical and electrical engineering programs often have work experience in or related to engineering practice. The program seeks to impart an education that inspires the graduates to constantly share their knowledge with others, to continually improve their knowledge and understanding, and to persistently adapt to change in technology and world needs. Graduates of the program are expected to develop and use professional skills that facilitate their continued career growth well beyond their graduation and should be able to apply their comprehensive education within the civil, mechanical and electrical engineering profession or a related field. The objectives are to:

- Meet the needs of employers of civil, mechanical, and electrical engineers, with an emphasis on the St. Louis region.
- Meet the expectations of graduate schools that our alumni attend.

## Student Outcomes

The student outcomes are the skills and knowledge expected of all students at the time of their graduation. Faculty members will assess these

student outcomes in their classes every semester. The student outcomes for the Engineering Program are:

- An ability to apply knowledge of mathematics, science and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- A recognition of the need for, and an ability to engage in, life-long learning
- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

The B.S.C.E., the B.S.E.E., and the B.S.M.E. are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700.

## Admission

Normally admission is granted to persons who have completed the pre-engineering program with a minimum grade point average of 2.75 over all mathematics, chemistry, physics, and introductory engineering courses (statics and dynamics). Students with less than a 2.75 grade point average, but at least a C in all their science and math courses, may be admitted on a probationary basis. These students must pass an Engineering Math Workshop with a grade of B or better, and then pass J E MATH 3170 Engineering Mathematics in the first year with a C- or better, in order to continue in the program.

## Fees

Students register on the UMSL campus and pay UMSL fees plus an engineering fee for engineering courses. Limits on enrollments are determined by the availability of resources.

## Career Outlook

Engineering is one of the few careers in which the bachelor's degree is a professional degree. Students earning a bachelor of science degree in one of the engineering disciplines are well qualified for entry-level engineering positions in a variety of businesses, industries, consulting firms, and government agencies. As society becomes increasingly dependent on technology, the outlook for all engineering disciplines becomes increasingly bright. Engineering careers typically rank at, or very near, the top of virtually any published rating of promising jobs for the 21st Century. Besides tackling challenging technical problems, roughly two-thirds of all engineers will have some level of management responsibility within ten years of receiving their bachelor's degrees. Many practicing engineers will eventually continue their education by pursuing graduate

degrees on a part-time basis. Typical areas of graduate study include all advanced technical and scientific fields and management.

## For Further Information

For information about enrolling in this program, please contact the UMSL/ Washington University Joint Undergraduate Engineering Program at 314-516-6800.

## Degree Requirements

- Bachelor of Science in Civil Engineering
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Mechanical Engineering

A program of 132 semester hours is required for the Bachelor of Science in Civil Engineering, a program of 122 semester hours is required for the Bachelor of Science in Electrical Engineering, and a program of 134 semester hours is required for the Bachelor of Science in Mechanical Engineering, as shown below:

- All majors must complete the University General Education requirements (p. 34), the Pre-Engineering Requirements and the Core Engineering Requirements.
- All students must first complete J E MATH 3170, Engineering Mathematics, with a minimum grade of C-.
- Mechanical and Electrical Engineering majors must also complete J E ENGR 2300, Introduction to Electrical Networks with a minimum grade of C-.
- A minimum grade of C- is necessary to meet the prerequisite requirement for any course.

## Pre-Engineering Requirements

Students seeking to major in engineering are first designated as 'Undeclared with an interest in Engineering majors' until they have completed Math 1800 Analytical Geometry & Calculus I. Upon successful completion of Math 1800 with a grade of C or better, students will be allowed to declare pre-engineering as their major. Math 1800 must be completed successfully within two attempts.

MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
MATH 2020	Introduction To Differential Equations	3
CHEM 1111	Introductory Chemistry I	5
PHYSICS 2111	Physics: Mechanics And Heat	5
PHYSICS 2112	Physics: Electricity, Magnetism, And Optics	5
ENGR 2310	Statics	3
ENGR 2320	Dynamics	3
ENGL 1100	First-Year Writing	3
<b>Total Hours</b>		<b>42</b>

Civil engineering majors must complete **GEOL 1001A**, General Geology as part of the pre-engineering requirements.

## General Education Requirements

PHIL 2259	Engineering Ethics	3
PHIL 3380	Philosophy Of Science	3
One additional Humanities course <sup>1</sup>		3

HIST 1001	American Civilization To 1865	3
or HIST 1002	American Civilization 1865 To Present	
or HIST 1004	The History Of Women In The United States	
Two additional Social Science courses <sup>1</sup>		6

- <sup>1</sup> One course must meet the Cultural Diversity requirement, and one course must meet the engineering Valuing Skill requirement. Humanities and social sciences electives must meet both the University of Missouri-St. Louis General Education Requirements and the Humanities and Social Sciences Requirements of the Joint Undergraduate Engineering Program. Check with your advisor for details.

## Engineering Core Requirements

J CMP SC 1002	Introduction To Computing Tools: Matlab Skills	1
CMP SCI 1250	Introduction To Computing	3
J E MATH 3170	Engineering Mathematics	4
ENGL 3130	Technical Writing	3
J M ENGR 3200	Thermodynamics <sup>1</sup>	3
J M ENGR 4310/ J E ENGR 4410	Control Systems I <sup>1</sup>	3
J E ENGR 2300	Introduction To Electrical Networks <sup>1</sup>	3
J E ENGR 2330	Electrical And Electronic Circuits Laboratory <sup>1</sup>	3
<b>Total Hours</b>		<b>23</b>

- <sup>1</sup> Required for electrical and mechanical engineering majors only.

## Civil Engineering Major Requirements

J C ENGR 2160	Surveying	3
J C ENGR 3410	Structural Analysis	3
J C ENGR 3420	Structural Design	3
J C ENGR 3360	Civil Engineering Materials Lab	1
J C ENGR 3460	Transportation Engineering	3
J C ENGR 3760	Hydraulic Engineering	3
J C ENGR 4190	Soil Mechanics	3
J C ENGR 4200	Soil Exploration And Testing	1
J C ENGR 4600	Highway and Traffic Engineering	3
J C ENGR 4640	Foundation Engineering	3
J C ENGR 4670	Structure Design Projects	3
or J C ENGR 4910	Water Hydrology and Hydraulic Design Project	
J C ENGR 4950	Fundamentals Of Engineering Review	1
J C ENGR 4990	Senior Civil Engineering Seminar	1
J M ENGR 1413	Introduction To Engineering Design: CAD	2
J M ENGR 2410	Mechanics Of Deformable Bodies	3
J M ENGR 3360	Material Science For J C ENGR	3
J M ENGR 3700	Fluid Mechanics	3
J M ENGR 3721	Fluid Mechanics Laboratory	1
MATH 1320	Applied Statistics I	3
Civil Engineering Electives		3

## Electrical Engineering Major Requirements

J E MATH 3260	Probability And Statistics For Engineering	3
(p. 571)		
J E ENGR 2320	Introduction To Electronic Circuits	3
(p. 571)		
J E ENGR 2600	Introduction To Digital Logic And Computer Design	3
(p. 571)		
J E ENGR 3300	Engineering Electro Magnetic Principles	3
(p. 571)		
J E ENGR 3320	Power, Energy And Polyphase Circuits	3
(p. 571)		
J E ENGR 3510	Signals And Systems	3
(p. 571)		
J E ENGR 4350	Electrical Energy Laboratory	3
(p. 571)		
J E ENGR 4980	Electrical Engineering Design Projects	3
(p. 571)		
Electrical Engineering Electives 3000-4990		
<b>Total Hours</b>		<b>24</b>

## Mechanical Engineering Major Requirements

J C ENGR 4950	Fundamentals Of Engineering Review	1
(p. 571)		
J E MATH 3260	Probability And Statistics For Engineering	3
(p. 571)		
J M ENGR 1413	Introduction To Engineering Design: CAD	2
(p. 571)		
J M ENGR 1414	Introduction To Engineering Design: Project	2
(p. 571)		
J M ENGR 2410	Mechanics Of Deformable Bodies	3
(p. 571)		
J M ENGR 3221	Mechanical Design And Machine Elements	4
(p. 571)		
J M ENGR 3250	Material Science For J M ENGR	4
(p. 571)		
J M ENGR 3700	Fluid Mechanics	3
(p. 571)		
J M ENGR 3710	Principles Of Heat Transfer	3
(p. 571)		
J M ENGR 3721	Fluid Mechanics Laboratory	1
(p. 571)		
J M ENGR 3722	Heat Transfer Laboratory	1
(p. 571)		
J M ENGR 4041	Current Topics In Engineering Design	1
(p. 571)		
J M ENGR 4120	Design of Thermal Systems	3
(p. 571)		
J M ENGR 4170	Dynamic Response Of Physical Systems	2
(p. 571)		
J M ENGR 4180	Dynamic Response Laboratory	2
(p. 571)		
J M ENGR 4110	Mechanical Engineering Design Project	4
(p. 571)		
Mechanical Engineering Electives		
<b>Total Hours</b>		<b>39</b>

## Graduation Requirements

In addition to the requirements of the University of Missouri-St. Louis that apply to all candidates for undergraduate degrees, the student must earn a minimum campus grade point average of 2.0 and a minimum grade point average of 2.0 for all engineering courses attempted at the University of Missouri-St. Louis.

## Engineering Design and Engineering Science Requirements

The number of semester hours assigned to each engineering course in the Joint Undergraduate Engineering Program is further divided into hours of engineering design, engineering science, and basic science content. Engineering topics is the sum of engineering science hours and engineering design hours. The following table shows the design hours and engineering science hours for courses in the engineering programs.

Each engineering student must complete a curriculum that contains at least 48 hours of engineering topics semester hours, including all courses: pre-engineering requirements, engineering core requirements, major requirements, and electives. Civil, electrical, and mechanical engineering majors should consult with their advisers to select electives at the 3000 and 4000 level that include sufficient engineering design and engineering science content to produce the required totals. Transfer courses from other institutions do not necessarily have the same engineering science and engineering design content as their equivalents in the UMSL/ Washington University Joint Undergraduate Engineering Program. Students who include transfer courses in their curricula should consult with their advisers to be sure that these requirements are met.

## Sample Four Year Plans

BS Electrical Engineering (p. 573) BS Civil Engineering (p. 574) BS Mechanical Engineering (p. 574)

## Electrical Engineering

First Year			
Fall	Hours Spring	Hours	
MATH 1800	5 HIST 1001 or 1002	3	
CHEM 1111	5 General Education	3	
ENGL 1100	3 MATH 1900	5	
ENGR 1010	1 General Education	3	
14		14	
Second Year			
Fall	Hours Spring	Hours Summer	Hours
General Education	3 General Education	3 ENGR 2320	3
PHIL 2259	3 PHIL 3380	3	
PHYSICS 2111	5 PHYSICS 2112	5	
MATH 2000	5 ENGR 2310	3	
	MATH 2020	3	
16		17	3
Third Year			
Fall	Hours Spring	Hours Summer	Hours
J E ENGR 2300	3 J E ENGR 3300	3 J E ENGR 3510	3
J CMP SC 1002	1 J E ENGR 2330	3	
CMP SCI 1250	3 J E ENGR 2320	3

## Engineering Courses

### **ENGR 1010 Introduction To Engineering: 1 semester hour**

Course consists of a series of lectures on engineering, fields of study within engineering, the engineering profession, types of work activities, and professional registration. Introduction to team building and the teamwork approach to projects and problem-solving common in an engineering curriculum and in the engineering profession. Guest lecturers will participate.

### **ENGR 2310 Statics: 3 semester hours**

Prerequisites: MATH 1900 and PHYSICS 2111. Statics of particles and rigid bodies. Equivalent systems of forces. Distributed forces; centroids. Applications to trusses, frames, machines, beams, and cables. Friction. Moments of inertia. Principle of virtual work and applications.

### **ENGR 2320 Dynamics: 3 semester hours**

Prerequisite: ENGR 2310. Review of vector algebra and calculus. Kinematics of a particle. Newton's laws and the kinetics of a particle. Work and energy. Impulse and momentum. Kinematics of rigid bodies. General theorems for systems of particles. Kinetics of rigid bodies. The inertia tensor.

## Joint Civil Engineering Courses

### **J C ENGR 2160 Surveying: 3 semester hours**

Horizontal and vertical control surveys, including traverses, triangulation, trilateration, and leveling; basic adjustments of observations; geologic data; coordinate systems. Basic route surveying, including horizontal and vertical curves.

### **J C ENGR 3360 Civil Engineering Materials Lab: 1 semester hour**

Testing procedures, testing machines, use of laboratory equipment, analysis of data, and presentation of results. Laboratory tests on static tension, compression, bending, and torsion of metal specimens. Tests on wood. Determination of compressive and tensile strengths of concrete. Design of concrete mixes and verification of strength. Experiments in advanced topics in mechanics of materials.

### **J C ENGR 3410 Structural Analysis: 3 semester hours**

Prerequisite: J M ENGR 2410. A review of the calculation of reactions, shear, and bending moment. Definition, construction and use of influence lines. Deflections for statically determinate structures using the work method. Analysis of statically indeterminate trusses using the method of consistent deformations. Analysis of continuous beams and planar frames using the consistent deformation, slope-deflection and moment distribution methods. The influence of span on strength, stability, and economy of structures. An introduction to structural analysis software.

### **J C ENGR 3420 Structural Design: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410. Fundamentals of structural design in steel, reinforced concrete, and timber. Familiarization with the sources of various design codes and practice in interpreting them. Computer graphics applications.

### **J C ENGR 3460 Transportation Engineering: 3 semester hours**

Fundamental treatment of the planning, engineering, design, and procedural aspects of multimodal transportation are covered. Intermodal freight and urban transportation planning processes and overview of environmental, energy, and economic issues are discussed.

### **J C ENGR 3760 Hydraulic Engineering: 3 semester hours**

Prerequisites: J M ENGR 3700. The principles of open channel flow will be discussed and illustrated with practical examples. Methods for channel design, storm sewer, culvert and bridge analysis will be presented using the concepts of gradually-varied, steady flow. A design project using computerized analysis and design is used to implement concepts in a large practical application.

### **J C ENGR 4000 Independent Study: 1-6 semester hours**

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a civil engineering topic of special interest to a student performed under the direction of a faculty member.

### **J C ENGR 4190 Soil Mechanics: 3 semester hours**

Prerequisite: J M ENGR 2410, J M ENGR 3700. Basic geology as it relates to index and classification properties of soil. Exploration, sampling, and testing techniques. Soil classification systems. clay minerals and soil structures. Compaction and stabilization. Capillary, shrinkage, swelling, and frost action in soils. Effective stress, permeability, seepage, and flow nets. Consolidation and consolidation settlements. stresses in soil. Time rate of consolidation. Mohr's circle, stress path, and failure theories. Shearing strength of sand and clays.

### **J C ENGR 4200 Soil Exploration And Testing: 1 semester hour**

Prerequisite: J C ENGR 4190 (may be taken concurrently). Soil exploration; in-situ soil testing, laboratory testing of soil; processing of test data using a microcomputer; statistical analysis of test data; use of test results in the decision-making process.

### **J C ENGR 4600 Highway and Traffic Engineering: 3 semester hours**

Prerequisites: J C ENGR 2160 and Senior Standing. Study of basic highway design and traffic circulation principles. Study of design elements of alignment, profile, crosssection, intersection types, interchange types, and controlled access highways. Investigation of functional highway classification. Traffic volume, delay and accident studies. Analysis of highway capacity of uninterrupted flow, interrupted flow. Freeway, ramp and weaving sections.

### **J C ENGR 4621 Traffic Operations and Analysis: 3 semester hours**

Prerequisites: Senior Standing. Study of traffic system operations and analysis, microsimulation modeling, interchange types, and the fundamentals of highway signing and marking. Introduction into transportation analysis project management. Analysis and design techniques focus on microsimulation modeling and the Manual of Uniform Traffic Control Devices. Material learned is integrated into a major design project.

### **J C ENGR 4630 Design Of Steel Structures: 3 semester hours**

Prerequisites: J C ENGR 3410, J C ENGR 3420. Behavior and design of steel frames by "allowable stress" and "maximum strength" based on deterministic and LRFD (Load-resistance factor design) methods. Design of beams, columns, beamcolumns, plate girders, connections, multistory frames, and bridge girders. Torsional design of steel structures. Plastic analysis and design of steel structures. Miscellaneous topics in structural steel construction and design.

### **J C ENGR 4640 Foundation Engineering: 3 semester hours**

Prerequisites: J C ENGR 3420, J C ENGR 4190, J C ENGR 4200. Principal problems in design and construction of foundations for bridges and buildings. Bearing capacity of deep and shallow foundations; pressure on retaining walls and shallow foundations; pressure on retaining walls and slope stability; modern developments in piling, cofferdams, open caissons, pneumatic caissons.

**J C ENGR 4660 Advanced Design Of Concrete Structures: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410, J C ENGR 3420.  
Flexural behavior and design, strength and deformation of rectangular and nonrectangular sections, shear strength, beamcolumns, long columns, slab systems, design of frames, and footings will be covered.

**J C ENGR 4670 Structure Design Projects: 3 semester hours**

Prerequisite: Permission of instructor. Students carry out the complete design of typical and unusual building and bridge structures. Use of the computer as a design tool is emphasized. Projects are conducted in cooperation with production engineers.

**J C ENGR 4720 Legal Aspects Of Construction: 3 semester hours**

Prerequisite: Junior standing or permission of instructor. A survey of the legal problems of the construction manager. Including but limited to, liability in the areas of contracts, agency, torts, insurance, bad judgement and oversight.

**J C ENGR 4730 Construction Operations And Management: 3 semester hours**

Prerequisite: Junior standing. The construction industry, its development, components, and organization. Contracting methods. Applications and limitations. Selection of equipment using production analysis and economics. Field engineering, including form design, shoring, embankment design. Purchasing and change orders. Safety and claims.

**J C ENGR 4740 Economic Decisions In Engineering: 3 semester hours**

Prerequisite: Junior standing. Principles of economics involved in engineering decisions. Decisions between alternatives based on the efficient allocation of resources. Topics include the time element in economics, analytical techniques for economy studies, and taxes.

**J C ENGR 4830 Fundamentals of Surface Water Hydrology and Environmental Engineering: 3 semester hours**

Prerequisites: Fluid Mechanics and senior status. The principles of the hydrologic cycle including precipitation, evaporation, transpiration, infiltration, runoff, streamflow, and groundwater will be discussed and illustrated. In addition, computational fundamentals of hydrologic analysis will be presented such as unit hydrographs, routing, data analysis, and flood frequency. Elements of quantitative problems in urban stormwater systems and management, water quality and urbanization. Concepts of sustainability and green engineering such as low impact development and other best management practices will be presented. Computer software will be utilized.

**J C ENGR 4910 Water Hydrology and Hydraulic Design Project: 3 semester hours**

Prerequisites: J M ENGR 3700, J C ENGR 3760, and J C ENGR 4830.  
This course is designed to provide seniors in Hydrology and Hydraulics with a major design/facility plan project. The principals of hydrologic and hydraulic design will be utilized in developing the hydrology, hydraulics and floodplain analysis for a local watershed or land area. Hydrologic analysis is performed to size hydraulic systems and evaluate watershed and floodplain performance. The course is structured to apply hydrologic theory and modeling techniques to engineering hydrology and hydraulics for watershed analysis, floodplain delineation, and urban stormwater. The student will also consider the next generation of hydrologic computation, watershed evaluation and the importance of severe storm impacts and flood management. Consideration of sustainability and green infrastructure practices will also be included. A final written report and class presentation of the design project is included.

**J C ENGR 4950 Fundamentals Of Engineering Review: 1 semester hour**

Prerequisite: Senior Standing. The topics found in most engineer-in-training exams will be reviewed and illustrated using examples. A discussion of the importance of licensin exams and the strategies for taking these exams will be discussed. The main topics for the review include: engineering mathematics, basic chemistry, engineering mechanics, engineering economics, thermodynamics, electrical circuits, and material science.

**J C ENGR 4990 Senior Civil Engineering Seminar: 1 semester hour**

Prerequisite: Senior standing. Students will research assigned topics of importance to graduates entering the Civil Engineering profession and prepare oral presentations and a written report. Student presentations will be augmented by lectures from practicing professionals. Topics include professional registration, early career development, graduate study, effective presentations, construction quality, and case histories of civil engineering projects.

## Joint Computer Science Courses

**J CMP SC 1002 Introduction To Computing Tools: Matlab Skills: 1 semester hour**

This course is aimed at the acquisition of MATLAB skills through hands-on familiarization and practice. Students practice the array, vector, and meshgrid representations, programming and plotting, and apply these skills to solve numerical problems and generate reports. (J CMP SC 1002 and CMP SCI 1250 can substitute for J CMP SC 1360).

## Joint Electrical Engineering Courses

**J E ENGR 2300 Introduction To Electrical Networks: 3 semester hours**

Elements, sources, and interconnects. Ohm's and Kirchoff's laws, superposition and Thevenin's theorem; the resistive circuit, transient analysis, sinusoidal analysis, and frequency response.

**J E ENGR 2320 Introduction To Electronic Circuits: 3 semester hours**

Prerequisites: J E ENGR 2300. Introduction to contemporary electronic devices and their circuit applications. Terminal characteristics of active semiconductor devices. Incremental and D-C models of junction diodes, bipolar transistor (BJTs), and metal-oxide semiconductor field effect transistors (MOSFETs) are developed and used to design single-and multi-stage amplifiers, Models of the BJT and MOSFET in cutoff and saturation regions are used to design digital circuits.

**J E ENGR 2330 Electrical And Electronic Circuits Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2300. Lectures and laboratory exercises related to sophomore topics in introductory networks and basic electronics.

**J E ENGR 2600 Introduction To Digital Logic And Computer Design: 3 semester hours**

Prerequisite: J CMP SC 1260. Digital computers and digital information-processing system; Boolean algebra, principles and methodology of logical design; machine language programming; register transfer logic; microprocessor hardware, software, and interfacing; fundamental of digital circuits and systems; computer organization and control; memory systems; arithmetic unit design. Occasional laboratory exercises.

**J E ENGR 3300 Engineering Electro Magnetic Principles: 3 semester hours**

Electromagnetic theory as applied to electrical engineering; vector calculus; electrostatics and magnetostatics; Maxwell's equations, including Poynting's theorem and boundary conditions; uniform plane-wave propagation; transmission lines-TEM modes, including treatment of general, lossless line, and pulse propagation; introduction to guided waves; introduction to radiation and scattering concepts.

**J E ENGR 3310 Electronics Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2300, J E ENGR 2330. Laboratory exercises for juniors covering topics in computer-aided measurements, computer simulation, and electronic circuits.

**J E ENGR 3320 Power, Energy And Polyphase Circuits: 3 semester hours**

Prerequisite: J E ENGR 2300. Fundamental concepts of power and energy; electrical measurements; physical and electrical arrangement of electrical power systems; polyphase circuit theory and calculations; principle elements of electrical systems such as transformers, rotating machines, control, and protective devices, their description and characteristics; elements of industrial power system design.

**J E ENGR 3360 Principles Of Electronic Devices: 3 semester hours**

Introduction to the solid-state physics of electronic materials and devices, including semiconductors, metals, insulators, diodes and transistors, Crystals growth technology and fundamental properties of crystals. Electronic properties and band structure of electronic materials, and electron transport in semiconductor materials. Fabrication of pn junction diodes, metal-semiconductor junctions, and transistors and integrated-circuit chips. Fundamental electrical properties of rectifying diodes and light-emitting diodes, bipolar transistors and field effect transistors. Device physics of diodes and transistors, large-signal electrical behavior and high-frequency properties.

**J E ENGR 3370 Electronic Devices And Circuits: 3 semester hours**

Prerequisites: J E ENGR 2320. Introduction to semiconductor electronic devices: transistors and diodes. Device electrical DC and high-frequency characteristics. Bipolar transistors, field-effect transistors for analog electronics applications. Transistors fabrication as discrete devices and as integrated-circuit chips. Large-signal analysis of transistor amplifiers: voltage gain, distortion, input resistance and output resistance. Analysis of multitransistor amplifiers: Darlington, Cascode, and coupled-pair configurations. Half-circuit concepts, differential-mode gain, common-mode gain, and differential-to-single-ended conversion. Transistor current sources, active loads, and power-amplifier stages. Applications to operational amplifiers and feedback circuits.

**J E ENGR 3510 Signals And Systems: 3 semester hours**

Prerequisites: J E ENGR 2300 and J E MATH 3170. Elementary concepts of continuous-time and discrete-time signals and systems. Linear time-invariant (LTI) systems, impulse response, convolution, Fourier series, Fourier transforms, and frequency-domain analysis of LTI systems. Laplace transforms, Z-transforms, and rational function descriptions of LTI systems. Principles of sampling and modulation. Students participate weekly in recitation sections to develop oral communications skills using class materials.

**J E ENGR 3620 Computer Architecture: 3 semester hours**

Prerequisite: J E ENGR 2600. Study of interaction and design philosophy of hardware and software for digital computer systems: Machine organization, data structures, I/O considerations. Comparison of minicomputer architectures.

**J E ENGR 4000 Independent Study: 1-3 semester hours**

Prerequisites: Senior in Good Standing. Opportunities to acquire experience outside the classroom setting and to work closely with individual members of the faculty. A final report must be submitted to the department. Open as a senior elective only. Hours and credit to be arranged. Credit variable, maximum credit per semester 3 hours. Maximum program total credit 3 hours.

**J E ENGR 4050 Reliability And Quality Control: 3 semester hours**

Prerequisites: J E MATH 3260 or MATH 1320. An integrated analysis of reliability and quality control function in manufacturing. Statistical process control, analysis, reliability prediction, design, testing, failure analysis and prevention, maintainability, availability, and safety are discussed and related. Qualitative and quantitative aspects of statistical quality control and reliability are introduced in the context of manufacturing.

**J E ENGR 4340 Solid State Power Circuits And Applications: 3 semester hours**

Prerequisite: J E ENGR 2320, J E ENGR 3510. Study of the strategies and applications of power control using solid-state semiconductor devices. Survey of generic power electronic converters. Applications to power supplies, motor drives, and consumer electronics. Introduction to power diodes, thyristors, and MOSFETs.

**J E ENGR 4350 Electrical Energy Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2330. Experimental studies of principles important in modern electrical energy systems. Topics: power measurement, transformers, batteries, static frequency converters, thermoelectric cooling, solar cells, electrical lighting, induction, commutator, and brushless motors, synchronous machines.

**J E ENGR 4360 Energy Alternatives: 3 semester hours**

Prerequisites: J E ENGR 2300, or J M ENGR 3200. This course introduces engineering analyses of the human uses of energy. Both non-renewable (e.g., oil, natural gas, coal, nuclear) and sustainable (e.g., hydropower, solar, wind, biomass) resources are covered. Topics include the engineer's role in harvesting, production, storage, conversion, delivery, and uses of energy. Students will learn system analysis, design, integration, optimization, and operational aspects of selected resources delivery systems, and end uses. Technical content will include site selection, conversion and delivery efficiency calculations, engineering economic analyses, control systems, and energy resource systematic classification. Measure will consist of a mix of homework, quizzes, tests, class participation, and projects.

**J E ENGR 4410 Control Systems I: 3 semester hours**

Same as J M ENGR 4310. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multiloop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag and lead-lag networks. Synthesis by Bode plots and root-locus diagrams. Introduction to state-variable techniques, state-transition matrix, state-variable feedback.

**J E ENGR 4520 Power Systems Analysis: 3 semester hours**

Prerequisite: J E ENGR 3320. Introduction to the modeling and elements of power systems; machines, lines, and loads; load flow methods and applications; short circuit analysis using symmetrical components on symmetrical and unsymmetrical faults; methods of economic operation of power systems and contingency; state estimators, stability, and introduction of the independent system operator.

**J E ENGR 4710 Communications Theory And Systems: 3 semester hours**

Prerequisites: J E ENGR 3510 and J E MATH 3260. Introduction to the concepts of transmission of information via communication channels. Amplitude and angle modulation for the transmission of continuous-time signals. Analog-to-digital conversion and pulse code modulation. Transmission of digital data. Introduction to random signals and noise and their effects on communication. Optimum detection systems in the presence of noise. Elementary information theory. Overview of various communication technologies such as radio, television, telephone networks, data communication, satellites, optical fiber, and cellular radio.

**J E ENGR 4720 Internet Communications: 3 semester hours**

This course will introduce and cover the architecture, protocols, security, and quality of service (QoS) of Internet Communications. Starting with the design principles and architecture of the Internet, communication applications such as Voice over IP (VoIP), video conferencing, and presence and instant messaging will be covered. Protocols developed by the Internet Engineering Task Force (IETF) including IP, TCP, UDP, DNS, SIP, XMPP, and ENUM will be studied. Latest areas of research including the Service Oriented Architecture (SOA) and peer-to-peer (P2P) architectures for Internet Communications will be covered.

**J E ENGR 4820 Digital Signal Processing: 3 semester hours**

Prerequisite: J E ENGR 3510. Introduction to analysis and synthesis of discrete-time linear time-invariant (LTI) systems. Discrete-time convolution, discrete-time Fourier transform, Z-transform, rational function descriptions of discrete-time LTI systems. Sampling, analog-to-digital conversion and digital processing of analog signals. Techniques for the design of finite impulse response (FIR) and infinite impulse response (IIR) digital filters. Hardware implementation of digital filters and finite register effects. The discrete Fourier transform and the fast Fourier transform (FFT) algorithm.

**J E ENGR 4980 Electrical Engineering Design Projects: 3 semester hours**

Prerequisites: Senior standing. Working in teams, students address design tasks assigned by faculty. Each student participates in one or more design projects in a semester. Projects are chosen to emphasize the design process, with the designer choosing one of several paths to a possible result. Collaboration with industry and all divisions of the university is encouraged.

**Joint Engineering Mathematics Courses****J E MATH 3170 Engineering Mathematics: 4 semester hours**

Prerequisite: MATH 2020 or equivalent. The Laplace transform and applications; series solutions of differential equations, Bessel's equation, Legendre's equation, special functions; matrices, eigenvalues, and eigenfunctions; Vector analysis and applications; boundary value problems and spectral representation; Fourier series and Fourier integrals; solution of partial differential equations of mathematical physics.

**J E MATH 3260 Probability And Statistics For Engineering: 3 semester hours**

Prerequisites: MATH 2000. Study of probability and statistics together with engineering applications. Probability and statistics: random variables, distribution functions, density functions, expectations, means, variances, combinatorial probability, geometric probability, normal random variables, joint distribution, independence, correlation, conditional probability, Bayes theorem, the law of large numbers, the central limit theorem. Applications: reliability, quality control, acceptance sampling, linear regression, design and analysis of experiments, estimation, hypothesis testing. Examples are taken from engineering applications. This course is required for electrical and mechanical engineering majors.

**Joint Mechanical Engineering Courses****J M ENGR 1413 Introduction To Engineering Design: CAD: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students learn the fundamentals of spatial reasoning and graphical representation. Freehand sketching, including pictorial and orthographic views, are applied to the design process. Computer modeling techniques provide accuracy, analysis, and visualization tools necessary for the design of devices and machines. Topics in detailing design for production, including fasteners, dimensioning, tolerancing, and creation of part and assembly drawings are also included.

**J M ENGR 1414 Introduction To Engineering Design: Project: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students first complete a series of experiments that introduce physical phenomena related to mechanical engineering. Understanding is achieved by designing and building simple devices and machines. The course proceeds to a design contest in which the students design and build from a kit of parts a more significant machine that competes in a contest held at the end of the course. The course is open to all and is appropriate for anyone interested in mechanical devices, design, and the design process.

**J M ENGR 2410 Mechanics Of Deformable Bodies: 3 semester hours**

Prerequisites: MATH 1900 and ENGR 2310. Normal and shear stresses and strains. Stress-strain diagrams. Hooke's law and elastic energy. Thermal stresses. Stresses in beams, columns, torsional members, and pressure vessels. Elastic deflection of beams and shafts. Statically indeterminate structures. Mohr's circle of stress. Stability concepts.

**J M ENGR 3010 Computer Aided Design: 3 semester hours**

Prerequisite: J M ENGR 1413. Computer aided design, analysis and optimization of parts and assemblies; solid modeling of complex surfaces, creation of detail drawings, dimensioning and tolerancing; assembly modeling, assembly constraints, interference checking; motion constraints, force and acceleration analysis, thermal analysis; part optimization for weight, strength and thermal characteristics using Unigraphics software.

**J M ENGR 3200 Thermodynamics: 3 semester hours**

Prerequisites: MATH 1900, CHEM 1111 and PHYSICS 2111. Classical thermodynamics; thermodynamic properties; work and heat; first and second laws. Entropy, irreversibility, availability. Application to engineering systems.

**J M ENGR 3221 Mechanical Design And Machine Elements: 4 semester hours**

Prerequisites: J M ENGR 1414, J M ENGR 1415, J M ENGR 2410, J E MATH 3170. Provides a thorough overview of the steps in the engineering design process and introduces analytical/quantitative techniques applicable to each step. Topics include recognition of need, specification formulation, concept generation, concept selection, embodiment, and detail design. Includes an introduction to several classes of machine elements such as bearings, gears, belts, and springs. Underlying analytical model of the machine elements are presented along with guidelines about designing and choosing such elements for practical applications. A case study from industry will emphasize how the steps of the design process were done as well as the rationale for choosing particular machine elements.

**J M ENGR 3250 Material Science For J M ENGR: 4 semester hours**

Prerequisites: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

**J M ENGR 3360 Material Science For J C ENGR: 3 semester hours**

Same as J M ENGR 3250, but without the lab. Prerequisite: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

**J M ENGR 3700 Fluid Mechanics: 3 semester hours**

Prerequisites: J E MATH 3170 and ENGR 2320. Fundamental concepts of fluids as continua. Viscosity. Flow field: velocity, vorticity, streamlines. Fluid statics: hydrostatic forces manometers. Conservation of mass and momentum. Incompressible inviscid flow. Dimensional analysis and similitude. Flow in pipes and ducts. Flow measurement. Boundary-layer concepts. Flow in open channels.

**J M ENGR 3710 Principles Of Heat Transfer: 3 semester hours**

Prerequisites: J M ENGR 3200, J M ENGR 3700 and J E MATH 3170. Introductory treatment of the principles of heat transfer by conduction, convection, or radiation. Mathematical analysis of steady and unsteady conduction along with numerical methods. Analytical and semiempirical methods of forced and natural convection systems. Heat exchangers: LMTD and e-NTU analysis. Boiling and condensation heat transfer. Radiation between blackbody and real surfaces. Radiation network analysis.

**J M ENGR 3721 Fluid Mechanics Laboratory: 1 semester hour**

Prerequisites: J M ENGR 3700. Physical laboratory exercises focusing on fluid properties and flow phenomena covered in J M ENGR 3700. Calibration and use of a variety of equipment; acquisition, processing, and analysis of data by manual as well as automated methods.

**J M ENGR 3722 Heat Transfer Laboratory: 1 semester hour**

Prerequisites: J M ENGR 3721 and J M ENGR 3710. Physical laboratory exercises, including some numerical simulations and computational exercises, focusing on heat-transfer phenomena covered in J M ENGR 3710. Calibration and use of variety of laboratory instrumentation; acquisition, processing, and analysis of data by manual as well as automated methods; training in formal report writing.

**J M ENGR 3750 Fluid Control and Power Systems Theory And Practice: 3 semester hours**

Prerequisite: J M ENGR 3700. Topics to be covered include: design of hydraulic and pneumatic control and power systems using advanced concepts and analytical tools; analysis of fluid flow through small orifices and between parallel and inclined planes; theory of spool and flapper valves; physical configuration of practical components: pumps, motors, fluid lines and valves, accumulators and storage devices; integration of components into practical systems, development of realistic performance diagrams using MATLAB Symulink; application of performance diagrams in design and analysis of fluid power systems.

**J M ENGR 4000 Independent Study: 1-3 semester hours**

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a mechanical engineering topic of special interest to a student performed under the direction of a faculty member.

**J M ENGR 4041 Current Topics In Engineering Design: 1 semester hour**

Case studies of engineering failures, class discussion & short written papers are used to illustrate and stress the importance of engineering teamwork, ethics, and professional standards within the mechanical engineering discipline. Working in teams students develop and present a case study on a topic of their choice. Guest lecturers introduce contemporary topics such as product liability, environmental regulations, green design, appropriate technologies, and concurrent engineering.

**J M ENGR 4110 Mechanical Engineering Design Project: 4 semester hours**

Prerequisites: J M ENGR 3221. Feasibility study of an open-ended, original design or a creative redesign of a mechanical component or system requiring the application of engineering science principles. Feasibility is subject to economic, safety, legal, environmental, ethical, aesthetic, and other constraints in a competitive manufacturing environment. Project teams perform the detailed design and optimization of the concept developed in the feasibility study. Presentations and reports with manufacturing drawings and prototypes are completed by each team.

**J M ENGR 4120 Design of Thermal Systems: 3 semester hours**

Prerequisites: Senior Standing. Analysis and design of advanced thermo-fluid systems. Student teams participate in the design process which could involve research, design formulation, codes, standards, engineering economics, a design project report, and formal presentations. Topics include: thermal-fluid systems and components, such as power, heating, and refrigeration systems, pumps, fans, compressors, combustors, turbines, nozzles, coils, heat exchangers and piping.

**J M ENGR 4170 Dynamic Response Of Physical Systems: 2 semester hours**

Prerequisites: ENGR 2320 and J E MATH 3170, J M ENGR 4170 and J M ENGR 4180 must be taken in the same semester. Free and forced vibration of mechanical systems with lumped inertia, springs, and dampers. Methods of Laplace transform, complex harmonic balance, and Fourier series. Electrical analogs. Introduction to Lagrange's equations of motion and matrix formulations. Transient response of continuous systems by partial differential equations, by rayleigh methods, and by lumped parameters.

**J M ENGR 4180 Dynamic Response Laboratory: 2 semester hours**

PREREQUISITES: J M ENGR 4170 and J M ENGR 4180 must be taken during the same semester. Laboratory problems focusing on materials covered in J M ENGR 4170.

**J M ENGR 4250 Material Selection In Engineering Design: 3 semester hours**

PREREQUISITES: Senior standing. Analysis of the scientific bases of material behavior in the light of research contributions of the last 20 years. Development of a rational approach to the selection of materials to meet a wide range of design requirements for conventional and advanced applications. Although emphasis will be placed on mechanical properties, other properties of interest in design will be discussed, e.g., acoustical, optical and thermal.

**J M ENGR 4310 Control Systems I: 3 semester hours**

Same as J E ENGR 4410. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multi-loop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag, and lead-lag networks. Synthesis by Bode plot plots and root-locus diagrams. Introduction to state-variable techniques, state transition matrix, state-variable feedback.

**J M ENGR 4440 Solar Energy: 3 semester hours**

Prerequisites: J M ENGR 3200, J M ENGR 3700, and J M ENGR 3710. This course will cover the following topics: extraterrestrial solar radiation; solar radiation on the earth's surface; weather bureau data; review of selected topics in heat transfer; methods of solar energy collection including flat panel and concentrating collectors; solar energy storage; transient and long-term solar system and performance.

***J M ENGR 4630 Nanotechnology: Concepts And Applications: 3 semester hours***

.

***J M ENGR 4700 Sustainable Environmental Building Systems: 3 semester hours***

Sustainable design of building lighting and HVAC systems considering performance, life-cycle cost and downstream environmental impact. Criteria, codes and standards for comfort, air quality, noise/vibration and illumination. Life cycle and other investment methods to integrate energy consumption/conservation, utility rates, initial cost, system/component longevity, maintenance cost and building productivity. Direct and secondary contributions to acid rain, global warming and ozone depletion.

***J M ENGR 4810 HVAC Analysis and Design I: 3 semester hours***

PREREQUISITES: Senior standing. Moist air properties and the psychrometric chart. Classic moist air processes and design procedures for heating and cooling systems. Design of heating, ventilating, and air conditioning systems for indoor environmental comfort and health. Basics of heat transfer in building structures. Solar radiation effects on building heat transfer. Calculation procedures for the analysis of heating and cooling loads in buildings.

***J M ENGR 4820 HVAC Analysis and Design II: 3 semester hours***

PREREQUISITES: Senior standing. Energy calculations to estimate the quantity of energy needed to heat and cool building structures. Fundamentals of incompressible flow, basics of centrifugal pump performance, and design procedures for water piping systems. Space air diffuser design to assure that temperatures, humidities, and air velocities within occupied spaces are acceptable. Air duct design and fan analysis for optimally distributing air through building air duct systems. Performance analysis of refrigeration systems, including the effects of pressure losses and heat transfer. Direct contact heat and mass transfer.

***J M ENGR 4900 Engineering Project Management: 3 semester hours***

Basic fundamentals and advanced concepts of engineering project management applicable to projects and programs, both large and small. Project management skills, techniques, systems, software and application of management science principles will be covered and related to research, engineering, architectural, and construction projects from initial evaluations through approval, design, procurement, construction and startup.

# International Studies and Programs

## General Information

The Office of International Studies and Programs (ISP) supports academic programs, seminars, and conferences designed to promote research in international studies, improve teaching of international studies, and encourage an interest in international affairs in the university and area communities.

ISP houses the Joint Center for East Asian Studies of UMSL and Washington University, the E. Desmond Lee Global Ethnic Collaborative, the Karakas Family Foundation Alliance for the Advancement of Hellenic Studies, and the Endowed Professorships in African/African American Studies, Chinese Studies, Greek Studies, international education, Irish Studies, Japanese Studies, the German Culture Center and the Greek Culture Center.

## Fellows

Each year a number of UMSL faculty are appointed as research Fellows.

## Study Abroad and Exchange Programs

The Study Abroad section of this Bulletin contains details about campus study abroad and international exchange programs. ISP's Study Abroad staff administer those programs.

## International Student and Scholar Services

International Student and Scholar Services provides services for international students and scholars, including admissions, visa and immigration matters, credential evaluations, health insurance, tax matters, nonacademic advising, initial campus arrival, orientation, social activities, and referrals to other campus units.

## Minor in African/African American Studies

Core Course (Required):

C I ST 2000	Introduction to African/African American Studies	3
-------------	--	---

Select at least four of the following electives: 12

ANTHRO 2124	Cultures Of Africa (Core Course (Required))
ANTHRO 3235	Women In Subsaharan Africa: A Contemporary Perspective
ART HS 1105	Introduction To The Arts Of Africa
HIST 1003	African-American History
HIST 1061	African Civilization: From The Beginning of Humanity to The End of The Slave Trade
HIST 1062	African Civilization II: From Colonies to Nations
HIST 2016	African-American History: From Slavery to Civil Rights
HIST 2017	African-American History: From Civil Rights To Black Power
HIST 2063	African Diaspora To Abolition of the Slave Trade
HIST 2064	African Diaspora in the Age of Migration
M H L T 1180	Musical Journal Through Africa
POL SCI 2320	African Americans And The Political System
POL SCI 2580	African Politics

POL SCI 3580 African Diasporas: Identity Politics And Transnational Communities

Total Hours

15

## Undergraduate Certificate Programs

The Office of International Studies and Programs (ISP) offers a wide variety of certificates, which provide our students the opportunity to develop expertise in international subjects. These programs usually combine course offerings from several departments so the subject is examined from a multidisciplinary approach. While most persons who earn certificates do so in the process of completing their undergraduate degree, a certificate may be completed by non-degree seeking students.

## East Asian Studies Certificate

First- and second-year Chinese, Japanese, or other appropriate Asian language 20

HIST 1041	East Asian Civilization	3
-----------	-------------------------	---

HIST 1042	East Asian Civilization	3
-----------	-------------------------	---

Select one course in three of the following areas:	9
--	---

### Area 1: Anthropology

ANTHRO 2111	Cultures Of East Asia
-------------	-----------------------

ANTHRO 2191	Special Topics In Non-Western Culture
-------------	---------------------------------------

### Area 2: Art and Art History

ART HS 1108	Introduction To The Arts Of Asia
-------------	----------------------------------

ART HS 4408	Topics In The Arts Of Asia
-------------	----------------------------

### Area 3: Business Administration

INTL BUS 3281	Business In China
---------------	-------------------

INTL BUS 3284	The Japanese Management System
---------------	--------------------------------

### Area 4: Languages and Cultures-Chinese

CHINESE 1005	Chinese Calligraphy and Writing in East Asia
--------------	--

CHINESE 1199	Special Topics: Language Immersion: Chinese
--------------	---

CHINESE 2150	Chinese Literature In Translation
--------------	-----------------------------------

CHINESE 2190	Special Readings
--------------	------------------

CHINESE 2199	Special Topics: Language Immersion: Chinese
--------------	---

### Area 5: Foreign Languages and Literatures-Japanese

JAPAN 1003	Japanese III
------------	--------------

JAPAN 1005	Chinese Calligraphy and Writing in East Asia
------------	--

JAPAN 1199	Special Topics: Language Immersion: Japanese
------------	--

JAPAN 2150	Classical Japanese Literature In Translation
------------	--

JAPAN 2190	Special Readings
------------	------------------

JAPAN 2199	Special Topic s: Language Immersion: Japanese
------------	---

JAPAN 3201	Intermediate Japanese III
------------	---------------------------

JAPAN 3202	Intermediate Japanese IV
------------	--------------------------

JAPAN 3290	Special Readings
------------	------------------

JAPAN 4390	Special Readings
------------	------------------

### Area 6: History

HIST 3031	History Of Women In The United States
-----------	---------------------------------------

HIST 3032	History Of Women In Comparative Cultures	
HIST 3033	Sexuality And Gender Theory	

**Area 7: Music**

M H L T 1090	Non-Western Music I	
--------------	---------------------	--

**Area 8: Philosophy**

PHIL 1120	Asian Philosophy	
-----------	------------------	--

**Area 9: Political Science**

POL SCI 2550	East Asian Politics	
--------------	---------------------	--

**Area 10: Social Work**

SOC WK 2330	Asians In Migration	
-------------	---------------------	--

**Independent Study Course**

Students seeking the certificate must complete an independent study course in which a research paper will be written focusing upon some aspect of East Asian Studies. The topic should be approved in advance by International Studies and Programs.	3
--	---

<b>Total Hours</b>	<b>38</b>
--------------------	-----------

**Modern European Studies Certificate**

Four semesters of college work or the equivalent in a modern European foreign language.	20
---	----

HIST 1032	Topics In European Civilization: 1715 To The Present	3
-----------	--	---

Select one course each from at least four of the following areas: <sup>1</sup>	12
--	----

**Anthropology**

ANTHRO 2192	Anthropological Perspectives on Western Culture	
-------------	---	--

**Art and Art History**

ART HS 2250	Nineteenth Century European Art	
ART HS 2255	Modern Art	
ART HS 4445	Topics In 17Th And 18Th Century European Art	
ART HS 4455	Topics In Modern Art	

**Business Administration**

MKTG 3787	Marketing in the European Union	
-----------	---------------------------------	--

**English**

ENGL 2280	Contemporary World Literature	
ENGL 2320	English Literature After 1790	
ENGL 4450	The Eighteenth-Century English Novel	
ENGL 4540	The Nineteenth-Century English Novel	
ENGL 4580	Literature Of The Late Nineteenth And Early Twentieth Centuries	
ENGL 4750	Modern British Fiction	
ENGL 4920	Major Works Of European Fiction	

**History**

HIST 2090	Europe in the Eighteenth Century: From the Glorious Revolution to the Napoleonic Era	
HIST 2091	Europe in the Nineteenth Century: From Waterloo to World War I	
HIST 3092	Europe, 1900-1950: War And Upheaval	
HIST 3093	Europe, 1950-Present: Peace And Prosperity	

**Languages and Cultures**

French
FRENCH 3211 Contemporary French Culture
FRENCH 3281 French Literature and Culture After 1800

FRENCH 4350	Studies in Eighteenth-Century French Literature and Culture	
-------------	---	--

FRENCH 4360	Studies in Nineteenth-Century French Literature and Culture	
-------------	---	--

**German**

GERMAN 2180	Intermediate Readings In German	
-------------	---------------------------------	--

GERMAN 3201	Introduction to German Literature	
-------------	-----------------------------------	--

GERMAN 3210	German Culture And Civilization	
-------------	---------------------------------	--

GERMAN 3211	Topics in German Culture	
-------------	--------------------------	--

GERMAN 3281	German Literature and Culture II: Romanticism - Present	
-------------	---	--

GERMAN 4311	Special Topics In German Culture	
-------------	----------------------------------	--

GERMAN 4398	Survey Of German Literature Part II	
-------------	-------------------------------------	--

**Modern Greek**

GRK MOD 2150	Modern Greek Literature In Translation	
--------------	--	--

GRK MOD 2190	Special Readings	
--------------	------------------	--

**Spanish**

SPANISH 4311	Special Topics In Hispanic Culture	
--------------	------------------------------------	--

SPANISH 4315	Spanish Literature From 1939 To The Present	
--------------	---	--

SPANISH 4325	Poetry And Drama Of The Golden Age	
--------------	------------------------------------	--

**Music**

M H L T 4240	Music Of The Classic Period	
--------------	-----------------------------	--

M H L T 4250	Music Of The Romantic Period	
--------------	------------------------------	--

**Philosophy**

PHIL 1111	Western Philosophy II: Descartes To The Present	
-----------	---	--

PHIL 3303	Early Modern Philosophy	
-----------	-------------------------	--

PHIL 3304	Kant And Nineteenth Century Philosophy	
-----------	--	--

PHIL 3305	Twentieth Century Philosophy	
-----------	------------------------------	--

PHIL 3369	The Marxist Heritage	
-----------	----------------------	--

**Political Science**

POL SCI 2510	The Politics of European Union	
--------------	--------------------------------	--

POL SCI 3595	Studies In Comparative Politics *	
--------------	-----------------------------------	--

POL SCI 3890	Studies In International Relations *	
--------------	--------------------------------------	--

POL SCI 4510	Comparative Public Policy And Administration *	
--------------	--	--

**Independent Study Course**

Students seeking the certificate must complete an independent study course in which a research paper will be written focusing upon aspect of Modern European Studies. The topics should be approved in advance by International Studies and Programs.	3
---	---

<b>Total Hours</b>	<b>38</b>
--------------------	-----------

- <sup>1</sup> Students should consult International Studies and Programs advisers to determine how these courses can best be arranged to meet their interests.

