Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated apps using Objective-C and the scripting language Swift. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 4250 Programming Languages: 3 semester hours**

Prerequisite: CMP SCI 2261 and CMP SCI 3010 or Graduate Standing. Studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. Examines major programming paradigms: object-oriented, imperative, functional and logic.

**CMP SCI 4280 Program Translation: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250. Focuses on methods, techniques, and mechanisms used to create the abstraction from high level programming to machine level execution. This course also requires an individual, semester long project.

**CMP SCI 4300 Introduction To Artificial Intelligence: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. Provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications.

**CMP SCI 4340 Introduction to Machine Learning: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. Provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 4410 Computer Graphics: 3 semester hours**

Prerequisites: CMP SCI 2750 and CMP SCI 3130. Covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects. Vector and raster graphics, and different display devices are also discussed. A brief discussion of special graphics hardware, such as GPU, may be presented.

**CMP SCI 4420 Introduction to Digital Image Processing: 3 semester hours**

Prerequisites: CMP SCI 2750 and CMP SCI 3130. Focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 4500 Introduction to the Software Profession: 3 semester hours**

Prerequisite: CMP SCI 2261, CMP SCI 2700, CMP SCI 2750, CMP SCI 3010, and CMP SCI 3130. Focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.

**CMP SCI 4520 Introduction to Object-Oriented Analysis And Design: 3 semester hours**

Prerequisite: CMP SCI 2261, CMP SCI 3010, CMP SCI 3130. Covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 4610 Database Management Systems: 3 semester hours**

Prerequisites: CMP SCI 2750 and MATH 3000. Focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required, using a popular SQL server.

**CMP SCI 4700 Computer Forensics: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, and CMP SCI 3010. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. Addresses both theory and hands-on aspects for conducting digital forensic examinations.

**CMP SCI 4710 Mobile And Ubiquitous Computing: 3 semester hours**

Prerequisites: CMP SCI 2261. This course provides an introduction to the rapidly developing field of ubiquitous computing while at the same time exploring more focused topics in the three main categories of this field, namely systems, experience, and sensors. Explores setting up the infrastructure, privacy issues, evaluation of field applications, internationalization, user interfaces, and geolocation analysis.

**CMP SCI 4730 Computer Networks and Communications: 3 semester hours**

Prerequisites: CMP SCI 2750 and MATH 1320. This course provides a broad overview of computer networks and communications. Covers the fundamental principles and protocols across the whole layering structure of the Internet protocol stack. A top-down approach covers multiple topics including network application layer, transport layer, network layer, link layer, and physical layer protocols. May also include a range of related technologies such as WWW, HTTP, FTP, DNS, SMTP, TCP, UDP, ICMP, IPv4, IPv6, OSPF, RIP, BGP, IEEE 802.11 (WiFi), cellular networks, LANs, Ethernet, CSMA/CD, CDMA, multimedia networking, network management, and security in Internet.

**CMP SCI 4750 Introduction to Cloud Computing: 3 semester hours**

Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 4760 Operating Systems: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, and CMP SCI 3130. Covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. Presents examples from contemporary operating systems. This course also requires practical projects implemented within a modern operating system or simulator environment.

**CMP SCI 4780 Computer and Network Security: 3 semester hours**

Prerequisite: CMP SCI 2750. This course provides a broad overview of computer and network security technologies and concerns from multiple perspectives, such as cryptography, Public Key Infrastructures (PKI), hashes and message digests, computer viruses and malware, email security, TCP/IP security, IPSec, Secure Socket Layer (SSL), Transport Layer Security (TLS), Virtual Private Networks (VPN), Firewall, AAA (Authentication, Authorization, Accounting), wireless and mobile systems security, secure identifications (IDs), cloud security, privacy and integrity, network attacks, system monitoring, and Intrusion Detection System (IDS). Management and human factors related to security will also be discussed.

**CMP SCI 4782 Information Security: 3 semester hours**

Prerequisites: CMP SCI 4730 or CMP SCI 4780 or consent of instructor. This course covers topics related to maintaining security in an organizational infrastructure, including risk analysis of the environment, access level and control including multi-factor authentication, and detection capabilities to ensure adequate security monitoring. Additional topics may include network level protections, firewalls, intrusion detection/prevention systems, securing web and mobile applications, securing cloud implementations, and overall architectural considerations for system security. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 4880 Individual Studies: 1-3 semester hours**

Prerequisites: Consent of the instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. It may include development of a software project. The course may be repeated for credit.

**CMP SCI 4890 Topics In Computer Science: 3 semester hours**

Prerequisites: Consent of the Instructor. Covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. Course may be repeated for credit.

**CMP SCI 5012 Enterprise Web Development: 3 semester hours**

Prerequisite: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours**

Prerequisites: CMP SCI 4010 or consent of the instructor. Covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 5030 Intelligent Web: 3 semester hours**

Prerequisite: Consent of the instructor. Covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Topics are the same as CMP SCI 4030 but material is covered at a greater depth and additional projects are required. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 5130 Advanced Data Structures And Algorithms: 3 semester hours**

Prerequisite: An elementary course in analysis of algorithms or consent of the instructor. This course covers analysis of time and space complexity of iterative and recursive algorithms along with performance bounds, design of data structures for efficient performance, sorting algorithms, probabilistic algorithms, divide and conquer strategies, various algorithms on graphs, and np completeness.

**CMP SCI 5222 Advanced iOS Apps: 3 semester hours**

Prerequisites: CMP SCI 4220 or consent of the instructor. Focuses on building sophisticated apps using Objective-C and the scripting language Swift. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 5320 Introduction To Evolutionary Computation: 3 semester hours**

Prerequisites: CMP SCI 4300 or consent of instructor. This course introduces the concepts of nature-inspired problem solving population dynamics, Darwinian selection, and inheritance. It discusses problems applicable to evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms and genetic programming.

**CMP SCI 5340 Machine Learning: 3 semester hours**

Prerequisites: Consent of instructor. Provides an introduction to machine learning in the context of applications such as data mining, natural language processing and adaptive computer systems. Reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering and decision trees. Selected concepts in computational learning theory may also be covered. Topics are the same as CMP SCI 4340 but material is covered at a greater depth and additional projects are required. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 5420 Digital Image Processing: 3 semester hours**

Prerequisites: Consent of instructor. Covers topics in image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Topics are the same as CMP SCI 4420 but material is covered at a greater depth and additional projects are required. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 5500 Software Engineering: 3 semester hours**

Prerequisite: Consent of instructor. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

**CMP SCI 5520 Object Oriented Analysis And Design: 3 semester hours**

Prerequisite: Consent of the instructor. Covers object-oriented development, illustrated with visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns and frameworks. A semester long project, starting with requirements and culminating with deployment, is required. Topics are the same as CMP SCI 4520 but material is covered at a greater depth and additional projects are required. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 5700 Computer Systems: 3 semester hours**

Prerequisite: Background in computer organization or architecture or consent of the instructor. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

**CMP SCI 5740 High Performance Computing: 3 semester hours**

Prerequisite: Consent of the instructor. Introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures.

**CMP SCI 5750 Cloud Computing: 3 semester hours**

Prerequisites: Graduate Standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 5782 Advanced Information Security: 3 semester hours**

Prerequisites: Consent of the instructor. The topics covered in this course are risk analysis to understand the security requirements of an environment; access controls to understand the level of controls needed for different practical situations, including multi-factor authentication; detection capabilities, to ensure adequate security monitoring for information systems; network level protections, with firewalls, intrusion detection/prevention systems; securing the web and mobile applications and cloud implementations; and overall security architecture to understand how various controls can provide the security-in-depth that is required in the current environment. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours**

Prerequisites: Graduate standing and consent of instructor This course offers the student an opportunity to work on an advisor-supervised project, individually or in a group. A student may repeat the course for up to 6 credit hours total, but at most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

**CMP SCI 5890 Topics In Computer Science: 1-3 semester hours**

Prerequisites: Graduate standing and consent of the instructor This course offers various topics not offered on a regular basis. It may be taken more than once for credit with the consent of the department.

**CMP SCI 5900 Graduate Internship in Computer Science: 3 semester hours**

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is employed off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The student is responsible for having the project supervisor at the company establish contact with the academic advisor to establish schedule and goals, and a procedure to evaluate the goals. The student will submit a written report to the advisor at the end of internship. The course cannot be repeated for credit. Students completing this course will be allowed only up to three hours of Independent Study (CMP SCI 5880).

***CMP SCI 6320 Advances In Evolutionary Computation: 3 semester hours***

Prerequisite: CMP SCI 5320 or consent of instructor. This course focuses on some advanced topics in Genetic and Evolutionary Computation, both theoretical and practical. Topics may include competent genetic algorithms, learning classifier systems, and Markov models. A substantial part of the course will be based on recent literature. Projects may involve literature research, developing specific applications or implementing a specific model.

***CMP SCI 6340 Genetic Programming: 3 semester hours***

Prerequisite: CMP SCI 5320 or consent of instructor. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

***CMP SCI 6410 Topics In Computer Graphics: 3 semester hours***

Prerequisites: CMP SCI 4410 or consent of instructor. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

***CMP SCI 6420 Topics In Image Processing And Multimedia: 3 semester hours***

Prerequisites: CMP SCI 5400, CMP SCI 5420 or consent of instructor. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

***CMP SCI 6740 High Performance Computing: 3 semester hours***

Prerequisites: CMP SCI 5740, or Graduate standing and consent of instructor. Looks at the current state of the art in parallel and distributed computing, with emphasis on programming in such environments. Introduction to the state of the art in code optimization and grid computing environments.

***CMP SCI 6900 Thesis: 1-6 semester hours***

Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for those students intending to present a thesis as part of their M.S. program. At most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

## Counselor Education

### Courses

***CNS ED 1400 Making A Career Choice: 3 semester hours***

Introduces students to career development theories and the career decision-making process. Students receive an overview of career development theory and learn how these theories pertain to the formulation of individual career plans. Self-knowledge of career interests, values, beliefs, aptitudes, and other factors are explored. Self-assessment and decision-making techniques learned in this class can be revisited throughout the life span. The seminar format allows for small group discussion of career-related issues and personal application of career development principles.

***CNS ED 3220 Counseling Individuals With Special Needs: 3 semester hours***

Prerequisite: TCH ED 3313 or equivalent, or consent of instructor. A course emphasizing counseling skills for individuals who plan to work with people with disabilities. Emphasis is placed on using counseling strategies with school-age children with disabilities.

***CNS ED 4310 Human Relations Skills: 3 semester hours***

Prerequisite: Junior or Senior level standing or consent of instructor.

A course emphasizing the development of specific skills in human relationships to help facilitate effective interaction among individuals and groups in the helping professions. Readings, discussion and skill-building exercise will be used to develop various human relations skills.

***CNS ED 4320 Occupational And Education Information: 3 semester hours***

Prerequisites: Junior or senior level standing or consent of instructor. This course is a basic introduction to the nature and use of occupational and educational information, including the characteristics and educational requirements of occupations as well as the history of and current occupation organizing systems.

***CNS ED 6000 Personal and Professional Development in Counseling: 3 semester hours***

Prerequisites: Provisional Acceptance to the Counseling Program or Consent of Instructor. This course provides an in-depth view of the professional counseling field. Attention is focused on the development of the helping relationship, including a review of research on factors which influence helping processes and rapport building, a development of skills used in the counseling process, and increased awareness of how students' values, beliefs, and behaviors are related to counselor effectiveness.

***CNS ED 6010 Theories of Counseling: 3 semester hours***

Prerequisite: CNS ED 6000. This course will explore the philosophical foundations of counseling theory. The major constructs of contemporary counseling approaches will be discussed and the practical applications of these theories will be analyzed.

***CNS ED 6020 Ethical and Professional Issues in Counseling: 3 semester hours***

Prerequisites: CNS ED 6000. Ethical, legal, and professional issues related to counseling are addressed. Ethical dilemmas in the provision of counseling services to individuals, couples, families, and groups are defined. Specific ethical codes of professional organizations are examined.

***CNS ED 6030 Foundations for Multicultural Counseling: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010. This course will focus on: (1) reviewing knowledge and research in the area of multicultural counseling, (2) developing and/or enhancing skills useful in counseling with individuals from minority populations, and (3) developing levels of personal awareness about stereotypes, and learning how feelings and attitudes about these may impact counseling with individuals from minority populations.

***CNS ED 6040 Group Procedures in Counseling: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010 and CNS ED 6270 or CNS ED 6370. This course examines the process dynamics of groups including group development, leadership, norms and therapeutic factors. Group counseling theories and approaches used for other group work including: skills, personal growth, support, vocational, and developmental guidance groups are included. Knowledge and skills of how to facilitate therapeutic groups are included. Students will be required to be participant-observers or facilitators of a group outside of class time.

***CNS ED 6050 Individual Inventory: 3 semester hours***

Prerequisite: ED REM 6709. Uses of educational and psychological appraisal techniques in counseling, develops counselor's abilities in assisting clients toward self-awareness through the use of test and non-test data. Ethical practices in the use of tests and the maintenance of personnel records are stressed.

**CNS ED 6070 Psychopathology & Diagnosis: 3 semester hours**

Prerequisites: Graduate Standing. Same As ED PSY 6113. Covers etiology, assessment and diagnosis of mental disorders using contemporary diagnostic systems. Course materials and assignment address the dynamics of adjustment and treatment implication for counselors, school psychologists, and others in the helping professions.

**CNS ED 6200 Foundations of School Guidance: 3 semester hours**

Prerequisites: CNS ED 6000 with a grade of B or better. The purpose of this course is to give students a foundation for understanding the history, philosophy, and development of school guidance programs. The role functions of the school counselor within a developmental, comprehensive program are examined, along with communication skills necessary for consultation with students, parents, school support staff, and resource people in the community nonacademic needs.

**CNS ED 6220 Current Issues In Counseling Special Needs Populations: 3 semester hours**

Prerequisite: Graduate Standing. Designed to analyze relevant literature and to provide communication skills training for those professionals in school settings who work with individuals with special needs. The characteristics and social and emotional needs of this special population will be discussed as well as the impact of special needs on the family system.

**CNS ED 6270 School Counseling Practicum: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010 (both courses with a grade of B- or better) or consent of instructor. One hundred clock hours of supervised practice in counseling to provide the opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession with emphasis on school counseling.

**CNS ED 6280 School Counseling Field Experience: 1-6 semester hours**

Prerequisites: CNS ED 6270 with a grade of B or better and consent of instructor. A 100 clock hour field experience for each semester-credit-hour of enrollment. Students will be closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students will receive 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by field experience site supervisor during terms of enrollment. Course may be repeated for a maximum of 6 semester-credit-hours.

**CNS ED 6300 Foundations Of Clinical Mental Health Counseling: 3 semester hours**

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010. A survey of counseling in a variety of mental health settings. Introduction to the basic philosophical, historical, and psychological foundations of clinical mental health counseling. Designed to acquaint the student with the foundations and roles of the professional counselor in various community and agency settings.

**CNS ED 6370 Clinical Mental Health Counseling Practicum I: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010 (both courses with a grade of B- or better) or consent of the instructor. One hundred clock hours of supervised practice in counseling to provide the opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession, focusing on clinical mental health counseling.

**CNS ED 6375 Clinical Mental Health Counseling Practicum II: 3 semester hours**

Prerequisites: CNS ED 6000, CNS ED 6010, and CNS ED 6370 (all courses with a grade of B- or better or S, as appropriate) or consent of instructor. One hundred clock hours of supervised advanced practice in counseling to provide the opportunity for students to continue to integrate and process theories, techniques, and methods as they are applied to the professional practice of counseling, with an emphasis on clinical mental health counseling.

**CNS ED 6380 Clinical Mental Health Counseling Field Experience: 1-6 semester hours**

Prerequisites: CNS ED 6370 and consent of instructor. A 100 clock hour field experience for each semester-credit-hour of enrollment. Students will be closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students will receive 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by a field experience site supervisor during terms of enrollment. Course may be repeated for a maximum of 6 semester-credit-hours.

**CNS ED 6400 Career Information and Development: 3 semester hours**

Prerequisites: CNS ED 6000 with a grade of B or better and graduate standing. Emphasis is on the nature of the changing labor market and the impact on personal, social, economic, career, and educational aspects of individuals and society. Use of occupational and educational information systems and resources to assist with career decisions are examined. The needs of culturally diverse populations are discussed. Use of career and labor market information and programs such as computer technology to access up-to-date career and labor market information is explored. Techniques and methods of career counseling are discussed. Various theories of career development and career choice will be examined.

**CNS ED 6404 Seminar: 1-10 semester hours**

Prerequisite: Graduate Standing.

**CNS ED 6410 Advanced Career Development: 3 semester hours**

Prerequisites: CNS ED 6400 or consent of instructor. Emphasis is on current theories of career development, career choice, and techniques and methods of career counseling. Issues concerning education and training, work, leisure, the family, life roles, and culturally diverse populations are studied. The role of career theory in planning, development, and delivery of a career development program is explored.

**CNS ED 6420 Career Assessment In Counseling And Rehabilitation: 3 semester hours**

Prerequisites: CNS ED 6050 and CNS ED 6400 or consent of instructor. This course provides an in-depth and specialized look at the educational and psychological assessment techniques used in career counseling, especially the assessment of career interests, work values, work environment, work skills, work samples, career development stages, career maturity, career decision making, and career beliefs. Issues of using computers in the delivery of career development services will be discussed.

**CNS ED 6497 Problems: 1-10 semester hours**

.

***CNS ED 6500 Introduction to Systems Theory for Couples and Family Counseling: 3 semester hours***

Prerequisite: CNS ED 6010 or Consent of Instructor. This course is an introduction to relationship theory as applied to couples and family counseling. General systems theory, and social constructivism theory are reviewed. Students learn relationship interventions and beginning couple and family counseling techniques. Ethical, professional, and legal issues related to couples and family counseling are addressed.

***CNS ED 6510 Marriage Counseling And Enrichment: 3 semester hours***

Prerequisite: CNS ED 6500 or consent of instructor. This course focuses on the theory and techniques of marital or couples counseling and enrichment. Models and methods for prevention and treatment of relationship dysfunction are explored. Relationship developmental issues are addressed. Students are challenged to develop the critical skills necessary to be effective marriage counselors and marital-life educators.

***CNS ED 6520 Family Counseling: 3 semester hours***

Prerequisite: CNS ED 6500 and CNS ED 6270, or CNS ED 6370, or consent of instructor. This course offers an in-depth analysis of strategic, structural, experiential, communications, behavioral, and psychodynamic approaches to systems change and family counseling. The range of techniques and applied practices evolving from each orientation are explored as are normal and dysfunctional family processes. Various counseling modalities, such as individual, concurrent, collaborative, conjoint, group, intergenerational, and networking are also considered.

***CNS ED 6600 Theories and Techniques of Counseling Children and Adolescents: 3 semester hours***

Prerequisites: CNS ED 6000, CNS ED 6010 (with a grade of B or better in both courses) or permission of instructor. This course focuses on counseling theories and their applicability to the developmental special concerns of children and adolescents including child-at risk issues such as: abuse, suicide, divorce, and death and dying. Individual, group, and family intervention techniques and consultation skills will be emphasized, as well as legal and ethical considerations for counselors. Strategies presented can be utilized in a variety of settings. Multicultural considerations are also addressed.

***CNS ED 6610 Introduction to Play Therapy: 3 semester hours***

Prerequisites: Graduate standing. Provides students a foundation for understanding the history, theories and application of play therapy. Working with children in both agency and school settings will be discussed as well as how play therapy skills can be incorporated into the student's developing theoretical framework. Can count towards the Registered Play Therapist Credential.

***CNS ED 6620 Advanced Play Therapy: 3-4 semester hours***

Prerequisites: CNS ED 6610. Helps students further develop their play therapy skills, especially in the area of client-centered play therapy. Examines the use of play therapy with traumatized children and aggressive children in both school and agency settings. Group play therapy and sand tray therapy as additional modalities will also be explored. Ethical and legal issues as well as supervision in play therapy will be emphasized. Can count towards the Registered Play Therapist credential.

***CNS ED 6630 High School Transitions/Post-Secondary Counseling: 3 semester hours***

Prerequisites: CNS ED 6000, CNS ED 6010, CNS ED 6200; or consent of instructor. Knowledge and skills regarding development and implementation of programs and processes for guiding secondary education students through the transition from high school to employment (including military) and/or post-secondary education (voc-tech training, community college, university, etc.). Places post-secondary career planning within the context of a developmental guidance curriculum to address the needs of all students. Intended for graduate students who are preparing to become high school counselors, as well as those interested in college advising and career counseling.

***CNS ED 6700 Introduction To Addictive Behaviors And Addiction Counseling: 3 semester hours***

Prerequisites: CNS ED 6010 or consent of instructor. Exploration of the theoretical foundations of contemporary approaches to such addictive behaviors as alcohol and drug abuse, smoking, compulsive gambling, and sexual addiction. The nature, etiology, prevention, and treatment of addictions are discussed and analyzed from a variety of theoretical perspectives. The applications of these specific theoretical models to various treatment settings are examined. Multicultural considerations are also addressed.

***CNS ED 6710 Advanced Strategies in Addictions Counseling: 3 semester hours***

Prerequisites: CNS ED 6700 or consent of instructor. Study of advanced, empirically supported counseling approaches and techniques for the treatment of addictive behaviors. An emphasis is placed on screening and assessment procedures and on matching interventions to individual client and community needs.

***CNS ED 6720 Counseling Individuals with Co-Occurring Disorders: 3 semester hours***

Prerequisites: CNS ED 6700 or consent of instructor. This course introduces the student to the special needs, concerns, and problems encountered when counseling clients who have co-occurring substance use and mental health problems. Subject areas include an overview of screening and assessment, evidence-based practices, counseling approaches and psychopharmacology for co-occurring disorders.

***CNS ED 6810 Integrating Religion And Spirituality In Counseling: 3 semester hours***

This course is for counselors and students wishing to develop the methods to integrate religion and spirituality in counseling and learn about counseling strategies for persons of various religious backgrounds, the link between health and religion, and ethics involved in the assessment and integration of religion and spirituality in practice.

***CNS ED 6820 Counseling Women Toward Empowerment: 3 semester hours***

Prerequisites: CNS ED 6000, CNS ED 6010, and CNS ED 6270 or CNS ED 6370, or consent of instructor. An introduction to Women's issues in counseling. Relational theory, healthy female development, and an overview of clinical issues most common to females will be presented.

***CNS ED 6830 Counseling African American Clients: 3 semester hours***

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor. This course is designed to promote an increased awareness and understanding of the psychological development and mental health needs of African American clients. This course also offers research-based theoretical strategies for counseling this diverse population.

**CNS ED 6840 Counseling Sexual Minorities: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor.

This course is focused on affirmative perspectives on lesbian, gay, bisexual, and transgender (LGBT) issues and populations. All of the major professional mental health organizations have formal ethical guidelines requiring non-discrimination with regard to LGBT populations and all of the organizations are active in promoting affirmative perspectives. Students will learn current perspectives in the fields of counseling and psychology on LGBT issues necessary for adequate practice or research in this area. A major focus will be on developing awareness and knowledge related to these populations.

**CNS ED 6850 Social Class and Poverty Issues In Counseling: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of the instructor. This course focuses on the experience of poor people in the United States. Specifically, the circumstances of poverty, the consequences of living in poverty (on behaviors, aspirations, relationships, education, and health including mental health), and the impact of poverty on the helping relationship will be addressed. Personal, social, and cultural aspects of poverty will be examined in both rural and urban settings. One objective of this course is to reduce the psychological distance between the poor client and the non-poor counselor. Included in this endeavor are specific attitude and techniques designed to maximize the quality of a counselor's work with poorer clients.

**CNS ED 6860 Human Sexuality in Counseling: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor. This course will focus on integrating issues of human sexuality into the counseling process. The psycho-sexual development of the individual from birth throughout the life span will be discussed and compared to other developmental tasks at each age. Themes related to influences from family, culture, environment, socioeconomic, ethnic, and religious perceptions of sexuality will be integrated. The physiology of human sexual function will be addressed, including variations in sexual orientation and gender identity.

**CNS ED 7000 Advanced Theories And Foundations Of Counseling Psychology: 3 semester hours**

Prerequisites: Doctoral standing or instructor consent. A seminar on the discipline of counseling psychology, including its history, development, and current status. An important focus will be contemporary and emergent theories in the field.

**CNS ED 7010 Advanced Multicultural Counseling: 3 semester hours**

Prerequisites: CNS ED 6030 and doctoral standing or consent of instructor. This advanced course addresses theories and research in multicultural counseling.

**CNS ED 7020 Seminar In Counseling Research: 3 semester hours**

Prerequisites: ED REM 6710, doctoral standing or consent of instructor. The purpose of this course is to review and analyze current counseling research literature. Ethical issues will be addressed.

**CNS ED 7025 Advanced Counseling Research: 3 semester hours**

Prerequisites: CNS ED 7020 or consent of instructor. Engages students in the conduct of an empirical research project. Building from the research proposal developed in CNS ED 7020, students will obtain IRB approval, collect data, analyze the data, and write a manuscript reporting the results in journal article format.

**CNS ED 7030 Counselor Education And Supervision: 3 semester hours**

Prerequisites: Master's degree in Counseling. An introduction to clinical supervision in counseling. Theories, models, and research in supervision will be presented. Students will supervise master's level students in practicum and internship courses in counseling.

**CNS ED 7035 Counselor Education & Supervision Practicum: 3 semester hours**

Prerequisites: Admission to the Counseling Option in the Ed.D. or Ph.D. Program. Offers advanced training in counseling supervision. Students will supervise master's level students in practicum and internship courses in counseling. Students will be expected to maintain as assigned caseload of supervisees and attend three hours of weekly doctoral-level supervision.

**CNS ED 7075 Teaching, Learning, and Technology in Counselor Education: 3 semester hours**

Prerequisites: CNS ED 7000 and CNS ED 7770. Examines pedagogy and epistemology of counselor education. Philosophies of teaching, instructional design, instructional methods, assessment of learning, and the impact and use of technology in teaching will be explored within the framework of the eight core courses as defined by the Council for Accreditation of Counseling & Related Educational Programs (CACREP). Students will both learn and apply classroom teaching knowledge and skills.

**CNS ED 7400 Advanced Topics in School Counseling Leadership: 3 semester hours**

Prerequisites: Admission to the Counseling Option in the Ed.D. Program. Focuses on leadership roles and advanced skills for professional school counselors, school counseling supervisors, and evaluation strategies, and training and supervision strategies will be addressed, with a special emphasis on preventative and culturally sound interventions.

**CNS ED 7770 Doctoral Practicum: 3 semester hours**

Prerequisites: Doctoral Standing. One hundred clock hours of on-campus doctoral-level supervised counseling practice. Students will counsel clients and will be introduced to teaching and supervising beginning counseling trainees in a clinical context. As a prerequisite to the Doctoral Internship, students will be expected to demonstrate competence in skills required of counselor educators and clinical supervisors. Students will receive 1.5 hours of group and 1 hour of individual supervision by a graduate faculty member.

**CNS ED 7780 Doctoral Internship: 1-6 semester hours**

Prerequisites: CNS ED 7770; ED REM 7771; ED REM 7781. A 100-hour field experience for each semester-credit hour of enrollment under the direction of a graduate faculty member. Students provide counseling services to clients at field sites, teach and supervise beginning counseling trainees, and conduct clinical research projects. Students are supervised by a graduate faculty member in two hours per week of group supervision, and they receive one hour per week of individual supervision by the field site supervisor.

## Courses

### ***CNS ED 1400 Making A Career Choice: 3 semester hours***

Introduces students to career development theories and the career decision-making process. Students receive an overview of career development theory and learn how these theories pertain to the formulation of individual career plans. Self-knowledge of career interests, values, beliefs, aptitudes, and other factors are explored. Self-assessment and decision-making techniques learned in this class can be revisited throughout the life span. The seminar format allows for small group discussion of career-related issues and personal application of career development principles.

### ***CNS ED 3220 Counseling Individuals With Special Needs: 3 semester hours***

Prerequisite: TCH ED 3313 or equivalent, or consent of instructor. A course emphasizing counseling skills for individuals who plan to work with people with disabilities. Emphasis is placed on using counseling strategies with school-age children with disabilities.

### ***CNS ED 4310 Human Relations Skills: 3 semester hours***

Prerequisite: Junior or Senior level standing or consent of instructor. A course emphasizing the development of specific skills in human relationships to help facilitate effective interaction among individuals and groups in the helping professions. Readings, discussion and skill-building exercise will be used to develop various human relations skills.

### ***CNS ED 4320 Occupational And Education Information: 3 semester hours***

Prerequisites: Junior or senior level standing or consent of instructor. This course is a basic introduction to the nature and use of occupational and educational information, including the characteristics and educational requirements of occupations as well as the history of and current occupation organizing systems.

### ***CNS ED 6000 Personal and Professional Development in Counseling: 3 semester hours***

Prerequisites: Provisional Acceptance to the Counseling Program or Consent of Instructor. This course provides an in-depth view of the professional counseling field. Attention is focused on the development of the helping relationship, including a review of research on factors which influence helping processes and rapport building, a development of skills used in the counseling process, and increased awareness of how students' values, beliefs, and behaviors are related to counselor effectiveness.

### ***CNS ED 6010 Theories of Counseling: 3 semester hours***

Prerequisite: CNS ED 6000. This course will explore the philosophical foundations of counseling theory. The major constructs of contemporary counseling approaches will be discussed and the practical applications of these theories will be analyzed.

### ***CNS ED 6020 Ethical and Professional Issues in Counseling: 3 semester hours***

Prerequisites: CNS ED 6000. Ethical, legal, and professional issues related to counseling are addressed. Ethical dilemmas in the provision of counseling services to individuals, couples, families, and groups are defined. Specific ethical codes of professional organizations are examined.

### ***CNS ED 6030 Foundations for Multicultural Counseling: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010. This course will focus on: (1) reviewing knowledge and research in the area of multicultural counseling, (2) developing and/or enhancing skills useful in counseling with individuals from minority populations, and (3) developing levels of personal awareness about stereotypes, and learning how feelings and attitudes about these may impact counseling with individuals from minority populations.

### ***CNS ED 6040 Group Procedures in Counseling: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010 and CNS ED 6270 or CNS ED 6370. This course examines the process dynamics of groups including group development, leadership, norms and therapeutic factors. Group counseling theories and approaches used for other group work including: skills, personal growth, support, vocational, and developmental guidance groups are included. Knowledge and skills of how to facilitate therapeutic groups are included. Students will be required to be participant-observers or facilitators of a group outside of class time.

### ***CNS ED 6050 Individual Inventory: 3 semester hours***

Prerequisite: ED REM 6709. Uses of educational and psychological appraisal techniques in counseling, develops counselor's abilities in assisting clients toward self-awareness through the use of test and non-test data. Ethical practices in the use of tests and the maintenance of personnel records are stressed.

### ***CNS ED 6070 Psychopathology & Diagnosis: 3 semester hours***

Prerequisites: Graduate Standing. Same As ED PSY 6113. Covers etiology, assessment and diagnosis of mental disorders using contemporary diagnostic systems. Course materials and assignment address the dynamics of adjustment and treatment implication for counselors, school psychologists, and others in the helping professions.

### ***CNS ED 6200 Foundations of School Guidance: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better. The purpose of this course is to give students a foundation for understanding the history, philosophy, and development of school guidance programs. The role functions of the school counselor within a developmental, comprehensive program are examined, along with communication skills necessary for consultation with students, parents, school support staff, and resource people in the community nonacademic needs.

### ***CNS ED 6220 Current Issues In Counseling Special Needs Populations: 3 semester hours***

Prerequisite: Graduate Standing. Designed to analyze relevant literature and to provide communication skills training for those professionals in school settings who work with individuals with special needs. The characteristics and social and emotional needs of this special population will be discussed as well as the impact of special needs on the family system.

### ***CNS ED 6270 School Counseling Practicum: 3 semester hours***

Prerequisites: CNS ED 6000 and CNS ED 6010 (both courses with a grade of B- or better) or consent of instructor. One hundred clock hours of supervised practice in counseling to provide the opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession with emphasis on school counseling.

***CNS ED 6280 School Counseling Field Experience: 1-6 semester hours***

Prerequisites: CNS ED 6270 with a grade of B or better and consent of instructor. A 100 clock hour field experience for each semester-credit-hour of enrollment. Students will be closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students will receive 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by field experience site supervisor during terms of enrollment. Course may be repeated for a maximum of 6 semester-credit-hours.

***CNS ED 6300 Foundations Of Clinical Mental Health Counseling: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and CNS ED 6010. A survey of counseling in a variety of mental health settings. Introduction to the basic philosophical, historical, and psychological foundations of clinical mental health counseling. Designed to acquaint the student with the foundations and roles of the professional counselor in various community and agency settings.

***CNS ED 6370 Clinical Mental Health Counseling Practicum I: 3 semester hours***

Prerequisites: CNS ED 6000 and CNS ED 6010 (both courses with a grade of B- or better) or consent of the instructor. One hundred clock hours of supervised practice in counseling to provide the opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession, focusing on clinical mental health counseling.

***CNS ED 6375 Clinical Mental Health Counseling Practicum II: 3 semester hours***

Prerequisites: CNS ED 6000, CNS ED 6010, and CNS ED 6370 (all courses with a grade of B- or better or S, as appropriate) or consent of instructor. One hundred clock hours of supervised advanced practice in counseling to provide the opportunity for students to continue to integrate and process theories, techniques, and methods as they are applied to the professional practice of counseling, with an emphasis on clinical mental health counseling.

***CNS ED 6380 Clinical Mental Health Counseling Field Experience: 1-6 semester hours***

Prerequisites: CNS ED 6370 and consent of instructor. A 100 clock hour field experience for each semester-credit-hour of enrollment. Students will be closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students will receive 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by a field experience site supervisor during terms of enrollment. Course may be repeated for a maximum of 6 semester-credit-hours.

***CNS ED 6400 Career Information and Development: 3 semester hours***

Prerequisites: CNS ED 6000 with a grade of B or better and graduate standing. Emphasis is on the nature of the changing labor market and the impact on personal, social, economic, career, and educational aspects of individuals and society. Use of occupational and educational information systems and resources to assist with career decisions are examined. The needs of culturally diverse populations are discussed. Use of career and labor market information and programs such as computer technology to access up-to-date career and labor market information is explored. Techniques and methods of career counseling are discussed. Various theories of career development and career choice will be examined.

***CNS ED 6404 Seminar: 1-10 semester hours***

Prerequisite: Graduate Standing.

***CNS ED 6410 Advanced Career Development: 3 semester hours***

Prerequisites: CNS ED 6400 or consent of instructor. Emphasis is on current theories of career development, career choice, and techniques and methods of career counseling. Issues concerning education and training, work, leisure, the family, life roles, and culturally diverse populations are studied. The role of career theory in planning, development, and delivery of a career development program is explored.

***CNS ED 6420 Career Assessment In Counseling And Rehabilitation: 3 semester hours***

Prerequisites: CNS ED 6050 and CNS ED 6400 or consent of instructor. This course provides an in-depth and specialized look at the educational and psychological assessment techniques used in career counseling, especially the assessment of career interests, work values, work environment, work skills, work samples, career development stages, career maturity, career decision making, and career beliefs. Issues of using computers in the delivery of career development services will be discussed.

***CNS ED 6497 Problems: 1-10 semester hours******CNS ED 6500 Introduction to Systems Theory for Couples and Family Counseling: 3 semester hours***

Prerequisite: CNS ED 6010 or Consent of Instructor. This course is an introduction to relationship theory as applied to couples and family counseling. General systems theory, and social constructivism theory are reviewed. Students learn relationship interventions and beginning couple and family counseling techniques. Ethical, professional, and legal issues related to couples and family counseling are addressed.

***CNS ED 6510 Marriage Counseling And Enrichment: 3 semester hours***

Prerequisite: CNS ED 6500 or consent of instructor. This course focuses on the theory and techniques of marital or couples counseling and enrichment. Models and methods for prevention and treatment of relationship dysfunction are explored. Relationship developmental issues are addressed. Students are challenged to develop the critical skills necessary to be effective marriage counselors and marital-life educators.

***CNS ED 6520 Family Counseling: 3 semester hours***

Prerequisite: CNS ED 6500 and CNS ED 6270, or CNS ED 6370, or consent of instructor. This course offers an in-depth analysis of strategic, structural, experiential, communications, behavioral, and psychodynamic approaches to systems change and family counseling. The range of techniques and applied practices evolving from each orientation are explored as are normal and dysfunctional family processes. Various counseling modalities, such as individual, concurrent, collaborative, conjoint, group, intergenerational, and networking are also considered.

***CNS ED 6600 Theories and Techniques of Counseling Children and Adolescents: 3 semester hours***

Prerequisites: CNS ED 6000, CNS ED 6010 (with a grade of B or better in both courses) or permission of instructor. This course focuses on counseling theories and their applicability to the developmental special concerns of children and adolescents including child-at risk issues such as: abuse, suicide, divorce, and death and dying. Individual, group, and family intervention techniques and consultation skills will be emphasized, as well as legal and ethical considerations for counselors. Strategies presented can be utilized in a variety of settings. Multicultural considerations are also addressed.

**CNS ED 6610 Introduction to Play Therapy: 3 semester hours**

Prerequisites: Graduate standing. Provides students a foundation for understanding the history, theories and application of play therapy. Working with children in both agency and school settings will be discussed as well as how play therapy skills can be incorporated into the student's developing theoretical framework. Can count towards the Registered Play Therapist Credential.

**CNS ED 6620 Advanced Play Therapy: 3-4 semester hours**

Prerequisites: CNS ED 6610. Helps students further develop their play therapy skills, especially in the area of client-centered play therapy. Examines the use of play therapy with traumatized children and aggressive children in both school and agency settings. Group play therapy and sand tray therapy as additional modalities will also be explored. Ethical and legal issues as well as supervision in play therapy will be emphasized. Can count towards the Registered Play Therapist credential.

**CNS ED 6630 High School Transitions/Post-Secondary Counseling: 3 semester hours**

Prerequisites: CNS ED 6000, CNS ED 6010, CNS ED 6200; or consent of instructor. Knowledge and skills regarding development and implementation of programs and processes for guiding secondary education students through the transition from high school to employment (including military) and/or post-secondary education (voc-tech training, community college, university, etc.). Places post-secondary career planning within the context of a developmental guidance curriculum to address the needs of all students. Intended for graduate students who are preparing to become high school counselors, as well as those interested in college advising and career counseling.

**CNS ED 6700 Introduction To Addictive Behaviors And Addiction Counseling: 3 semester hours**

Prerequisites: CNS ED 6010 or consent of instructor. Exploration of the theoretical foundations of contemporary approaches to such addictive behaviors as alcohol and drug abuse, smoking, compulsive gambling, and sexual addiction. The nature, etiology, prevention, and treatment of addictions are discussed and analyzed from a variety of theoretical perspectives. The applications of these specific theoretical models to various treatment settings are examined. Multicultural considerations are also addressed.

**CNS ED 6710 Advanced Strategies in Addictions Counseling: 3 semester hours**

Prerequisites: CNS ED 6700 or consent of instructor. Study of advanced, empirically supported counseling approaches and techniques for the treatment of addictive behaviors. An emphasis is placed on screening and assessment procedures and on matching interventions to individual client and community needs.

**CNS ED 6720 Counseling Individuals with Co-Occurring Disorders: 3 semester hours**

Prerequisites: CNS ED 6700 or consent of instructor. This course introduces the student to the special needs, concerns, and problems encountered when counseling clients who have co-occurring substance use and mental health problems. Subject areas include an overview of screening and assessment, evidence-based practices, counseling approaches and psychopharmacology for co-occurring disorders.

**CNS ED 6810 Integrating Religion And Spirituality In Counseling: 3 semester hours**

This course is for counselors and students wishing to develop the methods to integrate religion and spirituality in counseling and learn about counseling strategies for persons of various religious backgrounds, the link between health and religion, and ethics involved in the assessment and integration of religion and spirituality in practice.

**CNS ED 6820 Counseling Women Toward Empowerment: 3 semester hours**

Prerequisites: CNS ED 6000, CNS ED 6010, and CNS ED 6270 or CNS ED 6370, or consent of instructor. An introduction to Women's issues in counseling. Relational theory, healthy female development, and an overview of clinical issues most common to females will be presented.

**CNS ED 6830 Counseling African American Clients: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor. This course is designed to promote an increased awareness and understanding of the psychological development and mental health needs of African American clients. This course also offers research-based theoretical strategies for counseling this diverse population.

**CNS ED 6840 Counseling Sexual Minorities: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor. This course is focused on affirmative perspectives on lesbian, gay, bisexual, and transgender (LGBT) issues and populations. All of the major professional mental health organizations have formal ethical guidelines requiring non-discrimination with regard to LGBT populations and all of the organizations are active in promoting affirmative perspectives. Students will learn current perspectives in the fields of counseling and psychology on LGBT issues necessary for adequate practice or research in this area. A major focus will be on developing awareness and knowledge related to these populations.

**CNS ED 6850 Social Class and Poverty Issues In Counseling: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of the instructor. This course focuses on the experience of poor people in the United States. Specifically, the circumstances of poverty, the consequences of living in poverty (on behaviors, aspirations, relationships, education, and health including mental health), and the impact of poverty on the helping relationship will be addressed. Personal, social, and cultural aspects of poverty will be examined in both rural and urban settings. One objective of this course is to reduce the psychological distance between the poor client and the non-poor counselor. Included in this endeavor are specific attitude and techniques designed to maximize the quality of a counselor's work with poorer clients.

**CNS ED 6860 Human Sexuality in Counseling: 3 semester hours**

Prerequisites: CNS ED 6000 and CNS ED 6010, or consent of instructor. This course will focus on integrating issues of human sexuality into the counseling process. The psycho-sexual development of the individual from birth throughout the life span will be discussed and compared to other developmental tasks at each age. Themes related to influences from family, culture, environment, socioeconomic, ethnic, and religious perceptions of sexuality will be integrated. The physiology of human sexual function will be addressed, including variations in sexual orientation and gender identity.

**CNS ED 7000 Advanced Theories And Foundations Of Counseling Psychology: 3 semester hours**

Prerequisites: Doctoral standing or instructor consent. A seminar on the discipline of counseling psychology, including its history, development, and current status. An important focus will be contemporary and emergent theories in the field.

**CNS ED 7010 Advanced Multicultural Counseling: 3 semester hours**

Prerequisites: CNS ED 6030 and doctoral standing or consent of instructor. This advanced course addresses theories and research in multicultural counseling.

**CNS ED 7020 Seminar In Counseling Research: 3 semester hours**

Prerequisites: ED REM 6710, doctoral standing or consent of instructor. The purpose of this course is to review and analyze current counseling research literature. Ethical issues will be addressed.

**CNS ED 7025 Advanced Counseling Research: 3 semester hours**

Prerequisites: CNS ED 7020 or consent of instructor. Engages students in the conduct of an empirical research project. Building from the research proposal developed in CNS ED 7020, students will obtain IRB approval, collect data, analyze the data, and write a manuscript reporting the results in journal article format.

**CNS ED 7030 Counselor Education And Supervision: 3 semester hours**

Prerequisites: Master's degree in Counseling. An introduction to clinical supervision in counseling. Theories, models, and research in supervision will be presented. Students will supervise master's level students in practicum and internship courses in counseling.

**CNS ED 7035 Counselor Education & Supervision Practicum: 3 semester hours**

Prerequisites: Admission to the Counseling Option in the Ed.D. or Ph.D. Program. Offers advanced training in counseling supervision. Students will supervise master's level students in practicum and internship courses in counseling. Students will be expected to maintain as assigned caseload of supervisees and attend three hours of weekly doctoral-level supervision.

**CNS ED 7075 Teaching, Learning, and Technology in Counselor Education: 3 semester hours**

Prerequisites: CNS ED 7000 and CNS ED 7770. Examines pedagogy and epistemology of counselor education. Philosophies of teaching, instructional design, instructional methods, assessment of learning, and the impact and use of technology in teaching will be explored within the framework of the eight core courses as defined by the Council for Accreditation of Counseling & Related Educational Programs (CACREP). Students will both learn and apply classroom teaching knowledge and skills.

**CNS ED 7400 Advanced Topics in School Counseling Leadership: 3 semester hours**

Prerequisites: Admission to the Counseling Option in the Ed.D. Program. Focuses on leadership roles and advanced skills for professional school counselors, school counseling supervisors, and evaluation strategies, and training and supervision strategies will be addressed, with a special emphasis on preventative and culturally sound interventions.

**CNS ED 7770 Doctoral Practicum: 3 semester hours**

Prerequisites: Doctoral Standing. One hundred clock hours of on-campus doctoral-level supervised counseling practice. Students will counsel clients and will be introduced to teaching and supervising beginning counseling trainees in a clinical context. As a prerequisite to the Doctoral Internship, students will be expected to demonstrate competence in skills required of counselor educators and clinical supervisors. Students will receive 1.5 hours of group and 1 hour of individual supervision by a graduate faculty member.

**CNS ED 7780 Doctoral Internship: 1-6 semester hours**

Prerequisites: CNS ED 7770; ED REM 7771; ED REM 7781. A 100-hour field experience for each semester-credit hour of enrollment under the direction of a graduate faculty member. Students provide counseling services to clients at field sites, teach and supervise beginning counseling trainees, and conduct clinical research projects. Students are supervised by a graduate faculty member in two hours per week of group supervision, and they receive one hour per week of individual supervision by the field site supervisor.

## Criminology & Criminal Justice

### Courses

**CRIMIN 1100 Introduction To Criminology And Criminal Justice: 3 semester hours**

Introduction to the basic concepts and approaches in the study of criminology and criminal justice. The major components of the criminal justice system are examined.

**CRIMIN 1110 Theories Of Crime: 3 semester hours**

Prerequisite: CRIMIN 1100. Introduction to major theoretical approaches to the study of crime and justice.

**CRIMIN 1120 Criminal Law: 3 semester hours**

Prerequisite: CRIMIN 1100. Analysis of substantive criminal law, evidence and judicial procedure.

**CRIMIN 1150 Violence In America: 3 semester hours**

Prerequisites: CRIMIN 1100 or consent of instructor. Overview of patterns and correlates of violence in America. Emphasis on the variety of forms of violent crimes, such as murder, assault, robbery, rape, and gang violence. Includes an examination of violence as a response to lawbreaking.

**CRIMIN 1200 Foundations Of Law: An Introduction To Legal Studies: 3 semester hours**

Same as POL SCI 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

**CRIMIN 2130 Criminal Justice Policy: 3 semester hours**

Prerequisite: CRIMIN 1100. Introduction to criminal justice policy making, planning and implementation.

**CRIMIN 2180 Alcohol, Drugs And Society: 3 semester hours**

Same as SOC 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of Physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

**CRIMIN 2210 Research Methods In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: CRIMIN 1100. Examination of basic methods of research design, measurement and data collection in criminology and criminal justice.

**CRIMIN 2220 Statistical Analysis In Criminology And Criminal Justice: 4 semester hours**

Prerequisites: CRIMIN 2210 and the university math proficiency requirement. An introduction to techniques of quantitative data analysis. Both descriptive and inferential statistics are applied to problems in criminology and criminal justice. Includes a one hour lab. Courses with a CRIMIN 2220 prerequisite require a minimum grade of "C" to be earned by the student in this course.

**CRIMIN 2240 Policing: 3 semester hours**

Prerequisite: CRIMIN 1100. Overview of current and historical perspectives on the function of American policing. Emphasis on the management of police organizations and relationships with the community.

**CRIMIN 2250 Courts: 3 semester hours**

Prerequisite: CRIMIN 1100. This course provides an overview of current and historical perspectives on the function of the American courts. Emphasis on the dynamics of courthouse justice, with special attention placed on the roles of the prosecutors, judges, defense attorneys, defendants, victims, and jurors regarding the decisions that impact the adjudication process.

**CRIMIN 2251 Youth Gangs: 3 semester hours**

Prerequisites: CRIMIN 1100 or consent of instructor. This course provides an overview of research and policy concerning youth gangs. Definitional and methodological issues will be examined, along with both qualitative and quantitative research. Topics include: the causes of gangs and gang involvement; and variations by race, gender, time period, and geography.

**CRIMIN 2252 Philosophical Foundations Of Criminal Justice: 3 semester hours**

.

**CRIMIN 2260 Corrections: 3 semester hours**

Prerequisite: CRIMIN 1100. Examination of correctional philosophies and practices. Emphasis on the history of corrections, the formal and informal organization of correctional facilities, inmate rights, and correctional alternatives.

**CRIMIN 3043 History Of Crime And Justice: 3 semester hours**

Same as HIST 3043. Prerequisites: Junior standing or consent of instructor. The analysis development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison and the juvenile court.

**CRIMIN 3209 Forensic Anthropology: 4 semester hours**

Same as ANTHRO 3209. Prerequisites: ANTHRO 1005 or BIOL 1102 or consent of instructor. Students learn basic human dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to age and sex skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to skeletal remains.

**CRIMIN 3230 Crime Prevention: 3 semester hours**

Prerequisites: Junior standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of situational, social, and legislative approaches to the prevention of crime and delinquency. Emphasis on theories, implementation, and consequences of these approaches.

**CRIMIN 3270 Juvenile Justice And Delinquency: 3 semester hours**

Prerequisite: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of formal and informal responses to juvenile delinquency. Emphasis on theories of delinquency and the decision-making processes of police, court and probation officials.

**CRIMIN 3280 Internship In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: Junior standing. Internship under faculty supervision in criminal justice setting. May be repeated for one credit.

**CRIMIN 3290 Special Readings: 1-6 semester hours**

Prerequisite: Consent of instructor. Individualized study, under regular faculty supervision, designed to meet particular educational needs of selected students.

**CRIMIN 3305 Comparative Criminology and Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of crime and criminal justice systems in selected cultures. Emphasis on the ways in which these cultures define and respond to criminal behavior. Fulfills CRIMIN diversity requirement.

**CRIMIN 3310 Computers In Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Use of computers, data base systems, and software applications in research and professional practice.

**CRIMIN 3320 The Death Penalty: 3 semester hours**

Prerequisite: CRIMIN 1100. An examination of the history, application, and attitudes toward the death penalty.

**CRIMIN 3330 White Collar Crime: 3 semester hours**

Prerequisites: Junior Standing, CRIMIN 1120, CRIMIN 2130, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the physical and financial harm caused by crimes committed by corporations and business employees. Theoretical and empirical perspectives will be examined. Topics include: definitional issues and ethics; public perceptions; social, political and economic impact; and legal decision-making.

**CRIMIN 3345 Rights Of The Offender: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of the objectives of criminal law regarding the rights of persons suspected or convicted of crime. Emphasis on rights regarding the police, the court, and in correctional settings.

**CRIMIN 4300 Communities And Crime: 3 semester hours**

Same as SOC 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

**CRIMIN 4320 Forms Of Criminal Behavior: 3 semester hours**

Same as SOC 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

**CRIMIN 4325 Gender, Crime, And Justice: 3 semester hours**

Same as SOC 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220 and ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills CRIMIN diversity requirement.

**CRIMIN 4330 Violence Against Women: 3 semester hours**

Same as GS 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

**CRIMIN 4335 Probation And Parole: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, CRIMIN 2260, and ENGL 3100, or consent of instructor. Analysis of alternatives to incarceration and postincarceration supervision. emphasis on diversion, restitution, and community reintegration.

**CRIMIN 4340 Race, Crime, And Justice: 3 semester hours**

Same as SOC 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CRIMIN diversity requirement.

**CRIMIN 4350 Victimology: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of major perspectives on victimization. Emphasis on patterns of victimization, the role of victims in the generation of crime, and the experience of the victim in the criminal justice system.

**CRIMIN 4360 Sociology of Law: 3 semester hours**

Same As SOC 4360. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

**CRIMIN 4370 Crime, Justice, and the Media: 3 semester hours**

Prerequisites: ENGL 3100. This course provides a fresh take on issues of crime and justice through the exploration of media, such as *The Wire*, and its role in shaping the public's perception of crime and justice. Students will learn to synthesize ideas and perspectives about crime and justice as well as critically assess popular media images of crime.

**CRIMIN 4380 Special Topics In Criminology And Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. In-depth study of a selected topic in criminology and criminal justice.

**CRIMIN 4390 Seminar In Criminology And Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. In this capstone course, students demonstrate the ability to work independently, integrating theory and research in criminology and criminal justice in a major paper supervised by the instructor.

**CRIMIN 4487 Philosophy Of Law: 3 semester hours**

Same As PHIL 4487. Prerequisites: CRIMIN 1100 and 3 hours of philosophy and/or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment.

**CRIMIN 5415 Foundations Of Criminological Theory: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. Examination of the history of criminological thought incorporating the major works of such theorists as Bentham, Beccaria, Marx, Durkheim, Lombroso, Sutherland and Merton.

**CRIMIN 5533 Philosophy Of Law: 3 semester hours**

Same as PHIL 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

**CRIMIN 6400 Proseminar: 3 semester hours**

Prerequisite: Graduate standing. (Must be taken in the first Semester). A critical examination of theoretical, methodological and policy issues in criminology and criminal justice. Focus is on the nature of crime, policing, pretrial processes, adjudication and corrections.

**CRIMIN 6405 Methods: 3 semester hours**

Prerequisite: Graduate standing and consent of instructor. Examination of basic methods for research design and data collection. Topics include participant observation and interviewing, survey research, aggregate data analysis, and experimental design.

**CRIMIN 6410 Statistical Applications In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: CRIMIN 6405. Examination of elementary principles of quantitative analysis and their application to crime and justice problems. Topics include univariate, bivariate and multivariate procedures for discrete and continuous data, and a comprehensive introduction to ordinary least squares regression.

**CRIMIN 6420 Contemporary Criminal Theories: 3 semester hours**

Prerequisite: CRIMIN 5415. Examination of contemporary explanations of crime and criminal justice. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

**CRIMIN 6422 Law Courts, And Public Policy: 3 semester hours**

Same as POL SCI 6422. Prerequisite: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate), that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

**CRIMIN 6436 Comparative Criminology: 3 semester hours**

Prerequisite: Graduate Standing. Examination of crime and criminal justice systems in world perspective.

**CRIMIN 6440 Nature Of Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of patterns and correlates of crime at the individual, situational, and aggregate levels. Topics include definitions of crime, offending topologies, and criminal careers.

**CRIMIN 6441 Juvenile Delinquency: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of youth crime and juvenile offenders. Topics include definitions of juvenile crime, and theories of juvenile crime causation in the U.S.

**CRIMIN 6442 Communities And Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the trends and sources of crime and social disorder across communities. The course emphasizes relationships among crime, neighborhood change, neighborhood responses to crime, and public policies.

**CRIMIN 6443 Violent Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of violent offending across time and space. Topics include conceptions and typologies of violent crimes and offenders, victim-offender relationships, and efforts to predict and control violent offending.

**CRIMIN 6445 Property Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of property offending across time and space. Topics include conceptions and typologies of property crimes and offenders, victim-offender relationships, and efforts to predict and control property offending.

**CRIMIN 6448 Victimization: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the risks and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature of the injuries they experience and criminal justice procedures that involve them.

**CRIMIN 6450 Criminal Justice Process And Policy: 3 semester hours**

Prerequisite: Graduate standing. An analysis of criminal justice as a network of decisions and complex organizations. Topics include sources of criminal justice policy, policy agendas, implementation and evaluation.

**CRIMIN 6452 The Police: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Historical, social and political analysis of policing in America. Examination of federal, state, county and municipal agencies.

**CRIMIN 6454 Corrections: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the history, forms, and functions of correctional philosophies, institutions, programs and policies. Topics include the structure and functions of prisons and jails, community corrections, intermediate sanctions, and the growth of correctional control in modern society.

**CRIMIN 6465 Qualitative Research Design: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of participant observation and informant and respondent interviewing. Topics include gaining access, sampling, data collection and analysis, and legal and ethical concerns.

**CRIMIN 6470 Quantitative Research Design: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Examination of experimental, longitudinal, and cross-sectional designs. Sources of data, sampling procedures, operational definitions, and issues of reliability are also discussed.

**CRIMIN 6471 Evaluating Criminal Justice Interventions: 3 semester hours**

Prerequisites: CRIMIN 6405 and CRIMIN 6410. This course examines a broad range of interventions designed to prevent crime or improve some aspect of the criminal justice system. The validity, reliability, and feasibility of differing intervention designs are addressed. Several major criminal justice evaluations are discussed.

**CRIMIN 6480 Multivariate Statistics In Criminology: 3 semester hours**

Prerequisites: CRIMIN 6405 and CRIMIN 6470. Introduction to the general linear model with applications to multivariate problems in criminal justice and criminology. Topics include advanced ordinary least squares, causal modeling, time series analysis, simultaneous equations, and analysis of limited dependent variables.

**CRIMIN 6485 Directed Readings/Research In Criminology And Criminal Justice: 1-6 semester hours**

Prerequisite: Consent of instructor. Directed reading and research, under faculty supervision, designed to meet particular educational needs of selected students.

**CRIMIN 6495 Internship In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Supervised placements with criminal justice agencies. Designed primarily for students with limited field experience.

**CRIMIN 6498 M A Thesis Research: 1-6 semester hours**

Prerequisite: Graduate standing and consent of instructor.

**CRIMIN 6550 Seminar in Criminology and Criminal Justice: 3 semester hours**

Prerequisites: Graduate standing and CRIMIN 5415, CRIMIN 6400, and CRIMIN 6405 or consent of the instructor. Research and policy approaches to the study of criminology and criminal justice. Class may be repeated for credit when the subject matter is different.

**CRIMIN 7499 Ph.D. Dissertation Research: 1-6 semester hours**

To be arranged.

## Courses

**CRIMIN 1100 Introduction To Criminology And Criminal Justice: 3 semester hours**

Introduction to the basic concepts and approaches in the study of criminology and criminal justice. The major components of the criminal justice system are examined.

**CRIMIN 1110 Theories Of Crime: 3 semester hours**

Prerequisite: CRIMIN 1100. Introduction to major theoretical approaches to the study of crime and justice.

**CRIMIN 1120 Criminal Law: 3 semester hours**

Prerequisite: CRIMIN 1100. Analysis of substantive criminal law, evidence and judicial procedure.

**CRIMIN 1150 Violence In America: 3 semester hours**

Prerequisites: CRIMIN 1100 or consent of instructor. Overview of patterns and correlates of violence in America. Emphasis on the variety of forms of violent crimes, such as murder, assault, robbery, rape, and gang violence. Includes an examination of violence as a response to lawbreaking.

**CRIMIN 1200 Foundations Of Law: An Introduction To Legal Studies: 3 semester hours**

Same as POL SCI 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

**CRIMIN 2130 Criminal Justice Policy: 3 semester hours**

Prerequisite: CRIMIN 1100. Introduction to criminal justice policy making, planning and implementation.

**CRIMIN 2180 Alcohol, Drugs And Society: 3 semester hours**

Same as SOC 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of Physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

**CRIMIN 2210 Research Methods In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: CRIMIN 1100. Examination of basic methods of research design, measurement and data collection in criminology and criminal justice.

**CRIMIN 2220 Statistical Analysis In Criminology And Criminal Justice: 4 semester hours**

Prerequisites: CRIMIN 2210 and the university math proficiency requirement. An introduction to techniques of quantitative data analysis. Both descriptive and inferential statistics are applied to problems in criminology and criminal justice. Includes a one hour lab. Courses with a CRIMIN 2220 prerequisite require a minimum grade of "C" to be earned by the student in this course.

**CRIMIN 2240 Policing: 3 semester hours**

Prerequisite: CRIMIN 1100. Overview of current and historical perspectives on the function of American policing. Emphasis on the management of police organizations and relationships with the community.

**CRIMIN 2250 Courts: 3 semester hours**

Prerequisite: CRIMIN 1100. This course provides an overview of current and historical perspectives on the function of the American courts. Emphasis on the dynamics of courthouse justice, with special attention placed on the roles of the prosecutors, judges, defense attorneys, defendants, victims, and jurors regarding the decisions that impact the adjudication process.

**CRIMIN 2251 Youth Gangs: 3 semester hours**

Prerequisites: CRIMIN 1100 or consent of instructor. This course provides an overview of research and policy concerning youth gangs. Definitional and methodological issues will be examined, along with both qualitative and quantitative research. Topics include: the causes of gangs and gang involvement; and variations by race, gender, time period, and geography.

**CRIMIN 2252 Philosophical Foundations Of Criminal Justice: 3 semester hours**

.

**CRIMIN 2260 Corrections: 3 semester hours**

Prerequisite: CRIMIN 1100. Examination of correctional philosophies and practices. Emphasis on the history of corrections, the formal and informal organization of correctional facilities, inmate rights, and correctional alternatives.

**CRIMIN 3043 History Of Crime And Justice: 3 semester hours**

Same as HIST 3043. Prerequisites: Junior standing or consent of instructor. The analysis development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison and the juvenile court.

**CRIMIN 3209 Forensic Anthropology: 4 semester hours**

Same as ANTHRO 3209. Prerequisites: ANTHRO 1005 or BIOL 1102 or consent of instructor. Students learn basic human dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to age and sex skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to skeletal remains.

**CRIMIN 3230 Crime Prevention: 3 semester hours**

Prerequisites: Junior standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of situational, social, and legislative approaches to the prevention of crime and delinquency. Emphasis on theories, implementation, and consequences of these approaches.

**CRIMIN 3270 Juvenile Justice And Delinquency: 3 semester hours**

Prerequisite: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of formal and informal responses to juvenile delinquency. Emphasis on theories of delinquency and the decision-making processes of police, court and probation officials.

**CRIMIN 3280 Internship In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: Junior standing. Internship under faculty supervision in criminal justice setting. May be repeated for one credit.

**CRIMIN 3290 Special Readings: 1-6 semester hours**

Prerequisite: Consent of instructor. Individualized study, under regular faculty supervision, designed to meet particular educational needs of selected students.

**CRIMIN 3305 Comparative Criminology and Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of crime and criminal justice systems in selected cultures. Emphasis on the ways in which these cultures define and respond to criminal behavior. Fulfills CRIMIN diversity requirement.

**CRIMIN 3310 Computers In Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Use of computers, data base systems, and software applications in research and professional practice.

**CRIMIN 3320 The Death Penalty: 3 semester hours**

Prerequisite: CRIMIN 1100. An examination of the history, application, and attitudes toward the death penalty.

**CRIMIN 3330 White Collar Crime: 3 semester hours**

Prerequisites: Junior Standing, CRIMIN 1120, CRIMIN 2130, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the physical and financial harm caused by crimes committed by corporations and business employees. Theoretical and empirical perspectives will be examined. Topics include: definitional issues and ethics; public perceptions; social, political and economic impact; and legal decision-making.

**CRIMIN 3345 Rights Of The Offender: 3 semester hours**

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of the objectives of criminal law regarding the rights of persons suspected or convicted of crime. Emphasis on rights regarding the police, the court, and in correctional settings.

**CRIMIN 4300 Communities And Crime: 3 semester hours**

Same as SOC 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

**CRIMIN 4320 Forms Of Criminal Behavior: 3 semester hours**

Same as SOC 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

**CRIMIN 4325 Gender, Crime, And Justice: 3 semester hours**

Same as SOC 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220 and ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills CRIMIN diversity requirement.

**CRIMIN 4330 Violence Against Women: 3 semester hours**

Same as GS 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

**CRIMIN 4335 Probation And Parole: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, CRIMIN 2260, and ENGL 3100, or consent of instructor. Analysis of alternatives to incarceration and postincarceration supervision. emphasis on diversion, restitution, and community reintegration.

**CRIMIN 4340 Race, Crime, And Justice: 3 semester hours**

Same as SOC 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CRIMIN diversity requirement.

**CRIMIN 4350 Victimology: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of major perspectives on victimization. Emphasis on patterns of victimization, the role of victims in the generation of crime, and the experience of the victim in the criminal justice system.

**CRIMIN 4360 Sociology of Law: 3 semester hours**

Same As SOC 4360. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

**CRIMIN 4370 Crime, Justice, and the Media: 3 semester hours**

Prerequisites: ENGL 3100. This course provides a fresh take on issues of crime and justice through the exploration of media, such as *The Wire*, and its role in shaping the public's perception of crime and justice. Students will learn to synthesize ideas and perspectives about crime and justice as well as critically assess popular media images of crime.

**CRIMIN 4380 Special Topics In Criminology And Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. In-depth study of a selected topic in criminology and criminal justice.

**CRIMIN 4390 Seminar In Criminology And Criminal Justice: 3 semester hours**

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. In this capstone course, students demonstrate the ability to work independently, integrating theory and research in criminology and criminal justice in a major paper supervised by the instructor.

**CRIMIN 4487 Philosophy Of Law: 3 semester hours**

Same As PHIL 4487. Prerequisites: CRIMIN 1100 and 3 hours of philosophy and/or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment.

**CRIMIN 5415 Foundations Of Criminological Theory: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. Examination of the history of criminological thought incorporating the major works of such theorists as Bentham, Beccaria, Marx, Durkheim, Lombroso, Sutherland and Merton.

**CRIMIN 5533 Philosophy Of Law: 3 semester hours**

Same as PHIL 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

**CRIMIN 6400 Proseminar: 3 semester hours**

Prerequisite: Graduate standing. (Must be taken in the first Semester). A critical examination of theoretical, methodological and policy issues in criminology and criminal justice. Focus is on the nature of crime, policing, pretrial processes, adjudication and corrections.

**CRIMIN 6405 Methods: 3 semester hours**

Prerequisite: Graduate standing and consent of instructor. Examination of basic methods for research design and data collection. Topics include participant observation and interviewing, survey research, aggregate data analysis, and experimental design.

**CRIMIN 6410 Statistical Applications In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: CRIMIN 6405. Examination of elementary principles of quantitative analysis and their application to crime and justice problems. Topics include univariate, bivariate and multivariate procedures for discrete and continuous data, and a comprehensive introduction to ordinary least squares regression.

**CRIMIN 6420 Contemporary Criminal Theories: 3 semester hours**

Prerequisite: CRIMIN 5415. Examination of contemporary explanations of crime and criminal justice. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

**CRIMIN 6422 Law Courts, And Public Policy: 3 semester hours**

Same as POL SCI 6422. Prerequisite: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate), that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

**CRIMIN 6436 Comparative Criminology: 3 semester hours**

Prerequisite: Graduate Standing. Examination of crime and criminal justice systems in world perspective.

**CRIMIN 6440 Nature Of Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of patterns and correlates of crime at the individual, situational, and aggregate levels. Topics include definitions of crime, offending topologies, and criminal careers.

**CRIMIN 6441 Juvenile Delinquency: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of youth crime and juvenile offenders. Topics include definitions of juvenile crime, and theories of juvenile crime causation in the U.S.

**CRIMIN 6442 Communities And Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the trends and sources of crime and social disorder across communities. The course emphasizes relationships among crime, neighborhood change, neighborhood responses to crime, and public policies.

**CRIMIN 6443 Violent Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of violent offending across time and space. Topics include conceptions and typologies of violent crimes and offenders, victim-offender relationships, and efforts to predict and control violent offending.

**CRIMIN 6445 Property Crime: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of property offending across time and space. Topics include conceptions and typologies of property crimes and offenders, victim-offender relationships, and efforts to predict and control property offending.

**CRIMIN 6448 Victimization: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the risks and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature of the injuries they experience and criminal justice procedures that involve them.

**CRIMIN 6450 Criminal Justice Process And Policy: 3 semester hours**

Prerequisite: Graduate standing. An analysis of criminal justice as a network of decisions and complex organizations. Topics include sources of criminal justice policy, policy agendas, implementation and evaluation.

**CRIMIN 6452 The Police: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Historical, social and political analysis of policing in America. Examination of federal, state, county and municipal agencies.

**CRIMIN 6454 Corrections: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of the history, forms, and functions of correctional philosophies, institutions, programs and policies. Topics include the structure and functions of prisons and jails, community corrections, intermediate sanctions, and the growth of correctional control in modern society.

**CRIMIN 6465 Qualitative Research Design: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Examination of participant observation and informant and respondent interviewing. Topics include gaining access, sampling, data collection and analysis, and legal and ethical concerns.

**CRIMIN 6470 Quantitative Research Design: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Examination of experimental, longitudinal, and cross-sectional designs. Sources of data, sampling procedures, operational definitions, and issues of reliability are also discussed.

**CRIMIN 6471 Evaluating Criminal Justice Interventions: 3 semester hours**

Prerequisites: CRIMIN 6405 and CRIMIN 6410. This course examines a broad range of interventions designed to prevent crime or improve some aspect of the criminal justice system. The validity, reliability, and feasibility of differing intervention designs are addressed. Several major criminal justice evaluations are discussed.

**CRIMIN 6480 Multivariate Statistics In Criminology: 3 semester hours**

Prerequisites: CRIMIN 6405 and CRIMIN 6470. Introduction to the general linear model with applications to multivariate problems in criminal justice and criminology. Topics include advanced ordinary least squares, causal modeling, time series analysis, simultaneous equations, and analysis of limited dependent variables.

**CRIMIN 6485 Directed Readings/Research In Criminology And Criminal Justice: 1-6 semester hours**

Prerequisite: Consent of instructor. Directed reading and research, under faculty supervision, designed to meet particular educational needs of selected students.

**CRIMIN 6495 Internship In Criminology And Criminal Justice: 3 semester hours**

Prerequisite: Graduate standing or consent of instructor. Supervised placements with criminal justice agencies. Designed primarily for students with limited field experience.

**CRIMIN 6498 M A Thesis Research: 1-6 semester hours**

Prerequisite: Graduate standing and consent of instructor.

**CRIMIN 6550 Seminar in Criminology and Criminal Justice: 3 semester hours**

Prerequisites: Graduate standing and CRIMIN 5415, CRIMIN 6400, and CRIMIN 6405 or consent of the instructor. Research and policy approaches to the study of criminology and criminal justice. Class may be repeated for credit when the subject matter is different.

**CRIMIN 7499 Ph.D. Dissertation Research: 1-6 semester hours**

To be arranged.

# Early Childhood Education

## Courses

### ***ECH ED 3300 Introduction To Early Childhood Education: 3 semester hours***

Prerequisites: Level I. Students will use theoretical bases as well as on site observations to develop an awareness of teaching learning strategies appropriate for the developmental needs of children from birth through age eight. Scheduling, classroom arrangement, and child management practices will be considered. Students will develop their own philosophy of early childhood education.

### ***ECH ED 3301 Early Childhood Special Education Processes and Trends: 3 semester hours***

Prerequisites: Completion of Level 1 requirements. Focus on the history and federal laws related to the early childhood special education process. Examination of child development theories and assessment to determine if developmental delays exist. Emphasis on the importance of collaboration between teachers and therapists for service delivery, designing effective transition plans and integrating intervention services into a developmentally appropriate curriculum.

### ***ECH ED 3303 Curriculum And Practice Laboratory: Infant/Toddler: 1 semester hour***

Classroom experience in infant or toddler classrooms under directions of University personnel. Must be taken concurrently with ECH ED 3313 Curriculum and Practice: Infant/Toddler.

### ***ECH ED 3304 Curriculum And Practice Laboratory: Preschool: 1 semester hour***

Classroom experience in preschool classrooms under direction of university personnel. Must be taken concurrently with ECH ED 3314 Curriculum and Practice: Preschool.

### ***ECH ED 3313 Curriculum And Practice: Infant/Toddler: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for children from birth to 30 months. Must be taken concurrently with ECH ED 3303.

### ***ECH ED 3314 Curriculum And Practice: Preschool Education: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for the inclusive preschool classroom with emphasis on science, social studies, creative activities and technology. Must be taken concurrently with ECH ED 3304.

### ***ECH ED 3332 Literacy, Learning and Instruction For The Young Child: 3 semester hours***

Prerequisites: Level I. Attention on the home language and environment of young children as they construct knowledge of print from birth to age eight. Critical examination of the range of opportunities for early literacy learning available to children from economically advantaged and disadvantaged communities. Emphasis on meaningful, culturally, and developmentally appropriate activities for fostering beginning reading and writing. Focus on strategies for involving families and capitalizing on community resources in promoting language and literacy learning for young children. This course may be applied toward a Literacy Minor.

### ***ECH ED 3350 Child/Family and Education and Community Involvement: 3 semester hours***

Prerequisites: ECH ED 3300. Formal Admission to the Teacher Education Program. This course is designed to provide students with the knowledge and skills needed to work successfully with diverse families and family groups in individual and community settings. The focus will be on strengthening adult-child relationships and family-staff relationships in the home, school, and community settings. Family involvement in early childhood programs and sharing information with families will be stressed.

### ***ECH ED 4317 Implementation, Evaluation, and Assessment in Early Childhood Education: 3 semester hours***

Prerequisites: Level I and Level II, admission to the teacher education program, ECH ED 3300. Techniques of observing children and using assessment instruments to plan and implement individual program plans for early childhood. Practicum experience required.

### ***ECH ED 4320 Classroom Management: 3 semester hours***

Same as SEC ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

### ***ECH ED 4348 The Acquisition Of Mathematical and Science Concepts: 3 semester hours***

Prerequisites: Formal admission to the Teacher Education Program, ED PSY 3312, and MATH 1150. Applications of the major theorists to mathematics reasoning and scientific inquiry. Content is appropriate for pre-K to third grade learners. Research and its implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered.

### ***ECH ED 4989 Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in a preschool and elementary (as applicable) setting with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit .

***ECH ED 4990 Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ECH ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ECH ED 4991 Student Teaching In Early Childhood Education II: 6 semester hours***

Prerequisites: Level II, ECH ED 3313, ECH ED 3314, ECH ED 4989, Must be taken with ECH ED 4991, and must immediately precede ECH ED 4991 in the semester. Must follow ECH ED 4990 in the same semester. Clinical teaching experience in early childhood education classrooms in the schools under University and school supervision. Assignments will be in different school districts buildings, serving families of different socio-economic and cultural backgrounds, and at different age/grade levels from those of the ECH ED 4990 assignments. Required of all majors in early childhood education. Not available for graduate credit.

***ECH ED 5989 Practicum I: Early Childhood/Early Childhood Special Education Site Based Experience: 2 semester hours***

Prerequisites: Level I and Level II requirements. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods courses assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ECH ED 5990 Practicum II: Early Childhood/Early Childhood Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ECH ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Teacher candidates collect data for a research project.

***ECH ED 6321 Parent And Community Resources In Early Childhood Education: 3 semester hours***

Prerequisite: Graduate Standing. Competencies for working with parents and community agencies will be developed through a study of community and community resources. Procedures for parent participation and use of service agencies in the education of all young children, including those with special needs, will be examined.

***ECH ED 6348 Understanding and Supporting Children's Math and Science Inquiry: 2 semester hours***

Prerequisites: ED PSY 6215, ECH ED 6412. Advanced study of current cognitive theory to support the development of children's inquiry skills. Curriculum development and implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. National and state standards in math and science will provide a framework for teaching strategies.

***ECH ED 6412 Foundations Of Early Childhood Education: 3 semester hours***

Prerequisite: A course in child psychology or equivalent. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention will also be directed to the implementation of such programs, problems of parent involvement and the social environment of the children.

***ECH ED 6413 Educational Role Of Play: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Emphasizes play as a constructive process with application to cognitive and social development. Special attention to facilitating play in early childhood classrooms.

***ECH ED 6415 Organization And Development Of Early Childhood Programs: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Strategies for the effective organization and development of programs for children from diverse cultures, ages birth through age eight years, will be studied. Research and theory in funding and budgeting, staffing and professional development, and selection, development, and assessment of program curriculum will be emphasized. Long-range planning for program stability and involvement in advocacy issues will be covered.

***ECH ED 6490 Internship: 1-10 semester hours***

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation and related professional activities.

***ECH ED 6497 Problems: 1-10 semester hours***

Prerequisite: Graduate standing. Individual study on topics pertaining to early childhood education.

***ECH ED 6535 Assessment, Curriculum, and Research Based Practice Birth-Grade 3: 2 semester hours***

Prerequisites: ED PSY 6030 or ECH ED 6412. Advanced studies in curriculum design, assessment, and research based practice for children from birth through eight years, with primary emphasis on birth through 5 years. Students will learn to develop curriculum based upon observation of children and their interests; child development theory and research; as well as the diverse needs of children by considering culture, context, and family relationships. Must take concurrently with ECH ED 6536.

***ECH ED 6536 Early Childhood Pre-Primary Practicum: 2 semester hours***

Prerequisites: ED PSY 6215, ELE ED 5310A or ECH ED 6412. The focus of this practicum is observation of and participation in classrooms of children birth through five years. Concurrent registration in ECH ED 6535 required.

## Courses

### ***ECH ED 3300 Introduction To Early Childhood Education: 3 semester hours***

Prerequisites: Level I. Students will use theoretical bases as well as on site observations to develop an awareness of teaching learning strategies appropriate for the developmental needs of children from birth through age eight. Scheduling, classroom arrangement, and child management practices will be considered. Students will develop their own philosophy of early childhood education.

### ***ECH ED 3301 Early Childhood Special Education Processes and Trends: 3 semester hours***

Prerequisites: Completion of Level 1 requirements. Focus on the history and federal laws related to the early childhood special education process. Examination of child development theories and assessment to determine if developmental delays exist. Emphasis on the importance of collaboration between teachers and therapists for service delivery, designing effective transition plans and integrating intervention services into a developmentally appropriate curriculum.

### ***ECH ED 3303 Curriculum And Practice Laboratory: Infant/Toddler: 1 semester hour***

Classroom experience in infant or toddler classrooms under directions of University personnel. Must be taken concurrently with ECH ED 3313 Curriculum and Practice: Infant/Toddler.

### ***ECH ED 3304 Curriculum And Practice Laboratory: Preschool: 1 semester hour***

Classroom experience in preschool classrooms under direction of university personnel. Must be taken concurrently with ECH ED 3314 Curriculum and Practice: Preschool.

### ***ECH ED 3313 Curriculum And Practice: Infant/Toddler: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for children from birth to 30 months. Must be taken concurrently with ECH ED 3303.

### ***ECH ED 3314 Curriculum And Practice: Preschool Education: 2 semester hours***

Prerequisites: ECH ED 3300. Design and implementation of integrated curriculum for the inclusive preschool classroom with emphasis on science, social studies, creative activities and technology. Must be taken concurrently with ECH ED 3304.

### ***ECH ED 3332 Literacy, Learning and Instruction For The Young Child: 3 semester hours***

Prerequisites: Level I. Attention on the home language and environment of young children as they construct knowledge of print from birth to age eight. Critical examination of the range of opportunities for early literacy learning available to children from economically advantaged and disadvantaged communities. Emphasis on meaningful, culturally, and developmentally appropriate activities for fostering beginning reading and writing. Focus on strategies for involving families and capitalizing on community resources in promoting language and literacy learning for young children. This course may be applied toward a Literacy Minor.

### ***ECH ED 3350 Child/Family and Education and Community Involvement: 3 semester hours***

Prerequisites: ECH ED 3300. Formal Admission to the Teacher Education Program. This course is designed to provide students with the knowledge and skills needed to work successfully with diverse families and family groups in individual and community settings. The focus will be on strengthening adult-child relationships and family-staff relationships in the home, school, and community settings. Family involvement in early childhood programs and sharing information with families will be stressed.

### ***ECH ED 4317 Implementation, Evaluation, and Assessment in Early Childhood Education: 3 semester hours***

Prerequisites: Level I and Level II, admission to the teacher education program, ECH ED 3300. Techniques of observing children and using assessment instruments to plan and implement individual program plans for early childhood. Practicum experience required.

### ***ECH ED 4320 Classroom Management: 3 semester hours***

Same as SEC ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

### ***ECH ED 4348 The Acquisition Of Mathematical and Science Concepts: 3 semester hours***

Prerequisites: Formal admission to the Teacher Education Program, ED PSY 3312, and MATH 1150. Applications of the major theorists to mathematics reasoning and scientific inquiry. Content is appropriate for pre-K to third grade learners. Research and its implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered.

### ***ECH ED 4989 Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in a preschool and elementary (as applicable) setting with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit .

***ECH ED 4990 Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ECH ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ECH ED 4991 Student Teaching In Early Childhood Education II: 6 semester hours***

Prerequisites: Level II, ECH ED 3313, ECH ED 3314, ECH ED 4989, Must be taken with ECH ED 4991, and must immediately precede ECH ED 4991 in the semester. Must follow ECH ED 4990 in the same semester. Clinical teaching experience in early childhood education classrooms in the schools under University and school supervision. Assignments will be in different school districts buildings, serving families of different socio-economic and cultural backgrounds, and at different age/grade levels from those of the ECH ED 4990 assignments. Required of all majors in early childhood education. Not available for graduate credit.

***ECH ED 5989 Practicum I: Early Childhood/Early Childhood Special Education Site Based Experience: 2 semester hours***

Prerequisites: Level I and Level II requirements. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods courses assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ECH ED 5990 Practicum II: Early Childhood/Early Childhood Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ECH ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k; or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Teacher candidates collect data for a research project.

***ECH ED 6321 Parent And Community Resources In Early Childhood Education: 3 semester hours***

Prerequisite: Graduate Standing. Competencies for working with parents and community agencies will be developed through a study of community and community resources. Procedures for parent participation and use of service agencies in the education of all young children, including those with special needs, will be examined.

***ECH ED 6348 Understanding and Supporting Children's Math and Science Inquiry: 2 semester hours***

Prerequisites: ED PSY 6215, ECH ED 6412. Advanced study of current cognitive theory to support the development of children's inquiry skills. Curriculum development and implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. National and state standards in math and science will provide a framework for teaching strategies.

***ECH ED 6412 Foundations Of Early Childhood Education: 3 semester hours***

Prerequisite: A course in child psychology or equivalent. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention will also be directed to the implementation of such programs, problems of parent involvement and the social environment of the children.

***ECH ED 6413 Educational Role Of Play: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Emphasizes play as a constructive process with application to cognitive and social development. Special attention to facilitating play in early childhood classrooms.

***ECH ED 6415 Organization And Development Of Early Childhood Programs: 3 semester hours***

Prerequisites: ECH ED 3300 or equivalent. Strategies for the effective organization and development of programs for children from diverse cultures, ages birth through age eight years, will be studied. Research and theory in funding and budgeting, staffing and professional development, and selection, development, and assessment of program curriculum will be emphasized. Long-range planning for program stability and involvement in advocacy issues will be covered.

***ECH ED 6490 Internship: 1-10 semester hours***

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation and related professional activities.

***ECH ED 6497 Problems: 1-10 semester hours***

Prerequisite: Graduate standing. Individual study on topics pertaining to early childhood education.

***ECH ED 6535 Assessment, Curriculum, and Research Based Practice Birth-Grade 3: 2 semester hours***

Prerequisites: ED PSY 6030 or ECH ED 6412. Advanced studies in curriculum design, assessment, and research based practice for children from birth through eight years, with primary emphasis on birth through 5 years. Students will learn to develop curriculum based upon observation of children and their interests; child development theory and research; as well as the diverse needs of children by considering culture, context, and family relationships. Must take concurrently with ECH ED 6536.

***ECH ED 6536 Early Childhood Pre-Primary Practicum: 2 semester hours***

Prerequisites: ED PSY 6215, ELE ED 5310A or ECH ED 6412. The focus of this practicum is observation of and participation in classrooms of children birth through five years. Concurrent registration in ECH ED 6535 required.

## Economics

## Courses

### ***ECON 1000 Introduction To The American Economy: 3 semester hours***

Introduction to economic analysis and problems through an examination of the development and operations of the American economy; study of its evolution, institutions and principal problems. ECON 1000 does not substitute for ECON 1001 or ECON 1002. Students who have already completed ECON 1001 or ECON 1002 may not take ECON 1000 for credit.

### ***ECON 1001 Principles Of Microeconomics: 3 semester hours***

Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

### ***ECON 1002 Principles Of Macroeconomics: 3 semester hours***

Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

### ***ECON 1003 Microeconomics In The News: A Virtual Classroom: 1 semester hour***

Prerequisites: ECON 1000 or ECON 1001 (may be taken concurrently). This course uses a virtual chatroom to host one hour of discussion weekly about current news events with microeconomic content. News articles will focus on business, public policy, and individual choices that can be understood within a microeconomics framework. Chatroom can be accessed from any location-on or off-campus - with internet access.

### ***ECON 1004 Macroeconomics In The News: A Virtual Classroom: 1 semester hour***

Prerequisite: ECON 1002 (may be taken concurrently). This course uses a virtual chatroom to host one hour of discussion, weekly, about current news events with macroeconomic content. News articles will focus on macroeconomic phenomena - e.g., interest rates, the global economy, the Federal Reserve and public policy decisions - that can be understood within a macroeconomics framework. Chatroom can be accessed from any location - on or off-campus - with internet access.

### ***ECON 1005 Family Economics and Household Development: 3 semester hours***

Provides social service professionals that work with low income individuals and families with an understanding of the principles of personal financial management. Case studies are used to apply course content and to develop training strategies for clients to improve household financial management. The role of financial institutions and government policies as well as their impact on low income families is also examined. Resources to use with clients will be identified. ECON 1005 does not count toward a major or minor in Economics.

### ***ECON 1052 Microeconomics For The School Curriculum: 3 semester hours***

Analysis of market forces, with emphasis on business firms, households, and productive-factor markets, price determination and resource allocation. Special reference to topics included in elementary and secondary school social science curricula. ECON 1052 may not be used by Economics majors to meet degree requirements.

### ***ECON 1500 Entertainment Economics: The Movie Industry: 3 semester hours***

Same as MEDIA ST 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings. This course does not count towards the hours required for an economics major.

### ***ECON 2010 The Business Firm: History, Theory, And Policy: 3 semester hours***

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course presents a history of the development of modern business firms and examines the evolution of the economic theory of the firm. Special attention is paid to the role that firms play in fostering social and economic development. The ultimate objective of the course will be to provide students with a deeper understanding of firms so they can make better policy decisions as firm owners, managers, lawmakers, regulators, and voters.

### ***ECON 2410 Work, Families, And Public Policy: 3 semester hours***

Same as GS 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take ECON 2410 for credit.

### ***ECON 2610 The Economics Of Professional Sports: 3 semester hours***

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course will survey the economic organization of professional sports team industries and the relationship of sports teams to their employees, fans, and governments. Economic issues relating to salaries and labor disputes, monopoly practices, cartels and pricing, team location decisions, and public subsidies for professional sports teams will be analyzed.

### ***ECON 2800 History Of American Economic Development: 3 semester hours***

Same as HIST 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter-gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and anti trust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in the postwar economy.

### ***ECON 3001 Intermediate Microeconomics: 3 semester hours***

Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

**ECON 3002 Intermediate Macroeconomics: 3 semester hours**

Prerequisite: MATH 1030, ECON 1001 and ECON 1002; ECON 3200 is recommended. Study of national income, expenditure and the forces determining the level of economic activity. Special emphasis on the theory of income determination and its application to public policy.

**ECON 3003 Game Theory And Strategic Decision Making: 3 semester hours**

Prerequisites: ECON 1001. When the best course of action depends on the decisions made by others, strategy becomes important. Game theory provides the tools for analyzing such strategic decision making. Strategic behavior is analyzed in the context of business, logistics, biology, war, government, politics, and everyday life. A wide variety of in-class experiments are used to illustrate key concepts.

**ECON 3055 Economic Issues For The School Curriculum: 1-3 semester hours**

Prerequisites: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit, provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements. This course does not fulfill the undergraduate economics requirement for education majors.

**ECON 3100 Economic Statistics: 3 semester hours**

Prerequisite: MATH 1030, ECON 1001, and ECON 1002. Introduction to economic data sources, data interpretation and statistical inference as used in economic analysis. Emphasizes the testing of economic hypotheses and the development and estimation of economic models. Introduces the use of statistical software used in economics.

**ECON 3200 Money, Banking And Monetary Theory: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Factors influencing bank reserves and the money supply. Ability of the Federal Reserve System and the Treasury to control these factors. Introduction to monetary theory: integration of monetary phenomena with national income theory. Analysis of current policy issues.

**ECON 3300 International Economic Analysis: 3 semester hours**

Prerequisite: ECON 1001. Introduction to the theories of international trade and factor movements including determinants of trade, the effects of trade on sectors and on overall economic performance, trade restrictions, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

**ECON 3320 Economic Development: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Survey of economic growth as applied to developed and underdeveloped countries. Analysis of development policies with Emphasis on case studies. Case studies may include the United States, Western Europe or Latin America.

**ECON 3400 Labor Economics: 3 semester hours**

Prerequisites: ECON 1001. Examines the labor market in the economy, considers the theories of labor supply, labor demand, and market determination of wages. Other topics include noncompetitive markets, international labor markets, the theory of human capital, compensating wage differentials, labor market discrimination, unions and collective bargaining, unemployment, and poverty and the distribution of income.

**ECON 3450 Labor in the Global Political Economy: 3 semester hours**

This course will examine current issues, trends, and developments which are shaping labor in today's global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment. ECON 3450 may not be used by economics majors to meet degree requirements.

**ECON 3500 The Economics of Government Spending and Taxation: 3 semester hours**

Prerequisites: MATH 1030 and ECON 1001. Analysis of the role of government expenditures and taxation. Topics include: (1) analysis of public goods and externalities, models of collective choice, elements of benefit-cost analysis the theory of bureaucracy, governments as agents in markets; and (2) analysis of the economic role of governments, subsidies and taxes in the federal system, criteria for tax evaluation, the nature of tax legislation, private decision making under different tax institutions, and government borrowing.

**ECON 3600 Market Structure, Strategy, and Pricing: 3 semester hours**

Prerequisite: ECON 1001. A theoretical and empirical analysis of the actions of firms under alternative forms of market organization. The role of economies of scale, product differentiation, mergers, and advertising in affecting industry structure and the impact of the resulting industry structure on pricing, output, promotion, and technology decisions of firms.

**ECON 3650 Law And Economics: 3 semester hours**

Prerequisites: ECON 1001. Analysis of the economic role of property rights and contracts in the private for-profit and not-for-profit sectors of the economy. Considers economic incentives to form organizations as one alternative and to form contracts as another. Considers the economic efficiency of the common law and judicial systems in use in the United States.

**ECON 3900 Selected Topics In Economics: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Analysis of a selected economic topic. The topic selected will vary from semester to semester. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

**ECON 4030 Managerial Economics: 3 semester hours**

Prerequisites: ECON 3001; MATH 1800 or MATH 1100 recommended. Application of microeconomic theory to decision-making process in the business firm. Topics include pricing and profit strategy, cost analysis, decision making under uncertainty, technology, innovation, and productivity growth, and the structure and organization of firms. Problem-solving and case-study approach used.

**ECON 4040 Analysis Of Business Cycles: 3 semester hours**

Prerequisites: ECON 3002, ECON 3100, and ECON 3200 or equivalent. This course focuses on the empirical regularities in macroeconomics commonly referred to as the business cycle. It examines the variability and co-movements of aggregate economic variables and explores alternative theoretical explanations of these phenomena.

**ECON 4100 Introduction To Econometrics: 4 semester hours**

Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or LOG OM 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

**ECON 4105 Quantitative Mth & Modeling In Econ, Business & Social Sciences: 3 semester hours**

Prerequisites: MATH 1030; ECON 1001 or junior standing. This course focuses on the application of mathematical techniques to model building. The course reviews various mathematical techniques and shows students how they can be used for describing various social and business phenomena. Specific examples from the business, economics, criminology and other social sciences will be employed to reinforce the mathematical tools and concepts discussed. Students who have previously completed ECON 4150, MATH 1800 or MATH 1100 may not take this course for credit.

**ECON 4110 Applied Econometrics: 4 semester hours**

Prerequisites: ECON 4100 or equivalent. Concepts, techniques, & advanced applications of econometrics. Emphasis on developing a critical understanding of the appropriateness and limitations of a variety of state-of-the-art techniques used to model economic or political processes. Topics will include joint tests of hypotheses, estimation of lagged effects, models of qualitative choice, simultaneous systems, and outlier diagnostics. This course includes laboratory work in quantitative economic analysis.

**ECON 4120 Time Series Econometrics For Economics And Finance: 4 semester hours**

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

**ECON 4130 Business And Economic Forecasting: 4 semester hours**

Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

**ECON 4150 Mathematical Economics: 3 semester hours**

Prerequisites: MATH 1800 or MATH 1100; ECON 3001 or BUS AD 5000 or BUS AD 5001. This course uses calculus and other mathematical tools to analyze economic phenomena. In addition to exploring techniques used to solve unconstrained and constrained optimization problems, the course also examines how matrix algebra is used in economic modeling. This course allows students to mathematically analyze economic models which receive graphical treatment in lower level courses.

**ECON 4160 Geospatial Analysis In The Social Sciences: 3 semester hours**

Prerequisites: Junior standing. ECON 1001 or consent of instructor. Analysis of geospatial data relating to a variety of social phenomena using geographic information systems (GIS) software. Students will learn how geospatial analysis can be integrated into research projects and presentations (e.g., creating maps to present and analyze social, political, and economic data). Students will also learn how criminal activity, economic activity, voting patterns and other social behavior are spatially correlated with demographic data. As a culminating project, students will learn how to apply GIS techniques, including but not limited to sophisticated spatial modeling of social behavior.

**ECON 4170 Fundamentals Of Cost-Benefit Analysis: 3 semester hours**

Prerequisites: ECON 3001 or equivalent The purpose of this course is to provide a systemic and rigorous way of thinking about the measurement of benefits and costs when evaluating public projects, programs or regulations. Cost-benefit analysis has wide application, including: environmental resource use, highway construction projects, safety regulations, taxation of cigarettes, and investment in higher education. Given the prevalence of cost-benefit analysis in government budgetary processes, this course will develop critical appraisal skills to evaluate the appropriateness of these analyses.

**ECON 4210 Financial Markets And Institutions: 3 semester hours**

Prerequisite: ECON 3200. Demand, supply and flow of funds in the macrofinancial system, including money, capital, futures and foreign exchange markets. Examines types and historical development of domestic and international financial intermediaries operations within these markets, decision-making within individual intermediaries, their regulatory environment, and how their portfolio decisions affect flows of funds in the financial system.

**ECON 4510 Public Choice: 3 semester hours**

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

**ECON 4550 Natural Resource Economics: 3 semester hours**

Prerequisites: ECON 1001 or consent of instructor; junior standing. The relationship between human activity and the world's natural resources requires choices. This course uses an economics perspective to study these choices. This perspective uses the view of the environment as an asset for its starting point. Issues concerning the optimal and sustainable use of natural resources are examined in this context. Special emphasis is given to potential policy responses to environmental problems.

**ECON 4700 Urban Areas and Real Estate Markets: 3 semester hours**

Prerequisites: ECON 3001. Investigate the spatial aspects of urban economics: location theory, market areas, agglomerations, and real estate. The focus is on the description and explanation of the spatial allocation of economic activity with particular attention paid to the role of cities. Topics will include regional development, the growth of cities, firm location decision, spatial externalities, sprawl, and housing markets. Students may not receive credit for both ECON 4700 and ECON 5700.

**ECON 4720 The Economics Of Real Estate And Land Use Policy: 3 semester hours**

Prerequisites: ECON 3001 and ECON 4100. This course will introduce economic theory and analysis of the real estate market's micro and macro characteristics. Public policy impacting both the residential and commercial property markets will be discussed using the models developed in the course. Topics include price and location theory, growth and growth patterns, urban sprawl, migration, regulation of land and capital, provision of public goods, and non-market valuation econometric modeling. Hands on applications of various non-market econometric models will be provided.

**ECON 4900 Advanced Topics In Economic Analysis: 3 semester hours**

Prerequisite: ECON 3001 or ECON 3002 or consent of instructor. Study of a specific topic in Economics that may vary from semester to semester. May be taken for credit more than once if the topics are different.

**ECON 4980 Special Readings: 1-6 semester hours**

Prerequisite: Consent of instructor; grade point of 3.0 or higher in Economics. Unscheduled, independent directed readings on topics mutually acceptable to student and instructor. Maximum credit limited to six hours.

**ECON 4990 Internship In Applied Economics: 2-6 semester hours**

Prerequisites: ECON 3001, junior standing and consent of instructor. Independent study involving work with an appropriate private firm or public agency. A maximum of six hours may be earned, only three of which may be applied to the Economics major.

**ECON 5001 Microeconomic Analysis: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150. Survey of Microeconomic comparative statistics. Detailed examination of demand and supply, product and factor markets. Partial equilibrium in competitive, imperfectly competitive and monopolistic markets.

**ECON 5002 Macroeconomic Analysis: 3 semester hours**

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

**ECON 5010 Microeconomics For Policy Analysis: 3 semester hours**

Same as P P ADM 6080. Prerequisite: Graduate Student Standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields. This course may not be used by economics students to meet M.A. degree requirements.

**ECON 5051 Macroeconomics For The School Curriculum: 1-3 semester hours**

Prerequisite: Junior standing. Analysis of forces affecting the national economy, with emphasis on income determination, employment, money and banking, and international trade and finance. Special reference to topics included in elementary and secondary school social science curricula. ECON 5051 may not be used by Economics majors to meet degree requirements.

**ECON 5052 Microeconomics For The School Curriculum: 1-3 semester hours**

Prerequisites: Bachelor's degree from an accredited institution or consent of instructor. Analysis of market forces, with emphasis on business firms, households, productive factor markets, price determination and resource allocation. Special reference to topics included in the elementary and secondary school social science curricula.

**ECON 5055 Economic Issues For School Curriculum: 1-3 semester hours**

Prerequisite: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements.

**ECON 5100 Econometric Theory And Methods: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or LOG OM 5300; MATH 2450 or equivalent. A rigorous review of statistical models and methods relevant to the estimation and testing of economic relationships. Emphasis on the theoretical underpinnings of techniques commonly used for single and multiple equation estimation and hypothesis testing. Topics include ordinary and generalized least squares, robust regression, and simultaneous equations estimation.

**ECON 5110 Topics In Applied Econometrics: 3 semester hours**

Prerequisites: ECON 4100, or ECON 5100 or LOG OM 5300. Concepts and application of advanced econometric techniques. Students will develop a thorough understanding of the appropriateness and application of a variety of state-of-the art techniques. Topics will include specification tests, polynomial distributed lags, discrete choice, pooled time-series cross-section, simultaneous equations and outlier detection.

**ECON 5120 Advanced Topics In Time Series Econometrics: 3 semester hours**

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Application of econometric methods to time-series data. Emphasis on model specification as it applies to macroeconomic or financial data. Advanced topics include: Stationary and nonstationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

**ECON 5130 Advanced Topics In Business And Economic Forecasting: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or LOG OM 5300. This course develops the alternative techniques which are used to forecast economic time series. Each forecasting technique will be evaluated in terms of its theoretical soundness and predictive track record. Students will also learn to use these techniques to differentiate among competing economic models.

**ECON 5200 Monetary Theory And Policy: 3 semester hours**

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. An examination of how monetary policy has affected the economy in the past and how it can improve economic performance in the future. Topics include: the origins of money, money supply, money demand, the determinants of real and nominal interest rates, the term structure of interest rates, the impact of discretionary monetary policy on the domestic economy and foreign exchange markets, and the domestic economy and foreign exchange markets, and the relationship between monetary policy and federal government deficits.

**ECON 5210 Financial Markets: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002, and ECON 3200. Demand, supply, and flow of funds in allocating credit and distributing risk in the macrofinancial system. The saving investment process, the rationale for financial markets, and the role of financial intermediaries are studied within the framework of the flow of funds accounts. Special attention is given to the operation of money, capital, futures, and foreign financial markets and the impact of public policy on the structure and performance of financial markets.

**ECON 5300 International Trade: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. Survey of the modern theories of international trade and their applications including factor endowments and other, trade restrictions, foreign investment, trade and economic development, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

**ECON 5301 International Monetary Analysis: 3 semester hours**

Prerequisites: ECON 3200 and ECON 3002 or BUS AD 5002. Application of macroeconomic theory to the international monetary system. Topics include the balance of payments, exchange rates, international linkages, world inflation, capital flows, and the gold standard.

**ECON 5400 Labor Economics: Theory And Public Policy: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. This course examines labor supply, labor demand, and market determination of wages. Topics covered include the effect of technological change on employment, trends in labor force participation, the impact of government taxes and transfers on labor supply, poverty, and its economic consequences, the human capital model and its implications for investment in education and on-the-job training, and theories of economic discrimination and empirical measurement issues. Throughout the course, current public policy debates are examined using the theoretical models developed.

**ECON 5500 Public Sector Microeconomics: 3 semester hours**

Same as P P ADM 6210. Prerequisites: ECON 3001 or BUS AD 5001 and P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics covered include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost-benefit analysis.

**ECON 5510 Public Choice: 3 semester hours**

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics covered include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

**ECON 5600 Structure And Performance Of United States Industry: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; and ECON 4150. An analysis of the functioning of business firms under alternative market arrangements. Topics include: the theory and measurement of monopoly power and the role of economies of scale, product differentiation, and entry conditions in affecting this power; the impact of market power on the pricesetting behavior, advertising and promotional strategies, and technological innovation of firms; the role of government policy in promoting or preventing competition among firms.

**ECON 5630 Economics Of Telecommunications: 3 semester hours**

Prerequisites: ECON 3001, BUS AD 5000 or BUS AD 5001; and ECON 4150. Application of economic theory and techniques to the telecommunications industry. Topics include demand theory for telephone access and use, consumer surplus models for subscription choice, nonlinear pricing strategies including pure and mixed bundling and multi-part tariffs, the incentives of the firm under various regulatory regimes, a comparison of rate-of-return regulation and incentive (price cap) regulation, and the impact of carrier-of-last-resort responsibilities.

**ECON 5640 Transportation Economics: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5000. This course makes use of range of economic concepts to examine the nature of markets in which transport services are provided. This course is designed for future transportation professionals who wish to explore the fundamentals of economics in their field and for graduate students in public policy and economics wishing an economics-based understanding of transportation issues. Basic concepts covered include the theory of transportation demand, transportation costs and investment planning, and current topics in transportation economics such as regulation-deregulation and social cost pricing.

**ECON 5700 Urban and Real Estate Economics: 3 semester hours**

Prerequisites: ECON 3001. Investigate the spatial aspects of urban economics: location theory, market areas, agglomerations, and real estate. The focus is on the description and explanation of the spatial allocation of economic activity with particular attention paid to the role of cities. Topics will include regional development, the growth of cities, firm location decision, spatial externalities, sprawl, and housing markets. Students may not receive credit for both ECON 4700 and ECON 5700.

**ECON 5720 Real Estate Economics: 3 semester hours**

Prerequisites: ECON 3001 and ECON 4100. This course will apply economic theory to analyze the real estate market's micro and macro characteristics. Public policy impacting both the residential and commercial property markets will be discussed using models developed in the course. Topics include price and location theory, growth and growth patterns, urban sprawl, migration, regulation of land and capital, provision of public goods, and non-market valuation econometric modeling. Hands on applications of various non-market econometric models will be provided.

**ECON 5760 Health Economics: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. This course applies microeconomic theory and statistical techniques to understand decision making in health care markets. The effects of government policies on the health care choices of consumers and providers are identified and quantified; attention is given to federal and state entitlement programs, regulations, tax policies and antitrust enforcement. The role of insurance as a risk-sharing device is explored, along with its implications for pricing and health care utilization.

**ECON 5900 Advanced Topics In Economic Analysis: 3 semester hours**

Prerequisite: Consent of the instructor. Study of a specific economics topic, which may vary from semester to semester. May be taken more than once if the topic is different.

**ECON 5980 Directed Readings: 1-6 semester hours**

Prerequisite: Consent of the instructor. Independent study through readings, reports, research projects, and conferences.

## Courses

**ECON 1000 Introduction To The American Economy: 3 semester hours**

Introduction to economic analysis and problems through an examination of the development and operations of the american economy; study of its evolution, institutions and principal problems. ECON 1000 does not substitute for ECON 1001 or ECON 1002. Students who have already completed ECON 1001 or ECON 1002 may not take ECON 1000 for credit.

**ECON 1001 Principles Of Microeconomics: 3 semester hours**

Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

**ECON 1002 Principles Of Macroeconomics: 3 semester hours**

Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

**ECON 1003 Microeconomics In The News: A Virtual Classroom: 1 semester hour**

Prerequisites: ECON 1000 or ECON 1001 (may be taken concurrently). This course uses a virtual chatroom to host one hour of discussion weekly about current news events with microeconomic content. News articles will focus on business, public policy, and individual choices that can be understood within a microeconomics framework. Chatroom can be accessed from any location-on or off-campus - with internet access.

**ECON 1004 Macroeconomics In The News: A Virtual Classroom: 1 semester hour**

Prerequisite: ECON 1002 (may be taken concurrently). This course uses a virtual chatroom to host one hour of discussion, weekly, about current news events with macroeconomic content. News articles will focus on macroeconomic phenomena - e.g., interest rates, the global economy, the Federal Reserve and public policy decisions - that can be understood within a macroeconomics framework. Chatroom can be accessed from any location - on or off-campus - with internet access.

**ECON 1005 Family Economics and Household Development: 3 semester hours**

Provides social service professionals that work with low income individuals and families with an understanding of the principles of personal financial management. Case studies are used to apply course content and to develop training strategies for clients to improve household financial management. The role of financial institutions and government policies as well as their impact on low income families is also examined. Resources to use with clients will be identified. ECON 1005 does not count toward a major or minor in Economics.

**ECON 1052 Microeconomics For The School Curriculum: 3 semester hours**

Analysis of market forces, with emphasis on business firms, households, and productive-factor markets, price determination and resource allocation. Special reference to topics included in elementary and secondary school social science curricula. ECON 1052 may not be used by Economics majors to meet degree requirements.

**ECON 1500 Entertainment Economics: The Movie Industry: 3 semester hours**

Same as MEDIA ST 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings. This course does not count towards the hours required for an economics major.

**ECON 2010 The Business Firm: History, Theory, And Policy: 3 semester hours**

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course presents a history of the development of modern business firms and examines the evolution of the economic theory of the firm. Special attention is paid to the role that firms play in fostering social and economic development. The ultimate objective of the course will be to provide students with a deeper understanding of firms so they can make better policy decisions as firm owners, managers, lawmakers, regulators, and voters.

**ECON 2410 Work, Families, And Public Policy: 3 semester hours**

Same as GS 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take ECON 2410 for credit.

**ECON 2610 The Economics of Professional Sports: 3 semester hours**

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course will survey the economic organization of professional sports team industries and the relationship of sports teams to their employees, fans, and governments. Economic issues relating to salaries and labor disputes, monopoly practices, cartels and pricing, team location decisions, and public subsidies for professional sports teams will be analyzed.

**ECON 2800 History Of American Economic Development: 3 semester hours**

Same as HIST 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter-gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and anti trust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in the postwar economy.

**ECON 3001 Intermediate Microeconomics: 3 semester hours**

Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

**ECON 3002 Intermediate Macroeconomics: 3 semester hours**

Prerequisite: MATH 1030, ECON 1001 and ECON 1002; ECON 3200 is recommended. Study of national income, expenditure and the forces determining the level of economic activity. Special emphasis on the theory of income determination and its application to public policy.

**ECON 3003 Game Theory And Strategic Decision Making: 3 semester hours**

Prerequisites: ECON 1001. When the best course of action depends on the decisions made by others, strategy becomes important. Game theory provides the tools for analyzing such strategic decision making. Strategic behavior is analyzed in the context of business, logistics, biology, war, government, politics, and everyday life. A wide variety of in-class experiments are used to illustrate key concepts.

**ECON 3055 Economic Issues For The School Curriculum: 1-3 semester hours**

Prerequisites: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit, provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements. This course does not fulfill the undergraduate economics requirement for education majors.

**ECON 3100 Economic Statistics: 3 semester hours**

Prerequisite: MATH 1030, ECON 1001, and ECON 1002. Introduction to economic data sources, data interpretation and statistical inference as used in economic analysis. Emphasizes the testing of economic hypotheses and the development and estimation of economic models. Introduces the use of statistical software used in economics.

**ECON 3200 Money, Banking And Monetary Theory: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Factors influencing bank reserves and the money supply. Ability of the Federal Reserve System and the Treasury to control these factors. Introduction to monetary theory: integration of monetary phenomena with national income theory. Analysis of current policy issues.

**ECON 3300 International Economic Analysis: 3 semester hours**

Prerequisite: ECON 1001. Introduction to the theories of international trade and factor movements including determinants of trade, the effects of trade on sectors and on overall economic performance, trade restrictions, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

**ECON 3320 Economic Development: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Survey of economic growth as applied to developed and underdeveloped countries. Analysis of development policies with Emphasis on case studies. Case studies may include the United States, Western Europe or Latin America.

**ECON 3400 Labor Economics: 3 semester hours**

Prerequisites: ECON 1001. Examines the labor market in the economy, considers the theories of labor supply, labor demand, and market determination of wages. Other topics include noncompetitive markets, international labor markets, the theory of human capital, compensating wage differentials, labor market discrimination, unions and collective bargaining, unemployment, and poverty and the distribution of income.

**ECON 3450 Labor in the Global Political Economy: 3 semester hours**

This course will examine current issues, trends, and developments which are shaping labor in today's global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment. ECON 3450 may not be used by economics majors to meet degree requirements.

**ECON 3500 The Economics of Government Spending and Taxation: 3 semester hours**

Prerequisites: MATH 1030 and ECON 1001. Analysis of the role of government expenditures and taxation. Topics include: (1) analysis of public goods and externalities, models of collective choice, elements of benefit-cost analysis the theory of bureaucracy, governments as agents in markets; and (2) analysis of the economic role of governments, subsidies and taxes in the federal system, criteria for tax evaluation, the nature of tax legislation, private decision making under different tax institutions, and government borrowing.

**ECON 3600 Market Structure, Strategy, and Pricing: 3 semester hours**

Prerequisite: ECON 1001. A theoretical and empirical analysis of the actions of firms under alternative forms of market organization. The role of economies of scale, product differentiation, mergers, and advertising in affecting industry structure and the impact of the resulting industry structure on pricing, output, promotion, and technology decisions of firms.

**ECON 3650 Law And Economics: 3 semester hours**

Prerequisites: ECON 1001. Analysis of the economic role of property rights and contracts in the private for-profit and not-for-profit sectors of the economy. Considers economic incentives to form organizations as one alternative and to form contracts as another. Considers the economic efficiency of the common law and judicial systems in use in the United States.

**ECON 3900 Selected Topics In Economics: 3 semester hours**

Prerequisites: ECON 1001 and ECON 1002. Analysis of a selected economic topic. The topic selected will vary from semester to semester. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

**ECON 4030 Managerial Economics: 3 semester hours**

Prerequisites: ECON 3001; MATH 1800 or MATH 1100 recommended. Application of microeconomic theory to decision-making process in the business firm. Topics include pricing and profit strategy, cost analysis, decision making under uncertainty, technology, innovation, and productivity growth, and the structure and organization of firms. Problem-solving and case-study approach used.

**ECON 4040 Analysis Of Business Cycles: 3 semester hours**

Prerequisites: ECON 3002, ECON 3100, and ECON 3200 or equivalent. This course focuses on the empirical regularities in macroeconomics commonly referred to as the business cycle. It examines the variability and co-movements of aggregate economic variables and explores alternative theoretical explanations of these phenomena.

**ECON 4100 Introduction To Econometrics: 4 semester hours**

Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or LOG OM 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

**ECON 4105 Quantitative Mth & Modeling In Econ, Business & Social Sciences: 3 semester hours**

Prerequisites: MATH 1030; ECON 1001 or junior standing. This course focuses on the application of mathematical techniques to model building. The course reviews various mathematical techniques and shows students how they can be used for describing various social and business phenomena. Specific examples from the business, economics, criminology and other social sciences will be employed to reinforce the mathematical tools and concepts discussed. Students who have previously completed ECON 4150, MATH 1800 or MATH 1100 may not take this course for credit.

**ECON 4110 Applied Econometrics: 4 semester hours**

Prerequisites: ECON 4100 or equivalent. Concepts, techniques, & advanced applications of econometrics. Emphasis on developing a critical understanding of the appropriateness and limitations of a variety of state-of-the-art techniques used to model economic or political processes. Topics will include joint tests of hypotheses, estimation of lagged effects, models of qualitative choice, simultaneous systems, and outlier diagnostics. This course includes laboratory work in quantitative economic analysis.

***ECON 4120 Time Series Econometrics For Economics And Finance: 4 semester hours***

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

***ECON 4130 Business And Economic Forecasting: 4 semester hours***

Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

***ECON 4150 Mathematical Economics: 3 semester hours***

Prerequisites: MATH 1800 or MATH 1100; ECON 3001 or BUS AD 5000 or BUS AD 5001. This course uses calculus and other mathematical tools to analyze economic phenomena. In addition to exploring techniques used to solve unconstrained and constrained optimization problems, the course also examines how matrix algebra is used in economic modeling. This course allows students to mathematically analyze economic models which receive graphical treatment in lower level courses.

***ECON 4160 Geospatial Analysis In The Social Sciences: 3 semester hours***

Prerequisites: Junior standing. ECON 1001 or consent of instructor. Analysis of geospatial data relating to a variety of social phenomena using geographic information systems (GIS) software. Students will learn how geospatial analysis can be integrated into research projects and presentations (e.g., creating maps to present and analyze social, political, and economic data). Students will also learn how criminal activity, economic activity, voting patterns and other social behavior are spatially correlated with demographic data. As a culminating project, students will learn how to apply GIS techniques, including but not limited to sophisticated spatial modeling of social behavior.

***ECON 4170 Fundamentals Of Cost-Benefit Analysis: 3 semester hours***

Prerequisites: ECON 3001 or equivalent The purpose of this course is to provide a systemic and rigorous way of thinking about the measurement of benefits and costs when evaluating public projects, programs or regulations. Cost-benefit analysis has wide application, including: environmental resource use, highway construction projects, safety regulations, taxation of cigarettes, and investment in higher education. Given the prevalence of cost-benefit analysis in government budgetary processes, this course will develop critical appraisal skills to evaluate the appropriateness of these analyses.

***ECON 4210 Financial Markets And Institutions: 3 semester hours***

Prerequisite: ECON 3200. Demand, supply and flow of funds in the macrofinancial system, including money, capital, futures and foreign exchange markets. Examines types and historical development of domestic and international financial intermediaries operations within these markets, decision-making within individual intermediaries, their regulatory environment, and how their portfolio decisions affect flows of funds in the financial system.

***ECON 4510 Public Choice: 3 semester hours***

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

***ECON 4550 Natural Resource Economics: 3 semester hours***

Prerequisites: ECON 1001 or consent of instructor; junior standing. The relationship between human activity and the world's natural resources requires choices. This course uses an economics perspective to study these choices. This perspective uses the view of the environment as an asset for its starting point. Issues concerning the optimal and sustainable use of natural resources are examined in this context. Special emphasis is given to potential policy responses to environmental problems.

***ECON 4700 Urban Areas and Real Estate Markets: 3 semester hours***

Prerequisites: ECON 3001. Investigate the spatial aspects of urban economics: location theory, market areas, agglomerations, and real estate. The focus is on the description and explanation of the spatial allocation of economic activity with particular attention paid to the role of cities. Topics will include regional development, the growth of cities, firm location decision, spatial externalities, sprawl, and housing markets. Students may not receive credit for both ECON 4700 and ECON 5700.

***ECON 4720 The Economics Of Real Estate And Land Use Policy: 3 semester hours***

Prerequisites: ECON 3001 and ECON 4100. This course will introduce economic theory and analysis of the real estate market's micro and macro characteristics. Public policy impacting both the residential and commercial property markets will be discussed using the models developed in the course. Topics include price and location theory, growth and growth patterns, urban sprawl, migration, regulation of land and capital, provision of public goods, and non-market valuation econometric modeling. Hands on applications of various non-market econometric models will be provided.

***ECON 4900 Advanced Topics In Economic Analysis: 3 semester hours***

Prerequisite: ECON 3001 or ECON 3002 or consent of instructor. Study of a specific topic in Economics that may vary from semester to semester. May be taken for credit more than once if the topics are different.

***ECON 4980 Special Readings: 1-6 semester hours***

Prerequisite: Consent of instructor; grade point of 3.0 or higher in Economics. Unscheduled, independent directed readings on topics mutually acceptable to student and instructor. Maximum credit limited to six hours.

***ECON 4990 Internship In Applied Economics: 2-6 semester hours***

Prerequisites: ECON 3001, junior standing and consent of instructor. Independent study involving work with an appropriate private firm or public agency. A maximum of six hours may be earned, only three of which may be applied to the Economics major.

***ECON 5001 Microeconomic Analysis: 3 semester hours***

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150. Survey of Microeconomic comparative statistics. Detailed examination of demand and supply, product and factor markets. Partial equilibrium in competitive, imperfectly competitive and monopolistic markets.

**ECON 5002 Macroeconomic Analysis: 3 semester hours**

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

**ECON 5010 Microeconomics For Policy Analysis: 3 semester hours**

Same as P P ADM 6080. Prerequisite: Graduate Student Standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields. This course may not be used by economics students to meet M.A. degree requirements.

**ECON 5051 Macroeconomics For The School Curriculum: 1-3 semester hours**

Prerequisite: Junior standing. Analysis of forces affecting the national economy, with emphasis on income determination, employment, money and banking, and international trade and finance. Special reference to topics included in elementary and secondary school social science curricula. ECON 5051 may not be used by Economics majors to meet degree requirements.

**ECON 5052 Microeconomics For The School Curriculum: 1-3 semester hours**

Prerequisites: Bachelor's degree from an accredited institution or consent of instructor. Analysis of market forces, with emphasis on business firms, households, productive factor markets, price determination and resource allocation. Special reference to topics included in the elementary and secondary school social science curricula.

**ECON 5055 Economic Issues For School Curriculum: 1-3 semester hours**

Prerequisite: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements.

**ECON 5100 Econometric Theory And Methods: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or LOG OM 5300; MATH 2450 or equivalent. A rigorous review of statistical models and methods relevant to the estimation and testing of economic relationships. Emphasis on the theoretical underpinnings of techniques commonly used for single and multiple equation estimation and hypothesis testing. Topics include ordinary and generalized least squares, robust regression, and simultaneous equations estimation.

**ECON 5110 Topics In Applied Econometrics: 3 semester hours**

Prerequisites: ECON 4100, or ECON 5100 or LOG OM 5300. Concepts and application of advanced econometric techniques. Students will develop a thorough understanding of the appropriateness and application of a variety of state-of-the art techniques. Topics will include specification tests, polynomial distributed lags, discrete choice, pooled time-series cross-section, simultaneous equations and outlier detection.

**ECON 5120 Advanced Topics In Time Series Econometrics: 3 semester hours**

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Application of econometric methods to time-series data. Emphasis on model specification as it applies to macroeconomic or financial data. Advanced topics include: Stationary and nonstationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

**ECON 5130 Advanced Topics In Business And Economic Forecasting: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or LOG OM 5300. This course develops the alternative techniques which are used to forecast economic time series. Each forecasting technique will be evaluated in terms of its theoretical soundness and predictive track record. Students will also learn to use these techniques to differentiate among competing economic models.

**ECON 5200 Monetary Theory And Policy: 3 semester hours**

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. An examination of how monetary policy has affected the economy in the past and how it can improve economic performance in the future. Topics include: the origins of money, money supply, money demand, the determinants of real and nominal interest rates, the term structure of interest rates, the impact of discretionary monetary policy on the domestic economy and foreign exchange markets, and the domestic economy and foreign exchange markets, and the relationship between monetary policy and federal government deficits.

**ECON 5210 Financial Markets: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002, and ECON 3200. Demand, supply, and flow of funds in allocating credit and distributing risk in the macrofinancial system. The saving investment process, the rationale for financial markets, and the role of financial intermediaries are studied within the framework of the flow of funds accounts. Special attention is given to the operation of money, capital, futures, and foreign financial markets and the impact of public policy on the structure and performance of financial markets.

**ECON 5300 International Trade: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. Survey of the modern theories of international trade and their applications including factor endowments and other, trade restrictions, foreign investment, trade and economic development, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

**ECON 5301 International Monetary Analysis: 3 semester hours**

Prerequisites: ECON 3200 and ECON 3002 or BUS AD 5002. Application of macroeconomic theory to the international monetary system. Topics include the balance of payments, exchange rates, international linkages, world inflation, capital flows, and the gold standard.

**ECON 5400 Labor Economics: Theory And Public Policy: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. This course examines labor supply, labor demand, and market determination of wages. Topics covered include the effect of technological change on employment, trends in labor force participation, the impact of government taxes and transfers on labor supply, poverty, and its economic consequences, the human capital model and its implications for investment in education and on-the-job training, and theories of economic discrimination and empirical measurement issues. Throughout the course, current public policy debates are examined using the theoretical models developed.

**ECON 5500 Public Sector Microeconomics: 3 semester hours**

Same as P P ADM 6210. Prerequisites: ECON 3001 or BUS AD 5001 and P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics covered include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost-benefit analysis.

**ECON 5510 Public Choice: 3 semester hours**

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics covered include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

**ECON 5600 Structure And Performance Of United States Industry: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001; and ECON 4150. An analysis of the functioning of business firms under alternative market arrangements. Topics include: the theory and measurement of monopoly power and the role of economies of scale, product differentiation, and entry conditions in affecting this power; the impact of market power on the pricesetting behavior, advertising and promotional strategies, and technological innovation of firms; the role of government policy in promoting or preventing competition among firms.

**ECON 5630 Economics Of Telecommunications: 3 semester hours**

Prerequisites: ECON 3001, BUS AD 5000 or BUS AD 5001; and ECON 4150. Application of economic theory and techniques to the telecommunications industry. Topics include demand theory for telephone access and use, consumer surplus models for subscription choice, nonlinear pricing strategies including pure and mixed bundling and multi-part tariffs, the incentives of the firm under various regulatory regimes, a comparison of rate-of-return regulation and incentive (price cap) regulation, and the impact of carrier-of-last-resort responsibilities.

**ECON 5640 Transportation Economics: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5000. This course makes use of range of economic concepts to examine the nature of markets in which transport services are provided. This course is designed for future transportation professionals who wish to explore the fundamentals of economics in their field and for graduate students in public policy and economics wishing an economics-based understanding of transportation issues. Basic concepts covered include the theory of transportation demand, transportation costs and investment planning, and current topics in transportation economics such as regulation-deregulation and social cost pricing.

**ECON 5700 Urban and Real Estate Economics: 3 semester hours**

Prerequisites: ECON 3001. Investigate the spatial aspects of urban economics: location theory, market areas, agglomerations, and real estate. The focus is on the description and explanation of the spatial allocation of economic activity with particular attention paid to the role of cities. Topics will include regional development, the growth of cities, firm location decision, spatial externalities, sprawl, and housing markets. Students may not receive credit for both ECON 4700 and ECON 5700.

**ECON 5720 Real Estate Economics: 3 semester hours**

Prerequisites: ECON 3001 and ECON 4100. This course will apply economic theory to analyze the real estate market's micro and macro characteristics. Public policy impacting both the residential and commercial property markets will be discussed using models developed in the course. Topics include price and location theory, growth and growth patterns, urban sprawl, migration, regulation of land and capital, provision of public goods, and non-market valuation econometric modeling. Hands on applications of various non-market econometric models will be provided.

**ECON 5760 Health Economics: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5001. This course applies microeconomic theory and statistical techniques to understand decision making in health care markets. The effects of government policies on the health care choices of consumers and providers are identified and quantified; attention is given to federal and state entitlement programs, regulations, tax policies and antitrust enforcement. The role of insurance as a risk-sharing device is explored, along with its implications for pricing and health care utilization.

**ECON 5900 Advanced Topics In Economic Analysis: 3 semester hours**

Prerequisite: Consent of the instructor. Study of a specific economics topic, which may vary from semester to semester. May be taken more than once if the topic is different.

**ECON 5980 Directed Readings: 1-6 semester hours**

Prerequisite: Consent of the instructor. Independent study through readings, reports, research projects, and conferences.

## Education

### Courses

**EDUC 1000 Building Community, Culture, and Learning in Education: 3 semester hours**

This course provides opportunities for educator candidates to develop a community of educators-in-training, relationships that will continue throughout academic and professional careers. This course provides experiences for students to interact with a diverse group of educators who work in schools and in community-based organizations, such as teachers, principals, counselors, psychologists, social workers, nurses, librarians, museum curators, and many other kinds of youth development workers in a variety of settings and from a variety of cultures. Content includes introduction to, and applications of, the performance assessment system utilized throughout all curricular programs and essential to learning to evaluate one's experiences, impact, and coursework. The course serves to ground candidates in the education profession, including its diverse career options and programs offered in the College. Coursework addresses what the content and disposition expectations are of UMSL and College of Education students and supports the development of the skills to master those expectations, including research, critical thinking, and writing. This course is a critical component for successful graduation and post-graduate professional and career development.

**EDUC 2204 Special Topics In Education: 1-3 semester hours**

Prerequisite: Completion of 75 hours and consent of instructor.

Examination of a special area or topic within the field of education. Topics to be considered will be announced prior to registration and may vary. For elective credit only. This course may be repeated for different topics. Not to exceed a total of six hours credit.

**EDUC 2222 Interpretation: Connecting Audiences and Meaning: 3 semester hours**

Interpretation is a process for forming intellectual and emotional connections between the interests of an audience and the inherent meanings within a resource. This class covers interpretive methods for development and delivery of thematic, non-formal, presentations to various audiences. The class also introduces informal exhibit design, customer service and social media as they relate to interpretation.

**EDUC 2297 Independent Study: 1-3 semester hours**

Prerequisite: Completion of 75 hours and consent of instructor.

Independent study through readings, research, reports and conferences designed to provide depth in areas of study previously introduced in education courses. For elective credit only. May be repeated. Not to exceed a total of three hours credit.

**EDUC 4989 Internship I: 3 semester hours**

Prerequisites: Junior Standing, Admission to the Bachelor of Educational Studies Program, and Consent of Instructor. Supervised field experience in educational settings to prepare for planning, research, evaluation, and other professional activities in the student's emphasis area of concentration that will be carried out in EDUC 4990 and EDUC 4991.

**EDUC 4990 Internship II: 6 semester hours**

Prerequisites: EDUC 4989, Senior Standing, and Consent of Instructor. Includes planning, research, evaluation and other professional activities in the student's emphasis area.

**EDUC 4991 Internship III: 6 semester hours**

Prerequisites: Completion of or Concurrent Enrollment in EDUC 4990. Continuation of EDUC 4990.

**EDUC 5006 Graduate Workshop: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 6308 Graduate Institute: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 6404 Seminar: 1-10 semester hours**

Seminar on an educational topic or special issue not normally included in the regular curriculum.

**EDUC 6408 Graduate Seminar: 1-10 semester hours**

Prerequisites: Consent of instructor. Intensive study of selected issues in education.

**EDUC 6491 Staff Development And Professional Growth: 1-10 semester hours**

Designed in conjunction with an individual school district or educational agency and related to problems of education confronting that specific district or agency.

**EDUC 6998 Thesis Research: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 7050 The Research Process I: Framing Research Questions Within Educ Lit: 3 semester hours**

Same as ED ADM 7050. Prerequisites: Admission to the Ed.D. or Ph.D. in Education Programs. An overview of the essential elements of research proposals and familiarization with the techniques and tools used to identify important research questions within the education literature. emphasis is placed on exploring the research literature and both framing and justifying research questions within that literature.

**EDUC 7205 Action Research for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D cohort or consent of instructor. Study of small-scale simulations that introduce students to the fundamentals of framing relevant questions, working in community, writing field notes, interviewing, technologies to support and help analyze data, and storytelling. Particular attention will be given to representing perspectives of various stakeholders including students, parents, administrators, and colleagues.

**EDUC 7210 Survey Design for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Application of relevant theories, research, and pedagogical practices in designing surveys for educational settings. Focus on instrument development and design, forming questions and scales, and sampling methods as well as analysis of results and presentation for various target audiences in educational organizations and settings.

**EDUC 7215 Data Analysis for Educational Practitioner: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Guided workshop to conduct quantitative and/or qualitative analysis on data collected by learning communities. Develops specific skills necessary for research, e.g., using software for statistical or qualitative analysis, coding interviews or observation notes for patterns, doing critical discourse analysis, etc.

**EDUC 7220 Designing Research for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Guided workshop, applying the principles of research design, to design a study of the research issues selected by the learning community. Course covers how to develop research questions, choose among quantitative and qualitative methods, and consider the best, ethical practices.

**EDUC 7225 Ethnography for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. The study of ethnography as a methodology to engage in field research and provide the conceptual, theoretical, and empirical knowledge base for action research.

**EDUC 7230 Interviewing for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides opportunities for developing skills in interviewing individuals and groups to identify, describe, assess and compare educational programs, practices and policies. Emphasis on interviewing experts in the field and research participants in educational research field studies.

**EDUC 7295 Inquiry Seminar for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified approach to inquiry in order to obtain or analyze information of interest to scholar-practitioners leading educational programs through continuous improvement cycles.

**EDUC 7305 Representing Data for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. learning community or permission of instructor. Methods for presenting and displaying various types of data to a range of target audiences. Means of assuring accurate representation and the advantages and disadvantages of various methods are reviewed. Displays include tables, graphs, and charts. Current software programs to aid representation are reviewed.

**EDUC 7310 Integrating Technology in Learning for Educational: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Appropriate technology tools for carrying out individual or group research and assessment projects will be identified and integrated. The appropriate tools will be learned and applied to present, analyze and complete projects.

**EDUC 7315 Project Management for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to the Ed.D. program or consent of instructor. Tools for and approaches to managing complex projects in educational organizations, including establishing goals, subdivision of work, formation of work groups, planning and scheduling, establishing and tracking time lines, deployment of resources to complete a project, and addressing constraints. Use of current software for charting and reporting projects.

**EDUC 7320 Financial and Budgeting Skills for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Examines budgeting and finance systems of educational institutions, both from the perspective of theory, research and policy development, and from the perspective of actual budgeting and practice. There will also be an emphasis on the impact of federal and state policy regarding the finance of educational institutions, as well as the processes by which budgets are developed and resources allocated.

**EDUC 7325 Grant Writing for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides hands-on help for current and would-be grant writers. Examines search tools to locate likely request for proposals, explores text and sub-text issues, develops a timeline for grant development and submission, provides practice on how a peer review system works, considers issues related to revision and follows the real processes engaged in by successful grant recipients.

**EDUC 7330 Human Relations Skills for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to Ed.D. program or consent of instructor. Exposure for educational practitioners in a variety of leadership roles to basic human relations skills, effective interventions which can be made with the individual worker, and assessment skills to enable the leader to determine if referral to a mental health professional is warranted. Effective ways of confronting employees because of impaired job performance, giving performance evaluations, providing career development and planning information, identifying work transitions in their employees, and identifying stress and stressors in the work environment, along with identifying substance abusing workers and deciding what to do about them.

**EDUC 7395 Tool Seminar for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified tool used by leaders of educational institutions or programs for organizational improvement or as part of a continuous improvement cycle.

**EDUC 7415 Topics in Education: 3 semester hours**

Prerequisite: Admission to the doctoral program. Intensive study of a topic in education.

**EDUC 7490 Directed Readings in the Education Research Literature: 1-6 semester hours**

Prerequisite: Doctoral Standing. Independent study of the education research literature in an area defined in consultation with an advisor.

**EDUC 7495 Doctoral Research Tools: 1-6 semester hours**

Prerequisites: ED REM 6710. A structured individual or small group instructional or supervised investigative experience in and with a specific research skill and/or procedure that will be needed in the production of a doctoral dissertation. This course may not substitute for any existing graduate courses that cover the same research tool skills.

**EDUC 7600 Learning Community of Practice I: 1-6 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Applying the scholarship of teaching and learning through asset mapping, inquiry formation, and selected readings. Students explore professional connections, interests, beliefs and reflect on practice.

**EDUC 7605 Scholarship of Teaching and Learning in Educational Practice: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Exploration of learning through practice and reflection within a community of scholars committed to situated best practice in education.

**EDUC 7610 Learning Community of Practice II: 1-6 semester hours**

Prerequisites: EDUC 7600. Identifies and examines research problems by developing skills of inquiry, integrating prior knowledge, and evaluating extant research.

**EDUC 7615 Evaluation of Educational Programs: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Assessment of programs for continuous improvement cycles within educational settings.

**EDUC 7620 Learning Community of Practice III: 1-6 semester hours**

Prerequisites: EDUC 7610. Selection and definition a problem of practice to be addressed through research by the learning community members. Includes building relationships within and outside the learning community and designing structure to support inquiry into a problem of practice.

**EDUC 7625 Building Socially Just Educational Communities: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Examination of the role of culture and the analysis and application of social justice components in learning communities.

**EDUC 7630 Learning Community of Practice IV: 1-6 semester hours**

Prerequisites: EDUC 7620. Design and pilot of the research, selection of tools of inquiry, location of resources and needed support, and analysis of data.

**EDUC 7635 Ethical and Legal Issues in Educational Practice: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Examines legal and ethical perspectives, conflicts and professional practice in education, especially in education leadership. Introduces ethical theories and studies approaches to problem-solving strategies, focusing on anticipating legal issues before they arise; methods and tools to prevent and resolve legal problems will be practiced.

**EDUC 7640 Learning Community of Practice V: 1-6 semester hours**

Prerequisites: EDUC 7630. Preparation of dissertation proposals, consideration of research tools, establishment of process in research sites and attention to the adherence to high ethical standards.

**EDUC 7642 Sociocultural Perspectives In Education: 3 semester hours**

Prerequisite: Doctoral standing and consent of instructor. Investigation of sociocultural theory with a focus on educational applications. Topics include the social formation of mind, language as cultural tool, methodological issues in social science research, and dialogic inquiry as pedagogy.

**EDUC 7650 Learning Community of Practice VI: 1-6 semester hours**

Prerequisites: EDUC 7640. Preparation of dissertation proposals, consideration of research tools, establishment of process in research sites and attention to the adherence to high ethical standards. A continuation of EDUC 7640.

**EDUC 7880 Research Internship I: 3 semester hours**

Prerequisites: Nine hours of research methods or statistics and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7881 Research Internship II: 3 semester hours**

Prerequisites: EDUC 7880 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7882 Research Internship III: 3 semester hours**

Prerequisites: EDUC 7881 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7889 Laboratory of Practice: 1-6 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Field experience that bridges theory and practice in solving complex, situated problems of practice.

**EDUC 7950 Preparation for Writing the Dissertation Proposal: 3 semester hours**

Prerequisites: Completion of research method course requirements and EDUC 7880. An in-depth examination of the essential elements of a dissertation proposal. Particular emphasis is placed on examining the validity and reliability or the trustworthiness of the design of proposed research. Tools for identifying strengths and weaknesses are applied to proposals. Critique of proposals is employed. Also reviewed is the process of presenting and defending a proposal.

**EDUC 7998 Dissertation in Practice Research: 1-8 semester hours**

Prerequisite: Admission to pre-candidacy in the EdD program.

**EDUC 7999 Dissertation Research: 1-12 semester hours**

Prerequisite: Admission to pre-candidacy in the PhD in Education program.

**Courses****EDUC 1000 Building Community, Culture, and Learning in Education: 3 semester hours**

This course provides opportunities for educator candidates to develop a community of educators-in-training, relationships that will continue throughout academic and professional careers. This course provides experiences for students to interact with a diverse group of educators who work in schools and in community-based organizations, such as teachers, principals, counselors, psychologists, social workers, nurses, librarians, museum curators, and many other kinds of youth development workers in a variety of settings and from a variety of cultures. Content includes introduction to, and applications of, the performance assessment system utilized throughout all curricular programs and essential to learning to evaluate one's experiences, impact, and coursework. The course serves to ground candidates in the education profession, including its diverse career options and programs offered in the College. Coursework addresses what the content and disposition expectations are of UMSL and College of Education students and supports the development of the skills to master those expectations, including research, critical thinking, and writing. This course is a critical component for successful graduation and post-graduate professional and career development.

**EDUC 2204 Special Topics In Education: 1-3 semester hours**

Prerequisite: Completion of 75 hours and consent of instructor. Examination of a special area or topic within the field of education. Topics to be considered will be announced prior to registration and may vary. For elective credit only. This course may be repeated for different topics. Not to exceed a total of six hours credit.

**EDUC 2222 Interpretation: Connecting Audiences and Meaning: 3 semester hours**

Interpretation is a process for forming intellectual and emotional connections between the interests of an audience and the inherent meanings within a resource. This class covers interpretive methods for development and delivery of thematic, non-formal, presentations to various audiences. The class also introduces informal exhibit design, customer service and social media as they relate to interpretation.

**EDUC 2297 Independent Study: 1-3 semester hours**

Prerequisite: Completion of 75 hours and consent of instructor. Independent study through readings, research, reports and conferences designed to provide depth in areas of study previously introduced in education courses. For elective credit only. May be repeated. Not to exceed a total of three hours credit.

**EDUC 4989 Internship I: 3 semester hours**

Prerequisites: Junior Standing, Admission to the Bachelor of Educational Studies Program, and Consent of Instructor. Supervised field experience in educational settings to prepare for planning, research, evaluation, and other professional activities in the student's emphasis area of concentration that will be carried out in EDUC 4990 and EDUC 4991.

**EDUC 4990 Internship II: 6 semester hours**

Prerequisites: EDUC 4989, Senior Standing, and Consent of Instructor. Includes planning, research, evaluation and other professional activities in the student's emphasis area.

**EDUC 4991 Internship III: 6 semester hours**

Prerequisites: Completion of or Concurrent Enrollment in EDUC 4990. Continuation of EDUC 4990.

**EDUC 5006 Graduate Workshop: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 6308 Graduate Institute: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 6404 Seminar: 1-10 semester hours**

Seminar on an educational topic or special issue not normally included in the regular curriculum.

**EDUC 6408 Graduate Seminar: 1-10 semester hours**

Prerequisites: Consent of instructor. Intensive study of selected issues in education.

**EDUC 6491 Staff Development And Professional Growth: 1-10 semester hours**

Designed in conjunction with an individual school district or educational agency and related to problems of education confronting that specific district or agency.

**EDUC 6998 Thesis Research: 1-10 semester hours**

Prerequisite: Consent of instructor.

**EDUC 7050 The Research Process I: Framing Research Questions Within Educ Lit: 3 semester hours**

Same as ED ADM 7050. Prerequisites: Admission to the Ed.D. or Ph.D. in Education Programs. An overview of the essential elements of research proposals and familiarization with the techniques and tools used to identify important research questions within the education literature. emphasis is placed on exploring the research literature and both framing and justifying research questions within that literature.

**EDUC 7205 Action Research for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D cohort or consent of instructor. Study of small-scale simulations that introduce students to the fundamentals of framing relevant questions, working in community, writing field notes, interviewing, technologies to support and help analyze data, and storytelling. Particular attention will be given to representing perspectives of various stakeholders including students, parents, administrators, and colleagues.

**EDUC 7210 Survey Design for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Application of relevant theories, research, and pedagogical practices in designing surveys for educational settings. Focus on instrument development and design, forming questions and scales, and sampling methods as well as analysis of results and presentation for various target audiences in educational organizations and settings.

**EDUC 7215 Data Analysis for Educational Practitioner: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Guided workshop to conduct quantitative and/or qualitative analysis on data collected by learning communities. Develops specific skills necessary for research, e.g., using software for statistical or qualitative analysis, coding interviews or observation notes for patterns, doing critical discourse analysis, etc.

**EDUC 7220 Designing Research for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Guided workshop, applying the principles of research design, to design a study of the research issues selected by the learning community. Course covers how to develop research questions, choose among quantitative and qualitative methods, and consider the best, ethical practices.

**EDUC 7225 Ethnography for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. The study of ethnography as a methodology to engage in field research and provide the conceptual, theoretical, and empirical knowledge base for action research.

**EDUC 7230 Interviewing for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides opportunities for developing skills in interviewing individuals and groups to identify, describe, assess and compare educational programs, practices and policies. Emphasis on interviewing experts in the field and research participants in educational research field studies.

**EDUC 7295 Inquiry Seminar for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified approach to inquiry in order to obtain or analyze information of interest to scholar-practitioners leading educational programs through continuous improvement cycles.

**EDUC 7305 Representing Data for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. learning community or permission of instructor. Methods for presenting and displaying various types of data to a range of target audiences. Means of assuring accurate representation and the advantages and disadvantages of various methods are reviewed. Displays include tables, graphs, and charts. Current software programs to aid representation are reviewed.

**EDUC 7310 Integrating Technology in Learning for Educational: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Appropriate technology tools for carrying out individual or group research and assessment projects will be identified and integrated. The appropriate tools will be learned and applied to present, analyze and complete projects.

**EDUC 7315 Project Management for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to the Ed.D. program or consent of instructor. Tools for and approaches to managing complex projects in educational organizations, including establishing goals, subdivision of work, formation of work groups, planning and scheduling, establishing and tracking time lines, deployment of resources to complete a project, and addressing constraints. Use of current software for charting and reporting projects.

**EDUC 7320 Financial and Budgeting Skills for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Examines budgeting and finance systems of educational institutions, both from the perspective of theory, research and policy development, and from the perspective of actual budgeting and practice. There will also be an emphasis on the impact of federal and state policy regarding the finance of educational institutions, as well as the processes by which budgets are developed and resources allocated.

**EDUC 7325 Grant Writing for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides hands-on help for current and would-be grant writers. Examines search tools to locate likely request for proposals, explores text and sub-text issues, develops a timeline for grant development and submission, provides practice on how a peer review system works, considers issues related to revision and follows the real processes engaged in by successful grant recipients.

**EDUC 7330 Human Relations Skills for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to Ed.D. program or consent of instructor. Exposure for educational practitioners in a variety of leadership roles to basic human relations skills, effective interventions which can be made with the individual worker, and assessment skills to enable the leader to determine if referral to a mental health professional is warranted. Effective ways of confronting employees because of impaired job performance, giving performance evaluations, providing career development and planning information, identifying work transitions in their employees, and identifying stress and stressors in the work environment, along with identifying substance abusing workers and deciding what to do about them.

**EDUC 7395 Tool Seminar for Educational Practitioners: 1 semester hour**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified tool used by leaders of educational institutions or programs for organizational improvement or as part of a continuous improvement cycle.

**EDUC 7415 Topics in Education: 3 semester hours**

Prerequisite: Admission to the doctoral program. Intensive study of a topic in education.