## Greek Studies Certificate

### Greek Language

Select at least three courses from the following: 9

#### Ancient Greek

GRK ANC 1001 Ancient Greek I  
(p. 581)

GRK ANC 1002 Ancient Greek II  
(p. 581)

GRK ANC 2101 Intermediate Ancient Greek Language And Culture  
(p. 581)

GRK ANC 2151 Greek And Latin In English Today  
(p. 581)

GRK ANC 2152 A Brief Introduction to Greek and Latin in English Today  
(p. 581)

#### Modern Greek

GRK MOD 1001 Modern Greek I  
(p. 581)

GRK MOD 1002 Modern Greek II  
(p. 581)

GRK MOD 2101 Intermediate Modern Greek Language And Culture  
(p. 581)

GRK MOD 2102 Intermediate Modern Greek Language And Culture II  
(p. 581)

GRK MOD 2150 Modern Greek Literature In Translation  
(p. 581)

GRK MOD 2190 Special Readings  
(p. 581)

Select at least three courses from the following: 9

ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture  
(p. 581)

ANTHRO 1052 The Olympic Games: Ideals And Reality  
(p. 581)

ANTHRO 2035 Ancient Greek Civilization And Culture  
(p. 581)

ANTHRO/HIST 2117 Greek History And Culture  
(p. 581)

ANTHRO 2192 Anthropological Perspectives on Western Culture  
(p. 581) (only when appropriate)

ANTHRO 3225 Ritual, Death And Sports: Archaeology Of Greek Mythology  
(p. 581)

ANTHRO 4309 Archaeological Field School (only when appropriate)  
(p. 581)

ANTHRO 4350 Special Study  
(p. 581)

ART HS 2211 Art And Archaeology Of The Ancient World  
(p. 581)

ART HS 2212 Greek Art And Archaeology  
(p. 581)

ART HS 3390 Special Study (only when appropriate)  
(p. 581)

ART HS 4411 Topics In Ancient Art And Archaeology (only when appropriate)  
(p. 581)

ART HS 4490 Special Study (only when appropriate)  
(p. 581)

HIST 1030 The Ancient Empires of the Mediterranean  
(p. 581)

HIST/ANTHRO 2117/GRK MOD 2150 Greek History And Culture  
(p. 581)

GRK MOD 2150 Modern Greek Literature In Translation  
(p. 581)

GRK MOD 2190 Special Readings <sup>1</sup>  
(p. 581)

M H L T 4270 A History Of Byzantine Music And Hymnography  
(p. 581)

PHIL 3301 Ancient Philosophy  
(p. 581)

PHIL 4401 Plato  
(p. 581)

PHIL 4402 Aristotle  
(p. 581)

**Total Hours 18**

- <sup>1</sup> Note: GRK MOD courses will count for either the language requirement or the focus area requirement but not for both.

## International Business Certificate

Students must complete a minimum of 12 credit hours in some approved overseas study program focusing on international business which is approved by the College of Business Administration. 12

Select one course from Area 1 and one from Area 2: 6

### Area 1: Business Administration

INTL BUS 3280 The Law Of International Business Transactions  
(p. 581)

INTL BUS/FINANCE 3580 International Corporate Finance  
(p. 581)

INTL BUS 3281 Business In China  
(p. 581)

INTL BUS/ FINANCE 3582 (p. 581)	International Investments
INTL BUS/ MGMT 3680 (p. 581)	International Management
INTL BUS 3282 (p. 581)	Managing The Global Workforce
INTL BUS 3284 (p. 581)	The Japanese Management System
MGMT 3685 (p. 581)	Role Of The Global Corporation
INTL BUS 3282 (p. 581)	Managing The Global Workforce
INTL BUS 4289 (p. 581)	International Stretegic Management
INTL BUS/ MKTG 3780 (p. 581)	International Marketing
INTL BUS/ MKTG 3787 (p. 581)	Marketing in the European Union

**Area 2: International Studies <sup>1</sup>**

ANTHRO 2111 (p. 581)	Cultures Of East Asia
ANTHRO 2114 (p. 581)	Cultures Of The Near And Middle East
ANTHRO 2124 (p. 581)	Cultures Of Africa
ECON 3300 (p. 581)	International Economic Analysis
ECON 3320 (p. 581)	Economic Development
POL SCI 3830 (p. 581)	International Political Economy
POL SCI 3850 (p. 581)	International Organizations And Global Problem-Solving
SOC 1241 (p. 581)	Globalization and Social Change
SOC 4354 (p. 581)	Sociology Of Business And Work Settings

An independent study course is not required for this certificate option.

**Total Hours** **18**

<sup>1</sup> In lieu of a course from Area 2, students may substitute one course (3 credit hours) at the advanced level of a foreign language. Advanced level is defined as a course beyond the 13 credit hour introductory language sequence.

## International Affairs Certificate

Satisfactory completion of the language requirements for the degree program in which a student is enrolled.

POL SCI 1800 (p. 581)	World Politics	3
Select four courses from at least three of the following eleven areas:		12

**Area 1: Anthropology**

ANTHRO 3236 Sex Trafficking in Cross-Cultural Perspective  
(p. 581)

**Area 2: Biology**

BIOL 1202 Environmental Biology  
(p. 581)

BIOL 3202 Conservation Biology  
(p. 581)

**Area 3: Business Administration**

INTL BUS  
3299  
(p. 581) Independent Study In International Business |

INTL BUS  
3280  
(p. 581) The Law Of International Business Transactions |

FINANCE  
3580  
(p. 581) International Corporate Finance |

<b>Total Hours</b>		<b>31</b>

## Graduate Certificate in International Studies

A Graduate Certificate in International Studies is a program of study featuring advanced multidisciplinary course work designed for individuals, including teachers and other professionals, who wish to expand their

knowledge and understanding of international and cross-cultural affairs. The Certificate is sponsored by the Office of International Studies and Programs and the Departments of Economics, History, Foreign Languages and Literatures, and Political Science. A broad set of course offerings is available in these and other departments, with the flexibility for students to tailor the program to their particular interests and needs. The program has been developed as a vehicle for bringing together the resources of a distinguished faculty in international studies and for providing an opportunity for further graduate learning. Applicants to the Certificate program must meet the general requirements for admission to Graduate School as explained in the graduate study section of this Bulletin.

**For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website:** <http://umsl.edu/go/Bpv>.

Applicants to the Certificate program must meet the general requirements for admission to Graduate School as explained in the graduate study section of this Bulletin. The Certificate is awarded after completion of 18 hours, including a minimum of 12 hours drawn from a list of core courses and an additional six hours selected from a wide variety of offerings in eight different disciplines. No more than 12 hours may be from any one discipline. Students may simultaneously earn a graduate degree and count credits earned in their degree program toward the Certificate when appropriate.

## Requirements

Select three from the following list of core courses: 12

Business Administration	
FINANCE 6580	International Financial Management
LOG OM 5381	International Logistics And Operations Management
ACCTNG 5480	International Accounting
Economics	
ECON 5300	International Trade
ECON 5301	International Monetary Analysis
History	
HIST 6115	Historical Thinking in Theory and Practice I
Political Science	
POL SCI 6450	Proseminar In Comparative Politics
POL SCI 6451	Seminar In Comparative Politics
POL SCI 6480	Proseminar In International Relations
POL SCI 6481	Seminar In International Relations
POL SCI 6488	Studies In International Relations
Sociology	

Select two of the following: 6

Economics	
ECON 4980	Special Readings
English	
ENGL 4920	Major Works Of European Fiction
History	
HIST 4001	Special Readings
Languages and Culture	
FRENCH 4360	Studies in Nineteenth-Century French Literature and Culture

SPANISH 4315	Spanish Literature From 1939 To The Present
SPANISH 4345	Spanish American Literature Of The Twentieth Century
SPANISH 4351	Spanish American Fiction In The Twentieth Century
Music	
M H L T 4250	Music Of The Romantic Period
M H L T 4260	Music from 1900 to the Present
Political Science	
POL SCI 4510	Comparative Public Policy And Administration
POL SCI 4850	International Law
POL SCI 6485	Directed Readings And Research In International Relations

**Total Hours 18**

Note: No more than 12 credit hours may be from any one discipline.

## Study Abroad Programs

The University of Missouri-St. Louis is committed to broadening students' understanding of different cultures and preparing them for the global community in which we live. One of the most successful ways of achieving this global mindset is to study overseas. The opportunity to live and study in a different culture is an enriching experience, both academically and personally.

The Office of International Studies and Programs (ISP) provides UMSL students with opportunities to study at over 80 different universities in more than 30 countries around the globe. Most programs run for an academic year, semester, or summer. Two to three week-long faculty-led programs are offered during the winter intersession and summer. Through individual advising, students can find the program best suited to their personal, academic, and career goals. Internship possibilities are also available for qualified students.

## Fees and Financial Aid

The cost of the program depends on the services provided and the country and city of study. For most programs, participants continue to pay UMSL fees plus airfare, room and board, and spending money. Students are usually housed in dormitories or are assisted in finding apartments. In most cases, students are able to use their UMSL financial aid toward a study abroad program. Study abroad scholarships are available for qualified applicants through ISP.

## Application

Generally, applications are due in mid-February for summer, fall and academic year programs, and mid September for winter intersession and spring semester programs. Students should plan to spend at least one or two months researching a program before applying.

Participant selection is based on academic achievement, faculty recommendations, approval of the proposed course of study via the department/divisional advisory process, and for some programs, proficiency in the foreign language of instruction. Most programs are designed for undergraduate students in their junior or senior years of study; however, a limited number of programs for freshmen, sophomores, and graduate students are available.

## Student Teaching Abroad

Teacher Education students may be able to student teach in Fuxin, China during the spring semester. In addition to meeting the other requirements for student teaching, students complete an application form for the site.

## Courses

*C I ST 3200 Study Abroad, Non UM-St. Louis Program: 1-24 semester hours*

.

*C I ST 5200 Study Abroad Non UM-St Louis Program Grad: 1-15 semester hours*

.

# Internship and Cooperative Education Positions

---

## Internship/Cooperative Education Positions

Internships and Co-ops give students the opportunity to combine classroom studies with work experience in a field related to their education and career goals. These degree related positions offer students an excellent opportunity to gain professional job experience and earn money to help with expenses while in school. Through these opportunities, students begin to understand what career choices they might make, gain valuable contacts in their field, and, in many cases, get paid for their work. They graduate with a college degree and an impressive resume. Career Services and academic departments work with students and employers to ensure that positions are linked to curriculum and career development. These opportunities are available to UMSL students at all levels in all majors. Contact Career Services for more information at 516-5111, or visit 278 Millennium Center.

In addition to internships available through Career Services, internships and practica are available through many academic departments. Academic advisors can provide information about the requirements for these experiences, some of which are summarized below. Contact information for departments is available on the Career Services Website (<http://www.umsi.edu/depts/career/files/pdfs/ifc.pdf>). (<http://www.umsi.edu/depts/career/files/pdfs/ifc.pdf>)

## College of Arts and Sciences

### Anthropology

ANTHRO 4325- ANTHRO 4329, Internship in Cultural Anthropology, Archaeology, Folklore, Museum Studies, Physical Anthropology - elective, for credit; placement with outside organizations; junior standing required. Positions available on competitive basis as lab and research assistants, teachers/facilitators, and interns/assistants - optional, noncredit.

The Human Origin and Cultural Diversity program offers internships in educational anthropology and diversity education.

### Biology

BIOL 3699, Undergraduate Internship in Biotechnology - optional as part of certificate program, for credit or noncredit, enrollment in certificate program required.

BIOL 4299, Practicum in Conservation - required as part of certificate program, for credit, enrollment in certificate program required.

### Chemistry and Biochemistry

Opportunities are available to pursue research with faculty members for credit during the academic year, normally while enrolled in CHEM 3905. Stipends may be available in some cases. Expanded opportunities are available in the summer through the Research Experience for Undergraduates Program, which is typically funded by the National Science Foundation and local industry. In some cases students may conduct CHEM 3905 research at a local company through collaborative arrangement between a faculty members and an industrial chemist.

## Criminology and Criminal Justice

CRIMIN 3280, Internship in Criminology and Criminal Justice - elective, for credit.

## Economics

ECON 4990, Internship in Applied Economics; not required; 3 hours maximum.

## English

ENGL 4890, Independent Writing Project - internships offered in areas such as journalism, public relations, advertising, publishing, and technical writing; for credit, enrollment in Writing Certificate Program required.

## Languages and Cultures

Paid, noncredit positions as tutors in language lab available on a competitive basis. Students of German can apply for summer noncredit internships abroad in the German-American Student Exchange Program at the Study Abroad Office.

## History

HIST 4001, Special Readings - internships occasionally available with historical agencies; department chair and/or undergraduate coordinator must approve to obtain credit.

## Mathematics and Computer Science

Career-related work arrangements for students majoring in math and/or computer science are primarily administered through Career Services located in 278 Millennium Student Center. These positions are paid and non-credit-bearing.

## Physics and Astronomy

The department funds research internships in the department in both physics and astronomy. The awards are competitive, and preference is given to students who have completed the PHYSICS 2111/ PHYSICS 2112 sequence.

## Political Science

POL SCI 3940 Public Affairs Internship - required, for credit, for bachelor of science in public administration program. It may also count as an elective, for credit, within the bachelor of arts in political science program and is open to all majors. Placements include municipal, state, and federal governmental agencies, nonprofit organizations, courts, and political campaign offices.

## Psychology

PSYCH 3390, Research Assistant.

## Social Work

SOC WK 4800 and SOC WK 4850, Supervised Field Experience in Social Work I and II - required, for credit, admission to B.S.W. program and prior consent of instructor are required.

## Sociology

SOC 4385 Internship in Sociology - elective, for credit.

## College of Business Administration

Career Services works in partnership with the College of Business Administration to assist students in securing career-related work arrangements for students majoring in all areas of business. These

positions can be paid or unpaid and credit bearing or non-credit bearing. Those students choosing to receive academic credit through one of the courses listed below must contact the College of Business Administration Internship Coordinator in Room 469 SSB, by phone at 314-516-6117, or by email.

ACCTNG 3490	Internship In Accounting	1-3
BUS AD 3090	Internship In Business Administration	1-3
INTL BUS 3289	Practicum In International Business	3
BUS AD 3990	Internship In Business Law	1-3
FINANCE 3590	Internship In Finance	1-3
INFSYS 3890	Internship in Information Systems	1-3
LOG OM 3390	Internship In Logistics And Operations Management	1-3
MGMT 3690	Internship In Management	1-3
MKTG 3790	Internship In Marketing	1-3

## College of Education

Internships (4989) are required for 3 hours credit for most undergraduate programs and Site Based Experience (4990 and 4991) is required for 12 hours credit in all teacher certification programs. For more information, contact the Teacher Certification and Advising Office at 314-516-6710.

## College of Fine Arts and Communication

### Art

ART HS 3387, Professional Internship for Art History majors only elective, for credit.

ART HS 3388, St. Louis Art Museum Internship for Studio Art or Art History majors only – competitive position elective for credit.

### Communication

COMM 4920, Practicum in Applied Communication

COMM 4950, Internship in Applied Communication

### Media Studies

On-campus positions, as available:

MEDIA ST 1194	Practicum In Journalism	1-3
MEDIA ST 1196	Practicum In Radio	1-3
MEDIA ST 1197	Practicum In Television/Film	1-3
MEDIA ST 1198	Practicum In Media Studies	1-3
MEDIA ST 2095	Practicum In Advertising	1-3

Elective for credit, Senior standing, 3.0 GPA, and faculty recommendation required; off-campus positions:

MEDIA ST 3394	Internship In Journalism	3-6
MEDIA ST 3395	Internship In Advertising	3-6
MEDIA ST 3396	Internship In Radio	3-6
MEDIA ST 3397	Internship In Television/Film	3-6
MEDIA ST 3398	Internship In Media Studies	3-6

## Music

PRACTM 4920, Internship – required, for credit, enrollment in bachelor of music business required. Department sponsored internships available for all majors at St. Louis area arts institutions.

## Joint Engineering Program

UMSL/Washington University Joint Undergraduate Engineering Program career-related work arrangements for students majoring in all areas of engineering are administered through Career Services and the UMSL Engineering Advisor. These positions are paid and non-credit-bearing.

## College of Nursing

Clinical courses are required in both the undergraduate and graduate programs. These experiences are limited to nursing majors only.

## Pierre Laclede Honors College

Internships chosen by Honors College students, or arranged by their major departments, are valuable opportunities to broaden educational experience while also meeting the honors independent study requirement for graduation.

# Continuing Education

---

## Arts and Sciences

The College of Arts and Sciences offers credit courses and noncredit programs that reflect departmental disciplines in humanities, social sciences, and natural sciences. The array of educational programs includes archaeology, fiction and nonfiction writing, foreign languages, preparation for MCAT and LSAT, interdisciplinary conferences, study tours, and continuing education for social workers.

The Center for Entrepreneurship & Economic Education promotes the understanding of economics, personal finance, and entrepreneurship through education and outreach to children and adults. The Center offers credit and noncredit professional development for educators, educational programs for students, and other learning programs for the community. The Center also develops educational resources and provides consulting to educational institutions and nonprofit organizations.

The Advanced Credit Program provides an enrichment experience for university-bound secondary students by offering freshman-level courses for college credit in selected high schools.

The SUCCEED program is a post-secondary program for people with intellectual and developmental disabilities ages 18 through 25 years. Program participants can earn a Chancellor's Certificate by completing the two-year residential program.

## Business Administration

The College of Business Administration offers credit and noncredit programs in several areas, including financial planning, human resource management, and customized courses designed to meet individual client needs. Certificate programs are offered, as well as preparatory courses for professional certification programs in financial planning and human resources. CoBA's newest certificate program is the Digital Media Marketing Certificate, which offers marketers a chance to amplify their skills in the digital world by learning social media, web analytics, mobile marketing, media buying and more.

## Education

The College of Education, which is accredited by the Council for the Accreditation of Educator Preparation (CAEP) for the preparation of teachers, counselors, and administrators, offers an array of graduate and doctoral programs. Courses and programs are offered for both practitioners and those considering the field of education as a career. Many credit courses are available at sites throughout the metropolitan area, and professional development conferences and institutes are specially designed to help practitioners stay current in their fields of study. Programs also can be tailored to meet the specific needs of groups or organizations and can be offered on-site or at other convenient places and times.

The Transition to Teaching Program provides a special certification route for individuals who currently hold bachelor degrees and who want to enter the teaching profession. The program is job-embedded and individuals work full-time in classrooms while taking their certification coursework.

The Collabiat, a hub for education innovation, is a unique space that brings together practitioners from all education sectors, university faculty and researchers, new and bold education innovators, and leaders

from diverse fields. Serving as an incubator and co-working space as well as a flexible space for professional development, the Collabiat offers credit and noncredit courses as well as consulting and facilitation services. Professional development will not be the typical "sit and get" format. Design thinking and bias toward action is integral to Collabiat programming.

The College of Education is the academic partner for the Teach for America program in the St. Louis and Kansas City regions. This program offers coursework toward Missouri teacher certification as well as opportunities to concurrently obtain a Master of Education degree. Admittance is done through the national and regional Teach for America offices, and admittance to the UMSL Graduate School.

## Fine Arts and Communication

The College of Fine Arts and Communication offers a variety of high-quality credit and noncredit programs in the visual arts, performing arts, and communications. These programs are designed to enhance knowledge, celebrate community, and strengthen connections with regional cultural institutions such as MADCO (Modern American Dance Company), Opera Theatre of Saint Louis, and Notifi Records. CoFAC's newest programs include the Certificate in Digital Photography and the Certificate in Audio Recording, which is designed to prepare participants to develop technical skills related to the production of high-quality sound recordings.

## Graduate School and Public Policy Administration

The Nonprofit Management & Leadership Program offers comprehensive education and training for professional staff, board members, and other leaders of nonprofit and voluntary organizations, as well as students and others wishing to explore a future in the field. The program offers noncredit seminars, workshops, and conferences, both on and off campus.

## Nursing

The College of Nursing offers an RN-BSN program that provides a seamless articulation to facilitate obtaining the BSN degree for registered nurses on campus, online and off campus each semester. Currently, the college offers the RN-BSN courses at the University of Missouri-St. Louis, St. Charles Community College, Forest Park Community College, West County Continuing Education Center and Mercy Hospital in St. Louis. The MSN/FNP Program is offered at various outreach sites, depending on interest.

## Optometry

The College of Optometry offers COPE-approved advanced higher education programs that meet the requirements of state boards for individual relicensing. The dissemination of research data along with interactive panel programs of discussions of current issues are developed to advance clinical vision care.

# Academic Integrity

---

## Academic Dishonesty

Academic dishonesty is a serious offense that may lead to probation, suspension, or expulsion. One form of academic dishonesty is plagiarism--the use of an author's ideas, statements, or approaches without crediting the source. Academic dishonesty also includes such acts as cheating by copying information from another student's examination, take-home test, or laboratory manual. The Code of Student Conduct is in this Bulletin and is also available in the UMSL Student Planner.

## Honor Statement

The University of Missouri-St. Louis encourages students to pursue excellence within a respectful and collegial environment and to assume responsibility for the consequences of personal actions. For that reason the university requires students to reject any type of dishonest behavior.

Honesty precludes seeking, providing, or receiving any form of unauthorized assistance on tests or any type of assignment. It requires giving credit through appropriate citation to the author of materials used in written or oral assignments.

The full Student Standard of Conduct is available on the Web and in the student planner. By registering for a class at UMSL, students agree to follow this standard of integrity.

# Student Conduct and Title IX Policies

By registering for a class at any University of Missouri campus, students agree to abide by the Code of Student Conduct below. For more information about student conduct contact Student Conduct and Community Standards in the Office of Student Affairs (301 Woods Hall; 314-516-5211).

## Code of Student Conduct

**200.010 Standard of Conduct** ([http://www.umsystem.edu/ums/rules/collected\\_rules/programs/ch200/200.010\\_standard\\_of\\_conduct](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct))

**Amended Bd. Min. 3-20-81; Bd. Min. 8-3-90, Bd. Min 5-19-94; Bd. Min. 5-24-01, Bd. Min. 7-27-12; Bd. Min. 12-7-12; Bd. Min. 6-19-14; Revised 9-22-14 by Executive Order 41.**

A student at the University assumes an obligation to behave in a manner compatible with the University's function as an educational institution and voluntarily enters into a community of high achieving scholars. Consequently, students must adhere to community standards in accordance with the University's mission and expectations.

These expectations have been established in order to protect a specialized environment conducive to learning which fosters integrity, academic success, personal and professional growth, and responsible citizenship.

**A. Jurisdiction of the University of Missouri** generally shall be limited to conduct which occurs on the University of Missouri premises or at University-sponsored or University-supervised functions. However, the University may take appropriate action, including, but not limited to the imposition of sanctions under Sections 200.020 and 200.025 of the Collected Rules and Regulations against students for conduct occurring in other settings, including off-campus, in order to protect the physical safety of students, faculty, staff, and visitors or if there are effects of the conduct that interfere with or limit students' ability to participate in or benefit from the University's educational programs and activities.

**B. Conduct** for which students are subject to sanctions falls into the following categories:

1. **Academic dishonesty**, such as cheating, plagiarism, or sabotage. The Board of Curators recognizes that academic honesty is essential for the intellectual life of the University. Faculty members have a special obligation to expect high standards of academic honesty in all student work. Students have a special obligation to adhere to such standards. In all cases of academic dishonesty, the instructor shall make an academic judgment about the student's grade on that work and in that course. The instructor shall report the alleged academic dishonesty to the Primary Administrative Officer.
  - a. The term **cheating** includes but is not limited to: (i) use of any unauthorized assistance in taking quizzes, tests, or examinations; (ii) dependence upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments; (iii) acquisition or possession without permission of tests or other academic material

belonging to a member of the University faculty or staff; or (iv) knowingly providing any unauthorized assistance to another student on quizzes, tests, or examinations.

- b. The term **plagiarism** includes, but is not limited to: (i) use by paraphrase or direct quotation of the published or unpublished work of another person without fully and properly crediting the author with footnotes, citations or bibliographical reference; (ii) unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; or (iii) unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.
- c. The term **sabotage** includes, but is not limited to, the unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University community.
2. **Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.**
3. **Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.**
4. **Physical abuse or other conduct which threatens or endangers the health or safety of any person.**
5. **Stalking** another by following or engaging in a course of conduct with no legitimate purpose that puts another person reasonably in fear for his or her safety or would cause a reasonable person under the circumstances to be frightened, intimidated or emotionally distressed.
6. **Violation of the University's Equal Employment/Education Opportunity Policy** located at Section 320.010 of the Collected Rules and Regulations. These violations include, but are not limited to:
  - a. **Harassment.** Harassment in violation of the University's anti-discrimination policies, is unwelcome verbal or physical conduct, on the basis of actual or perceived membership in a protected class as defined in the University's anti-discrimination policies, that creates a hostile environment by being sufficiently severe or pervasive and objectively offensive that it interferes with, limits or denies the ability of an individual to participate in or benefit from educational programs or activities or employment access, benefits or opportunities.
  - b. **Sex Discrimination, Sexual Harassment and Sexual Misconduct** as further defined in Section 600.020 and/or referenced in Section 200.010B7 below.
  - c. **Bullying.** Bullying is defined as repeated and/or severe aggressive behavior likely to intimidate or intentionally hurt, control or diminish another person, physically or mentally on the basis of actual or perceived membership in a protected class.
  - d. **Retaliation.** Retaliation is any adverse action taken against a person because of that person's participation in protected activity. The University strictly prohibits retaliation against any person for making any good faith report or for filing, testifying, assisting, or participating in any investigation or proceeding involving allegations of discrimination in violation of the University's Equal Employment/Education Opportunity Policy.
  - e. **False Reporting.** False reporting is making an intentional false report or accusation as opposed to a report or accusation, which, even if erroneous, is made in good faith.
7. **Violation of the University's Sex Discrimination, Sexual Harassment and Sexual Misconduct in Education/Employment**

**Policy in Section 600.020 of the Collected Rules and Regulations.**

These violations include:

- a. **Sex Discrimination.** Sex discrimination occurs when a person has been treated inequitably on the basis of sex, gender identity, or gender expression. Specifically, the University of Missouri System upholds Title IX, which states in part that "[n]o person in the United States shall on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity." Sexual harassment, sexual misconduct, sexual exploitation, stalking on the basis of sex and dating/intimate partner violence are forms of sex discrimination.
- b. **Sexual Harassment.** Sexual harassment is defined as:
  - i Unwelcome sexual advances or requests for sexual activity by a person or persons in a position of power or authority to another person, or
  - ii Other unwelcome verbal or physical conduct of a sexual nature by a person to another person, when:
    1. a) Submission to or rejection of such conduct is used explicitly or implicitly as a condition for academic or employment decisions; or
    2. b) Such conduct creates a hostile environment by being sufficiently severe or pervasive and objectively offensive that it interferes with, limits or denies the ability of an individual to participate in or benefit from educational programs or activities or employment access, benefits or opportunities.
- c. **Sexual Misconduct.** Sexual misconduct is: 1) nonconsensual sexual intercourse; 2) nonconsensual sexual contact involving the sexual touching of the genitals, breast or anus of another person or the nonconsensual sexual touching of another with one's own genitals whether directly or through the clothing; 3) exposing one's genitals to another under circumstances in which he or she should reasonably know that his or her conduct is likely to cause affront or alarm; or 4) sexual exploitation.
- d. **Stalking on the Basis of Sex.** Stalking on the basis of sex is following or engaging in a course of conduct on the basis of sex with no legitimate purpose that puts another person reasonably in fear for his or her safety or would cause a reasonable person under the circumstances to be frightened, intimidated or emotionally distressed.
- e. **Dating/Intimate Partner Violence.** Violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the recipient of the violent behavior.
- f. **Sexual Exploitation.** Sexual exploitation occurs when one person takes nonconsensual or abusive sexual advantage of another person for his/her own advantage or benefit or for the advantage or benefit of anyone other than the person being exploited and which behavior does not constitute any other form of sexual misconduct. Examples of sexual exploitation include, but are not limited to, the following activities done without the consent of all participants:
  - i Invasion of sexual privacy;
  - ii Prostituting another person;
  - iii Taping or recording of sexual activity;
  - iv Going beyond the boundaries of consent to sexual activity (letting your friends hide to watch you engaging in sexual activity);
  - v Engaging in voyeurism;
  - vi Knowingly transmitting an STI, STD, venereal disease or HIV to another person;
  - vii Inducing another to expose their genitals.
- g. **Retaliation.** Retaliation is any adverse action taken against a person because of that person's participation in protected activity. The University strictly prohibits retaliation against any person for making a report required by Section 600.020 of the Collected Rules and Regulations, for making any good faith report to a Title IX Coordinator or for filing, testifying, assisting, or participating in any investigation or proceeding involving allegations of sex discrimination, sexual harassment or sexual misconduct.
- h. **False Reporting.** False reporting is making an intentional false report or accusation as opposed to a report or accusation, which, even if erroneous, is made in good faith.
8. **Threatening or Intimidating Behaviors,** defined as written or verbal conduct that causes a reasonable expectation of injury to the health or safety of any person or damage to any property or implied threats or acts that cause a reasonable fear of harm in another.
9. **Participating in attempted or actual taking of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.**
10. **Unauthorized possession, duplication or use of keys to any University facilities or unauthorized entry to or use of University facilities.**
11. **Violation of University policies, rules or regulations or of campus regulations** including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or the time, place and manner of public expression.
12. **Manufacture, use, possession, sale or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations,** including operating a vehicle on University property, or on streets or roadways adjacent to and abutting a campus, under the influence of alcohol or a controlled substance as prohibited by law of the state of Missouri.
13. **Disruptive conduct.** Conduct that creates a substantial disruption of University operations including obstruction of teaching, research, administration, other University activities, and/or other authorized non-University activities that occur on campus.
14. **Failure to comply with directions of University officials acting in the performance of their duties.**
15. **The illegal or unauthorized possession or use of firearms, explosives, other weapons, or hazardous chemicals.**
16. **Hazing,** defined as an act that endangers the mental or physical health or safety of a student, or an act that is likely to cause physical or psychological harm to any person within the University community, or that destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in a group or organization. Participation or cooperation by the person(s) being hazed does not excuse the violation. Failing to intervene to prevent (and/or) failing to discourage (and/or) failing to report those acts may also violate this policy.
17. **Misuse of computing resources in accordance with University policy,** including but not limited to:
  - a. Actual or attempted theft or other abuse.
  - b. Unauthorized entry into a file to use, read, or change the contents, or for any other purpose.
  - c. Unauthorized transfer of a file.

- d. Unauthorized use of another individual's identification and password.
- e. Use of computing facilities to interfere with the work of another student, faculty member, or University official.
- f. Use of computing facilities to interfere with normal operation of the University computing system.
- g. Knowingly causing a computer virus to become installed in a computer system or file.

make dispositions under these procedures or a Hearing Panel of such body as herein defined.

5. **Hearing Panel.** As used in these procedures, the term "hearing panel" refers to the part of the Student Conduct Committee described in Section 200.020E.3(b) below.

### C. Sanctions.

1. The following sanctions may be imposed upon any student found to have violated the Student Conduct Code; more than one of the sanctions may be imposed for any single violation:
  - a. **Warning.** A notice in writing to the student that the student is violating or has violated institutional regulations.
  - b. **Probation.** A written reprimand for violation of specified regulations. Probation is for a designated period of time and includes the probability of more severe sanctions if the student is violating any institutional regulation(s) during the probationary period.
  - c. **Loss of Privileges.** Denial of specified privileges for a designated period of time.
  - d. **Restitution.** Compensation for loss, damage, or injury to the University or University property. This may take the form of appropriate service and/or monetary or material replacement.
  - e. **Discretionary Sanctions.** Work assignments, service to the University, or other related discretionary assignments.
  - f. **Residence Hall Suspension.** Separation of the student from the residence halls for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
  - g. **Residence Hall Expulsion.** Permanent separation of the student from the residence halls.
  - h. **University Dismissal.** An involuntary separation of the student from the institution for misconduct. It is less than permanent in nature and does not imply or state a minimum separation time.
  - i. **University Suspension.** Separation of the student from the University for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
  - j. **University Expulsion.** Permanent separation of the student from the University.
2. **Temporary Suspension.** The Chancellor or Designee may at any time temporarily suspend or deny readmission to a student from the University pending formal procedures when the Chancellor or Designee finds and believes from available information that the presence of a student on campus would seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. The appropriate procedure to determine the future status of the student will be initiated within seven business days.

**D. Records Retention.** Student conduct records shall be maintained for five years after University action is completed.

### E. Policy and Procedures.

1. **Preliminary Procedures.** The Primary Administrative Officer/Designee(s) shall investigate any reported student misconduct before initiating formal conduct procedures and give the student the opportunity to present a personal version of the incident or occurrence. The Primary Administrative Officer/Designee(s) shall utilize the preponderance of the evidence standard in deciding whether or not to initiate formal conduct procedures and in deciding whether or not to offer an informal disposition in accordance with Section 200.020E.2

## Student Disciplinary Matters

### 200.20 Rules of Procedures in Student Conduct Matters ([http://www.umsystem.edu/ums/rules/collected\\_rules/programs/ch200/200.020\\_rules\\_of\\_procedures\\_in\\_student\\_conduct\\_matters](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.020_rules_of_procedures_in_student_conduct_matters))

**Bd. Min. 11-8-68, Amended Bd. Min. 3-20-81; Bd. Min. 12-8-89, Amended 5-19-94; Bd. Min. 5-24-01; Amended Bd. Min 7-27-12; Amended 6-19-14; Revised 9-22-14 by Executive Order 41.**

**A. Preamble.** The following rules of procedure in student conduct matters are hereby adopted in order to insure insofar as possible and practicable (a) that the requirements of procedural due process in student conduct proceedings will be fulfilled by the University, (b) that the immediate effectiveness of Section 10.030, which is Article V of the Bylaws of the Board of Curators relating to student conduct and sanctions may be secured for all students in the University of Missouri, and (c) that procedures shall be definite and determinable within the University of Missouri. Student conduct involving harassment or discrimination is governed by Section 200.025: *Equity Resolution Process for Resolving Complaints of Harassment, Sexual Misconduct and other Forms of Discrimination against a Student or Student Organization.*

**B. Definitions.** As used in these rules, the following definitions shall apply:

1. **Primary Administrative Officers.** As used in these procedures, the Chief Student Affairs Administrator on each campus is the Primary Administrative Officer except in cases of academic dishonesty, where the Chief Academic Administrator is the Primary Administrative Officer. Each Primary Administrative Officer may appoint designee(s) who are responsible for the administration of these conduct procedures, provided all such appointments must be in writing, filed with the Chancellor of the campus, and the office of General Counsel. The Primary Administrator's Office will certify in writing that the given designee has been trained in the administration of student conduct matters.
2. **Student Panel.** A panel of students appointed by the Chancellor, from which shall be selected by the Chair, upon the request of an accused student before the Student Conduct Committee, not more than three students to serve with the Student Conduct Committee.
3. **Student.** A person having once been admitted to the University who has not completed a course of study and who intends to or does continue a course of study in or through one of the campuses of the University. For the purpose of these rules, student status continues whether or not the University's academic programs are in session.
4. **Student Conduct Committee.** As used in these procedures, "Student Conduct Committee," hereinafter referred to as the Committee, is that body on each campus which is authorized to conduct hearings and to

below. The Primary Administrative Officer/Designee(s) may discuss with any student such alleged misconduct and the student shall attend such consultation as requested by the Primary Administrative Officer/Designee(s). The Primary Administrative Officer/Designee(s), in making an investigation and disposition, may utilize student courts and boards and/or divisional deans to make recommendations.

2. **Informal Dispositions.** The Primary Administrative Officer/Designee(s) shall have the authority to make a determination and to impose appropriate sanctions and shall fix a reasonable time within which the student shall accept or reject a proposed informal disposition. A failure of the student either to accept or reject within the time fixed may be deemed by the University to be an acceptance of the determination, provided the student has received written notice of the proposed determination and the result of the student's failure to formally reject and, in such event, the proposed disposition shall become final upon expiration of such time. If the student rejects informal disposition it must be in writing and shall be forwarded to the Committee. The Primary Administrative Officer/Designee(s) may refer cases to the Committee without first offering informal disposition.

3. **Formal Procedure and Disposition.**

- a. **Student Conduct Committee:**

- i The Committee shall be appointed by the Vice Chancellor for Student Affairs and shall have the authority to impose appropriate sanctions upon any accused student or students appearing before it.
    - ii When deemed appropriate or convenient by the Chair of the Committee, the Chair may divide the Committee into Hearing Panels each consisting of no less than five (5) Committee members of which no more than two (2) shall be students. If the Chair creates such Hearing Panels, the Chair of the Committee shall designate a Hearing Panel Chair. A Hearing Panel has the authority of the whole Committee in those cases assigned to it. The Chair of the Committee or a Hearing Panel Chair shall count as one member of the Committee or Hearing Panel and have the same rights as other members.
    - iii The Vice Chancellor for Student Affairs shall appoint a panel of students, to be known as the Student Panel. Upon written request of an accused student before the Committee made at least seventy-two (72) hours prior to the hearing, the Chair of the Committee shall appoint from the Student Panel not more than three students to sit with the Committee or the Hearing Panel Chair shall appoint two students to sit with the Hearing Panel for that particular case. When students from the Student Panel serve as members of the Committee or as members of the Hearing Panel, they shall have the same rights as other members of the Committee or Hearing Panel.

- b. **General Statement of Procedures.** A student accused of violating the Student Conduct Code is entitled to a written notice and a formal hearing unless the matter is disposed of under the rules for informal disposition. Student conduct proceedings are not to be construed as judicial trials and need not wait for legal action before proceeding; but care shall be taken to comply as fully as possible with the spirit and intent of the procedural safeguards set forth herein. The Office of the General Counsel shall be legal adviser to the Committee and the Primary Administrative Officer/Designee(s), but the same attorney from the Office of the General Counsel shall not perform both roles with regard to the same case.

- c. **Notice of Hearing.** At least seven business days prior to the Student Conduct Committee Hearing, or as far in advance as is reasonably possible if an accelerated resolution process is

scheduled with the consent of the accused student, the Primary Administrative Officer/Designee(s) will send a letter to the accused student with the following information:

- i A description of the alleged violation(s) and applicable policies
- ii A description of the applicable procedures
- iii A statement of the potential sanctions/remedial actions that could result
- iv The time, date and location of the hearing. If any party does not appear at the hearing, the hearing will be held in their absence. For compelling reasons, the hearing may be rescheduled.
  1. This Notice of Charges letter will be made in writing and will be delivered either:
  2. In person, or
  3. Mailed to the local address of the accused student as indicated in official University records and emailed to the accused student's University-issued email account. If there is no local address on file, mail will be sent to the accused student's permanent address.
  4. Once received in person or mailed and emailed, notice will be presumptively delivered. Any request to reschedule the hearing shall be made in writing to the Chair, who shall have the authority to reschedule the hearing if the request is timely and made for good cause. The Chair shall notify the Primary Administrative Officer/Designee(s) and the accused student of the new date for the hearing. If the accused student fails to appear at the scheduled time, the Committee may hear and determine the matter.

4. **Right to Petition for Review:** (other than University expulsion, University dismissal, or University suspension).

- a. In all cases where the sanction imposed by the Committee is other than University expulsion, University dismissal, or University suspension, the Primary Administrative Officer/Designee(s) or the accused student may petition the Chancellor or Designee in writing for a review of the decision within five (5) business days after written notification. A copy of the Petition for Review must also be served upon the non-appealing party or parties within such time. The Petition for Review must state the grounds or reasons for review in detail, and the non-appealing party or parties may answer the petition within five (5) business days.
  - b. The Chancellor or Designee may grant or refuse the right of review. In all cases where the Petition for Review is refused, the action of the Committee shall be final. If the Chancellor or Designee reviews the decision, the action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

5. **Right of Appeal** (University expulsion, University dismissal, or University suspension only).

- a. When an accused student is expelled, dismissed, or suspended from the University by the Committee, the Primary Administrative Officer/Designee(s), the accused student may appeal such decision to the Chancellor or Designee by filing written notice of appeal stating the grounds or reasons for appeal in detail with the Chancellor within ten (10) business days after notification of the decision of the Committee. The appealing party may file a written memorandum for consideration by the Chancellor with the Notice of Appeal, and the Chancellor may request a reply to such memorandum by the appropriate party.
  - b. The Chancellor or Designee shall review the record of the case and the appeal documents and may affirm, reverse, or remand

the case for further proceedings and shall notify the accused student in writing of the decision on the appeal. The action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

6. **Status During Appeal.** In cases of suspension, dismissal, or expulsion where a Notice of Appeal is filed within the required time, a student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit a student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. In such event, however, any final sanctions imposed shall be effective from the date of the action of the Committee.
7. **Student Honor System.** Forums under the student honor systems established for investigating facts, holding hearings, and recommending and imposing sanctions are authorized when the student honor code or other regulations containing well defined jurisdictional statements and satisfying the requirements of Section 10.030, which is Article V of the Bylaws of the Board of Curators, have been reduced to writing and have been approved by the Chancellor and the Board of Curators and notice thereof in writing has been furnished to students subject thereto. Though the student honor system has jurisdiction, together with procedures set forth therein, instead of the Primary Administrative Officer/Designee(s), the standard of conduct called for in any such student honor system shall be deemed to contain at a minimum the same standards set forth in Section 200.010, entitled Standards of Conduct. Procedures shall satisfy the requirements of the Board of Curators' Bylaws, Section 10.030, which is Article V, and shall contain procedures herein before stated insofar as appropriate and adaptable to the particular situation and shall be approved by the Chancellor and the General Counsel. Students subject to student honor systems shall have the rights of appeal as set forth in Section 200.020 E.6 and 7.

## **F. Hearing Procedures.**

1. **Conduct of Hearing.** The Chair shall preside at the hearing, call the hearing to order, call the roll of the Committee in attendance, ascertain the presence or absence of the student accused of misconduct, read the notice of hearing and charges and verify the receipt of notices of charges by the student, report any continuances requested or granted, establish the presence of any adviser or counselor of the student, and call to the attention of the accused student and the adviser any special or extraordinary procedures to be employed during the hearing and permit the student to make suggestions regarding or objections to any procedures for the Conduct Committee to consider.
  - a. **Opening Statements.**
    - i The Primary Administrative Officer/Designee(s) shall make opening remarks outlining the general nature of the case and testify to any facts the investigation has revealed.
    - ii The accused student may make a statement to the Committee about the charge at this time or at the conclusion of the University's presentation.
  - b. **University Evidence.**
    - i University witnesses are to be called and identified or written reports of evidence introduced as appropriate.
    - ii The Committee may question witnesses at any time.

- iii The accused student or, with permission of the Committee, the adviser or counselor may question witnesses or examine evidence at the conclusion of the University's presentation.

### **c. Accused Student Evidence.**

- i If the accused student has not elected to make a statement earlier under a(2) above, the accused student shall have the opportunity to make a statement to the Committee about the charge.
- ii The accused student may present evidence through witnesses or in the form of written memoranda.
- iii The Committee or Hearing Panel may question the accused student or witnesses at any time. The Primary Administrative Officer/Designee(s) may question the accused student or witnesses.

### **d. Rebuttal Evidence.** The Committee may permit the University or the accused to offer a rebuttal of the others' presentation(s).

### **e. Rights of Student Conduct Committee.** The Committee shall have the right to:

- i Hear together cases involving more than one student which arise out of the same transaction or occurrence, but in that event shall make separate findings and determinations for each student;
- ii Permit a stipulation of facts by the Primary Administrative Officer/Designee(s) and the student involved;
- iii Permit the incorporation in the record by reference of any documentation, produced and desired in the record by the University or the accused;
- iv Question witnesses or challenge other evidence introduced by either the University or the accused at any time;
- v Hear from the Primary Administrative Officer/Designee(s) about dispositions made in similar cases and any dispositions offered to the accused appearing before the Committee;
- vi Call additional witnesses or require additional investigation;
- vii Dismiss any action at any time or permit informal disposition as otherwise provided;
- viii Permit or require at any time amendment of the Notice of Hearing to include new or additional matters which may come to the attention of the Committee before final determination of the case; provided, however, that in such event the Committee shall grant to the student or Primary Administrative Officer/Designee(s) such time as the Committee may determine reasonable under the circumstances to answer or explain such additional matters;
- ix Dismiss any person from the hearing who interferes with or obstructs the hearing or fails to abide by the rulings of the Chair of the Committee;
- x Suspend summarily students from the University who, during the hearing, obstruct or interfere with the course of the hearing or fail to abide by the ruling of the Chair of the Committee on any procedural question or request of the Chair for order.

### **2. Rights of Accused upon Hearing.** A student appearing before a Committee shall have the right to:

- a. Be present at the hearing
- b. Have an adviser or counselor and to consult with such adviser or counselor during the hearing;
- c. Question witnesses present and testifying;
- d. Hear or examine evidence presented to the Committee;

- e. Present evidence by witnesses or affidavit;
  - f. Make any statement to the Committee in mitigation or explanation of the conduct in question;
  - g. Be informed in writing of the findings of the Committee and any sanctions it imposes; and
  - h. Request review or appeal to the Chancellor as herein provided.
3. **Determination by the Student Conduct Committee.** The Committee shall then make its findings and determinations based on the preponderance of the evidence in executive session out of the presence of the Primary Administrative Officer/Designee(s) and the accused student. Separate findings are to be made:
- a. As to the conduct of the accused student, and
  - b. On the sanctions, if any, to be imposed. No sanctions shall be imposed on the accused student unless a majority of the Committee present is convinced by the preponderance of the evidence that the student has committed the violation charged. In determining what sanction, if any, is appropriate, the Committee may take into consideration the previous disciplinary history of the accused student.
4. **Official Report of Findings and Determinations.** The Committee shall promptly consider the case on the merits and make its findings and determination and transmit them to the Primary Administrative Officer/Designee(s) and the accused student.
5. **Other Procedural Questions.** Procedural questions which arise during the hearing not covered by these general rules shall be determined by the Chair, whose ruling shall be final unless the Chair shall present the question to the Committee at the request of a member of the Committee, in which event the ruling of the Committee by majority vote shall be final.
6. **General Rules of Decorum.** The following general rules of decorum shall be adhered to:
- a. All requests to address the Committee shall be addressed to the Chair.
  - b. Rules of common courtesy and decency shall be observed at all times.
  - c. An adviser or counselor may be permitted to address the Committee at the discretion of the Committee. An adviser or counselor may request clarification of a procedural matter or object on the basis of procedure at any time by addressing the Chair after recognition.
7. **Record of Hearing.** An audio, video, digital, or stenographic record of the hearing shall be maintained. The notice, exhibits, hearing record, and the findings and determination of the Committee shall become the "Record of the Case" and shall be filed in the Office

of any type by an organization, or by an individual against another individual.

The Office of Student Activities will investigate any incident in which a charge of hazing has been made. University recognition may be temporarily withdrawn pending hearings and due process procedures.

Should it be determined that a student organization or any of its members is guilty of hazing as previously defined, sanctions may include but are not limited to:

1. Automatic and indefinite suspension of campus recognition or registration with an accompanying loss of all campus privileges (i.e. use of facilities, student services, etc.);
2. Disciplinary action against those members involved in the incident(s) including suspension or expulsion from the university.

Implementation: Each organizational president (or equivalent officer) is required to read and sign the university's Policy on Hazing at the first regular meeting at which he or she presides. This policy, signed by the incoming president (or equivalent officer), must accompany any notification of a change in officers submitted to the Office of Student Activities. Failure to do so will result in the automatic imposition of inactive status on the organization with an accompanying loss of all university privileges until such time as the signed policy is submitted.

The following equal opportunity policies have been established by the University of Missouri Board of Curators to govern the academic and administrative functions of the four campuses and are available on the UM System website.

#### 320.010 EQUAL EMPLOYMENT OPPORTUNITY POLICY

#### 320.010 EQUAL EMPLOYMENT OPPORTUNITY POLICY

#### 600.020 SEX DISCRIMINATION, SEXUAL HARASSMENT AND SEXUAL MISCONDUCT IN EDUCATION/

**EMPLOYMENT POLICY** ([http://www.umsystem.edu/ums/rules/collected\\_rules/equal\\_employment\\_educational\\_opportunity/ch600/600.020\\_sex\\_discrimination\\_sexual\\_harassment\\_and\\_sexual\\_misconduct](http://www.umsystem.edu/ums/rules/collected_rules/equal_employment_educational_opportunity/ch600/600.020_sex_discrimination_sexual_harassment_and_sexual_misconduct))

**240.040 POLICY RELATED TO STUDENTS WITH DISABILITIES** (<http://www.umsystem.edu/ums/departments/gc/rules/programs/240/040.shtml>)

**330.070 AFFIRMATIVE ACTION ON COMMITTEE APPOINTMENTS** (<http://www.umsystem.edu/ums/departments/gc/rules/personnel/330/070.shtml>)

Should a student feel that the campus has not followed these policies, they have access to the University of Missouri ([http://www.umsystem.edu/ums/rules/collected\\_rules/grievance/ch390/grievance\\_390.010](http://www.umsystem.edu/ums/rules/collected_rules/grievance/ch390/grievance_390.010)) **Discrimination Grievance Procedure for Students.**

Students may contact Student Affairs (<http://www.umsystem.edu/~studentconduct/Community%20Standards/standards.html>) or Equal Opportunity & Diversity (<http://www.umsystem.edu/~oeo/contact.html>) to lodge complaints or seek information about these procedures.

## Policy on Hazing

Hazing, defined by the Fraternity Executive Association and accepted by the University of Missouri#St. Louis, is any intentional action taken or situation created, whether on or off university premises, that produces mental or physical discomfort, embarrassment, harassment, or ridicule. This includes but is not limited to: paddling in any form, creation of excessive fatigue, physical or psychological shocks, wearing apparel publicly which is conspicuous and not normally in good taste, engaging in public stunts and buffoonery, morally degrading or humiliating games and activities, involuntary labor, or any activity not consistent with the University of Missouri Board of Curators Standard of Student Conduct. The University of Missouri#St. Louis does not condone or tolerate hazing

# Equal Employment/Educational Opportunity

## 600.040 Equity Resolution Process

### for Resolving Complaints of Harassment, Sexual Misconduct and other Forms of Discrimination against a Faculty Member ([http://www.umsystem.edu/ums/rules/collected\\_rules/equal\\_employment\\_educational\\_opportunity/ch600/600.040\\_equity\\_resolution\\_process\\_for\\_resolving\\_complaints\\_of\\_harassment](http://www.umsystem.edu/ums/rules/collected_rules/equal_employment_educational_opportunity/ch600/600.040_equity_resolution_process_for_resolving_complaints_of_harassment))

Board Min 2-5-15.