**EDUC 7490 Directed Readings in the Education Research Literature: 1-6 semester hours**

Prerequisite: Doctoral Standing. Independent study of the education research literature in an area defined in consultation with an advisor.

**EDUC 7495 Doctoral Research Tools: 1-6 semester hours**

Prerequisites: ED REM 6710. A structured individual or small group instructional or supervised investigative experience in and with a specific research skill and/or procedure that will be needed in the production of a doctoral dissertation. This course may not substitute for any existing graduate courses that cover the same research tool skills.

**EDUC 7600 Learning Community of Practice I: 1-6 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Applying the scholarship of teaching and learning through asset mapping, inquiry formation, and selected readings. Students explore professional connections, interests, beliefs and reflect on practice.

**EDUC 7605 Scholarship of Teaching and Learning in Educational Practice: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Exploration of learning through practice and reflection within a community of scholars committed to situated best practice in education.

**EDUC 7610 Learning Community of Practice II: 1-6 semester hours**

Prerequisites: EDUC 7600. Identifies and examines research problems by developing skills of inquiry, integrating prior knowledge, and evaluating extant research.

**EDUC 7615 Evaluation of Educational Programs: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Assessment of programs for continuous improvement cycles within educational settings.

**EDUC 7620 Learning Community of Practice III: 1-6 semester hours**

Prerequisites: EDUC 7610. Selection and definition a problem of practice to be addressed through research by the learning community members. Includes building relationships within and outside the learning community and designing structure to support inquiry into a problem of practice.

**EDUC 7625 Building Socially Just Educational Communities: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Examination of the role of culture and the analysis and application of social justice components in learning communities.

**EDUC 7630 Learning Community of Practice IV: 1-6 semester hours**

Prerequisites: EDUC 7620. Design and pilot of the research, selection of tools of inquiry, location of resources and needed support, and analysis of data.

**EDUC 7635 Ethical and Legal Issues in Educational Practice: 2 semester hours**

Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Examines legal and ethical perspectives, conflicts and professional practice in education, especially in education leadership. Introduces ethical theories and studies approaches to problem-solving strategies, focusing on anticipating legal issues before they arise; methods and tools to prevent and resolve legal problems will be practiced.

**EDUC 7640 Learning Community of Practice V: 1-6 semester hours**

Prerequisites: EDUC 7630. Preparation of dissertation proposals, consideration of research tools, establishment of process in research sites and attention to the adherence to high ethical standards.

**EDUC 7642 Sociocultural Perspectives In Education: 3 semester hours**

Prerequisite: Doctoral standing and consent of instructor. Investigation of sociocultural theory with a focus on educational applications. Topics include the social formation of mind, language as cultural tool, methodological issues in social science research, and dialogic inquiry as pedagogy.

**EDUC 7650 Learning Community of Practice VI: 1-6 semester hours**

Prerequisites: EDUC 7640. Preparation of dissertation proposals, consideration of research tools, establishment of process in research sites and attention to the adherence to high ethical standards. A continuation of EDUC 7640.

**EDUC 7880 Research Internship I: 3 semester hours**

Prerequisites: Nine hours of research methods or statistics and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7881 Research Internship II: 3 semester hours**

Prerequisites: EDUC 7880 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7882 Research Internship III: 3 semester hours**

Prerequisites: EDUC 7881 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

**EDUC 7889 Laboratory of Practice: 1-6 semester hours**

Prerequisites: Admission to an Ed.D. cohort. Field experience that bridges theory and practice in solving complex, situated problems of practice.

**EDUC 7950 Preparation for Writing the Dissertation Proposal: 3 semester hours**

Prerequisites: Completion of research method course requirements and EDUC 7880. An in-depth examination of the essential elements of a dissertation proposal. Particular emphasis is placed on examining the validity and reliability or the trustworthiness of the design of proposed research. Tools for identifying strengths and weaknesses are applied to proposals. Critique of proposals is employed. Also reviewed is the process of presenting and defending a proposal.

**EDUC 7998 Dissertation in Practice Research: 1-8 semester hours**

Prerequisite: Admission to pre-candidacy in the EdD program.

**EDUC 7999 Dissertation Research: 1-12 semester hours**

Prerequisite: Admission to pre-candidacy in the PhD in Education program.

## Educational Administration

### Courses

**ED ADM 6000 Seminar: 1-10 semester hours****ED ADM 6200 Demographic Contexts of Education: 3 semester hours**

Prerequisites: Graduate Standing. This course is a critical examination of the impact of population changes on schools. Students will have the opportunity to investigate the social and economic dimensions of demographic shifts that affect demand for and organization of education services.

**ED ADM 6201 Knowledge Contexts Of Education Administration And Policy: 3 semester hours**

Prerequisites: Admission to master, doctoral, and/or certification programs in Education Administration or consent of instructor. This course is a survey of the various views of knowledge that have influenced the nature of the organizational structures and policies of American educational institutions. The course is framed both by the purposes of American education and the "scientific management" movement of the first quarter of the 20th Century.

**ED ADM 6202 Social Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of different perspectives on the social structures within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6203 Political Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of those aspects of local, state, & federal politics which significantly influence the political contexts within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6204 Economic Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of those aspects of local, state, and national economic structures which influence the nature of education policies and their concomitant practices.

**ED ADM 6205 Legal Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of both (1) local, state, and federal laws and (2) Western notions of justice within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6301 Education Administration Policy Research: 3 semester hours**

Prerequisites: Completion of at least twenty-four credit hours towards the M.Ed. in Education Administration or consent of instructor. A study of issues and trends in basic, applied, and action research in education policymaking.

**ED ADM 6302 Elementary School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the elementary school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of elementary schools.

**ED ADM 6303 Middle School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the middle school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of middle schools.

**ED ADM 6304 Secondary School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the secondary school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of secondary schools.

**ED ADM 6305 School District Administration: 3 semester hours**

Prerequisite: Enrollment in Advanced Certification Program and/ or consent of instructor. Course focuses on current research about school district administration; also deals with major central office issues including: board/superintendent relations, central office organization, the function and authority of assistant superintendents and program directors, and the administrative team approach to school district administration.

**ED ADM 6306 Special Education Administration: 3 semester hours**

Prerequisites: Completion of graduate degree in Special Education, Education Administration or consent of instructor. A study of organizational issues in special education and implications for practices and procedures. Specific attention will be given to special education delivery systems, compliance standards, funding sources, and regulatory standards.

**ED ADM 6307 Integrated Curriculum For Special Education Administrators: 3 semester hours**

Prerequisites: Graduate Standing. Development of skills to understand, supervise and evaluate the integration and differentiation of curriculum. Intended for special education administrators.

**ED ADM 6315 Middle School Educational Philosophy: 3 semester hours**

An in-depth examination of the educational philosophy and historical basis of middle level schools, and the relationship between philosophy and middle school organizational practices. Includes a review of the research, organizational structures, and current trends and practices.

**ED ADM 6317 Supervision And The Middle School Child: 3 semester hours**

The unique developmental characteristics and needs of early adolescents are explored through a variety of supervisory activities involving middle level students, teachers, and administrators. The implications of economic and ethnic diversity for middle level schools will also be addressed.

**ED ADM 6401 School Staff Development And Supervision: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course provides an examination of the conceptual bases and practical applications of staff development and supervision in educational settings. It explores relevant conceptual models presented as heuristic devices to consider a variety of administrative techniques to assess needs, plan, deliver, and evaluate staff development and supervision programs in schooling.

**ED ADM 6402 School Personnel Administration: 3 semester hours**

Prerequisites: Advanced standing and/or consent of instructor. This course is a comprehensive, systematic study of problems in planning, recruitment, selection, induction, and retention relative to school personnel.

**ED ADM 6403 Problems In School Public Relations: 3 semester hours**

Prerequisites: Advanced standing and/or consent of instructor. This course is an examination of a range both traditional and critical perspectives relevant to home-school-community relations.

**ED ADM 6404 Collective Negotiations In Education Organizations: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. This course focuses on the concepts, issues, and processes involved with collective negotiations (bargaining) in American educational organizations. The major issues addressed in the course include recognition procedures, bargaining unit determination, the scope of negotiations, the proposal and counterproposal, compromise, impasse procedures, and master contract management.

**ED ADM 6407 School Staff Development & Supervision- Special Ed Administration: 3 semester hours**

Prerequisites: Completion of graduate degree in Special Education, Education Administration or consent of instructor. This course provides an examination of the conceptual bases and practical application of staff development and supervision for special education settings for staffs serving special education students. It explores relevant conceptual models presented as heuristic devices to consider a variety of administrative techniques to assess needs, plan, deliver, and evaluate staff development and supervision programs serving students with special education needs.

**ED ADM 6449 Using Technology In Administration Processes: 3 semester hours**

Prerequisites: A course in measurement, statistics, or evaluation, or consent of instructor. Same as ED TECH 6449. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED ADM 6497 Problems: 1-10 semester hours****ED ADM 6501 Principles Of Public School Finance In Missouri: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. Course is designed to analyze and study critical areas of public school finance at the local and state levels, highlighting the role of such factors as legislative procedures, principles of local and state support, budgeting and accounting procedures, assessment of property, etc.

**ED ADM 6502 School Buildings And Sites: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor.

This course deals with methods and procedures for (1) projecting the future building and facility needs of a public school district, (2) supervising actual planning and construction of educational facilities, (3) optimizing the use of current facilities, and (4) maintenance of buildings, grounds, and equipment.

**ED ADM 6503 Organizational Change In Education: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor.

This course deals with (1) developing strategies for assessing educational needs, (2) methods of assessing the school's "organizational health", (3) the designing of educational change strategies involving theory-based models, (4) using systems analysis techniques to implement educational change, and (5) methods of involving students and staff in incorporating meaningful organizational change strategies in educational institutions.

**ED ADM 6601 Administration Of Adult And Community Education: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. A course designed to familiarize the student with the structure, purpose, and processes of community education with particular emphasis being placed on the administrative theories and functions of adult education.

**ED ADM 6602 Programming In Community And Adult Education: 3 semester hours**

Prerequisites: ED ADM 6601 and/or consent of instructor. Study and analysis of basic situations in which community and adult educational programming take place. Within this framework, application will be made of a fundamental series of steps essential to sound educational programming.

**ED ADM 6900 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED ADM 7050 The Research Proc I: Framing Research Questions Within The Ed Lit: 3 semester hours**

Same as EDUC 7050. Prerequisites: Admission to the Ed.D. or Ph.D. in Education Programs. An overview of the essential elements of research proposals and familiarization with the techniques and tools used to identify important research questions within the education literature. Emphasis is placed on exploring the research literature and both framing and justifying research questions within that literature.

**ED ADM 7150 Educational Inquiry: 3 semester hours**

Prerequisites: ED ADM 7050. This course is required for doctoral students in the Educational Administration program. The course supports the development of the student's individual research topic and explores options for methodological approaches to education policy and administration issues.

**ED ADM 7250 The Change Process In Schools And School Districts: 3 semester hours**

Prerequisites: ED ADM 7050 and ED ADM 7150. Advanced study of the literature pertaining to the theories of action and strategies for leading and sustaining change in schools and school districts. Emphasis is on the framing of research questions through the perspective of the literature on the change process in the schools.

**ED ADM 7800 Educational Administration Doctoral Seminar: 1-6 semester hours**

Prerequisites: Admission to doctoral program and consent of instructor. Intensive directed study of selected issues related to the administration of educational institutions.

**Courses****ED ADM 6000 Seminar: 1-10 semester hours****ED ADM 6200 Demographic Contexts of Education: 3 semester hours**

Prerequisites: Graduate Standing. This course is a critical examination of the impact of population changes on schools. Students will have the opportunity to investigate the social and economic dimensions of demographic shifts that affect demand for and organization of education services.

**ED ADM 6201 Knowledge Contexts Of Education Administration And Policy: 3 semester hours**

Prerequisites: Admission to master, doctoral, and/or certification programs in Education Administration or consent of instructor. This course is a survey of the various views of knowledge that have influenced the nature of the organizational structures and policies of American educational institutions. The course is framed both by the purposes of American education and the "scientific management" movement of the first quarter of the 20th Century.

**ED ADM 6202 Social Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of different perspectives on the social structures within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6203 Political Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of those aspects of local, state, & federal politics which significantly influence the political contexts within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6204 Economic Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of those aspects of local, state, and national economic structures which influence the nature of education policies and their concomitant practices.

**ED ADM 6205 Legal Contexts Of Education: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course is a critical examination of both (1) local, state, and federal laws and (2) Western notions of justice within which education policies are constituted and their concomitant practices implemented.

**ED ADM 6301 Education Administration Policy Research: 3 semester hours**

Prerequisites: Completion of at least twenty-four credit hours towards the M.Ed. in Education Administration or consent of instructor. A study of issues and trends in basic, applied, and action research in education policymaking.

**ED ADM 6302 Elementary School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the elementary school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of elementary schools.

**ED ADM 6303 Middle School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the middle school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of middle schools.

**ED ADM 6304 Secondary School Administration: 3 semester hours**

Prerequisites: Completion of at least fifteen credit hours of the M.Ed. in Education Administration or consent of instructor. This course is a comprehensive, systematic study of the secondary school principalship. Emphasis is placed on relating theories of learning, teaching, and organization to effective administration of secondary schools.

**ED ADM 6305 School District Administration: 3 semester hours**

Prerequisite: Enrollment in Advanced Certification Program and/or consent of instructor. Course focuses on current research about school district administration; also deals with major central office issues including: board/superintendent relations, central office organization, the function and authority of assistant superintendents and program directors, and the administrative team approach to school district administration.

**ED ADM 6306 Special Education Administration: 3 semester hours**

Prerequisites: Completion of graduate degree in Special Education, Education Administration or consent of instructor. A study of organizational issues in special education and implications for practices and procedures. Specific attention will be given to special education delivery systems, compliance standards, funding sources, and regulatory standards.

**ED ADM 6307 Integrated Curriculum For Special Education Administrators: 3 semester hours**

Prerequisites: Graduate Standing. Development of skills to understand, supervise and evaluate the integration and differentiation of curriculum. Intended for special education administrators.

**ED ADM 6315 Middle School Educational Philosophy: 3 semester hours**

An in-depth examination of the educational philosophy and historical basis of middle level schools, and the relationship between philosophy and middle school organizational practices. Includes a review of the research, organizational structures, and current trends and practices.

**ED ADM 6317 Supervision And The Middle School Child: 3 semester hours**

The unique developmental characteristics and needs of early adolescents are explored through a variety of supervisory activities involving middle level students, teachers, and administrators. The implications of economic and ethnic diversity for middle level schools will also be addressed.

**ED ADM 6401 School Staff Development And Supervision: 3 semester hours**

Prerequisites: ED ADM 6201, concurrent with ED ADM 6201, or consent of instructor. This course provides an examination of the conceptual bases and practical applications of staff development and supervision in educational settings. It explores relevant conceptual models presented as heuristic devices to consider a variety of administrative techniques to assess needs, plan, deliver, and evaluate staff development and supervision programs in schooling.

**ED ADM 6402 School Personnel Administration: 3 semester hours**

Prerequisites: Advanced standing and/or consent of instructor. This course is a comprehensive, systematic study of problems in planning, recruitment, selection, induction, and retention relative to school personnel.

**ED ADM 6403 Problems In School Public Relations: 3 semester hours**

Prerequisites: Advanced standing and/or consent of instructor. This course is an examination of a range both traditional and critical perspectives relevant to home-school-community relations.

**ED ADM 6404 Collective Negotiations In Education Organizations: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. This course focuses on the concepts, issues, and processes involved with collective negotiations (bargaining) in American educational organizations. The major issues addressed in the course include recognition procedures, bargaining unit determination, the scope of negotiations, the proposal and counterproposal, compromise, impasse procedures, and master contract management.

**ED ADM 6407 School Staff Development & Supervision- Special Ed Administration: 3 semester hours**

Prerequisites: Completion of graduate degree in Special Education, Education Administration or consent of instructor. This course provides an examination of the conceptual bases and practical application of staff development and supervision for special education settings for staffs serving special education students. It explores relevant conceptual models presented as heuristic devices to consider a variety of administrative techniques to assess needs, plan, deliver, and evaluate staff development and supervision programs serving students with special education needs.

**ED ADM 6449 Using Technology In Administration Processes: 3 semester hours**

Prerequisites: A course in measurement, statistics, or evaluation, or consent of instructor. Same as ED TECH 6449. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED ADM 6497 Problems: 1-10 semester hours****ED ADM 6501 Principles Of Public School Finance In Missouri: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. Course is designed to analyze and study critical areas of public school finance at the local and state levels, highlighting the role of such factors as legislative procedures, principles of local and state support, budgeting and accounting procedures, assessment of property, etc.

**ED ADM 6502 School Buildings And Sites: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. This course deals with methods and procedures for (1) projecting the future building and facility needs of a public school district, (2) supervising actual planning and construction of educational facilities, (3) optimizing the use of current facilities, and (4) maintenance of buildings, grounds, and equipment.

**ED ADM 6503 Organizational Change In Education: 3 semester hours**

Prerequisites: Advanced graduate standing and/or consent of instructor. This course deals with (1) developing strategies for assessing educational needs, (2) methods of assessing the school's "organizational health", (3) the designing of educational change strategies involving theory-based models, (4) using systemsanalysis techniques to implement educational change, and (5) methods of involving students and staff in incorporating meaningful organizational change strategies in educational institutions.

**ED ADM 6601 Administration Of Adult And Community Education: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. A course designed to familiarize the student with the structure, purpose, and processes of community education with particular emphasis being placed on the administrative theories and functions of adult education.

**ED ADM 6602 Programming In Community And Adult Education: 3 semester hours**

Prerequisites: ED ADM 6601 and/or consent of instructor. Study and analysis of basic situations in which community and adult educational programming take place. Within this framework, application will be made of a fundamental series of steps essential to sound educational programming.

**ED ADM 6900 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED ADM 7050 The Research Proc I: Framing Research Questions Within The Ed Lit: 3 semester hours**

Same as EDUC 7050. Prerequisites: Admission to the Ed.D. or Ph.D. in Education Programs. An overview of the essential elements of research proposals and familiarization with the techniques and tools used to identify important research questions within the education literature. Emphasis is placed on exploring the research literature and both framing and justifying research questions within that literature.

**ED ADM 7150 Educational Inquiry: 3 semester hours**

Prerequisites: ED ADM 7050. This course is required for doctoral students in the Educational Administration program. The course supports the development of the student's individual research topic and explores options for methodological approaches to education policy and administration issues.

**ED ADM 7250 The Change Process In Schools And School Districts: 3 semester hours**

Prerequisites: ED ADM 7050 and ED ADM 7150. Advanced study of the literature pertaining to the theories of action and strategies for leading and sustaining change in schools and school districts. Emphasis is on the framing of research questions through the perspective of the literature on the change process in the schools.

**ED ADM 7800 Educational Administration Doctoral Seminar: 1-6 semester hours**

Prerequisites: Admission to doctoral program and consent of instructor. Intensive directed study of selected issues related to the administration of educational institutions.

## Educational Foundations

### Courses

**ED FND 3251 Black Americans In Education: 3 semester hours**

An examination and analysis of conditions affecting the education of black Americans and their schools, with emphasis on relationships between schools and the black community, and needed changes in education.

**ED FND 6422 Analysis Of Educational Issues: 3 semester hours**

Prerequisite: A course in philosophy of education or a course in history of education or consent of instructor. A critical examination of issues about the elementary and secondary schools. This is done through the analysis of the procedures, resources and goals that guide school policies and practices.

**ED FND 6430 Critical Race Theory in Education: 3 semester hours**

Prerequisites: Graduate Standing. A treatment of Critical Race Theory (CRT) in educational research. At the end of the semester, students will be able to articulate a personal perspective on CRT and how it could be utilized as a research philosophy and methodology.

**ED FND 6431 History of African American Education: 3 semester hours**

Prerequisites: Graduate Standing. Exploration of the history of education for African Americans. Among the topics investigated will be provision of schooling by the community and/or state; curriculum debates (i.e., vocational vs. classical), and official policies (and informal practices) surrounding segregation, desegregation, and resegregation. Also explores contested interpretations and the myriad ways that memories and meanings intersect through individuals and communities over education and its value.

**ED FND 6497 Problems: 1-10 semester hours**

## Courses

**ED FND 3251 Black Americans In Education: 3 semester hours**

An examination and analysis of conditions affecting the education of black Americans and their schools, with emphasis on relationships between schools and the black community, and needed changes in education.

**ED FND 6422 Analysis Of Educational Issues: 3 semester hours**

Prerequisite: A course in philosophy of education or a course in history of education or consent of instructor. A critical examination of issues about the elementary and secondary schools. This is done through the analysis of the procedures, resources and goals that guide school policies and practices.

**ED FND 6430 Critical Race Theory in Education: 3 semester hours**

Prerequisites: Graduate Standing. A treatment of Critical Race Theory (CRT) in educational research. At the end of the semester, students will be able to articulate a personal perspective on CRT and how it could be utilized as a research philosophy and methodology.

**ED FND 6431 History of African American Education: 3 semester hours**

Prerequisites: Graduate Standing. Exploration of the history of education for African Americans. Among the topics investigated will be provision of schooling by the community and/or state; curriculum debates (i.e., vocational vs. classical), and official policies (and informal practices) surrounding segregation, desegregation, and resegregation. Also explores contested interpretations and the myriad ways that memories and meanings intersect through individuals and communities over education and its value.

**ED FND 6497 Problems: 1-10 semester hours**

## Educational Psychology

## Courses

**ED PSY 2212 Introduction To Learners And Learning: 3 semester hours**

Prerequisite: PSYCH 1003. This course examines, discusses and applies theories on infant, child, and adolescent development; examines student growth in various domains, including cognitive, linguistic, physical, and socio-emotional; and analyzes how different cultural contexts affect learning. Through readings, in-class activities, and field assignments outside of class time, students will consider how to apply these theories to create appropriate learning environments.

**ED PSY 3312 Psychology of Learning, Instruction, and Assessment: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212 or equivalents and admission to Teacher Education program. Application of educational psychology theories and research to learning, instruction, and assessment. Candidates will gain experience working with individuals and groups in settings that will provide the opportunity to design and evaluate instruction and assessment. Field assignments outside of class hours required.

**ED PSY 6030 Instruction, Learning And Assessment: 3 semester hours**

Prerequisite: Admission to Graduate School. Reviews cognitive theories and research to examine how teachers can improve the design of classroom instruction, including the development of units, lesson plans, and assessment strategies. Students will critically evaluate current educational practices, design appropriate assessments based on instructional goals, and assess their own professional development as teachers.

**ED PSY 6111 Psychology Of Education: 3 semester hours**

Current psychological theories and research that guide inquiry and decision making in education. Topics surveyed include behavior, development, learning, instruction.

**ED PSY 6113 Psychopathology And Diagnosis: 3 semester hours**

Same as CNS ED 6070. Prerequisites: Graduate Standing. Covers etiology, assessment and diagnosis of mental disorders using contemporary diagnostic systems. Course materials and assignments address the dynamics of adjustment and treatment implications for counselors, school psychologists, and others in the helping professions.

**ED PSY 6115 Personality And Social Development: 3 semester hours**

Prerequisites: Graduate standing. A foundational course integrating major theoretical perspectives on personality and social development. Emphasis is on the dynamic interplay of sociocultural influences on personality and identity development, including the impact of social contexts such as the school on development.

**ED PSY 6210 Life-Span: Individual and Family Development: 3 semester hours**

Prerequisites: Graduate Standing. Critical analyses of theories of human development including readings from empirical research and cross-cultural comparisons focusing on strategies to enhance developmental outcomes through relationship and environmental opportunity.

**ED PSY 6215 Psychology Of Early Childhood Development: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. A survey of the theories, concepts and research which inform the field of early childhood development and help caregivers and teachers understand the cognitive, social, and emotional changes that take place from birth through the primary years of schooling.

**ED PSY 6217 Foundations Of Citizenship Education: 3 semester hours**

Prerequisites: Graduate Standing. Introduction to citizenship education providing a range of knowledge of civic participation, concepts of democracy, the democratic purposes of education, and the developmental of civic identity and political thinking, attitudes, and engagement. Comparison of historical and contemporary approaches to democratic citizenship education in the United States.

**ED PSY 6222 Advanced Studies in Child and Adolescent Development: 3 semester hours**

Prerequisites: Graduate Standing. Investigates current psychological theories and research regarding the physical, cognitive, and social-emotional development of children and adolescents.

**ED PSY 6225 The Psychology Of Adolescence: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. Current research on the psychological changes which occur during adolescence. Attention is paid to the family, school, peer groups, and contemporary settings that practitioners must understand to help young people meet the psychosocial challenges of adolescence.

**ED PSY 6310 Psychology Of Learning Processes: 3 semester hours**

Prerequisites: ED PSY 6111. Advanced study of learning and instructional theories. The historical and theoretical bases of instructional practice are examined.

**ED PSY 6404 Seminar: 1-10 semester hours****ED PSY 6417 Current Perspectives On Citizenship Education: 3 semester hours**

Prerequisite: ED PSY 6217. Seminar extends students' understanding of theory and research in citizenship education by applying it to practical programs in the US and abroad. Analysis of assumptions underlying methods of citizenship education and its goals. Exploration of research on methods that promote, facilitate, or inhibit civic participation and citizenship competence.

**ED PSY 6444 Cognition And Technology: 3 semester hours**

Same as ED TECH 6444. Prerequisites: ED PSY 6111 or consent of instructor. Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED PSY 6445 Character Education And Development: 3 semester hours**

Prerequisites: ED PSY 6111 and ED PSY 6220 or ED PSY 6225. Critical survey of theories of character development and models for character education in childhood and adolescence. Includes empirical and conceptual study of the nature of moral character how it develops, and how it can be fostered in schools.

**ED PSY 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Same as ED TECH 6448. Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of Instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as to the role of instructors.

**ED PSY 6450 Advanced Methods In Character Education: 3 semester hours**

Prerequisites: ED PSY 6445. Advanced exploration of methods for promoting character development in schools: class meetings, democratic processes, cross-age learning and character curriculum development. Methods will be critically examined for their empirical and theoretical justifications.

**ED PSY 6497 Problems: 1-10 semester hours****ED PSY 6530 Foundations Of School Psychology: 3 semester hours**

Prerequisites: Admission to the School Psychology Program or consent of instructor. Examines the professional roles, responsibilities, and functions of psychologists in schools. Focuses on educational foundations of school psychology including the history of the profession, organization and operation of schools, and diversity among students and their families.

**ED PSY 6532 Psychoeducational Differences: 3 semester hours**

Prerequisites: Graduate Standing. Examination of classification systems used with children and adolescents in the diagnosis and treatment of educational and physical disabilities, mental disorders, and other developmental challenges.

**ED PSY 6536 Biological Bases Of Behavior: 3 semester hours**

Prerequisites: Graduate Standing. Examination of biological factors affecting human behavior. Includes an overview of neuroscience, developmental psychophysiology, and basic psychopharmacology. Implications for psychological and educational interventions are considered.

**ED PSY 6540 Psychoeducational Interventions: 3 semester hours**

Prerequisites: Grades of B- or better in ED PSY 6545 and ED REM 6718; or consent of instructor. Examines academic and instructional interventions, both preventive and remedial, that are delivered in schools and related settings with children and adolescents. Emphasizes linking assessment and intervention via use of direct and indirect service delivery.

**ED PSY 6542 Social-Emotional and Behavior Interventions: 3 semester hours**

Prerequisites: Grade of B- or better in SPEC ED 6325 or SPEC ED 6437; or consent of instructor. Provides instruction and practice in the use of the problem-solving model to address common social-emotional and behavior problems found in schools. Special emphasis is given to research-based, early intervention and targeted intervention techniques that improve student behavior. Concurrent placement in a school or related setting is necessary to complete course assignments.

**ED PSY 6545 Consultation In Schools And Related Settings: 3 semester hours**

Prerequisites: Admission to the School Psychology or Special Education Program, or consent of instructor. Examines the theories, research, and legal/ethical issues related to consultation in schools and related settings. Emphasis on understanding the process of consultation using a problem-solving approach. Includes instruction in interviewing, observation, and development and evaluation of interventions.

**ED PSY 6550 Professional Issues In School Psychology: 3 semester hours**

Prerequisites: Grade of B- or better in ED PSY 6530 or consent of instructor. Advanced examination of professional issues - specifically the legal, ethical, and cultural factors - that influence the practice of school psychology.

**ED PSY 6590 School Psychology Practicum I: 3 semester hours**

Prerequisites: Grades of B or better in ED PSY 6550 and ED REM 6718. Introductory supervised experience in psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6591 School Psychology Practicum II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6590. Advanced supervised experience in consultation, problem solving, psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6598 School Psychology Internship I: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6591. Supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6599 School Psychology Internship II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6598. Advanced supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6990 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED PSY 7210 Theories of Development and the Life Course: 3 semester hours**

Prerequisites: Doctoral standing and at least one course in human development (e.g., ED PSY 6210 or ED PSY 6225), or consent of instructor. This advanced course examines the historical, ecological, cultural, and individual factors that shape developmental and educational experiences. Diverse families and their trajectories will be highlighted to demonstrate the intersecting spheres that shape human development. Students will critique research from multiple disciplines, analyze policy issues, and design a study to deepen their understanding of traditional and current theories on the life course.

**ED PSY 7640 Changing Perspectives In Educational Psychology: 3 semester hours**

Prerequisites: Doctoral Student Standing or consent of instructor The advanced exploration of foundational issues in educational psychology. Topics include theoretical perspectives on modes of analysis used in the investigation of psychological theories and concepts in education.

**ED PSY 7647 Teaching For Learning In The University: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. An examination of current research in learning, instruction, motivation, and assessment as it pertains to teaching and learning in post-secondary settings. Designed to guide graduate students to promote active and meaningful learning in college classrooms to develop college students' critical thinking skills. Graduate students across the disciplines may enroll.

## Courses

**ED PSY 2212 Introduction To Learners And Learning: 3 semester hours**

Prerequisite: PSYCH 1003. This course examines, discusses and applies theories on infant, child, and adolescent development; examines student growth in various domains, including cognitive, linguistic, physical, and socio-emotional; and analyzes how different cultural contexts affect learning. Through readings, in-class activities, and field assignments outside of class time, students will consider how to apply these theories to create appropriate learning environments.

**ED PSY 3312 Psychology of Learning, Instruction, and Assessment: 3 semester hours**

Prerequisites: TCH ED 2209, ED PSY 2212 or equivalents and admission to Teacher Education program. Application of educational psychology theories and research to learning, instruction, and assessment. Candidates will gain experience working with individuals and groups in settings that will provide the opportunity to design and evaluate instruction and assessment. Field assignments outside of class hours required.

**ED PSY 6030 Instruction, Learning And Assessment: 3 semester hours**

Prerequisite: Admission to Graduate School. Reviews cognitive theories and research to examine how teachers can improve the design of classroom instruction, including the development of units, lesson plans, and assessment strategies. Students will critically evaluate current educational practices, design appropriate assessments based on instructional goals, and assess their own professional development as teachers.

**ED PSY 6111 Psychology Of Education: 3 semester hours**

Current psychological theories and research that guide inquiry and decision making in education. Topics surveyed include behavior, development, learning, instruction.

**ED PSY 6113 Psychopathology And Diagnosis: 3 semester hours**

Same as CNS ED 6070. Prerequisites: Graduate Standing. Covers etiology, assessment and diagnosis of mental disorders using contemporary diagnostic systems. Course materials and assignments address the dynamics of adjustment and treatment implications for counselors, school psychologists, and others in the helping professions.

**ED PSY 6115 Personality And Social Development: 3 semester hours**

Prerequisites: Graduate standing. A foundational course integrating major theoretical perspectives on personality and social development. Emphasis is on the dynamic interplay of sociocultural influences on personality and identity development, including the impact of social contexts such as the school on development.

**ED PSY 6210 Life-Span: Individual and Family Development: 3 semester hours**

Prerequisites: Graduate Standing. Critical analyses of theories of human development including readings from empirical research and cross-cultural comparisons focusing on strategies to enhance developmental outcomes through relationship and environmental opportunity.

**ED PSY 6215 Psychology Of Early Childhood Development: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. A survey of the theories, concepts and research which inform the field of early childhood development and help caregivers and teachers understand the cognitive, social, and emotional changes that take place from birth through the primary years of schooling.

**ED PSY 6217 Foundations Of Citizenship Education: 3 semester hours**

Prerequisites: Graduate Standing. Introduction to citizenship education providing a range of knowledge of civic participation, concepts of democracy, the democratic purposes of education, and the developmental of civic identity and political thinking, attitudes, and engagement. Comparison of historical and contemporary approaches to democratic citizenship education in the United States.

**ED PSY 6222 Advanced Studies in Child and Adolescent Development: 3 semester hours**

Prerequisites: Graduate Standing. Investigates current psychological theories and research regarding the physical, cognitive, and social-emotional development of children and adolescents.

**ED PSY 6225 The Psychology Of Adolescence: 3 semester hours**

Prerequisites: ED PSY 6111 or consent of instructor. Current research on the psychological changes which occur during adolescence. Attention is paid to the family, school, peer groups, and contemporary settings that practitioners must understand to help young people meet the psychosocial challenges of adolescence.

**ED PSY 6310 Psychology Of Learning Processes: 3 semester hours**

Prerequisites: ED PSY 6111. Advanced study of learning and instructional theories. The historical and theoretical bases of instructional practice are examined.

**ED PSY 6404 Seminar: 1-10 semester hours****ED PSY 6417 Current Perspectives On Citizenship Education: 3 semester hours**

Prerequisite: ED PSY 6217. Seminar extends students' understanding of theory and research in citizenship education by applying it to practical programs in the US and abroad. Analysis of assumptions underlying methods of citizenship education and its goals. Exploration of research on methods that promote, facilitate, or inhibit civic participation and citizenship competence.

**ED PSY 6444 Cognition And Technology: 3 semester hours**

Same as ED TECH 6444. Prerequisites: ED PSY 6111 or consent of instructor. Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED PSY 6445 Character Education And Development: 3 semester hours**

Prerequisites: ED PSY 6111 and ED PSY 6220 or ED PSY 6225. Critical survey of theories of character development and models for character education in childhood and adolescence. Includes empirical and conceptual study of the nature of moral character how it develops, and how it can be fostered in schools.

**ED PSY 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Same as ED TECH 6448. Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of Instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as to the role of instructors.

**ED PSY 6450 Advanced Methods In Character Education: 3 semester hours**

Prerequisites: ED PSY 6445. Advanced exploration of methods for promoting character development in schools: class meetings, democratic processes, cross-age learning and character curriculum development. Methods will be critically examined for their empirical and theoretical justifications.

**ED PSY 6497 Problems: 1-10 semester hours****ED PSY 6530 Foundations Of School Psychology: 3 semester hours**

Prerequisites: Admission to the School Psychology Program or consent of instructor. Examines the professional roles, responsibilities, and functions of psychologists in schools. Focuses on educational foundations of school psychology including the history of the profession, organization and operation of schools, and diversity among students and their families.

**ED PSY 6532 Psychoeducational Differences: 3 semester hours**

Prerequisites: Graduate Standing. Examination of classification systems used with children and adolescents in the diagnosis and treatment of educational and physical disabilities, mental disorders, and other developmental challenges.

**ED PSY 6536 Biological Bases Of Behavior: 3 semester hours**

Prerequisites: Graduate Standing. Examination of biological factors affecting human behavior. Includes an overview of neuroscience, developmental psychophysiology, and basic psychopharmacology. Implications for psychological and educational interventions are considered.

**ED PSY 6540 Psychoeducational Interventions: 3 semester hours**

Prerequisites: Grades of B- or better in ED PSY 6545 and ED REM 6718; or consent of instructor. Examines academic and instructional interventions, both preventive and remedial, that are delivered in schools and related settings with children and adolescents. Emphasizes linking assessment and intervention via use of direct and indirect service delivery.

**ED PSY 6542 Social-Emotional and Behavior Interventions: 3 semester hours**

Prerequisites: Grade of B- or better in SPEC ED 6325 or SPEC ED 6437; or consent of instructor. Provides instruction and practice in the use of the problem-solving model to address common social-emotional and behavior problems found in schools. Special emphasis is given to research-based, early intervention and targeted intervention techniques that improve student behavior. Concurrent placement in a school or related setting is necessary to complete course assignments.

**ED PSY 6545 Consultation In Schools And Related Settings: 3 semester hours**

Prerequisites: Admission to the School Psychology or Special Education Program, or consent of instructor. Examines the theories, research, and legal/ethical issues related to consultation in schools and related settings. Emphasis on understanding the process of consultation using a problem-solving approach. Includes instruction in interviewing, observation, and development and evaluation of interventions.

**ED PSY 6550 Professional Issues In School Psychology: 3 semester hours**

Prerequisites: Grade of B- or better in ED PSY 6530 or consent of instructor. Advanced examination of professional issues - specifically the legal, ethical, and cultural factors - that influence the practice of school psychology.

**ED PSY 6590 School Psychology Practicum I: 3 semester hours**

Prerequisites: Grades of B or better in ED PSY 6550 and ED REM 6718. Introductory supervised experience in psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6591 School Psychology Practicum II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6590. Advanced supervised experience in consultation, problem solving, psychoeducational assessment and interventions for academic and behavior problems in schools and related settings. Settings and responsibilities determined in consultation with program faculty and site supervisor.

**ED PSY 6598 School Psychology Internship I: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6591. Supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6599 School Psychology Internship II: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6598. Advanced supervised field-based placement in an approved school or educational setting under the supervision of an appropriately credentialed school psychologist. Course is eligible for graduate equivalency credit.

**ED PSY 6990 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED PSY 7210 Theories of Development and the Life Course: 3 semester hours**

Prerequisites: Doctoral standing and at least one course in human development (e.g., ED PSY 6210 or ED PSY 6225), or consent of instructor. This advanced course examines the historical, ecological, cultural, and individual factors that shape developmental and educational experiences. Diverse families and their trajectories will be highlighted to demonstrate the intersecting spheres that shape human development. Students will critique research from multiple disciplines, analyze policy issues, and design a study to deepen their understanding of traditional and current theories on the life course.

**ED PSY 7640 Changing Perspectives In Educational Psychology: 3 semester hours**

Prerequisites: Doctoral Student Standing or consent of instructor The advanced exploration of foundational issues in educational psychology. Topics include theoretical perspectives on modes of analysis used in the investigation of psychological theories and concepts in education.

**ED PSY 7647 Teaching For Learning In The University: 3 semester hours**

Prerequisites: Graduate standing and consent of instructor. An examination of current research in learning, instruction, motivation, and assessment as it pertains to teaching and learning in post-secondary settings. Designed to guide graduate students to promote active and meaningful learning in college classrooms to develop college students' critical thinking skills. Graduate students across the disciplines may enroll.

## Educational Research And Evaluation Method

## Courses

**ED REM 3721 Psychoeducational Assessment and Evaluation: 3 semester hours**

Review of measurement concepts and use of psychoeducational assessment data gathered via interview, observation, norm-referenced, and curriculum-based assessment methods. Special emphasis on progress monitoring and data-based decision making.

**ED REM 6040 Educational Research for Teachers: 3 semester hours**

Prerequisites: TCH ED 6010 and TCH ED 6020. This course provides the basic knowledge and skills needed by educators to understand and engage in educational research. Educators will learn and use both analytic and practical tools for studying teaching, learning, and assessment in educational contexts, including their own classroom.

**ED REM 6497 Problems: 1-10 semester hours**

Prerequisite: At least one previous ED REM course and consent of course supervisor. Individual study on topics pertaining to educational measurement, evaluation, statistics and research design.

**ED REM 6707 Classroom Measurement And Evaluation: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course to classroom testing and evaluation. Topic areas include comparison of criterion-and norm-referenced theory and technique; classical test theory, reliability, validity, and associated descriptive statistics; derived and transformed scores; preparation of instructional objectives for use in developing the classroom test, performance evaluations, and portfolio rubrics; use of evaluation to assess student achievement and instructional effectiveness.

**ED REM 6709 Educational And Psychological Measurement: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course in testing and measurement theory: reliability, validity, and associated descriptive statistics; correlation and simple regression; derived and transformed scores; interpretation of test scores; measurement of aptitude, vocational interests, and personal-social adjustment.

**ED REM 6710 Educational Research Methods and Design: 3 semester hours**

Prerequisites: An introductory statistics course or an introductory research design course; or consent of instructor. Covers educational research methodology: comparison of various types of qualitative and quantitative educational research, threats to internal/external validity, sampling methods, data analyses, and components of research reports.

**ED REM 6716 Academic Assessment and Intervention: 3 semester hours**

Prerequisites: Graduate Standing. Provides instruction in measurement concepts, interpretation of cognitive ability tests, and use of norm-referenced and curriculum-based assessment techniques in developing academic interventions. Special attention is given to data-based decision making and the links among instruction, assessment, and intervention.

**ED REM 6718 Psychoeducational Assessment And Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6530 or CNS ED 6050, or consent of instructor. Reviews measurement concepts and covers administration, scoring, interpretation, and reporting of individually administered tests of academic and cognitive abilities. Special attention is given to the link between assessment and intervention.

**ED REM 6719 Advanced Psychoeducational Assessment and Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED REM 6718 or consent of instructor. Instruction is provided in advanced and specialized assessment, diagnostic, and intervention techniques for individuals with intellectual disabilities, emotional or behavior disorders, and other low incidence disabilities experienced by children and youth.

**ED REM 6730 Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6710, ED REM 6750; or consent of instructor. Covers principles and procedures for developing and assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and system changes in educational settings.

**ED REM 6732 Advanced Theory And Practice In Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6730 or consent of the instructor. Extension of the principles, attributes, and practice of program evaluation to contemporary problems and settings. Study will include the comparison of examples of the program evaluation process. Focus will be on adherence to the Program Evaluation Standards endorsed by leading professional research and evaluation associations.

**ED REM 6735 Statistical Analysis For Education Research: 3 semester hours**

Prerequisites: Graduate Standing. Provides students with a fundamental intermediate understanding of quantitative methods and their relationship to social science research in education. This course is designed to provide statistical background to students who will pursue advanced degrees in education. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

**ED REM 6750 Advanced Research Design In Education: 3 semester hours**

Prerequisites: ED REM 6735 or consent of instructor. Course is designed to provide students with a thorough background in the fundamental principles of research design in education, and the knowledge and skills necessary to design and carry out studies appropriate to a wide variety of research problems. It focuses on tailoring the research design and methodology to most effectively address the problem or issue of concern, including qualitative, quantitative, and mixed-method designs. This is an experiential course designed around active discussion by students each week, and requires each student to develop a detailed research proposal for conducting a study to examine an appropriate educational research problem.

**ED REM 6990 Internship: 1-10 semester hours**

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED REM 7712 Discourse Analysis In Education: 3 semester hours**

Prerequisites: Graduate Standing. The role of language in social life is of paramount concern to educational researchers. The purpose of this course is to introduce students to theories and methods of discourse analysis. Students will become familiar with the methods used in conversation analysis, critical discourse analysis and mediated or multimodal discourse analysis. Topics include transcription theory and practice, the role of context in discourse analysis, the ethics of representation and the place of action in discourse analysis. Students will engage with the theories and methods for analyzing educational interactions such as small-group discussions, education documents, classroom scenes, in-depth interviews, and naturally occurring conversations.

**ED REM 7740 Historical Research Methods in Education: 3 semester hours**

Prerequisites: Doctoral Standing. Survey of the methodology of historical research in education and historical writing about educational issues. Specific topics will include the historiography of education; working with primary and secondary documents; oral history as method and documentation; quantitative approaches to history; constructing historical narratives; and the question of interpretation.

**ED REM 7771 Quantitative Research Methods I: 3 semester hours**

Prerequisites: ED REM 6735. A second course in advanced Educational research methods sequence, with focus on multiple regression analysis and its applications to educational and psychological research.

**ED REM 7772 Quantitative Research Methods II: 3 semester hours**

Prerequisites: ED REM 7771 or consent of instructor. An advanced educational research methods course: multivariate analysis of variance, canonical correlation, discriminant function analysis, factor analysis, cluster analysis, advanced topics in multiple linear regression; and associated research design issues.

**ED REM 7773 Quantitative Research Methods III: 3 semester hours**

Prerequisites: ED REM 7772. An advanced educational research methods course using multiple linear regression models, path analysis, and structural equation modeling. Focus is on the theory, issues and application of these advanced data analysis techniques.

**ED REM 7781 Qualitative Methods In Educational Research I: 3 semester hours**

Prerequisites: ED REM 6750 or consent of instructor. An introductory qualitative research methods course in education to develop skill in forming research questions, writing field notes, and collecting, organizing, and analyzing a variety of data. The design issues of triangulation, subjectivity, and trustworthiness are explored. Ethics and ethical issues in qualitative research are presented.

**ED REM 7782 Qualitative Methods In Educational Research II: 3 semester hours**

Prerequisites: ED REM 7781 or consent of instructor. An advanced qualitative educational research methods course to address the issues of sampling strategies, observational and interview techniques, questionnaire construction, and data analysis. Requires access to a field setting to conduct a qualitative research study.

## Courses

**ED REM 3721 Psychoeducational Assessment and Evaluation: 3 semester hours**

Review of measurement concepts and use of psychoeducational assessment data gathered via interview, observation, norm-referenced, and curriculum-based assessment methods. Special emphasis on progress monitoring and data-based decision making.

**ED REM 6040 Educational Research for Teachers: 3 semester hours**

Prerequisites: TCH ED 6010 and TCH ED 6020. This course provides the basic knowledge and skills needed by educators to understand and engage in educational research. Educators will learn and use both analytic and practical tools for studying teaching, learning, and assessment in educational contexts, including their own classroom.

**ED REM 6497 Problems: 1-10 semester hours**

Prerequisite: At least one previous ED REM course and consent of course supervisor. Individual study on topics pertaining to educational measurement, evaluation, statistics and research design.

**ED REM 6707 Classroom Measurement And Evaluation: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course to classroom testing and evaluation. Topic areas include comparison of criterion- and norm-referenced theory and technique; classical test theory, reliability, validity, and associated descriptive statistics; derived and transformed scores; preparation of instructional objectives for use in developing the classroom test, performance evaluations, and portfolio rubrics; use of evaluation to assess student achievement and instructional effectiveness.

**ED REM 6709 Educational And Psychological Measurement: 3 semester hours**

Prerequisites: Graduate admission or consent of instructor. An introductory graduate course in testing and measurement theory: reliability, validity, and associated descriptive statistics; correlation and simple regression; derived and transformed scores; interpretation of test scores; measurement of aptitude, vocational interests, and personal-social adjustment.

**ED REM 6710 Educational Research Methods and Design: 3 semester hours**

Prerequisites: An introductory statistics course or an introductory research design course; or consent of instructor. Covers educational research methodology: comparison of various types of qualitative and quantitative educational research, threats to internal/external validity, sampling methods, data analyses, and components of research reports.

**ED REM 6716 Academic Assessment and Intervention: 3 semester hours**

Prerequisites: Graduate Standing. Provides instruction in measurement concepts, interpretation of cognitive ability tests, and use of norm-referenced and curriculum-based assessment techniques in developing academic interventions. Special attention is given to data-based decision making and the links among instruction, assessment, and intervention.

**ED REM 6718 Psychoeducational Assessment And Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED PSY 6530 or CNS ED 6050, or consent of instructor. Reviews measurement concepts and covers administration, scoring, interpretation, and reporting of individually administered tests of academic and cognitive abilities. Special attention is given to the link between assessment and intervention.

**ED REM 6719 Advanced Psychoeducational Assessment and Intervention: 3 semester hours**

Prerequisites: Grade of B or better in ED REM 6718 or consent of instructor. Instruction is provided in advanced and specialized assessment, diagnostic, and intervention techniques for individuals with intellectual disabilities, emotional or behavior disorders, and other low incidence disabilities experienced by children and youth.

**ED REM 6730 Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6710, ED REM 6750; or consent of instructor. Covers principles and procedures for developing and assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and system changes in educational settings.

**ED REM 6732 Advanced Theory And Practice In Educational Program Evaluation: 3 semester hours**

Prerequisites: ED REM 6730 or consent of the instructor. Extension of the principles, attributes, and practice of program evaluation to contemporary problems and settings. Study will include the comparison of examples of the program evaluation process. Focus will be on adherence to the Program Evaluation Standards endorsed by leading professional research and evaluation associations.

**ED REM 6735 Statistical Analysis For Education Research: 3 semester hours**

Prerequisites: Graduate Standing. Provides students with a fundamental intermediate understanding of quantitative methods and their relationship to social science research in education. This course is designed to provide statistical background to students who will pursue advanced degrees in education. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

**ED REM 6750 Advanced Research Design In Education: 3 semester hours**

Prerequisites: ED REM 6735 or consent of instructor. Course is designed to provide students with a thorough background in the fundamental principles of research design in education, and the knowledge and skills necessary to design and carry out studies appropriate to a wide variety of research problems. It focuses on tailoring the research design and methodology to most effectively address the problem or issue of concern, including qualitative, quantitative, and mixed-method designs. This is an experiential course designed around active discussion by students each week, and requires each student to develop a detailed research proposal for conducting a study to examine an appropriate educational research problem.

**ED REM 6990 Internship: 1-10 semester hours**

Prerequisite: consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED REM 7712 Discourse Analysis In Education: 3 semester hours**

Prerequisites: Graduate Standing. The role of language in social life is of paramount concern to educational researchers. The purpose of this course is to introduce students to theories and methods of discourse analysis. Students will become familiar with the methods used in conversation analysis, critical discourse analysis and mediated or multimodal discourse analysis. Topics include transcription theory and practice, the role of context in discourse analysis, the ethics of representation and the place of action in discourse analysis. Students will engage with the theories and methods for analyzing educational interactions such as small-group discussions, education documents, classroom scenes, in-depth interviews, and naturally occurring conversations.

**ED REM 7740 Historical Research Methods in Education: 3 semester hours**

Prerequisites: Doctoral Standing. Survey of the methodology of historical research in education and historical writing about educational issues. Specific topics will include the historiography of education; working with primary and secondary documents; oral history as method and documentation; quantitative approaches to history; constructing historical narratives; and the question of interpretation.

**ED REM 7771 Quantitative Research Methods I: 3 semester hours**

Prerequisites: ED REM 6735. A second course in advanced Educational research methods sequence, with focus on multiple regression analysis and its applications to educational and psychological research.

**ED REM 7772 Quantitative Research Methods II: 3 semester hours**

Prerequisites: ED REM 7771 or consent of instructor. An advanced educational research methods course: multivariate analysis of variance, canonical correlation, discriminant function analysis, factor analysis, cluster analysis, advanced topics in multiple linear regression; and associated research design issues.

**ED REM 7773 Quantitative Research Methods III: 3 semester hours**

Prerequisites: ED REM 7772. An advanced educational research methods course using multiple linear regression models, path analysis, and structural equation modeling. Focus is on the theory, issues and application of these advanced data analysis techniques.

**ED REM 7781 Qualitative Methods In Educational Research I: 3 semester hours**

Prerequisites: ED REM 6750 or consent of instructor. An introductory qualitative research methods course in education to develop skill in forming research questions, writing field notes, and collecting, organizing, and analyzing a variety of data. The design issues of triangulation subjectivity, and trustworthiness are explored. Ethics and ethical issues in qualitative research are presented.

**ED REM 7782 Qualitative Methods In Educational Research II: 3 semester hours**

Prerequisites: ED REM 7781 or consent of instructor. An advanced qualitative educational research methods course to address the issues of sampling strategies, observational and interview techniques, questionnaire construction, and data analysis. Requires access to a field setting to conduct a qualitative research study.

## Educational Technology

### Courses

**ED TECH 3135 Technology for Educators: 1 semester hour**

This course will instruct teacher candidates in the use of digital tools in education. Candidates will develop strategies for incorporating current technology developments and social media in educational practice.

**ED TECH 4302 Educational Technology Instruction in Educational Agencies: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how educators can facilitate inquiry-based learning, and on the design and implementation of technology-rich activities and projects. Practices to be explored include making presentations; searching for information and educational resources; organizing, writing, and displaying information and data. Students may not receive credit for both ED TECH 4302 and ED TECH 5301.

**ED TECH 4436 Computer-Mediated Teaching and Learning in Education: 3 semester hours**

Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Education could be formal or informal, in an institutional setting or not. Students will get experience with several different technologies during the semester.

**ED TECH 5301 Introduction To Computers And The Internet In Education: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how teachers can facilitate learning in inquiry-based, technology-rich classrooms; and on the design and implementation of technology-rich activities and projects. Introduces students to the networked computer as an instructional tool. Course participants will be introduced to how teachers and their students can use computer tools in appropriate ways for different context areas and educational levels. Practices to be explored include making presentations; searching for information and educational resources; organizing writing, and displaying information and data.

**ED TECH 5340 Selection And Utilization Of Educational Multimedia: 3 semester hours**

Prerequisites: ED TECH 5301 or consent of instructor. Prepares students for selecting and utilizing multimedia technologies for learning. Students will conduct projects involving educational multimedia programs available on computers or over telecommunications networks. The projects will incorporate graphics, sound, and video. The goal of working on these projects is to prepare students to facilitate others' use of multimedia in classrooms and other educational contexts.

**ED TECH 6135 Technology for Preparing Inquiry-Based Teaching: 1 semester hour**

Prerequisites: Graduate standing. This course instructs teacher candidates in the use of digital tools in their teaching practice. Candidates develop strategies for incorporating current technology developments and social media in educational practice. Technology for educators challenges the candidates to think about the underlying principles, terms, and concepts of educational technology. Students are introduced to the different methods teachers can use to integrate technology into classroom instruction for varying grade levels and content areas. Activities undertaken in this course include learning about educational technology tools and applying some of them to create the academic instructional materials through interactive collaboration.

**ED TECH 6404 Seminar: 1-10 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Seminar in educational technology addressing special issues and topics not normally included in the regular educational technology courses.

**ED TECH 6416 Teaching & Learning With Technology: Graphical Representational Tools: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Examines how graphical representation tools can be used to enhance teaching and learning. Students will learn about techniques for visualizing and organizing information and data in science, math, the social sciences, and humanities, and will become familiar with research and practice pertaining to their use in a variety of learning activities and projects.

**ED TECH 6434 Technology and Privilege: 3 semester hours**

Prerequisites: Graduate standing. Covers issues relating to the digital divide in schools and the society. The focus will be on technology in education with an emphasis on the ways that policies and practices perpetuate the divide. To examine this phenomenon, Critical Race Theory (CRT) will be one lens to examine the inequality.

**ED TECH 6435 Instructional Technology And Education Reform: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Students will learn how to foster changes in uses of technology for learning in schools, based on a historical understanding of previous technology reforms, and a critical assessment of recent reforms. Questions addressed included: What did stakeholders predict and hope for with earlier educational technologies, early uses of the computer and networking, and present technological innovations? What actually happened? Why? How can teachers and other educators help foster and spread effective use of technology for learning?.

**ED TECH 6436 Computer-Mediated Communication In Education: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Explores the theory, research, and practice of using computermediated communication and computer-supported collaborative learning in education. Learning environments including elementary, secondary, higher, and adult education will be considered.

**ED TECH 6437 Distance Learning Via Networks And Telecommunications: 3 semester hours**

Prerequisites: Graduate Standing The course is an investigation in the ways that learning and teaching across the barriers of time and distance are similar to and different from face to face learning and teaching. Students will study the influence of interactive media: videoconferencing, asynchronous discussions and other commonly used methods.

**ED TECH 6444 Cognition And Technology: 3 semester hours**

Same as ED PSY 6444. Prerequisites: ED PSY 6111 or consent of instructor Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED TECH 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, and pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as the role of instructors.

**ED TECH 6449 Using Technology In Administration Processes: 3 semester hours**

Same as ED ADM 6449. Prerequisites: A course in measurement, statistics or evaluation, or consent of instructor. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED TECH 6452 Educational Multimedia Design: 3 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Examines principles and techniques for the design of visually and functionally effective multimedia educational resources. Emphasis will be placed on techniques for the computer-based production of materials incorporating text, graphics, and video Rapid prototyping and evaluation techniques will be incorporated.

**ED TECH 6454 Instructional Video Production: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Elements of digital video production will be studied and used to produce video for a variety of formats. Students will develop the skill to produce and stream programs for school news programs, video annuals, documentaries and staff development programs.

**ED TECH 6460 Technology Coordination In Schools: 3 semester hours**

Prerequisites: ED TECH 5340, ED TECH 6444, and ED TECH 6448 or consent of instructor. The course provides theoretical and practical knowledge for implementing technology in schools. A major focus will be placed on analyzing the total cost of implementations and methods for measuring educational success.

**ED TECH 6462 Technical System Implementation For Educational Technology - Part 1: 3 semester hours**

Prerequisites: ED TECH 5340. Provides a foundational understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will learn theory and practice enabling them to install, troubleshoot and configure networked computers for educational purposes.

**ED TECH 6463 Technical System Implementation for Educational Technology Part 2: 3 semester hours**

Prerequisites: ED TECH 6462. Provides an in-depth understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will extend their knowledge of theory and practice, and will install, troubleshoot, configure networked computers for educational purposes.

**ED TECH 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED TECH 6497 Problems: 1-10 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Individual study on topics pertaining to educational technology.

**ED TECH 7070 Higher Education and Technology: Theory and Practice: 3 semester hours**

Prerequisites: Doctoral standing or consent of instructor. Students explore recent research of classical learning theories and pedagogy in order to incorporate advanced technology. Students apply both theory and practice to develop and present lesson modules that explore research in this area, and illustrate the use of technology in teaching. Detailed constructive criticism is used with the presentations.

## Courses

**ED TECH 3135 Technology for Educators: 1 semester hour**

This course will instruct teacher candidates in the use of digital tools in education. Candidates will develop strategies for incorporating current technology developments and social media in educational practice.

**ED TECH 4302 Educational Technology Instruction in Educational Agencies: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how educators can facilitate inquiry-based learning, and on the design and implementation of technology-rich activities and projects. Practices to be explored include making presentations; searching for information and educational resources; organizing, writing, and displaying information and data. Students may not receive credit for both ED TECH 4302 and ED TECH 5301.

**ED TECH 4436 Computer-Mediated Teaching and Learning in Education: 3 semester hours**

Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Education could be formal or informal, in an institutional setting or not. Students will get experience with several different technologies during the semester.

**ED TECH 5301 Introduction To Computers And The Internet In Education: 3 semester hours**

The course focuses on how computers and the internet have changed teaching and learning; how teachers can facilitate learning in inquiry-based, technology-rich classrooms; and on the design and implementation of technology-rich activities and projects. Introduces students to the networked computer as an instructional tool. Course participants will be introduced to how teachers and their students can use computer tools in appropriate ways for different context areas and educational levels. Practices to be explored include making presentations; searching for information and educational resources; organizing writing, and displaying information and data.

**ED TECH 5340 Selection And Utilization Of Educational Multimedia: 3 semester hours**

Prerequisites: ED TECH 5301 or consent of instructor. Prepares students for selecting and utilizing multimedia technologies for learning. Students will conduct projects involving educational multimedia programs available on computers or over telecommunications networks. The projects will incorporate graphics, sound, and video. The goal of working on these projects is to prepare students to facilitate others' use of multimedia in classrooms and other educational contexts.

**ED TECH 6135 Technology for Preparing Inquiry-Based Teaching: 1 semester hour**

Prerequisites: Graduate standing. This course instructs teacher candidates in the use of digital tools in their teaching practice. Candidates develop strategies for incorporating current technology developments and social media in educational practice. Technology for educators challenges the candidates to think about the underlying principles, terms, and concepts of educational technology. Students are introduced to the different methods teachers can use to integrate technology into classroom instruction for varying grade levels and content areas. Activities undertaken in this course include learning about educational technology tools and applying some of them to create the academic instructional materials through interactive collaboration.

**ED TECH 6404 Seminar: 1-10 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Seminar in educational technology addressing special issues and topics not normally included in the regular educational technology courses.

**ED TECH 6416 Teaching & Learning With Technology: Graphical Representational Tools: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor Examines how graphical representation tools can be used to enhance teaching and learning. Students will learn about techniques for visualizing and organizing information and data in science, math, the social sciences, and humanities, and will become familiar with research and practice pertaining to their use in a variety of learning activities and projects.

**ED TECH 6434 Technology and Privilege: 3 semester hours**

Prerequisites: Graduate standing. Covers issues relating to the digital divide in schools and the society. The focus will be on technology in education with an emphasis on the ways that policies and practices perpetuate the divide. To examine this phenomenon, Critical Race Theory (CRT) will be one lens to examine the inequality.

**ED TECH 6435 Instructional Technology And Education Reform: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Students will learn how to foster changes in uses of technology for learning in schools, based on a historical understanding of previous technology reforms, and a critical assessment of recent reforms. Questions addressed included: What did stakeholders predict and hope for with earlier educational technologies, early uses of the computer and networking, and present technological innovations? What actually happened? Why? How can teachers and other educators help foster and spread effective use of technology for learning?.

**ED TECH 6436 Computer-Mediated Communication In Education: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Explores the theory, research, and practice of using computer-mediated communication and computer-supported collaborative learning in education. Learning environments including elementary, secondary, higher, and adult education will be considered.

**ED TECH 6437 Distance Learning Via Networks And Telecommunications: 3 semester hours**

Prerequisites: Graduate Standing The course is an investigation in the ways that learning and teaching across the barriers of time and distance are similar to and different from face to face learning and teaching. Students will study the influence of interactive media: videoconferencing, asynchronous discussions and other commonly used methods.

**ED TECH 6444 Cognition And Technology: 3 semester hours**

Same as ED PSY 6444. Prerequisites: ED PSY 6111 or consent of instructor Examines cognitive theories and computer-based tools for learning. Students will gain a critical understanding of the relationship between the design of technological tools, the use of those tools in educational settings, and their implications for learning.

**ED TECH 6448 Technology-Supported Inquiry Learning: 3 semester hours**

Prerequisites: ED TECH 5340 and ED PSY 6310 or consent of instructor. Educational technology such as networked computers and software can play a supportive role in inquiry-based learning. Students will explore the theoretical background, design issues, and pragmatic realities of technology-supported inquiry learning environments. Such learning environments are best understood as systems involving social, cultural, material and psychological aspects. Consideration will be given to the important properties of settings, activities and technologies, as well as the role of instructors.

**ED TECH 6449 Using Technology In Administration Processes: 3 semester hours**

Same as ED ADM 6449. Prerequisites: A course in measurement, statistics or evaluation, or consent of instructor. The course will explore how the use of data analysis with technology can be applied in the administration of schools or other work settings. Administrators will explore software tools and their implications for making decisions. A case study will be completed on the implementation of a technology in a school or other appropriate setting.

**ED TECH 6452 Educational Multimedia Design: 3 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Examines principles and techniques for the design of visually and functionally effective multimedia educational resources. Emphasis will be placed on techniques for the computer-based production of materials incorporating text, graphics, and video. Rapid prototyping and evaluation techniques will be incorporated.

**ED TECH 6454 Instructional Video Production: 3 semester hours**

Prerequisites: ED TECH 5340 or consent of instructor. Elements of digital video production will be studied and used to produce video for a variety of formats. Students will develop the skill to produce and stream programs for school news programs, video annuals, documentaries and staff development programs.

**ED TECH 6460 Technology Coordination In Schools: 3 semester hours**

Prerequisites: ED TECH 5340, ED TECH 6444, and ED TECH 6448 or consent of instructor. The course provides theoretical and practical knowledge for implementing technology in schools. A major focus will be placed on analyzing the total cost of implementations and methods for measuring educational success.

**ED TECH 6462 Technical System Implementation For Educational Technology - Part 1: 3 semester hours**

Prerequisites: ED TECH 5340. Provides a foundational understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will learn theory and practice enabling them to install, troubleshoot and configure networked computers for educational purposes.

**ED TECH 6463 Technical System Implementation for Educational Technology Part 2: 3 semester hours**

Prerequisites: ED TECH 6462. Provides an in-depth understanding of technical systems used in educational institutions, with a special emphasis on preparing and configuring computers to connect to a network. Students will extend their knowledge of theory and practice, and will install, troubleshoot, configure networked computers for educational purposes.

**ED TECH 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ED TECH 6497 Problems: 1-10 semester hours**

Prerequisite: ED TECH 5340 or consent of instructor. Individual study on topics pertaining to educational technology.

**ED TECH 7070 Higher Education and Technology: Theory and Practice: 3 semester hours**

Prerequisites: Doctoral standing or consent of instructor. Students explore recent research of classical learning theories and pedagogy in order to incorporate advanced technology. Students apply both theory and practice to develop and present lesson modules that explore research in this area, and illustrate the use of technology in teaching. Detailed constructive criticism is used with the presentations.

## Elementary Education

### Courses

**ELE ED 2192 Educational Laboratory/Field Experience: 1-3 semester hours**

A laboratory/field experience requiring systematic observation and/or participation in appropriate educational settings. To precede student teaching. May be repeated to maximum of three hours.

**ELE ED 3330 Literacy, Literature And The Learner: 3 semester hours**

Prerequisites: Level I requirements. Exploration of literature and literacy-related resources available to teachers for children and young people. Emphasis on critical reading of literature for a variety of purposes, including communication, instruction, information, and recreation. Focus on the development of criteria for evaluating and selecting culturally and developmentally appropriate materials for motivating students to read in school and at home, as well as strategies for using literature to build family and school partnerships around reading. Twelve hours of participation in a school classroom setting are required. This course may be applied toward a Literacy Minor.

**ELE ED 3336 Communication Arts Learning And Instruction: 3 semester hours**

Prerequisites: Level I and Level II requirements. Analysis of the six communication arts (listening, speaking, viewing, visually representing, writing, and reading) across content areas. Attention on understanding children's home language and how children learn and develop communication skills. Special emphasis on strategies for assessing and teaching reading and writing, including workshop models, spelling, grammar, and grand conversations to meet the needs of every child. This course may be applied toward a Literacy Minor.

**ELE ED 3337 Teaching and Learning Literacy in the Elementary Classroom: 4 semester hours**

Prerequisite: Level I. The course, emphasizing literacy development, literacy instruction and children's literature, is the first in a sequence of two courses on teaching reading and writing. The purposes of this course are to survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work and phonics alongside matching texts (print and digital) and readers. Assessment strategies that inform these instructional practices will be introduced. Particular attention will be given to learning to teach literacy within diverse contexts and with multicultural groups of students.

**ELE ED 3338 Literacy Assessment and Learning: 3 semester hours**

Prerequisites: Level II and ELE ED 3337. The purposes of this course are to address issues of the differences and difficulties that may occur in literacy processes, evaluation of students' literacy skills, analysis of texts for their use by readers, and to design classroom literacy engagements that utilize a variety of instructional strategies and materials. Assessment practices explored will include running records, qualitative reading inventories, spelling inventories and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

**ELE ED 3389 Classroom Based Assessment To Guide Literacy Instruction: 3 semester hours**

Prerequisites: TCH ED 3315 or TCH ED 4391 or equivalent reading methods course. Analysis of strategies for differentiating instruction for a range of readers and writers across content areas. Focus on cultural and language considerations in the assessment of students' literacy skills. Emphasis on meeting the needs of individual readers and writers in the context of whole class instruction. This course may be applied toward a Literacy Minor.

**ELE ED 4246 Teaching Mathematics In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of mathematics requirements in General Education. Organization and implementation of a modern elementary school mathematics program. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4253 Teaching Of Social Studies In The Elementary School: 3 semester hours**

Prerequisite: Junior standing and completion of social science requirements in general education. Study of elementary school social studies emphasizing the current social studies curricular content, methods of teaching and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, the K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, SEC ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**ELE ED 4341 Teaching Science In The Elementary School: 3 semester hours**

Prerequisites: Level I and Level II requirements. An analysis of teaching science to K-6 students with emphasis on current science education trends, science curricular materials, and strategies of instruction. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

**ELE ED 4342 Addressing Needs In Mathematics Teaching And Learning: 3 semester hours**

Prerequisite: ELE ED 4246. Instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. Course requires that students participate in K-12 classrooms for a minimum of 10 hours, in addition to university class schedule.

**ELE ED 4989 Practicum I: Elementary/Special Education Site Based Experience: 3 semester hours**

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**ELE ED 4990 Practicum II: Elementary/Special Education Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in ELE ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

**ELE ED 4991 Elementary School Student Teaching II: 6 semester hours**

Prerequisite: Completion of Level III courses. Clinical teaching experience in elementary school classrooms under university and school supervision. Required for all majors in elementary education. Not available for graduate credit.

**ELE ED 4992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 3 semester hours**

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**ELE ED 4993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not for graduate credit.

***ELE ED 4994 Practicum I: Elementary/TESOL Site Based Experience: 3 semester hours***

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4995 Practicum II: Elementary/TESOL Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Not for graduate credit.

***ELE ED 5989 Practicum I: Elementary/Special Education Site Based Experience: 1-2 semester hours***

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5990 Practicum II: Elementary/Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ELE ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5994 Practicum I: Elementary/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5995 Practicum II: Elementary/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Teacher candidates collect data for a research project.

***ELE ED 6241 Science Content, Inquiry-Based Instruction, and Assessment: STEM-Integrated Pedagogy: 2 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. The course is designed to provide teacher candidates with research-based theories and practices focused upon the teaching and learning of science. Candidates will acquire skills to plan and implement lessons to facilitate each learner's ability to conceptualize science concepts. The course will integrate related disciplines, such as technology, engineering and mathematics, in order to provide prospective teachers with a context for understanding the content of science, how science knowledge is acquired and understood, and how the sciences are connected across disciplines. Through course experiences and scholarly readings, prospective teachers will realize that to become an effective teacher one must acquire a positive attitude toward learning science, technology, engineering and mathematics; know how to acquire scientific information; and know how to facilitate learners' construction of scientific understandings.

***ELE ED 6246 Math Content Pedagogy, Inquiry-Based Instruction, and Assessment: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. This course provides the teacher candidate with math content and math pedagogical techniques to lead them to prepare and deliver best practices of teaching that are aligned with the elementary math learning standards and research-based practices. The students are encouraged to adopt interdisciplinary resources including multicultural children's literature and coping strategies for diverse students in the classroom settings. The students will develop lessons that entail using inquiry-based instructional materials, and reflective practice with assessment data.

***ELE ED 6253 Teaching Social Studies through Reading, Writing, and English Language Learners: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. Examines the teaching of social studies through reading elementary children's literature about U.S. history and examines writing instruction as a complex and dynamic process. The course integrates a standards-based, backward-planning approach; authentic literacy instruction through the lens of social studies; attention to the linguistic and cultural demands of social studies; and differentiation in instruction so that each student has access to meaningful and challenging learning opportunities using Sheltered Instruction Observation Protocol (SIOP). It focuses on essential attributes of effective literacy and content teachers, including the ability to draw upon students' cultural and linguistic backgrounds, help students make connections between new information and previous knowledge and skills that are research-based, and support students to transfer new information to real-life contexts and environments using critical thinking skills.

***ELE ED 6337 Teaching and Learning Literacy in the Elementary Classrooms: Teaching Reading and Writing: 4 semester hours***

Prerequisites: Level I courses. Emphasizes literacy development, literacy instruction, and children's literature in the process of teaching reading and writing. Students survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to effectively utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work, and phonics alongside matching texts (print and digital) and readers. Includes readings of academic research articles and book chapters that promote critical thinking in the design and implementation of literacy instruction. Particular attention will be given to learning to teach literacy within diverse contexts and with linguistically and culturally diverse students.

***ELE ED 6338 Literacy Assessment for Guided Instruction: 3 semester hours***

Prerequisites: Level I and ELE ED 6337. Addresses assessment issues that include examining the differences and difficulties that may occur in literacy learning processes. Topics covered include the effective use and evaluation of assessment instruments to prevent student literacy difficulties and promote accelerated learning. Students design classroom literacy engagements utilizing a variety of instructional strategies and materials. Includes reading peer-reviewed research articles and book chapters that promote critical thinking in the assessment and evaluation of literacy achievement. Assessment practices explored include running records of oral reading, an observation survey of early literacy behaviors (e.g., phonemic awareness, letter identification), qualitative reading inventories, spelling inventories, and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

***ELE ED 6342 Addressing the Mathematical Needs of Students: 3 semester hours***

Prerequisites: Graduate standing and ELE ED 6246. Educators will learn instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. The course will cover research based approaches to help develop assessments and strategies for addressing needs of students who have difficulties understanding and becoming proficient in mathematics.

***ELE ED 6387 Literacy Acquisition And Learning For Diverse Students: 3 semester hours***

Prerequisite: Graduate Standing. Designed to extend teacher understanding of children's literacy acquisition, development, and learning through the elementary grades. Emphasis on development of a teaching philosophy and skills which include maintaining effective literacy learning environments in diverse classrooms, fostering culturally responsive classroom communities, understanding social and environmental issues that affect the literacy learning of diverse learners, using effective methods and materials to develop engaged and literate students, and fostering children's participation in literacy activities.

***ELE ED 6410 Current Research In Early Childhood And Elementary Programs: 3 semester hours***

Prerequisites: Graduate Admission. A systematic examination of research related to early childhood and elementary school programs. Student will be expected to become effective consumers of educational research and to utilize appropriate research findings in their decision-making processes when planning instruction.

***ELE ED 6411 Curriculum Leadership Elementary Programs: 3 semester hours***

Prerequisite: ED PSY 6030. Learn strategies for development and implementation of up-to date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

***ELE ED 6422 Curriculum Design of Elementary Programs: 3 semester hours***

Prerequisites: ED PSY 6030, ELE ED 6411 or consent of instructor. A study of current and classic curricular design models of elementary education. Students will select a grade level or subject area curriculum and develop an integrated or differentiated curriculum based on the Common Core and national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instructional practices to student performance.

***ELE ED 6423 Learning Through Inquiry: 3 semester hours***

Prerequisites: ED PSY 6030 or consent of instructor. Students will learn to improve their instruction through using various inquiry models of teaching which develop the thinking skills required by the Common Core standards. Prior instructional experience is recommended.

***ELE ED 6426 Elementary School Curriculum Reform In The Earth/Space Sciences: 1-4 semester hours***

Prerequisites: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the earth/space sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

***ELE ED 6428 Elementary School Curriculum Reform In The Life Sciences: 1-4 semester hours***

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. This course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for maximum of 4 credit hours.

***ELE ED 6429 Elementary School Curriculum Reform In The Physical Sciences: 1-4 semester hours***

Prerequisite: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry science activities that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for a maximum of 4 credit hours.

***ELE ED 6436 Children's Literature I: Survey And Analysis: 3 semester hours***

Prerequisite: ELE ED 3330 or equivalent. A survey of children's literature published in the last ten years. Special emphasis will be placed on the relationship between children's literature and contemporary issues of society. Students will experience the materials themselves rather than reading about books. In addition, students will begin to study the literary elements that make literature interesting and meaningful for children.

***ELE ED 6441 Problems And Research In Teaching Elementary School Science: 3 semester hours***

Prerequisite: Eight hours of science, ELE ED 6441, ED PSY 6111. A thorough examination of research related to elementary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional literature.

***ELE ED 6445 Problems Of Teaching Mathematics In The Elementary School: 3 semester hours***

A study of the mathematics program in the elementary school from the viewpoint of goals, content, techniques, and evaluation.

***ELE ED 6447 Problems And Research In Teaching Elementary School Mathematics: 3 semester hours***

Prerequisite: ELE ED 6445. A thorough examination of research related to recurrent problems in elementary school mathematics instruction, as well as current problems arising within modern programs. Includes methodology appropriate to investigation of such problems and techniques for assessment of the literature.

***ELE ED 6448 Diagnosis And Remediation Of Disabilities In Learning Mathematics: 3 semester hours***

Prerequisite: ELE ED 6445. Causes of mathematical disabilities. Materials and techniques for diagnoses and corrective programs for children and youth.

***ELE ED 6450 Problems Of Teaching Social Studies In The Elementary School: 3 semester hours***

A classroom-oriented study of curricular and instructional problems encountered in social studies. Emphasis is placed upon development of materials, techniques, and resources.

***ELE ED 6482 Problems And Research In Teaching Elementary School: 3 semester hours***

This is the capstone course for the Master of Elementary Education-Emphasis in Reading. To be taken in the last 9 hours of Masters Program. The three foci for this course are (1) systematic study of research as it focuses on the problems of teaching reading in the elementary school, (2) innovations in the field, and (3) action research. Each student designs and completes an action research project related to literacy.

***ELE ED 6490 Internship: 1-10 semester hours***

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

***ELE ED 6493 Reading Specialist Practicum I: 3 semester hours***

Prerequisites: ELE ED 6684, ELE ED 6686, and ED REM 6707, ED REM 6709, or ED REM 6716. Application of reading theory and research in a supervised setting. Emphasis on assessing and analyzing the literacy strengths, needs, and interests of a range of readers with the goal of improving their reading abilities and attitudes. Focus is on establishing reading support for children with the assistance of formal and informal assessments, reading professionals, educators, and children's families.

***ELE ED 6494 Reading Specialist Practicum II: 3 semester hours***

Prerequisite: ELE ED 6493. Application of reading theory and research in a supervised setting. Emphasis on using appropriate materials and providing effective instructional techniques to address children's assessed literacy strengths, needs, and interests with the goal of improving their reading abilities and attitudes. Focus is on sustaining reading support for children with the assistance of other reading professionals, educators, and children's families.

***ELE ED 6495 Supervision Of Practicum In Clinical Reading: 3 semester hours***

Prerequisites: ELE ED 6486, ELE ED 6494, ED REM 6716 or consent of instructor. Supervising graduate students in diagnosis and remedial process within the reading clinic.

***ELE ED 6497 Problems: 1-10 semester hours***

Selected problems to meet the needs of individual students.

***ELE ED 6684 Instructional Strategies For Teaching Reading: 3 semester hours***

Prerequisites: Graduate standing. Designed to extend teacher knowledge of effective instructional strategies for teaching reading. Emphasis on development of a teaching philosophy which acknowledges children gain considerable knowledge about reading from their families and communities, long before they encounter formal reading instruction. Focus on fostering culturally responsive classrooms using children's prior experiences, their language systems, cross-cultural literature, authentic texts, and other print materials familiar to children's home environments, as well as on teaching effective strategies to promote children's reading success.

***ELE ED 6686 Analysis And Correction Of Reading Disabilities: 3 semester hours***

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and at least one graduate level literacy course. Designed to develop teacher understanding of the roles and responsibilities of the teacher of reading, Reading Specialist, and Literary Coach. Emphasis on the nature of specific reading difficulties, distinguishing reading difficulty/ disability from language difference, becoming familiar with a range of tools for assessing reading skills and strategies, and developing a critical orientation for evaluating the purpose and utility of various literacy assessment tools. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

***ELE ED 6688 Literacy Assessment To Guide Instruction: 3 semester hours***

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and ELE ED 6686. Designed to apply teacher knowledge of the roles and responsibilities of the teacher of reading, Reading Specialist and Literary Coach. Emphasis on using literacy assessment tools and techniques to guide instruction for a range of children, especially in the areas of writing, comprehension, and vocabulary. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

**Courses*****ELE ED 2192 Educational Laboratory/Field Experience: 1-3 semester hours***

A laboratory/field experience requiring systematic observation and/or participation in appropriate educational settings. To precede student teaching. May be repeated to maximum of three hours.

***ELE ED 3330 Literacy, Literature And The Learner: 3 semester hours***

Prerequisites: Level I requirements. Exploration of literature and literacy-related resources available to teachers for children and young people. Emphasis on critical reading of literature for a variety of purposes, including communication, instruction, information, and recreation. Focus on the development of criteria for evaluating and selecting culturally and developmentally appropriate materials for motivating students to read in school and at home, as well as strategies for using literature to build family and school partnerships around reading. Twelve hours of participation in a school classroom setting are required. This course may be applied toward a Literacy Minor.

***ELE ED 3336 Communication Arts Learning And Instruction: 3 semester hours***

Prerequisites: Level I and Level II requirements. Analysis of the six communication arts (listening, speaking, viewing, visually representing, writing, and reading) across content areas. Attention on understanding children's home language and how children learn and develop communication skills. Special emphasis on strategies for assessing and teaching reading and writing, including workshop models, spelling, grammar, and grand conversations to meet the needs of every child. This course may be applied toward a Literacy Minor.

***ELE ED 3337 Teaching and Learning Literacy in the Elementary Classroom: 4 semester hours***

Prerequisite: Level I. The course, emphasizing literacy development, literacy instruction and children's literature, is the first in a sequence of two courses on teaching reading and writing. The purposes of this course are to survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work and phonics alongside matching texts (print and digital) and readers. Assessment strategies that inform these instructional practices will be introduced. Particular attention will be given to learning to teach literacy within diverse contexts and with multicultural groups of students.

***ELE ED 3338 Literacy Assessment and Learning: 3 semester hours***

Prerequisites: Level II and ELE ED 3337. The purposes of this course are to address issues of the differences and difficulties that may occur in literacy processes, evaluation of students' literacy skills, analysis of texts for their use by readers, and to design classroom literacy engagements that utilize a variety of instructional strategies and materials. Assessment practices explored will include running records, qualitative reading inventories, spelling inventories and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

***ELE ED 3389 Classroom Based Assessment To Guide Literacy Instruction: 3 semester hours***

Prerequisites: TCH ED 3315 or TCH ED 4391 or equivalent reading methods course. Analysis of strategies for differentiating instruction for a range of readers and writers across content areas. Focus on cultural and language considerations in the assessment of students' literacy skills. Emphasis on meeting the needs of individual readers and writers in the context of whole class instruction. This course may be applied toward a Literacy Minor.

***ELE ED 4246 Teaching Mathematics In The Elementary School: 3 semester hours***

Prerequisite: Junior standing and completion of mathematics requirements in General Education. Organization and implementation of a modern elementary school mathematics program. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

***ELE ED 4253 Teaching Of Social Studies In The Elementary School: 3 semester hours***

Prerequisite: Junior standing and completion of social science requirements in general education. Study of elementary school social studies emphasizing the current social studies curricular content, methods of teaching and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, the K-6 based field experiences are required in addition to scheduled course time.

***ELE ED 4320 Classroom Management: 3 semester hours***

Same as ECH ED 4320, SEC ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

***ELE ED 4341 Teaching Science In The Elementary School: 3 semester hours***

Prerequisites: Level I and Level II requirements. An analysis of teaching science to K-6 students with emphasis on current science education trends, science curricular materials, and strategies of instruction. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then K-6 based field experiences are required in addition to scheduled course time.

***ELE ED 4342 Addressing Needs In Mathematics Teaching And Learning: 3 semester hours***

Prerequisite: ELE ED 4246. Instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. Course requires that students participate in K-12 classrooms for a minimum of 10 hours, in addition to university class schedule.

***ELE ED 4989 Practicum I: Elementary/Special Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4990 Practicum II: Elementary/Special Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in ELE ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not available for graduate credit.

***ELE ED 4991 Elementary School Student Teaching II: 6 semester hours***

Prerequisite: Completion of Level III courses. Clinical teaching experience in elementary school classrooms under university and school supervision. Required for all majors in elementary education. Not available for graduate credit.

***ELE ED 4992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 3 semester hours***

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are educated exclusively. Not for graduate credit.

***ELE ED 4994 Practicum I: Elementary/TESOL Site Based Experience: 3 semester hours***

Prerequisites: Completion of Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***ELE ED 4995 Practicum II: Elementary/TESOL Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Not for graduate credit.

***ELE ED 5989 Practicum I: Elementary/Special Education Site Based Experience: 1-2 semester hours***

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5990 Practicum II: Elementary/Special Education Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in ELE ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5992 Practicum I: Elementary/Special Education/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5993 Practicum II: Elementary/Special Education/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms have ESOL and implement inclusion (combined general education and special education), and/or have pull-out resource room settings and may also have self-contained settings where students with complex disabilities are education exclusively. Teacher candidates collect data for a research project.

***ELE ED 5994 Practicum I: Elementary/TESOL Site Based Experience: 2 semester hours***

Prerequisites: Completion of Level I and Level II requirements. An intensive professional development experience (2 days per week) working in K-12 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to differentiated instruction and impacting student achievement for diverse populations. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

***ELE ED 5995 Practicum II: Elementary/TESOL Site Based Experience: 8 semester hours***

Prerequisites: Grade of B- or higher in Practicum I and admission to the Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in K-12 school settings. These sites offer settings where classrooms include ESOL. Teacher candidates collect data for a research project.

***ELE ED 6241 Science Content, Inquiry-Based Instruction, and Assessment: STEM-Integrated Pedagogy: 2 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. The course is designed to provide teacher candidates with research-based theories and practices focused upon the teaching and learning of science. Candidates will acquire skills to plan and implement lessons to facilitate each learner's ability to conceptualize science concepts. The course will integrate related disciplines, such as technology, engineering and mathematics, in order to provide prospective teachers with a context for understanding the content of science, how science knowledge is acquired and understood, and how the sciences are connected across disciplines. Through course experiences and scholarly readings, prospective teachers will realize that to become an effective teacher one must acquire a positive attitude toward learning science, technology, engineering and mathematics; know how to acquire scientific information; and know how to facilitate learners' construction of scientific understandings.

***ELE ED 6246 Math Content Pedagogy, Inquiry-Based Instruction, and Assessment: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. This course provides the teacher candidate with math content and math pedagogical techniques to lead them to prepare and deliver best practices of teaching that are aligned with the elementary math learning standards and research-based practices. The students are encouraged to adopt interdisciplinary resources including multicultural children's literature and coping strategies for diverse students in the classroom settings. The students will develop lessons that entail using inquiry-based instructional materials, and reflective practice with assessment data.

***ELE ED 6253 Teaching Social Studies through Reading, Writing, and English Language Learners: 3 semester hours***

Prerequisites: Graduate standing, and a passing score on the designated Missouri Content Examination or an approved program of study. Examines the teaching of social studies through reading elementary children's literature about U.S. history and examines writing instruction as a complex and dynamic process. The course integrates a standards-based, backward-planning approach; authentic literacy instruction through the lens of social studies; attention to the linguistic and cultural demands of social studies; and differentiation in instruction so that each student has access to meaningful and challenging learning opportunities using Sheltered Instruction Observation Protocol (SIOP). It focuses on essential attributes of effective literacy and content teachers, including the ability to draw upon students' cultural and linguistic backgrounds, help students make connections between new information and previous knowledge and skills that are research-based, and support students to transfer new information to real-life contexts and environments using critical thinking skills.

***ELE ED 6337 Teaching and Learning Literacy in the Elementary Classrooms: Teaching Reading and Writing: 4 semester hours***

Prerequisites: Level I courses. Emphasizes literacy development, literacy instruction, and children's literature in the process of teaching reading and writing. Students survey literacy and literacy development as social practices, to focus on methods of teaching reading and writing, and to effectively utilize children's literature within classroom practice. Instructional practices explored will include reading and writing workshops, guided reading, word work, and phonics alongside matching texts (print and digital) and readers. Includes readings of academic research articles and book chapters that promote critical thinking in the design and implementation of literacy instruction. Particular attention will be given to learning to teach literacy within diverse contexts and with linguistically and culturally diverse students.

***ELE ED 6338 Literacy Assessment for Guided Instruction: 3 semester hours***

Prerequisites: Level I and ELE ED 6337. Addresses assessment issues that include examining the differences and difficulties that may occur in literacy learning processes. Topics covered include the effective use and evaluation of assessment instruments to prevent student literacy difficulties and promote accelerated learning. Students design classroom literacy engagements utilizing a variety of instructional strategies and materials. Includes reading peer-reviewed research articles and book chapters that promote critical thinking in the assessment and evaluation of literacy achievement. Assessment practices explored include running records of oral reading, an observation survey of early literacy behaviors (e.g., phonemic awareness, letter identification), qualitative reading inventories, spelling inventories, and writing assessment. Teacher candidates will learn to assess and create literacy instruction that is multicultural and integrates global technologies.

***ELE ED 6342 Addressing the Mathematical Needs of Students: 3 semester hours***

Prerequisites: Graduate standing and ELE ED 6246. Educators will learn instructional strategies for analyzing and addressing needs of students who have difficulties understanding and becoming proficient in mathematics. Conceptual development and procedural fluency are approached in a diagnostic and prescriptive context. The course will cover research based approaches to help develop assessments and strategies for addressing needs of students who have difficulties understanding and becoming proficient in mathematics.

***ELE ED 6387 Literacy Acquisition And Learning For Diverse Students: 3 semester hours***

Prerequisite: Graduate Standing. Designed to extend teacher understanding of children's literacy acquisition, development, and learning through the elementary grades. Emphasis on development of a teaching philosophy and skills which include maintaining effective literacy learning environments in diverse classrooms, fostering culturally responsive classroom communities, understanding social and environmental issues that affect the literacy learning of diverse learners, using effective methods and materials to develop engaged and literate students, and fostering children's participation in literacy activities.

***ELE ED 6410 Current Research In Early Childhood And Elementary Programs: 3 semester hours***

Prerequisites: Graduate Admission. A systematic examination of research related to early childhood and elementary school programs. Student will be expected to become effective consumers of educational research and to utilize appropriate research findings in their decision-making processes when planning instruction.

***ELE ED 6411 Curriculum Leadership Elementary Programs: 3 semester hours***

Prerequisite: ED PSY 6030. Learn strategies for development and implementation of up-to date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

***ELE ED 6422 Curriculum Design of Elementary Programs: 3 semester hours***

Prerequisites: ED PSY 6030, ELE ED 6411 or consent of instructor. A study of current and classic curricular design models of elementary education. Students will select a grade level or subject area curriculum and develop an integrated or differentiated curriculum based on the Common Core and national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instructional practices to student performance.

***ELE ED 6423 Learning Through Inquiry: 3 semester hours***

Prerequisites: ED PSY 6030 or consent of instructor. Students will learn to improve their instruction through using various inquiry models of teaching which develop the thinking skills required by the Common Core standards. Prior instructional experience is recommended.

***ELE ED 6426 Elementary School Curriculum Reform In The Earth/Space Sciences: 1-4 semester hours***

Prerequisites: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the earth/space sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

***ELE ED 6428 Elementary School Curriculum Reform In The Life Sciences: 1-4 semester hours***

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. This course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for maximum of 4 credit hours.

***ELE ED 6429 Elementary School Curriculum Reform In The Physical Sciences: 1-4 semester hours***

Prerequisite: Graduate standing. Field-based experiences in improving the district-level elementary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry science activities that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. The course may be repeated for a maximum of 4 credit hours.

***ELE ED 6436 Children's Literature I: Survey And Analysis: 3 semester hours***

Prerequisite: ELE ED 3330 or equivalent. A survey of children's literature published in the last ten years. Special emphasis will be placed on the relationship between children's literature and contemporary issues of society. Students will experience the materials themselves rather than reading about books. In addition, students will begin to study the literary elements that make literature interesting and meaningful for children.

***ELE ED 6441 Problems And Research In Teaching Elementary School Science: 3 semester hours***

Prerequisite: Eight hours of science, ELE ED 6441, ED PSY 6111. A thorough examination of research related to elementary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional literature.

***ELE ED 6445 Problems Of Teaching Mathematics In The Elementary School: 3 semester hours***

A study of the mathematics program in the elementary school from the viewpoint of goals, content, techniques, and evaluation.

***ELE ED 6447 Problems And Research In Teaching Elementary School Mathematics: 3 semester hours***

Prerequisite: ELE ED 6445. A thorough examination of research related to recurrent problems in elementary school mathematics instruction, as well as current problems arising within modern programs. Includes methodology appropriate to investigation of such problems and techniques for assessment of the literature.

**ELE ED 6448 Diagnosis And Remediation Of Disabilities In Learning Mathematics: 3 semester hours**

Prerequisite: ELE ED 6445. Causes of mathematical disabilities. Materials and techniques for diagnoses and corrective programs for children and youth.

**ELE ED 6450 Problems Of Teaching Social Studies In The Elementary School: 3 semester hours**

A classroom-oriented study of curricular and instructional problems encountered in social studies. Emphasis is placed upon development of materials, techniques, and resources.

**ELE ED 6482 Problems And Research In Teaching Elementary School: 3 semester hours**

This is the capstone course for the Master of Elementary Education-Emphasis in Reading. To be taken in the last 9 hours of Masters Program. The three foci for this course are (1) systematic study of research as it focuses on the problems of teaching reading in the elementary school, (2) innovations in the field, and (3) action research. Each student designs and completes an action research project related to literacy.

**ELE ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**ELE ED 6493 Reading Specialist Practicum I: 3 semester hours**

Prerequisites: ELE ED 6684, ELE ED 6686, and ED REM 6707, ED REM 6709, or ED REM 6716. Application of reading theory and research in a supervised setting. Emphasis on assessing and analyzing the literacy strengths, needs, and interests of a range of readers with the goal of improving their reading abilities and attitudes. Focus is on establishing reading support for children with the assistance of formal and informal assessments, reading professionals, educators, and children's families.

**ELE ED 6494 Reading Specialist Practicum II: 3 semester hours**

Prerequisite: ELE ED 6493. Application of reading theory and research in a supervised setting. Emphasis on using appropriate materials and providing effective instructional techniques to address children's assessed literacy strengths, needs, and interests with the goal of improving their reading abilities and attitudes. Focus is on sustaining reading support for children with the assistance of other reading professionals, educators, and children's families.

**ELE ED 6495 Supervision Of Practicum In Clinical Reading: 3 semester hours**

Prerequisites: ELE ED 6486, ELE ED 6494, ED REM 6716 or consent of instructor. Supervising graduate students in diagnosis and remedial process within the reading clinic.

**ELE ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**ELE ED 6684 Instructional Strategies For Teaching Reading: 3 semester hours**

Prerequisites: Graduate standing. Designed to extend teacher knowledge of effective instructional strategies for teaching reading. Emphasis on development of a teaching philosophy which acknowledges children gain considerable knowledge about reading from their families and communities, long before they encounter formal reading instruction. Focus on fostering culturally responsive classrooms using children's prior experiences, their language systems, cross-cultural literature, authentic texts, and other print materials familiar to children's home environments, as well as on teaching effective strategies to promote children's reading success.

**ELE ED 6686 Analysis And Correction Of Reading Disabilities: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and at least one graduate level literacy course. Designed to develop teacher understanding of the roles and responsibilities of the teacher of reading, Reading Specialist, and Literary Coach. Emphasis on the nature of specific reading difficulties, distinguishing reading difficulty/ disability from language difference, becoming familiar with a range of tools for assessing reading skills and strategies, and developing a critical orientation for evaluating the purpose and utility of various literacy assessment tools. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

**ELE ED 6688 Literacy Assessment To Guide Instruction: 3 semester hours**

Prerequisites: ED REM 6707, ED REM 6709, or ED REM 6716 and ELE ED 6686. Designed to apply teacher knowledge of the roles and responsibilities of the teacher of reading, Reading Specialist and Literary Coach. Emphasis on using literacy assessment tools and techniques to guide instruction for a range of children, especially in the areas of writing, comprehension, and vocabulary. Teachers will use informal and formal literacy assessment tools to guide instructional planning for children in the UMSL Reading Center.

## Engineering

### Courses

**ENGR 1010 Introduction To Engineering: 1 semester hour**

Course consists of a series of lectures on engineering, fields of study within engineering, the engineering profession, types of work activities, and professional registration. Introduction to team building and the teamwork approach to projects and problem-solving common in an engineering curriculum and in the engineering profession. Guest lecturers will participate.

**ENGR 2310 Statics: 3 semester hours**

Prerequisites: MATH 1900 and PHYSICS 2111. Statics of particles and rigid bodies. Equivalent systems of forces. Distributed forces; centroids. Applications to trusses, frames, machines, beams, and cables. Friction. Moments of inertia. Principle of virtual work and applications.

**ENGR 2320 Dynamics: 3 semester hours**

Prerequisite: ENGR 2310. Review of vector algebra and calculus. Kinematics of a particle. Newton's laws and the kinetics of a particle. Work and energy. Impulse and momentum. Kinematics of rigid bodies. General theorems for systems of particles. Kinetics of rigid bodies. The inertia tensor.

### **ENGR 1010 Introduction To Engineering: 1 semester hour**

Course consists of a series of lectures on engineering, fields of study within engineering, the engineering profession, types of work activities, and professional registration. Introduction to team building and the teamwork approach to projects and problem-solving common in an engineering curriculum and in the engineering profession. Guest lecturers will participate.

### **ENGR 2310 Statics: 3 semester hours**

Prerequisites: MATH 1900 and PHYSICS 2111. Statics of particles and rigid bodies. Equivalent systems of forces. Distributed forces; centroids. Applications to trusses, frames, machines, beams, and cables. Friction. Moments of inertia. Principle of virtual work and applications.

### **ENGR 2320 Dynamics: 3 semester hours**

Prerequisite: ENGR 2310. Review of vector algebra and calculus. Kinematics of a particle. Newton's laws and the kinetics of a particle. Work and energy. Impulse and momentum. Kinematics of rigid bodies. General theorems for systems of particles. Kinetics of rigid bodies. The inertia tensor.

## English

## Courses

### **ENGL 1100 First-Year Writing: 3 semester hours**

Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Fulfills 3 hours of the General Education requirement for Communicating Skills. Does not count toward the major in English.

### **ENGL 1110 First-Year Writing For International Students: 3 semester hours**

Prerequisite: Essay proficiency test or a TOFEL score of 500 or above. Designed for any student whose first language is not English. Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Special attention given to verb tenses, idioms, articles, and syntax. Does not count toward the major in English. Substitutes for ENGL 1100 in all university requirements.

### **ENGL 1120 Introduction to Literature: 3 semester hours**

The student is introduced to the various literary types, including poetry, drama, fiction, and the essay.

### **ENGL 1170 American Literary Masterpieces: 3 semester hours**

An introduction to major authors, works, and themes in American Literature from the nineteenth century to the present.

### **ENGL 1710 Native American Literature: 3 semester hours**

Same as ANTHRO 1710. The course surveys the literature of American Indians from its oral tradition of myth, legend, song and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri state certification in secondary education and the cultural diversity requirement.

### **ENGL 1950 Topics In Literature: 3 semester hours**

This course will introduce the student to selected literary topics and/or genres. Each semester the department will announce topics and course content. Topics such as alienation, justice, and the absurd, and genres such as science fiction and contemporary drama are typical possibilities.

### **ENGL 2040 Beginning Fiction Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent. An introduction to the writing of fiction and an exploration of contemporary short stories as models for the writer. Students who have taken English 2060 may not take ENGL 2040 for credit. The course counts toward the Certificate in Writing.

### **ENGL 2080 Advertising Copywriting: 3 semester hours**

Same as MEDIA ST 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

### **ENGL 2120 Topics In Writing: 3 semester hours**

Prerequisite: ENGL 1100 or ENGL 1110. This course will introduce the student to writing in specific areas. The department will announce topics and course content in the schedule. Possible topics are argumentation, reading and writing about public affairs, sports reporting and writing, and writing about science. A student may repeat the course once when topics are different. The course counts toward the certificate in writing.

### **ENGL 2240 Literature Of The Old Testament: 3 semester hours**

A comprehensive understanding of the Old Testament, its literary background and significance for western civilization.

### **ENGL 2250 Literature Of The New Testament: 3 semester hours**

A comprehensive understanding of the New Testament, its literary background and significance for western civilization.

### **ENGL 2280 Contemporary World Literature: 3 semester hours**

Selected World Literature from the 20th and 21st centuries with emphasis on non-European literatures. This course may include works from Europe, Latin American, the Middle East, Africa, and Asia; it excludes literature from the United States and England. It satisfies the cultural diversity requirement of UMSL.

### **ENGL 2310 English Literature Before 1790: 3 semester hours**

The development of English literature from the Middle Ages through the eighteenth century. Introduces students to major literary movements and themes through the reading and analysis of representative works of selected major authors.

### **ENGL 2320 English Literature After 1790: 3 semester hours**

The development of English Literature from the beginning of the nineteenth century. Introduces students to major literary movements and themes through the reading and analysis of representative works of selected major authors.

### **ENGL 2330 Introduction To Poetry: 3 semester hours**

A close study of poems, with special emphasis on the varieties of poetic form, and the means of interpretation and evaluation.

### **ENGL 2340 Introduction To Drama: 3 semester hours**

A close study of major dramatic works in various modes, to introduce the student to the forms and techniques of dramatic literature.

### **ENGL 2350 Introduction To Fiction: 3 semester hours**

A close study of major prose fiction, with particular attention to the varieties of fictional forms and techniques.

**ENGL 2510 World Literature Before 1650: 3 semester hours**

Prerequisite: ENGL 1100. A survey of World Literature from the earliest times to 1650. Diverse literary works in a variety of genres and voices will be studied. This course excludes literature from the United States and England. To satisfy the cultural diversity requirement of UMSL, the course will include literary works from diverse traditions from throughout the world.

**ENGL 2520 World Literature After 1650: 3 semester hours**

Prerequisites: ENGL 1100. A survey of World Literature from 1650 to the present. Diverse literary works in a variety of genres and voices will be studied. This course excludes literature from the United States and England. To satisfy the cultural diversity requirement of UMSL, the course will include literary works from diverse traditions from throughout the world.

**ENGL 2710 American Literature Before 1865: 3 semester hours**

Representative selections from American authors from the early seventeenth century to the Civil War.

**ENGL 2720 American Literature After 1865: 3 semester hours**

Representative selections from American authors from the Civil War to the present.

**ENGL 2810 Traditional Grammar: 3 semester hours**

An introduction to the terms and concepts of traditional grammar, beginning with functions of the noun and forms of the verb in simple sentences, moving to more complex structures such as subordinate clauses and verbal phrases, and ending with the application of this material to issues of Standard English.

**ENGL 3030 Poetry Writing Workshop: 3 semester hours**

Prerequisite: ENGL 1100 or the equivalent or consent of instructor. Workshop in poetry writing that may also focus on close reading of published works and poetic forms. May be repeated once for a total of 6 credit hours. Counts toward the Certificate in Creative Writing, and if taken twice, the second time counts toward the Emphasis in Creative Writing for English majors.

**ENGL 3040 Fiction Writing Workshop: Narrative Techniques: 3 semester hours**

Prerequisite: ENGL 2040 or ENGL 2060 or the equivalent or consent of instructor. Workshop in fiction writing. The course counts toward the Certificate in Writing.

**ENGL 3090 Writing about Literature: 3 semester hours**

Prerequisites: ENGL 1100 Or Equivalent (3-6 credit hours) and 56 credit hours. Acquaints students with the basic methods of literary criticism and trains them in explicating particular texts and writing about literature. Introduces students to basic research and proper MLA documentation. Required of all English majors. Does not count toward the major in English. May not be taken on satisfactory/unsatisfactory option. Counts toward the Certificate in Writing.

**ENGL 3100 Junior-Level Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 credit hours) and 56 credit hours. Focuses on writing and literacies in various contexts. Builds on intellectual maturity, knowledge, and abilities gained through prior university studies. Enhances analytical, communicative, persuasive, and explanatory capabilities. Includes complex readings and research. Fulfills the university's requirement for a junior-level course in Communicative Skills. Counts toward the Certificate in Writing. May not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3110 Junior Level Writing For International Students: 3 semester hours**

Prerequisites: ENGL 1110 or equivalent (3-6 credit hours) and 56 credit hours. Designed for any student whose first language is not English. Builds on intellectual maturity, knowledge, and abilities gained through prior university studies. Enhances analytical, communicative, persuasive, and explanatory capabilities in contemporary American English. Includes formal research and documentation methods from a variety of fields. Emphasizes students' reading abilities, both comprehension and vocabulary. Fulfills the university's requirement for a junior-level course in Communicative Skills. Counts toward the Certificate in Writing. May not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3120 Business Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course further develops the experienced writer's style and analytical capabilities to the level of sophistication necessary for upper-division writing assignments and for business and professional settings. Writing assignments may include business correspondence, reports, resumes, proposals, analyses, feasibility studies, and articles for in-house publications. The course emphasizes clarity, conciseness, organization, format, style, tone and mechanical correctness; expands upon students' research and documentation skills; and requires research in university libraries. Fulfills the University's requirement for a junior-level course in communicative skills. It may not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3130 Technical Writing: 3 semester hours**

Prerequisite: ENGL 1100 or equivalent (3-6 hours) and junior standing. The major elements of industrial technical writing. Writing assignments include technical definitions, abstracts and summaries, mechanism descriptions, instructions, process analyses, technical reports and proposals. Emphasis is placed on clarity, conciseness, organization, format, style and tone. The course includes an introduction to research methods and documentation. All readings are selected from industrial material. Fulfills the University requirement for junior-level course in communicative skills, subject to the approval of the student's major department. May not be taken on the satisfactory/unsatisfactory option.

**ENGL 3140 News Writing: 3 semester hours**

Same as MEDIA ST 3214. Prerequisite: ENGL 1100 or equivalent. An introduction to news writing and reporting. Course covers basic components of news, reporting principles, and news writing style and structure. Daily writing assignments include coverage of speeches, meetings and interviews, accidents, deaths, courts, sports, consumer affairs and government. Emphasis on clarity, accuracy and speed. The course counts toward the Certificate in Writing.

**ENGL 3150 Feature Writing: 3 semester hours**

Same as MEDIA ST 3150. Prerequisite: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments -- journal entries, interviews, library projects, article critiques, and market reports -- lead to production of full-length feature articles. May not be taken on the S/U option. The course counts toward the Certificate in Writing.

**ENGL 3160 Writing In The Sciences: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing  
Designed to teach students how to write effectively in the sciences. Writing assignments include short reports, proposals and a major project. Students are encouraged to select projects that will reflect work in a science course which may include a research or analytical report, a formal proposal or a procedures/instructions manual. Emphasis is placed on clarity, conciseness, organization, format, style, and tone. The course will include an introduction to research methods and documentation. Fulfills the University requirement for a junior-level course in communicative skills, subject to the approval of the student's major department. May not be taken on the satisfactory/unsatisfactory option.

**ENGL 3180 Reporting: 3 semester hours**

Same as MEDIA ST 3180. Prerequisite: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limits. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the certificate in writing.

**ENGL 3280 Public Relations Writing: 3 semester hours**

Prerequisite: ENGL 3100 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**ENGL 3500 Special Studies: 1-3 semester hours**

Prerequisite: A course in area of proposed work and consent of instructor. Individual work, with conferences adjusted to needs of the student. May not be used to meet specific English department distribution and language requirements. May be repeated for a maximum total of four hours credit.

**ENGL 3800 Topics In Women And Literature: 3 semester hours**

An examination of the role of women in literature, either as figures in literary works or as writers. Specific topics to vary from semester to semester. Since the topics of ENGL 3800 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 4020 Writing Literary Criticism: 3 semester hours**

Prerequisite: ENGL 3100 or equivalent as judged by the instructor. Intensive training in the writing of literary criticism, with some attention to the bibliography and to methods of research in literature. Recommended for all English majors.

**ENGL 4030 Contemporary Critical Theory: 3 semester hours**

This course is to acquaint students with a range of critical methodologies that have gained currency since the 1960's; topics may include formalist, structuralist, post-structuralist, Marxist, reader-response, psychoanalytic, feminist, cognitive, and evolutionary approaches to literature and culture.

**ENGL 4060 Adolescent Literature: 3 semester hours**

The course will expose students to the large variety of quality adolescent literature available for reading and study in middle and high school classes. It will also examine the relevance of a variety of issues to the reading and teaching of adolescent literature, among them: reader response; theory and practice; multi-culturalism; literacy; the relation of adolescent literature to "classic" literature the role of adolescent literature in interdisciplinary studies; adolescent literature as an incentive to extracurricular reading.

**ENGL 4080 Narrative, Cognition, And Emotion: 3 semester hours**

Prerequisites: ENGL 2320; ENGL 3090, prerequisite or co-requisite. Examines narrative theory in the light of recent research into cognitive organization and the structure of the emotions. Traditional and contemporary theories of narrative--or realism, symbolism, point of view, tone, and genre--are developed through recent findings in empirical science. A variety of stories and novels are used as test cases for theoretical propositions.

**ENGL 4130 Advanced Poetry Writing Workshop: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent; ENGL 2030 or ENGL 3030 or consent of instructor. Advanced workshop in poetry writing. The course counts toward the Certificate in Writing.

**ENGL 4140 Advanced Fiction Writing Workshop: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent; ENGL 2040 or equivalent or consent of instructor. Advanced workshop in fiction writing. The course counts toward the certificate in Writing.

**ENGL 4160 Special Topics In Writing: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent. Special topics in writing that are not covered in other 4000level English courses. Since the topics of ENGL 4160 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 4250 Old English Literature: 3 semester hours**

Prerequisites: ENGL 3100; or, for majors, ENGL 3090 prerequisite or corequisite and ENGL 2310 prerequisite or permission of instructor. An introduction to the literary culture of Anglo-Saxon England through study of the Old English language and close reading of a diverse group of Old English texts from the eighth to eleventh centuries.

**ENGL 4260 Chaucer: 3 semester hours**

The course concentrates on the poetry of Geoffrey Chaucer, including the Canterbury Tales, early poetic works, and the Troilus and Criseyde. All readings are in the original Middle English.

**ENGL 4270 Medieval English Literature: 3 semester hours**

A survey of old and middle English literature from Beowulf to Malory's Morte d'Arthur, exclusive of Chaucer. All works are read in modern English translations.

**ENGL 4320 Sixteenth-Century Poetry and Prose: 3 semester hours**

A broad selection of writers from the late 15th century through 1603, including Thomas More, the Sidneys, Spenser, and Shakespeare's sonnets.

**ENGL 4340 Early Seventeenth Century Poetry And Prose: 3 semester hours**

A broad selection of writers from 1603 through 1675, exclusive of Milton, including Bacon, Donne, Jonson, and Lanyer.

**ENGL 4350 Milton: 3 semester hours**

All the minor poems and the three longer poems with some attention to the major prose, Milton and his relation to the politics, theology and literature of the seventeenth century.

**ENGL 4360 Tudor And Stuart Drama: 3 semester hours**

A survey of the dramatic writings of the period from the interludes of John Heywood to the closing of the theatres in 1642, with particular attention to the plays of Marlowe, Jonson, Webster and Ford. Though Shakespeare will not be studied in this course; connections between his works and those of his contemporaries will be discussed.

**ENGL 4370 Shakespeare: Tragedies And Romances: 3 semester hours**

A study of the structure and language of Shakespeare's tragedies and romances, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time. Shakespeare's narrative poems may also be included.

**ENGL 4380 Shakespeare: Comedies And Histories: 3 semester hours**

A study of the structure and language of Shakespeare's comedies and histories, with particular attention to their genre as well as their relation to the culture issues of Shakespeare's time. Shakespeare's sonnets may also be included.

**ENGL 4420 Age Of Dryden And Pope: 3 semester hours**

The beginnings of English neo-classic literature in the Restoration and its development through the first half of the eighteenth century, focusing on Dryden, Swift and Pope.

**ENGL 4450 The Eighteenth-Century English Novel: 3 semester hours**

The origins and early development of the English novel, from Defoe to Jane Austen.

**ENGL 4520 Romantic Poetry and Prose: 3 semester hours**

A broad selection of poetry and prose from the English Romantic movement. Primary focus on Blake, Wordsworth, Coleridge, Byron, Keats, and Shelley. Additional authors may include Mary Wollstonecraft, Robert Burns, Thomas De Quincey, Mary Shelley, John Clare, Felicia Hemans, Ottobah Cugoana, Olaudah Equiano, and others.

**ENGL 4540 The Nineteenth-Century English Novel: 3 semester hours**

Novels of the Romantic and Victorian periods, from Austen to George Eliot.

**ENGL 4550 Novels into Films: The Nineteenth Century: 3 semester hours**

Prerequisites: ENGL 2320, ENGL 3090. Novels by Austen, Eliot, Wilde, Hardy, and others read in themselves and as interpreted in film. Comparisons of the representational and aesthetic techniques available to novels and film.

**ENGL 4560 Prose And Poetry Of The Victorian Period: 3 semester hours**

Critical readings of selections from Tennyson, Browning, Arnold and others, in addition to selections from the major prose writing.

**ENGL 4580 Literature Of The Late Nineteenth And Early Twentieth Centuries: 3 semester hours**

Literature of the period between 1870 and the First World War, including works by writers such as Hardy, Conrad, James, Wilde, Stevenson, Shaw, Jefferies, and Wells.

**ENGL 4610 Selected Major American Writers I: 3 semester hours**

American literature of the nineteenth century: Emerson, Thoreau, Hawthorne, Melville, Whitman and others.

**ENGL 4620 Selected Major American Writers II: 3 semester hours**

American literature of the late nineteenth and early twentieth centuries: Dickinson, James, Twain, Cather, Frost, Dreiser and others.

**ENGL 4640 American Fiction To World War I: 3 semester hours**

Development of the novel and short story in America.

**ENGL 4650 Modern American Fiction: 3 semester hours**

The novel and short story in America since World War I. There may be some attention to British and continental influences.

**ENGL 4740 Poetry Since World War II: 3 semester hours**

Reading and analysis of contemporary poetry.

**ENGL 4750 Modern British Fiction: 3 semester hours**

Critical reading and analysis of British fiction of the twentieth century. There may be some attention to American and continental influences.

**ENGL 4770 Modern Poetry: 3 semester hours**

Critical reading and analysis of poetry of the late nineteenth and early twentieth centuries. Yeats, Eliot, Frost, Williams and others.

**ENGL 4800 Linguistics: 3 semester hours**

Prerequisites: ENGL 3100; majors, ENGL 3090. A survey of linguistics with emphasis on what the field reveals about the English language. Topics include the sounds of language, grammar, writing systems, language acquisition, language in society, language history, dialects, and usage.

**ENGL 4810 English Grammar: 3 semester hours**

Prerequisites: ENGL 3100; majors, ENGL 3090; ENGL 2810 or passing grade on English-Education Test of Basic Grammar. A study of modern English grammar from the perspectives of traditional, structural, and transformational grammar.

**ENGL 4820 History Of The English Language: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent. A historical survey of the English language from its Indo-European roots through Old and Middle English to the present. Topics include changes in sound, meaning, and grammar, as well as developments in American English, including regional and social dialects.

**ENGL 4850 Topics In The Teaching Of Writing: 1-3 semester hours**

Same as TCH ED 5850. Prerequisites: ENGL 3100 or equivalent. Special topics in the practice of and pedagogy of writing designed for in-service teachers. Topics may include writing at specific grade levels, writing/reading workshops, writing in urban settings, writing across the curriculum, action research, new technology, classroom and district-level assessment. May be repeated once for credit if topics differ. Counts toward Certificate in Writing.

**ENGL 4860 Editing: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by instructor; English ENGL 2810 or ENGL 4810. Introduction to the language and processes of editing. Includes copy editing, the study of style manuals, and an overview of the production process. Counts toward requirement for the Writing Certificate.

**ENGL 4870 Advanced Business And Technical Writing: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. An advanced, project-oriented course to produce substantial, multifaceted business and technical writing projects. These might include reports, manuals, proposals, Web projects, computer documentation, or other advanced written assignments. These projects demonstrate the ability to handle complex assignments requiring initiative, independent work, and professional-level writing skills.

**ENGL 4880 Writing For Teachers: 3 semester hours**

Same as SEC ED 4880. Prerequisite: ENGL 3090 or junior level English. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**ENGL 4890 Writing Internship: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. Course limited to students who are completing certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work in a supervised internship to complete professional writing assignments. Special consent form required.

**ENGL 4892 Independent Writing Project: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent as judged by instructor. Course limited to students who are completing their certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work individually with an instructor to complete an extensive creative writing or critical analysis writing project. This course is available on a limited basis only with the approval of the Coordinator and faculty sponsor. Special consent form is required.

**ENGL 4895 Editing "Litmag": 3 semester hours**

Prerequisites: ENGL 3100 or equivalent and at least two creative writing courses. Course is primarily for students nearing the end of their certificates in writing. Students in this course create "Litmag", the UM-St. Louis student literary magazine. Students will call for submissions; they will read and select work to be published; and they will produce the magazine, dealing with issues like format, budget, proofreading, print run, advertising, distribution, and publicity. The course is offered only in the spring and culminates with the publication of "Litmag" in late April.

**ENGL 4920 Major Works Of European Fiction: 3 semester hours**

Prerequisites: 2 college courses in literature. The development of the European novel in the 19th and 20th centuries. Representative of works of writers such as Balzac, Flaubert, Dostoevsky, Tolstoy, Kafka, and Proust, read in translation.

**ENGL 4925 The Short Story in World Literature: 3 semester hours**

Students will read a wide variety of short fiction, from very brief pieces to novellas, including stories from all over the world and from several different centuries either in translation or in the original English. The course will also cover short theoretical works on narrative and critical commentaries on some of the fiction.

**ENGL 4930 Studies In Gender And Literature: 3 semester hours**

Same as GS 4930. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

**ENGL 4931 English Women Writers, 1300-1750: 3 semester hours**

Same as GS 4931. Works will be read ranging in scope from closest drama and romance to lyrics to personal, political, and religious writing by women, such as Margery Kempe, Mary Sidney, and Amelia Lanyer, who wrote during a period when reading and writing were not the female norm.

**ENGL 4932 Female Gothic: 3 semester hours**

Same as GS 4932. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

**ENGL 4934 Austen And The Brontes: 3 semester hours**

Same as GS 4934. This course covers the novels of the major 19th century British writers Jane Austen and the three Bronte sisters, Anne, Emily, and Charlotte. The course will be devoted to Austen's romantic comedies and the historical/cultural contexts that inform the novels, as well as the darker romanticism of the Brontes, along with the biographical, cultural, philosophical, and religious contexts of their work.

**ENGL 4936 Tales Of The Islamic East: 3 semester hours**

Same as GS 4936. Adventure, gender, and power in British and post-colonial writing: Lady Montague on Turkey, Gibbon on Islam, Byron and Hemans on harems and heroes, Disraeli on the Jewish Caliph of Bagdad, T.E. Lawrence on Arabia, and el Saadawi and Rushdie on (post)modern gender and the Islamic East.

**ENGL 4939 The Bible for Students of Literature: 3 semester hours**

Prerequisites: ENGL 1100 or ENGL 1110; ENGL 2310 or ENGL 2320; or equivalents. Through reading large portions of the King James Bible in conjunction with literature that alludes to Biblical stories, concepts, and imagery, students will develop a greater understanding of the way writers from medieval to modern times use Biblical references to enrich their writing.

**ENGL 4950 Special Topics In Literature: 3 semester hours**

Special topics in literature that are not covered in other 4000-level English courses. Since the topics of ENGL 4950 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 5000 Introduction To Graduate Study In English: 3 semester hours**

A course designed to prepare students for the professional study of English. The course will both familiarize students with basic bibliographic tools and scholarly methods and introduce them to issues that are of current critical interest to those engaged in the advanced study of literature. These issues include gender, textuality, reader-response, multiculturalism, feminism, psychoanalysis, cultural studies, literary history and the relationship of literature to philosophy, history, and science. Must be taken within the first twelve hours of graduate study.

**ENGL 5100 Graduate Workshop In Poetry: 3 semester hours**

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the poetry written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original poetry throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5110 Graduate Workshop In Fiction: 3 semester hours**

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the fiction (short stories or chapters of a novel) written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original fiction throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5140 Graduate Workshop In Nonfiction: 3 semester hours**

Prerequisites: Open to students in the MFA program and to others with permission of instructor. A variable-topics writing workshop focusing on one or more of the following forms: personal essay, memoir, travel writing, literary journalism, biography, or other types of literary nonfiction. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5170 Techniques, Methods, And Effects In Fiction Writing: 3 semester hours**

Prerequisite: Open to students in the MFA program and to others with consent of the instructor. This course analyzes the technical choices made by important contemporary fiction writers in the areas of point of view, tone, setting, form, and plot structure, and it examines the effects of those choices. Close consideration is given to fictional techniques that contribute to a story's characterization, tension, interest, reliability, drama, irony, and humor. The course is primarily for creative writers.

**ENGL 5180 Form And Theory Of Poetry: 3 semester hours**

Prerequisites: Open to students in the MFA Program and other graduate students with consent of instructor. This course explores various aspects of traditional and contemporary poetry. The student will gain an understanding of formal poetry-rhyme and meter-as well as of traditional types of poetry, for example, the lyric and the narrative. Throughout the course, an emphasis will be maintained on free verse and a greater understanding of its practice. Students will read selectively in the poetry, theory, and critical approaches of various periods, for example, the romantic and the modern, and within various movements, such as the symbolist or confessional.

**ENGL 5190 Literary Journal Editing: 3 semester hours**

Prerequisites: Open to students in the MFA program who have had at least two graduate writing workshops and to others with consent of the instructor. In this course students serve as the first readers of all submissions to the university's literary magazine, Natural Bridge. Students will read and evaluate poems, short stories, and essays and recommend a body of work to the editorial board of the magazine. The editorial board will then consider the class consensus in its final selection of material for publication. In addition to this primary task of editorial selection, students will also be involved in the productions of an issue of the magazine. May be repeated for maximum graduate credit of nine hours.

**ENGL 5200 MFA Readings: 3 semester hours**

Prerequisites: Open to students in the MFA program and to others with consent of the instructor. This is an independent reading course. In consultation with an MFA faculty member, students choose works from the MFA Reading List and read them with the goal of broadening and sharpening their technical skills as writers. Students ordinarily choose works in one genre: poetry, the short story, or the novel. Each week the student reads and reports on at least one work. The course may be taken only once.

**ENGL 5250 Studies In Middle English Literature: 3 semester hours**

Special topics in English literature before 1500.

**ENGL 5300 Renaissance Literature: 3 semester hours**

Special topics in English literature from 1500 to 1660.

**ENGL 5500 Nineteenth Century Literature: 3 semester hours**

Special topics in English romanticism, in Victorian life and thought, and in the development of the novel and of poetry between 1797 and 1914.

**ENGL 5600 American Literature Before 1900: 3 semester hours**

Selected American writers or topics from the colonial period to 1900.

**ENGL 5700 Twentieth-Century American Literature: 3 semester hours**

Selected American writers or topics from 1900 to the present.

**ENGL 5750 Twentieth-Century British Literature: 3 semester hours**

Selected British and Commonwealth writers of the twentieth century.

**ENGL 5800 Modern Linguistics: 3 semester hours**

Prerequisite: None. A study of selected topics in the structure of the English language, combining readings in current linguistics publications with original research.

**ENGL 5840 Theories Of Writing: 3 semester hours**

An analysis of major modern theories in composition.

**ENGL 5850 Studies In Composition: 3 semester hours**

The study of special topics in composition. Topics may include history of composition, psychology of writing, reader response theory, etc.

**ENGL 5860 Writing/Reading Theory: 3 semester hours**

This course studies the parallel evolution of reading and writing theory and pedagogy. Topics include the influence of psycholinguistics and reader-response theory and the link between reading and writing theory and instruction.

**ENGL 5870 Composition Research: 3 semester hours**

This course equips students both to analyze and conduct research in composition. Coursework will teach students to evaluate methodologies and implications, to analyze data, and to design their own research projects.

**ENGL 5890 Teaching College Writing: 3 semester hours**

This course provides the opportunity for practical application of composition theory with an emphasis on improving teaching skills. Strongly recommended for graduate teaching assistants.

**ENGL 5920 Studies In Fiction: 3 semester hours**

Study of a few selected British and American novelists and short story writers.

**ENGL 5940 Seminar In Gender And Literature: 3 semester hours**

Same as GS 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

**ENGL 5950 Seminar In Special Topics: 1-3 semester hours**

Special topics which are not covered in other graduate-level English courses.

**ENGL 5970 Independent Reading: 1-3 semester hours**

Directed study in areas of English for which courses are not available.

**ENGL 6000 Thesis: 1-6 semester hours**

Prerequisite: 3.5 graduate GPA. Thesis research and writing on a selected topic in English studies. May be taken over two semesters, three (3) hours each semester.

**ENGL 6880 Gateway Writing Project: 3-6 semester hours**

Same as TCH ED 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. May be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

## Courses

**ENGL 1100 First-Year Writing: 3 semester hours**

Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Fulfills 3 hours of the General Education requirement for Communicating Skills. Does not count toward the major in English.

**ENGL 1110 First-Year Writing For International Students: 3 semester hours**

Prerequisite: Essay proficiency test or a TOFEL score of 500 or above. Designed for any student whose first language is not English. Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Special attention given to verb tenses, idioms, articles, and syntax. Does not count toward the major in English. Substitutes for ENGL 1100 in all university requirements.

**ENGL 1120 Introduction to Literature: 3 semester hours**

The student is introduced to the various literary types, including poetry, drama, fiction, and the essay.

**ENGL 1170 American Literary Masterpieces: 3 semester hours**

An introduction to major authors, works, and themes in American Literature from the nineteenth century to the present.

**ENGL 1710 Native American Literature: 3 semester hours**

Same as ANTHRO 1710. The course surveys the literature of American Indians from its oral tradition of myth, legend, song and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri state certification in secondary education and the cultural diversity requirement.

**ENGL 1950 Topics In Literature: 3 semester hours**

This course will introduce the student to selected literary topics and/or genres. Each semester the department will announce topics and course content. Topics such as alienation, justice, and the absurd, and genres such as science fiction and contemporary drama are typical possibilities.

**ENGL 2040 Beginning Fiction Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent. An introduction to the writing of fiction and an exploration of contemporary short stories as models for the writer. Students who have taken English 2060 may not take ENGL 2040 for credit. The course counts toward the Certificate in Writing.

**ENGL 2080 Advertising Copywriting: 3 semester hours**

Same as MEDIA ST 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

**ENGL 2120 Topics In Writing: 3 semester hours**

Prerequisite: ENGL 1100 or ENGL 1110. This course will introduce the student to writing in specific areas. The department will announce topics and course content in the schedule. Possible topics are argumentation, reading and writing about public affairs, sports reporting and writing, and writing about science. A student may repeat the course once when topics are different. The course counts toward the certificate in writing.

**ENGL 2240 Literature Of The Old Testament: 3 semester hours**

A comprehensive understanding of the Old Testament, its literary background and significance for western civilization.

**ENGL 2250 Literature Of The New Testament: 3 semester hours**

A comprehensive understanding of the New Testament, its literary background and significance for western civilization.

**ENGL 2280 Contemporary World Literature: 3 semester hours**

Selected World Literature from the 20th and 21st centuries with emphasis on non-European literatures. This course may include works from Europe, Latin American, the Middle East, Africa, and Asia; it excludes literature from the United States and England. It satisfies the cultural diversity requirement of UMSL.

**ENGL 2310 English Literature Before 1790: 3 semester hours**

The development of English literature from the Middle Ages through the eighteenth century. Introduces students to major literary movements and themes through the reading and analysis of representative works of selected major authors.

**ENGL 2320 English Literature After 1790: 3 semester hours**

The development of English Literature from the beginning of the nineteenth century. Introduces students to major literary movements and themes through the reading and analysis of representative works of selected major authors.

**ENGL 2330 Introduction To Poetry: 3 semester hours**

A close study of poems, with special emphasis on the varieties of poetic form, and the means of interpretation and evaluation.

**ENGL 2340 Introduction To Drama: 3 semester hours**

A close study of major dramatic works in various modes, to introduce the student to the forms and techniques of dramatic literature.

**ENGL 2350 Introduction To Fiction: 3 semester hours**

A close study of major prose fiction, with particular attention to the varieties of fictional forms and techniques.

**ENGL 2510 World Literature Before 1650: 3 semester hours**

Prerequisite: ENGL 1100. A survey of World Literature from the earliest times to 1650. Diverse literary works in a variety genres and voices will be studied. This course excludes literature from the United States and England. To satisfy the cultural diversity requirement of UMSL, the course will include literary works from diverse traditions from throughout the world.

**ENGL 2520 World Literature After 1650: 3 semester hours**

Prerequisites: ENGL 1100. A survey of World Literature from 1650 to the present. Diverse literary works in a variety genres and voices will be studied. This course excludes literature from the United States and England. To satisfy the cultural diversity requirement of UMSL, the course will include literary works from diverse traditions from throughout the world.

**ENGL 2710 American Literature Before 1865: 3 semester hours**

Representative selections from American authors from the early seventeenth century to the Civil War.

**ENGL 2720 American Literature After 1865: 3 semester hours**

Representative selections from American authors from the Civil War to the present.

**ENGL 2810 Traditional Grammar: 3 semester hours**

An introduction to the terms and concepts of traditional grammar, beginning with functions of the noun and forms of the verb in simple sentences, moving to more complex structures such as subordinate clauses and verbal phrases, and ending with the application of this material to issues of Standard English.

**ENGL 3030 Poetry Writing Workshop: 3 semester hours**

Prerequisite: ENGL 1100 or the equivalent or consent of instructor. Workshop in poetry writing that may also focus on close reading of published works and poetic forms. May be repeated once for a total of 6 credit hours. Counts toward the Certificate in Creative Writing, and if taken twice, the second time counts toward the Emphasis in Creative Writing for English majors.

**ENGL 3040 Fiction Writing Workshop: Narrative Techniques: 3 semester hours**

Prerequisite: ENGL 2040 or ENGL 2060 or the equivalent or consent of instructor. Workshop in fiction writing. The course counts toward the Certificate in Writing.

**ENGL 3090 Writing about Literature: 3 semester hours**

Prerequisites: ENGL 1100 Or Equivalent (3-6 credit hours) and 56 credit hours. Acquaints students with the basic methods of literary criticism and trains them in explicating particular texts and writing about literature. Introduces students to basic research and proper MLA documentation. Required of all English majors. Does not count toward the major in English. May not be taken on satisfactory/unsatisfactory option. Counts toward the Certificate in Writing.

**ENGL 3100 Junior-Level Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 credit hours) and 56 credit hours. Focuses on writing and literacies in various contexts. Builds on intellectual maturity, knowledge, and abilities gained through prior university studies. Enhances analytical, communicative, persuasive, and explanatory capabilities. Includes complex readings and research. Fulfills the university's requirement for a junior-level course in Communicative Skills. Counts toward the Certificate in Writing. May not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3110 Junior Level Writing For International Students: 3 semester hours**

Prerequisites: ENGL 1110 or equivalent (3-6 credit hours) and 56 credit hours. Designed for any student whose first language is not English. Builds on intellectual maturity, knowledge, and abilities gained through prior university studies. Enhances analytical, communicative, persuasive, and explanatory capabilities in contemporary American English. Includes formal research and documentation methods from a variety of fields. Emphasizes students' reading abilities, both comprehension and vocabulary. Fulfills the university's requirement for a junior-level course in Communicative Skills. Counts toward the Certificate in Writing. May not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3120 Business Writing: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course further develops the experienced writer's style and analytical capabilities to the level of sophistication necessary for upper-division writing assignments and for business and professional settings. Writing assignments may include business correspondence, reports, resumes, proposals, analyses, feasibility studies, and articles for in-house publications. The course emphasizes clarity, conciseness, organization, format, style, tone and mechanical correctness; expands upon students' research and documentation skills; and requires research in university libraries. Fulfills the University's requirement for a junior-level course in communicative skills. It may not be taken on a satisfactory/unsatisfactory basis.

**ENGL 3130 Technical Writing: 3 semester hours**

Prerequisite: ENGL 1100 or equivalent (3-6 hours) and junior standing. The major elements of industrial technical writing. Writing assignments include technical definitions, abstracts and summaries, mechanism descriptions, instructions, process analyses, technical reports and proposals. Emphasis is placed on clarity, conciseness, organization, format, style and tone. The course includes an introduction to research methods and documentation. All readings are selected from industrial material. Fulfills the University requirement for junior-level course in communicative skills, subject to the approval of the student's major department. May not be taken on the satisfactory/unsatisfactory option.

**ENGL 3140 News Writing: 3 semester hours**

Same as MEDIA ST 3214. Prerequisite: ENGL 1100 or equivalent. An introduction to news writing and reporting. Course covers basic components of news, reporting principles, and news writing style and structure. Daily writing assignments include coverage of speeches, meetings and interviews, accidents, deaths, courts, sports, consumer affairs and government. Emphasis on clarity, accuracy and speed. The course counts toward the Certificate in Writing.

**ENGL 3150 Feature Writing: 3 semester hours**

Same as MEDIA ST 3150. Prerequisite: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments -- journal entries, interviews, library projects, article critiques, and market reports -- lead to production of full-length feature articles. May not be taken on the S/U option. The course counts toward the Certificate in Writing.

**ENGL 3160 Writing In The Sciences: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. Designed to teach students how to write effectively in the sciences. Writing assignments include short reports, proposals and a major project. Students are encouraged to select projects that will reflect work in a science course which may include a research or analytical report, a formal proposal or a procedures/instructions manual. Emphasis is placed on clarity, conciseness, organization, format, style, and tone. The course will include an introduction to research methods and documentation. Fulfills the University requirement for a junior-level course in communicative skills, subject to the approval of the student's major department. May not be taken on the satisfactory/unsatisfactory option.

**ENGL 3180 Reporting: 3 semester hours**

Same as MEDIA ST 3180. Prerequisite: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limits. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the certificate in writing.

**ENGL 3280 Public Relations Writing: 3 semester hours**

Prerequisite: ENGL 3100 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**ENGL 3500 Special Studies: 1-3 semester hours**

Prerequisite: A course in area of proposed work and consent of instructor. Individual work, with conferences adjusted to needs of the student. May not be used to meet specific English department distribution and language requirements. May be repeated for a maximum total of four hours credit.

**ENGL 3800 Topics In Women And Literature: 3 semester hours**

An examination of the role of women in literature, either as figures in literary works or as writers. Specific topics to vary from semester to semester. Since the topics of ENGL 3800 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 4020 Writing Literary Criticism: 3 semester hours**

Prerequisite: ENGL 3100 or equivalent as judged by the instructor. Intensive training in the writing of literary criticism, with some attention to the bibliography and to methods of research in literature. Recommended for all English majors.

**ENGL 4030 Contemporary Critical Theory: 3 semester hours**

This course is to acquaint students with a range of critical methodologies that have gained currency since the 1960's; topics may include formalist, structuralist, post-structuralist, Marxist, reader-response, psychoanalytic, feminist, cognitive, and evolutionary approaches to literature and culture.

**ENGL 4060 Adolescent Literature: 3 semester hours**

The course will expose students to the large variety of quality adolescent literature available for reading and study in middle and high school classes. It will also examine the relevance of a variety of issues to the reading and teaching of adolescent literature, among them: reader response; theory and practice; multi-culturalism; literacy; the relation of adolescent literature to "classic" literature the role of adolescent literature in interdisciplinary studies; adolescent literature as an incentive to extracurricular reading.

**ENGL 4080 Narrative, Cognition, And Emotion: 3 semester hours**

Prerequisites: ENGL 2320; ENGL 3090, prerequisite or co-requisite. Examines narrative theory in the light of recent research into cognitive organization and the structure of the emotions. Traditional and contemporary theories of narrative--or realism, symbolism, point of view, tone, and genre--are developed through recent findings in empirical science. A variety of stories and novels are used as test cases for theoretical propositions.

**ENGL 4130 Advanced Poetry Writing Workshop: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent; ENGL 2030 or ENGL 3030 or consent of instructor. Advanced workshop in poetry writing. The course counts toward the Certificate in Writing.

**ENGL 4140 Advanced Fiction Writing Workshop: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent; ENGL 2040 or equivalent or consent of instructor. Advanced workshop in fiction writing. The course counts toward the certificate in Writing.

**ENGL 4160 Special Topics In Writing: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent. Special topics in writing that are not covered in other 4000level English courses. Since the topics of ENGL 4160 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 4250 Old English Literature: 3 semester hours**

Prerequisites: ENGL 3100; or, for majors, ENGL 3090 prerequisite or corequisite and ENGL 2310 prerequisite or permission of instructor. An introduction to the literary culture of Anglo-Saxon England through study of the Old English language and close reading of a diverse group of Old English texts from the eighth to eleventh centuries.

**ENGL 4260 Chaucer: 3 semester hours**

The course concentrates on the poetry of Geoffrey Chaucer, including the Canterbury Tales, early poetic works, and the Troilus and Criseyde. All readings are in the original Middle English.

**ENGL 4270 Medieval English Literature: 3 semester hours**

A survey of old and middle English literature from Beowulf to Malory's Morte d'Arthur, exclusive of Chaucer. All works are read in modern English translations.

**ENGL 4320 Sixteenth-Century Poetry and Prose: 3 semester hours**

A broad selection of writers from the late 15th century through 1603, including Thomas More, the Sidneys, Spenser, and Shakespeare's sonnets.

**ENGL 4340 Early Seventeenth Century Poetry And Prose: 3 semester hours**

A broad selection of writers from 1603 through 1675, exclusive of Milton, including Bacon, Donne, Jonson, and Lanyer.

**ENGL 4350 Milton: 3 semester hours**

All the minor poems and the three longer poems with some attention to the major prose, Milton and his relation to the politics, theology and literature of the seventeenth century.

**ENGL 4360 Tudor And Stuart Drama: 3 semester hours**

A survey of the dramatic writings of the period from the interludes of John Heywood to the closing of the theatres in 1642, with particular attention to the plays of Marlowe, Jonson, Webster and Ford. Though Shakespeare will not be studied in this course; connections between his works and those of his contemporaries will be discussed.

**ENGL 4370 Shakespeare: Tragedies And Romances: 3 semester hours**

A study of the structure and language of Shakespeare's tragedies and romances, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time. Shakespeare's narrative poems may also be included.

**ENGL 4380 Shakespeare: Comedies And Histories: 3 semester hours**

A study of the structure and language of Shakespeare's comedies and histories, with particular attention to their genre as well as their relation to the culture issues of Shakespeare's time. Shakespeare's sonnets may also be included.

**ENGL 4420 Age Of Dryden And Pope: 3 semester hours**

The beginnings of English neo-classic literature in the Restoration and its development through the first half of the eighteenth century, focusing on Dryden, Swift and Pope.

**ENGL 4450 The Eighteenth-Century English Novel: 3 semester hours**

The origins and early development of the English novel, from Defoe to Jane Austen.

**ENGL 4520 Romantic Poetry and Prose: 3 semester hours**

A broad selection of poetry and prose from the English Romantic movement. Primary focus on Blake, Wordsworth, Coleridge, Byron, Keats, and Shelley. Additional authors may include Mary Wollstonecraft, Robert Burns, Thomas De Quincey, Mary Shelley, John Clare, Felicia Hemans, Ottobah Cugoana, Olaudah Equiano, and others.

**ENGL 4540 The Nineteenth-Century English Novel: 3 semester hours**

Novels of the Romantic and Victorian periods, from Austen to George Eliot.

**ENGL 4550 Novels into Films: The Nineteenth Century: 3 semester hours**

Prerequisites: ENGL 2320, ENGL 3090. Novels by Austen, Eliot, Wilde, Hardy, and others read in themselves and as interpreted in film. Comparisons of the representational and aesthetic techniques available to novels and film.

**ENGL 4560 Prose And Poetry Of The Victorian Period: 3 semester hours**

Critical readings of selections from Tennyson, Browning, Arnold and others, in addition to selections from the major prose writing.

**ENGL 4580 Literature Of The Late Nineteenth And Early Twentieth Centuries: 3 semester hours**

Literature of the period between 1870 and the First World War, including works by writers such as Hardy, Conrad, James, Wilde, Stevenson, Shaw, Jefferies, and Wells.

**ENGL 4610 Selected Major American Writers I: 3 semester hours**

American literature of the nineteenth century: Emerson, Thoreau, Hawthorne, Melville, Whitman and others.

**ENGL 4620 Selected Major American Writers II: 3 semester hours**

American literature of the late nineteenth and early twentieth centuries: Dickinson, James, Twain, Cather, Frost, Dreiser and others.

**ENGL 4640 American Fiction To World War I: 3 semester hours**

Development of the novel and short story in America.

**ENGL 4650 Modern American Fiction: 3 semester hours**

The novel and short story in America since World War I. There may be some attention to British and continental influences.

**ENGL 4740 Poetry Since World War II: 3 semester hours**

Reading and analysis of contemporary poetry.

**ENGL 4750 Modern British Fiction: 3 semester hours**

Critical reading and analysis of British fiction of the twentieth century. There may be some attention to American and continental influences.

**ENGL 4770 Modern Poetry: 3 semester hours**

Critical reading and analysis of poetry of the late nineteenth and early twentieth centuries. Yeats, Eliot, Frost, Williams and others.

**ENGL 4800 Linguistics: 3 semester hours**

Prerequisites: ENGL 3100; majors, ENGL 3090. A survey of linguistics with emphasis on what the field reveals about the English language. Topics include the sounds of language, grammar, writing systems, language acquisition, language in society, language history, dialects, and usage.

**ENGL 4810 English Grammar: 3 semester hours**

Prerequisites: ENGL 3100; majors, ENGL 3090; ENGL 2810 or passing grade on English-Education Test of Basic Grammar. A study of modern English grammar from the perspectives of traditional, structural, and transformational grammar.

**ENGL 4820 History Of The English Language: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent. A historical survey of the English language from its IndoEuropean roots through Old and Middle English to the present. Topics include changes in sound, meaning, and grammar, as well as developments in American English, including regional and social dialects.

**ENGL 4850 Topics In The Teaching Of Writing: 1-3 semester hours**

Same as TCH ED 5850. Prerequisites: ENGL 3100 or equivalent. Special topics in the practice of and pedagogy of writing designed for in-service teachers. Topics may include writing at specific grade levels, writing/reading workshops, writing in urban settings, writing across the curriculum, action research, new technology, classroom and district-level assessment. May be repeated once for credit if topics differ. Counts toward Certificate in Writing.

**ENGL 4860 Editing: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by instructor; English ENGL 2810 or ENGL 4810. Introduction to the language and processes of editing. Includes copy editing, the study of style manuals, and an overview of the production process. Counts toward requirement for the Writing Certificate.

**ENGL 4870 Advanced Business And Technical Writing: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. An advanced, project-oriented course to produce substantial, multifaceted business and technical writing projects. These might include reports, manuals, proposals, Web projects, computer documentation, or other advanced written assignments. These projects demonstrate the ability to handle complex assignments requiring initiative, independent work, and professional-level writing skills.

**ENGL 4880 Writing For Teachers: 3 semester hours**

Same as SEC ED 4880. Prerequisite: ENGL 3090 or junior level English. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**ENGL 4890 Writing Internship: 3 semester hours**

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. Course limited to students who are completing certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work in a supervised internship to complete professional writing assignments. Special consent form required.

**ENGL 4892 Independent Writing Project: 3 semester hours**

Prerequisites: ENGL 3100 or equivalent as judged by instructor. Course limited to students who are completing their certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work individually with an instructor to complete an extensive creative writing or critical analysis writing project. This course is available on a limited basis only with the approval of the Coordinator and faculty sponsor. Special consent form is required.

**ENGL 4895 Editing "Litmag": 3 semester hours**

Prerequisites: ENGL 3100 or equivalent and at least two creative writing courses. Course is primarily for students nearing the end of their certificates in writing. Students in this course create "Litmag", the UM-St. Louis student literary magazine. Students will call for submissions; they will read and select work to be published; and they will produce the magazine, dealing with issues like format, budget, proofreading, print run, advertising, distribution, and publicity. The course is offered only in the spring and culminates with the publication of "Litmag" in late April.

**ENGL 4920 Major Works Of European Fiction: 3 semester hours**

Prerequisites: 2 college courses in literature. The development of the European novel in the 19th and 20th centuries. Representative of works of writers such as Balzac, Flaubert, Dostoevsky, Tolstoy, Kafka, and Proust, read in translation.

**ENGL 4925 The Short Story in World Literature: 3 semester hours**

Students will read a wide variety of short fiction, from very brief pieces to novellas, including stories from all over the world and from several different centuries either in translation or in the original English. The course will also cover short theoretical works on narrative and critical commentaries on some of the fiction.

**ENGL 4930 Studies In Gender And Literature: 3 semester hours**

Same as GS 4930. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

**ENGL 4931 English Women Writers, 1300-1750: 3 semester hours**

Same as GS 4931. Works will be read ranging in scope from closest drama and romance to lyrics to personal, political, and religious writing by women, such as Margery Kempe, Mary Sidney, and Amelia Lanyer, who wrote during a period when reading and writing were not the female norm.

**ENGL 4932 Female Gothic: 3 semester hours**

Same as GS 4932. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

**ENGL 4934 Austen And The Brontes: 3 semester hours**

Same as GS 4934. This course covers the novels of the major 19th century British writers Jane Austen and the three Bronte sisters, Anne, Emily, and Charlotte. The course will be devoted to Austen's romantic comedies and the historical/cultural contexts that inform the novels, as well as the darker romanticism of the Brontes, along with the biographical, cultural, philosophical, and religious contexts of their work.

**ENGL 4936 Tales Of The Islamic East: 3 semester hours**

Same as GS 4936. Adventure, gender, and power in British and post-colonial writing: Lady Montague on Turkey, Gibbon on Islam, Byron and Hemans on harems and heroes, Disraeli on the Jewish Caliph of Bagdad, T.E. Lawrence on Arabia, and el Saadawi and Rushdie on (post)modern gender and the Islamic East.

**ENGL 4939 The Bible for Students of Literature: 3 semester hours**

Prerequisites: ENGL 1100 or ENGL 1110; ENGL 2310 or ENGL 2320; or equivalents. Through reading large portions of the King James Bible in conjunction with literature that alludes to Biblical stories, concepts, and imagery, students will develop a greater understanding of the way writers from medieval to modern times use Biblical references to enrich their writing.

**ENGL 4950 Special Topics In Literature: 3 semester hours**

Special topics in literature that are not covered in other 4000-level English courses. Since the topics of ENGL 4950 may change each semester, the course may be repeated for credit if the topics are substantially different.

**ENGL 5000 Introduction To Graduate Study In English: 3 semester hours**

A course designed to prepare students for the professional study of English. The course will both familiarize students with basic bibliographic tools and scholarly methods and introduce them to issues that are of current critical interest to those engaged in the advanced study of literature. These issues include gender, textuality, reader-response, multiculturalism, feminism, psychoanalysis, cultural studies, literary history and the relationship of literature to philosophy, history, and science. Must be taken within the first twelve hours of graduate study.

**ENGL 5100 Graduate Workshop In Poetry: 3 semester hours**

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the poetry written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original poetry throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5110 Graduate Workshop In Fiction: 3 semester hours**

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the fiction (short stories or chapters of a novel) written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original fiction throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5140 Graduate Workshop In Nonfiction: 3 semester hours**

Prerequisites: Open to students in the MFA program and to others with permission of instructor. A variable-topics writing workshop focusing on one or more of the following forms: personal essay, memoir, travel writing, literary journalism, biography, or other types of literary nonfiction. May be repeated for maximum graduate credit of fifteen (15) hours.

**ENGL 5170 Techniques, Methods, And Effects In Fiction Writing: 3 semester hours**

Prerequisite: Open to students in the MFA program and to others with consent of the instructor. This course analyzes the technical choices made by important contemporary fiction writers in the areas of point of view, tone, setting, form, and plot structure, and it examines the effects of those choices. Close consideration is given to fictional techniques that contribute to a story's characterization, tension, interest, reliability, drama, irony, and humor. The course is primarily for creative writers.

**ENGL 5180 Form And Theory Of Poetry: 3 semester hours**

Prerequisites: Open to students in the MFA Program and other graduate students with consent of instructor. This course explores various aspects of traditional and contemporary poetry. The student will gain an understanding of formal poetry-rhyme and meter-as well as of traditional types of poetry, for example, the lyric and the narrative. Throughout the course, an emphasis will be maintained on free verse and a greater understanding of its practice. Students will read selectively in the poetry, theory, and critical approaches of various periods, for example, the romantic and the modern, and within various movements, such as the symbolist or confessional.

**ENGL 5190 Literary Journal Editing: 3 semester hours**

Prerequisites: Open to students in the MFA program who have had at least two graduate writing workshops and to others with consent of the instructor. In this course students serve as the first readers of all submissions to the university's literary magazine, Natural Bridge. Students will read and evaluate poems, short stories, and essays and recommend a body of work to the editorial board of the magazine. The editorial board will then consider the class consensus in its final selection of material for publication. In addition to this primary task of editorial selection, students will also be involved in the productions of an issue of the magazine. May be repeated for maximum graduate credit of nine hours.

**ENGL 5200 MFA Readings: 3 semester hours**

Prerequisites: Open to students in the MFA program and to others with consent of the instructor. This is an independent reading course. In consultation with an MFA faculty member, students choose works from the MFA Reading List and read them with the goal of broadening and sharpening their technical skills as writers. Students ordinarily choose works in one genre: poetry, the short story, or the novel. Each week the student reads and reports on at least one work. The course may be taken only once.

**ENGL 5250 Studies In Middle English Literature: 3 semester hours**

Special topics in English literature before 1500.

**ENGL 5300 Renaissance Literature: 3 semester hours**

Special topics in English literature from 1500 to 1660.

**ENGL 5500 Nineteenth Century Literature: 3 semester hours**

Special topics in English romanticism, in Victorian life and thought, and in the development of the novel and of poetry between 1797 and 1914.

**ENGL 5600 American Literature Before 1900: 3 semester hours**

Selected American writers or topics from the colonial period to 1900.

**ENGL 5700 Twentieth-Century American Literature: 3 semester hours**

Selected American writers or topics from 1900 to the present.

**ENGL 5750 Twentieth-Century British Literature: 3 semester hours**

Selected British and Commonwealth writers of the twentieth century.

**ENGL 5800 Modern Linguistics: 3 semester hours**

Prerequisite: None. A study of selected topics in the structure of the English language, combining readings in current linguistics publications with original research.

**ENGL 5840 Theories Of Writing: 3 semester hours**

An analysis of major modern theories in composition.

**ENGL 5850 Studies In Composition: 3 semester hours**

The study of special topics in composition. Topics may include history of composition, psychology of writing, reader response theory, etc.

**ENGL 5860 Writing/Reading Theory: 3 semester hours**

This course studies the parallel evolution of reading and writing theory and pedagogy. Topics include the influence of psycholinguistics and reader-response theory and the link between reading and writing theory and instruction.

**ENGL 5870 Composition Research: 3 semester hours**

This course equips students both to analyze and conduct research in composition. Coursework will teach students to evaluate methodologies and implications, to analyze data, and to design their own research projects.

**ENGL 5890 Teaching College Writing: 3 semester hours**

This course provides the opportunity for practical application of composition theory with an emphasis on improving teaching skills. Strongly recommended for graduate teaching assistants.

**ENGL 5920 Studies In Fiction: 3 semester hours**

Study of a few selected British and American novelists and short story writers.

**ENGL 5940 Seminar In Gender And Literature: 3 semester hours**

Same as GS 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

**ENGL 5950 Seminar In Special Topics: 1-3 semester hours**

Special topics which are not covered in other graduate-level English courses.

**ENGL 5970 Independent Reading: 1-3 semester hours**

Directed study in areas of English for which courses are not available.

**ENGL 6000 Thesis: 1-6 semester hours**

Prerequisite: 3.5 graduate GPA. Thesis research and writing on a selected topic in English studies. May be taken over two semesters, three (3) hours each semester.

**ENGL 6880 Gateway Writing Project: 3-6 semester hours**

Same as TCH ED 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. May be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

## Courses

**EAP 3202 Listening And Speaking Skills: 3 semester hours**

Prerequisites: Placement by examination. This intermediate-level course is for students who are non-native speakers of English to gain skills in listening and speaking for both conversational and academic situations. Students improve comprehensive and discrete listening skills, note-taking skills, vocabulary use, discussion skills, and understanding of American culture.

**EAP 3203 Reading And Writing I: 3 semester hours**

Prerequisites: Minimum TOEFL Score or 500 or placement by examination. In this course International students develop fluency in their reading and writing skills in American English. This course consists of reading a variety of types of written texts, vocabulary building, organization in writing from the paragraph to essay, techniques for generating ideas, grammar use and editing. This course does not count toward a degree.

**EAP 3205 Grammar for Speaking and Writing I: 3 semester hours**

Prerequisites: Placement by examination. A course for non-native speakers of English who have already studied basic English grammar. The content covers intensive study of verb tenses; their forms, meanings and integrated use; other grammatical structures; analyses of language use in written texts; and applied use in both speaking and writing to increase communicative competence.

**EAP 4301 Advanced EAP Conversation and Pronunciation: 3 semester hours**

Prerequisites: Placement by examination or permission of instructor. Designed for non-native speakers who need to improve their fluency and pronunciation in American English. Conversation strategies, oral presentations and extensive practice to modify accent are included. This course may count towards elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 4302 Language Skills for Academic Success: 3 semester hours**

Prerequisites: Placement by examination or successful completion of EAP 3202. Designed for the student who is a non-native speaker of English to enhance academic language skills needed for the American university. This course includes readings and lectures from various disciplines, strategies for effective listening comprehension and note-taking, vocabulary building exercises, exam preparation, and participation in class discussions. This course may count towards elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 4303 Reading and Writing II: 3 semester hours**

Prerequisites: Placement by examination or successful completion of EAP 3203. This course prepares students for ENGL 1100 or ENGL 1110. Activities targeting writing skills include the organization of essays, rhetorical forms and their structural organization, revision of ideas, research techniques, grammar use and editing. To develop reading skills, students read articles and a novel, practice reading strategies and learn how to summarize articles. This course may count towards elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 4305 Grammar for Speaking and Writing II: 3 semester hours**

Prerequisites: Placement by examination or successful completion of EAP 3205. This course is for students who are non-native speakers of English who need review and applied practice of English grammar for oral and written work. This course may count towards undergraduate elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

## English for Academic Purposes

**EAP 4307 Advanced Speaking Skills: 3 semester hours**

Prerequisites: EAP 4301, placement by examination or consent of instructor. Designed for non-native speakers who have fluency in speaking English but need to modify their accent to be better understood and feel confident expressing ideas. Course includes review and practice of the pronunciation of the consonants and vowels in American English; accent modification achieved through extensive practice of stress, rhythm and intonation patterns; and the development of speaking skills through presentations. This course may count towards elective credit towards graduation in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 4390 Special Readings: 1-3 semester hours**

Prerequisites: Consent of the instructor. Independent study through readings, reports, and conferences. This course may count towards elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 4603 Research Paper Writing Workshop For International Students: 3 semester hours**

Prerequisites: Successful completion of EAP 4303 or placement by examination. Organized as a workshop, this class focuses on the process of research paper writing, from choosing a topic to the final research paper. Class activities include using library resources for research, applying critical thinking skills, synthesizing source material, avoiding plagiarism, and using appropriate MLA or APA format. Editing for grammatical accuracy and word choice is included as necessary. Class enrollment is limited to 12 students. This course may count towards elective credit in the Colleges of Business, Arts and Sciences, and Fine Arts and Communication.

**EAP 5400 Seminar for International Teaching Assistants: 1-3 semester hours**

Prerequisites: Consent of the department. Focus is on presentation skills, strategies to facilitate communication, and cultural differences in education. Students develop effective teaching skills through class presentations. Not applicable to graduate degree program.

## Courses

**EAP 3202 Listening And Speaking Skills: 3 semester hours**

Prerequisites: Placement by examination. This intermediate-level course is for students who are non-native speakers of English to gain skills in listening and speaking for both conversational and academic situations. Students improve comprehensive and discrete listening skills, note-taking skills, vocabulary use, discussion skills, and understanding of American culture.

**EAP 3203 Reading And Writing I: 3 semester hours**

**EAP 5400 Seminar for International Teaching Assistants: 1-3 semester hours**

Prerequisites: Consent of the department. Focus is on presentation skills, strategies to facilitate communication, and cultural differences in education. Students develop effective teaching skills through class presentations. Not applicable to graduate degree program.

## Ensemble Performance

### Courses

**EN PER 1399 Music Ensemble Registration: 0 semester hours**

Prerequisite: Consent of Instructor. Study, preparation, and performance of music ensemble literature. Concurrent registration in one or more of the following courses is required: Ensemble performance EN PER 1400, EN PER 1410, EN PER 1500, EN PER 1520, EN PER 1530, EN PER 1541, EN PER 1542, EN PER 1543, EN PER 1544, EN PER 1545, EN PER 1546, EN PER 1550, EN PER 1560, EN PER 1570, EN PER 4560, EN PER 5310, EN PER 5490.

**EN PER 1400 University Chorus: 1 semester hour**

Prerequisite: Consent of instructor. Preparation and performance of choral literature.

**EN PER 1410 The University Singers: 1 semester hour**

Prerequisite: Consent of instructor. The study and performance of music for vocal chamber ensemble.

**EN PER 1420 University Concert Band: 1 semester hour**

Prerequisites: Consent of Instructor. Study, preparation, and performance of Music for Concert Band. This course is not intended to fulfill the ensemble requirement for music majors/minors.

**EN PER 1500 University Orchestra: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation and performance of orchestral repertory.

**EN PER 1520 University Symphonic Band: 1 semester hour**

Prerequisite: Consent of instructor. Study preparation and performance of music for the winds and percussion.

**EN PER 1530 University Wind Ensemble: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation, and performance of music for winds and percussion including the preparation and performance of various chamber ensembles for woodwinds and brass.

**EN PER 1532 University Pep Band: 1 semester hour**

Prerequisites: Consent of Department/Instructor. Study, preparation, and performance of music in diverse contemporary styles. Performances of the University Pep Band are primarily in conjunction with campus activities and athletic events.

**EN PER 1541 Chamber Ensemble Brass: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1542 Jazz Combo: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation and performance of music for small ensembles.

**EN PER 1543 Chamber Ensemble Percussion: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1544 Chamber Ensemble Strings: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles: a) brass; b) jazz; c) percussion; d) string; e) voice; f) woodwinds.

**EN PER 1545 Chamber Ensemble Voice: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1546 Chamber Ensemble Woodwinds: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1550 Jazz Ensemble: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation, and performance of jazz music for big band.

**EN PER 1560 Opera Workshop: 1 semester hour**

Prerequisite: Consent of instructor. Instruction in movement, basic stage techniques, technical theater, repertory and performance techniques and preparation. May be repeated for credit.

**EN PER 2700 Seminar in Performance and Outreach: 1 semester hour**

Prerequisites: Acceptance as a music major/minor and two semesters of applied music study or by consent of instructor. Instruction in developing performance repertoire and skills for community and educational outreach programming. Student presentations of these programs in community and educational venues required. Course may be repeated.

**EN PER 4560 Advanced Opera Workshop: 1 semester hour**

Prerequisite: Consent of instructor. Instruction in movement stage technique, technical theater, repertory and performance based on advanced vocal skills. May be repeated for credit.

**EN PER 5310 Graduate Chamber Ensemble: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Study and performance of traditional and nontraditional chamber literature.

**EN PER 5490 Graduate Ensemble: 1 semester hour**

Prerequisites: Graduate standing in music or consent of department. Study, preparation, and performance of ensemble literature from the choral, orchestral, or band/wind ensemble repertory. May be repeated for a total of four hours of credit.

### Courses

**EN PER 1399 Music Ensemble Registration: 0 semester hours**

Prerequisite: Consent of Instructor. Study, preparation, and performance of music ensemble literature. Concurrent registration in one or more of the following courses is required: Ensemble performance EN PER 1400, EN PER 1410, EN PER 1500, EN PER 1520, EN PER 1530, EN PER 1541, EN PER 1542, EN PER 1543, EN PER 1544, EN PER 1545, EN PER 1546, EN PER 1550, EN PER 1560, EN PER 1570, EN PER 4560, EN PER 5310, EN PER 5490.

**EN PER 1400 University Chorus: 1 semester hour**

Prerequisite: Consent of instructor. Preparation and performance of choral literature.

**EN PER 1410 The University Singers: 1 semester hour**

Prerequisite: Consent of instructor. The study and performance of music for vocal chamber ensemble.

**EN PER 1420 University Concert Band: 1 semester hour**

Prerequisites: Consent of Instructor. Study, preparation, and performance of Music for Concert Band. This course is not intended to fulfill the ensemble requirement for music majors/minors.

**EN PER 1500 University Orchestra: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation and performance of orchestral repertory.

**EN PER 1520 University Symphonic Band: 1 semester hour**

Prerequisite: Consent of instructor. Study preparation and performance of music for the winds and percussion.

**EN PER 1530 University Wind Ensemble: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation, and performance of music for winds and percussion including the preparation and performance of various chamber ensembles for woodwinds and brass.

**EN PER 1532 University Pep Band: 1 semester hour**

Prerequisites: Consent of Department/Instructor. Study, preparation, and performance of music in diverse contemporary styles. Performances of the University Pep Band are primarily in conjunction with campus activities and athletic events.

**EN PER 1541 Chamber Ensemble Brass: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1542 Jazz Combo: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation and performance of music for small ensembles.

**EN PER 1543 Chamber Ensemble Percussion: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1544 Chamber Ensemble Strings: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles: a)brass; b)jazz; c)percussion; d)string; e)voice; f)woodwinds.

**EN PER 1545 Chamber Ensemble Voice: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1546 Chamber Ensemble Woodwinds: 1 semester hour**

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

**EN PER 1550 Jazz Ensemble: 1 semester hour**

Prerequisite: Consent of instructor. Study, preparation, and performance of jazz music for big band.

**EN PER 1560 Opera Workshop: 1 semester hour**

Prerequisite: Consent of instructor. Instruction in movement, basic stage techniques, technical theater, repertory and performance techniques and preparation. May be repeated for credit.

**EN PER 2700 Seminar in Performance and Outreach: 1 semester hour**

Prerequisites: Acceptance as a music major/minor and two semesters of applied music study or by consent on instructor. Instruction in developing performance repertoire and skills for community and educational outreach programming. Student presentations of these programs in community and educational venues required. Course may be repeated.

**EN PER 4560 Advanced Opera Workshop: 1 semester hour**

Prerequisite: Consent of instructor. Instruction in movement stage technique, technical theater, repertory and performance based on advanced vocal skills. May be repeated for credit.

**EN PER 5310 Graduate Chamber Ensemble: 1 semester hour**

Prerequisites: Graduate standing in music and consent of department. Study and performance of traditional and nontraditional chamber literature.

**EN PER 5490 Graduate Ensemble: 1 semester hour**

Prerequisites: Graduate standing in music or consent of department. Study, preparation, and performance of ensemble literature from the choral, orchestral, or band/wind ensemble repertory. May be repeated for a total of four hours of credit.

## Finance

### Courses

**FINANCE 1590 Personal Finance For Nonbusiness Majors: 3 semester hours**

For future professionals who want to learn more about personal finance and how to better manage their resources. The topics include purchasing/leasing cars, home acquisitions, investing in stocks and bonds, mutual funds, retirement planning and health and life insurance. Special emphasis will be on the nontechnical aspects of these issues. Cannot be used for credit in BSBA program.

**FINANCE 3500 Financial Management: 3 semester hours**

Prerequisites: ECON 1002, MATH 1105, and ACCTNG 2400 and a 2.0 overall GPA. The study of a firm's need for funds; the institutions, instruments and markets concerned with raising funds; and the techniques of analysis used to determine how effectively these funds, once raised, are invested within the firm.

**FINANCE 3501 Financial Policies: 3 semester hours**

Prerequisite: FINANCE 3500 and a 2.0 overall GPA. The intensification and application of the concepts developed in FINANCE 3500. Special emphasis is given to the development of top management policies and their application toward complex problems of finance. Techniques for identifying and dealing with these problems before they become acute will be investigated. Cases will be integrated with appropriate outside reading.

**FINANCE 3502 Treasury Management: 3 semester hours**

Prerequisites: FINANCE 3500 and a 2.0 campus GPA. The focus of this course is on the role cash management plays in corporate finance. Topics include cash collection and payment systems, forecasting cash flows, electronic fund transfers, check processing, international cash management and managing bank relationships. Students passing the course with a grade of A or B are permitted to take the qualifying exam to become a Certified Cash Manager (CCM) under a special arrangement with the Treasury Management Association. Along with other finance courses, this class prepares students for careers in the Treasury Departments of major companies or with service providers like banks.

**FINANCE 3503 Computer Applications In Finance: 3 semester hours**

Prerequisite: INFSYS 1800, FINANCE 3500, one 3000-level finance course and a 2.0 overall GPA. Financial problem solving and applications on the micro-computer. A project oriented course with an emphasis on micro based finance projects: Present value/IRR analysis, duration, immunization, portfolio optimization, leasing, capital budgeting, financial forecasting, options and futures.

**FINANCE 3520 Investments: 3 semester hours**

Prerequisite: FINANCE 3500 and a 2.0 overall GPA. Financial analysis of debt and equity instruments available on organized exchanges and in less tangible "over the counter" markets. Techniques of such analysis being presented in context with economic and management circumstances within the company, industry and economy.

**FINANCE 3521 Financial Engineering: Applying Derivatives: 3 semester hours**

Prerequisites: FINANCE 3500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 3520) prior to enrolling in FINANCE 3521.

**FINANCE 3523 Fixed Income Analysis: 3 semester hours**

Prerequisites: FINANCE 3500. This course explores key issues in fixed income securities. The topics include pricing of bonds, measuring bond yields, bond price volatility, factors affecting yields and the term structure of interest rates, treasury securities, corporate debt instruments, residential mortgage loans, collateralized mortgage/debt obligation, and analysis of bonds with embedded options. The course prepares students for the CFA exams of Level 1 in the area of fixed income analysis.

**FINANCE 3525 Practicum In Investments: 1 semester hour**

Prerequisites: FINANCE 3500 and a 2.0 campus GPA. Students will apply their knowledge of stocks and bonds by managing a real dollar portfolio of securities. This course requires that students perform technical and fundamental analysis, prepare research reports, present proposals and participate in group investment decisions. The University's Student Investment Trust provides the money for students to invest. Course may be repeated for credit up to a maximum of 3 credit hours.

**FINANCE 3540 Introduction to Financial Institutions and Financial Markets: 3 semester hours**

Prerequisite: FINANCE 3500 and a 2.0 overall GPA. The course surveys financial institutions and financial markets and addresses the interplay between institutions and markets. State and federal regulation of institutions and markets is explored. A portion of the course addresses current events, managerial policy issues, and regulatory issues in financial services and markets. Focus is primarily U.S. institutions and markets, but the evolving impact of globalization and importance of the Foreign Exchange Market on U. S. financial institutions are developed.

**FINANCE 3541 Commercial Bank Management: 3 semester hours**

Prerequisites: ECON 1002, FINANCE 3500 and a 2.0 overall GPA. Corporate finance and microeconomics are applied to matters of importance to commercial bankers. Among the subjects treated are bank-asset portfolio construction, lending policies, liabilities management, bank capital structure, short-run cash management, financial market rates and flows, and quantitative models for bank management. Commercial bank management is analyzed from an internal viewpoint in terms of what bank managers should look for in asset management and why; what market conditions they should be aware of; and what techniques they can use to meet changing economic and financial conditions.

**FINANCE 3542 Principles Of Real Estate: 3 semester hours**

Prerequisites: FINANCE 3500 and a 2.0 campus GPA. As an introduction to the real estate industry, the course broadly explores all phases of acquisition, development and disposal of real property. Topics include legal requirements of contracts, property rights, valuation and appraisal techniques, marketing, brokerage operations and practices, mortgage financing, leasing and property management.

**FINANCE 3560 Practice Of Personal Financial Planning: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. Professional financial planning requires broad knowledge of investments, insurance, income taxation, retirement planning, and estate planning, as well as certification requirements and legal/ethical issues. This course introduces students to the field of financial planning, and provides an integrated overview of the topics listed above. Students interested in the Financial Planning track are encouraged to complete this course prior to taking other courses in the track.

**FINANCE 3561 Principles Of Insurance: 3 semester hours**

Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This is a survey course intended to introduce students to the basic concepts of insurance. Topics include the nature of risks, types of insurance carriers and markets, insurance contracts and policies, property and casualty coverages, life and health insurance, and government regulations. The functions of underwriting, setting premiums, risk analysis, loss prevention, and financial administration of carriers are emphasized.

**FINANCE 3562 Life Insurance And Employee Benefits: 3 semester hours**

Prerequisites: FINANCE 3500 or equivalent and a minimum campus GPA of 2.0 This course explores the life insurance business from the perspective of both the consumer and provider. Coverage will include an analysis of the various types of life insurance products, aspects of life insurance evaluation, reinsurance, underwriting, and uses of life insurance in financial planning. Also included is an examination of the tax, legal, and ethical requirements.

**FINANCE 3563 Retirement Planning And Employee Benefits: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. The course is designed to give students an understanding of the retirement planning process. Students will gain an appreciation of the usefulness (and shortcomings) of employee benefits and develop an ability to counsel others on important retirement and employee benefit decisions. Corporate pension and profit sharing plans, self-employed Keough plans, IRA's, annuities, health insurance, and social security will be discussed.

**FINANCE 3564 Estate Planning And Trusts: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. This course will focus on the responsibility of a financial planner in the formulation and implementation of an estate plan. Topics include wills, lifetime transfers, trusts, gifts, estate reduction techniques, tax implications in estate planning, business and inter-family transfers, dealing with incompetency, postmortem techniques, and the role of fiduciaries. Lectures, cases, and guest speakers will be used to stimulate analysis and discussion.

**FINANCE 3565 Seminar in Financial Planning: 3 semester hours**

Prerequisites: ACCTNG 3441, FINANCE 3520, FINANCE 3560, FINANCE 3561, FINANCE 3563, and FINANCE 3564; a minimum campus GPA of 2.0; or permission of instructor. This course serves as the capstone in the registered Financial Planning curriculum. Students will prepare and present comprehensive, professional-level personal financial plans. This course is required by the Certified Financial Planner Board of Standards for those who wish to sit for the Certified Financial Planner examination.

**FINANCE 3580 International Corporate Finance: 3 semester hours**

Same as INTL BUS 3580. Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This course explores corporate finance in the context of a global environment. Financial managers for an international firm must deal with all the normal problems faced by domestic corporations plus additional foreign exchange and political risks. Class discussions will focus on applying financial techniques to decision making in foreign operations. Students are required to work in a group to undertake a project related to international finance.

**FINANCE 3582 International Investments: 3 semester hours**

Same as INTL BUS 3582. Prerequisites: FINANCE 3500. This course explores the concepts of investing and hedging risk management, portfolio diversification, currency risk, asset pricing, and alternative portfolio strategies. Techniques for using derivatives are discussed in the context of hedging exchange rate risk. Reading foreign exchange quotes and understanding the functioning of global markets is central to the course. A prior course in investments is recommended but not required.

**FINANCE 3590 Internship In Finance: 1-3 semester hours**

Prerequisite: a minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of finance electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of at least 2.5 is also required. Students are employed in the field of finance where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience in a Track area are the primary goals. The student's program will be monitored by a finance faculty member with the student providing a formal written report at the end of the project. FINANCE 3590 may not be counted toward the minimum 15 credit hours of finance electives for a finance emphasis.

**FINANCE 3595 Special Administration Problems - Finance: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**FINANCE 3598 Seminar in Finance: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of finance. May be repeated for credit with different topics.

**FINANCE 3599 Independent Study In Finance: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in finance under the supervision of a full-time finance faculty member.

**FINANCE 5599 Individual Research in Finance: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Finance under the guidance of a specific professor.

**FINANCE 6500 Financial Management: 3 semester hours**

Prerequisites: ACCTNG 5400 or ACCTNG 2400, LOG OM 5300 or LOG OM 3300, and BUS AD 5000 or ECON 1001 and ECON 1002. This course provides an in-depth analysis of corporate finance including asset pricing, risk and return, short- and long-term investment decisions, capital structure choices, dividend policy, derivatives, mergers and acquisitions, and a host of other current topics. The material is taught through lectures and problem solving.

**FINANCE 6501 Advanced Financial Management: 3 semester hours**

Prerequisite: FINANCE 6500 and LOG OM 5300. Exposure to recent financial management theory through selected readings. Financial management problems are considered by the use of cases and simulation models. An original research project under the supervision of instructor is required.

**FINANCE 6520 Security Analysis: 3 semester hours**

Prerequisite: FINANCE 6500 and LOG OM 5300. An in-depth study of techniques used in evaluating various financial assets as investment opportunities. Financial assets studied include common stock, preferred stock, and fixed income securities. Other related topics such as sources of investment information and current market trends are discussed.

**FINANCE 6521 Financial Forensics: The Science of Derivatives: 3 semester hours**

Prerequisites: FINANCE 6500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 6520) prior to enrolling in FINANCE 6521.

**FINANCE 6540 Financial Institutions and Financial Markets: 3 semester hours**

Prerequisite: Graduate Status and FINANCE 6500. By lecture and casework, the course surveys markets (Money Market, Capital Markets, Foreign Exchange) and various forms of financial institutions. Historical and evolving business models of financial institutions are explored in the context of regulation, economics, and competition. Interplay between institutions and markets is addressed. Structure and purpose of regulation is examined. A portion of the course involves current events and managerial policy issues in financial services. A major U.S. financial institution is selected and case analyzed by the class. Focus is U.S. institutions and markets, but impact of globalization is discussed.

**FINANCE 6541 Commercial Bank Management: 3 semester hours**

Prerequisite: FINANCE 6500. This course explores the various bank management techniques required to manage a modern commercial bank in a rapidly changing environment. Topics include asset and liability management, capital adequacy, bank holding companies, profitability, and bank market structure and regulation.

**FINANCE 6542 Real Estate: 3 semester hours**

Prerequisite: FINANCE 6500 This course provides a broad introduction to real estate with a focus on legal issues, market analysis, valuation, financing, leasing and investment decisions. Classes are conducted in a standard lecture format with discussion on current topics. No prior knowledge of the industry is required.

**FINANCE 6580 International Financial Management: 3 semester hours**

Same as INTL BUS 6581. Prerequisite: FINANCE 6500. The objective of this course is to introduce students to financial issues for multinational firms. Besides covering basic tools and techniques, the class stresses the role of the financial manager in analysis and decision-making. Topics include the impact of international accounting and tax issues, capital budgeting in a foreign environment, transfer pricing, and global funding. Conceptual skills for lifelong learning experiences are emphasized. This course employs a lecture and case format with group discussions.

**FINANCE 6581 Seminar In International Investments: 3 semester hours**

Same as INTL BUS 6581. Prerequisite: FINANCE 6500 This course covers topics related to the determination of exchange rates, international parity relations and portfolio diversification. In addition, methods for using foreign exchange derivatives are explored in their use for hedging exchange rate risk. Learning to read foreign exchange quotes and understanding the functioning of global markets is an integral part of the course material. Each student is assigned a foreign country to study throughout the semester with the comprehensive project report. A prior investments course is recommended but not required.

**FINANCE 6582 International Bank Management: 3 semester hours**

Prerequisites: FINANCE 6500. The objective of this course is to introduce students to many challenging issues in international bank management. This is a specialized finance course dealing explicitly with global bank decision-makings of a multinational bank that uses a variety of financial tools and skills. The course will discuss the rapidly blurring distinctions between commercial and investment bankers. Conceptual skills for life-learning (evolving) experiences relevant to the global banking sector are emphasized.

**FINANCE 6590 Seminar In Finance: 3 semester hours**

Prerequisites: FINANCE 6500. This course incorporates a wide range of advanced topics in finance including, but not limited to, an evaluation of various financial assets as investment opportunities, trends in capital markets, derivatives and management of financial and non-financial firms.

**FINANCE 6591 Finance Internship: 1-3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of finance electives and have consent of supervising faculty member and Area Coordinator Students work in the field of finance where they apply the knowledge and skills learned in the classroom. Professional development and obtaining sopecialized work experience are the primary goals. The student's program will be monitored by a finance faculty member with the student providing a formal written report at the end of the project.

## Courses

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**FINANCE 3598 Seminar in Finance: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of finance. May be repeated for credit with different topics.

**FINANCE 3599 Independent Study In Finance: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in finance under the supervision of a full-time finance faculty member.

**FINANCE 5599 Individual Research in Finance: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Finance under the guidance of a specific professor.

**FINANCE 6500 Financial Management: 3 semester hours**

Prerequisites: ACCTNG 5400 or ACCTNG 2400, LOG OM 5300 or LOG OM 3300, and BUS AD 5000 or ECON 1001 and ECON 1002. This course provides an in-depth analysis of corporate finance including asset pricing, risk and return, short- and long-term investment decisions, capital structure choices, dividend policy, derivatives, mergers and acquisitions, and a host of other current topics. The material is taught through lectures and problem solving.

**FINANCE 6501 Advanced Financial Management: 3 semester hours**

Prerequisite: FINANCE 6500 and LOG OM 5300. Exposure to recent financial management theory through selected readings. Financial management problems are considered by the use of cases and simulation models. An original research project under the supervision of instructor is required.

**FINANCE 6520 Security Analysis: 3 semester hours**

Prerequisite: FINANCE 6500 and LOG OM 5300. An in-depth study of techniques used in evaluating various financial assets as investment opportunities. Financial assets studied include common stock, preferred stock, and fixed income securities. Other related topics such as sources of investment information and current market trends are discussed.

**FINANCE 6521 Financial Forensics: The Science of Derivatives: 3 semester hours**

Prerequisites: FINANCE 6500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 6520) prior to enrolling in FINANCE 6521.

**FINANCE 6540 Financial Institutions and Financial Markets: 3 semester hours**

Prerequisite: Graduate Status and FINANCE 6500. By lecture and casework, the course surveys markets (Money Market, Capital Markets, Foreign Exchange) and various forms of financial institutions. Historical and evolving business models of financial institutions are explored in the context of regulation, economics, and competition. Interplay between institutions and markets is addressed. Structure and purpose of regulation is examined. A portion of the course involves current events and managerial policy issues in financial services. A major U.S. financial institution is selected and case analyzed by the class. Focus is U.S. institutions and markets, but impact of globalization is discussed.

**FINANCE 6541 Commercial Bank Management: 3 semester hours**

Prerequisite: FINANCE 6500. This course explores the various bank management techniques required to manage a modern commercial bank in a rapidly changing environment. Topics include asset and liability management, capital adequacy, bank holding companies, profitability, and bank market structure and regulation.

**FINANCE 6542 Real Estate: 3 semester hours**

Prerequisite: FINANCE 6500 This course provides a broad introduction to real estate with a focus on legal issues, market analysis, valuation, financing, leasing and investment decisions. Classes are conducted in a standard lecture format with discussion on current topics. No prior knowledge of the industry is required.

**FINANCE 6580 International Financial Management: 3 semester hours**

Same as INTL BUS 6581. Prerequisite: FINANCE 6500. The objective of this course is to introduce students to financial issues for multinational firms. Besides covering basic tools and techniques, the class stresses the role of the financial manager in analysis and decision-making. Topics include the impact of international accounting and tax issues, capital budgeting in a foreign environment, transfer pricing, and global funding. Conceptual skills for lifelong learning experiences are emphasized. This course employs a lecture and case format with group discussions.

**FINANCE 6581 Seminar In International Investments: 3 semester hours**

Same as INTL BUS 6581. Prerequisite: FINANCE 6500 This course covers topics related to the determination of exchange rates, international parity relations and portfolio diversification. In addition, methods for using foreign exchange derivatives are explored in their use for hedging exchange rate risk. Learning to read foreign exchange quotes and understanding the functioning of global markets is an integral part of the course material. Each student is assigned a foreign country to study throughout the semester with the comprehensive project report. A prior investments course is recommended but not required.

**FINANCE 6582 International Bank Management: 3 semester hours**

Prerequisites: FINANCE 6500. The objective of this course is to introduce students to many challenging issues in international bank management. This is a specialized finance course dealing explicitly with global bank decision-makings of a multinational bank that uses a variety of financial tools and skills. The course will discuss the rapidly blurring distinctions between commercial and investment bankers. Conceptual skills for life-learning (evolving) experiences relevant to the global banking sector are emphasized.

**FINANCE 6590 Seminar In Finance: 3 semester hours**

Prerequisites: FINANCE 6500. This course incorporates a wide range of advanced topics in finance including, but not limited to, an evaluation of various financial assets as investment opportunities, trends in capital markets, derivatives and management of financial and non-financial firms.

**FINANCE 6591 Finance Internship: 1-3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of finance electives and have consent of supervising faculty member and Area Coordinator. Students work in the field of finance where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. The student's program will be monitored by a finance faculty member with the student providing a formal written report at the end of the project.

## Foreign Language-Other

### Courses

**FGN LANG 1111 Reacting to the Past: Language, Immigration, and Social Change: 4 semester hours**

Reacting to the Past is a series of culturally accurate simulations built around key moments, ideas, and texts from the past. In each simulation, students are assigned one role; they research their character and learn to speak and write in his or her voice. The course offers students a rigorous inter-disciplinary learning experience in which they conduct academic research, speak publicly, and write extensively in different genres. It integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. This course fulfills the requirement for Freshman Composition.

**FGN LANG 2100 Languages and World View: 3 semester hours**

Same as ANTHRO 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

**FGN LANG 2192 Service Learning In Foreign Languages: 1-3 semester hours**

Prerequisites: Permission of course instructor and concurrent enrollment in a Foreign Language course (Arabic, Chinese, English as a Second Language, French, German, Greek, Japanese, Latin or Spanish) at the 2000-level or higher. Taken concurrently with a qualifying foreign language course, students will participate in a community service experience that is academically integrated into the students' course of study. Community service in a local or international community organization, as approved by the course instructor, is required. Determination of the type of community service to be conducted and the number of hours required will be made in consultation with the instructor. May be repeated for a maximum of 6 credit hours.

**FGN LANG 3294 Internship in Languages: 1-3 semester hours**

Prerequisites: FGN LANG 2100 plus completion of 2000-level language requirements and consent of Internship Coordinator in Languages. This internship gives students of languages and cultures the opportunity to use their unique and developing skills at an appropriate agency, organization, or business, to gain valuable work experience, and to begin networking with organizations in the St. Louis region and beyond. Students will attend a minimum of three face-to-face meetings with the internship coordinator and write weekly journals and a final report about their experiences. Their course grade will reflect their work at the internship site as well as their written assignments for the course.

**FGN LANG 4394 Advanced Internship in Languages: 1-3 semester hours**

Prerequisites: FGN LANG 2100 plus completion of at least two 3000-level classes in a language and consent of the Internship Coordinator in Languages. This internship gives students of languages and cultures the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. Students will attend a minimum of three face-to-face meetings with their internship coordinator and write weekly journals and a final report about their experiences. Their course grade will reflect their work at the internship site as well as their written assignments for the course.

**FGN LANG 4589 Curriculum and Methods of Teaching Foreign Language: 3 semester hours**

Same as SEC ED 4589. Prerequisites: TCH ED 3310 or TCH ED 5310 and passing the departmental language skills test. A study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of foreign language. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**FGN LANG 4590 Foreign Language Teaching Seminar: 2 semester hours**

Same as SEC ED 4590. Prerequisites: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of FGN LANG 4589 / SEC ED 4589, Curriculum and Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

**FGN LANG 5311 Special Topics In Foreign Language Teaching: 3 semester hours**

Prerequisite: Consent of the Instructor. Designed for in-service foreign language teachers, this course focuses on the study of special topics in the field of foreign language learning with an emphasis on research applications to the improvement of practice. Topics may include technology for FL learning, the teaching of writing in the FL classroom, the teaching of reading in the FL classroom, proficiency-oriented instruction and assessment, second language acquisition for FL teachers, action research in the FL classroom. May be repeated for credit provided the topic is different. May be applied toward the Master's in Secondary Education with an emphasis in FL teaching.

**FGN LANG 5399 Standards-Based Foreign Language Instruction: 3 semester hours**

Prerequisites: Teacher certification and one year teaching experience. Designed to provide in-service foreign language teachers with the knowledge and skills to design instructional units that reflect the profession's standards for foreign language learning.

# French

## Courses

### ***FRENCH 1001 French Language and Culture I: 5 semester hours***

Students will develop communicative skills in French, including listening, speaking, reading, and writing. Introduction to Francophone culture through discussion of readings and visual media. Intended for students with no previous French experience. Students with previous French experience are expected to.

### ***FRENCH 1002 French Language and Culture II: 5 semester hours***

Prerequisite: FRENCH 1001 or equivalent. Students will continue to develop communicative skills in French, including listening, speaking, reading, and writing. Continued exploration of Francophone culture through discussion of readings and visual media.

### ***FRENCH 2101 Foreign Language and Culture III: 3 semester hours***

Students will further develop the four language skills through meaningful communicative interaction. Students will advance their understanding of Francophone culture through discussion of readings and visual media. Students who have successfully completed this course may advance to FRENCH 2170 and FRENCH 2180.

### ***FRENCH 2115A Intensive French: 5 semester hours***

Prerequisite: Special consent required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

### ***FRENCH 2115B Intensive French: 5 semester hours***

Prerequisite: Special Consent Required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

### ***FRENCH 2115C Intensive French: 3 semester hours***

Prerequisite: Special Consent Required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

### ***FRENCH 2170 Intermediate French Language And Culture: 3 semester hours***

Prerequisites: FRENCH 2101 or equivalent. Students will continue to advance in their development of the four language skills through meaningful communicative interaction. Students will further advance their understanding of Francophone culture. This course should be taken concurrently with FRENCH 2180.

### ***FRENCH 2180 Readings In French: 3 semester hours***

Prerequisite: FRENCH 2101 or equivalent. This course will introduce students to a variety of literary and non-literary texts in French. This course should be taken concurrently with FRENCH 2170.

### ***FRENCH 2190 Special Readings In French: 1-3 semester hours***

Prerequisite: FRENCH 2101 and consent of the department. Independent study on mutually acceptable topics through readings, reports, and conferences.

### ***FRENCH 2199 Special Topics: Language Immersion: French: 1-3 semester hours***

Prerequisite: FRENCH 2101 or consent of instructor. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

### ***FRENCH 3199 Special Topics: Language Immersion in French: 1-3 semester hours***

Prerequisites: Consent of the instructor. Study abroad experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

### ***FRENCH 3200 French Grammar in Review: 3 semester hours***

Prerequisite: FRENCH 2170 and FRENCH 2180. This course is designed to increase students' ability to communicate clearly and effectively through study and practice of forms and structures of the French language. Strong emphasis in writing.

### ***FRENCH 3205 French in Commerce and Media: 3 semester hours***

Prerequisite: FRENCH 2170 and FRENCH 2180. Professional and practical applications of French in commerce and media, including conventions of correspondence, business etiquette, and travel.

### ***FRENCH 3211 Contemporary French Culture: 3 semester hours***

Prerequisites: FRENCH 2170 and FRENCH 2180. Aspects of contemporary French culture, including history, geography, education, politics, and gastronomy, studied through a variety of authentic cultural materials.

### ***FRENCH 3271 Intermediate French Conversation: 3 semester hours***

Prerequisite: FRENCH 2170 or consent of the instructor. Emphasis will be placed upon the further development of communicative skills in French.

### ***FRENCH 3280 French Literature and Culture to 1800: 3 semester hours***

Prerequisites: FRENCH 2170 and FRENCH 2180. Designed to acquaint students with French literature and culture from the Middle Ages through the eighteenth century.

### ***FRENCH 3281 French Literature and Culture After 1800: 3 semester hours***

Prerequisites: FRENCH 2170 and FRENCH 2180. Designed to acquaint students with French literature and culture from the nineteenth century to the present.

### ***FRENCH 3290 Special Readings: 1-3 semester hours***

Prerequisite: Consent of department. Independent study through readings, reports and conferences.

### ***FRENCH 3311 Introduction to Special Topics in French Culture: 3 semester hours***

Prerequisites: FRENCH 2170 and FRENCH 2180. Selected topics in French or francophone culture taught in French. This course may be repeated once for credit provided that the topic is different.

### ***FRENCH 4300 Advanced Grammar & Stylistics: 3 semester hours***

Prerequisite: FRENCH 3200 or equivalent. This course is designed to improve students' writing skills through advanced study of modern French prose style.

**FRENCH 4311 Special Topics In French Culture and Literature: 3 semester hours**

Prerequisites: Three French courses at the 3000 level or above. Selected topics in French/Francophone culture and literature. This course may be repeated for credit provided the topic is different each time.

**FRENCH 4350 Studies in Eighteenth-Century French Literature and Culture: 3 semester hours**

Prerequisite: FRENCH 3280 or FRENCH 3281. A study of eighteenth-century French literature and culture. Topics may include the philosophic movement, the French Revolution, and representative novels and plays.

**FRENCH 4360 Studies in Nineteenth-Century French Literature and Culture: 3 semester hours**

Prerequisite: FRENCH 3280 or FRENCH 3281. A study of nineteenth-century French literature and culture. Topics may include romanticism, realism, symbolism, and impressionism.

**FRENCH 4370 Studies in Twentieth-Century French Literature and Culture: 3 semester hours**

Prerequisite: FRENCH 3280 or FRENCH 3281. A study of twentieth-century French literature and culture. Topics may include surrealism, existentialism, the influence of the world wars, post-colonialism, and cinema.

**FRENCH 4380 Studies in Twenty-First-Century French Literature and Culture: 3 semester hours**

Prerequisites: FRENCH 3280 or FRENCH 3281. A study of twenty-first-century French literature and culture. Topics may include literature, media, and culture since 2000.

**FRENCH 4390 Advanced Independent Study: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports and discussions.

**FRENCH 4399 French Seminar: 3 semester hours**

Prerequisite: FRENCH 3280 or FRENCH 3281. Specialized topic in French literature. Subject to be announced by instructor in charge of seminar.

**FRENCH 5311 Advanced Topics in French Culture and Literature: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in French/Francophone culture and literature. This course may be repeated for credit provided the topic is different each time. Students will be expected to conduct an independent research project.

Prerequisites: Graduate standing or permission of instructor. Selected topics in French/Francophone culture and literature. This course may be repeated for credit provided the topic is different each time. Students will be expected to conduct an independent research project.

## Gender Studies

### Courses

**GS 1004 History Of Women In The United States: 3 semester hours**

Same as HIST 1004. A survey of women's history from the colonial era to the present.

**GS 2020 History of Women and Social Movements: 3 semester hours**

Same as HIST 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

**GS 2100 Women in Contemporary Society: 3 semester hours**

.

**GS 2102 Introduction To Gender Studies: 3 semester hours**

Same as SOC WK 2102, HIST 2102, and SOC 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**GS 2130 Gender and the Military: 3 semester hours**

Same as MVS 2130. This course examines the treatment of gender difference in the military and focuses on the complex intersection between military culture and social constructs of gender in the civilian world.

**GS 2150 Special Topics In Gender Studies: 3 semester hours**

An introduction to a particular topic area in women's and gender studies (topics will be announced prior to registration) drawing on the theories and methods of such disciplines as sociology, psychology, political science, history, philosophy, art history, and others to examine particular aspects of gender in social and cultural life. Course may satisfy the distribution requirement for humanities or social sciences depending on the topic.

**GS 2224 Marriage And The Family: 3 semester hours**

Same as SOC 2224. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure are considered.

**GS 2230 Psychology Of Gender: 3 semester hours**

Same as PSYCH 2230. Prerequisites: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

**GS 2232 Psychology Of Trauma: 3 semester hours**

Same as PSYCH 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

**GS 2253 Philosophy And Feminism: 3 semester hours**

Same as PHIL 2253. A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

**GS 2290 Gender And The Law: 3 semester hours**

Same as POL SCI 2290. This course examines the ways in which laws and interpretations of laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non-governmental influences on equality. It also addresses gender representation in the legal profession admits effect on judicial decisions. This course satisfies State requirements in American History and Government.

**GS 2380 Politics of Gender in the United States: 3 semester hours**

Same as POL SCI 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past and present. It focuses on various movements for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels. (This course satisfies the State requirements in American History and Government).

**GS 2410 Work, Families, And Public Policy: 3 semester hours**

Same as ECON 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take 2410 for credit.

**GS 3031 History Of Women In The United States: 3 semester hours**

Same as HIST 3031. Prerequisites: Junior standing or consent of the instructor. Development of women's economic, political, and social role in the United States with special emphasis on the nineteenth and twentieth centuries; women and work; women and the family; women and reform movements; women and education; feminist theories and activists; images of women.

**GS 3032 History Of Women In Comparative Cultures: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. An introduction to the historical development of women's status in a variety of cultures and periods within the areas of Africa, Europe, the Far East, Latin America, and the Middle East. The course analyzes women's political, economic, familial, and sexual roles and the economic, demographic, ideological, and political forces which promoted change and continuity in those roles.

**GS 3033 Sexuality And Gender Theory: 3 semester hours**

Same as HIST 3033. Prerequisites: Junior standing or consent of instructor. Course examines the ways in which contemporary sexuality and gender theory has challenged and changed the study of culture and history. The course introduces students to sexuality and gender theory in late twentieth and early twenty-first century context-s.

**GS 3034 History Of Sexuality: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course locates sexuality at the center of history and examines its impact over time on politics, society, culture, and economics. In particular, the course focuses on changing definitions of sexual deviance, the historical evolution of formal and informal regulations of sexual practices and on the manner in which sex has been deployed in broader historical struggles involving gender, race, class, migration and state building.

**GS 3224 Families in Global Perspective: 3 semester hours**

Same as SOC 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status,.

**GS 3250 Sociology Of Victimization: 3 semester hours**

Same as SOC 3250. Prerequisite: SOC 1010. This course examines the role of social factors in a wide range of kinds of victimization--crime, violence, natural disasters, accidents, disease, etc. The topic of social reactions to various kinds of victimization is also covered. Sociological theories of victimization are emphasized.

**GS 3350 Special Topics In Gender Studies: 3 semester hours**

Prerequisite: GS 2102 or consent of instructor. Special topics in women's and Gender Studies. topics vary by semester.

**GS 3352 Independent Studies In Gender Studies: 1-3 semester hours**

Prerequisites: Junior standing; two courses in Women's and Gender Studies, including GS 2102; and consent of the instructor and the Institute. Directed independent work in selected women's and gender studies topics through readings, research, reports and/or conferences. Course may satisfy the distribution requirement for the humanities, social sciences, or math/science depending on topic.

**GS 3376 Gender In The Visual Arts: 3 semester hours**

Same as ART HS 3376. Prerequisites: Minimum of one 2000-level course in ART HIST and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

**GS 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours**

Same as POL SCI 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

**GS 3700 Diversity And Social Justice: 3 semester hours**

Same as SOC WK 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**GS 4100 Introduction to Feminist and Gender Theory: 3 semester hours**

Same as SOC 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

**GS 4150 Feminist Theory and Social Research: 3 semester hours**

Same as SOC 4150. Prerequisites: GS 2102 and Junior Standing or consent of instructor. This course provides an in-depth examination of feminist theoretical contributions to social science research. We begin by examining the 20th century roots of contemporary feminist theories. With this foundation in place, we then shift to an investigation of how feminist theory has informed sociological research by examining current feminist understandings of gender, race, and sexual inequalities across a range of contemporary social problems. Fulfills WGS feminist theory requirement.

**GS 4300 The Female Gaze: Women And The Media: 3 semester hours**

Prerequisites: Junior Standing or consent of instructor. This course challenges how women's issues and performances of femininity are represented in global media, particularly popular Western media which perpetuate cultural stereotypes of gender norms. Specific topics will vary.

**GS 4325 Gender, Crime And Justice: 3 semester hours**

Same as CRIMIN 4325 and SOC 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills criminology diversity requirement.

**GS 4330 Violence Against Women: 3 semester hours**

Same as CRIMIN 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

**GS 4335 Gender and Body Image in Media and Culture: 3 semester hours**

Prerequisites: GS 2102, GS 4100, and six additional hours of GS courses. Through the lens of feminist and gender theory, this course engages students in conversations pertaining to gender, media, body image, and culture. Students will read and analyze fiction and non-fiction texts in order to realize the multidisciplinary of gender and body image as themes and motifs. Students are required to participate in Service-Learning in order to deepen their understanding of how these issues affect day-to-day lives within their communities.

**GS 4350 Special Topics In Gender Studies: 3 semester hours**

Prerequisites: GS 2102 or consent of instructor. Special topics examined from a gender perspective in the fields of anthropology, art history, criminology, economics, English, foreign language, history, philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester. Course may be repeated by permission of Director of the Center.

**GS 4352 Independent Study In Gender Studies: 1-3 semester hours**

Prerequisites: GS 2102 or consent of instructor. Independent, directed readings and research in a women's gender related topic, to be determined in consultation with instructor.

**GS 4353 Internship In Gender Studies: 3 semester hours**

.

**GS 4360 Sociology Of Minority Groups: 3 semester hours**

Same as SOC 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

**GS 4452 Feminism And Science: 3 semester hours**

Same as GS 4452. Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. This course will explore major themes and issues in feminist science scholarship, a body of research that focuses on the relationship between science and gender. Feminist research in the philosophy and history of science, and in the biological sciences, are emphasized. Issues include: the nature of objectivity, evidence, and truth; the factors that contribute to the acceptance or rejection of research hypothesis and theories; the nature and consequences of science's cognitive authority; and the relationship between science and values.

**GS 4600 Masculinities: 3 semester hours**

Same as SOC 4600. Prerequisites: GS 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies GS gender theory requirement.

**GS 4610 Intimate Partner Violence: 3 semester hours**

Same as SOC WK 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

**GS 4630 Gender and Social Issues: 3 semester hours**

Same as SOC WK 4630. Prerequisites: SOC WK 3700, GS 2102 or graduate standing. This course will help students become more sensitive to social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

**GS 4920 Women Writing Nature: 3 semester hours**

Prerequisites: GS 2102, or consent of instructor. We will read and analyze nature writing by 19th and 20th-century women in America, as well as critical studies from various cultural perspectives and academic disciplines. The course will examine how women's observations about nature create, support, and/or dispute particular cultural and social attitudes toward the environment. Students will consider debates in feminist pedagogy, ecofeminism, and social constructivism about the relationship of gender to nature.

**GS 4925 Feminism and Witchcraft: 3 semester hours**

Prerequisites: GS 2102, or consent of instructor. This class will examine literary and historical treatments of witchcraft through a cross-cultural, feminist theoretical framework. Students will read primary historical documents as well as fictional, dramatic, and poetic representations of witches and witchcraft. The course will consider changing perspectives toward witches in contemporary gender theory, spiritualist discourse and popular media.

**GS 4930 Studies In Gender And Literature: 3 semester hours**

Same as ENGL 4930. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

**GS 4931 English Women Writers, 1300-1750: 3 semester hours**

Same as ENGL 4931. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Works will be read ranging in scope from closet drama and romance to lyrics to personal, political, and religious writing by women, such as Margery Kempe, Mary Sidney, and Amelia Lanyer who wrote during a period when reading and writing were not the female norm.

**GS 4932 Female Gothic: 3 semester hours**

Same as ENGL 4932. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

**GS 4933 Female Novel Of Development: 3 semester hours**

Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course covers the development of the female Bildungsroman from the late 18th century to the present. We will consider how temporary and current theories of female development help us read these novels within their particular cultural contexts.

**GS 4934 Austen And The Brontes: 3 semester hours**

Same as ENGL 4934. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. This course covers the novels of the major 19th century British writers Jane Austen and the three Bronte sisters, Anne, Emily, and Charlotte. The course will be devoted to Austen's romantic comedies and the historical/cultural contexts that inform the novels, as well as the darker romanticism of the Brontes, along with the biographical, cultural, philosophical, and religious contexts of their work.

**GS 4936 Tales Of The Islamic East: 3 semester hours**

Same as ENGL 4936. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Adventure, gender, and power in British and post-colonial writing: Lady Montague on Turkey, Gibbon on Islam, Byron and Hemans on harems and heroes, Disraeli on the Jewish Caliph of Bagdad, T.E. Lawrence on Arabia, and el Saadawi and Rushdie on (post)modern gender and the Islamic East.

**GS 4938 American Women Poets Of The 20Th/21St Centuries: 3 semester hours**

Same as ENGL 4938. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Introduction to American women poets since 1900: anarchists, Imagists, Harlem formalists, white lyricists, modernists (Ridge, H.D., Dunbar-Nelson, Millay, Stein); mid-century giants (Rukeyser, Brooks) and Confessionals (Sexton, Plath); feminists and multiculturalists (Rich, Lorde, Giovanni, Hogan), poets of witness and the play of language and the mind (Klepfisz, Olds, Mullen, Perillo).

**GS 5031 Advanced History Of Women In The United States: 3 semester hours**

Prerequisites: Graduate standing. Development of women's economic, political, and social roles in the United States with special emphasis on the nineteenth and twentieth centuries: women and work; women and the family; women and reform movements; women and education; feminist theorists and activists; images of women.

**GS 5032 Advanced History Of Women In Comparative Cultures: 3 semester hours**

Prerequisites: Graduate standing. An introduction to the historical development of women's status in a variety of cultures and periods within the areas of Africa, Europe, the Far East, Latin America, and the Middle East. The course analyzes women's political, economic, familial, and sexual roles and the economic, demographic, ideological, and political forces which promoted change and continuity in these roles.

**GS 5033 Sexuality And Gender Theory: 3 semester hours**

Prerequisite: Graduate standing. Course examines the ways in which contemporary sexuality and gender theory have challenged and changed the study of culture and history. The course introduces students to sexuality and gender theory in late twentieth and early twenty-first century context-s.

**GS 5040 Feminist Critical Theory: 3 semester hours**

Same as ENGL 5040. Prerequisites: Graduate Standing and consent of instructor. A consideration of feminist critical theory as a means of reassessing literary texts and our cultural heritage. After exploring the roots of feminist criticism, the seminar will examine Anglo-American and continental debates on theories of language, writing and representation. In providing an interdisciplinary context the course will consider studies in psychology, anthropology, history, and philosophy/theology which have influenced and enriched feminist approaches to literature.

**GS 5053 Advanced Studies In African-American History: 3 semester hours**

Prerequisites: Graduate Standing. Course introduces some of the themes of African-American women's history. By examining the impact of region, gender, and class on African-American women's experiences across time, the course highlights black women's applied and theoretical contributions to feminist politics and activism as well as the black struggle for freedom and equality. Topics covered include: slavery and emancipation, institution and community building, the family and work, electoral politics and direct action protest, civil rights, and contemporary issues.

**GS 5320 Gender and Aging: 3 semester hours**

Same As GERON 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

**GS 5350 Topics In Women's And Gender Studies: 3 semester hours**

Prerequisites: Graduate standing and at least one Women's and Gender Studies course. This course will focus on a particular aspect of gender (to be announced prior to registration) and will draw upon recent theoretical and methodological work from a variety of disciplines.

**GS 5450 Special Topics In Gender Studies: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Special topics at the Graduate level examined from a gender perspective in the field of anthropology, art history, criminology, economics, English, foreign language, history philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester.

**GS 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours**

Same as SOC WK 5500. Prerequisites: SOC WK 3150 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

**GS 5635 Social Work Practice With Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours**

Same as SOC WK 5635. Prerequisites: SOC WK 5100 and SOC WK 5500. This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

**GS 5700 Diversity, Social Justice And Social Practice: 3 semester hours**

Same as SOC WK 5700. Prerequisites: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**GS 5940 Seminar In Gender And Literature: 3 semester hours**

Same as ENGL 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

**GS 6350 Gender, Language and Identity: 3 semester hours**

Same as TCH ED 6350. Prerequisites: Graduate Standing. An interdisciplinary look at the ways gendered and racial identities get developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**GS 6353 Graduate Internship In Gender Studies: 1-6 semester hours**

Prerequisites: Graduate standing and consent of director. Provides an opportunity for the Graduate Women's and Gender Studies student to acquire "real world" experience working in a non-profit, political, economic, or social service organization with a gender focus.

**GS 6410 Women and Mental Health: 3 semester hours**

Same as PSYCH 7410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of the instructor. This course will focus on contemporary research on the psychology of women pertaining to mental health issues. Etiology and treatment of disorders disproportionately affecting women will be emphasized.

**GS 6450 Seminar In Gender Studies: 3 semester hours**

.

**GS 6452 Special Readings In Gender Studies: 3 semester hours**

.

## Courses

**GS 1004 History Of Women In The United States: 3 semester hours**

Same as HIST 1004. A survey of women's history from the colonial era to the present.

**GS 2020 History of Women and Social Movements: 3 semester hours**

Same as HIST 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

**GS 2100 Women in Contemporary Society: 3 semester hours**

.

**GS 2102 Introduction To Gender Studies: 3 semester hours**

Same as SOC WK 2102, HIST 2102, and SOC 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**GS 2130 Gender and the Military: 3 semester hours**

Same as MVS 2130. This course examines the treatment of gender difference in the military and focuses on the complex intersection between military culture and social constructs of gender in the civilian world.

**GS 2150 Special Topics In Gender Studies: 3 semester hours**

An introduction to a particular topic area in women's and gender studies (topics will be announced prior to registration) drawing on the theories and methods of such disciplines as sociology, psychology, political science, history, philosophy, art history, and others to examine particular aspects of gender in social and cultural life. Course may satisfy the distribution requirement for humanities or social sciences depending on the topic.

**GS 2224 Marriage And The Family: 3 semester hours**

Same as SOC 2224. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure are considered.

**GS 2230 Psychology Of Gender: 3 semester hours**

Same as PSYCH 2230. Prerequisites: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

**GS 2232 Psychology Of Trauma: 3 semester hours**

Same as PSYCH 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

**GS 2253 Philosophy And Feminism: 3 semester hours**

Same as PHIL 2253. A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

**GS 2290 Gender And The Law: 3 semester hours**

Same as POL SCI 2290. This course examines the ways in which laws and interpretations of laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non-governmental influences on equality. It also addresses gender representation in the legal profession admits effect on judicial decisions. This course satisfies State requirements in American History and Government.

**GS 2380 Politics of Gender in the United States: 3 semester hours**

Same as POL SCI 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past and present. It focuses on various movements for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels. (This course satisfies the State requirements in American History and Government).

**GS 2410 Work, Families, And Public Policy: 3 semester hours**

Same as ECON 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take 2410 for credit.

**GS 3031 History Of Women In The United States: 3 semester hours**

Same as HIST 3031. Prerequisites: Junior standing or consent of the instructor. Development of women's economic, political, and social role in the United States with special emphasis on the nineteenth and twentieth centuries; women and work; women and the family; women and reform movements; women and education; feminist theories and activists; images of women.

**GS 3032 History Of Women In Comparative Cultures: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. An introduction to the historical development of women's status in a variety of cultures and periods within the areas of Africa, Europe, the Far East, Latin America, and the Middle East. The course analyzes women's political, economic, familial, and sexual roles and the economic, demographic, ideological, and political forces which promoted change and continuity in those roles.

**GS 3033 Sexuality And Gender Theory: 3 semester hours**

Same as HIST 3033. Prerequisites: Junior standing or consent of instructor. Course examines the ways in which contemporary sexuality and gender theory has challenged and changed the study of culture and history. The course introduces students to sexuality and gender theory in late twentieth and early twenty-first century contexts.

**GS 3034 History Of Sexuality: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course locates sexuality at the center of history and examines its impact over time on politics, society, culture, and economics. In particular, the course focuses on changing definitions of sexual deviance, the historical evolution of formal and informal regulations of sexual practices and on the manner in which sex has been deployed in broader historical struggles involving gender, race, class, migration and state building.

**GS 3224 Families in Global Perspective: 3 semester hours**

Same as SOC 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status,.

**GS 3250 Sociology Of Victimization: 3 semester hours**

Same as SOC 3250. Prerequisite: SOC 1010. This course examines the role of social factors in a wide range of kinds of victimization--crime, violence, natural disasters, accidents, disease, etc. The topic of social reactions to various kinds of victimization is also covered. Sociological theories of victimization are emphasized.

**GS 3350 Special Topics In Gender Studies: 3 semester hours**

Prerequisite: GS 2102 or consent of instructor. Special topics in women's and Gender Studies. topics vary by semester.

**GS 3352 Independent Studies In Gender Studies: 1-3 semester hours**

Prerequisites: Junior standing; two courses in Women's and Gender Studies, including GS 2102; and consent of the instructor and the Institute. Directed independent work in selected women's and gender studies topics through readings, research, reports and/or conferences. Course may satisfy the distribution requirement for the humanities, social sciences, or math/science depending on topic.

**GS 3376 Gender In The Visual Arts: 3 semester hours**

Same as ART HS 3376. Prerequisites: Minimum of one 2000-level course in ART HIST and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

**GS 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours**

Same as POL SCI 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

**GS 3700 Diversity And Social Justice: 3 semester hours**

Same as SOC WK 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**GS 4100 Introduction to Feminist and Gender Theory: 3 semester hours**

Same as SOC 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

**GS 4150 Feminist Theory and Social Research: 3 semester hours**

Same as SOC 4150. Prerequisites: GS 2102 and Junior Standing or consent of instructor. This course provides an in-depth examination of feminist theoretical contributions to social science research. We begin by examining the 20th century roots of contemporary feminist theories. With this foundation in place, we then shift to an investigation of how feminist theory has informed sociological research by examining current feminist understandings of gender, race, and sexual inequalities across a range of contemporary social problems. Fulfills WGS feminist theory requirement.

**GS 4300 The Female Gaze: Women And The Media: 3 semester hours**

Prerequisites: Junior Standing or consent of instructor. This course challenges how women's issues and performances of femininity are represented in global media, particularly popular Western media which perpetuate cultural stereotypes of gender norms. Specific topics will vary.

**GS 4325 Gender, Crime And Justice: 3 semester hours**

Same as CRIMIN 4325 and SOC 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills criminology diversity requirement.

**GS 4330 Violence Against Women: 3 semester hours**

Same as CRIMIN 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

**GS 4335 Gender and Body Image in Media and Culture: 3 semester hours**

Prerequisites: GS 2102, GS 4100, and six additional hours of GS courses. Through the lens of feminist and gender theory, this course engages students in conversations pertaining to gender, media, body image, and culture. Students will read and analyze fiction and non-fiction texts in order to realize the multidisciplinary of gender and body image as themes and motifs. Students are required to participate in Service-Learning in order to deepen their understanding of how these issues affect day-to-day lives within their communities.

**GS 4350 Special Topics In Gender Studies: 3 semester hours**

Prerequisites: GS 2102 or consent of instructor. Special topics examined from a gender perspective in the fields of anthropology, art history, criminology, economics, English, foreign language, history, philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester. Course may be repeated by permission of Director of the Center.

**GS 4352 Independent Study In Gender Studies: 1-3 semester hours**

Prerequisites: GS 2102 or consent of instructor. Independent, directed readings and research in a women's gender related topic, to be determined in consultation with instructor.

**GS 4353 Internship In Gender Studies: 3 semester hours****GS 4360 Sociology Of Minority Groups: 3 semester hours**

Same as SOC 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

**GS 4452 Feminism And Science: 3 semester hours**

Same as GS 4452. Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. This course will explore major themes and issues in feminist science scholarship, a body of research that focuses on the relationship between science and gender. Feminist research in the philosophy and history of science, and in the biological sciences, are emphasized. Issues include: the nature of objectivity, evidence, and truth; the factors that contribute to the acceptance or rejection of research hypothesis and theories; the nature and consequences of science's cognitive authority; and the relationship between science and values.

**GS 4600 Masculinities: 3 semester hours**

Same as SOC 4600. Prerequisites: GS 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies GS gender theory requirement.

**GS 4610 Intimate Partner Violence: 3 semester hours**

Same as SOC WK 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

**GS 4630 Gender and Social Issues: 3 semester hours**

Same as SOC WK 4630. Prerequisites: SOC WK 3700, GS 2102 or graduate standing. This course will help students become more sensitive to social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

**GS 4920 Women Writing Nature: 3 semester hours**

Prerequisites: GS 2102, or consent of instructor. We will read and analyze nature writing by 19th and 20th-century women in America, as well as critical studies from various cultural perspectives and academic disciplines. The course will examine how women's observations about nature create, support, and/or dispute particular cultural and social attitudes toward the environment. Students will consider debates in feminist pedagogy, ecofeminism, and social constructivism about the relationship of gender to nature.

**GS 4925 Feminism and Witchcraft: 3 semester hours**

Prerequisites: GS 2102, or consent of instructor. This class will examine literary and historical treatments of witchcraft through a cross-cultural, feminist theoretical framework. Students will read primary historical documents as well as fictional, dramatic, and poetic representations of witches and witchcraft. The course will consider changing perspectives toward witches in contemporary gender theory, spiritualist discourse and popular media.

**GS 4930 Studies In Gender And Literature: 3 semester hours**

Same as ENGL 4930. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

**GS 4931 English Women Writers, 1300-1750: 3 semester hours**

Same as ENGL 4931. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Works will be read ranging in scope from closet drama and romance to lyrics to personal, political, and religious writing by women, such as Margery Kempe, Mary Sidney, and Amelia Lanyer who wrote during a period when reading and writing were not the female norm.

**GS 4932 Female Gothic: 3 semester hours**

Same as ENGL 4932. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

**GS 4933 Female Novel Of Development: 3 semester hours**

Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course covers the development of the female Bildungsroman from the late 18th century to the present. We will consider how temporary and current theories of female development help us read these novels within their particular cultural contexts.

**GS 4934 Austen And The Brontes: 3 semester hours**

Same as ENGL 4934. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. This course covers the novels of the major 19th century British writers Jane Austen and the three Bronte sisters, Anne, Emily, and Charlotte. The course will be devoted to Austen's romantic comedies and the historical/cultural contexts that inform the novels, as well as the darker romanticism of the Brontes, along with the biographical, cultural, philosophical, and religious contexts of their work.

**GS 4936 Tales Of The Islamic East: 3 semester hours**

Same as ENGL 4936. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Adventure, gender, and power in British and post-colonial writing: Lady Montague on Turkey, Gibbon on Islam, Byron and Hemans on harems and heroes, Disraeli on the Jewish Caliph of Bagdad, T.E. Lawrence on Arabia, and el Saadawi and Rushdie on (post)modern gender and the Islamic East.

**GS 4938 American Women Poets Of The 20Th/21St Centuries: 3 semester hours**

Same as ENGL 4938. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Introduction to American women poets since 1900: anarchists, Imagists, Harlem formalists, white lyricists, modernists (Ridge, H.D., Dunbar-Nelson, Millay, Stein); mid-century giants (Rukeyser, Brooks) and Confessionals (Sexton, Plath); feminists and multiculturalists (Rich, Lorde, Giovanni, Hogan), poets of witness and the play of language and the mind (Klepfisz, Olds, Mullen, Perillo).

**GS 5031 Advanced History Of Women In The United States: 3 semester hours**

Prerequisites: Graduate standing. Development of women's economic, political, and social roles in the United States with special emphasis on the nineteenth and twentieth centuries: women and work; women and the family; women and reform movements; women and education; feminist theorists and activists; images of women.

**GS 5032 Advanced History Of Women In Comparative Cultures: 3 semester hours**

Prerequisites: Graduate standing. An introduction to the historical development of women's status in a variety of cultures and periods within the areas of Africa, Europe, the Far East, Latin America, and the Middle East. The course analyzes women's political, economic, familial, and sexual roles and the economic, demographic, ideological, and political forces which promoted change and continuity in these roles.

**GS 5033 Sexuality And Gender Theory: 3 semester hours**

Prerequisite: Graduate standing. Course examines the ways in which contemporary sexuality and gender theory have challenged and changed the study of culture and history. The course introduces students to sexuality and gender theory in late twentieth and early twenty-first century context-s.

**GS 5040 Feminist Critical Theory: 3 semester hours**

Same as ENGL 5040. Prerequisites: Graduate Standing and consent of instructor. A consideration of feminist critical theory as a means of reassessing literary texts and our cultural heritage. After exploring the roots of feminist criticism, the seminar will examine Anglo-American and continental debates on theories of language, writing and representation. In providing an interdisciplinary context the course will consider studies in psychology, anthropology, history, and philosophy/theology which have influenced and enriched feminist approaches to literature.

**GS 5053 Advanced Studies In African-American History: 3 semester hours**

Prerequisites: Graduate Standing. Course introduces some of the themes of African-American women's history. By examining the impact of region, gender, and class on African-American women's experiences across time, the course highlights black women's applied and theoretical contributions to feminist politics and activism as well as the black struggle for freedom and equality. Topics covered include: slavery and emancipation, institution and community building, the family and work, electoral politics and direct action protest, civil rights, and contemporary issues.

**GS 5320 Gender and Aging: 3 semester hours**

Same As GERON 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

**GS 5350 Topics In Women's And Gender Studies: 3 semester hours**

Prerequisites: Graduate standing and at least one Women's and Gender Studies course. This course will focus on a particular aspect of gender (to be announced prior to registration) and will draw upon recent theoretical and methodological work from a variety of disciplines.

**GS 5450 Special Topics In Gender Studies: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Special topics at the Graduate level examined from a gender perspective in the field of anthropology, art history, criminology, economics, English, foreign language, history philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester.

**GS 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours**

Same as SOC WK 5500. Prerequisites: SOC WK 3150 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

**GS 5635 Social Work Practice With Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours**

Same as SOC WK 5635. Prerequisites: SOC WK 5100 and SOC WK 5500. This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

**GS 5700 Diversity, Social Justice And Social Practice: 3 semester hours**

Same as SOC WK 5700. Prerequisites: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**GS 5940 Seminar In Gender And Literature: 3 semester hours**

Same as ENGL 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

**GS 6350 Gender, Language and Identity: 3 semester hours**

Same as TCH ED 6350. Prerequisites: Graduate Standing. An interdisciplinary look at the ways gendered and racial identities get developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**GS 6353 Graduate Internship In Gender Studies: 1-6 semester hours**

Prerequisites: Graduate standing and consent of director. Provides an opportunity for the Graduate Women's and Gender Studies student to acquire "real world" experience working in a non-profit, political, economic, or social service organization with a gender focus.

**GS 6410 Women and Mental Health: 3 semester hours**

Same as PSYCH 7410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of the instructor. This course will focus on contemporary research on the psychology of women pertaining to mental health issues. Etiology and treatment of disorders disproportionately affecting women will be emphasized.

**GS 6450 Seminar In Gender Studies: 3 semester hours****GS 6452 Special Readings In Gender Studies: 3 semester hours**

## Geography

### Courses

**GEOG 1001 Introduction To Geography: 3 semester hours**

An introduction to geography as a social science. The identification and explanation of order in the human landscape. A survey of the social, political, economic, and psychological factors which influence geographic patterns.

**GEOG 1002 World Regions: 3 semester hours**

Survey of the major regions of the world. Designed to give the student an awareness of the character of each of these major regions through the interrelationships of the various attributes of place. Each semester the geographic perspective will be applied in greater depth to one significant country such as Afghanistan, Iraq, or North Korea.

**GEOG 2001 Cultural Geography: 3 semester hours**

This course examines the effect of geography on culture and cultural groups. Essential to the geographic perspective is identifying the effect on cultures of the current trend toward increasing globalization. Topics include language, religion, attitudes, and the effect of technology.

The major goals are to increase awareness of the diversity of human cultures and to prepare students for a world of increasing intercultural communication and conflict. Satisfies cultural diversity.

**GEOG 4900 Advanced Readings in Geography: 3 semester hours**

Prerequisite: Consent of Instructor. This course will provide a more in-depth analysis of the various factors which influence geographic patterns employing methods appropriate to graduate level instruction. The topic selected will vary from semester to semester. This course may be taken for credit more than once as long as the topic discussed in each semester is different.

## Geology

### Courses

**GEOL 1001 General Geology: 4 semester hours**

Earth materials and processes, including geological aspects of the resource/energy problem. Laboratory involves identification of common rocks and minerals.

**GEOL 1001A General Geology: 4 semester hours**

Earth materials and processes, including geological aspects of the resource/energy problem. Laboratory involves identification of common rocks and minerals.

**GEOL 1002 Historical Geology: 4 semester hours**

Study of changes in Geography, climate and life through geological time; origin of and continents oceans basins, and mountains in light of continental drift. Laboratory primarily involves description and identification of fossils. Three hours of lecture and two hours of lab.

**GEOL 1002A Historical Geology Lecture: 3 semester hours**

Study of changes in geography, climate and life through geological time; origin of continents, ocean basins, and mountains in light of continental drift. Same as GEOL 1002 without the laboratory.

**GEOL 1053 Oceanography: 3 semester hours**

The atmospheric and ocean circulations; the chemistry and geology of the deep sea; and their effects on the distribution of marine organisms.

## Courses

## German

### Courses

**GERMAN 1001 Beginning Language and Culture German I: 5 semester hours**

Introduction for students with little or no knowledge of German. Students will develop listening comprehension, speaking, reading, and writing skills and become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

**GERMAN 1002 Beginning Language and Culture: German II: 5 semester hours**

Prerequisite: GERMAN 1001 or equivalent. Students will continue to develop listening comprehension, speaking, reading, and writing skills and to become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

**GERMAN 2101 Intermediate Language And Culture: German III: 3 semester hours**

Prerequisites: GERMAN 1002 or equivalent. Students will advance their understanding of German-speaking cultures through discussions, readings, and written work. Through meaningful communicative interaction, students will further develop their language skills. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence. Students who have successfully completed this course may advance to GERMAN 2170 or GERMAN 2180.

**GERMAN 2170 Intermediate Practice in Speaking and Writing German: 3 semester hours**

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will work with authentic literary texts, news articles, film, and music. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

**GERMAN 2180 Intermediate Readings In German: 3 semester hours**

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will read and discuss authentic German texts. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

**GERMAN 2190 Intermediate Independent Study: 1-3 semester hours**

Prerequisite: GERMAN 2170 and GERMAN 2180, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop intermediate German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 2199 Special Topics: Language Immersion: 1 semester hour**

Prerequisites: GERMAN 1002. Faculty-led experience designed specifically to enhance acquisition of German language and culture. This course may be repeated for credit if the topics vary. The course is conducted in German.

**GERMAN 3201 Introduction to German Literature: 3 semester hours**

Prerequisite: Two years of college German or equivalent. Readings and critical analysis of selected works of literature written in the German language. This course is conducted in German.

**GERMAN 3202 Introduction to German Film: 3 semester hours**

Prerequisite: Two years of college German or equivalent. Viewings and critical analysis of selected films produced in the German language. The course is conducted in German.

**GERMAN 3208 The German-Speaking Countries in the Modern World: 3 semester hours**

Prerequisite: Two years of college German or equivalent; GERMAN 2170 or equivalent. A critical examination of issues in the culture and politics of the German-speaking countries since 1945 through a variety of media. The course is conducted in German.

**GERMAN 3210 German Culture And Civilization: 3 semester hours**

Prerequisite: Two years of college German or equivalent. A survey of the development of German culture and civilization and the emergence of a German identity. The course is conducted in German.

**GERMAN 3211 Topics in German Culture: 3 semester hours**

Prerequisites: Two years of college German or equivalent. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

**GERMAN 3280 German Literature and Culture I: Beginnings-Enlightenment: 3 semester hours**

Prerequisites: At least one 3000-level German course or consent of the instructor and department. This survey course will familiarize students with the development of German literature and culture through the end of the Enlightenment. Critical analysis of representative texts and other media. The course is conducted in German.

**GERMAN 3281 German Literature and Culture II: Romanticism - Present: 3 semester hours**

Prerequisites: At least one 3000-level German course or consent of instructor and department. This survey course will familiarize students with the development of German literature and culture from the end of the Enlightenment through the present day. Critical analysis of representative texts and other media. The course is conducted in German.

**GERMAN 3290 Advanced Independent Study I: 1-3 semester hours**

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to transition from intermediate to advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 4311 Special Topics In German Culture: 3 semester hours**

Prerequisites: At least two 3000 level German courses or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

**GERMAN 4390 Advanced Independent Study II: 1-3 semester hours**

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, and GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 4398 Survey Of German Literature Part II: 3 semester hours**

Prerequisite: GERMAN 3201 or GERMAN 3202. Special emphasis on the summary and synthesis of trends and characteristics of major periods in German literature considered in the general context of European culture.

**GERMAN 5311 Advanced Topics In German Culture: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

## Courses

**GERMAN 1001 Beginning Language and Culture German I: 5 semester hours**

Introduction for students with little or no knowledge of German. Students will develop listening comprehension, speaking, reading, and writing skills and become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

**GERMAN 1002 Beginning Language and Culture: German II: 5 semester hours**

Prerequisite: GERMAN 1001 or equivalent. Students will continue to develop listening comprehension, speaking, reading, and writing skills and to become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

**GERMAN 2101 Intermediate Language And Culture: German III: 3 semester hours**

Prerequisites: GERMAN 1002 or equivalent. Students will advance their understanding of German-speaking cultures through discussions, readings, and written work. Through meaningful communicative interaction, students will further develop their language skills. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence. Students who have successfully completed this course may advance to GERMAN 2170 or GERMAN 2180.

**GERMAN 2170 Intermediate Practice in Speaking and Writing German: 3 semester hours**

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will work with authentic literary texts, news articles, film, and music. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

**GERMAN 2180 Intermediate Readings In German: 3 semester hours**

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will read and discuss authentic German texts. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

**GERMAN 2190 Intermediate Independent Study: 1-3 semester hours**

Prerequisite: GERMAN 2170 and GERMAN 2180, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop intermediate German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 2199 Special Topics: Language Immersion: 1 semester hour**

Prerequisites: GERMAN 1002. Faculty-led experience designed specifically to enhance acquisition of German language and culture. This course may be repeated for credit if the topics vary. The course is conducted in German.

**GERMAN 3201 Introduction to German Literature: 3 semester hours**

Prerequisite: Two years of college German or equivalent. Readings and critical analysis of selected works of literature written in the German language. This course is conducted in German.

**GERMAN 3202 Introduction to German Film: 3 semester hours**

Prerequisite: Two years of college German or equivalent. Viewings and critical analysis of selected films produced in the German language. The course is conducted in German.

**GERMAN 3208 The German-Speaking Countries in the Modern World: 3 semester hours**

Prerequisite: Two years of college German or equivalent; GERMAN 2170 or equivalent. A critical examination of issues in the culture and politics of the German-speaking countries since 1945 through a variety of media. The course is conducted in German.

**GERMAN 3210 German Culture And Civilization: 3 semester hours**

Prerequisite: Two years of college German or equivalent. A survey of the development of German culture and civilization and the emergence of a German identity. The course is conducted in German.

**GERMAN 3211 Topics in German Culture: 3 semester hours**

Prerequisites: Two years of college German or equivalent. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

**GERMAN 3280 German Literature and Culture I: Beginnings-Enlightenment: 3 semester hours**

Prerequisites: At least one 3000-level German course or consent of the instructor and department. This survey course will familiarize students with the development of German literature and culture through the end of the Enlightenment. Critical analysis of representative texts and other media. The course is conducted in German.

**GERMAN 3281 German Literature and Culture II: Romanticism - Present: 3 semester hours**

Prerequisites: At least one 3000-level German course or consent of instructor and department. This survey course will familiarize students with the development of German literature and culture from the end of the Enlightenment through the present day. Critical analysis of representative texts and other media. The course is conducted in German.

**GERMAN 3290 Advanced Independent Study I: 1-3 semester hours**

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to transition from intermediate to advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 4311 Special Topics In German Culture: 3 semester hours**

Prerequisites: At least two 3000 level German courses or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

**GERMAN 4390 Advanced Independent Study II: 1-3 semester hours**

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, and GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

**GERMAN 4398 Survey Of German Literature Part II: 3 semester hours**

Prerequisite: GERMAN 3201 or GERMAN 3202. Special emphasis on the summary and synthesis of trends and characteristics of major periods in German literature considered in the general context of European culture.

**GERMAN 5311 Advanced Topics In German Culture: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

# Gerontology

## Courses

### **GERON 1220 Special Topics In Gerontology: 3 semester hours**

Same as INTDSC 1220. Selected topics dealing with various aspects of gerontology. The specific contents of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology director.

### **GERON 2256 Bioethics: 3 semester hours**

Same as PHIL 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

### **GERON 2272 Developmental Psychology: Adulthood And Aging: 3 semester hours**

Same as PSYCH 2272. Prerequisites: PSYCH 1003. Personality social and physiological development from the onset of early adulthood through maturity and old age.

### **GERON 2280 Psychology Of Death And Dying: 3 semester hours**

Same as PSYCH 2280. Prerequisite: PSYCH 1003. A beginning exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

### **GERON 3215 Aging Across Cultures: 3 semester hours**

Same as ANTHRO 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wideranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

### **GERON 4361 Social Gerontology: 3 semester hours**

Same as SOC 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include: sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

### **GERON 4376 Mental Health And Aging: 3 semester hours**

Same as PSYCH 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

### **GERON 4490 Directed Readings: 1-3 semester hours**

Prerequisites: Consent of instructor. Directed reading and research or field work. May be repeated for a maximum of three hours.

### **GERON 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as SOC WK 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

### **GERON 4700 Successful Aging: Individual & Societal Perspectives: 3 semester hours**

This course addresses key components of successful aging including avoidance of disease, maintenance of good mental and physical function, and sustained engagement in life. Students become familiar with the different intra- and extra-personal determinants of successful aging and learn to distinguish between the concepts of successful and productive aging. Also discussed is the impact of societal, economic and political context on success in aging (e.g. health care delivery, entitlement programs, technology, globalization, volunteerism, and culture).

### **GERON 5200 Gerontological Practice with Aging Veterans: 3 semester hours**

Prerequisites: Graduate standing or permission of the instructor. Aging veterans often demonstrate different social, health and psychological support needs. This practice-oriented course reviews and frames gerontological interventions for different veteran subpopulations, including those residing at home, in senior housing, and under Veterans Administration (VA) care. The impacts of age cohort, gender, service during war or peacetime, post-traumatic stress status, substance abuse and addiction, military culture, and pension and service-connected compensation are studied. Special opportunities and challenges for social service providers in the VA health system are also reviewed.

### **GERON 5320 Gender & Aging: 3 semester hours**

Same as GS 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

### **GERON 5361 Advanced Social Gerontology: 3 semester hours**

Prerequisites: Graduate Standing. An examination of sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

### **GERON 5376 Psychopathology And Aging: 3 semester hours**

Prerequisites: Graduate Standing. Recent theory and research in mental health issues for older populations. The primary focus is on major psychological disorders prevalent among older adults and in assessment and treatment approaches for aging populations.

**GERON 5420 Research Methods and Analysis I: 3 semester hours**

Prerequisites: Admission to the MSG Program or graduate standing.

The first of a two-course sequence designed to provide students with the knowledge base and skills for using the scientific method to advance gerontological knowledge, theory and evidence-based practice. Focuses on research methods employed in aging-related studies, with a special emphasis on the critical evaluation of academic studies and the evidentiary basis of key findings. Covers quantitative and qualitative approaches, research design, sampling procedures, measurement, use of results, impact of research, and ethical considerations.

**GERON 5440 Cultural Aspects Of Aging: 3 semester hours**

Same as ANTHRO 5440. Prerequisites: Graduate status or consent of the instructor. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

**GERON 5450 Research Methods and Analysis II: 3 semester hours**

Prerequisites: GERON 5420 or equivalent. An advanced course focused on the framing and analysis of qualitative and quantitative data to advance gerontological knowledge, theory, and evidence-based practice. Students learn to use and interpret various statistical procedures for analyzing qualitative and quantitative data (including bivariate and multivariate analyses). Students apply various analytic techniques using computer software applications.

**GERON 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as SOC WK 5610 and PSYCH 5610. Prerequisites: Graduate standing and BIOL 1102 or equivalent. (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**GERON 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as SOC WK 5611 and PSYCH 5611. Prerequisites: GERON 5610 or SOC WK 5610 or PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**GERON 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as SOC WK 5612 and PSYCH 5612. Prerequisites: GERON 5610 and GERON 5611 or SOC WK 5610 and SOC WK 5611 or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**GERON 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as SOC WK 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice, and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**GERON 6120 Theory and Practice with Older Adults: 3 semester hours**

Same as SOC WK 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**GERON 6130 Interviewing Older Adults And Life Review: 3 semester hours**

Same as SOC WK 6130. Prerequisite: Graduate Standing. This course combines training in interviewing techniques with video editing/production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**GERON 6441 Aging And Health Behavior: 3 semester hours**

Same as PSYCH 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

**GERON 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, POL SCI 6443, and SOC WK 6443.

Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**GERON 6444 Seminar In Public Policy And Aging: 3 semester hours**

Same as P P ADM 6444, and POL SCI 6444. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**GERON 6449 Issues In Retirement: 3 semester hours**

Prerequisites: Graduate standing. This course examines macro and micro issues of retirement in the United States--its processes, causes, and consequences--in relation to economic market conditions, demographic changes, and programs and policies that are targeted to support the elderly (e.g., Social Security). It also examines issues relating to older women and retirement.

**GERON 6450 Gerontological Assessment: 3 semester hours**

Same as SOC WK 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. Major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**GERON 6460 Long Term Care Administration: 3 semester hours**

Prerequisite: Graduate Standing. This course provides an overview of long term care programs and services for older adults. Administrative issues are reviewed, including patient services, state licensure requirements, human resource management, and reimbursement practices. Characteristics of well-functioning facilities are addressed, as well as consultation with families during the placement decision process.

**GERON 6470 Epidemiology of Aging: 3 semester hours**

Prerequisites: Graduate Standing. This course reviews the distribution and determinants of health-related conditions and functional concerns in older populations. An emphasis is placed on key concepts and methodological considerations for conducting epidemiological studies. Students learn about the epidemiology of selected diseases, syndromes and conditions common to older age, including various trajectories of physical and cognitive decline. Also discussed are the roles that epidemiological data play in the development of interventions to control and prevent age-related disease and inform public health decision-making and evidence-based geriatric practice.

**GERON 6490 Directed Study: 1-3 semester hours**

Prerequisite: Consent of Instructor. Designed to give the student an opportunity to pursue a more in-depth study of a problem area in gerontology than is normally covered in more formal courses. May be repeated for a total of six credit hours.

**GERON 6495 Practicum In Gerontology: 3 semester hours**

This course provides supervised work experience in an agency that serves older adults. Students are required to complete a minimum of 150 clock hours at the practicum site.

**GERON 6496 Advanced Practicum In Gerontology: 3 semester hours**

Prerequisites: GERON 6495 and consent of instructor. This course provides advanced practicum experience beyond GERON 6495. Students must complete a minimum of 150 clock hours of supervised field work (service or research) with older adults.

**GERON 6497 Interdisciplinary Geriatric Care: 3 semester hours**

Prerequisites: Consent of instructor. Same as VIS SCI 6497. Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

**GERON 6498 Advanced Seminar In Gerontology: 3 semester hours**

Prerequisite: Graduate standing. This course will provide in-depth analysis of specialized topics in gerontology which are not covered in required courses. (Course may be repeated for a maximum of nine credits, assuming topics are different.).

**GERON 6499 Topics In Gerontology: 1-3 semester hours**

Prerequisite: Graduate standing. Analysis of a current problem in gerontology. (Course may be repeated for maximum of five credits, assuming topics are different.).

**GERON 6500 Practicum in Gerontological Research: 3 semester hours**

Prerequisites: GERON 6495 and consent of the instructor. A supervised social science research experience involving a combination of two or more of the following activities: literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

**GERON 6510 Directed Research in Aging: 1-3 semester hours**

Prerequisites: Consent of the instructor. Designed to give the student an opportunity to explore a question of interest from a qualitative and/or quantitative research perspective. This supervised experience may include one or more of the following activities (depending on enrolled hours): literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

## Courses

**GERON 1220 Special Topics In Gerontology: 3 semester hours**

Same as INTDSC 1220. Selected topics dealing with various aspects of gerontology. The specific contents of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology director.

**GERON 2256 Bioethics: 3 semester hours**

Same as PHIL 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

**GERON 2272 Developmental Psychology: Adulthood And Aging: 3 semester hours**

Same as PSYCH 2272. Prerequisites: PSYCH 1003. Personality social and physiological development from the onset of early adulthood through maturity and old age.

**GERON 2280 Psychology Of Death And Dying: 3 semester hours**

Same as PSYCH 2280. Prerequisite: PSYCH 1003. A beginning exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

**GERON 3215 Aging Across Cultures: 3 semester hours**

Same as ANTHRO 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wideranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

**GERON 4361 Social Gerontology: 3 semester hours**

Same as SOC 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include: sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

**GERON 4376 Mental Health And Aging: 3 semester hours**

Same as PSYCH 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**GERON 4490 Directed Readings: 1-3 semester hours**

Prerequisites: Consent of instructor. Directed reading and research or field work. May be repeated for a maximum of three hours.

**GERON 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as SOC WK 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

**GERON 4700 Successful Aging: Individual & Societal Perspectives: 3 semester hours**

This course addresses key components of successful aging including avoidance of disease, maintenance of good mental and physical function, and sustained engagement in life. Students become familiar with the different intra- and extra-personal determinants of successful aging and learn to distinguish between the concepts of successful and productive aging. Also discussed is the impact of societal, economic and political context on success in aging (e.g. health care delivery, entitlement programs, technology, globalization, volunteerism, and culture).

**GERON 5200 Gerontological Practice with Aging Veterans: 3 semester hours**

Prerequisites: Graduate standing or permission of the instructor. Aging veterans often demonstrate different social, health and psychological support needs. This practice-oriented course reviews and frames gerontological interventions for different veteran subpopulations, including those residing at home, in senior housing, and under Veterans Administration (VA) care. The impacts of age cohort, gender, service during war or peacetime, post-traumatic stress status, substance abuse and addiction, military culture, and pension and service-connected compensation are studied. Special opportunities and challenges for social service providers in the VA health system are also reviewed.

**GERON 5320 Gender & Aging: 3 semester hours**

Same as GS 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

**GERON 5361 Advanced Social Gerontology: 3 semester hours**

Prerequisites: Graduate Standing. An examination of sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

**GERON 5376 Psychopathology And Aging: 3 semester hours**

Prerequisites: Graduate Standing. Recent theory and research in mental health issues for older populations. The primary focus is on major psychological disorders prevalent among older adults and in assessment and treatment approaches for aging populations.

**GERON 5420 Research Methods and Analysis I: 3 semester hours**

Prerequisites: Admission to the MSG Program or graduate standing. The first of a two-course sequence designed to provide students with the knowledge base and skills for using the scientific method to advance gerontological knowledge, theory and evidence-based practice. Focuses on research methods employed in aging-related studies, with a special emphasis on the critical evaluation of academic studies and the evidentiary basis of key findings. Covers quantitative and qualitative approaches, research design, sampling procedures, measurement, use of results, impact of research, and ethical considerations.

**GERON 5440 Cultural Aspects Of Aging: 3 semester hours**

Same as ANTHRO 5440. Prerequisites: Graduate status or consent of the instructor. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

**GERON 5450 Research Methods and Analysis II: 3 semester hours**

Prerequisites: GERON 5420 or equivalent. An advanced course focused on the framing and analysis of qualitative and quantitative data to advance gerontological knowledge, theory, and evidence-based practice. Students learn to use and interpret various statistical procedures for analyzing qualitative and quantitative data (including bivariate and multivariate analyses). Students apply various analytic techniques using computer software applications.

**GERON 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as SOC WK 5610 and PSYCH 5610. Prerequisites: Graduate standing and BIOL 1102 or equivalent. (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**GERON 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as SOC WK 5611 and PSYCH 5611. Prerequisites: GERON 5610 or SOC WK 5610 or PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**GERON 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as SOC WK 5612 and PSYCH 5612. Prerequisites: GERON 5610 and GERON 5611 or SOC WK 5610 and SOC WK 5611 or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**GERON 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as SOC WK 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice, and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**GERON 6120 Theory and Practice with Older Adults: 3 semester hours**

Same as SOC WK 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**GERON 6130 Interviewing Older Adults And Life Review: 3 semester hours**

Same as SOC WK 6130. Prerequisite: Graduate Standing. This course combines training in interviewing techniques with video editing/production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**GERON 6441 Aging And Health Behavior: 3 semester hours**

Same as PSYCH 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

**GERON 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, POL SCI 6443, and SOC WK 6443. Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**GERON 6444 Seminar In Public Policy And Aging: 3 semester hours**

Same as P P ADM 6444, and POL SCI 6444. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**GERON 6449 Issues In Retirement: 3 semester hours**

Prerequisites: Graduate standing. This course examines macro and micro issues of retirement in the United States--its processes, causes, and consequences--in relation to economic market conditions, demographic changes, and programs and policies that are targeted to support the elderly (e.g., Social Security). It also examines issues relating to older women and retirement.

**GERON 6450 Gerontological Assessment: 3 semester hours**

Same as SOC WK 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. Major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**GERON 6460 Long Term Care Administration: 3 semester hours**

Prerequisite: Graduate Standing This course provides an overview of long term care programs and services for older adults. Administrative issues are reviewed, including patient services, state licensure requirements, human resource management, and reimbursement practices. Characteristics of well-functioning facilities are addressed, as well as consultation with families during the placement decision process.

**GERON 6470 Epidemiology of Aging: 3 semester hours**

Prerequisites: Graduate Standing. This course reviews the distribution and determinants of health-related conditions and functional concerns in older populations. An emphasis is placed on key concepts and methodological considerations for conducting epidemiological studies. Students learn about the epidemiology of selected diseases, syndromes and conditions common to older age, including various trajectories of physical and cognitive decline. Also discussed are the roles that epidemiological data play in the development of interventions to control and prevent age-related disease and inform public health decision-making and evidence-based geriatric practice.

**GERON 6490 Directed Study: 1-3 semester hours**

Prerequisite: Consent of Instructor. Designed to give the student an opportunity to pursue a more in-depth study of a problem area in gerontology than is normally covered in more formal courses. May be repeated for a total of six credit hours.

**GERON 6495 Practicum In Gerontology: 3 semester hours**

This course provides supervised work experience in an agency that serves older adults. Students are required to complete a minimum of 150 clock hours at the practicum site.

**GERON 6496 Advanced Practicum In Gerontology: 3 semester hours**

Prerequisites: GERON 6495 and consent of instructor This course provides advanced practicum experience beyond GERON 6495. Students must complete a minimum of 150 clock hours of supervised field work (service or research) with older adults.

**GERON 6497 Interdisciplinary Geriatric Care: 3 semester hours**

Prerequisites: Consent of instructor. Same as VIS SCI 6497.

Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

**GERON 6498 Advanced Seminar In Gerontology: 3 semester hours**

Prerequisite: Graduate standing. This course will provide in-depth analysis of specialized topics in gerontology which are not covered in required courses. (Course may be repeated for a maximum of nine credits, assuming topics are different.).

**GERON 6499 Topics In Gerontology: 1-3 semester hours**

Prerequisite: Graduate standing. Analysis of a current problem in gerontology. (Course may be repeated for maximum of five credits, assuming topics are different.).

**GERON 6500 Practicum in Gerontological Research: 3 semester hours**

Prerequisites: GERON 6495 and consent of the instructor. A supervised social science research experience involving a combination of two or more of the following activities: literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

**GERON 6510 Directed Research in Aging: 1-3 semester hours**

Prerequisites: Consent of the instructor. Designed to give the student an opportunity to explore a question of interest from a qualitative and/or quantitative research perspective. This supervised experience may include one or more of the following activities (depending on enrolled hours): literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

## Greek Ancient

### Courses

**GRK ANC 1001 Ancient Greek I: 5 semester hours**

Study of grammar, syntax and vocabulary accompanied by readings of simple prose selections.

**GRK ANC 1002 Ancient Greek II: 5 semester hours**

Prerequisite: GRK ANC 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from GRK ANC 1001, including readings and discussion from selected classic authors.

**GRK ANC 2101 Intermediate Ancient Greek Language And Culture: 3 semester hours**

Prerequisite: GRK ANC 1002 or equivalent. Students will advance their understanding of ancient Greek culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

**GRK ANC 2152 A Brief Introduction to Greek and Latin in English**

**Today: 1 semester hour**

Same as LATIN 2152. This outline course is designed to enrich the student's general liberal arts vocabulary as well as to improve mastery of terms used in law, medicine, and science. The emphasis is on vocabulary derived from Greek and Latin. Included will be the Greek alphabet and an introduction to historical language change involving the relationship among Greek, Latin, and Romance languages, and Germanic languages (particularly English). This course is not to be taken in addition to GRK ANC 2151.

## Courses

**GRK ANC 1001 Ancient Greek I: 5 semester hours**

## Greek Modern

### Courses

**GRK MOD 1001 Modern Greek I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Modern Greek and upon the acquisition of the fundamentals of grammar and syntax.

**GRK MOD 1002 Modern Greek II: 5 semester hours**

Prerequisite: GRK MOD 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from GRK MOD 1001. Readings and discussions from selected classical authors.

**GRK MOD 2101 Intermediate Modern Greek Language And Culture: 3 semester hours**

Prerequisites: GRK MOD 1002 or equivalent. Students will advance their understanding of modern Greek culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

**GRK MOD 2102 Intermediate Modern Greek Language And Culture II: 3 semester hours**

Prerequisite: GRK MOD 2101 or equivalent. Emphasis is placed on the study of Greek and Greek-American culture and the continued development of language skills through meaningful communicative interaction.

**GRK MOD 2150 Modern Greek Literature In Translation: 3 semester hours**

This course is an exploration of significant works by major Modern Greek authors, dealing with relevant issues of Western literary traditions. Authors include: Cavafy, Kazantzakis, Seferis, Solomos, Elytis.

**GRK MOD 2190 Special Readings: 1-3 semester hours**

Prerequisites: GRK MOD 2101 or consent of the department. Independent study through readings, reports, and conferences.

## Courses

### **GRK MOD 1001 Modern Greek I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Modern Greek and upon the acquisition of the fundamentals of grammar and syntax.

### **GRK MOD 1002 Modern Greek II: 5 semester hours**

Prerequisite: GRK MOD 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from GRK MOD 1001. Readings and discussions from selected classical authors.

## Health and Physical Education

### Courses

#### **HLTH PE 3275 Psychological Aspects Of Physical Education: 3 semester hours**

Prerequisite: PSYCH 1003. A study of the psychological processes underlying the learning and performance of motor skills and participation in physical activity. Covers how humans learn skilled actions, how principles of motor performance and learning can be applied to teaching, and how teachers can create positive motivational climates.

#### **HLTH PE 3277 Foundations of Health & Physical Education Programs: 2 semester hours**

Prerequisites: Junior standing. A study of the historical, philosophical, and cultural influences and issues related to health education and physical education programs.

#### **HLTH PE 3285 Safety and Emergency Care for Health & Physical Education: 3 semester hours**

Prerequisites: HLTH PE 3280 or equivalent. A study of safety issues relating to health and physical education, including prevention and treatment of physical activity-related injuries. Emphasis will be given to emergency responses, including CPR certification.

#### **HLTH PE 3380 Introduction to Nutrition for Health and Performance: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Study of human nutrition and its relationship to healthy lifestyles and exercise performance. Includes study of nutrients, food sources, healthy weight and body composition, energy intake and expenditure, fluid and electrolyte balance, and ergogenic aids.

#### **HLTH PE 3432 Teaching Health and Physical Education in the Elementary School: 4 semester hours**

Prerequisites: Admission to the Teacher Education Program. A study of health and physical education programs in the elementary school. Emphasis is given to the teacher's roles and responsibilities as they relate to the content and services found in the coordinated school health program.

#### **HLTH PE 3433 Health Education Concepts and Skills: 3 semester hours**

Prerequisites: Junior Standing. A study of health concepts and lifestyle skills found in K-12 health education strands, including mental health, sexuality education, drug education, nutrition, personal health and disease prevention.

#### **HLTH PE 3434 Teaching of Health and Wellness: 4 semester hours**

Prerequisites: HLTH PE 3280 or the equivalent, or consent of the instructor. Study of concepts and issues related to health and active lifestyle behavior development, with emphasis given to the design and preparation of appropriate instructional experiences and techniques.

#### **HLTH PE 4989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. This course is an intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Not available for graduate credit.

#### **HLTH PE 4990 Practicum II: Health and Physical Education, Grades PK-5: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Not available for graduate credit.

#### **HLTH PE 4991 Practicum II: Health and Physical Education Grades 5-9: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Not available for graduate credit.

#### **HLTH PE 4992 Practicum II: Health and Physical Education Grades 9-12: 6 semester hours**

Prerequisites: HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Not available for graduate credit.

**HLTH PE 5989 Physical Education Professional Internship: 2 semester hours**

Prerequisites: Level II designated course requirements. An intensive professional development experience (equivalent of 6 hours per week for 14 weeks) working in a school setting with students. Activities on site include assisting the health and physical education teacher in all areas of instruction, assessment, and classroom management. This course is to be taken prior to student teaching, ideally during the semester immediately preceding student teaching. Assignments from allied courses (PHY ED 3422, PHY ED 3423, PHY ED 3424, HLTH PE 3434) are carried out in the Internship, and Internship experiences inform the activities and discussions in these courses. Activities to acquire research skills will be included.

**HLTH PE 5990 Practicum II: Health and Physical Education, Grades PK-6: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in physical education settings in the schools under university and school supervision. Required for all majors in physical education receiving certification in Health and Physical education. Teacher candidates collect data for a research project.

**HLTH PE 5991 Practicum II: Health and Physical Education Grades 5-9: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experiences in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-9. Teacher candidates collect data for a research project.

**HLTH PE 5992 Practicum II: Health and Physical Education Grades 9-12: 4 semester hours**

Prerequisites: A grade of B- or higher in HLTH PE 4989. Clinical teaching experience in Health and Physical Education settings in schools under university and school supervision. Required of all majors in Physical Education receiving certification in Health Education and Physical Education, K-12. Teacher candidates collect data for a research project.

## Higher Education

### Courses

**HIGHERED 5401 Current Issues In Higher Education: 3 semester hours**

Prerequisites: Graduate admission. Familiarizes student with nature and characteristics of American higher education. Students learn about the structure of higher education, the roles played by the various constituencies, and current issues.

**HIGHERED 5402 Student Affairs Administration: 3 semester hours**

Prerequisite: Graduate Admission. A survey course in student personnel administration with an emphasis on understanding the college student and on learning ways to meet both his/her academic and nonacademic needs.

**HIGHERED 6404 Seminar: 1-10 semester hours**

Prerequisite: Graduate standing.

**HIGHERED 6405 Financial Issues In Higher Education: 3 semester hours**

Prerequisite: Graduate standing. Provides an overview of the state/federal funding mechanisms for higher education in the U.S. Addresses practices in budgeting at various types of postsecondary institutions.

**HIGHERED 6406 Governance Of Higher Education: 3 semester hours**

Prerequisites: Graduate admission. Concentrates on the study of the unique system of governance in higher education, including faculty, instructional, system, and state governing mechanisms.

**HIGHERED 6408 Legal Issues in Student Affairs: 3 semester hours**

Prerequisite: Graduate Standing. Provides an exploration of the legal and philosophical principles that guide decision-making in higher education institutions and the courts. It also includes a detailed, in-depth analysis of legal cases that have an impact on students in private and public two- and four-year colleges and universities in the United States.

**HIGHERED 6409 Critical Issues in Student Affairs: 3 semester hours**

Prerequisites: Graduate Standing. Explores the historical development and foundational theories of the student affairs profession. This course also explores the organization and management of programs and services, the formulation of policies that guide student personnel service programs, and the integration of program elements, research, current problems and trends.

**HIGHERED 6410 Ethics in Higher Education Administration: 3 semester hours**

Prerequisites: Graduate standing. Students will examine the historical philosophical foundations of ethics and their implications for faculty, staff and students in the academic workplace.

**HIGHERED 6422 Policy Analysis Of Higher Education: 3 semester hours**

Prerequisites: Graduate admission. Introduces students to the analysis of higher education public policy. Includes state and local policy analysis and examination of legislative history of major federal higher education laws.

**HIGHERED 6430 The Community College: 3 semester hours**

Prerequisites: Graduate Admission. The purpose of this course is to develop an understanding of the two-year college - its past, present and future. Examines history, operations, funding, internal constituents, curricular mission, societal role, and current issues.

**HIGHERED 6431 Community College Leadership: 3 semester hours**

Prerequisite: Graduate Admission. Introduces students to leadership theory and practice and the literature of leadership development. Applies theory and practice to the unique role of the leader in community colleges, including the community college presidency. Particular emphasis is given to the diverse roles expected of the successful leader in today's community college.

**HIGHERED 6432 Current Issues In Community College Education: 3 semester hours**

A review and analysis of current issues affecting community college students, instruction, administration, policy and community relations. HIGHERED 6430, The Community College, is recommended before taking this course for those not currently working in community college settings.

**HIGHERED 6440 Issues In Institutional Research I: 3 semester hours**

Prerequisites: Graduate standing. Provides a history and overview of institutional research in postsecondary education. Other areas of interest include student issues, student outcomes, higher education funding, productivity funding, and legal issues.

**HIGHERED 6441 Issues In Institutional Research II: 3 semester hours**

This course provides the study of key issues in institutional research, including faculty workload and salary, program assessment, fact books, peer institutions, national databases, and strategic planning.

**HIGHERED 6473 Curriculum In Higher Education: 3 semester hours**

Prerequisite: Graduate standing. The development, implementation, and assessment of curriculum in higher education as well as historical and philosophical perspectives; major figures and emerging trends are included.

**HIGHERED 6474 The College Student: 3 semester hours**

Prerequisite: Graduate standing. A comprehensive overview of the theories and research related to college and university student development. Particular attention is given to student demographics, patterns of growth and development, and attitudinal changes.

**HIGHERED 6476 Organization And Administration Of Higher Education: 3 semester hours**

Prerequisites: Graduate Standing. This course includes the study of missions, governance, and organizational structures of American higher education institutions. Within this context, particular attention is given to administrative roles and responsibilities and issues of leadership.

**HIGHERED 6477 History And Philosophy Of American Higher Education: 3 semester hours**

Prerequisite: Graduate Standing. This course is a systematic study of the historical and philosophical contexts that have conditioned the evolution of American higher education. Particular attention is given to significant events, trends, and movements within American higher education.

**HIGHERED 6497 Problems: 1-10 semester hours**

Prerequisites: Graduate standing and consent of instructor.

**HIGHERED 6900 Internship: 1-10 semester hours**

Prerequisites: Graduate standing and consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will included planning, research, evaluation, and related professional activities.

**HIGHERED 7800 Higher Education Doctoral Seminar: 1-6 semester hours**

Prerequisites: Doctoral standing or consent of instructor. Intensive directed study of selected issues related to the administration of higher education institutions.

## History

### Courses

**HIST 1000 Selected Topics in History: 1-3 semester hours**

Prerequisite: Consent of instructor. Special topics in history. May be repeated for credit with consent of instructor.

**HIST 1001 American Civilization To 1865: 3 semester hours**

Evolution of the cultural tradition of the Americas from the earliest times to the mid-nineteenth century, with emphasis on the relationship of ideas and institutions to the historical background. Course fulfills the state requirement.

**HIST 1002 American Civilization 1865 To Present: 3 semester hours**

Continuation of HIST 1001 to the present. Course fulfills the state requirement. Either HIST 1001 or HIST 1002 taken separately.

**HIST 1003 African-American History: 3 semester hours**

A survey of African-American history from the beginning of the European slave trade to the modern Civil Rights era. This course meets the state requirement.

**HIST 1004 The History Of Women In The United States: 3 semester hours**

Same as GS 1004. A survey of women's history from the colonial era to the present.

**HIST 1030 The Ancient Empires of the Mediterranean: 3 semester hours**

Survey of ancient history in the near east, the Aegean, the central and western Mediterranean. Themes: politics and economy, war and society, culture, including art, literature, technology, religion and philosophy. The chronological span is from the neolithic period (7500-3000 B.C.) in the near east to the fall of the Roman Empire in the fifth century A.D.

**HIST 1031 Topics European Civilization: Emergence Of Western Europe To 1715: 3 semester hours**

Lectures and discussions on the development of western European society and tradition from approximately 1000 to 1715.

**HIST 1032 Topics In European Civilization: 1715 To The Present: 3 semester hours**

Lectures and discussions on the development of western European society and tradition from 1715 to the present.

**HIST 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours**

SAME AS ANTHRO 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

**HIST 1038 Byzantine History and Culture: 3 semester hours**

Same as ANTHRO 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

**HIST 1041 East Asian Civilization: 3 semester hours**

The development of Asian civilization from earliest times to the Manchu conquest.

**HIST 1042 East Asian Civilization: 3 semester hours**

Continuation of HIST 1041 with emphasis on the Asian response to the Western incursion. Either HIST 1041 or HIST 1042 may be taken separately.

**HIST 1051 Latin American Civilization: 3 semester hours**

A survey of selected topics important in the development of Latin America from pre-Columbian times to the twentieth century.

**HIST 1052 Mexican Civilization: 3 semester hours**

This course will focus on the history and culture of Mexico from the Aztecs to the mid-twentieth century. Among the topics to be covered are: the Aztecs, Cortez and the Conquest of Mexico, colonial institutions and culture, the obtaining of political independence, disorder and dictatorship in the nineteenth century, the Mexican Revolution, contemporary Mexico. This course meets the non-Euro-American requirement.

**HIST 1061 African Civilization: From The Beginning of Humanity to The End of The Slave Trade: 3 semester hours**

Introduction to cultural history from the emergence of early humankind to the abolition of the Atlantic slave trade. This course fulfills the Cultural Diversity requirement.

**HIST 1062 African Civilization II: From Colonies to Nations: 3 semester hours**

Survey of African initiative and response in the period spanning the loss and reassertion of independence. Either HIST 1061 or HIST 1062 may be taken separately.

**HIST 1075 World History to 1500: 3 semester hours**

A survey of the history of humankind to 1500 including the beginnings of civilization Mesopotamia, Africa, Asia and the Americas, the rise of Classical civilizations and the development of major transnational social, economic, political and religious networks.

**HIST 1076 World History Since 1500: 3 semester hours**

A survey of the history of humankind since 1500, emphasizing the growing interdependency of regional economic, political, and social systems. Topics will include imperialism, industrialization, and globalization.

**HIST 1111 Reacting to the Past: 4 semester hours**

Reacting to the Past is a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. The course offers students a rigorous academic experience in which they conduct historical research, speak, and write extensively. Because this course requires extensive writing, it fulfills the requirement for Freshman Composition.

**HIST 1776 History of American Leadership: 3 semester hours**

An introduction to the study of leaders in America that will cover different categories of political, cultural, social, and intellectual leadership and achievement. Crucial to the understanding of these categories is the question: how did leaders find their gift in becoming who they were and what leadership traits can be identified in the different categories under scrutiny.

**HIST 2000 Selected Topics in History: 1-4 semester hours**

Prerequisite: Consent of instructor. Special topics in history. The course may be repeated for credit with consent of the instructor.

**HIST 2001 Creating Early America: European Empires, Colonial Cultures, and Native Nations, 1565-1776: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. This content-rich course explores the transatlantic migrations and Indian interactions that laid the foundations of the American nation before 1776.

**HIST 2003 United States History: From Nation to Civil War: 3 semester hours**

Prerequisite: Soph standing or consent of the instructor. The "Era of Good Feelings"; the Age of Jackson; manifest destiny; the political and social developments of the antebellum period relating to the growth of sectionalism and the developing antislavery crusade.

**HIST 2004 United States History: The Civil War Era, 1860-1900: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. The Civil War, Reconstruction, industrial and urban expansion and their impact on American life.

**HIST 2005 The Modernization Of The United States: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor Studies in the economic, political and social development and crises of the maturing industrial United States between 1877 and 1940, and the growing importance of foreign relations.

**HIST 2006 Recent United States History: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. The economic, political and social developments and crises of post-industrial United States. The role of foreign affairs in American life.

**HIST 2007 History Of Missouri: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Lecture and readings. Seventeenth-century Spanish and French explorations and interaction with the Indians; settlement and organization of the Louisiana territory; lead mining and the fur trade; the Louisiana Purchase; the Missouri territory; the struggle for statehood and slavery; antebellum politics; banking and internal improvements; westward expansion; Civil War and reconstruction; postwar agrarian politics, industrialization; Irish, German, and southern European immigration; the Progressive reforms-- Political and economic changes; and twentieth-century social changes and political developments. Course satisfies the state requirement.

**HIST 2008 History Of St. Louis: 3 semester hours**

Prerequisites: Sophomore standing or the consent of the instructor. This course will provide an overview of the history of the St. Louis metropolitan region from its founding in 1764 to the present. Main topics will include: the St. Louis region before the Europeans, forces leading to the founding of the city, St. Louis as an "urban frontier", the Age of Steam on water and rail, the questions of slavery and the Civil War, St. Louis in the Gilded Age, the World's Fair, early efforts at city planning, impact of the automobile, St. Louis during the Depression and World War II, post-war suburbanization, urban renewal St. Louis style, school desegregation, the Schoemehl years, the emergence of St. Louis "Edge Cities", and St. Louis 2004.

**HIST 2009 St. Louis And The West: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. An examination of the role St. Louis played in the evolution of the North American West, both in the United States and Canada, from the fur trade of the late eighteenth century to the opening of the Texas oil fields in the early twentieth century. Special emphasis will be given to competition between river and rail transportation corridors, and hence to the rivalry that developed between St. Louis and Chicago.

**HIST 2010 From Sea to Shining Sea: The American Frontier 1763 - 1890: 3 semester hours**

This is a history of the colonization of the Great West, from the end of the French and Indian War to the official closing of the frontier in 1890. The westward movement will be examined as a major factor in explaining American development.

**HIST 2011 American West: The Truth Behind the Hollywood Myths: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor An exploration of the history of the American West from the 1750s to present, with emphasis on the role of transportation. Urban gateways such as St. Louis and San Francisco and transportation corridors such as the Missouri River and the Santa Fe and Oregon trails will be of particular importance.

**HIST 2012 The Indian In American History: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Investigates Native American encounters with non-Indian peoples between 1600 and 1900, analyzing how traditional Indian cultures changed to meet a variety of new challenges introduced to North America by Europeans and Africans. The approach will be interdisciplinary and ethnohistorical with emphasis placed on case studies of important native nations at key turning points in their history.

**HIST 2013 The Rise and Fall of American Cities: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. The physical and spatial growth of U.S. cities from colonial times to the present with special attention to the impact of industrialization, public policy, and advances in transportation technology.

**HIST 2015 Topics In African-American History: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Will explore a salient topic in African-American history. Such historical documents as personal narratives, letters, government documents, and autobiographies as well as monographs, articles, and other secondary sources will be used to explore topics such as slavery and slave culture in the United States; blacks and America's wars; the African-American intellectual tradition; or, African-Americans and the Great Migration.

**HIST 2016 African-American History: From Slavery to Civil Rights: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. This course examines the impact of region, gender, and class on black activism by focusing on topics such as remembering slavery and emancipation, institution and community building during segregation, changing strategies in politics and protest, and the emergence of the direct action civil rights movement.

**HIST 2017 African-American History: From Civil Rights To Black Power: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. A seminar on the activities, ideas, movement centers, and personalities that created the Civil Rights and Black Power movements in the U.S. from the 1950's through the 1970's. Some familiarity with the broad contours of U.S. History is presupposed. Special attention will be devoted to the roles of the African-American masses, college students, and women, and to the points of conflict, cooperation, and intersection between African-America and the larger American society.

**HIST 2020 History of Women and Social Movements: 3 semester hours**

Same as GS 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

**HIST 2022 The Automobile and American Life: 3 semester hours**

This course uses the automobile as a window into 20th-century American life. It examines the influence of automobility on patterns of work and leisure; on struggles over gender, race and ethnicity; on individualism, consumerism, and government regulation. It also surveys mass automobility's effects on our physical and natural environments and looks at future prospects of automobility in the information age.

**HIST 2023 US Foreign Relations and Military History To 1900: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. A survey of American foreign and military affairs to 1900, with particular emphasis on European conflicts, national expansion, Indian Wars, and the Mexican War.

**HIST 2024 US Foreign Relations and Military History Since 1900: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. A survey of American foreign and military affairs since 1900, with particular emphasis on the major wars during the period and the cold war era. Consideration of the nation's changing place in a changing world.

**HIST 2025 Topics in Military History: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. This course will examine a prominent military engagement in the past and consider strategic, diplomatic, and broad cultural aspects of the event. The particular military engagement investigated will vary from one semester to another. May be repeated if topics differ.

**HIST 2028 Sex, Drugs, and Rock 'n Roll: The 1960s in Song, Fashion, Dating, and Protest: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. This course examines the turbulent 1960s and the period's identification with sex, drugs, and rock 'n roll by looking historically at drugs, music, and changes in gender roles. It uses these histories to explore the cultural and political movements of the 1960s (1955 through 1973)-civil rights, black power, new left, antiwar, and feminist movements-along with the emergence of the counterculture, hallucinogenic drugs, the sexual revolution, and the whole hip scene. The class is discussion-based. There is a mid-term exam and several assignments, including a class presentation and papers on readings, music, and movies.

**HIST 2052 History Of Latin America Since 1808: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. Emphasis on the attainment of political independence and social, political, and economic developments of the nineteenth and twentieth centuries in Latin America. This course satisfies the cultural diversity requirement.

**HIST 2053 Modern Mexico: 3 semester hours**

Mexico from the Revolution to the present, covering major political, social, and cultural developments of the twentieth century including foreign population migration, the student movement of the 1960s, the rise and fall of the PRI, and the impacts of globalization.

**HIST 2063 African Diaspora To Abolition of the Slave Trade: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, the course examines major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora up to 1800. Themes include: slavery, multi-racialism, economics of the South Atlantic system, political dimensions and the social transformation from heterogeneous crowds to new and homogeneous communities. Linkages between Africans and their descendants in the Atlantic communities of Latin America, the Caribbean, as well as North America will be stressed. This course fulfills the Cultural Diversity requirement.

**HIST 2064 African Diaspora in the Age of Migration: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, this course uses a comparative methodology to examine the major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora after 1800. This course fulfills the Cultural Diversity requirement.

**HIST 2081 Rome: The Republic And Empire: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. A survey of the development of Roman political and cultural life from the Legendary founding of the city in central Italy in 753 BC to the death of the Emperor Justinian in 565 AD.

**HIST 2082 Christianity: From Jesus to Martin Luther: 3 semester hours**

The purpose of this course is to orient students in the scholarship about the Christian Church in the Western tradition as an institution. Open discussion is encouraged, and all traditions will be respected in the interest of expanding our knowledge of the past as well of as the living communities today.

***HIST 2083 Europe In Early Middle Ages: Paganism to Christianity: 3 semester hours***

Prerequisite: Sophomore standing or consent of the instructor. The end of the Roman Empire as a universal entity; the successor states of the Mediterranean and Northern Europe; the emergence of a Western Christendom under the Franks; the development of feudal states; the Gregorian reforms; the Crusades; the revival of education and learning in the twelfth century.

***HIST 2084 Crusades and Plagues: Europe In The High And Late Middle Ages: 3 semester hours***

Prerequisite: Sophomore standing or consent of the instructor. Medieval society at its political, economic, and intellectual zenith; the crisis of the later Middle Ages; the Papal schism and the development of national particular churches within Catholicism; and the rise of estate institutions.

***HIST 2085 Medieval England: From Arthur to Richard III: 3 semester hours***

Prerequisite: Sophomore standing or consent of the instructor. A brief summary of the Anglo-Saxon heritage and the impact of the Norman Conquest, followed by an investigation of the institutional, social, and legal evolution of the realm of England. English development will be viewed in its European context.

***HIST 2086 Reformation of Europe: Beyond Religion: 3 semester hours***

Prerequisite: Sophomore standing or consent of the instructor. Religious, intellectual, political, and socioeconomic developments of the sixteenth century.

***HIST 2088 Europe and the Renaissance: Not Just for Painters Anymore: 3 semester hours***

Prerequisites: Sophomore Standing or consent of the instructor. The Italian and Northern Renaissance as a distinct age; political, socioeconomic, intellectual, religious, and artistic movements attending the decline of medieval society, and the transition to the early modern period.

***HIST 2089 Religion, Philosophy & Science in History: Introduction to The Intellectual History Of The West: 3 semester hours***

Sophomore standing or consent of instructor. An examination of some of the most important ideas and debates that shaped the Western world. Topics include Platonic versus Aristotelian models of the universe, Medieval synthesis and the challenge of Renaissance naturalism, the Scientific Revolution, the political ideas of Thomas Hobbes, John Locke, and Jean-Jacques Rousseau, romanticism, Marxism, Darwinian evolution, Freudian psychology, existentialism, structuralism and poststructuralism.

***HIST 2090 Europe in the Eighteenth Century: From the Glorious Revolution to the Napoleonic Era: 3 semester hours***

Prerequisite: Sophomore standing or consent of instructor. This course offers intensive study of Europe in the period between the Glorious Revolution in England in 1688 and the fall of Napoleon in 1815. Particular emphasis will be placed on the theme of the rise of the modern. Specifically, the course will examine the struggle by intellectuals, politicians, and military figures to move Europe forward from the old regime system. Particular emphasis will be placed on the works of Voltaire, Rousseau, Locke, and Paine.

***HIST 2091 Europe in the Nineteenth Century: From Waterloo to World War I: 3 semester hours***

Prerequisites: Sophomore standing or Consent of Instructor. This course offers intensive study of Europe in the period between the fall of Napoleon in 1815 and the turn-of-twentieth century. Particular emphasis will be placed on the themes of industrialization, overseas colonization, and the development of nationalist, socialist, and liberal ideas.

***HIST 2095 History of Ireland: 3 semester hours***

This course will explore Irish history from medieval to modern times. Topics will include issues of land, settlement, immigration, and modernization.

***HIST 2102 Introduction To Gender Studies: 3 semester hours***

Same as GS 2102, SOC WK 2102, and SOC 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

***HIST 2105 Sex in America: 3 semester hours***

Prerequisites: Sophomore Standing or consent of the instructor. Dissected, categorized, evaluated, feared, and enjoyed: sex in America's past, including our current obsession with it, is the primary concern of this course. Why and how have sex and sexuality become so central to identities, culture, politics, and now, our history? This course explores the complex and often hidden history of sex in the United States. It uses sex to examine big political ideas of citizenship, democracy, and cultural inclusion.

***HIST 2116 History of Greece and The Balkans: 3 semester hours***

Prerequisites: Sophomore standing or consent of the instructor. This course is designed to introduce students to the history of the Balkans with particular emphasis on Greece. Although a part of the course will deal with nation building and nationalism, we will also examine the broad historical trends that have shaped the distinct cultural, social, and political developments in the region from the late 18th century until the end of the 20th century.

***HIST 2117 Greek History And Culture: 3 semester hours***

Same as ANTHRO 2117. Greek civilization has had a deep impact on contemporary society in art; social, political, and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek History, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

***HIST 2118 Modern Greek History and Culture: 3 semester hours***

Same as ANTHRO 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

***HIST 2219 United States Labor History: 3 semester hours***

Examines the history of work and the working class in the United States. It focuses on the transformation of the workplace, the evolution of working class consciousness and the development of the labor movement, the role of race, gender and ethnicity in uniting or dividing the working class, and the nature of labor's relations with other social groups in the political arena. Particular emphasis on the political and economic conditions and strategies of periods when working class power was growing.

***HIST 2770 Introduction To Transportation: 3 semester hours***

Prerequisites: Sophomore standing or consent of instructor. Introduction to Transportation provides an overview of the transportation sector, including history, providers, users, and government regulation. The importance and significance of transportation modes of rail, water, motor, air, and pipeline: the demand and supply of transportation, and the managerial aspects of these modes of transport will be covered in the course.

**HIST 2772 History Of Aviation In American Life: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Course focuses on the history of aviation in the United States from balloon flights preceding the Wright brothers through the terrorist attacks in September 2001 with emphasis upon how aviation and aviators have influenced American society and culture. Themes include the evolution of aviation technology, the growth of the commercial/military aviation/aerospace industries, issues of race and gender in aviation, the development of America's commercial airlines, aviation's influence upon American art, films, advertising, and literature, the significance of the space race, and the role of aerial weapons of war.

**HIST 2773 Urbanization And Transportation: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Course provides an overview of urbanization and transportation in the United States. Besides examining the history of urbanization and transportation, this course offers comparisons between contemporary international urban areas for the purpose of placing the US experience in context. Additionally, the course covers key issues surrounding the planning, development, and consequences of infrastructure facilitating the movement of people and freight in the urban setting, such as financing, transport technologies, political policies, economic growth, and demographic trends.

**HIST 2800 History Of American Economic Development: 3 semester hours**

Same as ECON 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and antitrust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in postwar economy.

**HIST 2999 Introduction to Historical Inquiry: 4 semester hours**

Prerequisites: Sophomore standing or consent of instructor. This course is designed to develop historical thinking skills. Emphasis will be placed on reading of historical sources, exploring the rhetoric of history, identifying perspectives in historical sources, and the process of formulating historical questions. Other topics covered will include proper citation procedures and historiography. The course is writing intensive and will involve primary source research at libraries and archives.

**HIST 3000 Selected Topics In History: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. Special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

**HIST 3031 Modern Japan: From the Meiji Restoration to the Present: 3 semester hours**

Prerequisite: Junior Standing Or Consent Of Instructor. The Economic, Social, And Political Development Of Modern Japan.

**HIST 3032 Modern China: From the Decline of the Qing Empire to the Global Age: 3 semester hours**

Prerequisite: Junior Standing Or Consent Of Instructor. The Economic, Social, And Political Development Of Modern China.

**HIST 3033 Modern History Of The Asian Pacific Rim: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. A course on the modern history of the broad economic region of East and Southeast Asia as well as the region's interaction with the United States. The course is designed for students who need to understand the political and economic dynamics of the countries around the Pacific Basin and the historical roots of various problems.

**HIST 3034 History of Technology and Environment in China: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course explores how the Chinese used technology to manage the economy, environment and disasters which paralleled developments in the West. Discussions on the political function of Chinese science and technology, and on its continued influence on Chinese culture and society.

**HIST 3041 Topics In American Constitutional History: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. Origins and development of the principal institutions and ideas of the American constitutional systems; the role of the constitution and the Supreme Court in the growth of the nation; important Supreme Court decisions; great American jurists and their impact upon the law; historical background to current constitutional issues.

**HIST 3043 History Of Crime And Justice: 3 semester hours**

Same as CRIMIN 3043. Prerequisites: Junior standing or consent of instructor. The analysis, development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison, and the juvenile court system.

**HIST 3051 Latin America: From Conquest to Independence: 3 semester hours**

Prerequisites: Junior standing or consent of Instructor. Latin America from the pre-Columbian Civilizations to 1808, stressing social, political, and economic institutions in the Spanish colonies. This course satisfies the Cultural Diversity requirement.

**HIST 3092 Europe, 1900-1950: War And Upheaval: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. The impact of World Wars I and II and the search for equilibrium.

**HIST 3093 Europe, 1950-Present: Peace And Prosperity: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. A survey of the main social, economic, political, military, and cultural trends in Europe since the outbreak of World War II.

**HIST 3097 Spain: From Superpower to Napoleon's Puppet: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. A survey of Spanish history from the fifteenth century, emphasizing its period of imperial greatness and examining the effects of empire on national development.

**HIST 4001 Special Readings: 1-10 semester hours**

Prerequisite: Consent of the instructor. Independent study through readings, reports and conferences.

**HIST 4002 Collaborative Research: 3 semester hours**

Prerequisite: Consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

**HIST 4003 Internship: 3-6 semester hours**

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history. This elective course supplements but does not replace the requirements for a baccalaureate degree in history. May not be taken for graduate credit.

**HIST 4014 World History For The Secondary Classroom: 3 semester hours**

Prerequisites: TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of World History to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies Certification. Not available for graduate credit.

**HIST 4142 Inquiries in U.S. History: 3 semester hours**

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in National History.

**HIST 4143 Inquiries in World History: 3 semester hours**

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in World History.

**HIST 4999 Senior Seminar: 5 semester hours**

Prerequisites: HIST 2999, consent of department and presentation of three examples of formal written work submitted in prior upper-division courses in history. Studies in historical methodology and historiography. Directed readings, research, and writing leading to the production of an original piece of historical scholarship. An exit interview is required. Senior seminar is required of all history majors. May not be taken for graduate credit.

**HIST 5000 Advanced Selected Topics In History: 3 semester hours**

Prerequisite: Graduate standing. Special topics in history. The course may be repeated for credit with consent of the instructor.

**HIST 5142 Advanced Inquiries in U.S. History: 3 semester hours**

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in United States history.

**HIST 5143 Advanced Inquiries in World History: 3 semester hours**

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in World history.

**HIST 5592 The History of the Visual Arts in American Museums: 3 semester hours**

Same as ANTHRO 5592 and ART HS 5592. Prerequisites: Graduate Standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**HIST 6000 The Historian's Craft: 1-3 semester hours**

This course will introduce incoming students to graduate work, both in the field of history generally and to the M.A. program at UM-St. Louis in particular. It will familiarize them with the fields of historical study and the UMSL faculty who teach them, protocols of the profession, and methodologies of historical research, writing, and analysis. It will also help students learn about and prepare for careers outside the academy and/or Ph.D. programs in the field. Students may be required to attend colloquia off campus.

**HIST 6001 Introduction to Public History and Cultural Heritage: 3 semester hours**

Prerequisites: Graduate Standing or Consent of Instructor. This seminar will introduce students to the theory and practice of public history and cultural heritage. Readings will acquaint students with these fields of study and offer commentary on a variety of strategies for making the past relevant for contemporary audiences.

**HIST 6013 Historical and Theoretical Foundations of US History in Schools and Communities: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. The intent of this course is to foster critical inquiry into school and public presentations of historical knowledge. Particular emphasis will be placed on defining the broad and connecting themes of U.S. History and the political and cultural struggles that have shaped school curriculum and public discussion since the nineteenth century.

**HIST 6014 World History For The Secondary School Classroom: 3-6 semester hours**

Prerequisites: Graduate standing or consent of instructor. The intent of this course is to adapt the themes and subject matter of World history to the secondary classroom and to train teachers in the methodology of Socratic symposium, techniques designed to maximize the use of sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on methods for choosing primary sources for use in an interactive classroom. HIST 6014 may not be used to meet history degree requirements.

**HIST 6101 Readings In American History To 1865: 3-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history to 1865.

**HIST 6102 Readings In American History Since 1865: 3-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history since 1865.

**HIST 6115 Historical Thinking in Theory and Practice I: 3 semester hours**

Same as TCH ED 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

**HIST 6116 Historical Thinking in Theory and Practice II: 3 semester hours**

Same as TCH ED 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115 / TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

**HIST 6121 Directed Readings: 1-3 semester hours**

Prerequisites: Consent of a member of the Doctoral Faculty. Directed research at the graduate level.

**HIST 6122 Collaborative Research: 3-6 semester hours**

Prerequisites: Graduate Standing and consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

**HIST 6123 Thesis Seminar: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Thesis research and writing on a selected topic in history.

**HIST 6124 Graduate Internship: 3 semester hours**

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history.

**HIST 6125 Practicum in Public History and Cultural Heritage: 3 semester hours**

Prerequisites: Graduate Standing or Consent of Instructor. In collaboration with a designated community partner, students will research and interpret the past for contemporary audiences. The course will combine traditional classroom sessions with hands-on training.

**HIST 6127 Museums and Communities: 3 semester hours**

Prerequisites: Graduate standing and consent of the Director of Museum Studies. As museums and heritage institutions have sought to attract new audiences, they have tried to re-present their collections with new stories, address topics of concern to the denizens of their cities, and provide a broader range of programming than ever before. This course considers how to identify community characteristics and needs, create entry points for multiple audiences at museums, and build strong, long-term relationships with local partners. We consider difficult histories, conflict, and strategies to create space for diverse perspectives; the role of communications technologies in soliciting participation and promoting dialogue; and networks and the organizational skills for community development. Students will examine case studies of community-based museum programming, and develop an engagement strategy around an exhibit.

**HIST 6130 Collections Management and Registration: 3 semester hours**

Prerequisites: Consent of Director of Museum Studies Program. Most of the institutions that we call museums collect objects. A collecting institution requires a collections manager or a registrar to track, manage, and insure the safety of its objects, whether it collects art, artifacts, specimens, or live organisms. This course covers collections care and management from acquisition to evaluation, documentation, care, storage (or maintenance), loans, exhibitions, contracts, risk preparedness, and policy-making. It focuses on the practical knowledge and skills needed for collections management and registration. While much of the course material is drawn from historical, ethnographic, and art collections, the basic principles apply broadly to all collecting institutions.

**HIST 6131 Museum Origins and Evolution: 3 semester hours**

Prerequisites: Consent of Director of Museum Studies Program. This course traces the social and cultural history of museums from their origins in curiosity cabinets, princely collections, freak shows, and exhibitions, through their late 19th and early 20th century institutionalization, to present-day developments such as blockbuster exhibitions, community collaborations, masterpiece architecture, and the spread of museal and heritage institutions around the globe. Topics include colonialism, modernity, and the production of taxonomical knowledge; museums and nationalism; theories of culture, patrimony, and ownership; manufacture, marketing, and museums; the relationships between museums and academia; identity politics and culture wars; community-based initiatives; and virtual and digital museum spaces.

**HIST 6132 Digital Video for Museums and Community History: 3 semester hours**

Prerequisites: Consent of Director of Museum Studies Program. This course covers basic production and post-production in digital video, and examines how digital video has been and can be used for community history projects and museum installations. Students will learn basics of shooting, lighting, sound, scripting, and non-linear editing; interviewing and observational footage; and produce a series of documentary shorts. Readings will include the special characteristics of the cinematic medium and case studies of digital video for community-based research, advocacy, and museum audiences.

**HIST 6133 Museums and History in the Digital Age: 3 semester hours**

This course introduces and explores the key issues, analyses, critical debates, opportunities and potential drawbacks for museums and public historians using digital media to engage with communities. Students will gain facility in implementing digital strategies for museum and public history initiatives, including how to plan, manage, and assess the success of media projects.

**HIST 6134 History Curatorship: 5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Principles and practices of curatorship in history museums. Historiography and research in material culture; theoretical foundations; methodologies for collecting and curating collections; legal and ethical issues; interpretation; role of the history curator in exhibit and program development; responsibilities to the community.

**HIST 6135 Foundations Of Museology I: 3 semester hours**

Same as ART HS 6035 and ANTHRO 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**HIST 6136 Foundations In Museology II: 3 semester hours**

Same as ART HS 6036 and ANTHRO 6136. Prerequisites: HIST 6135 and consent of Director of Museum Studies Program. Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**HIST 6137 Museum Organization and Operations: 3 semester hours**

Same as ART HS 6037 and ANTHRO 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**HIST 6138 Museum Studies Master's Project: 4 semester hours**

Same as ART HS 6038 and ANTHRO 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/ exhibit development on a selected topic.

**HIST 6140 Readings in Metropolitan History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in Metropolitan History.

**HIST 6141 Readings in Regional History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in Regional History.

**HIST 6142 Readings in U.S. History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing in selected topics and areas in United States History.

**HIST 6143 Readings in World History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in World History.

**HIST 6150 Directed Readings in Metropolitan History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6151 Directed Readings in Regional History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6152 Directed Readings in U.S. History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6153 Directed Readings in World History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

## Courses

**HIST 1000 Selected Topics in History: 1-3 semester hours**

Prerequisite: Consent of instructor. Special topics in history. May be repeated for credit with consent of instructor.

**HIST 1001 American Civilization To 1865: 3 semester hours**

Evolution of the cultural tradition of the Americas from the earliest times to the mid-nineteenth century, with emphasis on the relationship of ideas and institutions to the historical background. Course fulfills the state requirement.

**HIST 1002 American Civilization 1865 To Present: 3 semester hours**

Continuation of HIST 1001 to the present. Course fulfills the state requirement. Either HIST 1001 or HIST 1002 taken separately.

**HIST 1003 African-American History: 3 semester hours**

A survey of African-American history from the beginning of the European slave trade to the modern Civil Rights era. This course meets the state requirement.

**HIST 1004 The History Of Women In The United States: 3 semester hours**

Same as GS 1004. A survey of women's history from the colonial era to the present.

**HIST 1030 The Ancient Empires of the Mediterranean: 3 semester hours**

Survey of ancient history in the near east, the Aegean, the central and western Mediterranean. Themes: politics and economy, war and society, culture, including art, literature, technology, religion and philosophy. The chronological span is from the neolithic period (7500-3000 B.C.) in the near east to the fall of the Roman Empire in the fifth century A.D.

**HIST 1031 Topics European Civilization: Emergence Of Western Europe To 1715: 3 semester hours**

Lectures and discussions on the development of western European society and tradition from approximately 1000 to 1715.

**HIST 1032 Topics In European Civilization: 1715 To The Present: 3 semester hours**

Lectures and discussions on the development of western European society and tradition from 1715 to the present.

**HIST 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours**

SAME AS ANTHRO 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

**HIST 1038 Byzantine History and Culture: 3 semester hours**

Same as ANTHRO 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

**HIST 1041 East Asian Civilization: 3 semester hours**

The development of Asian civilization from earliest times to the Manchu conquest.