#### A. General

The University will act on any formal or informal complaint or notice of violation of the University's anti-discrimination policies. The procedures described below apply to all such complaints or notice when the Accused is a Staff Member.

#### B. Jurisdiction

Jurisdiction of the University of Missouri generally shall be limited to conduct which occurs on the University of Missouri premises or at University-sponsored or University-supervised functions. However, the University may take appropriate action, including, but not limited to, the imposition of sanctions under Section 600.050 of the Collected Rules and Regulations against Staff Members for conduct occurring in other settings, including off-campus, (1) in order to protect the physical safety of students, employees, visitors, patients or other members of the University community, (2) if there are effects of the conduct that interfere with or limit any person's ability to participate in or benefit from the University's educational programs, activities or employment or (3) if the conduct occurs when the Staff Member is serving in the role of a University employee.

#### C. At-Will Employment Status

Nothing contained in this policy is intended and no language contained herein shall be construed as establishing a "just cause" standard for imposing discipline, including but not limited to, termination of employment. Further, nothing contained in this policy is intended and no language contained herein shall be construed to alter in any manner whatsoever the at-will employment status of any at-will University employee.

#### D. Definitions:

1. **University's Anti-Discrimination Policies.** The University's Anti-Discrimination Policies include the Equal Employment/Educational Opportunity Policy located at Section 320.010 of the Collected Rules and Regulations and the Sex Discrimination, Sexual Harassment and Sexual Misconduct in Education/Employment Policy located at Section 600.020 of the Collected Rules and Regulations.
2. **Complainant.** Complainant refers to the alleged victim of discrimination under the University's Anti-Discrimination Policies. The University may also serve as the Complainant when the alleged victim does not wish to participate in the resolution process.
3. **Accused.** The Staff Member or Members alleged to have violated the University's Anti-Discrimination Policies.

4. **Staff Members.** Staff Members include all Administrative, Service and Support Staff, which includes all regular employees, variable hour employees, nonregular employees, per diem employees as defined in Section 320.050.II of the Collected Rules and Regulations, and Subsidiary Employees as defined in Section 320.050.III.
5. **Complaint.** Any verbal or written communication or notice of an alleged violation of the University's Anti-Discrimination Policies.
6. **Advisors.** The individuals selected by the Complainant and the Accused to provide support and guidance throughout the Equity Resolution Process. Each party is allowed one advisor.
7. **Investigators.** Investigators are trained individuals appointed by the Equity Human Resources Officer ("Equity HR Officer") or Equity HR Officer's Designee to conduct investigations of the alleged violations of the University's Anti-Discrimination Policies.
8. **Equity Human Resources Officers ("Equity HR Officers").** The Equity Human Resources Officers ("Equity HR Officers") are trained human resources and/or equity administrators designated by:
  - a. the Chancellor or Chancellor's Designee for campus Staff Members;
  - b. the Chancellor or Chancellor's Designee for MU Health System Staff Members; and
  - c. the President or President's Designee for System Staff Members.
9. **Supervisor.** The individual or individuals who have authority to terminate the Accused's employment. If a supervisor has a conflict as determined by the Equity HR Officer, the Equity HR Officer will determine the appropriate manager to act as the Supervisor for purposes of this rule.
10. **Equity Resolution Appellate Officers.** Equity Resolution Appellate Officers are trained, senior-level administrators who hear all appeals stemming from the Equity Resolution Process and are designated by:
  - a. the Chancellor or Chancellor's Designee for campus Staff Members;
  - b. the Chancellor or Chancellor's Designee for Health System Staff Members; and
  - c. the President or President's Designee for System Staff Members.
11. **Summary Resolution.** Resolution of the Complaint upon the determination by the Equity HR Officer or Equity HR Officer's Designee that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies.
12. **Conflict Resolution.** Resolution using alternative dispute resolution mechanisms such as mediation, facilitated dialogue or restorative justice.
13. **Administrative Resolution.** Resolution of a Complaint by the Equity HR Officer and the Accused's Supervisor.
14. **Parties.** The Complainant and the Accused are collectively referred to as the Parties.

#### E. Filing a Complaint

Any student, employee, volunteer, visitor or patient who believes that a Staff Member has violated the University's Anti-Discrimination Policies should contact the Equity HR Officer or Equity HR Officer's Designee and in the case of allegations of sexual harassment, sexual misconduct or allegations of other forms of sex discrimination as defined in Section 600.020 of the Collected Rules and Regulations, the Title IX Coordinator or Title IX Coordinator's Designee. Such individuals can also contact campus police if the alleged offense may also constitute a crime.

#### F. Interim Remedies

During the Equity Resolution Process and prior to a finding whether an alleged violation has occurred, the Equity HR Officer or Equity HR Officer's Designee or in the case of allegations of sexual harassment, sexual misconduct or allegations of other forms of sex discrimination as defined in Section 600.020 of the Collected Rules and Regulations, the Title IX Coordinator or Title IX Coordinator's Designee may provide interim remedies including, but not limited to, one or more of the following:

1. Referral and facilitating contact for the Complainant to on- or off-campus counseling, medical services and/or mental health services.
2. Implementing contact limitations on the Accused or on all Parties.
3. Referral of the Complainant to victim advocacy and support services either on and/or off-campus.
4. Adjusting the work schedules, work assignments, supervisory responsibilities, supervisor reporting responsibilities or work arrangements of the Complainant and/or the Accused.
5. If the Complainant is a student:
  - a. Referral of Complainant to academic support services and any other services that may be beneficial to the Complainant.
  - b. Adjusting the courses, assignments, exam schedules, etc. of the Complainant.
  - c. Altering the on-campus housing assignments, dining arrangements, or other campus services for the Complainant.
6. Informing the Complainant of the right to notify law enforcement authorities of the alleged incident and offering to help facilitate such a report.
7. Implementing leave from work with or without pay for the Complainant and/or Accused.
8. Implementing suspension from campus with or without pay for the Accused.

#### **G. Employees and Students Participating in the Equity Resolution Process**

All University employees and students must be truthful when making any statement or providing any information or evidence to the University throughout the process, including to the Investigator, the Equity HR Officer (or Equity HR Officer's Designee), the Title IX Coordinator (or Title IX Coordinator's Designee) and/or the Equity Resolution Appellate Officer, and all documentary evidence must be genuine and accurate. False statements, fraudulent evidence or refusal to cooperate with the Investigator, the Equity HR Officer (or Equity HR Officer's Designee), the Title IX Coordinator (or Title IX Coordinator's Designee) and/or the Equity Resolution Appellate Officer by an employee may be the basis for personnel action or by a student may be the basis for student conduct action pursuant to Section 200.010(B)(14) or other provisions of Section 200.010. Nothing in this provision is intended to require a Complainant to participate in the process.

#### **H. Rights of the Complainant in the Equity Resolution Process**

1. To be treated with respect by University officials.
2. To be free from retaliation.
3. To have access to campus support resources (such as counseling and mental health services and University health services).
4. To have an Advisor of the Complainant's choice accompany the Complainant to all interviews, meetings and proceedings throughout the Equity Resolution Process.
5. To refuse to have an allegation resolved through the Conflict Resolution process.

6. To have an opportunity to present a list of potential witnesses and provide evidence to the Investigator.
7. To have Complaints heard in substantial accordance with these procedures.
8. When the Complainant is not the reporting party, the Complainant has full rights to participate in any Equity Resolution Process.
9. To be informed in writing of the finding, rationale and sanctions.
10. To report the matter to law enforcement (if applicable) and to have assistance in making that report.
11. To have an opportunity to appeal the findings and sanction.

#### **I. Rights of the Accused in the Equity Resolution Process**

1. To be treated with respect by University officials.
2. To have access to campus support resources (such as counseling and mental health services and University health services), unless removed from campus pending the completion of the process.
3. To have an Advisor of the Accused's choice accompany the Accused to all meetings and proceedings throughout the Equity Resolution Process.
4. To refuse to have an allegation resolved through the Conflict Resolution process.
5. To have an opportunity to present a list of potential witnesses and provide evidence to the Investigator.
6. To receive notice of the policies alleged to have been violated.
7. To have Complaints heard in substantial accordance with these procedures.
8. To be informed in writing of the finding, rationale and sanction.
9. To have an opportunity to appeal the findings and sanction.

#### **J. Role of Advisors**

Each Complainant and Accused is allowed to have one Advisor of their choice present with them for all Equity Resolution process interviews, meeting and proceedings. The Parties may select whomever they wish to serve as their Advisor, including an attorney. An advisor is not required and any party may elect to proceed without an Advisor.

If Complainant is a student, the student Complainant may request that the Equity HR Officer (or Equity HR Officer's Designee) or Title IX Coordinator (or Title IX Coordinator's Designee) assign a trained Advisor to provide support throughout the Equity Resolution Process. University trained Advisors are administrators or staff at the University trained on the Equity Resolution Process.

The Advisor may not make a presentation or represent the Complainant or the Accused during any meeting or proceeding. The Parties are expected to ask and respond to question on their own behalf, without representation by their Advisor. The Advisor may consult with the advisee quietly or in writing, or outside the meeting or proceeding during breaks, but may not speak on behalf of the advisee at any point throughout the process. Advisors who do not follow these guidelines will be warned or dismissed from the meeting or proceeding at the discretion of the Investigator(s) during the investigation and the Equity HR Officer or Equity HR Officer's Designee during the Administrative Resolution Process.

#### **K. Investigation**

If a Complainant wants to pursue an investigation or if the University wants to pursue an investigation, then the Equity HR Officer or Equity HR Officer's Designee promptly appoints a trained investigator or a team of trained investigators to investigate. Within seven (7) business days after

the commencement of the investigation, the Investigator(s) will provide the Parties with written notice that an investigation has commenced, either:

1. In person, or
2. Mailed to the mailing address of the respective party as indicated in the official University records and emailed to the Party's University-issued e-mail account. If there is no local address on file, mail will be sent to the party's permanent address.

Once received in person or mailed and e-mailed, notice will be presumptively delivered.

The Parties are allowed to have an Advisor of their choice present with them for all Equity Resolution Process interviews, meetings and proceedings in which they participate. All investigations will be thorough, reliable and impartial. The Investigator(s) will make reasonable efforts to include interviews with the Parties and relevant witnesses, obtain available evidence and identify sources of expert information, if necessary. The Investigator(s) will provide an investigation report to the Equity HR Officer and Supervisor.

Investigation of reported misconduct brought directly by Complainant should be completed expeditiously, normally within thirty (30) business days of notice to the University. Investigation of a Complaint may take longer based on the nature or circumstances of the Complaint, such as lack of cooperation by the Complainant, when initial reports fail to provide direct first-hand information or in complex cases. The University may also undertake a short delay (several days to weeks, to allow evidence collection by the law enforcement agency) when criminal charges on the basis of the same behaviors that invoke the process are being investigated.

#### **L. Summary Resolution**

During or upon the completion of the investigation, the Equity HR Officer or Equity HR Officer's Designee will review the investigation, which may include meeting with the investigator(s). Based on that review, the Equity HR Officer or Equity HR Officer's Designee will make a summary determination whether a reasonable person could, based on the evidence gathered, find the Accused responsible for violating the University's Anti-Discrimination Policies.

If the Equity HR Officer or Equity HR Officer's Designee determines that a reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the Equity HR Officer or Equity HR Officer's Designee will direct the process to continue. The Complaint will then be resolved through either: Conflict Resolution or Administrative Resolution. There is no right to reconsider or appeal the summary determination to continue the process.

If the Equity HR Officer or Equity HR Officer's Designee determines that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the process will end and the Complainant and the Accused will be sent written notification of the determination. The Equity HR Officer or Equity HR Officer's Designee may counsel and suggest training opportunities to correct for inappropriate behavior that does not rise to the level of a violation.

The Complainant may request the Equity Resolution Appellate Officer to reconsider the summary determination ending the process. If the Equity Resolution Appellate Officer decides a reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, the Equity Resolution Appellate Officer will reverse the determination ending the process and direct the process to continue.

The Complaint will then be resolved through either: Conflict Resolution or Administrative Resolution.

If the Equity Resolution Appellate Officer agrees with the summary determination ending the process by the Equity HR Officer or Equity HR Officer's Designee and that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the process will end and the Complainant and the Accused will be sent written notification of the determination. This determination to end the process lies in the sole discretion of the Equity Resolution Appellate Officer and such determination is final. Further appeals or grievances are not permitted.

#### **M. Conflict Resolution**

The Investigator(s) will determine if Conflict Resolution is appropriate, based on the willingness of the parties, the nature of the conduct at issue and the susceptibility of the conduct to Conflict Resolution. Conflict Resolution is often used for less serious, yet inappropriate, behaviors and is encouraged as an alternative to the Administrative Resolution processes to resolve conflicts. Mediation is never utilized in cases involving allegations of nonconsensual sexual intercourse or nonconsensual sexual contact. It is not necessary to pursue Conflict Resolution prior to pursuing the Administrative Resolution Process and either party can stop the Conflict Resolution process at any time and request the Administrative Resolution Process. In a Conflict Resolution meeting, a neutral, University-assigned facilitator will foster dialogue with the parties to an effective resolution, if possible. The Equity HR Officer or Equity HR Officer's Designee will keep records of any resolution that is reached, and failure to abide by the agreed upon resolution can result in appropriate responsive actions.

#### **N. Administrative Resolution**

1. **Procedural Details for Administrative Resolution.** For the Administrative Resolution Processes, the following will apply:
  - a. The standard of proof will be "preponderance of the evidence," defined as determining whether evidence shows it is more likely than not that a policy violation occurred.
  - b. Questioning or evidence about the Complainant's prior sexual conduct is not permitted, though the Investigator, Equity HR Officer (or Equity HR Officer's Designee) or Title IX Coordinator (or Title IX Coordinator's Designee) may grant a limited exception in regards to the sexual history between the parties, if deemed relevant.
  - c. Unless deemed relevant by the decision maker, character evidence of either the Complainant or the Accused will not be considered.
  - d. Incidents or behavior of the Accused not directly related to the possible violation(s) will not be considered unless they show a pattern of related misconduct. History of related misconduct by the Accused that shows a pattern may be considered, if deemed relevant by the Equity HR Officer or Equity HR Officer's Designee.
  - e. The Administrative Resolution Process will normally be completed within sixty (60) business days from the notice of the Complaint. Deviations from this timeframe will be promptly communicated to both parties.
  - f. The Accused and the Complainant may provide a list of questions for the Investigator(s), Equity HR Officer or Equity HR Officer's Designee to ask the other party. If those questions are deemed appropriate and relevant, they may be asked on behalf of the requesting party.

- g. The Equity HR Officer or Equity HR Officer's Designee may, in their discretion, grant reasonable extensions to the timeframes and limits provided.
- h. The Administrative Resolution Process will proceed regardless of whether the Accused chooses to participate in the investigation or the finding.

2. **Administrative Resolution: Resolution by the Equity HR Officer and Supervisor.** Administrative Resolution by the Equity HR Officer and Supervisor can be pursued for any behavior that falls within the University's Anti-Discrimination Policies. The Administrative Resolution process consists of
- a. A prompt, thorough and impartial investigation by the Investigator;
  - b. A joint finding by the Equity HR Officer and Supervisor on each of the alleged policy violations; and
  - c. A joint finding by the Equity HR Officer and Supervisor on sanctions for findings of responsibility.

The Investigator(s) will provide an investigation report to the Equity HR Officer and Supervisor. The Equity HR Officer and Supervisor can, but are not required to, meet with and question the Investigator and any identified witnesses. The Equity HR Officer or Supervisor may request that the Investigator conduct additional interviews and/or gather additional information. The Equity HR Officer and Supervisor will offer to meet with the Complainant and will meet with the Complainant if the Complainant agrees to meet. The Equity HR Officer and Supervisor will meet with the Accused to review the alleged policy violations and the investigation report. The Accused may choose to admit responsibility for all or part of the alleged policy violations at any point in the process. If the Accused admits responsibility, in whole or in part, the Equity HR Officer and Supervisor will render a finding that the individual is in violation of University policy for the admitted conduct. For any disputed violations, the Equity HR Officer and Supervisor will render a joint finding utilizing the preponderance of the evidence standard. The Equity HR Officer and Supervisor will also render a finding on appropriate sanctions or remedial actions, if applicable. The findings are subject to appeal.

The Equity HR Officer will inform the Accused and the Complainant of the joint finding on each of the alleged policy violations and the joint finding on sanctions for findings of responsibility, if applicable, within five (5) business days of the findings, without significant time delay between notifications. Notification will be made in writing and will be delivered either:

- 1. In person, or
- 2. Mailed to the mailing address of the respective party as indicated in official University records and emailed to the party's University-issued email account. If there is no local address on file, mail will be sent to the party's permanent address

Once received in person or mailed and emailed, notice will be presumptively delivered.

## O. Sanctions

1. **Factors Considered When Finding Sanctions/Remedial Actions.** If the Accused is found responsible for a violation of the University's Anti-Discrimination Policies, the Equity HR Officer and Supervisor will find sanctions and remedial actions. Factors considered when finding a sanction/remedial action may include:
- a. The nature, severity of, and circumstances surrounding the violation.
  - b. The disciplinary history of the Accused.

- c. Any other information deemed relevant by the Equity HR Officer and Supervisor.
- d. The need for sanctions/remedial actions to bring an end to the discrimination, harassment and/or retaliation.
- e. The need for sanctions/remedial actions to prevent the future recurrence of discrimination, harassment and/or retaliation.
- f. The need to remedy the effects of the discrimination, harassment and/or retaliation on the Complainant and the University community.

2. **Types of Sanctions.** The following sanctions may be imposed upon any Staff Member found to have violated a University's Anti-Discrimination Policy. Multiple sanctions may be imposed for any single violation. Sanctions include but are not limited to:

- a. Warning – Verbal or Written
- b. Performance Improvement Plan
- c. Required Counseling
- d. Required Training or Education
- e. Loss of Annual Pay Increase
- f. Loss of Supervisory Responsibility
- g. Demotion
- h. Suspension without Pay
- i. Termination
- j. Recommendation of discipline in a training program, including recommendation of termination, suspension or other corrective or remedial actions

## P. Appeal

1. **Grounds for Appeal.** Both the Complainant and the Accused are allowed to appeal the findings in the Administrative Resolution Process. Appeals are limited to the following:
- a. A procedural error occurred that significantly impacted the outcome of the Administrative Resolution Process (e.g. substantiated bias, material deviation from established procedures, etc.)
  - b. To consider new evidence, unavailable during the original Administrative Resolution Process or investigation that could substantially impact the original finding or sanction
  - c. The sanctions fall outside the range typically imposed for this offense, or for the cumulative disciplinary record of the Accused.
2. **Requests for Appeal.** Both the Complainant and the Accused may submit a request for appeal to the Equity Resolution Appellate Officer. All requests for appeal must be submitted in writing to the Equity Resolution Appellate Officer within three (3) business days of the delivery of the findings. When any party requests an appeal, the other party (parties) will be notified and receive a copy of the request for appeal.
3. **Response to Request for Appeal.** Within three (3) business days of the delivery of the notice and copy of the request for appeal, the other party (parties) may file a response to the request for appeal. The response can address that sufficient grounds for appeal have not been met and/or the merits of the appeal.
4. **Review of the Request to Appeal.** The Equity Resolution Appellate Officer will make an initial review of the appeal request(s). The Equity Resolution Appellate Officer will review the request for appeal to determine whether:

- a. The request is timely, and
- b. The appeal is on the basis of any of the three grounds listed above, and
- c. When viewed in the light most favorable to the appealing party, the appeal states grounds that could result in an adjusted finding or sanction.

The Equity Resolution Appellate Officer will reject the request for appeal if all three of the above requirements are not met. The decision to reject the request for appeal is final and further appeals and grievances are not permitted. The Equity Resolution Appellate Officer will normally render a written decision whether the request for appeal is accepted or rejected within seven (7) business days from receipt of the request for appeal.

## Chapter 600.050 Equity Resolution Process for Resolving Complaints of Harassment, Sexual Misconduct and other Forms of Discrimination against a Staff Member ([http://www.umsystem.edu/ums/rules/collected\\_rules/equal\\_employment\\_educational\\_opportunity/ch600/chapter\\_600.050\\_equity\\_resolution\\_process\\_for\\_resolving\\_complaints](http://www.umsystem.edu/ums/rules/collected_rules/equal_employment_educational_opportunity/ch600/chapter_600.050_equity_resolution_process_for_resolving_complaints))

### A. General

The University will act on any formal or informal complaint or notice of violation of the University's anti-discrimination policies. The procedures described below apply to all such complaints or notice when the Accused is a Staff Member.

### B. Jurisdiction

Jurisdiction of the University of Missouri generally shall be limited to conduct which occurs on the University of Missouri premises or at University-sponsored or University-supervised functions. However, the University may take appropriate action, including, but not limited to, the imposition of sanctions under Section 600.050 of the Collected Rules and Regulations against Staff Members for conduct occurring in other settings, including off-campus, (1) in order to protect the physical safety of students, employees, visitors, patients or other members of the University community, (2) if there are effects of the conduct that interfere with or limit any person's ability to participate in or benefit from the University's educational programs, activities or employment or (3) if the conduct occurs when the Staff Member is serving in the role of a University employee.

### C. At-Will Employment Status

Nothing contained in this policy is intended and no language contained herein shall be construed as establishing a "just cause" standard for imposing discipline, including but not limited to, termination of employment. Further, nothing contained in this policy is intended and no language contained herein shall be construed to alter in any manner whatsoever the at-will employment status of any at-will University employee.

### D. Definitions:

1. **University's Anti-Discrimination Policies.** The University's Anti-Discrimination Policies include the Equal Employment/Education Opportunity Policy located at Section 320.010 of the Collected Rules and Regulations and the Sex Discrimination, Sexual Harassment and Sexual Misconduct in Education/Employment Policy located at Section 600.020 of the Collected Rules and Regulations.
2. **Complainant.** Complainant refers to the alleged victim of discrimination under the University's Anti-Discrimination Policies. The University may also serve as the Complainant when the alleged victim does not wish to participate in the resolution process.
3. **Accused.** The Staff Member or Members alleged to have violated the University's Anti-Discrimination Policies.
4. **Staff Members.** Staff Members include all Administrative, Service and Support Staff, which includes all regular employees, variable hour employees, nonregular employees, per diem employees as defined in Section 320.050.II of the Collected Rules and Regulations, and Subsidiary Employees as defined in Section 320.050.III.
5. **Complaint.** Any verbal or written communication or notice of an alleged violation of the University's Anti-Discrimination Policies.
6. **Advisors.** The individuals selected by the Complainant and the Accused to provide support and guidance throughout the Equity Resolution Process. Each party is allowed one advisor.
7. **Investigators.** Investigators are trained individuals appointed by the Equity Human Resources Officer ("Equity HR Officer") or Equity HR Officer's Designee to conduct investigations of the alleged violations of the University's Anti-Discrimination Policies.
8. **Equity Human Resources Officers ("Equity HR Officers").** The Equity Human Resources Officers ("Equity HR Officers") are trained human resources and/or equity administrators designated by:
  - a. the Chancellor or Chancellor's Designee for campus Staff Members;
  - b. the Chancellor or Chancellor's Designee for MU Health System Staff Members; and
  - c. the President or President's Designee for System Staff Members.
9. **Supervisor.** The individual or individuals who have authority to terminate the Accused's employment. If a supervisor has a conflict as determined by the Equity HR Officer, the Equity HR Officer will determine the appropriate manager to act as the Supervisor for purposes of this rule.
10. **Equity Resolution Appellate Officers.** Equity Resolution Appellate Officers are trained, senior-level administrators who hear all appeals stemming from the Equity Resolution Process and are designated by:
  - a. the Chancellor or Chancellor's Designee for campus Staff Members;
  - b. the Chancellor or Chancellor's Designee for Health System Staff Members; and
  - c. the President or President's Designee for System Staff Members.
11. **Summary Resolution.** Resolution of the Complaint upon the determination by the Equity HR Officer or Equity HR Officer's Designee that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies.
12. **Conflict Resolution.** Resolution using alternative dispute resolution mechanisms such as mediation, facilitated dialogue or restorative justice.
13. **Administrative Resolution.** Resolution of a Complaint by the Equity HR Officer and the Accused's Supervisor.
14. **Parties.** The Complainant and the Accused are collectively referred to as the Parties.

## E. Filing a Complaint

Any student, employee, volunteer, visitor or patient who believes that a Staff Member has violated the University's Anti-Discrimination Policies should contact the Equity HR Officer or Equity HR Officer's Designee and in the case of allegations of sexual harassment, sexual misconduct or allegations of other forms of sex discrimination as defined in Section 600.020 of the Collected Rules and Regulations, the Title IX Coordinator or Title IX Coordinator's Designee. Such individuals can also contact campus police if the alleged offense may also constitute a crime.

## F. Interim Remedies

During the Equity Resolution Process and prior to a finding whether an alleged violation has occurred, the Equity HR Officer or Equity HR Officer's Designee or in the case of allegations of sexual harassment, sexual misconduct or allegations of other forms of sex discrimination as defined in Section 600.020 of the Collected Rules and Regulations, the Title IX Coordinator or Title IX Coordinator's Designee may provide interim remedies including, but not limited to, one or more of the following:

1. Referral and facilitating contact for the Complainant to on- or off-campus counseling, medical services and/or mental health services.
2. Implementing contact limitations on the Accused or on all Parties.
3. Referral of the Complainant to victim advocacy and support services either on and/or off-campus.
4. Adjusting the work schedules, work assignments, supervisory responsibilities, supervisor reporting responsibilities or work arrangements of the Complainant and/or the Accused.
5. If the Complainant is a student:
  - a. Referral of Complainant to academic support services and any other services that may be beneficial to the Complainant.
  - b. Adjusting the courses, assignments, exam schedules, etc. of the Complainant.
  - c. Altering the on-campus housing assignments, dining arrangements, or other campus services for the Complainant.
6. Informing the Complainant of the right to notify law enforcement authorities of the alleged incident and offering to help facilitate such a report.
7. Implementing leave from work with or without pay for the Complainant and/or Accused.
8. Implementing suspension from campus with or without pay for the Accused.

## G. Employees and Students Participating in the Equity Resolution Process

All University employees and students must be truthful when making any statement or providing any information or evidence to the University throughout the process, including to the Investigator, the Equity HR Officer (or Equity HR Officer's Designee), the Title IX Coordinator (or Title IX Coordinator's Designee) and/or the Equity Resolution Appellate Officer, and all documentary evidence must be genuine and accurate. False statements, fraudulent evidence or refusal to cooperate with the Investigator, the Equity HR Officer (or Equity HR Officer's Designee), the Title IX Coordinator (or Title IX Coordinator's Designee) and/or the Equity Resolution Appellate Officer by an employee may be the basis for personnel action or by a student may be the basis for student conduct action pursuant to Section 200.010(B)(14) or other provisions of Section 200.010. Nothing in this provision is intended to require a Complainant to participate in the process.

## H. Rights of the Complainant in the Equity Resolution Process

1. To be treated with respect by University officials.
2. To be free from retaliation.
3. To have access to campus support resources (such as counseling and mental health services and University health services).
4. To have an Advisor of the Complainant's choice accompany the Complainant to all interviews, meetings and proceedings throughout the Equity Resolution Process.
5. To refuse to have an allegation resolved through the Conflict Resolution process.
6. To have an opportunity to present a list of potential witnesses and provide evidence to the Investigator.
7. To have Complaints heard in substantial accordance with these procedures.
8. When the Complainant is not the reporting party, the Complainant has full rights to participate in any Equity Resolution Process.
9. To be informed in writing of the finding, rationale and sanctions.
10. To report the matter to law enforcement (if applicable) and to have assistance in making that report.
11. To have an opportunity to appeal the findings and sanction.

## I. Rights of the Accused in the Equity Resolution Process

1. To be treated with respect by University officials.
2. To have access to campus support resources (such as counseling and mental health services and University health services), unless removed from campus pending the completion of the process.
3. To have an Advisor of the Accused's choice accompany the Accused to all meetings and proceedings throughout the Equity Resolution Process.
4. To refuse to have an allegation resolved through the Conflict Resolution process.
5. To have an opportunity to present a list of potential witnesses and provide evidence to the Investigator.
6. To receive notice of the policies alleged to have been violated.
7. To have Complaints heard in substantial accordance with these procedures.
8. To be informed in writing of the finding, rationale and sanction.
9. To have an opportunity to appeal the findings and sanction.

## J. Role of Advisors

Each Complainant and Accused is allowed to have one Advisor of their choice present with them for all Equity Resolution process interviews, meeting and proceedings. The Parties may select whomever they wish to serve as their Advisor, including an attorney. An advisor is not required and any party may elect to proceed without an Advisor.

If Complainant is a student, the student Complainant may request that the Equity HR Officer (or Equity HR Officer's Designee) or Title IX Coordinator (or Title IX Coordinator's Designee) assign a trained Advisor to provide support throughout the Equity Resolution Process. University trained Advisors are administrators or staff at the University trained on the Equity Resolution Process.

The Advisor may not make a presentation or represent the Complainant or the Accused during any meeting or proceeding. The Parties are expected to ask and respond to question on their own behalf, without representation by their Advisor. The Advisor may consult with the advisee quietly or in

writing, or outside the meeting or proceeding during breaks, but may not speak on behalf of the advisee at any point throughout the process. Advisors who do not follow these guidelines will be warned or dismissed from the meeting or proceeding at the discretion of the Investigator(s) during the investigation and the Equity HR Officer or Equity HR Officer's Designee during the Administrative Resolution Process.

#### **K. Investigation**

If a Complainant wants to pursue an investigation or if the University wants to pursue an investigation, then the Equity HR Officer or Equity HR Officer's Designee promptly appoints a trained investigator or a team of trained investigators to investigate. Within seven (7) business days after the commencement of the investigation, the Investigator(s) will provide the Parties with written notice that an investigation has commenced, either:

1. In person, or
2. Mailed to the mailing address of the respective party as indicated in the official University records and emailed to the Party's University-issued e-mail account. If there is no local address on file, mail will be sent to the party's permanent address

Once received in person or mailed and e-mailed, notice will be presumptively delivered.

The Parties are allowed to have an Advisor of their choice present with them for all Equity Resolution Process interviews, meetings and proceedings in which they participate. All investigations will be thorough, reliable and impartial. The Investigator(s) will make reasonable efforts to include interviews with the Parties and relevant witnesses, obtain available evidence and identify sources of expert information, if necessary. The Investigator(s) will provide an investigation report to the Equity HR Officer and Supervisor.

Investigation of reported misconduct brought directly by Complainant should be completed expeditiously, normally within thirty (30) business days of notice to the University. Investigation of a Complaint may take longer based on the nature or circumstances of the Complaint, such as lack of cooperation by the Complainant, when initial reports fail to provide direct first-hand information or in complex cases. The University may also undertake a short delay (several days to weeks, to allow evidence collection by the law enforcement agency) when criminal charges on the basis of the same behaviors that invoke the process are being investigated.

#### **L. Summary Resolution**

During or upon the completion of the investigation, the Equity HR Officer or Equity HR Officer's Designee will review the investigation, which may include meeting with the investigator(s). Based on that review, the Equity HR Officer or Equity HR Officer's Designee will make a summary determination whether a reasonable person could, based on the evidence gathered, find the Accused responsible for violating the University's Anti-Discrimination Policies.

If the Equity HR Officer or Equity HR Officer's Designee determines that a reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the Equity HR Officer or Equity HR Officer's Designee will direct the process to continue. The Complaint will then be resolved through either: Conflict Resolution or Administrative Resolution. There is no right to reconsider or appeal the summary determination to continue the process.

If the Equity HR Officer or Equity HR Officer's Designee determines that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the process will end and the Complainant and the Accused will be sent written notification of the determination. The Equity HR Officer or Equity HR Officer's Designee may counsel and suggest training opportunities to correct for inappropriate behavior that does not rise to the level of a violation.

The Complainant may request the Equity Resolution Appellate Officer to reconsider the summary determination ending the process. If the Equity Resolution Appellate Officer decides a reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, the Equity Resolution Appellate Officer will reverse the determination ending the process and direct the process to continue. The Complaint will then be resolved through either: Conflict Resolution or Administrative Resolution.

If the Equity Resolution Appellate Officer agrees with the summary determination ending the process by the Equity HR Officer or Equity HR Officer's Designee and that no reasonable person could find the Accused responsible for violating the University's Anti-Discrimination Policies, then the process will end and the Complainant and the Accused will be sent written notification of the determination. This determination to end the process lies in the sole discretion of the Equity Resolution Appellate Officer and such determination is final. Further appeals or grievances are not permitted.

#### **M. Conflict Resolution**

The Investigator(s) will determine if Conflict Resolution is appropriate, based on the willingness of the parties, the nature of the conduct at issue and the susceptibility of the conduct to Conflict Resolution. Conflict Resolution is often used for less serious, yet inappropriate, behaviors and is encouraged as an alternative to the Administrative Resolution processes to resolve conflicts. Mediation is never utilized in cases involving allegations of nonconsensual sexual intercourse or nonconsensual sexual contact. It is not necessary to pursue Conflict Resolution prior to pursuing the Administrative Resolution Process and either party can stop the Conflict Resolution process at any time and request the Administrative Resolution Process. In a Conflict Resolution meeting, a neutral, University-assigned facilitator will foster dialogue with the parties to an effective resolution, if possible. The Equity HR Officer or Equity HR Officer's Designee will keep records of any resolution that is reached, and failure to abide by the agreed upon resolution can result in appropriate responsive actions.

#### **N. Administrative Resolution**

1. **Procedural Details for Administrative Resolution.** For the Administrative Resolution Processes, the following will apply:
  - a. The standard of proof will be "preponderance of the evidence," defined as determining whether evidence shows it is more likely than not that a policy violation occurred.
  - b. Questioning or evidence about the Complainant's prior sexual conduct is not permitted, though the Investigator, Equity HR Officer (or Equity HR Officer's Designee) or Title IX Coordinator (or Title IX Coordinator's Designee) may grant a limited exception in regards to the sexual history between the parties, if deemed relevant.
  - c. Unless deemed relevant by the decision maker, character evidence of either the Complainant or the Accused will not be considered.

- d. Incidents or behavior of the Accused not directly related to the possible violation(s) will not be considered unless they show a pattern of related misconduct. History of related misconduct by the Accused that shows a pattern may be considered, if deemed relevant by the Equity HR Officer or Equity HR Officer's Designee.
- e. The Administrative Resolution Process will normally be completed within sixty (60) business days from the notice of the Complaint. Deviations from this timeframe will be promptly communicated to both parties.
- f. The Accused and the Complainant may provide a list of questions for the Investigator(s), Equity HR Officer or Equity HR Officer's Designee to ask the other party. If those questions are deemed appropriate and relevant, they may be asked on behalf of the requesting party.
- g. The Equity HR Officer or Equity HR Officer's Designee may, in their discretion, grant reasonable extensions to the timeframes and limits provided.
- h. The Administrative Resolution Process will proceed regardless of whether the Accused chooses to participate in the investigation or the finding.

**2. Administrative Resolution: Resolution by the Equity HR Officer and Supervisor.** Administrative Resolution by the Equity HR Officer and Supervisor can be pursued for any behavior that falls within the University's Anti-Discrimination Policies.

The Administrative Resolution process consists of

- 1. A prompt, thorough and impartial investigation by the Investigator;
- 2. A joint finding by the Equity HR Officer and Supervisor on each of the alleged policy violations; and
- 3. A joint finding by the Equity HR Officer and Supervisor on sanctions for findings of responsibility.

The Investigator(s) will provide an investigation report to the Equity HR Officer and Supervisor. The Equity HR Officer and Supervisor can, but are not required to, meet with and question the Investigator and any identified witnesses. The Equity HR Officer or Supervisor may request that the Investigator conduct additional interviews and/or gather additional information. The Equity HR Officer and Supervisor will offer to meet with the Complainant and will meet with the Complainant if the Complainant agrees to meet. The Equity HR Officer and Supervisor will meet with the Accused to review the alleged policy violations and the investigation report. The Accused may choose to admit responsibility for all or part of the alleged policy violations at any point in the process. If the Accused admits responsibility, in whole or in part, the Equity HR Officer and Supervisor will render a finding that the individual is in violation of University policy for the admitted conduct. For any disputed violations, the Equity HR Officer and Supervisor will render a joint finding utilizing the preponderance of the evidence standard. The Equity HR Officer and Supervisor will also render a finding on appropriate sanctions or remedial actions, if applicable. The findings are subject to appeal.

The Equity HR Officer will inform the Accused and the Complainant of the joint finding on each of the alleged policy violations and the joint finding on sanctions for findings of responsibility, if applicable, within five (5) business days of the findings, without significant time delay between notifications. Notification will be made in writing and will be delivered either:

- a) In person, or
- b) Mailed to the mailing address of the respective party as indicated in official University records and emailed to the

party's University-issued email account. If there is no local address on file, mail will be sent to the party's permanent address.

Once received in person or mailed and emailed, notice will be presumptively delivered.

## O. Sanctions

### 1. Factors Considered When Finding Sanctions/Remedial Actions.

If the Accused is found responsible for a violation of the University's Anti-Discrimination Policies, the Equity HR Officer and Supervisor will find sanctions and remedial actions. Factors considered when finding a sanction/remedial action may include:

- a. The nature, severity of, and circumstances surrounding the violation.
- b. The disciplinary history of the Accused.
- c. Any other information deemed relevant by the Equity HR Officer and Supervisor.
- d. The need for sanctions/remedial actions to bring an end to the discrimination, harassment and/or retaliation.
- e. The need for sanctions/remedial actions to prevent the future recurrence of discrimination, harassment and/or retaliation.
- f. The need to remedy the effects of the discrimination, harassment and/or retaliation on the Complainant and the University community.

### 2. Types of Sanctions. The following sanctions may be imposed upon any Staff Member found to have violated a University's Anti-Discrimination Policy. Multiple sanctions may be imposed for any single violation. Sanctions include but are not limited to:

- a. Warning – Verbal or Written
- b. Performance Improvement Plan
- c. Required Counseling
- d. Required Training or Education
- e. Loss of Annual Pay Increase
- f. Loss of Supervisory Responsibility
- g. Demotion
- h. Suspension without Pay
- i. Termination
- j. Recommendation of discipline in a training program, including recommendation of termination, suspension or other corrective or remedial actions

## P. Appeal

### 1. Grounds for Appeal.

Both the Complainant and the Accused are allowed to appeal the findings in the Administrative Resolution Process. Appeals are limited to the following:

- a. A procedural error occurred that significantly impacted the outcome of the Administrative Resolution Process (e.g. substantiated bias, material deviation from established procedures, etc.).
- b. To consider new evidence, unavailable during the original Administrative Resolution Process or investigation that could substantially impact the original finding or sanction.
- c. The sanctions fall outside the range typically imposed for this offense, or for the cumulative disciplinary record of the Accused.

### 2. Requests for Appeal.

Both the Complainant and the Accused may submit a request for appeal to the Equity Resolution Appellate Officer.

All requests for appeal must be submitted in writing to the Equity Resolution Appellate Officer within three (3) business days of the delivery of the findings. When any party requests an appeal, the other party (parties) will be notified and receive a copy of the request for appeal.

3. **Response to Request for Appeal.** Within three (3) business days of the delivery of the notice and copy of the request for appeal, the other party (parties) may file a response to the request for appeal. The response can address that sufficient grounds for appeal have not been met and/or the merits of the appeal.
4. **Review of the Request to Appeal.** The Equity Resolution Appellate Officer will make an initial review of the appeal request(s). The Equity Resolution Appellate Officer will review the request for appeal to determine whether:
  - a. The request is timely, and
  - b. The appeal is on the basis of any of the three grounds listed above, and
  - c. When viewed in the light most favorable to the appealing party, the appeal states grounds that could result in an adjusted finding or sanction.
    - i. The Equity Resolution Appellate Officer will reject the request for appeal if all three of the above requirements are not met. The decision to reject the request for appeal is final and further appeals and grievances are not permitted. The Equity Resolution Appellate Officer will normally render a written decision whether the request for appeal is accepted or rejected within seven (7) business days from receipt of the request for appeal.
5. **Review of the Appeal.** If all three requirements for appeal listed above are met, the Equity Resolution Appellate Officer will accept the request for appeal and proceed with rendering a decision on the appeal applying the following additional principles:
  - a. Appeals are not intended to be full re-hearings of the Complaint and are therefore deferential to the original findings. In most cases, appeals are confined to a review of the written documentation and record of the Administrative Resolution Process, and pertinent documentation regarding the grounds for appeal. Appeals granted based on new evidence should normally be remanded to the original Equity HR Officer and Supervisor for reconsideration.
  - b. Sanctions imposed are implemented immediately unless the Equity Resolution Appellate Officer stays their implementation pending the outcome of the appeal.
  - c. The Equity Resolution Appellate Officer will normally render a written decision on the appeal to all parties within seven (7) business days from accepting the request for appeal.
  - d. Once an appeal is decided, the outcome is final. Further appeals and grievances are not permitted.
6. **Extensions of Time.** For good cause, the Equity Resolution Appellate Officer may grant reasonable extensions of time (e.g.: 5-7 business days) to the deadlines in the appeal process.

#### **Q. Records**

In implementing this policy, records of all Complaints and resolutions will be kept by the Equity HR Officer or Equity HR Officer's Designee. The "Record of the Case in the Section 600.050 Process" will include, if applicable, letters of notice, exhibits, the findings of the Equity HR Officer and Supervisor and the decision on appeal. The Record of the Case in the

Section 600.050 Process will be kept for a minimum of seven (7) years following final resolution.

#### **R. Amendments**

The President of the University is authorized to amend this Board Rule by Executive Order on or before February 6, 2017.

Complaints regarding sex discrimination, sexual harassment, or sexual violence, questions or concerns about Title IX compliance should be directed to the Title IX Coordinator: [http://www.umsystem.edu/ums/hr/titleix/umsl\\_title\\_ix\\_office](http://www.umsystem.edu/ums/hr/titleix/umsl_title_ix_office).

# Confidentiality Policies

These statements are set forth as guidelines and procedures to implement the University of Missouri policy on student records developed from the federal Family Educational Rights and Privacy Act of 1974.

The University of Missouri--St. Louis, as charged in the act, will annually inform its eligible students by including in the Student Planner, the Schedule of Courses, and the UMSL Bulletin the following information:

1. "Education Records" are those records, files, documents, and other materials that contain information directly related to a student and are maintained by the university. Those records, made available for review to the student under The Family Educational Rights and Privacy Act of 1974, are student financial aid, the student's cumulative advisement file, student health records, disciplinary records, admissions file, and academic record. Confidential letters and statements of recommendation that were placed in student credential folders at the Office of Career Placement Services after January 1, 1975, are also made available, if the student has not waived the right to view these recommendations.

The University of Missouri--St. Louis "Education Records" do not include:

Records of instructional, supervisor, and administrative personnel and educational personnel ancillary thereto which are in the sole possession of the maker thereof and which are not accessible or revealed to any other person except a substitute.

Records of the University of Missouri Police Department created for a law enforcement purpose and maintained by the police department.

In the case of persons who are employed by the university but who are not in attendance at the university, records made and maintained in the normal course of business that related exclusively to such persons and that person's capacity as an employee where the records are not available for any other purpose.

All records on any university student that are created and maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in his professional or paraprofessional capacity, or assisting in that capacity, and created, maintained, or used only in connection with the provision of treatment to the student, and are not available to anyone other than persons providing such treatment, provided, however, that such records can be personally reviewed by a physician or other appropriate professional of the student's choice.

Directory Information:

1. The University of Missouri-St. Louis recognizes "Directory Information/ Public Information" to mean a student's name, address, telephone listing, e-mail, enrollment status, current level, major field of study, participation in officially recognized activities and sports, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. All students must inform the Office of the Registrar if the information designated as directory information should not be released without the student's prior consent. Students may change their privacy settings by logging in to MyView. .
2. University of Missouri-St. Louis students have access to the educational records identified in Paragraph 1 above. In accordance

with Public Law 93380 as amended, the University of Missouri--St. Louis will not make available to students the following materials:

Financial records of the parents of students or any information contained therein.

Confidential letters and statements of recommendation placed in the education records prior to January 1, 1975, if such letters or statements are not used for the purpose other than those for which they were specifically intended.

Confidential recommendations respecting admission to the university, application for employment and receipt of honor, or honorary recognition, where the student has signed a waiver of the student's rights of access as provided in 6.0404, the University Policy on Student Records.

1. The Director of Financial Aid, the appropriate academic dean, Assistant Vice Provost for Student Affairs: Health, Wellness, & Counseling Services, the Vice Provost for Student Affairs, the Director of Career Placement Services, the Director of Admissions, and the Registrar are the officials responsible for the maintenance of each type of record listed in Paragraph 1.
2. Any student may, upon request, review his or her records and, if inaccurate information is included, may request the expunging of such information from the file. Such inaccurate information will then be expunged upon authorization of the official responsible for the file.
3. Students desiring to challenge the content of their record may request an opportunity for a hearing to challenge the content of the educational record in order to ensure that the record is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student, to provide an opportunity for the correction or deletion of any such inaccurate, misleading, or otherwise inappropriate data contained therein, and to insert into such records a written explanation respecting the content of such records.
4. The university official charged with custody of the records will attempt to settle informally any disputes with any student regarding the content of the university's educational records through informal meetings and discussions with the student.
5. Upon request of the student or the university official charged with custody of the records of the student, a formal hearing shall be conducted as follows:
  - a. The request for a hearing shall be submitted in writing to the chancellor, who will appoint a hearing officer or a hearing committee to conduct the hearing.
  - b. The hearing shall be conducted and decided within a reasonable period of time following the request for a hearing. The parties will be entitled to written notice 10 days prior to the time and place of the hearing.
  - c. The hearing shall be conducted and the decision rendered by an appointed hearing official or officials who shall not have a direct interest in the outcome of the hearing.
  - d. The student shall be afforded a full and fair opportunity to present evidence relevant to the hearing.
  - e. The decision shall be rendered in writing within a reasonable period of time after the conclusion of the hearing.

Either party may appeal the decision of the hearing official or officials to the campus chancellor. Appeal of the chancellor's decision is to the president. Appeal of the president's decision is to the Board of Curators.

1. The University of Missouri-St. Louis will not mail grade reports to parents unless the student has completed the necessary authorization in the registrar's office.
2. The University of MissouriSt. Louis may permit access to or release of the educational records without the written consent of the student to the parents of a dependent student as defined in Section 152 of the Internal Revenue Code of 1954.
3. If any material or document in the educational record of a student includes information on more than one student, the student may inspect and review only such part of such material or document as relates to him or her or to be informed of the specific information contained in such part of such material.

# Tuition and Payments

## Fee Assessment

Fees for coursework vary due to the student's residency standing, undergraduate, graduate or post-graduate status, credit hours, and the applicability of any course fees charged to specific courses or programs. Detailed Information on tuition and fee rates and residency status can be found on the Cashier's website (<http://www.umsl.edu/cashiers>).

## Financial Responsibility

A Financial Responsibility agreement (<http://www.umsl.edu/cashiers/student-parent/student-responsibility.html>) will be presented to all students once per academic year. The agreement explains the billing methods, payment options and all policies related to student accounts. It is the responsibility of the student that fees and other financial obligations are paid as they become due regardless of who is making the payments. Students who need assistance in meeting financial obligations to the university should contact the Financial Aid Office in a timely manner. Students are expected to adhere to important dates and policies that impact fees. Due dates and fee reassessment dates are posted on the Cashier's website (<http://www.umsl.edu/cashiers>) and through links on the eBill website (<http://www.umsl.edu/cashiers/billing-payment/view-pay.html>). The non-payment of any financial obligation may result in additional collection fees, the inability to register and the withholding of student records.

## Billing

The Cashier's Office bills you by posting a monthly student account billing statement on eBill around the 10th of any month in which there's a new charge or credit on your account. The Cashier's Office will send you and your authorized payer (if any) a billing notification email reminder to check your statement and pay any balance due. The mail.umsl.edu email address will be used for students and the authorized payers email address will be used for authorized payers.

## Payment of Fees

Payments are due on the first day of each month. The minimum payment can be found at the top of the monthly billing statement or by checking the percentage due as shown in the billing schedules (<http://www.umsl.edu/cashiers/billing-payment/billing-schedules.html>) on the Cashier's website. If a student chooses to make the minimum payment or a partial payment, a finance charge of 1% will be assessed on the unpaid billed balance. The monthly 1% finance charge can be avoided by paying the balance in full. A \$10 late payment fee will be charged to student accounts which have been billed and not paid by the due date.

All fees, fines, bookstore charges, etc. must be paid by the last day of the term. After the term ends, unpaid accounts will be turned over to an outside collection agency. Collection agency fees of up to 50% of the unpaid account balance will be added to the student's account. Student accounts must be paid in full before a student will be permitted to register for upcoming semesters or receive transcripts or a diploma.

## Payment Options

**Online** – Log on to the MyView (<https://myview.umsl.edu/psp/prd/?cmd=login&languageCd=ENG&>) student system to make payment using a personal checking or savings account or a Visa, MasterCard, Discover

or American Express credit card.(2.75% service fee applied to credit card payments).

**Mail** – Send your check or money order to the Cashier's Office at: University of Missouri - St. Louis 285 Millennium Student Center (MC 212) One University Blvd. St. Louis, MO 63121-4400. Include student name and student number on the check or money order.

**In person** – Visit the Cashier's Office on the second floor of the Millennium Student Center in room 285. Payment in cash, check, money order or pin based MasterCard or VISA debit are accepted at the cashier stations. Credit card payments cannot be processed at the cashier stations, but are accepted online from <http://ebill.umsl.edu>.

**Payment Drop Box** – A secure payment drop box is situated just outside the Cashier's Office, room 285 of the Millennium Student Center. Only check or money order payments, please.