**HIST 1042 East Asian Civilization: 3 semester hours**

Continuation of HIST 1041 with emphasis on the Asian response to the Western incursion. Either HIST 1041 or HIST 1042 may be taken separately.

**HIST 1051 Latin American Civilization: 3 semester hours**

A survey of selected topics important in the development of Latin America from pre-Columbian times to the twentieth century.

**HIST 1052 Mexican Civilization: 3 semester hours**

This course will focus on the history and culture of Mexico from the Aztecs to the mid-twentieth century. Among the topics to be covered are: the Aztecs, Cortez and the Conquest of Mexico, colonial institutions and culture, the obtaining of political independence, disorder and dictatorship in the nineteenth century, the Mexican Revolution, contemporary Mexico. This course meets the non-Euro-American requirement.

**HIST 1061 African Civilization: From The Beginning of Humanity to The End of The Slave Trade: 3 semester hours**

Introduction to cultural history from the emergence of early humankind to the abolition of the Atlantic slave trade. This course fulfills the Cultural Diversity requirement.

**HIST 1062 African Civilization II: From Colonies to Nations: 3 semester hours**

Survey of African initiative and response in the period spanning the loss and reassertion of independence. Either HIST 1061 or HIST 1062 may be taken separately.

**HIST 1075 World History to 1500: 3 semester hours**

A survey of the history of humankind since 1500 including the beginnings of civilization Mesopotamia, Africa, Asia and the Americas, the rise of Classical civilizations and the development of major transnational social, economic, political and religious networks.

**HIST 1076 World History Since 1500: 3 semester hours**

A survey of the history of humankind since 1500, emphasizing the growing interdependency of regional economic, political, and social systems. Topics will include imperialism, industrialization, and globalization.

**HIST 1111 Reacting to the Past: 4 semester hours**

Reacting to the Past is a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. The course offers students a rigorous academic experience in which they conduct historical research, speak, and write extensively. Because this course requires extensive writing, it fulfills the requirement for Freshman Composition.

**HIST 1776 History of American Leadership: 3 semester hours**

An introduction to the study of leaders in America that will cover different categories of political, cultural, social, and intellectual leadership and achievement. Crucial to the understanding of these categories is the question: how did leaders find their gift in becoming who they were and what leadership traits can be identified in the different categories under scrutiny.

**HIST 2000 Selected Topics in History: 1-4 semester hours**

Prerequisite: Consent of instructor. Special topics in history. The course may be repeated for credit with consent of the instructor.

**HIST 2001 Creating Early America: European Empires, Colonial Cultures, and Native Nations, 1565-1776: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. This content-rich course explores the transatlantic migrations and Indian interactions that laid the foundations of the American nation before 1776.

**HIST 2003 United States History: From Nation to Civil War: 3 semester hours**

Prerequisite: Soph standing or consent of the instructor. The "Era of Good Feelings"; the Age of Jackson; manifest destiny; the political and social developments of the antebellum period relating to the growth of sectionalism and the developing antislavery crusade.

**HIST 2004 United States History: The Civil War Era, 1860-1900: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. The Civil War, Reconstruction, industrial and urban expansion and their impact on American life.

**HIST 2005 The Modernization Of The United States: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Studies in the economic, political and social development and crises of the maturing industrial United States between 1877 and 1940, and the growing importance of foreign relations.

**HIST 2006 Recent United States History: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. The economic, political and social developments and crises of post-industrial United States. The role of foreign affairs in American life.

**HIST 2007 History Of Missouri: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Lecture and readings. Seventeenth-century Spanish and French explorations and interaction with the Indians; settlement and organization of the Louisiana territory; lead mining and the fur trade; the Louisiana Purchase; the Missouri territory; the struggle for statehood and slavery; antebellum politics; banking and internal improvements; westward expansion; Civil War and reconstruction; postwar agrarian politics, industrialization; Irish, German, and southern European immigration; the Progressive reforms--Political and economic changes; and twentieth-century social changes and political developments. Course satisfies the state requirement.

**HIST 2008 History Of St. Louis: 3 semester hours**

Prerequisites: Sophomore standing or the consent of the instructor. This course will provide an overview of the history of the St. Louis metropolitan region from its founding in 1764 to the present. Main topics will include: the St. Louis region before the Europeans, forces leading to the founding of the city, St. Louis as an "urban frontier", the Age of Steam on water and rail, the questions of slavery and the Civil War, St. Louis in the Gilded Age, the World's Fair, early efforts at city planning, impact of the automobile, St. Louis during the Depression and World War II, post-war suburbanization, urban renewal St. Louis style, school desegregation, the Schoemehl years, the emergence of St. Louis "Edge Cities", and St. Louis 2004.

**HIST 2009 St. Louis And The West: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. An examination of the role St. Louis played in the evolution of the North American West, both in the United States and Canada, from the fur trade of the late eighteenth century to the opening of the Texas oil fields in the early twentieth century. Special emphasis will be given to competition between river and rail transportation corridors, and hence to the rivalry that developed between St. Louis and Chicago.

**HIST 2010 From Sea to Shining Sea: The American Frontier 1763 - 1890: 3 semester hours**

This is a history of the colonization of the Great West, from the end of the French and Indian War to the official closing of the frontier in 1890. The westward movement will be examined as a major factor in explaining American development.

**HIST 2011 American West: The Truth Behind the Hollywood Myths: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. An exploration of the history of the American West from the 1750s to present, with emphasis on the role of transportation. Urban gateways such as St. Louis and San Francisco and transportation corridors such as the Missouri River and the Santa Fe and Oregon trails will be of particular importance.

**HIST 2012 The Indian In American History: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Investigates Native American encounters with non-Indian peoples between 1600 and 1900, analyzing how traditional Indian cultures changed to meet a variety of new challenges introduced to North America by Europeans and Africans. The approach will be interdisciplinary and ethnohistorical with emphasis placed on case studies of important native nations at key turning points in their history.

**HIST 2013 The Rise and Fall of American Cities: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Will explore a salient topic in African-American history. Such historical documents as personal narratives, letters, government documents, and autobiographies as well as monographs, articles, and other secondary sources will be used to explore topics such as slavery and slave culture in the United States; blacks and America's wars; the African-American intellectual tradition; or, African-Americans and the Great Migration.

**HIST 2015 Topics In African-American History: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Will explore a salient topic in African-American history. Such historical documents as personal narratives, letters, government documents, and autobiographies as well as monographs, articles, and other secondary sources will be used to explore topics such as slavery and slave culture in the United States; blacks and America's wars; the African-American intellectual tradition; or, African-Americans and the Great Migration.

**HIST 2016 African-American History: From Slavery to Civil Rights: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. This course examines the impact of region, gender, and class on black activism by focusing on topics such as remembering slavery and emancipation, institution and community building during segregation, changing strategies in politics and protest, and the emergence of the direct action civil rights movement.

**HIST 2017 African-American History: From Civil Rights To Black Power: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. A seminar on the activities, ideas, movement centers, and personalities that created the Civil Rights and Black Power movements in the U.S. from the 1950's through the 1970's. Some familiarity with the broad contours of U.S. History is presupposed. Special attention will be devoted to the roles of the African-American masses, college students, and women, and to the points of conflict, cooperation, and intersection between African-America and the larger American society.

**HIST 2020 History of Women and Social Movements: 3 semester hours**

Same as GS 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

**HIST 2022 The Automobile and American Life: 3 semester hours**

This course uses the automobile as a window into 20th-century American life. It examines the influence of automobility on patterns of work and leisure; on struggles over gender, race and ethnicity; on individualism, consumerism, and government regulation. It also surveys mass automobility's effects on our physical and natural environments and looks at future prospects of automobility in the information age.

**HIST 2023 US Foreign Relations and Military History To 1900: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. A survey of American foreign and military affairs to 1900, with particular emphasis on European conflicts, national expansion, Indian Wars, and the Mexican War.

**HIST 2024 US Foreign Relations and Military History Since 1900: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. A survey of American foreign and military affairs since 1900, with particular emphasis on the major wars during the period and the cold war era. Consideration of the nation's changing place in a changing world.

**HIST 2025 Topics in Military History: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. This course will examine a prominent military engagement in the past and consider strategic, diplomatic, and broad cultural aspects of the event. The particular military engagement investigated will vary from one semester to another. May be repeated if topics differ.

**HIST 2028 Sex, Drugs, and Rock 'n Roll: The 1960s in Song, Fashion, Dating, and Protest: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. This course examines the turbulent 1960s and the period's identification with sex, drugs, and rock 'n roll by looking historically at drugs, music, and changes in gender roles. It uses these histories to explore the cultural and political movements of the 1960s (1955 through 1973)-civil rights, black power, new left, antiwar, and feminist movements-along with the emergence of the counterculture, hallucinogenic drugs, the sexual revolution, and the whole hip scene. The class is discussion-based. There is a mid-term exam and several assignments, including a class presentation and papers on readings, music, and movies.

**HIST 2052 History Of Latin America Since 1808: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. Emphasis on the attainment of political independence and social, political, and economic developments of the nineteenth and twentieth centuries in Latin America. This course satisfies the cultural diversity requirement.

**HIST 2053 Modern Mexico: 3 semester hours**

Mexico from the Revolution to the present, covering major political, social, and cultural developments of the twentieth century including foreign population migration, the student movement of the 1960s, the rise and fall of the PRI, and the impacts of globalization.

**HIST 2063 African Diaspora To Abolition of the Slave Trade: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, the course examines major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora up to 1800. Themes include: slavery, multi-racialism, economics of the South Atlantic system, political dimensions and the social transformation from heterogeneous crowds to new and homogeneous communities. Linkages between Africans and their descendants in the Atlantic communities of Latin America, the Caribbean, as well as North America will be stressed. This course fulfills the Cultural Diversity requirement.

**HIST 2064 African Diaspora in the Age of Migration: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, this course uses a comparative methodology to examine the major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora after 1800. This course fulfills the Cultural Diversity requirement.

**HIST 2081 Rome: The Republic And Empire: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. A survey of the development of Roman political and cultural life from the Legendary founding of the city in central Italy in 753 BC to the death of the Emperor Justinian in 565 AD.

**HIST 2082 Christianity: From Jesus to Martin Luther: 3 semester hours**

The purpose of this course is to orient students in the scholarship about the Christian Church in the Western tradition as an institution. Open discussion is encouraged, and all traditions will be respected in the interest of expanding our knowledge of the past as well of as the living communities today.

**HIST 2083 Europe In Early Middle Ages: Paganism to Christianity: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. The end of the Roman Empire as a universal entity; the successor states of the Mediterranean and Northern Europe; the emergence of a Western Christendom under the Franks; the development of feudal states; the Gregorian reforms; the Crusades; the revival of education and learning in the twelfth century.

**HIST 2084 Crusades and Plagues: Europe In The High And Late Middle Ages: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. Medieval society at its political, economic, and intellectual zenith; the crisis of the later Middle Ages; the Papal schism and the development of national particular churches within Catholicism; and the rise of estate institutions.

**HIST 2085 Medieval England: From Arthur to Richard III: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. A brief summary of the Anglo-Saxon heritage and the impact of the Norman Conquest, followed by an investigation of the institutional, social, and legal evolution of the realm of England. English development will be viewed in its European context.

**HIST 2086 Reformation of Europe: Beyond Religion: 3 semester hours**

Prerequisite: Sophomore standing or consent of the instructor. Religious, intellectual, political, and socioeconomic developments of the sixteenth century.

**HIST 2088 Europe and the Renaissance: Not Just for Painters Anymore: 3 semester hours**

Prerequisites: Sophomore Standing or consent of the instructor. The Italian and Northern Renaissance as a distinct age; political, socioeconomic, intellectual, religious, and artistic movements attending the decline of medieval society, and the transition to the early modern period.

**HIST 2089 Religion, Philosophy & Science in History: Introduction to The Intellectual History Of The West: 3 semester hours**

Sophomore standing or consent of instructor. An examination of some of the most important ideas and debates that shaped the Western world. Topics include Platonic versus Aristotelian models of the universe, Medieval synthesis and the challenge of Renaissance naturalism, the Scientific Revolution, the political ideas of Thomas Hobbes, John Locke, and Jean-Jacques Rousseau, romanticism, Marxism, Darwinian evolution, Freudian psychology, existentialism, structuralism and poststructuralism.

**HIST 2090 Europe in the Eighteenth Century: From the Glorious Revolution to the Napoleonic Era: 3 semester hours**

Prerequisite: Sophomore standing or consent of instructor. This course offers intensive study of Europe in the period between the Glorious Revolution in England in 1688 and the fall of Napoleon in 1815. Particular emphasis will be placed on the theme of the rise of the modern. Specifically, the course will examine the struggle by intellectuals, politicians, and military figures to move Europe forward from the old regime system. Particular emphasis will be placed on the works of Voltaire, Rousseau, Locke, and Paine.

**HIST 2091 Europe in the Nineteenth Century: From Waterloo to World War I: 3 semester hours**

Prerequisites: Sophomore standing or Consent of Instructor. This course offers intensive study of Europe in the period between the fall of Napoleon in 1815 and the turn-of-twentieth century. Particular emphasis will be placed on the themes of industrialization, overseas colonization, and the development of nationalist, socialist, and liberal ideas.

**HIST 2095 History of Ireland: 3 semester hours**

This course will explore Irish history from medieval to modern times. Topics will include issues of land, settlement, immigration, and modernization.

**HIST 2102 Introduction To Gender Studies: 3 semester hours**

Same as GS 2102, SOC WK 2102, and SOC 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**HIST 2105 Sex in America: 3 semester hours**

Prerequisites: Sophomore Standing or consent of the instructor. Dissected, categorized, evaluated, feared, and enjoyed: sex in America's past, including our current obsession with it, is the primary concern of this course. Why and how have sex and sexuality become so central to identities, culture, politics, and now, our history? This course explores the complex and often hidden history of sex in the United States. It uses sex to examine big political ideas of citizenship, democracy, and cultural inclusion.

**HIST 2116 History of Greece and The Balkans: 3 semester hours**

Prerequisites: Sophomore standing or consent of the instructor. This course is designed to introduce students to the history of the Balkans with particular emphasis on Greece. Although a part of the course will deal with nation building and nationalism, we will also examine the broad historical trends that have shaped the distinct cultural, social, and political developments in the region from the late 18th century until the end of the 20th century.

**HIST 2117 Greek History And Culture: 3 semester hours**

Same as ANTHRO 2117. Greek civilization has had a deep impact on contemporary society in art; social, political, and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek History, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

**HIST 2118 Modern Greek History and Culture: 3 semester hours**

Same as ANTHRO 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

**HIST 2219 United States Labor History: 3 semester hours**

Examines the history of work and the working class in the United States. It focuses on the transformation of the workplace, the evolution of working class consciousness and the development of the labor movement, the role of race, gender and ethnicity in uniting or dividing the working class, and the nature of labor's relations with other social groups in the political arena. Particular emphasis on the political and economic conditions and strategies of periods when working class power was growing.

**HIST 2770 Introduction To Transportation: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Introduction to Transportation provides an overview of the transportation sector, including history, providers, users, and government regulation. The importance and significance of transportation modes of rail, water, motor, air, and pipeline: the demand and supply of transportation, and the managerial aspects of these modes of transport will be covered in the course.

**HIST 2772 History Of Aviation In American Life: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Course focuses on the history of aviation in the United States from balloon flights preceding the Wright brothers through the terrorist attacks in September 2001 with emphasis upon how aviation and aviators have influenced American society and culture. Themes include the evolution of aviation technology, the growth of the commercial/military aviation/aerospace industries, issues of race and gender in aviation, the development of America's commercial airlines, aviation's influence upon American art, films, advertising, and literature, the significance of the space race, and the role of aerial weapons of war.

**HIST 2773 Urbanization And Transportation: 3 semester hours**

Prerequisites: Sophomore standing or consent of instructor. Course provides an overview of urbanization and transportation in the United States. Besides examining the history of urbanization and transportation, this course offers comparisons between contemporary international urban areas for the purpose of placing the US experience in context. Additionally, the course covers key issues surrounding the planning, development, and consequences of infrastructure facilitating the movement of people and freight in the urban setting, such as financing, transport technologies, political policies, economic growth, and demographic trends.

**HIST 2800 History Of American Economic Development: 3 semester hours**

Same as ECON 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and antitrust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in postwar economy.

**HIST 2999 Introduction to Historical Inquiry: 4 semester hours**

Prerequisites: Sophomore standing or consent of instructor. This course is designed to develop historical thinking skills. Emphasis will be placed on reading of historical sources, exploring the rhetoric of history, identifying perspectives in historical sources, and the process of formulating historical questions. Other topics covered will include proper citation procedures and historiography. The course is writing intensive and will involve primary source research at libraries and archives.

**HIST 3000 Selected Topics In History: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. Special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

**HIST 3031 Modern Japan: From the Meiji Restoration to the Present: 3 semester hours**

Prerequisite: Junior Standing Or Consent Of Instructor. The Economic, Social, And Political Development Of Modern Japan.

**HIST 3032 Modern China: From the Decline of the Qing Empire to the Global Age: 3 semester hours**

Prerequisite: Junior Standing Or Consent Of Instructor. The Economic, Social, And Political Development Of Modern China.

**HIST 3033 Modern History Of The Asian Pacific Rim: 3 semester hours**

Prerequisites: Junior standing or consent of the instructor. A course on the modern history of the broad economic region of East and Southeast Asia as well as the region's interaction with the United States. The course is designed for students who need to understand the political and economic dynamics of the countries around the Pacific Basin and the historical roots of various problems.

**HIST 3034 History of Technology and Environment in China: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course explores how the Chinese used technology to manage the economy, environment and disasters which paralleled developments in the West. Discussions on the political function of Chinese science and technology, and on its continued influence on Chinese culture and society.

**HIST 3041 Topics In American Constitutional History: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. Origins and development of the principal institutions and ideas of the American constitutional systems; the role of the constitution and the Supreme Court in the growth of the nation; important Supreme Court decisions; great American jurists and their impact upon the law; historical background to current constitutional issues.

**HIST 3043 History Of Crime And Justice: 3 semester hours**

Same as CRIMIN 3043. Prerequisites: Junior standing or consent of instructor. The analysis, development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison, and the juvenile court system.

**HIST 3051 Latin America: From Conquest to Independence: 3 semester hours**

Prerequisites: Junior standing or consent of Instructor. Latin America from the pre-Columbian Civilizations to 1808, stressing social, political, and economic institutions in the Spanish colonies. This course satisfies the Cultural Diversity requirement.

**HIST 3092 Europe, 1900-1950: War And Upheaval: 3 semester hours**  
Prerequisites: Junior standing or consent of the instructor. The impact of World Wars I and II and the search for equilibrium.

**HIST 3093 Europe, 1950-Present: Peace And Prosperity: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. A survey of the main social, economic, political, military, and cultural trends in Europe since the outbreak of World War II.

**HIST 3097 Spain: From Superpower to Napoleon's Puppet: 3 semester hours**

Prerequisite: Junior standing or consent of instructor. A survey of Spanish history from the fifteenth century, emphasizing its period of imperial greatness and examining the effects of empire on national development.

**HIST 4001 Special Readings: 1-10 semester hours**

Prerequisite: Consent of the instructor. Independent study through readings, reports and conferences.

**HIST 4002 Collaborative Research: 3 semester hours**

Prerequisite: Consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

**HIST 4003 Internship: 3-6 semester hours**

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history. This elective course supplements but does not replace the requirements for a baccalaureate degree in history. May not be taken for graduate credit.

**HIST 4014 World History For The Secondary Classroom: 3 semester hours**

Prerequisites: TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of World History to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies Certification. Not available for graduate credit.

**HIST 4142 Inquiries in U.S. History: 3 semester hours**

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in National History.

**HIST 4143 Inquiries in World History: 3 semester hours**

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in World History.

**HIST 4999 Senior Seminar: 5 semester hours**

Prerequisites: HIST 2999, consent of department and presentation of three examples of formal written work submitted in prior upper-division courses in history. Studies in historical methodology and historiography. Directed readings, research, and writing leading to the production of an original piece of historical scholarship. An exit interview is required. Senior seminar is required of all history majors. May not be taken for graduate credit.

**HIST 5000 Advanced Selected Topics In History: 3 semester hours**

Prerequisite: Graduate standing. Special topics in history. The course may be repeated for credit with consent of the instructor.

**HIST 5142 Advanced Inquiries in U.S. History: 3 semester hours**

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in United States history.

**HIST 5143 Advanced Inquiries in World History: 3 semester hours**

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in World history.

**HIST 5592 The History of the Visual Arts in American Museums: 3 semester hours**

Same as ANTHRO 5592 and ART HS 5592. Prerequisites: Graduate Standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

**HIST 6000 The Historian's Craft: 1-3 semester hours**

This course will introduce incoming students to graduate work, both in the field of history generally and to the M.A. program at UM-St. Louis in particular. It will familiarize them with the fields of historical study and the UMSL faculty who teach them, protocols of the profession, and methodologies of historical research, writing, and analysis. It will also help students learn about and prepare for careers outside the academy and/or Ph.D. programs in the field. Students may be required to attend colloquia off campus.

**HIST 6001 Introduction to Public History and Cultural Heritage: 3 semester hours**

Prerequisites: Graduate Standing or Consent of Instructor. This seminar will introduce students to the theory and practice of public history and cultural heritage. Readings will acquaint students with these fields of study and offer commentary on a variety of strategies for making the past relevant for contemporary audiences.

**HIST 6013 Historical and Theoretical Foundations of US History in Schools and Communities: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. The intent of this course is to foster critical inquiry into school and public presentations of historical knowledge. Particular emphasis will be placed on defining the broad and connecting themes of U.S. History and the political and cultural struggles that have shaped school curriculum and public discussion since the nineteenth century.

**HIST 6014 World History For The Secondary School Classroom: 3-6 semester hours**

Prerequisites: Graduate standing or consent of instructor. The intent of this course is to adapt the themes and subject matter of World history to the secondary classroom and to train teachers in the methodology of Socratic symposium, techniques designed to maximize the use of sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on methods for choosing primary sources for use in an interactive classroom. HIST 6014 may not be used to meet history degree requirements.

**HIST 6101 Readings In American History To 1865: 3-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history to 1865.

**HIST 6102 Readings In American History Since 1865: 3-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history since 1865.

***HIST 6115 Historical Thinking in Theory and Practice I: 3 semester hours***

Same as TCH ED 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

***HIST 6116 Historical Thinking in Theory and Practice II: 3 semester hours***

Same as TCH ED 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115 / TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

***HIST 6121 Directed Readings: 1-3 semester hours***

Prerequisites: Consent of a member of the Doctoral Faculty. Directed research at the graduate level.

***HIST 6122 Collaborative Research: 3-6 semester hours***

Prerequisites: Graduate Standing and consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

***HIST 6123 Thesis Seminar: 1-6 semester hours***

Prerequisites: Graduate standing and consent of instructor. Thesis research and writing on a selected topic in history.

***HIST 6124 Graduate Internship: 3 semester hours***

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history.

***HIST 6125 Practicum in Public History and Cultural Heritage: 3 semester hours***

Prerequisites: Graduate Standing or Consent of Instructor. In collaboration with a designated community partner, students will research and interpret the past for contemporary audiences. The course will combine traditional classroom sessions with hands-on training.

***HIST 6127 Museums and Communities: 3 semester hours***

Prerequisites: Graduate standing and consent of the Director of Museum Studies. As museums and heritage institutions have sought to attract new audiences, they have tried to re-present their collections with new stories, address topics of concern to the denizens of their cities, and provide a broader range of programming than ever before. This course considers how to identify community characteristics and needs, create entry points for multiple audiences at museums, and build strong, long-term relationships with local partners. We consider difficult histories, conflict, and strategies to create space for diverse perspectives; the role of communications technologies in soliciting participation and promoting dialogue; and networks and the organizational skills for community development. Students will examine case studies of community-based museum programming, and develop an engagement strategy around an exhibit.

***HIST 6130 Collections Management and Registration: 3 semester hours***

Prerequisites: Consent of Director of Museum Studies Program. Most of the institutions that we call museums collect objects. A collecting institution requires a collections manager or a registrar to track, manage, and insure the safety of its objects, whether it collects art, artifacts, specimens, or live organisms. This course covers collections care and management from acquisition to evaluation, documentation, care, storage (or maintenance), loans, exhibitions, contracts, risk preparedness, and policy-making. It focuses on the practical knowledge and skills needed for collections management and registration. While much of the course material is drawn from historical, ethnographic, and art collections, the basic principles apply broadly to all collecting institutions.

***HIST 6131 Museum Origins and Evolution: 3 semester hours***

Prerequisites: Consent of Director of Museum Studies Program. This course traces the social and cultural history of museums from their origins in curiosity cabinets, princely collections, freak shows, and exhibitions, through their late 19th and early 20th century institutionalization, to present-day developments such as blockbuster exhibitions, community collaborations, masterpiece architecture, and the spread of museal and heritage institutions around the globe. Topics include colonialism, modernity, and the production of taxonomical knowledge; museums and nationalism; theories of culture, patrimony, and ownership; manufacture, marketing, and museums; the relationships between museums and academia; identity politics and culture wars; community-based initiatives; and virtual and digital museum spaces.

***HIST 6132 Digital Video for Museums and Community History: 3 semester hours***

Prerequisites: Consent of Director of Museum Studies Program. This course covers basic production and post-production in digital video, and examines how digital video has been and can be used for community history projects and museum installations. Students will learn basics of shooting, lighting, sound, scripting, and non-linear editing; interviewing and observational footage; and produce a series of documentary shorts. Readings will include the special characteristics of the cinematic medium and case studies of digital video for community-based research, advocacy, and museum audiences.

***HIST 6133 Museums and History in the Digital Age: 3 semester hours***

This course introduces and explores the key issues, analyses, critical debates, opportunities and potential drawbacks for museums and public historians using digital media to engage with communities. Students will gain facility in implementing digital strategies for museum and public history initiatives, including how to plan, manage, and assess the success of media projects.

***HIST 6134 History Curatorship: 5 semester hours***

Prerequisites: Graduate standing and consent of instructor. Principles and practices of curatorship in history museums. Historiography and research in material culture; theoretical foundations; methodologies for collecting and curating collections; legal and ethical issues; interpretation; role of the history curator in exhibit and program development; responsibilities to the community.

***HIST 6135 Foundations Of Museology I: 3 semester hours***

Same as ART HS 6035 and ANTHRO 6135. Prerequisites: Consent of Director of Museum Studies Program. Concepts for understanding museums in their social and cultural context; history of museums; museology and general social theory; information transfer vs meaning-making models; museums and communities; the changing role of museums; museums as complex organizations; process models of museology.

**HIST 6136 Foundations In Museology II: 3 semester hours**

Same as ART HS 6036 and ANTHRO 6136. Prerequisites: HIST 6135 and consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

**HIST 6137 Museum Organization and Operations: 3 semester hours**

Same as ART HS 6037 and ANTHRO 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

**HIST 6138 Museum Studies Master's Project: 4 semester hours**

Same as ART HS 6038 and ANTHRO 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/ exhibit development on a selected topic.

**HIST 6140 Readings in Metropolitan History: 3-5 semester hours**

Prerequisite: Graduate Standing Directed readings and writing on selected topics and areas in Metropolitan History.

**HIST 6141 Readings in Regional History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in Regional History.

**HIST 6142 Readings in U.S. History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing in selected topics and areas in United States History.

**HIST 6143 Readings in World History: 3-5 semester hours**

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in World History.

**HIST 6150 Directed Readings in Metropolitan History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6151 Directed Readings in Regional History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6152 Directed Readings in U.S. History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

**HIST 6153 Directed Readings in World History: 1-3 semester hours**

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

## Home Economics

### Courses

**HOME EC 1110 Nutrition In Health: 3 semester hours**

A study of dietary nutrients essential for health, proper selection of foods to provide them and current issues affecting them.

### Courses

**HOME EC 1110 Nutrition In Health: 3 semester hours**

A study of dietary nutrients essential for health, proper selection of foods to provide them and current issues affecting them.

## Honors

### Courses

**HONORS 1100 Freshman Composition: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Theory and practice of writing expository prose. Emphasis on individual tutorial. Assignment will be linked with topics discussed in honors 101.

**HONORS 1110 Western Traditions: Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

**HONORS 1130 Western Traditions: Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

**HONORS 1200 Freshman Symposium: Cultural Traditions I: 3 semester hours**

Course surveys Western and Non-Western cultural Traditions from their beginnings until 1800. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

**HONORS 1201 Freshman Symposium: Cultural Traditions II: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Course surveys Western and Non-Western Cultural Traditions from the 1800's to current times. It will introduce intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

**HONORS 1230 American Traditions: Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Honors seminars in the American Traditions series involve reading and discussion of texts of major importance in the development of the culture, politics, ideologies, and values which are or have been characteristic of the United States of America. Every American Traditions seminar will cover a broad range of time, and each may include contemporary issues. HONORS 1230 (Social Sciences) satisfies the American history and government requirement, and any course in the American Traditions sequence may be taken to satisfy one of the 'core' requirements for the American Studies Minor.

**HONORS 1310 Non-Western Traditions Series Humanities: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the humanities but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 1330 Non-Western Traditions Series-Social Sciences: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the social sciences but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 1410 Freshman Seminar In Humanities: 3 semester hours**

Seminars focus on different topics in the humanities but address themes and problems in the western cultural traditions that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading and discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 2010 Inquiries In The Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one of more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2020 Inquiries In The Fine And Performing Arts: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2030 Inquiries In The Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2050 Inquiries In The Natural Sciences: 1-3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2051 Inquiries in the Sciences: Laboratory or Field Work: 1 semester hour**

Prerequisites: Permission of Honors Dean. This course develops students' understanding of how the experimental procedures of the life and physical sciences are used to collect data and to develop and test scientific hypotheses. HONORS 2051 is taken as a required companion course to specific sections of HONORS 2050, (Inquiries in the Sciences), when laboratory or field work experience is essential to students' understanding of and competence in the scientific subject matter of the companion section of HONORS 2050.

**HONORS 2060 Inquiries In Business: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2070 Inquiries In Education: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2071 Inquiries in Education: 4 semester hours**

Prerequisite: Consent of the dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate, laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. HONORS 2071 meets College of Education requirements for TCH ED 2209.

**HONORS 2080 Inquiries In Nursing: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2310 Cultural Diversity In The Humanities: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the humanities.

**HONORS 2330 Cultural Diversity In The Social Sciences: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the social sciences.

**HONORS 3010 Advanced Honors Seminar In The Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3020 Advanced Honors Seminar In The Fine And Performing Arts: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3030 Advanced Honors Seminar In The Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3075 Reflective Research in Education: 2-3 semester hours**

Prerequisites: Consent of Honors College Dean. Students will explore issues and trends in educational research from the perspectives offered by their own classroom experiences (as students and/or as teaching interns). Through individual research projects, discussions, and periodic status reviews, students will gain in understanding how major educational research issues arise from and interact with curriculum design and classroom pedagogy. Students who have already taken HONORS 2071 (Foundations of Teaching in American Schools) will take the course for two (2) credits.

**HONORS 3100 Honors Advanced Composition: Writing The City: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Enhances critical thinking, research, discussion and writing skills by focusing on the city of St. Louis and on the specific fields of study of those enrolled in the course. Issues such as depth and development of content, voice, style, tone, correct expression, and research techniques are among the topics emphasized. Students maintain a Commonplace Book of journals, drafts, and creative writings; they also submit a minimum of four formal papers. This course is required for transfer students (two-year Honors Program) and an elective for students on the four-year program. For students on either program, HONORS 3100 meets the Advanced Composition requirement of the University.

**HONORS 3160 Honors Writing In The Sciences: 3 semester hours**

Prerequisites: Junior-level standing. This honors course, designed to meet the needs for students in the science disciplines, will satisfy the campus junior-level writing requirement. The course will stress writing observation reports, academic journals, laboratory reports and a major project suited to the specific area of study of each student enrolled in the class. Instruction will include correct documentation of science sources, synthesis techniques of research information, technology-based research skills and effective laboratory reporting methods. Four formal papers, including one large project, and several informal papers will be required for this challenging course.

**HONORS 4100 Independent Portfolio Writing: 1-2 semester hours**

Prerequisites: Senior status. Students in this course will meet with their instructor on a regular basis to discuss and revise their writing portfolio and write their master resume, career or academic resume, personal statements for graduate school, or other projects for careers or their futures. The course is required to be at least one hour and may be taken for two hours to allow for more personal time and assistance from the instructor.

**HONORS 4900 Independent Study In Honors: 1-6 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Most Honors students will fulfill their Honors independent study requirements in another department or division of the university. Where this is not possible, and where academic credit seems an appropriate reward for the independent study in question, the project may be undertaken as HONORS 4900, normally as a 3-credit course. This will involve substantial reading, research, and/or field work, and will be supervised by a permanent member of the Honors College academic staff. Completed proposal forms for this course must be submitted to the Honors College not later than the deadline for university registration.

**HONORS 4910 Independent Study: Internships: 1-6 semester hours**

**HONORS 4915 Honors Independent Off-Campus Internship: 1-6 semester hours**

Prerequisites: Approval from Honors Dean. This course is designed for 1 to 6 hours for an outside internship, approved by the Honors College. The student will not be on campus for the hours of this internship and most work for the internship will be submitted online to the Honors Internship Faculty Member.

**Courses****HONORS 1100 Freshman Composition: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Theory and practice of writing expository prose. Emphasis on individual tutorial. Assignment will be linked with topics discussed in honors 101.

**HONORS 1110 Western Traditions: Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

**HONORS 1130 Western Traditions: Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

**HONORS 1200 Freshman Symposium: Cultural Traditions I: 3 semester hours**

Course surveys Western and Non-Western cultural Traditions from their beginnings until 1800. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

**HONORS 1201 Freshman Symposium: Cultural Traditions II: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Course surveys Western and Non-Western Cultural Traditions from the 1800's to current times. It will introduce intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy.

**HONORS 1230 American Traditions: Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Honors seminars in the American Traditions series involve reading and discussion of texts of major importance in the development of the culture, politics, ideologies, and values which are or have been characteristic of the United States of America. Every American Traditions seminar will cover a broad range of time, and each may include contemporary issues. HONORS 1230 (Social Sciences) satisfies the American history and government requirement, and any course in the American Traditions sequence may be taken to satisfy one of the 'core' requirements for the American Studies Minor.

**HONORS 1310 Non-Western Traditions Series Humanities: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the humanities but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 1330 Non-Western Traditions Series-Social Sciences: 3 semester hours**

Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the social sciences but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 1410 Freshman Seminar In Humanities: 3 semester hours**

Seminars focus on different topics in the humanities but address themes and problems in the western cultural traditions that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading and discussion, and students will produce formal papers and participate in individual or small group presentations.

**HONORS 2010 Inquiries In The Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one of more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2020 Inquiries In The Fine And Performing Arts: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2030 Inquiries In The Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2050 Inquiries In The Natural Sciences: 1-3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2051 Inquiries in the Sciences: Laboratory or Field Work: 1 semester hour**

Prerequisites: Permission of Honors Dean. This course develops students' understanding of how the experimental procedures of the life and physical sciences are used to collect data and to develop and test scientific hypotheses. HONORS 2051 is taken as a required companion course to specific sections of HONORS 2050, (Inquiries in the Sciences), when laboratory or field work experience is essential to students' understanding of and competence in the scientific subject matter of the companion section of HONORS 2050.

**HONORS 2060 Inquiries In Business: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2070 Inquiries In Education: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2071 Inquiries in Education: 4 semester hours**

Prerequisite: Consent of the dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate, laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. HONORS 2071 meets College of Education requirements for TCH ED 2209.

**HONORS 2080 Inquiries In Nursing: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 2310 Cultural Diversity In The Humanities: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the humanities.

**HONORS 2330 Cultural Diversity In The Social Sciences: 3 semester hours**

This seminar focuses upon cultural diversity themes, texts, and perspectives within the social sciences.

**HONORS 3010 Advanced Honors Seminar In The Humanities: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3020 Advanced Honors Seminar In The Fine And Performing Arts: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3030 Advanced Honors Seminar In The Social And Behavioral Sciences: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

**HONORS 3075 Reflective Research in Education: 2-3 semester hours**

Prerequisites: Consent of Honors College Dean. Students will explore issues and trends in educational research from the perspectives offered by their own classroom experiences (as students and/or as teaching interns). Through individual research projects, discussions, and periodic status reviews, students will gain in understanding how major educational research issues arise from and interact with curriculum design and classroom pedagogy. Students who have already taken HONORS 2071 (Foundations of Teaching in American Schools) will take the course for two (2) credits.

**HONORS 3100 Honors Advanced Composition: Writing The City: 3 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Enhances critical thinking, research, discussion and writing skills by focusing on the city of St. Louis and on the specific fields of study of those enrolled in the course. Issues such as depth and development of content, voice, style, tone, correct expression, and research techniques are among the topics emphasized. Students maintain a Commonplace Book of journals, drafts, and creative writings; they also submit a minimum of four formal papers. This course is required for transfer students (two-year Honors Program) and an elective for students on the four-year program. For students on either program, HONORS 3100 meets the Advanced Composition requirement of the University.

**HONORS 3160 Honors Writing In The Sciences: 3 semester hours**

Prerequisites: Junior-level standing. This honors course, designed to meet the needs for students in the science disciplines, will satisfy the campus junior-level writing requirement. The course will stress writing observation reports, academic journals, laboratory reports and a major project suited to the specific area of study of each student enrolled in the class. Instruction will include correct documentation of science sources, synthesis techniques of research information, technology-based research skills and effective laboratory reporting methods. Four formal papers, including one large project, and several informal papers will be required for this challenging course.

**HONORS 4100 Independent Portfolio Writing: 1-2 semester hours**

Prerequisites: Senior status. Students in this course will meet with their instructor on a regular basis to discuss and revise their writing portfolio and write their master resume, career or academic resume, personal statements for graduate school, or other projects for careers or their futures. The course is required to be at least one hour and may be taken for two hours to allow for more personal time and assistance from the instructor.

**HONORS 4900 Independent Study In Honors: 1-6 semester hours**

Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Most Honors students will fulfill their Honors independent study requirements in another department or division of the university. Where this is not possible, and where academic credit seems an appropriate reward for the independent study in question, the project may be undertaken as HONORS 4900, normally as a 3-credit course. This will involve substantial reading, research, and/or field work, and will be supervised by a permanent member of the Honors College academic staff. Completed proposal forms for this course must be submitted to the Honors College not later than the deadline for university registration.

**HONORS 4910 Independent Study: Internships: 1-6 semester hours**

.

**HONORS 4915 Honors Independent Off-Campus Internship: 1-6 semester hours**

Prerequisites: Approval from Honors Dean. This course is designed for 1 to 6 hours for an outside internship, approved by the Honors College. The student will not be on campus for the hours of this internship and most work for the internship will be submitted online to the Honors Internship Faculty Member.

## Information Systems

### Courses

**INFSYS 1800 Computers And Information Systems: 3 semester hours**

This course covers the basic concepts of networked computers including the basics of file management on local and remote computers, electronic mail, Internet browsers, and web page development. Students are also exposed to applications used in business for solving problems, communicating, and making informed decisions, including word processors, presentation software, and electronic spreadsheets. Students will also develop business applications using a popular programming language or database management tool. Credit cannot be granted for both CMP SCI 1010 and INFSYS 1800.

**INFSYS 2800 Information Systems Concepts And Applications: 3 semester hours**

Prerequisites: INFSYS 1800 or satisfactory performance on proficiency exam. Course covers concepts of information systems as they relate to business functions, including web page design and e-commerce, telecommunications, systems analysis and design, ethics of information system design and use, information security, foundations of database systems and integrated business information systems. Students will also gain valuable strategies for career development, contact management, and networking.

**INFSYS 3806 Managerial Applications Of Object-Oriented Programming I: 3 semester hours**

Prerequisites: INFSYS 1800 or CMP SCI 1250, and a 2.0 overall GPA. The course provides a study of the UNIX operating system and the C++ programming language as they pertain to managerial applications. In addition, the course will introduce the use of object-oriented programming methodologies.

**INFSYS 3807 Legacy Systems: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806. Structured COBOL programming techniques for business applications are presented. Included are report generation, control breaks, output editing, debugging, tables, sort concepts, job control language, utilities, partitioned data sets, and updating of files.

**INFSYS 3810 Information Systems Analysis: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806 or permission of instructor. Aspects and methods for managing the computer and information resources of organizations. Topics include: project management, aligning IS plans with corporate plans, MIS organizational structures, demonstrating the value of systems, facility management, purchase decisions, software acquisition, software metrics, security issues, and economic evaluation, as they relate to information resources. Special cases of systems, such as Enterprise Resource Planning (EPR) systems, Supply Chain Systems, and BPO will be discussed.

**INFSYS 3815 Object Oriented Applications In Business: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806. Object-oriented programming techniques for business applications are presented. The topics are implemented in a C++ environment.

***INFSYS 3816 Managerial Application Of Object-Oriented Programming II: 3 semester hours***

Prerequisites: INFSYS 3806 and a minimum overall GPA of 2.0. This course expands object-oriented skills taught in INFSYS 3806. The emphasis in this course is on object-oriented development tools and development in a client-server environment. The data management tools will include the use of SQL to access serverbased databases.

***INFSYS 3841 Enterprise Information Systems: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800. Aspects and methods for managing the computer and information resources of organizations. Topics include: aligning IS plans with corporate plans, MIS organizational structures, demonstrating the value of MIS to senior management, facility management, purchase decisions, software acquisition, software metrics, project management, security issues, and economic evaluation, as they relate to information resources.

***INFSYS 3842 Data Networks and Security: 3 semester hours***

Prerequisites: INFSYS 1800 and a 2.0 overall GPA. The technical, managerial and security aspects of data networks as they apply to the business environment are discussed. Issues include communications components and services, network architecture, managerial implementations, organizational issues, and cost/benefits analyses.

***INFSYS 3843 Decision Support Systems for Business Intelligence: 3 semester hours***

Prerequisites: LOG OM 3300 and a minimum campus GPA of 2.0 Applications of intelligent decision support systems to support business intelligence are explored. DSS component design in response to decision making and business intelligence needs are discussed.

***INFSYS 3844 Developing Business Applications In .NET: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0. This course will enable students to design, implement, and debug object-oriented and data driven business applications in Visual Basic.NET. Students will learn application design choices, object-oriented design principles, event-driven programming, user interface programming using Windows Forms and user interface controls, data binding and database access using ADO.NET, exception handling, debugging and effective ways of working with Visual Studio.NET.

***INFSYS 3845 Database Management Systems: 3 semester hours***

Prerequisites: INFSYS 2800, INFSYS 3806, INFSYS 3816, ACCTNG 2400, and a minimum campus GPA of 2.0. This course provides an introduction to the design and use of databases in meeting business information needs. Topics include database planning, conceptual design, and data administration. The concepts are studied with projects involving the use of a current database management system.

***INFSYS 3846 E-Commerce: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800. This course provides an understanding of strategies, managerial issues, and technologies pertaining to electronic commerce in organizations. Topics include: history, business models, the virtual value chain, electronic markets, impact on organizational strategy and industry structure, analysis of successful strategies, and other emerging issues (legal, ethical, regulatory) related to managing electronic commerce, and the technical infrastructure enabling electronic commerce.

***INFSYS 3847 Web Design: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800.

This course focuses on web page planning, design, layout and construction. Topics covered include: setting up and maintaining a web site; understanding site structure, presentation, navigation and content management. HTML/XML, CSS, Dreamweaver, Fireworks, Flash, Photoshop, data access, scripting languages, and various other technologies and tools will be discussed.

***INFSYS 3848 Introduction to Information Security: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800 or permission of instructor. An introductory survey of the vast field of Information Security (InfoSec). Intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics include fundamental principles of InfoSec, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptology/cryptography, web application security, and current issues. Hands-on labs expose students to basics of penetration testing and ethical hacking. A group project is required. Course is open to all majors.

***INFSYS 3858 Advanced Security and Information Systems: 3 semester hours***

Prerequisites: INFSYS 3848 or Permission of Department Chair. This course builds upon the principles of information security. Covered in this course are a wide range of topics from networking, penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Students are exposed to virtualization, defense security, offensive security, and other forms of cyber security. Credit cannot be granted for both INFSYS 3858 and INFSYS 6858.

***INFSYS 3868 Secure Software Development: 3 semester hours***

Prerequisites: A first course in programming such as INFSYS 3806 or permission of instructor. This course provides an overview of the vast field of secure software development. The goal is to make students aware of the fundamentals of the secure software lifecycle as it relates to software development. Specifically, the course enables students to apply principles of secure development and information security management. It provides a real world application that allows the learners to experience the secure software lifecycle process by developing concrete artifacts and practicing in a lab environment. Credit cannot be granted for both INFSYS 3868 and INFSYS 6868.

**INFSYS 3878 Information Security Risk Management and Business Continuity: 3 semester hours**

Business continuity is viewed organizationally to include all company operations, and addresses information, computer systems, infrastructure, personnel, and supply chain, as well as emergencies emanating from man-made and natural disasters. This course is designed to provide the tools and concepts necessary to plan for, prevent, and when needed successfully respond to disruptions in business operations. Provided in this course is a review of important issues relating to business continuity, security, information systems policies, frameworks, information and materials management, as well as risk management from a planning, operations, and response perspective. Topics presented include incident response and disaster recovery, compliance issues, and system wide risk analysis. Students will be able to (1) assess the strengths and weaknesses of organizational strategies and determine their implications for the development and implementation of an enterprise information assurance strategy (2) evaluate an enterprise's ability to respond to disruptions in business operations (3) identify risks and implement appropriate mitigation strategies and (4) create artifacts to ensure the survival of an organization after a natural disaster or cyber attack. Credit cannot be granted for both INFSYS 3878 and INFSYS 6878.

**INFSYS 3890 Internship in Information Systems: 1-3 semester hours**

Prerequisites: Minimum business GPA of 2.5, minimum campus GPA of 2.0, completed and/or currently enrolled in at least 6 credit hours of information systems electives at the 3000 level or above, consent of supervising instructor, and consent of department chair. Students are employed in the field of information systems where they apply the knowledge and skills learned in the classroom. Professional development obtaining specialized work experience are primary goals. An information systems faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

**INFSYS 3898 Seminar in Information Systems: 1-3 semester hours**

Prerequisites: To be determined each time course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of information systems. May be repeated for credit with different topics.

**INFSYS 3899 Independent Study In Information Systems: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in information systems under the supervision of a full-time information systems faculty member.

**INFSYS 4850 Information Systems Design: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; INFSYS 3810, INFSYS 3816 and INFSYS 3845. System design, implementation, and methods of systems installation and operation are presented. A system development project is required.

**INFSYS 5800 Management Information Systems: 3 semester hours**

Same as P P ADM 6800. This course provides an overview of the established and contemporary issues related to information systems within organizations. Topics include the practices and tools associated with topics such as the management of IS-based investment projects, the design and implementation of IS, the alignment of IS strategy with organizational strategy, information security and privacy, and gaining a competitive advantage through IS.

**INFSYS 5890 Graduate Internship in Information Systems: 1-6 semester hours**

Prerequisites: INFSYS 6840 or permission of instructor. The internship will be a supervised field experience in a US-based business/organization or a US-based international business/organization. Students will be employed off-campus for a 10-16 week period on projects directed by host organization supervisors in consultation with a UM-St. Louis faculty member. The project requires students to apply IS concepts to a real-world problem. The project does not duplicate, but builds upon material in the IS curriculum. A professional written report will be required.

**INFSYS 5899 Individual Research in Information Systems: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Information Systems under the guidance of a specific professor.

**INFSYS 6805 Applications Of Programming For Business Solutions: 3 semester hours**

Prerequisite: Graduate standing. This course provides a study of business-oriented programming. A programming language will be introduced and discussed in detail. Emphasis will be on program definition and the use of such programs in business-oriented applications.

**INFSYS 6806 Managerial Applications Of Object-Oriented Technologies: 3 semester hours**

Prerequisite: INFSYS 6805. This course deals with business-oriented programming in an object oriented environment. The emphasis will be on program definition, and tools and development in a client-server environment. The course will involve the study of objectoriented language in addition to object-oriented methodologies for systems development.

**INFSYS 6808 Internet Programming For Business: 3 semester hours**

Prerequisite: INFSYS 6806. Focus on web-based applications development for business. It will begin with the fundamentals of web-based computing, including web client and server interaction, the MIME standard, server and client data frame headers, the CGI standard, and error conditions as they pertain to business applications. In addition, JAVA will be introduced to build web-based GUI-interfaces and back-end servers. Finally, business applications issues such as firewalls, proxy servers and data encryption using secure servers will be included.

**INFSYS 6833 Decision Support Systems for Business Intelligence: 3 semester hours**

Prerequisite: LOG OM 5300. Applications of intelligent decision support systems to support business intelligence are explored. DSS component design in response to decision making and business intelligence needs are discussed.

**INFSYS 6835 IT-Enabled Business: 3 semester hours**

Prerequisite: INFSYS 5800. IT-enabled business focuses on business models, processes, and activities made possible by the internet. The course includes theoretic aspects of e-commerce: consumer relationship management, supply chain management, inventory management, business strategy, auctions, and portals. Issues associated with electronic commerce such as security, privacy, content selection and rating, intellectual property rights, authentication, encryption, acceptable use policies, and legal liabilities are explored. Particular attention is paid to IT-enabled entrepreneurship and business creation, and IT use in small to medium sized enterprises. Case studies drawn from actual business applications will be used to reinforce theory.

**INFSYS 6836 Management of Data Networks and Security: 3 semester hours**

Prerequisite: INFSYS 5800 (may be taken concurrently). This course addresses issues such as data security, communications components and services, network architecture, managerial implementations, organizational issues, and cost/benefit analyses.

**INFSYS 6837 Information Systems Architecture: 3 semester hours**

Prerequisite: INFSYS 6836 This course explores a wide range of topics necessary for understanding and managing distributed computing technology. A wide range of infrastructure and "middleware" architectural components will be explored. Finally, the course will provide a framework for understanding the capabilities and shortcomings of various distributed computing architectures, technical standards and their implications for interoperability of components.

**INFSYS 6838 Business Processes: Design, Management & Integration: 3 semester hours**

Prerequisite: INFSYS 5800. Major business processes are identified and analyzed. Issues related to characteristics, goals, benefits and costs of enterprise-wide design, and the role of information technology during the design process are discussed. Workflow automation, process modeling, analysis, automation, and redesign techniques are discussed, including the following: process inputs & entrance criteria, process outputs & exit criteria, feedback mechanisms & process correction, alternate theoretical frames for business process design, and impacts on business process design from socio-cultural forces. Case studies are used to illustrate the concepts.

**INFSYS 6840 Information Systems Analysis: 3 semester hours**

Prerequisite: INFSYS 6805. The theory and practice of structured analysis are presented. Topics may include: traditional vs. structured analysis methods, requirements analysis, user/analyst interaction, investigation of existing systems, human/machine interfaces, CASE tools, and workbenches.

**INFSYS 6845 Database Management Systems: 3 semester hours**

Prerequisites: INFSYS 5800, INFSYS 6805. The course introduces the concepts of Database Management Systems for business applications. Issues in database architecture, design, administration, and implementation are covered. Projects are assigned on a mainframe DBMS and a microcomputer based DBMS to illustrate the concepts & applications.

**INFSYS 6846 Management Of Global Sourcing: 3 semester hours**

Same as INTL BUS 6846. Prerequisite: INFSYS 5800. Largely fostered by the spread of the Internet, global software development standards, global software packages, and fewer trade restrictions, organizations now regularly source software development, software maintenance, systems upgrades, platform transitions, help desks, and other IS-related work globally. This course covers topics to help organizations manage global sourcing of IS work, including sourcing strategies, sourcing models (captive, joint venture, outsourcing), role of program management offices, supplier selection, engagement models, and special practices required to manage globally dispersed teams. Risk mitigation practices associated with cultural, legal, political, infrastructure, logistical, and human resource issues are also addressed.

**INFSYS 6847 Project Management: 3 semester hours**

Prerequisite: INFSYS 5800. Effective project management ensures that a project is completed on time, within budget, and has high quality. The purpose of this class is to examine the task of project resource management with a focus on IT and services. It will cover conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class will examine risk management, change management, critical chain management, build vs. buy analysis, package vs. custom solutions, vendor qualification and selection, and the roles of certification in the process. The class will also cover the management of programs or a portfolio of IT projects.

**INFSYS 6848 Knowledge Management And Business Intelligence: 3 semester hours**

Prerequisite: INFSYS 5800 Knowledge management (KM) is the process of creating, and drawing value from, an organization's intellectual assets. It deals with how to best leverage the organization's knowledge internally as well as externally. The emphasis on knowledge management within business organizations has risen dramatically in the last few years, to some extent as a result of the rapid progress in information technology capabilities. The course covers the following topics: KM tools, technologies, and systems, including knowledge repositories, knowledge portals, and expert seeker systems, creating and sustaining a knowledge sharing culture, managing and measuring intellectual capital, managing knowledge in networked organizations, including interorganizational alliances and supply chains, aligning knowledge with business strategy, risks of knowledge loss and knowledge leakage, business intelligence, and social aspects of knowledge management.

**INFSYS 6849 Data Warehouse Design and Implementation: 3 semester hours**

Prerequisites: INFSYS 6845 or consent of instructor. Course will cover different design configurations for structuring and organizing data in a data warehouse. Formal methodologies for the development of data warehouses will also be discussed and implemented.

**INFSYS 6850 Information Systems Design: 3 semester hours**

Prerequisites: INFSYS 6840 and INFSYS 6845 This course builds upon the analysis techniques presented in INFSYS 6840. It requires the student, usually working in a group to design and implement a system in a real-world environment. Advanced design concepts are presented to support the students in their project work.

**INFSYS 6851 Practicum in Business Intelligence: 3 semester hours**

Prerequisites: INFSYS 6833, INFSYS 6849, and LOG OM 6345. This course will provide the context for students to integrate, synthesize and apply their Business Intelligence skills in an actual business organization. Project work will be jointly supervised and coordinated by a faculty member and a supervisor in the relevant business organization.

**INFSYS 6860 Data Integration: 3 semester hours**

Prerequisites: Consent of Instructor. This course discusses the theories and techniques for blending unstructured and structured data including Big Data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. Using mini-cases and assignments, it provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics.

**INFSYS 6881 Management Of Transnational Information Systems: 3 semester hours**

Same as INTL BUS 6881. Prerequisites: INFSYS 5800, INFSYS 6825 (may be taken concurrently). The course presents concepts of managing global information technology. Issues covered include: global information technology, systems development, electronic data interchange, cross-border data flows, and national and international information structures. Further topics may include information technology enabled economic development, global outsourcing of information systems services, and social, organizational and ethical implications.

**INFSYS 6891 Seminar in Information Systems: 3 semester hours**

Prerequisites: INFSYS 5800. Topics of current interest in management information systems. Topics may include international information systems, electronic commerce, decision support systems, information systems strategy, telecommunications, and information systems management.

**Courses****INFSYS 1800 Computers And Information Systems: 3 semester hours**

This course covers the basic concepts of networked computers including the basics of file management on local and remote computers, electronic mail, Internet browsers, and web page development. Students are also exposed to applications used in business for solving problems, communicating, and making informed decisions, including word processors, presentation software, and electronic spreadsheets. Students will also develop business applications using a popular programming language or database management tool. Credit cannot be granted for both CMP SCI 1010 and INFSYS 1800.

**INFSYS 2800 Information Systems Concepts And Applications: 3 semester hours**

Prerequisites: INFSYS 1800 or satisfactory performance on proficiency exam. Course covers concepts of information systems as they relate to business functions, including web page design and e-commerce, telecommunications, systems analysis and design, ethics of information system design and use, information security, foundations of database systems and integrated business information systems. Students will also gain valuable strategies for career development, contact management, and networking.

**INFSYS 3806 Managerial Applications Of Object-Oriented Programming I: 3 semester hours**

Prerequisites: INFSYS 1800 or CMP SCI 1250, and a 2.0 overall GPA. The course provides a study of the UNIX operating system and the C++ programming language as they pertain to managerial applications. In addition, the course will introduce the use of object-oriented programming methodologies.

**INFSYS 3807 Legacy Systems: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806. Structured COBOL programming techniques for business applications are presented. Included are report generation, control breaks, output editing, debugging, tables, sort concepts, job control language, utilities, partitioned data sets, and updating of files.

**INFSYS 3810 Information Systems Analysis: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806 or permission of instructor. Aspects and methods for managing the computer and information resources of organizations. Topics include: project management, aligning IS plans with corporate plans, MIS organizational structures, demonstrating the value of systems, facility management, purchase decisions, software acquisition, software metrics, security issues, and economic evaluation, as they relate to information resources. Special cases of systems, such as Enterprise Resource Planning (EPR) systems, Supply Chain Systems, and BPO will be discussed.

**INFSYS 3815 Object Oriented Applications In Business: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 3806. Object-oriented programming techniques for business applications are presented. The topics are implemented in a C++ environment.

**INFSYS 3816 Managerial Application Of Object-Oriented Programming II: 3 semester hours**

Prerequisites: INFSYS 3806 and a minimum overall GPA of 2.0. This course expands object-oriented skills taught in INFSYS 3806. The emphasis in this course is on object-oriented development tools and development in a client-server environment. The data management tools will include the use of SQL to access serverbased databases.

**INFSYS 3841 Enterprise Information Systems: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800. Aspects and methods for managing the computer and information resources of organizations. Topics include: aligning IS plans with corporate plans, MIS organizational structures, demonstrating the value of MIS to senior management, facility management, purchase decisions, software acquisition, software metrics, project management, security issues, and economic evaluation, as they relate to information resources.

**INFSYS 3842 Data Networks and Security: 3 semester hours**

Prerequisites: INFSYS 1800 and a 2.0 overall GPA. The technical, managerial and security aspects of data networks as they apply to the business environment are discussed. Issues include communications components and services, network architecture, managerial implementations, organizational issues, and cost/benefits analyses.

**INFSYS 3843 Decision Support Systems for Business Intelligence: 3 semester hours**

Prerequisites: LOG OM 3300 and a minimum campus GPA of 2.0. Applications of intelligent decision support systems to support business intelligence are explored. DSS component design in response to decision making and business intelligence needs are discussed.

**INFSYS 3844 Developing Business Applications In .NET: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0. This course will enable students to design, implement, and debug object-oriented and data driven business applications in Visual Basic.NET. Students will learn application design choices, object-oriented design principles, event-driven programming, user interface programming using Windows Forms and user interface controls, data binding and database access using ADO.NET, exception handling, debugging and effective ways of working with Visual Studio.NET.

**INFSYS 3845 Database Management Systems: 3 semester hours**

Prerequisites: INFSYS 2800, INFSYS 3806, INFSYS 3816, ACCTNG 2400, and a minimum campus GPA of 2.0. This course provides an introduction to the design and use of databases in meeting business information needs. Topics include database planning, conceptual design, and data administration. The concepts are studied with projects involving the use of a current database management system.

**INFSYS 3846 E-Commerce: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800. This course provides an understanding of strategies, managerial issues, and technologies pertaining to electronic commerce in organizations. Topics include: history, business models, the virtual value chain, electronic markets, impact on organizational strategy and industry structure, analysis of successful strategies, and other emerging issues (legal, ethical, regulatory) related to managing electronic commerce, and the technical infrastructure enabling electronic commerce.

**INFSYS 3847 Web Design: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800. This course focuses on web page planning, design, layout and construction. Topics covered include: setting up and maintaining a web site; understanding site structure, presentation, navigation and content management. HTML/XML, CSS, Dreamweaver, Fireworks, Flash, Photoshop, data access, scripting languages, and various other technologies and tools will be discussed.

**INFSYS 3848 Introduction to Information Security: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and INFSYS 2800 or permission of instructor. An introductory survey of the vast field of Information Security (InfoSec). Intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics include fundamental principles of InfoSec, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptology/cryptography, web application security, and current issues. Hands-on labs expose students to basics of penetration testing and ethical hacking. A group project is required. Course is open to all majors.

**INFSYS 3858 Advanced Security and Information Systems: 3 semester hours**

Prerequisites: INFSYS 3848 or Permission of Department Chair. This course builds upon the principles of information security. Covered in this course are a wide range of topics from networking, penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Students are exposed to virtualization, defense security, offensive security, and other forms of cyber security. Credit cannot be granted for both INFSYS 3858 and INFSYS 6858.

**INFSYS 3868 Secure Software Development: 3 semester hours**

Prerequisites: A first course in programming such as INFSYS 3806 or permission of instructor. This course provides an overview of the vast field of secure software development. The goal is to make students aware of the fundamentals of the secure software lifecycle as it relates to software development. Specifically, the course enables students to apply principles of secure development and information security management. It provides a real world application that allows the learners to experience the secure software lifecycle process by developing concrete artifacts and practicing in a lab environment. Credit cannot be granted for both INFSYS 3868 and INFSYS 6868.

**INFSYS 3878 Information Security Risk Management and Business Continuity: 3 semester hours**

Business continuity is viewed organizationally to include all company operations, and addresses information, computer systems, infrastructure, personnel, and supply chain, as well as emergencies emanating from man-made and natural disasters. This course is designed to provide the tools and concepts necessary to plan for, prevent, and when needed successfully respond to disruptions in business operations. Provided in this course is a review of important issues relating to business continuity, security, information systems policies, frameworks, information and materials management, as well as risk management from a planning, operations, and response perspective. Topics presented include incident response and disaster recovery, compliance issues, and system wide risk analysis. Students will be able to (1) assess the strengths and weaknesses of organizational strategies and determine their implications for the development and implementation of an enterprise information assurance strategy (2) evaluate an enterprise's ability to respond to disruptions in business operations (3) identify risks and implement appropriate mitigation strategies and (4) create artifacts to ensure the survival of an organization after a natural disaster or cyber attack. Credit cannot be granted for both INFSYS 3878 and INFSYS 6878.

**INFSYS 3890 Internship in Information Systems: 1-3 semester hours**

Prerequisites: Minimum business GPA of 2.5, minimum campus GPA of 2.0, completed and/or currently enrolled in at least 6 credit hours of information systems electives at the 3000 level or above, consent of supervising instructor, and consent of department chair. Students are employed in the field of information systems where they apply the knowledge and skills learned in the classroom. Professional development obtaining specialized work experience are primary goals. An information systems faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

**INFSYS 3898 Seminar in Information Systems: 1-3 semester hours**

Prerequisites: To be determined each time course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of information systems. May be repeated for credit with different topics.

**INFSYS 3899 Independent Study In Information Systems: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in information systems under the supervision of a full-time information systems faculty member.

**INFSYS 4850 Information Systems Design: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; INFSYS 3810, INFSYS 3816 and INFSYS 3845. System design, implementation, and methods of systems installation and operation are presented. A system development project is required.

**INFSYS 5800 Management Information Systems: 3 semester hours**

Same as P P ADM 6800. This course provides an overview of the established and contemporary issues related to information systems within organizations. Topics include the practices and tools associated with topics such as the management of IS-based investment projects, the design and implementation of IS, the alignment of IS strategy with organizational strategy, information security and privacy, and gaining a competitive advantage through IS.

***INFSYS 5890 Graduate Internship in Information Systems: 1-6 semester hours***

Prerequisites: INFSYS 6840 or permission of instructor. The internship will be a supervised field experience in a US-based business/organization or a US-based international business/organization. Students will be employed off-campus for a 10-16 week period on projects directed by host organization supervisors in consultation with a UM-St. Louis faculty member. The project requires students to apply IS concepts to a real-world problem. The project does not duplicate, but builds upon material in the IS curriculum. A professional written report will be required.

***INFSYS 5899 Individual Research in Information Systems: 1-3 semester hours***

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Information Systems under the guidance of a specific professor.

***INFSYS 6805 Applications Of Programming For Business Solutions: 3 semester hours***

Prerequisite: Graduate standing. This course provides a study of business-oriented programming. A programming language will be introduced and discussed in detail. Emphasis will be on program definition and the use of such programs in business-oriented applications.

***INFSYS 6806 Managerial Applications Of Object-Oriented Technologies: 3 semester hours***

Prerequisite: INFSYS 6805. This course deals with business-oriented programming in an object oriented environment. The emphasis will be on program definition, and tools and development in a client-server environment. The course will involve the study of objectoriented language in addition to object-oriented methodologies for systems development.

***INFSYS 6808 Internet Programming For Business: 3 semester hours***

Prerequisite: INFSYS 6806. Focus on web-based applications development for business. It will begin with the fundamentals of web-based computing, including web client and server interaction, the MIME standard, server and client data frame headers, the CGI standard, and error conditions as they pertain to business applications. In addition, JAVA will be introduced to build web-based GUI-interfaces and back-end servers. Finally, business applications issues such as firewalls, proxy servers and data encryption using secure servers will be included.

***INFSYS 6833 Decision Support Systems for Business Intelligence: 3 semester hours***

Prerequisite: LOG OM 5300. Applications of intelligent decision support systems to support business intelligence are explored. DSS component design in response to decision making and business intelligence needs are discussed.

***INFSYS 6835 IT-Enabled Business: 3 semester hours***

Prerequisite: INFSYS 5800. IT-enabled business focuses on business models, processes, and activities made possible by the internet. The course includes theoretic aspects of e-commerce: consumer relationship management, supply chain management, inventory management, business strategy, auctions, and portals. Issues associated with electronic commerce such as security, privacy, content selection and rating, intellectual property rights, authentication, encryption, acceptable use policies, and legal liabilities are explored. Particular attention is paid to IT-enabled entrepreneurship and business creation, and IT use in small to medium sized enterprises. Case studies drawn from actual business applications will be used to reinforce theory.

***INFSYS 6836 Management of Data Networks and Security: 3 semester hours***

Prerequisite: INFSYS 5800 (may be taken concurrently). This course addresses issues such as data security, communications components and services, network architecture, managerial implementations, organizational issues, and cost/benefit analyses.

***INFSYS 6837 Information Systems Architecture: 3 semester hours***

Prerequisite: INFSYS 6836 This course explores a wide range of topics necessary for understanding and managing distributed computing technology. A wide range of infrastructure and "middleware" architectural components will be explored. Finally, the course will provide a framework for understanding the capabilities and shortcomings of various distributed computing architectures, technical standards and their implications for interoperability of components.

***INFSYS 6838 Business Processes: Design, Management & Integration: 3 semester hours***

Prerequisite: INFSYS 5800. Major business processes are identified and analyzed. Issues related to characteristics, goals, benefits and costs of enterprise-wide design, and the role of information technology during the design process are discussed. Workflow automation, process modeling, analysis, automation, and redesign techniques are discussed, including the following: process inputs & entrance criteria, process outputs & exit criteria, feedback mechanisms & process correction, alternate theoretical frames for business process design, and impacts on business process design from socio-cultural forces. Case studies are used to illustrate the concepts.

***INFSYS 6840 Information Systems Analysis: 3 semester hours***

Prerequisite: INFSYS 6805. The theory and practice of structured analysis are presented. Topics may include: traditional vs. structured analysis methods, requirements analysis, user/analyst interaction, investigation of existing systems, human/machine interfaces, CASE tools, and workbenches.

***INFSYS 6845 Database Management Systems: 3 semester hours***

Prerequisites: INFSYS 5800, INFSYS 6805. The course introduces the concepts of Database Management Systems for business applications. Issues in database architecture, design, administration, and implementation are covered. Projects are assigned on a mainframe DBMS and a microcomputer based DBMS to illustrate the concepts & applications.

***INFSYS 6846 Management Of Global Sourcing: 3 semester hours***

Same as INTL BUS 6846. Prerequisite: INFSYS 5800. Largely fostered by the spread of the Internet, global software development standards, global software packages, and fewer trade restrictions, organizations now regularly source software development, software maintenance, systems upgrades, platform transitions, help desks, and other IS-related work globally. This course covers topics to help organizations manage global sourcing of IS work, including sourcing strategies, sourcing models (captive, joint venture, outsourcing), role of program management offices, supplier selection, engagement models, and special practices required to manage globally dispersed teams. Risk mitigation practices associated with cultural, legal, political, infrastructure, logistical, and human resource issues are also addressed.

**INFSYS 6847 Project Management: 3 semester hours**

Prerequisite: INFSYS 5800. Effective project management ensures that a project is completed on time, within budget, and has high quality. The purpose of this class is to examine the task of project resource management with a focus on IT and services. It will cover conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class will examine risk management, change management, critical chain management, build vs. buy analysis, package vs. custom solutions, vendor qualification and selection, and the roles of certification in the process. The class will also cover the management of programs or a portfolio of IT projects.

**INFSYS 6848 Knowledge Management And Business Intelligence: 3 semester hours**

Prerequisite: INFSYS 5800 Knowledge management (KM) is the process of creating, and drawing value from, an organization's intellectual assets. It deals with how to best leverage the organization's knowledge internally as well as externally. The emphasis on knowledge management within business organizations has risen dramatically in the last few years, to some extent as a result of the rapid progress in information technology capabilities. The course covers the following topics: KM tools, technologies, and systems, including knowledge repositories, knowledge portals, and expert seeker systems, creating and sustaining a knowledge sharing culture, managing and measuring intellectual capital, managing knowledge in networked organizations, including interorganizational alliances and supply chains, aligning knowledge with business strategy, risks of knowledge loss and knowledge leakage, business intelligence, and social aspects of knowledge management.

**INFSYS 6849 Data Warehouse Design and Implementation: 3 semester hours**

Prerequisites: INFSYS 6845 or consent of instructor. Course will cover different design configurations for structuring and organizing data in a data warehouse. Formal methodologies for the development of data warehouses will also be discussed and implemented.

**INFSYS 6850 Information Systems Design: 3 semester hours**

Prerequisites: INFSYS 6840 and INFSYS 6845 This course builds upon the analysis techniques presented in INFSYS 6840. It requires the student, usually working in a group to design and implement a system in a real-world environment. Advanced design concepts are presented to support the students in their project work.

**INFSYS 6851 Practicum in Business Intelligence: 3 semester hours**

Prerequisites: INFSYS 6833, INFSYS 6849, and LOG OM 6345. This course will provide the context for students to integrate, synthesize and apply their Business Intelligence skills in an actual business organization. Project work will be jointly supervised and coordinated by a faculty member and a supervisor in the relevant business organization.

**INFSYS 6860 Data Integration: 3 semester hours**

Prerequisites: Consent of Instructor. This course discusses the theories and techniques for blending unstructured and structured data including Big Data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. Using mini-cases and assignments, it provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics.

**INFSYS 6881 Management Of Transnational Information Systems: 3 semester hours**

Same as INTL BUS 6881. Prerequisites: INFSYS 5800, INFSYS 6825 (may be taken concurrently). The course presents concepts of managing global information technology. Issues covered include: global information technology, systems development, electronic data interchange, cross-border data flows, and national and international information structures. Further topics may include information technology enabled economic development, global outsourcing of information systems services, and social, organizational and ethical implications.

**INFSYS 6891 Seminar in Information Systems: 3 semester hours**

Prerequisites: INFSYS 5800. Topics of current interest in management information systems. Topics may include international information systems, electronic commerce, decision support systems, information systems strategy, telecommunications, and information systems management.

## Interdisciplinary Courses

### Courses

**INTDSC 1003 University Studies: 1 semester hour**

This course, required of all new freshmen in the College of Arts and Science and the College of Fine Arts and Communication, is designed to assist students in making the transition to the university experience and to UMSL by giving students the knowledge and tools needed to succeed as a scholar. The course will also familiarize students with the relationship between their education and their career and personal goals, and will assist in developing positive connections with faculty, staff, and peers at UMSL. Students will learn about faculty expectations, support services, and student life, as well as academic disciplines. The course counts toward the 120 credit hours needed for graduation.

**INTDSC 1004 SUCCEED Special Topics: 1-3 semester hours**

Prerequisites: By consent of SUCCEED director. This course is designed to assist students in the SUCCEED program make the transition to the university experience and to UMSL. This course gives students in SUCCEED the opportunity to be co-enrolled in courses that meet their interests and abilities through a mutual agreement between SUCCEED staff and UMSL course instructors regarding enrollment and student expectations.

**INTDSC 1010 Information Research & Student Success: 1 semester hour**

Students will use online library resources to learn search techniques for different types of information. Course content will be delivered through interactive, online tutorials and short, informative videos. Students will develop an understanding of academic research that will set a foundation for critical thinking skills. The course will help students in practical ways, such as for researching term papers, but also in more abstract ways, such as exposing them to the world of scholarship and academic knowledge.

**INTDSC 1030 Language and Communicative Arts Across the Disciplines: 3 semester hours**

Prerequisites: None. This course is designed to advance the academic skills of university-level students. This course consists of listening to academic lectures across the disciplines; reading texts and articles to supplement lectures; writing summaries, essays and responses to exam questions; understanding and editing grammar and sentence structure; phonetics and word stress patterns; presentation skills; and advancing skills in note-taking, critical thinking, and comprehension of advanced college-level vocabulary of various fields of study.

**INTDSC 1220 Special Topics In Gerontology: 3 semester hours**

Same as GERON 1220. Selected topics dealing with various aspects of gerontology. The specific content of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology Director.

**INTDSC 1700 Major and Career Exploration: 1 semester hour**

This course is designed to provide students with the opportunity to learn & explore various majors and career paths within a structured setting. Both informative and interactive, the course will provide students with the opportunity to learn broadly about college majors and their relationship to the 'world of work,' while also researching specifically the options they are interested in pursuing. The course seeks to assist students with answering two questions, "What do I want to study?" and "How do I want to make a life for myself (and family)?" Components of the course will also educate students about the current and projected employment market, and how to further research pertinent career information.

**INTDSC 1999 Big History: From the Big Bang to the Blackberry: 3-6 semester hours**

Same As HIST 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, field trips, and group discussions.

**INTDSC 3010 Peer Mentoring: 1-3 semester hours**

Prerequisites: Instructor's consent required. The objective of this interdisciplinary course is to prepare and support undergraduate students working across campus as learning assistants, tutors, peer mentors, student leaders, etc. The course will support the development of general pedagogical knowledge of active learning, leadership and facilitation skills, and effective communication and listening skills, that they will use to facilitate learning in settings where students are working collaboratively, reviewing course content, or receiving supplemental instruction to guide their success. This course may be repeated for up to 6 credit hours.

## Courses

**INTDSC 1003 University Studies: 1 semester hour**

This course, required of all new freshmen in the College of Arts and Science and the College of Fine Arts and Communication, is designed to assist students in making the transition to the university experience and to UMSL by giving students the knowledge and tools needed to succeed as a scholar. The course will also familiarize students with the relationship between their education and their career and personal goals, and will assist in developing positive connections with faculty, staff, and peers at UMSL. Students will learn about faculty expectations, support services, and student life, as well as academic disciplines. The course counts toward the 120 credit hours needed for graduation.

**INTDSC 1004 SUCCEED Special Topics: 1-3 semester hours**

Prerequisites: By consent of SUCCEED director. This course is designed to assist students in the SUCCEED program make the transition to the university experience and to UMSL. This course gives students in SUCCEED the opportunity to be co-enrolled in courses that meet their interests and abilities through a mutual agreement between SUCCEED staff and UMSL course instructors regarding enrollment and student expectations.

**INTDSC 1010 Information Research & Student Success: 1 semester hour**

Students will use online library resources to learn search techniques for different types of information. Course content will be delivered through interactive, online tutorials and short, informative videos. Students will develop an understanding of academic research that will set a foundation for critical thinking skills. The course will help students in practical ways, such as for researching term papers, but also in more abstract ways, such as exposing them to the world of scholarship and academic knowledge.

**INTDSC 1030 Language and Communicative Arts Across the Disciplines: 3 semester hours**

Prerequisites: None. This course is designed to advance the academic skills of university-level students. This course consists of listening to academic lectures across the disciplines; reading texts and articles to supplement lectures; writing summaries, essays and responses to exam questions; understanding and editing grammar and sentence structure; phonetics and word stress patterns; presentation skills; and advancing skills in note-taking, critical thinking, and comprehension of advanced college-level vocabulary of various fields of study.

**INTDSC 1220 Special Topics In Gerontology: 3 semester hours**

Same as GERON 1220. Selected topics dealing with various aspects of gerontology. The specific content of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology Director.

**INTDSC 1700 Major and Career Exploration: 1 semester hour**

This course is designed to provide students with the opportunity to learn & explore various majors and career paths within a structured setting. Both informative and interactive, the course will provide students with the opportunity to learn broadly about college majors and their relationship to the 'world of work,' while also researching specifically the options they are interested in pursuing. The course seeks to assist students with answering two questions, "What do I want to study?" and "How do I want to make a life for myself (and family)?" Components of the course will also educate students about the current and projected employment market, and how to further research pertinent career information.

**INTDSC 1999 Big History: From the Big Bang to the Blackberry: 3-6 semester hours**

Same As HIST 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, field trips, and group discussions.

**INTDSC 3010 Peer Mentoring: 1-3 semester hours**

The objective of this interdisciplinary course is to prepare and support undergraduate students working across campus as learning assistants, tutors, peer mentors, student leaders, etc. The course will support the development of general pedagogical knowledge of active learning, leadership and facilitation skills, and effective communication and listening skills, that they will use to facilitate learning in settings where students are working collaboratively, reviewing course content, or receiving supplemental instruction to guide their success. This course may be repeated for up to 6 credit hours.

## International Business

## Courses

### ***INTL BUS 3280 The Law Of International Business Transactions: 3 semester hours***

Prerequisites: BUS AD 2900 or consent of the instructor. A study of the role and function of International Law and national laws in the regulation of international business transactions. The impact of various legal regimes on import/export transactions, foreign investments, and the operations of multinational enterprises will be included. The role of national governments, supra-national governmental organizations, and non-governmental organizations in forming and administering the international legal environment will be studied.

### ***INTL BUS 3281 Business In China: 3 semester hours***

Prerequisites: A minimum campus GPA of 2.0; and junior standing. This course introduces students to the practices of doing business in China. Students will be introduced to the Chinese economic and business environment. Issues related to trade and foreign direct investment in China will be discussed. The course adopts an innovative approach, utilizing lectures, case analysis, projects, and student presentations.

### ***INTL BUS 3282 Managing The Global Workforce: 3 semester hours***

Prerequisite: A minimum of 2.0 campus GPA. In addition, MGMT 3600 and at least one of the following: MGMT 3611 or MGMT 3621 or enrollment in Honors College or consent of instructor. A study of the international dimensions of organizational behavior and human resource management. The course provides an overview of the tools and skills that are necessary to understand and manage people in global organizations. Topics include motivation, leadership, communication, hiring, training, and compensation.

### ***INTL BUS 3283 International Business And Society: 3 semester hours***

Encompasses the readings, lectures, company and government agency visits, and cultural visits that comprise annual Country Study Tours, (e.g., Austria, Japan, Thailand, etc.). The program includes 45 contact hours or more of classroom lectures covering aspects of the chosen country's business and society, in-depth pre-departure cross-cultural orientation and training supplemented by briefings on the country's economy and on U.S. market penetration by the Commercial Service, U.S. Embassy; a briefing by the in-country State of Missouri representative; briefings by host country agencies; company visits and factory tours; and tours of cultural sites. Student evaluation will be based on active participation and on a research paper based on readings, lectures, interviews and field observations.

### ***INTL BUS 3284 The Japanese Management System: 3 semester hours***

Prerequisites: MGMT 3600 This course provides an introduction to various aspects of the contemporary Japanese business system. The emphasis is on interpretation of issues from a managerial perspective. Topics include an overview of Japan's economic growth, government policies, industrial and financial structure of Japanese business, labor-management relations, internal management practices, international competitive strategies, managing U.S. subsidiaries in Japan, penetrating the Japanese market, Japanese investment in the U.S.A., and current issues in U.S.-Japan economic relations.

### ***INTL BUS 3285 Role Of The Global Corporation: 3 semester hours***

Prerequisites: A minimum 2.0 campus GPA and MGMT 3600 or permission of the instructor. The purpose of this course is to create awareness of controversial issues about international business. Students will gain a better understanding of resistance to and criticism of international business and will become better prepared for dealing with these issues and problems.

### ***INTL BUS 3286 International Business Ethics: 3 semester hours***

Same as PHIL 3286. This course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other "corrupt" practices, respect for intellectual property, etc. Frequent short papers will be assigned.

### ***INTL BUS 3289 Practicum In International Business: 3 semester hours***

Prerequisites: At least one international business course, 2.0 campus GPA and completion of an approval form. Students will apply both their language skills and knowledge of international business by working for a three month period in an organization located outside the student's country of origin. This course requires students to prepare a research report summarizing the global experience and how it relates to the international business program.

### ***INTL BUS 3290 Internship In International Business: 3-6 semester hours***

Prerequisites: ECON 1001 and ECON 1002, ACCTNG 2400 and ACCTNG 2410, an additional 12 hours in Business Administration, concurrent enrollment in a UM overseas program; also a minimum overall gpa of 2.0. The internship will be a supervised field experience in a business/ international organization at a foreign site. Students will work for 10 weeks on projects directed by host-organization supervisors in consultation with a UM-St. Louis faculty member. Prior to the field experience students will receive training that includes familiarization with the language and practices of the country's business, the background of the host firm, and international information sources. The student will complete a written report of his/her project. Course may not be repeated for more than 6 hours credit.

### ***INTL BUS 3299 Independent Study In International Business: 1-3 semester hours***

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator of the specific discipline. Special individual study in international business under the supervision of an approved faculty member.

### ***INTL BUS 3580 International Corporate Finance: 3 semester hours***

Same as FINANCE 3580. Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This course explores corporate finance in the context of a global environment. Financial managers for an international firm must deal with all the normal problems faced by domestic corporations plus additional foreign exchange and political risks. Class discussions will focus on applying financial techniques to decision making in foreign operations. Students are required to work in a group to undertake a project related to international finance.

### ***INTL BUS 3582 International Investments: 3 semester hours***

Same as FINANCE 3582. Prerequisites: FINANCE 3500. This course explores the concepts of investing and hedging risk management, portfolio diversification, currency risk, asset pricing, and alternative portfolio strategies. Techniques for using derivatives are discussed in the context of hedging exchange rate risk. Reading foreign exchange quotes and understanding the functioning of global markets is central to the course. A prior course in investments is recommended but not required.

**INTL BUS 3680 International Management: 3 semester hours**

Same as MGMT 3680. Prerequisites: A minimum 2.0 campus GPA. In addition, ECON 1002 and MGMT 3600; or consent of the instructor. A study of international business and management practices. Topics covered include an introduction to international management and the multinational enterprise, the cultural environment of international management, planning in an international setting, organizing for international operations, directing international operations, international staffing, preparing employees for international assignments, and the control process in an international context.

**INTL BUS 3780 International Marketing: 3 semester hours**

Same as MKTG 3780. Prerequisites: MKTG 3700 and a 2.0 overall GPA. Marketing management problems, techniques and strategies needed to apply the marketing concept to the world marketplace. Understanding a country's cultural and environmental impact on the marketing plan is emphasized, as well as competing in markets of various cultures. Worldwide consumerism, economic and social development, the spread of multinational corporations, business ethics, and current economic and marketing issues are examined.

**INTL BUS 3787 Marketing in the European Union: 3 semester hours**

Same as MKTG 3787. Prerequisites: MKTG 3780 or instructor's permission. The European Union (EU) is both a major customer and major competitor of the United States. The inclusion of many of the Eastern European countries into the EU has added another challenge to our ability to trade in this area. The better we understand the people, institutions and policies of the EU, the better positioned we will be to conduct business effectively. This course will emphasize understanding the institutional structure that unites the European Union as well as the cultural and political diversity of its members, and provide insights into how business activity functions in the European Environment.

**INTL BUS 4280 International Business Experience: 0 semester hours**

Students with an International Business emphasis must complete one of the following international experience requirements: (a) study abroad for three or more credit hours, (b) complete a minimum of one year international experience (e.g., Peace Corps, volunteer work, missionary work, an international posting by an organization) within 5 years of entering the program, or (c) complete an international internship approved by the International Business Institute. May be taken on a satisfactory/unsatisfactory basis only.

**INTL BUS 4281 Entrepreneurship in the Global Environment: 3 semester hours**

Prerequisites: ECON 1002; ACCTNG 2410; MKTG 3700. This course explores changes in the planet's physical environment and ways of reversing, retarding or coping with those changes. Students will be required to develop proposals for new business ventures that have as a goal preservation or restoration of the natural environment.

**INTL BUS 4289 International Strategic Management: 3 semester hours**

Prerequisites: A minimum 2.0 campus GPA and INTL BUS 3282, MKTG 3780 and FINANCE 3580 or consent of instructor. A study of the international dimensions of strategic management. Provides an introduction to the key concepts and tools necessary for international competitive analysis. Topics include the international dimensions of strategy formulation and implementation, diversification, strategic alliances, and divestment.

**INTL BUS 4381 International Logistics And Operations Management: 3 semester hours**

Same as LOG OM 4381. Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of business logistics and supply chain strategies involving shipments across national boundaries. Topics include the effects of international agreements and regional trading blocks on supply chain strategies; the design of global logistics networks; managerial processes and systems for international production and distribution, and risk management for international logistics.

**INTL BUS 5289 International Business Strategies: 3 semester hours**

Prerequisites: BUS AD 5000 and ACCTNG 5400. This course focuses on those managerial issues which follow from the definition and implementation of corporate strategy for worldwide operations, as distinguished from purely domestic firms or those only marginally involved in international activities. It aims to develop an appreciation for the unique competitive, sociocultural and political environments in which international business takes place and the skills required to deal with these changes.

**INTL BUS 5290 Internship In International Business: 3 semester hours**

Prerequisites: Consent of IMBA Director. Students will apply both their language skills and knowledge of international business by working in an organization located outside the student's country of origin. This course requires students to submit regular evaluations and prepare a research report summarizing their global experience and how it relates to the international business program.

**INTL BUS 5381 International Logistics And Operations Management: 3 semester hours**

Same As LOG OM 5381. Prerequisites: LOG OM 5320 A study of international logistics and operations management strategy, planning and operations. Topics may include multinational logistics and supply chain strategies, global network design and sourcing, international transportation, distribution and operations, import-export, risk management, etc.

**INTL BUS 5780 Seminar In International Marketing: 3 semester hours**

Same as MKTG 5780. Prerequisite: MKTG 5700. An advanced seminar on topics in international or global marketing. Possible topics include the globalization of trade, export marketing, international market opportunity analysis, and negotiation for international marketers. Students who take one version of this course (e.g., globalization of trade) can take a second version of the course (e.g., negotiation for international marketers) with prior permission.

**INTL BUS 6580 International Financial Management: 3 semester hours**

Same as FINANCE 6580. Prerequisite: FINANCE 6500. The objective of this course is to introduce students to financial issues for multinational firms. Besides covering basic tools and techniques, the class stresses the role of the financial manager in analysis and decision-making. Topics include the impact of international accounting and tax issues, capital budgeting in a foreign environment, transfer pricing, and global funding. Conceptual skills for lifelong learning experiences are emphasized. This course employs a lecture and case format with group discussions.

**INTL BUS 6581 Seminar In International Investments: 3 semester hours**

Same as FINANCE 6581. Prerequisite: FINANCE 6500. This course covers topics related to the determination of exchange rates, international parity relations and portfolio diversification. In addition, methods for using foreign exchange derivatives are explored in their use for hedging exchange rate risk. Learning to read foreign exchange quotes and understanding the functioning of global markets is an integral part of the course material. Each student is assigned a foreign country to study throughout the semester with the comprehensive project report. A prior investments course is recommended but not required.

**INTL BUS 6846 Management Of Global Sourcing: 3 semester hours**

Same as INFSYS 6846. Prerequisite: INFSYS 5800. Largely fostered by the spread of the Internet, global software development standards, global software packages, and fewer trade restrictions, organizations now regularly source software development, software maintenance, systems upgrades, platform transitions, help desks, and other IS-related work globally. This course covers topics to help organizations manage global sourcing of IS work, including sourcing strategies, sourcing models (captive, joint venture, outsourcing), role of program management offices, supplier selection, engagement models, and special practices required to manage globally dispersed teams. Risk mitigation practices associated with cultural, legal, political, infrastructure, logistical, and human resource issues are also addressed.

**INTL BUS 6881 Management Of Transnational Information Systems: 3 semester hours**

Same as INFSYS 6881. Prerequisites: INFSYS 5800, INFSYS 6825 (may be taken concurrently). The course presents concepts of managing global information technology. Issues covered include: global information technology, systems development, electronic data interchange, cross-border data flows, and national and international information structures. Further topics may include information technology enabled economic development, global outsourcing of information systems services, and social, organizational and ethical implications.

**INTL BUS 7000 intl bus test: 1 semester hour**

## Courses

**INTL BUS 3280 The Law Of International Business Transactions: 3 semester hours**

Prerequisites: BUS AD 2900 or consent of the instructor. A study of the role and function of International Law and national laws in the regulation of international business transactions. The impact of various legal regimes on import/export transactions, foreign investments, and the operations of multinational enterprises will be included. The role of national governments, supra-national governmental organizations, and non-governmental organizations in forming and administering the international legal environment will be studied.

**INTL BUS 3281 Business In China: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; and junior standing. This course introduces students to the practices of doing business in China. Students will be introduced to the Chinese economic and business environment. Issues related to trade and foreign direct investment in China will be discussed. The course adopts an innovative approach, utilizing lectures, case analysis, projects, and student presentations.

**INTL BUS 3282 Managing The Global Workforce: 3 semester hours**

Prerequisite: A minimum of 2.0 campus GPA. In addition, MGMT 3600 and at least one of the following: MGMT 3611 or MGMT 3621 or enrollment in Honors College or consent of instructor. A study of the international dimensions of organizational behavior and human resource management. The course provides an overview of the tools and skills that are necessary to understand and manage people in global organizations. Topics include motivation, leadership, communication, hiring, training, and compensation.

**INTL BUS 3283 International Business And Society: 3 semester hours**

Encompasses the readings, lectures, company and government agency visits, and cultural visits that comprise annual Country Study Tours, (e.g., Austria, Japan, Thailand, etc.). The program includes 45 contact hours or more of classroom lectures covering aspects of the chosen country's business and society, in-depth pre-departure cross-cultural orientation and training supplemented by briefings on the country's economy and on U.S. market penetration by the Commercial Service, U.S. Embassy; a briefing by the in-country State of Missouri representative; briefings by host country agencies; company visits and factory tours; and tours of cultural sites. Student evaluation will be based on active participation and on a research paper based on readings, lectures, interviews and field observations.

**INTL BUS 3284 The Japanese Management System: 3 semester hours**

Prerequisites: MGMT 3600 This course provides an introduction to various aspects of the contemporary Japanese business system. The emphasis is on interpretation of issues from a managerial perspective. Topics include an overview of Japan's economic growth, government policies, industrial and financial structure of Japanese business, labor-management relations, internal management practices, international competitive strategies, managing U.S. subsidiaries in Japan, penetrating the Japanese market, Japanese investment in the U.S.A., and current issues in U.S.-Japan economic relations.

**INTL BUS 3285 Role Of The Global Corporation: 3 semester hours**

Prerequisites: A minimum 2.0 campus GPA and MGMT 3600 or permission of the instructor. The purpose of this course is to create awareness of controversial issues about international business. Students will gain a better understanding of resistance to and criticism of international business and will become better prepared for dealing with these issues and problems.

**INTL BUS 3286 International Business Ethics: 3 semester hours**

Same as PHIL 3286. This course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other "corrupt" practices, respect for intellectual property, etc. Frequent short papers will be assigned.

**INTL BUS 3289 Practicum In International Business: 3 semester hours**

Prerequisites: At least one international business course, 2.0 campus GPA and completion of an approval form. Students will apply both their language skills and knowledge of international business by working for a three month period in an organization located outside the student's country of origin. This course requires students to prepare a research report summarizing the global experience and how it relates to the international business program.

**INTL BUS 3290 Internship In International Business: 3-6 semester hours**

Prerequisites: ECON 1001 and ECON 1002, ACCTNG 2400 and ACCTNG 2410, an additional 12 hours in Business Administration, concurrent enrollment in a UM overseas program; also a minimum overall gpa of 2.0. The internship will be a supervised field experience in a business/ international organization at a foreign site. Students will work for 10 weeks on projects directed by host-organization supervisors in consultation with a UM-St. Louis faculty member. Prior to the field experience students will receive training that includes familiarization with the language and practices of the country's business, the background of the host firm, and international information sources. The student will complete a written report of his/her project. Course may not be repeated for more than 6 hours credit.

**INTL BUS 3299 Independent Study In International Business: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator of the specific discipline. Special individual study in international business under the supervision of an approved faculty member.

**INTL BUS 3580 International Corporate Finance: 3 semester hours**

Same as FINANCE 3580. Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This course explores corporate finance in the context of a global environment. Financial managers for an international firm must deal with all the normal problems faced by domestic corporations plus additional foreign exchange and political risks. Class discussions will focus on applying financial techniques to decision making in foreign operations. Students are required to work in a group to undertake a project related to international finance.

**INTL BUS 3582 International Investments: 3 semester hours**

Same as FINANCE 3582. Prerequisites: FINANCE 3500. This course explores the concepts of investing and hedging risk management, portfolio diversification, currency risk, asset pricing, and alternative portfolio strategies. Techniques for using derivatives are discussed in the context of hedging exchange rate risk. Reading foreign exchange quotes and understanding the functioning of global markets is central to the course. A prior course in investments is recommended but not required.

**INTL BUS 3680 International Management: 3 semester hours**

Same as MGMT 3680. Prerequisites: A minimum 2.0 campus GPA. In addition, ECON 1002 and MGMT 3600; or consent of the instructor. A study of international business and management practices. Topics covered include an introduction to international management and the multinational enterprise, the cultural environment of international management, planning in an international setting, organizing for international operations, directing international operations, international staffing, preparing employees for international assignments, and the control process in an international context.

**INTL BUS 3780 International Marketing: 3 semester hours**

Same as MKTG 3780. Prerequisites: MKTG 3700 and a 2.0 overall GPA. Marketing management problems, techniques and strategies needed to apply the marketing concept to the world marketplace. Understanding a country's cultural and environmental impact on the marketing plan is emphasized, as well as competing in markets of various cultures. Worldwide consumerism, economic and social development, the spread of multinational corporations, business ethics, and current economic and marketing issues are examined.

**INTL BUS 3787 Marketing in the European Union: 3 semester hours**

Same as MKTG 3787. Prerequisites: MKTG 3780 or instructor's permission. The European Union (EU) is both a major customer and major competitor of the United States. The inclusion of many of the Eastern European countries into the EU has added another challenge to our ability to trade in this area. The better we understand the people, institutions and policies of the EU, the better positioned we will be to conduct business effectively. This course will emphasize understanding the institutional structure that unites the European Union as well as the cultural and political diversity of its members, and provide insights into how business activity functions in the European Environment.

**INTL BUS 4280 International Business Experience: 0 semester hours**

Students with an International Business emphasis must complete one of the following international experience requirements: (a) study abroad for three or more credit hours, (b) complete a minimum of one year international experience (e.g., Peace Corps, volunteer work, missionary work, an international posting by an organization) within 5 years of entering the program, or (c) complete an international internship approved by the International Business Institute. May be taken on a satisfactory/unsatisfactory basis only.

**INTL BUS 4281 Entrepreneurship in the Global Environment: 3 semester hours**

Prerequisites: ECON 1002; ACCTNG 2410; MKTG 3700. This course explores changes in the planet's physical environment and ways of reversing, retarding or coping with those changes. Students will be required to develop proposals for new business ventures that have as a goal preservation or restoration of the natural environment.

**INTL BUS 4289 International Strategic Management: 3 semester hours**

Prerequisites: A minimum 2.0 campus GPA and INTL BUS 3282, MKTG 3780 and FINANCE 3580 or consent of instructor. A study of the international dimensions of strategic management. Provides an introduction to the key concepts and tools necessary for international competitive analysis. Topics include the international dimensions of strategy formulation and implementation, diversification, strategic alliances, and divestment.

**INTL BUS 4381 International Logistics And Operations Management: 3 semester hours**

Same as LOG OM 4381. Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of business logistics and supply chain strategies involving shipments across national boundaries. Topics include the effects of international agreements and regional trading blocks on supply chain strategies; the design of global logistics networks; managerial processes and systems for international production and distribution, and risk management for international logistics.

**INTL BUS 5289 International Business Strategies: 3 semester hours**

Prerequisites: BUS AD 5000 and ACCTNG 5400. This course focuses on those managerial issues which follow from the definition and implementation of corporate strategy for worldwide operations, as distinguished from purely domestic firms or those only marginally involved in international activities. It aims to develop an appreciation for the unique competitive, sociocultural and political environments in which international business takes place and the skills required to deal with these changes.

**INTL BUS 5290 Internship In International Business: 3 semester hours**

Prerequisites: Consent of IMBA Director. Students will apply both their language skills and knowledge of international business by working in an organization located outside the student's country of origin. This course requires students to submit regular evaluations and prepare a research report summarizing their global experience and how it relates to the international business program.

**INTL BUS 5381 International Logistics And Operations Management: 3 semester hours**

Same As LOG OM 5381. Prerequisites: LOG OM 5320 A study of international logistics and operations management strategy, planning and operations. Topics may include multinational logistics and supply chain strategies, global network design and sourcing, international transportation, distribution and operations, import-export, risk management, etc.

**INTL BUS 5780 Seminar In International Marketing: 3 semester hours**

Same as MKTG 5780. Prerequisite: MKTG 5700. An advanced seminar on topics in international or global marketing. Possible topics include the globalization of trade, export marketing, international market opportunity analysis, and negotiation for international marketers. Students who take one version of this course (e.g., globalization of trade) can take a second version of the course (e.g., negotiation for international marketers) with prior permission.

**INTL BUS 6580 International Financial Management: 3 semester hours**

Same as FINANCE 6580. Prerequisite: FINANCE 6500. The objective of this course is to introduce students to financial issues for multinational firms. Besides covering basic tools and techniques, the class stresses the role of the financial manager in analysis and decision-making. Topics include the impact of international accounting and tax issues, capital budgeting in a foreign environment, transfer pricing, and global funding. Conceptual skills for lifelong learning experiences are emphasized. This course employs a lecture and case format with group discussions.

**INTL BUS 6581 Seminar In International Investments: 3 semester hours**

Same as FINANCE 6581. Prerequisite: FINANCE 6500. This course covers topics related to the determination of exchange rates, international parity relations and portfolio diversification. In addition, methods for using foreign exchange derivatives are explored in their use for hedging exchange rate risk. Learning to read foreign exchange quotes and understanding the functioning of global markets is an integral part of the course material. Each student is assigned a foreign country to study throughout the semester with the comprehensive project report. A prior investments course is recommended but not required.

**INTL BUS 6846 Management Of Global Sourcing: 3 semester hours**

Same as INFSYS 6846. Prerequisite: INFSYS 5800. Largely fostered by the spread of the Internet, global software development standards, global software packages, and fewer trade restrictions, organizations now regularly source software development, software maintenance, systems upgrades, platform transitions, help desks, and other IS-related work globally. This course covers topics to help organizations manage global sourcing of IS work, including sourcing strategies, sourcing models (captive, joint venture, outsourcing), role of program management offices, supplier selection, engagement models, and special practices required to manage globally dispersed teams. Risk mitigation practices associated with cultural, legal, political, infrastructure, logistical, and human resource issues are also addressed.

**INTL BUS 6881 Management Of Transnational Information Systems: 3 semester hours**

Same as INFSYS 6881. Prerequisites: INFSYS 5800, INFSYS 6825 (may be taken concurrently). The course presents concepts of managing global information technology. Issues covered include: global information technology, systems development, electronic data interchange, cross-border data flows, and national and international information structures. Further topics may include information technology enabled economic development, global outsourcing of information systems services, and social, organizational and ethical implications.

**INTL BUS 7000 intl bus test: 1 semester hour**

## Italian

### Courses

**ITALIAN 1001 Italian I: 5 semester hours**

Fundamentals of Italian grammar, pronunciation and diction for students with no previous acquaintance with the language. One hour laboratory per week required.

**ITALIAN 1002 Italian II: 5 semester hours**

Prerequisite: ITALIAN 1001 or equivalent. Continuation of grammar and conversation with introductory readings centering on Italian contributions to art, literature and music. One hour laboratory per week required.

**ITALIAN 1035 English Grammar For Students Of Foreign Languages: 1 semester hour**

This course is designed to familiarize the student with basic English grammar and the terms commonly used in the teaching of most languages. This course does not count toward a major or minor in English or any foreign language.

**ITALIAN 2101 Intermediate Italian Language And Culture: 3 semester hours**

Prerequisites: ITALIAN 1002 or equivalent. Students will advance their understanding of Italian culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

**ITALIAN 2190 Special Readings: 1-3 semester hours**

Prerequisite: ITALIAN 2101 or equivalent. Readings on literary topics mutually acceptable to student and instructor.

### Courses

**ITALIAN 1001 Italian I: 5 semester hours**

Prerequisite: ITALIAN 2101 or equivalent. Readings on literary topics mutually acceptable to student and instructor.

## Japanese

### Courses

**JAPAN 1001 Japanese I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, and writing of Japanese and upon the acquisition of the fundamentals of grammar and syntax.

**JAPAN 1002 Japanese II: 5 semester hours**

Prerequisites: JAPAN 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Japanese. Continuation of the acquisition of the fundamentals of grammar and syntax.

**JAPAN 1003 Japanese III: 3 semester hours**

Prerequisite: JAPAN 1002 or equivalent. Review and practice of fundamentals of grammar, syntax, reading and writing acquired in JAPAN 1002. This course is not a JAPAN 2101 equivalent and may not be counted towards a foreign language requirement.

**JAPAN 1005 Practicum in East Asian Calligraphy: 1 semester hour**

Same as CHINESE 1005. This course is an introduction to the art of calligraphy in East Asia. Emphasis is placed on writing Japanese syllabaries and Chinese characters correctly with a calligraphy brush and ink. Students practice writing basic strokes and characters and creating their own calligraphic works.

**JAPAN 1011 Anime Nation: Popular Culture in Japan: 3 semester hours**

A look at postmodern samurai, preteen ninjas, praying at shrines and other elements of J-pop culture. This on-line course uses various clips and full-length animated features, to introduce and explore topics such as family life, school life, shared values, contemporary social issues, fashion, and metaphysics. Critical texts, essays, and narrated presentations provide background for analysis and appreciation.

**JAPAN 1199 Special Topics: Language Immersion: Japanese: 1 semester hour**

Prerequisite: JAPAN 1001 or concurrent enrollment in JAPAN 1001. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

**JAPAN 2101 Intermediate Japanese I: 5 semester hours**

Prerequisite: JAPAN 1002 or equivalent. Students will advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

**JAPAN 2102 Intermediate Japanese II: 5 semester hours**

Prerequisites: JAPAN 2101 or equivalent. Continuation of JAPAN 2101.

**JAPAN 2111 The World of Anime - Advanced Topics in Japanese Animation: 3 semester hours**

Prerequisites: JAPAN 1011 or permission of instructor. Students will explore and analyze anime and manga from sociological, literary, and anthropological perspectives, attempting to foster deeper understanding of contemporary Japan and the historical context from which the selected works emerged.

**JAPAN 2150 Classical Japanese Literature In Translation: 3 semester hours**

An exploration of Classical Japanese literary masterpieces and the world from which they arose. All required readings will be in English translation. This course may be repeated for credit with different literary works as a topic.

**JAPAN 2190 Special Readings: 1-3 semester hours**

Prerequisites: JAPAN 2102 or consent of the department. Independent study through readings, reports, and conferences.

**JAPAN 2191 Special Topics in Japanese Culture: 3 semester hours**

A topically organized introduction to Japanese culture and society. May be repeated for credit when the topic varies.

**JAPAN 2199 Special Topics: Language Immersion: Japanese: 1 semester hour**

Prerequisite: JAPAN 2101 or concurrent enrollment in JAPAN 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

**JAPAN 3201 Intermediate Japanese III: 3 semester hours**

Prerequisites: JAPAN 2102 or equivalent. Students will continue to advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course satisfies the University cultural diversity requirement.

**JAPAN 3202 Intermediate Japanese IV: 3 semester hours**

Prerequisites: JAPAN 3201 or equivalent. Continuation of JAPAN 3201.

**JAPAN 3280 Readings in Japanese: 3 semester hours**

Prerequisites: JAPAN 3201 or concurrent enrollment in JAPAN 3202. Development of language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

**JAPAN 3290 Special Readings: 1-3 semester hours**

Prerequisites: JAPAN 2190 or consent of instructor. Independent study through readings, reports and conferences.

**JAPAN 4301 Advanced Japanese I: 3 semester hours**

Prerequisite: JAPAN 3202 or equivalent. Further development of skills in both spoken and written Japanese. Students will read/view and discuss selected newspaper articles, editorials, essays, short stories, television programs and films.

**JAPAN 4302 Advanced Japanese II: 3 semester hours**

Prerequisite: JAPAN 4301 or equivalent. Continuation of JAPAN 4301. Further development of skills in both spoken and written Japanese. Students will read/view and discuss selected newspaper articles, editorials, essays, short stories, television programs and films.

**JAPAN 4380 Advanced Readings in Japanese: 3 semester hours**

Prerequisites: JAPAN 4301 or concurrent enrollment in JAPAN 4302. Continued development of advanced language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

**JAPAN 4390 Special Readings: 1-3 semester hours**

Prerequisites: JAPAN 3290 or consent of instructor. Independent study through readings, reports and conferences.

## Courses

### ***JAPAN 1001 Japanese I: 5 semester hours***

Emphasis is placed upon the understanding, speaking, and writing of Japanese and upon the acquisition of the fundamentals of grammar and syntax.

### ***JAPAN 1011 Anime Nation: Popular Culture in Japan: 3 semester hours***

A look at postmodern samurai, preteen ninjas, praying at shrines and other elements of J-pop culture. This on-line course uses various clips and full-length animated features, to introduce and explore topics such as family life, school life, shared values, contemporary social issues, fashion, and metaphysics. Critical texts, essays, and narrated presentations provide background for analysis and appreciation.

### ***JAPAN 1199 Special Topics: Language Immersion: Japanese: 1 semester hour***

Prerequisite: JAPAN 1001 or concurrent enrollment in JAPAN 1001. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

### ***JAPAN 2101 Intermediate Japanese I: 5 semester hours***

Prerequisite: JAPAN 1002 or equivalent. Students will advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

### ***JAPAN 2102 Intermediate Japanese II: 5 semester hours***

Prerequisites: JAPAN 2101 or equivalent. Continuation of JAPAN 2101.

### ***JAPAN 2111 The World of Anime - Advanced Topics in Japanese Animation: 3 semester hours***

Prerequisites: JAPAN 1011 or permission of instructor. Students will explore and analyze anime and manga from sociological, literary, and anthropological perspectives, attempting to foster deeper understanding of contemporary Japan and the historical context from which the selected works emerged.

### ***JAPAN 2150 Classical Japanese Literature In Translation: 3 semester hours***

An exploration of Classical Japanese literary masterpieces and the world from which they arose. All required readings will be in English translation. This course may be repeated for credit with different literary works as a topic.

### ***JAPAN 2190 Special Readings: 1-3 semester hours***

Prerequisites: JAPAN 2102 or consent of the department. Independent study through readings, reports, and conferences.

### ***JAPAN 2191 Special Topics in Japanese Culture: 3 semester hours***

A topically organized introduction to Japanese culture and society. May be repeated for credit when the topic varies.

### ***JAPAN 2199 Special Topics: Language Immersion: Japanese: 1 semester hour***

Prerequisite: JAPAN 2101 or concurrent enrollment in JAPAN 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

### ***JAPAN 3201 Intermediate Japanese III: 3 semester hours***

Prerequisites: JAPAN 2102 or equivalent. Students will continue to advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course satisfies the University cultural diversity requirement.

### ***JAPAN 3202 Intermediate Japanese IV: 3 semester hours***

Prerequisites: JAPAN 3201 or equivalent. Continuation of JAPAN 3201.

### ***JAPAN 3280 Readings in Japanese: 3 semester hours***

Prerequisites: JAPAN 3201 or concurrent enrollment in JAPAN 3202. Development of language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

### ***JAPAN 3290 Special Readings: 1-3 semester hours***

Prerequisites: JAPAN 2190 or consent of instructor. Independent study through readings, reports and conferences.

### ***JAPAN 4301 Advanced Japanese I: 3 semester hours***

Prerequisite: JAPAN 3202 or equivalent. Further development of skills in both spoken and written Japanese. Students will read/view and discuss selected newspaper articles, editorials, essays, short stories, television programs and films.

### ***JAPAN 4302 Advanced Japanese II: 3 semester hours***

Prerequisite: JAPAN 4301 or equivalent. Continuation of JAPAN 4301. Further development of skills in both spoken and written Japanese. Students will read/view and discuss selected newspaper articles, editorials, essays, short stories, television programs and films.

### ***JAPAN 4380 Advanced Readings in Japanese: 3 semester hours***

Prerequisites: JAPAN 4301 or concurrent enrollment in JAPAN 4302. Continued development of advanced language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

### ***JAPAN 4390 Special Readings: 1-3 semester hours***

Prerequisites: JAPAN 3290 or consent of instructor. Independent study through readings, reports and conferences.

## Joint Civil Engineering

### Courses

#### ***J C ENGR 2160 Surveying: 3 semester hours***

Horizontal and vertical control surveys, including traverses, triangulation, trilateration, and leveling; basic adjustments of observations; geologic data; coordinate systems. Basic route surveying, including horizontal and vertical curves.

#### ***J C ENGR 3360 Civil Engineering Materials Lab: 1 semester hour***

Testing procedures, testing machines, use of laboratory equipment, analysis of data, and presentation of results. Laboratory tests on static tension, compression, bending, and torsion of metal specimens. Tests on wood. Determination of compressive and tensile strengths of concrete. Design of concrete mixes and verification of strength. Experiments in advanced topics in mechanics of materials.

**J C ENGR 3410 Structural Analysis: 3 semester hours**

Prerequisite: J M ENGR 2410. A review of the calculation of reactions, shear, and bending moment. Definition, construction and use of influence lines. Deflections for statically determinate structures using the work method. Analysis of statically indeterminate trusses using the method of consistent deformations. Analysis of continuous beams and planar frames using the consistent deformation, slope-deflection and moment distribution methods. The influence of span on strength, stability, and economy of structures. An introduction to structural analysis software.

**J C ENGR 3420 Structural Design: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410. Fundamentals of structural design in steel, reinforced concrete, and timber. Familiarization with the sources of various design codes and practice in interpreting them. Computer graphics applications.

**J C ENGR 3460 Transportation Engineering: 3 semester hours**

Fundamental treatment of the planning, engineering, design, and procedural aspects of multimodal transportation are covered. Intermodal freight and urban transportation planning processes and overview of environmental, energy, and economic issues are discussed.

**J C ENGR 3760 Hydraulic Engineering: 3 semester hours**

Prerequisites: J M ENGR 3700. The principles of open channel flow will be discussed and illustrated with practical examples. Methods for channel design, storm sewer, culvert and bridge analysis will be presented using the concepts of gradually-varied, steady flow. A design project using computerized analysis and design is used to implement concepts in a large practical application.

**J C ENGR 4000 Independent Study: 1-6 semester hours**

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a civil engineering topic of special interest to a student performed under the direction of a faculty member.

**J C ENGR 4190 Soil Mechanics: 3 semester hours**

Prerequisite: J M ENGR 2410, J M ENGR 3700. Basic geology as it relates to index and classification properties of soil. Exploration, sampling, and testing techniques. Soil classification systems. clay minerals and soil structures. Compaction and stabilization. Capillary, shrinkage, swelling, and frost action in soils. Effective stress, permeability, seepage, and flow nets. Consolidation and consolidation settlements. stresses in soil. Time rate of consolidation. Mohr's circle, stress path, and failure theories. Shearing strength of sand and clays.

**J C ENGR 4200 Soil Exploration And Testing: 1 semester hour**

Prerequisite: J C ENGR 4190 (may be taken concurrently). Soil exploration; in-situ soil testing, laboratory testing of soil; processing of test data using a microcomputer; statistical analysis of test data; use of test results in the decision-making process.

**J C ENGR 4600 Highway and Traffic Engineering: 3 semester hours**

Prerequisites: J C ENGR 2160 and Senior Standing. Study of basic highway design and traffic circulation principles. Study of design elements of alignment, profile, crosssection, intersection types, interchange types, and controlled access highways. Investigation of functional highway classification. Traffic volume, delay and accident studies. Analysis of highway capacity of uninterrupted flow, interrupted flow. Freeway, ramp and weaving sections.

**J C ENGR 4621 Traffic Operations and Analysis: 3 semester hours**

Prerequisites: Senior Standing. Study of traffic system operations and analysis, microsimulation modeling, interchange types, and the fundamentals of highway signing and marking. Introduction into transportation analysis project management. Analysis and design techniques focus on microsimulation modeling and the Manual of Uniform Traffic Control Devices. Material learned is integrated into a major design project.

**J C ENGR 4630 Design Of Steel Structures: 3 semester hours**

Prerequisites: J C ENGR 3410, J C ENGR 3420. Behavior and design of steel frames by "allowable stress" and "maximum strength" based on deterministic and LRFD (Load-resistance factor design) methods. Design of beams, columns, beamcolumns, plate girders, connections, multistory frames, and bridge girders. Torsional design of steel structures. Plastic analysis and design of steel structures. Miscellaneous topics in structural steel construction and design.

**J C ENGR 4640 Foundation Engineering: 3 semester hours**

Prerequisites: J C ENGR 3420, J C ENGR 4190, J C ENGR 4200. Principal problems in design and construction of foundations for bridges and buildings. Bearing capacity of deep and shallow foundations; pressure on retaining walls and shallow foundations; pressure on retaining walls and slope stability; modern developments in piling, cofferdams, open caissons, pneumatic caissons.

**J C ENGR 4660 Advanced Design Of Concrete Structures: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410, J C ENGR 3420. Flexural behavior and design, strength and deformation of rectangular and nonrectangular sections, shear strength, beamcolumns, long columns, slab systems, design of frames, and footings will be covered.

**J C ENGR 4670 Structure Design Projects: 3 semester hours**

Prerequisite: Permission of instructor. Students carry out the complete design of typical and unusual building and bridge structures. Use of the computer as a design tool is emphasized. Projects are conducted in cooperation with production engineers.

**J C ENGR 4720 Legal Aspects Of Construction: 3 semester hours**

Prerequisite: Junior standing or permission of instructor. A survey of the legal problems of the construction manager. Including but limited to, liability in the areas of contracts, agency, torts, insurance, bad judgement and oversight.

**J C ENGR 4730 Construction Operations And Management: 3 semester hours**

Prerequisite: Junior standing. The construction industry, its development, components, and organization. Contracting methods. Applications and limitations. Selection of equipment using production analysis and economics. Field engineering, including form design, shoring, embankment design. Purchasing and change orders. Safety and claims.

**J C ENGR 4740 Economic Decisions In Engineering: 3 semester hours**

Prerequisite: Junior standing. Principles of economics involved in engineering decisions. Decisions between alternatives based on the efficient allocation of resources. Topics include the time element in economics, analytical techniques for economy studies, and taxes.

**J C ENGR 4830 Fundamentals of Surface Water Hydrology and Environmental Engineering: 3 semester hours**

Prerequisites: Fluid Mechanics and senior status. The principles of the hydrologic cycle including precipitation, evaporation, transpiration, infiltration, runoff, streamflow, and groundwater will be discussed and illustrated. In addition, computational fundamentals of hydrologic analysis will be presented such as unit hydrographs, routing, data analysis, and flood frequency. Elements of quantitative problems in urban stormwater systems and management, water quality and urbanization. Concepts of sustainability and green engineering such as low impact development and other best management practices will be presented. Computer software will be utilized.

**J C ENGR 4910 Water Hydrology and Hydraulic Design Project: 3 semester hours**

Prerequisites: J M ENGR 3700, J C ENGR 3760, and J C ENGR 4830. This course is designed to provide seniors in Hydrology and Hydraulics with a major design/facility plan project. The principals of hydrologic and hydraulic design will be utilized in developing the hydrology, hydraulics and floodplain analysis for a local watershed or land area. Hydrologic analysis is performed to size hydraulic systems and evaluate watershed and floodplain performance. The course is structured to apply hydrologic theory and modeling techniques to engineering hydrology and hydraulics for watershed analysis, floodplain delineation, and urban stormwater. The student will also consider the next generation of hydrologic computation, watershed evaluation and the importance of severe storm impacts and flood management. Consideration of sustainability and green infrastructure practices will also be included. A final written report and class presentation of the design project is included.

**J C ENGR 4950 Fundamentals Of Engineering Review: 1 semester hour**

Prerequisite: Senior Standing. The topics found in most engineer-in-training exams will be reviewed and illustrated using examples. A discussion of the importance of licensin exams and the strategies for taking these exams will be discussed. The main topics for the review include: engineering mathematics, basic chemistry, engineering mechanics, engineering economics, thermodynamics, electrical circuits, and material science.

**J C ENGR 4990 Senior Civil Engineering Seminar: 1 semester hour**

Prerequisite: Senior standing. Students will research assigned topics of importance to graduates entering the Civil Engineering profession and prepare oral presentations and a written report. Student presentations will be augmented by lectures from practicing professionals. Topics include professional registration, early career development, graduate study, effective presentations, construction quality, and case histories of civil engineering projects.

## Courses

**J C ENGR 2160 Surveying: 3 semester hours**

Horizontal and vertical control surveys, including traverses, triangulation, trilateration, and leveling; basic adjustments of observations; geologic data; coordinate systems. Basic route surveying, including horizontal and vertical curves.

**J C ENGR 3360 Civil Engineering Materials Lab: 1 semester hour**

Testing procedures, testing machines, use of laboratory equipment, analysis of data, and presentation of results. Laboratory tests on static tension, compression, bending, and torsion of metal specimens. Tests on wood. Determination of compressive and tensile strengths of concrete. Design of concrete mixes and verification of strength. Experiments in advanced topics in mechanics of materials.

**J C ENGR 3410 Structural Analysis: 3 semester hours**

Prerequisite: J M ENGR 2410. A review of the calculation of reactions, shear, and bending moment. Definition, construction and use of influence lines. Deflections for statically determinate structures using the work method. Analysis of statically indeterminate trusses using the method of consistent deformations. Analysis of continuous beams and planar frames using the consistent deformation, slope-deflection and moment distribution methods. The influence of span on strength, stability, and economy of structures. An introduction to structural analysis software.

**J C ENGR 3420 Structural Design: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410. Fundamentals of structural design in steel, reinforced concrete, and timber. Familiarization with the sources of various design codes and practice in interpreting them. Computer graphics applications.

**J C ENGR 3460 Transportation Engineering: 3 semester hours**

Fundamental treatment of the planning, engineering, design, and procedural aspects of multimodal transportation are covered. Intermodal freight and urban transportation planning processes and overview of environmental, energy, and economic issues are discussed.

**J C ENGR 3760 Hydraulic Engineering: 3 semester hours**

Prerequisites: J M ENGR 3700. The principles of open channel flow will be discussed and illustrated with practical examples. Methods for channel design, storm sewer, culvert and brige analysis will be presented using the concepts of gradually-varied, steady flow. A design project using computerized analysis and design is used to implement concepts in a large practical application.

**J C ENGR 4000 Independent Study: 1-6 semester hours**

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a civil engineering topic of special interest to a student performed under the direction of a faculty member.

**J C ENGR 4190 Soil Mechanics: 3 semester hours**

Prerequisite: J M ENGR 2410, J M ENGR 3700. Basic geology as it relates to index and classification properties of soil. Exploration, sampling, and testing techniques. Soil classification systems. clay minerals and soil structures. Compaction and stabilization. Capillary, shrinkage, swelling, and frost action in soils. Effective stress, permeability, seepage, and flow nets. Consolidation and consolidation settlements. stresses in soil. Time rate of consolidation. Mohr's circle, stress path, and failure theories. Shearing strength of sand and clays.

**J C ENGR 4200 Soil Exploration And Testing: 1 semester hour**

Prerequisite: J C ENGR 4190 (may be taken concurrently). Soil exploration; in-situ soil testing, laboratory testing of soil; processing of test data using a microcomputer; statistical analysis of test data; use of test results in the decision-making process.

**J C ENGR 4600 Highway and Traffic Engineering: 3 semester hours**

Prerequisites: J C ENGR 2160 and Senior Standing. Study of basic highway design and traffic circulation principles. Study of design elements of alignment, profile, crosssection, intersection types, interchange types, and controlledaccess highways. Investigation of functional highway classification. Traffic volume, delay and accident studies. Analysis of highway capacity of uninterrupted flow, interrupted flow. Freeway, ramp and weaving sections.

**J C ENGR 4621 Traffic Operations and Analysis: 3 semester hours**

Prerequisites: Senior Standing. Study of traffic system operations and analysis, microsimulation modeling, interchange types, and the fundamentals of highway signing and marking. Introduction into transportation analysis project management. Analysis and design techniques focus on microsimulation modeling and the Manual of Uniform Traffic Control Devices. Material learned is integrated into a major design project.

**J C ENGR 4630 Design Of Steel Structures: 3 semester hours**

Prerequisites: J C ENGR 3410, J C ENGR 3420. Behavior and design of steel frames by "allowable stress" and "maximum strength" based on deterministic and LRFD (Load-resistance factor design) methods. Design of beams, columns, beamcolumns, plate girders, connections, multistory frames, and bridge girders, Torsional design of steel structures. Plastic analysis and design of steel structures. Miscellaneous topics in structural steel construction and design.

**J C ENGR 4640 Foundation Engineering: 3 semester hours**

Prerequisites: J C ENGR 3420, J C ENGR 4190, J C ENGR 4200  
Principal problems in design and construction of foundations for bridges and buildings. Bearing capacity of deep and shallow foundations; pressure on retaining walls and shallow foundations; pressure on retaining walls and slope stability; modern developments in piling, cofferdams, open caissons, pneumatic caissons.

**J C ENGR 4660 Advanced Design Of Concrete Structures: 3 semester hours**

Prerequisites: J M ENGR 3250, J C ENGR 3410, J C ENGR 3420.  
Flexural behavior and design, strength and deformation of rectangular and nonrectangular sections, shear strength, beamcolumns, long columns, slab systems, design of frames, and footings will be covered.

**J C ENGR 4670 Structure Design Projects: 3 semester hours**

Prerequisite: Permission of instructor. Students carry out the complete design of typical and unusual building and bridge structures. Use of the computer as a design tool is emphasized. Projects are conducted in cooperation with production engineers.

**J C ENGR 4720 Legal Aspects Of Construction: 3 semester hours**

Prerequisite: Junior standing or permission of instructor. A survey of the legal problems of the construction manager. Including but limited to, liability in the areas of contracts, agency, torts, insurance, bad judgement and oversight.

**J C ENGR 4730 Construction Operations And Management: 3 semester hours**

Prerequisite: Junior standing. The construction industry, its development, components, and organization. Contracting methods. Applications and limitations. Selection of equipment using production analysis and economics. Field engineering, including form design, shoring, embankment design. Purchasing and change orders. Safety and claims.

**J C ENGR 4740 Economic Decisions In Engineering: 3 semester hours**

Prerequisite: Junior standing. Principles of economics involved in engineering decisions. Decisions between alternatives based on the efficient allocation of resources. Topics include the time element in economics, analytical techniques for economy studies, and taxes.

**J C ENGR 4830 Fundamentals of Surface Water Hydrology and Environmental Engineering: 3 semester hours**

Prerequisites: Fluid Mechanics and senior status. The principles of the hydrologic cycle including precipitation, evaporation, transpiration, infiltration, runoff, streamflow, and groundwater will be discussed and illustrated. In addition, computational fundamentals of hydrologic analysis will be presented such as unit hydrographs, routing, data analysis, and flood frequency. Elements of quantitative problems in urban stormwater systems and management, water quality and urbanization. Concepts of sustainability and green engineering such as low impact development and other best management practices will be presented. Computer software will be utilized.

**J C ENGR 4910 Water Hydrology and Hydraulic Design Project: 3 semester hours**

Prerequisites: J M ENGR 3700, J C ENGR 3760, and J C ENGR 4830.  
This course is designed to provide seniors in Hydrology and Hydraulics with a major design/facility plan project. The principals of hydrologic and hydraulic design will be utilized in developing the hydrology, hydraulics and floodplain analysis for a local watershed or land area. Hydrologic analysis is performed to size hydraulic systems and evaluate watershed and floodplain performance. The course is structured to apply hydrologic theory and modeling techniques to engineering hydrology and hydraulics for watershed analysis, floodplain delineation, and urban stormwater. The student will also consider the next generation of hydrologic computation, watershed evaluation and the importance of severe storm impacts and flood management. Consideration of sustainability and green infrastructure practices will also be included. A final written report and class presentation of the design project is included.

**J C ENGR 4950 Fundamentals Of Engineering Review: 1 semester hour**

Prerequisite: Senior Standing. The topics found in most engineer-in-training exams will be reviewed and illustrated using examples. A discussion of the importance of licensin exams and the strategies for taking these exams will be discussed. The main topics for the review include: engineering mathematics, basic chemistry, engineering mechanics, engineering economics, thermodynamics, electrical circuits, and material science.

**J C ENGR 4990 Senior Civil Engineering Seminar: 1 semester hour**

Prerequisite: Senior standing. Students will research assigned topics of importance to graduates entering the Civil Engineering profession and prepare oral presentations and a written report. Student presentations will be augmented by lectures from practicing professionals. Topics include professional registration, early career development, graduate study, effective presentations, construction quality, and case histories of civil engineering projects.

## Joint Computer Science

### Courses

**J CMP SC 1002 Introduction To Computing Tools: Matlab Skills: 1 semester hour**

This course is aimed at the acquisition of MATLAB skills through hands-on familiarization and practice. Students practice the array, vector, and meshgrid representations, programming and plotting, and apply these skills to solve numerical problems and generate reports. (J CMP SC 1002 and CMP SCI 1250 can substitute for J CMP SC 1360).

## Courses

### ***J CMP SC 1002 Introduction To Computing Tools: Matlab Skills: 1 semester hour***

This course is aimed at the acquisition of MATLAB skills through hands-on familiarization and practice. Students practice the array, vector, and meshgrid representations, programming and plotting, and apply these skills to solve numerical problems and generate reports. (J CMP SC 1002 and CMP SCI 1250 can substitute for J CMP SC 1360).

## Joint Electrical Engineering

## Courses

### ***J E ENGR 2300 Introduction To Electrical Networks: 3 semester hours***

Elements, sources, and interconnects. Ohm's and Kirchoff's laws, superposition and Thevenin's theorem; the resistive circuit, transient analysis, sinusoidal analysis, and frequency response.

### ***J E ENGR 2320 Introduction To Electronic Circuits: 3 semester hours***

Prerequisites: J E ENGR 2300. Introduction to contemporary electronic devices and their circuit applications. Terminal characteristics of active semiconductor devices. Incremental and D-C models of junction diodes, bipolar transistor (BJTs), and metal-oxide semiconductor field effect transistors (MOSFETs) are developed and used to design single- and multi-stage amplifiers. Models of the BJT and MOSFET in cutoff and saturation regions are used to design digital circuits.

### ***J E ENGR 2330 Electrical And Electronic Circuits Laboratory: 3 semester hours***

Prerequisites: J E ENGR 2300. Lectures and laboratory exercises related to sophomore topics in introductory networks and basic electronics.

### ***J E ENGR 2600 Introduction To Digital Logic And Computer Design: 3 semester hours***

Prerequisite: J CMP SC 1260. Digital computers and digital information-processing system; Boolean algebra, principles and methodology of logical design; machine language programming; register transfer logic; microprocessor hardware, software, and interfacing; fundamental of digital circuits and systems; computer organization and control; memory systems; arithmetic unit design. Occasional laboratory exercises.

### ***J E ENGR 3300 Engineering Electro Magnetic Principles: 3 semester hours***

Electromagnetic theory as applied to electrical engineering; vector calculus; electrostatics and magnetostatics; Maxwell's equations, including Poynting's theorem and boundary conditions; uniform plane-wave propagation; transmission lines-TEM modes, including treatment of general, lossless line, and pulse propagation; introduction to guided waves; introduction to radiation and scattering concepts.

### ***J E ENGR 3310 Electronics Laboratory: 3 semester hours***

Prerequisites: J E ENGR 2300, J E ENGR 2330. Laboratory exercises for juniors covering topics in computeraided measurements, computer simulation, and electronic circuits.

### ***J E ENGR 3320 Power, Energy And Polyphase Circuits: 3 semester hours***

Prerequisite: J E ENGR 2300. Fundamental concepts of power and energy; electrical measurements; physical and electrical arrangement of electrical power systems; polyphase circuit theory and calculations; principle elements of electrical systems such as transformers, rotating machines, control, and protective devices, their description and characteristics; elements of industrial power system design.

### ***J E ENGR 3360 Principles Of Electronic Devices: 3 semester hours***

Introduction to the solid-state physics of electronic materials and devices, including semiconductors, metals, insulators, diodes and transistors, Crystals growth technology and fundamental properties of crystals. Electronic properties and band structure of electronic materials, and electron transport in semiconductor materials. Fabrication of pn junction diodes, metal-semiconductor junctions, and transistors and integrated circuit chips. Fundamental electrical properties of rectifying diodes and light-emitting diodes, bipolar transistors and field effect transistors. Device physics of diodes and transistors, large-signal electrical behavior and high-frequency properties.

### ***J E ENGR 3370 Electronic Devices And Circuits: 3 semester hours***

Prerequisites: J E ENGR 2320. Introduction to semiconductor electronic devices: transistors and diodes. Device electrical DC and high-frequency characteristics. Bipolar transistors, field-effect transistors for analog electronics applications. Transistors fabrication as discrete devices and as integrated-circuit chips. Large-signal analysis of transistor amplifiers: voltage gain, distortion, input resistance and output resistance. Analysis of multitransistor amplifiers: Darlington, Cascode, and coupled-pair configurations. Half-circuit concepts, differential-mode gain, common-mode gain, and differential-to-single-ended conversion. Transistor current sources, active loads, and power-amplifier stages. Applications to operational amplifiers and feedback circuits.

### ***J E ENGR 3510 Signals And Systems: 3 semester hours***

Prerequisites: J E ENGR 2300 and J E MATH 3170. Elementary concepts of continuous-time and discrete-time signals and systems. Linear time-invariant (LTI) systems, impulse response, convolution, Fourier series, Fourier transforms, and frequency-domain analysis of LTI systems. Laplace transforms, Z-transforms, and rational function descriptions of LTI systems. Principles of sampling and modulation. Students participate weekly in recitation sections to develop oral communications skills using class materials.

### ***J E ENGR 3620 Computer Architecture: 3 semester hours***

Prerequisite: J E ENGR 2600. Study of interaction and design philosophy of hardware and software for digital computer systems: Machine organization, data structures, I/O considerations. Comparison of minicomputer architectures.

### ***J E ENGR 4000 Independent Study: 1-3 semester hours***

Prerequisites: Senior in Good Standing. Opportunities to acquire experience outside the classroom setting and to work closely with individual members of the faculty. A final report must be submitted to the department. Open as a senior elective only. Hours and credit to be arranged. Credit variable, maximum credit per semester 3 hours. Maximum program total credit 3 hours.

### ***J E ENGR 4050 Reliability And Quality Control: 3 semester hours***

Prerequisites: J E MATH 3260 or MATH 1320. An integrated analysis of reliability and quality control function in manufacturing. Statistical process control, analysis, reliability prediction, design, testing, failure analysis and prevention, maintainability, availability, and safety are discussed and related. Qualitative and quantitative aspects of statistical quality control and reliability are introduced in the context of manufacturing.

### ***J E ENGR 4340 Solid State Power Circuits And Applications: 3 semester hours***

Prerequisite: J E ENGR 2320, J E ENGR 3510. Study of the strategies and applications of power control using solid-state semiconductor devices. Survey of generic power electronic converters. Applications to power supplies, motor drives, and consumer electronics. Introduction to power diodes, thyristors, and MOSFETs.

**J E ENGR 4350 Electrical Energy Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2330. Experimental studies of principles important in modern electrical energy systems. Topics: power measurement, transformers, batteries, static frequency converters, thermoelectric cooling, solar cells, electrical lighting, induction, commutator, and brushless motors, synchronous machines.

**J E ENGR 4360 Energy Alternatives: 3 semester hours**

Prerequisites: J E ENGR 2300, or J M ENGR 3200. This course introduces engineering analyses of the human uses of energy. Both non-renewable (e.g., oil, natural gas, coal, nuclear) and sustainable (e.g., hydropower, solar, wind, biomass) resources are covered. Topics include the engineer's role in harvesting, production, storage, conversion, delivery, and uses of energy. Students will learn system analysis, design, integration, optimization, and operational aspects of selected resources delivery systems, and end uses. Technical content will include site selection, conversion and delivery efficiency calculations, engineering economic analyses, control systems, and energy resource systematic classification. Measure will consist of a mix of homework, quizzes, tests, class participation, and projects.

**J E ENGR 4410 Control Systems I: 3 semester hours**

Same as J M ENGR 4310. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multiloop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag and lead-lag networks. Synthesis by Bode plots and root-locus diagrams. Introduction to state-variable techniques, state-transition matrix, state-variable feedback.

**J E ENGR 4520 Power Systems Analysis: 3 semester hours**

Prerequisite: J E ENGR 3320. Introduction to the modeling and elements of power systems; machines, lines, and loads; load flow methods and applications; short circuit analysis using symmetrical components on symmetrical and unsymmetrical faults; methods of economic operation of power systems and contingency; state estimators, stability, and introduction of the independent system operator.

**J E ENGR 4710 Communications Theory And Systems: 3 semester hours**

Prerequisites: J E ENGR 3510 and J E MATH 3260. Introduction to the concepts of transmission of information via communication channels. Amplitude and angle modulation for the transmission of continuous-time signals. Analog-to-digital conversion and pulse code modulation. Transmission of digital data. Introduction to random signals and noise and their effects on communication. Optimum detection systems in the presence of noise. Elementary information theory. Overview of various communication technologies such as radio, television, telephone networks, data communication, satellites, optical fiber, and cellular radio.

**J E ENGR 4720 Internet Communications: 3 semester hours**

This course will introduce and cover the architecture, protocols, security, and quality of service (QoS) of Internet Communications. Starting with the design principles and architecture of the Internet, communication applications such as Voice over IP (VoIP), video conferencing, and presence and instant messaging will be covered. Protocols developed by the Internet Engineering Task Force (IETF) including IP, TCP, UDP, DNS, SIP, XMPP, and ENUM will be studied. Latest areas of research including the Service Oriented Architecture (SOA) and peer-to-peer (P2P) architectures for Internet Communications will be covered.

**J E ENGR 4820 Digital Signal Processing: 3 semester hours**

Prerequisite: J E ENGR 3510. Introduction to analysis and synthesis of discrete-time linear time-invariant (LTI) systems. Discrete-time convolution, discrete-time Fourier transform, Z-transform, rational function descriptions of discrete-time LTI systems. Sampling, analog-to-digital conversion and digital processing of analog signals. Techniques for the design of finite impulse response (FIR) and infinite impulse response (IIR) digital filters. Hardware implementation of digital filters and finite register effects. The discrete Fourier transform and the fast Fourier transform (FFT) algorithm.

**J E ENGR 4980 Electrical Engineering Design Projects: 3 semester hours**

Prerequisites: Senior standing. Working in teams, students address design tasks assigned by faculty. Each student participates in one or more design projects in a semester. Projects are chosen to emphasize the design process, with the designer choosing one of several paths to a possible result. Collaboration with industry and all divisions of the university is encouraged.

## Courses

**J E ENGR 2300 Introduction To Electrical Networks: 3 semester hours**

Elements, sources, and interconnects. Ohm's and Kirchhoff's laws, superposition and Thevenin's theorem; the resistive circuit, transient analysis, sinusoidal analysis, and frequency response.

**J E ENGR 2320 Introduction To Electronic Circuits: 3 semester hours**

Prerequisites: J E ENGR 2300. Introduction to contemporary electronic devices and their circuit applications. Terminal characteristics of active semiconductor devices. Incremental and D-C models of junction diodes, bipolar transistor (BJTs), and metal-oxide semiconductor field effect transistors (MOSFETs) are developed and used to design single- and multi-stage amplifiers. Models of the BJT and MOSFET in cutoff and saturation regions are used to design digital circuits.

**J E ENGR 2330 Electrical And Electronic Circuits Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2300. Lectures and laboratory exercises related to sophomore topics in introductory networks and basic electronics.

**J E ENGR 2600 Introduction To Digital Logic And Computer Design: 3 semester hours**

Prerequisite: J CMP SC 1260. Digital computers and digital information-processing system; Boolean algebra, principles and methodology of logical design; machine language programming; register transfer logic; microprocessor hardware, software, and interfacing; fundamental of digital circuits and systems; computer organization and control; memory systems; arithmetic unit design. Occasional laboratory exercises.

**J E ENGR 3300 Engineering Electro Magnetic Principles: 3 semester hours**

Electromagnetic theory as applied to electrical engineering; vector calculus; electrostatics and magnetostatics; Maxwell's equations, including Poynting's theorem and boundary conditions; uniform plane-wave propagation; transmission lines-TEM modes, including treatment of general, lossless line, and pulse propagation; introduction to guided waves; introduction to radiation and scattering concepts.

**J E ENGR 3310 Electronics Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2300, J E ENGR 2330. Laboratory exercises for juniors covering topics in computer-aided measurements, computer simulation, and electronic circuits.

**J E ENGR 3320 Power, Energy And Polyphase Circuits: 3 semester hours**

Prerequisite: J E ENGR 2300. Fundamental concepts of power and energy; electrical measurements; physical and electrical arrangement of electrical power systems; polyphase circuit theory and calculations; principle elements of electrical systems such as transformers, rotating machines, control, and protective devices, their description and characteristics; elements of industrial power system design.

**J E ENGR 3360 Principles Of Electronic Devices: 3 semester hours**

Introduction to the solid-state physics of electronic materials and devices, including semiconductors, metals, insulators, diodes and transistors, Crystals growth technology and fundamental properties of crystals. Electronic properties and band structure of electronic materials, and electron transport in semiconductor materials. Fabrication of pn junction diodes, metal-semiconductor junctions, and transistors and integrated circuit chips. Fundamental electrical properties of rectifying diodes and light-emitting diodes, bipolar transistors and field effect transistors. Device physics of diodes and transistors, large-signal electrical behavior and high-frequency properties.

**J E ENGR 3370 Electronic Devices And Circuits: 3 semester hours**

Prerequisites: J E ENGR 2320. Introduction to semiconductor electronic devices: transistors and diodes. Device electrical DC and high-frequency characteristics. Bipolar transistors, field-effect transistors for analog electronics applications. Transistors fabrication as discrete devices and as integrated-circuit chips. Large-signal analysis of transistor amplifiers: voltage gain, distortion, input resistance and output resistance. Analysis of multitransistor amplifiers: Darlington, Cascode, and coupled-pair configurations. Half-circuit concepts, differential-mode gain, common-mode gain, and differential-to-single-ended conversion. Transistor current sources, active loads, and power-amplifier stages. Applications to operational amplifiers and feedback circuits.

**J E ENGR 3510 Signals And Systems: 3 semester hours**

Prerequisites: J E ENGR 2300 and J E MATH 3170. Elementary concepts of continuous-time and discrete-time signals and systems. Linear time-invariant (LTI) systems, impulse response, convolution, Fourier series, Fourier transforms, and frequency-domain analysis of LTI systems. Laplace transforms, Z-transforms, and rational function descriptions of LTI systems. Principles of sampling and modulation. Students participate weekly in recitation sections to develop oral communications skills using class materials.

**J E ENGR 3620 Computer Architecture: 3 semester hours**

Prerequisite: J E ENGR 2600. Study of interaction and design philosophy of hardware and software for digital computer systems: Machine organization, data structures, I/O considerations. Comparison of minicomputer architectures.

**J E ENGR 4000 Independent Study: 1-3 semester hours**

Prerequisites: Senior in Good Standing. Opportunities to acquire experience outside the classroom setting and to work closely with individual members of the faculty. A final report must be submitted to the department. Open as a senior elective only. Hours and credit to be arranged. Credit variable, maximum credit per semester 3 hours. Maximum program total credit 3 hours.

**J E ENGR 4050 Reliability And Quality Control: 3 semester hours**

Prerequisites: J E MATH 3260 or MATH 1320. An integrated analysis of reliability and quality control function in manufacturing. Statistical process control, analysis, reliability prediction, design, testing, failure analysis and prevention, maintainability, availability, and safety are discussed and related. Qualitative and quantitative aspects of statistical quality control and reliability are introduced in the context of manufacturing.

**J E ENGR 4340 Solid State Power Circuits And Applications: 3 semester hours**

Prerequisite: J E ENGR 2320, J E ENGR 3510. Study of the strategies and applications of power control using solid-state semiconductor devices. Survey of generic power electronic converters. Applications to power supplies, motor drives, and consumer electronics. Introduction to power diodes, thyristors, and MOSFETs.

**J E ENGR 4350 Electrical Energy Laboratory: 3 semester hours**

Prerequisites: J E ENGR 2330. Experimental studies of principles important in modern electrical energy systems. Topics: power measurement, transformers, batteries, static frequency converters, thermoelectric cooling, solar cells, electrical lighting, induction, commutator, and brushless motors, synchronous machines.

**J E ENGR 4360 Energy Alternatives: 3 semester hours**

Prerequisites: J E ENGR 2300, or J M ENGR 3200. This course introduces engineering analyses of the human uses of energy. Both non-renewable (e.g., oil, natural gas, coal, nuclear) and sustainable (e.g., hydropower, solar, wind, biomass) resources are covered. Topics include the engineer's role in harvesting, production, storage, conversion, delivery, and uses of energy. Students will learn system analysis, design, integration, optimization, and operational aspects of selected resources delivery systems, and end uses. Technical content will include site selection, conversion and delivery efficiency calculations, engineering economic analyses, control systems, and energy resource systematic classification. Measure will consist of a mix of homework, quizzes, tests, class participation, and projects.

**J E ENGR 4410 Control Systems I: 3 semester hours**

Same as J M ENGR 4310. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multiloop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag and lead-lag networks. Synthesis by Bode plots and root-locus diagrams. Introduction to state-variable techniques, state-transition matrix, state-variable feedback.