Any communications concerning disputed debts, including instruments tendered as full satisfaction of debt, must be sent to Account Disputes, 1 University Blvd., 289 Millennium Student Center, St. Louis, MO 63121-4400.

Any check presented to the university for payment that is returned unpaid will be assessed a \$20.00 returned check fee in addition to any fees that the bank may charge.

**ERDPP** – Employer Reimbursement Deferred Payment Program (<http://www.umsl.edu/cashiers/tuition-fees/erdpp.html>). Many companies offer tuition reimbursement to their employees. While the student is ultimately responsible for the payment of their tuition and fees, the Cashier's Office offers the ERDPP program to allow a student to take advantage of this employer benefit by deferring payment of all, or a portion, of their tuition and related costs. There is a \$50.00 application fee each semester.

**Financial Aid** – If you have applied for financial aid in advance and have received an award letter, your letter describes how much of your award will be paid towards your student fees. If your financial aid does not cover all the fees, then you must pay the remainder of your student fees yourself by the due date. Financial aid that has not yet been disbursed will appear on your monthly billing statement as "Anticipated Aid". Your statement will reflect Anticipated Aid as being deducted from your Account Balance giving you an Adjusted Amount Due. Your Minimum Payment is a percentage of the Adjusted Amount Due. Students should pay either the Adjusted Amount Due or the Minimum Payment by the due date to avoid a \$10 late payment fee.

**Third Party Sponsor** – When an organization makes a commitment to pay your educational expenses, they are considered a Third Party Sponsor (<http://www.umsl.edu/cashiers/billing-payment/explanations/third-party.html>). If you are expecting a third party sponsor to pay your tuition and fees, you will need to have your sponsor submit a letter of authorization to the Cashier's Office. Once the sponsor's letter is received, a credit for the amount the sponsor has indicated will be applied to your student account. An invoice for this amount will then be sent to your sponsor. You are responsible for paying any charges not covered by your sponsor on time, to avoid finance and late charges or other penalties. If your sponsor ends up not paying for the charges they authorized, the responsibility of paying those charges defaults back to you.

## UMSL Compliance with the Veteran Access, Choice and Accountability Act of 2014, Section 702

UMSL is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition purposes:

- A veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in the State of Missouri (or one of the Illinois counties covered by the “Metropolitan Rate Program”) while attending UMSL (regardless of his/her formal State of residence) and enrolls within three years of discharge from a period of active duty service of 90 days or more.
- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in the State of Missouri (or one of the Illinois counties covered by the “Metropolitan Rate Program”) while attending UMSL (regardless of his/her formal State of residence) and enrolls within three years of the transferor's discharge from a period of active duty service of 90 days or more.
- A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Missouri (or one of the Illinois counties covered by the “Metropolitan Rate Program”) while attending UMSL (regardless of his/her formal State of residence) and enrolls within three years of the Service member's death in the line of duty following a period of active duty service of 90 days or more.
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

## Refunds

A credit balance is the result of an overpayment on a student's account from Financial Aid, loans or payments received. Credit balance refunds will be processed when a credit actually exists on the student's account. Anticipated Financial Aid must be received and posted to the student's account in order for a credit to exist and for a refund to be processed.

When financial aid funds are received by the University, the funds are applied to the students account. During the Fall and Spring semesters, financial aid funds are applied to student accounts no sooner than ten days prior to the start of classes. During the Summer semester, financial aid funds are applied to student accounts no sooner than the day the student is actually taking the course(s) that have the hours required to receive the aid. If the student has a credit balance after financial aid funds have paid all account charges in full, the student is now eligible for a refund.

**Parent-Plus Loan Refund** - If you have any funds available after what is owed directly to the University, the refund may be released to the parent at the address listed on the PLUS Loan Application. Refunds from proceeds

of PLUS will be issued to the student only if the parent requests that on the PLUS application.

**Credit Card Refund** - If a credit card payment has been made towards your student account in the past 120 days, any refund due to you will be returned to that credit card.

**Drop/Withdrawal Refund** – Students who are leaving school or dropping classes are responsible for canceling their registration and verifying that their classes have been dropped. Any refunding of fees will be made according to the reassessment schedule available on the Cashier's website. Fees reassessed may include Tuition and Course/Supplemental fees (if applicable). The Spring and Fall reassessment schedules only apply to regular 16 week session courses. The Summer reassessment schedules only apply to regular 4 week, 8 week and 12 week session courses. Fee reassessment for courses not in regular sessions will be based on the course's total number of calendar days (weekends and holidays included) and the number of calendar days that the student was enrolled in the course. If the meeting dates for your course are different from the regular session meeting dates, please contact the Cashier's Office as your fee reassessment for withdrawal or dropping may differ from the regular reassessment.

The refund process requires two to four weeks processing time after withdrawal or dropped classes. When a student completely withdraws from a semester and was receiving federal financial aid, the University and/or the student may be required to return some of the financial aid, awarded to the student.

Charges that students accrue prior to a refund being issued will be deducted from the refund amount. Charges that are accrued after a refund is issued will be billed to the student on the monthly billing statement. As student accounts go into credit balance, the Cashier's office processes refunds to students by checks through the mail and by direct deposit to students personal checking or savings accounts. Students should allow 7-10 business days from the day that the refund is processed to receive a refund check in the mail. For students that have direct deposit, please allow 3-5 business days from the day that the refund is processed to receive the refund in your bank account.

## Cancellation of Registration Due to Nonpayment of Fees

The university will attempt to notify any student whose registration is about to be administratively canceled for nonpayment of fees prior to taking this action.

On or before the last day on which a student may enroll in a course, a cancelled student's space in a course will be given to other students on that course's wait lists. The canceled student will be placed at the end of the course wait list.

Any student who has been administratively canceled for nonpayment of assessed fees may not enroll in a class unless the required fees have been paid.

Cancelled students who re-register on or after the first day of the semester will be assessed an additional nonrefundable late registration charge.

## Fees May Change Without Notice

The university reserves the right to modify by increase or decrease the fees charged for attendance and other services at the university, including but not limited to tuition or educational fees, at any time when in the discretion of the governing board the same is in the best interest of the

University, provided that no increases can or will be effective unless approved by the governing board not less than thirty (30) days prior to the beginning of the academic term (semester, etc.) to which the fees are applicable, with all modification of fees to be effective irrespective as to whether fees have or have not been paid by or on behalf of a student prior to the effective date of the modification.

# Courses of Instruction

## Accounting

### Courses

#### ***ACCTNG 2400 Fundamentals Of Financial Accounting: 3 semester hours***

Prerequisites: MATH 1030 and completion of 27 credit hours. MATH 1030 may be taken concurrently. This is a one semester course in financial accounting theory and practice. The primary emphasis is on the corporate financial statements of income, financial position and cash flow-their content and interpretation; and the impact of financial transactions upon them.

#### ***ACCTNG 2410 Managerial Accounting: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 2400. This is an advanced course that goes beyond the scope of a second-semester course in fundamentals of accounting. The development, interpretation, and use of relevant cost behavior, control, and traceability concepts for management planning, controlling and decision making are emphasized. Topics include: an introduction to product costing, the contribution concept, direct costing, performance standards and variance analysis, responsibility accounting, segment profitability, alternative choice decisions, and capital budgeting.

#### ***ACCTNG 3401 Financial Accounting And Reporting I: 3 semester hours***

Prerequisites: A minimum 2.0 campus GPA, MATH 1030, ACCTNG 2410, and 57 credit hours Review of the foundations of financial accounting theory and of the financial statement preparation process. Accounting theory and practice related to current assets (except for investments in securities). The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

#### ***ACCTNG 3402 Financial Accounting And Reporting II: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as investments in securities, operational assets, current and long-term liabilities, and leases. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

#### ***ACCTNG 3411 Cost Accounting: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. The study of the basic principles of cost determination for, and control of, manufacturing and distribution activities. Topics include job-order costing, process costing, cost allocations, and the development and use of standard costs within a system of absorption costing.

#### ***ACCTNG 3421 Accounting Information Systems: 3 semester hours***

Prerequisites: Minimum campus GPA of 2.0. In addition, MATH 1030, INFSYS 1800, ACCTNG 2410, and ACCTNG 3401. Examines the fundamentals of accounting information systems, including hardware and software considerations, internal controls, and transaction processing cycles. Also focuses upon the development of efficient spreadsheets as applied to financial and managerial accounting concepts.

#### ***ACCTNG 3441 Income Taxes: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Fundamentals of Federal income taxation. Topics include taxable entities, income, deductions, tax accounting methods, tax basis, and property transactions at both the conceptual and operational levels.

#### ***ACCTNG 3451 Accounting For Governmental And Not-For-Profit Entities: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; also MATH 1030 and ACCTNG 3402. Principles of fund accounting and financial reporting for governmental and nonprofit entities. This course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

#### ***ACCTNG 3460 Accounting Career Strategies: 3 semester hours***

Prerequisites: ACCTNG 3401; minimum campus GPA of 2.0 and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This is a course in career and professional development. The primary emphasis is developing and executing a career strategy, enhancing business and client communication skills, and preparing for the transition to the accounting profession.

#### ***ACCTNG 3490 Internship In Accounting: 1-3 semester hours***

Prerequisites: ACCTNG 3401, a minimum campus GPA of 2.0, a minimum GPA of 2.7 in all accounting courses at the 3000-level and above taken at UM-St. Louis, consent of supervising instructor and accounting internship coordinator. Students are employed in the field of Accounting where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. An accounting faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

#### ***ACCTNG 3495 Special Administration Problems - Accounting (VITA) Program: 1-3 semester hours***

Prerequisites: ACCTNG 2400, ACCTNG 2410 and ACCTNG 3401; minimum campus GPA of 2.0, minimum GPA of 2.2 in all accounting courses at the 2000-level and above taken at UMSL; completion of nine semester hours of accounting. Enrollment in the course is restricted to Volunteer Income Tax Assistance (VITA) program student participants. The class offers practical tax experience, networking opportunities, potential managerial experience, and personal satisfaction derived from community service. It is taken on a satisfactory/unsatisfactory basis. The course offers one to three hours of undergraduate business elective credit and may be repeated for up to 3 hours credit.

#### ***ACCTNG 3498 Seminar in Accounting: 1-3 semester hours***

Prerequisite: To be determined each time the course is offered and to include a minimum campus GPA of 2.0 and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is a selected special topic in the field of accounting. May be repeated for credit with different topics.

#### ***ACCTNG 3499 Independent Study In Accounting: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0, a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and approval by the supervising professor and the department chair. Special individual study in accounting under the supervision of a full-time accounting faculty member.

**ACCTNG 4401 Financial Accounting And Reporting III: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as income taxes, pensions, owners' equity, earnings per share, and the statement of cash flows. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4402 Financial Accounting And Reporting IV: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as business combinations, consolidated financial statements, multinational operations, foreign exchange transactions, and governmental and nonprofit organizations. The course includes an emphasis on unstructured problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4405 Professional Accounting Research: 3 semester hours**

Prerequisites: ACCTNG 4401; also a minimum campus GPA of 2.0 and minimum GPA of 2.2 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice is the focal point of the course.

**ACCTNG 4435 Auditing: 3 semester hours**

Prerequisites: MATH 1105; ACCTNG 3402; ACCTNG 3421 or INFSYS 3810; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. An introduction to auditing practice. Includes the social role of auditing and the services offered by auditors in internal, governmental, and public accounting practice. Emphasis is on the financial auditing process, including professional ethics, audit risk assessment, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting decisions.

**ACCTNG 4441 Advanced Federal Income Tax: Business Taxation: 3 semester hours**

Prerequisites: ACCTNG 3441 with a grade of B- or above; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Focuses on federal income taxation of corporations, S corporations, partnerships, LLCs and their owners.

**ACCTNG 5400 Financial And Managerial Accounting: 3 semester hours**

This course provides an introduction to accounting, with emphasis on preparation of financial statements for external parties (financial accounting) and accumulation of cost information to aid internal planning and control (managerial accounting). Topics covered include measurement of assets and liabilities, revenues and expenses, the accounting cycle, financial statements, cost terminology, cost behavior, product costing, and relevant costs for decision making. This course provides the necessary background for ACCTNG 5401.

**ACCTNG 5401 Financial Reporting And Analysis: 3 semester hours**

Prerequisites: ACCTNG 5400 or the equivalent. This course builds on the foundations covered in ACCTNG 5400, emphasizing in-depth analysis of published financial statements. The course begins with discussion of the role of financial accounting information in capital markets and contracting, and continues with examination of a number of specific accounting issues. Students are encouraged to look behind the numbers to better understand the economics of the underlying transactions, and properly interpret what the reported numbers mean about a firm's future prospects.

**ACCTNG 5402 Professional Accounting Research: 3 semester hours**

Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice.

**ACCTNG 5403 Graduate Topics in Financial Accounting: 3 semester hours**

Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of current financial reporting issues. Analysis of current problems and approaches pertaining to the communication of corporate financial information to the U.S. and international investment communities.

**ACCTNG 5404 Professional Accountancy I: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 2410; a minimum 2.0 campus GPA; graduate standing. This is the first professional-level course in financial reporting. The course includes a study of the conceptual framework underlying Generally Accepted Accounting Principles (GAAP) and issues pertaining to accounting for current assets and liabilities.

**ACCTNG 5405 Professional Accountancy II: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. This is the second professional-level course in financial reporting. The course includes an in-depth study of issues pertaining to accounting for operational assets, liabilities and owners equity.

**ACCTNG 5406 Research and Professional Writing in Accounting: 3 semester hours**

Prerequisites: Completion of ACCTNG 4401 and enrollment in Master of Accounting Program.. This course employs the professional accounting literature and authoritative databases to analyze contemporary issues in accounting. Students will refine their communication skills in preparation for leadership roles in the accounting profession.

**ACCTNG 5408 Fraud Examination: 3 semester hours**

Prerequisites: ACCTNG 3402 or ACCTNG 5405; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is designed for graduate students who are interested in fraud and its effects. Students will be introduced to theoretical concepts of fraud and practical responses to it. Course coverage includes an overview of the fraud problem; prevention and detection of fraud; elements of fraud investigation, interview techniques, fraud types, and laws governing the prosecution of fraud cases.

**ACCTNG 5411 Cost Systems Analysis: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. The development, interpretation, and use of accounting reports and supplementary information for management planning, control and decision making. Emphasizes the application of relevant cost behavior, control and traceability concepts in the preparation of internal accounting reports, with a secondary emphasis upon product costing techniques as appropriate to financial accounting needs. Topics include break-even analysis, operational budgeting, direct costing, absorption costing, standard costs and variance analysis, business segment analysis, responsibility accounting distribution cost accounting, and gross profit analysis.

**ACCTNG 5412 Graduate Topics in Management Accounting: Controllershship: 3 semester hours**

Prerequisite: ACCTNG 3411 or ACCTNG 5411; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced managerial accounting techniques useful in facilitating the planning and control process in the modern organization. Emphasis on the implementation and administration of these techniques, their integration with management information systems, and the organizational role of the corporate accountant.

**ACCTNG 5421 Information Systems in Accounting: 3 semester hours**

Prerequisites: MATH 1030; INFSYS 1800; ACCTNG 2410; ACCTNG 3401; a minimum campus GPA of 2.0; graduate standing. This is a professional-level course in accounting information systems. The course includes examination of transaction cycles, structured analysis and design of accounting information systems, and internal controls.

**ACCTNG 5435 Graduate Topics in Auditing: 3 semester hours**

Prerequisite: ACCTNG 4435; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced auditing and attestation issues, with an emphasis on operational auditing. Topics include professional ethics, risk analysis, internal control, fraud detection, analytical procedures, determining and assessing operational objectives, and reporting and implementing audit findings.

**ACCTNG 5436 Systems Auditing: 3 semester hours**

Prerequisite: ACCTNG 5400, INFSYS 6800 or consent of instructor. Study of techniques involved in the control and audit of computer-based systems. Emphasis on the review of internal controls at operational and administrative levels and on computer-assisted audit techniques.

**ACCTNG 5441 Tax Research: 3 semester hours**

Prerequisite: ACCTNG 3441; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; or consent of instructor. Application of the research tools and methods available to resolve questions pertaining to the tax laws. Addresses techniques for locating and evaluating relevant authority. Students will be expected to complete written tax research memos. A basic understanding of federal income tax law is presumed.

**ACCTNG 5446 Advanced Topics in Taxation: 3 semester hours**

Prerequisites: ACCTNG 3441. Address advanced topics in taxation selected by the instructor.

**ACCTNG 5447 Taxation of Individuals and Businesses: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401 or both ACCTNG 5400 and FINANCE 6590 with the topic "Practice of Personal Financial Planning" with grades of B or better in both; graduate standing. This is the first professional-level course in taxation. The course includes a general introduction to the concepts of taxation. It will enable students to understand the role of taxes in evaluating decisions typically confronted by individual taxpayers and businesses.

**ACCTNG 5451 Accounting and Auditing in Governmental and Not-for-Profit Entities: 3 semester hours**

Prerequisite: ACCTNG 3402 and graduate standing; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of accounting for use in the public sector and in not-for-profit organizations. Principles of fund accounting and financial reporting for governmental and not-for-profit entities, as well as auditing in the public sector.

**ACCTNG 5490 Graduate Internship in Accounting: 1-3 semester hours**

Prerequisites: ACCTNG 3401 or ACCTNG 5404; a minimum graduate GPA of 3.0; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL; consent of supervising instructor and accounting internship coordinator. The student works in an accounting internship that contains sufficient content and rigor to merit graduate credit. The student's program will be monitored by a member of the Graduate Faculty in Accounting. The course requires several meetings with the faculty advisor and a graduate-level written assignment. The course will be graded on a Satisfactory/Unsatisfactory basis. A student who has previously taken ACCTNG 3490 may not take ACCTNG 5490.

**ACCTNG 5491 Contemporary Issues In Accountancy: 3 semester hours**

Prerequisites: ACCTNG 5405 or ACCTNG 3402. This course includes an analysis of contemporary developments in the practice of accountancy or theories underlying it. This course may address topics in accountancy in any area of specialization (financial, cost/managerial, tax, auditing, governmental/NFP) or may examine topics that affect the profession as a whole. Topics will vary. May be repeated for credit when topics are different.

**ACCTNG 5498 Graduate Seminar in Accounting: 3 semester hours**

Prerequisites: To be determined each time the course is offered and to include a minimum 2.0 overall GPA and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Study of selected special problems in accounting. May be repeated for credit with different topics.

**ACCTNG 5499 Individual Research in Accounting: 1-3 semester hours**

Prerequisites: Consent of instructor, department chair and graduate director; a minimum 3.0 graduate GPA; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL. Special individual research topics in Accounting under the guidance of a specific professor.

**ACCTNG 6441 Graduate Topics in Taxation: 3 semester hours**

Prerequisite: At least a B in ACCTNG 3441 or ACCTNG 5447; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Addresses tax policy topics drawing on literature from accounting, economics, and public finance. Other topics of current interest will be selected by the instructor.

## Courses

### ***ACCTNG 2400 Fundamentals Of Financial Accounting: 3 semester hours***

Prerequisites: MATH 1030 and completion of 27 credit hours. MATH 1030 may be taken concurrently. This is a one semester course in financial accounting theory and practice. The primary emphasis is on the corporate financial statements of income, financial position and cash flow-their content and interpretation; and the impact of financial transactions upon them.

Prerequisites: MATH 1030 and ACCTNG 2400. This is an advanced course that goes beyond the scope of a second-semester course in fundamentals of accounting. The development, interpretation, and use of relevant cost behavior, control, and traceability concepts for management planning, controlling and decision making are emphasized. Topics include: an introduction to product costing, the contribution concept, direct costing, performance standards and variance analysis, responsibility accounting, segment profitability, alternative choice decisions, and capital budgeting.

### ***ACCTNG 3401 Financial Accounting And Reporting I: 3 semester hours***

Prerequisites: A minimum 2.0 campus GPA, MATH 1030, ACCTNG 2410, and 57 credit hours Review of the foundations of financial accounting theory and of the financial statement preparation process. Accounting theory and practice related to current assets (except for investments in securities). The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

### ***ACCTNG 3402 Financial Accounting And Reporting II: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as investments in securities, operational assets, current and long-term liabilities, and leases. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

### ***ACCTNG 3411 Cost Accounting: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. The study of the basic principles of cost determination for, and control of, manufacturing and distribution activities. Topics include job-order costing, process costing, cost allocations, and the development and use of standard costs within a system of absorption costing.

### ***ACCTNG 3421 Accounting Information Systems: 3 semester hours***

Prerequisites: Minimum campus GPA of 2.0. In addition, MATH 1030, INFSYS 1800, ACCTNG 2410, and ACCTNG 3401. Examines the fundamentals of accounting information systems, including hardware and software considerations, internal controls, and transaction processing cycles. Also focuses upon the development of efficient spreadsheets as applied to financial and managerial accounting concepts.

### ***ACCTNG 3441 Income Taxes: 3 semester hours***

Prerequisites: MATH 1030 and ACCTNG 3401; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Fundamentals of Federal income taxation. Topics include taxable entities, income, deductions, tax accounting methods, tax basis, and property transactions at both the conceptual and operational levels.

### ***ACCTNG 3451 Accounting For Governmental And Not-For-Profit Entities: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; also MATH 1030 and ACCTNG 3402. Principles of fund accounting and financial reporting for governmental and nonprofit entities. This course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

### ***ACCTNG 3460 Accounting Career Strategies: 3 semester hours***

Prerequisites: ACCTNG 3401; minimum campus GPA of 2.0 and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This is a course in career and professional development. The primary emphasis is developing and executing a career strategy, enhancing business and client communication skills, and preparing for the transition to the accounting profession.

### ***ACCTNG 3490 Internship In Accounting: 1-3 semester hours***

Prerequisites: ACCTNG 3401, a minimum campus GPA of 2.0, a minimum GPA of 2.7 in all accounting courses at the 3000-level and above taken at UM-St. Louis, consent of supervising instructor and accounting internship coordinator. Students are employed in the field of Accounting where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. An accounting faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

### ***ACCTNG 3495 Special Administration Problems - Accounting (VITA) Program: 1-3 semester hours***

Prerequisites: ACCTNG 2400, ACCTNG 2410 and ACCTNG 3401; minimum campus GPA of 2.0, minimum GPA of 2.2 in all accounting courses at the 2000-level and above taken at UMSL; completion of nine semester hours of accounting. Enrollment in the course is restricted to Volunteer Income Tax Assistance (VITA) program student participants. The class offers practical tax experience, networking opportunities, potential managerial experience, and personal satisfaction derived from community service. It is taken on a satisfactory/unsatisfactory basis. The course offers one to three hours of undergraduate business elective credit and may be repeated for up to 3 hours credit.

### ***ACCTNG 3498 Seminar in Accounting: 1-3 semester hours***

Prerequisite: To be determined each time the course is offered and to include a minimum campus GPA of 2.0 and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is a selected special topic in the field of accounting. May be repeated for credit with different topics.

### ***ACCTNG 3499 Independent Study In Accounting: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0, a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and approval by the supervising professor and the department chair. Special individual study in accounting under the supervision of a full-time accounting faculty member.

### ***ACCTNG 4401 Financial Accounting And Reporting III: 3 semester hours***

Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as income taxes, pensions, owners' equity, earnings per share, and the statement of cash flows. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4402 Financial Accounting And Reporting IV: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as business combinations, consolidated financial statements, multinational operations, foreign exchange transactions, and governmental and nonprofit organizations. The course includes an emphasis on unstructured problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4405 Professional Accounting Research: 3 semester hours**

Prerequisites: ACCTNG 4401; also a minimum campus GPA of 2.0 and minimum GPA of 2.2 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice is the focal point of the course.

**ACCTNG 4435 Auditing: 3 semester hours**

Prerequisites: MATH 1105; ACCTNG 3402; ACCTNG 3421 or INFSYS 3810; also a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. An introduction to auditing practice. Includes the social role of auditing and the services offered by auditors in internal, governmental, and public accounting practice. Emphasis is on the financial auditing process, including professional ethics, audit risk assessment, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting decisions.

**ACCTNG 4441 Advanced Federal Income Tax: Business Taxation: 3 semester hours**

Prerequisites: ACCTNG 3441 with a grade of B- or above; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Focuses on federal income taxation of corporations, S corporations, partnerships, LLCs and their owners.

**ACCTNG 5400 Financial And Managerial Accounting: 3 semester hours**

This course provides an introduction to accounting, with emphasis on preparation of financial statements for external parties (financial accounting) and accumulation of cost information to aid internal planning and control (managerial accounting). Topics covered include measurement of assets and liabilities, revenues and expenses, the accounting cycle, financial statements, cost terminology, cost behavior, product costing, and relevant costs for decision making. This course provides the necessary background for ACCTNG 5401.

**ACCTNG 5401 Financial Reporting And Analysis: 3 semester hours**

Prerequisites: ACCTNG 5400 or the equivalent. This course builds on the foundations covered in ACCTNG 5400, emphasizing in-depth analysis of published financial statements. The course begins with discussion of the role of financial accounting information in capital markets and contracting, and continues with examination of a number of specific accounting issues. Students are encouraged to look behind the numbers to better understand the economics of the underlying transactions, and properly interpret what the reported numbers mean about a firm's future prospects.

**ACCTNG 5402 Professional Accounting Research: 3 semester hours**

Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice.

**ACCTNG 5403 Graduate Topics in Financial Accounting: 3 semester hours**

Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of current financial reporting issues. Analysis of current problems and approaches pertaining to the communication of corporate financial information to the U.S. and international investment communities.

**ACCTNG 5404 Professional Accountancy I: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 2410; a minimum 2.0 campus GPA; graduate standing. This is the first professional-level course in financial reporting. The course includes a study of the conceptual framework underlying Generally Accepted Accounting Principles (GAAP) and issues pertaining to accounting for current assets and liabilities.

**ACCTNG 5405 Professional Accountancy II: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. This is the second professional-level course in financial reporting. The course includes an in-depth study of issues pertaining to accounting for operational assets, liabilities and owners equity.

**ACCTNG 5406 Research and Professional Writing in Accounting: 3 semester hours**

Prerequisites: Completion of ACCTNG 4401 and enrollment in Master of Accounting Program.. This course employs the professional accounting literature and authoritative databases to analyze contemporary issues in accounting. Students will refine their communication skills in preparation for leadership roles in the accounting profession.

**ACCTNG 5408 Fraud Examination: 3 semester hours**

Prerequisites: ACCTNG 3402 or ACCTNG 5405; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is designed for graduate students who are interested in fraud and its effects. Students will be introduced to theoretical concepts of fraud and practical responses to it. Course coverage includes an overview of the fraud problem; prevention and detection of fraud; elements of fraud investigation, interview techniques, fraud types, and laws governing the prosecution of fraud cases.

**ACCTNG 5411 Cost Systems Analysis: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. The development, interpretation, and use of accounting reports and supplementary information for management planning, control and decision making. Emphasizes the application of relevant cost behavior, control and traceability concepts in the preparation of internal accounting reports, with a secondary emphasis upon product costing techniques as appropriate to financial accounting needs. Topics include break-even analysis, operational budgeting, direct costing, absorption costing, standard costs and variance analysis, business segment analysis, responsibility accounting distribution cost accounting, and gross profit analysis.

**ACCTNG 5412 Graduate Topics in Management Accounting: Controllorship: 3 semester hours**

Prerequisite: ACCTNG 3411 or ACCTNG 5411; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced managerial accounting techniques useful in facilitating the planning and control process in the modern organization. Emphasis on the implementation and administration of these techniques, their integration with management information systems, and the organizational role of the corporate accountant.

**ACCTNG 5421 Information Systems in Accounting: 3 semester hours**

Prerequisites: MATH 1030; INFSYS 1800; ACCTNG 2410; ACCTNG 3401; a minimum campus GPA of 2.0; graduate standing. This is a professional-level course in accounting information systems. The course includes examination of transaction cycles, structured analysis and design of accounting information systems, and internal controls.

**ACCTNG 5435 Graduate Topics in Auditing: 3 semester hours**

Prerequisite: ACCTNG 4435; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced auditing and attestation issues, with an emphasis on operational auditing. Topics include professional ethics, risk analysis, internal control, fraud detection, analytical procedures, determining and assessing operational objectives, and reporting and implementing audit findings.

**ACCTNG 5436 Systems Auditing: 3 semester hours**

Prerequisite: ACCTNG 5400, INFSYS 6800 or consent of instructor. Study of techniques involved in the control and audit of computer-based systems. Emphasis on the review of internal controls at operational and administrative levels and on computer-assisted audit techniques.

**ACCTNG 5441 Tax Research: 3 semester hours**

Prerequisite: ACCTNG 3441; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; or consent of instructor. Application of the research tools and methods available to resolve questions pertaining to the tax laws. Addresses techniques for locating and evaluating relevant authority. Students will be expected to complete written tax research memos. A basic understanding of federal income tax law is presumed.

**ACCTNG 5446 Advanced Topics in Taxation: 3 semester hours**

Prerequisites: ACCTNG 3441. Address advanced topics in taxation selected by the instructor.

**ACCTNG 5447 Taxation of Individuals and Businesses: 3 semester hours**

Prerequisites: MATH 1030; ACCTNG 3401 or both ACCTNG 5400 and FINANCE 6590 with the topic "Practice of Personal Financial Planning" with grades of B or better in both; graduate standing. This is the first professional-level course in taxation. The course includes a general introduction to the concepts of taxation. It will enable students to understand the role of taxes in evaluating decisions typically confronted by individual taxpayers and businesses.

**ACCTNG 5451 Accounting and Auditing in Governmental and Not-for-Profit Entities: 3 semester hours**

Prerequisite: ACCTNG 3402 and graduate standing; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of accounting for use in the public sector and in not-for-profit organizations. Principles of fund accounting and financial reporting for governmental and not-for-profit entities, as well as auditing in the public sector.

**ACCTNG 5490 Graduate Internship in Accounting: 1-3 semester hours**

Prerequisites: ACCTNG 3401 or ACCTNG 5404; a minimum graduate GPA of 3.0; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL; consent of supervising instructor and accounting internship coordinator. The student works in an accounting internship that contains sufficient content and rigor to merit graduate credit. The student's program will be monitored by a member of the Graduate Faculty in Accounting. The course requires several meetings with the faculty advisor and a graduate-level written assignment. The course will be graded on a Satisfactory/Unsatisfactory basis. A student who has previously taken ACCTNG 3490 may not take ACCTNG 5490.

**ACCTNG 5491 Contemporary Issues In Accountancy: 3 semester hours**

Prerequisites: ACCTNG 5405 or ACCTNG 3402. This course includes an analysis of contemporary developments in the practice of accountancy or theories underlying it. This course may address topics in accountancy in any area of specialization (financial, cost/managerial, tax, auditing, governmental/NFP) or may examine topics that affect the profession as a whole. Topics will vary. May be repeated for credit when topics are different.

**ACCTNG 5498 Graduate Seminar in Accounting: 3 semester hours**

Prerequisites: To be determined each time the course is offered and to include a minimum 2.0 overall GPA and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Study of selected special problems in accounting. May be repeated for credit with different topics.

**ACCTNG 5499 Individual Research in Accounting: 1-3 semester hours**

Prerequisites: Consent of instructor, department chair and graduate director; a minimum 3.0 graduate GPA; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL. Special individual research topics in Accounting under the guidance of a specific professor.

**ACCTNG 6441 Graduate Topics in Taxation: 3 semester hours**

Prerequisite: At least a B in ACCTNG 3441 or ACCTNG 5447; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Addresses tax policy topics drawing on literature from accounting, economics, and public finance. Other topics of current interest will be selected by the instructor.

## Adult Education

### Courses

**ADULT ED 4311 Teaching Basic Reading Skills To Adults: 3 semester hours**

A study of the reading process and of the characteristics of adult learners with a focus on instructional techniques and materials useful in upgrading the performance of adults with deficient reading skills.

**ADULT ED 6230 Adult Learning And Development: 3 semester hours**

Prerequisites: ED PSY 6210 or ED PSY 6111, or ADULT ED 6410. A study of how life stage theories and theories of learning pertain to the adult learner. The research bases of these theories will be explored in relationship to instructional practice with adult learners.

**ADULT ED 6404 Seminar In Adult Education Research: 1-10 semester hours**

Prerequisites: ADULT ED 6410 or consent of instructor. A review of current research on various topics in the field of adult education. An in-depth study of these research topics will be conducted. Application to the field of adult education will be considered. Special focus will be placed on assessing and improving competency in educational, corporate and community settings.

**ADULT ED 6410 The Adult Learner: 3 semester hours**

This course is designed for those who help adults learn in a variety of settings. A study will be made of the characteristics of Adult Learners and various theories of how they learn, as well as the implications of these characteristics and theories for Adult Education Research, Programming, Curriculum, Planning, and Instructional Practice.

**ADULT ED 6411 History Of Adult Education: 3 semester hours**

Prerequisites: ADULT ED 6410. In this course the historical foundation of the field of Adult Education in America will be studied. This will include the major theorists and their contributions; together with the continuing education of the adult in a progressive social context.

**ADULT ED 6412 Philosophical Foundations Of Adult Education: 3 semester hours**

Prerequisites: ADULT ED 6410 or consent of instructor. A comprehensive, systematic philosophical foundation for adult education. In this course the philosophical underpinnings of the various approaches to the education of adults will be explored. These include the role of the learner, the teacher, and overall objectives within each philosophy.

**ADULT ED 6413 Improvement Of Instruction In Adult Education: 3 semester hours**

Prerequisite: ADULT ED 6410 or consent of instructor. A study of selected methods and instructional techniques appropriate for the teaching of adults. An examination of current research will be made as it relates to the problems of instructing adults.

**ADULT ED 6414 Curriculum Theory And Development In Adult Education: 3 semester hours**

Prerequisite: ADULT ED 6410 or consent of instructor. A study of curriculum theory and its application to adult education. Particular emphasis will be placed on the development of model curricula for various programs in adult education.

**ADULT ED 6415 Adult Literacy Perspectives: 3 semester hours**

Prerequisites: ADULT ED 6410. Students will draw upon a variety of disciplines in considering the ideological, political, economic, moral, and pedagogical dimensions of literacy education. This is significant since popular, as well as scholarly, views of literacy assert its importance to a variety of personal and societal goals. In addition to a theoretical perspective, students will explore practical applications of literacy.

**ADULT ED 6416 Survey Of Adult Distance Education: 3 semester hours**

Prerequisites: ADULT ED 6410. This course is designed as a survey of distance education covering the concept, theories, history, present practice, delivery systems, major issues and future directions of the field of distance learning. Emphasis is on research and practice in the U.S.; however, since much of the literature in the field has been written by educators in other countries, the course will explore topics and issues in distance education from an international perspective, identifying similarities and differences among countries as they relate to adult learning.

**ADULT ED 6417 Multicultural Issues In Adult Education: 3 semester hours**

Prerequisites: ADULT ED 6410. In this course the learners will discuss cultural diversity from an adult education perspective. Topics include cultural self-awareness, challenges/issues in intercultural educational settings, theoretical perspectives of multicultural education, and practitioner concerns and strategies for implementing multiculturalism in adult education settings.

**ADULT ED 6418 Assessment In The Adult Classroom: 3 semester hours**

Prerequisites: ADULT ED 6410 and ED REM 6707 or consent of instructor. This course addresses assessing how effectively adult educators are facilitating adult learning. Emphasis will be on knowledge and skills, learner characteristics, and learner reactions to instruction through the use of formative assessment of both student learning and instructional effectiveness in the adult classroom. Special attention will focus this assessment in the adult classroom within educational, corporate, community, and non-formal settings.

**ADULT ED 6419 Developing Intercultural Competence: 3 semester hours**

Prerequisites: ADULT ED 6410. The focus of this course is on intercultural competence theories and concepts designed to build personal, academic, and professional skills. It is intended to enable the individual to function more successfully in a global environment.

**ADULT ED 6420 Survey Of Human Resource Development And Adult Education: 3 semester hours**

Prerequisites: Graduate standing and permission of instructor. This course provides an overview of the fields of human resource development and adult education. The many societal contexts within which the training of adults and organization development occur will be examined. The systems theory that frames a discussion of adult education, training, and organization development is also explored. The unique characteristics of each field will be represented as well as the ways in which the two fields come together along some general concepts: Definitions, philosophies, goals, sponsoring agencies, professional roles, processes, participants, and resources.

**ADULT ED 6424 Intervention Determination In Adult Learning & Human Resource Dev: 3 semester hours**

Prerequisite: ADULT ED 6410. A variety of strategies will be studied with a view to examining systemic problems in workforce and adult learning situations. The determination of interventions for program planning and development is the major focus. As key outcomes for this course, learners will be able to design and develop plans, and distinguish among workplace, community and educational needs that can be met with educational interventions and those that require other, and more appropriate, nontraining solutions. While specifically focused on HRD applications, the content of this course will apply to any educational setting for adults.

**ADULT ED 6440 Developing Critical Thinking Through Reading and Writing: 3 semester hours**

Prerequisites: Graduate standing. A study of developing critical thinking through focusing upon reading and writing instructional techniques and materials useful in upgrading the performance of secondary, higher education, and adult learners.

**ADULT ED 6494 Directed Readings In Adult Learning: 1-6 semester hours**

Prerequisites: Graduate Standing, ADULT ED 6410 and consent of instructor. Self-directed learning, as a key concept in Adult Education, is encouraged as a means of understanding the adult experience, both personally and professionally, and is a recognized core competency in the field of Adult Education. This course consists of supervised, independent study into the current research, literature, and issues in the area of Adult Learning. Learners are given the opportunity to meet with other learners and the instructor on a regular basis to share resources, ideas, and to gain feedback.

**ADULT ED 6497 Problems In Adult Education: 1-10 semester hours**

Prerequisite: ADULT ED 6410 or consent of instructor. Independent study on topics in adult education.

**ADULT ED 6540 Comparative International Adult and Higher Education: 3 semester hours**

Prerequisites: ADULT ED 6410 or HIGHERED 6476. A study of lifelong learning as well as adult and higher education with a view to a more global understanding of educational systems. Selected western and non-western educational themes and issues will be viewed from the context of their respective cultures.

**ADULT ED 6990 Internship: 1-10 semester hours**

Prerequisite: ADULT ED 6410 or consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ADULT ED 7820 Policy Issues in Adult Education: 3 semester hours**

This course should be taken immediately after admittance into the doctoral program. In this course, students will engage in a systematic examination of issues related to adult education. This will include, but not be limited to, legislative policies, delivery systems, and occupational issues. Students will be expected to examine trends in adult education practice and/or related fields.

**ADULT ED 7822 Advance Research in Adult Education: 3 semester hours**

Prerequisites: ADULT ED 7820. This course will build on ADULT ED 7820 in which students will engage in a systematic and critical examination and discussion of research related to adult education and related area topics.

**ADULT ED 7824 Communicating Theory and Practice in Adult Education: 3 semester hours**

Prerequisites: ADULT ED 7822. Students will learn the processes involved in writing for publication. In conjunction with instructor, students will engage in a project that merges theory and practice. Course should be taken the semester before a student enrolls in EDUC 7950.

## Courses

**ADULT ED 4311 Teaching Basic Reading Skills To Adults: 3 semester hours**

A study of the reading process and of the characteristics of adult learners with a focus on instructional techniques and materials useful in upgrading the performance of adults with deficient reading skills.

**ADULT ED 6230 Adult Learning And Development: 3 semester hours**

Prerequisites: ED PSY 6210 or ED PSY 6111, or ADULT ED 6410. A study of how life stage theories and theories of learning pertain to the adult learner. The research bases of these theories will be explored in relationship to instructional practice with adult learners.

**ADULT ED 6404 Seminar In Adult Education Research: 1-10 semester hours**

**ADULT ED 7824 Communicating Theory and Practice in Adult Education: 3 semester hours**

Prerequisites: ADULT ED 7822. Students will learn the processes involved in writing for publication. In conjunction with instructor, students will engage in a project that merges theory and practice. Course should be taken the semester before a student enrolls in EDUC 7950.

## Air Science

### Courses

**AERO 1001 The Air Force Today: 2 semester hours**

Introduction to contemporary military issues and overall Air Force structure. Professionalism, human rights, and civilian-military relationships are stressed. Leadership laboratory activities designed to develop leadership potential, and includes military customs and courtesies, drill and ceremonies and base visitations.

**AERO 1002 The Air Force Today: 2 semester hours**

Continuation of AERO 1001. Includes strategic offensive and defense forces, general purpose forces, aerospace support forces, and relationships with U.S. Army forces. Individual communicative skills emphasized.

**AERO 1500 Leadership Laboratory: 0 semester hours**

Prerequisites: Students must be enrolled in an AERO course. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential. Course work includes a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes field trips to Air Force installations throughout the United States. This course is generally taught at St. Louis University. It is required for all AF ROTC students.

**AERO 2001 The Air Force Way: 2 semester hours****AERO 2002 The Air Force Way: 2 semester hours****AERO 3001 Air Force Management And Leadership: 3 semester hours**

Integrated management course emphasizing the individual as a manager in air force milieu. Motivational and behavioral processes, leadership, communication, and group dynamics covered for development of the junior officer's professional skills as an Air Force officer. Basic managerial processes involving decision-making, utilization of analytic aids in planning, organizing and controlling in a changing environment are emphasized as professional concepts. Classroom activity, three hours per week; leadership laboratory, one hour per week.

**AERO 3002 Air Force Management And Leadership: 3 semester hours**

Continuation of AERO 3001; includes organizational and personal values, management of forces in change, organizational power, politics, and managerial strategy and tactics within context of the military organization. actual Air Force cases used to enhance learning and communication processes. Classroom activity, three hours per week; leadership laboratory, one hour per week.

**AERO 4001 National Security Forces In Contemporary American Society: 3 semester hours**

The armed forces as an integral element of society; American civil-military relations; environmental context in which U.S. defense policy is formulated and implemented; societal attitudes toward the military leader-manager in a democratic society; fundamental values and socialization processes associated with the armed services. Individual and group oral and written reports. Classroom activity, three hours per week; leadership laboratory, one hour per week.

**AERO 4002 National Security Forces In Contemporary American Society: 3 semester hours**

Continuation of AERO 4001. Requisites for maintaining adequate national security forces; political, economic and social constraints on the national defense structure; impact of technological and international developments on strategic preparedness; formulation and implementation of national security policy. Classroom activity, three hours per week; leadership laboratory, one hour per week.

Classroom activity, three hours per week; leadership laboratory, one hour per week.

## Anthropology

## Courses

### ***ANTHRO 1005 Introduction To Biological Anthropology: 4 semester hours***

Topics include evolutionary theory and its development, the evolution/creationist debate, Mendelian & population genetics, the evolutionary place of humans within the animal kingdom, anatomical and behavioral characteristics of primates, fossilization, primate evolution, the human evolutionary fossil record, biological variability in modern humans, race as a biological concept, and applied biological anthropology. In addition to 3 hours of lecture, 1 hour per week is spent in lab classifying ancient human fossils, observing monkeys and apes at the zoo, and doing other projects. Satisfies the Natural Science and Mathematics (SM) breadth of study requirement.

### ***ANTHRO 1011 Introduction To Cultural Anthropology: 3 semester hours***

Cultural anthropology is the study of human beings as creatures and creators of society. This course is an introduction to that study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. We will consider topics such as language, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience, the diversity and flexibility of human cultures, and processes of intercultural communication and conflict. This course satisfies the Cultural Diversity Requirement.

### ***ANTHRO 1019 Introduction To Archaeology: 3 semester hours***

Archaeology is a subfield of anthropology that studies past human societies from their material remains. Explores the development of archaeology as a scientific discipline. Archaeological methods and theories will be explained using case studies from the continents of Africa, Asia, Australia, Europe and the Americas. Satisfies the Cultural Diversity requirement.

### ***ANTHRO 1021 The Body In Culture: 3 semester hours***

This course will compare uses of the body as a social signifier in Western and non-Western cultures. It will explore how culture shapes the images, uses and meanings of the human body. It concentrates on different historical and beliefs in five areas: how the body works; sex and gender; eating manners and food; pain and punishment; beauty and bodily mutilation. This course satisfies the Cultural Diversity requirement.

### ***ANTHRO 1025 World Cultures: 3 semester hours***

An ethnographic survey of the major culture areas of the world (Africa, North and South America, Europe and Oceania). Satisfies the Cultural Diversity requirement.

### ***ANTHRO 1033 World Archaeology: 3 semester hours***

Discusses some of the greatest discoveries in archaeology from prehistoric cultures to ancient civilizations of Africa, Asia, Australia, Europe and the Americas. Archaeological examples may include early human origins at Olduvai Gorge in Tanzania, the pyramids of ancient Egypt, the Maya and Aztec of Mexico, the rise of civilization in Mesopotamia, England's Stonehenge, the Roman city of Pompeii, upper Paleolithic cave paintings in France and Spain, and American Indian pueblos of the Southwest. This introductory course is designed for non-anthropology majors, or for those who are considering the major. Satisfies the Cultural Diversity requirement.

### ***ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours***

Same as HIST 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

### ***ANTHRO 1038 Byzantine History and Culture: 3 semester hours***

Same as HIST 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

### ***ANTHRO 1041 Sex And Gender Across Cultures: 3 semester hours***

This course considers womanhood, manhood, third genders, and sexuality in a broad cross-cultural perspective. The focus of the course is on the diverse cultural logics that separate females, males, and sometimes third genders into different groups in different societies, with the male group usually being the more prestigious one. Focusing on the indigenous nonWestern cultures, this course examines gender roles and sexuality within the broader cultural contexts of ritual and symbolism, family, marriage and kinship, economy, politics, and public life. This course will help students understand what it is like to be male or female in non-Western cultures. This course fulfills the Cultural Diversity Requirement.

### ***ANTHRO 1051 Sport, Culture, and Society: 3 semester hours***

Same as SOC 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

### ***ANTHRO 1052 The Olympic Games: Ideals And Reality: 3 semester hours***

What would the ancient Greeks think of the modern Olympic Games? In this course, we examine whether the Olympic Games are living up to their ancient Greek ideals. We begin studying the history and philosophy of the ancient Olympic festival in an effort to understand the personal, educational, and political nature of the Olympic ideal. Next we examine the historical and contemporary reality of the modern Games from the perspective of athletes, spectators, and society at large. Based on these accounts, we critically evaluate the Games' success and failure with respect to their ideals. Finally, we develop constructive solutions to the problems we identify, suggesting practical ways to revise the Olympic ideals and/or improve Olympic reality.

**ANTHRO 1091 Introductory Topics In Anthropology: 3 semester hours**

This course features special and current topics at the introductory level in the areas of social, cultural and physical anthropology and archaeology. The course examines the basic concepts and provides an understanding of the development of new trends and areas of study in the field of Anthropology. Topics will focus on the comparative study of non-Western cultures such as ecological practices in tribal societies; religious practices in prehistoric cultures; the roles of women across cultures; etc. Topics may vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

**ANTHRO 1095 Brief Overview Of The Four Fields Of Anthropology: 1 semester hour**

Through the use of videos, readings, and the online course management system, this course provides a brief overview of the four traditional fields of anthropology: biological, archaeological, cultural, and linguistic anthropology. This course is designed for video instruction and offers minimal direct interaction with the instructor.

**ANTHRO 1163 Disagreement, Difference, Diversity: 6 semester hours**

Same as PHIL 1163. This interdisciplinary course will combine material from philosophy, anthropology, and sociology to examine the ways we encounter and accommodate disagreement in our daily lives. The unifying thread is our ability to deal with various sorts of opposition: differences of opinion, differences in practice, and differences in how we construct and address both biological and cultural variation. The course will combine units on informal logic and applied ethics from philosophy together with units on the social construction of difference and the understanding of human diversity from anthropology and sociology.

**ANTHRO 1710 Native American Literature: 3 semester hours**

The course surveys the literature of American Indians from its oral tradition of myth, legend, song, and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri State Certification in Secondary Education and the College of Arts and Sciences Cultural Diversity requirement.

**ANTHRO 2035 Ancient Greek Civilization And Culture: 3 semester hours**

A survey of the history, language, literature, art, science, and philosophy of the ancient Greeks from prehistory to the Roman conquest. It covers the glamorous Minoan-Mycenaean civilization, the rise of classical Greek civilization and the golden age, the history of the city states such as Athens and Sparta, and the Hellenistic period under Alexander the Great and his descendants. Examines the nature of the ancient Greek language, surveys literary classics such as the Iliad and the Odyssey, and describes the archaeology of Greek myths based on the ongoing UM-St. Louis archaeological project in Greece. Discusses the rise of humanism, the ancient Olympic Games, and the legacy of ancient Greece in Western civilization.

**ANTHRO 2100 Languages and World View: 3 semester hours**

Same as FGN LANG 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

**ANTHRO 2105 Human Variation: 3 semester hours**

This course will look at the variation that exists within our own species, both between and within populations. It will investigate the evolutionary and genetic basis of human variation, as well as its diversity, adaptive significance, and distribution. Topics covered will include: body shape and physiology, blood groups, susceptibility to disease, and skin color. It will survey historical attempts to classify humans into different "races"; assess definitions of race as a solely cultural construct; and critique attempts to link race, intelligence and performance.

**ANTHRO 2109 Archaeological Field School: 3-6 semester hours**

Prerequisites: Consent of instructor. Introduction to field methods in archaeology and to the techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in a field research project including excavation and survey projects. Emphasis is placed upon research design and implementation and upon the use of archaeological data in describing and explaining human behavior.

**ANTHRO 2111 Cultures Of East Asia: 3 semester hours**

An ethnographic and historical survey of the various people of East Asia including Japan, China, North and South Korea, Hong Kong and Macau. Includes an examination of the varying cultural and social developments within and through the historical, geographical, and cultural environments. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2114 Cultures Of The Near And Middle East: 3 semester hours**

A study of the cultural diversity and unity of the peoples of the Near and Middle East. Emphasis on historical and ethnological relationships, social and political structure, religious beliefs and contemporary problems. This course satisfies the non-Euro-American requirement.

**ANTHRO 2117 Greek History And Culture: 3 semester hours**

Same as HIST 2117. Greek civilization has had a deep impact on contemporary society in art; social; political; and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek history, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

**ANTHRO 2118 Modern Greek History and Culture: 3 semester hours**

Same as HIST 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

**ANTHRO 2120 Native Peoples Of North America: 3 semester hours**

A survey of Native Peoples of North America including the prehistory, ethnographic and linguistic groupings, social organization, and cultural systems of these cultures.

**ANTHRO 2121 Native American Spirituality: 3 semester hours**

This class will look at the important role of spirituality in American Indian ways of life. This course covers indigenous peoples of the United States and Canada, from prehistoric times to the present. It will look at traditional worldviews and their preservation in contemporary times, including the use of symbols to define tribal identities; religious rituals and practices; and the relationship between humans, animals, and nature. Satisfies Cultural Diversity requirement.

**ANTHRO 2123 Cultures Of Oceania: 3 semester hours**

An introduction to the original cultures and peoples of the South and Western Pacific: New Guinea, Australia, New Zealand, Samoa, Hawaii, Easter Island, etc. Focus is on art, religion, language, relationships to the environment, economics, politics, social groupings, and how these intertwine to form distinctly adaptive cultures in one of the least understood regions of the world. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2124 Cultures Of Africa: 3 semester hours**

A basic ethnographic survey of African cultures, with attention to social groupings, tribalism, religion, language, social change, and the ecological relationship between humans and nature. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2126 Archaeology Of Greater St Louis: 3 semester hours**

Discussion of Ice Age hunters and gatherers, moundbuilders, fur traders, farmers and industrial workers from the history of the Greater St. Louis Community. The physical testimony to their lives remains buried beneath city streets and buildings. Archeology is our link to this cultural legacy. Through use of archeological data and historical sources, this class will explore human social and cultural developments in St. Louis.

**ANTHRO 2131 Archaeology Of Missouri: 3 semester hours**

An introduction to the prehistoric American Indian cultures of Missouri and adjacent areas from 20,000 years ago to the coming of the Europeans. Examines the development of prehistoric cultures in Missouri from small bands of hunters and gatherers to moundbuilding, agricultural societies and discusses the decline of indigenous cultures as they came into contact with European civilization. Satisfies the Cultural Diversity requirement.

**ANTHRO 2132 Archaeology Of North America: 3 semester hours**

Examines the archaeological record of human developments throughout prehistoric North America. Topics of discussion include the origins of human culture in America, the processes of prehistoric cultural development in the different regions of the continent, and archaeological approaches to explaining the behavior of North America's prehistoric inhabitants. Satisfies the Cultural Diversity requirement.

**ANTHRO 2134 Archaeology Of The Inca, Aztec, And Maya: 3 semester hours**

Provides an overview of human social and cultural developments in Mesoamerica and Andean South America from the first settlements over 20,000 years ago to the Spanish conquest. Focuses on events leading to and including the establishment of Classic Mayan and Aztec societies, and discusses changes that led to what was perhaps the largest nation on earth for its time, the Inca. Satisfies the Cultural Diversity requirement.

**ANTHRO 2191 Special Topics In Non-Western Culture: 3 semester hours**

This course focuses on a specific non-western culture, or geographically related groups of cultures. Ethnographic and/or archaeological cultures are chosen and their ecological, economic, social, religious, cosmological, political, ethnic, linguistic and other cultural domains are examined. Students are exposed to basic concepts and knowledge for understanding diverse cultures in their historical and/or contemporary contexts of development and relationship. Topics will vary. Satisfies Cultural Diversity Requirement.

**ANTHRO 2192 Anthropological Perspectives on Western Culture: 3 semester hours**

This course focuses on a specific Western culture or geographically-related group of cultures utilizing ethnographic and/or archaeological sources. Ecological, economic, social, political, ethnic, religious, linguistic and cultural domains will be examined. Students are exposed to basic anthropological concepts for understanding diverse cultures in their historical and/or contemporary contexts. Topics will vary.

**ANTHRO 3202 History and Theory of Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1005, ANTHRO 1006, ANTHRO 1011, or ANTHRO 1019. An overview of the history and theory of anthropology from the Victorian era to today with an emphasis on putting theory into practice. The purpose of the course is to help students understand where anthropology has come from and where it may be going, and to teach students how to apply theory to specific questions and problems.

**ANTHRO 3209 Forensic Anthropology: 4 semester hours**

Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

**ANTHRO 3210 Applied Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. A description and analysis of the methods, principles and use of anthropology in solution of practical problems associated with the changing conditions of our times. The course will examine a wide variety of cross-cultural case studies.

**ANTHRO 3211 Linguistic Anthropology: 3 semester hours**

Same as SOC 3211. Prerequisites: Junior Level Standing. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

**ANTHRO 3212 Medical Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science or consent of instructor. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

**ANTHRO 3214 Writing Systems of the World: 3 semester hours**

ANTHRO 1011 or consent of instructor. This course is an introduction to the comparative study of writing systems from around the world. It explores the origin and development of Sumerian cuneiform, Mayan glyphs, Egyptian hieroglyphs, Chinese characters, alphabets and syllabaries. It encompasses time periods from the decipherment of ancient languages to the intersections of writing and culture found in the contemporary world.

**ANTHRO 3215 Aging Across Cultures: 3 semester hours**

Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

**ANTHRO 3216 Cognition Across Cultures: 3 semester hours**

Prerequisites: ANTHRO 1011 or introductory course in another social science, or consent of instructor. This course explores cognition - perception, knowledge and thought - as a set of social and cultural processes. An introduction to methods for understanding the human mind in context. It will cover key debates, including: cross-cultural variation in thought processes (cognitive relativity vs. psychic unity), the relation between physiology and consciousness, ethno-science, the social and cultural construction of reality, the different ways that social contexts affect the way people think, the implications of the way knowledge is distributed across society, the social and cultural basis of logic.

**ANTHRO 3217 Anthropology of Pregnancy and Birth: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Birth and pregnancy play important roles in shaping human anatomy and culture. Human biological anatomy is shaped by the physical requirements of childbirth and pregnancy, and cultural adaptations have developed to address the issues associated with them. This course employs a biocultural approach that explores evolutionary perspectives on anatomy and physiology, biocultural perspectives on modern birth, and cross-cultural analyses of birthing practices worldwide.

**ANTHRO 3220 Social Statistics: 3 semester hours**

Same as SOC 3220. Prerequisites: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analyses relevant to quantitative social science research, e.g. elementary probability, measures of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

**ANTHRO 3225 Ritual, Death And Sports: Archaeology Of Greek Mythology: 3 semester hours**

Prerequisites: ANTHRO 1019 or ANTHRO 1011 or consent of instructor. Since the beginning of our existence, humans have pondered the mysteries of life and death and have strived to find meaning in a constantly changing world. In Western civilization, Greek mythology and religion represent humanity's earliest attempts to deal with the greater forces that affect our lives, which found expression in the great religious and athletic festivals, such as the Olympic Games. We will study the myths, rituals, religious beliefs of the ancient Greeks and how these were expressed in sports and art, in order to get a glimpse of the supernatural. The sources of our exploration are two: the fascinating archaeological discoveries of ancient Greek sites and relevant readings from the ancient Greek literature.

**ANTHRO 3227 Monsters & Victims: Women Dramatis Personae in Greek Tragedy & Contemporary Drama: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. This course explores female dramatic figures in ancient Greek tragedies that represent women either as victims and/or monsters. From Iphigenia, Alcestis, and Hecuba to Clytemnestra, Phaedra and Medea, it analyzes issues such as the role of sex, gender, female sexuality, ritual and domestic violence in the image-making of women as either scapegoats or monsters by the major Greek tragedians, particularly Euripides. It explores contemporary adaptations by several women playwrights in light of theoretical readings by feminist critics.

**ANTHRO 3228 People and Plants: 3 semester hours**

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. This course is designed to introduce students to complex relationships between people and plants. We will focus on how plants are perceived, managed, and used across human societies. Topics span the ages and include collection of wild plants and "Stone Age" diets; the origins of agriculture in Ancient Egypt, Mesopotamia, China, and the Americas; the development of crops and GMOs; industrial agriculture; organic gardening; and the wilderness-to-table movement. While emphasis will be on food plants, we will also discuss the use of plants as medicines, cosmetics, dyes, and construction materials.

**ANTHRO 3229 Economic Archaeology And Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Course examines economic organization and behavior in a crosscultural context. It looks at the various ways anthropologists have approached the study of economy, and explores how cultural factors such as relations of power, gender, kinship, and ideology affect economic organization in ancient and modern societies. Most of the course will focus on pre-industrial societies (including hunter-gather, tribal, and complex societies), and will address issues of subsistence strategies, craft production and specialization, trade and exchange, money, and markets. It will also briefly explore how modern communities around the globe are responding to contemporary processes like capitalism and globalization.

**ANTHRO 3232 Environmental Archaeology: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Environmental archeology is the science of reconstructing the relationships between past peoples and the natural environment in which they lived. This course will explore theory, methods, data, and advances for this area of study within archaeology. Case studies will be drawn from cultures throughout the world. Students will learn how to design an environmental archaeology project, be familiar with the literature and research conducted to date, and master knowledge about past cultures.

**ANTHRO 3235 Women In Subsaharan Africa: A Contemporary Perspective: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is "socially and culturally acceptable." The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course fulfills the Cultural Diversity requirement.

**ANTHRO 3236 Sex Trafficking in Cross-Cultural Perspective: 3 semester hours**

Prerequisites: ANTHRO 1041, GS 2150 or GS 2102 or consent of instructor. This course introduces the history of and current issues in the international sex industry, including human trafficking, slavery, and prostitution in Europe, Asia, Africa, South America, and North America. It will evaluate the power structures (political, economic, and military institutions) and the process, organization and structure of the industry within the context of nationality, ethnicity, and class, with particular emphasis on voluntary (immigration) and forced (displacement) population migration. Finally, it will look at current legislation and methods to control this growing problem, especially in the United States.

**ANTHRO 3237 Contemporary Japanese Culture: 3 semester hours**

Same as SOC 3237. Prerequisites: Junior Level Standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

**ANTHRO 3270 Human Ecology, Cultural Collapse, and Sustainable Developments: 3 semester hours**

Prerequisites: ANTHRO 1019 or consent of the instructor. Human interactions with the natural environment will be explored by reviewing approaches, concepts, and tools from ecological anthropology and archaeology. Case studies based on archaeological, ethnographic, and ethnological data will be analyzed and discussions expanded to include information about past and present, sustainable human-environmental interactions, policies, and contributing institutions.

**ANTHRO 3290 Advanced Topics In Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019, or consent of instructor. Selected topics in archeology with a strong theoretical and methodological approach. Requires substantial reading and writing. May be repeated with consent of department.

**ANTHRO 3291 Current Issues In Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Selected topics in social, cultural and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated provided topic is different.

**ANTHRO 4000 Ethnographic Field Research Methods: 3 semester hours**

Prerequisites: ANTHRO 1011, SOC 1010, or consent of Instructor. Ethnographic field research is the basis of cultural anthropological inquiry. This course emphasizes hands-on training in the collection and analysis of ethnographic data, including participant observation, taking and managing field notes, key informant interviewing, content analysis and the preparation of ethnographic field reports.

**ANTHRO 4005 Special Research Methods in Cultural Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1011 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in cultural anthropology and/or linguistic anthropology. May be repeated provided the topic is different.

**ANTHRO 4100 Field Methods in Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in archaeological field methods including techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in excavations and/or surveys. Emphasis is placed upon research design and implementation and the use of archaeological data in describing and explaining human behavior.

**ANTHRO 4105 Special Research Methods in Archaeology: 1-3 semester hours**

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in archaeology. May be repeated provided the topic is different.

**ANTHRO 4160 Geographical Information Systems in Anthropology and Sociology: 4 semester hours**

Same as SOC 4160. Prerequisites: ANTHRO 1005, or ANTHRO 1011, or ANTHRO 1019, or SOC 1010, or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

**ANTHRO 4200 Field Methods in Biological Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1006, SOC 3220 or equivalent, or consent of instructor. Course material based on primate behavior, demographics, and morphology. Research techniques for ethological and primatological studies, including the design of research protocols, development of data collection methodologies, analysis of morphological and behavioral data, and the scientific description of findings. Students are required to conduct observations of primates at the St. Louis Zoo and participate in the Undergraduate Research Symposium.

**ANTHRO 4205 Special Research Methods in Biological Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1005 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in biological anthropology. May be repeated provided the topic is different.

**ANTHRO 4206 Primate Behavioral Research at the Saint Louis Zoo: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course will provide students with a comprehensive overview of research techniques as they relate to the study of primate behavior. Students will be guided through the process of developing an independent primate behavioral research project. Then they will have the opportunity to collect, analyze, and interpret data as it relates to their research questions. Data collection will occur at the St. Louis Zoo.

**ANTHRO 4305 Special Research Methods in Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in anthropology and may combine skills from cultural anthropology, linguistic anthropology, archaeology, and/or biological anthropology. May be repeated provided the topic is different.

**ANTHRO 4307 Community Based Research in Anthropology: 3 semester hours**

Prerequisites: Junior standing, ANTHRO 1011, ANTHRO 3202, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying anthropological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is repeated.

**ANTHRO 4309 Archaeological Field School: 3-6 semester hours**

Prerequisites: Consent of instructor. Advanced methods in field archaeology and laboratory analysis. Emphasis is placed on sampling, the use of theory in guiding field and laboratory work, advanced field techniques, and speciality analysis. Opportunities are provided for the development of field and laboratory leadership skills. Independent research is encouraged.

**ANTHRO 4310 Laboratory Methods In Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019, SOC 3220 or equivalent, or consent of instructor. An advanced laboratory analysis and curation methods class. The emphases are 1) mastery of general lab methods and procedures, and 2) development of independent analysis skills in one or more specialty areas such as lithics, ceramics, computer graphics, statistical methods, paleoethnobotany, experimental analysis, and soils.

**ANTHRO 4312 Cultural Resource Management And Historic Preservation: 3 semester hours**

Prerequisites: ANTHRO 1019 or Consent of Instructor. This course will introduce proper practices of cultural resource management and historic preservation. It provides a technical and theoretical bridge between anthropological archaeology and its application to the management of resources. Among the issues covered will be relevant legislation, the phased approach to archaeological and historical research, state and federal review procedures, proposal writing, interacting with clients, consulting with native peoples, and public and professional ethics and standards. This course will provide hands-on experience. Because one of the skills most sought by project managers and employers is writing competence, it will be writing intensive.

**ANTHRO 4315 Professionalism and Practice In Anthropology: 3 semester hours**

Prerequisites: Senior standing, Consent of Instructor, ANTHRO 3202 and one of the following: ANTHRO 4000, ANTHRO 4100, ANTHRO 4200 or another 4000-level methods course. The capstone course for anthropology majors, ideally taken in the final semester of the senior year. Students learn to apply knowledge and skills gained in previous courses to their future, professional careers. Objectives include developing a personal statement, a CV, and/or resume; applying to graduate schools and jobs; preparing presentation slides and/or posters; and writing grant proposals, internship/consulting reports, and/or research papers. Final senior exit project are presented orally to Anthropology faculty members.

**ANTHRO 4316 Senior Research Project: 3 semester hours**

Prerequisites: Senior standing and consent of the instructor. For undergraduates who have excelled in their coursework and wish to conduct original research. Students will work with a faculty member with expertise relevant to the research topic. This course offers students the opportunity to build upon strong research, analytic and writing skills. Completion of this course will result in the writing of a thesis, publication of an article, presentation at a professional meeting, or other work that exemplifies high achievement.

**ANTHRO 4325 Internship In Cultural Anthropology: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4326 Internship In Archaeology: 1-6 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Archaeology internships are aimed at providing students with opportunities to work with professional archaeologists in public and private research environments including laboratories and curation centers. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4328 Internship In Museum Studies: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate museum or other exhibition oriented institution. Museum internships are aimed at providing students with opportunities to work with professional museologists to learn skills relating to areas such as exhibition, curation, public programming, research, and publication. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4329 Internship In Physical Anthropology: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate institution, lab, or research setting related to forensics, primate behavior and biology, human genetics, population, environmental policy, and other domains related to physical anthropology.

**ANTHRO 4350 Special Study: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Special Study.

**ANTHRO 4391 Current Issues In Anthropology: 1-4 semester hours**

Prerequisite: ANTHRO 1011 or consent of instructor. Selected topics in social, cultural, and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated. Non-majors may register for ANTHRO 2191.

**ANTHRO 5440 Cultural Aspects Of Aging: 3 semester hours**

Same as GERON 5440. Prerequisites: Graduate status or consent of the instructor. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

**ANTHRO 5592 The History of the Visual Arts in American Museums: 3 semester hours**

Same as HIST 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**ANTHRO 6135 Foundations Of Museology I: 3 semester hours**

Same as ART HS 6035 and HIST 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs. meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**ANTHRO 6136 Foundations Of Museology II: 3 semester hours**

Same as ART HS 6036 and HIST 6136. Prerequisites: Consent of Director of Museum Studies Program. Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**ANTHRO 6137 Museum Organization and Operations: 3 semester hours**

Same as: ART HS 6037 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**ANTHRO 6138 Museum Studies Master's Project: 4 semester hours**

Same as ART HS 6038 and HIST 6138. Prerequisites: Consent of Director of Museum Studies program. Research and writing/exhibit development on a selected topic.

**ANTHRO 6139 Practicum In Exhibit & Program Development: 3 semester hours**

Prerequisites: Consent of Director of Museum Studies Program. Development of exhibits and related education programs. Students work as teams with museum professionals to develop and implement an exhibit concept that integrates design, education, and marketing from the onset. Methods in planning, flow charting, budgeting, team dynamics and related skills.

## Courses

**ANTHRO 1005 Introduction To Biological Anthropology: 4 semester hours**

Topics include evolutionary theory and its development, the evolution/creationist debate, Mendelian & population genetics, the evolutionary place of humans within the animal kingdom, anatomical and behavioral characteristics of primates, fossilization, primate evolution, the human evolutionary fossil record, biological variability in modern humans, race as a biological concept, and applied biological anthropology. In addition to 3 hours of lecture, 1 hour per week is spent in lab classifying ancient human fossils, observing monkeys and apes at the zoo, and doing other projects. Satisfies the Natural Science and Mathematics (SM) breadth of study requirement.

**ANTHRO 1011 Introduction To Cultural Anthropology: 3 semester hours**

Cultural anthropology is the study of human beings as creatures and creators of society. This course is an introduction to that study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. We will consider topics such as language, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience, the diversity and flexibility of human cultures, and processes of intercultural communication and conflict. This course satisfies the Cultural Diversity Requirement.

**ANTHRO 1019 Introduction To Archaeology: 3 semester hours**

Archaeology is a subfield of anthropology that studies past human societies from their material remains. Explores the development of archaeology as a scientific discipline. Archaeological methods and theories will be explained using case studies from the continents of Africa, Asia, Australia, Europe and the Americas. Satisfies the Cultural Diversity requirement.

**ANTHRO 1021 The Body In Culture: 3 semester hours**

This course will compare uses of the body as a social signifier in Western and non-Western cultures. It will explore how culture shapes the images, uses and meanings of the human body. It concentrates on different historical and beliefs in five areas: how the body works; sex and gender; eating manners and food; pain and punishment; beauty and bodily mutilation. This course satisfies the Cultural Diversity requirement.

**ANTHRO 1025 World Cultures: 3 semester hours**

An ethnographic survey of the major culture areas of the world (Africa, North and South America, Europe and Oceania). Satisfies the Cultural Diversity requirement.

**ANTHRO 1033 World Archaeology: 3 semester hours**

Discusses some of the greatest discoveries in archaeology from prehistoric cultures to ancient civilizations of Africa, Asia, Australia, Europe and the Americas. Archaeological examples may include early human origins at Olduvai Gorge in Tanzania, the pyramids of ancient Egypt, the Maya and Aztec of Mexico, the rise of civilization in Mesopotamia, England's Stonehenge, the Roman city of Pompeii, upper Paleolithic cave paintings in France and Spain, and American Indian pueblos of the Southwest. This introductory course is designed for non-anthropology majors, or for those who are considering the major. Satisfies the Cultural Diversity requirement.

**ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours**

Same as HIST 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

**ANTHRO 1038 Byzantine History and Culture: 3 semester hours**

Same as HIST 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

**ANTHRO 1041 Sex And Gender Across Cultures: 3 semester hours**

This course considers womanhood, manhood, third genders, and sexuality in a broad cross-cultural perspective. The focus of the course is on the diverse cultural logics that separate females, males, and sometimes third genders into different groups in different societies, with the male group usually being the more prestigious one. Focusing on the indigenous nonWestern cultures, this course examines gender roles and sexuality within the broader cultural contexts of ritual and symbolism, family, marriage and kinship, economy, politics, and public life. This course will help students understand what it is like to be male or female in non-Western cultures. This course fulfills the Cultural Diversity Requirement.

**ANTHRO 1051 Sport, Culture, and Society: 3 semester hours**

Same as SOC 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

**ANTHRO 1052 The Olympic Games: Ideals And Reality: 3 semester hours**

What would the ancient Greeks think of the modern Olympic Games? In this course, we examine whether the Olympic Games are living up to their ancient Greek ideals. We begin studying the history and philosophy of the ancient Olympic festival in an effort to understand the personal, educational, and political nature of the Olympic ideal. Next we examine the historical and contemporary reality of the modern Games from the perspective of athletes, spectators, and society at large. Based on these accounts, we critically evaluate the Games' success and failure with respect to their ideals. Finally, we develop constructive solutions to the problems we identify, suggesting practical ways to revise the Olympic ideals and/or improve Olympic reality.

**ANTHRO 1091 Introductory Topics In Anthropology: 3 semester hours**

This course features special and current topics at the introductory level in the areas of social, cultural and physical anthropology and archaeology. The course examines the basic concepts and provides an understanding of the development of new trends and areas of study in the field of Anthropology. Topics will focus on the comparative study of non-Western cultures such as ecological practices in tribal societies; religious practices in prehistoric cultures; the roles of women across cultures; etc. Topics may vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

**ANTHRO 1095 Brief Overview Of The Four Fields Of Anthropology: 1 semester hour**

Through the use of videos, readings, and the online course management system, this course provides a brief overview of the four traditional fields of anthropology: biological, archaeological, cultural, and linguistic anthropology. This course is designed for video instruction and offers minimal direct interaction with the instructor.

**ANTHRO 1163 Disagreement, Difference, Diversity: 6 semester hours**

Same as PHIL 1163. This interdisciplinary course will combine material from philosophy, anthropology, and sociology to examine the ways we encounter and accommodate disagreement in our daily lives. The unifying thread is our ability to deal with various sorts of opposition: differences of opinion, differences in practice, and differences in how we construct and address both biological and cultural variation. The course will combine units on informal logic and applied ethics from philosophy together with units on the social construction of difference and the understanding of human diversity from anthropology and sociology.

**ANTHRO 1710 Native American Literature: 3 semester hours**

The course surveys the literature of American Indians from its oral tradition of myth, legend, song, and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri State Certification in Secondary Education and the College of Arts and Sciences Cultural Diversity requirement.

**ANTHRO 2035 Ancient Greek Civilization And Culture: 3 semester hours**

A survey of the history, language, literature, art, science, and philosophy of the ancient Greeks from prehistory to the Roman conquest. It covers the glamorous Minoan-Mycenaean civilization, the rise of classical Greek civilization and the golden age, the history of the city states such as Athens and Sparta, and the Hellenistic period under Alexander the Great and his descendants. Examines the nature of the ancient Greek language, surveys literary classics such as the Iliad and the Odyssey, and describes the archaeology of Greek myths based on the ongoing UM-St. Louis archaeological project in Greece. Discusses the rise of humanism, the ancient Olympic Games, and the legacy of ancient Greece in Western civilization.

**ANTHRO 2100 Languages and World View: 3 semester hours**

Same as FGN LANG 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

**ANTHRO 2105 Human Variation: 3 semester hours**

This course will look at the variation that exists within our own species, both between and within populations. It will investigate the evolutionary and genetic basis of human variation, as well as its diversity, adaptive significance, and distribution. Topics covered will include: body shape and physiology, blood groups, susceptibility to disease, and skin color. It will survey historical attempts to classify humans into different "races"; assess definitions of race as a solely cultural construct; and critique attempts to link race, intelligence and performance.

**ANTHRO 2109 Archaeological Field School: 3-6 semester hours**

Prerequisites: Consent of instructor. Introduction to field methods in archaeology and to the techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in a field research project including excavation and survey projects. Emphasis is placed upon research design and implementation and upon the use of archaeological data in describing and explaining human behavior.

**ANTHRO 2111 Cultures Of East Asia: 3 semester hours**

An ethnographic and historical survey of the various people of East Asia including Japan, China, North and South Korea, Hong Kong and Macau. Includes an examination of the varying cultural and social developments within and through the historical, geographical, and cultural environments. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2114 Cultures Of The Near And Middle East: 3 semester hours**

A study of the cultural diversity and unity of the peoples of the Near and Middle East. Emphasis on historical and ethnological relationships, social and political structure, religious beliefs and contemporary problems. This course satisfies the non-Euro-American requirement.

**ANTHRO 2117 Greek History And Culture: 3 semester hours**

Same as HIST 2117. Greek civilization has had a deep impact on contemporary society in art; social; political; and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek history, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

**ANTHRO 2118 Modern Greek History and Culture: 3 semester hours**

Same as HIST 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

**ANTHRO 2120 Native Peoples Of North America: 3 semester hours**

A survey of Native Peoples of North America including the prehistory, ethnographic and linguistic groupings, social organization, and cultural systems of these cultures.

**ANTHRO 2121 Native American Spirituality: 3 semester hours**

This class will look at the important role of spirituality in American Indian ways of life. This course covers indigenous peoples of the United States and Canada, from prehistoric times to the present. It will look at traditional worldviews and their preservation in contemporary times, including the use of symbols to define tribal identities; religious rituals and practices; and the relationship between humans, animals, and nature. Satisfies Cultural Diversity requirement.

**ANTHRO 2123 Cultures Of Oceania: 3 semester hours**

An introduction to the original cultures and peoples of the South and Western Pacific: New Guinea, Australia, New Zealand, Samoa, Hawaii, Easter Island, etc. Focus is on art, religion, language, relationships to the environment, economics, politics, social groupings, and how these intertwine to form distinctly adaptive cultures in one of the least understood regions of the world. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2124 Cultures Of Africa: 3 semester hours**

A basic ethnographic survey of African cultures, with attention to social groupings, tribalism, religion, language, social change, and the ecological relationship between humans and nature. This course satisfies the Cultural Diversity requirement.

**ANTHRO 2126 Archaeology Of Greater St Louis: 3 semester hours**

Discussion of Ice Age hunters and gatherers, moundbuilders, fur traders, farmers and industrial workers from the history of the Greater St. Louis Community. The physical testimony to their lives remains buried beneath city streets and buildings. Archeology is our link to this cultural legacy. Through use of archeological data and historical sources, this class will explore human social and cultural developments in St. Louis.

**ANTHRO 2131 Archaeology Of Missouri: 3 semester hours**

An introduction to the prehistoric American Indian cultures of Missouri and adjacent areas from 20,000 years ago to the coming of the Europeans. Examines the development of prehistoric cultures in Missouri from small bands of hunters and gatherers to moundbuilding, agricultural societies and discusses the decline of indigenous cultures as they came into contact with European civilization. Satisfies the Cultural Diversity requirement.

**ANTHRO 2132 Archaeology Of North America: 3 semester hours**

Examines the archaeological record of human developments throughout prehistoric North America. Topics of discussion include the origins of human culture in America, the processes of prehistoric cultural development in the different regions of the continent, and archaeological approaches to explaining the behavior of North America's prehistoric inhabitants. Satisfies the Cultural Diversity requirement.

**ANTHRO 2134 Archaeology Of The Inca, Aztec, And Maya: 3 semester hours**

Provides an overview of human social and cultural developments in Mesoamerica and Andean South America from the first settlements over 20,000 years ago to the Spanish conquest. Focuses on events leading to and including the establishment of Classic Mayan and Aztec societies, and discusses changes that led to what was perhaps the largest nation on earth for its time, the Inca. Satisfies the Cultural Diversity requirement.

**ANTHRO 2191 Special Topics In Non-Western Culture: 3 semester hours**

This course focuses on a specific non-western culture, or geographically related groups of cultures. Ethnographic and/or archaeological cultures are chosen and their ecological, economic, social, religious, cosmological, political, ethnic, linguistic and other cultural domains are examined. Students are exposed to basic concepts and knowledge for understanding diverse cultures in their historical and/or contemporary contexts of development and relationship. Topics will vary. Satisfies Cultural Diversity Requirement.

**ANTHRO 2192 Anthropological Perspectives on Western Culture: 3 semester hours**

This course focuses on a specific Western culture or geographically-related group of cultures utilizing ethnographic and/or archaeological sources. Ecological, economic, social, political, ethnic, religious, linguistic and cultural domains will be examined. Students are exposed to basic anthropological concepts for understanding diverse cultures in their historical and/or contemporary contexts. Topics will vary.

**ANTHRO 3202 History and Theory of Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1005, ANTHRO 1006, ANTHRO 1011, or ANTHRO 1019. An overview of the history and theory of anthropology from the Victorian era to today with an emphasis on putting theory into practice. The purpose of the course is to help students understand where anthropology has come from and where it may be going, and to teach students how to apply theory to specific questions and problems.

**ANTHRO 3209 Forensic Anthropology: 4 semester hours**

Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

**ANTHRO 3210 Applied Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. A description and analysis of the methods, principles and use of anthropology in solution of practical problems associated with the changing conditions of our times. The course will examine a wide variety of cross-cultural case studies.

**ANTHRO 3211 Linguistic Anthropology: 3 semester hours**

Same as SOC 3211. Prerequisites: Junior Level Standing. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

**ANTHRO 3212 Medical Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science or consent of instructor. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

**ANTHRO 3214 Writing Systems of the World: 3 semester hours**

ANTHRO 1011 or consent of instructor. This course is an introduction to the comparative study of writing systems from around the world. It explores the origin and development of Sumerian cuneiform, Mayan glyphs, Egyptian hieroglyphs, Chinese characters, alphabets and syllabaries. It encompasses time periods from the decipherment of ancient languages to the intersections of writing and culture found in the contemporary world.

**ANTHRO 3215 Aging Across Cultures: 3 semester hours**

Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

**ANTHRO 3216 Cognition Across Cultures: 3 semester hours**

Prerequisites: ANTHRO 1011 or introductory course in another social science, or consent of instructor. This course explores cognition - perception, knowledge and thought - as a set of social and cultural processes. An introduction to methods for understanding the human mind in context. It will cover key debates, including: cross-cultural variation in thought processes (cognitive relativity vs. psychic unity), the relation between physiology and consciousness, ethnoscience, the social and cultural construction of reality, the different ways that social contexts affect the way people think, the implications of the way knowledge is distributed across society, the social and cultural basis of logic.

**ANTHRO 3217 Anthropology of Pregnancy and Birth: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Birth and pregnancy play important roles in shaping human anatomy and culture. Human biological anatomy is shaped by the physical requirements of childbirth and pregnancy, and cultural adaptations have developed to address the issues associated with them. This course employs a biocultural approach that explores evolutionary perspectives on anatomy and physiology, biocultural perspectives on modern birth, and cross-cultural analyses of birthing practices worldwide.

**ANTHRO 3220 Social Statistics: 3 semester hours**

Same as SOC 3220. Prerequisites: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analyses relevant to quantitative social science research, e.g. elementary probability, measures of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

**ANTHRO 3225 Ritual, Death And Sports: Archaeology Of Greek Mythology: 3 semester hours**

Prerequisites: ANTHRO 1019 or ANTHRO 1011 or consent of instructor. Since the beginning of our existence, humans have pondered the mysteries of life and death and have strived to find meaning in a constantly changing world. In Western civilization, Greek mythology and religion represent humanity's earliest attempts to deal with the greater forces that affect our lives, which found expression in the great religious and athletic festivals, such as the Olympic Games. We will study the myths, rituals, religious beliefs of the ancient Greeks and how these were expressed in sports and art, in order to get a glimpse of the supernatural. The sources of our exploration are two: the fascinating archaeological discoveries of ancient Greek sites and relevant readings from the ancient Greek literature.

**ANTHRO 3227 Monsters & Victims: Women Dramatis Personae in Greek Tragedy & Contemporary Drama: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. This course explores female dramatic figures in ancient Greek tragedies that represent women either as victims and/or monsters. From Iphigenia, Alcestis, and Hecuba to Clytemnestra, Phaedra and Medea, it analyzes issues such as the role of sex, gender, female sexuality, ritual and domestic violence in the image-making of women as either scapegoats or monsters by the major Greek tragedians, particularly Euripides. It explores contemporary adaptations by several women playwrights in light of theoretical readings by feminist critics.

**ANTHRO 3228 People and Plants: 3 semester hours**

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. This course is designed to introduce students to complex relationships between people and plants. We will focus on how plants are perceived, managed, and used across human societies. Topics span the ages and include collection of wild plants and "Stone Age" diets; the origins of agriculture in Ancient Egypt, Mesopotamia, China, and the Americas; the development of crops and GMOs; industrial agriculture; organic gardening; and the wilderness-to-table movement. While emphasis will be on food plants, we will also discuss the use of plants as medicines, cosmetics, dyes, and construction materials.

**ANTHRO 3229 Economic Archaeology And Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Course examines economic organization and behavior in a crosscultural context. It looks at the various ways anthropologists have approached the study of economy, and explores how cultural factors such as relations of power, gender, kinship, and ideology affect economic organization in ancient and modern societies. Most of the course will focus on pre-industrial societies (including hunter-gather, tribal, and complex societies), and will address issues of subsistence strategies, craft production and specialization, trade and exchange, money, and markets. It will also briefly explore how modern communities around the globe are responding to contemporary processes like capitalism and globalization.

**ANTHRO 3232 Environmental Archaeology: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Environmental archeology is the science of reconstructing the relationships between past peoples and the natural environment in which they lived. This course will explore theory, methods, data, and advances for this area of study within archaeology. Case studies will be drawn from cultures throughout the world. Students will learn how to design an environmental archaeology project, be familiar with the literature and research conducted to date, and master knowledge about past cultures.

**ANTHRO 3235 Women In Subsaharan Africa: A Contemporary Perspective: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is "socially and culturally acceptable." The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course fulfills the Cultural Diversity requirement.

**ANTHRO 3236 Sex Trafficking in Cross-Cultural Perspective: 3 semester hours**

Prerequisites: ANTHRO 1041, GS 2150 or GS 2102 or consent of instructor. This course introduces the history of and current issues in the international sex industry, including human trafficking, slavery, and prostitution in Europe, Asia, Africa, South America, and North America. It will evaluate the power structures (political, economic, and military institutions) and the process, organization and structure of the industry within the context of nationality, ethnicity, and class, with particular emphasis on voluntary (immigration) and forced (displacement) population migration. Finally, it will look at current legislation and methods to control this growing problem, especially in the United States.

**ANTHRO 3237 Contemporary Japanese Culture: 3 semester hours**

Same as SOC 3237. Prerequisites: Junior Level Standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

**ANTHRO 3270 Human Ecology, Cultural Collapse, and Sustainable Developments: 3 semester hours**

Prerequisites: ANTHRO 1019 or consent of the instructor. Human interactions with the natural environment will be explored by reviewing approaches, concepts, and tools from ecological anthropology and archaeology. Case studies based on archaeological, ethnographic, and ethnological data will be analyzed and discussions expanded to include information about past and present, sustainable human-environmental interactions, policies, and contributing institutions.

**ANTHRO 3290 Advanced Topics In Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019, or consent of instructor. Selected topics in archeology with a strong theoretical and methodological approach. Requires substantial reading and writing. May be repeated with consent of department.

**ANTHRO 3291 Current Issues In Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Selected topics in social, cultural and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated provided topic is different.

**ANTHRO 4000 Ethnographic Field Research Methods: 3 semester hours**

Prerequisites: ANTHRO 1011, SOC 1010, or consent of Instructor. Ethnographic field research is the basis of cultural anthropological inquiry. This course emphasizes hands-on training in the collection and analysis of ethnographic data, including participant observation, taking and managing field notes, key informant interviewing, content analysis and the preparation of ethnographic field reports.

**ANTHRO 4005 Special Research Methods in Cultural Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1011 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in cultural anthropology and/or linguistic anthropology. May be repeated provided the topic is different.

**ANTHRO 4100 Field Methods in Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in archaeological field methods including techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in excavations and/or surveys. Emphasis is placed upon research design and implementation and the use of archaeological data in describing and explaining human behavior.

**ANTHRO 4105 Special Research Methods in Archaeology: 1-3 semester hours**

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in archaeology. May be repeated provided the topic is different.

**ANTHRO 4160 Geographical Information Systems in Anthropology and Sociology: 4 semester hours**

Same as SOC 4160. Prerequisites: ANTHRO 1005, or ANTHRO 1011, or ANTHRO 1019, or SOC 1010, or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

**ANTHRO 4200 Field Methods in Biological Anthropology: 3 semester hours**

Prerequisites: ANTHRO 1006, SOC 3220 or equivalent, or consent of instructor. Course material based on primate behavior, demographics, and morphology. Research techniques for ethological and primatological studies, including the design of research protocols, development of data collection methodologies, analysis of morphological and behavioral data, and the scientific description of findings. Students are required to conduct observations of primates at the St. Louis Zoo and participate in the Undergraduate Research Symposium.

**ANTHRO 4205 Special Research Methods in Biological Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1005 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in biological anthropology. May be repeated provided the topic is different.

**ANTHRO 4206 Primate Behavioral Research at the Saint Louis Zoo: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course will provide students with a comprehensive overview of research techniques as they relate to the study of primate behavior. Students will be guided through the process of developing an independent primate behavioral research project. Then they will have the opportunity to collect, analyze, and interpret data as it relates to their research questions. Data collection will occur at the St. Louis Zoo.

**ANTHRO 4305 Special Research Methods in Anthropology: 1-3 semester hours**

Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in anthropology and may combine skills from cultural anthropology, linguistic anthropology, archaeology, and/or biological anthropology. May be repeated provided the topic is different.

**ANTHRO 4307 Community Based Research in Anthropology: 3 semester hours**

Prerequisites: Junior standing, ANTHRO 1011, ANTHRO 3202, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying anthropological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is repeated.

**ANTHRO 4309 Archaeological Field School: 3-6 semester hours**

Prerequisites: Consent of instructor. Advanced methods in field archaeology and laboratory analysis. Emphasis is placed on sampling, the use of theory in guiding field and laboratory work, advanced field techniques, and speciality analysis. Opportunities are provided for the development of field and laboratory leadership skills. Independent research is encouraged.

**ANTHRO 4310 Laboratory Methods In Archaeology: 3 semester hours**

Prerequisites: ANTHRO 1019, SOC 3220 or equivalent, or consent of instructor. An advanced laboratory analysis and curation methods class. The emphases are 1) mastery of general lab methods and procedures, and 2) development of independent analysis skills in one or more specialty areas such as lithics, ceramics, computer graphics, statistical methods, paleoethnobotany, experimental analysis, and soils.

**ANTHRO 4312 Cultural Resource Management And Historic Preservation: 3 semester hours**

Prerequisites: ANTHRO 1019 or Consent of Instructor. This course will introduce proper practices of cultural resource management and historic preservation. It provides a technical and theoretical bridge between anthropological archaeology and its application to the management of resources. Among the issues covered will be relevant legislation, the phased approach to archaeological and historical research, state and federal review procedures, proposal writing, interacting with clients, consulting with native peoples, and public and professional ethics and standards. This course will provide hands-on experience. Because one of the skills most sought by project managers and employers is writing competence, it will be writing intensive.

**ANTHRO 4315 Professionalism and Practice In Anthropology: 3 semester hours**

Prerequisites: Senior standing, Consent of Instructor, ANTHRO 3202 and one of the following: ANTHRO 4000, ANTHRO 4100, ANTHRO 4200 or another 4000-level methods course. The capstone course for anthropology majors, ideally taken in the final semester of the senior year. Students learn to apply knowledge and skills gained in previous courses to their future, professional careers. Objectives include developing a personal statement, a CV, and/or resume; applying to graduate schools and jobs; preparing presentation slides and/or posters; and writing grant proposals, internship/consulting reports, and/or research papers. Final senior exit project are presented orally to Anthropology faculty members.

**ANTHRO 4316 Senior Research Project: 3 semester hours**

Prerequisites: Senior standing and consent of the instructor. For undergraduates who have excelled in their coursework and wish to conduct original research. Students will work with a faculty member with expertise relevant to the research topic. This course offers students the opportunity to build upon strong research, analytic and writing skills. Completion of this course will result in the writing of a thesis, publication of an article, presentation at a professional meeting, or other work that exemplifies high achievement.

**ANTHRO 4325 Internship In Cultural Anthropology: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4326 Internship In Archaeology: 1-6 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Archaeology internships are aimed at providing students with opportunities to work with professional archaeologists in public and private research environments including laboratories and curation centers. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4328 Internship In Museum Studies: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate museum or other exhibition oriented institution. Museum internships are aimed at providing students with opportunities to work with professional museologists to learn skills relating to areas such as exhibition, curation, public programming, research, and publication. Specific placements will be selected to match student's interests and career goals.

**ANTHRO 4329 Internship In Physical Anthropology: 1-3 semester hours**

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate institution, lab, or research setting related to forensics, primate behavior and biology, human genetics, population, environmental policy, and other domains related to physical anthropology.

**ANTHRO 4350 Special Study: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Special Study.

**ANTHRO 4391 Current Issues In Anthropology: 1-4 semester hours**

Prerequisite: ANTHRO 1011 or consent of instructor. Selected topics in social, cultural, and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated. Non-majors may register for ANTHRO 2191.

**ANTHRO 5440 Cultural Aspects Of Aging: 3 semester hours**

Same as GERON 5440. Prerequisites: Graduate status or consent of the instructor. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

**ANTHRO 5592 The History of the Visual Arts in American Museums: 3 semester hours**

Same as HIST 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**ANTHRO 6135 Foundations Of Museology I: 3 semester hours**

Same as ART HS 6035 and HIST 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs. meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**ANTHRO 6136 Foundations Of Museology II: 3 semester hours**

Same as ART HS 6036 and HIST 6136. Prerequisites: Consent of Director of Museum Studies Program. Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**ANTHRO 6137 Museum Organization and Operations: 3 semester hours**

Same as: ART HS 6037 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**ANTHRO 6138 Museum Studies Master's Project: 4 semester hours**

Same as ART HS 6038 and HIST 6138. Prerequisites: Consent of Director of Museum Studies program. Research and writing/exhibit development on a selected topic.

**ANTHRO 6139 Practicum In Exhibit & Program Development: 3 semester hours**

Prerequisites: Consent of Director of Museum Studies Program. Development of exhibits and related education programs. Students work as teams with museum professionals to develop and implement an exhibit concept that integrates design, education, and marketing from the onset. Methods in planning, flow charting, budgeting, team dynamics and related skills.

## Applied Music

### Courses

**AP MUS 1410 Secondary Applied Music: Bassoon: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1411 Secondary Applied Music: Clarinet: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1412 Secondary Applied Music: Classical Guitar: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1413 Secondary Applied Music: Euphonium: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1414 Secondary Applied Music: Flute: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1448 Organ: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1449 Percussion: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1450 Piano: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1451 Saxophone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1452 Trombone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1453 Trumpet: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1454 Tuba: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1455 Violin: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1456 Viola: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1457 Violoncello: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1458 String Bass: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1459 Voice: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 3440 Bassoon: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3441 Clarinet: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3442 Classical Guitar: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3443 Euphonium: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3444 Flute: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3445 French Horn: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3446 Harp: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3447 Oboe: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3448 Organ: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3449 Percussion: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3450 Piano: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3451 Saxophone: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3452 Trombone: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3453 Trumpet: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3454 Tuba: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3455 Violin: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3456 Viola: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3457 Violoncello: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3458 String Bass: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3459 Voice: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with a parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory basis.

**AP MUS 4440 Bassoon: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4441 Clarinet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4442 Classical Guitar: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4443 Euphonium: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4444 Flute: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4445 French Horn: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4446 Harp: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4447 Oboe: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4448 Organ: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4449 Percussion: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4450 Piano: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4451 Saxophone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4452 Trombone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4453 Trumpet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4454 Tuba: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4455 Violin: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar Music 4460.

**AP MUS 4456 Viola: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4457 Violoncello: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4458 String Bass: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4459 Voice: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisite: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 4500 Honors Recital: 2-4 semester hours**

Prerequisites: Minimum of three semesters of applied music at the upper division level; completion of the required junior and/or senior degree recitals; permission of the applied music faculty. Preparation and public performance beyond the required degree recital(s) for undergraduate music programs. By approval of the applied music instructor, the Honors Recital may be a lecture-recital focusing on both the performance and the historical, analytical, and/or pedagogical aspects of selected literature, a public performance of a complete concerto or major solo work with orchestra or symphonic band, a major music theatre or opera role in a full production, a full chamber music recital, or other similar major performances.

**AP MUS 5430 Special Applied Studies: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Individual instruction in the performance and literature of an applied area other than the student's primary performance study. No jury examination is required. May be repeated for credit.

**AP MUS 5440 Graduate Applied Music: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Instruction is offered in the following areas: bassoon, clarinet, classical guitar, euphonium, flute, French horn, harp oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violin, viola, violoncello, string bass and voice. May be repeated for credit.

## Courses

**AP MUS 1410 Secondary Applied Music: Bassoon: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1411 Secondary Applied Music: Clarinet: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1412 Secondary Applied Music: Classical Guitar: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1413 Secondary Applied Music: Euphonium: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1414 Secondary Applied Music: Flute: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1415 Secondary Applied Music: French Horn: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1417 Secondary Applied Music: Oboe: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1418 Secondary Applied Music: Organ: 1 semester hour**

Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

**AP MUS 1451 Saxophone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1452 Trombone: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1453 Trumpet: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1454 Tuba: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1455 Violin: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1456 Viola: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1457 Violoncello: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1458 String Bass: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1459 Voice: 1 semester hour**

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 3440 Bassoon: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3441 Clarinet: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3442 Classical Guitar: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3443 Euphonium: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3444 Flute: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3445 French Horn: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3446 Harp: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3447 Oboe: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3448 Organ: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3449 Percussion: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3450 Piano: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3451 Saxophone: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3452 Trombone: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3453 Trumpet: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3454 Tuba: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3455 Violin: 1 semester hour**

Prerequisites: Completion of the Junior Standing Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3456 Viola: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3457 Violoncello: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3458 String Bass: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3459 Voice: 1 semester hour**

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisites: Concurrent registration with a parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory basis.

**AP MUS 4440 Bassoon: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4441 Clarinet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4442 Classical Guitar: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4443 Euphonium: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4444 Flute: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4445 French Horn: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4446 Harp: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4447 Oboe: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4448 Organ: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4449 Percussion: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4450 Piano: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4451 Saxophone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4452 Trombone: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4453 Trumpet: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4454 Tuba: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4455 Violin: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar Music 4460.

**AP MUS 4456 Viola: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4457 Violoncello: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4458 String Bass: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4459 Voice: 2 semester hours**

Prerequisites: Completion of Junior Standing Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

**AP MUS 4460 Seminar In Pedagogy And Literature: 0 semester hours**

Prerequisite: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 4500 Honors Recital: 2-4 semester hours**

Prerequisites: Minimum of three semesters of applied music at the upper division level; completion of the required junior and/or senior degree recitals; permission of the applied music faculty. Preparation and public performance beyond the required degree recital(s) for undergraduate music programs. By approval of the applied music instructor, the Honors Recital may be a lecture-recital focusing on both the performance and the historical, analytical, and/or pedagogical aspects of selected literature, a public performance of a complete concerto or major solo work with orchestra or symphonic band, a major music theatre or opera role in a full production, a full chamber music recital, or other similar major performances.

**AP MUS 5430 Special Applied Studies: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Individual instruction in the performance and literature of an applied area other than the student's primary performance study. No jury examination is required. May be repeated for credit.

**AP MUS 5440 Graduate Applied Music: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Instruction is offered in the following areas: bassoon, clarinet, classical guitar, euphonium, flute, French horn, harp oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violin, viola, violoncello, string bass and voice. May be repeated for credit.

## Arabic

## Courses

**ARABIC 1001 Arabic I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading and writing of Arabic and upon the acquisition of the fundamentals of grammar and syntax.

**ARABIC 1002 Arabic II: 5 semester hours**

Prerequisites: ARABIC 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading and writing of Arabic. Continuation of acquisition of the fundamentals of grammar and syntax.

**ARABIC 2101 Intermediate Arabic I: 5 semester hours**

Prerequisites: ARABIC 1002 or equivalent. Students will advance their understanding of Arabic culture through discussions, readings and written work. Language skills will be further developed through meaningful communicative interaction.

**ARABIC 2102 Intermediate Arabic II: 5 semester hours**

Prerequisites: ARABIC 2101 or equivalent Continuation of ARABIC 2101.

**ARABIC 2190 Special Readings: 1-3 semester hours**

Prerequisites: ARABIC 2102 or consent of the department. Independent study through readings, reports and conferences.

## Courses

**ARABIC 1001 Arabic I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading and writing of Arabic and upon the acquisition of the fundamentals of grammar and syntax.

**ARABIC 2102 Intermediate Arabic II: 5 semester hours**

Prerequisites: ARABIC 2101 or equivalent Continuation of ARABIC 2101.

**ARABIC 2190 Special Readings: 1-3 semester hours**

Prerequisites: ARABIC 2102 or consent of the department. Independent study through readings, reports and conferences.

## Art Education

### Courses

**ART ED 2179 Art Activities for Elementary School: 3 semester hours**

A study of art principles and laboratory experiences with various media and materials. Stresses curriculum planning and development of the elementary school program in art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ART ED 3328 Art Education: Theory to Practice: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212 and completion of Foundation Art Program. Development and application of concepts related to comprehensive art education and standards-based curriculum in art education, with an examination of current theories, trends, publications, and on-line resources in the field.

**ART ED 4260 Art Museum as Teaching Resource: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212, 9 hours of Art History and completion of Foundation Art Program. Should be taken concurrently with ART ED 3328. Students will learn how to strengthen K-12 Art Education by utilizing the collections and resources of the St. Louis Art Museum. A variety of teaching approaches and learning activities for galleries and classrooms will be employed, focusing on art from around the world and throughout history.