**J E ENGR 4520 Power Systems Analysis: 3 semester hours**

Prerequisite: J E ENGR 3320. Introduction to the modeling and elements of power systems; machines, lines, and loads; load flow methods and applications; short circuit analysis using symmetrical components on symmetrical and unsymmetrical faults; methods of economic operation of power systems and contingency; state estimators, stability, and introduction of the independent system operator.

**J E ENGR 4710 Communications Theory And Systems: 3 semester hours**

Prerequisites: J E ENGR 3510 and J E MATH 3260. Introduction to the concepts of transmission of information via communication channels. Amplitude and angle modulation for the transmission of continuous-time signals. Analog-to-digital conversion and pulse code modulation. Transmission of digital data. Introduction to random signals and noise and their effects on communication. Optimum detection systems in the presence of noise. Elementary information theory. Overview of various communication technologies such as radio, television, telephone networks, data communication, satellites, optical fiber, and cellular radio.

**J E ENGR 4720 Internet Communications: 3 semester hours**

This course will introduce and cover the architecture, protocols, security, and quality of service (QoS) of Internet Communications. Starting with the design principles and architecture of the Internet, communication applications such as Voice over IP (VoIP), video conferencing, and presence and instant messaging will be covered. Protocols developed by the Internet Engineering Task Force (IETF) including IP, TCP, UDP, DNS, SIP, XMPP, and ENUM will be studied. Latest areas of research including the Service Oriented Architecture (SOA) and peer-to-peer (P2P) architectures for Internet Communications will be covered.

**J E ENGR 4820 Digital Signal Processing: 3 semester hours**

Prerequisite: J E ENGR 3510. Introduction to analysis and synthesis of discrete-time linear time-invariant (LTI) systems. Discrete-time convolution, discrete-time Fourier transform, Z-transform, rational function descriptions of discrete-time LTI systems. Sampling, analog-to-digital conversion and digital processing of analog signals. Techniques for the design of finite impulse response (FIR) and infinite impulse response (IIR) digital filters. Hardware implementation of digital filters and finite register effects. The discrete Fourier transform and the fast Fourier transform (FFT) algorithm.

**J E ENGR 4980 Electrical Engineering Design Projects: 3 semester hours**

Prerequisites: Senior standing. Working in teams, students address design tasks assigned by faculty. Each student participates in one or more design projects in a semester. Projects are chosen to emphasize the design process, with the designer choosing one of several paths to a possible result. Collaboration with industry and all divisions of the university is encouraged.

## Joint Engineering Mathematics

### Courses

**J E MATH 3170 Engineering Mathematics: 4 semester hours**

Prerequisite: MATH 2020 or equivalent. The Laplace transform and applications; series solutions of differential equations, Bessel's equation, Legendre's equation, special functions; matrices, eigenvalues, and eigenfunctions; Vector analysis and applications; boundary value problems and spectral representation; Fourier series and Fourier integrals; solution of partial differential equations of mathematical physics.

**J E MATH 3260 Probability And Statistics For Engineering: 3 semester hours**

Prerequisites: MATH 2000. Study of probability and statistics together with engineering applications. Probability and statistics: random variables, distribution functions, density functions, expectations, means, variances, combinatorial probability, geometric probability, normal random variables, joint distribution, independence, correlation, conditional probability, Bayes theorem, the law of large numbers, the central limit theorem. Applications: reliability, quality control, acceptance sampling, linear regression, design and analysis of experiments, estimation, hypothesis testing. Examples are taken from engineering applications. This course is required for electrical and mechanical engineering majors.

### Courses

**J E MATH 3170 Engineering Mathematics: 4 semester hours**

Prerequisite: MATH 2020 or equivalent. The Laplace transform and applications; series solutions of differential equations, Bessel's equation, Legendre's equation, special functions; matrices, eigenvalues, and eigenfunctions; Vector analysis and applications; boundary value problems and spectral representation; Fourier series and Fourier integrals; solution of partial differential equations of mathematical physics.

**J E MATH 3260 Probability And Statistics For Engineering: 3 semester hours**

Prerequisites: MATH 2000. Study of probability and statistics together with engineering applications. Probability and statistics: random variables, distribution functions, density functions, expectations, means, variances, combinatorial probability, geometric probability, normal random variables, joint distribution, independence, correlation, conditional probability, Bayes theorem, the law of large numbers, the central limit theorem. Applications: reliability, quality control, acceptance sampling, linear regression, design and analysis of experiments, estimation, hypothesis testing. Examples are taken from engineering applications. This course is required for electrical and mechanical engineering majors.

## Joint Mechanical Engineering

### Courses

**J M ENGR 1413 Introduction To Engineering Design: CAD: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students learn the fundamentals of spatial reasoning and graphical representation. Freehand sketching, including pictorial and orthographic views, are applied to the design process. Computer modeling techniques provide accuracy, analysis, and visualization tools necessary for the design of devices and machines. Topics in detailing design for production, including fasteners, dimensioning, tolerancing, and creation of part and assembly drawings are also included.

**J M ENGR 1414 Introduction To Engineering Design: Project: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students first complete a series of experiments that introduce physical phenomena related to mechanical engineering. Understanding is achieved by designing and building simple devices and machines. The course proceeds to a design contest in which the students design and build from a kit of parts a more significant machine that competes in a contest held at the end of the course. The course is open to all and is appropriate for anyone interested in mechanical devices, design, and the design process.

**J M ENGR 2410 Mechanics Of Deformable Bodies: 3 semester hours**

Prerequisites: MATH 1900 and ENGR 2310. Normal and shear stresses and strains. Stress-strain diagrams. Hooke's law and elastic energy. Thermal stresses. Stresses in beams, columns, torsional members, and pressure vessels. Elastic deflection of beams and shafts. Statically indeterminate structures. Mohr's circle of stress. Stability concepts.

**J M ENGR 3010 Computer Aided Design: 3 semester hours**

Prerequisite: J M ENGR 1413. Computer aided design, analysis and optimization of parts and assemblies; solid modeling of complex surfaces, creation of detail drawings, dimensioning and tolerancing; assembly modeling, assembly constraints, interference checking; motion constraints, force and acceleration analysis, thermal analysis; part optimization for weight, strength and thermal characteristics using Unigraphics software.

**J M ENGR 3200 Thermodynamics: 3 semester hours**

Prerequisites: MATH 1900, CHEM 1111 and PHYSICS 2111. Classical thermodynamics; thermodynamic properties; work and heat; first and second laws. Entropy, irreversibility, availability. Application to engineering systems.

***J M ENGR 3221 Mechanical Design And Machine Elements: 4 semester hours***

Prerequisites: J M ENGR 1414, J M ENGR 1415, J M ENGR 2410, J E MATH 3170. Provides a thorough overview of the steps in the engineering design process and introduces analytical/quantitative techniques applicable to each step. Topics include recognition of need, specification formulation, concept generation, concept selection, embodiment, and detail design. Includes an introduction to several classes of machine elements such as bearings, gears, belts, and springs. Underlying analytical model of the machine elements are presented along with guidelines about designing and choosing such elements for practical applications. A case study from industry will emphasize how the steps of the design process were done as well as the rationale for choosing particular machine elements.

***J M ENGR 3250 Material Science For J M ENGR: 4 semester hours***

Prerequisites: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

***J M ENGR 3360 Material Science For J C ENGR: 3 semester hours***

Same as J M ENGR 3250, but without the lab. Prerequisite: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

***J M ENGR 3700 Fluid Mechanics: 3 semester hours***

Prerequisites: J E MATH 3170 and ENGR 2320. Fundamental concepts of fluids as continua. Viscosity. Flow field: velocity, vorticity, streamlines. Fluid statics: hydrostatic forces manometers. Conservation of mass and momentum. Incompressible inviscid flow. Dimensional analysis and similitude. Flow in pipes and ducts. Flow measurement. Boundary-layer concepts. Flow in open channels.

***J M ENGR 3710 Principles Of Heat Transfer: 3 semester hours***

Prerequisites: J M ENGR 3200, J M ENGR 3700 and J E MATH 3170. Introductory treatment of the principles of heat transfer by conduction, convection, or radiation. Mathematical analysis of steady and unsteady conduction along with numerical methods. Analytical and semiempirical methods of forced and natural convection systems. Heat exchangers: LMTD and e-NTU analysis. Boiling and condensation heat transfer. Radiation between blackbody and real surfaces. Radiation network analysis.

***J M ENGR 3721 Fluid Mechanics Laboratory: 1 semester hour***

Prerequisites: J M ENGR 3700. Physical laboratory exercises focusing on fluid properties and flow phenomena covered in J M ENGR 3700. Calibration and use of a variety of equipment; acquisition, processing, and analysis of data by manual as well as automated methods.

***J M ENGR 3722 Heat Transfer Laboratory: 1 semester hour***

Prerequisites: J M ENGR 3721 and J M ENGR 3710. Physical laboratory exercises, including some numerical simulations and computational exercises, focusing on heat-transfer phenomena covered in J M ENGR 3710. Calibration and use of variety of laboratory instrumentation; acquisition, processing, and analysis of data by manual as well as automated methods; training in formal report writing.

***J M ENGR 3750 Fluid Control and Power Systems Theory And Practice: 3 semester hours***

Prerequisite: J M ENGR 3700. Topics to be covered include: design of hydraulic and pneumatic control and power systems using advanced concepts and analytical tools; analysis of fluid flow through small orifices and between parallel and inclined planes; theory of spool and flapper valves; physical configuration of practical components: pumps, motors, fluid lines and valves, accumulators and storage devices; integration of components into practical systems, development of realistic performance diagrams using MATLAB Simulink; application of performance diagrams in design and analysis of fluid power systems.

***J M ENGR 4000 Independent Study: 1-3 semester hours***

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a mechanical engineering topic of special interest to a student performed under the direction of a faculty member.

***J M ENGR 4041 Current Topics In Engineering Design: 1 semester hour***

Case studies of engineering failures, class discussion & short written papers are used to illustrate and stress the importance of engineering teamwork, ethics, and professional standards within the mechanical engineering discipline. Working in teams students develop and present a case study on a topic of their choice. Guest lecturers introduce contemporary topics such as product liability, environmental regulations, green design, appropriate technologies, and concurrent engineering.

***J M ENGR 4110 Mechanical Engineering Design Project: 4 semester hours***

Prerequisites: J M ENGR 3221. Feasibility study of an open-ended, original design or a creative redesign of a mechanical component or system requiring the application of engineering science principles. Feasibility is subject to economic, safety, legal, environmental, ethical, aesthetic, and other constraints in a competitive manufacturing environment. Project teams perform the detailed design and optimization of the concept developed in the feasibility study. Presentations and reports with manufacturing drawings and prototypes are completed by each team.

***J M ENGR 4120 Design of Thermal Systems: 3 semester hours***

Prerequisites: Senior Standing. Analysis and design of advanced thermo-fluid systems. Student teams participate in the design process which could involve research, design formulation, codes, standards, engineering economics, a design project report, and formal presentations. Topics include: thermal-fluid systems and components, such as power, heating, and refrigeration systems, pumps, fans, compressors, combustors, turbines, nozzles, coils, heat exchangers and piping.

***J M ENGR 4170 Dynamic Response Of Physical Systems: 2 semester hours***

Prerequisites: ENGR 2320 and J E MATH 3170, J M ENGR 4170 and J M ENGR 4180 must be taken in the same semester. Free and forced vibration of mechanical systems with lumped inertia, springs, and dampers. Methods of Laplace transform, complex harmonic balance, and Fourier series. Electrical analogs. Introduction to Lagrange's equations of motion and matrix formulations. Transient response of continuous systems by partial differential equations, by rayleigh methods, and by lumped parameters.

***J M ENGR 4180 Dynamic Response Laboratory: 2 semester hours***

PREREQUISITES: J M ENGR 4170 and J M ENGR 4180 must be taken during the same semester. Laboratory problems focusing on materials covered in J M ENGR 4170.

**J M ENGR 4250 Material Selection In Engineering Design: 3 semester hours**

PREREQUISITES: Senior standing. Analysis of the scientific bases of material behavior in the light of research contributions of the last 20 years. Development of a rational approach to the selection of materials to meet a wide range of design requirements for conventional and advanced applications. Although emphasis will be placed on mechanical properties, other properties of interest in design will be discussed, e.g., acoustical, optical and thermal.

**J M ENGR 4310 Control Systems I: 3 semester hours**

Same as J E ENGR 4410. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multi-loop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag, and lead-lag networks. Synthesis by Bode plot plots and root-locus diagrams. Introduction to state-variable techniques, state transition matrix, state-variable feedback.

**J M ENGR 4440 Solar Energy: 3 semester hours**

Prerequisites: J M ENGR 3200, J M ENGR 3700, and J M ENGR 3710. This course will cover the following topics: extraterrestrial solar radiation; solar radiation on the earth's surface; weather bureau data; review of selected topics in heat transfer; methods of solar energy collection including flat panel and concentrating collectors; solar energy storage; transient and long-term solar system and performance.

**J M ENGR 4630 Nanotechnology: Concepts And Applications: 3 semester hours****J M ENGR 4700 Sustainable Environmental Building Systems: 3 semester hours**

Sustainable design of building lighting and HVAC systems considering performance, life-cycle cost and downstream environmental impact. Criteria, codes and standards for comfort, air quality, noise/vibration and illumination. Life cycle and other investment methods to integrate energy consumption/conservation, utility rates, initial cost, system/component longevity, maintenance cost and building productivity. Direct and secondary contributions to acid rain, global warming and ozone depletion.

**J M ENGR 4810 HVAC Analysis and Design I: 3 semester hours**

PREREQUISITES: Senior standing. Moist air properties and the psychrometric chart. Classic moist air processes and design procedures for heating and cooling systems. Design of heating, ventilating, and air conditioning systems for indoor environmental comfort and health. Basics of heat transfer in building structures. Solar radiation effects on building heat transfer. Calculation procedures for the analysis of heating and cooling loads in buildings.

**J M ENGR 4820 HVAC Analysis and Design II: 3 semester hours**

PREREQUISITES: Senior standing. Energy calculations to estimate the quantity of energy needed to heat and cool building structures. Fundamentals of incompressible flow, basics of centrifugal pump performance, and design procedures for water piping systems. Space air diffuser design to assure that temperatures, humidities, and air velocities within occupied spaces are acceptable. Air duct design and fan analysis for optimally distributing air through building air duct systems. Performance analysis of refrigeration systems, including the effects of pressure losses and heat transfer. Direct contact heat and mass transfer.

**J M ENGR 4900 Engineering Project Management: 3 semester hours**

Basic fundamentals and advanced concepts of engineering project management applicable to projects and programs, both large and small. Project management skills, techniques, systems, software and application of management science principles will be covered and related to research, engineering, architectural, and construction projects from initial evaluations through approval, design, procurement, construction and startup.

**Courses****J M ENGR 1413 Introduction To Engineering Design: CAD: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students learn the fundamentals of spatial reasoning and graphical representation. Freehand sketching, including pictorial and orthographic views, are applied to the design process. Computer modeling techniques provide accuracy, analysis, and visualization tools necessary for the design of devices and machines. Topics in detailing design for production, including fasteners, dimensioning, tolerancing, and creation of part and assembly drawings are also included.

**J M ENGR 1414 Introduction To Engineering Design: Project: 2 semester hours**

An introduction to engineering design in the context of mechanical engineering. Students first complete a series of experiments that introduce physical phenomena related to mechanical engineering. Understanding is achieved by designing and building simple devices and machines. The course proceeds to a design contest in which the students design and build from a kit of parts a more significant machine that competes in a contest held at the end of the course. The course is open to all and is appropriate for anyone interested in mechanical devices, design, and the design process.

**J M ENGR 2410 Mechanics Of Deformable Bodies: 3 semester hours**

Prerequisites: MATH 1900 and ENGR 2310. Normal and shear stresses and strains. Stress-strain diagrams. Hooke's law and elastic energy. Thermal stresses. Stresses in beams, columns, torsional members, and pressure vessels. Elastic deflection of beams and shafts. Statically indeterminate structures. Mohr's circle of stress. Stability concepts.

**J M ENGR 3010 Computer Aided Design: 3 semester hours**

Prerequisite: J M ENGR 1413. Computer aided design, analysis and optimization of parts and assemblies; solid modeling of complex surfaces, creation of detail drawings, dimensioning and tolerancing; assembly modeling, assembly constraints, interference checking; motion constraints, force and acceleration analysis, thermal analysis; part optimization for weight, strength and thermal characteristics using Unigraphics software.

**J M ENGR 3200 Thermodynamics: 3 semester hours**

Prerequisites: MATH 1900, CHEM 1111 and PHYSICS 2111. Classical thermodynamics; thermodynamic properties; work and heat; first and second laws. Entropy, irreversibility, availability. Application to engineering systems.

***J M ENGR 3221 Mechanical Design And Machine Elements: 4 semester hours***

Prerequisites: J M ENGR 1414, J M ENGR 1415, J M ENGR 2410, J E MATH 3170. Provides a thorough overview of the steps in the engineering design process and introduces analytical/quantitative techniques applicable to each step. Topics include recognition of need, specification formulation, concept generation, concept selection, embodiment, and detail design. Includes an introduction to several classes of machine elements such as bearings, gears, belts, and springs. Underlying analytical model of the machine elements are presented along with guidelines about designing and choosing such elements for practical applications. A case study from industry will emphasize how the steps of the design process were done as well as the rationale for choosing particular machine elements.

***J M ENGR 3250 Material Science For J M ENGR: 4 semester hours***

Prerequisites: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

***J M ENGR 3360 Material Science For J C ENGR: 3 semester hours***

Same as J M ENGR 3250, but without the lab. Prerequisite: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

***J M ENGR 3700 Fluid Mechanics: 3 semester hours***

Prerequisites: J E MATH 3170 and ENGR 2320. Fundamental concepts of fluids as continua. Viscosity. Flow field: velocity, vorticity, streamlines. Fluid statics: hydrostatic forces manometers. Conservation of mass and momentum. Incompressible inviscid flow. Dimensional analysis and similitude. Flow in pipes and ducts. Flow measurement. Boundary-layer concepts. Flow in open channels.

***J M ENGR 3710 Principles Of Heat Transfer: 3 semester hours***

Prerequisites: J M ENGR 3200, J M ENGR 3700 and J E MATH 3170. Introductory treatment of the principles of heat transfer by conduction, convection, or radiation. Mathematical analysis of steady and unsteady conduction along with numerical methods. Analytical and semiempirical methods of forced and natural convection systems. Heat exchangers: LMTD and e-NTU analysis. Boiling and condensation heat transfer. Radiation between blackbody and real surfaces. Radiation network analysis.

***J M ENGR 3721 Fluid Mechanics Laboratory: 1 semester hour***

Prerequisites: J M ENGR 3700. Physical laboratory exercises focusing on fluid properties and flow phenomena covered in J M ENGR 3700. Calibration and use of a variety of equipment; acquisition, processing, and analysis of data by manual as well as automated methods.

***J M ENGR 3722 Heat Transfer Laboratory: 1 semester hour***

Prerequisites: J M ENGR 3721 and J M ENGR 3710. Physical laboratory exercises, including some numerical simulations and computational exercises, focusing on heat-transfer phenomena covered in J M ENGR 3710. Calibration and use of variety of laboratory instrumentation; acquisition, processing, and analysis of data by manual as well as automated methods; training in formal report writing.

***J M ENGR 3750 Fluid Control and Power Systems Theory And Practice: 3 semester hours***

Prerequisite: J M ENGR 3700. Topics to be covered include: design of hydraulic and pneumatic control and power systems using advanced concepts and analytical tools; analysis of fluid flow through small orifices and between parallel and inclined planes; theory of spool and flapper valves; physical configuration of practical components: pumps, motors, fluid lines and valves, accumulators and storage devices; integration of components into practical systems, development of realistic performance diagrams using MATLAB Simulink; application of performance diagrams in design and analysis of fluid power systems.

***J M ENGR 4000 Independent Study: 1-3 semester hours***

Prerequisites: Junior standing and consent of faculty advisor. Independent investigation of a mechanical engineering topic of special interest to a student performed under the direction of a faculty member.

***J M ENGR 4041 Current Topics In Engineering Design: 1 semester hour***

Case studies of engineering failures, class discussion & short written papers are used to illustrate and stress the importance of engineering teamwork, ethics, and professional standards within the mechanical engineering discipline. Working in teams students develop and present a case study on a topic of their choice. Guest lecturers introduce contemporary topics such as product liability, environmental regulations, green design, appropriate technologies, and concurrent engineering.

***J M ENGR 4110 Mechanical Engineering Design Project: 4 semester hours***

Prerequisites: J M ENGR 3221. Feasibility study of an open-ended, original design or a creative redesign of a mechanical component or system requiring the application of engineering science principles. Feasibility is subject to economic, safety, legal, environmental, ethical, aesthetic, and other constraints in a competitive manufacturing environment. Project teams perform the detailed design and optimization of the concept developed in the feasibility study. Presentations and reports with manufacturing drawings and prototypes are completed by each team.

***J M ENGR 4120 Design of Thermal Systems: 3 semester hours***

Prerequisites: Senior Standing. Analysis and design of advanced thermo-fluid systems. Student teams participate in the design process which could involve research, design formulation, codes, standards, engineering economics, a design project report, and formal presentations. Topics include: thermal-fluid systems and components, such as power, heating, and refrigeration systems, pumps, fans, compressors, combustors, turbines, nozzles, coils, heat exchangers and piping.

***J M ENGR 4170 Dynamic Response Of Physical Systems: 2 semester hours***

Prerequisites: ENGR 2320 and J E MATH 3170, J M ENGR 4170 and J M ENGR 4180 must be taken in the same semester. Free and forced vibration of mechanical systems with lumped inertia, springs, and dampers. Methods of Laplace transform, complex harmonic balance, and Fourier series. Electrical analogs. Introduction to Lagrange's equations of motion and matrix formulations. Transient response of continuous systems by partial differential equations, by rayleigh methods, and by lumped parameters.

***J M ENGR 4180 Dynamic Response Laboratory: 2 semester hours***

PREREQUISITES: J M ENGR 4170 and J M ENGR 4180 must be taken during the same semester. Laboratory problems focusing on materials covered in J M ENGR 4170.

**J M ENGR 4250 Material Selection In Engineering Design: 3 semester hours**

PREREQUISITES: Senior standing. Analysis of the scientific bases of material behavior in the light of research contributions of the last 20 years. Development of a rational approach to the selection of materials to meet a wide range of design requirements for conventional and advanced applications. Although emphasis will be placed on mechanical properties, other properties of interest in design will be discussed, e.g., acoustical, optical and thermal.

**J M ENGR 4310 Control Systems I: 3 semester hours**

Same as J E ENGR 4410. Prerequisites: J E MATH 3170, J E ENGR 2300. Introduction to automatic control concepts. Block diagram representation of single and multi-loop systems. Multi-input and multi-output systems. Control system components. Transient and steady-state performance; stability analysis; Routh, Nyquist, Bode, and root locus diagrams. Compensation using lead, lag, and lead-lag networks. Synthesis by Bode plot plots and root-locus diagrams. Introduction to state-variable techniques, state transition matrix, state-variable feedback.

**J M ENGR 4440 Solar Energy: 3 semester hours**

Prerequisites: J M ENGR 3200, J M ENGR 3700, and J M ENGR 3710. This course will cover the following topics: extraterrestrial solar radiation; solar radiation on the earth's surface; weather bureau data; review of selected topics in heat transfer; methods of solar energy collection including flat panel and concentrating collectors; solar energy storage; transient and long-term solar system and performance.

**J M ENGR 4630 Nanotechnology: Concepts And Applications: 3 semester hours**

.

**J M ENGR 4700 Sustainable Environmental Building Systems: 3 semester hours**

Sustainable design of building lighting and HVAC systems considering performance, life-cycle cost and downstream environmental impact. Criteria, codes and standards for comfort, air quality, noise/vibration and illumination. Life cycle and other investment methods to integrate energy consumption/conservation, utility rates, initial cost, system/component longevity, maintenance cost and building productivity. Direct and secondary contributions to acid rain, global warming and ozone depletion.

**J M ENGR 4810 HVAC Analysis and Design I: 3 semester hours**

PREREQUISITES: Senior standing. Moist air properties and the psychrometric chart. Classic moist air processes and design procedures for heating and cooling systems. Design of heating, ventilating, and air conditioning systems for indoor environmental comfort and health. Basics of heat transfer in building structures. Solar radiation effects on building heat transfer. Calculation procedures for the analysis of heating and cooling loads in buildings.

**J M ENGR 4820 HVAC Analysis and Design II: 3 semester hours**

PREREQUISITES: Senior standing. Energy calculations to estimate the quantity of energy needed to heat and cool building structures. Fundamentals of incompressible flow, basics of centrifugal pump performance, and design procedures for water piping systems. Space air diffuser design to assure that temperatures, humidities, and air velocities within occupied spaces are acceptable. Air duct design and fan analysis for optimally distributing air through building air duct systems. Performance analysis of refrigeration systems, including the effects of pressure losses and heat transfer. Direct contact heat and mass transfer.

**J M ENGR 4900 Engineering Project Management: 3 semester hours**

Basic fundamentals and advanced concepts of engineering project management applicable to projects and programs, both large and small. Project management skills, techniques, systems, software and application of management science principles will be covered and related to research, engineering, architectural, and construction projects from initial evaluations through approval, design, procurement, construction and startup.

## Korean

### Courses

**KOREAN 1001 Korean I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Korean and upon the acquisition of the fundamentals of grammar and syntax.

**KOREAN 1002 Korean II: 5 semester hours**

Prerequisites: KOREAN 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Korean. Continuation of the acquisition of the fundamentals of grammar and syntax.

**KOREAN 2101 Intermediate Korean I: 5 semester hours**

Prerequisites: KOREAN 1002 or equivalent. Grammar review and continued development of language skills.

**KOREAN 2102 Intermediate Korean II: 5 semester hours**

PREREQUISITES: KOREAN 2101 or equivalent. Continuation of KOREAN 2101.

**KOREAN 2190 Special Readings: 1-3 semester hours**

Prerequisites: KOREAN 2102 or consent of the department Independent study through readings, reports, and conferences.

### Courses

**KOREAN 1001 Korean I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Korean and upon the acquisition of the fundamentals of grammar and syntax.

**KOREAN 1002 Korean II: 5 semester hours**

Prerequisites: KOREAN 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Korean. Continuation of the acquisition of the fundamentals of grammar and syntax.

**KOREAN 2101 Intermediate Korean I: 5 semester hours**

Prerequisites: KOREAN 1002 or equivalent. Grammar review and continued development of language skills.

**KOREAN 2102 Intermediate Korean II: 5 semester hours**

PREREQUISITES: KOREAN 2101 or equivalent. Continuation of KOREAN 2101.

**KOREAN 2190 Special Readings: 1-3 semester hours**

Prerequisites: KOREAN 2102 or consent of the department Independent study through readings, reports, and conferences.

## Latin

### Courses

**LATIN 1001 Latin I: 5 semester hours**

A study of Latin grammar, syntax and vocabulary accompanied by reading selections from literary texts.

***LATIN 1002 Latin II: 5 semester hours***

Prerequisite: LATIN 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from LATIN 1001, including readings and discussion from selected classical authors.

***LATIN 2101 Intermediate Latin Language And Culture: 3 semester hours***

Prerequisites: LATIN 1002 or equivalent. Students will advance their understanding of Roman culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

***LATIN 2150 Latin Literature In Translation: 3 semester hours***

Prerequisites: Sophomore standing. Reading and discussion of selected works in Latin literature from Republican Rome to late antiquity in English translation. This course may be repeated for credit if the topics vary.

***LATIN 2152 A Brief Introduction to Greek and Latin in English Today: 1 semester hour***

Same as GRK ANC 2152. This online course is designed to enrich the student's general liberal arts vocabulary as well as to improve mastery of terms used in law, medicine, and science. The emphasis is on vocabulary derived from Greek and Latin. Included will be the Greek alphabet and an introduction to historical language change involving the relationship among Greek, Latin, and Romance languages, and Germanic languages (particularly English). This course is not to be taken in addition to GRK ANC 2151.

***LATIN 2190 Special Readings: 1-3 semester hours***

Prerequisite: LATIN 2101 and consent of department. Independent study through readings, reports and conferences.

## Courses

***LATIN 1001 Latin I: 5 semester hours***

A study of Latin grammar, syntax and vocabulary accompanied by reading selections from literary texts.

***LATIN 1002 Latin II: 5 semester hours***

Prerequisite: LATIN 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from LATIN 1001, including readings and discussion from selected classical authors.

***LATIN 2101 Intermediate Latin Language And Culture: 3 semester hours***

Prerequisites: LATIN 1002 or equivalent. Students will advance their understanding of Roman culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

***LATIN 2150 Latin Literature In Translation: 3 semester hours***

Prerequisites: Sophomore standing. Reading and discussion of selected works in Latin literature from Republican Rome to late antiquity in English translation. This course may be repeated for credit if the topics vary.

***LATIN 2152 A Brief Introduction to Greek and Latin in English Today: 1 semester hour***

Same as GRK ANC 2152. This online course is designed to enrich the student's general liberal arts vocabulary as well as to improve mastery of terms used in law, medicine, and science. The emphasis is on vocabulary derived from Greek and Latin. Included will be the Greek alphabet and an introduction to historical language change involving the relationship among Greek, Latin, and Romance languages, and Germanic languages (particularly English). This course is not to be taken in addition to GRK ANC 2151.

***LATIN 2190 Special Readings: 1-3 semester hours***

Prerequisite: LATIN 2101 and consent of department. Independent study through readings, reports and conferences.

# Logistics and Operations Management

## Courses

***LOG OM 3300 Business Statistics: 3 semester hours***

Prerequisites: MATH 1100, MATH 1105, INFSYS 1800 and a 2.0 campus GPA. Construction and use of statistical models for business management. Students will learn techniques used for relational analysis and business forecasting and how to apply them in a business context. Tools include CHI-Square tests of statistical independence; analysis of variance; simple linear regression and correlation; multiple linear regression; and extrapolative techniques such as moving averages and exponential smoothing. Emphasis is placed on problem definition, construction of statistical models, analysis of data, and interpretation of results. Computers are used for extensive analyses of case data.

***LOG OM 3320 Introduction To Operations Management: 3 semester hours***

Prerequisites: A 2.0 campus GPA and either (ECON 1001, ACCTNG 2410 and LOG OM 3300) or (MATH 2000 and MATH 1320). An examination of the concepts, processes, and institutions which are fundamental to an understanding of manufacturing and service operations within organizations. Emphasis is on the management and organization of operations and upon the application of quantitative methods to the solution of strategic, tactical and operational problems.

***LOG OM 3349 Project Consulting and Execution: 3 semester hours***

Prerequisites: LOG OM 3300 or equivalent and LOG OM 3320 or equivalent (may be taken concurrently). Provides real world experience in planning and executing projects. The class will have teams of students work on projects sponsored by companies and not for profit organizations for 2 to 6 weeks at a time. It will provide students practice in critical thinking, analysis, communication, and other critical skills identified as necessary for employees to function at a high level in their jobs.

***LOG OM 3390 Internship In Logistics And Operations Management: 1-3 semester hours***

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of LOM electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of at least 2.5 is also required. Students are employed in the field of Logistics and Operations Management (LOM) where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. An LOM faculty member will monitor the student's program with the student providing a formal written report at the end of the project. LOG OM 3390 may not be counted toward the minimum credit hours for the LOM emphasis.

***LOG OM 3395 Special Administrative Problems - Management Science: 1-10 semester hours***

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**LOG OM 3398 Seminar in Logistics and Operations Management: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of logistics and operations management. May be repeated for credit with different topics.

**LOG OM 3399 Independent Study In Logistics And Operations Management: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in logistics and operations management under the supervision of a full-time logistics and operations management faculty member.

**LOG OM 4312 Business Forecasting: 3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 or graduate standing; also either LOG OM 3320 or (MATH 3000 and MATH 1320) Further study of statistical tools for forecasting in a decision-making context. Topics include explanatory models (multiple regression), classical time series decomposition, and extrapolative techniques (exponential smoothing and Box-Jenkins procedures). In addition, methods for considering problems of intervention effects, seasonality, and collinearity will be discussed. Students will perform extensive analyses of time series data using computer packages.

**LOG OM 4321 Production and Operations Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Application of the tools and techniques of statistical decision theory and operations research to production and operating problems. Emphasis is on the use of mathematical modeling and simulation techniques to analyze complex and ill-structured problems in large-scale systems.

**LOG OM 4322 Lean Production In Manufacturing And Service Operations: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement techniques, quick set-ups, total productive maintenance, kanban scheduling, cellular production, team organization of workers, supplier relations, quality management, and the environmental aspects of production.

**LOG OM 4324 Service Operations Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. An examination of methods for designing and operating service delivery systems, such as in the health care, financial, transportation, hospitality, and governmental services industries. Topics include process and facility design, facility layout and location, queuing, demand forecasting and management service quality, staffing, and personnel scheduling.

**LOG OM 4325 Environmental Sustainability in Business Operations: 3 semester hours**

Prerequisites: LOG OM 3320 or permission of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of "lean and green" operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

**LOG OM 4326 Quality Assurance In Business: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of statistical quality control concepts and procedures applicable to management systems, administrative activities, service industries, and nonprofit organizations. Some successful quality assurance programs will be examined.

**LOG OM 4330 Business Logistics Systems: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Analysis of business logistics systems, their design, and operation. Topics include: network design, facility location, transportation, vehicle routing, storage and handling capacity planning, inventory management, and customer service.

**LOG OM 4347 Introduction to Project Management: 3 semester hours**

Prerequisites: LOG OM 3320. This course introduces the concepts and practices of Project Management with a focus on Logistics and Operations Management related projects. It will cover conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class will introduce agile project management as applicable to projects where there is not the specificity of goals or solutions to be applicable to traditional project management.

**LOG OM 4350 Management Science Methods: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320 or MATH 3000 and MATH 1320. Applications of the theories and techniques of operations research to problems of business, government, and industry with emphasis on the construction and utilization of quantitative decision models.

**LOG OM 4354 Management Science Methods II: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 4350. Topics of special interest including mathematical programming, stochastic decision-making, digital simulation, game theory, and other selected techniques. (Formerly Mathematical programming).

**LOG OM 4381 International Logistics And Operations Management: 3 semester hours**

Same as INTL BUS 4381. Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of business logistics and supply chain strategies involving shipments across national boundaries. Topics include the effects of international agreements and regional trading blocks on supply chain strategies; the design of global logistics networks; managerial processes and systems for international production and distribution, and risk management for international logistics.

**LOG OM 4398 Seminar in Logistics and Operations Management: 1-3 semester hours**

Prerequisites: LOG OM 3320 or permission of the instructor and a minimum 2.0 campus GPA. For some topics additional prerequisites may be required. An intensive study of a specific aspect, problem or technique in the areas of logistics, operations management, or supply chain management. Different topics may be offered under this course number, so the course (with different topics) can be repeated for credit.

**LOG OM 5300 Statistical Analysis For Management Decisions: 3 semester hours**

Prerequisites: INFSYS 5800 (may be taken concurrently) and ECON 4105 with a minimum grade of "C." The role of statistical evidence in the formation of inference and in the selection of strategies in solving business problems is developed. Probability and probability distributions are studied as a basis of statistical inference. An introduction to multivariate analysis is provided, which includes analysis of variance and regression methods.

**LOG OM 5312 Advanced Statistical Methods For Management Decisions: 3 semester hours**

Prerequisites: LOG OM 5300. The application of statistical methods to managerial problems, forecasting and business research. Topics include the blending of multiple regression and analysis of variance into a general linear model, logistic models, techniques for projecting seasonal time series, and forecasting techniques (ARIMA models) which deal with serially correlated data. Through class presentations, assigned exercises and a major project, students gain experience in constructing explanatory and predictive models for problems in marketing, finance, etc. Students use commercial software (e.g. the Statistical Analysis System) for analyzing data, constructing models and producing reports.

**LOG OM 5320 Production And Operations Management: 3 semester hours**

Prerequisites: LOG OM 5300. This course discusses issues related to the creation and delivery of goods and services. Topics include the design of production processes, the layout and location of facilities, forecasting, scheduling, inventory control, queuing, materials planning, and quality control. Analytical techniques such as linear programming are used in studying these problems.

**LOG OM 5322 Lean Production: 3 semester hours**

Prerequisites: LOG OM 5320. Study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement, set-up reduction, total productive maintenance, kanban scheduling, cellular production, work teams, supplier relations, quality management, and the environmental aspects of production. Cases and a course project will be used to integrate and apply the course material.

**LOG OM 5324 Service Operations Management: 3 semester hours**

Prerequisite: LOG OM 5320. An examination of methods for designing and operating service delivery systems, such as in the health care, financial, transportation, hospitality, and governmental services industries. Topics include process and facility design, facility layout and location, queuing, demand forecasting and management, service quality, staffing, and personnel scheduling.

**LOG OM 5325 Environmental Analysis and Sustainability in Business Operations: 3 semester hours**

Prerequisites: LOG OM 5320 or permission of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of "lean and green" operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

**LOG OM 5326 Quality Management: 3 semester hours**

Prerequisites: LOG OM 5300 or MATH 4200 or permission of instructor. An applied course on total quality management. Quality improvement approaches are presented and the managerial implications and responsibilities in implementing these approaches are discussed. Topical coverage includes the construction and interpretation of control charts, graphical methods, quality function deployment, robust experiments for product design and improvement, mistake-proofing (poke yoke), the Deming approach, Baldrige award criteria, quality cost audits, worker empowerment and reward systems. Cases involving both business processes and physical processes are used to illustrate successful quality improvement efforts.

**LOG OM 5334 Internship In Logistics And Supply Chain Management: 1 semester hour**

Prerequisite: Consent of Instructor. Students receive practical experience in the area of logistics or supply chain management. The internship is supervised by a professional in the host organization in consultation with a faculty member.

**LOG OM 5340 Transportation Economics for Business Managers: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5000 or permission of the instructor. This course makes use of a range of economic concepts to examine the nature of markets in which transport services are provided. This course is designed for future transportation professionals who wish to explore the fundamentals of economics in their field. Basic concepts covered include the theory of transportation demand, transportation costs and investment planning, and current topics in transportation economics such as regulation-deregulation and social cost pricing.

**LOG OM 5349 Project Consulting and Execution: 3 semester hours**

Prerequisites: LOG OM 5300 or equivalent; LOG OM 5320 or equivalent (may be taken concurrently). Provides real world experience in planning and executing projects. The class will have teams of students work on projects sponsored by companies and not for profit organizations for 2 to 6 weeks at a time. It will provide students practice in critical thinking, analysis, communication, and other critical skills identified as necessary for employees to function at a high level in their jobs. A student may NOT count LOG OM 5349 and an internship toward the LOG OM emphasis. Only one of the two would count.

**LOG OM 5354 Simulation For Managerial Decision Making: 3 semester hours**

Prerequisites: LOG OM 5320. Introduction to simulation as a managerial decision-making aid. Application of simulation to a number of management science-oriented problems. This course introduces and requires use of a simulation language.

**LOG OM 5381 International Logistics And Operations Management: 3 semester hours**

Same as INTL BUS 5381. Prerequisites: LOG OM 5320. A study of international logistics and operations management strategy, planning and operations. Topics may include multinational logistics and supply chain strategies, global network design and sourcing, international transportation, distribution and operations, import-export, risk management, etc.

**LOG OM 5399 Individual Research in Logistics and Operations Management: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Logistics and Operations Management under the guidance of a specific professor.

**LOG OM 6330 Business Logistics Systems: 3 semester hours**

Prerequisites: LOG OM 5320 (may be taken concurrently). Analysis of business logistics systems and their role in supply chain management. covers both design and operation of logistics systems and their components. Topics may include network design, facility location, transportation, vehicle routing, inventory management, customer service, reverse logistics and logistics information systems.

**LOG OM 6331 Logistics And Supply Chain Operational Modeling: 3 semester hours**

Prerequisites: LOG OM 5320 and LOG OM 6330. A study of the application of leading software packages to modeling problems and issues arising in the operational management of logistics and supply chains. This course covers the economic tradeoffs involved in such decisions, data requirements, operating parameters, and application of software packages to problems such as vehicle routing and scheduling, freight shipments consolidation, cross-docking, and other operational and tactical strategies. This "hands on" course is designed to prepare students for higher-level supply chain analyses and consulting work.

**LOG OM 6332 Logistics And Supply Chain Strategic Modeling: 3 semester hours**

Prerequisites: LOG OM 5320 and LOG OM 6330. A study of the application of leading software packages to modeling problems and issues arising in the planning and strategic management of logistics networks and supply chains. The course identifies and explores the economic and customer service tradeoffs involved in such networks. Issues such as location of facilities assignment of production and distribution missions to facilities, identification of sourcing relationships amongst facilities, and identification of cost and customer service consequences of alternative supply chain designs are addressed by the application of commercial software packages to support decision making. This "hands on" course is designed to prepare students for high-level supply chain analyses and consulting work.

**LOG OM 6338 Business Processes: Design, Management & Integration: 3 semester hours**

Prerequisites: LOG OM 5320. This course presents the concepts and state of the art / state of the practice of business process design and business process management for improving business performance, effectiveness, quality, customer service and satisfaction. Issues related to characteristics, goals, benefits and costs of enterprise-wide design, and the role of information technology during the design process will be discussed. Specific topics will include: the history and development of process focused businesses and the impacts on processes caused by just-in-time and total quality management philosophies, organizational learning, strategy mapping, et.al. We will also discuss the exploitation of core competencies and changing business scenarios such as globalization and electronic-commerce. We will draw from the literature to explore the notion of moving from business strategies to business processes. We will review current writings relative to the subject, and then will apply our knowledge to actual process design, documentation, analysis and simulation. We will introduce computer-based modeling tools for process design and simulation, and use those tools in both in-class and individual work.

**LOG OM 6345 Business Analytics and Data Mining: 3 semester hours**

Prerequisites: LOG OM 5300 and INFSYS 5800. This course concentrates on methods for converting data into business intelligence. It provides knowledge of the principles and techniques for business analytics and data mining. Topics include clustering, pattern recognition, visualization of relationships, predictive modeling, optimization techniques and simulation.

**LOG OM 6347 LOM Project Management: 3 semester hours**

Prerequisites: LOG OM 5320. This course addresses the concepts and processes of project management as applicable to Logistics and Operations Management. Students study organizational design, project specification, integrated project planning, risk management and project control; students will come to understand how globalization, environmental and sustainability issues, quality control (including industry standard initiatives such as the Continuing Integration Improvement Model and the International Standards Organization model), and cultural factors drive project management. NOTE: Credit may not be earned for both LOG OM 6347 and INFSYS 6847.

**LOG OM 6350 Management Science Methods: 3 semester hours**

Prerequisites: LOG OM 5320. This course provides a working knowledge of management science techniques. It emphasizes analytical approaches to solving business problems, construction of mathematical models, and manipulation of model variables for managerial decision-making. Topics include mathematical programming, including integer and network models, heuristics, and simulation models.

**LOG OM 6395 Seminar In Logistics And Operations Management: 3 semester hours**

Prerequisite: LOG OM 5320. Topics of current interest in logistics and operations management. Topics may include just-in-time and lean production, quality management, manufacturing and service systems, transportation and logistics, quantitative management tools, etc.

**LOG OM 7381 International Supply Chain Management: 3 semester hours**

Prerequisites: LOG OM 5320; Admittance into the Ph.D. Program. A comprehensive examination of international logistics and supply chain management strategies, planning and operations from the firm's perspective. Topics may include multinational logistics and supply chain issues and management strategies, multinational sourcing and network design, transportation issues in international supply chains, multinational distribution and operations, legal and financial issues in import and export, risk identification and management in international supply chains, and the relationship of supply chain management to other activities of international firms.

**LOG OM 7390 Research Seminar In LSCM: 3 semester hours**

Prerequisites: LOG OM 6330; Admittance into the Ph.D. Program. Analysis of research approaches, and findings in Logistics and Supply Chain Management. May be repeated for credit when the subject matter is different.

**LOG OM 7393 Special Topics In LSCM: 3 semester hours**

Prerequisites: Consent of Instructor; Admittance into the Ph.D. Program. In-depth analysis of special topics in Logistics and Supply Chain Management research. May be repeated for credit when the subject matter is different.

## Courses

**LOG OM 3300 Business Statistics: 3 semester hours**

Prerequisites: MATH 1100, MATH 1105, INFSYS 1800 and a 2.0 campus GPA. Construction and use of statistical models for business management. Students will learn techniques used for relational analysis and business forecasting and how to apply them in a business context. Tools include CHI-Square tests of statistical independence; analysis of variance; simple linear regression and correlation; multiple linear regression; and extrapolative techniques such as moving averages and exponential smoothing. Emphasis is placed on problem definition, construction of statistical models, analysis of data, and interpretation of results. Computers are used for extensive analyses of case data.

**LOG OM 3320 Introduction To Operations Management: 3 semester hours**

Prerequisites: A 2.0 campus GPA and either (ECON 1001, ACCTNG 2410 and LOG OM 3300) or (MATH 2000 and MATH 1320). An examination of the concepts, processes, and institutions which are fundamental to an understanding of manufacturing and service operations within organizations. Emphasis is on the management and organization of operations and upon the application of quantitative methods to the solution of strategic, tactical and operational problems.

**LOG OM 3349 Project Consulting and Execution: 3 semester hours**

Prerequisites: LOG OM 3300 or equivalent and LOG OM 3320 or equivalent (may be taken concurrently). Provides real world experience in planning and executing projects. The class will have teams of students work on projects sponsored by companies and not for profit organizations for 2 to 6 weeks at a time. It will provide students practice in critical thinking, analysis, communication, and other critical skills identified as necessary for employees to function at a high level in their jobs.

**LOG OM 3390 Internship In Logistics And Operations Management: 1-3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of LOM electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of at least 2.5 is also required. Students are employed in the field of Logistics and Operations Management (LOM) where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. An LOM faculty member will monitor the student's program with the student providing a formal written report at the end of the project. LOG OM 3390 may not be counted toward the minimum credit hours for the LOM emphasis.

**LOG OM 3395 Special Administrative Problems - Management Science: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**LOG OM 3398 Seminar in Logistics and Operations Management: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of logistics and operations management. May be repeated for credit with different topics.

**LOG OM 3399 Independent Study In Logistics And Operations Management: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in logistics and operations management under the supervision of a full-time logistics and operations management faculty member.

**LOG OM 4312 Business Forecasting: 3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 or graduate standing; also either LOG OM 3320 or (MATH 3000 and MATH 1320) Further study of statistical tools for forecasting in a decision-making context. Topics include explanatory models (multiple regression), classical time series decomposition, and extrapolative techniques (exponential smoothing and Box-Jenkins procedures). In addition, methods for considering problems of intervention effects, seasonality, and collinearity will be discussed. Students will perform extensive analyses of time series data using computer packages.

**LOG OM 4321 Production and Operations Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Application of the tools and techniques of statistical decision theory and operations research to production and operating problems. Emphasis is on the use of mathematical modeling and simulation techniques to analyze complex and ill-structured problems in large-scale systems.

**LOG OM 4322 Lean Production In Manufacturing And Service Operations: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement techniques, quick set-ups, total productive maintenance, kanban scheduling, cellular production, team organization of workers, supplier relations, quality management, and the environmental aspects of production.

**LOG OM 4324 Service Operations Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. An examination of methods for designing and operating service delivery systems, such as in the health care, financial, transportation, hospitality, and governmental services industries. Topics include process and facility design, facility layout and location, queuing, demand forecasting and management service quality, staffing, and personnel scheduling.

**LOG OM 4325 Environmental Sustainability in Business Operations: 3 semester hours**

Prerequisites: LOG OM 3320 or permission of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of "lean and green" operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

**LOG OM 4326 Quality Assurance In Business: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of statistical quality control concepts and procedures applicable to management systems, administrative activities, service industries, and nonprofit organizations. Some successful quality assurance programs will be examined.

**LOG OM 4330 Business Logistics Systems: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. Analysis of business logistics systems, their design, and operation. Topics include: network design, facility location, transportation, vehicle routing, storage and handling capacity planning, inventory management, and customer service.

**LOG OM 4347 Introduction to Project Management: 3 semester hours**

Prerequisites: LOG OM 3320. This course introduces the concepts and practices of Project Management with a focus on Logistics and Operations Management related projects. It will cover conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class will introduce agile project management as applicable to projects where there is not the specificity of goals or solutions to be applicable to traditional project management.

**LOG OM 4350 Management Science Methods: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320 or MATH 3000 and MATH 1320. Applications of the theories and techniques of operations research to problems of business, government, and industry with emphasis on the construction and utilization of quantitative decision models.

**LOG OM 4354 Management Science Methods II: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 4350. Topics of special interest including mathematical programming, stochastic decision-making, digital simulation, game theory, and other selected techniques. (Formerly Mathematical programming).

**LOG OM 4381 International Logistics And Operations Management: 3 semester hours**

Same as INTL BUS 4381. Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also LOG OM 3320. A study of business logistics and supply chain strategies involving shipments across national boundaries. Topics include the effects of international agreements and regional trading blocks on supply chain strategies; the design of global logistics networks; managerial processes and systems for international production and distribution, and risk management for international logistics.

**LOG OM 4398 Seminar in Logistics and Operations Management: 1-3 semester hours**

Prerequisites: LOG OM 3320 or permission of the instructor and a minimum 2.0 campus GPA. For some topics additional prerequisites may be required. An intensive study of a specific aspect, problem or technique in the areas of logistics, operations management, or supply chain management. Different topics may be offered under this course number, so the course (with different topics) can be repeated for credit.

**LOG OM 5300 Statistical Analysis For Management Decisions: 3 semester hours**

Prerequisites: INFSYS 5800 (may be taken concurrently) and ECON 4105 with a minimum grade of "C." The role of statistical evidence in the formation of inference and in the selection of strategies in solving business problems is developed. Probability and probability distributions are studied as a basis of statistical inference. An introduction to multivariate analysis is provided, which includes analysis of variance and regression methods.

**LOG OM 5312 Advanced Statistical Methods For Management Decisions: 3 semester hours**

Prerequisites: LOG OM 5300. The application of statistical methods to managerial problems, forecasting and business research. Topics include the blending of multiple regression and analysis of variance into a general linear model, logistic models, techniques for projecting seasonal time series, and forecasting techniques (ARIMA models) which deal with serially correlated data. Through class presentations, assigned exercises and a major project, students gain experience in constructing explanatory and predictive models for problems in marketing, finance, etc. Students use commercial software (e.g. the Statistical Analysis System) for analyzing data, constructing models and producing reports.

**LOG OM 5320 Production And Operations Management: 3 semester hours**

Prerequisites: LOG OM 5300. This course discusses issues related to the creation and delivery of goods and services. Topics include the design of production processes, the layout and location of facilities, forecasting, scheduling, inventory control, queuing, materials planning, and quality control. Analytical techniques such as linear programming are used in studying these problems.

**LOG OM 5322 Lean Production: 3 semester hours**

Prerequisites: LOG OM 5320. Study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement, set-up reduction, total productive maintenance, kanban scheduling, cellular production, work teams, supplier relations, quality management, and the environmental aspects of production. Cases and a course project will be used to integrate and apply the course material.

**LOG OM 5324 Service Operations Management: 3 semester hours**

Prerequisite: LOG OM 5320. An examination of methods for designing and operating service delivery systems, such as in the health care, financial, transportation, hospitality, and governmental services industries. Topics include process and facility design, facility layout and location, queuing, demand forecasting and management, service quality, staffing, and personnel scheduling.

**LOG OM 5325 Environmental Analysis and Sustainability in Business Operations: 3 semester hours**

Prerequisites: LOG OM 5320 or permission of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of "lean and green" operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

**LOG OM 5326 Quality Management: 3 semester hours**

Prerequisites: LOG OM 5300 or MATH 4200 or permission of instructor. An applied course on total quality management. Quality improvement approaches are presented and the managerial implications and responsibilities in implementing these approaches are discussed. Topical coverage includes the construction and interpretation of control charts, graphical methods, quality function deployment, robust experiments for product design and improvement, mistake-proofing (poke yoke), the Deming approach, Baldrige award criteria, quality cost audits, worker empowerment and reward systems. Cases involving both business processes and physical processes are used to illustrate successful quality improvement efforts.

**LOG OM 5334 Internship In Logistics And Supply Chain Management: 1 semester hour**

Prerequisite: Consent of Instructor. Students receive practical experience in the area of logistics or supply chain management. The internship is supervised by a professional in the host organization in consultation with a faculty member.

**LOG OM 5340 Transportation Economics for Business Managers: 3 semester hours**

Prerequisites: ECON 3001 or BUS AD 5000 or permission of the instructor. This course makes use of a range of economic concepts to examine the nature of markets in which transport services are provided. This course is designed for future transportation professionals who wish to explore the fundamentals of economics in their field. Basic concepts covered include the theory of transportation demand, transportation costs and investment planning, and current topics in transportation economics such as regulation-deregulation and social cost pricing.

**LOG OM 5349 Project Consulting and Execution: 3 semester hours**

Prerequisites: LOG OM 5300 or equivalent; LOG OM 5320 or equivalent (may be taken concurrently). Provides real world experience in planning and executing projects. The class will have teams of students work on projects sponsored by companies and not for profit organizations for 2 to 6 weeks at a time. It will provide students practice in critical thinking, analysis, communication, and other critical skills identified as necessary for employees to function at a high level in their jobs. A student may NOT count LOG OM 5349 and an internship toward the LOG OM emphasis. Only one of the two would count.

**LOG OM 5354 Simulation For Managerial Decision Making: 3 semester hours**

Prerequisites: LOG OM 5320. Introduction to simulation as a managerial decision-making aid. Application of simulation to a number of management science-oriented problems. This course introduces and requires use of a simulation language.

**LOG OM 5381 International Logistics And Operations Management: 3 semester hours**

Same as INTL BUS 5381. Prerequisites: LOG OM 5320. A study of international logistics and operations management strategy, planning and operations. Topics may include multinational logistics and supply chain strategies, global network design and sourcing, international transportation, distribution and operations, import-export, risk management, etc.

**LOG OM 5399 Individual Research in Logistics and Operations Management: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Logistics and Operations Management under the guidance of a specific professor.

**LOG OM 6330 Business Logistics Systems: 3 semester hours**

Prerequisites: LOG OM 5320 (may be taken concurrently). Analysis of business logistics systems and their role in supply chain management. covers both design and operation of logistics systems and their components. Topics may include network design, facility location, transportation, vehicle routing, inventory management, customer service, reverse logistics and logistics information systems.

**LOG OM 6331 Logistics And Supply Chain Operational Modeling: 3 semester hours**

Prerequisites: LOG OM 5320 and LOG OM 6330. A study of the application of leading software packages to modeling problems and issues arising in the operational management of logistics and supply chains. This course covers the economic tradeoffs involved in such decisions, data requirements, operating parameters, and application of software packages to problems such as vehicle routing and scheduling, freight shipments consolidation, cross-docking, and other operational and tactical strategies. This "hands on" course is designed to prepare students for higher-level supply chain analyses and consulting work.

**LOG OM 6332 Logistics And Supply Chain Strategic Modeling: 3 semester hours**

Prerequisites: LOG OM 5320 and LOG OM 6330. A study of the application of leading software packages to modeling problems and issues arising in the planning and strategic management of logistics networks and supply chains. The course identifies and explores the economic and customer service tradeoffs involved in such networks. Issues such as location of facilities assignment of production and distribution missions to facilities, identification of sourcing relationships amongst facilities, and identification of cost and customer service consequences of alternative supply chain designs are addressed by the application of commercial software packages to support decision making. This "hands on" course is designed to prepare students for high-level supply chain analyses and consulting work.

**LOG OM 6338 Business Processes: Design, Management & Integration: 3 semester hours**

Prerequisites: LOG OM 5320. This course presents the concepts and state of the art / state of the practice of business process design and business process management for improving business performance, effectiveness, quality, customer service and satisfaction. Issues related to characteristics, goals, benefits and costs of enterprise-wide design, and the role of information technology during the design process will be discussed. Specific topics will include: the history and development of process focused businesses and the impacts on processes caused by just-in-time and total quality management philosophies, organizational learning, strategy mapping, et.al. We will also discuss the exploitation of core competencies and changing business scenarios such as globalization and electronic-commerce. We will draw from the literature to explore the notion of moving from business strategies to business processes. We will review current writings relative to the subject, and then will apply our knowledge to actual process design, documentation, analysis and simulation. We will introduce computer-based modeling tools for process design and simulation, and use those tools in both in-class and individual work.

**LOG OM 6345 Business Analytics and Data Mining: 3 semester hours**

Prerequisites: LOG OM 5300 and INFSYS 5800. This course concentrates on methods for converting data into business intelligence. It provides knowledge of the principles and techniques for business analytics and data mining. Topics include clustering, pattern recognition, visualization of relationships, predictive modeling, optimization techniques and simulation.

**LOG OM 6347 LOM Project Management: 3 semester hours**

Prerequisites: LOG OM 5320. This course addresses the concepts and processes of project management as applicable to Logistics and Operations Management. Students study organizational design, project specification, integrated project planning, risk management and project control; students will come to understand how globalization, environmental and sustainability issues, quality control (including industry standard initiatives such as the Continuing Integration Improvement Model and the International Standards Organization model), and cultural factors drive project management. NOTE: Credit may not be earned for both LOG OM 6347 and INFSYS 6847.

**LOG OM 6350 Management Science Methods: 3 semester hours**

Prerequisites: LOG OM 5320. This course provides a working knowledge of management science techniques. It emphasizes analytical approaches to solving business problems, construction of mathematical models, and manipulation of model variables for managerial decision-making. Topics include mathematical programming, including integer and network models, heuristics, and simulation models.

**LOG OM 6395 Seminar In Logistics And Operations Management: 3 semester hours**

Prerequisite: LOG OM 5320. Topics of current interest in logistics and operations management. Topics may include just-in-time and lean production, quality management, manufacturing and service systems, transportation and logistics, quantitative management tools, etc.

**LOG OM 7381 International Supply Chain Management: 3 semester hours**

Prerequisites: LOG OM 5320; Admittance into the Ph.D. Program. A comprehensive examination of international logistics and supply chain management strategies, planning and operations from the firm's perspective. Topics may include multinational logistics and supply chain issues and management strategies, multinational sourcing and network design, transportation issues in international supply chains, multinational distribution and operations, legal and financial issues in import and export, risk identification and management in international supply chains, and the relationship of supply chain management to other activities of international firms.

**LOG OM 7390 Research Seminar In LSCM: 3 semester hours**

Prerequisites: LOG OM 6330; Admittance into the Ph.D. Program. Analysis of research approaches, and findings in Logistics and Supply Chain Management. May be repeated for credit when the subject matter is different.

**LOG OM 7393 Special Topics In LSCM: 3 semester hours**

Prerequisites: Consent of Instructor; Admittance into the Ph.D. Program. In-depth analysis of special topics in Logistics and Supply Chain Management research. May be repeated for credit when the subject matter is different.

## Management

### Courses

**MGMT 3600 Management And Organizational Behavior: 3 semester hours**

Same as SOC 3600. Prerequisites: Junior standing and a 2.0 overall GPA. This course involves the study of the behavior of individuals and groups in an organizational setting. Specific topics examined include: motivation, leadership, organizational design, and conflict resolution, as well as basic coverage of management principles. In covering these topics, both "classic" and current perspectives are provided.

**MGMT 3611 Advanced Management And Organizational Behavior: 3 semester hours**

Prerequisites: MGMT 3600 and a 2.0 overall GPA. Building upon MGMT 3600, course provides a more detailed examination of motivation, leadership, group process, decision making, job design, and organizational development. In addition to providing more detail in terms of content, this course provides the student with considerable practical experience through the use of class exercises, case studies, and small group discussions.

**MGMT 3612 Professional Skills Development: 3 semester hours**

Prerequisite: A minimum 2.0 campus GPA and Junior standing. This course focuses on career management. Topics include job search, interviews, resumes and cover letters, presentation skills, business etiquette, entry strategies, and career alternatives.

**MGMT 3621 Human Resource Management: 3 semester hours**

Prerequisites: MGMT 3600 and a 2.0 overall GPA. In-depth examination of selected human resource management issues from a contemporary manager's viewpoint. Topics examined include: employee selection, performance appraisal, training and development, compensation, legal issues, and labor relations.

**MGMT 3622 Industrial And Labor Relations: 3 semester hours**

Prerequisite: MGMT 3600 and a 2.0 overall GPA. Emphasis is on the dynamic relationship between management, employees, unions, and government as determinants in the efficient and effective use of human resources. Current issues and case material are used to supplement text and lecture.

**MGMT 3623 Industrial And Organizational Psychology: 3 semester hours**

Same as PSYCH 3318. Prerequisite: PSYCH 2201 or MATH 1105, MGMT 3600. This course introduces the student to psychological research and theories pertaining to human behavior in the work setting. Topics covered include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

**MGMT 3624 Employee Training And Development: 3 semester hours**

Prerequisites: A minimum overall GPA of 2.0. In addition, MGMT 3600 or permission of instructor. An intensive study of training in organizations, including needs analysis, learning theory, management development, and development of training objectives and programs. Projects and exercises are used to supplement the readings.

**MGMT 3625 Leadership In Organization: 3 semester hours**

Prerequisites: MGMT 3600 and a minimum 2.0 campus GPA. This course introduces classic and contemporary theories of leadership. The emphasis is on building a sound grasp of good practice and on developing the student's ability to apply such knowledge as he/she enters today's global workforce. The course covers key theories and models of effective leadership in organizations.

**MGMT 3680 International Management: 3 semester hours**

Same as INTL BUS 3680. Prerequisites: A minimum 2.0 campus GPA. In addition, ECON 1002 and MGMT 3600; or consent of the instructor. A study of international business and management practices. Topics covered include an introduction to international management and the multinational enterprise, the cultural environment of international management, planning in an international setting, organizing for international operations, directing international operations, international staffing, preparing employees for international assignments, and the control process in an international context.

**MGMT 3690 Internship In Management: 1-3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of Management electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of 2.5 is also required. Students are employed in the field of Management where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. A Management faculty member will monitor the student's program with the student providing a formal written report at the end of the project. MGMT 3690 may not be counted toward the minimum 12 credit hours of management electives required for a MOB emphasis.

**MGMT 3695 Special Admin Problems - Management & Organization Behavior: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**MGMT 3698 Seminar in Management: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of management. May be repeated for credit with different topics.

**MGMT 3699 Independent Study In Management: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in management under the supervision of a full-time management faculty member.

**MGMT 4219 Strategic Management: 3 semester hours**

Prerequisites: Senior standing and FINANCE 3500, MKTG 3700, MGMT 3600; a minimum overall GPA of 2.0.; and concurrent enrollment MGMT 4220. This is a capstone course drawing on the subject matter covered in prerequisite courses. Emphasis is on the formulation and implementation of corporate, business and functional strategies designed to achieve organizational objectives. Topics include the role of top management, globalization of business and ethical perspectives. Case studies and research reports may be used extensively. (It is preferred that this course be taken during the student's final semester.

**MGMT 4220 Business Assessment Testing: 0 semester hours**

Prerequisite: Concurrent enrollment in MGMT 4219, Strategic Management. A one-time lab during which a major field exam in business is administered. Course graded on a satisfactory/ unsatisfactory basis. Satisfactory grade required for graduation.

**MGMT 4614 Entrepreneurship/Small Business Management: 3 semester hours**

Prerequisite: BUS AD 2900, FINANCE 3500, MKTG 3700, MGMT 3600, and a 2.0 overall GPA. This integrative general management course is designed to communicate the academic principles of business management applicable to solving of problems of small and medium-size businesses and assist in their development. This course will provide a background in the forms of business, the development of business plans and systems integration, venture capital, accounting, procurement, promotion, financing, distribution and negotiations for initial organization, and operation and expansion of the firm.

**MGMT 5600 Managing People in Organizations: 3 semester hours**

Same as P P ADM 6600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**MGMT 5611 Advanced Organizational Behavior And Administrative Processes: 3 semester hours**

Prerequisite: MGMT 5600. An indepth examination of selected organizational and individual theories affecting behavior and operating performance. Organizational structure and design, formal and informal organization, decision making, communications and motivation are analyzed for their organizational impact. The course seeks to develop further the ability to analyze and evaluate organizational processes and individual behavior.

**MGMT 5612 Negotiating Workplace Conflict: 3 semester hours**

Same as P P ADM 6680. Prerequisites: P P ADM 6600 / MGMT 5600, and Graduate Standing. Examines conflict and cooperation between individuals, groups, and organizations over the control of work. A central theme is how this conflict is expressed, controlled and resolved. Students will participate in exercises to learn the basics of two-party negotiations.

**MGMT 5614 Managing Organizational Change And Design: 3 semester hours**

Prerequisites: MGMT 5600 (may be taken concurrently). This course examines the ways to manage orgainzational change to meet the rapid pace of change in the business environment. Cases and current research inform class discussions of different types of restructuring. Topics may include creating learning organizations, designing for innovation, managing growth and downsizing, and building sustainable organizations.

**MGMT 5621 Managing Human Resources: 3 semester hours**

Prerequisite: MGMT 5600. In-depth examination of selected of human resource management issues from a contemporary manager's viewpoint. Topics examined include: personnel planning; employee selection; performance appraisal, training, and development; compensation; legal issues; discipline; and labor relations. The course examines these topics as they relate primarily to operational activities in organizations.

**MGMT 5622 Union-Management Relations And Collective Bargaining: 3 semester hours**

Prerequisite: MGMT 5600 and BUS AD 5900. Primary concern is with the setting and the dynamics of contract negotiation and administration. Emphasis is on the development of insight and understanding of the forces affecting the decisions of the parties to a labor contract within the context of the social, political and economic environment of the organization. A dynamic approach is taken to examine difficulties that arise in attempting to administer a collectively established relationship between employer and employee.

**MGMT 5625 Selected Topics In Human Resource Management: 3 semester hours**

Prerequisites: MGMT 5621 and LOG OM 5300. This course provides an advanced treatment of selected human resource management topics. Primary focus is on topics such as job analysis, pre-employment screening devices, test validation, and civil rights laws. Other topics, such as performance appraisal, recruitment, promotions, and terminations may be covered. Various class projects may be assigned to supplement readings, lectures, and discussion.

**MGMT 5690 Management Internship: 1-3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of management electives and have consent of a supervising faculty member and the Department Chair. The student works in the field of management where he/she applies the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. The student's program will be monitored by the management faculty member supervising the internship with the student providing a formal written report at the end of the project.

**MGMT 5695 Seminar In Management: 3 semester hours**

Prerequisites: MGMT 5600. Topics of current interest in management. Possible topics include: human resource management, international management, and entrepreneurship.

**MGMT 5699 Individual Research in Management: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Management under the guidance of a specific professor.

## Courses

**MGMT 3600 Management And Organizational Behavior: 3 semester hours**

Same as SOC 3600. Prerequisites: Junior standing and a 2.0 overall GPA. This course involves the study of the behavior of individuals and groups in an organizational setting. Specific topics examined include: motivation, leadership, organizational design, and conflict resolution, as well as basic coverage of management principles. In covering these topics, both "classic" and current perspectives are provided.

**MGMT 3611 Advanced Management And Organizational Behavior: 3 semester hours**

Prerequisites: MGMT 3600 and a 2.0 overall GPA. Building upon MGMT 3600, course provides a more detailed examination of motivation, leadership, group process, decision making, job design, and organizational development. In addition to providing more detail in terms of content, this course provides the student with considerable practical experience through the use of class exercises, case studies, and small group discussions.

**MGMT 3612 Professional Skills Development: 3 semester hours**

Prerequisite: A minimum 2.0 campus GPA and Junior standing. This course focuses on career management. Topics include job search, interviews, resumes and cover letters, presentation skills, business etiquette, entry strategies, and career alternatives.

**MGMT 3621 Human Resource Management: 3 semester hours**

Prerequisites: MGMT 3600 and a 2.0 overall GPA. In-depth examination of selected human resource management issues from a contemporary manager's viewpoint. Topics examined include: employee selection, performance appraisal, training and development, compensation, legal issues, and labor relations.

**MGMT 3622 Industrial And Labor Relations: 3 semester hours**

Prerequisite: MGMT 3600 and a 2.0 overall GPA. Emphasis is on the dynamic relationship between management, employees, unions, and government as determinants in the efficient and effective use of human resources. Current issues and case material are used to supplement text and lecture.

**MGMT 3623 Industrial And Organizational Psychology: 3 semester hours**

Same as PSYCH 3318. Prerequisite: PSYCH 2201 or MATH 1105, MGMT 3600. This course introduces the student to psychological research and theories pertaining to human behavior in the work setting. Topics covered include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

**MGMT 3624 Employee Training And Development: 3 semester hours**

Prerequisites: A minimum overall GPA of 2.0. In addition, MGMT 3600 or permission of instructor. An intensive study of training in organizations, including needs analysis, learning theory, management development, and development of training objectives and programs. Projects and exercises are used to supplement the readings.

**MGMT 3625 Leadership in Organization: 3 semester hours**

Prerequisites: MGMT 3600 and a minimum 2.0 campus GPA. This course introduces classic and contemporary theories of leadership. The emphasis is on building a sound grasp of good practice and on developing the student's ability to apply such knowledge as he/she enters today's global workforce. The course covers key theories and models of effective leadership in organizations.

**MGMT 3680 International Management: 3 semester hours**

Same as INTL BUS 3680. Prerequisites: A minimum 2.0 campus GPA. In addition, ECON 1002 and MGMT 3600; or consent of the instructor. A study of international business and management practices. Topics covered include an introduction to international management and the multinational enterprise, the cultural environment of international management, planning in an international setting, organizing for international operations, directing international operations, international staffing, preparing employees for international assignments, and the control process in an international context.

**MGMT 3690 Internship In Management: 1-3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of Management electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of 2.5 is also required. Students are employed in the field of Management where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. A Management faculty member will monitor the student's program with the student providing a formal written report at the end of the project. MGMT 3690 may not be counted toward the minimum 12 credit hours of management electives required for a MOB emphasis.

**MGMT 3695 Special Admin Problems - Management & Organization Behavior: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**MGMT 3698 Seminar in Management: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of management. May be repeated for credit with different topics.

**MGMT 3699 Independent Study In Management: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in management under the supervision of a full-time management faculty member.

**MGMT 4219 Strategic Management: 3 semester hours**

Prerequisites: Senior standing and FINANCE 3500, MKTG 3700, MGMT 3600; a minimum overall GPA of 2.0.; and concurrent enrollment MGMT 4220. This is a capstone course drawing on the subject matter covered in prerequisite courses. Emphasis is on the formulation and implementation of corporate, business and functional strategies designed to achieve organizational objectives. Topics include the role of top management, globalization of business and ethical perspectives. Case studies and research reports may be used extensively. (It is preferred that this course be taken during the student's final semester.)

**MGMT 4220 Business Assessment Testing: 0 semester hours**

Prerequisite: Concurrent enrollment in MGMT 4219, Strategic Management. A one-time lab during which a major field exam in business is administered. Course graded on a satisfactory/ unsatisfactory basis. Satisfactory grade required for graduation.

**MGMT 4614 Entrepreneurship/Small Business Management: 3 semester hours**

Prerequisite: BUS AD 2900, FINANCE 3500, MKTG 3700, MGMT 3600, and a 2.0 overall GPA. This integrative general management course is designed to communicate the academic principles of business management applicable to solving of problems of small and medium-size businesses and assist in their development. This course will provide a background in the forms of business, the development of business plans and systems integration, venture capital, accounting, procurement, promotion, financing, distribution and negotiations for initial organization, and operation and expansion of the firm.

**MGMT 5600 Managing People in Organizations: 3 semester hours**

Same as P P ADM 6600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**MGMT 5611 Advanced Organizational Behavior And Administrative Processes: 3 semester hours**

Prerequisite: MGMT 5600. An indepth examination of selected organizational and individual theories affecting behavior and operating performance. Organizational structure and design, formal and informal organization, decision making, communications and motivation are analyzed for their organizational impact. The course seeks to develop further the ability to analyze and evaluate organizational processes and individual behavior.

**MGMT 5612 Negotiating Workplace Conflict: 3 semester hours**

Same as P P ADM 6680. Prerequisites: P P ADM 6600 / MGMT 5600, and Graduate Standing. Examines conflict and cooperation between individuals, groups, and organizations over the control of work. A central theme is how this conflict is expressed, controlled and resolved. Students will participate in exercises to learn the basics of two-party negotiations.

**MGMT 5614 Managing Organizational Change And Design: 3 semester hours**

Prerequisites: MGMT 5600 (may be taken concurrently). This course examines the ways to manage organizational change to meet the rapid pace of change in the business environment. Cases and current research inform class discussions of different types of restructuring. Topics may include creating learning organizations, designing for innovation, managing growth and downsizing, and building sustainable organizations.

**MGMT 5621 Managing Human Resources: 3 semester hours**

Prerequisite: MGMT 5600. In-depth examination of selected of human resource management issues from a contemporary manager's viewpoint. Topics examined include: personnel planning; employee selection; performance appraisal, training, and development; compensation; legal issues; discipline; and labor relations. The course examines these topics as they relate primarily to operational activities in organizations.

**MGMT 5622 Union-Management Relations And Collective Bargaining: 3 semester hours**

Prerequisite: MGMT 5600 and BUS AD 5900. Primary concern is with the setting and the dynamics of contract negotiation and administration. Emphasis is on the development of insight and understanding of the forces affecting the decisions of the parties to a labor contract within the context of the social, political and economic environment of the organization. A dynamic approach is taken to examine difficulties that arise in attempting to administer a collectively established relationship between employer and employee.

**MGMT 5625 Selected Topics In Human Resource Management: 3 semester hours**

Prerequisites: MGMT 5621 and LOG OM 5300. This course provides an advanced treatment of selected human resource management topics. Primary focus is on topics such as job analysis, pre-employment screening devices, test validation, and civil rights laws. Other topics, such as performance appraisal, recruitment, promotions, and terminations may be covered. Various class projects may be assigned to supplement readings, lectures, and discussion.

**MGMT 5690 Management Internship: 1-3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of management electives and have consent of a supervising faculty member and the Department Chair. The student works in the field of management where he/she applies the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. The student's program will be monitored by the management faculty member supervising the internship with the student providing a formal written report at the end of the project.

**MGMT 5695 Seminar In Management: 3 semester hours**

Prerequisites: MGMT 5600. Topics of current interest in management. Possible topics include: human resource management, international management, and entrepreneurship.

**MGMT 5699 Individual Research in Management: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in Management under the guidance of a specific professor.

## Marketing

### Courses

**MKTG 3700 Basic Marketing: 3 semester hours**

Prerequisites: ECON 1001, Junior standing and a 2.0 overall GPA. An examination of the character and importance of the marketing process, its essential functions and the institutions performing them. Attention is focused on the major policies (such as distribution, product, price, and promotion) which underlie the multifarious activities of marketing institutions and the managerial, economic, societal implications of such policies.

**MKTG 3710 Consumer Behavior: 3 semester hours**

Prerequisites: MKTG 3700, and a minimum overall GPA of 2.0. A study of such consumer functions as decision-making, attitude formation and change, cognition, perception, and learning. The marketing concepts of product positioning, segmentation, brand loyalty, shopping preference and diffusion of innovations are considered in context with the environmental, ethical, multicultural and social influences on an increasingly diverse American consumer.

**MKTG 3720 Management Of Promotion: 3 semester hours**

Prerequisite: MKTG 3700 and a 2.0 overall GPA. A study of the design, organization and implementation of the marketing "communications mix". Various methods such as advertising, personal selling, and publicity are analyzed as alternatives for use alone, or in combination to stimulate demand, reseller support, and buyer preference. Particular topics considered include: media selection, sales promotionals, packaging, selling strategy and their relationships in the promotion process.

**MKTG 3721 Introduction to Digital Marketing Strategies: 3 semester hours**

Prerequisites: MKTG 3700 and a minimum campus GPA of 2.0. This course explores the world of digital media marketing and how it impacts and is integrated along with our traditional marketing channels. We will explore how the balance of power has shifted between brands and consumers. Consumers are more active in the marketing process and in influencing how brands communicate with them than ever before. In particular we will explore: The latest digital marketing trends, how to build a strong website from an organic perspective, search strategies for success, website intelligence and tracking using Google Analytics, retaining customers via Email marketing, online Display advertising, social media strategy, affiliate marketing, mobile marketing trends and developing an integrated marketing plan.

**MKTG 3722 Introduction to Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 3721. Social networks are becoming an integral part of the marketing mix. In these platforms, brands can engage with prospects and consumers on many levels. In this course you will learn how to create a brand presence on these social networks, understand the differences between earned and paid media, be introduced to the various tools (free and paid) used to listen and engage with consumers, discuss how brands manage healthy communities, learn techniques used by social media managers to identify influencers, and study the various ways engagement is measured including calculating social media return on investment. Social networks to be discussed throughout the semester will include Facebook, Twitter, Tumblr, Instagram, LinkedIn, etc. Students will also be introduced to the various social measurement tools including Netbase (our partner), HootSuite, TweetDeck, Sprinklr, Technorati, etc. Real life case examples will be used throughout the semester.

**MKTG 3731 Digital and Social Media Marketing Lab (Internship): 3 semester hours**

Prerequisites: MKTG 3700, MKTG 3720, MKTG 3721 and MKTG 3722. In this capstone practicum course, students will be teamed up with various St. Louis based organizations. Students will assist these companies with their digital and social media strategies and plans. Students will conduct specific digital and social media project tasks including, among others, managing social media content and pushes, creating a social media presence, creation of a social media playbook, search engine marketing, paid search, web analytics and dashboard creation, landing page design, assisting in the build of a WordPress blog.

**MKTG 3738 Advertising Technique: 3 semester hours**

Same as MEDIA ST 3338. Prerequisites: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

**MKTG 3740 Marketing Analysis: 3 semester hours**

Prerequisites: INFSYS 1800, MKTG 3700, LOG OM 3300, and a 2.0 Overall GPA. An investigation of the acquisition, presentation, and application of marketing information for management. Particular problems considered are defining information requirements, evaluating research findings, and utilizing information. Statistical methods, models, and/or cases are employed to illustrate approaches to marketing intelligence problems, such as sales forecasts, market delineation, buyer motives, store location, and performance of marketing functions.

**MKTG 3750 Sales Management: 3 semester hours**

Prerequisites: MKTG 3700 and MGMT 3600. (MGMT 3600 may be taken concurrently). Also a minimum campus GPA of 2.0. The aim of this course is to provide an understanding of how selling is critical to the success of marketing. The course will promote critical thinking skills as well as practical selling skills needed in a competitive marketplace. Course topics include, among others, selling principles & techniques, understanding of the tasks and roles of the sales manager, the management of sales professionals within an organization, developing and applying effective persuasive communications, creating a vision, developing and implementing a sales-team strategy, structuring sales-force, designing and assigning territories, recruiting, training, motivation and evaluating salespeople, methods of compensation, and forecasting sales. The emphasis will be on ways the sales-force can be molded to build long-lasting relationships with customers through the systematic analysis and solution of customer's problems.

**MKTG 3760 Business To Business Marketing: 3 semester hours**

Prerequisites: Senior standing, MATH 1105, MKTG 3700 and a 2.0 overall GPA. A study of the nature of the business-to-business (organizational) marketplace, concentrating on those aspects that differentiate it from consumer markets. The major focus of the course is marketing strategy, starting with analysis of the market wants and segments, concepts of pricing, the distribution arrangements, and buyer/seller relations. In this last area, consideration will be given to service, personal selling, sales promotion, and advertising, as found in the organizational marketplace. At all times emphasis is given to relating business-to-business marketing strategy to basic concepts in underlying business disciplines. Lectures and case discussions are used heavily in the course.

**MKTG 3770 Introduction To Transportation: 3 semester hours**

Prerequisite: A minimum campus GPA of 2.0; also Junior standing or instructor consent. This course provides an overview of the transportation sector, including history, providers, users, and government regulation. The importance and significance of transportation, the operational aspects of transportation modes of rail, water, motor, air and pipeline; the demand and supply of transportation, and the managerial aspects of these modes of transport will be covered in the course.

**MKTG 3771 Traffic And Transportation Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and Junior standing or instructor's consent. This course focuses on the purchase of transportation and warehouse services and/or the operation of transportation services as a firm activity. This course is also designed to provide the student with an exposure to the managerial aspects of transportation management as a function of the firm's logistical strategy. In addition, it includes an introduction to the management of firms with the various transportation modes of rail, motor, air, water, and pipelines. This course is designed to provide the student with a basic understanding of the issues and work performed by traffic managers and the management of modern transportation firms.

**MKTG 3776 Transportation Security, Safety and Disaster Preparedness: 3 semester hours**

Prerequisites: Junior standing or instructor's consent. This course emphasizes security issues related to the nation's highway, aviation, pipeline, inland waterway, transit, and rail networks, as well as port facilities. This course provides an overview of transportation safety issues including passenger and employee safety and hazardous materials. Strategies to prepare for transportation-related disasters in addition to the transport of people and goods after terrorism events or natural disasters are also addressed.

**MKTG 3777 Aviation in American Life: 3 semester hours**

Prerequisites: Junior standing or instructor's consent. This course focuses on the history and business of aviation in the United States from balloon flights preceding the Wright brothers through the terrorist attacks in September 2001 with emphasis upon how aviation and aviators have influenced American society, culture. Themes include the evolution of aviation technology, the growth of the commercial/military aviation/aerospace industries, issues of race and gender in aviation, the development of America's commercial airlines, aviation's influence upon American art, films, advertising, and literature, the significance of the space race, and the role of aerial weapons of war.

**MKTG 3780 International Marketing: 3 semester hours**

Same as INTL BUS 3780. Prerequisites: MKTG 3700 and a 2.0 overall GPA. Marketing management problems, techniques and strategies needed to apply the marketing concept to the world marketplace. Understanding a country's cultural and environmental impact on the marketing plan is emphasized, as well as competing in markets of various cultures. Worldwide consumerism, economic and social development, the spread of multinational corporations, business ethics, and current economic and marketing issues are examined.

**MKTG 3785 Women in International Entrepreneurship: 3 semester hours**

Prerequisites: MKTG 3700; MKTG 3780 or INTL BUS 3780; and Junior standing. This course is an integration of international business and entrepreneurship, with a focus on women entrepreneurs. It is designed to help students learn how entrepreneurs create and grow their ventures internationally. We will examine how entrepreneurs search, evaluate, and exploit opportunities across national boundaries to market goods and services effectively. We will explore the unique circumstances faced by women entrepreneurs and the appropriate strategies developed in order to sustain international growth.

**MKTG 3787 Marketing in the European Union: 3 semester hours**

Same as INTL BUS 3787. Prerequisites: MKTG 3780 or instructor's permission. The European Union (EU) is both a major customer and major competitor of the United States. The inclusion of many of the Eastern European countries into the EU has added another challenge to our ability to trade in this area. The better we understand the people, institutions and policies of the EU, the better positioned we will be to conduct business effectively. This course will emphasize understanding the institutional structure that unites the European Union as well as the cultural and political diversity of its members, and provide insights into how business activity functions in the European Environment.

**MKTG 3790 Internship In Marketing: 1-3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of Marketing electives and have consent of supervising marketing instructor and Area Coordinator. A Business College GPA of 2.5 is also required. Students are employed in the field of Marketing where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. A Marketing faculty member will monitor the student's program with the student providing a formal written report at the end of the project. MKTG 3790 may be counted toward the minimum credit hours of marketing electives required for a marketing emphasis.

**MKTG 3795 Special Administration Problems - Marketing: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**MKTG 3798 Seminar in Marketing: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of marketing. May be repeated for credit with different topics.

**MKTG 3799 Independent Study In Marketing: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the area coordinator. Special individual study in marketing under the supervision of a full-time marketing faculty member.

**MKTG 4700 Marketing Management: 3 semester hours**

Prerequisites: MATH 1105, MKTG 3700, three other marketing elective courses, senior standing, and a 2.0 campus GPA. An intensive analysis of major marketing decisions facing the firm, such as level, mix, allocation, and strategy of marketing efforts. Specific decision areas investigated include market determination, pricing, physical distribution, product policy, promotion, channel management, and buyer behavior. Competitive, political, legal, and social factors that may affect such areas of decisions are discussed. Cases, models, and problems are used heavily.

**MKTG 5700 Contemporary Marketing Concepts: 3 semester hours**

Prerequisite: BUS AD 5000. Designed for students with no prior course work in the field of marketing. A wide spectrum of marketing institutions and activities is covered. The impact of marketing on the total firm, the economy, and society in general is assessed. The course is intended to develop and organize the fundamental marketing concepts necessary to an analytical study of consumer behavior, the economic environment and four managerial aspects of marketing. The acquisition and utilization of marketing research data for problem solving is stressed. Relation and integration of basic marketing knowledge to the successful development of sound marketing policy, planning, and strategy is developed.

**MKTG 5701 Marketing Planning And Strategy: 3 semester hours**

Prerequisite: MKTG 5700. Emphasizes the development of a total marketing program through an analytical study of the marketing-mix, the diagnosis of the business situation, along with the influence of exogenous variables and the development of an effective overall marketing strategy. Stresses importance of an integrated marketing plan and utilizes modern decision-making tools. Supplementary readings, journal articles, and current periodicals are used to place the theoretical framework of the course into the contemporary environment of the market place.

**MKTG 5710 Consumer Motivation And Behavior: 3 semester hours**

Prerequisite: MKTG 5700. An analysis of the socio-psychological foundations of consumer behavior including personality differences, needs and wants, status symbols, social change and mobility, fads and fashions. Consumer spending and saving habits, product preferences, leisure-time patterns, shopping behavior and motivation research also are examined for their impact on advertising, selling and marketing management.

**MKTG 5720 Marketing Communications: 3 semester hours**

Prerequisite: MKTG 5700. Deals with managerial decision making by placing particular emphasis on assimilating and integrating all forms of marketing communication in the development of promotional policies, plans and procedures. Course approach is analytical rather than descriptive in investigating the areas of advertising, public relations, sales management, packaging and other forms of demand stimulation.

**MKTG 5721 Digital Marketing Strategies and Measurement: 3 semester hours**

Prerequisites: MKTG 5700. Most every business today needs a digital marketing strategy to engage with current customers and attract new. Consumers are changing the way they communicate with and research brands. Brands are changing the way they promote and engage with consumers. We are embracing digital technologies to communicate in ways that were inconceivable just a few short years ago. We have shifted our attention from traditional media marketing to internet, wireless devices, and other digital platforms. In this course you will assess the various marketing channels; the importance of establishing a social media strategy; understand the digital trends that are shaping the future; experiment with today's cutting edge digital marketing tools (licensed and free) including Adobe SiteCatalyst, Radian6, Lithium, Alexa, and Hootsuite to name a few; learn how to develop a digital marketing plan; how we define key performance indicators (KPI's); techniques used to measure the ROI of your digital campaigns; marketing mix and campaign attribution.

**MKTG 5722 Social Media Marketing Strategy: 3 semester hours**

Prerequisite: MKTG 5721. Social networks are becoming an integral part of the marketing mix. In these platforms, brands can engage with prospects and consumers on many levels. In this course you will learn how to create a brand presence on these social networks, understand the differences between earned and paid media, the various tools (free and paid) used to listen and engage with consumers, how we manage healthy communities, techniques used to identify influencers, crisis management, rules of engagement for high profile individuals and corporations, the importance of transparency, the various ways engagement is measured, the value of a Facebook like, and calculating return on investment. Social networks to be discussed will include Facebook, Twitter, Tumblr, Instagram, LinkedIn, Wordpress, etc. Tools to be used will include Netbase (our partner), HootSuite, Tweetdeck, Sprinklr, Technorati, etc. Various real life case projects and exercises will be assigned throughout the semester under the instructor's supervision.

**MKTG 5730 Clinical Study in Digital and Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 5721 or MKTG 5722 or consent of instructor if prior digital/social media experience. This course, in partnership with Capital Innovators, provides students the opportunity for experiential learning by directly applying classroom topics to the real world. Students will be paired up with a new startup business in their current class and, over the course of the semester, contribute to their digital and social media marketing strategies by assisting in specific project tasks. Other mutually agreed upon areas of responsibility may be assigned as necessary. This is not an internship but rather a project support based clinical course providing very valuable learning in the very vibrant entrepreneurial startup world. It will be instructor led with weekly class meetings.

**MKTG 5731 Special Seminars in Digital and Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 5721 or MKTG 5722 or consent of instructor if prior digital/social media experience. In this course, the students will be attending three special 2- or 3-day seminars discussing focused topics in Digital and Social Media Marketing. Seminar topics include Mobile Strategy, Email Marketing, Blogs to Buzz, Online Display Advertising, and Strategic Search Engine Marketing. This course may be offered on a weekend schedule.

**MKTG 5740 Marketing And Business Research: 3 semester hours**

Prerequisites: MKTG 5700 and LOG OM 5300. A broad approach to marketing research as a model for acquiring, retrieving, and analyzing decision-making information. Includes market measurement, evaluation of sales and cost effectiveness, sales forecasting and primary marketing research studies aimed at solving specific problems. Emphasis is placed also on building a theoretical and analytical framework to provide flexibility in the design of marketing experiments and in judging recent research innovations.

**MKTG 5761 Business To Business Marketing: 3 semester hours**

The course provides graduate students with an understanding of the role of business to business marketing as it pertains to business, government, and institutional customers. The course places a heavy emphasis on buyer-seller interaction embodying business to business marketing. In addition to discussing the standard theories and covering the subject domain of business marketing, the course focuses on the finer aspects of business to business marketing negotiations using exercises and readings. Student groups enact complex industrial buyer-seller negotiations striving to achieve their respective organizational goals.

**MKTG 5770 Supply Chain Management Strategy: 3 semester hours**

Prerequisite: Consent of instructor. Course addresses supply chain management and its implications, with a focus on what firms can do to maintain competitiveness in the quickly changing business landscape. Topics may include, but are not limited to, value chain analyses, marketing business-to-business, supply chain analytics, procurement, production, logistics, and inventory management within supply chains.

**MKTG 5775 Domestic Transportation: 3 semester hours**

Domestic Transportation is the study of North American transportation modes, their management and operating characteristics. This graduate course is part of the Mid-West Transportation Consortium where UMSL, along with 5 other Universities, provides guest lectures that comment on aspects of transportation. UMSL students concentrate on the business aspects of transportation.

**MKTG 5780 Seminar In International Marketing: 3 semester hours**

Same as INTL BUS 5780. Prerequisite: MKTG 5700. An advanced seminar on topics in international or global marketing. Possible topics include the globalization of trade, export marketing, international market opportunity analysis, and negotiation for international marketers. Students who take one version of this course (e.g., globalization of trade) can take a second version of the course (e.g., negotiation for international marketers) with prior permission.

**MKTG 5790 Internship in Marketing: 3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of marketing electives and have consent of supervising faculty member and Area Coordinator. Students work in the field of Marketing where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. The student's program will be monitored by a Marketing faculty member with the student providing a formal report at the end of the project.

**MKTG 5795 Seminar In Marketing: 3 semester hours**

Prerequisites: MKTG 5700. This course addresses advanced problems in contemporary marketing. Topics may include, but are not limited to, marketing strategy, marketing communications and advertising, product management, consumer behavior, channels of distribution, international marketing, and marketing research.

**MKTG 5799 Individual Research in Marketing: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in marketing under the guidance of a specific professor.

## Courses

**MKTG 3700 Basic Marketing: 3 semester hours**

Prerequisites: ECON 1001, Junior standing and a 2.0 overall GPA. An examination of the character and importance of the marketing process, its essential functions and the institutions performing them. Attention is focused on the major policies (such as distribution, product, price, and promotion) which underlie the multifarious activities of marketing institutions and the managerial, economic, societal implications of such policies.

**MKTG 3710 Consumer Behavior: 3 semester hours**

Prerequisites: MKTG 3700, and a minimum overall GPA of 2.0. A study of such consumer functions as decision-making, attitude formation and change, cognition, perception, and learning. The marketing concepts of product positioning, segmentation, brand loyalty, shopping preference and diffusion of innovations are considered in context with the environmental, ethical, multicultural and social influences on an increasingly diverse American consumer.

**MKTG 3720 Management Of Promotion: 3 semester hours**

Prerequisite: MKTG 3700 and a 2.0 overall GPA. A study of the design, organization and implementation of the marketing "communications mix". Various methods such as advertising, personal selling, and publicity are analyzed as alternatives for use alone, or in combination to stimulate demand, reseller support, and buyer preference. Particular topics considered include: media selection, sales promotionals, packaging, selling strategy and their relationships in the promotion process.

**MKTG 3721 Introduction to Digital Marketing Strategies: 3 semester hours**

Prerequisites: MKTG 3700 and a minimum campus GPA of 2.0. This course explores the world of digital media marketing and how it impacts and is integrated along with our traditional marketing channels. We will explore how the balance of power has shifted between brands and consumers. Consumers are more active in the marketing process and in influencing how brands communicate with them than ever before. In particular we will explore: The latest digital marketing trends, how to build a strong website from an organic perspective, search strategies for success, website intelligence and tracking using Google Analytics, retaining customers via Email marketing, online Display advertising, social media strategy, affiliate marketing, mobile marketing trends and developing an integrated marketing plan.

**MKTG 3722 Introduction to Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 3721. Social networks are becoming an integral part of the marketing mix. In these platforms, brands can engage with prospects and consumers on many levels. In this course you will learn how to create a brand presence on these social networks, understand the differences between earned and paid media, be introduced to the various tools (free and paid) used to listen and engage with consumers, discuss how brands manage healthy communities, learn techniques used by social media managers to identify influencers, and study the various ways engagement is measured including calculating social media return on investment. Social networks to be discussed throughout the semester will include Facebook, Twitter, Tumblr, Instagram, LinkedIn, etc. Students will also be introduced to the various social measurement tools including Netbase (our partner), HootSuite, TweetDeck, Sprinklr, Technorati, etc. Real life case examples will be used throughout the semester.

**MKTG 3731 Digital and Social Media Marketing Lab (Internship): 3 semester hours**

Prerequisites: MKTG 3700, MKTG 3720, MKTG 3721 and MKTG 3722. In this capstone practicum course, students will be teamed up with various St. Louis based organizations. Students will assist these companies with their digital and social media strategies and plans. Students will conduct specific digital and social media project tasks including, among others, managing social media content and pushes, creating a social media presence, creation of a social media playbook, search engine marketing, paid search, web analytics and dashboard creation, landing page design, assisting in the build of a WordPress blog.

**MKTG 3738 Advertising Technique: 3 semester hours**

Same as MEDIA ST 3338. Prerequisites: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

**MKTG 3740 Marketing Analysis: 3 semester hours**

Prerequisites: INFSYS 1800, MKTG 3700, LOG OM 3300, and a 2.0 Overall GPA. An investigation of the acquisition, presentation, and application of marketing information for management. Particular problems considered are defining information requirements, evaluating research findings, and utilizing information. Statistical methods, models, and/or cases are employed to illustrate approaches to marketing intelligence problems, such as sales forecasts, market delineation, buyer motives, store location, and performance of marketing functions.

**MKTG 3750 Sales Management: 3 semester hours**

Prerequisites: MKTG 3700 and MGMT 3600. (MGMT 3600 may be taken concurrently). Also a minimum campus GPA of 2.0. The aim of this course is to provide an understanding of how selling is critical to the success of marketing. The course will promote critical thinking skills as well as practical selling skills needed in a competitive marketplace. Course topics include, among others, selling principles & techniques, understanding of the tasks and roles of the sales manager, the management of sales professionals within an organization, developing and applying effective persuasive communications, creating a vision, developing and implementing a sales-team strategy, structuring sales-force, designing and assigning territories, recruiting, training, motivation and evaluating salespeople, methods of compensation, and forecasting sales. The emphasis will be on ways the sales-force can be molded to build long-lasting relationships with customers through the systematic analysis and solution of customer's problems.

**MKTG 3760 Business To Business Marketing: 3 semester hours**

Prerequisites: Senior standing, MATH 1105, MKTG 3700 and a 2.0 overall GPA. A study of the nature of the business-to-business (organizational) marketplace, concentrating on those aspects that differentiate it from consumer markets. The major focus of the course is marketing strategy, starting with analysis of the market wants and segments, concepts of pricing, the distribution arrangements, and buyer/seller relations. In this last area, consideration will be given to service, personal selling, sales promotion, and advertising, as found in the organizational marketplace. At all times emphasis is given to relating business-to-business marketing strategy to basic concepts in underlying business disciplines. Lectures and case discussions are used heavily in the course.

**MKTG 3770 Introduction To Transportation: 3 semester hours**

Prerequisite: A minimum campus GPA of 2.0; also Junior standing or instructor consent. This course provides an overview of the transportation sector, including history, providers, users, and government regulation. The importance and significance of transportation, the operational aspects of transportation modes of rail, water, motor, air and pipeline; the demand and supply of transportation, and the managerial aspects of these modes of transport will be covered in the course.

**MKTG 3771 Traffic And Transportation Management: 3 semester hours**

Prerequisites: A minimum campus GPA of 2.0 and Junior standing or instructor's consent. This course focuses on the purchase of transportation and warehouse services and/or the operation of transportation services as a firm activity. This course is also designed to provide the student with an exposure to the managerial aspects of transportation management as a function of the firm's logistical strategy. In addition, it includes an introduction to the management of firms with the various transportation modes of rail, motor, air, water, and pipelines. This course is designed to provide the student with a basic understanding of the issues and work performed by traffic managers and the management of modern transportation firms.

**MKTG 3776 Transportation Security, Safety and Disaster Preparedness: 3 semester hours**

Prerequisites: Junior standing or instructor's consent. This course emphasizes security issues related to the nation's highway, aviation, pipeline, inland waterway, transit, and rail networks, as well as port facilities. This course provides an overview of transportation safety issues including passenger and employee safety and hazardous materials. Strategies to prepare for transportation-related disasters in addition to the transport of people and goods after terrorism events or natural disasters are also addressed.

**MKTG 3777 Aviation in American Life: 3 semester hours**

Prerequisites: Junior standing or instructor's consent. This course focuses on the history and business of aviation in the United States from balloon flights preceding the Wright brothers through the terrorist attacks in September 2001 with emphasis upon how aviation and aviators have influenced American society, culture. Themes include the evolution of aviation technology, the growth of the commercial/military aviation/aerospace industries, issues of race and gender in aviation, the development of America's commercial airlines, aviation's influence upon American art, films, advertising, and literature, the significance of the space race, and the role of aerial weapons of war.

**MKTG 3780 International Marketing: 3 semester hours**

Same as INTL BUS 3780. Prerequisites: MKTG 3700 and a 2.0 overall GPA. Marketing management problems, techniques and strategies needed to apply the marketing concept to the world marketplace. Understanding a country's cultural and environmental impact on the marketing plan is emphasized, as well as competing in markets of various cultures. Worldwide consumerism, economic and social development, the spread of multinational corporations, business ethics, and current economic and marketing issues are examined.

**MKTG 3785 Women in International Entrepreneurship: 3 semester hours**

Prerequisites: MKTG 3700; MKTG 3780 or INTL BUS 3780; and Junior standing. This course is an integration of international business and entrepreneurship, with a focus on women entrepreneurs. It is designed to help students learn how entrepreneurs create and grow their ventures internationally. We will examine how entrepreneurs search, evaluate, and exploit opportunities across national boundaries to market goods and services effectively. We will explore the unique circumstances faced by women entrepreneurs and the appropriate strategies developed in order to sustain international growth.

**MKTG 3787 Marketing in the European Union: 3 semester hours**

Same as INTL BUS 3787. Prerequisites: MKTG 3780 or instructor's permission. The European Union (EU) is both a major customer and major competitor of the United States. The inclusion of many of the Eastern European countries into the EU has added another challenge to our ability to trade in this area. The better we understand the people, institutions and policies of the EU, the better positioned we will be to conduct business effectively. This course will emphasize understanding the institutional structure that unites the European Union as well as the cultural and political diversity of its members, and provide insights into how business activity functions in the European Environment.

**MKTG 3790 Internship In Marketing: 1-3 semester hours**

Prerequisites: A minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of Marketing electives and have consent of supervising marketing instructor and Area Coordinator. A Business College GPA of 2.5 is also required. Students are employed in the field of Marketing where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. A Marketing faculty member will monitor the student's program with the student providing a formal written report at the end of the project. MKTG 3790 may be counted toward the minimum credit hours of marketing electives required for a marketing emphasis.

**MKTG 3795 Special Administration Problems - Marketing: 1-10 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**MKTG 3798 Seminar in Marketing: 1-3 semester hours**

Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of marketing. May be repeated for credit with different topics.

**MKTG 3799 Independent Study In Marketing: 1-3 semester hours**

Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the area coordinator. Special individual study in marketing under the supervision of a full-time marketing faculty member.

**MKTG 4700 Marketing Management: 3 semester hours**

Prerequisites: MATH 1105, MKTG 3700, three other marketing elective courses, senior standing, and a 2.0 campus GPA. An intensive analysis of major marketing decisions facing the firm, such as level, mix, allocation, and strategy of marketing efforts. Specific decision areas investigated include market determination, pricing, physical distribution, product policy, promotion, channel management, and buyer behavior. Competitive, political, legal, and social factors that may affect such areas of decisions are discussed. Cases, models, and problems are used heavily.

**MKTG 5700 Contemporary Marketing Concepts: 3 semester hours**

Prerequisite: BUS AD 5000. Designed for students with no prior course work in the field of marketing. A wide spectrum of marketing institutions and activities is covered. The impact of marketing on the total firm, the economy, and society in general is assessed. The course is intended to develop and organize the fundamental marketing concepts necessary to an analytical study of consumer behavior, the economic environment and four managerial aspects of marketing. The acquisition and utilization of marketing research data for problem solving is stressed. Relation and integration of basic marketing knowledge to the successful development of sound marketing policy, planning, and strategy is developed.

**MKTG 5701 Marketing Planning And Strategy: 3 semester hours**

Prerequisite: MKTG 5700. Emphasizes the development of a total marketing program through an analytical study of the marketing-mix, the diagnosis of the business situation, along with the influence of exogenous variables and the development of an effective overall marketing strategy. Stresses importance of an integrated marketing plan and utilizes modern decision-making tools. Supplementary readings, journal articles, and current periodicals are used to place the theoretical framework of the course into the contemporary environment of the market place.

**MKTG 5710 Consumer Motivation And Behavior: 3 semester hours**

Prerequisite: MKTG 5700. An analysis of the socio-psychological foundations of consumer behavior including personality differences, needs and wants, status symbols, social change and mobility, fads and fashions. Consumer spending and saving habits, product preferences, leisure-time patterns, shopping behavior and motivation research also are examined for their impact on advertising, selling and marketing management.

**MKTG 5720 Marketing Communications: 3 semester hours**

Prerequisite: MKTG 5700. Deals with managerial decision making by placing particular emphasis on assimilating and integrating all forms of marketing communication in the development of promotional policies, plans and procedures. Course approach is analytical rather than descriptive in investigating the areas of advertising, public relations, sales management, packaging and other forms of demand stimulation.

**MKTG 5721 Digital Marketing Strategies and Measurement: 3 semester hours**

Prerequisites: MKTG 5700. Most every business today needs a digital marketing strategy to engage with current customers and attract new. Consumers are changing the way they communicate with and research brands. Brands are changing the way they promote and engage with consumers. We are embracing digital technologies to communicate in ways that were inconceivable just a few short years ago. We have shifted our attention from traditional media marketing to internet, wireless devices, and other digital platforms. In this course you will assess the various marketing channels; the importance of establishing a social media strategy; understand the digital trends that are shaping the future; experiment with today's cutting edge digital marketing tools (licensed and free) including Adobe SiteCatalyst, Radian6, Lithium, Alexa, and Hootsuite to name a few; learn how to develop a digital marketing plan; how we define key performance indicators (KPI's); techniques used to measure the ROI of your digital campaigns; marketing mix and campaign attribution.

**MKTG 5722 Social Media Marketing Strategy: 3 semester hours**

Prerequisite: MKTG 5721. Social networks are becoming an integral part of the marketing mix. In these platforms, brands can engage with prospects and consumers on many levels. In this course you will learn how to create a brand presence on these social networks, understand the differences between earned and paid media, the various tools (free and paid) used to listen and engage with consumers, how we manage healthy communities, techniques used to identify influencers, crisis management, rules of engagement for high profile individuals and corporations, the importance of transparency, the various ways engagement is measured, the value of a Facebook like, and calculating return on investment. Social networks to be discussed will include Facebook, Twitter, Tumblr, instagram, LinkedIn, Wordpress, etc. Tools to be used will include Netbase (our partner), HootSuite, tweetdeck, Sprinklr, Technorati, etc. Various real life case projects and exercises will be assigned throughout the semester under the instructor's supervision.

**MKTG 5730 Clinical Study in Digital and Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 5721 or MKTG 5722 or consent of instructor if prior digital/social media experience. This course, in partnership with Capital Innovators, provides students the opportunity for experiential learning by directly applying classroom topics to the real world. Students will be paired up with a new startup business in their current class and, over the course of the semester, contribute to their digital and social media marketing strategies by assisting in specific project tasks. Other mutually agreed upon areas of responsibility may be assigned as necessary. This is not an internship but rather a project support based clinical course providing very valuable learning in the very vibrant entrepreneurial startup world. It will be instructor led with weekly class meetings.

**MKTG 5731 Special Seminars in Digital and Social Media Marketing: 3 semester hours**

Prerequisites: MKTG 5721 or MKTG 5722 or consent of instructor if prior digital/social media experience. In this course, the students will be attending three special 2- or 3-day seminars discussing focused topics in Digital and Social Media Marketing. Seminar topics include Mobile Strategy, Email Marketing, Blogs to Buzz, Online Display Advertising, and Strategic Search Engine Marketing. This course may be offered on a weekend schedule.

**MKTG 5740 Marketing And Business Research: 3 semester hours**

Prerequisites: MKTG 5700 and LOG OM 5300. A broad approach to marketing research as a model for acquiring, retrieving, and analyzing decision-making information. Includes market measurement, evaluation of sales and cost effectiveness, sales forecasting and primary marketing research studies aimed at solving specific problems. Emphasis is placed also on building a theoretical and analytical framework to provide flexibility in the design of marketing experiments and in judging recent research innovations.

**MKTG 5761 Business To Business Marketing: 3 semester hours**

The course provides graduate students with an understanding of the role of business to business marketing as it pertains to business, government, and institutional customers. The course places a heavy emphasis on buyer-seller interaction embodying business to business marketing. In addition to discussing the standard theories and covering the subject domain of business marketing, the course focuses on the finer aspects of business to business marketing negotiations using exercises and readings. Student groups enact complex industrial buyer-seller negotiations striving to achieve their respective organizational goals.

**MKTG 5770 Supply Chain Management Strategy: 3 semester hours**

Prerequisite: Consent of instructor. Course addresses supply chain management and its implications, with a focus on what firms can do to maintain competitiveness in the quickly changing business landscape. Topics may include, but are not limited to, value chain analyses, marketing business-to-business, supply chain analytics, procurement, production, logistics, and inventory management within supply chains.

**MKTG 5775 Domestic Transportation: 3 semester hours**

Domestic Transportation is the study of North American transportation modes, their management and operating characteristics. This graduate course is part of the Mid-West Transportation Consortium where UMSL, along with 5 other Universities, provides guest lectures that comment on aspects of transportation. UMSL students concentrate on the business aspects of transportation.

**MKTG 5780 Seminar In International Marketing: 3 semester hours**

Same as INTL BUS 5780. Prerequisite: MKTG 5700. An advanced seminar on topics in international or global marketing. Possible topics include the globalization of trade, export marketing, international market opportunity analysis, and negotiation for international marketers. Students who take one version of this course (e.g., globalization of trade) can take a second version of the course (e.g., negotiation for international marketers) with prior permission.

**MKTG 5790 Internship in Marketing: 3 semester hours**

Prerequisites: Students must have completed and/or be enrolled in at least 6 credit hours of marketing electives and have consent of supervising faculty member and Area Coordinator. Students work in the field of Marketing where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. The student's program will be monitored by a Marketing faculty member with the student providing a formal report at the end of the project.

**MKTG 5795 Seminar In Marketing: 3 semester hours**

Prerequisites: MKTG 5700. This course addresses advanced problems in contemporary marketing. Topics may include, but are not limited to, marketing strategy, marketing communications and advertising, product management, consumer behavior, channels of distribution, international marketing, and marketing research.

**MKTG 5799 Individual Research in Marketing: 1-3 semester hours**

Prerequisites: Consent of instructor and graduate director. Special individual research topics in marketing under the guidance of a specific professor.

## Mathematics

### Courses

**MATH 0005 Intermediate Algebra: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Preparatory material for college level mathematics courses. Covers systems of linear equations and inequalities, polynomials, rational expressions, exponents, quadratic equations, graphing linear and quadratic functions. This course carries no credit towards any baccalaureate degree.

**MATH 1020 Contemporary Mathematics: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents methods of problem solving, centering on problems and questions which arise naturally in everyday life. May include aspects of algebra and geometry, the mathematics of finance, probability and statistics, exponential growth, and other topics chosen from traditional and contemporary mathematics which do not employ the calculus. May be taken to meet the mathematical proficiency requirement, but may not be used as a prerequisite for other mathematics courses. Designed for students who do not plan to take calculus. Credit will not be granted for MATH 1020 if credit has been granted for MATH 1310, MATH 1800, MATH 1100, MATH 1102, or MATH 1105. Concurrent enrollment in MATH 1020 and any of these courses is not permitted.

**MATH 1021 Choice and Chance: 3 semester hours**

Same as PHIL 1021. Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**MATH 1025 Geometry in the Real World: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents topics in geometry designed to enrich the student's understanding of mathematics. Geometry as it applies to the physical world and such fields as art, music, nature, motion, architecture and city planning will be examined. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**MATH 1030 College Algebra: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. Topics in algebra and probability, polynomial functions, the binomial theorem, logarithms, exponentials, and solutions to systems of equations.

**MATH 1035 Trigonometry: 2 semester hours**

Prerequisite: MATH 1030 or MATH 1040, or concurrent registration in either of these two courses, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. A study of the trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

**MATH 1040 College Algebra for Science and Engineering: 4 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Topics in this course include factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences.

**MATH 1045 PreCalculus: 5 semester hours**

Prerequisite: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Topics in this course include factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences. Students will also study trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

**MATH 1100 Basic Calculus: 3 semester hours**

Prerequisite: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Placement Examination, obtained at most one year prior to enrollment in this course. Introduction to plane analytic geometry and basic differential and integral calculus with applications to various areas. No credit for Mathematics majors. Credit not granted for both MATH 1800 and MATH 1100.

**MATH 1102 Finite Mathematics: 3 semester hours**

Prerequisites: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Introductory logic and set theory, partitions and counting problems, elementary probability theory, stochastic processes, Markov chains, vectors and matrices, linear programming, and game theory.

**MATH 1105 Basic Probability And Statistics: 3 semester hours**

Prerequisites: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to probability and statistics. Topics include the concept of probability and its properties, descriptive statistics, discrete and continuous random variables, expected value, distribution functions, the central limit theorem, random sampling and sampling distributions. Credit not granted for more than one of MATH 1310, MATH 1320, and MATH 1105.

**MATH 1150 Structure Of Mathematical Systems I: 3 semester hours**

Prerequisites: 45 hours of college credit and a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course OR successful completion of MATH 1030 no more than 2 years prior to enrollment in this course. A study of sets, relations, functions, whole numbers; the integers and their properties, and the rational and real number systems.

**MATH 1310 Elementary Statistical Methods: 3 semester hours**

Prerequisite: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to the basic tools and elementary methods of statistics, such as testing of hypotheses, analysis of variance, method of least squares, and time series. A student may not receive credit for more than one of MATH 1310, MATH 1320, and MATH 1105.

**MATH 1320 Applied Statistics I: 3 semester hours**

Prerequisites: MATH 1800 or MATH 1100. This is the first course of a one-year sequence in introductory probability and statistics. It provides a comprehensive introduction to those models and methods which are most likely to be encountered by students in their careers in applied mathematics and the sciences. Topics include descriptive statistics, basics of probability theory, random variables and their distributions, sampling distributions, confidence intervals, and hypothesis testing for population means and population proportions. A student may not receive credit for more than one of MATH 1310, MATH 1320 and MATH 1105.

**MATH 1800 Analytic Geometry And Calculus I: 5 semester hours**

Prerequisites: MATH 1030 and MATH 1035, or MATH 1040 and MATH 1035, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This course provides an introduction to differential and integral calculus. Topics include limits, derivatives, related rates, Newton's method, the Mean-Value Theorem, Max-Min problems, the integral, the Fundamental Theorem of Integral Calculus, areas, volumes, and average values.

**MATH 1900 Analytic Geometry And Calculus II: 5 semester hours**

Prerequisite: MATH 1800. Topics include conic sections, rotation of axes, polar coordinates, exponential and logarithmic functions, inverse (trigonometric) functions, integration techniques, applications of the integral (including mass, moments, arc length, and hydrostatic pressure), parametric equations, infinite series, power and Taylor series.

**MATH 2000 Analytic Geometry And Calculus III: 5 semester hours**

Prerequisite: MATH 1900. Topics include vectors, cylindrical and spherical coordinates, vector-valued functions, arc length and curvature, functions of several variables, partial and directional derivatives, gradients, extrema, Lagrange multipliers, multiple integrals, change of variables, surface area, vector fields, Stokes' Theorem.

**MATH 2020 Introduction To Differential Equations: 3 semester hours**

Prerequisite: MATH 2000. Topics will be chosen from: linear differential equations, equations with constant coefficients, laplace transforms, power series solutions, systems of ordinary differential equations.

**MATH 2450 Elementary Linear Algebra: 3 semester hours**

Prerequisite: MATH 1100 or MATH 1900. An introduction to linear algebra. Topics will include complex numbers, geometric vectors in two and three dimensions and their linear transformations, the algebra of matrices, determinants, solutions of systems of equations, eigenvalues and eigenvectors.

**MATH 2510 Structure Of Mathematical Systems II: 3 semester hours**

Prerequisite: MATH 1150. An introduction to probability and statistics. An intuitive study of elementary geometry. Introduction to the deductive theory of geometry and to coordinate geometry.

**MATH 3000 Discrete Structures: 3 semester hours**

Prerequisites: MATH 1900 or MATH 1100, and CMP SCI 1250 or equivalent. Treats fundamental ideas in discrete structures and serves as a foundation for subsequent courses in both Mathematics and Computer Science. Provides an introduction to techniques of mathematical reasoning with examples derived from computer science. Topics include logic, set algebra, equivalence relations and partitions, functions, mathematical induction, elementary number theory, cardinality, recurrence relations, basic combinatorial methods, trees and graphs. Credit not granted for more than one of CMP SCI 3000, and MATH 3000.

**MATH 3100 Problem Solving In Mathematics: 1 semester hour**

Prerequisite: MATH 2000. Course will train students to solve and write solutions to challenging mathematical problems, like those found in competitive exams like the Putnam Exam.

**MATH 3520 Structure Of Mathematical Systems III: 3 semester hours**

Prerequisite: MATH 2510 Together with MATH 1150 and MATH 2510, this course teaches the mathematics necessary for middle school mathematics certification. Topics from MATH 1150 and MATH 2510 are continued. Other topics include geometric constructions, similarity, coordinate geometry, normal distribution, combinatorics, and trigonometry.

**MATH 4010 Financial Mathematics I: 3 semester hours**

Prerequisites: MATH 1900 or MATH 1100, and MATH 1320 or LOG OM 3300 (or equivalents). An introduction to the theory of interest, annuities (certain), annuities with differing pay periods, amortization schedules and sinking funds.

**MATH 4020 Financial Mathematics II: 3 semester hours**

Prerequisites: MATH 4010. Premium-discount formula for bonds, bond amortization, term structure of interest rates and pricing theory for options.

**MATH 4030 Applied Mathematics I: 3 semester hours**

Prerequisite: MATH 2020 and MATH 2450. Topics chosen from Fourier series, special functions, partial differential equations, and boundary value problems.

**MATH 4060 Applied Differential Equations: 3 semester hours**

Prerequisites: MATH 2020 and MATH 2450. The study of ordinary differential equations and partial differential equations is continued with applications in such areas as physics, engineering and biology.

**MATH 4100 Real Analysis I: 3 semester hours**

Prerequisites: MATH 2000 and MATH 3000. Introduction to real analysis in one variable. Topics include the real number system, limits, continuity, differentiability, and sequences and series of functions.

**MATH 4160 Complex Analysis I: 3 semester hours**

Prerequisites: MATH 2020 or both MATH 3000 and MATH 2000. Complex numbers and their geometrical representation, point sets, analytic functions of a complex variable, complex integration, Taylor and Laurent series, residue theorem, conformal mapping.

**MATH 4200 Mathematical Statistics I: 3 semester hours**

Prerequisites: MATH 1320 and MATH 2000. Introduction to the theory of probability and statistics using concepts and methods of calculus.

**MATH 4210 Mathematical Statistics II: 3 semester hours**

Prerequisites: MATH 4200. Continuation of MATH 4200. Sampling distributions, estimation theory, properties of estimators, hypothesis testing, Neyman-Pearson Theorem, likelihood ratio tests, introduction of analysis of variance and linear models. Basics of some nonparametric procedures.

**MATH 4230 Numerical Analysis I: 3 semester hours**

Prerequisites: MATH 2020, MATH 2450, and the ability to program in an upper-level language. Solutions of equations, interpolation and approximation numerical differentiation and integration, and numerical solutions of initial value problems in ordinary differential equations. Selected algorithms will be programmed for solution on computers.

**MATH 4260 Introduction To Stochastic Processes: 3 semester hours**

Prerequisites: MATH 4200. Basic theory and applications of stochastic processes. Markov chains, recurrent and transient states, stationary distributions, ergodic theorem, renewal processes, discrete martingales and stationary processes.

**MATH 4350 Theory Of Numbers: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of instructor. Properties of integers, multiplicative functions, congruences, primitive roots, and quadratic residues.

**MATH 4390 Topics In Probability And Statistics: 3 semester hours**

Prerequisites: Consent of Instructor. A seminar on special topics in probability and statistics to be determined by the interests of the instructor. May be repeated for credit provided different topics are studied.

**MATH 4400 Introduction To Abstract Algebra I: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. Introduction to groups, rings, and fields, with emphasis on groups and rings.

**MATH 4450 Linear Algebra: 3 semester hours**

Prerequisites: MATH 3000, MATH 2000 and MATH 2450. Topics selected from vector spaces, bases, linear transformations, matrices, canonical forms, eigenvalues, hermitian and unitary matrices, inner product spaces, and quadratic forms.

**MATH 4500 Special Readings: 1-10 semester hours**

Prerequisites: MATH 3000, MATH 2000 and consent of instructor.

**MATH 4550 Combinatorics: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000. Advanced counting methods are introduced, including the use of generating functions for the solution of recurrences and difference equations. Additional topics may include: graphs and trees, combinatorial designs, combinatorial games, error-correcting codes, and finite-state machines.

**MATH 4660 Foundations Of Geometry: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A development of portions of Euclidean geometry from a selected set of axioms, including a discussion of consistency, independence, categoricity, and completeness of the axioms.

**MATH 4670 Introduction To Non-Euclidean Geometry: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A summary of the history of the non-Euclidean geometries and a study of hyperbolic plane geometry.

**MATH 4800 Introduction To Topology: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A study of topological spaces, including the concepts of limit, continuity, connectedness, compactness, etc. Special emphasis placed on, and examples taken from, the space of real numbers.

**MATH 4890 Topics In Mathematics: 3 semester hours**

Prerequisite: Consent of Instructor.

**MATH 5060 Computational Harmonic Analysis: 3 semester hours**

Prerequisites: MATH 4030, MATH 4100 and MATH 4450. The course covers the basics of Fourier analysis and wavelet analysis. Topics include Fourier transforms and series, discrete Fourier transform, discrete cosine transform and their fast computational schemes, fast wavelet transform, and the lifting scheme. Additional topics include industrial standards for image compression and several aspects of signal processing.

**MATH 5100 Real Analysis II: 3 semester hours**

Prerequisites: MATH 4100. Introduction to measure and integration. Topics include the Riemann-Stieltjes integral, Lebesgue measure, measurable functions, the Lebesgue integral, Radon-Nikodym and Fubini theorems and the basics of  $L_p$ -spaces.

**MATH 5110 Differentiable Manifolds: 3 semester hours**

Prerequisites: MATH 4100, MATH 4450, and MATH 4800. An introduction to smooth manifolds and maps. Topics will include the Implicit Function Theorem, Sard's Theorem, transversality, intersection and degree theory, differential forms and integration on manifolds.

**MATH 5140 Set Theory And Metric Spaces: 3 semester hours**

Prerequisites: MATH 4100 or consent of instructor. Naive set theory, cardinal arithmetic, ordinal numbers, the axiom of choice and equivalents, metric spaces, convergence, continuity, compactness, contraction principals and applications. Construction of completions and examples like real numbers and  $p$ -adic numbers. Other topics could include the Stone-Weierstrass theorem and metrization theorems.

**MATH 5160 Complex Analysis II: 3 semester hours**

Prerequisites: MATH 4160 and either MATH 4100 or MATH 4800. A second course in complex analysis, emphasizing the theory of analytic functions, and including various topics like the Riemann mapping theorem, normal families, analytic continuation, representations of analytic functions, and elliptic functions.

**MATH 5320 Applied Statistics: 3 semester hours**

Prerequisites: MATH 4210 or consent of instructor. The course studies classical and recently developed statistical procedures selected from areas including analysis of variance, multivariate analysis, nonparametric or semi-parametric methods and generalized linear models. Emphasis is on application of procedures, including the rationale underlying choice of procedures.

**MATH 5500 Directed Readings: 1-6 semester hours**

Prerequisite: Consent of instructor. Independent readings at an advanced level.

**MATH 5550 Topics In Advanced Math For The Teacher: 3 semester hours**

Prerequisite: Consent of Instructor. This course will look at various topics in Algebra, Analysis, and Geometry that will deepen a teacher's understanding of the Mathematics of the precollegiate curriculum. It can be taken more than once for credit.

**MATH 5600 Topics In Computation: 3 semester hours**

Prerequisite: consent of instructor. The course will cover various advanced topics in computation, and can be taken more than once for credit. Examples of such topics are: computer graphics, computer architecture, theories of language, analysis of operating systems, numerical geometry and computer aided design, etc.

**MATH 5700 Topics In Applied Mathematics: 3 semester hours**

Prerequisite: consent of instructor. The course will cover various advanced topics on applied mathematics, and can be taken more than once for credit. Examples of such topics are: fast transforms, digital filters, etc.

**MATH 5710 Topics In Analysis: 3 semester hours**

Prerequisites: MATH 5100 or consent of instructor. Topics selected from the areas of Fourier analysis, harmonic analysis, functional analysis, special functions, generalized functions, and partial differential equations. May be taken more than once for credit with consent of department.

**MATH 5820 Topics In Algebra: 3 semester hours**

Prerequisite: Consent of instructor. Topics selected from the theory of groups, rings, fields, algebras and other algebraic systems. May be taken more than once for credit with consent of department.

**MATH 6900 Masters Thesis: 1-6 semester hours**

Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.A. program. Students who do not write a thesis cannot apply MATH 6900 to a degree.

**MATH 7990 Ph.D. Dissertation Research: 1-9 semester hours**

Prerequisites: Completion of Comprehensive. May be taken for no more than nine hours.

## Courses

**MATH 0005 Intermediate Algebra: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Preparatory material for college level mathematics courses. Covers systems of linear equations and inequalities, polynomials, rational expressions, exponents, quadratic equations, graphing linear and quadratic functions. This course carries no credit towards any baccalaureate degree.

**MATH 1020 Contemporary Mathematics: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents methods of problem solving, centering on problems and questions which arise naturally in everyday life. May include aspects of algebra and geometry, the mathematics of finance, probability and statistics, exponential growth, and other topics chosen from traditional and contemporary mathematics which do not employ the calculus. May be taken to meet the mathematical proficiency requirement, but may not be used as a prerequisite for other mathematics courses. Designed for students who do not plan to take calculus. Credit will not be granted for MATH 1020 if credit has been granted for MATH 1310, MATH 1800, MATH 1100, MATH 1102, or MATH 1105. Concurrent enrollment in MATH 1020 and any of these courses is not permitted.

**MATH 1021 Choice and Chance: 3 semester hours**

Same as PHIL 1021. Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**MATH 1025 Geometry in the Real World: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents topics in geometry designed to enrich the student's understanding of mathematics. Geometry as it applies to the physical world and such fields as art, music, nature, motion, architecture and city planning will be examined. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**MATH 1030 College Algebra: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. Topics in algebra and probability, polynomial functions, the binomial theorem, logarithms, exponentials, and solutions to systems of equations.

**MATH 1035 Trigonometry: 2 semester hours**

Prerequisite: MATH 1030 or MATH 1040, or concurrent registration in either of these two courses, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. A study of the trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

**MATH 1040 College Algebra for Science and Engineering: 4 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Topics in this course include factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences.

**MATH 1045 PreCalculus: 5 semester hours**

Prerequisite: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Topics in this course include factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences. Students will also study trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

**MATH 1100 Basic Calculus: 3 semester hours**

Prerequisite: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Placement Examination, obtained at most one year prior to enrollment in this course. Introduction to plane analytic geometry and basic differential and integral calculus with applications to various areas. No credit for Mathematics majors. Credit not granted for both MATH 1800 and MATH 1100.

**MATH 1102 Finite Mathematics: 3 semester hours**

Prerequisites: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Introductory logic and set theory, partitions and counting problems, elementary probability theory, stochastic processes, Markov chains, vectors and matrices, linear programming, and game theory.

**MATH 1105 Basic Probability And Statistics: 3 semester hours**

Prerequisites: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to probability and statistics. Topics include the concept of probability and its properties, descriptive statistics, discrete and continuous random variables, expected value, distribution functions, the central limit theorem, random sampling and sampling distributions. Credit not granted for more than one of MATH 1310, MATH 1320, and MATH 1105.

**MATH 1150 Structure Of Mathematical Systems I: 3 semester hours**

Prerequisites: 45 hours of college credit and a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course OR successful completion of MATH 1030 no more than 2 years prior to enrollment in this course. A study of sets, relations, functions, whole numbers; the integers and their properties, and the rational and real number systems.

**MATH 1310 Elementary Statistical Methods: 3 semester hours**

Prerequisite: MATH 1030 or MATH 1040 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to the basic tools and elementary methods of statistics, such as testing of hypotheses, analysis of variance, method of least squares, and time series. A student may not receive credit for more than one of MATH 1310, MATH 1320, and MATH 1105.

**MATH 1320 Applied Statistics I: 3 semester hours**

Prerequisites: MATH 1800 or MATH 1100. This is the first course of a one-year sequence in introductory probability and statistics. It provides a comprehensive introduction to those models and methods which are most likely to be encountered by students in their careers in applied mathematics and the sciences. Topics include descriptive statistics, basics of probability theory, random variables and their distributions, sampling distributions, confidence intervals, and hypothesis testing for population means and population proportions. A student may not receive credit for more than one of MATH 1310, MATH 1320 and MATH 1105.

**MATH 1800 Analytic Geometry And Calculus I: 5 semester hours**

Prerequisites: MATH 1030 and MATH 1035, or MATH 1040 and MATH 1035, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This course provides an introduction to differential and integral calculus. Topics include limits, derivatives, related rates, Newton's method, the Mean-Value Theorem, Max-Min problems, the integral, the Fundamental Theorem of Integral Calculus, areas, volumes, and average values.

**MATH 1900 Analytic Geometry And Calculus II: 5 semester hours**

Prerequisite: MATH 1800. Topics include conic sections, rotation of axes, polar coordinates, exponential and logarithmic functions, inverse (trigonometric) functions, integration techniques, applications of the integral (including mass, moments, arc length, and hydrostatic pressure), parametric equations, infinite series, power and Taylor series.

**MATH 2000 Analytic Geometry And Calculus III: 5 semester hours**

Prerequisite: MATH 1900. Topics include vectors, cylindrical and spherical coordinates, vector-valued functions, arc length and curvature, functions of several variables, partial and directional derivatives, gradients, extrema, Lagrange multipliers, multiple integrals, change of variables, surface area, vector fields, Stokes' Theorem.

**MATH 2020 Introduction To Differential Equations: 3 semester hours**

Prerequisite: MATH 2000. Topics will be chosen from: linear differential equations, equations with constant coefficients, laplace transforms, power series solutions, systems of ordinary differential equations.

**MATH 2450 Elementary Linear Algebra: 3 semester hours**

Prerequisite: MATH 1100 or MATH 1900. An introduction to linear algebra. Topics will include complex numbers, geometric vectors in two and three dimensions and their linear transformations, the algebra of matrices, determinants, solutions of systems of equations, eigenvalues and eigenvectors.

**MATH 2510 Structure Of Mathematical Systems II: 3 semester hours**

Prerequisite: MATH 1150. An introduction to probability and statistics. An intuitive study of elementary geometry. Introduction to the deductive theory of geometry and to coordinate geometry.

**MATH 3000 Discrete Structures: 3 semester hours**

Prerequisites: MATH 1900 or MATH 1100, and CMP SCI 1250 or equivalent. Treats fundamental ideas in discrete structures and serves as a foundation for subsequent courses in both Mathematics and Computer Science. Provides an introduction to techniques of mathematical reasoning with examples derived from computer science. Topics include logic, set algebra, equivalence relations and partitions, functions, mathematical induction, elementary number theory, cardinality, recurrence relations, basic combinatorial methods, trees and graphs. Credit not granted for more than one of CMP SCI 3000, and MATH 3000.

**MATH 3100 Problem Solving In Mathematics: 1 semester hour**

Prerequisite: MATH 2000. Course will train students to solve and write solutions to challenging mathematical problems, like those found in competitive exams like the Putnam Exam.

**MATH 3520 Structure Of Mathematical Systems III: 3 semester hours**

Prerequisite: MATH 2510 Together with MATH 1150 and MATH 2510, this course teaches the mathematics necessary for middle school mathematics certification. Topics from MATH 1150 and MATH 2510 are continued. Other topics include geometric constructions, similarity, coordinate geometry, normal distribution, combinatorics, and trigonometry.

**MATH 4010 Financial Mathematics I: 3 semester hours**

Prerequisites: MATH 1900 or MATH 1100, and MATH 1320 or LOG OM 3300 (or equivalents). An introduction to the theory of interest, annuities (certain), annuities with differing pay periods, amortization schedules and sinking funds.

**MATH 4020 Financial Mathematics II: 3 semester hours**

Prerequisites: MATH 4010. Premium-discount formula for bonds, bond amortization, term structure of interest rates and pricing theory for options.

**MATH 4030 Applied Mathematics I: 3 semester hours**

Prerequisite: MATH 2020 and MATH 2450. Topics chosen from Fourier series, special functions, partial differential equations, and boundary value problems.

**MATH 4060 Applied Differential Equations: 3 semester hours**

Prerequisites: MATH 2020 and MATH 2450. The study of ordinary differential equations and partial differential equations is continued with applications in such areas as physics, engineering and biology.

**MATH 4100 Real Analysis I: 3 semester hours**

Prerequisites: MATH 2000 and MATH 3000. Introduction to real analysis in one variable. Topics include the real number system, limits, continuity, differentiability, and sequences and series of functions.

**MATH 4160 Complex Analysis I: 3 semester hours**

Prerequisites: MATH 2020 or both MATH 3000 and MATH 2000. Complex numbers and their geometrical representation, point sets, analytic functions of a complex variable, complex integration, Taylor and Laurent series, residue theorem, conformal mapping.

**MATH 4200 Mathematical Statistics I: 3 semester hours**

Prerequisites: MATH 1320 and MATH 2000. Introduction to the theory of probability and statistics using concepts and methods of calculus.

**MATH 4210 Mathematical Statistics II: 3 semester hours**

Prerequisites: MATH 4200. Continuation of MATH 4200. Sampling distributions, estimation theory, properties of estimators, hypothesis testing, Neyman-Pearson Theorem, likelihood ratio tests, introduction of analysis of variance and linear models. Basics of some nonparametric procedures.

**MATH 4230 Numerical Analysis I: 3 semester hours**

Prerequisites: MATH 2020, MATH 2450, and the ability to program in an upper-level language. Solutions of equations, interpolation and approximation numerical differentiation and integration, and numerical solutions of initial value problems in ordinary differential equations. Selected algorithms will be programmed for solution on computers.

**MATH 4260 Introduction To Stochastic Processes: 3 semester hours**

Prerequisites: MATH 4200. Basic theory and applications of stochastic processes. Markov chains, recurrent and transient states, stationary distributions, ergodic theorem, renewal processes, discrete martingales and stationary processes.

**MATH 4350 Theory Of Numbers: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of instructor. Properties of integers, multiplicative functions, congruences, primitive roots, and quadratic residues.

**MATH 4390 Topics In Probability And Statistics: 3 semester hours**

Prerequisites: Consent of Instructor. A seminar on special topics in probability and statistics to be determined by the interests of the instructor. May be repeated for credit provided different topics are studied.

**MATH 4400 Introduction To Abstract Algebra I: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. Introduction to groups, rings, and fields, with emphasis on groups and rings.

**MATH 4450 Linear Algebra: 3 semester hours**

Prerequisites: MATH 3000, MATH 2000 and MATH 2450. Topics selected from vector spaces, bases, linear transformations, matrices, canonical forms, eigenvalues, hermitian and unitary matrices, inner product spaces, and quadratic forms.

**MATH 4500 Special Readings: 1-10 semester hours**

Prerequisites: MATH 3000, MATH 2000 and consent of instructor.

**MATH 4550 Combinatorics: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000. Advanced counting methods are introduced, including the use of generating functions for the solution of recurrences and difference equations. Additional topics may include: graphs and trees, combinatorial designs, combinatorial games, error-correcting codes, and finite-state machines.

**MATH 4660 Foundations Of Geometry: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A development of portions of Euclidean geometry from a selected set of axioms, including a discussion of consistency, independence, categoricity, and completeness of the axioms.

**MATH 4670 Introduction To Non-Euclidean Geometry: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A summary of the history of the non-Euclidean geometries and a study of hyperbolic plane geometry.

**MATH 4800 Introduction To Topology: 3 semester hours**

Prerequisites: MATH 3000 and MATH 2000, or consent of the department. A study of topological spaces, including the concepts of limit, continuity, connectedness, compactness, etc. Special emphasis placed on, and examples taken from, the space of real numbers.

**MATH 4890 Topics In Mathematics: 3 semester hours**

Prerequisite: Consent of Instructor.

**MATH 5060 Computational Harmonic Analysis: 3 semester hours**

Prerequisites: MATH 4030, MATH 4100 and MATH 4450. The course covers the basics of Fourier analysis and wavelet analysis. Topics include Fourier transforms and series, discrete Fourier transform, discrete cosine transform and their fast computational schemes, fast wavelet transform, and the lifting scheme. Additional topics include industrial standards for image compression and several aspects of signal processing.

**MATH 5100 Real Analysis II: 3 semester hours**

Prerequisites: MATH 4100. Introduction to measure and integration. Topics include the Riemann-Stieltjes integral, Lebesgue measure, measurable functions, the Lebesgue integral, Radon-Nikodym and Fubini theorems and the basics of  $L_p$ -spaces.

**MATH 5110 Differentiable Manifolds: 3 semester hours**

Prerequisites: MATH 4100, MATH 4450, and MATH 4800. An introduction to smooth manifolds and maps. Topics will include the Implicit Function Theorem, Sard's Theorem, transversality, intersection and degree theory, differential forms and integration on manifolds.

**MATH 5140 Set Theory And Metric Spaces: 3 semester hours**

Prerequisites: MATH 4100 or consent of instructor. Naive set theory, cardinal arithmetic, ordinal numbers, the axiom of choice and equivalents, metric spaces, convergence, continuity, compactness, contraction principals and applications. Construction of completions and examples like real numbers and p-adic numbers. Other topics could include the Stone-Weierstrass theorem and metrization theorems.

**MATH 5160 Complex Analysis II: 3 semester hours**

Prerequisites: MATH 4160 and either MATH 4100 or MATH 4800. A second course in complex analysis, emphasizing the theory of analytic functions, and including various topics like the Riemann mapping theorem, normal families, analytic continuation, representations of analytic functions, and elliptic functions.

**MATH 5320 Applied Statistics: 3 semester hours**

Prerequisites: MATH 4210 or consent of instructor. The course studies classical and recently developed statistical procedures selected from areas including analysis of variance, multivariate analysis, nonparametric or semi-parametric methods and generalized linear models. Emphasis is on application of procedures, including the rationale underlying choice of procedures.

**MATH 5500 Directed Readings: 1-6 semester hours**

Prerequisite: Consent of instructor. Independent readings at an advanced level.

**MATH 5550 Topics In Advanced Math For The Teacher: 3 semester hours**

Prerequisite: Consent of Instructor. This course will look at various topics in Algebra, Analysis, and Geometry that will deepen a teacher's understanding of the Mathematics of the precollegiate curriculum. It can be taken more than once for credit.

**MATH 5600 Topics In Computation: 3 semester hours**

Prerequisite: consent of instructor. The course will cover various advanced topics in computation, and can be taken more than once for credit. Examples of such topics are: computer graphics, computer architecture, theories of language, analysis of operating systems, numerical geometry and computer aided design, etc.

**MATH 5700 Topics In Applied Mathematics: 3 semester hours**

Prerequisite: consent of instructor. The course will cover various advanced topics on applied mathematics, and can be taken more than once for credit. Examples of such topics are: fast transforms, digital filters, etc.

**MATH 5710 Topics In Analysis: 3 semester hours**

Prerequisites: MATH 5100 or consent of instructor. Topics selected from the areas of Fourier analysis, harmonic analysis, functional analysis, special functions, generalized functions, and partial differential equations. May be taken more than once for credit with consent of department.

**MATH 5820 Topics In Algebra: 3 semester hours**

Prerequisite: Consent of instructor. Topics selected from the theory of groups, rings, fields, algebras and other algebraic systems. May be taken more than once for credit with consent of department.

**MATH 6900 Masters Thesis: 1-6 semester hours**

Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.A. program. Students who do not write a thesis cannot apply MATH 6900 to a degree.

**MATH 7990 Ph.D. Dissertation Research: 1-9 semester hours**

Prerequisites: Completion of Comprehensive. May be taken for no more than nine hours.

## Media Studies

### Courses

**MEDIA ST 1050 Introduction To Media Studies: 3 semester hours**

Introduction to print and electronic media, as well as the Internet. Emphasis on history, theory, and role of the mass media as cultural institutions. The course also examines the Federal Communications Commission (FCC) and issues of ownership and media conglomeration.

**MEDIA ST 1055 Introduction to Social Media: 3 semester hours**

Introduction to the creation and rise of social media/networks. Course will cover the impact and influence of dominant sites along with individual, group, political, and commercial behavior changes. The course will examine how social media platforms can be integrated with other current tools. Issues such as privacy, censorship, cyber-bullying, and the use of social media for anti-social/terrorist activities will be explored.

**MEDIA ST 1060 Introduction to World Cinema: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of world cinema. International film theory and criticism will be studied as well as major genres, authors, and artists.

**MEDIA ST 1065 Internet Media: 3 semester hours**

This studio course will cover the principles of media design as they apply to the interactive world of the web. Sensitivity to the visual elements of online interfaces will be developed through analysis of the changing nature of communication technologies. Students will conceive and create their own web-based media projects.

**MEDIA ST 1070 Introduction To Cinema: 3 semester hours**

An overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. Course will discuss both the Hollywood studio system and today's independent movement. Also covered: genre, film theory, criticism, and aesthetics.

**MEDIA ST 1100 Introduction To Advertising: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of Advertising. A basic understanding of industry issues and key areas such as account management, research, strategy, creative, media, and production.

**MEDIA ST 1110 Introduction To Radio And Television Broadcasting: 3 semester hours**

An introduction to broadcasting, including the areas of history, government regulations, station operation, and program development.

**MEDIA ST 1194 Practicum In Journalism: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance, and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work in the journalism program or the student newspaper, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1196 Practicum In Radio: 1-3 semester hours**

Prerequisites: MEDIA ST 2114 or Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work at the campus radio station, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1197 Practicum In Television/Film: 1-3 semester hours**

Prerequisites: MEDIA ST 2113 or Consent of Instructor; open to Theatre, Dance and Media Studies majors only; not open to student who have delayed grades outstanding. Practical work at one of the campus television studios or for the UM-St. Louis Television/Film Club, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1198 Practicum In Media Studies: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only; not open to students who have delayed grades outstanding. Practical work in media studies, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1500 Entertainment Economics: The Movie Industry: 3 semester hours**

Same as ECON 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings.

**MEDIA ST 2080 Advertising Copywriting: 3 semester hours**

Same as ENGL 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

**MEDIA ST 2090 Creative Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explores the fundamentals of the creative process by discussing selling messages, marketplace diversity, research, strategy, layouts, and the creative brief. Emphasis on creative campaigns for radio, television, direct marketing, and the Internet.

**MEDIA ST 2095 Practicum In Advertising: 1-3 semester hours**

Prerequisites: MEDIA ST 2080 and MEDIA ST 2090 or consent of instructor. Open to Theatre, Dance, and Media Studies majors and minors only. Overall GPA of at least 2.0 or better. Not open to students who have any delayed grades outstanding. Practical work in the advertising program, the student newspaper, or an on-campus agency, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 2105 Advertising For The Arts: 3 semester hours**

Advertising for the Arts examines the theories and design principles needed to produce print and other forms of advertising to stimulate awareness of and community participation in a broad range of arts activities, including, but not limited to music, drama, dance, and the visual arts.

**MEDIA ST 2113 Media Production I: 3 semester hours**

Study of the basic skills needed to create media packages. The class will provide students with practical experience in camera operation, directing, producing, switching, audio mixing, and lighting, as well as basic non-linear editing. Lab arranged.

**MEDIA ST 2114 Radio Production I: 3 semester hours**

Prerequisites: MEDIA ST 1110. Theory and practice in the creation of radio programs. Laboratory experience included.

**MEDIA ST 2210 Video Production I: 3 semester hours**

Prerequisites: MEDIA ST 2113 or consent of instructor. Study of the basic theories of remote video production. The areas of producing and directing in the field will be examined and practiced. The course will focus on technical and aesthetic aspects of cinematic production. Lab arranged.

**MEDIA ST 2211 Introduction To Digital Multimedia Production: 3 semester hours**

Students will explore different state-of-the-art digital multimedia applications, including audio, video, and computer generated graphics, that are presently used in television, radio, CD, DVD, and online presentation. Current media related software such as QuickTime, Window Media, and Flash multimedia creation will be demonstrated and utilized to develop skill sets in those areas.

**MEDIA ST 2212 Broadcast Writing And Reporting: 3 semester hours**

Prerequisites: MEDIA ST 1110 or consent of instructor. Elementary principles and practice of writing for radio and television in varied program formats, emphasis on preparation of written materials for news and public affairs presentation. Lecture and lab.

**MEDIA ST 2214 Screenwriting: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the department. Writing fiction film narratives with particular emphasis on plot structure, theme, and character development.

**MEDIA ST 2220 Promotion Essentials: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explains the difference between advertising and sales promotion and why companies use sales promotion. Understand how companies utilize the different sales promotion techniques in each medium. Emphasis on the key sales promotion tools used by companies.

**MEDIA ST 2222 Convergence and Digital Media: 3 semester hours**

The development of new media technologies results in convergence, in which the lines between or among formerly separate media are blurred. Convergence and Digital Media focuses on the emerging media forms which result, including such new options as mobile apps for audio and video, blogs, and social media, as well as new tools for media creation for personal, social, business, and organizational expression. The course will examine emerging media technical options, effective message strategies in the context of emerging media, and basic principles associated with the practical use of tools for the creation of emerging media content. Both a lecture/discussion format and a hands-on project approach will be utilized.

**MEDIA ST 2225 Live Events Media: 3 semester hours**

Techniques and aesthetics of recording live video events. Course will include practical application training for single- and multi-camera shoots of concerts, lectures, theatre, dance, weddings, and other special events.

**MEDIA ST 2228 Public Relations Writing: 3 semester hours**

Prerequisites: ENGL 3140 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**MEDIA ST 2235 Media Theory: 3 semester hours**

Prerequisite: MEDIA ST 1050. Theory based explanation of the relationship between mass media and society. Topics will include agenda-setting, violence and television, and other current issues from a critical perspective.

**MEDIA ST 2271 History Of American Film: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the instructor. History of American film from the late nineteenth century to the present.

**MEDIA ST 2272 Contemporary Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or Consent of Instructor. History of World Cinema from the 1940s to the present day.

**MEDIA ST 2273 Survey of Film Genres: 3 semester hours**

Prerequisite: MEDIA ST 1060 or MEDIA ST 1070, or consent of instructor. This course explores the historical and aesthetic significance of film varieties. Analysis of genres may include the western, horror, science fiction, musical, detective, war, romantic comedy, and other films by type.

**MEDIA ST 2274 African-American Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or equivalent. Impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture. The history of African-American films from Oscar Micheaux in the 1920's through 1970's Blaxploitation to present directors and producers will be examined. African-American experiences and roles in films will also be discussed.

**MEDIA ST 2275 Introduction To International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 with a grade of C or better. Course provides an understanding of the art and history of international cinema; and helps to better understand film and filmmakers' intentions as well as the culture in which the film was produced. Films from Europe, Asia, South America, Africa and Australia will be examined. The artistic, technical, historical and social significance of these films, as well as their impact upon American cinema, will also be studied.

**MEDIA ST 2500 Introduction To Comparative International Media Systems: 3 semester hours**

This course introduces students to various media systems and theories around the world. It examines similarities and differences in media history, structures, and regulatory processes of developing countries, focusing on the dominant culture(s) of non-western regions. It also provides a framework for understanding and analyzing the cultural differences among global media systems in Africa, the Middle East, and Asia. In addition, the course examines aboriginal and other development media. The course fulfills the cultural diversity requirement.

**MEDIA ST 2510 Fundamentals of Mobile Design: 3 semester hours**

Building on core web languages and programming standards, this course introduces central concepts, techniques, methodologies, and best practices in the creation and deployment of mobile websites, applications, and user interface.

**MEDIA ST 3025 Current Issues in Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100, junior standing or consent of instructor. Using recent topics in advertising, students will analyze, evaluate, and critique current topics as well as prepare current campaigns for open discussion and presentation.

**MEDIA ST 3030 Advertising and Social Media: 3 semester hours**

Prerequisite: MEDIA ST 2090. Examination of advertising online with such topics as: social communities, friendvertising, virtual worlds, brand building, media democracy, online opinions, gaming, and how companies can leverage their brand using two-way interaction.

**MEDIA ST 3035 Advanced Media Theory: 3 semester hours**

Prerequisites: MEDIA ST 2235 or consent of instructor. This course examines major schools, ownership and theorists in mass media fields. The writings of the Frankfurt School, Marshall McLuhan, Ben Bagdikian, and others will be examined.

**MEDIA ST 3070 International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 and MEDIA ST 2275. Understanding international film, its properties, methods, aesthetics, and its impact on culture and society.

**MEDIA ST 3113 Media Production II: 3 semester hours**

Prerequisites: MEDIA ST 2113. Advanced study of the skills needed to create media packages. The class will provide students with a continuation of practical training in camera operations, directing, producing, switching, audio mixing, and lighting, as well as more advanced post production techniques. Lab arranged.

**MEDIA ST 3150 Feature Writing: 3 semester hours**

Same as ENGL 3150. Prerequisites: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments - journal entries, interviews, library projects, article critiques, and market reports - lead to production of full-length feature articles. May not be taken on the satisfactory/unsatisfactory option. The course counts toward the English Certificate in Writing.

**MEDIA ST 3180 Reporting: 3 semester hours**

Same as ENGL 3180. Prerequisites: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limit. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the English certificate in Writing.

**MEDIA ST 3214 News Writing: 3 semester hours**

Same as ENGL 3140. Prerequisites: ENGL 1100 or equivalent. An introduction to news writing and reporting. Course covers basic components of news reporting principles, and news writing style and structure. Daily writing assignments include coverage of speeches, meetings and interviews, accidents, deaths, courts, sports, consumer affairs, and government. Emphasis on clarity, accuracy, and speed. The course counts toward the English Certificate in Writing. THIS COURSE WAS PREVIOUSLY COMM 3214 PRIOR TO AUGUST 2007.

**MEDIA ST 3215 Commercial Media Applications: 3 semester hours**

Prerequisites: MEDIA ST 2210, MEDIA ST 2211; or consent of instructor. An integrated application of audio, video, and digital media production techniques for commercial purposes. Emphasizing a client-centered approach, students gain practical experience in developing media applications that conform to client-defined specifications.

**MEDIA ST 3310 Video Production II: 3 semester hours**

Prerequisite: MEDIA ST 2210. Study of advanced theories of media production. Refinement of production principles learned in MEDIA ST 2210. Exploration of complex program formats, and advanced non-linear editing techniques. Lab arranged.

**MEDIA ST 3313 Advanced Video Editing: 3 semester hours**

Prerequisites: Six (6) hours of television production. Study of advanced non-linear editing techniques, animation, and advanced graphics development. Exploration of state of the art editing formats. Lab arranged.

**MEDIA ST 3317 Radio And The Recording Industry: 3 semester hours**

Prerequisite: Junior standing. Historical development and current status of the recording industry, particularly as it interacts with the broadcast industry. Impact of radio and recording technology on the development of rock and other popular music.

**MEDIA ST 3334 Advertising Media Planning: 3 semester hours**

Prerequisite: MEDIA ST 1050. A hands-on study of how to determine an advertising budget, select media and develop a strategic plan.

**MEDIA ST 3338 Advertising Technique: 3 semester hours**

Same as MKTG 3738. Prerequisite: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

**MEDIA ST 3350 Mass Media History: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Examination of the social, economic, and political factors contributing to the development of American mass media. Emphasis on significant personalities who helped shape its course; analysis of select critical works.

**MEDIA ST 3355 Media Law And Regulation: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Discussion of laws affecting the mass media. Exploration of problems and issues in legal regulation of media content, ownership, access, and accountability. Discussion of industry self-regulation and the influence of citizens' organizations.

**MEDIA ST 3356 Global Media Systems And Trends: 3 semester hours**

This course will survey major theories, global trends, and key stakeholders in the field of mass and multi-media. Designed to foster substantive comprehension of issues raised by transnational media corporations and their impact on other cultures and languages. Details about the BBC, CNN, MTV, Euro Disney, and the internet will be major components of this class.

**MEDIA ST 3357 Media Convergence: 3 semester hours**

This course will provide students with an overview of how computer technologies, telecommunication networks, and digital media are transforming contemporary culture and everyday life. Through hands-on projects on topics of social relevance, students will explore multiple platforms for reaching a variety of audiences. The course will also deal with policy issues such as regulation and competition.

**MEDIA ST 3362 Storytelling: 1-3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course gives an overview of the history of storytelling, types of tales, and appropriate uses for storytelling. The primary emphasis of the course is in developing storytelling skills through preparation, performances, and evaluation.

**MEDIA ST 3370 Documentary Film: 3 semester hours**

Prerequisite: MEDIA ST 1070. Consideration of the history, theory, and criticism of nonfiction film. Screening of representative documentary films.

**MEDIA ST 3380 Feature Film Screenwriting: 3 semester hours**

This course involves a careful examination and execution of the art and craft of feature film screenwriting from concept through completion and marketing. Students will learn aspects of proper screenplay format, developing dramatic characters, theme, and plot, with emphasis on visual storytelling.

**MEDIA ST 3394 Internship In Journalism: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in journalism, masscommunication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work with an off-campus newspaper, magazine, or other news organization, supervised by a journalism professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3395 Internship In Advertising: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in advertising; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have delayed grades. Practical work at an off-campus advertising agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3396 Internship In Radio: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in radio, broadcasting; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus radio station, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3397 Internship In Television/Film: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus television, film or video organization, supervised by a television, film or video professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3398 Internship In Media Studies: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video, radio, journalism, broadcasting, mass communication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3500 Advanced Advertising Seminar: 3 semester hours**

Prerequisites: MEDIA ST 2080, MEDIA ST 2090, and MEDIA ST 3334 or consent of instructor. Students utilize skills learned in copywriting, creative advertising, and media buying and planning. Students are graded on research and customer insights, strategy, messaging and creative media plan, advertising partnerships, and measures of effectiveness. The course final includes preparing a Plan Book for a specific client and presenting at a national competition.

**MEDIA ST 3505 Field Experience in Advertising: 3 semester hours**

Prerequisites: Junior standing and completion of 3 courses from the Certificate in Advertising or consent of instructor. Through supervised travel, students will examine current ad campaigns, media placement, and effects on consumer purchasing behaviors. They will develop a broad hands-on understanding of the industry while applying principles and practices learned in the classroom. Topics include creativity with visual images and/or photographs, copywriting, accounting planning, account services, and media planning and buying. For field experience, students will visit advertising agencies, businesses that have in-house advertising departments, vendors (such as printers), museums, and other creative venues in St. Louis and/or other cities.

**MEDIA ST 3990 Directed Readings In Media Studies: 3 semester hours**

Prerequisites: consent of instructor; not open to students who have any delayed grades. Supervised independent study involving readings, conferences, papers, in one of the department's disciplines: advertising, radio, television, film, or journalism.

**MEDIA ST 4040 Special Topics in Media Studies: 1-6 semester hours**

Prerequisites: Junior, Senior, or Graduate standing and consent of instructor. Special topics with subject matter dealing with current issues, (theoretical or applied), in the discipline of media studies. Since the topics of MEDIA ST 4040 may change from semester to semester, the course may be repeated for up to 12 credit hours.

**MEDIA ST 4270 Feature Film Writing: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of instructor. This course will include story conceptualization, development, and drafting a feature film script ready for production. Characterization, dramatic structure, thematic subtext, and visual storytelling will be emphasized.

**MEDIA ST 4271 Feature Film Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of Instructor. This course will emphasize production techniques applicable to a wide variety of audio, film, and video-based media. Students will be involved in feature film production assignments on location in addition to regularly scheduled classes.

**MEDIA ST 4272 Feature Film Post Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of instructor. This course will provide instruction in editing techniques and motivation, as well as continuity, rhythmic, graphic, and temporal editing principles. Students will work on feature film segments in addition to regularly scheduled classes.

**MEDIA ST 4392 Administration Of Co-Curricular Activities: 3 semester hours**

Prerequisites: Junior Standing or consent of instructor. A survey of skills required to administer the various co-curricular activities associated with teachers in the secondary schools, such as theatre performances and mass media centers.

**MEDIA ST 4400 Senior Project: 3-6 semester hours**

Prerequisites: Senior Status, Consent of Instructor. The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty. Repeatable up to 6 credit hours.

## Courses

**MEDIA ST 1050 Introduction To Media Studies: 3 semester hours**

Introduction to print and electronic media, as well as the Internet. Emphasis on history, theory, and role of the mass media as cultural institutions. The course also examines the Federal Communications Commission (FCC) and issues of ownership and media conglomeration.

**MEDIA ST 1055 Introduction to Social Media: 3 semester hours**

Introduction to the creation and rise of social media/networks. Course will cover the impact and influence of dominant sites along with individual, group, political, and commercial behavior changes. The course will examine how social media platforms can be integrated with other current tools. Issues such as privacy, censorship, cyber-bullying, and the use of social media for anti-social/terrorist activities will be explored.

**MEDIA ST 1060 Introduction to World Cinema: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of world cinema. International film theory and criticism will be studied as well as major genres, authors, and artists.

**MEDIA ST 1065 Internet Media: 3 semester hours**

This studio course will cover the principles of media design as they apply to the interactive world of the web. Sensitivity to the visual elements of online interfaces will be developed through analysis of the changing nature of communication technologies. Students will conceive and create their own web-based media projects.

**MEDIA ST 1070 Introduction To Cinema: 3 semester hours**

An overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. Course will discuss both the Hollywood studio system and today's independent movement. Also covered: genre, film theory, criticism, and aesthetics.

**MEDIA ST 1100 Introduction To Advertising: 3 semester hours**

An introduction to the history, rhetoric, and aesthetics of Advertising. A basic understanding of industry issues and key areas such as account management, research, strategy, creative, media, and production.

**MEDIA ST 1110 Introduction To Radio And Television Broadcasting: 3 semester hours**

An introduction to broadcasting, including the areas of history, government regulations, station operation, and program development.

**MEDIA ST 1194 Practicum In Journalism: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance, and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work in the journalism program or the student newspaper, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1196 Practicum In Radio: 1-3 semester hours**

Prerequisites: MEDIA ST 2114 or Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only. Not open to students who have any delayed grades outstanding. Practical work at the campus radio station, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1197 Practicum In Television/Film: 1-3 semester hours**

Prerequisites: MEDIA ST 2113 or Consent of Instructor; open to Theatre, Dance and Media Studies majors only; not open to student who have delayed grades outstanding. Practical work at one of the campus television studios or for the UM-St. Louis Television/Film Club, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1198 Practicum In Media Studies: 1-3 semester hours**

Prerequisites: Consent of Instructor. Open to Theatre, Dance and Media Studies majors or minors only; not open to students who have delayed grades outstanding. Practical work in media studies, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 1500 Entertainment Economics: The Movie Industry: 3 semester hours**

Same as ECON 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings.

**MEDIA ST 2080 Advertising Copywriting: 3 semester hours**

Same as ENGL 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

**MEDIA ST 2090 Creative Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explores the fundamentals of the creative process by discussing selling messages, marketplace diversity, research, strategy, layouts, and the creative brief. Emphasis on creative campaigns for radio, television, direct marketing, and the Internet.

**MEDIA ST 2095 Practicum In Advertising: 1-3 semester hours**

Prerequisites: MEDIA ST 2080 and MEDIA ST 2090 or consent of instructor. Open to Theatre, Dance, and Media Studies majors and minors only. Overall GPA of at least 2.0 or better. Not open to students who have any delayed grades outstanding. Practical work in the advertising program, the student newspaper, or an on-campus agency, supervised by a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 2105 Advertising For The Arts: 3 semester hours**

Advertising for the Arts examines the theories and design principles needed to produce print and other forms of advertising to stimulate awareness of and community participation in a broad range of arts activities, including, but not limited to music, drama, dance, and the visual arts.

**MEDIA ST 2113 Media Production I: 3 semester hours**

Study of the basic skills needed to create media packages. The class will provide students with practical experience in camera operation, directing, producing, switching, audio mixing, and lighting, as well as basic non-linear editing. Lab arranged.

**MEDIA ST 2114 Radio Production I: 3 semester hours**

Prerequisites: MEDIA ST 1110. Theory and practice in the creation of radio programs. Laboratory experience included.

**MEDIA ST 2210 Video Production I: 3 semester hours**

Prerequisites: MEDIA ST 2113 or consent of instructor. Study of the basic theories of remote video production. The areas of producing and directing in the field will be examined and practiced. The course will focus on technical and aesthetic aspects of cinematic production. Lab arranged.

**MEDIA ST 2211 Introduction To Digital Multimedia Production: 3 semester hours**

Students will explore different state-of-the-art digital multimedia applications, including audio, video, and computer generated graphics, that are presently used in television, radio, CD, DVD, and online presentation. Current media related software such as QuickTime, Window Media, and Flash multimedia creation will be demonstrated and utilized to develop skill sets in those areas.

**MEDIA ST 2212 Broadcast Writing And Reporting: 3 semester hours**

Prerequisites: MEDIA ST 1110 or consent of instructor. Elementary principles and practice of writing for radio and television in varied program formats, emphasis on preparation of written materials for news and public affairs presentation. Lecture and lab.

**MEDIA ST 2214 Screenwriting: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the department. Writing fiction film narratives with particular emphasis on plot structure, theme, and character development.

**MEDIA ST 2220 Promotion Essentials: 3 semester hours**

Prerequisites: MEDIA ST 1100 or consent of instructor. Explains the difference between advertising and sales promotion and why companies use sales promotion. Understand how companies utilize the different sales promotion techniques in each medium. Emphasis on the key sales promotion tools used by companies.

**MEDIA ST 2222 Convergence and Digital Media: 3 semester hours**

The development of new media technologies results in convergence, in which the lines between or among formerly separate media are blurred. Convergence and Digital Media focuses on the emerging media forms which result, including such new options as mobile apps for audio and video, blogs, and social media, as well as new tools for media creation for personal, social, business, and organizational expression. The course will examine emerging media technical options, effective message strategies in the context of emerging media, and basic principles associated with the practical use of tools for the creation of emerging media content. Both a lecture/discussion format and a hands-on project approach will be utilized.

**MEDIA ST 2225 Live Events Media: 3 semester hours**

Techniques and aesthetics of recording live video events. Course will include practical application training for single- and multi-camera shoots of concerts, lectures, theatre, dance, weddings, and other special events.

**MEDIA ST 2228 Public Relations Writing: 3 semester hours**

Prerequisites: ENGL 3140 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**MEDIA ST 2235 Media Theory: 3 semester hours**

Prerequisite: MEDIA ST 1050. Theory based explanation of the relationship between mass media and society. Topics will include agenda-setting, violence and television, and other current issues from a critical perspective.

**MEDIA ST 2271 History Of American Film: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of the instructor. History of American film from the late nineteenth century to the present.

**MEDIA ST 2272 Contemporary Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or Consent of Instructor. History of World Cinema from the 1940s to the present day.

**MEDIA ST 2273 Survey of Film Genres: 3 semester hours**

Prerequisite: MEDIA ST 1060 or MEDIA ST 1070, or consent of instructor. This course explores the historical and aesthetic significance of film varieties. Analysis of genres may include the western, horror, science fiction, musical, detective, war, romantic comedy, and other films by type.

**MEDIA ST 2274 African-American Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 or equivalent. Impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture. The history of African-American films from Oscar Micheaux in the 1920's through 1970's Blaxploitation to present directors and producers will be examined. African-American experiences and roles in films will also be discussed.

**MEDIA ST 2275 Introduction To International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 with a grade of C or better. Course provides an understanding of the art and history of international cinema; and helps to better understand film and filmmakers' intentions as well as the culture in which the film was produced. Films from Europe, Asia, South America, Africa and Australia will be examined. The artistic, technical, historical and social significance of these films, as well as their impact upon American cinema, will also be studied.

**MEDIA ST 2500 Introduction To Comparative International Media Systems: 3 semester hours**

This course introduces students to various media systems and theories around the world. It examines similarities and differences in media history, structures, and regulatory processes of developing countries, focusing on the dominant culture(s) of non-western regions. It also provides a framework for understanding and analyzing the cultural differences among global media systems in Africa, the Middle East, and Asia. In addition, the course examines aboriginal and other development media. The course fulfills the cultural diversity requirement.

**MEDIA ST 2510 Fundamentals of Mobile Design: 3 semester hours**

Building on core web languages and programming standards, this course introduces central concepts, techniques, methodologies, and best practices in the creation and deployment of mobile websites, applications, and user interface.

**MEDIA ST 3025 Current Issues in Advertising: 3 semester hours**

Prerequisites: MEDIA ST 1100, junior standing or consent of instructor. Using recent topics in advertising, students will analyze, evaluate, and critique current topics as well as prepare current campaigns for open discussion and presentation.

**MEDIA ST 3030 Advertising and Social Media: 3 semester hours**

Prerequisite: MEDIA ST 2090. Examination of advertising online with such topics as: social communities, friendvertising, virtual worlds, brand building, media democracy, online opinions, gaming, and how companies can leverage their brand using two-way interaction.

**MEDIA ST 3035 Advanced Media Theory: 3 semester hours**

Prerequisites: MEDIA ST 2235 or consent of instructor. This course examines major schools, ownership and theorists in mass media fields. The writings of the Frankfurt School, Marshall McLuhan, Ben Bagdikian, and others will be examined.

**MEDIA ST 3070 International Cinema: 3 semester hours**

Prerequisites: MEDIA ST 1070 and MEDIA ST 2275. Understanding international film, its properties, methods, aesthetics, and its impact on culture and society.

**MEDIA ST 3113 Media Production II: 3 semester hours**

Prerequisites: MEDIA ST 2113. Advanced study of the skills needed to create media packages. The class will provide students with a continuation of practical training in camera operations, directing, producing, switching, audio mixing, and lighting, as well as more advanced post production techniques. Lab arranged.

**MEDIA ST 3150 Feature Writing: 3 semester hours**

Same as ENGL 3150. Prerequisites: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments - journal entries, interviews, library projects, article critiques, and market reports - lead to production of full-length feature articles. May not be taken on the satisfactory/unsatisfactory option. The course counts toward the English Certificate in Writing.

**MEDIA ST 3180 Reporting: 3 semester hours**

Same as ENGL 3180. Prerequisites: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limit. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the English certificate in Writing.

**MEDIA ST 3214 News Writing: 3 semester hours**

Same as ENGL 3140. Prerequisites: ENGL 1100 or equivalent.

An introduction to news writing and reporting. Course covers basic components of news reporting principles, and news writing style and structure. Daily writing assignments include coverage of speeches, meetings and interviews, accidents, deaths, courts, sports, consumer affairs, and government. Emphasis on clarity, accuracy, and speed. The course counts toward the English Certificate in Writing. THIS COURSE WAS PREVIOUSLY COMM 3214 PRIOR TO AUGUST 2007.

**MEDIA ST 3215 Commercial Media Applications: 3 semester hours**

Prerequisites: MEDIA ST 2210, MEDIA ST 2211; or consent of instructor. An integrated application of audio, video, and digital media production techniques for commercial purposes. Emphasizing a client-centered approach, students gain practical experience in developing media applications that conform to client-defined specifications.

**MEDIA ST 3310 Video Production II: 3 semester hours**

Prerequisite: MEDIA ST 2210. Study of advanced theories of media production. Refinement of production principles learned in MEDIA ST 2210. Exploration of complex program formats, and advanced non-linear editing techniques. Lab arranged.

**MEDIA ST 3313 Advanced Video Editing: 3 semester hours**

Prerequisites: Six (6) hours of television production. Study of advanced non-linear editing techniques, animation, and advanced graphics development. Exploration of state of the art editing formats. Lab arranged.

**MEDIA ST 3317 Radio And The Recording Industry: 3 semester hours**

Prerequisite: Junior standing. Historical development and current status of the recording industry, particularly as it interacts with the broadcast industry. Impact of radio and recording technology on the development of rock and other popular music.

**MEDIA ST 3334 Advertising Media Planning: 3 semester hours**

Prerequisite: MEDIA ST 1050. A hands-on study of how to determine an advertising budget, select media and develop a strategic plan.

**MEDIA ST 3338 Advertising Technique: 3 semester hours**

Same as MKTG 3738. Prerequisite: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

**MEDIA ST 3350 Mass Media History: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Examination of the social, economic, and political factors contributing to the development of American mass media. Emphasis on significant personalities who helped shape its course; analysis of select critical works.

**MEDIA ST 3355 Media Law And Regulation: 3 semester hours**

Prerequisites: MEDIA ST 1050 or MEDIA ST 1110. Discussion of laws affecting the mass media. Exploration of problems and issues in legal regulation of media content, ownership, access, and accountability. Discussion of industry self-regulation and the influence of citizens' organizations.

**MEDIA ST 3356 Global Media Systems And Trends: 3 semester hours**

This course will survey major theories, global trends, and key stakeholders in the field of mass and multi-media. Designed to foster substantive comprehension of issues raised by transnational media corporations and their impact on other cultures and languages. Details about the BBC, CNN, MTV, Euro Disney, and the internet will be major components of this class.

**MEDIA ST 3357 Media Convergence: 3 semester hours**

This course will provide students with an overview of how computer technologies, telecommunication networks, and digital media are transforming contemporary culture and everyday life. Through hands-on projects on topics of social relevance, students will explore multiple platforms for reaching a variety of audiences. The course will also deal with policy issues such as regulation and competition.

**MEDIA ST 3362 Storytelling: 1-3 semester hours**

Prerequisites: Junior standing or consent of instructor. Course gives an overview of the history of storytelling, types of tales, and appropriate uses for storytelling. The primary emphasis of the course is in developing storytelling skills through preparation, performances, and evaluation.

**MEDIA ST 3370 Documentary Film: 3 semester hours**

Prerequisite: MEDIA ST 1070. Consideration of the history, theory, and criticism of nonfiction film. Screening of representative documentary films.

**MEDIA ST 3380 Feature Film Screenwriting: 3 semester hours**

This course involves a careful examination and execution of the art and craft of feature film screenwriting from concept through completion and marketing. Students will learn aspects of proper screenplay format, developing dramatic characters, theme, and plot, with emphasis on visual storytelling.

**MEDIA ST 3394 Internship In Journalism: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in journalism, masscommunication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work with an off-campus newspaper, magazine, or other news organization, supervised by a journalism professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3395 Internship In Advertising: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in advertising; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have delayed grades. Practical work at an off-campus advertising agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3396 Internship In Radio: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in radio, broadcasting; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus radio station, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3397 Internship In Television/Film: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus television, film or video organization, supervised by a television, film or video professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3398 Internship In Media Studies: 3-6 semester hours**

Prerequisites: Senior standing, with at least 12 hours of course work in television, film, video, radio, journalism, broadcasting, mass communication; an overall GPA of at least 3.0; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 6 credit hours.

**MEDIA ST 3500 Advanced Advertising Seminar: 3 semester hours**

Prerequisites: MEDIA ST 2080, MEDIA ST 2090, and MEDIA ST 3334 or consent of instructor. Students utilize skills learned in copywriting, creative advertising, and media buying and planning. Students are graded on research and customer insights, strategy, messaging and creative media plan, advertising partnerships, and measures of effectiveness. The course final includes preparing a Plan Book for a specific client and presenting at a national competition.

**MEDIA ST 3505 Field Experience in Advertising: 3 semester hours**

Prerequisites: Junior standing and completion of 3 courses from the Certificate in Advertising or consent of instructor. Through supervised travel, students will examine current ad campaigns, media placement, and effects on consumer purchasing behaviors. They will develop a broad hands-on understanding of the industry while applying principles and practices learned in the classroom. Topics include creativity with visual images and/or photographs, copywriting, accounting planning, account services, and media planning and buying. For field experience, students will visit advertising agencies, businesses that have in-house advertising departments, vendors (such as printers), museums, and other creative venues in St. Louis and/or other cities.

**MEDIA ST 3990 Directed Readings In Media Studies: 3 semester hours**

Prerequisites: consent of instructor; not open to students who have any delayed grades. Supervised independent study involving readings, conferences, papers, in one of the department's disciplines: advertising, radio, television, film, or journalism.

**MEDIA ST 4040 Special Topics in Media Studies: 1-6 semester hours**

Prerequisites: Junior, Senior, or Graduate standing and consent of instructor. Special topics with subject matter dealing with current issues, (theoretical or applied), in the discipline of media studies. Since the topics of MEDIA ST 4040 may change from semester to semester, the course may be repeated for up to 12 credit hours.

**MEDIA ST 4270 Feature Film Writing: 3 semester hours**

Prerequisites: MEDIA ST 1070 or consent of instructor. This course will include story conceptualization, development, and drafting a feature film script ready for production. Characterization, dramatic structure, thematic subtext, and visual storytelling will be emphasized.

**MEDIA ST 4271 Feature Film Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of Instructor. This course will emphasize production techniques applicable to a wide variety of audio, film, and video-based media. Students will be involved in feature film production assignments on location in addition to regularly scheduled classes.

**MEDIA ST 4272 Feature Film Post Production: 3 semester hours**

Prerequisites: MEDIA ST 2210 or consent of instructor. This course will provide instruction in editing techniques and motivation, as well as continuity, rhythmic, graphic, and temporal editing principles. Students will work on feature film segments in addition to regularly scheduled classes.

***MEDIA ST 4392 Administration Of Co-Curricular Activities: 3 semester hours***

Prerequisites: Junior Standing or consent of instructor. A survey of skills required to administer the various co-curricular activities associated with teachers in the secondary schools, such as theatre performances and mass media centers.

***MEDIA ST 4400 Senior Project: 3-6 semester hours***

Prerequisites: Senior Status, Consent of Instructor. The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty. Repeatable up to 6 credit hours.

## Middle Education

### Courses

***MID ED 4246 Teaching Mathematics In The Middle School: 3 semester hours***

Prerequisites: Level 1 and Level 2 and completion of mathematics area of concentration A study of the middle school math curriculum with state standards and appropriate instructional strategies, materials, and assessments.

***MID ED 4253 Teaching Social Studies In The Middle School: 3 semester hours***

Prerequisites: Completion of level 1 and level 2 courses. Study of middle school social studies emphasizing current social studies curricular content, methods of teaching, and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, middle school based field experiences are required in addition to scheduled course time.

***MID ED 4315 The Middle Level School: 3 semester hours***

Prerequisites: level 1 and admission to teacher education program. An in-depth study of the philosophical and historical basis of the goals and organization of middle level schools, including a review of research as the basis for current trends and practices.

***MID ED 4316 Middle Level Curriculum And Instruction: 3 semester hours***

Prerequisites: Completion of Level 1 and MID ED 4315. Preparation for teaching and learning in a middle school, grades 5-9. Content focuses on curriculum development, methods, techniques, materials, planning, organization, and assessment in middle level education for early adolescents.

***MID ED 4317 The Middle-Level Child: 3 semester hours***

Prerequisites: Completion of level 2. Developmental characteristics and needs of early adolescents are studied through field experience in middle school classrooms. The relationship between needs and behavior is explored and skills for effective student teacher relationships are highlighted. This course to be taken concurrently with MID ED 4989.

***MID ED 4350 Teaching Science In The Middle School: 3 semester hours***

Prerequisites: Level I and Level 2 or equivalent preparation. Students will analyze both methodology and content, apply appropriate teaching and learning strategies, and become acquainted with technological advances in teaching science. Students will use informal and formal assessment as well as design and implement original science activities and instruction for all areas of science. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then middle school based field experiences are required in addition to scheduled course time.

***MID ED 4989 Practicum I: Middle Level Education Site Based Experience: 3 semester hours***

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in grades 6-8 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

***MID ED 4990 Practicum II: Middle Level Education Site Based Experience: 12 semester hours***

Prerequisites: Grade of C or higher in MID ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in grades 6-8 school settings in the subject area of certification. Not available for graduate credit.

### Courses

***MID ED 4246 Teaching Mathematics In The Middle School: 3 semester hours***

Prerequisites: Level 1 and Level 2 and completion of mathematics area of concentration A study of the middle school math curriculum with state standards and appropriate instructional strategies, materials, and assessments.

***MID ED 4253 Teaching Social Studies In The Middle School: 3 semester hours***

Prerequisites: Completion of level 1 and level 2 courses. Study of middle school social studies emphasizing current social studies curricular content, methods of teaching, and instructional materials. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, middle school based field experiences are required in addition to scheduled course time.

***MID ED 4315 The Middle Level School: 3 semester hours***

Prerequisites: level 1 and admission to teacher education program. An in-depth study of the philosophical and historical basis of the goals and organization of middle level schools, including a review of research as the basis for current trends and practices.

***MID ED 4316 Middle Level Curriculum And Instruction: 3 semester hours***

Prerequisites: Completion of Level 1 and MID ED 4315. Preparation for teaching and learning in a middle school, grades 5-9. Content focuses on curriculum development, methods, techniques, materials, planning, organization, and assessment in middle level education for early adolescents.

**MID ED 4317 The Middle-Level Child: 3 semester hours**

Prerequisites: Completion of level 2. Developmental characteristics and needs of early adolescents are studied through field experience in middle school classrooms. The relationship between needs and behavior is explored and skills for effective student teacher relationships are highlighted. This course to be taken concurrently with MID ED 4989.

**MID ED 4350 Teaching Science In The Middle School: 3 semester hours**

Prerequisites: Level I and Level 2 or equivalent preparation. Students will analyze both methodology and content, apply appropriate teaching and learning strategies, and become acquainted with technological advances in teaching science. Students will use informal and formal assessment as well as design and implement original science activities and instruction for all areas of science. If taken concurrently with internship, field hours will be combined within the internship experience. If this course is taken separately, then middle school based field experiences are required in addition to scheduled course time.

**MID ED 4989 Practicum I: Middle LEvel Education Site Based Experience: 3 semester hours**

Prerequisites: Level I and Level II requirements. This course is an intensive professional development experience (2 days per week) working in grades 6-8 settings with students. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, and classroom management. Particular emphasis will be given to impacting students achievement for diverse populations and differentiated instruction. Level III methods course assignments will be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Practicum I is taken in the semester immediately preceding Practicum II. Not available for graduate credit.

**MID ED 4990 Practicum II: Middle Level Education Site Based Experience: 12 semester hours**

Prerequisites: Grade of C or higher in MID ED 4989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur in grades 6-8 school settings in the subject area of certification. Not available for graduate credit.

## Military and Veterans Studies

### Courses

**MVS 1100 Veterans Transition Seminar: 1 semester hour**

This course is designed for the student veteran who is new to UMSL but not eligible for the First Year Experience class. It will survey essential life skills (time management, financial management, physical fitness) and tools for academic success (note-taking, writing, research, oral presentation). It will familiarize students with the relationship between their education and their career and personal goals. It will also expose students to campus and veteran-specific support services. Maybe most importantly, this course will provide a venue for veterans to connect with other veterans who are facing a similar transition.

**MVS 2000 Selected Topics in Military or Veterans Studies: 1-3 semester hours**

Selected topics in military or veterans studies. The topics will vary each semester. May be taken more than once for credit as long as the topic differs.

**MVS 2100 Veterans in America: 3 semester hours**

Prerequisite: ENGL 1100, ENGL 1110 or HONORS 1100. With a focus on the American veteran experience, this survey course will explore basic concepts, ideas and research into veterans and veteran institutions. In a multidisciplinary manner, we will examine military culture, the unique status of veterans in our society, and veteran institutions. We will study the successes, challenges and obligations our society faces related to its veteran community.

**MVS 2130 Gender and the Military: 3 semester hours**

Same As: GS 2130. This course investigates how the military treats gender difference, explores how military culture is defined, and how gender is a socially constructed concept. Topics include: What is military culture? What is gender? How do military culture and gender intersect? How does gender identity affect the military/soldiers? How prevalent are sexual assault and sexual harassment? How does this affect morale? How might it be eradicated? How do LGBTQ issues play out in military culture? How do disability and trauma shape the military experience? How does the military experience affect veterans' families? How are these issues being addressed globally?.

**MVS 3500 Internship in Veterans Studies: 1-3 semester hours**

Prerequisites: Junior Standing and consent of the department chair. Independent study involving regular on-site work with an appropriate public or private agency serving the veteran community. A written report reflecting on the experience is required. Course may be repeated for a maximum of 6 credit hours.

**MVS 4100 Veterans Studies Capstone Seminar: 3 semester hours**

Prerequisites: MVS 2100 and senior standing. Mentored by a faculty member, students in this course will apply insights gained from previous coursework into a substantial Veterans Studies project. Students will work with the instructor and the class to develop a topic, establish a research or project plan, then prepare a project or paper suitable for presentation to the public. Students should expect that their work will be published or presented at an end-of-the-year symposium. This is not an independent study.

**MVS 4200 Independent Study in Military and Veterans Issues: 1-3 semester hours**

Prerequisite: Consent of instructor. Faculty mentored, independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Independent Study.

Prerequisite: Consent of instructor. Faculty mentored, independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Independent Study.

## Military Science

### Courses

**MIL SCI 1101 Introduction to Leadership I: 3 semester hours**

Examine the challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental/physical resiliency, and stress management relate to leadership, officership, and the Army profession. Enrollment in MIL SCI 1101 does not require a commitment to join the US Army, (FALL ONLY).

**MIL SCI 1102 Introduction To Leadership II: 3 semester hours**

Investigate leadership fundamentals such as problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. You will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. Learn fundamental military concepts and explore the Army's leadership philosophy. Enrollment in MIL SCI 1102 does not require a commitment to join the US Army. (SPRING ONLY).

**MIL SCI 1500 Leadership Laboratory: 0 semester hours**

Prerequisites: Must be currently enrolled in a MIL SCI course. Leadership Laboratory provides basic and advanced leadership experience in military courtesy, drill and ceremonies and practical application of classroom-taught subjects. Functions and responsibilities of leadership positions are developed through student-led staff planning actions and command positions. This course normally meets at Washington University. Note: All military science scholarship and advanced course students must register for MIL SCI 1500.

**MIL SCI 2201 Innovative Team Leadership: 3 semester hours**

Explore the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. The focus continues to build on developing knowledge of leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation and squad tactics. Enrollment in MIL SCI 2201 does not require a commitment to join the US Army. (FALL ONLY).

**MIL SCI 2202 Foundations of Tactical Leadership: 3 semester hours**

Develop greater self-awareness as you assess your own leadership styles and practice communication and team building skills. Examine the challenges of leading teams in the complex operational environment. Study dimensions of terrain analysis, patrolling, and operation orders. Explores the dynamics of adaptive leadership in the context of military operations. Enrollment in MIL SCI 2202 does not require a commitment to join the US Army. (SPRING ONLY).

**MIL SCI 3301 Adaptive Team Leadership: 3 semester hours**

Prerequisites: Successful completion of MIL SCI 1101 through 2202; OR attendance at the Leader's Training Course (LTC); OR member of US Army Reserve or National Guard Unit. This is an academically challenging course where you will study, practice, and apply the fundamentals of Army leadership, officership, Army values and ethics, and small unit tactics. At the conclusion of this course you will be capable of planning, coordinating, navigating, motivating and leading a team or squad in the execution of a tactical mission during a classroom practical exercise (PE), a leadership lab, or during a situational training exercise (STX) in a field environment. (FALL ONLY).

**MIL SCI 3302 Applied Team Leadership: 3 semester hours**

Prerequisites: MIL SCI 3301. Continue to learn and apply the fundamentals of Army leadership, officership, Army values and ethics as you hone your leadership abilities in a variety of tactical environments and the classroom. Successful completion of this course will help prepare you for success at the ROTC Leader Development and Assessment Course (LDAC) which you will attend the summer following this course at Fort Lewis, WA. You will receive systematic and specific feedback on your leadership attributes, values and core leader competencies from your instructors, other ROTC cadre, and senior cadets. (SPRING ONLY).

**MIL SCI 4401 Adaptive Leadership: 3 semester hours**

Prerequisites: Successful completion of the ROTC Leadership Development and Assessment Course (LDAC). This course focuses on practical application of adaptive leadership. Throughout the semester, students will attend weekly training meetings and fill the roles of Army staff officers. They will plan, execute and assess ROTC training and recruiting events. Study will also focus on the Army values, leader ethics and how they are applied in the Full Spectrum Operating Environment. The officer's role in the Uniform Code of Military Justice, counseling of subordinates, administrative actions and other aspects of everyday military life will also be discussed. (FALL ONLY).

**MIL SCI 4402 Leaders In A Complex World: 3 semester hours**

Prerequisites: MIL SCI 4401. Explore the dynamics of leading in the complex situation of current military operations in the contemporary operating environment. Examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. You will also explore aspects of interacting with non-government organizations, civilians on the battlefield and host nation support. Significant emphasis is placed on preparing you for your branch school and first unit of assignment. (SPRING ONLY).

**MIL SCI 4411 Advanced Military Science Studies I: 3 semester hours**

Prerequisites: MIL SCI 4401 or permission of instructor. An in-depth study of the role of the Army officer in today's Army.

**MIL SCI 4412 Advanced Military Science Studies II: 3 semester hours**

Prerequisites: MIL SCI 4401 or permission of instructor. A study of how the Army officer develops the leadership traits necessary to lead soldier's into battle.

**MIL SCI 4413 Military Medical Technologies Independent Study: 3 semester hours**

This course explores how medical advances have improved soldiers' chances of surviving battlefield injuries from the Civil War to the Iraq War. Also explores how soldiers are now surviving more catastrophic injuries and what the implications are on long term health care for these soldiers both physically and mentally.

## Music Education

### Courses

**MUS ED 3570 Curriculum And Methods Of Teaching Elementary School Music: 3 semester hours**

Prerequisites: THRY COM 2311 and THRY COM 2312 and Level I Education courses for the music education major. A study of the elementary school music curriculum emphasizing the objectives, methods of teaching and staffing music classes, and analysis of instructional materials and resources. This course must be completed in residence.

**MUS ED 3680 Curriculum And Methods Of Teaching Instrumental Music I: 2 semester hours**

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 2510, PRACTM 2610, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A study of the teaching techniques, materials, curriculum, and organization of the beginning instrumental music education program. Topics include student recruitment, the elementary band/orchestra, small group instruction, jazz ensemble, and marching band. This course must be completed in residence. Concurrent enrollment in MUS ED 3570 is required.

**MUS ED 3690 Curriculum and Methods of Secondary General Music: 2 semester hours**

Prerequisites: THRY COM 2311, THRY COM 2312, MUS ED 3570 and Level I Education courses. A study of the middle school/ junior high and high school general music program emphasizing a conceptually based curriculum: objectives, methodologies, materials, innovations, classroom organization and management. This course must be completed in residence.

**MUS ED 3700 Curriculum And Methods Of Teaching Instrumental Music II: 2 semester hours**

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 3521, MUS ED 3570, MUS ED 3680, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A continuation of MUS ED 3680. Topics include large group rehearsal techniques, program development, administrative procedures, and evaluation. This course must be completed in residence.

**MUS ED 3710 Curriculum And Methods Of Teaching Secondary Choral Music: 2 semester hours**

Prerequisites: THRY COM 2311, THRY COM 2312, MUS ED 3570. Level I Education courses. A study of the secondary school choral music program: curriculum, methods teaching techniques, organization, and administrative procedures for choral performance classes. This course must be completed in residence. Limited to music education majors.

**MUS ED 3770 An Introduction To Music For The Elementary School Teacher: 3 semester hours**

Prerequisite: None. An introduction to the elements of music and the expressive nature of music. Includes application of fundamentals to appropriate literature and activities for use with children in a classroom setting. This course will not apply toward requirements for a music major.

**MUS ED 4010 Marching Band Techniques: 3 semester hours**

Prerequisites: Junior standing or better. Techniques for organizing and training school marching bands. Content will include planning and charting shows, rehearsal problems, corps and traditional styles, and auxiliary units.

**MUS ED 4060 Advanced Workshop In Music Education: 1-5 semester hours**

Prerequisites: Junior standing and consent of instructor. An intensive variable-topic workshop in Music Education presenting knowledge and skills to supplement specific areas in existing courses.

**MUS ED 5060 Graduate Workshop in Music Education: 1-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Intensive workshop in Music Education. Variable topics. To gain skills and knowledge in specific areas not readily available in existing courses.

**MUS ED 5510 Graduate Instrumental Methods: 3 semester hours**

Prerequisites: Graduate standing in music. Development of objectives for instrumental programs and methods of achieving those objectives. Comprehensive musicianship through instrumental performance, analysis of instrumental literature, instrumental philosophies and methodologies, rehearsal organization, and recent research in instrumental music education will be discussed.

**MUS ED 5610 Graduate Choral Methods: 3 semester hours**

Prerequisites: Graduate standing in music. Development of objectives for choral programs and methods of achieving those objectives. Comprehensive musicianship through choral performance, analysis of choral literature, the changing voice, choral philosophies and methodologies, rehearsal organization, and recent research in choral music education will be discussed.

**MUS ED 5620 Guitar in the Classroom: 3 semester hours**

Prerequisites: Graduate Standing in Music. A study of guitar instruction in grades 5-12 with a focus on curricular sequence that includes chords, strums and picking patterns essential for song accompaniment skill development. Current materials, suitable for upper elementary and secondary students will be explored.

**MUS ED 5710 General Music: A Model For Multi-Faceted Learning: 3 semester hours**

Prerequisite: Graduate standing in music. An exploration of the general music class as a learning laboratory model designed to actively engage the learner in a series of comprehensive music learning experiences. Emphasizes techniques and materials that will motivate the "non-performance oriented" student.

**MUS ED 5750 Computer Applications in Music Education: 3 semester hours**

Prerequisites: Graduate standing in Music. An examination of the potential of computers in the music education field. Experiences with available hardware and software suitable for applications that include inventory, budget, music library cataloging, digital music synthesis, digital music recording and editing, music-related graphics and basic animation with music soundtracks.

**MUS ED 5760 Multimedia in Music Education: 3 semester hours**

Prerequisites: Graduate standing in Music. The development and use of interactive instructional multi-media materials for K-12 or collegiate settings. Platforms used will include presentation software and interactive whiteboard software/hardware.

**MUS ED 5770 Music Notation Software for Music Educators: 3 semester hours**

Prerequisite: Graduate standing in music. The in-depth study of a complex music notation program. The course will include various modes of notation entry, playback, music formatting and printing, MIDI-related and graphic-related functions, and the creation of music performance accompaniment and assessment files.

**MUS ED 5800 Musical Acoustics: 3 semester hours**

Prerequisite: Graduate standing in music. The acoustical properties of the human voice, acoustic and electronic musical instruments, rehearsal rooms and performance spaces. Applications for musicians/teachers in the choice, design and acoustical treatment of rehearsal/performance space, requirements and techniques for quality music recordings and the use of acoustic principles in the design of original classroom musical instruments.

**MUS ED 5810 Foundations Of Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A study of the historical, philosophical, and psychological foundations of music education, includes principles necessary for development, implementation, and evaluation of total school music program.

**MUS ED 5830 Contemporary Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A study of recent trends and issues in music education.

**MUS ED 5840 Teaching Music in an Urban Setting: 3 semester hours**

Prerequisite: Graduate standing in music. An analysis of current practices, problems, trends, and research involved in developing strategies for the improvement of music programs in inner-city schools.

**MUS ED 5910 Music Education Research: 3 semester hours**

Prerequisite: Graduate standing in music. Applications of various approaches in defining and analyzing research problems in music education. Historical, experimental, descriptive, and philosophical research will be included.

**MUS ED 5920 Psychology Of Music: 3 semester hours**

Prerequisite: MUS ED 5810 and MUS ED 5910. Identify and discuss important trends within the field of psychology of music focusing specifically on applying Cognitive Psychology to music learning, perception, and performance.

**MUS ED 5950 Special Problems In Music Education: 1-3 semester hours**

Prerequisite: Graduate Standing In Music. Selected Problems To Meet The Needs Of the Individual Student.

**MUS ED 5990 Master's Project In Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A project utilizing historical, experimental, philosophical, descriptive, or analytical research techniques. The project will include a written report.

## Courses

**MUS ED 3570 Curriculum And Methods Of Teaching Elementary School Music: 3 semester hours**

Prerequisites: THRY COM 2311 and THRY COM 2312 and Level I Education courses for the music education major. A study of the elementary school music curriculum emphasizing the objectives, methods of teaching and staffing music classes, and analysis of instructional materials and resources. This course must be completed in residence.

**MUS ED 3680 Curriculum And Methods Of Teaching Instrumental Music I: 2 semester hours**

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 2510, PRACTM 2610, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A study of the teaching techniques, materials, curriculum, and organization of the beginning instrumental music education program. Topics include student recruitment, the elementary band/orchestra, small group instruction, jazz ensemble, and marching band. This course must be completed in residence. Concurrent enrollment in MUS ED 3570 is required.

**MUS ED 3690 Curriculum and Methods of Secondary General Music: 2 semester hours**

**MUS ED 5060 Graduate Workshop in Music Education: 1-5 semester hours**

Prerequisites: Graduate standing and consent of instructor. Intensive workshop in Music Education. Variable topics. To gain skills and knowledge in specific areas not readily available in existing courses.

**MUS ED 5510 Graduate Instrumental Methods: 3 semester hours**

Prerequisites: Graduate standing in music. Development of objectives for instrumental programs and methods of achieving those objectives. Comprehensive musicianship through instrumental performance, analysis of instrumental literature, instrumental philosophies and methodologies, rehearsal organization, and recent research in instrumental music education will be discussed.

**MUS ED 5610 Graduate Choral Methods: 3 semester hours**

Prerequisites: Graduate standing in music. Development of objectives for choral programs and methods of achieving those objectives. Comprehensive musicianship through choral performance, analysis of choral literature, the changing voice, choral philosophies and methodologies, rehearsal organization, and recent research in choral music education will be discussed.

**MUS ED 5620 Guitar in the Classroom: 3 semester hours**

Prerequisites: Graduate Standing in Music. A study of guitar instruction in grades 5-12 with a focus on curricular sequence that includes chords, strums and picking patterns essential for song accompaniment skill development. Current materials, suitable for upper elementary and secondary students will be explored.

**MUS ED 5710 General Music: A Model For Multi-Faceted Learning: 3 semester hours**

Prerequisite: Graduate standing in music. An exploration of the general music class as a learning laboratory model designed to actively engage the learner in a series of comprehensive music learning experiences. Emphasizes techniques and materials that will motivate the "non-performance oriented" student.

**MUS ED 5750 Computer Applications in Music Education: 3 semester hours**

Prerequisites: Graduate standing in Music. An examination of the potential of computers in the music education field. Experiences with available hardware and software suitable for applications that include inventory, budget, music library cataloging, digital music synthesis, digital music recording and editing, music-related graphics and basic animation with music soundtracks.

**MUS ED 5760 Multimedia in Music Education: 3 semester hours**

Prerequisites: Graduate standing in Music. The development and use of interactive instructional multi-media materials for K-12 or collegiate settings. Platforms used will include presentation software and interactive whiteboard software/hardware.

**MUS ED 5770 Music Notation Software for Music Educators: 3 semester hours**

Prerequisite: Graduate standing in music. The in-depth study of a complex music notation program. The course will include various modes of notation entry, playback, music formatting and printing, MIDI-related and graphic-related functions, and the creation of music performance accompaniment and assessment files.

**MUS ED 5800 Musical Acoustics: 3 semester hours**

Prerequisite: Graduate standing in music The acoustical properties of the human voice, acoustic and electronic musical instruments, rehearsal rooms and performance spaces. Applications for musicians/teachers in the choice, design and acoustical treatment of rehearsal/performance space, requirements and techniques for quality music recordings and the use of acoustic principles in the design of original classroom musical instruments.

**MUS ED 5810 Foundations Of Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A study of the historical, philosophical, and psychological foundations of music education, includes principles necessary for development, implementation, and evaluation of total school music program.

**MUS ED 5830 Contemporary Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A study of recent trends and issues in music education.

**MUS ED 5840 Teaching Music in an Urban Setting: 3 semester hours**

Prerequisite: Graduate standing in music. An analysis of current practices, problems, trends, and research involved in developing strategies for the improvement of music programs in inner-city schools.

**MUS ED 5910 Music Education Research: 3 semester hours**

Prerequisite: Graduate standing in music. Applications of various approaches in defining and analyzing research problems in music education. Historical, experimental, descriptive, and philosophical research will be included.

**MUS ED 5920 Psychology Of Music: 3 semester hours**

Prerequisite: MUS ED 5810 and MUS ED 5910. Identify and discuss important trends within the field of psychology of music focusing specifically on applying Cognitive Psychology to music learning, perception, and performance.

**MUS ED 5950 Special Problems In Music Education: 1-3 semester hours**

Prerequisite: Graduate Standing In Music. Selected Problems To Meet The Needs Of the Individual Student.

**MUS ED 5990 Master's Project In Music Education: 3 semester hours**

Prerequisite: Graduate standing in music. A project utilizing historical, experimental, philosophical, descriptive, or analytical research techniques. The project will include a written report.

## Music History

### Courses

**M H L T 1001 Introduction To Music: 3 semester hours**

An historically oriented study of art music, its styles and forms from the Baroque period to the present day. This course will not apply toward requirements for a music major.

**M H L T 1010 History Of Western Music I: 3 semester hours**

Prerequisite: THRY COM 1301/ THRY COM 1302 or consent of department. A general survey of the history of western music. Includes the evolution and development of styles, forms and their social setting. This course meets the General Education requirement for Humanities and Fine Arts Knowledge and Valuing Skills.

**M H L T 1020 History Of Western Music II: 3 semester hours**

Prerequisite: THRY COM 1301/THRY COM 1302 or consent of department. A continuation of M H L T 1010. This course meets the General Education requirements for the Humanities and Fine Arts Knowledge and Valuing Skills.

**M H L T 1060 Introduction To African-American Music: 3 semester hours**

This course will survey African-American musical heritage from its African origins through its role and development in twentieth century American Society. All genres will be discussed, including African-American composers who wrote in the European tradition. This course will not apply toward requirements for music major or minor.

**M H L T 1070 Introduction To Jazz: 3 semester hours**

A survey course which examines the musical, historical and social aspects of the subject. This course will not count toward requirements for a music major.

**M H L T 1080 Introduction To Irish Traditional Music: 3 semester hours**

Will survey the rich tapestry of Irish traditional music, song and dance. Particular attention will be given to the cultural history of the traditional music maker in Irish society, as well as among the constituent communities of the Irish diaspora in Europe and North America. Will introduce students to the instruments, performance settings and regional styles of Irish traditional music. Using field recordings and archive materials collected in Ireland and North America, will focus on celebrated folk performers of the past and present, and evaluate the impact of contemporary media on their ancient, yet evolving, musical genre. No prior experience of Irish traditional music is necessary to pursue this course.

**M H L T 1090 Non-Western Music I: 3 semester hours**

The music of Oceania; folk and classical music and dance of East Asia, Tibet and Southeast Asia, the influence of Buddhism, Islam and western acculturation on the functions of music in these societies.

**M H L T 1120 The American Musical Film: 3 semester hours**

This course is a survey of the American film genre. Emphasis on themes, conventions, audience relationships, cultural values, and the synthesis of film form, music and dance. Examination of films such as Top Hat, West Side Story, Chicago, An American in Paris.

**M H L T 1130 Introduction to Music Theatre: 3 semester hours**

A study of music theatre as an art form emphasizing the contributions of the playwright, composer, lyricist, actor, musician, dancer, choreographer, director, designer, and technicians. Major stylistic periods and dramatic forms will be covered. Students will learn about how music theatre functions as an art and an industry in today's world. Attendance at live theatrical performances and/or rehearsals will be required.

**M H L T 1140 Popular Music in America: 3 semester hours**

This course is designed as a survey of major genres of American popular music - Tin Pan Alley, musical theater, ragtime, blues, early and more popular phases of jazz, country, rock, pop, hip-hop, rap, etc. Included will be a broad spectrum of cultural and historical contexts, insight into the development of the music industry, study of significant artists, and understandings of the formal and stylistic components of the music.

**M H L T 1150 Drumming Cultures of the World: 3 semester hours**

Drumming is one of the oldest forms of expression in the world and is prevalent on every continent. This course is designed as a survey of drumming throughout the world and the significance to the cultures therein. Included will be a broad spectrum of cultural and historical contexts, performance practices and hands on instruction. The major focus in this course will be the drumming practices of Africa, Asia, South America and the Caribbean. This course satisfies the cultural diversity requirement for the University.

**M H L T 1160 Musical Journey through Latin America: 3 semester hours**

Explore the diversity of this contagious music of the past and present, from the tango of Argentina, to salsa and meringue of the Caribbean, and from huayno of Amerindian cultures, to the marimba of Middle Latin America! This introduction to musical cultures of Latin America reveals the rich and wide range of musical forms, instruments, and styles that has influenced music on almost all parts of the globe today.

**M H L T 1170 Musical Journey through the Far East: 3 semester hours**

This class will explore the musical traditions and instruments of the countries of East Asia - China, Japan, and Korea. Much of the legendary founding of music and musical instruments originated on the Asian continent and transplanted along the Silk Road (trade routes from India, Persia and the Mediterranean) to the Far East. We will examine some of the world's most amazing sounds of the Orient.

**M H L T 1180 Musical Journal Through Africa: 3 semester hours**

This introduction to musical cultures of Africa provides a snapshot of African music south of the Sahara, or sub-Saharan Africa. We will explore the extraordinary rich and diverse musical traditions through the sounds and rhythms of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments from Africa.

**M H L T 1190 Musical Journey of the Native North American: 3 semester hours**

This introduction to musical cultures of the Native American provides a snapshot of the aboriginal and modern day Native American in North America. We will explore the extraordinary rich and diverse musical traditions through the sounds and cultural practices of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments of the Native American.

**M H L T 4000 Directed Studies: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**M H L T 4220 Music Of The Renaissance: 3 semester hours**

Prerequisite: M H L T 1010 or consent of department. A study of the theoretical and practical impact of humanism on music, musicians, and musical thought from 1450 to 1600. Sacred and secular music; the rise of an instrumental idiom.

**M H L T 4230 Music Of The Baroque: 3 semester hours**

Prerequisite: M H L T 1010 or consent of department. A detailed study of music from 1600 to 1750. The rise of the new style, national styles in the seventeenth century and the culmination of the Baroque period.

**M H L T 4240 Music Of The Classic Period: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A study of the growth of classical style; Galant and expressive styles; Mozart, Haydn and Beethoven.

**M H L T 4250 Music Of The Romantic Period: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. Composers, forms and styles in nineteenth century music. The literary and social background of musical romanticism.

**M H L T 4260 Music from 1900 to the Present: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A detailed study of trends in modern music and of influential composers; impressionism, serial composition, electronic music and other recent techniques.

**M H L T 4270 A History Of Byzantine Music And Hymnography: 3 semester hours**

Prerequisite: M H L T 1020 or consent of department. A study of the liturgical and secular music of the Byzantine Empire and post-Byzantine period during the Ottoman occupation; a historical investigation of the Oriental and Ancient Greek origins of the music along with an evolution of the types of music and poetical forms. A study of the types of notation and transcription analyses from the Medieval neumes into Western staff notation is included.

**M H L T 4280 American Music: 3 semester hours**

Prerequisites: M H L T 1010 or M H L T 1020 or consent of department.

A study of the history and literature of American music, its composers, performers and influences on American and world culture. Compositions studied include classical compositions from the colonial era through contemporary times as well as literature from the gospel, blues, jazz and popular music genres.

## Music: Pedagogy

### Courses

**PDGOGY 1250 Brass Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all brass instruments including trumpet, horn, trombone, euphonium, and tuba in the school setting.

**PDGOGY 1260 Woodwind Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all woodwind instruments including flute, clarinet, oboe, bassoon, and saxophone in the school setting.

**PDGOGY 1270 String Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all string instruments including violin, viola, cello, and bass in the school setting.

**PDGOGY 1280 Percussion Instrumental Techniques: 2 semester hours**

Prerequisites: Consent of the Department. The objective of this course is to familiarize students with materials and techniques for teaching all percussion instruments including snare drum, tom-tom, bass drum, cymbals, drumset, timpani, mallet instruments and miscellaneous percussion instruments in the school setting.

**PDGOGY 1560 Piano Pedagogy: 2 semester hours**

Prerequisite: Equivalent of AP MUS 1361 or permission of instructor. A study of methods, repertoire, and technical problems pertaining to private studio teaching for all levels of performance ability.

**PDGOGY 2220 Jazz Pedagogy: 3 semester hours**

Students will participate in interactive sessions that will "boost the jazz teaching chops" whether students are seasoned teachers or novices in the field of jazz education. A wide range of jazz teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles, and examine and perform jazz literature from different styles.

**PDGOGY 4000 Directed Study: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**PDGOGY 5110 Graduate Jazz Pedagogy: 3 semester hours**

Students will participate in interactive sessions that will dramatically strengthen jazz teaching strategies, introduce new jazz rehearsal techniques, and examine the best in jazz education literature and materials. A wide range of jazz-teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles and examine and perform jazz literature from different styles. The course is for students who are seasoned teachers or novices in the field of jazz education. Student will complete a research paper or a big band arrangement.

### Courses

## Music: Practicum

### Courses

**PRACTM 1140 Piano Proficiency I: 1 semester hour**

Prerequisite: Permission of department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1150 Piano Proficiency II: 1 semester hour**

Prerequisite: PRACTM 1140 or Consent of Department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1250 Singer's Diction: English, Italian And German: 1 semester hour**

Prerequisites: AP MUS 1459. A study of English, Italian and German pronunciation using the International Phonetic Alphabet.

**PRACTM 1260 Singer's Diction: Latin, French, And Spanish: 1 semester hour**

Prerequisites: AP MUS 1459. A study of Latin, French, and Spanish pronunciation using the International Phonetic Alphabet.

**PRACTM 1530 Accompanying I: 1 semester hour**

Prerequisite: Consent of department. Accompanying and ensemble practices, including rehearsal techniques, for keyboard majors. Public performance of works studied is required.

**PRACTM 1540 Accompanying II: 1 semester hour**

Prerequisite: Consent of department. A continuation of PRACTM 1530.

**PRACTM 1550 Accompanying III: 1 semester hour**

Prerequisite: Consent of Department. A continuation of PRACTM 1540.

**PRACTM 1570 Piano Performance Class: 2 semester hours**

Prerequisites: Two semesters of AP MUS 1450: Piano. This class allows for additional study of repertoire, giving students greater opportunities to perform and receive critiques from instructor, adjudicators, and peers. Course may be repeated for credit.

**PRACTM 2160 Piano Proficiency III: 1 semester hour**

Prerequisite: PRACTM 1150 or permission of department. Continuation of piano proficiency study.

**PRACTM 2170 Jazz Keyboard Harmony: 1 semester hour**

Prerequisite: Prerequisites: PRACTM 1150 or consent of dept. Group keyboard instruction in the application of chordal structures and harmonic functions commonly used in mainstream jazz performance.

**PRACTM 2180 Piano Proficiency IV: 1 semester hour**

Prerequisite: PRACTM 2160 or consent of department. Continuation of piano proficiency study.

**PRACTM 2190 Piano Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registrations in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2191 Brass Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2192 Woodwind Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2193 Rhythm Section Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2510 Conducting I: 2 semester hours**

Prerequisite: THRY COM 2301. Concurrent registration in PRACTM 2610 required for Bachelor of Music in Music Education program. Techniques and problems in conducting.

**PRACTM 2610 Instrumental Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Analysis and evaluation of selected instructional and concert materials for elementary, junior and senior high school groups.

**PRACTM 2611 Elementary School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Active conducting experience while analyzing and evaluating selected instructional and concert materials for elementary grades.

**PRACTM 3190 Piano Proficiency V: 1 semester hour**

Prerequisite: PRACTM 2180 or consent of department. Continuation of piano proficiency study.

**PRACTM 3280 Score Reading at the Keyboard: 1 semester hour**

Prerequisites: PRACTM 3190, or consent of department. Practical experience in the keyboard realization of figured bass and score reading with emphasis on C-clefs, transposition, and modulation.

**PRACTM 3290 Piano Proficiency VI: 1 semester hour**

Prerequisite: PRACTM 3190 or consent of department. Continuation of piano proficiency study.

**PRACTM 3521 Conducting II - Instrumental: 2 semester hours**

Prerequisite: PRACTM 2510. Advanced study of instrumental conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3522 Conducting II - Choral: 2 semester hours**

Prerequisite: PRACTM 2510. Concurrent registration in PRACTM 3620 required for Bachelor of Music in Music Education program. Advanced study of choral conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3621 Junior-Senior High School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312. Analysis and evaluation of selected instructional and concert materials for junior and senior high school performance groups.

**PRACTM 3920 Senior Research: 2-4 semester hours**

Prerequisite: Consent of department. Required of all senior music majors. Directed readings and research in an area mutually acceptable to the student and instructor.

**PRACTM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of department. Directed independent study of selected topics in music. May be repeated, if topic is substantially different, but no more than 5 hours may be applied toward a degree.

**PRACTM 4100 Senior Project in Theory/Composition: 2-4 semester hours**

Prerequisites: Consent of department. Required of all students in the BM in Theory/Composition program. This project could take any number of forms, dependent upon mutual agreement between student and instructor. For example, a student with a focus in music theory would write a thesis of substantial depth on a theoretical/analytical topic, and a student with a focus in composition would either write a large-scale work (for orchestra, wind ensemble, etc.) or prepare and lead a recital of several of his or her own compositions.

**PRACTM 4920 Internship: 1-3 semester hours**

Prerequisite: Senior standing in B.M. Business emphasis and permission of the instructor. Supervised experience in the area of the student's career objective, as music or instrument merchandising, arts management, mass communication, publishing, manufacturing or other, as available. May be repeated once for credit in different area.

**PRACTM 5020 Choral Literature: 3 semester hours**

Prerequisite: Graduate standing in music. Study of choral literature appropriate for ensembles from elementary to senior high school. Criteria for evaluating choral literature will be developed and pedagogical implications of choral music as a means of developing comprehensive musicianship will be discussed.

**PRACTM 5035 Instrumental Literature: 3 semester hours**

Prerequisite: Graduate standing. Music Study of literature appropriate for soloists and ensembles for elementary to senior high school band, orchestra, and jazz ensemble. Criteria for evaluating the literature will be developed and related technical problems will be studied.

**PRACTM 5210 Graduate Conducting: 3 semester hours**

Prerequisites: Graduate standing in music Conducting techniques, score reading, and interpretation of choral, orchestral, and band literature.

## Courses

**PRACTM 1140 Piano Proficiency I: 1 semester hour**

Prerequisite: Permission of department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1150 Piano Proficiency II: 1 semester hour**

Prerequisite: PRACTM 1140 or Consent of Department. Group instruction for music majors who do not meet beginning keyboard requirements.

**PRACTM 1250 Singer's Diction: English, Italian And German: 1 semester hour**

Prerequisites: AP MUS 1459. A study of English, Italian and German pronunciation using the International Phonetic Alphabet.

**PRACTM 1260 Singer's Diction: Latin, French, And Spanish: 1 semester hour**

Prerequisites: AP MUS 1459. A study of Latin, French, and Spanish pronunciation using the International Phonetic Alphabet.

**PRACTM 1530 Accompanying I: 1 semester hour**

Prerequisite: Consent of department. Accompanying and ensemble practices, including rehearsal techniques, for keyboard majors. Public performance of works studied is required.

**PRACTM 1540 Accompanying II: 1 semester hour**

Prerequisite: Consent of department. A continuation of PRACTM 1530.

**PRACTM 1550 Accompanying III: 1 semester hour**

Prerequisite: Consent of Department. A continuation of PRACTM 1540.

**PRACTM 1570 Piano Performance Class: 2 semester hours**

Prerequisites: Two semesters of AP MUS 1450: Piano. This class allows for additional study of repertoire, giving students greater opportunities to perform and receive critiques from instructor, adjudicators, and peers. Course may be repeated for credit.

**PRACTM 2160 Piano Proficiency III: 1 semester hour**

Prerequisite: PRACTM 1150 or permission of department. Continuation of piano proficiency study.

**PRACTM 2170 Jazz Keyboard Harmony: 1 semester hour**

Prerequisite: Prerequisites: PRACTM 1150 or consent of dept. Group keyboard instruction in the application of chordal structures and harmonic functions commonly used in mainstream jazz performance.

**PRACTM 2180 Piano Proficiency IV: 1 semester hour**

Prerequisite: PRACTM 2160 or consent of department. Continuation of piano proficiency study.

**PRACTM 2190 Piano Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registrations in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2191 Brass Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2192 Woodwind Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2193 Rhythm Section Jazz: 1 semester hour**

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

**PRACTM 2510 Conducting I: 2 semester hours**

Prerequisite: THRY COM 2301. Concurrent registration in PRACTM 2610 required for Bachelor of Music in Music Education program. Techniques and problems in conducting.

**PRACTM 2610 Instrumental Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Analysis and evaluation of selected instructional and concert materials for elementary, junior and senior high school groups.

**PRACTM 2611 Elementary School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2301 and THRY COM 2302. Active conducting experience while analyzing and evaluating selected instructional and concert materials for elementary grades.

**PRACTM 3190 Piano Proficiency V: 1 semester hour**

Prerequisite: PRACTM 2180 or consent of department. Continuation of piano proficiency study.

**PRACTM 3280 Score Reading at the Keyboard: 1 semester hour**

Prerequisites: PRACTM 3190, or consent of department. Practical experience in the keyboard realization of figured bass and score reading with emphasis on C-clefs, transposition, and modulation.

**PRACTM 3290 Piano Proficiency VI: 1 semester hour**

Prerequisite: PRACTM 3190 or consent of department. Continuation of piano proficiency study.

**PRACTM 3521 Conducting II - Instrumental: 2 semester hours**

Prerequisite: PRACTM 2510. Advanced study of instrumental conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3522 Conducting II - Choral: 2 semester hours**

Prerequisite: PRACTM 2510. Concurrent registration in PRACTM 3620 required for Bachelor of Music in Music Education program. Advanced study of choral conducting and rehearsal techniques, score reading and interpretation.

**PRACTM 3621 Junior-Senior High School Choral Literature Laboratory: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312. Analysis and evaluation of selected instructional and concert materials for junior and senior high school performance groups.

**PRACTM 3920 Senior Research: 2-4 semester hours**

Prerequisite: Consent of department. Required of all senior music majors. Directed readings and research in an area mutually acceptable to the student and instructor.

**PRACTM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of department. Directed independent study of selected topics in music. May be repeated, if topic is substantially different, but no more than 5 hours may be applied toward a degree.

**PRACTM 4100 Senior Project in Theory/Composition: 2-4 semester hours**

Prerequisites: Consent of department. Required of all students in the BM in Theory/Composition program. This project could take any number of forms, dependent upon mutual agreement between student and instructor. For example, a student with a focus in music theory would write a thesis of substantial depth on a theoretical/analytical topic, and a student with a focus in composition would either write a large-scale work (for orchestra, wind ensemble, etc.) or prepare and lead a recital of several of his or her own compositions.

**PRACTM 4920 Internship: 1-3 semester hours**

Prerequisite: Senior standing in B.M. Business emphasis and permission of the instructor. Supervised experience in the area of the student's career objective, as music or instrument merchandising, arts management, mass communication, publishing, manufacturing or other, as available. May be repeated once for credit in different area.

**PRACTM 5020 Choral Literature: 3 semester hours**

Prerequisite: Graduate standing in music. Study of choral literature appropriate for ensembles from elementary to senior high school. Criteria for evaluating choral literature will be developed and pedagogical implications of choral music as a means of developing comprehensive musicianship will be discussed.

**PRACTM 5035 Instrumental Literature: 3 semester hours**

Prerequisite: Graduate standing. Music Study of literature appropriate for soloists and ensembles for elementary to senior high school band, orchestra, and jazz ensemble. Criteria for evaluating the literature will be developed and related technical problems will be studied.

**PRACTM 5210 Graduate Conducting: 3 semester hours**

Prerequisites: Graduate standing in music Conducting techniques, score reading, and interpretation of choral, orchestral, and band literature.

## Nursing

### Courses

**NURSE 1010 Orientation To Nursing: 0 semester hours**

Prerequisites: Admission to four-year baccalaureate program. This mandatory eight-week introduction to the nursing program provides a comprehensive orientation to the program. Students are introduced to the academic and clinical expectations of the curriculum. Concerns critical for academic success (i.e., time management, effective study skills, stress management and dealing with test anxiety) are addressed.

**NURSE 2101 Introduction to Nursing: 2 semester hours**

This course introduces the historical and theoretical development of nursing as a discipline. Nursing is examined as a dynamic practice profession. Variables that influence nursing and health care are discussed. Concepts and skills introduced in this course guide the student's educational experience within the nursing major.

**NURSE 2103 Nutrition And Health: 3 semester hours**

This course examines nutritional needs throughout the life span with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients and cultural and economic influences on dietary practices.

***NURSE 2105 Communication In The Nursing Profession: 3 semester hours***

This course focuses on the development of communication abilities utilized in professional nursing. The individual's relationship with self, others and groups is discussed. Students learn verbal and non-verbal communication skills, self-awareness, and sensitivity to others. Interpersonal skills are introduced to enable the student to develop effective human caring relationships with a diverse population of clients and colleagues.

***NURSE 3101 Nursing And Health: 6 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; CHEM 1052; NURSE 1010, NURSE 3106; NURSE 3110; NURSE 3111. An introduction to the discipline of nursing, the historical and theoretical development of nursing is explored with an emphasis on critical thinking, the teaching/learning process, and foundational practice concepts. Through modular laboratory experiences, the student acquires psychomotor skills to provide safe and effective nursing care to clients promoting health and wellness. Includes classroom, laboratory and clinical experiences.

***NURSE 3106 Assessment Of Clients In Health And Illness: 4 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; BIOL 1162; CHEM 1052; PSYCH 1268; NURSE 1010. This course integrates theoretical knowledge and interpersonal skills in the assessment of clients, focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking and cultural competency in identifying multidimensional health variations across the life span. The course includes classroom and laboratory experiences.

***NURSE 3110 Pathophysiological Bases Of Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1131, BIOL 1141, BIOL 1162, CHEM 1052 (or equivalent); NURSE 1010. This course focuses on the nature of disease, its causes and the bodily changes that accompany it. The course includes a study of general principles of disease, specific diseases of individual organs and systems and the clinical implications.

***NURSE 3111 Pharmacotherapeutics In Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1141, BIOL 1162, CHEM 1052, NURSE 1010; pre/co requisite: NURSE 3110. This course introduces key terminology, legal foundations, general principles and clinical applications of pharmacology.

***NURSE 3120 Foundations of Nursing: 7 semester hours***

Prerequisites: All general education requirements and accelerated nursing option prerequisite non-nursing courses. This course introduces the student to the theoretical concepts and foundations of professional nursing practice. Utilizing an integrated approach, health promotion and protection throughout the lifespan are explored and supported using theories of nursing practice, health assessment of well individuals, and general principles and concepts of pharmacology and critical thinking.

***NURSE 3121 Clinical Foundations of Nursing: 3 semester hours***

Prerequisites: NURSE 3120. This course assists in the development and application of clinical reasoning in the lab, clinical agency, and simulation environments. Through clinical learning experiences, the student acquires basic psychomotor, communication, and medication administration skills. The student applies these skills in the provision of safe and effective nursing care to clients while promoting health, wellness, and clinical reasoning.

***NURSE 3205 Adult Health Nursing I: 5 semester hours***

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to immune responses, problems of oxygenation: ventilation, transport and perfusion: kidney function; regulatory mechanisms and digestion absorption and elimination. emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

***NURSE 3206 Adult Health Nursing II: 5 semester hours***

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

***NURSE 3214 Psychiatric Mental Health Nursing: 4 semester hours***

Prerequisites: All 3100-level nursing courses; PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic emotional and psychosocial difficulties and psychiatric illnesses. The course emphasizes development of students' decisional capabilities, self-awareness and professional behaviors as they utilize theory and research from nursing, psychology and related disciplines for the provision of nursing care to individuals, families, & groups. Clinical experiences in community and acute care settings are designed for students to engage in individual and group strategies that promote and maintain mental health. Course includes classroom and clinical activities in a variety of settings.

***NURSE 3215 Nursing Of Women And Childbearing Families: 4 semester hours***

Prerequisites: All 3100 level nursing courses, PSYCH 1268. Focuses on the childbearing family and women's reproductive health, including family dynamics and growth and development. Health promotion, protection, maintenance and restoration are covered in experiences that include hospital and community settings. Health care policy and systems as relevant to these populations are included. Course includes classroom and clinical activities in a variety of settings.

***NURSE 3216 Child And Family Health Nursing: 4 semester hours***

Prerequisites: All 3100 level nursing courses, PSYCH 1268. This course focuses on pediatric health and illness with emphasis on family dynamics, growth and development and communication with children and their families. Health promotion, protection, restoration, maintenance and support concepts are covered in experiences that include hospital and community settings. Health care policy and systems are studied as relevant to this population. Course includes classroom and clinical activities in a variety of settings.

***NURSE 3324 Sociology Of The Family: 3 semester hours***

Same as SOC 3224. Prerequisite: SOC 1010 or consent of instructor. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include: love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure.

**NURSE 3330 Nursing of Adults I: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing health problems affecting body regulatory mechanisms. These mechanisms are related to perioperative processes, immune processes, problems of oxygenation, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system and genetics, oncology and hematology problems. This course also incorporates relevant concepts of pharmacology and pathophysiology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support as well as the continued development of the nurse-client relationship, clinical reasoning, and evidence-based nursing practice across the adult life span.

**NURSE 3331 Clinical Nursing of Adults I: 3 semester hours**

Prerequisites: NURSE 3330. This course focuses on the nursing care of adults in the lab, clinical agency, and simulation environments. Utilizing an integrated approach, advanced nursing skills and assessment techniques for adult clients are mastered in perioperative processes, immune processes, problems of oxygenation, hematology, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system, genetics and oncology problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients across the health/illness continuum.

**NURSE 3340 Behavioral Health Nursing: 2.5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic psychosocial and behavioral health issues and specific psychiatric illnesses. An emphasis is placed on the nurse/client relationship in behavioral health promotion, restoration, maintenance and support.

**NURSE 3341 Clinical Behavioral Health Nursing: 1.5 semester hour**

Prerequisites: NURSE 3340. In this course students utilize theory and evidence from nursing and related disciplines in the provision of nursing care to individuals, families, and groups with psychiatric and behavioral health problems. Clinical experiences in community and acute care settings are designed so that students can engage in individual and group strategies that promote and maintain mental health.

**NURSE 3350 Nursing of Adults II: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3351 Clinical Nursing of Adults II: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3360 Maternal-Child Nursing: 5 semester hours**

Prerequisites: PSYCH 1268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3799 Quantitative Analysis In The Health Sciences: 3 semester hours**

Prerequisites: MATH 1030 or equivalent. This course focuses on concepts and applications of statistics in the health sciences. Topics include descriptive and inferential statistics, probability distributions of random variables, sampling and estimation. The course uses examples and content from health sciences to provide the basic concept structure for quantitative analysis.

**NURSE 3804 Ethical And Legal Dimensions Of Nursing Practice: 3 semester hours**

Prerequisites: Philosophy (3 credits). This course explores the ethical and legal dimensions of nursing practice. The relationship between ethical and legal issues is examined within nursing situations. The student participates in dialogue addressing ethical-legal issues in professional nursing practice to explore personal values, increase sensitivity to others and to develop ethical reasoning abilities.

**NURSE 3807 Nursing Research - Evidence Based Nursing Practice: 3 semester hours**

Prerequisite: NURSE 3799 (or equivalent). This course prepares nurses to provide evidence based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

***NURSE 3808 Management And Leadership In Nursing: 2-3 semester hours***

Prerequisites: All 3000 level nursing courses; ECON 1000 or (equivalent)  
This course prepares the nurse to coordinate and manage client care in diverse health care settings. Emphasis is placed on leadership and management theory and related skills, collaboration, delegation, coordination, and evaluation of multi-disciplinary work and the application of outcome-based nursing practice.

***NURSE 3817 Introduction To Nursing And Health Informatics: 3 semester hours***

This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

***NURSE 3820 Introduction to Evidence-Based Nursing Practice and Informatics: 5 semester hours***

Prerequisites: NURSE 3799 or equivalent statistics course. This course will focus on current review of qualitative and quantitative nursing literature and research utilization through evidence-based practice and establish competency in fundamental information management and technology. Students will examine the research and evidence-based process through analysis and critique of nursing literature; critically evaluate technology, information, and its sources; use decision support systems designed for clinical and ethical decision making; and focus on the presentation of nursing data, information, and knowledge.

***NURSE 3873 Guided Study In Nursing: 1-3 semester hours***

This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

***NURSE 3900 Dimensions Of Professional Nursing: 3 semester hours***

Prerequisites: Admission to the College as RN This course investigates the roles and responsibilities of the professional nurse within a rapidly changing health care delivery system. Key issues are explored with emphasis on health promotion and health. Graduates of diploma nursing programs will be awarded college credit for successful validation of basic nursing knowledge as part of this course.

***NURSE 3920 Health Assessment: 3 semester hours***

Prerequisites: NURSE 3900 and NURSE 3817 (may be taken concurrently) or consent of instructor. This laboratory course focuses on the knowledge, communication abilities, and technical skills necessary for comprehensive assessment of individuals of all ages.

***NURSE 4300 Community Health Nursing: 4 semester hours***

Prerequisites: All 3000 level nursing courses. This course provides a conceptual foundation for nursing that recognizes the community as client in society. The course examines socioeconomic, environmental, epidemiological, and legislative influences, ethical/legal issues, and the impact of health beliefs and practices on health promotion and protection in communities and society. The student applies various theories and concepts when encountering families, groups and communities with diverse value systems and cultural backgrounds. Course includes classroom and clinical activities in a variety of settings.

***NURSE 4310 Senior Synthesis: 6 semester hours***

Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 3808 may be taken concurrently. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Within a seminar context, students explore a variety of clinical and professional nursing topics. The course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Course includes classroom and clinical experiences in a variety of settings. Not for graduate credit.

***NURSE 4520 Population Focused Nursing: 2 semester hours***

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course provides a conceptual foundation for nursing that recognizes populations in society. The course examines the effect of socioeconomic and environmental, epidemiological factors, and the impact of health beliefs and practices on health promotion and protection in populations. This course also focuses on epidemiological factors and legislative influences in diverse populations.

***NURSE 4521 Clinical Population Focused Nursing: 2 semester hours***

Prerequisites: NURSE 4520. This clinical course focuses on the nursing care of populations in various settings. The student applies population-based theories and concepts when encountering individuals, families, groups and populations with diverse value systems and cultural backgrounds.

***NURSE 4530 Leadership Development and Professional Nursing Practice: 4 semester hours***

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Topics will include leadership, management theory and related skills, collaboration, delegation, coordination, and evaluation of outcome based interdisciplinary nursing practice.

***NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours***

Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

***NURSE 4720 Perioperative Nursing: 3 semester hours***

Prerequisite: Consent of the instructor. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

***NURSE 4722 Transcultural Nursing: 3 semester hours***

Prerequisite: Consent of the Instructor. Examines transcultural nursing concepts, theories and practices in relationship to human caring. Focuses on application and analysis of health care and scope of practice within selected cultural contexts. Includes practicum experiences.

***NURSE 4723 Nurse Externship: 3 semester hours***

Prerequisite: Senior level status; GPA 3.0 (4.0 scale). This course provides the opportunity to apply theoretical and conceptual knowledge and skills in a structured clinical environment under the guidance of a mentor.

**NURSE 4724 Emergency/Trauma Nursing: 3 semester hours**

Prerequisites: NURSE 3205 and NURSE 3206 or consent of instructor. This course provides a framework for the roles and responsibilities of the professional registered nurse in Emergency and Trauma nursing care.

**NURSE 4726 Parish Nursing: 3 semester hours**

Prerequisites: All 2000 level nursing courses, NURSE 3205 and NURSE 3214. This course provides a conceptual foundation that recognizes a speciality of nursing practice that combines professional nursing and health ministry. It examines four major concepts: professionalism; health and wholeness; spirituality; and community as it relates to culture and diversity. The course includes classroom discussion, individual reflection and community based learning experiences.

**NURSE 4730 Nursing Care At The End Of Life: 3 semester hours**

Prerequisites for Nursing Students NURSE 3205 and NURSE 3214. All others by consent of instructor. This course focuses on the nursing care of terminally ill patients and their families. Topics explored will include the impact of personal values and beliefs about death, physiology of end stage disease processes, symptom assessment and management, psychosocial and spiritual support, consideration in special patient populations, societal issues and trends in end of life care, ethical considerations in caring for the dying patient, grief and bereavement processes, and the role nursing in end of life care across settings.

**NURSE 4741 Advanced Nrsng Assmt & Mgt Of Clients W/Cardiac Dysrhythmias: 3 semester hours**

Prerequisite: Senior status. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

**NURSE 4742 Critical Care Nursing Of The Adult: 3 semester hours**

Prerequisites: RN or completion of NURSE 3205 and NURSE 3206 (or equivalent). Focuses on health restoration, health maintenance, and health support of individuals with dysfunctions or trauma to major organ systems. Emphasis is on understanding pathophysiology and psychosocial processes related to nursing and collaborative interventions, and the development of a functional framework for data organization and analysis.

**NURSE 4901 Family And Community Nursing: 5 semester hours**

Prerequisites: NURSE 3900, NURSE 3817 and NURSE 3920. This practicum course introduces the concepts, principles, skills, and professional nursing roles essential to practice community-based professional nursing with families and groups.

**NURSE 4905 Values In Professional Nursing: 3 semester hours**

Prerequisites: All 3000 level RN/BSN nursing courses or consent of instructor. Explores values and beliefs as they shape professional nursing practice and influence clinical decision making and interventions in the evolving health care system. Attention is given to the impact of sociocultural factors and health/illness beliefs and practices of the diverse populations served by the professional nurse. Students examine their own understanding of the moral nature of professional nursing within the context of a diverse society.

**NURSE 4911 Synthesis In Nursing Practice: 5 semester hours**

Prerequisites: NURSE 4901. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities with selected populations determined to be at risk for a variety of health related problems. The course includes assessment of cognitive and affective growth achieved while in the BSN Completion Program.

**NURSE 6000 Statistics in Nursing & Health Sciences: 3 semester hours**

Prerequisites: Admission to graduate study in nursing or consent of instructor. Provides students with a graduate level understanding of quantitative methods and their relationship to research in nursing and health sciences. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

**NURSE 6106 Policy, Organization And Financing In Health Care: 3 semester hours**

Prerequisite: Admission to MSN program. This course presents an overview of health care policy, organization, and financing with emphasis on current health care trends. The focus is on the design and implementation of health care delivery systems with the goal of providing safe, quality, and informatics driven cost-effective care. Emphasis is placed on the development of a leadership role in managing human, financial, and physical health care resources. The format includes pertinent information concerning primary health care and public health issues, the relationship between these issues, and improving health care delivery and outcomes.

**NURSE 6111 Healthcare Systems Concepts and Theory: 3 semester hours**

Prerequisites: Consent of Program Director. Healthcare Systems Concepts and Theory introduces the historical development, current U.S. healthcare structure, and projected transformation of the U.S. health care system and practice professions. This is a foundational course that provides the student with an understanding of the complex nature of the healthcare sector. This course content prepares the student to assess organized efforts to influence health delivery and policy formulation, the impact of these efforts on the administrator, leader, or policy analyst of a healthcare organization, and the role of societal values and individual behaviors in healthcare system's performance, reform efforts, and the health status of the U.S. population.

**NURSE 6112 Nursing Research Methods: 3 semester hours**

Prerequisites: NURSE 3799 or equivalent; NURSE 6111 may be taken concurrently. This course is designed to provide the student with the skills required to be a consumer of nursing research. These include the fundamentals of scientific inquiry in nursing as well as the information necessary to understand and evaluate nursing research. Principles and techniques common to scientific investigation are applied to nursing. Researchable problems are developed.

**NURSE 6114 Evidence-Based Nursing: 3 semester hours**

Prerequisite: NURSE 6112. This course prepares nurses to review existing nursing research about a nursing practice problem and to propose appropriate changes in current nursing practice. The theoretical basis for evidence-based nursing with respect to screening, diagnosis, selection of treatment alternatives, and prognosis are examined. Research designs such as case control and cohort studies are included. Practical application of change in nursing is examined, including formative and summative aspects of evaluation. Opportunities are provided to develop a plan to implement evidence-based change in an area of nursing practice.

***NURSE 6120 Population-Based Foundations of Health: 3 semester hours***

Prerequisite: Admission to MSN. The purpose of this course is to provide students with an advanced nursing practice perspective on providing population-based nursing care. This course includes an evaluation of human and cultural diversity in the health-illness continuum. Core concepts include ethics; theories of health and health promotion, protection, restoration, and maintenance; and the support needed for a peaceful death. Coursework will focus on community/population-based data on epidemiology, disease and injury prevention, health education, growth and development, and family systems.

***NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides opportunities to examine the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will have opportunities to develop skills needed to critically analyze scientific literature foundational to implementing evidence-based practice projects.

***NURSE 6144 Health Promotion and Cultural Diversity: 3 semester hours***

Prerequisites: Admission to the MSN Program. This course provides graduate nursing students with knowledge related to the concepts of health promotion, health protection, cultural diversity, and moral/ethical influences across the lifespan. Core concepts for the course include theories of health and health promotion and protection, epidemiology, disease and injury prevention, health education, cultural diversity, growth and development, nutrition and family systems. The students will explore values clarification and ethical analysis.

***NURSE 6309 Role Of The Nurse Educator: 3 semester hours***

Prerequisites: Admission to the MSN program or consent of instructor. This course will explore the roles, responsibilities, and functions of the nurse educator. Emphasis will be placed on the development and evaluation of the interactive nature of teaching and learning in a variety of settings.

***NURSE 6320 Learning And Curriculum Development In Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

***NURSE 6321 Instructional Strategies In Nursing: 3 semester hours***

Prerequisites: NURSE 6309 or consent of Instructor; must be taken concurrently with NURSE 6320. This course focuses on the development and analysis of teaching and learning strategies in nursing education. Adult learning principles of teaching and learning will be incorporated into the innovative strategies developed within this course. Integration of new technology in instructional design and delivery will be highlighted. Evaluation methods of both teacher and learner will be explored.

***NURSE 6322 Evaluation Strategies in Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course provides students the opportunity to learn evaluation concepts, including testing and measurement in nursing education at the didactic, clinical and programmatic levels. Content includes strategies to assess and evaluate learning in the cognitive, psychomotor and affective domains. Quality improvements, as well as legal and ethical considerations are explored. Key concepts include criterion and norm referenced theory and technique; reliability, validity, and the associated descriptive statistics; preparation of instrumental objectives for use in developing classroom tests and clinical nursing performance evaluations.

***NURSE 6409 Role Of The Nurse Leader: 3 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of the instructor. Analysis of the roles and responsibilities of the nurse executive in a complex healthcare system. This course explores the roles and challenges of the clinical nurse leader. Emphasis will be placed on the responsibilities of the clinical nurse and clinical nurse leader in a complex healthcare system.

***NURSE 6418 Organizational Behavior in Healthcare: 3 semester hours***

Prerequisites: Consent of Program Director. This course applies theory and concepts from organizational behavior to the healthcare system and incorporates organizational theory and behavioral sciences as a framework for improving organization performance. Students will understand interpersonal and interprofessional relationships in healthcare and factors that influence effectiveness and employee and patient satisfaction. Areas of particular focus will include psychosocial factors impacting recruitment selection, training and development of employees, healthcare organizational leadership, theories of employee performance, effective management theory and practice, engaging and involving employees in organizational processes, motivation, teamwork, and managing change.

***NURSE 6420 Healthcare Law and Regulation: 3 semester hours***

Prerequisites: Consent of Program Director. This course introduces and examines a wide range of topics in the area of health law and regulation, and discusses how laws and regulations can promote or impede health and well-being. Students will explore concepts that inform healthcare policy, potential legal problems in various health care settings, issues and rights that are implicated, and the role of law in healthcare and policy. Students will identify issues and propose solutions or plans of action. The emphasis will be on formulating analyses of federal, state, and local law related to healthcare and public health. Specific topics will include the role that policy and law have played in areas such as tobacco regulation, managed care, healthcare reform, and laws utilized for emergency use of drugs and during public health emergencies.

***NURSE 6424 Social Determinants of Health: 3 semester hours***

This course covers health disparities in the U.S. that adversely impact individual health, population health outcomes, and the productivity of the workforce. Developing an appropriate response to what will be treated as an epidemic requires an understanding of factors that adversely influence vulnerability and behavior. Patterns of poverty and life expectancy serve as one vehicle for understanding social disparities. The goal of this course is to provide students with the skills to critically reflect on current strategies to stem the health disparities through a sociological approach to understanding epidemiological patterns. Understanding the impact of poverty, racism, and stigma and the processes of migration, incarceration, social interaction that influences vulnerability, access to care, and participation in wellness activities will be addressed. This course will have an extensive interdisciplinary approach that will challenge students to create solutions that address elements of the structural and social environment impacting health disparities. Students will work with individuals in the community to assess existing disparities, the current and the past approaches to mitigating the factors leading to disparities.

***NURSE 6425 Managed Care Services: 3 semester hours***

Prerequisites: Admission to the MSN or consent of instructor. Provides an analysis of the health care environment in managed care and its impact on the nurse's role.

***NURSE 6426 Health Resources Management: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on the roles and responsibilities of the nurse leader for fiscal and human resource management in both public and private sectors. Includes analysis of the environment, healthcare organization within the system and impact of resource management on nursing and health care.

***NURSE 6428 Theory And Practice In Nursing Leadership: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on theories and practices of advanced nursing leadership and management practice within complex healthcare systems. This course will also compare to global healthcare systems. Particular focus will be on the application/effectiveness assessments of the practices within healthcare organizations. Patient safety and quality management theory practices in healthcare will be discussed in depth and compared to other industries' safety and quality management programs theory/practices.

***NURSE 6509 Role Of The Clinical Nurse Specialist/Nurse Practitioner: 2 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of instructor. This course will focus on issues affecting the emerging roles of the nurse practitioner and clinical nurse specialist. It is designed to facilitate the role development of nurses who desire to function as primary care providers and/or as specialists within a specific clinical area of advanced nursing practice. Emphasis include sub-roles of advanced practice (leader, consultant, expert, researcher, educator), legal and professional issues, change theories, and standards of practice.

***NURSE 6518 Pathophysiology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnosis within physiological systems of sub-cellular and cellular origin, biochemical, and anatomical changes across the life span.

***NURSE 6519 Advanced Pediatric Pathophysiology: 3 semester hours***

This course focuses on embryology of the major organ systems, as well as specific physiologic and pathophysiologic processes relevant to the child from birth through age 18. Implications for advanced nursing practice which result from alterations of normal physiologic functioning in cellular, tissue, and organ systems are examined. Emphasis is placed on the relationship between pathophysiology, decision making and standards of advanced nursing practice.

***NURSE 6520 Pharmacology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: NURSE 6518 or consent of Program Director. This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

***NURSE 6524 Health Assessment For Advanced Nursing Practice: 3 semester hours***

Prerequisite: NURSE 6518 or consent of Program Director. This course provides a systematic approach to advanced physical assessment as well as psychological, sociocultural, developmental, and spiritual assessment of individuals across the life span. This course builds upon basic health assessment knowledge and skills, laboratory work interpretation, validation, documentation, and analysis of assessment findings. This course includes mandatory didactic and clinical experiences.

***NURSE 6526 Advanced Health Assessment For Pediatric Nursing Practice: 3 semester hours***

Co-requisite: NURSE 6519 or permission of the instructor. Comprehensive assessment of children through adolescence, including those with significant health and/or developmental deviations, using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation, and documentation of findings.

***NURSE 6529 Advanced Pharmacology For Pediatric Nursing Practice: 3 semester hours***

Prerequisites: Admission to Master of Science in Nursing or permission of the instructor. This course is a clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary health care management of children from birth to young adulthood by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific illness. The Missouri Laws for advanced practice nurse prescriptive authority will be addressed. Core concepts include pharmacodynamics, pharmacokinetics, health related information, medication compliance and issues that pertain to the prescribing of medication in advanced nursing practice.

***NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides an introduction to the interpretation and appropriate use of diagnostic measures for advanced practice nurses in primary care settings. Special attention is paid to laboratory, radiographic and diagnostic testing. In addition, clinical opportunities will be provided to gain clinical interventional skills for advanced practice nursing.

***NURSE 6660 Introduction to Health Systems Management, and Policy for Underserved: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides a comprehensive survey of the U.S. health care system, healthcare policy, integrative care practice models, and management principles useful in primary care settings dedicated to underserved populations. Selected topics include health behaviors, health maintenance and the management of primary healthcare in underserved populations, access to mental health care and substance abuse treatment, the U.S. healthcare system (both public and private sectors), the legal and ethical bases for caring for the underserved, the public policy-making process, and management principles of strategic planning, marketing, and project management in clinics serving the underserved. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations will be incorporated into a community based experience.

***NURSE 6730 Leadership in Population Health I: 4 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6731 Leadership in Population Health II: 4 semester hours***

Prerequisites: NURSE 6730 or consent of Program Director. This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6737 Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan experiencing psychiatric-mental health concerns. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6738 Psychiatric-Mental Health II: Diagnosis & Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6737 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic, and mental health problems in this population.

***NURSE 6739 Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6740 Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6739 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6741 Family Health I: Diagnosis and Management of Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6742 Family Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6741 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6743 Child Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6578, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute and chronic health and mental health problems in this population.

***NURSE 6744 Child Health II: Diagnosis and Management in Advanced Practice Nurse: 4-5 semester hours***

Prerequisites: NURSE 6743 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology, and advanced physical assessment to prepare students to assume roles in advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply previous strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6746 Women's Health I: Diagnosis & Management in Advanced Practice Nursing: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of women across the life span, with a focus on reproductive health, including male sexual and reproductive health. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within the defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6747 Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6870 Special Topics In Advanced Practice Nursing: 1-3 semester hours***

Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate MSN or PhD levels.

***NURSE 6875 Special Study In Graduate Nursing: 1-3 semester hours***

Prerequisites: Admission to MSN prog or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

***NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 3 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

***NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 3-6 semester hours***

This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, health systems leadership, policy and evidence-based care populations.

***NURSE 6950 Advanced Nursing Practice: 4 semester hours***

Prerequisites: NURSE 6739, NURSE 6743, NURSE 6746. Advanced nursing practice examines different nursing and interdisciplinary models of case management of acute and chronic problems across the lifespan. The intensive clinical experience focuses on the student's specialty care area: adults, pediatric or women's health.

***NURSE 6951 Advanced Intensive Clinical for the Nurse Educator: 2 semester hours***

Prerequisites: NURSE 6520, NURSE 6524, NURSE 6309. This course provides a concentrated opportunity to function in an advanced nursing role as a nurse educator incorporating an intensive clinical experience focusing on the student's chosen population.

***NURSE 6952 Synthesis Practicum: 3 semester hours***

Prerequisites: All required courses in the Nurse Educator or Nursing Leadership of Health Systems option or consent of instructor. This clinical course is a concentrated opportunity to function in an advanced nursing role as a nurse administrator, integrating clinical and functional role activities within a chosen setting. Emphasis includes educator or administrator nursing practice, functional role responsibilities, and activities with emphasis on their relationship to client outcomes.

***NURSE 6954 Advanced Practice Nursing: Residency I: 3-4 semester hours***

Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744, NURSE 6747 or the consent of the Program Director. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 6955 Advanced Practice Nursing: Residency II: 3-6 semester hours***

Prerequisites: NURSE 6954 or the consent of the Program Director. This clinical course provides a continuation of precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

***NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

**NURSE 7209 Role of the DNP: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to synthesize and analyze knowledge of the DNP role within a specified population focus and role. The overview of selected theories and frameworks that can be used to guide advanced practice nurses and nursing leaders in facilitating the use of evidence-based practice, understanding cultural aspects of care, and framing situational awareness. Core concepts include the regulatory, legislative, and professional influences of advanced nursing practice. Emphasis includes sub-roles of the doctorally prepared nurse including: Advanced Practice Registered Nurse (APRN), leader, consultant, expert, researcher, and educator.

**NURSE 7211 Biostatistics I: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides a foundational understanding of the use of biostatistics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

**NURSE 7212 Biostatistics II: 3 semester hours**

Prerequisites: Admission to PhD program. This course builds on statistical procedures and advances the student's understanding of advanced statistical methods including design and measurement.

**NURSE 7220 Leadership in Practice: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to develop and refine critical leadership skills by focusing on improving the health of individuals and populations. The course uses a combination of didactic lectures, case-based learning and experiential exercises to explore leadership competencies including change management, strategy implementation, quality improvement, effective communication, team dynamics, and systems thinking. Emphasis is on using models and theories that facilitate inter-professional collaboration to achieve optimal health outcomes. The focus is effective communication and leadership methods necessary to establish successful inter-professional teams. Students will enhance skills in verbal, written and electronic communication; team leadership; and creating and sustaining health related initiatives. Through advanced understanding of the inter-professional dimension of healthcare, students will facilitate collaboration and remove barriers to providing safe, timely, effective, efficient, equitable and patient centered care in healthcare systems.

**NURSE 7230 Epidemiology: 3 semester hours**

Prerequisite: NURSE 7211 or Consent of Program Director. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

**NURSE 7240 Health Informatics: 3 semester hours**

Prerequisites: Consent of the Program Director. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

**NURSE 7251 Healthcare Economics: 3 semester hours**

Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

**NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours**

Prerequisite: None. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

**NURSE 7270 Policy Application for Improved Health Outcomes: 3 semester hours**

Prerequisites: NURSE 6106 or equivalent and NURSE 7230. Students learn how to effectively translate and disseminate knowledge from nursing and other health sciences to policy makers and stakeholders in order to form collaborations to affect change at various levels of the policy process. Topics to be covered include policy analysis, policy development, collaboration and negotiation specific to the policy process, building social and political capital and garnering resources to assure effective policy implementation. Students will utilize population health data, policy analysis, and policy development skills to define, shape and implement culturally competent health policy.

**NURSE 7291 DNP Capstone I: 3 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7292 DNP Capstone II: 3 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7293 DNP Capstone III: 2 semester hours**

Prerequisites: Consent of Program Director. This experience provides additional opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

**NURSE 7299 DNP Seminar: 1-3 semester hours**

Prerequisites: All DNP required course work or Consent of Instructor. This seminar provides students with the opportunity to synthesize and analyze knowledge within the context of the emerging DNP role. Analysis of practice issues may include reflective practice, collaboration, health systems technology, ethics and policy.

**NURSE 7300 Prevention of Injury and Disability: 3 semester hours**

Prerequisites: Graduate status or consent of instructor. This course will examine trends in injury and disability nationally and internationally, relevant theories and conceptual models, the definition and measurement of key concepts, and analysis of interventions proposed for preventing injury and mitigating disability. The role of information and computer technologies in the management of disability will also be considered. Specific content will include age-related injury and disability, disability associated with cardiovascular and other chronic diseases, and the psychosocial contexts of disability, including traumatic stress and its outcomes.

**NURSE 7401 Research Institute I: 2 semester hours**

Prerequisites: Admission to Doctorial Study in Nursing. This course provides an introduction to the process of becoming a research scientist or translational investigator. Content will include the responsible conduct of research, its core elements, relevant policies and procedures, and relevant research. This course also includes the culture of nursing, literature reviews, scholarly writing, technology in the research process, developing a program of scholarship and effective time management.

**NURSE 7403 Developer of the Nurse Scientist: 3 semester hours**

Prerequisite: Admission to doctoral study in nursing. This course addresses the role of the PhD-prepared nurse as scientist, leader, academician, and policy maker. Students will analyze strategies for lifelong learning and development as nurse scientists and will explore avenues for building their programs of scholarship, funding opportunities, and contributing to nursing science in policy and clinical practice. Students will examine ways to collaborate effectively in order to improve health care and health outcomes.

**NURSE 7443 Healthcare Policy: 3 semester hours**

Prerequisites: Graduate Standing and Consent of the Program Director. This is a survey course examining current issues in healthcare policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in healthcare policy are explored.

**NURSE 7480 Guided Nursing Research Seminar: 1-6 semester hours**

Prerequisite: Consent of instructor. Provides opportunity to work in collaboration with faculty and peers on a focused research topic relevant to nursing.

**NURSE 7481 Development Of Nursing Science And Theory: 3 semester hours**

Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

**NURSE 7488 Qualitative Methods In Nursing Research: 3 semester hours**

Prerequisites: Admission to PhD program. Examines the relationship between theoretical and philosophical perspectives and selection of appropriate methodologies in research design. Critically explores issues related to innovations in traditional qualitative designs and emerging technologies, rigor and validity, and role of interpretive research in nursing science.

**NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours**

Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

**NURSE 7491 Advanced Nursing Theory Development And Validation: 3 semester hours**

Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

**NURSE 7498 Doctoral Seminar: 1-12 semester hours**

Prerequisite: Consent of instructor. Presentation and discussion of pertinent methodological and clinical issues related to doctoral research.

**NURSE 7499 Dissertation Research: 1-12 semester hours**

Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

**NURSE 7530 Assessment of Community Health and Infrastructure: 3 semester hours**

Prerequisites: Consent of Program Director. This course will introduce community health assessment and community infrastructure assessment. Participants will be introduced to the information and the resources available to secure and improve resilience in the community's healthcare and public health infrastructure. Participants will also be given an opportunity to work on a community-based health assessment project in conjunction with a community partner. Much of the experience will be practical and hands-on. Participants may be asked to work with a new project or join in an ongoing project.

***NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 3-6 semester hours***

Prerequisites: Consent of Program Director. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

**Courses*****NURSE 1010 Orientation To Nursing: 0 semester hours***

Prerequisites: Admission to four-year baccalaureate program. This mandatory eight-week introduction to the nursing program provides a comprehensive orientation to the program. Students are introduced to the academic and clinical expectations of the curriculum. Concerns critica for academic success (i.e., time management, effective study skills, stress management and dealing with test anxiety) are addressed.

***NURSE 2101 Introduction to Nursing: 2 semester hours***

This course introduces the historical and theoretical development of nursing as a discipline. Nursing is examined as a dynamic practice profession. Variables that influence nursing and health care are discussed. Concepts and skills introduced in this course guide the student's educational experience within the nursing major.

***NURSE 2103 Nutrition And Health: 3 semester hours***

This course examines nutritional needs throughout the life span with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients and cultural and economic influences on dietary practices.

***NURSE 2105 Communication In The Nursing Profession: 3 semester hours***

This course focuses on the development of communication abilities utilized in professional nursing. The individual's relationship with self, others and groups is discussed. Students learn verbal and non-verbal communication skills, self-awareness, and sensitivity to others. Interpersonal skills are introduced to enable the student to develop effective human caring relationships with a diverse population of clients and colleagues.

***NURSE 3101 Nursing And Health: 6 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; CHEM 1052; NURSE 1010, NURSE 3106; NURSE 3110; NURSE 3111. An introduction to the discipline of nursing, the historical and theoretical development of nursing is explored with an emphasis on critical thinking, the teaching/learning process, and foundational practice concepts. Through modular laboraory experiences, the student acquires psychomotor skills to provide safe and effective nursing care to clients promoting health and wellness. Includes classroom, laboratory and clinical experiences.

***NURSE 3106 Assessment Of Clients In Health And Illness: 4 semester hours***

Prerequisites: BIOL 1131; BIOL 1141; BIOL 1162; CHEM 1052; PSYCH 1268; NURSE 1010. This course integrates theoretical knowledge and interpersonal skills in the assessment of clients, focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking and cultural competency in identifying multidimensional health variations across the life span. The course includes classroom and laboratory experiences.

***NURSE 3110 Pathophysiological Bases Of Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1131, BIOL 1141, BIOL 1162, CHEM 1052 (or equivalent); NURSE 1010. This course focuses on the nature of disease, its causes and the bodily changes that accompany it. The course includes a study of general principles of disease, specific diseases of individual organs and systems and the clinical implications.

***NURSE 3111 Pharmacotherapeutics In Nursing Practice: 3 semester hours***

Prerequisites: BIOL 1141, BIOL 1162, CHEM 1052, NURSE 1010; pre/co requisite: NURSE 3110. This course introduces key terminology, legal foundations, general principles and clinical applications of pharmacology.

***NURSE 3120 Foundations of Nursing: 7 semester hours***

Prerequisites: All general education requirements and accelerated nursing option prerequisite non-nursing courses. This course introduces the student to the theoretical concepts and foundations of professional nursing practice. Utilizing an integrated approach, health promotion and protection throughout the lifespan are explored and supported using theories of nursing practice, health assessment of well individuals, and general principles and concepts of pharmacology and critical thinking.

***NURSE 3121 Clinical Foundations of Nursing: 3 semester hours***

Prerequisites: NURSE 3120. This course assists in the development and application of clinical reasoning in the lab, clinical agency, and simulation environments. Through clinical learning experiences, the student acquires basic psychomotor, communication, and medication administration skills. The student applies these skills in the provision of safe and effective nursing care to clients while promoting health, wellness, and clinical reasoning.

***NURSE 3205 Adult Health Nursing I: 5 semester hours***

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to immune responses, problems of oxygenation: ventilation, transport and perfusion: kidney function; regulatory mechanisms and digestion absorption and elimination. emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

***NURSE 3206 Adult Health Nursing II: 5 semester hours***

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

**NURSE 3214 Psychiatric Mental Health Nursing: 4 semester hours**

Prerequisites: All 3100-level nursing courses; PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic emotional and psychosocial difficulties and psychiatric illnesses. The course emphasizes development of students' decisional capabilities, self-awareness and professional behaviors as they utilize theory and research from nursing, psychology and related disciplines for the provision of nursing care to individuals, families, & groups. Clinical experiences in community and acute care settings are designed for students to engage in individual and group strategies that promote and maintain mental health. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3215 Nursing Of Women And Childbearing Families: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. Focuses on the childbearing family and women's reproductive health, including family dynamics and growth and development. Health promotion, protection, maintenance and restoration are covered in experiences that include hospital and community settings. Health care policy and systems as relevant to these populations are included. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3216 Child And Family Health Nursing: 4 semester hours**

Prerequisites: All 3100 level nursing courses, PSYCH 1268. This course focuses on pediatric health and illness with emphasis on family dynamics, growth and development and communication with children and their families. Health promotion, protection, restoration, maintenance and support concepts are covered in experiences that include hospital and community settings. Health care policy and systems are studied as relevant to this population. Course includes classroom and clinical activities in a variety of settings.

**NURSE 3324 Sociology Of The Family: 3 semester hours**

Same as SOC 3224. Prerequisite: SOC 1010 or consent of instructor.

The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include: love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure.

**NURSE 3330 Nursing of Adults I: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing health problems affecting body regulatory mechanisms. These mechanisms are related to perioperative processes, immune processes, problems of oxygenation, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system and genetics, oncology and hematology problems. This course also incorporates relevant concepts of pharmacology and pathophysiology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support as well as the continued development of the nurse-client relationship, clinical reasoning, and evidence-based nursing practice across the adult life span.

**NURSE 3331 Clinical Nursing of Adults I: 3 semester hours**

Prerequisites: NURSE 3330. This course focuses on the nursing care of adults in the lab, clinical agency, and simulation environments. Utilizing an integrated approach, advanced nursing skills and assessment techniques for adult clients are mastered in perioperative processes, immune processes, problems of oxygenation, hematology, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system, genetics and oncology problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients across the health/illness continuum.

**NURSE 3340 Behavioral Health Nursing: 2.5 semester hours**

Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic psychosocial and behavioral health issues and specific psychiatric illnesses. An emphasis is placed on the nurse/client relationship in behavioral health promotion, restoration, maintenance and support.

**NURSE 3341 Clinical Behavioral Health Nursing: 1.5 semester hour**

Prerequisites: NURSE 3340. In this course students utilize theory and evidence from nursing and related disciplines in the provision of nursing care to individuals, families, and groups with psychiatric and behavioral health problems. Clinical experiences in community and acute care settings are designed so that students can engage in individual and group strategies that promote and maintain mental health.

**NURSE 3350 Nursing of Adults II: 5 semester hours**

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3351 Clinical Nursing of Adults II: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

**NURSE 3360 Maternal-Child Nursing: 5 semester hours**

Prerequisites: PSYCH 1268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hours**

Prerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

**NURSE 3799 Quantitative Analysis In The Health Sciences: 3 semester hours**

Prerequisites: MATH 1030 or equivalent. This course focuses on concepts and applications of statistics in the health sciences. Topics include descriptive and inferential statistics, probability distributions of random variables, sampling and estimation. The course uses examples and content from health sciences to provide the basic concept structure for quantitative analysis.

**NURSE 3804 Ethical And Legal Dimensions Of Nursing Practice: 3 semester hours**

Prerequisites: Philosophy (3 credits). This course explores the ethical and legal dimensions of nursing practice. The relationship between ethical and legal issues is examined within nursing situations. The student participates in dialogue addressing ethical-legal issues in professional nursing practice to explore personal values, increase sensitivity to others and to develop ethical reasoning abilities.

**NURSE 3807 Nursing Research - Evidence Based Nursing Practice: 3 semester hours**

Prerequisite: NURSE 3799 (or equivalent). This course prepares nurses to provide evidence based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

**NURSE 3808 Management And Leadership In Nursing: 2-3 semester hours**

Prerequisites: All 3000 level nursing courses; ECON 1000 or (equivalent) This course prepares the nurse to coordinate and manage client care in diverse health care settings. Emphasis is placed on leadership and management theory and related skills, collaboration, delegation, coordination, and evaluation of multi-disciplinary work and the application of outcome-based nursing practice.

**NURSE 3817 Introduction To Nursing And Health Informatics: 3 semester hours**

This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

**NURSE 3820 Introduction to Evidence-Based Nursing Practice and Informatics: 5 semester hours**

Prerequisites: NURSE 3799 or equivalent statistics course. This course will focus on current review of qualitative and quantitative nursing literature and research utilization through evidence-based practice and establish competency in fundamental information management and technology. Students will examine the research and evidence-based process through analysis and critique of nursing literature; critically evaluate technology, information, and its sources; use decision support systems designed for clinical and ethical decision making; and focus on the presentation of nursing data, information, and knowledge.

**NURSE 3873 Guided Study In Nursing: 1-3 semester hours**

This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

**NURSE 3900 Dimensions Of Professional Nursing: 3 semester hours**

Prerequisites: Admission to the College as RN This course investigates the roles and responsibilities of the professional nurse within a rapidly changing health care delivery system. Key issues are explored with emphasis on health promotion and health. Graduates of diploma nursing programs will be awarded college credit for successful validation of basic nursing knowledge as part of this course.

**NURSE 3920 Health Assessment: 3 semester hours**

Prerequisites: NURSE 3900 and NURSE 3817 (may be taken concurrently) or consent of instructor. This laboratory course focuses on the knowledge, communication abilities, and technical skills necessary for comprehensive assessment of individuals of all ages.

**NURSE 4300 Community Health Nursing: 4 semester hours**

Prerequisites: All 3000 level nursing courses. This course provides a conceptual foundation for nursing that recognizes the community as client in society. The course examines socioeconomic, environmental, epidemiological, and legislative influences, ethical/legal issues, and the impact of health beliefs and practices on health promotion and protection in communities and society. The student applies various theories and concepts when encountering families, groups and communities with diverse value systems and cultural backgrounds. Course includes classroom and clinical activities in a variety of settings.

**NURSE 4310 Senior Synthesis: 6 semester hours**

Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 3808 may be taken concurrently. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Within a seminar context, students explore a variety of clinical and professional nursing topics. The course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Course includes classroom and clinical experiences in a variety of settings. Not for graduate credit.

**NURSE 4520 Population Focused Nursing: 2 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course provides a conceptual foundation for nursing that recognizes populations in society. The course examines the effect of socioeconomic and environmental, epidemiological factors, and the impact of health beliefs and practices on health promotion and protection in populations. This course also focuses on epidemiological factors and legislative influences in diverse populations.

**NURSE 4521 Clinical Population Focused Nursing: 2 semester hours**

Prerequisites: NURSE 4520. This clinical course focuses on the nursing care of populations in various settings. The student applies population-based theories and concepts when encountering individuals, families, groups and populations with diverse value systems and cultural backgrounds.

**NURSE 4530 Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Topics will include leadership, management theory and related skills, collaboration, delegation, coordination, and evaluation of outcome based interdisciplinary nursing practice.

**NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours**

Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

**NURSE 4720 Perioperative Nursing: 3 semester hours**

Prerequisite: Consent of the instructor. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

**NURSE 4722 Transcultural Nursing: 3 semester hours**

Prerequisite: Consent of the Instructor. Examines transcultural nursing concepts, theories and practices in relationship to human caring. Focuses on application and analysis of health care and scope of practice within selected cultural contexts. Includes practicum experiences.

**NURSE 4723 Nurse Externship: 3 semester hours**

Prerequisite: Senior level status; GPA 3.0 (4.0 scale). This course provides the opportunity to apply theoretical and conceptual knowledge and skills in a structured clinical environment under the guidance of a mentor.

**NURSE 4724 Emergency/Trauma Nursing: 3 semester hours**

Prerequisites: NURSE 3205 and NURSE 3206 or consent of instructor. This course provides a framework for the roles and responsibilities of the professional registered nurse in Emergency and Trauma nursing care.

**NURSE 4726 Parish Nursing: 3 semester hours**

Prerequisites: All 2000 level nursing courses, NURSE 3205 and NURSE 3214. This course provides a conceptual foundation that recognizes a speciality of nursing practice that combines professional nursing and health ministry. It examines four major concepts: professionalism; health and wholeness; spirituality; and community as it relates to culture and diversity. The course includes classroom discussion, individual reflection and community based learning experiences.

**NURSE 4730 Nursing Care At The End Of Life: 3 semester hours**

Prerequisites for Nursing Students NURSE 3205 and NURSE 3214. All others by consent of instructor. This course focuses on the nursing care of terminally ill patients and their families. Topics explored will include the impact of personal values and beliefs about death, physiology of end stage disease processes, symptom assessment and management, psychosocial and spiritual support, consideration in special patient populations, societal issues and trends in end of life care, ethical considerations in caring for the dying patient, grief and bereavement processes, and the role nursing in end of life care across settings.

**NURSE 4741 Advanced Nrsng Assmt & Mgt Of Clients W/Cardiac Dysrhythmias: 3 semester hours**

Prerequisite: Senior status. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

**NURSE 4742 Critical Care Nursing Of The Adult: 3 semester hours**

Prerequisites: RN or completion of NURSE 3205 and NURSE 3206 (or equivalent). Focuses on health restoration, health maintenance, and health support of individuals with dysfunctions or trauma to major organ systems. Emphasis is on understanding pathophysiology and psychosocial processes related to nursing and collaborative interventions, and the development of a functional framework for data organization and analysis.

**NURSE 4901 Family And Community Nursing: 5 semester hours**

Prerequisites: NURSE 3900, NURSE 3817 and NURSE 3920. This practicum course introduces the concepts, principles, skills, and professional nursing roles essential to practice community-based professional nursing with families and groups.

**NURSE 4905 Values In Professional Nursing: 3 semester hours**

Prerequisites: All 3000 level RN/BSN nursing courses or consent of instructor. Explores values and beliefs as they shape professional nursing practice and influence clinical decision making and interventions in the evolving health care system. Attention is given to the impact of sociocultural factors and health/illness beliefs and practices of the diverse populations served by the professional nurse. Students examine their own understanding of the moral nature of professional nursing within the context of a diverse society.

**NURSE 4911 Synthesis In Nursing Practice: 5 semester hours**

Prerequisites: NURSE 4901. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities with selected populations determined to be at risk for a variety of health related problems. The course includes assessment of cognitive and affective growth achieved while in the BSN Completion Program.

**NURSE 6000 Statistics in Nursing & Health Sciences: 3 semester hours**

Prerequisites: Admission to graduate study in nursing or consent of instructor. Provides students with a graduate level understanding of quantitative methods and their relationship to research in nursing and health sciences. Students will conduct lab data analysis based on the topics covered in the class and learn how to generate specific research questions and conduct basic statistical analysis.

***NURSE 6106 Policy, Organization And Financing In Health Care: 3 semester hours***

Prerequisite: Admission to MSN program. This course presents an overview of health care policy, organization, and financing with emphasis on current health care trends. The focus is on the design and implementation of health care delivery systems with the goal of providing safe, quality, and informatics driven cost-effective care. Emphasis is placed on the development of a leadership role in managing human, financial, and physical health care resources. The format includes pertinent information concerning primary health care and public health issues, the relationship between these issues, and improving health care delivery and outcomes.

***NURSE 6111 Healthcare Systems Concepts and Theory: 3 semester hours***

Prerequisites: Consent of Program Director. Healthcare Systems Concepts and Theory introduces the historical development, current U.S. healthcare structure, and projected transformation of the U.S. health care system and practice professions. This is a foundational course that provides the student with an understanding of the complex nature of the healthcare sector. This course content prepares the student to assess organized efforts to influence health delivery and policy formulation, the impact of these efforts on the administrator, leader, or policy analyst of a healthcare organization, and the role of societal values and individual behaviors in healthcare system's performance, reform efforts, and the health status of the U.S. population.

***NURSE 6112 Nursing Research Methods: 3 semester hours***

Prerequisites: NURSE 3799 or equivalent; NURSE 6111 may be taken concurrently. This course is designed to provide the student with the skills required to be a consumer of nursing research. These include the fundamentals of scientific inquiry in nursing as well as the information necessary to understand and evaluate nursing research. Principles and techniques common to scientific investigation are applied to nursing. Researchable problems are developed.

***NURSE 6114 Evidence-Based Nursing: 3 semester hours***

Prerequisite: NURSE 6112. This course prepares nurses to review existing nursing research about a nursing practice problem and to propose appropriate changes in current nursing practice. The theoretical basis for evidence-based nursing with respect to screening, diagnosis, selection of treatment alternatives, and prognosis are examined. Research designs such as case control and cohort studies are included. Practical application of change in nursing is examined, including formative and summative aspects of evaluation. Opportunities are provided to develop a plan to implement evidence-based change in an area of nursing practice.

***NURSE 6120 Population-Based Foundations of Health: 3 semester hours***

Prerequisite: Admission to MSN. The purpose of this course is to provide students with an advanced nursing practice perspective on providing population-based nursing care. This course includes an evaluation of human and cultural diversity in the health-illness continuum. Core concepts include ethics; theories of health and health promotion, protection, restoration, and maintenance; and the support needed for a peaceful death. Coursework will focus on community/population-based data on epidemiology, disease and injury prevention, health education, growth and development, and family systems.

***NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides opportunities to examine the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will have opportunities to develop skills needed to critically analyze scientific literature foundational to implementing evidence-based practice projects.

***NURSE 6144 Health Promotion and Cultural Diversity: 3 semester hours***

Prerequisites: Admission to the MSN Program. This course provides graduate nursing students with knowledge related to the concepts of health promotion, health protection, cultural diversity, and moral/ethical influences across the lifespan. Core concepts for the course include theories of health and health promotion and protection, epidemiology, disease an injury prevention, health education, cultural diversity, growth and development, nutrition and family systems. The students will explore values clarification and ethical analysis.

***NURSE 6309 Role Of The Nurse Educator: 3 semester hours***

Prerequisites: Admission to the MSN program or consent of instructor. This course will explore the roles, responsibilities, and functions of the nurse educator. Emphasis will be placed on the development and evaluation of the interactive nature of teaching and learning in a variety of settings.

***NURSE 6320 Learning And Curriculum Development In Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

***NURSE 6321 Instructional Strategies In Nursing: 3 semester hours***

Prerequisites: NURSE 6309 or consent of Instructor; must be taken concurrently with NURSE 6320. This course focuses on the development and analysis of teaching and learning strategies in nursing education. Adult learning principles of teaching and learning will be incorporated into the innovative strategies developed within this course. Integration of new technology in instructional design and delivery will be highlighted. Evaluation methods of both teacher and learner will be explored.

***NURSE 6322 Evaluation Strategies in Nursing: 3 semester hours***

Prerequisites: NURSE 6309. This course provides students the opportunity to learn evaluation concepts, including testing and measurement in nursing education at the didactic, clinical and programmatic levels. Content includes strategies to assess and evaluate learning in the cognitive, psychomotor and affective domains. Quality improvements, as well as legal and ethical considerations are explored. Key concepts include criterion and norm referenced theory and technique; reliability, validity, and the associated descriptive statistics; preparation of instrumental objectives for use in developing classroom tests and clinical nursing performance evaluations.

***NURSE 6409 Role Of The Nurse Leader: 3 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of the instructor. Analysis of the roles and responsibilities of the nurse executive in a complex healthcare system. This course explores the roles and challenges of the clinical nurse leader. Emphasis will be placed on the responsibilities of the clinical nurse and clinical nurse leader in a complex healthcare system.

***NURSE 6418 Organizational Behavior in Healthcare: 3 semester hours***

Prerequisites: Consent of Program Director. This course applies theory and concepts from organizational behavior to the healthcare system and incorporates organizational theory and behavioral sciences as a framework for improving organization performance. Students will understand interpersonal and interprofessional relationships in healthcare and factors that influence effectiveness and employee and patient satisfaction. Areas of particular focus will include psychosocial factors impacting recruitment selection, training and development of employees, healthcare organizational leadership, theories of employee performance, effective management theory and practice, engaging and involving employees in organizational processes, motivation, teamwork, and managing change.

***NURSE 6420 Healthcare Law and Regulation: 3 semester hours***

Prerequisites: Consent of Program Director. This course introduces and examines a wide range of topics in the area of health law and regulation, and discusses how laws and regulations can promote or impede health and well-being. Students will explore concepts that inform healthcare policy, potential legal problems in various health care settings, issues and rights that are implicated, and the role of law in healthcare and policy. Students will identify issues and propose solutions or plans of action. The emphasis will be on formulating analyses of federal, state, and local law related to healthcare and public health. Specific topics will include the role that policy and law have played in areas such as tobacco regulation, managed care, healthcare reform, and laws utilized for emergency use of drugs and during public health emergencies.

***NURSE 6424 Social Determinants of Health: 3 semester hours***

This course covers health disparities in the U.S. that adversely impact individual health, population health outcomes, and the productivity of the workforce. Developing an appropriate response to what will be treated as an epidemic requires an understanding of factors that adversely influence vulnerability and behavior. Patterns of poverty and life expectancy serve as one vehicle for understanding social disparities. The goal of this course is to provide students with the skills to critically reflect on current strategies to stem the health disparities through a sociological approach to understanding epidemiological patterns. Understanding the impact of poverty, racism, and stigma and the processes of migration, incarceration, social interaction that influences vulnerability, access to care, and participation in wellness activities will be addressed. This course will have an extensive interdisciplinary approach that will challenge students to create solutions that address elements of the structural and social environment impacting health disparities. Students will work with individuals in the community to assess existing disparities, the current and the past approaches to mitigating the factors leading to disparities.

***NURSE 6425 Managed Care Services: 3 semester hours***

Prerequisites: Admission to the MSN or consent of instructor. Provides an analysis of the health care environment in managed care and its impact on the nurse's role.

***NURSE 6426 Health Resources Management: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on the roles and responsibilities of the nurse leader for fiscal and human resource management in both public and private sectors. Includes analysis of the environment, healthcare organization within the system and impact of resource management on nursing and health care.

***NURSE 6428 Theory And Practice In Nursing Leadership: 3 semester hours***

Prerequisite: NURSE 6409. This course focuses on theories and practices of advanced nursing leadership and management practice within complex healthcare systems. This course will also compare to global healthcare systems. Particular focus will be on the application/effectiveness assessments of the practices within healthcare organizations. Patient safety and quality management theory practices in healthcare will be discussed in depth and compared to other industries' safety and quality management programs theory/practices.

***NURSE 6509 Role Of The Clinical Nurse Specialist/Nurse Practitioner: 2 semester hours***

Prerequisites: Admission to the Master's Program in the College of Nursing or consent of instructor. This course will focus on issues affecting the emerging roles of the nurse practitioner and clinical nurse specialist. It is designed to facilitate the role development of nurses who desire to function as primary care providers and/or as specialists within a specific clinical area of advanced nursing practice. Emphasis include sub-roles of advanced practice (leader, consultant, expert, researcher, educator), legal and professional issues, change theories, and standards of practice.

***NURSE 6518 Pathophysiology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnosis within physiological systems of sub-cellular and cellular origin, biochemical, and anatomical changes across the life span.

***NURSE 6519 Advanced Pediatric Pathophysiology: 3 semester hours***

This course focuses on embryology of the major organ systems, as well as specific physiologic and pathophysiologic processes relevant to the child from birth through age 18. Implications for advanced nursing practice which result from alterations of normal physiologic functioning in cellular, tissue, and organ systems are examined. Emphasis is placed on the relationship between pathophysiology, decision making and standards of advanced nursing practice.

***NURSE 6520 Pharmacology For Advanced Nursing Practice: 3 semester hours***

Prerequisites: NURSE 6518 or consent of Program Director. This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

***NURSE 6524 Health Assessment For Advanced Nursing Practice: 3 semester hours***

Prerequisite: NURSE 6518 or consent of Program Director. This course provides a systematic approach to advanced physical assessment as well as psychological, sociocultural, developmental, and spiritual assessment of individuals across the life span. This course builds upon basic health assessment knowledge and skills, laboratory work interpretation, validation, documentation, and analysis of assessment findings. This course includes mandatory didactic and clinical experiences.

***NURSE 6526 Advanced Health Assessment For Pediatric Nursing Practice: 3 semester hours***

Co-requisite: NURSE 6519 or permission of the instructor. Comprehensive assessment of children through adolescence, including those with significant health and/or developmental deviations, using advanced diagnostic reasoning process. Emphasis on health history, cultural diversity, differentiation, interpretation, and documentation of findings.

***NURSE 6529 Advanced Pharmacology For Pediatric Nursing Practice: 3 semester hours***

Prerequisites: Admission to Master of Science in Nursing or permission of the instructor. This course is a clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary health care management of children from birth to young adulthood by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific illness. The Missouri Laws for advanced practice nurse prescriptive authority will be addressed. Core concepts include pharmacodynamics, pharmacokinetics, health related information, medication compliance and issues that pertain to the prescribing of medication in advanced nursing practice.

***NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides an introduction to the interpretation and appropriate use of diagnostic measures for advanced practice nurses in primary care settings. Special attention is paid to laboratory, radiographic and diagnostic testing. In addition, clinical opportunities will be provided to gain clinical interventional skills for advanced practice nursing.

***NURSE 6660 Introduction to Health Systems Management, and Policy for Underserved: 3 semester hours***

Prerequisites: Consent of Program Director. This course provides a comprehensive survey of the U.S. health care system, healthcare policy, integrative care practice models, and management principles useful in primary care settings dedicated to underserved populations. Selected topics include health behaviors, health maintenance and the management of primary healthcare in underserved populations, access to mental health care and substance abuse treatment, the U.S. healthcare system (both public and private sectors), the legal and ethical bases for caring for the underserved, the public policy-making process, and management principles of strategic planning, marketing, and project management in clinics serving the underserved. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations will be incorporated into a community based experience.

***NURSE 6730 Leadership in Population Health I: 4 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6731 Leadership in Population Health II: 4 semester hours***

Prerequisites: NURSE 6730 or consent of Program Director. This clinical course is designed to provide a theoretical and practical base for leadership development in population health, community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the population's community-level intervention to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases and community-level systems to chronic conditions.

***NURSE 6737 Psychiatric-Mental Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan experiencing psychiatric-mental health concerns. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6738 Psychiatric-Mental Health II: Diagnosis & Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6737 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic, and mental health problems in this population.

***NURSE 6739 Adult-Geriatric Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6740 Adult-Geriatric Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisite: NURSE 6739 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6741 Family Health I: Diagnosis and Management of Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6742 Family Health II: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6741 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6743 Child Health I: Diagnosis and Management in Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6578, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute and chronic health and mental health problems in this population.

***NURSE 6744 Child Health II: Diagnosis and Management in Advanced Practice Nurse: 4-5 semester hours***

Prerequisites: NURSE 6743 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology, and advanced physical assessment to prepare students to assume roles in advanced nursing care of infants, children and adolescents. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply previous strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6746 Women's Health I: Diagnosis & Management in Advanced Practice Nursing: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of women across the life span, with a focus on reproductive health, including male sexual and reproductive health. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within the defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6747 Women's Health II: Diagnosis & Mgmt In Advanced Nursing Practice: 4-5 semester hours***

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of the adult-geriatric age spectrum. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

***NURSE 6870 Special Topics In Advanced Practice Nursing: 1-3 semester hours***

Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate MSN or PhD levels.

***NURSE 6875 Special Study In Graduate Nursing: 1-3 semester hours***

Prerequisites: Admission to MSN prog or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

***NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 3 semester hours***

This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

***NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 3-6 semester hours***

This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, health systems leadership, policy and evidence-based care populations.

***NURSE 6950 Advanced Nursing Practice: 4 semester hours***

Prerequisites: NURSE 6739, NURSE 6743, NURSE 6746. Advanced nursing practice examines different nursing and interdisciplinary models of case management of acute and chronic problems across the lifespan. The intensive clinical experience focuses on the student's specialty care area: adults, pediatric or women's health.

***NURSE 6951 Advanced Intensive Clinical for the Nurse Educator: 2 semester hours***

Prerequisites: NURSE 6520, NURSE 6524, NURSE 6309. This course provides a concentrated opportunity to function in an advanced nursing role as a nurse educator incorporating an intensive clinical experience focusing on the student's chosen population.

**NURSE 6952 Synthesis Practicum: 3 semester hours**

Prerequisites: All required courses in the Nurse Educator or Nursing Leadership of Health Systems option or consent of instructor. This clinical course is a concentrated opportunity to function in an advanced nursing role as a nurse administrator, integrating clinical and functional role activities within a chosen setting. Emphasis includes educator or administrator nursing practice, functional role responsibilities, and activities with emphasis on their relationship to client outcomes.

**NURSE 6954 Advanced Practice Nursing: Residency I: 3-4 semester hours**

Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744, NURSE 6747 or the consent of the Program Director. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

**NURSE 6955 Advanced Practice Nursing: Residency II: 3-6 semester hours**

Prerequisites: NURSE 6954 or the consent of the Program Director. This clinical course provides a continuation of precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

**NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours**

Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

**NURSE 7209 Role of the DNP: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to synthesize and analyze knowledge of the DNP role within a specified population focus and role. The overview of selected theories and frameworks that can be used to guide advanced practice nurses and nursing leaders in facilitating the use of evidence-based practice, understanding cultural aspects of care, and framing situational awareness. Core concepts include the regulatory, legislative, and professional influences of advanced nursing practice. Emphasis includes sub-roles of the doctorally prepared nurse including: Advanced Practice Registered Nurse (APRN), leader, consultant, expert, researcher, and educator.

**NURSE 7211 Biostatistics I: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides a foundational understanding of the use of biostatistics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

**NURSE 7212 Biostatistics II: 3 semester hours**

Prerequisites: Admission to PhD program. This course builds on statistical procedures and advances the student's understanding of advanced statistical methods including design and measurement.

**NURSE 7220 Leadership in Practice: 3 semester hours**

Prerequisites: Consent of Program Director. This course provides students with the opportunity to develop and refine critical leadership skills by focusing on improving the health of individuals and populations. The course uses a combination of didactic lectures, case-based learning and experiential exercises to explore leadership competencies including change management, strategy implementation, quality improvement, effective communication, team dynamics, and systems thinking. Emphasis is on using models and theories that facilitate inter-professional collaboration to achieve optimal health outcomes. The focus is effective communication and leadership methods necessary to establish successful inter-professional teams. Students will enhance skills in verbal, written and electronic communication; team leadership; and creating and sustaining health related initiatives. Through advanced understanding of the inter-professional dimension of healthcare, students will facilitate collaboration and remove barriers to providing safe, timely, effective, efficient, equitable and patient centered care in healthcare systems.

**NURSE 7230 Epidemiology: 3 semester hours**

Prerequisite: NURSE 7211 or Consent of Program Director. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

**NURSE 7240 Health Informatics: 3 semester hours**

Prerequisites: Consent of the Program Director. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

**NURSE 7251 Healthcare Economics: 3 semester hours**

Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

***NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours***

Prerequisite: None. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

***NURSE 7270 Policy Application for Improved Health Outcomes: 3 semester hours***

Prerequisites: NURSE 6106 or equivalent and NURSE 7230. Students learn how to effectively translate and disseminate knowledge from nursing and other health sciences to policy makers and stakeholders in order to form collaborations to affect change at various levels of the policy process. Topics to be covered include policy analysis, policy development, collaboration and negotiation specific to the policy process, building social and political capital and garnering resources to assure effective policy implementation. Students will utilize population health data, policy analysis, and policy development skills to define, shape and implement culturally competent health policy.

***NURSE 7291 DNP Capstone I: 3 semester hours***

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7292 DNP Capstone II: 3 semester hours***

Prerequisites: Consent of Program Director. This experience provides additional opportunities for practice expertise development to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7293 DNP Capstone III: 2 semester hours***

Prerequisites: Consent of Program Director. This experience provides additional opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

***NURSE 7299 DNP Seminar: 1-3 semester hours***

Prerequisites: All DNP required course work or Consent of Instructor. This seminar provides students with the opportunity to synthesize and analyze knowledge within the context of the emerging DNP role. Analysis of practice issues may include reflective practice, collaboration, health systems technology, ethics and policy.

***NURSE 7300 Prevention of Injury and Disability: 3 semester hours***

Prerequisites: Graduate status or consent of instructor. This course will examine trends in injury and disability nationally and internationally, relevant theories and conceptual models, the definition and measurement of key concepts, and analysis of interventions proposed for preventing injury and mitigating disability. The role of information and computer technologies in the management of disability will also be considered. Specific content will include age-related injury and disability, disability associated with cardiovascular and other chronic diseases, and the psychosocial contexts of disability, including traumatic stress and its outcomes.

***NURSE 7401 Research Institute I: 2 semester hours***

Prerequisites: Admission to Doctorial Study in Nursing. This course provides an introduction to the process of becoming a research scientist or translational investigator. Content will include the responsible conduct of research, its core elements, relevant policies and procedures, and relevant research. This course also includes the culture of nursing, literature reviews, scholarly writing, technology in the research process, developing a program of scholarship and effective time management.

***NURSE 7403 Developer of the Nurse Scientist: 3 semester hours***

Prerequisite: Admission to doctoral study in nursing. This course addresses the role of the PhD-prepared nurse as scientist, leader, academician, and policy maker. Students will analyze strategies for lifelong learning and development as nurse scientists and will explore avenues for building their programs of scholarship, funding opportunities, and contributing to nursing science in policy and clinical practice. Students will examine ways to collaborate effectively in order to improve health care and health outcomes.

***NURSE 7443 Healthcare Policy: 3 semester hours***

Prerequisites: Graduate Standing and Consent of the Program Director. This is a survey course examining current issues in healthcare policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in healthcare policy are explored.

***NURSE 7480 Guided Nursing Research Seminar: 1-6 semester hours***

Prerequisite: Consent of instructor. Provides opportunity to work in collaboration with faculty and peers on a focused research topic relevant to nursing.

***NURSE 7481 Development Of Nursing Science And Theory: 3 semester hours***

Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

***NURSE 7488 Qualitative Methods In Nursing Research: 3 semester hours***

Prerequisites: Admission to PhD program. Examines the relationship between theoretical and philosophical perspectives and selection of appropriate methodologies in research design. Critically explores issues related to innovations in traditional qualitative designs and emerging technologies, rigor and validity, and role of interpretive research in nursing science.

***NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours***

Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

***NURSE 7491 Advanced Nursing Theory Development And Validation: 3 semester hours***

Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

***NURSE 7498 Doctoral Seminar: 1-12 semester hours***

Prerequisite: Consent of instructor. Presentation and discussion of pertinent methodological and clinical issues related to doctoral research.

***NURSE 7499 Dissertation Research: 1-12 semester hours***

Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

***NURSE 7530 Assessment of Community Health and Infrastructure: 3 semester hours***

Prerequisites: Consent of Program Director. This course will introduce community health assessment and community infrastructure assessment. Participants will be introduced to the information and the resources available to secure and improve resilience in the community's healthcare and public health infrastructure. Participants will also be given an opportunity to work on a community-based health assessment project in conjunction with a community partner. Much of the experience will be practical and hands-on. Participants may be asked to work with a new project or join in an ongoing project.

***NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 3-6 semester hours***

Prerequisites: Consent of Program Director. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

## Optometry

## Courses

***OPTOM 8010 Anatomy, Physiology and Disease Processes I: 5 semester hours***

First in a two-semester course sequence that will detail the general anatomy of the human body along with the histology (microanatomy), physiology and disease processes of major organ systems. Course content will be presented in a modular format. Areas of discussion will include cardiovascular, respiratory, endocrine, digestive, reproductive, integumentary and peripheral and autonomic nervous systems. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

***OPTOM 8020 Basic and Clinical Optics I: 4 semester hours***

Prerequisites: Consent of instructor. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined.

***OPTOM 8030 Introduction to Optometry: 1 semester hour***

An introduction to the profession of optometry, including a consideration of the characteristics of a profession, the behaviors and attitudes of a professional, the history of optometry, the profession's legal basis, the major optometric organizations and sources and types of information available to optometrists. One hour of lecture per week.

***OPTOM 8040 Neuroanatomy: 4 semester hours***

Prerequisites: Consent of instructor. Detailed gross and microscopic anatomy of human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system.

***OPTOM 8060 Biochemistry: 3 semester hours***

Basic concepts of general and cellular biochemistry. Study of nomenclature, structure, and reactions of organic molecules. Some emphasis on visual system - tears, intraocular fluids, lens, and photochemistry.

***OPTOM 8090 Case Based Discovery For The Developing Clinician: 1 semester hour***

Students acquire curricular competencies appropriate for the professional year in which they are enrolled via in depth individual and group discovery via case based presentations. The experience will provide students the opportunity to assimilate and recognize the relationships among diverse topics emphasized within the optometric curriculum. Participants work in groups of no more than 10.