**ART ED 4273 Curriculum and Methods of Teaching Art: 3 semester hours**

Prerequisites: ART ED 3328 and completion of, or concurrent enrollment in, TCH ED 3310, ED PSY 3312, SPEC ED 3318, or TCH ED 4391. A study of the scope and sequence of art education in the school curriculum, with emphasis on the preparation, selection, organization and application of materials and methods of instruction and assessment. Attention is also given to learning the research tools of the scholar in the field of art education. Not available for graduate credit.

**ART ED 4290 Special Study in Art Education: 1-6 semester hours**

Prerequisites: Junior, senior, or graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit, up to a maximum of 6 credit hours.

**ART ED 5334 Topics in Contemporary Art Education: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Intensive study for advanced students and art teachers, emphasizing specialized techniques and innovative concepts. Topics to be announced. May be repeated for credit, up to a maximum of 12 credit hours.

**ART ED 5588 Museum Education and Visitor Research: 3 semester hours**

Prerequisites: Consent of director of Museum Studies Program. Development and operation of museum educational programs: learning theory; program design; relationships with exhibit development' programming for children and adults. Visitor research: theoretical foundations; research design; impact on programming and strategic planning.

**ART ED 5590 Special Study in Art Education: 1-6 semester hours**

Prerequisite: Graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit.

## Art History

### Courses

**ART HS 1100 Introduction To Western Art: 3 semester hours**

An introduction to major historical movements in Western art.

**ART HS 1101 Ideas in Art History: 3 semester hours**

Prerequisites: ART HS 1100 or consent of instructor. Studies of selected works of art, with attention to the social and cultural factors surrounding their creation. May not count for a major or minor in art history.

**ART HS 1103 Pre-Columbian Art and Architecture of Meso-and South America: 3 semester hours**

An overview of Pre-Columbian art and architecture that examines the contributions of Olmec, Toltec, Maya, Aztec, Inca, Andean and other Meso-American and South American cultures from prehistoric times until the Spanish intervention in the early 1500s.

**ART HS 1104 Indigenous Arts Of North America: 3 semester hours**

A survey of the indigenous arts of North America from precontact through the present. Cultures to be covered include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagwath and Gitksan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored.

**ART HS 1105 Introduction To The Arts Of Africa: 3 semester hours**

A survey of the major art forms of Africa and the African Diaspora. The course addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the cultural diversity requirement.

**ART HS 1108 Introduction To The Arts Of Asia: 3 semester hours**

A survey of the major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the cultural diversity requirement.

**ART HS 2211 Art And Archaeology Of The Ancient World: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.

**ART HS 2212 Greek Art And Archaeology: 3 semester hours**

General survey of material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

**ART HS 2225 Medieval Art: 3 semester hours**

A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

**ART HS 2235 Italian And Northern European Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. An introduction to selected artworks, artists and patrons in Italy and Northern Europe throughout the fifteenth and sixteenth centuries, beginning with Ghiberti and Van Eyck and ending with Michelangelo and Brughel.

**ART HS 2238 Italian Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Study of sculpture, paintings, and architecture in Florence, Rome, and Venice during the fourteenth, fifteenth, & sixteenth centuries as reflections of cultural, religious, philosophical, and political beliefs.

**ART HS 2240 French Art And Architecture 1400-1715: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art and architecture in France from the late medieval period to the late baroque. Topics will include the development of French chateaux and gardens, the rise of the Academy, and the influence of royal patronage on the arts.

**ART HS 2245 Baroque Art And Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. A survey of the major paintings, statues, buildings, and their artists and patrons in seventeenth-century Italy, France, Flanders, Holland, and Spain. Special attention will be given to the study of the city of Rome.

**ART HS 2248 Eighteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of the instructor. A survey of European art and architecture from 1700 to 1800, primarily in England, France, and Italy. Topics will include the Rococo and Georgian styles; the Classical and Gothic revivals; the impact of the Enlightenment; the Grand Tour and admiration of antiquity; and decorative arts, including ceramics, interior design, and gardens.

**ART HS 2250 Nineteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. A survey of European art from 1780 to 1880, focusing on developments in England, France, Germany, and Scandinavia. Topics to be addressed include Neoclassicism, Romanticism, Realism, and Impressionism.

**ART HS 2255 Modern Art: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1880 to 1960. Topics to be addressed include Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, and non-representational art.

**ART HS 2265 History Of Photography: 3 semester hours**

Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

**ART HS 2270 American Art To 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of the major developments in painting, sculpture, and the decorative arts in the United States to 1876.

**ART HS 2272 American Art Since 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. Major developments in American painting, sculpture, and the decorative arts since 1876.

**ART HS 2279 American Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of American Architectural practice from 1600 to the present.

**ART HS 2281 Art Since 1960: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1960 to present. Topics to be addressed include Pop Art, Conceptual Art, Minimalism, Performance Art, and other recent art forms and movements.

**ART HS 2291 Issues And Ideas In Art History: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Intensive studies of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. May be repeated for credit with a change of topic and permission of advisor.

**ART HS 3303 Media And Technique In Art History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Technical demonstration of and research into various materials and media used by artists. In addition to ancient media such as egg tempera and fresco, it will include modern media such as photography and video.

**ART HS 3350 Studies in Design: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

**ART HS 3360 Photography And Society: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of photography as a means of information and expression, as an influence on culture, and as a reflection of concepts in politics, science, morality, and art. This course counts toward the major.

**ART HS 3365 The Artist And The City: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Examines the role of urban centers as a locus for significant artistic activity, as a recurring theme in art, and as spatial and physical architectural realities. Aspects of urban planning, urban imagery in art and the social, political, and personal networks artists develop as a result of living in particular urban centers at particular moments in history will be among the topics discussed.

**ART HS 3374 Philosophy Of Art: 3 semester hours**

Same as PHIL 3374. A critical study of issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

**ART HS 3376 Gender in the Visual Arts: 3 semester hours**

Same as GS 3376. Prerequisites: Minimum of one 2000-level course in art history and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

**ART HS 3385 Studies In Architectural History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of selected topics in architectural history. The content of the course will vary, and the course may be repeated for credit with permission of the instructor and departmental advisor. Possible topics include the history of the castle, factory architecture, the evolution of the Gothic cathedral, and domestic and vernacular architecture.

**ART HS 3387 Professional Internship: 1-6 semester hours**

Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

**ART HS 3388 St. Louis Art Museum Internship: 3 semester hours**

Prerequisites: Art & Art History or Anthropology major, minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. Students selected by the Internship Committee will work 15-20 hours per week under the direction of staff at the St. Louis Art Museum. Projects may include research on the collection, exhibitions, and programs.

**ART HS 3389 Visual Resources Management: 1-3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and Art History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

**ART HS 3390 Special Study: 1-4 semester hours**

Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

**ART HS 3391 Selected Themes In Art History: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected themes in art history. Course content will vary; the course may be repeated for credit with a different theme, for a maximum of 6 credit hours.

**ART HS 3393 Art Museum And Gallery Management: 3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History and ENGL 3100 or consent of instructor. This course will consider the practical application of professional training in art history as it applies to not-for-profit gallery management. Topics covered will include: grant writing in the arts, the development of art exhibits, the role of the art curator, and the operation of a gallery.

**ART HS 3395 Sophomore/Junior Seminar: Research in Art History: 3 semester hours**

Prerequisite: Minimum of two 2000-level courses in Art Hist and ENGL 3100, or consent of instructor. An introduction to research and writing techniques in art history, organized around a topic to be announced. Course includes directed readings, research and writing.

**ART HS 3396 The Nude In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An exploration of the various meanings of nudity in art. The cultural, social and psychological contexts of nudity and geographic regions, both western and non-western. Representations of both males and females will be analyzed in terms of gender construction, political authority, and personal identity.

**ART HS 3397 Landscape Perspectives In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. This seminar considers the various conventions for representing landscape and nature, and human relationships to landscape, throughout history and across cultures. Issues to be considered may include: landscape as metaphor in European painting; contemporary earthworks; landscape photography; and the relationship of artist to landscape in the non-western world.

**ART HS 3398 The Portrait: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An examination of portraiture in its social, economic and political contexts. Group and individual portraits will be analyzed in terms of gender construction, social status, family history and personal and public identity throughout selected periods of western and non-Western culture.

**ART HS 4408 Topics In The Arts Of Asia: 3 semester hours**

Prerequisites: ART HS 1108 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in the arts of Asia. The content of the course will vary. May be repeated for credit with permission of instructor and advisor. This course satisfies the cultural diversity requirement.

**ART HS 4411 Topics In Ancient Art And Archaeology: 3 semester hours**

Prerequisites: ART HS 2211, ART HS 2212, or ART HS 2213, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of some aspect of ancient art and archaeology, with emphasis prior to the common era. May be repeated for credit with permission of instructor and advisor.

**ART HS 4425 Topics In Medieval Art: 3 semester hours**

Prerequisite: ART HS 2225 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of the selected topics in Medieval art. The content of the course will vary, focusing on single topics such as manuscript painting, the Gothic cathedral and its sculptural decoration, or the art of pilgrimage churches. May be repeated for credit with permission of instructor.

**ART HS 4435 Topics In Renaissance Art: 3 semester hours**

Prerequisites: ART HS 2235, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Studies of selected topics, which will vary. Subjects to be considered may include the art of Florence, the role of patronage in Renaissance Italy and Papal art. May be repeated for credit with a different topic.

**ART HS 4445 Topics In 17Th And 18Th Century European Art: 3 semester hours**

Prerequisite: ART HS 2245 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of selected topics in Baroque and Rococo art. The content of the course will vary, focusing on single areas, such as the Baroque in Rome, or on major artists; such as Bernini, Rubens and Rembrandt. May be repeated for credit with permission of instructor and advisor.

**ART HS 4455 Topics In Modern Art: 3 semester hours**

Prerequisites: ART HS 2255 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

**ART HS 4475 Topics In American Art: 3 semester hours**

Prerequisites: ART HS 2270 or ART HS 2272 or ART HS 2279 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in American art. May be repeated for credit with permission of instructor and advisor.

**ART HS 4481 Topics In Contemporary Art: 3 semester hours**

Prerequisites: ART HS 2281 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art since 1960. May be repeated for credit with permission of instructor and advisor.

**ART HS 4490 Special Study: 1-4 semester hours**

Prerequisite: Junior/Senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

**ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours**

Prerequisite: ART HS 3395, ENGL 3100 and Senior standing in art history or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

**ART HS 5578 Topics In American Art: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. This course examines a discrete aspect of the history of American art within the changing social, cultural and historical contexts of Euro-American and/or Native American experiences and traditions.

**ART HS 5590 Special Study in Art History: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.

**ART HS 5592 The History Of The Visual Arts In American Museums: 3 semester hours**

Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**ART HS 6035 Foundations In Museology I: 3 semester hours**

Same as ANTHRO 6135 and HIST 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs. meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**ART HS 6036 Foundations Of Museology II: 3 semester hours**

Same as ANTHRO 6136 and HIST 6136. Prerequisites: ART HS 6035 consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**ART HS 6037 Museum Organization and Operations: 3 semester hours**

Same as ANTHRO 6137 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**ART HS 6038 Museum Studies Master's Project: 4 semester hours**

Sames as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

## Courses

**ART HS 1100 Introduction To Western Art: 3 semester hours**

An introduction to major historical movements in Western art.

**ART HS 1101 Ideas in Art History: 3 semester hours**

Prerequisites: ART HS 1100 or consent of instructor. Studies of selected works of art, with attention to the social and cultural factors surrounding their creation. May not count for a major or minor in art history.

**ART HS 1103 Pre-Columbian Art and Architecture of Meso-and South America: 3 semester hours**

An overview of Pre-Columbian art and architecture that examines the contributions of Olmec, Toltec, Maya, Aztec, Inca, Andean and other Meso-American and South American cultures from prehistoric times until the Spanish intervention in the early 1500s.

**ART HS 1104 Indigenous Arts Of North America: 3 semester hours**

A survey of the indigenous arts of North America from precontact through the present. Cultures to be covered include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagwath and Gitsxan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored.

**ART HS 1105 Introduction To The Arts Of Africa: 3 semester hours**

A survey of the major art forms of Africa and the African Diaspora. The course addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the cultural diversity requirement.

**ART HS 1108 Introduction To The Arts Of Asia: 3 semester hours**

A survey of the major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the cultural diversity requirement.

**ART HS 2211 Art And Archaeology Of The Ancient World: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.

**ART HS 2212 Greek Art And Archaeology: 3 semester hours**

General survey of material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

**ART HS 2225 Medieval Art: 3 semester hours**

A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

**ART HS 2235 Italian And Northern European Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. An introduction to selected artworks, artists and patrons in Italy and Northern Europe throughout the fifteenth and sixteenth centuries, beginning with Ghiberti and Van Eyck and ending with Michelangelo and Brughel.

**ART HS 2238 Italian Renaissance Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Study of sculpture, paintings, and architecture in Florence, Rome, and Venice during the fourteenth, fifteenth, & sixteenth centuries as reflections of cultural, religious, philosophical, and political beliefs.

**ART HS 2240 French Art And Architecture 1400-1715: 3 semester hours**

Prerequisite: ART HS 1100. A survey of art and architecture in France from the late medieval period to the late baroque. Topics will include the development of French chateaux and gardens, the rise of the Academy, and the influence of royal patronage on the arts.

**ART HS 2245 Baroque Art And Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. A survey of the major paintings, statues, buildings, and their artists and patrons in seventeenth-century Italy, France, Flanders, Holland, and Spain. Special attention will be given to the study of the city of Rome.

**ART HS 2248 Eighteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or permission of the instructor. A survey of European art and architecture from 1700 to 1800, primarily in England, France, and Italy. Topics will include the Rococo and Georgian styles; the Classical and Gothic revivals; the impact of the Enlightenment; the Grand Tour and admiration of antiquity; and decorative arts, including ceramics, interior design, and gardens.

**ART HS 2250 Nineteenth Century European Art: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. A survey of European art from 1780 to 1880, focusing on developments in England, France, Germany, and Scandinavia. Topics to be addressed include Neoclassicism, Romanticism, Realism, and Impressionism.

**ART HS 2255 Modern Art: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1880 to 1960. Topics to be addressed include Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, and non-representational art.

**ART HS 2265 History Of Photography: 3 semester hours**

Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

**ART HS 2270 American Art To 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of the major developments in painting, sculpture, and the decorative arts in the United States to 1876.

**ART HS 2272 American Art Since 1876: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. Major developments in American painting, sculpture, and the decorative arts since 1876.

**ART HS 2279 American Architecture: 3 semester hours**

Prerequisites: ART HS 1100 or consent of the instructor. An overview of American Architectural practice from 1600 to the present.

**ART HS 2281 Art Since 1960: 3 semester hours**

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1960 to present. Topics to be addressed include Pop Art, Conceptual Art, Minimalism, Performance Art, and other recent art forms and movements.

**ART HS 2291 Issues And Ideas In Art History: 3 semester hours**

Prerequisites: ART HS 1100 or permission of instructor. Intensive studies of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. May be repeated for credit with a change of topic and permission of advisor.

**ART HS 3303 Media And Technique In Art History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Technical demonstration of and research into various materials and media used by artists. In addition to ancient media such as egg tempera and fresco, it will include modern media such as photography and video.

**ART HS 3350 Studies in Design: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

**ART HS 3360 Photography And Society: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of photography as a means of information and expression, as an influence on culture, and as a reflection of concepts in politics, science, morality, and art. This course counts toward the major.

**ART HS 3365 The Artist And The City: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Examines the role of urban centers as a locus for significant artistic activity, as a recurring theme in art, and as spatial and physical architectural realities. Aspects of urban planning, urban imagery in art and the social, political, and personal networks artists develop as a result of living in particular urban centers at particular moments in history will be among the topics discussed.

**ART HS 3374 Philosophy Of Art: 3 semester hours**

Same as PHIL 3374. A critical study of issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

**ART HS 3376 Gender in the Visual Arts: 3 semester hours**

Same as GS 3376. Prerequisites: Minimum of one 2000-level course in art history and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

**ART HS 3385 Studies In Architectural History: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of selected topics in architectural history. The content of the course will vary, and the course may be repeated for credit with permission of the instructor and departmental advisor. Possible topics include the history of the castle, factory architecture, the evolution of the Gothic cathedral, and domestic and vernacular architecture.

**ART HS 3387 Professional Internship: 1-6 semester hours**

Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

**ART HS 3388 St. Louis Art Museum Internship: 3 semester hours**

Prerequisites: Art & Art History or Anthropology major, minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. Students selected by the Internship Committee will work 15-20 hours per week under the direction of staff at the St. Louis Art Museum. Projects may include research on the collection, exhibitions, and programs.

**ART HS 3389 Visual Resources Management: 1-3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and Art History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

**ART HS 3390 Special Study: 1-4 semester hours**

Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. My not be used for internship credit.

**ART HS 3391 Selected Themes In Art History: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected themes in art history. Course content will vary; the course may be repeated for credit with a different theme, for a maximum of 6 credit hours.

**ART HS 3393 Art Museum And Gallery Management: 3 semester hours**

Prerequisites: Minimum of two 2000-level courses in Art History and ENGL 3100 or consent of instructor. This course will consider the practical application of professional training in art history as it applies to not-for-profit gallery management. Topics covered will include: grant writing in the arts, the development of art exhibits, the role of the art curator, and the operation of a gallery.

**ART HS 3395 Sophomore/Junior Seminar: Research in Art History: 3 semester hours**

Prerequisite: Minimum of two 2000-level courses in Art Hist and ENGL 3100, or consent of instructor. An introduction to research and writing techniques in art history, organized around a topic to be announced. Course includes directed readings, research and writing.

**ART HS 3396 The Nude In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An exploration of the various meanings of nudity in art. The cultural, social and psychological contexts of nudity and geographic regions, both western and non-western. Representations of both males and females will be analyzed in terms of gender construction, political authority, and personal identity.

**ART HS 3397 Landscape Perspectives In Art: 3 semester hours**

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. This seminar considers the various conventions for representing landscape and nature, and human relationships to landscape, throughout history and across cultures. Issues to be considered may include: landscape as metaphor in European painting; contemporary earthworks; landscape photography; and the relationship of artist to landscape in the non-western world.

**ART HS 3398 The Portrait: 3 semester hours**

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An examination of portraiture in its social, economic and political contexts. Group and individual portraits will be analyzed in terms of gender construction, social status, family history and personal and public identity throughout selected periods of western and non-Western culture.

**ART HS 4408 Topics In The Arts Of Asia: 3 semester hours**

Prerequisites: ART HS 1108 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in the arts of Asia. The content of the course will vary. May be repeated for credit with permission of instructor and advisor. This course satisfies the cultural diversity requirement.

**ART HS 4411 Topics In Ancient Art And Archaeology: 3 semester hours**

Prerequisites: ART HS 2211, ART HS 2212, or ART HS 2213, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of some aspect of ancient art and archaeology, with emphasis prior to the common era. May be repeated for credit with permission of instructor and advisor.

**ART HS 4425 Topics In Medieval Art: 3 semester hours**

Prerequisite: ART HS 2225 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of the selected topics in Medieval art. The content of the course will vary, focusing on single topics such as manuscript painting, the Gothic cathedral and its sculptural decoration, or the art of pilgrimage churches. May be repeated for credit with permission of instructor.

**ART HS 4435 Topics In Renaissance Art: 3 semester hours**

Prerequisites: ART HS 2235, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Studies of selected topics, which will vary. Subjects to be considered may include the art of Florence, the role of patronage in Renaissance Italy and Papal art. May be repeated for credit with a different topic.

**ART HS 4445 Topics In 17Th And 18Th Century European Art: 3 semester hours**

Prerequisite: ART HS 2245 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of selected topics in Baroque and Rococo art. The content of the course will vary, focusing on single areas, such as the Baroque in Rome, or on major artists; such as Bernini, Rubens and Rembrandt. May be repeated for credit with permission of instructor and advisor.

**ART HS 4455 Topics In Modern Art: 3 semester hours**

Prerequisites: ART HS 2255 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

**ART HS 4475 Topics In American Art: 3 semester hours**

Prerequisites: ART HS 2270 or ART HS 2272 or ART HS 2279 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in American art. May be repeated for credit with permission of instructor and advisor.

**ART HS 4481 Topics In Contemporary Art: 3 semester hours**

Prerequisites: ART HS 2281 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art since 1960. May be repeated for credit with permission of instructor and advisor.

**ART HS 4490 Special Study: 1-4 semester hours**

Prerequisite: Junior/Senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

**ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours**

Prerequisite: ART HS 3395, ENGL 3100 and Senior standing in art history or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

**ART HS 5578 Topics In American Art: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. This course examines a discrete aspect of the history of American art within the changing social, cultural and historical contexts of Euro-American and/or Native American experiences and traditions.

**ART HS 5590 Special Study in Art History: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.

**ART HS 5592 The History Of The Visual Arts In American Museums: 3 semester hours**

Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**ART HS 6035 Foundations In Museology I: 3 semester hours**

Same as ANTHRO 6135 and HIST 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs. meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**ART HS 6036 Foundations Of Museology II: 3 semester hours**

Same as ANTHRO 6136 and HIST 6136. Prerequisites: ART HS 6035 consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**ART HS 6037 Museum Organization and Operations: 3 semester hours**

Same as ANTHRO 6137 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**ART HS 6038 Museum Studies Master's Project: 4 semester hours**

Sames as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

## Astronomy

## Courses

### ***ASTRON 1001 Cosmic Evolution Introductory Astronomy: 4 semester hours***

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. The format is three classroom hours and one 2-hour laboratory session per week to enhance lecture material.

### ***ASTRON 1001A Cosmic Evolution/Introduction Astronomy: 3 semester hours***

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. Three classroom hours per week. Same as ASTRON 1001 without the laboratory.

### ***ASTRON 1011 Planets And Life In The Universe: 3 semester hours***

Man's concept of the solar system from Stonehenge to Einstein; geology and meteorology of the planets of our solar system, with particular attention to results from the space program; exobiology--study of the possibilities of life on other worlds and the best method of communicating with it. Three lecture hours per week.

### ***ASTRON 1012 The Violent Universe And The New Astronomy: 3 semester hours***

A nontechnical course focusing on recent results which larger telescopes and the space program have made available. Pulsars, x-ray stars, and black holes; radio astronomy, our galaxy, and interstellar molecules; exploding galaxies and quasars; origin of the expanding universe. Three lecture hours and one observing session per week.

### ***ASTRON 1050 Introduction To Astronomy I: 3 semester hours***

Prerequisites: MATH 1030 and MATH 1035. A survey of the history of astronomy from the ancient times to present. Theories for the formation and evolution of the solar system and the general features of the solar system and planetary motions are discussed. The physical concept of gravity is presented. The detailed properties of the planets, comets, and asteroids are reviewed, concentrating on recent results from space missions.

### ***ASTRON 1051 Introduction To Astronomy II: 3 semester hours***

Prerequisites: MATH 1030 and MATH 1035. A survey of astronomy beyond the solar system. Topics include stars and stellar evolution, neutron stars, and black holes. The physical concept of light and the design of telescopes is discussed in detail. The structure of the Milky Way Galaxy and the large scale structure of the universe are explored. Dark matter, quasars, and active galactic nuclei are discussed in the context of theories for the formation and evolution of the universe. Course does not need to be taken in sequence with ASTRON 1050.

### ***ASTRON 1121 The Search For Extraterrestrial Life: 3 semester hours***

Prerequisite: ASTRON 1001 or ASTRON 1011. Are we alone? The possibility of life in the universe in addition to our own will be explored. Our discussion of the chances for extraterrestrial life will be built around the current theories of chemical, biological, and cultural evolution which have led to our own technological civilization on Earth. Strategies for communication with extraterrestrial intelligence will be discussed.

### ***ASTRON 4301 Astrophysics: 3 semester hours***

Prerequisite: PHYSICS 3231 or consent of instructor. A moderately technical introduction to astrophysics. Topics will include: physics of stellar interiors and atmospheres; interpretation of stellar spectra; stellar evolution; radio astronomy; and cosmology.

### ***ASTRON 4322 Observational Astronomy: 4 semester hours***

Prerequisite: ASTRON 1050, ASTRON 1051 and PHYSICS 3231. Tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of projects which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of the course. This course is primarily for persons who are astronomy or physics majors or who have some equivalent background.

## Courses

### ***ASTRON 1001 Cosmic Evolution Introductory Astronomy: 4 semester hours***

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. Student night observing will be an important part of the course. This course is primarily for persons who are astronomy or physics majors or who have some equivalent background.

## Atmospheric Science

### Courses

**ATM SCI 1001 Elementary Meteorology: 4 semester hours**

Prerequisites: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effects such as radiation, stability, storms, and general circulation. Four classroom hours per week with one hour being a learning enhancement session to include demonstrations and exercises on problem solving.

**ATM SCI 1001A Elementary Meteorology: 3 semester hours**

Prerequisite: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effect such as radiation, stability, storms, and general circulation. Same as ATM SCI 1001 without the learning enhancement session.

### Courses

**ATM SCI 1001 Elementary Meteorology: 4 semester hours**

Prerequisites: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effects such as radiation, stability, storms, and general circulation. Four classroom hours per week with one hour being a learning enhancement session to include demonstrations and exercises on problem solving.

**ATM SCI 1001A Elementary Meteorology: 3 semester hours**

Prerequisite: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effect such as radiation, stability, storms, and general circulation. Same as ATM SCI 1001 without the learning enhancement session.

## Biology

### Courses

**BIOL 1010 Introduction to Student Biological Research: 1-2 semester hours**

Prerequisites: Permission of Instructor. An opportunity for high school students to develop individual research projects under faculty mentorship. Includes interdisciplinary lectures, demonstrations, seminars, and project guidance. Evaluation will be based on written and oral presentation of the research project and student portfolio.

**BIOL 1012 General Biology: 3 semester hours**

Emphasis on fundamental principles of biology. BIOL 1012 can be applied toward fulfillment of the general education requirement in science. BIOL 1012 does not satisfy the prerequisite requirements in other courses in biology at the 2000 level or above. Students who plan to pursue a career in medicine or one of the medical-oriented professions should enroll in BIOL 1831 rather than BIOL 1012.

**BIOL 1013 General Biology Laboratory: 2 semester hours**

Prerequisite: BIOL 1012 (may be taken concurrently). Laboratory course to accompany BIOL 1012. BIOL 1013 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Three and one-half hours of laboratory per week.

**BIOL 1102 Human Biology: 3 semester hours**

Lectures and readings concerned with the reproduction, development, genetics, functional anatomy, behavior, ecology, and evolution of the human species. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1131 Human Physiology And Anatomy I: 4 semester hours**

Prerequisite: BIOL 1012 or its equivalent. The basic aspects of the structure of the healthy human body and how it functions. Special emphasis is on how the human body adapts itself to its environment and how changes affect physiological activities. Three hours lecture and two hours laboratory per week.

**BIOL 1141 Human Physiology And Anatomy II: 4 semester hours**

Prerequisite: BIOL 1131. A continuation of BIOL 1131. A study of the basic aspects of human physiology and anatomy. Three hours lecture and two hours laboratory per week.

**BIOL 1162 General Microbiology: 3 semester hours**

Prerequisite: BIOL 1012 or its equivalent. A survey of microbiology structure, genetics, and physiology. Special emphasis will be placed on the transmission and control of such organisms as it relates to the maintenance of human health. Three hours of lecture per week.

**BIOL 1202 Environmental Biology: 3 semester hours**

An examination of the biological basis of current environmental problems, with emphasis upon resources, energy, pollution and conservation. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1212 Applied Environmental Sciences: 4 semester hours**

In a combined lecture/laboratory setting, students will get hands-on experience collecting and testing environmental samples for abiotic factors such as contaminants, and experimentally assessing the impact of those contaminants on the biological communities contained within the samples. Important approaches include global positioning and information technologies, microscopy, microbiological techniques, genomics, and quantitative analytical measures for assessing the physical, biological and chemical properties of collected samples.

**BIOL 1821 Introductory Biology: Organisms And The Environment: 5 semester hours**

Prerequisites: A minimum of high school chemistry, ENGL 1100 or equivalent (may be taken concurrently), and placement into college algebra or higher. Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the organism and supraorganism levels of biology. Topics to be covered include: ecology, evolution, diversity, and population biology. Three hours of lecture and one hour of discussion per week.

**BIOL 1831 Introductory Biology: From Molecules To Organisms: 5 semester hours**

Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

**BIOL 1999 Evolution for Everyone: 3 semester hours**

Evolution for Everyone explores the development of our current understanding by examining modern and ancient controversies, and by studying major processes by which change occurs. Lectures will present overviews and many examples on topics in history, mechanisms, and outcome of evolutionary change, and students will participate in classroom and online discussions based on readings, computer exercises, and data collection and analysis. Course may not be applied towards major in Biology. Not eligible for credit with BIOL 3302 (Introduction to Evolution) required for Biology majors.

**BIOL 2012 Genetics: 3 semester hours**

Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

**BIOL 2013 Genetics Laboratory: 2 semester hours**

Prerequisites: Concurrent registration in BIOL 2012, or by permission of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

**BIOL 2102 General Ecology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. An examination of the relationships between living organisms and their environment. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 2103 General Ecology Laboratory: 2 semester hours**

Prerequisites: BIOL 2102 required (may be taken concurrently); a general statistics course strongly recommended. An analysis of environmental factors influencing the abundance and distribution of living organisms. Some classes will be held at field sites in and around St. Louis. Three and one-half hours of laboratory or field work per week.

**BIOL 2402 Vertebrate Anatomy: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. Development, structure, function, interrelationships, and zoogeography of vertebrate animals with particular attention to phylogenetic aspects. Three hours of lecture per week. Fulfills Science/Math requirement.

**BIOL 2403 Vertebrate Anatomy Laboratory: 2 semester hours**

Prerequisite: BIOL 2402 (may be taken concurrently). Laboratory to accompany BIOL 2402. Morphological analysis and systematic survey of major vertebrate groups. Overview of the vertebrate life forms and their adaptations to habitats and resources. Three and one-half hours of laboratory per week.

**BIOL 2482 Microbiology: 3 semester hours**

Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

**BIOL 2483 Microbiology Laboratory: 2 semester hours**

Prerequisite: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

**BIOL 2501 Biology Of Plants: 5 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. A general discussion of the plant groups from algae through angiosperms. Plant morphology, physiology, reproduction and ecology will be discussed in lecture (three hours per week). The laboratory (three and one half hours per week) involves examination of representatives of the plant kingdom and experimentation in plant physiology and genetics. Fulfills both a lecture and laboratory requirement.

**BIOL 3001 Experiential Practicum in Biosciences: 1 semester hour**

Prerequisites: Consent of Biology Curriculum Committee. Credit for off-campus bioscience projects providing extraordinary student experience and service to a community in need.

**BIOL 3102 Animal Behavior: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. The study of invertebrate and vertebrate behavior, including neurophysiological, hormonal, developmental, genetic, ecological and evolutionary aspects of behavior; behavior interactions within and between populations. Three hours of lecture per week.

**BIOL 3103 Animal Behavior Laboratory: 2 semester hours**

Prerequisites: BIOL 3102 (may be taken concurrently). Observational and experimental studies of animal behavior in the field and laboratory. Three and one-half hours of formal laboratory time per week, but additional time may be required for independent projects. Some activities involve field trips or trips to the St. Louis Zoo.

**BIOL 3202 Conservation Biology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. Introduction to the principles and theories of conservation biology. Course topics include biodiversity, extinctions, population modeling, habitat fragmentation, conservation area management, restoration ecology, and social science elements of conservation strategies. Class sessions will include lectures, discussions, and simulation exercises. Three hours of lecture per week.

**BIOL 3203 Conservation Biology Laboratory: 2 semester hours**

Prerequisite: BIOL 3202 (recommended to be taken concurrently). Laboratory to accompany BIOL 3202. Laboratory will include computer simulations of conservation problems using existing software, 2-3 field trips to local conservation projects, and field interviews with governmental and nongovernmental agencies. Three and one-half hours of laboratory per week.

**BIOL 3302 Introduction To Evolution: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831, and MATH 1030; BIOL 2012 strongly recommended. Introduction to the theory, events, and processes of organic evolution.

**BIOL 3622 Cell Biology: 3 semester hours**

Prerequisites: BIOL 1831, BIOL 2012, CHEM 2612, and MATH 1030. Examination of the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

**BIOL 3699 Undergraduate Internship In Biotechnology: 1-4 semester hours**

Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

**BIOL 3802 Vertebrate Physiology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831 and CHEM 1111 or CHEM 1081 plus CHEM 1091). Basic functional aspects of organ systems in relation to the physiochemical properties of protoplasm. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 3803 Vertebrate Physiology Lab: 2 semester hours**

Prerequisite: BIOL 3802 (may be taken concurrently). Instrumental and experimental studies in physiology. Three and one-half hours laboratory per week.

**BIOL 4102 Behavioral Ecology: 3 semester hours**

Prerequisite: BIOL 3102 (BIOL 3302 recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, signal use and communication. Three hours of lecture per week. Students may not receive credit for both BIOL 4102 and BIOL 6102.

**BIOL 4122 Biometry: 3 semester hours**

Prerequisites: MATH 1030 and a minimum of 15 hours in biology. Reviews descriptive, analytical, and experimental methods useful for the statistical study of biological phenomena. Students will develop the skills needed to better appreciate and evaluate the published literature, as well as the ability to design their own research programs. Topics include: the collection and summarization of biological observations; development, design, and testing of hypothesis; analysis and presentation of data. Three hours of lecture per week. Fulfills the statistics requirement for the B.A. or B.S. degree in biology.

**BIOL 4182 Population Biology: 3 semester hours**

Prerequisite: BIOL 2102 and BIOL 2012 (BIOL 3302 recommended) Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of populations, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. Three hours of lecture per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 4192 Applications of Geographic Information Systems: 5 semester hours**

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week. Fulfills both a lecture and a laboratory requirement. Students may not receive credit for both BIOL 4192 and BIOL 6192.

**BIOL 4222 Tropical Ecology And Conservation: 3 semester hours**

Prerequisite: BIOL 2102, BIOL 4182, BIOL 5192, or equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. Three hours of lecture per week. Students may not receive credit for both BIOL 4222 and BIOL 6222.

**BIOL 4245 Field Biology: 3 semester hours**

Prerequisite: Three biology courses and consent of instructor. Intensive study of the flora and fauna of selected natural areas of North America, including an extended field trip. Details of the field trip and course schedule will be posted in the Biology department preceding registration for the term in which the course will be offered. Students will be required to pay costs of travel and of the field trip. This is a laboratory course appropriate for advanced undergraduates and non-thesis Master of Science students.

**BIOL 4270 Global Climate Change: 3 semester hours**

Prerequisites: BIOL 3302 or consent of instructor. Topics included are fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. In addition, basic environmental economics and politics of climate change at local and global levels will be included. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 4299 Practicum In Conservation: 2 semester hours**

Prerequisites: Consent of instructor and BIOL 3202. This course is generally restricted to students officially enrolled in the Certificate Program in Conservation Biology. The course provides practical experience with conservation or environmental agencies. Specific placement will be selected according to student's interests and career goals as well as availability of agency openings. Course requirements include practical experience and final report on practicum experience.

**BIOL 4308 Transmission Electron Microscopy Hours: 3 semester hours**

Same as PHYSICS 4308. Course introduces students to transmission electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes fundamental principles (electron optics), electron-specimen interactions, diffraction of electrons, image formation and interpretation, image processing and analysis, energy dispersive X-ray spectroscopy, electron energy loss spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with TEM operations and problem solving skills. Successful completion of the course enables students to independently operate transmission electron microscopes to perform basic research experiments. This course is ideal for students interested in ultrastructural or nanocharacterization of biological or materials systems. Two classroom hours and two hours of laboratory per week.

**BIOL 4402 Ornithology: 3 semester hours**

Prerequisites: BIOL 2102 and junior standing. Introduction to avian biology and ecology. Material to be covered will include basic adaptations of anatomy, physiology, and behavior of birds. There will be a strong emphasis on avian ecology and conservation. Specific topics will include flight, reproductive behavior, migration, foraging behavior, community structure, and current conservation concerns. The diversity of birds will be emphasized through comparisons between temperate and tropical regions. Three hours of lecture per week.

**BIOL 4403 Ornithology Laboratory: 2 semester hours**

Prerequisites: BIOL 4402 (may be taken concurrently), or consent of instructor. This course will introduce students to methods of identifying and studying birds. Labs will almost entirely be comprised of field trips to local areas and will emphasize diversity of birds, adaptations shown by different groups, and means of identification, particularly of birds found in Missouri. Field projects will focus on techniques for censusing birds, sampling foraging behavior, and studying habitat selection. Indoor periods will cover internal and external anatomy of birds. Slides and field trips to the St Louis Zoo will be used to survey the diversity of birds worldwide. Three and one-half hours of laboratory per week. Longer (e.g., Saturday) field trips will be made when appropriate.

**BIOL 4422 Entomology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. 9 additional hours of biology and upper-division standing. Development, structure, function, behavior and ecology of insects, including a systematic survey of the orders of Insecta. Three hours of lecture per week.

**BIOL 4423 Entomology Laboratory: 2 semester hours**

Prerequisites: BIOL 4442 (may be taken concurrently). Laboratory to accompany BIOL 4422. Studies of the morphology, physiology, and behavior of insects to give a sampling of biological studies of the class Insecta. Formation of a collection of insects, comprising a systematic survey of orders and principal families, will be an integral part of the course and will require additional time beyond the official lab hours. Three and one-half hours of lab per week.

**BIOL 4442 Developmental Biology: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 4501 Flowering Plant Families: Phylogeny And Diversification: 5 semester hours**

Prerequisites: BIOL 1821, BIOL 1831 and junior standing or consent of instructor. Focusing on the flowering plant families of North America, the aim of the course is to give an understanding of their phylogeny and diversification. Student will also gain an understanding of plant morphology and anatomy, a basis for further developing their knowledge of plants. Three hours of lecture and three to four hours of laboratory per week. Students may need to return to the laboratory at unscheduled times.

**BIOL 4502 Evolution of Cognition: 3 semester hours**

Prerequisites: BIOL 3102 or Consent of Instructor; BIOL 3302 and PSYCH 2211 are strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week.

**BIOL 4550 Bacterial Pathogenesis: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

**BIOL 4602 Molecular Biology: 3 semester hours**

Prerequisites: BIOL 2012 and CHEM 2612. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students may not receive credit for BIOL 4602 and either BIOL 6602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

**BIOL 4612 Molecular Genetics Of Bacteria: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Student may not receive credit for BIOL 4612 and either BIOL 6612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

**BIOL 4614 Biotechnology Laboratory I: 4 semester hours**

Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hand-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

**BIOL 4615 Biotechnology Laboratory II: 4 semester hours**

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

**BIOL 4622 Cellular Basis of Disease: 3 semester hours**

Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

**BIOL 4632 Nucleic Acid Structure And Function: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

**BIOL 4642 Plant Molecular Biology and Genetic Engineering: 3 semester hours**

Prerequisites: BIOL 2012. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Three hours of lecture per week. Student may not receive credit for both BIOL 4642 and BIOL 6642.

**BIOL 4652 Virology: 3 semester hours**

Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

**BIOL 4662 Human Pathology: 3 semester hours**

Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

**BIOL 4712 Biochemistry: 3 semester hours**

Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. (Same as CHEM 4712) Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

**BIOL 4713 Techniques In Biochemistry: 2 semester hours**

Prerequisites: BIOL 4712 or CHEM 4712 (may be taken concurrently). Laboratory activities introducing fundamental qualitative and quantitative biochemical techniques. Student evaluation will be based on laboratory participation, student laboratory reports, and written examinations. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some experiments.

**BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour**

Prerequisites: Same as CHEM 4797. Senior standing in the Biochemistry and Biotechnology program. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

**BIOL 4822 Introduction To Neuroscience: 3 semester hours**

Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction of the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

**BIOL 4842 Immunobiology: 3 semester hours**

Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

**BIOL 4889 Senior Seminar: 2 semester hours**

Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and BIOL 3302, with a total of at least 30 credits in Biology. Oral and written presentation by students of selected scientific papers or articles. Students are expected to participate in discussions of oral presentations by other students. May not be taken for graduate credit.

**BIOL 4905 Research: 1-3 semester hours**

Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

**BIOL 4915 Biology Internship: 1-3 semester hours**

Prerequisites: Consent of faculty research advisor; generally restricted to junior and senior standing. Research in an area selected by the student to be conducted off-campus in a lab of a professional researcher or faculty person (the internship mentor) other than those in UMSL Biology. Research opportunities are subject to availability and must be approved in advance of beginning research by an UMSL biology faculty liaison and the internship mentor. The project normally includes the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester. Credit arranged. This course and BIOL 4905 may be repeated in any combination for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 and/or BIOL 4915 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS.

**BIOL 4920 Selected Topics: 1-10 semester hours**

Prerequisite: Junior standing and consent of instructor. Selected topics in biology. The topics will vary each semester. Topics offered for the following semester will be available in the departmental office. Credit arranged. May be taken more than once for credit.

**BIOL 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Same as SEC ED 4986. Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences. Must be taken concurrently with SEC ED 4985.

**BIOL 5059 Topics In Ecology, Evolution, And Systematics: 1 semester hour**

Prerequisites: Graduate Standing. Presentation and discussion of faculty and student current research projects in behavior, ecology, evolution, and systematics. May be repeated.

**BIOL 5069 Topics In Cellular And Molecular Biology: 1 semester hour**

Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

**BIOL 5079 Topics In Floristic Taxonomy: 1 semester hour**

Prerequisite: BIOL 2501 or equivalent, and graduate standing. Seminar course In systematics of higher plants, arranged In the Cronquist sequence of families, covering morphology, anatomy, palynology, biogeography, chemosystematics, cytology, and other aspects of plant classification and phylogenetics. Given at the Missouri Botanical Garden. One hour per week.

**BIOL 5089 Topics In Animal Behavior: 1 semester hour**

Prerequisites: Graduate standing. Presentation and discussion of current research articles and/or student and faculty research projects in animal behavior, including ecology, evolution, genetics, and mechanisms of behavior. May be repeated.

**BIOL 5099 Biology Colloquium: 1 semester hour**

Prerequisites: Graduate standing. Attendance is required for the Biology weekly seminar series, consisting of research presentations by department faculty and invited speakers. Class sessions will include discussion of scientific research and presentation practices.

**BIOL 5123 Advanced Tropical Resource Ecology Field Studies: 2 semester hours**

Prerequisites: BIOL 5122 (may be taken concurrently). The field component to the lecture and seminar course. Examines the patterns of use and exploitation of resources in the topics by humans in the context of the theories of behavioral ecology. Two weeks of intensive field research and lectures in Guyana, South America during the second and third weeks of Summer Session I (trip costs to be borne by the student). Students may not receive credit for both BIOL 3123 and BIOL 5123. Offered in odd numbered years.

**BIOL 5177 Graduate Research Writing Workshop in Biology: 1 semester hour**

Prerequisites: Graduate standing. This hands-on course is designed to give Biology graduate students practical assistance and advice on writing, including grant proposal content and organization, writing succinctly but clearly, and editing. The course format will include both informational lectures with discussions and working sessions focused on writing and critiquing drafts. Students are recommended to begin the class ready to write at least one aim of a grant or thesis proposal. Course is graded on a satisfactory/unsatisfactory basis.

**BIOL 5178 Introduction to Graduate Research in Biology: 1 semester hour**

Prerequisites: Graduate standing or consent of instructor. A discussion-based class to introduce new PhD and thesis MS students to the Biology department, graduate school, and best research practices.

**BIOL 5179 Ethical Issues in Biology: 1 semester hour**

Prerequisites: Graduate Standing. Using readings and discussions, students will explore ethical issues in Biology in both professional and social realms. Professional topics include authorship, grants accounting, and academic misconduct; social topics include ethical foundations of basic and applied science, government regulation of science, environmental and individual protection, and current issues. Course graded on a satisfactory/unsatisfactory basis.

**BIOL 5192 Community Ecology: 3 semester hours**

Prerequisites: Graduate standing and either BIOL 2102 and BIOL 4182 or an equivalent course. Studies of structure and organization of natural communities stressing the abundance and distribution of species, the regulation of species diversity, and the evolution of demographic parameters in populations.

**BIOL 5302 Advanced Evolution: 3 semester hours**

Prerequisites: BIOL 3302 or graduate standing. Explores advanced topics in the study of adaptation and the origin of species. Covers phenomena both within populations (e.g. natural selection, sexual selection, and molecular evolution) and between populations (e.g. speciation, coevolution, competition, gene flow, biogeography, and comparative phylogenetics), with a particular focus on recent primary literature.

**BIOL 5312 Theory Of Systematics: 3 semester hours**

Prerequisites: BIOL 1821, BIOL 1831 and at least one course beyond the introductory level dealing with animal, plant, or microbial diversity (such as BIOL 2482, BIOL 2501, BIOL 2402, BIOL 4482, BIOL 4501, BIOL 4402, BIOL 4422) or consent of instructor. Course investigates the theory of classification, phylogenetic analysis, systematic biology, and their relation to systematic practice. Will cover goals and schools of systematics, characters and homology, analysis of molecular and morphological data and underlying assumptions, species concepts, classification, naming, and the connections between evolutionary biology and systematics. The course is appropriate for upper level undergraduates & graduate students in all disciplines, animal, plant, and microbial, as an introduction to systematic methods. Three hours of lecture per week.

**BIOL 5436 Applied Bioinformatics: 3 semester hours**

Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

**BIOL 5798 Practicum in Science in Business: 1-2 semester hours**

Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

**BIOL 5799 Internship in Sciences in Business: 1-2 semester hours**

Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

**BIOL 6102 Advanced Topics In Behavioral Ecology: 3 semester hours**

Prerequisite: BIOL 3102 (BIOL 3302 is recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, and signal use and communication. Three hours of lecture per week. Assignments will include a heavy emphasis on theory and modelling approaches to behavioral ecology. Students may not receive credit for both BIOL 4102 and BIOL 6102.

**BIOL 6182 Advanced Population Biology: 3 semester hours**

Prerequisites: BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of population, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. A discussion section will focus on mathematical elements of population biology models. Three hours of discussion per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 6192 Applications Of Geographic Information Systems: 5 semester hours**

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software using Windows 2000/NT based workstations during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week.

**BIOL 6222 Advanced Tropical Ecology And Conservation: 3 semester hours**

Prerequisite: BIOL 2102, BIOL 4182, or BIOL 5192, or their equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. A research proposal designed to investigate a current topic in tropical ecology will be required. Students may not receive credit for BIOL 4222 and BIOL 6222. Three hours of lecture per week.

**BIOL 6250 Public Policy Of Conservation And Sustainable Development: 3 semester hours**

Prerequisite: Same as POL SCI 6452. Graduate standing in Biology or Political Science and consent of instructor. Prior course in ecology recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

**BIOL 6270 Advanced Global Climate Change: 3 semester hours**

Prerequisites: Graduate Standing or permission of the instructor. We will cover the fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. We will also cover basic environmental economics and politics of climate change at local and global levels. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 6299 Internship In Conservation Biology: 1-4 semester hours**

Prerequisite: BIOL 6250 or BIOL 6212 and consent of the director of graduate studies in biology. Internships will consist of a period of study, observation and on-the-job training at a conservation or environmental agency. Specific placements will be selected according to student's interests and career goals. Internships may vary from 2 weeks to 4 months in duration.

**BIOL 6442 Advanced Developmental Biology: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 6502 Advanced Evolution of Cognition: 3 semester hours**

Prerequisites: BIOL 3102 and BIOL 3302, or consent of instructor; PSYCH 2211 strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4502 and BIOL 6502.

**BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

**BIOL 6602 Advanced Molecular Biology: 3 semester hours**

Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6602 and BIOL 4602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

**BIOL 6612 Advanced Molecular Genetics Of Bacteria: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Student may not receive credit for both BIOL 6612 and BIOL 4612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

**BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours**

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

**BIOL 6618 Practical Next-Generation Sequencing: 3 semester hours**

Prerequisites: Consent of instructor. This is a laboratory course in practical next-generation sequencing. Roughly one-half of the course will focus on bench-top methods for generating sequencing libraries from total RNA as well as the use of next-generation sequencing instruments. The second half of the course will focus on computational methods for analyzing sequencing data, including data visualization and coding.

**BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours**

Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

**BIOL 6632 Advanced Nucleic Acid Structure And Function: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

**BIOL 6642 Advanced Plant Biology And Biotechnology: 3 semester hours**

Prerequisites: Graduate standing. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including the techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Student may not receive credit for both BIOL 4642 and BIOL 6642.

**BIOL 6652 Advanced Virology: 3 semester hours**

Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

**BIOL 6699 Graduate Internship In Biotechnology: 1-4 semester hours**

Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

**BIOL 6889 Graduate Seminar: 2 semester hours**

Presentation and discussion of various research problems in biology. Graduate student exposure to the seminar process.

**BIOL 6905 Graduate Research In Biology: 1-10 semester hours**

Research in area selected by student in consultation with faculty members.

**BIOL 6915 Graduate Research Practicum: 1-2 semester hours**

Prerequisite: Consent of instructor. This course is designed for graduate students wishing to pursue research experience in an area outside their dissertation topic. The project can be techniques-oriented or focused on a specific research question. The credit hours will depend on the time commitment to the project as decided by the supervisory faculty member.

**BIOL 6920 Topics In Biology: 1-5 semester hours**

In-depth studies of selected topics in contemporary biology. May be repeated.

## Courses

**BIOL 1010 Introduction to Student Biological Research: 1-2 semester hours**

Prerequisites: Permission of Instructor. An opportunity for high school students to develop individual research projects under faculty mentorship. Includes interdisciplinary lectures, demonstrations, seminars, and project guidance. Evaluation will be based on written and oral presentation of the research project and student portfolio.

**BIOL 1012 General Biology: 3 semester hours**

Emphasis on fundamental principles of biology. BIOL 1012 can be applied toward fulfillment of the general education requirement in science. BIOL 1012 does not satisfy the prerequisite requirements in other courses in biology at the 2000 level or above. Students who plan to pursue a career in medicine or one of the medical-oriented professions should enroll in BIOL 1831 rather than BIOL 1012.

**BIOL 1013 General Biology Laboratory: 2 semester hours**

Prerequisite: BIOL 1012 (may be taken concurrently). Laboratory course to accompany BIOL 1012. BIOL 1013 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Three and one-half hours of laboratory per week.