***OPTOM 8110 Anatomy, Physiology And Disease Process II: 5 semester hours***

Prerequisite: OPTOM 8010. Continuation of OPTOM 8010 Anatomy, Physiology and Disease Processes I.

***OPTOM 8120 Basic & Clinical Optics II: 5 semester hours***

Prerequisite: OPTOM 8020. Radiometry and photometry, polarization, scattering, emmetropia, myopia, hyperopia, astigmatism, models of experimental myopia, accommodation, diffraction, retinal image size, entoptic phenomena, aberrations, lasers and the eye, apertures, and optical instruments.

***OPTOM 8160 Anatomy And Physiology Of The Eye: 5 semester hours***

Prerequisites: OPTOM 8040, OPTOM 8010 or consent of instructor. Vegetative anatomy and physiology of the eye, optic nerve, orbit, and adnexa will be discussed. This includes discussion of embryology and the dynamics of ocular fluids. Four lecture hours and a two-hour laboratory per week.

**OPTOM 8180 Clinical Optometry I: 5 semester hours**

Prerequisite: OPTOM 8030. Selected tests for ocular assessment including case history, visual acuity, ophthalmoscopy, refraction, and binocular integration. The course format is two 75-minute lectures and two 2-hour laboratories.

**OPTOM 8190 Introduction to Clinical Diagnostic Reasoning: 1 semester hour**

Prerequisite: OPTOM 8090. Introduction to clinical diagnostic reasoning by individual and group case-based learning. Scenarios give students an understanding of the relationship between basic and clinical sciences and provide an introduction to established best practices.

**OPTOM 8220 Ophthalmic Optics: 4 semester hours**

Prerequisites: OPTOM 8120. Ophthalmic materials, physical characteristics of lenses and frames, paraxial optics of ophthalmic lenses, ophthalmic prisms, lens specifications, special lenses, multifocal lenses, unique designs, aniseikonic lenses, aberration theory and its application to lens design, lenses for low vision, protective eyewear.

**OPTOM 8230 Interpersonal Communications: 2 semester hours**

Prerequisites: OPTOM 8030. Principles of human interpersonal relationships. The enhancement of listening and verbal skills will be provided. Emphasis will be preparing the student to understand and manage the many human interpersonal relationships necessary in the practice of optometry. Two hours of lecture per week.

**OPTOM 8240 Ocular Motility: 2 semester hours**

Prerequisites: OPTOM 8040 or consent of instructor. The anatomy, physiology, neurology, measurement, characteristic, and control of the intra- and extraocular system.

**OPTOM 8250 Monocular Sensory Processes: 5 semester hours**

Prerequisite: OPTOM 8160 or consent of instructor. Monocular sensory processes of vision: phototransduction, visual neurophysiology, spatial and temporal vision, acuity, light adaptation and discrimination, color, motion, objects and attention. Sensory processes are considered from both the psychophysical aspects and neurophysiological bases, including the changes during development, adulthood and aging. Four hours of lecture and two hours of laboratory per week.

**OPTOM 8260 Foundations of Ocular and Systemic Disease and Management I: 4 semester hours**

Prerequisites: OPTOM 8110, OPTOM 8160, OPTOM 8180. The first in a comprehensive series of courses that address disease processes involving the eye and systemic disease. Emphasis is on pharmacology of the eye and specified organ systems. Clinical diagnoses, and optometric and medical management of ocular and systemic disease are discussed. Diagnostic procedures for assessing the health of the eye including binocular indirect ophthalmoscopy are taught in the laboratory.

**OPTOM 8280 Clinical Optometry II: 5 semester hours**

Prerequisites: OPTOM 8180. Continuation of clinical optometry. Patient care in the areas of refraction, binocular integration, perimetry, and biomicroscopy.

**OPTOM 8320 Ophthalmic Dispensing: 1 semester hour**

Prerequisites: OPTOM 8220. Clinical experience in verification and dispensing of ophthalmic materials.

**OPTOM 8340 Binocular Vision And Space Perception: 4 semester hours**

Prerequisites: OPTOM 8240, OPTOM 8280 and OPTOM 8250 or consent of instructor. Binocular vision and space perception. Visual direction, theory of correspondence, fusion, rivalry, ocular dominance, and stereopsis. Developmental aspects and neurophysiological mechanisms.

**OPTOM 8350 Epidemiology: 2 semester hours**

A review of descriptive statistics, probability sampling, correlation, and prediction. The essentials of epidemiological study procedures and a discussion of the epidemiology of vision disorders.

**OPTOM 8370 Foundations of Ocular and Systemic Disease and Management II: 5 semester hours**

Prerequisite: OPTOM 8260. The second in the series of courses that address diseases of the eye, clinical diagnoses, and optometric and medical management of ocular and systemic disease. The laboratories emphasize diagnostic techniques and treatment skills, preparation for the initial clinic privileging examination and augment important concepts introduced in the classroom environment.

**OPTOM 8380 Clinical Optometry III: 2 semester hours**

Prerequisites: OPTOM 8280. Continuation of Clinical Optometry II. Diagnosis, prognosis and management of visual problems. Emphasis on conducting comprehensive eye exams in preparation for the initial clinical privileging examination.

**OPTOM 8390 Specialty Clinic Laboratory: 1 semester hour**

Prerequisite: OPTOM 8280. Students acquire and practice skills for pediatric, binocular vision, low vision, and contact lens examinations. The course format is one 2-hour laboratory per week.

**OPTOM 8391 Clinical Topics in Contact Lenses: 1 semester hour**

Prerequisite: OPTOM 8280. This is the first in a series of 3 courses addressing contact lenses. The focus is on contact lens care and evaluation. The course format is one 50-minute lecture per week.

**OPTOM 8392 Clinical Topics in Binocular Vision and Pediatric Optometry: 1 semester hour**

Prerequisite: OPTOM 8240 and OPTOM 8280. This course presents clinical diagnostic and management skills for both pediatric patients and those with binocular vision anomalies. The course format is lecture.

**OPTOM 8393 Clinical Topics in Low Vision: 1 semester hour**

Prerequisite: OPTOM 8280. This course presents clinical diagnostic and management skills for patients with low vision. the course format is one 50-minute lecture per week.

**OPTOM 8400 Directed Readings: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent literature review of a specific topic in any area of basic or clinical vision science guided by a full time faculty member with appropriate interests. Credit is awarded upon approval of a written paper regarding the selected topic. This elective may be repeated up to a total of 3 credit hours.

**OPTOM 8410 Directed Research: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent research. Projects may be laboratory, library, or clinically based research in any area of vision science. Projects will be supervised by one or more full time faculty members. This elective may be repeated up to a total of 6 credit hours.

**OPTOM 8450 Introduction to Primary Care Clinic: 4 semester hours**

Prerequisites: OPTOM 8230, OPTOM 8320, OPTOM 8340, OPTOM 8370, OPTOM 8380, OPTOM 8390, OPTOM 8391, OPTOM 8392, OPTOM 8393, OPTOM 8560, and successful completion of the Clinical Proficiency Examination. The first in a series of adult primary care courses. Students perform comprehensive examinations, make diagnoses, and develop management plans with patient education under supervision of a faculty attending. Students participate in accompanying clinic seminar discussion groups.

**OPTOM 8460 Foundations of Ocular and Systemic Disease and Management III: 2 semester hours**

Prerequisites: OPTOM 8370. The third course in the foundation series that addresses ocular and systemic diseases and their management.

**OPTOM 8500 Primary Care Clinic I: 6 semester hours**

Prerequisites: OPTOM 8450. The second in a series of adult primary care courses. Students examine and care for patients under supervision of a faculty attending. Students are expected to become more independent in decision-making. Diagnostic coding is introduced.

**OPTOM 8520 Contact Lenses I: 3 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8391. Historical development of the contact lens and its use. Basic lens terminology, specifications, physiochemical characteristics, optics, fabrication, and verification. Preliminary patient evaluation, indications and contraindications for contact lenses. Basic fitting philosophies for all lens types. Lens care and patient education. Patient and practice management considerations.

**OPTOM 8540 Binocular Vision Anomalies: 4 semester hours**

Prerequisites: OPTOM 8340, OPTOM 8380 and OPTOM 8392 or consent of instructor. The etiology, epidemiology, symptoms, signs, and course sequelae of the obstacles to binocular vision-sensory, integrative, and motor. The detection, diagnosis, prognosis, and orthoptic treatment of such anomalies. Clinical care of aniseikonias.

**OPTOM 8550 Low Vision: 2 semester hours**

Prerequisite: OPTOM 8380 and OPTOM 8393. The etiology, epidemiology, symptoms, signs, course, and sequelae of low vision problems. Methods of testing, prognosis, selection of therapy, design of environmental and optical aids, problems of rehabilitation. Agencies, laws, public and social assistance for the partially sighted and blind. The course format is lecture and 1 two-hour laboratory per week.

**OPTOM 8560 Public Health: 2 semester hours**

A review of local, state and federal organizations involved in health care, comprehensive health planning, new trends in health care delivery. The assessment of the quality of health care delivery. The relationship of vision care to these topics is emphasized.

**OPTOM 8570 Advanced Topics In Ocular And Systemic Disease And Management: 6 semester hours**

Prerequisite: OPTOM 8370. The third semester of a comprehensive, systems based course sequence. Advanced topics in diagnoses as well as optometric and medical management of ocular and systemic disease will be discussed. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

**OPTOM 8600 Primary Care Clinic II: 6 semester hours**

Prerequisites: OPTOM 8500, OPTOM 8520, OPTOM 8540, OPTOM 8550, OPTOM 8570, and OPTOM 8650. The final course in the adult primary care sequence. Students examine and care for patients under supervision of a faculty attending. Students are expected to function nearly independently in final preparation for the Externship Program.

**OPTOM 8610 Environmental Vision: 2 semester hours**

Prerequisites: OPTOM 8500. This course considers the relationship of the eye and vision to all aspects of one's environment including home, work, recreation, and transportation. Emphasis will be placed on protecting the eye from injury and maximizing vision performance.

**OPTOM 8620 Contact Lenses II: 2 semester hours**

Prerequisites: OPTOM 8520. Advanced contact lens fitting, theories, and clinical methods for astigmatic, presbyopic, keratoconic, and aphakic designs. Special considerations include the use of corneal topography, orthokeratology, disposable lenses, lenses for extended wear and lenses for color deficiencies. The course format is one lecture per week.

**OPTOM 8630 Practice Management III: 3 semester hours**

Prerequisites: OPTOM 8030 and OPTOM 8230. The development and management of an optometric practice from a patient and community service point of view - office design, office routine, patient care administration, personnel management, recall systems. The establishment, development and management of an optometric practice from a business point of view. Legal developments, governmental regulations, legislation and the legislative process, malpractice, professional ethics, taxes, fee structures, insurance and accounting methods.

**OPTOM 8640 Pediatric Optometry: 2 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8540. Special examination and management considerations of the pediatric patient. Psychological, physiological, social, and demographic aspects of early visual development. Discussion of the optometric considerations of children with learning and reading disabilities. The course format is two lecture/discussions per week.

**OPTOM 8650 Geriatric Optometry: 2 semester hours**

Prerequisite: OPTOM 8380. Special examination and management considerations of the geriatric patient will be discussed. Psychological, physiological, social, and demographic aspects of aging, as well as ocular changes associated with the aging process will be taught.

**OPTOM 8660 Contact Lens Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8391. The clinical examination and care of patients in the optometric specialty area of contact lenses.

**OPTOM 8670 Comprehensive Case Review and analysis: 1 semester hour**

Prerequisites: Enrollment in OPTOM 8500 or OPTOM 8600. Discussion of the diagnosis and management of common clinic patient encounters via Socratic teaching techniques. Interns are encouraged to present actual cases which have been particularly challenging for them. The course format is a weekly seminar.

**OPTOM 8680 Ophthalmic Lasers: 1 semester hour**

Prerequisites: OPTOM 8570. Principles and applications of lasers for ophthalmic use. Emphasis will be placed on demonstration where possible. Topics will include the principles, physics and safety concerns of ophthalmic lasers. Lasers used in retinal imaging, and in the care of glaucoma, cataract, refractive conditions, and cosmetic conditions will be discussed and demonstrated. Co-management of patients requiring ophthalmic laser treatment will also be covered.

**OPTOM 8690 Pediatric/Binocular Vision Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8392. The clinical examination and care of patients in the optometric specialty areas of binocular vision and pediatric vision.

**OPTOM 8700 UM-St. Louis Pediatric/Binocular Vision Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients in pediatric/binocular vision clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8710 and OPTOM 8720.

**OPTOM 8710 UM-St. Louis Contact Lens Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework required Comprehensive clinical care in the contact lens clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8720.

**OPTOM 8720 UMSL Eye Health Management Patient Care: 1 semester hour**

Prerequisites: Successful completion of all first, second, and third year course work. Comprehensive clinical care in the eye health management clinic with ophthalmologists at the University of Missouri-St. Louis University Eye Center. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8710.

**OPTOM 8730 Community Service Patient Care Rotation A: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8750 Community Service Patient Care Rotation B: 7 semester hours**

Prerequisite: Successful completion of all first, second, and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8760 Community Service Patient Care Rotation D: 7 semester hours**

Prerequisite: Successful completion of all first, second and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8770 Community Service Patient Care Rotation C: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8780 External Rotation In Institutional Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of primary care patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8790 External Rotation In Ocular Disease Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients with ocular disease at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8800 External Rotation In Pediatric/Binocular Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of pediatric/binocular vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8810 External Rotation In Contact Lens Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of contact lens patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8811 External Rotation In Ophthalmic Surgical Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Ophthalmic Surgical Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8812 External Rotation In Geriatric Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Geriatric Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8813 External Rotation In Ophthalmic Sports Vision: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Sports Vision Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8814 External Rotation In Primary Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Primary Care Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8815 External Rotation In Pathology And Treatment: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in pathology and treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8816 External Rotation In Ophthalmic Laser Treatment: 7 semester hours**

Prerequisites: Successful Completion of all second and third year coursework. Comprehensive clinical care in ophthalmic laser treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8817 External Rotation In Rehabilitative Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in Rehabilitative Patient Care at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8820 External Rotation In Low Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of low vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8830 External Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of a general population of optometric patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8840 External Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at external site approved by the School of Optometry's Externship Council.

**OPTOM 8850 Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at the UM-St. Louis Center for Eye Care, UM-St. Louis Optometric Center, or the UM-St. Louis East St. Louis Eye Center.

**OPTOM 8870 Practice Management IV: 2 semester hours**

Prerequisites: Successful completion of all first, second and third year. Further in-depth discussion in practice management.

**OPTOM 8880 Clinic Seminar: 1 semester hour**

Prerequisites: Successful completion of all first, second and third year. Presentation and discussion of interesting clinical patients. Additional clinical testing techniques and concepts. Further discussion of patient data analysis-the process of determining diagnosis, prognosis, and therapy. Further discussions in the optometric specialties.

**OPTOM 8970 Geriatric Patient Care Delivery: 3-6 semester hours**

Prerequisite: Consent of Geriatric Residency Instructors. Direct optometric patient care to a population that is largely geriatric. Emphasis will be on integrating specialty care available for these patients to provide comprehensive vision care. Two hours of direct patient care per week are required per hour of credit. In addition, the student will attend weekly supervisory meetings. May be repeated with consent of instructor for a total of 18 credits. Patient care will become more independent of direct supervision and the type of patients seen will be more varied with each repeat.

## Courses

**OPTOM 8010 Anatomy, Physiology and Disease Processes I: 5 semester hours**

First in a two-semester course sequence that will detail the general anatomy of the human body along with the histology (microanatomy), physiology and disease processes of major organ systems. Course content will be presented in a modular format. Areas of discussion will include cardiovascular, respiratory, endocrine, digestive, reproductive, integumentary and peripheral and autonomic nervous systems. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

**OPTOM 8020 Basic and Clinical Optics I: 4 semester hours**

Prerequisites: Consent of instructor. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined.

**OPTOM 8030 Introduction to Optometry: 1 semester hour**

An introduction to the profession of optometry, including a consideration of the characteristics of a profession, the behaviors and attitudes of a professional, the history of optometry, the profession's legal basis, the major optometric organizations and sources and types of information available to optometrists. One hour of lecture per week.

**OPTOM 8040 Neuroanatomy: 4 semester hours**

Prerequisites: Consent of instructor. Detailed gross and microscopic anatomy of human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system.

**OPTOM 8060 Biochemistry: 3 semester hours**

Basic concepts of general and cellular biochemistry. Study of nomenclature, structure, and reactions of organic molecules. Some emphasis on visual system - tears, intraocular fluids, lens, and photochemistry.

**OPTOM 8090 Case Based Discovery For The Developing Clinician: 1 semester hour**

Students acquire curricular competencies appropriate for the professional year in which they are enrolled via in depth individual and group discovery via case based presentations. The experience will provide students the opportunity to assimilate and recognize the relationships among diverse topics emphasized within the optometric curriculum. Participants work in groups of no more than 10.

**OPTOM 8110 Anatomy, Physiology And Disease Process II: 5 semester hours**

Prerequisite: OPTOM 8010. Continuation of OPTOM 8010 Anatomy, Physiology and Disease Processes I.

**OPTOM 8120 Basic & Clinical Optics II: 5 semester hours**

Prerequisite: OPTOM 8020. Radiometry and photometry, polarization, scattering, emmetropia, myopia, hyperopia, astigmatism, models of experimental myopia, accommodation, diffraction, retinal image size, entoptic phenomena, aberrations, lasers and the eye, apertures, and optical instruments.

**OPTOM 8160 Anatomy And Physiology Of The Eye: 5 semester hours**

Prerequisites: OPTOM 8040, OPTOM 8010 or consent of instructor. Vegetative anatomy and physiology of the eye, optic nerve, orbit, and adnexa will be discussed. This includes discussion of embryology and the dynamics of ocular fluids. Four lecture hours and a two-hour laboratory per week.

**OPTOM 8180 Clinical Optometry I: 5 semester hours**

Prerequisite: OPTOM 8030. Selected tests for ocular assessment including case history, visual acuity, ophthalmoscopy, refraction, and binocular integration. The course format is two 75-minute lectures and two 2-hour laboratories.

**OPTOM 8190 Introduction to Clinical Diagnostic Reasoning: 1 semester hour**

Prerequisite: OPTOM 8090. Introduction to clinical diagnostic reasoning by individual and group case-based learning. Scenarios give students an understanding of the relationship between basic and clinical sciences and provide an introduction to established best practices.

**OPTOM 8220 Ophthalmic Optics: 4 semester hours**

Prerequisites: OPTOM 8120. Ophthalmic materials, physical characteristics of lenses and frames, paraxial optics of ophthalmic lenses, ophthalmic prisms, lens specifications, special lenses, multifocal lenses, unique designs, aniseikonic lenses, aberration theory and its application to lens design, lenses for low vision, protective eyewear.

**OPTOM 8230 Interpersonal Communications: 2 semester hours**

Prerequisites: OPTOM 8030. Principles of human interpersonal relationships. The enhancement of listening and verbal skills will be provided. Emphasis will be preparing the student to understand and manage the many human interpersonal relationships necessary in the practice of optometry. Two hours of lecture per week.

**OPTOM 8240 Ocular Motility: 2 semester hours**

Prerequisites: OPTOM 8040 or consent of instructor. The anatomy, physiology, neurology, measurement, characteristic, and control of the intra- and extraocular system.

**OPTOM 8250 Monocular Sensory Processes: 5 semester hours**

Prerequisite: OPTOM 8160 or consent of instructor. Monocular sensory processes of vision: phototransduction, visual neurophysiology, spatial and temporal vision, acuity, light adaptation and discrimination, color, motion, objects and attention. Sensory processes are considered from both the psychophysical aspects and neurophysiological bases, including the changes during development, adulthood and aging. Four hours of lecture and two hours of laboratory per week.

**OPTOM 8260 Foundations of Ocular and Systemic Disease and Management I: 4 semester hours**

Prerequisites: OPTOM 8110, OPTOM 8160, OPTOM 8180. The first in a comprehensive series of courses that address disease processes involving the eye and systemic disease. Emphasis is on pharmacology of the eye and specified organ systems. Clinical diagnoses, and optometric and medical management of ocular and systemic disease are discussed. Diagnostic procedures for assessing the health of the eye including binocular indirect ophthalmoscopy are taught in the laboratory.

**OPTOM 8280 Clinical Optometry II: 5 semester hours**

Prerequisites: OPTOM 8180. Continuation of clinical optometry. Patient care in the areas of refraction, binocular integration, perimetry, and biomicroscopy.

**OPTOM 8320 Ophthalmic Dispensing: 1 semester hour**

Prerequisites: OPTOM 8220. Clinical experience in verification and dispensing of ophthalmic materials.

**OPTOM 8340 Binocular Vision And Space Perception: 4 semester hours**

Prerequisites: OPTOM 8240, OPTOM 8280 and OPTOM 8250 or consent of instructor. Binocular vision and space perception. Visual direction, theory of correspondence, fusion, rivalry, ocular dominance, and stereopsis. Developmental aspects and neurophysiological mechanisms.

**OPTOM 8350 Epidemiology: 2 semester hours**

A review of descriptive statistics, probability sampling, correlation, and prediction. The essentials of epidemiological study procedures and a discussion of the epidemiology of vision disorders.

**OPTOM 8370 Foundations of Ocular and Systemic Disease and Management II: 5 semester hours**

Prerequisite: OPTOM 8260. The second in the series of courses that address diseases of the eye, clinical diagnoses, and optometric and medical management of ocular and systemic disease. The laboratories emphasize diagnostic techniques and treatment skills, preparation for the initial clinic privileging examination and augment important concepts introduced in the classroom environment.

**OPTOM 8380 Clinical Optometry III: 2 semester hours**

Prerequisites: OPTOM 8280. Continuation of Clinical Optometry II. Diagnosis, prognosis and management of visual problems. Emphasis on conducting comprehensive eye exams in preparation for the initial clinical privileging examination.

**OPTOM 8390 Specialty Clinic Laboratory: 1 semester hour**

Prerequisite: OPTOM 8280. Students acquire and practice skills for pediatric, binocular vision, low vision, and contact lens examinations. The course format is one 2-hour laboratory per week.

**OPTOM 8391 Clinical Topics in Contact Lenses: 1 semester hour**

Prerequisite: OPTOM 8280. This is the first in a series of 3 courses addressing contact lenses. The focus is on contact lens care and evaluation. The course format is one 50-minute lecture per week.

**OPTOM 8392 Clinical Topics in Binocular Vision and Pediatric Optometry: 1 semester hour**

Prerequisite: OPTOM 8240 and OPTOM 8280. This course presents clinical diagnostic and management skills for both pediatric patients and those with binocular vision anomalies. The course format is lecture.

**OPTOM 8393 Clinical Topics in Low Vision: 1 semester hour**

Prerequisite: OPTOM 8280. This course presents clinical diagnostic and management skills for patients with low vision. The course format is one 50-minute lecture per week.

**OPTOM 8400 Directed Readings: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent literature review of a specific topic in any area of basic or clinical vision science guided by a full time faculty member with appropriate interests. Credit is awarded upon approval of a written paper regarding the selected topic. This elective may be repeated up to a total of 3 credit hours.

**OPTOM 8410 Directed Research: 1-3 semester hours**

Prerequisite: Consent of Instructor. Credit is given for independent research. Projects may be laboratory, library, or clinically based research in any area of vision science. Projects will be supervised by one or more full time faculty members. This elective may be repeated up to a total of 6 credit hours.

**OPTOM 8450 Introduction to Primary Care Clinic: 4 semester hours**

Prerequisites: OPTOM 8230, OPTOM 8320, OPTOM 8340, OPTOM 8370, OPTOM 8380, OPTOM 8390, OPTOM 8391, OPTOM 8392, OPTOM 8393, OPTOM 8560, and successful completion of the Clinical Proficiency Examination. The first in a series of adult primary care courses. Students perform comprehensive examinations, make diagnoses, and develop management plans with patient education under supervision of a faculty attending. Students participate in accompanying clinic seminar discussion groups.

**OPTOM 8460 Foundations of Ocular and Systemic Disease and Management III: 2 semester hours**

Prerequisites: OPTOM 8370. The third course in the foundation series that addresses ocular and systemic diseases and their management.

**OPTOM 8500 Primary Care Clinic I: 6 semester hours**

Prerequisites: OPTOM 8450. The second in a series of adult primary care courses. Students examine and care for patients under supervision of a faculty attending. Students are expected to become more independent in decision-making. Diagnostic coding is introduced.

**OPTOM 8520 Contact Lenses I: 3 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8391. Historical development of the contact lens and its use. Basic lens terminology, specifications, physiochemical characteristics, optics, fabrication, and verification. Preliminary patient evaluation, indications and contraindications for contact lenses. Basic fitting philosophies for all lens types. Lens care and patient education. Patient and practice management considerations.

**OPTOM 8540 Binocular Vision Anomalies: 4 semester hours**

Prerequisites: OPTOM 8340, OPTOM 8380 and OPTOM 8392 or consent of instructor. The etiology, epidemiology, symptoms, signs, and course sequelae of the obstacles to binocular vision-sensory, integrative, and motor. The detection, diagnosis, prognosis, and orthoptic treatment of such anomalies. Clinical care of aniseikonias.

**OPTOM 8550 Low Vision: 2 semester hours**

Prerequisite: OPTOM 8380 and OPTOM 8393. The etiology, epidemiology, symptoms, signs, course, and sequelae of low vision problems. Methods of testing, prognosis, selection of therapy, design of environmental and optical aids, problems of rehabilitation. Agencies, laws, public and social assistance for the partially sighted and blind. The course format is lecture and 1 two-hour laboratory per week.

**OPTOM 8560 Public Health: 2 semester hours**

A review of local, state and federal organizations involved in health care, comprehensive health planning, new trends in health care delivery. The assessment of the quality of health care delivery. The relationship of vision care to these topics is emphasized.

**OPTOM 8570 Advanced Topics In Ocular And Systemic Disease And Management: 6 semester hours**

Prerequisite: OPTOM 8370. The third semester of a comprehensive, systems based course sequence. Advanced topics in diagnoses as well as optometric and medical management of ocular and systemic disease will be discussed. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

**OPTOM 8600 Primary Care Clinic II: 6 semester hours**

Prerequisites: OPTOM 8500, OPTOM 8520, OPTOM 8540, OPTOM 8550, OPTOM 8570, and OPTOM 8650. The final course in the adult primary care sequence. Students examine and care for patients under supervision of a faculty attending. Students are expected to function nearly independently in final preparation for the Externship Program.

**OPTOM 8610 Environmental Vision: 2 semester hours**

Prerequisites: OPTOM 8500. This course considers the relationship of the eye and vision to all aspects of one's environment including home, work, recreation, and transportation. Emphasis will be placed on protecting the eye from injury and maximizing vision performance.

**OPTOM 8620 Contact Lenses II: 2 semester hours**

Prerequisites: OPTOM 8520. Advanced contact lens fitting, theories, and clinical methods for astigmatic, presbyopic, keratoconic, and aphakic designs. Special considerations include the use of corneal topography, orthokeratology, disposable lenses, lenses for extended wear and lenses for color deficiencies. The course format is one lecture per week.

**OPTOM 8630 Practice Management III: 3 semester hours**

Prerequisites: OPTOM 8030 and OPTOM 8230. The development and management of an optometric practice from a patient and community service point of view - office design, office routine, patient care administration, personnel management, recall systems. The establishment, development and management of an optometric practice from a business point of view. Legal developments, governmental regulations, legislation and the legislative process, malpractice, professional ethics, taxes, fee structures, insurance and accounting methods.

**OPTOM 8640 Pediatric Optometry: 2 semester hours**

Prerequisites: OPTOM 8380 and OPTOM 8540. Special examination and management considerations of the pediatric patient. Psychological, physiological, social, and demographic aspects of early visual development. Discussion of the optometric considerations of children with learning and reading disabilities. The course format is two lecture/discussions per week.

**OPTOM 8650 Geriatric Optometry: 2 semester hours**

Prerequisite: OPTOM 8380. Special examination and management considerations of the geriatric patient will be discussed. Psychological, physiological, social, and demographic aspects of aging, as well as ocular changes associated with the aging process will be taught.

**OPTOM 8660 Contact Lens Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8391. The clinical examination and care of patients in the optometric specialty area of contact lenses.

**OPTOM 8670 Comprehensive Case Review and analysis: 1 semester hour**

Prerequisites: Enrollment in OPTOM 8500 or OPTOM 8600. Discussion of the diagnosis and management of common clinic patient encounters via Socratic teaching techniques. Interns are encouraged to present actual cases which have been particularly challenging for them. The course format is a weekly seminar.

**OPTOM 8680 Ophthalmic Lasers: 1 semester hour**

Prerequisites: OPTOM 8570. Principles and applications of lasers for ophthalmic use. Emphasis will be placed on demonstration where possible. Topics will include the principles, physics and safety concerns of ophthalmic lasers. Lasers used in retinal imaging, and in the care of glaucoma, cataract, refractive conditions, and cosmetic conditions will be discussed and demonstrated. Co-management of patients requiring ophthalmic laser treatment will also be covered.

**OPTOM 8690 Pediatric/Binocular Vision Specialty Clinic: 1 semester hour**

Prerequisites: OPTOM 8392. The clinical examination and care of patients in the optometric specialty areas of binocular vision and pediatric vision.

**OPTOM 8700 UM-St. Louis Pediatric/Binocular Vision Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients in pediatric/binocular vision clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8710 and OPTOM 8720.

**OPTOM 8710 UM-St. Louis Contact Lens Patient Care: 3 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework required Comprehensive clinical care in the contact lens clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8720.

**OPTOM 8720 UMSL Eye Health Management Patient Care: 1 semester hour**

Prerequisites: Successful completion of all first, second, and third year course work. Comprehensive clinical care in the eye health management clinic with ophthalmologists at the University of Missouri-St. Louis University Eye Center. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8710.

**OPTOM 8730 Community Service Patient Care Rotation A: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8750 Community Service Patient Care Rotation B: 7 semester hours**

Prerequisite: Successful completion of all first, second, and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8760 Community Service Patient Care Rotation D: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year course work. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8770 Community Service Patient Care Rotation C: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8780 External Rotation In Institutional Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of primary care patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8790 External Rotation In Ocular Disease Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients with ocular disease at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8800 External Rotation In Pediatric/Binocular Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of pediatric/binocular vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8810 External Rotation In Contact Lens Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of contact lens patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8811 External Rotation In Ophthalmic Surgical Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Ophthalmic Surgical Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8812 External Rotation In Geriatric Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Geriatric Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8813 External Rotation In Ophthalmic Sports Vision: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Sports Vision Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8814 External Rotation In Primary Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Primary Care Patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8815 External Rotation In Pathology And Treatment: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in pathology and treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8816 External Rotation In Ophthalmic Laser Treatment: 7 semester hours**

Prerequisites: Successful Completion of all second and third year coursework. Comprehensive clinical care in ophthalmic laser treatment of patients at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8817 External Rotation In Rehabilitative Patient Care: 7 semester hours**

Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in Rehabilitative Patient Care at an external site approved by the College of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8820 External Rotation In Low Vision Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of low vision patients at an external site approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8830 External Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of a general population of optometric patients at external sites approved by the School of Optometry's Externship Council. This course fulfills one of the clinic courses required for graduation.

**OPTOM 8840 External Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at external site approved by the School of Optometry's Externship Council.

**OPTOM 8850 Supplementary Rotation In General Patient Care: 7 semester hours**

Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at the UM-St. Louis Center for Eye Care, UM-St. Louis Optometric Center, or the UM-St. Louis East St. Louis Eye Center.

**OPTOM 8870 Practice Management IV: 2 semester hours**

Prerequisites: Successful completion of all first, second and third year. Further in-depth discussion in practice management.

**OPTOM 8880 Clinic Seminar: 1 semester hour**

Prerequisites: Successful completion of all first, second and third year. Presentation and discussion of interesting clinical patients. Additional clinical testing techniques and concepts. Further discussion of patient data analysis-the process of determining diagnosis, prognosis, and therapy. Further discussions in the optometric specialities.

**OPTOM 8970 Geriatric Patient Care Delivery: 3-6 semester hours**

Prerequisite: Consent of Geriatric Residency Instructors. Direct optometric patient care to a population that is largely geriatric. Emphasis will be on integrating specialty care available for these patients to provide comprehensive vision care. Two hours of direct patient care per week are required per hour of credit. In addition, the student will attend weekly supervisory meetings. May be repeated with consent of instructor for a total of 18 credits. Patient care will become more independent of direct supervision and the type of patients seen will be more varied with each repeat.

# Philosophy

## Courses

**PHIL 1021 Choice and Chance: 3 semester hours**

Prerequisites: A score of 22 or higher on the ACT Math sub-test; or a grade of C or better in a two- or four-year college intermediate algebra course; or a satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. Same as MATH 1021. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**PHIL 1030 Present Moral Problems: 3 semester hours**

This course will explore a range of ethical dilemmas with an eye towards living the best life. How should I live? What actions are right and wrong? How should I treat myself and others? In this class, we will consider these and other issues by investigating practical problems in daily life including: human rights, the environment, hunger and poverty, war and violence, racial and ethnic discrimination, gender roles and marriage, abortion, and euthanasia,.

**PHIL 1050 Existentialism and Phenomenology: 3 semester hours**

The course will study major works by the major philosophers in the existential and phenomenological traditions. Topics will include what it means to live an authentic life, the structure and content of conscious experience, the construction of the social arena, and what it means to live in a society.

**PHIL 1090 Philosophy Looks at the Arts: 3 semester hours**

This online course will explore the distinct resources of various arts - the raw materials of each, what each can represent, express, convey - and key differences among them. After an introductory unit devoted to art in general, the course will present eight units examining the arts of painting, photography, sculpture, architecture, music, literature, drama, and film. The course will employ a variety of instructional materials. These include posted essays, streaming video, readings from an assigned text, and participation on an interface discussion board.

**PHIL 1091 Great Philosophers: 3 semester hours**

This online course introduces philosophy through a survey and examination of the ideas of fifteen of the most important figures in the history of the subject. From Socrates to Nietzsche, the questions, answers, and lives of the great philosophers are explored in a multimedia context. This course does not satisfy any of the requirements for philosophy major or minor.

**PHIL 1110 Western Philosophy I: Antiquity To The Renaissance: 3 semester hours**

Lectures and discussions tracing the development of western philosophy from its beginnings among the pre-Socratics through the Middle Ages and Renaissance. Philosophical ideas will be examined in the cultural and historical context: the Greek city-state, the rise of Christianity, etc.

**PHIL 1111 Western Philosophy II: Descartes To The Present: 3 semester hours**

Lectures and discussions on the development of western philosophy from Descartes (1596-1650) to the present. Philosophical ideas will be examined with an eye to their historical and cultural setting: the rise of modern science, the industrial revolution, the rise of capitalism, etc.

**PHIL 1120 Asian Philosophy: 3 semester hours**

Critical study of selected philosophical classics of India and China.

**PHIL 1125 Islamic Philosophy: 3 semester hours**

An introduction to arabic philosophy in the islamic classical period (roughly from the mid-ninth through the twelfth centuries). We consider the philosophical and theological background, and then examine the thought of such notable Islamic philosophers as al-Kindi, Ibn Sina, al-Ghazali, and Ibn Rushd. Topics treated typically include proofs for the existence of God, whether the world is eternal or had a beginning, the nature of the soul and whether it is immortal, and the distinction between essence and existence. This course fulfills the cultural diversity requirement.

**PHIL 1130 Approaches To Ethics: 3 semester hours**

A study and discussion of representative topics in moral philosophy such as moral skepticism, moral objectivity, theories of obligation and value, evaluation of social institutions and the relation between morality and science. Traditional and contemporary writers will be considered.

**PHIL 1150 Introduction to Philosophy: 3 semester hours**

A study and discussion of representative topics in philosophy such as free will and determinism, concepts of mind and body, the basis of value judgments, knowledge and belief, and the possibility of constructing a world view.

**PHIL 1151 Love 101: 3 semester hours**

A critical review of what media personalities, philosophers, criminal justice experts, medical experts, neuroscientists, and psychologists have said about love and its place in our lives. Included will be such topics as the neuroscience of love, love across culture, love and commitment issues, marriage and the "seven-year itch," jealousy, domestic violence, and verbal abuse. Larger questions will include the role of love in the good life; the ethics of love; the psychological consequences of obsession, breakups and divorce; arranged marriages vs. freely chosen love; and the morality of laws that affect relationships between loving partners.

**PHIL 1160 Critical Thinking: 3 semester hours**

An introduction to the language and logical structure of arguments, the principles of sound reasoning, and application of these principles in a variety of contexts.

**PHIL 1163 Disagreement, Difference, Diversity: 6 semester hours**

Same as ANTHRO 1163. This interdisciplinary course will combine material from philosophy, anthropology, and sociology to examine the ways we encounter and accommodate disagreement in our daily lives. The unifying thread is our ability to deal with various sorts of opposition: differences of opinion, differences in practice, and differences in how we construct and address both biological and cultural variation. The course will combine units on informal logic and applied ethics from philosophy together with units on the social construction of difference and the understanding of human diversity from anthropology and sociology. This course will be worth 6 SCHs.

**PHIL 1178 Superhuman Mind: 3 semester hours**

As a study of people with special neurological talents, this course will look at cases of people who became geniuses by accident, human echolocation (deaf people who can detect sound), lucid dreaming, telepathy used to solve crimes, and more.

**PHIL 1180 Science vs. God: 3 semester hours**

This course examines whether religion and science are compatible, discusses the science-religion debate historically, and broaches philosophical issues surrounding belief, especially whether belief should be based in empirical evidence or in faith. Following these introductory course sessions, the class will discuss, in detail, topics in science and religion, including creation versus evolution; human nature (including abortion and stem cell research); the nature of sexuality and gender; the science of religion; morality; the environment from a religious perspective; meaningfulness in the universe; and finally, evidence for or against the afterlife, existence of a divinity, and divine providence.

**PHIL 1185 Philosophy Of Religion: 3 semester hours**

A philosophical investigation of such problems as the nature of religious faith and experience, the relation of faith and reason, alternative concepts of deity and the problem of evil.

**PHIL 2249 Accounting Ethics: 3 semester hours**

The course is a study of moral problems as they relate to the profession of accounting. We will analyze a number of major cases (Enron, HealthSouth, etc.) in which accounting lapses were involved, and we will look at general moral theories which might illuminate these problems. A major component of the course work will be writing essays which address specific moral dilemmas which have arisen or might arise for accountants. The course is primarily online, but there will be five required 75-minute class meetings spread through the semester.

**PHIL 2250 Philosophy And Current Issues: 3 semester hours**

A careful examination of such current social controversies as women's liberation, the ethics of abortion, public accountability of holders of high offices, and the subtler forms of racism and other prejudices. Although there is no formal prerequisite, it is recommended that students have taken, or be concurrently enrolled in, at least one other philosophy course.

**PHIL 2251 Sexual Ethics: 3 semester hours**

A critical review of what philosophers, both classical and contemporary, have said about sexual experience and its place in our lives. Included will be such topics as sexual desire, sexual perversion, love and commitment, marriage and adultery, larger questions might include that role of sexual experience in the good life, issues of sexual privacy, and the morality of laws which regulate sexual activity.

**PHIL 2252 Philosophical Foundations Of Criminal Justice: 3 semester hours**

Same as CRIMIN 2252. This course will address fundamental conceptual and ethical issues that arise in the context of the legal system. Questions may include: How does punishment differ from pre-trial detention? How, if at all, can it be justified? Is the death penalty ever justified? When is it morally permissible for juries to acquit defendants who are legally guilty? Is plea bargaining unjust? Why might people be morally obligated to obey the laws? Are laws restricting civil liberty (e.g. laws against abortion, homosexuality, or drug use) permissible?

**PHIL 2253 Philosophy And Feminism: 3 semester hours**

Same as GS 2253 A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

**PHIL 2254 Business Ethics: 3 semester hours**

A critical survey from the perspective of moral theory of businesses and business practices. Topics vary but usually include some of the following: Whether the sole moral obligation of businesses is to make money; whether certain standard business practices, e.g., the creation of wants through advertising, are moral; whether businesses ought to be compelled, e.g., to protect the environment or participate in affirmative action programs.

**PHIL 2255 Environmental Ethics: 3 semester hours**

Examines such issues as the value of wilderness, our duties to animals and the natural world, pollution and development, environmental justice.

**PHIL 2256 Bioethics: 3 semester hours**

Same as GERON 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

**PHIL 2257 Happiness and the Meaning of Life: 3 semester hours**

This course is an accessible introduction to the historical and contemporary perspectives on happiness and the meaning of life in philosophy. It examines the nature of happiness by focusing on three major theories: happiness as pleasure, happiness as excellence and happiness as desire satisfaction. Other issues examined may include the relevance of virtue for happiness, the experience machine argument, the best way to pursue happiness as a personal or a policy goal, and other related topics.

**PHIL 2258 Medicine, Values, And Society: 3 semester hours**

Social, conceptual, and policy issues connected with medicine form the focus of the course. Topics may include: (1) role played by race & gender in design of research and distribution of care; (2) whether diseases are socially constructed categories reflecting the values of society; (3) development of social policies that offer universal access to health care; (4) the legitimacy of using psychotropic drugs to enhance life, rather than treat the disease. The course differs from Bioethics by emphasizing policy issues and their conceptual basis. Content of this course may vary.

**PHIL 2259 Engineering Ethics: 3 semester hours**

An examination of ethical issues in engineering using professional engineering codes as a starting point. The course will have a problem solving orientation, focusing on the analysis of particular cases. Actual high-profile cases such as the Challenger disaster will be considered, as well as hypothetical cases illustrating the more commonly encountered moral problems in engineering (such as accepting gifts from vendors). Topics include the engineer/manager relationship, engineers and the environment, honesty in engineering, and risk, safety, and liability.

**PHIL 2276 Philosophy of Film: 3 semester hours**

Critical study of such issues as film's relation to photography, shots and editing, documentary vs. fiction films, cinematic narration, our identification with film characters, criticism and evaluation.

**PHIL 2277 Philosophy and Food: 3 semester hours**

This course will examine issues surrounding the production, consumption, and enjoyment of food. Questions about food choices, food scarcity, self-control, and aberrant eating will be addressed. The focus will range from global issues such as population growth, the carrying capacity of the planet, famine, and GMO crops to more narrowly focused topics such as the workings of our sense of taste, our ability to evaluate and rank different food items, and the very idea of expertise in tasting.

**PHIL 2280 Minds, Brains, And Machines: 3 semester hours**

An introduction to basic philosophical issues in cognitive science. General topics include minds as computers; computers as minds, or the possibility of artificial intelligence that is truly intelligent; relationship between mental function and brain function. Some areas of current research, such as reasoning, vision, and emotion.

**PHIL 2281 Darwinism and the Philosophy of Biology: 3 semester hours**

Prerequisites: Six hours in Philosophy, graduate standing, or consent of instructor. Examines Darwin's theory of evolution by natural selection and its philosophical consequences. Besides the theory itself, topics may include (but are not limited to): how we can test evolution and what the evidence is for it; the design argument; adaptationism; evolutionary psychology; evolution and mortality; the fact-value distinction; nature versus nurture; differences between humans and other animals; evolution and human history; genetic engineering and possible futures.

**PHIL 2282 Philosophy of Science in Historical Perspective: 3 semester hours**

This course considers the history and philosophy of ancient, medieval and early modern science, with a focus on theories of scientific methodology, biology and physics. Figures treated may include Pythagoras, Hippocrates, Plato, Aristotle, Euclid, Galen, Harvey, Copernicus, Kepler, and Newton. Topics may include Hippocratic and Galenic medicine; geocentric and heliocentric astronomies; theories of induction; scientific realism vs. instrumentalism; and the role of logic and mathematics in ancient and medieval sciences. Content of this course may vary.

**PHIL 2283 Markets & Morals: 3 semester hours**

Prerequisites: MATH 1030, or equivalent. This course will explore some moral issues connected with economic markets: the reasons for and against promoting free markets and free trade; whether we should be able to buy and sell anything or are there goods and services that should be above market transactions; whether free markets make us happier; how free markets are related to individual freedom; whether the efficacy of markets requires individuals to be moral; what moral grounds there are, if any, for capitalism, libertarianism, socialism, and Marxism.

**PHIL 3286 International Business Ethics: 3 semester hours**

Same as INTL BUS 3286. The course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other "corrupt" practices, respect for intellectual property, etc. Frequent short papers will be assigned.

**PHIL 3301 Ancient Philosophy: 3 semester hours**

Freshman admitted by consent of department. The principle philosophical doctrines of the ancient world, with special emphasis on the philosophies of Plato and Aristotle. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3302 Medieval Philosophy: 3 semester hours**

A critical study of the important philosophies of the period from August to the Renaissance. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3303 Early Modern Philosophy: 3 semester hours**

Principal figures in the development of rationalism, empiricism and skepticism in early modern Europe, from Descartes through Hume. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3304 Kant And Nineteenth Century Philosophy: 3 semester hours**

Study of Kant and such major nineteenth century figures as Hegel and Nietzsche, Mill and Pierce. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3305 Twentieth Century Philosophy: 3 semester hours**

Representative topics in contemporary philosophy, with readings selected from pragmatism, logical positivism, linguistic analysis and existentialism. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3307 American Philosophy: 3 semester hours**

Prerequisite: Six hours of philosophy or consent of instructor. A study of selected American philosophers.

**PHIL 3360 Formal Logic: 3 semester hours**

An introductory study of logical truth and deductive inference, with emphasis on the development and mastery of a formal system.

**PHIL 3369 The Marxist Heritage: 3 semester hours**

Same as POL SCI 3690. Study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

**PHIL 3374 Philosophy Of Art: 3 semester hours**

Same as ART HS 3374. A critical study of such issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

**PHIL 3378 Philosophy of Mind: 3 semester hours**

Prerequisites: Three hours of philosophy or consent of instructor. An introduction to philosophical issues pertaining to the mind. Topics may include how the mind relates to the body, how the mind represents the world, how the mind works, consciousness, and free will.

**PHIL 3380 Philosophy Of Science: 3 semester hours**

An examination of science: what makes science special? Topics may include (but are not limited to): empiricism and of induction; paradigms and revolutions; explanation, causation and laws; realism versus instrumentalism; critiques of science such as those of feminism or postmodernism; and reductionism - ultimately is it all just physics?.

**PHIL 4401 Plato: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A study of selected Platonic dialogues.

**PHIL 4402 Aristotle: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A selective study of Aristotle's major works.

**PHIL 4405 Rationalism: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. An examination of the philosophies of such major figures as Descartes, Spinoza, and Leibniz.

**PHIL 4406 Empiricism: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Early Modern philosophy recommended, graduate standing, or consent of instructor. An examination of the philosophies of such major figures as Locke, Berkeley, and Hume.

**PHIL 4407 Kant: 3 semester hours**

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing or consent of instructor. A systematic study of the Critique of Pure Reason.

**PHIL 4408 Hegel: 3 semester hours**

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing, or consent of instructor. A critical study of the writings and influence of Hegel.

**PHIL 4410 Topics and Figures in the History of Philosophy: 3 semester hours**

Prerequisites: Nine hours of philosophy, graduate standing, or consent of instructor. In-depth examination of a particular topic, significant figure or philosophical movement from the history of philosophy. The philosopher or movement to be studied will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

**PHIL 4421 The Analytic Tradition: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. PHIL 3305 and PHIL 3360 strongly recommended. Course studies in depth the development of analytic philosophy with a broad emphasis on its style and substance. Topics may include early writings that set the stage for this tradition (Frege, Moore, Russell), the basic texts of Logical Positivism (Carnap, Schlick, Neurath, Hempel), and later responses including reassessment of the doctrine, the revival of naturalism, and the "death" of philosophy (Wittgenstein, Quine, Sellars). This is a variable content course that may be taken again for credit with consent of the instructor and the department chair.

**PHIL 4430 Social And Political Philosophy: 3 semester hours**

Prerequisites: Six credit hours of philosophy required or consent of instructor. This course will cover several classic works of political theory, with a particular focus on the nature of justice, the proper extent of liberty, and social contract arguments for the legitimacy of state authority. Readings from Plato, Hobbes, Locke, Hume, Rousseau, Bentham, Mill, Marx and Rawls.

**PHIL 4435 Classical Ethical Theory: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Significant contributions to moral philosophy from Plato and Aristotle to Bentham and Mill.

**PHIL 4437 Metaethics: 3 semester hours**

Prerequisites: 6 credit hours of Philosophy. This course deals with questions regarding the foundations of ethics and the status of our ethical judgments about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

**PHIL 4438 Recent Ethical Theory: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A study of major contributions to twentieth-century ethics, including works by such writers as Moore, Dewey, Ross, Stevenson, Hare, and Rawls.

**PHIL 4439 Topics In Ethical Theory: 3 semester hours**

Prerequisites: PHIL 4435, PHIL 4438, nine hours of philosophy, graduate standing, or consent of instructor. Formulation and evaluation of major theories in normative ethics, metaethics, and axiology. Topics include: egoism, moral realism, act and rule utilitarianism, and varieties of naturalism and non-naturalism in ethics. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4440 Theories Of Knowledge: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of concepts and problems involved in the characterization of knowledge. Specific topics will vary, but will usually include knowledge, belief, skepticism, evidence, certainty, perception, truth, and necessity.

**PHIL 4445 Metaphysics: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of selected metaphysical topics such as substance, universals, causality, necessity, space and time, free will, being, and identity.

**PHIL 4450 Special Readings In Philosophy: 1-3 semester hours**

Prerequisite: Consent of Department Independent study through readings, reports, and conferences. This is a content course and may be taken again up to a total of 6 credit hours with consent of instructor and department chair.

**PHIL 4451 Special Topics In Philosophy: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A critical study of classical and/or contemporary contributions to a selected topic in philosophy. The topic to be considered will be announced prior to registration. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4452 Feminism And Science: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Same as GS 4452. This course will explore major themes and issues in feminist science scholarship, a body of research that focuses on the relationship between science and gender. Feminist research in the philosophy and history of science, and in the biological sciences, are emphasized. Issues include: the nature of objectivity, evidence, and truth; the factors that contribute to the acceptance or rejection of research hypothesis and theories; the nature and consequences of science's cognitive authority; and the relationship between science and values.

**PHIL 4458 Ethics And The Computer: 3 semester hours**

Prerequisites: Six hours of coursework above the level of MATH 1030 in Math/Computer Science or at least six hours of philosophy or consent of instructor. An examination of ethical issues concerning the use of computers generally and software engineering in particular. Aims at developing awareness of these issues, and skills for ethical decision-making regarding them through careful, analytical methods. Typical issues include privacy, intellectual property, computer fraud, and others.

**PHIL 4460 Advanced Formal Logic: 3 semester hours**

Prerequisites: PHIL 3360, graduate standing, or consent of instructor. Rigorous study of major developments in contemporary logic. Emphasis is given to theoretical problems and some attention is devoted to philosophical issues arising from logic.

**PHIL 4465 Theory Of Decisions And Games: 3 semester hours**

Same as POL SCI 4060. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent) or consent of the instructor. A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

**PHIL 4474 Topics In Aesthetics: 3 semester hours**

Prerequisites: PHIL 3374, graduate standing or consent of instructor. Selected topics, such as vision and representation, musical aesthetics, and recent theorists. This is a variable content course that may be taken again for credit with the approval of the instructor and the department chair.

**PHIL 4478 Topics In Philosophy Of Mind: 3 semester hours**

Prerequisites: PHIL 3378 or six hours of other philosophy courses or consent of instructor. An examination of selected topics at the interface of philosophical and psychological research. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4479 Philosophy Of Cognitive Science: 3 semester hours**

Prerequisites: PHIL 3378 or PHIL 4478 or nine hours of other philosophy courses or consent of instructor. An exploration of the philosophical foundations of cognitive science, a cooperative effort of philosophers, cognitive psychologists, brain scientists, computer scientists, and others to understand the relationship between the mind and the brain.

**PHIL 4480 Topics In Philosophy Of Science: 3 semester hours**

Prerequisites: Consent of the instructor. An advanced introduction to the philosophy of science for advanced undergraduates in philosophy and graduate and professional students. Topics covered include scientific method, confirmation, explanation, the nature of theories, scientific progress, science criticism, ethics in science, and science and religion.

**PHIL 4482 Philosophy Of Social Science: 3 semester hours**

Prerequisites: Six hours of philosophy or consent of instructor. An intensive examination of selected topics such as the nature of explanation in social science versus natural science, interpretation theory, and the postmodernism debate (e.g. Habermas, Foucault, Clifford). This course may be repeated for credit on approval by the department.

**PHIL 4483 Topics In History And Philosophy Of Science: 3 semester hours**

Prerequisites: Six hours of philosophy, (PHIL 3380 strongly recommended), graduate standing, or consent of instructor. Examines in depth a particular topic or topics from either the history or philosophy of science. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

**PHIL 4487 Topics In Philosophy Of Law: 3 semester hours**

Same as CRIMIN 4487. Prerequisites: CRIMIN 1100 and three hours of philosophy, graduate standing, or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

**PHIL 4491 Senior Seminar: 3 semester hours**

Prerequisites: Senior standing; at least 12 hours of philosophy at the 2000 level or above; or consent of instructor. Intensive study of a central philosophical problem. The course emphasizes the fundamentals of philosophical writing and scholarship. Students will write a major paper to be evaluated by two members of the Philosophy Department and the course instructor.

**PHIL 5400 Proseminar In Philosophy: 3 semester hours**

Prerequisites: Graduate Standing. Required of all entering Graduate Students in the Fall Semester of the first full year of residency. Topics vary. Other graduate students may take this course with the permission of the instructor and the director of Graduate Studies in Philosophy. Students will be expected to write papers, give presentations, and join in class discussion.

**PHIL 5403 Seminar on Themes in the History of Philosophy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or school of thought in the history of philosophy. Topics may include but are not limited to historical theories of science, Hellenistic philosophy, Neoplatonism, and historical approaches concerning the nature of time. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5410 Seminar In Significant Figures In Philosophy: 3 semester hours**

Prerequisites: Graduate Standing. In depth study of the work of a single philosopher. The philosopher selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5478 Seminar In Philosophy Of Mind: 3 semester hours**

Prerequisites: Graduate standing Topics may include functionalism and physicalism; representation and the nature of propositional attitudes such as belief, desire, and the various emotions; folk psychology and knowledge of other minds; introspection and knowledge of one's own mind; conscious and unconscious mental states and processes. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

**PHIL 5495 Thesis Research: 1-3 semester hours**

Prerequisites: Graduate standing or consent of instructor. May be repeated once for credit with the consent of the instructor and the department chair.

**PHIL 5521 Seminar In Analytic Philosophy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Intensive study of selected topics, texts, or individuals in historical or contemporary analytic philosophy. Topics may include, but are not limited to, Frege semantics, Russell's theory of definite descriptions, logical positivism, Wittgenstein's philosophy of language, Quine on the analytic/ synthetic distinction, Kripke possible-world semantics, theories of propositions, the analysis of knowledge, contextualism in epistemology and language, relative semantics, epistemic two-dimensionalism, conceivability vs. possibility, three-dimensionalism vs. four-dimensionalism, presentism vs. eternalism, and applications of core concepts in other areas of philosophy. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5530 Seminar In Social And Political Philosophy: 3 semester hours**

An intensive study of contemporary philosophical debate about such issues such as civil liberty, economic justice, political decision-making, and state authority. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5533 Philosophy Of Law: 3 semester hours**

Same as CRIMIN 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

**PHIL 5537 Seminar in Metaethics: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. The course deals with questions regarding the foundations of ethics and the status of our ethical judgements about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

**PHIL 5538 Seminar In Ethical Theory: 3 semester hours**

Prerequisites: Graduate standing or consent of the instructor. In this course we will seek to answer questions from normative ethics or metaethics, which may include: What do all morally wrong actions have in common? What does the word "wrong" mean? How, if at all, can we verify moral judgements? Are any moral judgements valid for all societies? Do we always have good reason to be moral?.

**PHIL 5540 Seminar In Epistemology: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or individuals in epistemology. Topics may include (but are not limited to) theories of justification, naturalism in epistemology, and conceptions of knowledge. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5545 Seminar In Metaphysics: 3 semester hours**

Prerequisites: Graduate standing. Intensive study of a selected topic or problem area in metaphysics, e.g. mind-body identity, nature of the self, or conception of time. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5551 Special Readings In Philosophy: 1-3 semester hours**

Prerequisites: Graduate Standing, written consent of instructor. Independent study through readings, reports, and conferences. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5560 Seminar In Logic: 3 semester hours**

Prerequisites: Graduate standing A focused study of topics in logic and/ or its history. Representative topics include: Aristotelian logic, modal logic, the Godel incompleteness theorems, relevance logic, paraconsistent logic, free logic. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5561 Graduate Formal Logic: 3 semester hours**

Prerequisite: Graduate standing; permission of the department A rigorous introduction to formal logic that includes sentential calculus, predicate logic, and completeness proofs. May be taken for graduate credit only with permission of the graduate advisor and chair.

**PHIL 5579 Seminar In Philosophy Of Cognitive Science: 3 semester hours**

Prerequisites: Graduate standing. General topics include the role of computation in cognitive science, the merits of symbolic computation and connectionism, the aims and methods of artificial intelligence, and the relationship between cognitive science and our everyday understanding of people. Specific topics may include perception, reasoning, consciousness, language, emotion, and will. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5580 Seminar In Philosophy Of Science: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Focus is on recent issues and controversies. Topics may include: theories and observation, models of explanation, confirmation, realism and antirealism, empiricism & naturalism, "social construction" and feminist views of science. This is a variable content course and may be taken again with the consent of the instructor and the department chair.

**PHIL 5582 Seminar In Philosophy Of Social Science: 3 semester hours**

Prerequisites: Graduate Standing or consent of instructor. Intensive examination of selected topics, such as the nature of explanation in social science, rationality, value-freedom and objectivity, or relation of social to natural sciences. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5590 Philosophical Issues In Other Disciplines: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. An examination of selected philosophical issues in disciplines other than philosophy. One or more such disciplines as history, political science, psychology, sociology, biology, chemistry, physics, or mathematics will be chosen. The discipline(s) and issues selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

## Courses

**PHIL 1021 Choice and Chance: 3 semester hours**

Prerequisites: A score of 22 or higher on the ACT Math sub-test; or a grade of C or better in a two- or four-year college intermediate algebra course; or a satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. Same as MATH 1021. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**PHIL 1030 Present Moral Problems: 3 semester hours**

This course will explore a range of ethical dilemmas with an eye towards living the best life. How should I live? What actions are right and wrong? How should I treat myself and others? In this class, we will consider these and other issues by investigating practical problems in daily life including: human rights, the environment, hunger and poverty, war and violence, racial and ethnic discrimination, gender roles and marriage, abortion, and euthanasia,.

**PHIL 1050 Existentialism and Phenomenology: 3 semester hours**

The course will study major works by the major philosophers in the existential and phenomenological traditions. Topics will include what it means to live an authentic life, the structure and content of conscious experience, the construction of the social arena, and what it means to live in a society.

**PHIL 1090 Philosophy Looks at the Arts: 3 semester hours**

This online course will explore the distinct resources of various arts - the raw materials of each, what each can represent, express, convey - and key differences among them. After an introductory unit devoted to art in general, the course will present eight units examining the arts of painting, photography, sculpture, architecture, music, literature, drama, and film. The course will employ a variety of instructional materials. These include posted essays, streaming video, readings from an assigned text, and participation on an interface discussion board.

**PHIL 1091 Great Philosophers: 3 semester hours**

This online course introduces philosophy through a survey and examination of the ideas of fifteen of the most important figures in the history of the subject. From Socrates to Nietzsche, the questions, answers, and lives of the great philosophers are explored in a multimedia context. This course does not satisfy any of the requirements for philosophy major or minor.

**PHIL 1110 Western Philosophy I: Antiquity To The Renaissance: 3 semester hours**

Lectures and discussions tracing the development of western philosophy from its beginnings among the pre-Socratics through the Middle Ages and Renaissance. Philosophical ideas will be examined in the cultural and historical context: the Greek city-state, the rise of Christianity, etc.

**PHIL 1111 Western Philosophy II: Descartes To The Present: 3 semester hours**

Lectures and discussions on the development of western philosophy from Descartes (1596-1650) to the present. Philosophical ideas will be examined with an eye to their historical and cultural setting: the rise of modern science, the industrial revolution, the rise of capitalism, etc.

**PHIL 1120 Asian Philosophy: 3 semester hours**

Critical study of selected philosophical classics of India and China.

**PHIL 1125 Islamic Philosophy: 3 semester hours**

An introduction to arabic philosophy in the islamic classical period (roughly from the mid-ninth through the twelfth centuries). We consider the philosophical and theological background, and then examine the thought of such notable Islamic philosophers as al-Kindi, Ibn Sina, al-Ghazali, and Ibn Rushd. Topics treated typically include proofs for the existence of God, whether the world is eternal or had a beginning, the nature of the soul and whether it is immortal, and the distinction between essence and existence. This course fulfills the cultural diversity requirement.

**PHIL 1130 Approaches To Ethics: 3 semester hours**

A study and discussion of representative topics in moral philosophy such as moral skepticism, moral objectivity, theories of obligation and value, evaluation of social institutions and the relation between morality and science. Traditional and contemporary writers will be considered.

**PHIL 1150 Introduction to Philosophy: 3 semester hours**

A study and discussion of representative topics in philosophy such as free will and determinism, concepts of mind and body, the basis of value judgments, knowledge and belief, and the possibility of constructing a world view.

**PHIL 1151 Love 101: 3 semester hours**

A critical review of what media personalities, philosophers, criminal justice experts, medical experts, neuroscientists, and psychologists have said about love and its place in our lives. Included will be such topics as the neuroscience of love, love across culture, love and commitment issues, marriage and the "seven-year itch," jealousy, domestic violence, and verbal abuse. Larger questions will include the role of love in the good life; the ethics of love; the psychological consequences of obsession, breakups and divorce; arranged marriages vs. freely chosen love; and the morality of laws that affect relationships between loving partners.

**PHIL 1160 Critical Thinking: 3 semester hours**

An introduction to the language and logical structure of arguments, the principles of sound reasoning, and application of these principles in a variety of contexts.

**PHIL 1163 Disagreement, Difference, Diversity: 6 semester hours**

Same as ANTHRO 1163. This interdisciplinary course will combine material from philosophy, anthropology, and sociology to examine the ways we encounter and accommodate disagreement in our daily lives. The unifying thread is our ability to deal with various sorts of opposition: differences of opinion, differences in practice, and differences in how we construct and address both biological and cultural variation. The course will combine units on informal logic and applied ethics from philosophy together with units on the social construction of difference and the understanding of human diversity from anthropology and sociology. This course will be worth 6 SCHs.

**PHIL 1178 Superhuman Mind: 3 semester hours**

As a study of people with special neurological talents, this course will look at cases of people who became geniuses by accident, human echolocation (deaf people who can detect sound), lucid dreaming, telepathy used to solve crimes, and more.

**PHIL 1180 Science vs. God: 3 semester hours**

This course examines whether religion and science are compatible, discusses the science-religion debate historically, and broaches philosophical issues surrounding belief, especially whether belief should be based in empirical evidence or in faith. Following these introductory course sessions, the class will discuss, in detail, topics in science and religion, including creation versus evolution; human nature (including abortion and stem cell research); the nature of sexuality and gender; the science of religion; morality; the environment from a religious perspective; meaningfulness in the universe; and finally, evidence for or against the afterlife, existence of a divinity, and divine providence.

**PHIL 1185 Philosophy Of Religion: 3 semester hours**

A philosophical investigation of such problems as the nature of religious faith and experience, the relation of faith and reason, alternative concepts of deity and the problem of evil.

**PHIL 2249 Accounting Ethics: 3 semester hours**

The course is a study of moral problems as they relate to the profession of accounting. We will analyze a number of major cases (Enron, HealthSouth, etc.) in which accounting lapses were involved, and we will look at general moral theories which might illuminate these problems. A major component of the course work will be writing essays which address specific moral dilemmas which have arisen or might arise for accountants. The course is primarily online, but there will be five required 75-minute class meetings spread through the semester.

**PHIL 2250 Philosophy And Current Issues: 3 semester hours**

A careful examination of such current social controversies as women's liberation, the ethics of abortion, public accountability of holders of high offices, and the subtler forms of racism and other prejudices. Although there is no formal prerequisite, it is recommended that students have taken, or be concurrently enrolled in, at least one other philosophy course.

**PHIL 2251 Sexual Ethics: 3 semester hours**

A critical review of what philosophers, both classical and contemporary, have said about sexual experience and its place in our lives. Included will be such topics as sexual desire, sexual perversion, love and commitment, marriage and adultery, larger questions might include that role of sexual experience in the good life, issues of sexual privacy, and the morality of laws which regulate sexual activity.

**PHIL 2252 Philosophical Foundations Of Criminal Justice: 3 semester hours**

Same as CRIMIN 2252. This course will address fundamental conceptual and ethical issues that arise in the context of the legal system. Questions may include: How does punishment differ from pre-trial detention? How, if at all, can it be justified? Is the death penalty ever justified? When is it morally permissible for juries to acquit defendants who are legally guilty? Is plea bargaining unjust? Why might people be morally obligated to obey the laws? Are laws restricting civil liberty (e.g. laws against abortion, homosexuality, or drug use) permissible?

**PHIL 2253 Philosophy And Feminism: 3 semester hours**

Same as GS 2253 A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

**PHIL 2254 Business Ethics: 3 semester hours**

A critical survey from the perspective of moral theory of businesses and business practices. Topics vary but usually include some of the following: Whether the sole moral obligation of businesses is to make money; whether certain standard business practices, e.g., the creation of wants through advertising, are moral; whether businesses ought to be compelled, e.g., to protect the environment or participate in affirmative action programs.

**PHIL 2255 Environmental Ethics: 3 semester hours**

Examines such issues as the value of wilderness, our duties to animals and the natural world, pollution and development, environmental justice.

**PHIL 2256 Bioethics: 3 semester hours**

Same as GERON 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

**PHIL 2257 Happiness and the Meaning of Life: 3 semester hours**

This course is an accessible introduction to the historical and contemporary perspectives on happiness and the meaning of life in philosophy. It examines the nature of happiness by focusing on three major theories: happiness as pleasure, happiness as excellence and happiness as desire satisfaction. Other issues examined may include the relevance of virtue for happiness, the experience machine argument, the best way to pursue happiness as a personal or a policy goal, and other related topics.

**PHIL 2258 Medicine, Values, And Society: 3 semester hours**

Social, conceptual, and policy issues connected with medicine form the focus of the course. Topics may include: (1) role played by race & gender in design of research and distribution of care; (2) whether diseases are socially constructed categories reflecting the values of society; (3) development of social policies that offer universal access to health care; (4) the legitimacy of using psychotropic drugs to enhance life, rather than treat the disease. The course differs from Bioethics by emphasizing policy issues and their conceptual basis. Content of this course may vary.

**PHIL 2259 Engineering Ethics: 3 semester hours**

An examination of ethical issues in engineering using professional engineering codes as a starting point. The course will have a problem solving orientation, focusing on the analysis of particular cases. Actual high-profile cases such as the Challenger disaster will be considered, as well as hypothetical cases illustrating the more commonly encountered moral problems in engineering (such as accepting gifts from vendors). Topics include the engineer/manager relationship, engineers and the environment, honesty in engineering, and risk, safety, and liability.

**PHIL 2276 Philosophy of Film: 3 semester hours**

Critical study of such issues as film's relation to photography, shots and editing, documentary vs. fiction films, cinematic narration, our identification with film characters, criticism and evaluation.

**PHIL 2277 Philosophy and Food: 3 semester hours**

This course will examine issues surrounding the production, consumption, and enjoyment of food. Questions about food choices, food scarcity, self-control, and aberrant eating will be addressed. The focus will range from global issues such as population growth, the carrying capacity of the planet, famine, and GMO crops to more narrowly focused topics such as the workings of our sense of taste, our ability to evaluate and rank different food items, and the very idea of expertise in tasting.

**PHIL 2280 Minds, Brains, And Machines: 3 semester hours**

An introduction to basic philosophical issues in cognitive science. General topics include minds as computers; computers as minds, or the possibility of artificial intelligence that is truly intelligent; relationship between mental function and brain function. Some areas of current research, such as reasoning, vision, and emotion.

**PHIL 2281 Darwinism and the Philosophy of Biology: 3 semester hours**

Prerequisites: Six hours in Philosophy, graduate standing, or consent of instructor. Examines Darwin's theory of evolution by natural selection and its philosophical consequences. Besides the theory itself, topics may include (but are not limited to): how we can test evolution and what the evidence is for it; the design argument; adaptationism; evolutionary psychology; evolution and mortality; the fact-value distinction; nature versus nurture; differences between humans and other animals; evolution and human history; genetic engineering and possible futures.

**PHIL 2282 Philosophy of Science in Historical Perspective: 3 semester hours**

This course considers the history and philosophy of ancient, medieval and early modern science, with a focus on theories of scientific methodology, biology and physics. Figures treated may include Pythagoras, Hippocrates, Plato, Aristotle, Euclid, Galen, Harvey, Copernicus, Kepler, and Newton. Topics may include Hippocratic and Galenic medicine; geocentric and heliocentric astronomies; theories of induction; scientific realism vs. instrumentalism; and the role of logic and mathematics in ancient and medieval sciences. Content of this course may vary.

**PHIL 2283 Markets & Morals: 3 semester hours**

Prerequisites: MATH 1030, or equivalent. This course will explore some moral issues connected with economic markets: the reasons for and against promoting free markets and free trade; whether we should be able to buy and sell anything or are there goods and services that should be above market transactions; whether free markets make us happier; how free markets are related to individual freedom; whether the efficacy of markets requires individuals to be moral; what moral grounds there are, if any, for capitalism, libertarianism, socialism, and Marxism.

**PHIL 3286 International Business Ethics: 3 semester hours**

Same as INTL BUS 3286. The course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other "corrupt" practices, respect for intellectual property, etc. Frequent short papers will be assigned.

**PHIL 3301 Ancient Philosophy: 3 semester hours**

Freshman admitted by consent of department. The principle philosophical doctrines of the ancient world, with special emphasis on the philosophies of Plato and Aristotle. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3302 Medieval Philosophy: 3 semester hours**

A critical study of the important philosophies of the period from August to the Renaissance. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3303 Early Modern Philosophy: 3 semester hours**

Principal figures in the development of rationalism, empiricism and skepticism in early modern Europe, from Descartes through Hume. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3304 Kant And Nineteenth Century Philosophy: 3 semester hours**

Study of Kant and such major nineteenth century figures as Hegel and Nietzsche, Mill and Pierce. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3305 Twentieth Century Philosophy: 3 semester hours**

Representative topics in contemporary philosophy, with readings selected from pragmatism, logical positivism, linguistic analysis and existentialism. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

**PHIL 3307 American Philosophy: 3 semester hours**

Prerequisite: Six hours of philosophy or consent of instructor. A study of selected American philosophers.

**PHIL 3360 Formal Logic: 3 semester hours**

An introductory study of logical truth and deductive inference, with emphasis on the development and mastery of a formal system.

**PHIL 3369 The Marxist Heritage: 3 semester hours**

Same as POL SCI 3690. Study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

**PHIL 3374 Philosophy Of Art: 3 semester hours**

Same as ART HS 3374. A critical study of such issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

**PHIL 3378 Philosophy of Mind: 3 semester hours**

Prerequisites: Three hours of philosophy or consent of instructor. An introduction to philosophical issues pertaining to the mind. Topics may include how the mind relates to the body, how the mind represents the world, how the mind works, consciousness, and free will.

**PHIL 3380 Philosophy Of Science: 3 semester hours**

An examination of science: what makes science special? Topics may include (but are not limited to): empiricism and of induction; paradigms and revolutions; explanation, causation and laws; realism versus instrumentalism; critiques of science such as those of feminism or postmodernism; and reductionism - ultimately is it all just physics?.

**PHIL 4401 Plato: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A study of selected Platonic dialogues.

**PHIL 4402 Aristotle: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A selective study of Aristotle's major works.

**PHIL 4405 Rationalism: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. An examination of the philosophies of such major figures as Descartes, Spinoza, and Leibniz.

**PHIL 4406 Empiricism: 3 semester hours**

Prerequisites: Six hours of philosophy, a course in Early Modern philosophy recommended, graduate standing, or consent of instructor. An examination of the philosophies of such major figures as Locke, Berkeley, and Hume.

**PHIL 4407 Kant: 3 semester hours**

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing or consent of instructor. A systematic study of the Critique of Pure Reason.

**PHIL 4408 Hegel: 3 semester hours**

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing, or consent of instructor. A critical study of the writings and influence of Hegel.

**PHIL 4410 Topics and Figures in the History of Philosophy: 3 semester hours**

Prerequisites: Nine hours of philosophy, graduate standing, or consent of instructor. In-depth examination of a particular topic, significant figure or philosophical movement from the history of philosophy. The philosopher or movement to be studied will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

**PHIL 4421 The Analytic Tradition: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. PHIL 3305 and PHIL 3360 strongly recommended. Course studies in depth the development of analytic philosophy with a broad emphasis on its style and substance. Topics may include early writings that set the stage for this tradition (Frege, Moore, Russell), the basic texts of Logical Positivism (Carnap, Schlick, Neurath, Hempel), and later responses including reassessment of the doctrine, the revival of naturalism, and the "death" of philosophy (Wittgenstein, Quine, Sellars). This is a variable content course that may be taken again for credit with consent of the instructor and the department chair.

**PHIL 4430 Social And Political Philosophy: 3 semester hours**

Prerequisites: Six credit hours of philosophy required or consent of instructor. This course will cover several classic works of political theory, with a particular focus on the nature of justice, the proper extent of liberty, and social contract arguments for the legitimacy of state authority. Readings from Plato, Hobbes, Locke, Hume, Rousseau, Bentham, Mill, Marx and Rawls.

**PHIL 4435 Classical Ethical Theory: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Significant contributions to moral philosophy from Plato and Aristotle to Bentham and Mill.

**PHIL 4437 Metaethics: 3 semester hours**

Prerequisites: 6 credit hours of Philosophy. This course deals with questions regarding the foundations of ethics and the status of our ethical judgments about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

**PHIL 4438 Recent Ethical Theory: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A study of major contributions to twentieth-century ethics, including works by such writers as Moore, Dewey, Ross, Stevenson, Hare, and Rawls.

**PHIL 4439 Topics In Ethical Theory: 3 semester hours**

Prerequisites: PHIL 4435, PHIL 4438, nine hours of philosophy, graduate standing, or consent of instructor. Formulation and evaluation of major theories in normative ethics, metaethics, and axiology. Topics include: egoism, moral realism, act and rule utilitarianism, and varieties of naturalism and non-naturalism in ethics. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4440 Theories Of Knowledge: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of concepts and problems involved in the characterization of knowledge. Specific topics will vary, but will usually include knowledge, belief, skepticism, evidence, certainty, perception, truth, and necessity.

**PHIL 4445 Metaphysics: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of selected metaphysical topics such as substance, universals, causality, necessity, space and time, free will, being, and identity.

**PHIL 4450 Special Readings In Philosophy: 1-3 semester hours**

Prerequisite: Consent of Department Independent study through readings, reports, and conferences. This is a content course and may be taken again up to a total of 6 credit hours with consent of instructor and department chair.

**PHIL 4451 Special Topics In Philosophy: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A critical study of classical and/or contemporary contributions to a selected topic in philosophy. The topic to be considered will be announced prior to registration. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4452 Feminism And Science: 3 semester hours**

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Same as GS 4452. This course will explore major themes and issues in feminist science scholarship, a body of research that focuses on the relationship between science and gender. Feminist research in the philosophy and history of science, and in the biological sciences, are emphasized. Issues include: the nature of objectivity, evidence, and truth; the factors that contribute to the acceptance or rejection of research hypothesis and theories; the nature and consequences of science's cognitive authority; and the relationship between science and values.

**PHIL 4458 Ethics And The Computer: 3 semester hours**

Prerequisites: Six hours of coursework above the level of MATH 1030 in Math/Computer Science or at least six hours of philosophy or consent of instructor. An examination of ethical issues concerning the use of computers generally and software engineering in particular. Aims at developing awareness of these issues, and skills for ethical decision-making regarding them through careful, analytical methods. Typical issues include privacy, intellectual property, computer fraud, and others.

**PHIL 4460 Advanced Formal Logic: 3 semester hours**

Prerequisites: PHIL 3360, graduate standing, or consent of instructor. Rigorous study of major developments in contemporary logic. Emphasis is given to theoretical problems and some attention is devoted to philosophical issues arising from logic.

**PHIL 4465 Theory Of Decisions And Games: 3 semester hours**

Same as POL SCI 4060. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent) or consent of the instructor. A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

**PHIL 4474 Topics In Aesthetics: 3 semester hours**

Prerequisites: PHIL 3374, graduate standing or consent of instructor. Selected topics, such as vision and representation, musical aesthetics, and recent theorists. This is a variable content course that may be taken again for credit with the approval of the instructor and the department chair.

**PHIL 4478 Topics In Philosophy Of Mind: 3 semester hours**

Prerequisites: PHIL 3378 or six hours of other philosophy courses or consent of instructor. An examination of selected topics at the interface of philosophical and psychological research. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

**PHIL 4479 Philosophy Of Cognitive Science: 3 semester hours**

Prerequisites: PHIL 3378 or PHIL 4478 or nine hours of other philosophy courses or consent of instructor. An exploration of the philosophical foundations of cognitive science, a cooperative effort of philosophers, cognitive psychologists, brain scientists, computer scientists, and others to understand the relationship between the mind and the brain.

**PHIL 4480 Topics In Philosophy Of Science: 3 semester hours**

Prerequisites: Consent of the instructor. An advanced introduction to the philosophy of science for advanced undergraduates in philosophy and graduate and professional students. Topics covered include scientific method, confirmation, explanation, the nature of theories, scientific progress, science criticism, ethics in science, and science and religion.

**PHIL 4482 Philosophy Of Social Science: 3 semester hours**

Prerequisites: Six hours of philosophy or consent of instructor. An intensive examination of selected topics such as the nature of explanation in social science versus natural science, interpretation theory, and the postmodernism debate (e.g. Habermas, Foucault, Clifford). This course may be repeated for credit on approval by the department.

**PHIL 4483 Topics In History And Philosophy Of Science: 3 semester hours**

Prerequisites: Six hours of philosophy, (PHIL 3380 strongly recommended), graduate standing, or consent of instructor. Examines in depth a particular topic or topics from either the history or philosophy of science. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

**PHIL 4487 Topics In Philosophy Of Law: 3 semester hours**

Same as CRIMIN 4487. Prerequisites: CRIMIN 1100 and three hours of philosophy, graduate standing, or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

**PHIL 4491 Senior Seminar: 3 semester hours**

Prerequisites: Senior standing; at least 12 hours of philosophy at the 2000 level or above; or consent of instructor. Intensive study of a central philosophical problem. The course emphasizes the fundamentals of philosophical writing and scholarship. Students will write a major paper to be evaluated by two members of the Philosophy Department and the course instructor.

**PHIL 5400 Proseminar In Philosophy: 3 semester hours**

Prerequisites: Graduate Standing. Required of all entering Graduate Students in the Fall Semester of the first full year of residency. Topics vary. Other graduate students may take this course with the permission of the instructor and the director of Graduate Studies in Philosophy. Students will be expected to write papers, give presentations, and join in class discussion.

**PHIL 5403 Seminar on Themes in the History of Philosophy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or school of thought in the history of philosophy. Topics may include but are not limited to historical theories of science, Hellenistic philosophy, Neoplatonism, and historical approaches concerning the nature of time. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5410 Seminar In Significant Figures In Philosophy: 3 semester hours**

Prerequisites: Graduate Standing. In depth study of the work of a single philosopher. The philosopher selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5478 Seminar In Philosophy Of Mind: 3 semester hours**

Prerequisites: Graduate standing Topics may include functionalism and physicalism; representation and the nature of propositional attitudes such as belief, desire, and the various emotions; folk psychology and knowledge of other minds; introspection and knowledge of one's own mind; conscious and unconscious mental states and processes. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

**PHIL 5495 Thesis Research: 1-3 semester hours**

Prerequisites: Graduate standing or consent of instructor. May be repeated once for credit with the consent of the instructor and the department chair.

**PHIL 5521 Seminar In Analytic Philosophy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Intensive study of selected topics, texts, or individuals in historical or contemporary analytic philosophy. Topics may include, but are not limited to, Frege semantics, Russell's theory of definite descriptions, logical positivism, Wittgenstein's philosophy of language, Quine on the analytic/ synthetic distinction, Kripke possible-world semantics, theories of propositions, the analysis of knowledge, contextualism in epistemology and language, relative semantics, epistemic two-dimensionalism, conceivability vs. possibility, three-dimensionalism vs. four-dimensionalism, presentism vs. eternalism, and applications of core concepts in other areas of philosophy. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5530 Seminar In Social And Political Philosophy: 3 semester hours**

An intensive study of contemporary philosophical debate about such issues such as civil liberty, economic justice, political decision-making, and state authority. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5533 Philosophy Of Law: 3 semester hours**

Same as CRIMIN 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

**PHIL 5537 Seminar in Metaethics: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. The course deals with questions regarding the foundations of ethics and the status of our ethical judgements about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

**PHIL 5538 Seminar In Ethical Theory: 3 semester hours**

Prerequisites: Graduate standing or consent of the instructor. In this course we will seek to answer questions from normative ethics or metaethics, which may include: What do all morally wrong actions have in common? What does the word "wrong" mean? How, if at all, can we verify moral judgements? Are any moral judgements valid for all societies? Do we always have good reason to be moral?.

**PHIL 5540 Seminar In Epistemology: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or individuals in epistemology. Topics may include (but are not limited to) theories of justification, naturalism in epistemology, and conceptions of knowledge. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5545 Seminar In Metaphysics: 3 semester hours**

Prerequisites: Graduate standing. Intensive study of a selected topic or problem area in metaphysics, e.g. mind-body identity, nature of the self, or conception of time. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5551 Special Readings In Philosophy: 1-3 semester hours**

Prerequisites: Graduate Standing, written consent of instructor.

Independent study through readings, reports, and conferences. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5560 Seminar In Logic: 3 semester hours**

Prerequisites: Graduate standing A focused study of topics in logic and/or its history. Representative topics include: Aristotelian logic, modal logic, the Godel incompleteness theorems, relevance logic, paraconsistent logic, free logic. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5561 Graduate Formal Logic: 3 semester hours**

Prerequisite: Graduate standing; permission of the department A rigorous introduction to formal logic that includes sentential calculus, predicate logic, and completeness proofs. May be taken for graduate credit only with permission of the graduate advisor and chair.

**PHIL 5579 Seminar In Philosophy Of Cognitive Science: 3 semester hours**

Prerequisites: Graduate standing. General topics include the role of computation in cognitive science, the merits of symbolic computation and connectionism, the aims and methods of artificial intelligence, and the relationship between cognitive science and our everyday understanding of people. Specific topics may include perception, reasoning, consciousness, language, emotion, and will. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

**PHIL 5580 Seminar In Philosophy Of Science: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. Focus is on recent issues and controversies. Topics may include: theories and observation, models of explanation, confirmation, realism and antirealism, empiricism & naturalism, "social construction" and feminist views of science. This is a variable content course and may be taken again with the consent of the instructor and the department chair.

**PHIL 5582 Seminar In Philosophy Of Social Science: 3 semester hours**

Prerequisites: Graduate Standing or consent of instructor. Intensive examination of selected topics, such as the nature of explanation in social science, rationality, value-freedom and objectivity, or relation of social to natural sciences. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

**PHIL 5590 Philosophical Issues In Other Disciplines: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. An examination of selected philosophical issues in disciplines other than philosophy. One or more such disciplines as history, political science, psychology, sociology, biology, chemistry, physics, or mathematics will be chosen. The discipline(s) and issues selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

## Physical Education

### Courses

**PHY ED 1124 Principles & Practice In 1St Aid & Cardiopulmonary Resuscitation: 1 semester hour**

The course provides theory and supervised practice in first aid and cardiopulmonary resuscitation leading to American Red Cross certification in those areas.

**PHY ED 2134 Personal Physical Fitness: 3 semester hours**

Prerequisite: Consent of instructor. A study of the relationship between vigorous physical activity and individual well-being. Emphasis will be placed on an individualized analysis of health fitness, resulting in a prescribed program to develop optimal levels of physical fitness, including aerobic fitness, strength, muscular endurance, flexibility, body composition, and lifetime sports considerations.

**PHY ED 3204 Special Topics In Physical Education: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, field study or research.

**PHY ED 3261 Physical Activity For The Exceptional Learner: 2 semester hours**

Prerequisite: SPEC ED 3311 and TCH ED 3313. A study of the special physical activity and exercise needs, interests, and problems of the exceptional learner, with considerable emphasis on the development of methods and competencies, in modifying physical activities.

**PHY ED 3282 Physical Growth And Motor Development: 3 semester hours**

Prerequisite: PSYCH 2270 and PHY ED 3465. An examination of the physical growth and aging, and motor development of the human being over the life span. Emphasis on evaluative tools, techniques and studies of research findings. Laboratory field experience for observing individuals. Attention is directed toward acquisition of basic skills, perceptual-motor development, fitness development, and age-related changes in information processing. A Required course for Physical Education majors; an elective course for early childhood, special, and Elementary Education majors.

**PHY ED 3283 Kinesiology: 3 semester hours**

Prerequisite: HLTH PE 3280 and math proficiency. Study of the biomechanics of human motion with particular application to performance in sport activities.

**PHY ED 3287 Seminar In Exercise Science: 1-3 semester hours**

Prerequisites: HLTH PE 3284 or consent of instructor. Study of current topics in the research and practice of exercise science, especially those required for certifications in the field. An emphasis will be placed on application of research to professional situations. Some field experience may be required. May be repeated as long as the topic is different for a maximum of 6 credit hours.

**PHY ED 3422 Teaching Of Skills: Grades Pk-4: 4 semester hours**

Prerequisites: Completion of 15 hours of level II courses. Study of developmental movement activities and appropriate learning experiences found in PK-4 grade level programs, with emphasis on developmental sequencing and the design of appropriate learning activities, materials, and effective pedagogical skills.

**PHY ED 3423 Teaching Of Skills: Grades 5-9: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sports and physical activities commonly found in the curriculum for grades 5-9, with emphasis on critical cues analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3424 Teaching Of Skills: Grades 9-12: 3 semester hours**

Prerequisites: Completion of 15 hours of Level II courses. Study of sport and physical activities predominately found in physical education programs at these grade levels, with emphasis given to critical cue analysis, developmental sequencing, and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3425 Teaching Skills: Movement, Dance, And Rhythms: 3 semester hours**

Prerequisites: Completion of 15 credit hrs of Level II courses. Study of movement analysis and techniques of teaching fundamental movement skills, rhythmic activities, creative movement, and dance forms commonly taught in school settings. Emphasis will be given to developmental sequencing and the design of appropriate learning activities, materials, and pedagogical skills.

**PHY ED 3465 Physical Education Activities In The Elementary School: 3 semester hours**

Objectives of physical education for the elementary school child with applications of choice of activities, organization of program, theory, practices.

**PHY ED 3468 Curriculum And Methods Of Teaching Physical Education: 3 semester hours**

Prerequisite: PHY ED 101 or TCH ED 3213. Study of the scope and sequence of the school program in physical education with emphasis on planning processes, content selection, management procedures, instructional strategies, and program assessment.

**PHY ED 5380 Nutrition For Human Performance: 3 semester hours**

A study of human nutrition and its relationship to human performance. Consideration is given to nutrients - function, food source, health concerns and implications energy intake and expenditure; special considerations - body composition including weight gain and loss ergogenic aides competitive athletes, older adults, children and teens, pregnant women, disease risk, fluid and electrolyte balance, and specific sport activities.

**PHY ED 6462 The Physical Education Curriculum: 3 semester hours**

Prerequisite: Consent of instructor. A study of current practices, problems, trends and research involved in the analysis and development of the physical education curriculum.

**PHY ED 6464 Analysis Of Teaching In Physical Education: 3 semester hours**

Prerequisite: Consent of instructor. A study of trends and research relating to teaching methodology, teacher effectiveness, and supervision of instruction in physical education. Emphasis will be given to the application of research on teacher effectiveness in the instructional process in physical education.

**PHY ED 6478 Problems And Research In Physical Education: 3 semester hours**

A study of potential research problems and research processes in specific physical education subdisciplines. A research project will be completed in the student's physical education subdiscipline interest area.

**PHY ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**PHY ED 7492 Directed Readings In Curriculum And Instruction: 1-6 semester hours**

Prerequisites: Graduate Standing, one graduate course in Curriculum and Instruction, and permission of the instructor. Independent study into the current research, literature, and issues in the areas of physical education curriculum and instruction.

**PHY ED 7494 Directed Readings In Motor Behavior: 1-6 semester hours**

Prerequisites: Graduate standing, one graduate course in motor behavior, and permission of the instructor. Independent study into the current research, literature, and issues in the area of motor behavior.

## Courses

**PHY ED 1124 Principles & Practice In 1St Aid & Cardiopulmonary Resuscitation: 1 semester hour**

The course provides theory and supervised practice in first aid and cardiopulmonary resuscitation leading to American Red Cross certification in those areas.

**PHY ED 2134 Personal Physical Fitness: 3 semester hours**

Prerequisite: Consent of instructor. A study of the relationship between vigorous physical activity and individual well-being. Emphasis will be placed on an individualized analysis of health fitness, resulting in a prescribed program to develop optimal levels of physical fitness, including aerobic fitness, strength, muscular endurance, flexibility, body composition, and lifetime sports considerations.

**PHY ED 3204 Special Topics In Physical Education: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, field study or research.

**PHY ED 3261 Physical Activity For The Exceptional Learner: 2 semester hours**

Prerequisite: SPEC ED 3311 and TCH ED 3313. A study of the special physical activity and exercise needs, interests, and problems of the exceptional learner, with considerable emphasis on the development of methods and competencies, in modifying physical activities.

**PHY ED 3282 Physical Growth And Motor Development: 3 semester hours**

Prerequisite: PSYCH 2270 and PHY ED 3465. An examination of the physical growth and aging, and motor development of the human being over the life span. **PHY ED 6478 Problems And Research In Physical Education: 3 semester hours**

A study of potential research problems and research processes in specific physical education subdisciplines. A research project will be completed in the student's physical education subdiscipline interest area.

**PHY ED 6497 Problems: 1-10 semester hours**

Selected problems to meet the needs of individual students.

**PHY ED 7492 Directed Readings In Curriculum And Instruction: 1-6 semester hours**

Prerequisites: Graduate Standing, one graduate course in Curriculum and Instruction, and permission of the instructor. Independent study into the current research, literature, and issues in the areas of physical education curriculum and instruction.

**PHY ED 7494 Directed Readings In Motor Behavior: 1-6 semester hours**

Prerequisites: Graduate standing, one graduate course in motor behavior, and permission of the instructor. Independent study into the current research, literature, and issues in the area of motor behavior.

## Physics

### Courses

**PHYSICS 1001 How Things Work: 3 semester hours**

Can baseball players hit home runs more easily when the weather is hot and humid? This course provides a practical introduction to understanding common life experiences by using physical intuition and basic ideas of physics. Powerful scientific principles are demonstrated through topics ranging from airplane wings to compact disk players, from lightning strikes to lasers.

**PHYSICS 1011 Basic Physics I: 4 semester hours**

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences covering the topics in classical mechanics such as kinematics, Newton's laws, energy, momentum and oscillations. This course will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

**PHYSICS 1011A Basic Physics I: 3 semester hours**

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences, covering the topics of classical mechanics, heat and sound. Will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours per week. There is no laboratory associated with this course.

**PHYSICS 1012 Basic Physics II: 4 semester hours**

Prerequisites: PHYSICS 1011. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering electricity, magnetism, light, optics and waves. This course will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

**PHYSICS 1012A Basic Physics II: 3 semester hours**

Prerequisites: PHYSICS 1011 or PHYSICS 1011A. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering the topics of electricity, magnetism, light and radiation. Will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours. There is no laboratory associated with this course.

**PHYSICS 1099 Windows On Physics: 1 semester hour**

A seminar designed to introduce physics majors to research areas in physics and physics-related fields in the Department of Physics and Astronomy. In addition to fundamental areas of physics, the areas of astrophysics, biophysics, materials science, and nanotechnology will be included. Career opportunities for students with physics degrees will be discussed and the physics curriculum will be reviewed. The course meets weekly and is required of all physics majors and minors who are transfer students.

**PHYSICS 2111 Physics: Mechanics And Heat: 5 semester hours**

Prerequisites: MATH 1900 (may be taken concurrently). An introduction to the phenomena, concepts, and laws of mechanics and heat for physics majors and students in other departments. Three classroom hours, one hour discussion, and two hours of laboratory per week.

**PHYSICS 2112 Physics: Electricity, Magnetism, And Optics: 5 semester hours**

Prerequisites: PHYSICS 2111 and MATH 2000 (MATH 2000 may be taken concurrently). A phenomenological introduction to the concepts and laws of electricity and magnetism, electromagnetic waves, optics and electrical circuits for physics majors and students in other departments. Three hours of lecture, one hour of discussion, and two hours of laboratory per week.

**PHYSICS 3200 Mathematical Methods Of Theoretical Physics: 3 semester hours**

Prerequisites: PHYSICS 2112 and MATH 2000. Mathematical techniques specifically used in the study of mechanics, electricity, magnetism, and quantum physics are developed in the context of various physical problems. Course includes the topics of vector calculus, coordinate systems, the Laplace equation and its solutions, elementary Fourier analysis, & complex variables. Applications to electrostatics, mechanics, and fluid dynamics are emphasized. Three hours of lecture per week.

**PHYSICS 3221 Mechanics: 3 semester hours**

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering single and many particle dynamics, rigid-body dynamics, and oscillations. Variational principles and Hamiltonian formulations of mechanics are covered. Three hours of lecture per week.

**PHYSICS 3223 Electricity And Magnetism: 3 semester hours**

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering the rigorous development, from basic laws, of Maxwell's equations for electromagnetic fields along with applications of these equations. Topics covered are electrostatics and electrodynamics including currents, magnetic fields, motion of charged particles in fields and an introduction to electromagnetic waves. Three hours of lecture per week.

**PHYSICS 3231 Introduction To Modern Physics I: 3 semester hours**

Prerequisites: PHYSICS 2111, PHYSICS 2112, and MATH 2020 (may be taken concurrently) and PHYSICS 3200 strongly recommended. Photons and the wave nature of particles, wave mechanics, Schrodinger equation, with applications to atomic physics; and radiation; the physics of solids; elementary particles; special relativity; health physics. Three hours of lecture per week.

**PHYSICS 3281 Directed Readings In Physics: 1-5 semester hours**

Prerequisite: Consent of Instructor. An independent study of special topics in physics. A paper may be required on an approved topic. Topics must be substantially different. Hours arranged.

**PHYSICS 3390 Research: 1-10 semester hours**

Prerequisite: Consent of department. Independent physics research projects arranged between student and instructor. Hours arranged.

**PHYSICS 4305 Bayesian Data analysis for the Sciences: 3 semester hours**

Prerequisites: Consent of Instructor. This is a cross-disciplinary course in two parts. Part one covers Bayesian inference as applied to data analysis in general, with a special focus on the mathematics of model-selection in the physical and life sciences. Part two concentrates specifically on the Bayesian use of log-probability (i.e. information) measures to track order-disorder transitions in thermodynamics, and to track the evolution of sub-system correlations (via both digital and analog means) in a wide variety of complex systems. Expect weekly empirical observation exercises, and opportunities for asynchronous as well as synchronous collaboration.

**PHYSICS 4306 Nanoscience Practicals: 1-3 semester hours**

Studies of Nanoscience characterization, synthesis, modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. Course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g. on materials microscopy), if interested. Each module will cover instrumentation, current applications, weaknesses, and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

**PHYSICS 4308 Transmission Electron Microscopy: 3 semester hours**

Prerequisite: Consent of instructor. Course introduces students to transmission electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes fundamental principles (electron optics), electron-specimen interactions, diffraction of electrons, image formation and interpretation, image processing and analysis, energy dispersive X-ray spectroscopy, electron energy loss spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with TEM operations and problem solving skills. Successful completion of the course enables students to independently operate transmission electron microscopes to perform basic research experiments. This course is ideal for students interested in ultrastructural or nanocharacterization of biological or materials systems. Two classroom hours and two hours of laboratory per week.

**PHYSICS 4309 Scanning Probe Microscopy: 3 semester hours**

Prerequisites: Consent of instructor. A lecture/laboratory study of research techniques using scanning probe microscopy. Topics include atomic force microscopy, scanning tunneling microscopy, feedback control, scanning tip fabrication, scan calibrations, air/solution/vacuum imaging, image processing and analysis, near-field optical probes, metrology, and lateral force/displacement microscopy. Applications in physics, chemistry, biology, engineering and surface science are discussed. Two hours lecture and two hours laboratory per week.

**PHYSICS 4310 Modern Electronics: 3 semester hours**

An integrated recitation/laboratory study of modern analog and digital electronics with emphasis on integrated circuits. Topics include circuit elements, operational amplifiers, logic gates, counters, ac/dc converters, noise reduction, microprocessors, embedded microcontrollers, and digital processing. Three hours of lecture/laboratory per week.

**PHYSICS 4311 Advanced Physics Laboratory I: 3 semester hours**

Prerequisite: Advanced standing with at least nine completed hours of Physics at or above the 3000 level. Physics majors are introduced to the experimental techniques used in research. A student will choose and do several special problems during the semester. Six hours laboratory per week.

**PHYSICS 4323 Modern Optics: 3 semester hours**

Prerequisite: PHYSICS 3223. A study of modern optics including diffraction theory, polarization, light propagation in solids, quantum optics, and coherence.

**PHYSICS 4331 Intro To Quantum Mechanics: 3 semester hours**

Prerequisites: PHYSICS 3200 and PHYSICS 3231. Photons and the wave nature of particles; wave mechanics, Schrodinger equation, operator and matrix formulations, and Dirac notation; applications to single particle systems, atomic physics, and spectroscopy.

**PHYSICS 4341 Thermal And Statistical Physics: 3 semester hours**

Prerequisites: MATH 2000 and PHYSICS 3231. Introduction to statistical mechanics, classical thermodynamics, and kinetic theory.

**PHYSICS 4343 Selected Topics In Physics I: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 3231, PHYSICS 4341 Topics include special phenomena for research areas such as physics of waves, biophysics, nonlinear physics, geophysical fluid dynamics and the atmospheric sciences treated by methods of advanced mechanics, electromagnetism, statistical mechanics, thermodynamics and quantum mechanics. Three hours of lecture per week.

**PHYSICS 4347 Introduction to Biophysics: 4 semester hours**

Prerequisites: PHYSICS 3231, BIOL 1821, and BIOL 1831; or permission of instructor. Introduction to the application of physical principles to problems in biology. The course will cover topics such as ion transport, protein folding, molecular motors, collective dynamics and self-assembly of biological systems, x-ray crystallography and NMR, a survey of medical imaging techniques, the relation between nonlinear dynamics and electrophysiology in the heart and brain, and physics-based approaches to modeling gene networks and evolutionary dynamics.

**PHYSICS 4350 Computational Physics: 3 semester hours**

Prerequisite: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231. Computer Analysis In Physics; Solutions Of Eigenvalue Problems; Coupled Differential Equations; And Writing Of Fortran Programs.

**PHYSICS 4351 Elementary Solid State Physics: 3 semester hours**

Prerequisites: PHYSICS 4331. Theoretical and experimental aspects of solid state physics, including one-dimensional band theory of solids; electron emission from metals and semiconductors; electrical and thermal conductivity of solids.

**PHYSICS 4353 Physics Of Fluids: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 4341, or consent of instructor. Dynamical theory of gases and liquids. Course covers the mathematical development of physical fluid dynamics with contemporary applications.

**PHYSICS 4365 Introduction To Plasma Physics: 3 semester hours**

Prerequisites: PHYSICS 3223 and PHYSICS 4341. A study of the nonlinear collective interactions of ions, electrons, and neutral molecules with each other and with electric and magnetic fields. Topics include plasma confinement and stability, electrical discharges and ionization, kinetic theory of plasma transport, plasma waves and radiation, and controlled fusion. Solutions of the Boltzmann, Fokker-Planck, and Vlasov equations are discussed and methods of advanced electromagnetism and statistical physics are utilized.

**PHYSICS 4370 Relativity And Cosmology: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223 and PHYSICS 3231. An introduction to Einstein's general theory of relativity. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, metric description of curved space, geodesic equation, Einstein Field Equation, black holes, and cosmology.

**PHYSICS 4381 Directed Readings In Physics: 1-10 semester hours**

Prerequisite: Consent of instructor. An independent study of special topics in physics for senior undergraduates or graduate students.

**PHYSICS 5307 Advanced Scanning Electron Microscopy: 3 semester hours**

Prerequisites: Consent of instructor. This Course introduces students to advanced scanning electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes electron optics, electron-specimen interactions, image formation and interpretation, compositional analysis by energy dispersive x-ray spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with SEM operations and problem-solving skills. Successful completion of the course enables students to independently operate scanning electron microscopes to perform research experiments. Two classroom hours and two hours of laboratory per week.

**PHYSICS 5308 Transmission Electron Microscopy: 3 semester hours**

Prerequisites: PHYSICS 5307 or consent of instructor. A lecture/laboratory study of transmission electron microscopy (TEM) in conventional, analytical, and phase-contrast (high resolution) applications. Course includes advanced electron optics and image formation, defect structures, specimen preparation, contrast theory, diffraction/periodicity analysis, and electron energy loss/x-ray spectroscopy. Two hours lecture and two hours laboratory per week.

**PHYSICS 5345 Nonlinear Dynamics And Stochastic Processes: 3 semester hours**

Prerequisites: PHYSICS 3221 and PHYSICS 4341 and consent of instructor. Dynamical systems; theory of oscillations; introduction to bifurcation theory and chaos in dissipative systems with applications in physics and biology; introduction to stochastic processes with applications in physics, chemistry and biology; dynamics of nonlinear systems perturbed by noise; noise-induced phase transitions; linear and nonlinear time series analysis. Three classroom hours per week.

**PHYSICS 5357 Fundamental Particles and Forces: 3 semester hours**

Prerequisites: PHYSICS 3223, PHYSICS 3231, and PHYSICS 4331, may be taken concurrently Introduction to nuclear and particle physics. Nuclear phenomenology and models; high energy particle accelerators and detectors; phenomenology of strong, electromagnetic and weak interactions; symmetry principles; quark compositions of strongly interacting baryons and mesons; gauge theories and the standard model of particle interactions; grand unification.

**PHYSICS 5370 Intermediate Relativity and Cosmology: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231; or graduate standing. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, geodesic equation, Einstein Field Equation, black holes, and cosmology. Differential geometry from metric description to Riemann curvature tensor will be studied.

**PHYSICS 5402 Introduction To Mathematical Physics: 3 semester hours**

Prerequisites: Graduate standing in physics or consent of instructor A course covering mathematical techniques as applied in advanced theoretical physics including generalized vector spaces and their dual spaces, linear operators and functionals, generalized functions, spectral decomposition of operators, tensor analysis, and complex variables. Three hours of lecture per week.

**PHYSICS 5403 Principles Of Mathematical Physics: 3 semester hours**

Prerequisites: Graduate standing in physics or consent of instructor. Boundary value problems; Strum-Liouville theory and orthogonal functions; Green's function techniques; and introduction to group theory with emphasis on representations of Lie Algebras. Three hours of lecture per week.

**PHYSICS 6300 Master's Thesis: 3 semester hours**

Prerequisite: Consent of Instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.S. program. Students who do not write a thesis cannot apply PHYSICS 6300 to a degree. This course transfers to the Cooperative Ph.D. program as three research credits.

**PHYSICS 6400 Special Problems: 1-5 semester hours**

Must have faculty mentor and approval of Department Chairperson. A study of special topics in physics for graduate students.

**PHYSICS 6401 Special Topics: 1-4 semester hours**

Prerequisite: Consent of instructor. This course is designed to give the department an opportunity to test a new course.

**PHYSICS 6409 Theoretical Mechanics I: 3 semester hours**

Prerequisite: PHYSICS 3221. Classical mechanics, methods of Newton, Lagrange, and Hamilton applied to motion of particles and rigid bodies, elasticity, hydrodynamics.

**PHYSICS 6410 Seminar: 1-3 semester hours**

Prerequisite: Approval of Department Chair. Discussion of current topics.

**PHYSICS 6411 Electrodynamics I: 3 semester hours**

Prerequisite: PHYSICS 3223. A rigorous development of the fundamentals of electromagnetic fields and waves. Electrostatics, magnetostatics, Maxwell's equations, Green's functions, boundary value problems, multipoles, conservation laws.

**PHYSICS 6413 Statistical Mechanics: 3 semester hours**

Prerequisite: PHYSICS 4331, PHYSICS 4341. A study of statistical ensembles; Maxwell-Boltzmann, Fermi-Dirac and Einstein-Bose distribution laws, application to some physical systems.

**PHYSICS 6423 Electrodynamics II: 3 semester hours**

Prerequisite: PHYSICS 6411. A Continuation of PHYSICS 6411. Applications of time-dependent Maxwell's equations to such topics as plasmas, wave guides, cavities, radiation: fields of simple systems and multiples. Relativity: covariant formulation of Maxwell's equations and conservation laws, fields of uniformly moving and accelerated charges.

**PHYSICS 6461 Quantum Mechanics I: 3 semester hours**

Prerequisite: PHYSICS 4331. A study of the Schroedinger wave equation, operators and matrices, perturbation theory, collision and scattering problems.

**PHYSICS 6463 Quantum Mechanics II: 3 semester hours**

Prerequisite: PHYSICS 6461. Continuation of PHYSICS 6461. To include such topics as Pauli Spin-Operator Theory, classification of atomic states, introduction to field quantization, and Dirac Electron Theory.

**PHYSICS 6481 Physics Of Solid State: 3 semester hours**

Prerequisite: PHYSICS 6461. Crystal symmetry, point and space groups, lattice vibrations, phonons, one-electron model, Hartee-Fock approximation, elementary energy band theory, transport properties, the Boltzmann equation, introduction to superconductivity, semiconductors and magnetism.

**PHYSICS 6490 Research: 1-10 semester hours**

Prerequisite: Must have a faculty mentor and approval of the department chair. Investigations of an advanced nature leading to the preparation of a thesis or dissertation.

**PHYSICS 6495 Continuous Registration: 1-6 semester hours**

Doctoral candidates who have completed all requirements for the degree except the dissertation, and are away from the campus must continue to enroll for at least one hour of credit each registration period until the degree is completed. Failure to do so may invalidate the candidacy.

## Courses

**PHYSICS 1001 How Things Work: 3 semester hours**

Can baseball players hit home runs more easily when the weather is hot and humid? This course provides a practical introduction to understanding common life experiences by using physical intuition and basic ideas of physics. Powerful scientific principles are demonstrated through topics ranging from airplane wings to compact disk players, from lightning strikes to lasers.

**PHYSICS 1011 Basic Physics I: 4 semester hours**

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences covering the topics in classical mechanics such as kinematics, Newton's laws, energy, momentum and oscillations. This course will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

**PHYSICS 1011A Basic Physics I: 3 semester hours**

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences, covering the topics of classical mechanics, heat and sound. Will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours per week. There is no laboratory associated with this course.

**PHYSICS 1012 Basic Physics II: 4 semester hours**

Prerequisites: PHYSICS 1011. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering electricity, magnetism, light, optics and waves. This course will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

**PHYSICS 1012A Basic Physics II: 3 semester hours**

Prerequisites: PHYSICS 1011 or PHYSICS 1011A. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering the topics of electricity, magnetism, light and radiation. Will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours. There is no laboratory associated with this course.

**PHYSICS 1099 Windows On Physics: 1 semester hour**

A seminar designed to introduce physics majors to research areas in physics and physics-related fields in the Department of Physics and Astronomy. In addition to fundamental areas of physics, the areas of astrophysics, biophysics, materials science, and nanotechnology will be included. Career opportunities for students with physics degrees will be discussed and the physics curriculum will be reviewed. The course meets weekly and is required of all physics majors and minors who are transfer students.

**PHYSICS 2111 Physics: Mechanics And Heat: 5 semester hours**

Prerequisites: MATH 1900 (may be taken concurrently). An introduction to the phenomena, concepts, and laws of mechanics and heat for physics majors and students in other departments. Three classroom hours, one hour discussion, and two hours of laboratory per week.

**PHYSICS 2112 Physics: Electricity, Magnetism, And Optics: 5 semester hours**

Prerequisites: PHYSICS 2111 and MATH 2000 (MATH 2000 may be taken concurrently). A phenomenological introduction to the concepts and laws of electricity and magnetism, electromagnetic waves, optics and electrical circuits for physics majors and students in other departments. Three hours of lecture, one hour of discussion, and two hours of laboratory per week.

**PHYSICS 3200 Mathematical Methods Of Theoretical Physics: 3 semester hours**

Prerequisites: PHYSICS 2112 and MATH 2000. Mathematical techniques specifically used in the study of mechanics, electricity, magnetism, and quantum physics are developed in the context of various physical problems. Course includes the topics of vector calculus, coordinate systems, the Laplace equation and its solutions, elementary Fourier analysis, & complex variables. Applications to electrostatics, mechanics, and fluid dynamics are emphasized. Three hours of lecture per week.

**PHYSICS 3221 Mechanics: 3 semester hours**

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering single and many particle dynamics, rigid-body dynamics, and oscillations. Variational principles and Hamiltonian formulations of mechanics are covered. Three hours of lecture per week.

**PHYSICS 3223 Electricity And Magnetism: 3 semester hours**

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering the rigorous development, from basic laws, of Maxwell's equations for electromagnetic fields along with applications of these equations. Topics covered are electrostatics and electrodynamics including currents, magnetic fields, motion of charged particles in fields and an introduction to electromagnetic waves. Three hours of lecture per week.

**PHYSICS 3231 Introduction To Modern Physics I: 3 semester hours**

Prerequisites: PHYSICS 2111, PHYSICS 2112, and MATH 2020 (may be taken concurrently) and PHYSICS 3200 strongly recommended. Photons and the wave nature of particles, wave mechanics, Schrodinger equation, with applications to atomic physics; and radiation; the physics of solids; elementary particles; special relativity; health physics. Three hours of lecture per week.

**PHYSICS 3281 Directed Readings In Physics: 1-5 semester hours**

Prerequisite: Consent of Instructor. An independent study of special topics in physics. A paper may be required on an approved topic. Topics must be substantially different. Hours arranged.

**PHYSICS 3390 Research: 1-10 semester hours**

Prerequisite: Consent of department. Independent physics research projects arranged between student and instructor. Hours arranged.

**PHYSICS 4305 Bayesian Data analysis for the Sciences: 3 semester hours**

Prerequisites: Consent of Instructor. This is a cross-disciplinary course in two parts. Part one covers Bayesian inference as applied to data analysis in general, with a special focus on the mathematics of model-selection in the physical and life sciences. Part two concentrates specifically on the Bayesian use of log-probability (i.e. information) measures to track order-disorder transitions in thermodynamics, and to track the evolution of sub-system correlations (via both digital and analog means) in a wide variety of complex systems. Expect weekly empirical observation exercises, and opportunities for asynchronous as well as synchronous collaboration.

**PHYSICS 4306 Nanoscience Practicals: 1-3 semester hours**

Studies of Nanoscience characterization, synthesis, modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. Course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g. on materials microscopy), if interested. Each module will cover instrumentation, current applications, weaknesses, and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

**PHYSICS 4308 Transmission Electron Microscopy: 3 semester hours**

Prerequisite: Consent of instructor. Course introduces students to transmission electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes fundamental principles (electron optics), electron-specimen interactions, diffraction of electrons, image formation and interpretation, image processing and analysis, energy dispersive X-ray spectroscopy, electron energy loss spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with TEM operations and problem solving skills. Successful completion of the course enables students to independently operate transmission electron microscopes to perform basic research experiments. This course is ideal for students interested in ultrastructural or nanocharacterization of biological or materials systems. Two classroom hours and two hours of laboratory per week.

**PHYSICS 4309 Scanning Probe Microscopy: 3 semester hours**

Prerequisites: Consent of instructor. A lecture/laboratory study of research techniques using scanning probe microscopy. Topics include atomic force microscopy, scanning tunneling microscopy, feedback control, scanning tip fabrication, scan calibrations, air/solution/vacuum imaging, image processing and analysis, near-field optical probes, metrology, and lateral force/displacement microscopy. Applications in physics, chemistry, biology, engineering and surface science are discussed. Two hours lecture and two hours laboratory per week.

**PHYSICS 4310 Modern Electronics: 3 semester hours**

An integrated recitation/laboratory study of modern analog and digital electronics with emphasis on integrated circuits. Topics include circuit elements, operational amplifiers, logic gates, counters, ac/dc converters, noise reduction, microprocessors, embedded microcontrollers, and digital processing. Three hours of lecture/laboratory per week.

**PHYSICS 4311 Advanced Physics Laboratory I: 3 semester hours**

Prerequisite: Advanced standing with at least nine completed hours of Physics at or above the 3000 level. Physics majors are introduced to the experimental techniques used in research. A student will choose and do several special problems during the semester. Six hours laboratory per week.

**PHYSICS 4323 Modern Optics: 3 semester hours**

Prerequisite: PHYSICS 3223. A study of modern optics including diffraction theory, polarization, light propagation in solids, quantum optics, and coherence.

**PHYSICS 4331 Intro To Quantum Mechanics: 3 semester hours**

Prerequisites: PHYSICS 3200 and PHYSICS 3231. Photons and the wave nature of particles; wave mechanics, Schrodinger equation, operator and matrix formulations, and Dirac notation; applications to single particle systems, atomic physics, and spectroscopy.

**PHYSICS 4341 Thermal And Statistical Physics: 3 semester hours**

Prerequisites: MATH 2000 and PHYSICS 3231. Introduction to statistical mechanics, classical thermodynamics, and kinetic theory.

**PHYSICS 4343 Selected Topics In Physics I: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 3231, PHYSICS 4341 Topics include special phenomena for research areas such as physics of waves, biophysics, nonlinear physics, geophysical fluid dynamics and the atmospheric sciences treated by methods of advanced mechanics, electromagnetism, statistical mechanics, thermodynamics and quantum mechanics. Three hours of lecture per week.

**PHYSICS 4347 Introduction to Biophysics: 4 semester hours**

Prerequisites: PHYSICS 3231, BIOL 1821, and BIOL 1831; or permission of instructor. Introduction to the application of physical principles to problems in biology. The course will cover topics such as ion transport, protein folding, molecular motors, collective dynamics and self-assembly of biological systems, x-ray crystallography and NMR, a survey of medical imaging techniques, the relation between nonlinear dynamics and electrophysiology in the heart and brain, and physics-based approaches to modeling gene networks and evolutionary dynamics.

**PHYSICS 4350 Computational Physics: 3 semester hours**

Prerequisite: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231. Computer Analysis In Physics; Solutions Of Eigenvalue Problems; Coupled Differential Equations; And Writing Of Fortran Programs.

**PHYSICS 4351 Elementary Solid State Physics: 3 semester hours**

Prerequisites: PHYSICS 4331. Theoretical and experimental aspects of solid state physics, including one-dimensional band theory of solids; electron emission from metals and semiconductors; electrical and thermal conductivity of solids.

**PHYSICS 4353 Physics Of Fluids: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 4341, or consent of instructor. Dynamical theory of gases and liquids. Course covers the mathematical development of physical fluid dynamics with contemporary applications.

**PHYSICS 4365 Introduction To Plasma Physics: 3 semester hours**

Prerequisites: PHYSICS 3223 and PHYSICS 4341. A study of the nonlinear collective interactions of ions, electrons, and neutral molecules with each other and with electric and magnetic fields. Topics include plasma confinement and stability, electrical discharges and ionization, kinetic theory of plasma transport, plasma waves and radiation, and controlled fusion. Solutions of the Boltzmann, Fokker-Planck, and Vlasov equations are discussed and methods of advanced electromagnetism and statistical physics are utilized.

**PHYSICS 4370 Relativity And Cosmology: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223 and PHYSICS 3231. An introduction to Einstein's general theory of relativity. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, metric description of curved space, geodesic equation, Einstein Field Equation, black holes, and cosmology.

**PHYSICS 4381 Directed Readings In Physics: 1-10 semester hours**

Prerequisite: Consent of instructor. An independent study of special topics in physics for senior undergraduates or graduate students.

**PHYSICS 5307 Advanced Scanning Electron Microscopy: 3 semester hours**

Prerequisites: Consent of instructor. This Course introduces students to advanced scanning electron microscopy techniques and their applications to solving challenging materials and biological problems. Course includes electron optics, electron-specimen interactions, image formation and interpretation, compositional analysis by energy dispersive x-ray spectroscopy, and sample preparation of both biological and non-biological systems. Laboratory experiments will provide students "hands-on" experience with SEM operations and problem-solving skills. Successful completion of the course enables students to independently operate scanning electron microscopes to perform research experiments. Two classroom hours and two hours of laboratory per week.

**PHYSICS 5308 Transmission Electron Microscopy: 3 semester hours**

Prerequisites: PHYSICS 5307 or consent of instructor. A lecture/laboratory study of transmission electron microscopy (TEM) in conventional, analytical, and phase-contrast (high resolution) applications. Course includes advanced electron optics and image formation, defect structures, specimen preparation, contrast theory, diffraction/periodicity analysis, and electron energy loss/x-ray spectroscopy. Two hours lecture and two hours laboratory per week.

**PHYSICS 5345 Nonlinear Dynamics And Stochastic Processes: 3 semester hours**

Prerequisites: PHYSICS 3221 and PHYSICS 4341 and consent of instructor. Dynamical systems; theory of oscillations; introduction to bifurcation theory and chaos in dissipative systems with applications in physics and biology; introduction to stochastic processes with applications in physics, chemistry and biology; dynamics of nonlinear systems perturbed by noise; noise-induced phase transitions; linear and nonlinear time series analysis. Three classroom hours per week.

**PHYSICS 5357 Fundamental Particles and Forces: 3 semester hours**

Prerequisites: PHYSICS 3223, PHYSICS 3231, and PHYSICS 4331, may be taken concurrently Introduction to nuclear and particle physics. Nuclear phenomenology and models; high energy particle accelerators and detectors; phenomenology of strong, electromagnetic and weak interactions; symmetry principles; quark compositions of strongly interacting baryons and mesons; gauge theories and the standard model of particle interactions; grand unification.

**PHYSICS 5370 Intermediate Relativity and Cosmology: 3 semester hours**

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231; or graduate standing. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, geodesic equation, Einstein Field Equation, black holes, and cosmology. Differential geometry from metric description to Riemann curvature tensor will be studied.

**PHYSICS 5402 Introduction To Mathematical Physics: 3 semester hours**

Prerequisites: Graduate standing in physics or consent of instructor A course covering mathematical techniques as applied in advanced theoretical physics including generalized vector spaces and their dual spaces, linear operators and functionals, generalized functions, spectral decomposition of operators, tensor analysis, and complex variables. Three hours of lecture per week.

**PHYSICS 5403 Principles Of Mathematical Physics: 3 semester hours**

Prerequisites: Graduate standing in physics or consent of instructor. Boundary value problems; Strum-Liouville theory and orthogonal functions; Green's function techniques; and introduction to group theory with emphasis on representations of Lie Algebras. Three hours of lecture per week.

**PHYSICS 6300 Master's Thesis: 3 semester hours**

Prerequisite: Consent of Instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.S. program. Students who do not write a thesis cannot apply PHYSICS 6300 to a degree. This course transfers to the Cooperative Ph.D. program as three research credits.

**PHYSICS 6400 Special Problems: 1-5 semester hours**

Must have faculty mentor and approval of Department Chairperson. A study of special topics in physics for graduate students.

**PHYSICS 6401 Special Topics: 1-4 semester hours**

Prerequisite: Consent of instructor. This course is designed to give the department an opportunity to test a new course.

**PHYSICS 6409 Theoretical Mechanics I: 3 semester hours**

Prerequisite: PHYSICS 3221. Classical mechanics, methods of Newton, Lagrange, and Hamilton applied to motion of particles and rigid bodies, elasticity, hydrodynamics.

**PHYSICS 6410 Seminar: 1-3 semester hours**

Prerequisite: Approval of Department Chair. Discussion of current topics.

**PHYSICS 6411 Electrodynamics I: 3 semester hours**

Prerequisite: PHYSICS 3223. A rigorous development of the fundamentals of electromagnetic fields and waves. Electrostatics, magnetostatics, Maxwell's equations, Green's functions, boundary value problems, multipoles, conservation laws.

**PHYSICS 6413 Statistical Mechanics: 3 semester hours**

Prerequisite: PHYSICS 4331, PHYSICS 4341. A study of statistical ensembles; Maxwell-Boltzmann, Fermi-Dirac and Einstein-Bose distribution laws, application to some physical systems.

**PHYSICS 6423 Electrodynamics II: 3 semester hours**

Prerequisite: PHYSICS 6411. A Continuation of PHYSICS 6411. Applications of time-dependent Maxwell's equations to such topics as plasmas, wave guides, cavities, radiation: fields of simple systems and multiples. Relativity: covariant formulation of Maxwell's equations and conservation laws, fields of uniformly moving and accelerated charges.

**PHYSICS 6461 Quantum Mechanics I: 3 semester hours**

Prerequisite: PHYSICS 4331. A study of the Schroedinger wave equation, operators and matrices, perturbation theory, collision and scattering problems.

**PHYSICS 6463 Quantum Mechanics II: 3 semester hours**

Prerequisite: PHYSICS 6461. Continuation of PHYSICS 6461. To include such topics as Pauli Spin-Operator Theory, classification of atomic states, introduction to field quantization, and Dirac Electron Theory.

**PHYSICS 6481 Physics Of Solid State: 3 semester hours**

Prerequisite: PHYSICS 6461. Crystal symmetry, point and space groups, lattice vibrations, phonons, one-electron model, Hartee-Fock approximation, elementary energy band theory, transport properties, the Boltzmann equation, introduction to superconductivity, semiconductors and magnetism.

**PHYSICS 6490 Research: 1-10 semester hours**

Prerequisite: Must have a faculty mentor and approval of the department chair. Investigations of an advanced nature leading to the preparation of a thesis or dissertation.

**PHYSICS 6495 Continuous Registration: 1-6 semester hours**

Doctoral candidates who have completed all requirements for the degree except the dissertation, and are away from the campus must continue to enroll for at least one hour of credit each registration period until the degree is completed. Failure to do so may invalidate the candidacy.

## Political Science

### Courses

**POL SCI 1100 Introduction To American Politics: 3 semester hours**

Introduction to basic concepts of government and politics with special reference to the United States, but including comparative material from other systems. Course fulfills the state requirement.

**POL SCI 1200 Foundations Of Law: An Introduction To Legal Studies: 3 semester hours**

Same as CRIMIN 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

**POL SCI 1450 Introduction To Labor Studies: 3 semester hours**

This course covers many topics important to the role of unions in the American political system and American society from a labor perspective. Topics include the role of workers in current and future times, unions' institutional structure, collective bargaining strategies and obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media.

**POL SCI 1500 Introduction To Comparative Politics: 3 semester hours**

This course introduces students to western and non-western systems. It examines similarities and differences in the basic political ideologies, structures, economies, social institutions and governmental processes of developed and developing countries. It also provides frameworks for understanding the cultures of the world that are the basis for formal economic and political institutions. In addition, the course examines the role of non-state institutions, including trans-national ones, in shaping national policies. It uses case studies from Africa, Asia, Latin America, as well as Europe, to enhance student understanding of comparative politics. (This course fulfills the cultural diversity requirement.)

**POL SCI 1550 Women And Politics In The Developing World: 3 semester hours**

Women play a central role in the transformation of political, economic, cultural and gender relations in developing nations. This course examines the political role of women in these transformations. In particular, the course examines: 1) ways that modernity, universal education, the market economy and globalization have widened the scope of women's public activities; 2) the emergence of social movements driven by the transformation of economic and political roles brought about by the inclusion of women in the political arena; 3) the re-interpretation of religious doctrines, especially those that emphasize women's "return" to the private sphere and the legitimate denial of women's political rights. Fulfills the Cultural Diversity requirement.

**POL SCI 1600 Contemporary Political Ideologies: 3 semester hours**

An introduction to the major political ideologies of the world today. Emphasis is placed on democracy, feminism, Marxism, and nationalism.

**POL SCI 1800 World Politics: 3 semester hours**

An introduction to the field of international relations, covering such topics as nationalism, power, foreign policymaking, diplomacy, war, arms control and disarmament, interdependence, the regulation of conflict, and other aspects of politics among nations.

**POL SCI 2000 Political Analysis: 3 semester hours**

Prerequisites: Math proficiency of MATH 1020 or higher. An introduction to political analysis, emphasizing both the logic of inquiry and practical methods. Students learn about the construction and evaluation of theories that relate to real-world politics. They also have an opportunity for hands-on experience with qualitative and quantitative methods including graphics, descriptive statistics, cross-tabular and correlational analysis, hypothesis testing, and computer applications.

**POL SCI 2260 Law, Politics and Society: 3 semester hours**

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course examines the ways in which law in America connects with politics and society. The course will cover the litigation process, access to the courts, how and why individuals and groups bring litigation to pursue political and policy goals, and how lawyers, judges and other political actors use law to solve policy problems. Attention will be placed on current legal policy issues facing American society.

**POL SCI 2280 Judicial Politics And Policy: 3 semester hours**

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course is an examination of the American state and federal legal systems. Topics examined in this course include an analysis of the structure, organization and foundation of courts. Emphasis will be placed on the role of juries, judges, attorneys, litigants, and interest groups in the judicial system. The objective of the course is to evaluate courts as political institutions and analyze the policy-making role of judges.

**POL SCI 2290 Gender And The Law: 3 semester hours**

Same as GS 2290. This course examines the ways in which laws and interpretations of the laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non- governmental influences on equality. It also addresses gender representation in the legal profession and its effect on judicial decisions. (This course satisfies State requirements in American History and Government).

**POL SCI 2300 State Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An examination of contemporary state politics in the U.S. Covers social, economic and political determinants of policies; federal-state-local relations, elections, interest groups and participation; executive legislative and judicial institutions and processes, policies and their impact. Course fulfills the state requirement.

**POL SCI 2320 African Americans And The Political System: 3 semester hours**

Prerequisites: POL SCI 1100 or consent of instructor. Examination of the status of African Americans in the context of the American political system. The course will focus on a number of issues, including: attitudes of various publics toward racial concerns; nature of problems in specific policy areas (e.g., unemployment, school desegregation, housing, poverty); representation of African Americans in governmental institutions and the private sector; and the role of African American leadership and civil rights groups in the political process. Course fulfills the state requirement.

**POL SCI 2350 Introduction To Urban Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Examination of structure and process of politics in the urban community, with emphasis on their relationships to community power structures. Course fulfills the state requirement.

**POL SCI 2370 The Politics of Identity and Social Justice: 3 semester hours**

Examines the meaning of social justice at the intersections of identities linked to race, ethnicity, class, gender, sexuality, age, ability, religion, and citizenship in the United States. We will dissect how the social construction of "difference" within systems of power has resulted in social policies that marginalize some groups more than others. We will also discuss how oppression linked to delineations of difference can be challenged and socially reconstructed, and ultimately used as a source of political empowerment.

**POL SCI 2380 The Politics of Gender in the United States: 3 semester hours**

Same As GS 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels. (This course satisfies State requirements in American History and Government.).

**POL SCI 2400 Public Administration: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Survey of Public Administration, with reference to organization, financial administration, personnel management, judicial control of the administrative process. Course fulfills state requirement.

**POL SCI 2420 Introduction To Public Policy: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Study of differing approaches to understanding the public policy process. Course surveys the application of social science to public issues and problems. Course fulfills the state requirement.

**POL SCI 2500 Comparing Different Worlds: 3 semester hours**

This course focuses on the role of political institutions, economic structures and social groups in explaining differences in forms of government and levels of socio-economic development. It explores in detail one or more of these themes in cases drawn from developing and developed nations.

**POL SCI 2510 The Politics of European Union: 3 semester hours**

Prerequisite: POL SCI 1500 or consent of instructor. The European Union has become the driving force in European economic and social development. This course assesses the changing nature of national identity and national sovereignty in Europe. It compares and contrasts key public policies, (single market, welfare, migration, gender mainstreaming, "democratic deficits"), along with core EU actors and institutions, and includes participation in the annual Midwest Model EU.

**POL SCI 2530 Political Systems Of South America: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of South America. Examination of the cultural context that has shaped the political, economic, and social development of states in the region. This course satisfies the Cultural Diversity requirement.

***POL SCI 2540 Political Systems Of Mexico, Central America And The Caribbean: 3 semester hours***

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of Mexico, Central America, and the Caribbean. Examination of the cultural context that has shaped the political, economic, and social development of these countries. This course satisfies the Cultural Diversity requirement.

***POL SCI 2550 East Asian Politics: 3 semester hours***

An introduction to the study of the Chinese and Japanese political systems. Examination of the cultural context that has shaped the path of political development for both states. This course satisfies the Cultural Diversity requirement.

***POL SCI 2580 African Politics: 3 semester hours***

Prerequisite: POL SCI 1100 or consent of instructor. An introduction to the nature of societies, governments, and international relations in Africa. The course deals with forms of governance on the continent, regional groupings of states, and persistent conflicts within and among states. Problems of economic underdevelopment, food supplies, health and population trends, and cultural change are analyzed, along with the role of outside major power intervention. Fulfills the Cultural Diversity requirement.

***POL SCI 2590 Globalization: Prospects and Problems: 3 semester hours***

Globalization is a multidimensional construct, which calls for its study from a multidisciplinary perspective: i.e., economics, political science, history, and anthropology. The course will explore the forces undergirding economic globalization, as well as the factors that are giving rise to a global democratic dispensation. It will also examine previous forms of globalization including archaic globalization, proto-globalization, and modern globalization as well as so-called deviant globalization - the trade in illicit goods and services, which are also highly lucrative: e.g., human trafficking, prostitution, endangered species, narcotics, organ transplants, small arms, etc. Finally, the course will explore cultural globalization and the rise of a global 'pop culture.' The course will include a comparative analysis of the impacts of globalization in all of its manifestations on social groups (e.g., men and women, ethnic and racial minorities, young and old, classes), countries, and regions.

***POL SCI 2610 Ancient And Medieval Political Thought: 3 semester hours***

Study of political thought from Plato to Machiavelli.

***POL SCI 2620 Modern Political Thought: 3 semester hours***

Study of political thought from Machiavelli to the present.

***POL SCI 2650 American Political Thought: 3 semester hours***

History of political thought in the United States from Colonial times to the present.

***POL SCI 2820 United States Foreign Policy: 3 semester hours***

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of Instructor. Examination of the factors influencing the formation and the execution of American foreign policy, with a focus on specific contemporary foreign policy issues.

***POL SCI 2900 Studies In Political Science: 3 semester hours***

Selected topics in political science.

***POL SCI 3200 Constitutional Law: 3 semester hours***

Prerequisites: POL SCI 1100, or POL SCI 1200, or consent of the instructor. Study of leading American constitutional principles regarding legislative, executive, and judicial power, federalism, the commerce clause, and economic due process as they have evolved through the important decisions of the U.S. Supreme Court. Course fulfills the state requirement.

***POL SCI 3210 Civil Liberties: 3 semester hours***

Prerequisite: POL SCI 1100, or POL SCI 1200, or POL SCI 3200, or consent of instructor. Civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and rights of defendants. Course fulfills the state requirement.

***POL SCI 3220 Labor Law: 3 semester hours***

Prerequisites: Consent of instructor In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities.

***POL SCI 3260 The Supreme Court: 3 semester hours***

Prerequisites: POL SCI 1100, or POL SCI 1200 or consent of the instructor. An examination of the role, function and assertion of power by the U.S. Supreme Court in our constitutional democracy. Topics include an historical overview of the Supreme court, the process of selecting Supreme Court Justices, life in the Court, Supreme Court decision making, Supreme Court policymaking, implementation and impact of Court decisions and the role of the Supreme Court as a national policymaker. This course fulfills the state requirement.

***POL SCI 3300 The American Presidency: 3 semester hours***

Prerequisite: POL SCI 1100 or consent of instructor. Study of constitutional, political, legislative, and administrative roles played by the American chief executive in the development of public policy. Course fulfills state requirement.

***POL SCI 3330 Public Opinion and Political Participation: 3 semester hours***

Prerequisite: POL SCI 1100 or consent of instructor. This course links Americans' political attitudes to their political participation (defined broadly) and explores how governmental institutions, the media, and social group affiliations affect political behavior. It also connects trends in public opinion and participation to the state of American democracy.

***POL SCI 3331 Congressional Politics: 3 semester hours***

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the Congress of the United States, its history and evolution, its contemporary politics, and its role in the national policy-making process. Topics include candidate recruitment, campaigns and elections, representation, committees, legislative leadership, roles and norms, voting alignments, lobbyists and interest groups, oversight of administration, and House-Senate comparisons, the role of Congress in foreign policy, economic policy, social-welfare policy will be examined.

**POL SCI 3340 Politics And The Media: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. This course examines how the political news media operate, the interplay between journalists, politicians, and the public, and media's role in promoting American democracy. Emphasis is placed on understanding the media's impact on various political institutions and actors and how these, in turn, affect the media.

**POL SCI 3350 Political Parties And Elections: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Development, organization, functions, activities of major and minor political parties, pressure groups, election administration, especially in the United States. Course fulfills the state requirement.

**POL SCI 3390 Studies In American Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Selected topics in American politics. May be repeated.

**POL SCI 3420 Public and NonProfit Personnel Management: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 2400 or consent of instructor. A study of personnel practices in the public and nonprofit sectors, including recruitment, job development, labor relations, and administration of equal employment/ affirmative action Programs.

**POL SCI 3430 Union Leadership And Administration: 3 semester hours**

Prerequisites: Consent of instructor. This course will focus on the roles and challenges of union leadership in a changing environment. Topics will include the union leader's roles as representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership style and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking strategic planning and managing complex campaigns and diverse organizations.

**POL SCI 3440 Public and NonProfit Budgeting: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 2400; or consent of instructor. Budgeting is the study of "who gets what" and who pays for it. This course examines the administration and politics of federal, state, and local government budgets. Students gain experience in interpreting budget documents and making budget choices, using electronic and other resources.

**POL SCI 3450 Urban Administration: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Study of administrative machinery and practices of metropolitan government, how metropolitan areas organize themselves to provide services, how urban policies are made and implemented, how budgeting and personnel recruitment processes operate, and how these relate to urban policies. Course fulfills state requirement.

**POL SCI 3455 Metropolitan Planning: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 2400, or consent of instructor. Why do metropolitan areas look the way they do? How much of this was "planned?" Can/should metropolitan development be planned? Who should decide, and how? This course will examine the political processes in metropolitan areas as they relate to planning. We will look at a series of urban plans and see what they have (and have not) accomplished, and look at a range of alternative views of how planning might be done. Course fulfills state requirement.

**POL SCI 3460 The Politics Of Poverty And Welfare: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the structure of income inequality in the U.S. and public policies designed to redistribute wealth and to treat poverty. The history of welfare programs, the growth of the welfare state, and attempts to cut social spending are closely examined.

**POL SCI 3470 Collective Bargaining: 3 semester hours**

This course involves a study of collective bargaining processes including contract negotiations, contract administration, and methods for the resolution of bargaining disputes. Both theoretical and applied issues in collective bargaining will be addressed. Specific topics include the economic determination of bargaining power, legal constraints on the bargaining process, negotiation strategies and techniques, and the use of mediation and arbitration in the resolution of bargaining disputes.

**POL SCI 3480 Environmental Politics: 3 semester hours**

Prerequisites: POL SCI 1100 or consent of instructor. This course examines the process of environmental policymaking and key environmental issues. Topics include national and international policies toward air and water pollution, energy use, solid and toxic waste disposal, global warming, overpopulation, and wilderness and wildlife conservation.

**POL SCI 3500 The Politics of the Middle East: International and National Dynamics: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500 or consent of instructor. Survey of political movements, governments, and international conflicts in the Middle East. Islam, nationalism, ideologies and economic systems will be studied. The effect of oil and the military will also be considered. Course fulfills the non-Euro-American requirement.

**POL SCI 3570 Gender, Ethnicity and Public Policy: 3 semester hours**

Prerequisite: POL SCI 1100, or POL SCI 1500, or consent of instructor. Raises the question as to whether "more women in politics," stemming from diverse economic, racial, ethnic backgrounds and age groups, will necessarily result in better policies for women and men. Compares gendered and racialized impacts of a wide array of public policies (in the areas of education, employment health care, welfare, and reproductive technologies) across a broad sample of advanced industrial societies. Analyzes the "empowerment" potential of new equality policies being generated at the international and supranational levels (e.g., in the UN and the European Union).

**POL SCI 3580 African Diasporas: Identity Politics And Transnational Communities: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. This course focuses on the role of Africa's regional and global diaspora(s) in the construction of post-modern identities, democratization and foreign policymaking in diverse countries.

**POL SCI 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours**

Same as GS 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

**POL SCI 3595 Studies In Comparative Politics: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. Selected topics in comparative politics. May be repeated.

**POL SCI 3690 The Marxist Heritage: 3 semester hours**

Same as PHIL 3369. An interdisciplinary study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

**POL SCI 3700 NonProfit Organizations and Public Policy: 3 semester hours**

Prerequisites: POL SCI 1100; Recommended: POL SCI 2420. This course explores the roles of nonprofit organizations in public policy issues through citizen advocacy and political participation. The course begins with an overview of the scope of the nonprofit sector and then examines its political and legal foundations in the U.S. Theories about civic engagement and the rights of association are considered. Students will gain practical knowledge about direct and grassroots lobbying by nonprofit organizations. Discussion and analysis of actual advocacy campaigns carried out through nonprofit effort will be included. The course also investigates the formation of nonprofit political action committees (PACs) and other so-called 527 organizations, as well as ethical abuses of the nonprofit form for political purposes.

**POL SCI 3710 NonProfits, Civil Society and Volunteerism: 3 semester hours**

Prerequisites: POL SCI 1100 and junior standing. This course introduces basic concepts about the role of voluntary action in democratic society, especially in the context of organizations in the nonprofit sector. Theories of civil society and social capital are explored. Selected approaches to leadership are considered, in addition to the variety of motivations for giving time and resources to the pursuit of social and political change. Students will gain practical skill development in the recruitment, training and utilization of volunteers. Through study of recent case examples, students will develop an appreciation for the characteristics of effective leadership and strategic use of volunteers. In addition, the course includes an overview of new technologies that are being used by voluntary organizations to enlist participation and strengthen commitment of supporters.

**POL SCI 3800 Media, Film and Literature and International Politics: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 1500 or Instructor's consent. This seminar engages students in the complex ways by which media, images and literary narratives shape political perspectives and international policy making. Using multi-disciplinary texts, films, and web-based materials this course addresses the political discourse behind national and international debates on humanitarian interventions, war on drugs, transnational terrorism, human trafficking, and cross-border immigration.

**POL SCI 3830 International Political Economy: 3 semester hours**

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of instructor. This course provides an introduction to international political economy. In particular, it will focus on the politics of international trade, finance, and investment. It will analyze the relationships between developed and developing countries and it will assess the relative usefulness of alternative frameworks for studying international political economy.

**POL SCI 3850 International Organizations And Global Problem-Solving: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 1200, or consent of the instructor. Introduction to the study of international organization. The course focuses on relationships between nation-states and "nonstate" actors (e.g., global intergovernmental organizations such as multinational corporations) in world politics and on the role of international institutions in such problem areas as economic development, management of resources, and control of violence across national boundaries.

**POL SCI 3860 Studies In War And Peace: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor.

Exploration, development, and testing of theories about the causes and consequences of war, peace, and conflict among nations. A broad range of literature on war and peace will be reviewed, and applied to crisis situations in the international system.

**POL SCI 3890 Studies In International Relations: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor.

Selected topics in international relations. May be repeated.

**POL SCI 3900 Special Readings: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, and conferences. May be repeated.

**POL SCI 3940 Public Affairs Internship: 1-6 semester hours**

Prerequisite: Junior standing and consent of instructor. Independent study involving work with an appropriate public or private agency. A maximum of six credit hours may be earned.

**POL SCI 3950 Senior Seminar In Political Science: 3 semester hours**

Prerequisite: POL SCI 2000, senior standing and consent of instructor.

Required of all political science majors in their last year of coursework as an integrative, capstone experience. Emphasis is on student-faculty interaction in a seminar format designed to engage upper-level students in a critical examination of a broad theme in political science, leading to the production of a major research paper. Topics vary. May be repeated. This course is not available for graduate student credit.

**POL SCI 4040 Survey Research Practicum in Political Science: 3 semester hours**

Prerequisite: Junior standing and consent of the instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results.

**POL SCI 4060 Theory Of Decisions And Games: 3 semester hours**

Same As PHIL 4465. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent, or consent of the instructor).

A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

**POL SCI 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as: SEC ED 4090. Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or the consent of the instructor. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

***POL SCI 4510 Comparative Public Policy And Administration: 3 semester hours***

Prerequisite: POL SCI 1500 or consent of instructor. A comparative study of the characteristics of public administrators, their institutions and environments in western democratic, developing nations and communist political systems.

***POL SCI 4520 Mega-Cities and Diasporas: Understanding Global Migration: 3 semester hours***

Prerequisites: POL SCI 1500 or consent of instructor. This course examines the causes, dynamics and effects of mega-city development and migrating diasporas in a variety of national settings. Case studies include cities based in Europe, South America, China, India, Turkey, and parts of Africa, fostering global awareness, as well as an understanding of the "interconnectedness" of politics, economics and climate change across the planet.

***POL SCI 4850 International Law: 3 semester hours***

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Study of the international legal system, including the content and operation of the laws of war and peace, how law is created and enforced with regard to the oceans and other parts of the globe, and the relationship between international law and international politics.

***POL SCI 4900 Topics In Political Science: 3 semester hours***

Prerequisites: POL SCI 1100 or consent of instructor. Selected topics in Political Science.