**BIOL 1102 Human Biology: 3 semester hours**

Lectures and readings concerned with the reproduction, development, genetics, functional anatomy, behavior, ecology, and evolution of the human species. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1131 Human Physiology And Anatomy I: 4 semester hours**

Prerequisite: BIOL 1012 or its equivalent. The basic aspects of the structure of the healthy human body and how it functions. Special emphasis is on how the human body adapts itself to its environment and how changes affect physiological activities. Three hours lecture and two hours laboratory per week.

**BIOL 1141 Human Physiology And Anatomy II: 4 semester hours**

Prerequisite: BIOL 1131. A continuation of BIOL 1131. A study of the basic aspects of human physiology and anatomy. Three hours lecture and two hours laboratory per week.

**BIOL 1162 General Microbiology: 3 semester hours**

Prerequisite: BIOL 1012 or its equivalent. A survey of microbiology structure, genetics, and physiology. Special emphasis will be placed on the transmission and control of such organisms as it relates to the maintenance of human health. Three hours of lecture per week.

**BIOL 1202 Environmental Biology: 3 semester hours**

An examination of the biological basis of current environmental problems, with emphasis upon resources, energy, pollution and conservation. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1212 Applied Environmental Sciences: 4 semester hours**

In a combined lecture/laboratory setting, students will get hands-on experience collecting and testing environmental samples for abiotic factors such as contaminants, and experimentally assessing the impact of those contaminants on the biological communities contained within the samples. Important approaches include global positioning and information technologies, microscopy, microbiological techniques, genomics, and quantitative analytical measures for assessing the physical, biological and chemical properties of collected samples.

**BIOL 1821 Introductory Biology: Organisms And The Environment: 5 semester hours**

Prerequisites: A minimum of high school chemistry, ENGL 1100 or equivalent (may be taken concurrently), and placement into college algebra or higher. Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the organism and supraorganism levels of biology. Topics to be covered include: ecology, evolution, diversity, and population biology. Three hours of lecture and one hour of discussion per week.

**BIOL 1831 Introductory Biology: From Molecules To Organisms: 5 semester hours**

Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

**BIOL 1999 Evolution for Everyone: 3 semester hours**

Evolution for Everyone explores the development of our current understanding by examining modern and ancient controversies, and by studying major processes by which change occurs. Lectures will present overviews and many examples on topics in history, mechanisms, and outcome of evolutionary change, and students will participate in classroom and online discussions based on readings, computer exercises, and data collection and analysis. Course may not be applied towards major in Biology. Not eligible for credit with BIOL 3302 (Introduction to Evolution) required for Biology majors.

**BIOL 2012 Genetics: 3 semester hours**

Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

**BIOL 2013 Genetics Laboratory: 2 semester hours**

Prerequisites: Concurrent registration in BIOL 2012, or by permission of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

**BIOL 2102 General Ecology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. An examination of the relationships between living organisms and their environment. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 2103 General Ecology Laboratory: 2 semester hours**

Prerequisites: BIOL 2102 required (may be taken concurrently); a general statistics course strongly recommended. An analysis of environmental factors influencing the abundance and distribution of living organisms. Some classes will be held at field sites in and around St. Louis. Three and one-half hours of laboratory or field work per week.

**BIOL 2402 Vertebrate Anatomy: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. Development, structure, function, interrelationships, and zoogeography of vertebrate animals with particular attention to phylogenetic aspects. Three hours of lecture per week. Fulfills Science/Math requirement.

**BIOL 2403 Vertebrate Anatomy Laboratory: 2 semester hours**

Prerequisite: BIOL 2402 (may be taken concurrently). Laboratory to accompany BIOL 2402. Morphological analysis and systematic survey of major vertebrate groups. Overview of the vertebrate life forms and their adaptations to habitats and resources. Three and one-half hours of laboratory per week.

**BIOL 2482 Microbiology: 3 semester hours**

Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

**BIOL 2483 Microbiology Laboratory: 2 semester hours**

Prerequisite: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

**BIOL 2501 Biology Of Plants: 5 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. A general discussion of the plant groups from algae through angiosperms. Plant morphology, physiology, reproduction and ecology will be discussed in lecture (three hours per week). The laboratory (three and one half hours per week) involves examination of representatives of the plant kingdom and experimentation in plant physiology and genetics. Fulfills both a lecture and laboratory requirement.

**BIOL 3001 Experiential Practicum in Biosciences: 1 semester hour**

Prerequisites: Consent of Biology Curriculum Committee. Credit for off-campus bioscience projects providing extraordinary student experience and service to a community in need.

**BIOL 3102 Animal Behavior: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. The study of invertebrate and vertebrate behavior, including neurophysiological, hormonal, developmental, genetic, ecological and evolutionary aspects of behavior; behavior interactions within and between populations. Three hours of lecture per week.

**BIOL 3103 Animal Behavior Laboratory: 2 semester hours**

Prerequisites: BIOL 3102 (may be taken concurrently). Observational and experimental studies of animal behavior in the field and laboratory. Three and one-half hours of formal laboratory time per week, but additional time may be required for independent projects. Some activities involve field trips or trips to the St. Louis Zoo.

**BIOL 3202 Conservation Biology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. Introduction to the principles and theories of conservation biology. Course topics include biodiversity, extinctions, population modeling, habitat fragmentation, conservation area management, restoration ecology, and social science elements of conservation strategies. Class sessions will include lectures, discussions, and simulation exercises. Three hours of lecture per week.

**BIOL 3203 Conservation Biology Laboratory: 2 semester hours**

Prerequisite: BIOL 3202 (recommended to be taken concurrently). Laboratory to accompany BIOL 3202. Laboratory will include computer simulations of conservation problems using existing software, 2-3 field trips to local conservation projects, and field interviews with governmental and nongovernmental agencies. Three and one-half hours of laboratory per week.

**BIOL 3302 Introduction To Evolution: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831, and MATH 1030; BIOL 2012 strongly recommended. Introduction to the theory, events, and processes of organic evolution.

**BIOL 3622 Cell Biology: 3 semester hours**

Prerequisites: BIOL 1831, BIOL 2012, CHEM 2612, and MATH 1030. Examination of the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

**BIOL 3699 Undergraduate Internship In Biotechnology: 1-4 semester hours**

Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

**BIOL 3802 Vertebrate Physiology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831 and CHEM 1111 or CHEM 1081 plus CHEM 1091). Basic functional aspects of organ systems in relation to the physiochemical properties of protoplasm. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 3803 Vertebrate Physiology Lab: 2 semester hours**

Prerequisite: BIOL 3802 (may be taken concurrently). Instrumental and experimental studies in physiology. Three and one-half hours laboratory per week.

**BIOL 4102 Behavioral Ecology: 3 semester hours**

Prerequisite: BIOL 3102 (BIOL 3302 recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, signal use and communication. Three hours of lecture per week. Students may not receive credit for both BIOL 4102 and BIOL 6102.

**BIOL 4122 Biometry: 3 semester hours**

Prerequisites: MATH 1030 and a minimum of 15 hours in biology. Reviews descriptive, analytical, and experimental methods useful for the statistical study of biological phenomena. Students will develop the skills needed to better appreciate and evaluate the published literature, as well as the ability to design their own research programs. Topics include: the collection and summarization of biological observations; development, design, and testing of hypothesis; analysis and presentation of data. Three hours of lecture per week. Fulfills the statistics requirement for the B.A. or B.S. degree in biology.

**BIOL 4182 Population Biology: 3 semester hours**

Prerequisite: BIOL 2102 and BIOL 2012 (BIOL 3302 recommended) Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of populations, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. Three hours of lecture per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 4192 Applications of Geographic Information Systems: 5 semester hours**

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week. Fulfills both a lecture and a laboratory requirement. Students may not receive credit for both BIOL 4192 and BIOL 6192.

**BIOL 4222 Tropical Ecology And Conservation: 3 semester hours**

Prerequisite: BIOL 2102, BIOL 4182, BIOL 5192, or equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. Three hours of lecture per week. Students may not receive credit for both BIOL 4222 and BIOL 6222.

**BIOL 4245 Field Biology: 3 semester hours**

Prerequisite: Three biology courses and consent of instructor. Intensive study of the flora and fauna of selected natural areas of North America, including an extended field trip. Details of the field trip and course schedule will be posted in the Biology department preceding registration for the term in which the course will be offered. Students will be required to pay costs of travel and of the field trip. This is a laboratory course appropriate for advanced undergraduates and non-thesis Master of Science students.

**BIOL 4270 Global Climate Change: 3 semester hours**

Prerequisites: BIOL 3302 or consent of instructor. Topics included are fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. In addition, basic environmental economics and politics of climate change at local and global levels will be included. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 4299 Practicum In Conservation: 2 semester hours**

Prerequisites: Consent of instructor and BIOL 3202. This course is generally restricted to students officially enrolled in the Certificate Program in Conservation Biology. The course provides practical experience with conservation or environmental agencies. Specific placement will be selected according to student's interests and career goals as well as availability of agency openings. Course requirements include practical experience and final report on practicum experience.

**BIOL 4308 Transmission Electron Microscopy Hours: 3 semester hours**

Same as PHYSICS 4308. Course introduces students to transmission electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes fundamental principles (electron optics), electron-specimen interactions, diffraction of electrons, image formation and interpretation, image processing and analysis, energy dispersive X-ray spectroscopy, electron energy loss spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with TEM operations and problem solving skills. Successful completion of the course enables students to independently operate transmission electron microscopes to perform basic research experiments. This course is ideal for students interested in ultrastructural or nanocharacterization of biological or materials systems. Two classroom hours and two hours of laboratory per week.

**BIOL 4402 Ornithology: 3 semester hours**

Prerequisites: BIOL 2102 and junior standing. Introduction to avian biology and ecology. Material to be covered will include basic adaptations of anatomy, physiology, and behavior of birds. There will be a strong emphasis on avian ecology and conservation. Specific topics will include flight, reproductive behavior, migration, foraging behavior, community structure, and current conservation concerns. The diversity of birds will be emphasized through comparisons between temperate and tropical regions. Three hours of lecture per week.

**BIOL 4403 Ornithology Laboratory: 2 semester hours**

Prerequisites: BIOL 4402 (may be taken concurrently), or consent of instructor. This course will introduce students to methods of identifying and studying birds. Labs will almost entirely be comprised of field trips to local areas and will emphasize diversity of birds, adaptations shown by different groups, and means of identification, particularly of birds found in Missouri. Field projects will focus on techniques for censusing birds, sampling foraging behavior, and studying habitat selection. Indoor periods will cover internal and external anatomy of birds. Slides and field trips to the St Louis Zoo will be used to survey the diversity of birds worldwide. Three and one-half hours of laboratory per week. Longer (e.g., Saturday) field trips will be made when appropriate.

**BIOL 4422 Entomology: 3 semester hours**

Prerequisites: BIOL 1821 and BIOL 1831. 9 additional hours of biology and upper-division standing. Development, structure, function, behavior and ecology of insects, including a systematic survey of the orders of Insecta. Three hours of lecture per week.

**BIOL 4423 Entomology Laboratory: 2 semester hours**

Prerequisites: BIOL 4442 (may be taken concurrently). Laboratory to accompany BIOL 4422. Studies of the morphology, physiology, and behavior of insects to give a sampling of biological studies of the class Insecta. Formation of a collection of insects, comprising a systematic survey of orders and principal families, will be an integral part of the course and will require additional time beyond the official lab hours. Three and one-half hours of lab per week.

**BIOL 4442 Developmental Biology: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 4501 Flowering Plant Families: Phylogeny And Diversification: 5 semester hours**

Prerequisites: BIOL 1821, BIOL 1831 and junior standing or consent of instructor. Focusing on the flowering plant families of North America, the aim of the course is to give an understanding of their phylogeny and diversification. Student will also gain an understanding of plant morphology and anatomy, a basis for further developing their knowledge of plants. Three hours of lecture and three to four hours of laboratory per week. Students may need to return to the laboratory at unscheduled times.

**BIOL 4502 Evolution of Cognition: 3 semester hours**

Prerequisites: BIOL 3102 or Consent of Instructor; BIOL 3302 and PSYCH 2211 are strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week.

**BIOL 4550 Bacterial Pathogenesis: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host/parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

**BIOL 4602 Molecular Biology: 3 semester hours**

Prerequisites: BIOL 2012 and CHEM 2612. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students may not receive credit for BIOL 4602 and either BIOL 6602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

**BIOL 4612 Molecular Genetics Of Bacteria: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Student may not receive credit for BIOL 4612 and either BIOL 6612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

**BIOL 4614 Biotechnology Laboratory I: 4 semester hours**

Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hand-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

**BIOL 4615 Biotechnology Laboratory II: 4 semester hours**

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

**BIOL 4622 Cellular Basis of Disease: 3 semester hours**

Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

**BIOL 4632 Nucleic Acid Structure And Function: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

**BIOL 4642 Plant Molecular Biology and Genetic Engineering: 3 semester hours**

Prerequisites: BIOL 2012. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Three hours of lecture per week. Student may not receive credit for both BIOL 4642 and BIOL 6642.

**BIOL 4652 Virology: 3 semester hours**

Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

**BIOL 4662 Human Pathology: 3 semester hours**

Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

**BIOL 4712 Biochemistry: 3 semester hours**

Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. (Same as CHEM 4712) Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

**BIOL 4713 Techniques In Biochemistry: 2 semester hours**

Prerequisites: BIOL 4712 or CHEM 4712 (may be taken concurrently). Laboratory activities introducing fundamental qualitative and quantitative biochemical techniques. Student evaluation will be based on laboratory participation, student laboratory reports, and written examinations. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some experiments.

**BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour**

Prerequisites: Same as CHEM 4797. Senior standing in the Biochemistry and Biotechnology program. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

**BIOL 4822 Introduction To Neuroscience: 3 semester hours**

Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction for the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

**BIOL 4842 Immunobiology: 3 semester hours**

Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

**BIOL 4889 Senior Seminar: 2 semester hours**

Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and BIOL 3302, with a total of at least 30 credits in Biology. Oral and written presentation by students of selected scientific papers or articles. Students are expected to participate in discussions of oral presentations by other students. May not be taken for graduate credit.

**BIOL 4905 Research: 1-3 semester hours**

Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

**BIOL 4915 Biology Internship: 1-3 semester hours**

Prerequisites: Consent of faculty research advisor; generally restricted to junior and senior standing. Research in an area selected by the student to be conducted off-campus in a lab of a professional researcher or faculty person (the internship mentor) other than those in UMSL Biology. Research opportunities are subject to availability and must be approved in advance of beginning research by an UMSL biology faculty liaison and the internship mentor. The project normally includes the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester. Credit arranged. This course and BIOL 4905 may be repeated in any combination for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 and/or BIOL 4915 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS.

**BIOL 4920 Selected Topics: 1-10 semester hours**

Prerequisite: Junior standing and consent of instructor. Selected topics in biology. The topics will vary each semester. Topics offered for the following semester will be available in the departmental office. Credit arranged. May be taken more than once for credit.

**BIOL 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Same as SEC ED 4986. Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences. Must be taken concurrently with SEC ED 4985.

**BIOL 5059 Topics In Ecology, Evolution, And Systematics: 1 semester hour**

Prerequisites: Graduate Standing. Presentation and discussion of faculty and student current research projects in behavior, ecology, evolution, and systematics. May be repeated.

**BIOL 5069 Topics In Cellular And Molecular Biology: 1 semester hour**

Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

**BIOL 5079 Topics In Floristic Taxonomy: 1 semester hour**

Prerequisite: BIOL 2501 or equivalent, and graduate standing. Seminar course in systematics of higher plants, arranged in the Cronquist sequence of families, covering morphology, anatomy, palynology, biogeography, chemosystematics, cytology, and other aspects of plant classification and phylogenetics. Given at the Missouri Botanical Garden. One hour per week.

**BIOL 5089 Topics In Animal Behavior: 1 semester hour**

Prerequisites: Graduate standing. Presentation and discussion of current research articles and/or student and faculty research projects in animal behavior, including ecology, evolution, genetics, and mechanisms of behavior. May be repeated.

**BIOL 5099 Biology Colloquium: 1 semester hour**

Prerequisites: Graduate standing. Attendance is required for the Biology weekly seminar series, consisting of research presentations by department faculty and invited speakers. Class sessions will include discussion of scientific research and presentation practices.

**BIOL 5123 Advanced Tropical Resource Ecology Field Studies: 2 semester hours**

Prerequisites: BIOL 5122 (may be taken concurrently). The field component to the lecture and seminar course. Examines the patterns of use and exploitation of resources in the topics by humans in the context of the theories of behavioral ecology. Two weeks of intensive field research and lectures in Guyana, South America during the second and third weeks of Summer Session I (trip costs to be borne by the student). Students may not receive credit for both BIOL 3123 and BIOL 5123. Offered in odd numbered years.

**BIOL 5177 Graduate Research Writing Workshop in Biology: 1 semester hour**

Prerequisites: Graduate standing. This hands-on course is designed to give Biology graduate students practical assistance and advice on writing, including grant proposal content and organization, writing succinctly but clearly, and editing. The course format will include both informational lectures with discussions and working sessions focused on writing and critiquing drafts. Students are recommended to begin the class ready to write at least one aim of a grant or thesis proposal. Course is graded on a satisfactory/unsatisfactory basis.

**BIOL 5178 Introduction to Graduate Research in Biology: 1 semester hour**

Prerequisites: Graduate standing or consent of instructor. A discussion-based class to introduce new PhD and thesis MS students to the Biology department, graduate school, and best research practices.

**BIOL 5179 Ethical Issues in Biology: 1 semester hour**

Prerequisites: Graduate Standing. Using readings and discussions, students will explore ethical issues in Biology in both professional and social realms. Professional topics include authorship, grants accounting, and academic misconduct; social topics include ethical foundations of basic and applied science, government regulation of science, environmental and individual protection, and current issues. Course graded on a satisfactory/unsatisfactory basis.

**BIOL 5192 Community Ecology: 3 semester hours**

Prerequisites: Graduate standing and either BIOL 2102 and BIOL 4182 or an equivalent course. Studies of structure and organization of natural communities stressing the abundance and distribution of species, the regulation of species diversity, and the evolution of demographic parameters in populations.

**BIOL 5302 Advanced Evolution: 3 semester hours**

Prerequisites: BIOL 3302 or graduate standing. Explores advanced topics in the study of adaptation and the origin of species. Covers phenomena both within populations (e.g. natural selection, sexual selection, and molecular evolution) and between populations (e.g. speciation, coevolution, competition, gene flow, biogeography, and comparative phylogenetics), with a particular focus on recent primary literature.

**BIOL 5312 Theory Of Systematics: 3 semester hours**

Prerequisites: BIOL 1821, BIOL 1831 and at least one course beyond the introductory level dealing with animal, plant, or microbial diversity (such as BIOL 2482, BIOL 2501, BIOL 2402, BIOL 4482, BIOL 4501, BIOL 4402, BIOL 4422) or consent of instructor. Course investigates the theory of classification, phylogenetic analysis, systematic biology, and their relation to systematic practice. Will cover goals and schools of systematics, characters and homology, analysis of molecular and morphological data and underlying assumptions, species concepts, classification, naming, and the connections between evolutionary biology and systematics. The course is appropriate for upper level undergraduates & graduate students in all disciplines, animal, plant, and microbial, as an introduction to systematic methods. Three hours of lecture per week.

**BIOL 5436 Applied Bioinformatics: 3 semester hours**

Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

**BIOL 5798 Practicum in Science in Business: 1-2 semester hours**

Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

**BIOL 5799 Internship in Sciences in Business: 1-2 semester hours**

Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

**BIOL 6102 Advanced Topics In Behavioral Ecology: 3 semester hours**

Prerequisite: BIOL 3102 (BIOL 3302 is recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, and signal use and communication. Three hours of lecture per week. Assignments will include a heavy emphasis on theory and modelling approaches to behavioral ecology. Students may not receive credit for both BIOL 4102 and BIOL 6102.

**BIOL 6182 Advanced Population Biology: 3 semester hours**

Prerequisites: BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of population, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. A discussion section will focus on mathematical elements of population biology models. Three hours of discussion per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 6192 Applications Of Geographic Information Systems: 5 semester hours**

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software using Windows 2000/NT based workstations during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week.

**BIOL 6222 Advanced Tropical Ecology And Conservation: 3 semester hours**

Prerequisite: BIOL 2102, BIOL 4182, or BIOL 5192, or their equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. A research proposal designed to investigate a current topic in tropical ecology will be required. Students may not receive credit for BIOL 4222 and BIOL 6222. Three hours of lecture per week.

**BIOL 6250 Public Policy Of Conservation And Sustainable Development: 3 semester hours**

Prerequisite: Same as POL SCI 6452. Graduate standing in Biology or Political Science and consent of instructor. Prior course in ecology recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

**BIOL 6270 Advanced Global Climate Change: 3 semester hours**

Prerequisites: Graduate Standing or permission of the instructor. We will cover the fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. We will also cover basic environmental economics and politics of climate change at local and global levels. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 6299 Internship In Conservation Biology: 1-4 semester hours**

Prerequisite: BIOL 6250 or BIOL 6212 and consent of the director of graduate studies in biology. Internships will consist of a period of study, observation and on-the-job training at a conservation or environmental agency. Specific placements will be selected according to student's interests and career goals. Internships may vary from 2 weeks to 4 months in duration.

**BIOL 6442 Advanced Developmental Biology: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 6502 Advanced Evolution of Cognition: 3 semester hours**

Prerequisites: BIOL 3102 and BIOL 3302, or consent of instructor; PSYCH 2211 strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4502 and BIOL 6502.

**BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

**BIOL 6602 Advanced Molecular Biology: 3 semester hours**

Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6602 and BIOL 4602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

**BIOL 6612 Advanced Molecular Genetics Of Bacteria: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Student may not receive credit for both BIOL 6612 and BIOL 4612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

**BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours**

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

**BIOL 6618 Practical Next-Generation Sequencing: 3 semester hours**

Prerequisites: Consent of instructor. This is a laboratory course in practical next-generation sequencing. Roughly one-half of the course will focus on bench-top methods for generating sequencing libraries from total RNA as well as the use of next-generation sequencing instruments. The second half of the course will focus on computational methods for analyzing sequencing data, including data visualization and coding.

**BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours**

Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

**BIOL 6632 Advanced Nucleic Acid Structure And Function: 3 semester hours**

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

**BIOL 6642 Advanced Plant Biology And Biotechnology: 3 semester hours**

Prerequisites: Graduate standing. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including the techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Student may not receive credit for both BIOL 4642 and BIOL 6642.

**BIOL 6652 Advanced Virology: 3 semester hours**

Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

**BIOL 6699 Graduate Internship In Biotechnology: 1-4 semester hours**

Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

**BIOL 6889 Graduate Seminar: 2 semester hours**

Presentation and discussion of various research problems in biology. Graduate student exposure to the seminar process.

**BIOL 6905 Graduate Research In Biology: 1-10 semester hours**

Research in area selected by student in consultation with faculty members.

**BIOL 6915 Graduate Research Practicum: 1-2 semester hours**

Prerequisite: Consent of instructor. This course is designed for graduate students wishing to pursue research experience in an area outside their dissertation topic. The project can be techniques-oriented or focused on a specific research question. The credit hours will depend on the time commitment to the project as decided by the supervisory faculty member.

**BIOL 6920 Topics In Biology: 1-5 semester hours**

In-depth studies of selected topics in contemporary biology. May be repeated.

## Business Administration

### Courses

**BUS AD 1000 Introduction to Business: 3 semester hours**

Overview of the functional business disciplines, including, but not limited to principles of Accounting, Finance, Information Systems, Law, Logistics and Operations Management, Management, and Marketing.

**BUS AD 1900 Introduction to Personal Law: 3 semester hours**

This course introduces students to the American legal system and the basic issues every individual must deal with in our society. The course will be of interest to anyone seeking a job, leasing an apartment, buying a car or house, borrowing money, buying insurance, getting married or divorced, entering contracts, filing a law suit, writing a will, or accumulating wealth. May not be used for credit in any undergraduate business program.

**BUS AD 2000 Topics In Business Administration: 1-3 semester hours**

Prerequisites: Vary with topic; contact the School of Business Administration. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**BUS AD 2900 Legal Environment Of Business: 3 semester hours**

Prerequisites: Sophomore Standing. An introduction to the nature and meaning of law, sources of law, legal process and institutions. The legal environment of business is defined as: the attitude of the government toward business, the historical development of this attitude; current trends of public control in taxation, regulation of commerce and competition; freedom of contract, antitrust legislation and its relationship to marketing, mergers and acquisitions; and labor management relations.

***BUS AD 3090 Internship In Business Administration: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 hours of Business Administration electives and have consent of supervising instructor and Associate Dean. College of Business GPA of at least 2.5 is also required. Students are employed in the field of Business Administration where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. A Business Administration faculty member will monitor the student's program with the student providing a formal written report at the end of the project. BUS AD 3090 may not be counted toward the minimum credit hours for any emphasis area.

***BUS AD 3099 Independent Study In Business Administration: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Associate Dean. Special individual study in business under the supervision of a full-time faculty member.

***BUS AD 3990 Internship In Business Law: 1-3 semester hours***

Prerequisites: BUS AD 2900, 3 credit hours of Business Law electives, and a Business College 2.5 GPA. Must have completed and/or be currently enrolled in at least 3 credit hour of Business Law electives and have consent of supervising instructor and Area Coordinator. Students are employed in the field of Business Law where the knowledge and skills learned in the classroom are applied. Professional development and obtaining specialized work experience are primary goals. A Business Law faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

***BUS AD 3999 Independent Study In Legal Studies: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in legal studies under the supervision of a full-time legal studies faculty member.

***BUS AD 4198 Business Administration Senior Seminar: 1-10 semester hours***

Prerequisites: To be determined each time the course is offered and to include minimum 2.0 campus GPA. An intensive study of a specific area of business administration, of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number. May be repeated for credit as long as the topic differs.

***BUS AD 5000 Economics For Managers: 3 semester hours***

Prerequisites: none The first portion of this course introduces microeconomic analysis of consumers, firms, and government. The concepts and tools of economic analysis are applied to the production and distribution functions of organizations. The last portion is devoted to the macroeconomic influence of capital markets, the influence of interest rates, inflation, and the business cycle.

***BUS AD 5001 Managerial Economic Analysis: 3 semester hours***

Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. Microeconomic analysis of consumers, firms, and government. The concepts and mathematical tools of economic analysis are applied to the production and distribution functions of organizations.

***BUS AD 5002 Analysis Of National Economic Environment: 3 semester hours***

Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. The character and functioning of the national economic system; analyzing and forecasting fluctuations in national income and product, employment, and prices; the influence of monetary and fiscal policies. Emphasis is on the acquisition of knowledge concerning forces affecting all business firms.

***BUS AD 5100 Managerial Communication: 3 semester hours***

An analysis of business writing and speaking, and the communication conventions common in organizations. Emphasis is placed on developing skills critical to career advancement and necessary for effective organizational functioning. A second goal is to prepare students for assignments in other business courses. This course must be taken within the first 12 credit hours of study, preferably in the student's first semester.

***BUS AD 5198 Seminar In Business Administration: 3 semester hours***

An intensive study of a specific area of business administration of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number.

***BUS AD 5299 Individual Research: 1-3 semester hours***

Prerequisite: Consent of instructor and graduate director. Special individual research topics under the guidance of a specific professor.

***BUS AD 5450 Governmental Budgeting And Financial Control: 3 semester hours***

Prerequisite: ACCTNG 5400. A study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

***BUS AD 5900 Law, Ethics And Business: 3 semester hours***

Analysis of the relationship between law and business with emphasis on the ability of, and extent to which, governments regulate business activities. Topics covered include the employer-employee relationship, protection of consumers, antitrust regulation, and securities law. Also discussed are ethical issues confronting management of the modern business enterprises.

***BUS AD 6990 Strategy Formulation And Implementation: 3 semester hours***

Prerequisites: FINANCE 6500, MGMT 5600, MKTG 5700, LOG OM 5320 and special consent. Graduate program capstone course examining concepts and methods that integrate functional areas of business. The perspective is that of general management charged with directing the total enterprise. Interactions between the environment, organization, strategy, policies and the implementation of plans are explored. Special emphasis is given to globalization of business and ethical perspectives. This course should be taken during the semester prior to graduation. In no case may it be taken sooner than two semesters prior to graduation.

***BUS AD 7001 Doctoral Research: 1-12 semester hours***

Prerequisites: Must have Ph.D. Program Director or Area Coordinator approval Investigation of an advanced nature culminating in preparation for comprehensive examinations and/or development of dissertation proposal. The course may be repeated for credit.

***BUS AD 7002 Dissertation Research: 1-12 semester hours***

Prerequisites: Must have Ph.D. Program Director or Area Coordinator approval. Investigation of an advanced nature culminating preparation of a doctoral dissertation. The course may be repeated.

***BUS AD 7021 Qualitative Methods And Philosophical Foundations Of BA Research: 3 semester hours***

Prerequisites: Admittance into the Ph.D. Program This course investigates the ontology and epistemology of business administration research, particularly as they pertain to qualitative research methods, such as case studies, action research, and ethnomethodology.

***BUS AD 7300 Statistical Modeling: 3 semester hours***

Prerequisites: LOG OM 5300; Admittance into the Ph.D. Program. Study of multivariate analytical techniques and their application to the analysis of business systems. Topics include the construction and adaptation of statistical models and extrapolative techniques to accommodate factor interactions, nonlinearities, and periodic effects. Methodologies include multiple regression, ANOVA, and general linear model, MANOVA, structural equation modeling, and time series modeling.

## Courses

***BUS AD 1000 Introduction to Business: 3 semester hours***

Overview of the functional business disciplines, including, but not limited to principles of Accounting, Finance, Information Systems, Law, Logistics and Operations Management, Management, and Marketing.

***BUS AD 1900 Introduction to Personal Law: 3 semester hours***

This course introduces students to the American legal system and the basic issues every individual must deal with in our society. The course will be of interest to anyone seeking a job, leasing an apartment, buying a car or house, borrowing money, buying insurance, getting married or divorced, entering contracts, filing a law suit, writing a will, or accumulating wealth. May not be used for credit in any undergraduate business program.

***BUS AD 2000 Topics In Business Administration: 1-3 semester hours***

Prerequisites: Vary with topic; contact the School of Business Administration. Study of selected special problems in business and administration. May be repeated for credit with different topics.

***BUS AD 2900 Legal Environment Of Business: 3 semester hours***

Prerequisites: Sophomore Standing. An introduction to the nature and meaning of law, sources of law, legal process and institutions. The legal environment of business is defined as: the attitude of the government toward business, the historical development of this attitude; current trends of public control in taxation, regulation of commerce and competition; freedom of contract, antitrust legislation and its relationship to marketing, mergers and acquisitions; and labor management relations.

***BUS AD 3090 Internship In Business Administration: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 hours of Business Administration electives and have consent of supervising instructor and Associate Dean. College of Business GPA of at least 2.5 is also required. Students are employed in the field of Business Administration where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. A Business Administration faculty member will monitor the student's program with the student providing a formal written report at the end of the project. BUS AD 3090 may not be counted toward the minimum credit hours for any emphasis area.

***BUS AD 3099 Independent Study In Business Administration: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Associate Dean. Special individual study in business under the supervision of a full-time faculty member.

***BUS AD 3990 Internship In Business Law: 1-3 semester hours***

Prerequisites: BUS AD 2900, 3 credit hours of Business Law electives, and a Business College 2.5 GPA. Must have completed and/or be currently enrolled in at least 3 credit hour of Business Law electives and have consent of supervising instructor and Area Coordinator. Students are employed in the field of Business Law where the knowledge and skills learned in the classroom are applied. Professional development and obtaining specialized work experience are primary goals. A Business Law faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

***BUS AD 3999 Independent Study In Legal Studies: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in legal studies under the supervision of a full-time legal studies faculty member.

***BUS AD 4198 Business Administration Senior Seminar: 1-10 semester hours***

Prerequisites: To be determined each time the course is offered and to include minimum 2.0 campus GPA. An intensive study of a specific area of business administration, of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number. May be repeated for credit as long as the topic differs.

***BUS AD 5000 Economics For Managers: 3 semester hours***

Prerequisites: none The first portion of this course introduces microeconomic analysis of consumers, firms, and government. The concepts and tools of economic analysis are applied to the production and distribution functions of organizations. The last portion is devoted to the macroeconomic influence of capital markets, the influence of interest rates, inflation, and the business cycle.

***BUS AD 5001 Managerial Economic Analysis: 3 semester hours***

Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. Microeconomic analysis of consumers, firms, and government. The concepts and mathematical tools of economic analysis are applied to the production and distribution functions of organizations.

***BUS AD 5002 Analysis Of National Economic Environment: 3 semester hours***

Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. The character and functioning of the national economic system; analyzing and forecasting fluctuations in national income and product, employment, and prices; the influence of monetary and fiscal policies. Emphasis is on the acquisition of knowledge concerning forces affecting all business firms.

***BUS AD 5100 Managerial Communication: 3 semester hours***

An analysis of business writing and speaking, and the communication conventions common in organizations. Emphasis is placed on developing skills critical to career advancement and necessary for effective organizational functioning. A second goal is to prepare students for assignments in other business courses. This course must be taken within the first 12 credit hours of study, preferably in the student's first semester.

***BUS AD 5198 Seminar In Business Administration: 3 semester hours***

An intensive study of a specific area of business administration of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number.

***BUS AD 5299 Individual Research: 1-3 semester hours***

Prerequisite: Consent of instructor and graduate director. Special individual research topics under the guidance of a specific professor.

**BUS AD 5450 Governmental Budgeting And Financial Control: 3 semester hours**

Prerequisite: ACCTNG 5400. A study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

**BUS AD 5900 Law, Ethics And Business: 3 semester hours**

Analysis of the relationship between law and business with emphasis on the ability of, and extent to which, governments regulate business activities. Topics covered include the employer-employee relationship, protection of consumers, antitrust regulation, and securities law. Also discussed are ethical issues confronting management of the modern business enterprises.

**BUS AD 6990 Strategy Formulation And Implementation: 3 semester hours**

Prerequisites: FINANCE 6500, MGMT 5600, MKTG 5700, LOG OM 5320 and special consent. Graduate program capstone course examining concepts and methods that integrate functional areas of business. ## Chemistry

### Courses

**CHEM 1011 Chemistry in the Environment: 3 semester hours**

This course examines the role of chemistry in the environment and the application of chemistry to our understanding of society. The focus of the course will be the relationship between chemistry and the world around us including topics such as the chemistry of air, global climate change, water and energy. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture per week and, on alternate weeks, one hour of discussion or two hours of laboratory.

**CHEM 1052 Chemistry For The Health Professions: 4 semester hours**

An introduction to general, nuclear, structural organic, organic reactions and biochemistry. This course is designed primarily for students in nursing and related health professions, and should not be taken by students majoring in the physical or biological sciences. Chemistry majors may include neither CHEM 1052 or CHEM 1062 in the 120 hours required for graduation. Four hours of lecture per week.

**CHEM 1062 Organic & Biochem For The Health Professions: 2 semester hours**

Prerequisites: Any college Chemistry course. An introduction to organic reactions and biochemistry. CHEM 1062 is offered during the second half of the semester. Four hours of lecture per week.

**CHEM 1081 Introductory Chemistry I-A: 3 semester hours**

Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Math Placement Test). This course is designed for students who want to have an in depth understanding of introductory concepts in Chemistry. CHEM 1081 covers the topics taught in the first half of CHEM 1111 but at a slower pace, thus allowing students time to fully integrate the concepts and thereby build a stronger foundation for their subsequent Chemistry courses. CHEM 1081 consists of the first half of CHEM 1111 (excluding laboratory experiments), whereas CHEM 1091 covers all the laboratory experiments and second half of lecture part of CHEM 1111. Three hours of lecture or workshop per week.

**CHEM 1091 Introductory Chemistry IB: 3 semester hours**

Prerequisites: CHEM 1081 and MATH 1035 (MATH 1035 may be taken concurrently). CHEM 1091 is the completion of CHEM 1111 for students who have completed CHEM 1081. The laboratory portion of this course will start at the beginning of the semester. The lecture part of the course starts in mid-semester and students join an ongoing CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

**CHEM 1111 Introductory Chemistry I: 5 semester hours**

Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

**CHEM 1121 Introductory Chemistry II: 5 semester hours**

Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

**CHEM 1134 Special Topics In Introductory Chemistry: 1-5 semester hours**

Prerequisite: Consent of instructor. A lecture and/or laboratory course to assist transfer students to complete the equivalent of CHEM 1111 and CHEM 1121. Students enrolling in this course should contact the instructor prior to the first day of class for guidelines on course requirements, to choose a lab or workshop section, and to request enrollment in the course website.

**CHEM 2223 Quantitative Analysis: 3 semester hours**

Prerequisites: CHEM 1121. Principles and practice of elementary quantitative chemistry. The lecture treats descriptive statistics with emphasis on small samples; various types of competing equilibria pertaining to acid-base, complexometric, and potentiometric titrations; and an introduction to spectrophotometric processes. The laboratory provides exercises in titrimetric gravimetric, and spectrophotometric techniques. Both portions of the course deal with the analytical chemistry of environmentally-significant problems. Two hours of lecture and four and one-half hours of laboratory weekly.

**CHEM 2612 Organic Chemistry I: 3 semester hours**

Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

**CHEM 2622 Organic Chemistry II: 3 semester hours**

Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

**CHEM 2633 Organic Chemistry Laboratory: 2 semester hours**

Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 3022 Introduction To Chemical Literature: 1 semester hour**

Prerequisites: CHEM 2622 (2622 may be taken concurrently) and CHEM 3412. This course will familiarize the student with the literature of chemistry and its use. One hour of lecture per week.

**CHEM 3302 Physical Chemistry For The Life Sciences: 3 semester hours**

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles and applications of physical chemistry appropriate to students pursuing degree programs in the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course is intended for undergraduates seeking the B.S. degree in Biochemistry and Biotechnology and does not fulfill the physical chemistry required for other Chemistry B.A. and B.S. degree programs.

**CHEM 3312 Physical Chemistry I: 3 semester hours**

Prerequisites: CHEM 1121 and MATH 2000 (MATH 2000 may be taken concurrently), and PHYSICS 2111. Principles of physical chemistry, including thermodynamics, theory of gases, phase equilibria, kinetics, crystal structure, spectroscopy, and quantum mechanics. Three hours per week.

**CHEM 3322 Physical Chemistry II: 3 semester hours**

Prerequisite: CHEM 3312 and MATH 2000. Continuation of CHEM 3312. Three hours lecture per week.

**CHEM 3333 Physical Chemistry Laboratory I: 2 semester hours**

Prerequisites: CHEM 2223 and CHEM 3312. Experiments designed to illustrate principles introduced in CHEM 3312. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 3412 Basic Inorganic Chemistry: 2 semester hours**

Prerequisite: CHEM 1121. This course reviews the principles of atomic structure and studies covalent and ionic bonding. Topics include properties of the elements and synthesis, reactions and bonding aspects of important main group and transition metal compounds. Two hours lecture per week.

**CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 3022. Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

**CHEM 3905 Chemical Research: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

**CHEM 4212 Instrumental Analysis: 2 semester hours**

Prerequisites: CHEM 3322. Principles and applications of modern methods of instrumental analysis for analytical chemistry measurements. Topics will be selected from the areas of electrochemistry, absorption and emission spectroscopy, chromatography, mass spectrometry, surface analysis, and nuclear magnetic resonance. Two hours of lecture per week.

**CHEM 4233 Laboratory In Instrumental Analysis: 2 semester hours**

Prerequisites: CHEM 4212, CHEM 3333. Experiments designed to illustrate the principles and practices of instrumental analysis, involving the use of modern instrumentation in analytical chemistry applications. One hour of discussion and four and one-half hours of laboratory per week.

**CHEM 4302 Survey Of Physical Chemistry With Applications To The Life Scienc: 3 semester hours**

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302.

**CHEM 4343 Physical Chemistry Laboratory II: 2 semester hours**

Prerequisites: CHEM 3322 (may be taken concurrently) and CHEM 3333. Experiments designed to illustrate principles introduced in CHEM 3322. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

**CHEM 4412 Advanced Inorganic Chemistry: 3 semester hours**

Prerequisites: CHEM 3322 (may be taken concurrently), CHEM 3412, and CHEM 2622. An introduction to the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Three hours of lecture per week.

**CHEM 4433 Inorganic Chemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 3333, CHEM 3643, and CHEM 4412 (CHEM 3643 may be taken concurrently). The more sophisticated techniques of physical and analytical chemistry will be used to study inorganic compounds and their reactions. One hours of lecture and four and one half hours of laboratory per week. Not for graduate credit.

**CHEM 4712 Biochemistry: 3 semester hours**

Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

**CHEM 4722 Advanced Biochemistry: 3 semester hours**

Prerequisite: CHEM 4712. Selected advanced topics in the chemistry of life processes. Three hours lecture per week.

**CHEM 4733 Biochemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 4772 Physical Biochemistry: 3 semester hours**

Prerequisites: CHEM 3312 or CHEM 4712/ BIOL 4712. Designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, electron transfer, and biological spectroscopy. Three hours of lecture per week.

**CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour**

Same as BIOL 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

**CHEM 4814 Special Topics In Chemistry: 1-10 semester hours**

A reading and seminar course in selected advanced topics.

**CHEM 4897 Seminar: 1 semester hour**

Prerequisites: CHEM 3022 and senior standing. Presentation of papers by students, faculty, and invited speakers. Chemistry majors must enroll during the semester in which they intend to graduate. Completion of a comprehensive examination during one of the semesters is a course requirement. One hour of lecture and one hour of discussion per week.

**CHEM 5394 Special Topics In Physical Chemistry: 1-10 semester hours**

Prerequisite: Consent of instructor. Selected topics in physical chemistry; may be taken more than once for credit.

**CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours**

Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

**CHEM 5422 Coordination Chemistry: 3 semester hours**

Prerequisite: CHEM 4412 or an equivalent course. Chemistry of the coordination compounds of the transition metals including such topics as kinetics and mechanisms of reaction, stereochemistry, ligand field theory, stability and electronic spectra. Three hours of lecture per week.

**CHEM 5462 Organometallic Chemistry Of The Transition Elements: 3 semester hours**

Prerequisites: CHEM 4412 or an equivalent course. A study of transition metal compounds containing metal-carbon bonds and related metal-element bonds, including their synthesis, structure and bonding, and reactions. Applications in organic synthesis and catalysis will also be presented. Three hours of lecture per week.

**CHEM 5494 Special Topics In Inorganic Chemistry: 1-3 semester hours**

Prerequisite: Consent of instructor. Selected topics in inorganic chemistry; may be taken more than once for credit.

**CHEM 5602 Advanced Organic Chemistry I - Physical Organic: 3 semester hours**

Prerequisites: CHEM 2622 and CHEM 3322. Mechanism and theory of organic chemistry. Topics to include kinetics, transition state theory, reaction intermediates, and stereochemical analysis. Three hours of lecture per week.

**CHEM 5612 Advanced Organic Chemistry II - Reactions And Synthesis: 3 semester hours**

Prerequisite: CHEM 2622. This course will examine a variety of organic transformations typically utilized in organic synthesis. Topics will include carbon-carbon bond formation, pericyclic reactions, oxidation, reduction, and functional group interconversions. Mechanism and stereochemistry will be emphasized. Three hours of lecture per week.

**CHEM 5652 Spectroscopic Identification Of Organic Compounds: 3 semester hours**

Prerequisites: Graduate standing or CHEM 3643. An applied approach to the use of spectroscopic techniques in organic chemistry. Topics to include integrated applications of infrared and Raman spectroscopy,  $^{13}\text{C}$  and  $^1\text{H}$  nuclear magnetic resonance spectroscopy and mass spectroscopy for the purpose of elucidating the structure and dynamics of organic compounds. Three hours of lecture per week.

**CHEM 5694 Special Topics In Organic Chemistry: 3 semester hours**

Prerequisite: Consent of Instructor. Advanced topics of special current interest. May be taken more than once for credit. Topics that may be offered include: Methods in Organic Synthesis, Organometallics in Organic Synthesis, Topics in Bioorganic Chemistry, Organic thermochemistry, Natural Products Chemistry, Stereochemistry, Photochemistry, Heterocyclic Chemistry, Medicinal Chemistry.

**CHEM 5774 Bioinformatics: 3 semester hours**

Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, and molecular modeling and simulation.

**CHEM 5794 Special Topics In Biochemistry: 3 semester hours**

Prerequisites: Consent of instructor. Selected topics in biochemistry. May be taken more than once for credit.

**CHEM 5798 Practicum in Science in Business: 1-2 semester hours**

Same As BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

**CHEM 5799 Internship in Science in Business: 1-2 semester hours**

Same As BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

**CHEM 6196 Advanced Reading In Chemistry: 1 semester hour**

Prerequisite: Admission to the Ph.D. program. Reading and examinations in the sub-disciplines of chemistry. Enrollment must begin after completion of any course deficiencies.

**CHEM 6487 Problem Seminar In Inorganic Chemistry: 1 semester hour**

Prerequisite: Consent of the inorganic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

**CHEM 6687 Problem Seminar In Organic Chemistry: 1-3 semester hours**

Prerequisite: Consent of the organic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. Students may take more than once for credit. Up to three credits may be applied to the M.S. degree programs.

**CHEM 6787 Problem Seminar In Biochemistry: 1 semester hour**

Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

**CHEM 6812 Introduction To Graduate Study In Chemistry: 1 semester hour**

Prerequisite: Consent of Graduate Advisor. Topics to be covered include: techniques of teaching of chemistry in colleges and universities, methods of instruction and evaluation; role and responsibilities of the Graduate Teaching Assistant in laboratory instruction; safety in the undergraduate laboratory, safety practices, emergency procedures; selection of a research project and thesis advisor.

**CHEM 6822 Introduction To Graduate Research In Chemistry: 1 semester hour**

Prerequisite: Consent of instructor. Topics to include: safety in the research laboratory, safety practices, emergency procedures, hazardous materials, waste disposal, radiation safety; research ethics, chemistry information retrieval, computer assisted information retrieval, types of databases, searching bibliographic data bases.

**CHEM 6832 Strategies for Independent Research Proposal Development: 1 semester hour**

Prerequisites: CHEM 6822 and Consent of Graduate Advisor. Topics include: strategies for identification of research topics in chemistry and biochemistry, techniques for database literature search, critical analysis of existing research knowledge, introduction to standard grant proposal formats, technical aspects in preparation of a research plan and accompanying sections, use of bibliographical software, and overview and practice of the peer review process.

**CHEM 6897 Chemistry Colloquium: 1 semester hour**

Presentation of papers by students, faculty and invited speakers. One hour per week.

**CHEM 6905 Graduate Research In Chemistry: 1-10 semester hours**

.

## Courses

**CHEM 1011 Chemistry in the Environment: 3 semester hours**

This course examines the role of chemistry in the environment and the application of chemistry to our understanding of society. The focus of the course will be the relationship between chemistry and the world around us including topics such as the chemistry of air, global climate change, water and energy. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture per week and, on alternate weeks, one hour of discussion or two hours of laboratory.

**CHEM 1052 Chemistry For The Health Professions: 4 semester hours**

An introduction to general, nuclear, structural organic, organic reactions and biochemistry. This course is designed primarily for students in nursing and related health professions, and should not be taken by students majoring in the physical or biological sciences. Chemistry majors may include neither CHEM 1052 or CHEM 1062 in the 120 hours required for graduation. Four hours of lecture per week.

**CHEM 1062 Organic & Biochem For The Health Professions: 2 semester hours**

Prerequisites: Any college Chemistry course. An introduction to organic reactions and biochemistry. CHEM 1062 is offered during the second half of the semester. Four hours of lecture per week.

**CHEM 1081 Introductory Chemistry I-A: 3 semester hours**

Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Math Placement Test). This course is designed for students who want to have an in depth understanding of introductory concepts in Chemistry. CHEM 1081 covers the topics taught in the first half of CHEM 1111 but at a slower pace, thus allowing students time to fully integrate the concepts and thereby build a stronger foundation for their subsequent Chemistry courses. CHEM 1081 consists of the first half of CHEM 1111 (excluding laboratory experiments), whereas CHEM 1091 covers all the laboratory experiments and second half of lecture part of CHEM 1111. Three hours of lecture or workshop per week.

**CHEM 1091 Introductory Chemistry IB: 3 semester hours**

Prerequisites: CHEM 1081 and MATH 1035 (MATH 1035 may be taken concurrently). CHEM 1091 is the completion of CHEM 1111 for students who have completed CHEM 1081. The laboratory portion of this course will start at the beginning of the semester. The lecture part of the course starts in mid-semester and students join an ongoing CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

**CHEM 1111 Introductory Chemistry I: 5 semester hours**

Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

**CHEM 1121 Introductory Chemistry II: 5 semester hours**

Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

**CHEM 1134 Special Topics In Introductory Chemistry: 1-5 semester hours**

Prerequisite: Consent of instructor. A lecture and/or laboratory course to assist transfer students to complete the equivalent of CHEM 1111 and CHEM 1121. Students enrolling in this course should contact the instructor prior to the first day of class for guidelines on course requirements, to choose a lab or workshop section, and to request enrollment in the course website.

**CHEM 2223 Quantitative Analysis: 3 semester hours**

Prerequisites: CHEM 1121. Principles and practice of elementary quantitative chemistry. The lecture treats descriptive statistics with emphasis on small samples; various types of competing equilibria pertaining to acid-base, complexometric, and potentiometric titrations; and an introduction to spectrophotometric processes. The laboratory provides exercises in titrimetric gravimetric, and spectrophotometric techniques. Both portions of the course deal with the analytical chemistry of environmentally-significant problems. Two hours of lecture and four and one-half hours of laboratory weekly.

**CHEM 2612 Organic Chemistry I: 3 semester hours**

Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

**CHEM 2622 Organic Chemistry II: 3 semester hours**

Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

**CHEM 2633 Organic Chemistry Laboratory: 2 semester hours**

Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 3022 Introduction To Chemical Literature: 1 semester hour**

Prerequisites: CHEM 2622 (2622 may be taken concurrently) and CHEM 3412. This course will familiarize the student with the literature of chemistry and its use. One hour of lecture per week.

**CHEM 3302 Physical Chemistry For The Life Sciences: 3 semester hours**

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles and applications of physical chemistry appropriate to students pursuing degree programs in the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course is intended for undergraduates seeking the B.S. degree in Biochemistry and Biotechnology and does not fulfill the physical chemistry required for other Chemistry B.A. and B.S. degree programs.

**CHEM 3312 Physical Chemistry I: 3 semester hours**

Prerequisites: CHEM 1121 and MATH 2000 (MATH 2000 may be taken concurrently), and PHYSICS 2111. Principles of physical chemistry, including thermodynamics, theory of gases, phase equilibria, kinetics, crystal structure, spectroscopy, and quantum mechanics. Three hours per week.

**CHEM 3322 Physical Chemistry II: 3 semester hours**

Prerequisite: CHEM 3312 and MATH 2000. Continuation of CHEM 3312. Three hours lecture per week.

**CHEM 3333 Physical Chemistry Laboratory I: 2 semester hours**

Prerequisites: CHEM 2223 and CHEM 3312. Experiments designed to illustrate principles introduced in CHEM 3312. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 3412 Basic Inorganic Chemistry: 2 semester hours**

Prerequisite: CHEM 1121. This course reviews the principles of atomic structure and studies covalent and ionic bonding. Topics include properties of the elements and synthesis, reactions and bonding aspects of important main group and transition metal compounds. Two hours lecture per week.

**CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 3022. Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

**CHEM 3905 Chemical Research: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

**CHEM 4212 Instrumental Analysis: 2 semester hours**

Prerequisites: CHEM 3322. Principles and applications of modern methods of instrumental analysis for analytical chemistry measurements. Topics will be selected from the areas of electrochemistry, absorption and emission spectroscopy, chromatography, mass spectrometry, surface analysis, and nuclear magnetic resonance. Two hours of lecture per week.

**CHEM 4233 Laboratory In Instrumental Analysis: 2 semester hours**

Prerequisites: CHEM 4212, CHEM 3333. Experiments designed to illustrate the principles and practices of instrumental analysis, involving the use of modern instrumentation in analytical chemistry applications. One hour of discussion and four and one-half hours of laboratory per week.

**CHEM 4302 Survey Of Physical Chemistry With Applications To The Life Scienc: 3 semester hours**

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302.

**CHEM 4343 Physical Chemistry Laboratory II: 2 semester hours**

Prerequisites: CHEM 3322 (may be taken concurrently) and CHEM 3333. Experiments designed to illustrate principles introduced in CHEM 3322. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

**CHEM 4412 Advanced Inorganic Chemistry: 3 semester hours**

Prerequisites: CHEM 3322 (may be taken concurrently), CHEM 3412, and CHEM 2622. An introduction to the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Three hours of lecture per week.

**CHEM 4433 Inorganic Chemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 3333, CHEM 3643, and CHEM 4412 (CHEM 3643 may be taken concurrently). The more sophisticated techniques of physical and analytical chemistry will be used to study inorganic compounds and their reactions. One hours of lecture and four and one half hours of laboratory per week. Not for graduate credit.

**CHEM 4712 Biochemistry: 3 semester hours**

Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

**CHEM 4722 Advanced Biochemistry: 3 semester hours**

Prerequisite: CHEM 4712. Selected advanced topics in the chemistry of life processes. Three hours lecture per week.

**CHEM 4733 Biochemistry Laboratory: 2 semester hours**

Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

**CHEM 4772 Physical Biochemistry: 3 semester hours**

Prerequisites: CHEM 3312 or CHEM 4712/ BIOL 4712. Designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, electron transfer, and biological spectroscopy. Three hours of lecture per week.

**CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour**

Same as BIOL 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

**CHEM 4814 Special Topics In Chemistry: 1-10 semester hours**

A reading and seminar course in selected advanced topics.

**CHEM 4897 Seminar: 1 semester hour**

Prerequisites: CHEM 3022 and senior standing. Presentation of papers by students, faculty, and invited speakers. Chemistry majors must enroll during the semester in which they intend to graduate. Completion of a comprehensive examination during one of the semesters is a course requirement. One hour of lecture and one hour of discussion per week.

**CHEM 5394 Special Topics In Physical Chemistry: 1-10 semester hours**

Prerequisite: Consent of instructor. Selected topics in physical chemistry; may be taken more than once for credit.

**CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours**

Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

**CHEM 5422 Coordination Chemistry: 3 semester hours**

Prerequisite: CHEM 4412 or an equivalent course. Chemistry of the coordination compounds of the transition metals including such topics as kinetics and mechanisms of reaction, stereochemistry, ligand field theory, stability and electronic spectra. Three hours of lecture per week.

**CHEM 5462 Organometallic Chemistry Of The Transition Elements: 3 semester hours**

Prerequisites: CHEM 4412 or an equivalent course. A study of transition metal compounds containing metal-carbon bonds and related metal-element bonds, including their synthesis, structure and bonding, and reactions. Applications in organic synthesis and catalysis will also be presented. Three hours of lecture per week.

**CHEM 5494 Special Topics In Inorganic Chemistry: 1-3 semester hours**

Prerequisite: Consent of instructor. Selected topics in organic chemistry; may be taken more than once for credit.

**CHEM 5602 Advanced Organic Chemistry I - Physical Organic: 3 semester hours**

Prerequisites: CHEM 2622 and CHEM 3322. Mechanism and theory of organic chemistry. Topics to include kinetics, transition state theory, reaction intermediates, and stereochemical analysis. Three hours of lecture per week.

**CHEM 5612 Advanced Organic Chemistry II - Reactions And Synthesis: 3 semester hours**

Prerequisite: CHEM 2622. This course will examine a variety of organic transformations typically utilized in organic synthesis. Topics will include carbon-carbon bond formation, pericyclic reactions, oxidation, reduction, and functional group interconversions. Mechanism and stereochemistry will be emphasized. Three hours of lecture per week.

**CHEM 5652 Spectroscopic Identification Of Organic Compounds: 3 semester hours**

Prerequisites: Graduate standing or CHEM 3643. An applied approach to the use of spectroscopic techniques in organic chemistry. Topics to include integrated applications of infrared and Raman spectroscopy,  $^{13}\text{C}$  and  $^1\text{H}$  nuclear magnetic resonance spectroscopy and mass spectroscopy for the purpose of elucidating the structure and dynamics of organic compounds. Three hours of lecture per week.

**CHEM 5694 Special Topics In Organic Chemistry: 3 semester hours**

Prerequisite: Consent of Instructor. Advanced topics of special current interest. May be taken more than once for credit. Topics that may be offered include: Methods in Organic Synthesis, Organometallics in Organic Synthesis, Topics in Bioorganic Chemistry, Organic thermochemistry, Natural Products Chemistry, Stereochemistry, Photochemistry, Heterocyclic Chemistry, Medicinal Chemistry.

**CHEM 5774 Bioinformatics: 3 semester hours**

Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, and molecular modeling and simulation.

**CHEM 5794 Special Topics In Biochemistry: 3 semester hours**

Prerequisites: Consent of instructor. Selected topics in biochemistry. May be taken more than once for credit.

**CHEM 5798 Practicum in Science in Business: 1-2 semester hours**

Same As BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

**CHEM 5799 Internship in Science in Business: 1-2 semester hours**

Same As BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

**CHEM 6196 Advanced Reading In Chemistry: 1 semester hour**

Prerequisite: Admission to the Ph.D. program. Reading and examinations in the sub-disciplines of chemistry. Enrollment must begin after completion of any course deficiencies.

**CHEM 6487 Problem Seminar In Inorganic Chemistry: 1 semester hour**

Prerequisite: Consent of the inorganic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

**CHEM 6687 Problem Seminar In Organic Chemistry: 1-3 semester hours**

Prerequisite: Consent of the organic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. Students may take more than once for credit. Up to three credits may be applied to the M.S. degree programs.

**CHEM 6787 Problem Seminar In Biochemistry: 1 semester hour**

Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

**CHEM 6812 Introduction To Graduate Study In Chemistry: 1 semester hour**

Prerequisite: Consent of Graduate Advisor. Topics to be covered include: techniques of teaching of chemistry in colleges and universities, methods of instruction and evaluation; role and responsibilities of the Graduate Teaching Assistant in laboratory instruction; safety in the undergraduate laboratory, safety practices, emergency procedures; selection of a research project and thesis advisor.

**CHEM 6822 Introduction To Graduate Research In Chemistry: 1 semester hour**

Prerequisite: Consent of instructor. Topics to include: safety in the research laboratory, safety practices, emergency procedures, hazardous materials, waste disposal, radiation safety; research ethics, chemistry information retrieval, computer assisted information retrieval, types of databases, searching bibliographic data bases.

**CHEM 6832 Strategies for Independent Research Proposal Development: 1 semester hour**

Prerequisites: CHEM 6822 and Consent of Graduate Advisor. Topics include: strategies for identification of research topics in chemistry and biochemistry, techniques for database literature search, critical analysis of existing research knowledge, introduction to standard grant proposal formats, technical aspects in preparation of a research plan and accompanying sections, use of bibliographical software, and overview and practice of the peer review process.

**CHEM 6897 Chemistry Colloquium: 1 semester hour**

Presentation of papers by students, faculty and invited speakers. One hour per week.

**CHEM 6905 Graduate Research In Chemistry: 1-10 semester hours**

.

## Child Advocacy Studies

### Courses

**CAST 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours**

SAME AS PSYCH 3290. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, or approval from the instructor. Exploration of the impact of stressors experienced during infancy, childhood and adolescence. Integrates how theoretical frameworks, cultural considerations and policy implications apply to child development research and practice.

**CAST 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

SAME AS PSYCH 4398 and SOC WK 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**CAST 4498 Forensic Investigation of Child Abuse: 3 semester hours**

Prerequisites: CAST 4398/PSYCH 4398/SOC WK 4398. Designed for students across multiple disciplines where knowledge of child abuse investigation and advocacy are necessary. Focuses on the investigative and prosecutorial responses of professionals involved with child abuse cases to expand the student's knowledge and skills in the most effective response to child abuse investigations. Includes competency-based skills training such as conducting a cursory interview, participating in peer review, doing case presentations, and producing investigative documentation.

**CAST 4598 Child Abuse Assessment and Intervention: 3 semester hours**

Prerequisites: CAST 4398/PSYCH 4398/SOC WK 4398. Provides students with knowledge and skills to intervene effectively and empathically with families that experience child abuse and neglect. Uses experiential learning to develop skills in trauma-focused screening, assessment, and crisis intervention for vulnerable children and their families who are involved with child serving systems such as law enforcement, child protective services, prosecution, and physical and mental health.

**CAST 4698 Internship in Child Advocacy Studies: 3 semester hours**

SAME AS PSYCH 4698. Prerequisites: PSYCH 4398, completion of or concurrent enrollment in PSYCH 4498 and PSYCH 4598, and approval from the CAST director. Internship under CAST staff supervision in child or youth-serving setting. Monthly seminar participation required. Approval from the CAST director is required prior to enrolling.

## Chinese

### Courses

**CHINESE 1001 Chinese I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese and upon the acquisition of the fundamentals of grammar and syntax.

**CHINESE 1002 Chinese II: 5 semester hours**

Prerequisites: Chinese I or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese. Continuation of the acquisition of the fundamentals of grammar and syntax.

**CHINESE 1003 Chinese III: 3 semester hours**

Prerequisites: CHINESE 1002 or equivalent. Review and practice of vocabulary, fundamentals of grammar, syntax, reading and writing acquired in CHINESE 1002. This course is not a CHINESE 2101 equivalent and may not be counted towards a foreign language requirement.

**CHINESE 1199 Special Topics: Language Immersion: Chinese: 1 semester hour**

Prerequisites: CHINESE 1001 or concurrent enrollment in CHINESE 1001. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

**CHINESE 2101 Intermediate Chinese I: 5 semester hours**

Prerequisites: CHINESE 1002 or equivalent. Grammar review and continued development of language skills.

**CHINESE 2102 Intermediate Chinese II: 5 semester hours**

Prerequisites: CHINESE 2101 or equivalent. Continuation of CHINESE 2101.

**CHINESE 2150 Chinese Literature In Translation: 3 semester hours**

A historical and critical introduction to great works in classical Chinese literature and culture. All required readings will be in English translation. This course may be repeated for credit with different literary works with departmental approval. This course satisfies the University cultural diversity requirement.

**CHINESE 2190 Special Readings: 1-6 semester hours**

Prerequisites: CHINESE 2102 or consent of the department. Independent study through readings, reports, and conferences.

**CHINESE 2191 Special Topics in Chinese Culture: 3 semester hours**

A topically organized introduction to Chinese culture and society. May be repeated for credit (up to 9 credits) when the topic varies.

**CHINESE 2199 Special Topics: Language Immersion: Chinese: 1 semester hour**

Prerequisites: CHINESE 2101 or concurrent enrollment in CHINESE 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

## Courses

**CHINESE 1001 Chinese I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese and upon the acquisition of the fundamentals of grammar and syntax.

**CHINESE 1002 Chinese II: 5 semester hours**

Prerequisites: Chinese I or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese. Continuation of the acquisition of the fundamentals of grammar and syntax.

**CHINESE 1003 Chinese III: 3 semester hours**

# Communication

## Courses

**COMM 1000 Effective Communication for College: 3 semester hours**

A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

**COMM 1030 Interpersonal Communication I: 3 semester hours**

Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.

**COMM 1040 Introduction To Public Speaking: 3 semester hours**

Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

**COMM 1041 Presentational Speaking: 3 semester hours**

Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

**COMM 1050 Introduction To Mass Communication: 3 semester hours**

Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

**COMM 1135 Communication Theory: 3 semester hours**

Survey of elements and processes critical to human communication behavior. Comparison of influential communication theories.

**COMM 1150 Introduction To Public Relations: 3 semester hours**

Publicity methods and public relations representation of profit and nonprofit institutions to the public; use of communication research and media, as applied to the public relations profession.

**COMM 1920 Applied Communication: 3 semester hours**

Prerequisites: Consent of instructor. An intermediate experience in applied communication on UMSL's campus, such as the school newspaper or radio station. Work must be done on campus, under supervision of a working professional, and in consultation with a faculty member. Repeatable, but no more than six hours of credit may be applied toward the 36-hour minimum required for the degree.

**COMM 2230 Small Group Communication: 3 semester hours**

Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

**COMM 2231 Communication In The Organization: 3 semester hours**

Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

**COMM 2232 Effective Communication In The Organization: Tools For Leadership: 3 semester hours**

This telecourse is designed to equip students with communication skills applicable to the organizational context. The course will present effective strategies for the articulation of ideas, with particular emphasis on the development of leadership skills.

**COMM 2240 Persuasive Communication: 3 semester hours**

A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.

**COMM 3130 Advanced Interpersonal Communication: 3 semester hours**

Prerequisite: COMM 1030. Continuation of COMM 1030, focusing on contemporary theories and research regarding interpersonal relationships.

**COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

**COMM 3330 Research Methods In Communication I: 3 semester hours**

Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

**COMM 3332 Intercultural Communication: 3 semester hours**

Prerequisite: Junior standing or consent of the instructor. Study of culture as a variable in both interpersonal and collective communicative situations. Emphasis upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

**COMM 3337 Male/Female Communication: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

**COMM 3352 Mass Media in Society: 3 semester hours**

Prerequisites: COMM 1050. Examination and evaluation of theories and literature concerning media content and its effect on society. Topics include the evidence relating to the effect of entertainment and information media on audiences' behavior and attitudes, the factors that contribute to individual differences in responses to media content, and the ways the organizational structure of the media industries shape the type of content that is produced.

**COMM 3355 Dangerous Messages: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

**COMM 3358 Communication In Public Relations: 3 semester hours**

Prerequisites: COMM 1150. An overview of communication within the area of public relations. Emphasis on ethics, law, professional standards and written communication. Case study approach.

**COMM 3360 Media & Health Communication: 3 semester hours**

Prerequisites: COMM 1050 or consent of the instructor. Topics include health promotion and prevention campaigns and the effect of news and entertainment media on health behaviors. Examination of the theories and literature dealing with the role of mass media in health behavior.

**COMM 3361 Interpersonal Health Communication: 3 semester hours**

Prerequisites: COMM 1030 and COMM 2231, or consent of the instructor. Examination of the theories and literature dealing with the role of interpersonal and organizational communication in health behavior and health care. Special focus on patient-provider communication, social support, and cultural conceptions of illness.

**COMM 3370 Social Media in Public Relations: 3 semester hours**

Prerequisites: COMM 3358. Overview of digital and social media in contemporary public relations. Online initiatives and related strategies will also be discussed.

**COMM 3395 Special Topics In Communication: 3 semester hours**

In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

**COMM 3400 Language And Behavior: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. Examination of language and behavior which includes etiological considerations, functions, meanings, perceptions, and process-interaction rules.

**COMM 3410 Nonverbal Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the paralinguistic cues that accompany normal communication such as facial expression, eye behavior, gestures and body movements, accents and dialects, and the impact of touch, among others. The implications for message construction, delivery, and perception are discussed.

**COMM 3500 Dysfunctional Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of some of the factors that impede effective communication. Emphasis is placed both on individual attributes such as verbal aggression and communication apprehension, as well as context-based factors found in family and romantic relationships, among others.

**COMM 3510 Communication & Conflict: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the features that contribute to effective and ineffective communication during conflicts. The course integrates communication research and theory with practical applications in negotiation and conflict resolution.

**COMM 3520 Communication Barriers I: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. A review of communication research on physical and developmental barriers that impair or impede effective communication with children. A limited number of site visits and/or off-campus experiences are required.

**COMM 3521 Communication Barriers II: 3 semester hours**

Prerequisites: COMM 3520. An extension of COMM 3520, this course focuses on effective and empathic communication with children and adults encumbered by communication barriers. A strong emphasis on high impact educational experiences is a major component of this course. Site visits and/or off-campus experiences are required.

**COMM 3600 Communication and Families: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor.

An analysis of research and theory involving communicative attributes and phenomena unique to the family context. Communication between parent-child, siblings, and extended family members, as well as more complex family structures are addressed. Functional and effective communication techniques are also discussed.

**COMM 3610 Communication and Relationships: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor.

An examination of the contributions of communication researchers to the study of developing and maintaining human relationships with particular focus on communication in friendships and romantic relationships.

**COMM 3700 Computer-Mediated Communication: 3 semester hours**

Prerequisites: COMM 1030, COMM 1050, junior standing or consent of the instructor. A comparison of the similarities and differences between face-to-face communication and computer-mediated communication.

Synchronous and asynchronous methods of interaction are examined, as well as other characteristics unique to the digital environment.

**COMM 3800 Trends in Mass Communication: 3 semester hours**

Prerequisites: COMM 1050, junior standing or consent of the instructor.

A theoretical and research-based examination of popular trends in mass communication. May be repeated once if topics are different.

**COMM 4035 Integrated Approaches-Public Relations, Advertising, & Promotion: 3 semester hours**

Prerequisites: COMM 3358 or consent of instructor. Overview of how publicity, advertising and other promotional activities can be integrated into a single cohesive communication initiative or program.

**COMM 4100 Communication Campaigns: 3 semester hours**

Prerequisite: COMM 1030, COMM 1050, COMM 1150 and junior standing or consent of the instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal, mass communication, and public relations.

**COMM 4199 Applied Public Relations: 3 semester hours**

Prerequisites: COMM 1150, COMM 3358, COMM 4035, and junior standing or consent of the instructor. This course provides students with an applied experience in public relations. The course may require on-site visits to private firms and/or the development of multi-year strategic plans.

**COMM 4900 Directed Readings: 3 semester hours**

Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

**COMM 4910 Supervised Research: 1-3 semester hours**

Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

**COMM 4920 Practicum In Applied Communication: 1-3 semester hours**

Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.

**COMM 4950 Internship In Applied Communication: 3-6 semester hours**

Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but not more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

**COMM 5000 ACP - Elements of Public Speaking: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on the delivery of theory and research based public speaking content for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5010 ACP: Elements of Debate: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a comprehensive understanding of the theory and research typically taught in college level forensics and debate courses. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5020 ACP - Persuasion and Influence: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a strong background in the research and theory that underlies attempts to persuade and influence others through the use of effective communication. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Programs.

**COMM 5050 ACP - Special Topics: 3-6 semester hours**

Prerequisites: COMM 5000, COMM 5010, and COMM 5020, Special Consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach in the Advanced Credit Program. May be repeated for a maximum of 6 credit hours.

**COMM 5099 ACP - Observation and Implementation: 3 semester hours**

Prerequisites: COMM 5000, COMM 5010, COMM 5020 and COMM 5050, Special Consent. Provides a capstone experience for teachers seeking to teach communication courses in the advanced credit program. While enrolled, participants will implement an ACP course in their school under the supervision of the Communication Department's advanced Credit Program Liaison.

**COMM 6500 Seminar In Communication Theory: 3 semester hours**

Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.

**COMM 6510 Advanced Communication Research Methods I: 3 semester hours**

Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

**COMM 6515 Advanced Communicatin Research Methods II: 3 semester hours**

Prerequisite: COMM 6510 or permission of instructor. Overview of the most commonly utilized methods in quantitative data analysis statistical methods in communication with an emphasis on understanding how the statistic is reported in scholarly articles and when to use that method, rather than in the mathematical computation of the method. Topics include: descriptive statistics, single and multi-factor analysis of variance, simple and multiple linear regression, basics of nonlinear regression, analysis of categorical data, meta-analysis, and non-parametric statistical methods. Required of all graduate communication students.

**COMM 6600 Seminar In Organizational Communication: 3 semester hours**

Prerequisite: Graduate standing. Explores communication theories and topics related to organizational institutional, and social system contexts and reviews the communication literature on behavior in organizations. Emphasizes a case study approach to the communication strategies used by agencies and corporations. Required of all graduate communication students.

**COMM 6650 Seminar in Health Communication: 3 semester hours**

Prerequisites: COMM 6500, COMM 6510, and COMM 6515. This course examines the theories, from communication and related disciplines, which researchers use to investigate health communication phenomena, as well as the application of those theories to understanding and solving health-related issues. Health communication theories across contexts are examined including those specific to interpersonal communication, mass communication, and organizational communication. Course topics include health campaigns, health education, health informatics, and health media use.

**COMM 6700 Seminar In Mass Communication: 3 semester hours**

Prerequisites: Graduate Standing. Examines the communication research literature pertaining to media industries, content, and effects. A broad range of media forms and possible effects are considered.

**COMM 6750 Media Reception Processes: 3 semester hours**

Prerequisites: COMM 6510 or permission of instructor. Examines how audiences select, interpret, and respond to media messages. Students, typically in a group, are involved in developing and carrying out a research study investigating the topic.

**COMM 6810 Communication Systems and Technology: 3 semester hours**

Prerequisite: Graduate Standing. Examines innovations in modern communications technologies, their impacts on individuals and society, and their implications for communication research and practice.

**COMM 6815 Persuasion and Influence in Communication: 3 semester hours**

Prerequisite: Graduate Standing. Broad-based examination of the major theories of social influence and persuasion and their practical applications.

**COMM 6830 Seminar In Special Topics In Communication: 3 semester hours**

Prerequisite: Graduate Standing. Selected topics in the study of communication. Review of the communication theory and methods appropriate to the topic. The course includes a research project. May be repeated if the topic is different.

**COMM 6900 Directed Readings In Communication: 1-6 semester hours**

Prerequisite: Graduate Standing and consent of instructor. Independent study of published research and reports relating to a specific topic in communication. May be repeated for credit with permission of advisor.

**COMM 6910 Supervised Research In Communication: 1-3 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Primary research on specific topics in communication. May involve collaborative research with a faculty member on a topic of mutual interest or data collection/analysis for a project developed by the student under the guidance of a faculty member. May be repeated for credit with permission of advisor.

**COMM 6920 Practicum In Computer-Mediated Communication: 1-3 semester hours**

Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

**COMM 6950 Graduate Internship: 3-6 semester hours**

Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

**COMM 6960 Thesis Research And Preparation: 1-10 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Individual research for and preparation of the graduate thesis.

## Courses

**COMM 1000 Effective Communication for College: 3 semester hours**

A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

**COMM 1030 Interpersonal Communication I: 3 semester hours**

Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.

**COMM 1040 Introduction To Public Speaking: 3 semester hours**

Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

**COMM 1041 Presentational Speaking: 3 semester hours**

Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

**COMM 1050 Introduction To Mass Communication: 3 semester hours**

Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

**COMM 1135 Communication Theory: 3 semester hours**

Survey of elements and processes critical to human communication behavior. Comparison of influential communication theories.

**COMM 1150 Introduction To Public Relations: 3 semester hours**

Publicity methods and public relations representation of profit and nonprofit institutions to the public; use of communication research and media, as applied to the public relations profession.

**COMM 1920 Applied Communication: 3 semester hours**

Prerequisites: Consent of instructor. An intermediate experience in applied communication on UMSL's campus, such as the school newspaper or radio station. Work must be done on campus, under supervision of a working professional, and in consultation with a faculty member. Repeatable, but no more than six hours of credit may be applied toward the 36-hour minimum required for the degree.

**COMM 2230 Small Group Communication: 3 semester hours**

Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

**COMM 2231 Communication In The Organization: 3 semester hours**

Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

**COMM 2232 Effective Communication In The Organization: Tools For Leadership: 3 semester hours**

This telecourse is designed to equip students with communication skills applicable to the organizational context. The course will present effective strategies for the articulation of ideas, with particular emphasis on the development of leadership skills.

**COMM 2240 Persuasive Communication: 3 semester hours**

A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.

**COMM 3130 Advanced Interpersonal Communication: 3 semester hours**

Prerequisite: COMM 1030. Continuation of COMM 1030, focusing on contemporary theories and research regarding interpersonal relationships.

**COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

**COMM 3330 Research Methods In Communication I: 3 semester hours**

Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

**COMM 3332 Intercultural Communication: 3 semester hours**

Prerequisite: Junior standing or consent of the instructor. Study of culture as a variable in both interpersonal and collective communicative situations. Emphasis upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

**COMM 3337 Male/Female Communication: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

**COMM 3352 Mass Media in Society: 3 semester hours**

Prerequisites: COMM 1050. Examination and evaluation of theories and literature concerning media content and its effect on society. Topics include the evidence relating to the effect of entertainment and information media on audiences' behavior and attitudes, the factors that contribute to individual differences in responses to media content, and the ways the organizational structure of the media industries shape the type of content that is produced.

**COMM 3355 Dangerous Messages: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

**COMM 3358 Communication In Public Relations: 3 semester hours**

Prerequisites: COMM 1150. An overview of communication within the area of public relations. Emphasis on ethics, law, professional standards and written communication. Case study approach.

**COMM 3360 Media & Health Communication: 3 semester hours**

Prerequisites: COMM 1050 or consent of the instructor. Topics include health promotion and prevention campaigns and the effect of news and entertainment media on health behaviors. Examination of the theories and literature dealing with the role of mass media in health behavior.

**COMM 3361 Interpersonal Health Communication: 3 semester hours**

Prerequisites: COMM 1030 and COMM 2231, or consent of the instructor. Examination of the theories and literature dealing with the role of interpersonal and organizational communication in health behavior and health care. Special focus on patient-provider communication, social support, and cultural conceptions of illness.

**COMM 3370 Social Media in Public Relations: 3 semester hours**

Prerequisites: COMM 3358. Overview of digital and social media in contemporary public relations. Online initiatives and related strategies will also be discussed.

**COMM 3395 Special Topics In Communication: 3 semester hours**

In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

**COMM 3400 Language And Behavior: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. Examination of language and behavior which includes etiological considerations, functions, meanings, perceptions, and process-interaction rules.

**COMM 3410 Nonverbal Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the paralinguistic cues that accompany normal communication such as facial expression, eye behavior, gestures and body movements, accents and dialects, and the impact of touch, among others. The implications for message construction, delivery, and perception are discussed.

**COMM 3500 Dysfunctional Communication: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of some of the factors that impede effective communication. Emphasis is placed both on individual attributes such as verbal aggression and communication apprehension, as well as context-based factors found in family and romantic relationships, among others.

**COMM 3510 Communication & Conflict: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the features that contribute to effective and ineffective communication during conflicts. The course integrates communication research and theory with practical applications in negotiation and conflict resolution.

**COMM 3520 Communication Barriers I: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. A review of communication research on physical and developmental barriers that impair or impede effective communication with children. A limited number of site visits and/or off-campus experiences are required.

**COMM 3521 Communication Barriers II: 3 semester hours**

Prerequisites: COMM 3520. An extension of COMM 3520, this course focuses on effective and empathic communication with children and adults encumbered by communication barriers. A strong emphasis on high impact educational experiences is a major component of this course. Site visits and/or off-campus experiences are required.

**COMM 3600 Communication and Families: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An analysis of research and theory involving communicative attributes and phenomena unique to the family context. Communication between parent-child, siblings, and extended family members, as well as more complex family structures are addressed. Functional and effective communication techniques are also discussed.

**COMM 3610 Communication and Relationships: 3 semester hours**

Prerequisites: COMM 1030, junior standing or consent of the instructor. An examination of the contributions of communication researchers to the study of developing and maintaining human relationships with particular focus on communication in friendships and romantic relationships.

**COMM 3700 Computer-Mediated Communication: 3 semester hours**

Prerequisites: COMM 1030, COMM 1050, junior standing or consent of the instructor. A comparison of the similarities and differences between face-to-face communication and computer-mediated communication. Synchronous and asynchronous methods of interaction are examined, as well as other characteristics unique to the digital environment.

**COMM 3800 Trends in Mass Communication: 3 semester hours**

Prerequisites: COMM 1050, junior standing or consent of the instructor. A theoretical and research-based examination of popular trends in mass communication. May be repeated once if topics are different.

**COMM 4035 Integrated Approaches-Public Relations, Advertising, & Promotion: 3 semester hours**

Prerequisites: COMM 3358 or consent of instructor. Overview of how publicity, advertising and other promotional activities can be integrated into a single cohesive communication initiative or program.

**COMM 4100 Communication Campaigns: 3 semester hours**

Prerequisite: COMM 1030, COMM 1050, COMM 1150 and junior standing or consent of the instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal, mass communication, and public relations.

**COMM 4199 Applied Public Relations: 3 semester hours**

Prerequisites: COMM 1150, COMM 3358, COMM 4035, and junior standing or consent of the instructor. This course provides students with an applied experience in public relations. The course may require on-site visits to private firms and/or the development of multi-year strategic plans.

**COMM 4900 Directed Readings: 3 semester hours**

Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

**COMM 4910 Supervised Research: 1-3 semester hours**

Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

**COMM 4920 Practicum In Applied Communication: 1-3 semester hours**

Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.

**COMM 4950 Internship In Applied Communication: 3-6 semester hours**

Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but not more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

**COMM 5000 ACP - Elements of Public Speaking: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on the delivery of theory and research based public speaking content for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5010 ACP: Elements of Debate: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a comprehensive understanding of the theory and research typically taught in college level forensics and debate courses. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5020 ACP - Persuasion and Influence: 3 semester hours**

Prerequisites: Graduate Standing, Special Consent. This course focuses on developing a strong background in the research and theory that underlies attempts to persuade and influence others through the use of effective communication. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Programs.

**COMM 5050 ACP - Special Topics: 3-6 semester hours**

Prerequisites: COMM 5000, COMM 5010, and COMM 5020, Special Consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach in the Advanced Credit Program. May be repeated for a maximum of 6 credit hours.

**COMM 5099 ACP - Observation and Implementation: 3 semester hours**

Prerequisites: COMM 5000, COMM 5010, COMM 5020 and COMM 5050, Special Consent. Provides a capstone experience for teachers seeking to teach communication courses in the advanced credit program. While enrolled, participants will implement an ACP course in their school under the supervision of the Communication Department's advanced Credit Program Liaison.

**COMM 6500 Seminar In Communication Theory: 3 semester hours**

Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.

**COMM 6510 Advanced Communication Research Methods I: 3 semester hours**

Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

**COMM 6515 Advanced Communicatin Research Methods II: 3 semester hours**

Prerequisite: COMM 6510 or permission of instructor. Overview of the most commonly utilized methods in quantitative data analysis statistical methods in communication with an emphasis on understanding how the statistic is reported in scholarly articles and when to use that method, rather than in the mathematical computation of the method. Topics include: descriptive statistics, single and multi-factor analysis of variance, simple and multiple linear regression, basics of nonlinear regression, analysis of categorical data, meta-analysis, and non-parametric statistical methods. Required of all graduate communication students.

**COMM 6600 Seminar In Organizational Communication: 3 semester hours**

Prerequisite: Graduate standing. Explores communication theories and topics related to organizational institutional, and social system contexts and reviews the communication literature on behavior in organizations. Emphasizes a case study approach to the communication strategies used by agencies and corporations. Required of all graduate communication students.

**COMM 6650 Seminar in Health Communication: 3 semester hours**

Prerequisites: COMM 6500, COMM 6510, and COMM 6515. This course examines the theories, from communication and related disciplines, which researchers use to investigate health communication phenomena, as well as the application of those theories to understanding and solving health-related issues. Health communication theories across contexts are examined including those specific to interpersonal communication, mass communication, and organizational communication. Course topics include health campaigns, health education, health informatics, and health media use.

**COMM 6700 Seminar In Mass Communication: 3 semester hours**

Prerequisites: Graduate Standing. Examines the communication research literature pertaining to media industries, content, and effects. A broad range of media forms and possible effects are considered.

**COMM 6750 Media Reception Processes: 3 semester hours**

Prerequisites: COMM 6510 or permission of instructor. Examines how audiences select, interpret, and respond to media messages. Students, typically in a group, are involved in developing and carrying out a research study investigating the topic.

**COMM 6810 Communication Systems and Technology: 3 semester hours**

Prerequisite: Graduate Standing. Examines innovations in modern communications technologies, their impacts on individuals and society, and their implications for communication research and practice.

**COMM 6815 Persuasion and Influence in Communication: 3 semester hours**

Prerequisite: Graduate Standing. Broad-based examination of the major theories of social influence and persuasion and their practical applications.

**COMM 6830 Seminar In Special Topis In Communication: 3 semester hours**

Prerequisite: Graduate Standing. Selected topics in the study of communication. Review of the communication theory and methods appropriate to the topic. The course includes a research project. May be repeated if the topic is different.

**COMM 6900 Directed Readings In Communication: 1-6 semester hours**

Prerequisite: Graduate Standing and consent of instructor. Independent study of published research and reports relating to a specific topic in communication. May be repeated for credit with permission of advisor.

**COMM 6910 Supervised Research In Communication: 1-3 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Primary research on specific topics in communication. May involve collaborative research with a faculty member on a topic of mutual interest or data collection/analysis for a project developed by the student under the guidance of a faculty member. May be repeated for credit with permission of advisor.

**COMM 6920 Practicum In Computer-Mediated Communication: 1-3 semester hours**

Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

**COMM 6950 Graduate Internship: 3-6 semester hours**

Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

**COMM 6960 Thesis Research And Preparation: 1-10 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Individual research for and preparation of the graduate thesis.

# Computer Science

## Courses

**CMP SCI 1010 Introduction To Computers And The Internet: 3 semester hours**

Prerequisites: None. Covers basic concepts and components of a PC: survey of popular applications including e-mail, word processors, spreadsheets, overview of the Internet, popular browsers, World Wide Web, search engines, multimedia, web pages, security, and privacy. Credit not granted for both CMP SCI 1010 and INFSYS 1800.

**CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours**

Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

**CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours**

Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

**CMP SCI 1250 Introduction To Computing: 3 semester hours**

Prerequisites: MATH 1030 with B-or better, or MATH 1100, or MATH 1800. Provides an introduction to the concepts of computation, problem solving, and computer systems. Covers fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

**CMP SCI 2250 Programming And Data Structures: 3 semester hours**

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

**CMP SCI 2261 Object-Oriented Programming: 3 semester hours**

Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

**CMP SCI 2700 Computer Organization and Architecture: 3 semester hours**

Prerequisite: CMP SCI 2250. Introduces details of computer systems from architectural and organizational points of view. Covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

**CMP SCI 2750 System Programming and Tools: 3 semester hours**

Prerequisites: CMP SCI 2250. Covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.

**CMP SCI 3010 Web Programming: 3 semester hours**

Prerequisite: CMP SCI 2250. Provides a survey of current Web technologies including markup languages (such as HTML/XHTML, CSS, XML), client side languages (such as JavaScript), server side languages (such as PERL, PHP), and Web protocols. This course requires client-server computing projects.

**CMP SCI 3130 Design and Analysis of Algorithms: 3 semester hours**

Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

**CMP SCI 3710 Assembly Language Programming: 3 semester hours**

Prerequisite: CMP SCI 2700. Explores machine architecture concepts and principles through a study of assembly language programming. Topics covered include integer and floating point arithmetic, procedures, conditional processing, strings, macros, and interfaces to high level languages. Programming projects using a commercially available assembly language will be required.

**CMP SCI 4010 Advanced Web Development with Java: 3 semester hours**

Prerequisites: CMP SCI 2261 and CMP SCI 3010, or consent of instructor. Covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

**CMP SCI 4012 Introduction to Enterprise Web Development: 3 semester hours**

Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 4020 Introduction to Android Apps: Android Fundamentals: 3 semester hours**

Prerequisites: CMP SCI 4010, or consent of the instructor. This course covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 4030 Introduction to Intelligent Web: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750, CMP SCI 3010, and CMP SCI 3130. Covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 4140 Theory Of Computation: 3 semester hours**

Prerequisite: CMP SCI 3130. Provides an introduction to the theory of computation. Describes basic computational models, such as finite state machines, pushdown automata, Turing machines and grammars. Covers the concept of nondeterministic computation and the relationships between different computational models. Discusses decidability, reducibility, and classification of problems into complexity classes based on their time and space complexity, such as P, NP, and PSPACE.

**CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course covers Objective-C and uses it for building iOS apps. It also introduces Xcode, Interface Builder, basic architectural patterns for MVC such as action, delegation, and outlets. Additional topics may include online services, mapping, persistence with core data, and single and multiple views.

**CMP SCI 4222 iOS Apps: 3 semester hours**

Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated apps using Objective-C and the scripting language Swift. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 4250 Programming Languages: 3 semester hours**

Prerequisite: CMP SCI 2261 and CMP SCI 3010 or Graduate Standing. Studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. Examines major programming paradigms: object-oriented, imperative, functional and logic.

**CMP SCI 4280 Program Translation: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250. Focuses on methods, techniques, and mechanisms used to create the abstraction from high level programming to machine level execution. This course also requires an individual, semester long project.

**CMP SCI 4300 Introduction To Artificial Intelligence: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. Provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications.

**CMP SCI 4340 Introduction to Machine Learning: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. Provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 4410 Computer Graphics: 3 semester hours**

Prerequisites: CMP SCI 2750 and CMP SCI 3130. Covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects. Vector and raster graphics, and different display devices are also discussed. A brief discussion of special graphics hardware, such as GPU, may be presented.

**CMP SCI 4420 Introduction to Digital Image Processing: 3 semester hours**

Prerequisites: CMP SCI 2750 and CMP SCI 3130. Focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 4500 Introduction to the Software Profession: 3 semester hours**

Prerequisite: CMP SCI 2261, CMP SCI 2700, CMP SCI 2750, CMP SCI 3010, and CMP SCI 3130. Focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.

**CMP SCI 4520 Introduction to Object-Oriented Analysis And Design: 3 semester hours**

Prerequisite: CMP SCI 2261, CMP SCI 3010, CMP SCI 3130. Covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 4610 Database Management Systems: 3 semester hours**

Prerequisites: CMP SCI 2750 and MATH 3000. Focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required, using a popular SQL server.

**CMP SCI 4700 Computer Forensics: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, and CMP SCI 3010. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. Addresses both theory and hands-on aspects for conducting digital forensic examinations.

**CMP SCI 4710 Mobile And Ubiquitous Computing: 3 semester hours**

Prerequisites: CMP SCI 2261. This course provides an introduction to the rapidly developing field of ubiquitous computing while at the same time exploring more focused topics in the three main categories of this field, namely systems, experience, and sensors. Explores setting up the infrastructure, privacy issues, evaluation of field applications, internationalization, user interfaces, and geolocation analysis.

**CMP SCI 4730 Computer Networks and Communications: 3 semester hours**

Prerequisites: CMP SCI 2750 and MATH 1320. This course provides a broad overview of computer networks and communications. Covers the fundamental principles and protocols across the whole layering structure of the Internet protocol stack. A top-down approach covers multiple topics including network application layer, transport layer, network layer, link layer, and physical layer protocols. May also include a range of related technologies such as WWW, HTTP, FTP, DNS, SMTP, TCP, UDP, ICMP, IPv4, IPv6, OSPF, RIP, BGP, IEEE 802.11 (WiFi), cellular networks, LANs, Ethernet, CSMA/CD, CDMA, multimedia networking, network management, and security in Internet.

**CMP SCI 4750 Introduction to Cloud Computing: 3 semester hours**

Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 4760 Operating Systems: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, and CMP SCI 3130. Covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. Presents examples from contemporary operating systems. This course also requires practical projects implemented within a modern operating system or simulator environment.

**CMP SCI 4780 Computer and Network Security: 3 semester hours**

Prerequisite: CMP SCI 2750. This course provides a broad overview of computer and network security technologies and concerns from multiple perspectives, such as cryptography, Public Key Infrastructures (PKI), hashes and message digests, computer viruses and malware, email security, TCP/IP security, IPSec, Secure Socket Layer (SSL), Transport Layer Security (TLS), Virtual Private Networks (VPN), Firewall, AAA (Authentication, Authorization, Accounting), wireless and mobile systems security, secure identifications (IDs), cloud security, privacy and integrity, network attacks, system monitoring, and Intrusion Detection System (IDS). Management and human factors related to security will also be discussed.

**CMP SCI 4782 Information Security: 3 semester hours**

Prerequisites: CMP SCI 4730 or CMP SCI 4780 or consent of instructor. This course covers topics related to maintaining security in an organizational infrastructure, including risk analysis of the environment, access level and control including multi-factor authentication, and detection capabilities to ensure adequate security monitoring. Additional topics may include network level protections, firewalls, intrusion detection/prevention systems, securing web and mobile applications, securing cloud implementations, and overall architectural considerations for system security. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 4880 Individual Studies: 1-3 semester hours**

Prerequisites: Consent of the instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. It may include development of a software project. The course may be repeated for credit.

**CMP SCI 4890 Topics In Computer Science: 3 semester hours**

Prerequisites: Consent of the Instructor. Covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. Course may be repeated for credit.

**CMP SCI 5012 Enterprise Web Development: 3 semester hours**

Prerequisite: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours**

Prerequisites: CMP SCI 4010 or consent of the instructor. Covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 5030 Intelligent Web: 3 semester hours**

Prerequisite: Consent of the instructor. Covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Topics are the same as CMP SCI 4030 but material is covered at a greater depth and additional projects are required. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 5130 Advanced Data Structures And Algorithms: 3 semester hours**

Prerequisite: An elementary course in analysis of algorithms or consent of the instructor. This course covers analysis of time and space complexity of iterative and recursive algorithms along with performance bounds, design of data structures for efficient performance, sorting algorithms, probabilistic algorithms, divide and conquer strategies, various algorithms on graphs, and np completeness.

**CMP SCI 5222 Advanced iOS Apps: 3 semester hours**

Prerequisites: CMP SCI 4220 or consent of the instructor. Focuses on building sophisticated apps using Objective-C and the scripting language Swift. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 5320 Introduction To Evolutionary Computation: 3 semester hours**

Prerequisites: CMP SCI 4300 or consent of instructor. This course introduces the concepts of nature-inspired problem solving population dynamics, Darwinian selection, and inheritance. It discusses problems applicable to evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms and genetic programming.

**CMP SCI 5340 Machine Learning: 3 semester hours**

Prerequisites: Consent of instructor. Provides an introduction to machine learning in the context of applications such as data mining, natural language processing and adaptive computer systems. Reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering and decision trees. Selected concepts in computational learning theory may also be covered. Topics are the same as CMP SCI 4340 but material is covered at a greater depth and additional projects are required. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 5420 Digital Image Processing: 3 semester hours**

Prerequisites: Consent of instructor. Covers topics in image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Topics are the same as CMP SCI 4420 but material is covered at a greater depth and additional projects are required. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 5500 Software Engineering: 3 semester hours**

Prerequisite: Consent of instructor. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

**CMP SCI 5520 Object Oriented Analysis And Design: 3 semester hours**

Prerequisite: Consent of the instructor. Covers object-oriented development, illustrated with visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns and frameworks. A semester long project, starting with requirements and culminating with deployment, is required. Topics are the same as CMP SCI 4520 but material is covered at a greater depth and additional projects are required. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 5700 Computer Systems: 3 semester hours**

Prerequisite: Background in computer organization or architecture or consent of the instructor. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

**CMP SCI 5740 High Performance Computing: 3 semester hours**

Prerequisite: Consent of the instructor. Introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures.

**CMP SCI 5750 Cloud Computing: 3 semester hours**

Prerequisites: Graduate Standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 5782 Advanced Information Security: 3 semester hours**

Prerequisites: Consent of the instructor. The topics covered in this course are risk analysis to understand the security requirements of an environment; access controls to understand the level of controls needed for different practical situations, including multi-factor authentication; detection capabilities, to ensure adequate security monitoring for information systems; network level protections, with firewalls, intrusion detection/prevention systems; securing the web and mobile applications and cloud implementations; and overall security architecture to understand how various controls can provide the security-in-depth that is required in the current environment. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours**

Prerequisites: Graduate standing and consent of instructor This course offers the student an opportunity to work on an advisor-supervised project, individually or in a group. A student may repeat the course for up to 6 credit hours total, but at most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

**CMP SCI 5890 Topics In Computer Science: 1-3 semester hours**

Prerequisites: Graduate standing and consent of the instructor This course offers various topics not offered on a regular basis. It may be taken more than once for credit with the consent of the department.

**CMP SCI 5900 Graduate Internship in Computer Science: 3 semester hours**

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is employed off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The student is responsible for having the project supervisor at the company establish contact with the academic advisor to establish schedule and goals, and a procedure to evaluate the goals. The student will submit a written report to the advisor at the end of internship. The course cannot be repeated for credit. Students completing this course will be allowed only up to three hours of Independent Study (CMP SCI 5880).

**CMP SCI 6320 Advances In Evolutionary Computation: 3 semester hours**

Prerequisite: CMP SCI 5320 or consent of instructor. This course focuses on some advanced topics in Genetic and Evolutionary Computation, both theoretical and practical. Topics may include competent genetic algorithms, learning classifier systems, and Markov models. A substantial part of the course will be based on recent literature. Projects may involve literature research, developing specific applications or implementing a specific model.

**CMP SCI 6340 Genetic Programming: 3 semester hours**

Prerequisite: CMP SCI 5320 or consent of instructor. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

**CMP SCI 6410 Topics In Computer Graphics: 3 semester hours**

Prerequisites: CMP SCI 4410 or consent of instructor. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

**CMP SCI 6420 Topics In Image Processing And Multimedia: 3 semester hours**

Prerequisites: CMP SCI 5400, CMP SCI 5420 or consent of instructor. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

**CMP SCI 6740 High Performance Computing: 3 semester hours**

Prerequisites: CMP SCI 5740, or Graduate standing and consent of instructor. Looks at the current state of the art in parallel and distributed computing, with emphasis on programming in such environments. Introduction to the state of the art in code optimization and grid computing environments.

**CMP SCI 6900 Thesis: 1-6 semester hours**

Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for those students intending to present a thesis as part of their M.S. program. At most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

**Courses****CMP SCI 1010 Introduction To Computers And The Internet: 3 semester hours**

Prerequisites: None. Covers basic concepts and components of a PC: survey of popular applications including e-mail, word processors, spreadsheets, overview of the Internet, popular browsers, World Wide Web, search engines, multimedia, web pages, security, and privacy. Credit not granted for both CMP SCI 1010 and INFSYS 1800.

**CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours**

Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

**CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours**

Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

**CMP SCI 1250 Introduction To Computing: 3 semester hours**

Prerequisites: MATH 1030 with B-or better, or MATH 1100, or MATH 1800. Provides an introduction to the concepts of computation, problem solving, and computer systems. Covers fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

**CMP SCI 2250 Programming And Data Structures: 3 semester hours**

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

**CMP SCI 2261 Object-Oriented Programming: 3 semester hours**

Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

**CMP SCI 2700 Computer Organization and Architecture: 3 semester hours**

Prerequisite: CMP SCI 2250. Introduces details of computer systems from architectural and organizational points of view. Covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

**CMP SCI 2750 System Programming and Tools: 3 semester hours**

Prerequisites: CMP SCI 2250. Covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.

**CMP SCI 3010 Web Programming: 3 semester hours**

Prerequisite: CMP SCI 2250. Provides a survey of current Web technologies including markup languages (such as HTML/XHTML, CSS, XML), client side languages (such as JavaScript), server side languages (such as PERL, PHP), and Web protocols. This course requires client-server computing projects.

**CMP SCI 3130 Design and Analysis of Algorithms: 3 semester hours**

Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

**CMP SCI 3710 Assembly Language Programming: 3 semester hours**

Prerequisite: CMP SCI 2700. Explores machine architecture concepts and principles through a study of assembly language programming. Topics covered include integer and floating point arithmetic, procedures, conditional processing, strings, macros, and interfaces to high level languages. Programming projects using a commercially available assembly language will be required.

**CMP SCI 4010 Advanced Web Development with Java: 3 semester hours**

Prerequisites: CMP SCI 2261 and CMP SCI 3010, or consent of instructor. Covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

**CMP SCI 4012 Introduction to Enterprise Web Development: 3 semester hours**

Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 4020 Introduction to Android Apps: Android Fundamentals: 3 semester hours**

Prerequisites: CMP SCI 4010, or consent of the instructor. This course covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 4030 Introduction to Intelligent Web: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750, CMP SCI 3010, and CMP SCI 3130. Covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 4140 Theory Of Computation: 3 semester hours**

Prerequisite: CMP SCI 3130. Provides an introduction to the theory of computation. Describes basic computational models, such as finite state machines, pushdown automata, Turing machines and grammars. Covers the concept of nondeterministic computation and the relationships between different computational models. Discusses decidability, reducibility, and classification of problems into complexity classes based on their time and space complexity, such as P, NP, and PSPACE.

**CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course covers Objective-C and uses it for building iOS apps. It also introduces Xcode, Interface Builder, basic architectural patterns for MVC such as action, delegation, and outlets. Additional topics may include online services, mapping, persistence with core data, and single and multiple views.

**CMP SCI 4222 iOS Apps: 3 semester hours**