***POL SCI 6300 Leadership and Management in NonProfit Organizations: 3 semester hours***

Same as P P ADM 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

***POL SCI 6401 Introduction To Policy Research: 3 semester hours***

Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

***POL SCI 6402 Intermediate Techniques In Policy Research: 3 semester hours***

Prerequisite: Graduate standing and POL SCI 6401. Elementary distribution theory, statistical inference, and introduction to multiple regression. Emphasis on practical applications.

***POL SCI 6403 Advanced Techniques In Policy Research: 3 semester hours***

Prerequisite: Graduate standing and POL SCI 6402. Selected topics in policy research emphasizing forecasting, modeling and estimation.

***POL SCI 6404 Multi-Method Research Design: 3 semester hours***

Prerequisite: POL SCI 6403 or consent of instructor. Develops policy research skills that combine qualitative and quantitative social science tools and applies an appropriate mix of these tools to specific policy problems. Topics include alternative approaches to causal analysis, levels of analysis, triangulation from a variety of qualitative and quantitative research techniques, building contextual effects into multiple research projects, techniques for assessing alternative program theories and clarifying implicit assumptions, and meta-analysis of secondary data sources.

***POL SCI 6405 Directed Readings In Research Methods: 1-10 semester hours***

Independent study through readings, reports, research projects, and conferences.

***POL SCI 6410 Introduction To Policy Analysis: 3 semester hours***

Same as P P ADM 6000. Systematic development of a critical/analytic base for dealing with public policy.

***POL SCI 6415 Directed Readings And Research In Public Policy: 1-10 semester hours***

Same as P P ADM 6150. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

***POL SCI 6418 Social & Economic Development Policy: 3 semester hours***

Same as SOC WK 6250. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

***POL SCI 6420 Proseminar In Public Law: 3 semester hours***

Study of judicial systems and processes (judges, courts, litigants, and juries) and evaluation of legal policies (Compliance, impact and deterrence).

***POL SCI 6421 Seminar In Public Law: 3 semester hours***

Research problems and designs, models and approaches to the study of public law. May be repeated for credit when the subject matter is different.

***POL SCI 6422 Law, Courts And Public Policy: 3 semester hours***

Same as CRIMIN 6422. Prerequisites: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate) that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

***POL SCI 6425 Directed Readings And Research In Public Law: 1-10 semester hours***

Independent study through readings, reports, research projects, and conferences.

***POL SCI 6430 Proseminar In American Politics: 3 semester hours***

Study of individual and group political behavior including socialization, participation, consensus formation, representation, legislative and judicial behavior.

***POL SCI 6431 Seminar In American Politics: 3 semester hours***

Research problems and design in American political process and behavior. May be repeated for credit when the subject matter is different.

**POL SCI 6435 Directed Readings And Research In American Politics: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6440 Proseminar In Public Policy Administration: 3 semester hours**

Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impacts. Specific topics may include administrative accountability, inter-governmental relations, public-private interaction, implementation of processes, bureaucratic expertise, the legal environment of public service and merit issues.

**POL SCI 6442 The Policy Process: 3 semester hours**

Prerequisite: Graduate Standing. This course will examine how public policies are made in the United States. It will cover different theories of the policy process, including how political actors get the government to focus on certain problems, form coalitions to enact policies, and generate support for their implementation. Finally, the course will examine how well various policy models apply to different policy domains.

**POL SCI 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, GERON 6443, and SOC WK 6443.

Prerequisites: Graduate Standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**POL SCI 6444 Seminar In Public Policy And Aging: 3 semester hours**

Same as GERON 6444 and P P ADM 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**POL SCI 6445 Directed Readings And Research In Public Administration: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6446 Selected Topics In Health Care Policy: 3 semester hours**

Same as P P ADM 6460. Prerequisite: Consent of Instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

**POL SCI 6448 Political Economy And Public Policy: 3 semester hours**

Prerequisite: Graduate standing. This course examines political economy in its contemporary manifestations as public choice and as the study of the ways in which institutional power shapes economic policies and performance. The course explores the origins and major concepts of political economy, the institutions of economic policymaking and economic policies in the U. S. It emphasizes the consequences of budget constraints, inflation, unemployment and sectoral decline on the design and administration of public programs at all levels of government.

**POL SCI 6449 Human Resources In The Public Sector: 3 semester hours**

Same as SOC WK 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of Instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

**POL SCI 6450 Proseminar In Comparative Politics: 3 semester hours**

Classification and typology of political systems; structural-functional analysis; political culture, ideology, affiliation and participation; decision-making processes; political roles; organization of authority.

**POL SCI 6451 Seminar In Comparative Politics: 3 semester hours**

Research problems and design in comparative politics. May be repeated for credit when the subject matter is different.

**POL SCI 6452 Public Policy Of Conservation And Sustainable Development: 3 semester hours**

Same as BIOL 6250. Prerequisites: Graduate standing in Political Science or Biology and consent of instructor. Prior course in ecology is recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

**POL SCI 6455 Directed Readings And Research In Comparative Politics: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6465 Directed Readings And Research In Political Theory: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6470 Proseminar In Urban Politics: 3 semester hours**

Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

**POL SCI 6471 Seminar In Urban Politics: 3 semester hours**

Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

**POL SCI 6475 Directed Readings And Research In Urban Politics: 1-10 semester hours**

Independent study through readings, reports and conferences.

**POL SCI 6480 Proseminar In International Relations: 3 semester hours**

Examination of various approaches to the study of international politics and foreign policy, focusing on studies of conflict, decision-making, international political economy, and related topics. Included are realist, idealist, and Marxist perspectives.

**POL SCI 6481 Seminar In International Relations: 3 semester hours**

Research problems and design in international politics. May be repeated for credit when the subject matter is different.

**POL SCI 6482 International Political Economy: 3 semester hours**

Prerequisite: Graduate standing. This course will examine the theoretical and policy issues of international political economy. In particular, it will focus on the politics of international trade, finance and investment. It will also analyze the themes of interdependence, hegemony, and dependency, as well as consider relations between developed and developing countries. Finally, the relative usefulness of liberal, Realist and Marxist approaches to the study of international political economy will be weighed.

**POL SCI 6485 Directed Readings And Research In International Relations: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6488 Studies In International Relations: 1-6 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in international studies. May be repeated for credit provided the topic of the course is different each time.

**POL SCI 6490 Strategic & Program Planning For Nonprofit Organizations: 3 semester hours**

Same as P P ADM 6550 and SOC WK 6491. Prerequisites: Graduate standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, a vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**POL SCI 6494 Thesis Research: 1-10 semester hours**

.

**POL SCI 6495 Internship: 1-6 semester hours**

Independent study involving work with an appropriate public or private agency.

**POL SCI 6499 Directed Dissertation Proposal Research: 3 semester hours**

Prerequisites: Consent of Instructor. Supervised study through readings and research leading to the preparation of a dissertation proposal plan. Open to doctoral students who have completed at least 42 hours of course work. The proposal plan will indicate the following: statement of research question, importance of the problem, literature review and research design.

**POL SCI 7499 Dissertation Research: 1-10 semester hours**

.

## Courses

**POL SCI 1100 Introduction To American Politics: 3 semester hours**

Introduction to basic concepts of government and politics with special reference to the United States, but including comparative material from other systems. Course fulfills the state requirement.

**POL SCI 1200 Foundations Of Law: An Introduction To Legal Studies: 3 semester hours**

Same as CRIMIN 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

**POL SCI 1450 Introduction To Labor Studies: 3 semester hours**

This course covers many topics important to the role of unions in the American political system and American society from a labor perspective. Topics include the role of workers in current and future times, unions' institutional structure, collective bargaining strategies and obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media.

**POL SCI 1500 Introduction To Comparative Politics: 3 semester hours**

This course introduces students to western and non-western systems. It examines similarities and differences in the basic political ideologies, structures, economies, social institutions and governmental processes of developed and developing countries. It also provides frameworks for understanding the cultures of the world that are the basis for formal economic and political institutions. In addition, the course examines the role of non-state institutions, including trans-national ones, in shaping national policies. It uses case studies from Africa, Asia, Latin America, as well as Europe, to enhance student understanding of comparative politics. (This course fulfills the cultural diversity requirement.)

**POL SCI 1550 Women And Politics In The Developing World: 3 semester hours**

Women play a central role in the transformation of political, economic, cultural and gender relations in developing nations. This course examines the political role of women in these transformations. In particular, the course examines: 1) ways that modernity, universal education, the market economy and globalization have widened the scope of women's public activities; 2) the emergence of social movements driven by the transformation of economic and political roles brought about by the inclusion of women in the political arena; 3) the re-interpretation of religious doctrines, especially those that emphasize women's "return" to the private sphere and the illegitimate denial of women's political rights. Fulfills the Cultural Diversity requirement.

**POL SCI 1600 Contemporary Political Ideologies: 3 semester hours**

An introduction to the major political ideologies of the world today. Emphasis is placed on democracy, feminism, Marxism, and nationalism.

**POL SCI 1800 World Politics: 3 semester hours**

An introduction to the field of international relations, covering such topics as nationalism, power, foreign policymaking, diplomacy, war, arms control and disarmament, interdependence, the regulation of conflict, and other aspects of politics among nations.

**POL SCI 2000 Political Analysis: 3 semester hours**

Prerequisites: Math proficiency of MATH 1020 or higher. An introduction to political analysis, emphasizing both the logic of inquiry and practical methods. Students learn about the construction and evaluation of theories that relate to real-world politics. They also have an opportunity for hands-on experience with qualitative and quantitative methods including graphics, descriptive statistics, cross-tabular and correlational analysis, hypothesis testing, and computer applications.

**POL SCI 2260 Law, Politics and Society: 3 semester hours**

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course examines the ways in which law in America connects with politics and society. The course will cover the litigation process, access to the courts, how and why individuals and groups bring litigation to pursue political and policy goals, and how lawyers, judges and other political actors use law to solve policy problems. Attention will be placed on current legal policy issues facing American society.

**POL SCI 2280 Judicial Politics And Policy: 3 semester hours**

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor.

This course is an examination of the American state and federal legal systems. Topics examined in this course include an analysis of the structure, organization and foundation of courts. Emphasis will be placed on the role of juries, judges, attorneys, litigants, and interest groups in the judicial system. The objective of the course is to evaluate courts as political institutions and analyze the policy-making role of judges.

**POL SCI 2290 Gender And The Law: 3 semester hours**

Same as GS 2290. This course examines the ways in which laws and interpretations of the laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non- governmental influences on equality. It also addresses gender representation in the legal profession and its effect on judicial decisions. (This course satisfies State requirements in American History and Government).

**POL SCI 2300 State Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An examination of contemporary state politics in the U.S. Covers social, economic and political determinants of policies; federal-state-local relations, elections, interest groups and participation; executive legislative and judicial institutions and processes, policies and their impact. Course fulfills the state requirement.

**POL SCI 2320 African Americans And The Political System: 3 semester hours**

Prerequisites: POL SCI 1100 or consent of instructor. Examination of the status of African Americans in the context of the American political system. The course will focus on a number of issues, including: attitudes of various publics toward racial concerns; nature of problems in specific policy areas (e.g., unemployment, school desegregation, housing, poverty); representation of African Americans in governmental institutions and the private sector; and the role of AfricanAmerican leadership and civil rights groups in the political process. Course fulfills the state requirement.

**POL SCI 2350 Introduction To Urban Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Examination of structure and process of politics in the urban community, with emphasis on their relationships to community power structures. Course fulfills the state requirement.

**POL SCI 2370 The Politics of Identity and Social Justice: 3 semester hours**

Examines the meaning of social justice at the intersections of identities linked to race, ethnicity, class, gender, sexuality, age, ability, religion, and citizenship in the United States. We will dissect how the social construction of "difference" within systems of power has resulted in social policies that marginalize some groups more than others. We will also discuss how oppression linked to delineations of difference can be challenged and socially reconstructed, and ultimately used as a source of political empowerment.

**POL SCI 2380 The Politics of Gender in the United States: 3 semester hours**

Same As GS 2380. Prerequisites: POL SCI 1100 or consent of instructor.

This course examines the role of gender in political institutions, practices and policy in the United States, past for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels. (This course satisfies State requirements in American History and Government.).

**POL SCI 2400 Public Administration: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Survey of Public Administration, with reference to organization, financial administration, personnel management, judicial control of the administrative process. Course fulfils state requirement.

**POL SCI 2420 Introduction To Public Policy: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Study of differing approaches to understanding the public policy process. Course surveys the application of social science to public issues and problems. Course fulfills the state requirement.

**POL SCI 2500 Comparing Different Worlds: 3 semester hours**

This course focuses on the role of political institutions, economic structures and social groups in explaining differences in forms of government and levels of socio-economic development. It explores in detail one or more of these themes in cases drawn from developing and developed nations.

**POL SCI 2510 The Politics of European Union: 3 semester hours**

Prerequisite: POL SCI 1500 or consent of instructor. The European Union has become the driving force in European economic and social development. This course assesses the changing nature of national identity and national sovereignty in Europe. It compares and contrasts key public policies, (single market, welfare, migration, gender mainstreaming, "democratic deficits"), along with core EU actors and institutions, and includes participation in the annual Midwest Model EU.

**POL SCI 2530 Political Systems Of South America: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of South America. Examination of the cultural context that has shaped the political, economic, and social development of states in the region. This course satisfies the Cultural Diversity requirement.

**POL SCI 2540 Political Systems Of Mexico, Central America And The Caribbean: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of Mexico, Central America, and the Caribbean. Examination of the cultural context that has shaped the political, economic, and social development of these countries. This course satisfies the Cultural Diversity requirement.

**POL SCI 2550 East Asian Politics: 3 semester hours**

An introduction to the study of the Chinese and Japanese political systems. Examination of the cultural context that has shaped the path of political development for both states. This course satisfies the Cultural Diversity requirement.

**POL SCI 2580 African Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An introduction to the nature of societies, governments, and international relations in Africa. The course deals with forms of governance on the continent, regional groupings of states, and persistent conflicts within and among states. Problems of economic underdevelopment, food supplies, health and population trends, and cultural change are analyzed, along with the role of outside major power intervention. Fulfills the Cultural Diversity requirement.

**POL SCI 2590 Globalization: Prospects and Problems: 3 semester hours**

Globalization is a multidimensional construct, which calls for its study from a multidisciplinary perspective: i.e., economics, political science, history, and anthropology. The course will explore the forces undergirding economic globalization, as well as the factors that are giving rise to a global democratic dispensation. It will also examine previous forms of globalization including archaic globalization, proto-globalization, and modern globalization as well as so-called deviant globalization - the trade in illicit goods and services, which are also highly lucrative: e.g., human trafficking, prostitution, endangered species, narcotics, organ transplants, small arms, etc. Finally, the course will explore cultural globalization and the rise of a global 'pop culture.' The course will include a comparative analysis of the impacts of globalization in all of its manifestations on social groups (e.g., men and women, ethnic and racial minorities, young and old, classes), countries, and regions.

**POL SCI 2610 Ancient And Medieval Political Thought: 3 semester hours**

Study of political thought from Plato to Machiavelli.

**POL SCI 2620 Modern Political Thought: 3 semester hours**

Study of political thought from Machiavelli to the present.

**POL SCI 2650 American Political Thought: 3 semester hours**

History of political thought in the United States from Colonial times to the present.

**POL SCI 2820 United States Foreign Policy: 3 semester hours**

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of Instructor. Examination of the factors influencing the formation and the execution of American foreign policy, with a focus on specific contemporary foreign policy issues.

**POL SCI 2900 Studies In Political Science: 3 semester hours**

Selected topics in political science.

**POL SCI 3200 Constitutional Law: 3 semester hours**

Prerequisites: POL SCI 1100, or POL SCI 1200, or consent of the instructor. Study of leading American constitutional principles regarding legislative, executive, and judicial power, federalism, the commerce clause, and economic due process as they have evolved through the important decisions of the U.S. Supreme Court. Course fulfills the state requirement.

**POL SCI 3210 Civil Liberties: 3 semester hours**

Prerequisite: POL SCI 1100, or POL SCI 1200, or POL SCI 3200, or consent of instructor. Civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and rights of defendants. Course fulfills the state requirement.

**POL SCI 3220 Labor Law: 3 semester hours**

Prerequisites: Consent of instructor. In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities.

**POL SCI 3260 The Supreme Court: 3 semester hours**

Prerequisites: POL SCI 1100, or POL SCI 1200 or consent of the instructor. An examination of the role, function and assertion of power by the U.S. Supreme Court in our constitutional democracy. Topics include an historical overview of the Supreme court, the process of selecting Supreme Court Justices, life in the Court, Supreme Court decision making, Supreme Court policymaking, implementation and impact of Court decisions and the role of the Supreme Court as a national policymaker. This course fulfills the state requirement.

**POL SCI 3300 The American Presidency: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Study of constitutional, political, legislative, and administrative roles played by the American chief executive in the development of public policy. Course fulfills state requirement.

**POL SCI 3330 Public Opinion and Political Participation: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. This course links Americans' political attitudes to their political participation (defined broadly) and explores how governmental institutions, the media, and social group affiliations affect political behavior. It also connects trends in public opinion and participation to the state of American democracy.

**POL SCI 3331 Congressional Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the Congress of the United States, its history and evolution, its contemporary politics, and its role in the national policy-making process. Topics include candidate recruitment, campaigns and elections, representation, committees, legislative leadership, roles and norms, voting alignments, lobbyists and interest groups, oversight of administration, and House-Senate comparisons, the role of Congress in foreign policy, economic policy, social-welfare policy will be examined.

**POL SCI 3340 Politics And The Media: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. This course examines how the political news media operate, the interplay between journalists, politicians, and the public, and media's role in promoting American democracy. Emphasis is placed on understanding the media's impact on various political institutions and actors and how these, in turn, affect the media.

**POL SCI 3350 Political Parties And Elections: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Development, organization, functions, activities of major and minor political parties, pressure groups, election administration, especially in the United States. Course fulfills the state requirement.

**POL SCI 3390 Studies In American Politics: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Selected topics in American politics. May be repeated.

**POL SCI 3420 Public and NonProfit Personnel Management: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 2400 or consent of instructor. A study of personnel practices in the public and nonprofit sectors, including recruitment, job development, labor relations, and administration of equal employment/ affirmative action Programs.

**POL SCI 3430 Union Leadership And Administration: 3 semester hours**

Prerequisites: Consent of instructor. This course will focus on the roles and challenges of union leadership in a changing environment. Topics will include the union leader's roles as representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership style and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking strategic planning and managing complex campaigns and diverse organizations.

**POL SCI 3440 Public and NonProfit Budgeting: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 2400; or consent of instructor. Budgeting is the study of "who gets what" and who pays for it. This course examines the administration and politics of federal, state, and local government budgets. Students gain experience in interpreting budget documents and making budget choices, using electronic and other resources.

**POL SCI 3450 Urban Administration: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. Study of administrative machinery and practices of metropolitan government, how metropolitan areas organize themselves to provide services, how urban policies are made and implemented, how budgeting and personnel recruitment processes operate, and how these relate to urban policies. Course fulfills state requirement.

**POL SCI 3455 Metropolitan Planning: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 2400, or consent of instructor. Why do metropolitan areas look the way they do? How much of this was "planned?" Can/should metropolitan development be planned? Who should decide, and how? This course will examine the political processes in metropolitan areas as they relate to planning. We will look at a series of urban plans and see what they have (and have not) accomplished, and look at a range of alternative views of how planning might be done. Course fulfills state requirement.

**POL SCI 3460 The Politics Of Poverty And Welfare: 3 semester hours**

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the structure of income inequality in the U.S. and public policies designed to redistribute wealth and to treat poverty. The history of welfare programs, the growth of the welfare state, and attempts to cut social spending are closely examined.

**POL SCI 3470 Collective Bargaining: 3 semester hours**

This course involves a study of collective bargaining processes including contract negotiations, contract administration, and methods for the resolution of bargaining disputes. Both theoretical and applied issues in collective bargaining will be addressed. Specific topics include the economic determination of bargaining power, legal constraints on the bargaining process, negotiation strategies and techniques, and the use of mediation and arbitration in the resolution of bargaining disputes.

**POL SCI 3480 Environmental Politics: 3 semester hours**

Prerequisites: POL SCI 1100 or consent of instructor. This course examines the process of environmental policymaking and key environmental issues. Topics include national and international policies toward air and water pollution, energy use, solid and toxic waste disposal, global warming, overpopulation, and wilderness and wildlife conservation.

**POL SCI 3500 The Politics of the Middle East: International and National Dynamics: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500 or consent of instructor. Survey of political movements, governments, and international conflicts in the Middle East. Islam, nationalism, ideologies and economic systems will be studied. The effect of oil and the military will also be considered. Course fulfills the non-Euro-American requirement.

**POL SCI 3570 Gender, Ethnicity and Public Policy: 3 semester hours**

Prerequisite: POL SCI 1100, or POL SCI 1500, or consent of instructor. Raises the question as to whether "more women in politics," stemming from diverse economic, racial, ethnic backgrounds and age groups, will necessarily result in better policies for women and men. Compares gendered and racialized impacts of a wide array of public policies (in the areas of education, employment health care, welfare, and reproductive technologies) across a broad sample of advanced industrial societies. Analyzes the "empowerment" potential of new equality policies being generated at the international and supranational levels (e.g., in the UN and the European Union).

**POL SCI 3580 African Diasporas: Identity Politics And Transnational Communities: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. This course focuses on the role of Africa's regional and global diaspora(s) in the construction of post-modern identities, democratization and foreign policymaking in diverse countries.

**POL SCI 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours**

Same as GS 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

**POL SCI 3595 Studies In Comparative Politics: 3 semester hours**

Prerequisites: POL SCI 1500 or consent of instructor. Selected topics in comparative politics. May be repeated.

**POL SCI 3690 The Marxist Heritage: 3 semester hours**

Same as PHIL 3369. An interdisciplinary study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

**POL SCI 3700 NonProfit Organizations and Public Policy: 3 semester hours**

Prerequisites: POL SCI 1100; Recommended: POL SCI 2420. This course explores the roles of nonprofit organizations in public policy issues through citizen advocacy and political participation. The course begins with an overview of the scope of the nonprofit sector and then examines its political and legal foundations in the U.S. Theories about civic engagement and the rights of association are considered. Students will gain practical knowledge about direct and grassroots lobbying by nonprofit organizations. Discussion and analysis of actual advocacy campaigns carried out through nonprofit effort will be included. The course also investigates the formation of nonprofit political action committees (PACs) and other so-called 527 organizations, as well as ethical abuses of the nonprofit form for political purposes.

**POL SCI 3710 NonProfits, Civil Society and Volunteerism: 3 semester hours**

Prerequisites: POL SCI 1100 and junior standing. This course introduces basic concepts about the role of voluntary action in democratic society, especially in the context of organizations in the nonprofit sector. Theories of civil society and social capital are explored. Selected approaches to leadership are considered, in addition to the variety of motivations for giving time and resources to the pursuit of social and political change. Students will gain practical skill development in the recruitment, training and utilization of volunteers. Through study of recent case examples, students will develop an appreciation for the characteristics of effective leadership and strategic use of volunteers. In addition, the course includes an overview of new technologies that are being used by voluntary organizations to enlist participation and strengthen commitment of supporters.

**POL SCI 3800 Media, Film and Literature and International Politics: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 1500 or Instructor's consent. This seminar engages students in the complex ways by which media, images and literary narratives shape political perspectives and international policy making. Using multi-disciplinary texts, films, and web-based materials this course addresses the political discourse behind national and international debates on humanitarian interventions, war on drugs, transnational terrorism, human trafficking, and cross-border immigration.

**POL SCI 3830 International Political Economy: 3 semester hours**

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of instructor. This course provides an introduction to international political economy. In particular, it will focus on the politics of international trade, finance, and investment. It will analyze the relationships between developed and developing countries and it will assess the relative usefulness of alternative frameworks for studying international political economy.

**POL SCI 3850 International Organizations And Global Problem-Solving: 3 semester hours**

Prerequisites: POL SCI 1100, POL SCI 1200, or consent of the instructor. Introduction to the study of international organization. The course focuses on relationships between nation-states and "nonstate" actors (e.g., global intergovernmental organizations such as multinational corporations) in world politics and on the role of international institutions in such problem areas as economic development, management of resources, and control of violence across national boundaries.

**POL SCI 3860 Studies In War And Peace: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Exploration, development, and testing of theories about the causes and consequences of war, peace, and conflict among nations. A broad range of literature on war and peace will be reviewed, and applied to crisis situations in the international system.

**POL SCI 3890 Studies In International Relations: 3 semester hours**

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Selected topics in international relations. May be repeated.

**POL SCI 3900 Special Readings: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, and conferences. May be repeated.

**POL SCI 3940 Public Affairs Internship: 1-6 semester hours**

Prerequisite: Junior standing and consent of instructor. Independent study involving work with an appropriate public or private agency. A maximum of six credit hours may be earned.

**POL SCI 3950 Senior Seminar In Political Science: 3 semester hours**

Prerequisite: POL SCI 2000, senior standing and consent of instructor. Required of all political science majors in their last year of coursework as an integrative, capstone experience. Emphasis is on student-faculty interaction in a seminar format designed to engage upper-level students in a critical examination of a broad theme in political science, leading to the production of a major research paper. Topics vary. May be repeated. This course is not available for graduate student credit.

**POL SCI 4040 Survey Research Practicum in Political Science: 3 semester hours**

Prerequisite: Junior standing and consent of the instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results.

**POL SCI 4060 Theory Of Decisions And Games: 3 semester hours**

Same As PHIL 4465. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent, or consent of the instructor. A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

**POL SCI 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as: SEC ED 4090. Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or the consent of the instructor. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

**POL SCI 4510 Comparative Public Policy And Administration: 3 semester hours**

Prerequisite: POL SCI 1500 or consent of instructor. A comparative study of the characteristics of public administrators, their institutions and environments in western democratic, developing nations and communist political systems.

***POL SCI 4520 Mega-Cities and Diasporas: Understanding Global Migration: 3 semester hours***

Prerequisites: POL SCI 1500 or consent of instructor. This course examines the causes, dynamics and effects of mega-city development and migrating diasporas in a variety of national settings. Case studies include cities based in Europe, South America, China, India, Turkey, and parts of Africa, fostering global awareness, as well as an understanding of the "interconnectedness" of politics, economics and climate change across the planet.

***POL SCI 4850 International Law: 3 semester hours***

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Study of the international legal system, including the content and operation of the laws of war and peace, how law is created and enforced with regard to the oceans and other parts of the globe, and the relationship between international law and international politics.

***POL SCI 4900 Topics In Political Science: 3 semester hours***

Prerequisites: POL SCI 1100 or consent of instructor. Selected topics in Political Science.

***POL SCI 6300 Leadership and Management in NonProfit Organizations: 3 semester hours***

Same as P P ADM 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

***POL SCI 6401 Introduction To Policy Research: 3 semester hours***

Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

***POL SCI 6402 Intermediate Techniques In Policy Research: 3 semester hours***

Prerequisite: Graduate standing and POL SCI 6401. Elementary distribution theory, statistical inference, and introduction to multiple regression. Emphasis on practical applications.

***POL SCI 6403 Advanced Techniques In Policy Research: 3 semester hours***

Prerequisite: Graduate standing and POL SCI 6402. Selected topics in policy research emphasizing forecasting, modeling and estimation.

***POL SCI 6404 Multi-Method Research Design: 3 semester hours***

Prerequisite: POL SCI 6403 or consent of instructor. Develops policy research skills that combine qualitative and quantitative social science tools and applies an appropriate mix of these tools to specific policy problems. Topics include alternative approaches to causal analysis, levels of analysis, triangulation from a variety of qualitative and quantitative research techniques, building contextual effects into multiple research projects, techniques for assessing alternative program theories and clarifying implicit assumptions, and meta-analysis of secondary data sources.

***POL SCI 6405 Directed Readings In Research Methods: 1-10 semester hours***

Independent study through readings, reports, research projects, and conferences.

***POL SCI 6410 Introduction To Policy Analysis: 3 semester hours***

Same as P P ADM 6000. Systematic development of a critical/analytic base for dealing with public policy.

***POL SCI 6415 Directed Readings And Research In Public Policy: 1-10 semester hours***

Same as P P ADM 6150. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

***POL SCI 6418 Social & Economic Development Policy: 3 semester hours***

Same as SOC WK 6250. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

***POL SCI 6420 Proseminar In Public Law: 3 semester hours***

Study of judicial systems and processes (judges, courts, litigants, and juries) and evaluation of legal policies (Compliance, impact and deterrence).

***POL SCI 6421 Seminar In Public Law: 3 semester hours***

Research problems and designs, models and approaches to the study of public law. May be repeated for credit when the subject matter is different.

***POL SCI 6422 Law, Courts And Public Policy: 3 semester hours***

Same as CRIMIN 6422. Prerequisites: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate) that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

***POL SCI 6425 Directed Readings And Research In Public Law: 1-10 semester hours***

Independent study through readings, reports, research projects, and conferences.

***POL SCI 6430 Proseminar In American Politics: 3 semester hours***

Study of individual and group political behavior including socialization, participation, consensus formation, representation, legislative and judicial behavior.

***POL SCI 6431 Seminar In American Politics: 3 semester hours***

Research problems and design in American political process and behavior. May be repeated for credit when the subject matter is different.

***POL SCI 6435 Directed Readings And Research In American Politics: 1-10 semester hours***

Independent study through readings, reports, research projects, and conferences.

***POL SCI 6440 Proseminar In Public Policy Administration: 3 semester hours***

Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impacts. Specific topics may include administrative accountability, inter-governmental relations, public-private interaction, implementation of processes, bureaucratic expertise, the legal environment of public service and merit issues.

**POL SCI 6442 The Policy Process: 3 semester hours**

Prerequisite: Graduate Standing. This course will examine how public policies are made in the United States. It will cover different theories of the policy process, including how political actors get the government to focus on certain problems, form coalitions to enact policies, and generate support for their implementation. Finally, the course will examine how well various policy models apply to different policy domains.

**POL SCI 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, GERON 6443, and SOC WK 6443.

Prerequisites: Graduate Standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**POL SCI 6444 Seminar In Public Policy And Aging: 3 semester hours**

Same as GERON 6444 and P P ADM 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**POL SCI 6445 Directed Readings And Research In Public Administration: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6446 Selected Topics In Health Care Policy: 3 semester hours**

Same as P P ADM 6460. Prerequisite: Consent of Instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

**POL SCI 6448 Political Economy And Public Policy: 3 semester hours**

Prerequisite: Graduate standing. This course examines political economy in its contemporary manifestations as public choice and as the study of the ways in which institutional power shapes economic policies and performance. The course explores the origins and major concepts of political economy, the institutions of economic policymaking and economic policies in the U. S. It emphasizes the consequences of budget constraints inflation, unemployment and sectoral decline on the design and administration of public programs at all levels of government.

**POL SCI 6449 Human Resources In The Public Sector: 3 semester hours**

Same as SOC WK 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of Instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

**POL SCI 6450 Proseminar In Comparative Politics: 3 semester hours**

Classification and typology of political systems; structural-functional analysis; political culture, ideology, affiliation and participation; decision-making processes; political roles; organization of authority.

**POL SCI 6451 Seminar In Comparative Politics: 3 semester hours**

Research problems and design in comparative politics. May be repeated for credit when the subject matter is different.

**POL SCI 6452 Public Policy Of Conservation And Sustainable Development: 3 semester hours**

Same as BIOL 6250. Prerequisites: Graduate standing in Political Science or Biology and consent of instructor. Prior course in ecology is recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

**POL SCI 6455 Directed Readings And Research In Comparative Politics: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6465 Directed Readings And Research In Political Theory: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6470 Proseminar In Urban Politics: 3 semester hours**

Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

**POL SCI 6471 Seminar In Urban Politics: 3 semester hours**

Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

**POL SCI 6475 Directed Readings And Research In Urban Politics: 1-10 semester hours**

Independent study through readings, reports and conferences.

**POL SCI 6480 Proseminar In International Relations: 3 semester hours**

Examination of various approaches to the study of international politics and foreign policy, focusing on studies of conflict, decision-making, international political economy, and related topics. Included are realist, idealist, and Marxist perspectives.

**POL SCI 6481 Seminar In International Relations: 3 semester hours**

Research problems and design in international politics. May be repeated for credit when the subject matter is different.

**POL SCI 6482 International Political Economy: 3 semester hours**

Prerequisite: Graduate standing. This course will examine the theoretical and policy issues of international political economy. In particular, it will focus on the politics of international trade, finance and investment. It will also analyze the themes of interdependence, hegemony, and dependency, as well as consider relations between developed and developing countries. Finally, the relative usefulness of liberal, Realist and Marxist approaches to the study of international political economy will be weighed.

**POL SCI 6485 Directed Readings And Research In International Relations: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6488 Studies In International Relations: 1-6 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in international studies. May be repeated for credit provided the topic of the course is different each time.

**POL SCI 6490 Strategic & Program Planning For Nonprofit Organizations: 3 semester hours**

Same as P P ADM 6550 and SOC WK 6491. Prerequisites: Graduate standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, a vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**POL SCI 6494 Thesis Research: 1-10 semester hours**

**POL SCI 6495 Internship: 1-6 semester hours**

Independent study involving work with an appropriate public or private agency.

**POL SCI 6499 Directed Dissertation Proposal Research: 3 semester hours**

Prerequisites: Consent of Instructor. Supervised study through readings and research leading to the preparation of a dissertation proposal plan. Open to doctoral students who have completed at least 42 hours of course work. The proposal plan will indicate the following: statement of research question, importance of the problem, literature review and research design.

**POL SCI 7499 Dissertation Research: 1-10 semester hours**

## Psychology

### Courses

**PSYCH 1000 Choosing A Career In Psychology: 1 semester hour**

Prerequisite: Psychology Major or consent of instructor. This course is an orientation to the field of psychology for majors and for students who are considering declaring the major. This course is to be completed by native and transfer Psychology majors during their first semester of study at UMSL. Students will be engaged in activities that will help them to develop and identify their professional goals, learn about the various specialties and careers available within the field of psychology, understand the education and skills necessary for various careers, learn the requirements for a psychology major, become familiar with minors that are available at UMSL, think about a possible choice of minor or certificate, and become acquainted with the interest areas of UMSL faculty in Psychology and related fields. All Psychology majors must complete this course during the first semester at UMSL with a grade of C- or higher.

**PSYCH 1003 General Psychology: 3 semester hours**

A survey of the basic concepts, theories, and pivotal findings over the past 100 years in the science of Psychology, with special emphasis on contemporary concepts and findings that focus on the relation of the brain to normal and pathological behaviors. All Psychology majors must complete this course with a grade of C- or higher.

**PSYCH 1268 Human Growth And Development: 3 semester hours**

Prerequisites: PSYCH 1003. A survey course, designed for non-majors. This course examines development over the lifespan with an emphasis on the developmental tasks and hazards of each age period. Majors in Psychology and students planning to pursue a career in psychology research, teaching, or practice are strongly encouraged to take PSYCH 2270 instead of this course.

**PSYCH 2160 Social Psychology: 3 semester hours**

Same as SOC 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

**PSYCH 2200 Drugs And Behavior: 3 semester hours**

Prerequisite: PSYCH 1003. The course is an introduction to psychopharmacology and the relationship among drugs, and how these impact the brain and behavior. The emphasis is on physiological mechanisms underlying the behavioral responses to psychotherapeutic substances, illicit psychoactive drugs, commonly used substances (alcohol, nicotine, caffeine), and drug-like substances produced naturally in the body.

**PSYCH 2201 Psychological Statistics: 4 semester hours**

Prerequisites: PSYCH 1003 and satisfaction of the University's mathematical skills requirement. (With Laboratory) This course serves as an introduction to statistical concepts and methods used in Psychological measurement and the analysis and interpretation of social sciences data. Topics include descriptive statistics, frequency distributions centrality, variability, and correlational measures; as well as an introduction to statistical inference, sampling fundamentals, significance testing and effect size, t-test, and analysis of variance. All Psychology majors must complete this course with a grade of C- or higher before registering for PSYCH 2219.

**PSYCH 2205 Human Sexuality: Psychological Perspectives: 3 semester hours**

Prerequisites: PSYCH 1003. This course is a comprehensive overview of human sexuality from the standpoint of the behavioral science of Psychology. This course includes a study of sexual anatomy and physiology, intersex classifications, sex and gender differences, sexual orientation, interpersonal and interpersonal aspects of human sexuality, classification and treatment of sexual dysfunction and sexual disorders, sexual victimization, and the methods employed for the scientific examination of human sexual behavior.

**PSYCH 2211 Introduction To Biological Psychology: 3 semester hours**

Prerequisites: PSYCH 1003 and 3 hours of BIOL chosen from either BIOL 1012, or BIOL 1102, or BIOL 1831. Students with career goals that include graduate study in Psychology are urged to complete the BIOL 1831 prerequisite for this course. This course introduces psychology students to behavioral neuroscience and neuropsychology. Course topics include basic neuroanatomy and neurophysiology, neurodevelopment, sensory and motor systems, and the integration of subcortical and cortical networks. All are covered with an emphasis on behavioral outcomes of normal and pathological functioning of the brain. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2219 Research Methods: 3 semester hours**

Prerequisite: Completion of PSYCH 2201 with a final grade of C- or higher is required prior to enrolling in this course. This course is a comprehensive overview of research methods in the social sciences. Topics include technical scientific writing in current APA format, critical evaluation of research literature, the application of statistical methods, and mastery of the ethical principles guiding social sciences research. Course and laboratory work involve designing and evaluating research questions, formulating research hypotheses, designing and conducting original research studies, and presenting research results. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2222 Group Processes In Organizations: 3 semester hours**

Prerequisite: PSYCH 1003 or MGMT 3600. Topics include theory, research and practice in coordination, conflict and decision-making in groups and organizations, as well as the role of influence, power, and leadership effectiveness in understanding interpersonal and group relations.

**PSYCH 2230 Psychology Of Gender: 3 semester hours**

Same as GS 2230. Prerequisite: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

**PSYCH 2232 Psychology Of Trauma: 3 semester hours**

Same as GS 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

**PSYCH 2245 Abnormal Psychology: 3 semester hours**

Prerequisite: PSYCH 1003. This course examines the historical views and current perspectives on the possible antecedents, symptoms, and treatments of major psychological disorders, including anxiety, dissociative, mood, somatoform, eating, schizophrenia and substance-related disorders. Major diagnostic categories and criteria, individual and social factors of maladaptive behavior, methods of clinical assessment, research strategies, and types of therapy will also be covered. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2270 Developmental Psychology: Infancy, Childhood And Adolescence: 3 semester hours**

Prerequisites: PSYCH 1003. This course systematically examines theories and research concerning the physical, social, emotional, and cognitive development of children from conception through adolescence. It will provide students with a basic knowledge of infant, child, and adolescent development; its subject matter; its approaches to gathering and evaluating evidence about the causes of behavior; and the ways in which our knowledge is applied to enhance the development and the quality of life of children. It is intended for Psychology majors and students with career interests in research, education, and/or the treatment of children. All Psychology majors taking this course instead of PSYCH 2160, must complete it with a grade of C- or higher.

**PSYCH 2272 Developmental Psychology: Adulthood And Aging: 3 semester hours**

Same as GERON 2272. Prerequisite: PSYCH 1003. Personality, social, and physiological development from the onset of early adulthood through maturity and old age.

**PSYCH 2280 Psychology Of Death And Dying: 3 semester hours**

Same as GERON 2280. Prerequisites: PSYCH 1003. A beginning exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

**PSYCH 2285 American Culture and Minority Mental Health: 3 semester hours**

Prerequisites: PSYCH 1003. Provides an examination of the relationship between American culture and mental health. The focus is on the lives of American minority groups, with specific attention given to how racism, prejudice, and minority status currently reveal themselves within a mental health framework. An eclectic, multidisciplinary approach that draws from clinical and social psychology will be utilized.

**PSYCH 3205 Evolutionary Psychology: 3 semester hours**

Prerequisites: PSYCH 2211. Evolutionary Psychology refers to a fundamentally unique approach to studying and thinking about human and animal behavior through considerations of 1. The challenges and stressors encountered in ancestral environments, 2. The proximate physical, psychological, and anatomical methods that evolved to meet these adaptive problems, and 3. How adaptive or maladaptive these mechanisms are in current environments. Special emphasis will be placed on the evolution of brain structures, cognitive processes, and social behaviors. The content for this course is not new; Evolutionary Psychology involves looking at the science of Psychology through a unique lens, shaped by its tenets. Although appreciation for this approach to psychological research is increasing, it remains controversial in psychology circles. We will discuss the state of this aspect of Psychology as well.

**PSYCH 3256 Environmental Psychology: 3 semester hours**

Prerequisites: PSYCH 2160 or SOC 2160. Analysis of environmental influences on behavior and man's influence, in turn, on the environment. Topics will include a consideration of both individual processes relating to the environment (such as the perception, evaluation, and adaptation to the environment) and social processes relating to the environment (such as privacy, territoriality, and crowding).

**PSYCH 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours**

Same as CAST 3290. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, or approval from the instructor. Exploration of the impact of stressors experienced during infancy, childhood and adolescence. Integrates how theoretical frameworks, cultural considerations and policy implications apply to child development research and practice.

**PSYCH 3295 Selected Projects In Field Placement: 3 semester hours**

Prerequisite: Junior standing, fifteen hours of psychology, or consent of instructor. Selected options in field work placement experiences in various local agencies with training and supervision by faculty. (May be repeated once for credit).

**PSYCH 3316 Fundamentals Of Leadership: 3 semester hours**

Prerequisites: PSYCH 1003 and six additional hours of Psychology, or consent of instructor. This course addresses concepts and methods for developing leadership skills in work and everyday settings. Contemporary approaches to leadership development are reviewed in relation to psychological and organizational theory. This course is designed to be relevant to the wide range of leadership opportunities that arise in work and daily life. Experiential exercises are used to help students discover and develop new leadership skills.

**PSYCH 3318 Industrial And Organizational Psychology: 3 semester hours**

Same as MGMT 3623. Prerequisite: PSYCH 2201 or MGMT 3600. This course introduces the student to psychological research and theories pertaining to human behavior in the work setting. Topics covered include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

**PSYCH 3340 Clinical Problems Of Childhood: 3 semester hours**

Prerequisite: PSYCH 1003 and six additional hours of Psychology, or consent of instructor. This course will address the clinical disorders and difficulties of children, as well as the causes and the treatment of these disorders. Topics addressed include autism, childhood schizophrenia, conduct disorders, learning disabilities, ADHD, mood disorders, health-related disorders, anxiety disorders, and child maltreatment. Treatments designed for specific use with children, including behavioral, drug and community mental health approaches will be addressed. This course is recommended for those going on to graduate work in psychology.

**PSYCH 3346 Introduction To Clinical Psychology: 3 semester hours**

Prerequisite: PSYCH 1003, PSYCH 2245; and three additional hours of Psychology. This course provides a conceptual framework for research, description and understanding of clinical phenomena. Assessment, interviewing, the clinical use of tests and psychological approaches to treatment are also addressed.

**PSYCH 3390 Directed Studies: 1-6 semester hours**

Prerequisite: Consent of instructor. Directed reading and research. May be repeated for a maximum total of ten hours.

**PSYCH 3400 Conceptual and Historical Foundations of Psychology: 3 semester hours**

Prerequisite: PSYCH 1003 and three additional hours of Psychology. This course addresses basic questions about human life debated throughout the history of the West that are present in contemporary Psychology. These include the relation between mind and body, how we know about the world, the nature of morality, and how we think and feel. Greek and Judeo-Christian traditions, and science and religion, have provided distinct, fundamental approaches to how these questions have been asked and answered. This course examines these and related historical, conceptual, and theoretical foundations underlying contemporary Psychology.

**PSYCH 3500 Health Psychology: 3 semester hours**

Prerequisite: PSYCH 1003 and three additional hours of Psychology. Health Psychology involves the discipline and principles of psychology and behavior in understanding how the mind, body, and behavior interact in health and disease. Class topics include theoretical foundations of health and illness, health promotion and primary prevention of illness, health enhancing and health damaging behaviors, psychosomatic illness, stress and coping, pain management, and a variety of specific behavior-related medical illnesses (e.g., heart disease, eating disorders, cancer, AIDS).

**PSYCH 3820 Cross-Cultural Psychology: 3 semester hours**

Prerequisites: PSYCH 1003 and 9 hours of Psychology The purpose of this course is to present students with a broad theoretical and applied overview of cross-cultural psychology. To this end, the course presents an orientation to the definitions, concepts, theories, and methodologies of crosscultural psychology. Included is an examination of cultural and ecological factors and their influences on perceptual and cognitive processes, personality, language, and other psychological variables.

**PSYCH 4250 Stereotyping, Prejudice, and Discrimination: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2160/SOC 2160/GS 2150; or consent of instructor. This course will provide an intellectual forum for discussing classic and contemporary theories and methodologies focused on understanding stereotyping, prejudice, and discrimination. Using a social psychological framework, we will assess psychology's current understanding of why people use and apply stereotypes in their everyday thinking and behavior. We will explore such topics as social categorization, stereotype activation, contemporary forms of prejudice, the social context of prejudice, the consequences of prejudice and discrimination, the stigmatized target's perspective, coping with prejudice, and techniques for reducing prejudice and discrimination. After completing the course, you will be able to describe the social and cultural influences on stereotyping, prejudice, and discrimination and how they influence our thoughts, feelings, and behaviors. You will have a better understanding of why "isms" in society persist and how we can work to reduce them.

**PSYCH 4300 Introduction To Psychopharmacology: Drugs And Mental Illness: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2211 or PSYCH 2200; PSYCH 2245. The course is designed to provide an introduction to drugs used to treat anxiety disorders, major depression, schizophrenia, and other psychopathologies. The emphasis will be on understanding neural mechanisms related to psychological disorders and to the effectiveness of current drug treatments.

**PSYCH 4305 Developmental Psychology: Cognitive Development of Children: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. Data and theory concerned with how children's thinking changes over time. Discussion will include domain-general versus domain-specific theories, social and cultural influences on cognition, gains in memory, attention, problem solving, and metacognition, conceptual development, children's naive theories, schooling, and various definitions and measures of intelligence.

**PSYCH 4311 Psychology Of Nonverbal Behavior: 3 semester hours**

Prerequisite: PSYCH 2160 or SOC 2160. This course examines the psychological perspective on the role of nonverbal behavior in social settings. Primary concerns of the course will include an analysis of the functions of nonverbal behavior (e.g., providing information, regulating interaction, expressing intimacy, exercising influence, and managing impressions), factors influencing nonverbal expression (e.g., culture, personality, relationships), and various theoretical views on nonverbal communication. Applications to various problems and settings in everyday life will also be pursued.

**PSYCH 4314 Behavioral Neuroscience: 3 semester hours**

Prerequisites: 9 hours of Psych and/or Biology; PSYCH 2211 is recommended but not required. A neuroscience course focusing on behavioral outcomes of brain function and dysfunction. Emphasis will be on modern research methods with animal models and humans. Topics discussed will include the classic findings in the field, but the emphasis will be on recent findings from human neuropsychology, neuroimaging, cognitive neuroscience, neuropharmacology, and neuroendocrinology.

***PSYCH 4316 Developmental Psychology: Social Development of Children and Adolescents: 3 semester hours***

Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. This course examines data and theory concerned with social behavior in infants, preschoolers, and school-aged children. Discussion will include emotional regulation; measurement and nature of temperament; the formation and maintenance of attachment relationships; sex-role development; and theories of aggression and the effects of socializing agents such as family, peers, media, and culture on development.

***PSYCH 4321 The Dark Side of Organizational Behavior: 3 semester hours***

Prerequisites: Junior standing, and at least one of the following courses: PSYCH 3316, PSYCH 3318, or MGMT 3600, or permission of instructor. This course focuses on understanding the antecedents, processes, and outcomes associated with dysfunctional organizational behavior. Specific topics covered in the course include forms of counterproductive work behavior, workplace aggression and violence, organizational politics, toxic leadership, group and individual-level antecedents, and managing dysfunctional organizational behavior. Emphasis is given to findings from Psychology and Management research studies, as well as the application of course material to everyday work settings.

***PSYCH 4330 Hormones, The Brain And Behavior: 3 semester hours***

Prerequisites: 9 hours of Psychology or Biology, including at least one of the following: PSYCH 2200, PSYCH 2211, or PSYCH 4300 or permission of instructor. This course may be taken for graduate credit with permission of the instructor. Historically, hormones have been studied for their role in reproduction, including reproductive physiology and sexual behaviors. It is now clear, however, that the endocrine system actively interacts with brain regions unrelated to reproduction with the result that sex hormones and neuropeptide hormones influence a wide range of behaviors including mood, anxiety, stress responses, cognition, memory, violence, attachment, aging, weight control and athletic prowess. Emphasis of the class is on hormonal contribution both to reproductive and non-reproductive behaviors with special attention paid to gender behavioral differences.

***PSYCH 4340 Introduction to Human Neuroanatomy: 3 semester hours***

Prerequisites: Grade of B- or above in PSYCH 2211, and nine hours of psychology or biology or consent of instructor. This course is an intensive introduction to brain anatomy. It will explore the structure and function of the human nervous system with the goal of preparing students for advanced study in neuroscience-related fields. Topics will include a review of core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions. Based on an understanding of typical brain structure and function, the anatomical and physiological basis of various neurological disorders is explored.

***PSYCH 4349 Human Learning And Memory: 3 semester hours***

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Is it bad to stay up all night studying for an exam? Can you buy groceries without a shopping list? Why is exposure therapy effective in reducing anxiety? What is your earliest memory? Is your grandmother just forgetful or does she have dementia? Can you explain how to tie shoelaces? Why do victims sometimes only remember the gun and not the perpetrator? Learning and memory happen all day, every day. No matter what you plan to do with your psychology degree (e.g., become a therapist, social worker, lawyer, scientist, teacher, stay-at-home dad/mom) knowledge of learning and memory will be extremely relevant. In this course we will discuss basic forms of learning and memory such as habituation, sensitization, conditioning, and skill/procedural memory, as well as more complex forms of learning and memory such as semantic memory, episodic/autobiographical memory, short-term and working memory, and social learning. Because learning and memory happen in the brain we will also discuss the neurobiological basis of learning and memory on cellular (e.g., long-term potentiation) and system (e.g., hippocampus) levels. In addition, we will discuss how factors such as emotion, aging, sleep, and stress affect memory and learning. Finally, we will look at the relevance of learning and memory for clinical and legal environments.

***PSYCH 4350 Emotions and the Brain: 3 semester hours***

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Emotions play an important role in everyday life. But what exactly is an emotion? And what happens in your body when you experience an emotion? More specifically, what happens in your brain? Doesn't the limbic system have something to do with emotions? What are the differences and similarities between emotions (such as anger) and motivations (such as hunger)? What happens in your body and brain when you fall in love? And how do emotions influence cognition, such as attention and memory? Conversely, does cognition influence our emotions as well? These are some of the questions that we will answer in this course. Given that many mental disorders involve emotional disturbances, this course is not only relevant for students who are interested in the fundamental knowledge of emotions, but also for students who are interested in clinical psychology.

***PSYCH 4356 Cognitive Processes: 3 semester hours***

Prerequisite: Nine hours of psychology or consent of instructor. This course is an overview of the major topics in cognitive psychology, including perception, visual imagery, attention, memory, knowledge representation and retrieval, language, problem solving, reasoning, judgment, decision making, and intelligence.

***PSYCH 4365 Psychological Tests And Measurements: 3 semester hours***

Prerequisites: Grade of C- or above in PSYCH 2201 and PSYCH 2219, or consent of instructor. This course is a survey of the basic principles, research, and theories on testing and measurement of psychological constructs. Students will critically examine several professionally developed tests and learn about the administration, interpretation, and psychometric qualities of each.

***PSYCH 4372 Introduction to Social Neuroscience: 3 semester hours***

Prerequisites: PSYCH 2160 and PSYCH 2211. An introduction to current theory and research in social neuroscience with a focus on mechanisms underlying mind and behavior interactions using a multi-level integrative analysis. This course will examine how organismic processes are shaped, modulated, and modified by social factors and vice versa. This course may be taken for graduate credit with permission of the instructor.

**PSYCH 4374 Introduction To Clinical Neuropsychology: 3 semester hours**

Prerequisites: Nine hours of Psychology. An introduction to current theory and practice of clinical neuropsychology with a focus on neuropsychological findings concerning relationships between the brain and behavior. Particular attention is devoted to function, neuroanatomy, neurological syndromes, patterns of brain impairment associated with various medical diseases, and methods of neuropsychological assessment and intervention.

**PSYCH 4376 Mental Health And Aging: 3 semester hours**

Same GERON 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**PSYCH 4392 Selected Topics In Psychology: 1-3 semester hours**

Prerequisite: Twelve hours of psychology and consent of instructor. A seminar of selected issues and methods in psychology. May be repeated once for credit.

**PSYCH 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

Same as SOC WK 4398 and CAST 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**PSYCH 4698 Internship in Child Advocacy Studies: 3 semester hours**

Same as CAST 4698. Prerequisites: PSYCH 4398, completion of or concurrent enrollment in PSYCH 4498 and PSYCH 4598, and approval from the CAST director. Internship under CAST staff supervision in child or youth-serving setting. Monthly seminar participation required. Approval from the CAST director is required prior to enrolling.

**PSYCH 4999 Integrated Psychology: 2 semester hours**

Prerequisites: This course is restricted to Psychology majors and must be taken during majors' final semester of study. This capstone course serves as a review of the primary sub-fields of psychology. An advanced general psychology textbook will guide the class through important contemporary topics in behavioral neuroscience, learning and memory, cognition, psychopathologies and their treatments, and developmental and social psychology. The Major Field Aptitude Test in Psychology will serve as the final exam for the course. All Psychology majors must complete this course with a grade of C- or higher.

**PSYCH 5001 Neuropsychological Assessment: 3 semester hours**

Prerequisites: Admission to Psychology graduate program, or consent of instructor. This graduate level course will review neuroanatomical systems that mediate primary cognitive networks and methods of assessments and interpretation of data. The course will also review common neurological and psychiatric conditions that result in neuropsychological compromise.

**PSYCH 5340 Human Neuroanatomy: 3 semester hours**

Prerequisites: Admission to graduate program in psychology or consent of instructor. This course provides an overview of brain anatomy for graduate students in psychology and related disciplines. It explores the structure and function of the human nervous system both in health and disease. The course will cover core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions.

**PSYCH 5400 Seminar: Special Topics in Behavioral Neuroscience: 1 semester hour**

Prerequisites: Admission to the graduate program in behavioral neuroscience or consent of the instructor. A seminar of selected contemporary topics in behavioral neuroscience. The class will meet weekly to discuss a journal article in the field with special focus on the methodologies used in neuroscience research. May be repeated for a total of 3 credit hours, provided the subject matter is different.

**PSYCH 5407 Psychopharmacology: 3 semester hours**

Prerequisite: 12 units of graduate-level. An examination of the effects of drugs on the brain and on behavior. Primary emphasis is on those drugs used in the treatment of affective disorders, schizophrenia and anxiety.

**PSYCH 5465 Seminar: Behavioral Neuroscience: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Behavioral neuroscience is the study of the relation of the brain to behavior. The field has emerged as the new face of psychology; there are few subfields in psychology that have not been influenced by findings from animal labs, and from human studies employing physiological recordings, neuroimaging and psychotherapeutic drugs. This course will serve as an introduction for graduate students in psychology of brain morphology and function with an emphasis on normal and pathological behaviors.

**PSYCH 5468 Seminar: Cognitive Processes: 3 semester hours**

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. This course is an introduction to classic and contemporary theories, methodologies, and theoretical perspectives used in the field of cognitive psychology. The emphasis is on basic research in the field of cognitive psychology but some applications of these experiments are discussed as well. The class will read and discuss chapters from cognitive psychology textbooks as well as classic and contemporary empirical journal articles in cognitive Psychology.

**PSYCH 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as SOC WK 5610 and GERON 5610. Prerequisites: Graduate standing and BIOL 1102 or equivalent. (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social sciences/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**PSYCH 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as SOC WK 5611 and GERON 5611. Prerequisites: GERON 5610 or SOC WK 5610 or PSYCH 5610 or equivalent or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**PSYCH 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as SOC WK 5612 and GERON 5612. Prerequisites: GERON 5610 and GERON 5611, or SOC WK 5610 and SOC WK 5611, or PSYCH 5610 and PSYCH 5611 or equivalent or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with the information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**PSYCH 6415 Seminar in Health Psychology & Behavioral Medicine: 3 semester hours**

Prerequisites: Consent of instructor. This course analyzes research, theory, and clinical applications in the interrelationships of behavior, psychological states, physical health and disease. Discussion includes theoretical foundations of health and illness, biopsychosocial factors affecting health and illness, diagnostic issues, prevention, interdisciplinary treatment applications, health and public policy, and research issues. Critical evaluation of theory and empirical support for clinical applications will be discussed.

**PSYCH 6441 Aging And Health Behavior: 3 semester hours**

Same as GERON 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

**PSYCH 6448 Multicultural Issues In Clinical Psychology: 3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A survey of theoretical perspectives utilized in the treatment of various cultural groups. Their relationship to and implications for the treatment of members of various cultural groups will be explored. Strategies and ethical concerns in diagnosis, test interpretation, and treatment are considered.

**PSYCH 6466 Seminar: Developmental Psychology: 1-3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A critical examination of contemporary problems in developmental psychology.

**PSYCH 7403 Psychopathology: 3 semester hours**

Prerequisite: Admission to clinical psychology program or permission of instructor. A critical examination of the clinical-experimental literature in psychopathology. Etiologies of cognitive/affective functions and dysfunctions are explored, and implications for therapeutic interventions are considered.

**PSYCH 7404 Introduction To Clinical Assessment I: 4 semester hours**

Prerequisites: Admission to Clinical Psychology program. Fundamentals of clinical assessment with emphasis on interviewing and the measurement of cognitive functioning. This course includes a laboratory.

**PSYCH 7405 History And Systems In Psychology: 3 semester hours**

Prerequisites: Admission to Clinical Psychology program or consent of instructor. A comprehensive overview of the history of psychology with emphasis on the systems of thought that have shaped contemporary psychological theory and research.

**PSYCH 7406 Introduction To Clinical Assessment II: 4 semester hours**

Prerequisites: PSYCH 7404. This course addresses theory and techniques of personality assessment including clinical interviewing, objective and projective assessment, and integrative report writing.

**PSYCH 7410 Women And Mental Health: 3 semester hours**

Same as GS 6410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will focus on contemporary research on the psychology of women pertaining to mental health issues. Etiology and treatment of disorders disproportionately affecting women will be emphasized.

**PSYCH 7412 Social Psychology: 3 semester hours**

Prerequisites: Admittance to psychology doctoral program or consent of instructor. A review of key areas in contemporary theory and research in social psychology.

**PSYCH 7419 Existential Issues In Clinical Psychology: 3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will review existential thought in psychology and its application to understanding clinical problems and treatment. Particular attention will be given to how psychotherapy can be understood within an existential framework that focuses on the issues of death, freedom, responsibility, and isolation.

**PSYCH 7421 Quantitative Methods I: 4 semester hours**

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. A comprehensive study of univariate statistical concepts and analyses used in psychological research. Topics include descriptive statistics, normal distributions,  $z$ ,  $t$ ,  $F$ , chi-square statistics, and distributions. Correlation, simple and multiple regression, factorial and repeated measures analysis of variance, significance testing and effect size are also examined.

**PSYCH 7422 Quantitative Methods II: 4 semester hours**

Prerequisites: PSYCH 7421 and consent of instructor. (With laboratory) A comprehensive study of the use of multivariate statistics in data analysis. Topics include the general linear model, multiple regression, factor analysis, and multivariate analysis of variance.

**PSYCH 7423 Quantitative Methods III: 3 semester hours**

Prerequisites: PSYCH 7422 and PSYCH 7429 and consent of instructor. A selective study of the use of multivariate statistics in data analysis. Topics include structural equation modeling, multilevel modeling, and analysis of longitudinal data.

**PSYCH 7429 Psychometric Theory: 3 semester hours**

Prerequisites: PSYCH 7421, PSYCH 7422 and consent of instructor. A consideration of classical and modern theories of psychological testing. Topics include test reliability, validity and construction.

**PSYCH 7430 Introduction To Clinical Skills: 1 semester hour**

Prerequisites: Admission to doctoral program in clinical psychology. An introduction to processes and procedures involved in psychotherapy.

**PSYCH 7431 Clinical Supervision: 1-3 semester hours**

Prerequisite: Admission to Clinical Psychology Program. Supervised experience in clinical practice. May be repeated six times for credit.

**PSYCH 7432 Ethics And Professional Issues: 3 semester hours**

Prerequisites: Admission to Clinical Psychology program. A study of issues in professional development, clinical supervision, risk management, and ethical standards as they relate to teaching, research, and professional practice.

**PSYCH 7433 Clerkship in Clinical Psychology: 1 semester hour**

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised training in an affiliated agency or organization following completion of two years of course work. (May be repeated 3 times).

**PSYCH 7434 Introduction to Clinical Interventions: 3 semester hours**

Prerequisites: Admittance to Clinical Psychology program and PSYCH 7406. This course focuses on conceptual and methodological issues that are central to the development, evaluation and application of interventions in clinical psychology. Topics include efficacy and effectiveness research, introduction to theories of behavior change, and applications with specific populations.

**PSYCH 7439 Summer Supervision: 1 semester hour**

Prerequisites: PSYCH 7431. Supervised experience in clinical practice at all graduate year levels during the summer months. Can be repeated for credit.

**PSYCH 7442 Seminar: Cognitive And Behavioral Interventions: 3 semester hours**

Prerequisites: PSYCH 7434. This course focuses on the theory and practice of cognitive-behavioral interventions in the field of clinical psychology.

**PSYCH 7447 Trauma And Recovery: 3 semester hours**

Prerequisites: Graduate Trauma Studies Certificate. A comprehensive seminar on the psychological effects associated with exposure to potentially traumatic events. The course will include information on the history of trauma studies; definitions of stressful and traumatic events; common responses to these events; theoretical models for conceptualizing traumatic responses; information on specific types of traumatic events; and issues in treatment.

**PSYCH 7449 Research Methods and Project Development In Applied Psychology: 1-3 semester hours**

Prerequisite: Admission to the Graduate Program in Psychology or consent of instructor. This course focuses on the basics of conducting research in Industrial-Organizational Psychology. Topics include: philosophy of science; reliability and validity; experimental, quasi-experimental, and non-experimental designs; power; meta-analysis; survey/item analyses; and cross-cultural methods. In addition, the course includes group supervision of initial research that leads to thesis or dissertation proposals. Can be taken up to three times for a total of 6 credit hours.

**PSYCH 7450 Clinical Internship I: 1-9 semester hours**

Prerequisite: Consent of advisor. Formal, one year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. This course is repeated in the fall and spring semesters of the internship year.

**PSYCH 7451 Clinical Internship II: 1-9 semester hours**

Prerequisite: PSYCH 7450 and consent of advisor. Formal, one-year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. (Taken in the final summer of the internship).

**PSYCH 7454 Seminar: Personnel Psychology: 3 semester hours**

An analysis of theories and research in personnel and industrial psychology. Topics include testing, assessment centers, performance appraisal, and interviewing.

**PSYCH 7455 Seminar: Organizational Psychology: 3 semester hours**

An analysis of theories and research in organizational psychology. Topics include theories of motivation, leadership, job design, group process decision-making, organizational effectiveness, and the relation between organizations and their environment.

**PSYCH 7457 Seminar: Special Topics In Industrial Psychology: 3 semester hours**

A seminar of selected issues and methods in personnel psychology.

**PSYCH 7458 Seminar: Special Topics In Organizational Psychology: 3 semester hours**

A seminar of selected issues and methods in organizational psychology.

**PSYCH 7459 Practicum In Industrial/Organizational Psychology: 1-4 semester hours**

Supervised experience in personnel or human resource management.

**PSYCH 7461 Summer Research in I/O Psychology: 1 semester hour**

Prerequisites: Admission to I/O program. Supervised experience on research topics in I/O psychology at all graduate year levels during the summer months. Can be repeated for credit.

**PSYCH 7464 Field Experiences in Industrial-Organizational Psychology: 3 semester hours**

Prerequisites: PSYCH 7454 and PSYCH 7455 or consent of instructor. The course focuses on the innovative application of psychological theory and principles to solving some pressing human resources issues, including actual organizational projects. Through readings, discussions and projects, students obtain hands-on experience with applied psychological issues, striking the needed balance between the theoretical and applied components of Industrial-Organizational psychology.

**PSYCH 7465 Applied Issues In Organizational Psychology: 3 semester hours**

Prerequisites: PSYCH 7455 or consent of instructor. Course focuses on the application of psychological theory and principles to organizational development consulting. While such consulting is ultimately intended to enhance organizational level functioning, applications of this approach begin with learning at the individual and small group levels. In this course, students work through real-world cases that address real organizational problems. In addition to this casework, the readings and class discussions will address the theoretical and practical links between individual/team learning and organizational development.

**PSYCH 7466 Seminar Series in Industrial/Organizational Psychology: 1 semester hour**

Prerequisites: Open only to students in the I/O Psychology Graduate Program. A seminar series involving speakers, presentations, and discussions focusing on applied and theoretical perspectives, techniques, and research in the field of Industrial/Organizational Psychology. May be taken up to 6 times for credit.

**PSYCH 7469 I/O Professional Issues And Ethics: 3 semester hours**

Prerequisite: Consent of Instructor. In this course students learn the ethical standards as they relate to teaching, research and professional practice in industrial organizational psychology. Other professional and career issues are also discussed.

**PSYCH 7472 Special Topics In Psychology: 1-3 semester hours**

.

**PSYCH 7474 Clinical Research In Applied Settings: 3 semester hours**

Prerequisites: PSYCH 7421 and PSYCH 7422. This course provides information on the design and implementation of research in applied settings (e.g., human service agencies). Topics include program evaluation, consultation models, risk factor analysis, presentation and health promotion, and quality control.

**PSYCH 7476 Seminar In Developmental Psychopathology: 2 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. Introduction to principles, theory, and methods of study in the field of clinical child psychology. Emotional and behavioral dysfunctions are considered from developmental and socialization perspectives.

**PSYCH 7477 Clinical Intervention with Children and Families: 3 semester hours**

Prerequisite: PSYCH 7434 and PSYCH 7476. This course provides an overview of the theory and practice of clinical interventions with children, adolescents, and families.

**PSYCH 7478 Directed Research In Industrial/Organizational Psychology: 1-4 semester hours**

Independent study of an issue in industrial/organizational psychology through the application of research techniques.

**PSYCH 7479 Directed Readings In Industrial/Organizational Psychology: 1-4 semester hours**

Independent literature review of a topic in industrial/organizational psychology.

**PSYCH 7483 Directed Research: 1-10 semester hours**

.

**PSYCH 7484 Directed Readings: 1-10 semester hours**

.

**PSYCH 7485 Research Team: 3 semester hours**

Prerequisites: Doctoral standing. Group supervision of research leading to the Independent Research Project.

**PSYCH 7486 Research Team II: 2 semester hours**

Prerequisites: Completion of Independent Research Project or third year standing in doctoral program in clinical psychology. Group supervision of advanced research related to dissertation proposal and program's comprehensive examination required for doctoral candidacy.

**PSYCH 7487 Thesis Research Project: 1-6 semester hours**

Prerequisites: Admission to the doctoral program in clinical psychology. Supervised original research project of a clinically-related topic.

**PSYCH 7488 Specialty Examination Research: 1-6 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised original review and analysis of a clinically-related topic.

**PSYCH 7491 MA Thesis Research: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor.

**PSYCH 7492 Ph D Thesis Research: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor.

## Courses

**PSYCH 1000 Choosing A Career In Psychology: 1 semester hour**

Prerequisite: Psychology Major or consent of instructor. This course is an orientation to the field of psychology for majors and for students who are considering declaring the major. This course is to be completed by native and transfer Psychology majors during their first semester of study at UMSL. Students will be engaged in activities that will help them to develop and identify their professional goals, learn about the various specialties and careers available within the field of psychology, understand the education and skills necessary for various careers, learn the requirements for a psychology major, become familiar with minors that are available at UMSL, think about a possible choice of minor or certificate, and become acquainted with the interest areas of UMSL faculty in Psychology and related fields. All Psychology majors must complete this course during the first semester at UMSL with a grade of C- or higher.

**PSYCH 1003 General Psychology: 3 semester hours**

A survey of the basic concepts, theories, and pivotal findings over the past 100 years in the science of Psychology, with special emphasis on contemporary concepts and findings that focus on the relation of the brain to normal and pathological behaviors. All Psychology majors must complete this course with a grade of C- or higher.

**PSYCH 1268 Human Growth And Development: 3 semester hours**

Prerequisites: PSYCH 1003. A survey course, designed for non-majors. This course examines development over the lifespan with an emphasis on the developmental tasks and hazards of each age period. Majors in Psychology and students planning to pursue a career in psychology research, teaching, or practice are strongly encouraged to take PSYCH 2270 instead of this course.

**PSYCH 2160 Social Psychology: 3 semester hours**

Same as SOC 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

**PSYCH 2200 Drugs And Behavior: 3 semester hours**

Prerequisite: PSYCH 1003. The course is an introduction to psychopharmacology and the relationship among drugs, and how these impact the brain and behavior. The emphasis is on physiological mechanisms underlying the behavioral responses to psychotherapeutic substances, illicit psychoactive drugs, commonly used substances (alcohol, nicotine, caffeine), and drug-like substances produced naturally in the body.

**PSYCH 2201 Psychological Statistics: 4 semester hours**

Prerequisites: PSYCH 1003 and satisfaction of the University's mathematical skills requirement. (With Laboratory) This course serves as an introduction to statistical concepts and methods used in Psychological measurement and the analysis and interpretation of social sciences data. Topics include descriptive statistics, frequency distributions centrality, variability, and correlational measures; as well as an introduction to statistical inference, sampling fundamentals, significance testing and effect size, t-test, and analysis of variance. All Psychology majors must complete this course with a grade of C- or higher before registering for PSYCH 2219.

**PSYCH 2205 Human Sexuality: Psychological Perspectives: 3 semester hours**

Prerequisites: PSYCH 1003. This course is a comprehensive overview of human sexuality from the standpoint of the behavioral science of Psychology. This course includes a study of sexual anatomy and physiology, intersex classifications, sex and gender differences, sexual orientation, interpersonal and interpersonal aspects of human sexuality, classification and treatment of sexual dysfunction and sexual disorders, sexual victimization, and the methods employed for the scientific examination of human sexual behavior.

**PSYCH 2211 Introduction To Biological Psychology: 3 semester hours**

Prerequisites: PSYCH 1003 and 3 hours of BIOL chosen from either BIOL 1012, or BIOL 1102, or BIOL 1831. Students with career goals that include graduate study in Psychology are urged to complete the BIOL 1831 prerequisite for this course. This course introduces psychology students to behavioral neuroscience and neuropsychology. Course topics include basic neuroanatomy and neurophysiology, neurodevelopment, sensory and motor systems, and the integration of subcortical and cortical networks. All are covered with an emphasis on behavioral outcomes of normal and pathological functioning of the brain. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2219 Research Methods: 3 semester hours**

Prerequisite: Completion of PSYCH 2201 with a final grade of C- or higher is required prior to enrolling in this course. This course is a comprehensive overview of research methods in the social sciences. Topics include technical scientific writing in current APA format, critical evaluation of research literature, the application of statistical methods, and mastery of the ethical principles guiding social sciences research. Course and laboratory work involve designing and evaluating research questions, formulating research hypotheses, designing and conducting original research studies, and presenting research results. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2222 Group Processes In Organizations: 3 semester hours**

Prerequisite: PSYCH 1003 or MGMT 3600. Topics include theory, research and practice in coordination, conflict and decision-making in groups and organizations, as well as the role of influence, power, and leadership effectiveness in understanding interpersonal and group relations.

**PSYCH 2230 Psychology Of Gender: 3 semester hours**

Same as GS 2230. Prerequisite: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

**PSYCH 2232 Psychology Of Trauma: 3 semester hours**

Same as GS 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

**PSYCH 2245 Abnormal Psychology: 3 semester hours**

Prerequisite: PSYCH 1003. This course examines the historical views and current perspectives on the possible antecedents, symptoms, and treatments of major psychological disorders, including anxiety, dissociative, mood, somatoform, eating, schizophrenia and substance-related disorders. Major diagnostic categories and criteria, individual and social factors of maladaptive behavior, methods of clinical assessment, research strategies, and types of therapy will also be covered. All psychology majors must complete this course with a grade of C- or higher.

**PSYCH 2270 Developmental Psychology: Infancy, Childhood And Adolescence: 3 semester hours**

Prerequisites: PSYCH 1003. This course systematically examines theories and research concerning the physical, social, emotional, and cognitive development of children from conception through adolescence. It will provide students with a basic knowledge of infant, child, and adolescent development; its subject matter; its approaches to gathering and evaluating evidence about the causes of behavior; and the ways in which our knowledge is applied to enhance the development and the quality of life of children. It is intended for Psychology majors and students with career interests in research, education, and/or the treatment of children. All Psychology majors taking this course instead of PSYCH 2160, must complete it with a grade of C- or higher.

**PSYCH 2272 Developmental Psychology: Adulthood And Aging: 3 semester hours**

Same as GERON 2272. Prerequisite: PSYCH 1003. Personality, social, and physiological development from the onset of early adulthood through maturity and old age.

**PSYCH 2280 Psychology Of Death And Dying: 3 semester hours**

Same as GERON 2280. Prerequisites: PSYCH 1003. A beginning exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

**PSYCH 2285 American Culture and Minority Mental Health: 3 semester hours**

Prerequisites: PSYCH 1003. Provides an examination of the relationship between American culture and mental health. The focus is on the lives of American minority groups, with specific attention given to how racism, prejudice, and minority status currently reveal themselves within a mental health framework. An eclectic, multidisciplinary approach that draws from clinical and social psychology will be utilized.

**PSYCH 3205 Evolutionary Psychology: 3 semester hours**

Prerequisites: PSYCH 2211. Evolutionary Psychology refers to a fundamentally unique approach to studying and thinking about human and animal behavior through considerations of 1. The challenges and stressors encountered in ancestral environments, 2. The proximate physical, psychological, and anatomical methods that evolved to meet these adaptive problems, and 3. How adaptive or maladaptive these mechanisms are in current environments. Special emphasis will be placed on the evolution of brain structures, cognitive processes, and social behaviors. The content for this course is not new; Evolutionary Psychology involves looking at the science of Psychology through a unique lens, shaped by its tenets. Although appreciation for this approach to psychological research is increasing, it remains controversial in psychology circles. We will discuss the state of this aspect of Psychology as well.

**PSYCH 3256 Environmental Psychology: 3 semester hours**

Prerequisites: PSYCH 2160 or SOC 2160. Analysis of environmental influences on behavior and man's influence, in turn, on the environment. Topics will include a consideration of both individual processes relating to the environment (such as the perception, evaluation, and adaptation to the environment) and social processes relating to the environment (such as privacy, territoriality, and crowding).

**PSYCH 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours**

Same as CAST 3290. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, or approval from the instructor. Exploration of the impact of stressors experienced during infancy, childhood and adolescence. Integrates how theoretical frameworks, cultural considerations and policy implications apply to child development research and practice.

**PSYCH 3295 Selected Projects In Field Placement: 3 semester hours**

Prerequisite: Junior standing, fifteen hours of psychology, or consent of instructor. Selected options in field work placement experiences in various local agencies with training and supervision by faculty. (May be repeated once for credit).

**PSYCH 3316 Fundamentals Of Leadership: 3 semester hours**

Prerequisites: PSYCH 1003 and six additional hours of Psychology, or consent of instructor. This course addresses concepts and methods for developing leadership skills in work and everyday settings. Contemporary approaches to leadership development are reviewed in relation to psychological and organizational theory. This course is designed to be relevant to the wide range of leadership opportunities that arise in work and daily life. Experiential exercises are used to help students discover and develop new leadership skills.

**PSYCH 3318 Industrial And Organizational Psychology: 3 semester hours**

Same as MGMT 3623. Prerequisite: PSYCH 2201 or MGMT 3600. This course introduces the student to psychological research and theories pertaining to human behavior in the work setting. Topics covered include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

**PSYCH 3340 Clinical Problems Of Childhood: 3 semester hours**

Prerequisite: PSYCH 1003 and six additional hours of Psychology, or consent of instructor. This course will address the clinical disorders and difficulties of children, as well as the causes and the treatment of these disorders. Topics addressed include autism, childhood schizophrenia, conduct disorders, learning disabilities, ADHD, mood disorders, health-related disorders, anxiety disorders, and child maltreatment. Treatments designed for specific use with children, including behavioral, drug and community mental health approaches will be addressed. This course is recommended for those going on to graduate work in psychology.

**PSYCH 3346 Introduction To Clinical Psychology: 3 semester hours**

Prerequisite: PSYCH 1003, PSYCH 2245; and three additional hours of Psychology. This course provides a conceptual framework for research, description and understanding of clinical phenomena. Assessment, interviewing, the clinical use of tests and psychological approaches to treatment are also addressed.

**PSYCH 3390 Directed Studies: 1-6 semester hours**

Prerequisite: Consent of instructor. Directed reading and research. May be repeated for a maximum total of ten hours.

**PSYCH 3400 Conceptual and Historical Foundations of Psychology: 3 semester hours**

Prerequisite: PSYCH 1003 and three additional hours of Psychology. This course addresses basic questions about human life debated throughout the history of the West that are present in contemporary Psychology. These include the relation between mind and body, how we know about the world, the nature of morality, and how we think and feel. Greek and Judeo-Christian traditions, and science and religion, have provided distinct, fundamental approaches to how these questions have been asked and answered. This course examines these and related historical, conceptual, and theoretical foundations underlying contemporary Psychology.

**PSYCH 3500 Health Psychology: 3 semester hours**

Prerequisite: PSYCH 1003 and three additional hours of Psychology. Health Psychology involves the discipline and principles of psychology and behavior in understanding how the mind, body, and behavior interact in health and disease. Class topics include theoretical foundations of health and illness, health promotion and primary prevention of illness, health enhancing and health damaging behaviors, psychosomatic illness, stress and coping, pain management, and a variety of specific behavior-related medical illnesses (e.g., heart disease, eating disorders, cancer, AIDS).

**PSYCH 3820 Cross-Cultural Psychology: 3 semester hours**

Prerequisites: PSYCH 1003 and 9 hours of Psychology The purpose of this course is to present students with a broad theoretical and applied overview of cross-cultural psychology. To this end, the course presents an orientation to the definitions, concepts, theories, and methodologies of crosscultural psychology. Included is an examination of cultural and ecological factors and their influences on perceptual and cognitive processes, personality, language, and other psychological variables.

**PSYCH 4250 Stereotyping, Prejudice, and Discrimination: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2160/SOC 2160/GS 2150; or consent of instructor. This course will provide an intellectual forum for discussing classic and contemporary theories and methodologies focused on understanding stereotyping, prejudice, and discrimination. Using a social psychological framework, we will assess psychology's current understanding of why people use and apply stereotypes in their everyday thinking and behavior. We will explore such topics as social categorization, stereotype activation, contemporary forms of prejudice, the social context of prejudice, the consequences of prejudice and discrimination, the stigmatized target's perspective, coping with prejudice, and techniques for reducing prejudice and discrimination. After completing the course, you will be able to describe the social and cultural influences on stereotyping, prejudice, and discrimination and how they influence our thoughts, feelings, and behaviors. You will have a better understanding of why "isms" in society persist and how we can work to reduce them.

**PSYCH 4300 Introduction To Psychopharmacology: Drugs And Mental Illness: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2211 or PSYCH 2200; PSYCH 2245. The course is designed to provide an introduction to drugs used to treat anxiety disorders, major depression, schizophrenia, and other psychopathologies. The emphasis will be on understanding neural mechanisms related to psychological disorders and to the effectiveness of current drug treatments.

**PSYCH 4305 Developmental Psychology: Cognitive Development of Children: 3 semester hours**

Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. Data and theory concerned with how children's thinking changes over time. Discussion will include domain-general versus domain-specific theories, social and cultural influences on cognition, gains in memory, attention, problem solving, and metacognition, conceptual development, children's naive theories, schooling, and various definitions and measures of intelligence.

**PSYCH 4311 Psychology Of Nonverbal Behavior: 3 semester hours**

Prerequisite: PSYCH 2160 or SOC 2160. This course examines the psychological perspective on the role of nonverbal behavior in social settings. Primary concerns of the course will include an analysis of the functions of nonverbal behavior (e.g., providing information, regulating interaction, expressing intimacy, exercising influence, and managing impressions), factors influencing nonverbal expression (e.g., culture, personality, relationships), and various theoretical views on nonverbal communication. Applications to various problems and settings in everyday life will also be pursued.

**PSYCH 4314 Behavioral Neuroscience: 3 semester hours**

Prerequisites: 9 hours of Psych and/or Biology; PSYCH 2211 is recommended but not required. A neuroscience course focusing on behavioral outcomes of brain function and dysfunction. Emphasis will be on modern research methods with animal models and humans. Topics discussed will include the classic findings in the field, but the emphasis will be on recent findings from human neuropsychology, neuroimaging, cognitive neuroscience, neuropharmacology, and neuroendocrinology.

***PSYCH 4316 Developmental Psychology: Social Development of Children and Adolescents: 3 semester hours***

Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. This course examines data and theory concerned with social behavior in infants, preschoolers, and school-aged children. Discussion will include emotional regulation; measurement and nature of temperament; the formation and maintenance of attachment relationships; sex-role development; and theories of aggression and the effects of socializing agents such as family, peers, media, and culture on development.

***PSYCH 4321 The Dark Side of Organizational Behavior: 3 semester hours***

Prerequisites: Junior standing, and at least one of the following courses: PSYCH 3316, PSYCH 3318, or MGMT 3600, or permission of instructor. This course focuses on understanding the antecedents, processes, and outcomes associated with dysfunctional organizational behavior. Specific topics covered in the course include forms of counterproductive work behavior, workplace aggression and violence, organizational politics, toxic leadership, group and individual-level antecedents, and managing dysfunctional organizational behavior. Emphasis is given to findings from Psychology and Management research studies, as well as the application of course material to everyday work settings.

***PSYCH 4330 Hormones, The Brain And Behavior: 3 semester hours***

Prerequisites: 9 hours of Psychology or Biology, including at least one of the following: PSYCH 2200, PSYCH 2211, or PSYCH 4300 or permission of instructor. This course may be taken for graduate credit with permission of the instructor. Historically, hormones have been studied for their role in reproduction, including reproductive physiology and sexual behaviors. It is now clear, however, that the endocrine system actively interacts with brain regions unrelated to reproduction with the result that sex hormones and neuropeptide hormones influence a wide range of behaviors including mood, anxiety, stress responses, cognition, memory, violence, attachment, aging, weight control and athletic prowess. Emphasis of the class is on hormonal contribution both to reproductive and non-reproductive behaviors with special attention paid to gender behavioral differences.

***PSYCH 4340 Introduction to Human Neuroanatomy: 3 semester hours***

Prerequisites: Grade of B- or above in PSYCH 2211, and nine hours of psychology or biology or consent of instructor. This course is an intensive introduction to brain anatomy. It will explore the structure and function of the human nervous system with the goal of preparing students for advanced study in neuroscience-related fields. Topics will include a review of core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions. Based on an understanding of typical brain structure and function, the anatomical and physiological basis of various neurological disorders is explored.

***PSYCH 4349 Human Learning And Memory: 3 semester hours***

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Is it bad to stay up all night studying for an exam? Can you buy groceries without a shopping list? Why is exposure therapy effective in reducing anxiety? What is your earliest memory? Is your grandmother just forgetful or does she have dementia? Can you explain how to tie shoelaces? Why do victims sometimes only remember the gun and not the perpetrator? Learning and memory happen all day, every day. No matter what you plan to do with your psychology degree (e.g., become a therapist, social worker, lawyer, scientist, teacher, stay-at-home dad/mom) knowledge of learning and memory will be extremely relevant. In this course we will discuss basic forms of learning and memory such as habituation, sensitization, conditioning, and skill/procedural memory, as well as more complex forms of learning and memory such as semantic memory, episodic/autobiographical memory, short-term and working memory, and social learning. Because learning and memory happen in the brain we will also discuss the neurobiological basis of learning and memory on cellular (e.g., long-term potentiation) and system (e.g., hippocampus) levels. In addition, we will discuss how factors such as emotion, aging, sleep, and stress affect memory and learning. Finally, we will look at the relevance of learning and memory for clinical and legal environments.

***PSYCH 4350 Emotions and the Brain: 3 semester hours***

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Emotions play an important role in everyday life. But what exactly is an emotion? And what happens in your body when you experience an emotion? More specifically, what happens in your brain? Doesn't the limbic system have something to do with emotions? What are the differences and similarities between emotions (such as anger) and motivations (such as hunger)? What happens in your body and brain when you fall in love? And how do emotions influence cognition, such as attention and memory? Conversely, does cognition influence our emotions as well? These are some of the questions that we will answer in this course. Given that many mental disorders involve emotional disturbances, this course is not only relevant for students who are interested in the fundamental knowledge of emotions, but also for students who are interested in clinical psychology.

***PSYCH 4356 Cognitive Processes: 3 semester hours***

Prerequisite: Nine hours of psychology or consent of instructor. This course is an overview of the major topics in cognitive psychology, including perception, visual imagery, attention, memory, knowledge representation and retrieval, language, problem solving, reasoning, judgment, decision making, and intelligence.

***PSYCH 4365 Psychological Tests And Measurements: 3 semester hours***

Prerequisites: Grade of C- or above in PSYCH 2201 and PSYCH 2219, or consent of instructor. This course is a survey of the basic principles, research, and theories on testing and measurement of psychological constructs. Students will critically examine several professionally developed tests and learn about the administration, interpretation, and psychometric qualities of each.

***PSYCH 4372 Introduction to Social Neuroscience: 3 semester hours***

Prerequisites: PSYCH 2160 and PSYCH 2211. An introduction to current theory and research in social neuroscience with a focus on mechanisms underlying mind and behavior interactions using a multi-level integrative analysis. This course will examine how organismic processes are shaped, modulated, and modified by social factors and vice versa. This course may be taken for graduate credit with permission of the instructor.

**PSYCH 4374 Introduction To Clinical Neuropsychology: 3 semester hours**

Prerequisites: Nine hours of Psychology. An introduction to current theory and practice of clinical neuropsychology with a focus on neuropsychological findings concerning relationships between the brain and behavior. Particular attention is devoted to function, neuroanatomy, neurological syndromes, patterns of brain impairment associated with various medical diseases, and methods of neuropsychological assessment and intervention.

**PSYCH 4376 Mental Health And Aging: 3 semester hours**

Same GERON 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**PSYCH 4392 Selected Topics In Psychology: 1-3 semester hours**

Prerequisite: Twelve hours of psychology and consent of instructor. A seminar of selected issues and methods in psychology. May be repeated once for credit.

**PSYCH 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

Same as SOC WK 4398 and CAST 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**PSYCH 4698 Internship in Child Advocacy Studies: 3 semester hours**

Same as CAST 4698. Prerequisites: PSYCH 4398, completion of or concurrent enrollment in PSYCH 4498 and PSYCH 4598, and approval from the CAST director. Internship under CAST staff supervision in child or youth-serving setting. Monthly seminar participation required. Approval from the CAST director is required prior to enrolling.

**PSYCH 4999 Integrated Psychology: 2 semester hours**

Prerequisites: This course is restricted to Psychology majors and must be taken during majors' final semester of study. This capstone course serves as a review of the primary sub-fields of psychology. An advanced general psychology textbook will guide the class through important contemporary topics in behavioral neuroscience, learning and memory, cognition, psychopathologies and their treatments, and developmental and social psychology. The Major Field Aptitude Test in Psychology will serve as the final exam for the course. All Psychology majors must complete this course with a grade of C- or higher.

**PSYCH 5001 Neuropsychological Assessment: 3 semester hours**

Prerequisites: Admission to Psychology graduate program, or consent of instructor. This graduate level course will review neuroanatomical systems that mediate primary cognitive networks and methods of assessments and interpretation of data. The course will also review common neurological and psychiatric conditions that result in neuropsychological compromise.

**PSYCH 5340 Human Neuroanatomy: 3 semester hours**

Prerequisites: Admission to graduate program in psychology or consent of instructor. This course provides an overview of brain anatomy for graduate students in psychology and related disciplines. It explores the structure and function of the human nervous system both in health and disease. The course will cover core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions.

**PSYCH 5400 Seminar: Special Topics in Behavioral Neuroscience: 1 semester hour**

Prerequisites: Admission to the graduate program in behavioral neuroscience or consent of the instructor. A seminar of selected contemporary topics in behavioral neuroscience. The class will meet weekly to discuss a journal article in the field with special focus on the methodologies used in neuroscience research. May be repeated for a total of 3 credit hours, provided the subject matter is different.

**PSYCH 5407 Psychopharmacology: 3 semester hours**

Prerequisite: 12 units of graduate-level. An examination of the effects of drugs on the brain and on behavior. Primary emphasis is on those drugs used in the treatment of affective disorders, schizophrenia and anxiety.

**PSYCH 5465 Seminar: Behavioral Neuroscience: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Behavioral neuroscience is the study of the relation of the brain to behavior. The field has emerged as the new face of psychology; there are few subfields in psychology that have not been influenced by findings from animal labs, and from human studies employing physiological recordings, neuroimaging and psychotherapeutic drugs. This course will serve as an introduction for graduate students in psychology of brain morphology and function with an emphasis on normal and pathological behaviors.

**PSYCH 5468 Seminar: Cognitive Processes: 3 semester hours**

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. This course is an introduction to classic and contemporary theories, methodologies, and theoretical perspectives used in the field of cognitive psychology. The emphasis is on basic research in the field of cognitive psychology but some applications of these experiments are discussed as well. The class will read and discuss chapters from cognitive psychology textbooks as well as classic and contemporary empirical journal articles in cognitive Psychology.

**PSYCH 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as SOC WK 5610 and GERON 5610. Prerequisites: Graduate standing and BIOL 1102 or equivalent. (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social sciences/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**PSYCH 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as SOC WK 5611 and GERON 5611. Prerequisites: GERON 5610 or SOC WK 5610 or PSYCH 5610 or equivalent or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**PSYCH 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as SOC WK 5612 and GERON 5612. Prerequisites: GERON 5610 and GERON 5611, or SOC WK 5610 and SOC WK 5611, or PSYCH 5610 and PSYCH 5611 or equivalent or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with the information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**PSYCH 6415 Seminar in Health Psychology & Behavioral Medicine: 3 semester hours**

Prerequisites: Consent of instructor. This course analyzes research, theory, and clinical applications in the interrelationships of behavior, psychological states, physical health and disease. Discussion includes theoretical foundations of health and illness, biopsychosocial factors affecting health and illness, diagnostic issues, prevention, interdisciplinary treatment applications, health and public policy, and research issues. Critical evaluation of theory and empirical support for clinical applications will be discussed.

**PSYCH 6441 Aging And Health Behavior: 3 semester hours**

Same as GERON 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

**PSYCH 6448 Multicultural Issues In Clinical Psychology: 3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A survey of theoretical perspectives utilized in the treatment of various cultural groups. Their relationship to and implications for the treatment of members of various cultural groups will be explored. Strategies and ethical concerns in diagnosis, test interpretation, and treatment are considered.

**PSYCH 6466 Seminar: Developmental Psychology: 1-3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A critical examination of contemporary problems in developmental psychology.

**PSYCH 7403 Psychopathology: 3 semester hours**

Prerequisite: Admission to clinical psychology program or permission of instructor. A critical examination of the clinical-experimental literature in psychopathology. Etiologies of cognitive/affective functions and dysfunctions are explored, and implications for therapeutic interventions are considered.

**PSYCH 7404 Introduction To Clinical Assessment I: 4 semester hours**

Prerequisites: Admission to Clinical Psychology program. Fundamentals of clinical assessment with emphasis on interviewing and the measurement of cognitive functioning. This course includes a laboratory.

**PSYCH 7405 History And Systems In Psychology: 3 semester hours**

Prerequisites: Admission to Clinical Psychology program or consent of instructor. A comprehensive overview of the history of psychology with emphasis on the systems of thought that have shaped contemporary psychological theory and research.

**PSYCH 7406 Introduction To Clinical Assessment II: 4 semester hours**

Prerequisites: PSYCH 7404. This course addresses theory and techniques of personality assessment including clinical interviewing, objective and projective assessment, and integrative report writing.

**PSYCH 7410 Women And Mental Health: 3 semester hours**

Same as GS 6410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will focus on contemporary research on the psychology of women pertaining to mental health issues. Etiology and treatment of disorders disproportionately affecting women will be emphasized.

**PSYCH 7412 Social Psychology: 3 semester hours**

Prerequisites: Admittance to psychology doctoral program or consent of instructor. A review of key areas in contemporary theory and research in social psychology.

**PSYCH 7419 Existential Issues In Clinical Psychology: 3 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will review existential thought in psychology and its application to understanding clinical problems and treatment. Particular attention will be given to how psychotherapy can be understood within an existential framework that focuses on the issues of death, freedom, responsibility, and isolation.

**PSYCH 7421 Quantitative Methods I: 4 semester hours**

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. A comprehensive study of univariate statistical concepts and analyses used in psychological research. Topics include descriptive statistics, normal distributions,  $z$ ,  $t$ ,  $F$ , chi-square statistics, and distributions. Correlation, simple and multiple regression, factorial and repeated measures analysis of variance, significance testing and effect size are also examined.

**PSYCH 7422 Quantitative Methods II: 4 semester hours**

Prerequisites: PSYCH 7421 and consent of instructor. (With laboratory) A comprehensive study of the use of multivariate statistics in data analysis. Topics include the general linear model, multiple regression, factor analysis, and multivariate analysis of variance.

**PSYCH 7423 Quantitative Methods III: 3 semester hours**

Prerequisites: PSYCH 7422 and PSYCH 7429 and consent of instructor. A selective study of the use of multivariate statistics in data analysis. Topics include structural equation modeling, multilevel modeling, and analysis of longitudinal data.

**PSYCH 7429 Psychometric Theory: 3 semester hours**

Prerequisites: PSYCH 7421, PSYCH 7422 and consent of instructor. A consideration of classical and modern theories of psychological testing. Topics include test reliability, validity and construction.

**PSYCH 7430 Introduction To Clinical Skills: 1 semester hour**

Prerequisites: Admission to doctoral program in clinical psychology. An introduction to processes and procedures involved in psychotherapy.

**PSYCH 7431 Clinical Supervision: 1-3 semester hours**

Prerequisite: Admission to Clinical Psychology Program. Supervised experience in clinical practice. May be repeated six times for credit.

**PSYCH 7432 Ethics And Professional Issues: 3 semester hours**

Prerequisites: Admission to Clinical Psychology program. A study of issues in professional development, clinical supervision, risk management, and ethical standards as they relate to teaching, research, and professional practice.

**PSYCH 7433 Clerkship in Clinical Psychology: 1 semester hour**

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised training in an affiliated agency or organization following completion of two years of course work. (May be repeated 3 times).

**PSYCH 7434 Introduction to Clinical Interventions: 3 semester hours**

Prerequisites: Admittance to Clinical Psychology program and PSYCH 7406. This course focuses on conceptual and methodological issues that are central to the development, evaluation and application of interventions in clinical psychology. Topics include efficacy and effectiveness research, introduction to theories of behavior change, and applications with specific populations.

**PSYCH 7439 Summer Supervision: 1 semester hour**

Prerequisites: PSYCH 7431. Supervised experience in clinical practice at all graduate year levels during the summer months. Can be repeated for credit.

**PSYCH 7442 Seminar: Cognitive And Behavioral Interventions: 3 semester hours**

Prerequisites: PSYCH 7434. This course focuses on the theory and practice of cognitive-behavioral interventions in the field of clinical psychology.

**PSYCH 7447 Trauma And Recovery: 3 semester hours**

Prerequisites: Graduate Trauma Studies Certificate. A comprehensive seminar on the psychological effects associated with exposure to potentially traumatic events. The course will include information on the history of trauma studies; definitions of stressful and traumatic events; common responses to these events; theoretical models for conceptualizing traumatic responses; information on specific types of traumatic events; and issues in treatment.

**PSYCH 7449 Research Methods and Project Development In Applied Psychology: 1-3 semester hours**

Prerequisite: Admission to the Graduate Program in Psychology or consent of instructor. This course focuses on the basics of conducting research in Industrial-Organizational Psychology. Topics include: philosophy of science; reliability and validity; experimental, quasi-experimental, and non-experimental designs; power; meta-analysis; survey/item analyses; and cross-cultural methods. In addition, the course includes group supervision of initial research that leads to thesis or dissertation proposals. Can be taken up to three times for a total of 6 credit hours.

**PSYCH 7450 Clinical Internship I: 1-9 semester hours**

Prerequisite: Consent of advisor. Formal, one year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. This course is repeated in the fall and spring semesters of the internship year.

**PSYCH 7451 Clinical Internship II: 1-9 semester hours**

Prerequisite: PSYCH 7450 and consent of advisor. Formal, one-year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. (Taken in the final summer of the internship).

**PSYCH 7454 Seminar: Personnel Psychology: 3 semester hours**

An analysis of theories and research in personnel and industrial psychology. Topics include testing, assessment centers, performance appraisal, and interviewing.

**PSYCH 7455 Seminar: Organizational Psychology: 3 semester hours**

An analysis of theories and research in organizational psychology. Topics include theories of motivation, leadership, job design, group process decision-making, organizational effectiveness, and the relation between organizations and their environment.

**PSYCH 7457 Seminar: Special Topics In Industrial Psychology: 3 semester hours**

A seminar of selected issues and methods in personnel psychology.

**PSYCH 7458 Seminar: Special Topics In Organizational Psychology: 3 semester hours**

A seminar of selected issues and methods in organizational psychology.

**PSYCH 7459 Practicum In Industrial/Organizational Psychology: 1-4 semester hours**

Supervised experience in personnel or human resource management.

**PSYCH 7461 Summer Research in I/O Psychology: 1 semester hour**

Prerequisites: Admission to I/O program. Supervised experience on research topics in I/O psychology at all graduate year levels during the summer months. Can be repeated for credit.

**PSYCH 7464 Field Experiences in Industrial-Organizational Psychology: 3 semester hours**

Prerequisites: PSYCH 7454 and PSYCH 7455 or consent of instructor. The course focuses on the innovative application of psychological theory and principles to solving some pressing human resources issues, including actual organizational projects. Through readings, discussions and projects, students obtain hands-on experience with applied psychological issues, striking the needed balance between the theoretical and applied components of Industrial-Organizational psychology.

**PSYCH 7465 Applied Issues In Organizational Psychology: 3 semester hours**

Prerequisites: PSYCH 7455 or consent of instructor. Course focuses on the application of psychological theory and principles to organizational development consulting. While such consulting is ultimately intended to enhance organizational level functioning, applications of this approach begin with learning at the individual and small group levels. In this course, students work through real-world cases that address real organizational problems. In addition to this casework, the readings and class discussions will address the theoretical and practical links between individual/team learning and organizational development.

**PSYCH 7466 Seminar Series in Industrial/Organizational Psychology: 1 semester hour**

Prerequisites: Open only to students in the I/O Psychology Graduate Program. A seminar series involving speakers, presentations, and discussions focusing on applied and theoretical perspectives, techniques, and research in the field of Industrial/Organizational Psychology. May be taken up to 6 times for credit.

**PSYCH 7469 I/O Professional Issues And Ethics: 3 semester hours**

Prerequisite: Consent of Instructor. In this course students learn the ethical standards as they relate to teaching, research and professional practice in industrial organizational psychology. Other professional and career issues are also discussed.

**PSYCH 7472 Special Topics In Psychology: 1-3 semester hours**

.

**PSYCH 7474 Clinical Research In Applied Settings: 3 semester hours**

Prerequisites: PSYCH 7421 and PSYCH 7422. This course provides information on the design and implementation of research in applied settings (e.g., human service agencies). Topics include program evaluation, consultation models, risk factor analysis, presentation and health promotion, and quality control.

**PSYCH 7476 Seminar In Developmental Psychopathology: 2 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. Introduction to principles, theory, and methods of study in the field of clinical child psychology. Emotional and behavioral dysfunctions are considered from developmental and socialization perspectives.

**PSYCH 7477 Clinical Intervention with Children and Families: 3 semester hours**

Prerequisite: PSYCH 7434 and PSYCH 7476. This course provides an overview of the theory and practice of clinical interventions with children, adolescents, and families.

**PSYCH 7478 Directed Research In Industrial/Organizational Psychology: 1-4 semester hours**

Independent study of an issue in industrial/organizational psychology through the application of research techniques.

**PSYCH 7479 Directed Readings In Industrial/Organizational Psychology: 1-4 semester hours**

Independent literature review of a topic in industrial/organizational psychology.

**PSYCH 7483 Directed Research: 1-10 semester hours**

.

**PSYCH 7484 Directed Readings: 1-10 semester hours**

.

**PSYCH 7485 Research Team: 3 semester hours**

Prerequisites: Doctoral standing. Group supervision of research leading to the Independent Research Project.

**PSYCH 7486 Research Team II: 2 semester hours**

Prerequisites: Completion of Independent Research Project or third year standing in doctoral program in clinical psychology. Group supervision of advanced research related to dissertation proposal and program's comprehensive examination required for doctoral candidacy.

**PSYCH 7487 Thesis Research Project: 1-6 semester hours**

Prerequisites: Admission to the doctoral program in clinical psychology. Supervised original research project of a clinically-related topic.

**PSYCH 7488 Specialty Examination Research: 1-6 semester hours**

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised original review and analysis of a clinically-related topic.

**PSYCH 7491 MA Thesis Research: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor.

**PSYCH 7492 Ph D Thesis Research: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor.

## Public Policy Administration

### Courses

**P P ADM 6000 Introduction to Policy Analysis: 3 semester hours**

Same as POL SCI 6410. Systematic development of a critical/analytic base for dealing with public policy.

**P P ADM 6010 Introduction to Policy Research: 3 semester hours**

Same as POL SCI 6401. Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

**P P ADM 6080 Microeconomics for Policy Analysis: 3 semester hours**

Same as ECON 5010. Prerequisite: Graduate student standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields.

**P P ADM 6150 Directed Readings and Research in Public Policy: 1-10 semester hours**

Same as POL SCI 6415. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

**P P ADM 6180 Governmental Budgeting and Financial Control: 3 semester hours**

Same as BUS AD 5450. Prerequisite: ACCTNG 5400 a study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

**P P ADM 6210 Public Sector Microeconomics: 3 semester hours**

Same as ECON 5500. Prerequisites: ECON 3001 or BUS AD 5001 or P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost/benefit analysis.

**P P ADM 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

**P P ADM 6310 American Philanthropy and Nonprofit Resources Development: 3 semester hours**

Same as SOC WK 6310. Prerequisites: Graduate Standing Required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

**P P ADM 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour**

Same as SOC WK 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff' legal issues that affect these processes.

**P P ADM 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as SOC WK 6312. Prerequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

**P P ADM 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as SOC WK 6313. Prerequisite: Graduate standing required. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

**P P ADM 6340 Seminar in City Administration: 3 semester hours**

This course provides an overview of the working environment of a city administrator and is jointly sponsored by the local city managers association. Professional city personnel make presentations to the students on six major topics: political structure, organizational structure, service delivery, finance, personnel policies and practices, and leadership. The course provides direct observation of city council meetings, visits to various city facilities, exposure to different philosophies and styles of city management, and provides students a chance to assemble facts, evaluate options, and present policy recommendations for real problems that local administrators face.

**P P ADM 6350 Issues in Urban Management: 3 semester hours**

Designed to evaluate management issues that confront managers in local government from a political perspective. The format will include an intense review and discussion of original case studies from actual local government situations. The specific focus of this course will vary. Course may be repeated.

**P P ADM 6400 Proseminar in Public Administration: 3 semester hours**

Same as POL SCI 6440. Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impact. Specific topics may include administrative accountability, inter-governmental relations, public private interaction, implementation processes, bureaucratic expertise, the legal environment of public administration, and public service and merit issue.

**P P ADM 6430 Health Care Policy: 3 semester hours**

Same as GERON 6443, POL SCI 6443, and SOC WK 6443. Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**P P ADM 6444 Seminar in Public Policy and Aging: 3 semester hours**

Same as GERON 6444 and POL SCI 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**P P ADM 6460 Selected Topics in Health Care Policy: 3 semester hours**

Same as POL SCI 6446. Prerequisite: consent of instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

**P P ADM 6470 Proseminar in Urban Politics: 3 semester hours**

Same As: POL SCI 6470. Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

**P P ADM 6471 Seminar In Urban Politics: 3 semester hours**

Same As: POL SCI 6471. Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

**P P ADM 6490 Human Resources in the Public Sector: 3 semester hours**

Same as POL SCI 6449 and SOC WK 6449. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

**P P ADM 6500 Selected Topics in Public Policy Administration: 3 semester hours**

Prerequisites: Graduate Standing. Permission of instructor may be required. A seminar of selected issues and methods relating to public policy administration. May be repeated for credit, provided the subject matter is different.

**P P ADM 6501 Selected Topics in Nonprofit Management and Leadership: 3 semester hours**

Prerequisites: Graduate standing. Permission of instructor may be required. A seminar of selected issues and methods relating to nonprofit management and leadership. May be repeated for credit, provided the subject matter is different.

**P P ADM 6510 Urban and Regional Planning and Public Policy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. This course focuses on the interdependent processes of urbanization and public policy. Students will acquire an understanding of urban planning and public policy processes in North America.

**P P ADM 6550 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and SOC WK 6491. Prerequisite: Graduate Standing or Consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**P P ADM 6600 Managing People in Organizations: 3 semester hours**

Same as MGMT 5600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**P P ADM 6680 Negotiating Workplace Conflict: 3 semester hours**

Same as MGMT 5612. Prerequisites: P P ADM 6600 / MGMT 5600 and Graduate Standing. Examines conflict and cooperation between individuals, groups and organizations over the control of work. A central theme is how this conflict is expressed, controlled, and resolved. Students will participate in exercises to learn the basics of two-party negotiations.

***P P ADM 6750 Introduction to Evaluation Research Methods: 3 semester hours***

Prerequisites: At least one course in research design and statistics at the graduate level. A comparative study of research strategies with regard to data sources, data collection, and modes of analysis that are appropriate for program evaluation research. Attention is given to observational, survey, and quasi-experimental methodologies.

***P P ADM 6751 Applied Evaluation Project: 3 semester hours***

Prerequisites: P P ADM 6000, P P ADM 6010 or equivalents, P P ADM 6750 or equivalents. Independent study involving an evaluation project with an appropriate public or private or nonprofit agency.

***P P ADM 6800 Management Information Systems: 3 semester hours***

Same as INFSYS 5800. This course provides an overview of the established and contemporary issues related to information systems within organizations. Topics include the practices and tools associated with topics such as the management of IS-based investment projects, the design and implementation of IS, the alignment of IS strategy with organizational strategy, information security and privacy, and gaining a competitive advantage through IS.

***P P ADM 6850 Information Technology and the Public and Nonprofit Sectors: 1 semester hour***

Prerequisite: Graduate Standing. This course addresses information technology in the public sector from a managerial perspective. Course goals include an increase in student's knowledge and understanding of basic hardware, software, data, and information management issues from a managerial perspective. These topics include, but are not limited to: web portal design, geographic information systems, database management, e-government, strategic design, and the use of information technology to address public policy questions.

***P P ADM 6900 Cases in Public Policy Administration: 3 semester hours***

Prerequisites: 24 hours of public policy administration courses, at least 15 of which are in core courses. This capstone course intensively analyzes public policy administration cases drawn from a variety of issues and settings.

***P P ADM 6950 Internship: 3 semester hours***

Independent study involving work with an appropriate public or private or nonprofit agency.

## Courses

***P P ADM 6000 Introduction to Policy Analysis: 3 semester hours***

Same as POL SCI 6410. Systematic development of a critical/analytic base for dealing with public policy.

***P P ADM 6010 Introduction to Policy Research: 3 semester hours***

Same as POL SCI 6401. Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

***P P ADM 6080 Microeconomics for Policy Analysis: 3 semester hours***

Same as ECON 5010. Prerequisite: Graduate student standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields.

***P P ADM 6150 Directed Readings and Research in Public Policy: 1-10 semester hours***

Same as POL SCI 6415. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

***P P ADM 6180 Governmental Budgeting and Financial Control: 3 semester hours***

Same as BUS AD 5450. Prerequisite: ACCTNG 5400 a study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

***P P ADM 6210 Public Sector Microeconomics: 3 semester hours***

Same as ECON 5500. Prerequisites: ECON 3001 or BUS AD 5001 or P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost/benefit analysis.

***P P ADM 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours***

Same as POL SCI 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

***P P ADM 6310 American Philanthropy and Nonprofit Resources Development: 3 semester hours***

Same as SOC WK 6310. Prerequisites: Graduate Standing Required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

***P P ADM 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour***

Same as SOC WK 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff' legal issues that affect these processes.

***P P ADM 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour***

Same as SOC WK 6312. Prerequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

**P P ADM 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as SOC WK 6313. Prerequisite: Graduate standing required. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

**P P ADM 6340 Seminar in City Administration: 3 semester hours**

This course provides an overview of the working environment of a city administrator and is jointly sponsored by the local city managers association. Professional city personnel make presentations to the students on six major topics: political structure, organizational structure, service delivery, finance, personnel policies and practices, and leadership. The course provides direct observation of city council meetings, visits to various city facilities, exposure to different philosophies and styles of city management, and provides students a chance to assemble facts, evaluate options, and present policy recommendations for real problems that local administrators face.

**P P ADM 6350 Issues in Urban Management: 3 semester hours**

Designed to evaluate management issues that confront managers in local government from a political perspective. The format will include an intense review and discussion of original case studies from actual local government situations. The specific focus of this course will vary. Course may be repeated.

**P P ADM 6400 Proseminar in Public Administration: 3 semester hours**

Same as POL SCI 6440. Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impact. Specific topics may include administrative accountability, inter-governmental relations, public private interaction, implementation processes, bureaucratic expertise, the legal environment of public administration, and public service and merit issue.

**P P ADM 6430 Health Care Policy: 3 semester hours**

Same as GERON 6443, POL SCI 6443, and SOC WK 6443. Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**P P ADM 6444 Seminar in Public Policy and Aging: 3 semester hours**

Same as GERON 6444 and POL SCI 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**P P ADM 6460 Selected Topics in Health Care Policy: 3 semester hours**

Same as POL SCI 6446. Prerequisite: consent of instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

**P P ADM 6470 Proseminar in Urban Politics: 3 semester hours**

Same As: POL SCI 6470. Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

**P P ADM 6471 Seminar In Urban Politics: 3 semester hours**

Same As: POL SCI 6471. Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

**P P ADM 6490 Human Resources in the Public Sector: 3 semester hours**

Same as POL SCI 6449 and SOC WK 6449. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

**P P ADM 6500 Selected Topics in Public Policy Administration: 3 semester hours**

Prerequisites: Graduate Standing. Permission of instructor may be required. A seminar of selected issues and methods relating to public policy administration. May be repeated for credit, provided the subject matter is different.

**P P ADM 6501 Selected Topics in Nonprofit Management and Leadership: 3 semester hours**

Prerequisites: Graduate standing. Permission of instructor may be required. A seminar of selected issues and methods relating to nonprofit management and leadership. May be repeated for credit, provided the subject matter is different.

**P P ADM 6510 Urban and Regional Planning and Public Policy: 3 semester hours**

Prerequisites: Graduate standing or consent of instructor. This course focuses on the interdependent processes of urbanization and public policy. Students will acquire an understanding of urban planning and public policy processes in North America.

**P P ADM 6550 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and SOC WK 6491. Prerequisite: Graduate Standing or Consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**P P ADM 6600 Managing People in Organizations: 3 semester hours**

Same as MGMT 5600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**P P ADM 6680 Negotiating Workplace Conflict: 3 semester hours**

Same as MGMT 5612. Prerequisites: P P ADM 6600 / MGMT 5600 and Graduate Standing. Examines conflict and cooperation between individuals, groups and organizations over the control of work. A central theme is how this conflict is expressed, controlled, and resolved. Students will participate in exercises to learn the basics of two-party negotiations.

***P P ADM 6750 Introduction to Evaluation Research Methods: 3 semester hours***

Prerequisites: At least one course in research design and statistics at the graduate level. A comparative study of research strategies with regard to data sources, data collection, and modes of analysis that are appropriate for program evaluation research. Attention is given to observational, survey, and quasi-experimental methodologies.

***P P ADM 6751 Applied Evaluation Project: 3 semester hours***

Prerequisites: P P ADM 6000, P P ADM 6010 or equivalents, P P ADM 6750 or equivalents. Independent study involving an evaluation project with an appropriate public or private or nonprofit agency.

***P P ADM 6800 Management Information Systems: 3 semester hours***

Same as INFSYS 5800. This course provides an overview of the established and contemporary issues related to information systems within organizations. Topics include the practices and tools associated with topics such as the management of IS-based investment projects, the design and implementation of IS, the alignment of IS strategy with organizational strategy, information security and privacy, and gaining a competitive advantage through IS.

***P P ADM 6850 Information Technology and the Public and Nonprofit Sectors: 1 semester hour***

Prerequisite: Graduate Standing. This course addresses information technology in the public sector from a managerial perspective. Course goals include an increase in student's knowledge and understanding of basic hardware, software, data, and information management issues from a managerial perspective. These topics include, but are not limited to: web portal design, geographic information systems, database management, e-government, strategic design, and the use of information technology to address public policy questions.

***P P ADM 6900 Cases in Public Policy Administration: 3 semester hours***

Prerequisites: 24 hours of public policy administration courses, at least 15 of which are in core courses. This capstone course intensively analyzes public policy administration cases drawn from a variety of issues and settings.

***P P ADM 6950 Internship: 3 semester hours***

Independent study involving work with an appropriate public or private or nonprofit agency.

## Quantitative Management Science

### Courses

***QN MGT S 6360 Advanced Operations Research Applications: 3 semester hours***

Prerequisite: LOG OM 5350. Application of operation research techniques to business problems. After a brief review of these techniques, followed by an examination of typical applications reported in the literature, the major portion of the term is spent in analyzing and solving an actual business operations research problem. A team approach is used, with groups of two or three students responsible for finding and solving an operations research problem in a local company. Primary emphasis is placed on the use of operations research techniques to solve management problems.

## Russian

### Courses

***RUSSIAN 1001 Russian I: 5 semester hours***

Emphasis will be placed upon the speaking and understanding of Russian and upon the acquisition of the fundamentals of grammar and syntax. Five hours of class and one hour language laboratory per week required.

***RUSSIAN 1002 Russian II: 5 semester hours***

Prerequisite: RUSSIAN 1001 or equivalent. Emphasis will be placed upon the speaking and understanding of Russian and upon the acquisition of the fundamentals of grammar and syntax. Five hours of class and one hour language laboratory per week required.

***RUSSIAN 1035 English Grammar For Students Of Foreign Languages: 1 semester hour***

This course is designed to familiarize the student with basic English grammar and the terms commonly used in the teaching of most languages. This course does not count toward a major or minor in English or any other language.

***RUSSIAN 1108 Introduction To Life In Russia: 2 semester hours***

This course gives insights into the practices, customs and habits of contemporary Russian society. It targets the beginner and teaches many useful phrases for basic reading skills for business or travel. Course is taught in English and does not count towards the language requirement.

***RUSSIAN 2100 Scientific Russian: 3 semester hours***

Prerequisite: RUSSIAN 1002 or equivalent. Introduction to reading of selected Russian texts in the natural and social sciences. Designed primarily for majors in these areas.

***RUSSIAN 2101 Intermediate Russian Language & Culture: 5 semester hours***

Prerequisite: RUSSIAN 1002 or equivalent. Grammar review and continued development of language skills with readings in their cultural context.

***RUSSIAN 2190 Special Readings: 1-3 semester hours***

Prerequisite: RUSSIAN 2101 or equivalent. Readings on literary topics mutually acceptable to student and instructor.

### Courses

## Secondary Education

### Courses

**SEC ED 3240 Curriculum And Methods Of Teaching Physical Sciences: 3 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in the subject area. A study of the scope and sequence of the physical science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of science. To be taken concurrently with Practicum I. This course must be completed in residence.

**SEC ED 4011 The Curriculum And Methods Of Teaching History And Social Studies: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of history and social studies courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. May not count toward history hours required for history major. Must be completed prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4012 Social Studies Teaching Seminar: 1 semester hour**

Prerequisites: SEC ED 4989. Must be taken concurrently with student teaching. Addresses the application of teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 4013 United States History For The Secondary Classroom: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of American history to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of American history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies certification. Not available for graduate credit.

**SEC ED 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as POL SCI 4090. Prerequisites: POL SCI 4090/ SEC ED 4090 must be taken concurrently with SEC ED 4011 except with special consent of the School Studies Coordinator. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

**SEC ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**SEC ED 4589 Curriculum And Methods Of Teaching Foreign Languages: 3 semester hours**

Same as FGN LANG 4589. Prerequisites: TCH ED 3310 or TCH ED 5310 and passing the departmental language skill test. A study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of foreign language. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4590 Foreign Language Teaching Seminar: 2 semester hours**

Same as FGN LANG 4589. Prerequisite: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of SEC ED 4589, Curriculum & Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

**SEC ED 4646 The Curriculum And Methods Of Teaching Math: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of the mathematics courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of mathematics. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4648 Mathematics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4989. Must be taken concurrently with SEC ED 4990. A seminar in the integration of mathematics curricula, Educational philosophy, teaching strategies, and instructional technology in the classroom setting. Not available for graduate credit.

**SEC ED 4837 Chemistry/Physics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 3240 and SEC ED 4989. A seminar to accompany practice teaching covering integration of physical science curricula and methods into the classroom setting. To be taken concurrently with SEC ED 4990. Two-hour discussion per week.

**SEC ED 4880 Writing For Teachers: 3 semester hours**

Prerequisite: ENGL 3090 or junior level English. Same as ENGL 4880. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**SEC ED 4885 The Curriculum And Methods Of Teaching English: 3 semester hours**

Prerequisites: Completion of Level II education courses and a near major in English. A study of the scope and sequence of the English courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experiences and theory to practice. To be taken prior to student teaching and concurrently with Practicum I, SEC ED 4989.

**SEC ED 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as TH DAN 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communications or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989; Secondary Education Professional Internship. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4888 English Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4885 and a near major in the subject area. A seminar in the integration of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with Practicum II, SEC ED 4990. Not available for graduate credit.

**SEC ED 4985 Curriculum And Methods Of Teaching Life Sciences: 4 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in biology. A study of the scope and sequence of the life science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. The analysis of teaching/learning and field experience observations in secondary school classrooms will be integrated into classroom activities and discussions. Take concurrently with SEC ED 4989. This course must be completed in residence.

**SEC ED 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences.

**SEC ED 4989 Practicum I: Site Based Experience: 3 semester hours**

Prerequisites: Level I & II requirements. This course is an intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teaching in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Not available for graduate credit.

**SEC ED 4990 Practicum II: Site Based Experience: 12 semester hours**

Prerequisites: SEC ED 4989 and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Not available for graduate credit.

**SEC ED 4993 Practicum II: Site Based Experience in Elementary (K-6) Music: 6 semester hours**

Prerequisites: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4994. Not available for graduate credit.

**SEC ED 4994 Practicum II: Site Based Experience in Secondary (7-12) Music: 6 semester hours**

Prerequisite: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4993. Not available for graduate credit.

**SEC ED 4996 Practicum II: Site Based Experience in Elementary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Intensive clinical teaching experience under university and school supervision, with seminar included. Must be taken "in block" with SEC ED 4997. Not available for graduate credit.

**SEC ED 4997 Practicum II: Site Based Experience in Secondary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Clinical teaching experience under university and school supervision in middle/junior high and/or high school, with seminar included. Must be taken in block with SEC ED 4996. Not available for graduate credit.

**SEC ED 4999 Biology Science Teaching Seminar: 3 semester hours**

Prerequisites: SEC ED 4985 and SEC ED 4986. The application of Educational philosophy, science curriculum, teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 5000 Teacher Practicum Research: 1 semester hour**

Prerequisites: Admission into Student Teaching. Students conduct research on their own teaching in order to modify their instruction, curriculum and assessment practices. Concurrent enrollment in SEC ED 4990, Secondary Student Teaching.

**SEC ED 5012 Social Studies Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of social studies curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5374 Foreign Language Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of foreign language curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5648 Mathematics Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of mathematics curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5888 English Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5989 Practicum I: Site Based Experience: 2 semester hours**

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Activities to acquire research skills will be included.

**SEC ED 5990 Practicum II: Site Based Experience: 8 semester hours**

Prerequisites: SEC ED 5989 with a B- or better and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Teacher candidates collect data for a research project.

**SEC ED 5999 Biology Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of science curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 6404 Seminar: 1-10 semester hours****SEC ED 6415 Curriculum Leadership in Education: 3 semester hours**

Prerequisites: ED PSY 6030 or consent of instructor. Strategies for developing and implementing up-to-date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

**SEC ED 6416 Curriculum Design for Educational Programs: 3 semester hours**

Prerequisites: ED PSY 6030, SEC ED 6415 or consent of instructor. Principles of curriculum design and development for a formal or informal educational setting. Students may choose to develop an integrated or differentiated curriculum using the Common Core or national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instruction practices to learner performance.

**SEC ED 6420 Improving Teaching and Learning: 3 semester hours**

Prerequisites: ED PSY 6030, or consent of instructor. Students will learn to improve their teaching effectiveness through the use of various models of instruction that are based on current learning theories and research in teaching methodology to improve the achievement of diverse learners. Focus on inquiry models that prepare educators for effectively teaching the Common Core standards. Prior instructional experience is recommended.

**SEC ED 6428 Secondary School Curriculum Reform In The Life Sciences: 1-4 semester hours**

Prerequisites: Graduate Standing. Field-based experiences in improving the district level secondary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6441 Problems and Research in Teaching Secondary School Science: 3 semester hours**

Prerequisites: Graduate Standing & science education experience. A thorough examination of research related to middle and secondary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional research literature.

**SEC ED 6485 Secondary School Curriculum Reform In The Physical Sciences: 1-4 semester hours**

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level secondary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**SEC ED 6497 Problems: 1-10 semester hours**

## Courses

**SEC ED 3240 Curriculum And Methods Of Teaching Physical Sciences: 3 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in the subject area. A study of the scope and sequence of the physical science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of science. To be taken concurrently with Practicum I. This course must be completed in residence.

**SEC ED 4011 The Curriculum And Methods Of Teaching History And Social Studies: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of history and social studies courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. May not count toward history hours required for history major. Must be completed prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4012 Social Studies Teaching Seminar: 1 semester hour**

Prerequisites: SEC ED 4989. Must be taken concurrently with student teaching. Addresses the application of teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 4013 United States History For The Secondary Classroom: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of American history to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of American history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies certification. Not available for graduate credit.

**SEC ED 4090 American Government For The Secondary Classroom: 3 semester hours**

Same as POL SCI 4090. Prerequisites: POL SCI 4090/ SEC ED 4090 must be taken concurrently with SEC ED 4011 except with special consent of the School Studies Coordinator. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

**SEC ED 4320 Classroom Management: 3 semester hours**

Same as ECH ED 4320, ELE ED 4320. Prerequisites: Level I and II courses or consent of instructor. Understanding classroom management as the development of engaging instruction that establishes healthy and culturally appropriate teacher-student relationships, builds successful classroom community and enhances student learning. Participants develop a culturally relevant classroom management plan that includes rules, procedures, expected behaviors and uses problem solving strategies to resolve behavior problems. Emphasis is on the teacher developing the social competence of Pre K-12 students within culturally diverse classrooms and engaging families in supportive interactions.

**SEC ED 4589 Curriculum And Methods Of Teaching Foreign Languages: 3 semester hours**

Same as FGN LANG 4589. Prerequisites: TCH ED 3310 or TCH ED 5310 and passing the departmental language skill test. A study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of foreign language. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4590 Foreign Language Teaching Seminar: 2 semester hours**

Same as FGN LANG 4589. Prerequisite: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of SEC ED 4589, Curriculum & Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

**SEC ED 4646 The Curriculum And Methods Of Teaching Math: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program and completion of all Level II courses. Must be taken concurrently with SEC ED 4989. A study of the scope and sequence of the mathematics courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. Attention is also directed toward learning the techniques and research tools of the scholar in the field of mathematics. To be taken prior to student teaching. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4648 Mathematics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4989. Must be taken concurrently with SEC ED 4990. A seminar in the integration of mathematics curricula, Educational philosophy, teaching strategies, and instructional technology in the classroom setting. Not available for graduate credit.

**SEC ED 4837 Chemistry/Physics Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 3240 and SEC ED 4989. A seminar to accompany practice teaching covering integration of physical science curricula and methods into the classroom setting. To be taken concurrently with SEC ED 4990. Two-hour discussion per week.

**SEC ED 4880 Writing For Teachers: 3 semester hours**

Prerequisite: ENGL 3090 or junior level English. Same as ENGL 4880. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

**SEC ED 4885 The Curriculum And Methods Of Teaching English: 3 semester hours**

Prerequisites: Completion of Level II education courses and a near major in English. A study of the scope and sequence of the English courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experiences and theory to practice. To be taken prior to student teaching and concurrently with Practicum I, SEC ED 4989.

**SEC ED 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as TH DAN 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communications or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989; Secondary Education Professional Internship. This course must be completed in residence. Not available for graduate credit.

**SEC ED 4888 English Teaching Seminar: 2 semester hours**

Prerequisites: SEC ED 4885 and a near major in the subject area. A seminar in the integration of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with Practicum II, SEC ED 4990. Not available for graduate credit.

**SEC ED 4985 Curriculum And Methods Of Teaching Life Sciences: 4 semester hours**

Prerequisites: TCH ED 3310 or TCH ED 5310 and a near major in biology. A study of the scope and sequence of the life science courses in the school curriculum, with emphasis on the selection and organization of materials and methods of instruction and evaluation. The analysis of teaching/learning and field experience observations in secondary school classrooms will be integrated into classroom activities and discussions. Take concurrently with SEC ED 4989. This course must be completed in residence.

**SEC ED 4986 Laboratory In Teaching Life Sciences: 2 semester hours**

Prerequisite: TCH ED 3310. Discussion, development, utilization, and evaluation of equipment, materials, and techniques applicable to instruction in the life sciences.

**SEC ED 4989 Practicum I: Site Based Experience: 3 semester hours**

Prerequisites: Level I & II requirements. This course is an intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teaching in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Not available for graduate credit.

**SEC ED 4990 Practicum II: Site Based Experience: 12 semester hours**

Prerequisites: SEC ED 4989 and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Not available for graduate credit.

**SEC ED 4993 Practicum II: Site Based Experience in Elementary (K-6) Music: 6 semester hours**

Prerequisites: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4994. Not available for graduate credit.

**SEC ED 4994 Practicum II: Site Based Experience in Secondary (7-12) Music: 6 semester hours**

Prerequisite: Level I and Level II Education Courses, MUS ED 3570, PRACTM 2180, MUS ED 3680 or MUS ED 3690, MUS ED 3700 or MUS ED 3710, approval of Coordinator of Music Education. Intensive clinical teaching experience under university supervision, with seminar included. Must be taken concurrently with SEC ED 4993. Not available for graduate credit.

**SEC ED 4996 Practicum II: Site Based Experience in Elementary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Intensive clinical teaching experience under university and school supervision, with seminar included. Must be taken "in block" with SEC ED 4997. Not available for graduate credit.

**SEC ED 4997 Practicum II: Site Based Experience in Secondary Art: 6 semester hours**

Prerequisites: ART ED 4273, SEC ED 4989, 45 hours of Studio Art, and 15 hours of Art History. Clinical teaching experience under university and school supervision in middle/junior high and/or high school, with seminar included. Must be taken in block with SEC ED 4996. Not available for graduate credit.

**SEC ED 4999 Biology Science Teaching Seminar: 3 semester hours**

Prerequisites: SEC ED 4985 and SEC ED 4986. The application of Educational philosophy, science curriculum, teaching strategies and instructional technology in the classroom setting. Offered concurrently with Secondary School Student Teaching, SEC ED 4990. Not available for graduate credit.

**SEC ED 5000 Teacher Practicum Research: 1 semester hour**

Prerequisites: Admission into Student Teaching. Students conduct research on their own teaching in order to modify their instruction, curriculum and assessment practices. Concurrent enrollment in SEC ED 4990, Secondary Student Teaching.

**SEC ED 5012 Social Studies Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of social studies curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5374 Foreign Language Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of foreign language curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5648 Mathematics Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of mathematics curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5888 English Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of English curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 5989 Practicum I: Site Based Experience: 2 semester hours**

Prerequisites: Graduate standing and Level I & II requirements. An intensive professional development experience (1 day per week for 14 weeks) working in a school setting. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding Practicum II (student teaching). This course must be taken in conjunction with methods of instruction course in specific content area. Assignments from the methods course(s) may be completed in the Practicum setting, and experiences in the school guide the methods course activities and discussions. Activities to acquire research skills will be included.

**SEC ED 5990 Practicum II: Site Based Experience: 8 semester hours**

Prerequisites: SEC ED 5989 with a B- or better and appropriate curriculum and methods course in the teaching field. Teacher candidates spend time in schools engaged in various capacities to improve student learning within small group instruction, whole class teaching, lesson planning and special programs to demonstrate proficiency on all MoSPE standards. Teacher candidates collect data for a research project.

**SEC ED 5999 Biology Teaching Advanced Seminar: 2 semester hours**

Prerequisites: SEC ED 5989. An advanced seminar in the analysis and synthesis of current research and best practice of science curricula, educational philosophy, teaching strategies, and instructional technology in the classroom setting. To be taken concurrently with SEC ED 5990, Practicum II.

**SEC ED 6404 Seminar: 1-10 semester hours**

.

**SEC ED 6415 Curriculum Leadership in Education: 3 semester hours**

Prerequisites: ED PSY 6030 or consent of instructor. Strategies for developing and implementing up-to-date curriculum. Using current research of innovative programs and new approaches, students will develop skills in analyzing and evaluating content area curriculum according to Common Core and national content standards in order to lead curriculum development in an educational setting.

**SEC ED 6416 Curriculum Design for Educational Programs: 3 semester hours**

Prerequisites: ED PSY 6030, SEC ED 6415 or consent of instructor. Principles of curriculum design and development for a formal or informal educational setting. Students may choose to develop an integrated or differentiated curriculum using the Common Core or national content standards. Compare and contrast curriculum design approaches while connecting curriculum and instruction practices to learner performance.

**SEC ED 6420 Improving Teaching and Learning: 3 semester hours**

Prerequisites: ED PSY 6030, or consent of instructor. Students will learn to improve their teaching effectiveness through the use of various models of instruction that are based on current learning theories and research in teaching methodology to improve the achievement of diverse learners. Focus on inquiry models that prepare educators for effectively teaching the Common Core standards. Prior instructional experience is recommended.

**SEC ED 6428 Secondary School Curriculum Reform In The Life Sciences: 1-4 semester hours**

Prerequisites: Graduate Standing. Field-based experiences in improving the district level secondary school science program, with special attention to the life sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6441 Problems and Research in Teaching Secondary School Science: 3 semester hours**

Prerequisites: Graduate Standing & science education experience. A thorough examination of research related to middle and secondary school science instruction with particular emphasis on innovative programs. Includes methods of investigation and techniques for interpreting the professional research literature.

**SEC ED 6485 Secondary School Curriculum Reform In The Physical Sciences: 1-4 semester hours**

Prerequisite: Graduate Standing. Field-based experiences in improving the district-level secondary school science program, with special attention to the physical sciences. Emphasis is given to planning and implementing standards-based inquiry on selected science topics that include connections to other curricular areas. The course is organized into 4 non-overlapping modules. Credit hours are determined based on number of modules completed. To reflect the number of modules selected by the student, this course may be repeated for a maximum of 4 credit hours.

**SEC ED 6490 Internship: 1-10 semester hours**

Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

**SEC ED 6497 Problems: 1-10 semester hours**

## Social Work

### Courses

**SOC WK 2000 Social Work And Social Issues: 3 semester hours**

Prerequisites: SOC 1010 or PSYCH 1003. Examination of the network of social programs and services developed in response to social problems in modern urban communities and the various roles and functions performed by the helping professions. Students will be introduced to basic values, skills, and training involved in a helping relationship as well as the characteristics of clients seeking help and professionals engaged in the helping process.

**SOC WK 2001 Social Work and Social Issues Lab: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2000. The lab session will be used for field trips to social agencies which will allow students to better understand the many roles social workers are involved in. This course is required for social work majors.

**SOC WK 2102 Introduction To Gender Studies: 3 semester hours**

Same as HIST 2102, SOC 2102, and GS 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**SOC WK 2200 Social Welfare As A Social Institution: 3 semester hours**

Prerequisite: SOC WK 2000 or consent of instructor. A study of the: 1) development of social welfare service and the philosophy underlying the present practices and systems, 2) present social welfare programs with particular emphasis given to public income maintenance provisions, 3) special welfare needs of the black, elderly, women, indian and hispanic americans, and 4) Development of social work as a profession. This course may be taken by non-social work majors.

**SOC WK 2201 Social Welfare As A Social Institution Laboratory: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2200. The lab session will be used for field trips to social agencies. This course is required for all Social Work majors.

**SOC WK 2330 Asians In Migration: 3 semester hours**

This course is a comparative analysis of the social and cultural diversity of the peoples of East, South, and Southeast Asia. Study focuses on their reasons for migration and the extent and quality of the social and cultural connections they maintain to their homelands. Implications of these cultures for students in a variety of disciplines are explored. This course satisfies the cultural diversity requirement.

**SOC WK 3100 Introduction To Strategies for Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 2200, SOC 1010 and PSYCH 1003 or permission of instructor. A presentation of basic knowledge, skills, and theory used for entry-level professional practice, such as problem assessment, interviewing skills, crisis intervention and referral procedures. The course objectives will also be to teach students how to help clients negotiate systems effectively, and to use resources, services, and opportunities.

**SOC WK 3210 Social Issues And Social Policy Development: 3 semester hours**

Prerequisites: SOC WK 2200, POL SCI 1100, and ECON 1000. The identification of issues concerning governmental provisions to meet contemporary social needs, with analysis of the principles and values underlying alternative solutions. A study of the processes by which citizen opinions and public policies evolve and are implemented in areas such as income maintenance, crime and delinquency, employment, family and child welfare, and public mental health.

**SOC WK 3410 Research Design In Social Work: 3 semester hours**

Prerequisites: Satisfaction of Math Proficiency requirement and either SOC 3220, CRIMIN 2220, or PSYCH 2201. Students explore research concepts and procedures (hypothesis testing, sampling, measurement, and design) emphasizing issues in social work research. Students learn to collect, analyze and present data.

**SOC WK 3510 Human Behavior In The Social Environment: 3 semester hours**

Prerequisites: BIOL 1012 and SOC 2160 or PSYCH 2160 or permission of instructor. This course will focus on the normative stages in the life span, and specifically, how human development is affected by the physical environment and social status characteristics. Empirical information and theoretical views on human development will be included. Human development will be viewed as a complex interaction of individual developmental stages with family, social, and community systems.

**SOC WK 3700 Diversity And Social Justice: 3 semester hours**

Same as GS 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 4110 Social Work Practice with Individuals, Families, and Groups: 3 semester hours**

Prerequisites: SOC WK 3100, SOC WK 3510, and SOC WK 3700 taken prior to or concurrently. This course continues the presentation of basic knowledge and practice skills for entry level professional practice begun in SOC WK 3100. It builds on the generalized helping model, incorporating specialized skills for working with specific groups of clients (e.g., children, aged, mentally ill, and physically handicapped), with families and small groups.

**SOC WK 4300 Social Work Practice with Communities: 3 semester hours**

Prerequisites: SOC WK 3210 taken prior to or concurrently, senior standing. Continuation of basic practice skills with emphasis given to analysis and intervention at the community level. Includes assessment of community assets and needs and the development of community-level interventions. Emphasis is also placed on helping the practitioner evaluate the impact of intervention.

**SOC WK 4350 Human Service Organizations: 3 semester hours**

Prerequisite: POL SCI 1100; PSYCH 2160 or SOC 2160 and admission to the BSW program or consent from instructor. This course seeks to help develop knowledge of organizational functioning and an understanding of organizational history, principles and philosophy of effective administration. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, organizational structure, goals, membership, leadership, motivation, technology and organizational culture. They will learn to develop a budget and to submit proposals for grant funding. Using a systemic perspective with organizations as settings for practice students learn to function in and through organizations.

**SOC WK 4376 Mental Health And Aging: 3 semester hours**

Same as GERON 4376 and PSYCH 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**SOC WK 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

Same As PSYCH 4398 and CAST 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**SOC WK 4601 Abused And Neglected Children: 3 semester hours**

Prerequisites: SOC WK 3510 or equivalent. This course explores the major concepts necessary for understanding abused and neglected children and their families. Emphasis is placed on (1) defining the problem, including societal stresses which contribute to the abuse and neglect; (2) examining existing practice methods; and (3) understanding the role of the social worker on interdisciplinary teams.

**SOC WK 4610 Intimate Partner Violence: 3 semester hours**

Same as GS 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

**SOC WK 4620 Addictions: Assessment And Intervention In Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent, (or are taking concurrently), or consent of instructor. This class examines the interface of psychological, physical, social, and spiritual aspects of addiction. This practice class is designed to deepen students' abilities to address clients' issues related to addictions and addictive behaviors, including: prevention, assessment, and intervention. It builds on the generalized helping model within a systems perspective, and it introduces specialized skills for working with individuals, with specific groups of clients, with families, and with small groups.

**SOC WK 4630 Gender Issues in Social Work: 3 semester hours**

Same as GS 4630. Prerequisites: SOC WK 3700, GS 2102, or graduate standing. This course will help students become more sensitive to the social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

**SOC WK 4641 Crisis Intervention: 1 semester hour**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent (or are taking concurrently), or consent of instructor. This course introduces students to the theoretical framework as well as the skills needed to understand and engage in effective crisis intervention. Students will learn a specialized model for assessment and intervention with people in crisis and will have an opportunity to apply this model to a variety of case situations.

**SOC WK 4642 Non-Violent Crisis Intervention: 1 semester hour**

Prerequisites: Senior or Graduate Standing. Nonviolent Crisis Intervention is a nonharmful behavior management system designed to aid human service professionals in the management of disruptive and assaultive people. These techniques are used to reduce tension in agitated people, control anxiety during interventions, determine alternative approaches if a person becomes violent. Students will learn how to use nonverbal, paraverbal, verbal and physical intervention skills to maintain the best care and safety for clients.

**SOC WK 4643 Social Work Practice with Individuals with Development Disabilities: 1 semester hour**

Prerequisites: Senior Standing This evidence based course exposes students to the diverse issues related to the services and support needed by individuals with development issues. Students will explore the complex social contexts in which this population lives and the appropriate interventions to meet the unique challenges facing these individuals.

**SOC WK 4645 Social Work in Mental Health: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4110 or the equivalent. The role of social work in the field of behavioral health has evolved over the last thirty years as the setting for service activity has shifted from inpatient facilities to community-based care and treatment. This course will integrate the basic components of good social work practice with the contemporary role of the social worker in the field of behavioral healthcare. This course will focus on practical applications of social work in the context of working with individuals and families dealing with mental health and/or addiction disorders with an emphasis on consumer empowerment and recovery.

**SOC WK 4670 Cross Cultural Perspectives On Social Policy: 3 semester hours**

Prerequisites: SOC WK 3210 or equivalent. This course examines social policies in different countries, which may include social insurance, social assistance, health care, and social services. Using a comparative framework, the course examines the nature of government involvement, and public and private sector relations. It examines adequacy, equity, inclusiveness, comprehensiveness, effectiveness, and efficiency of social policies in the countries being studied.

**SOC WK 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as GERON 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

**SOC WK 4800 Supervised Field Experience In Social Work I: 4 semester hours**

Prerequisite: SOC WK 3100, SOC WK 4110. SOC WK 4110 must be taken prior to or concurrently with SOC WK 4801; consent of instructor. This course provides students practice experience in social service agencies. Students work at the agencies approximately 20 hours per week. The purpose of this experience is to familiarize students with agency operations. Selection of the agency is based on student education needs.

**SOC WK 4801 Integrative Field Experience Seminar I: 2 semester hours**

Prerequisite: Consent of instructor and concurrent registration in SOC WK 4800. This seminar provides an opportunity for students to integrate previous course work with their experience in social work agencies. Classroom discussion will emphasize direct practice issues.

**SOC WK 4850 Supervised Field Experience In Social Work II: 4 semester hours**

Prerequisite: SOC WK 4800, SOC WK 4801 and consent of instructor. This is a continuation of agency practice experience. Students work at the agency approximately 20 hours per week and continue at the same agency as SOC WK 4800 or change agencies with the consent of the instructor.

**SOC WK 4851 Integrative Field Seminar II: 2 semester hours**

Prerequisites: Consent of instructor and concurrent registration in SOC WK 4850. This seminar is a continuation of SOC WK 4801. Classroom discussion will emphasize administration and community organization issues.

**SOC WK 4900 Special Study: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through advanced readings in method and philosophy on a topic of particular interest, or field research in an agency.

**SOC WK 5100 Generalist Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or equiv or admission to MSW program. Using a problem-solving approach, students develop theoretical and empirical understanding and practical application of generalist social work methods. Students gain knowledge and skills that include interviewing, assessment, crisis and shortterm intervention, contracting, resource development, and case documentation needed for competent direct practice with diverse populations.

**SOC WK 5200 Social Policy And Social Services: 3 semester hours**

Prerequisites: SOC WK 3210 or POL SCI 2420 or POL SCI 3460 or equivalent or admission to the MSW program. Covers the history and development of social welfare policies, legislative processes, and existing social welfare programs. Examines frameworks for social policy analysis, analyzes how social and economic conditions impact the process of social policy development and implementation, and introduces policy practice in social work.

**SOC WK 5300 Community Practice And Social Change: 3 semester hours**

Prerequisites: SOC WK 3300, or SOC 3344, or equivalent or admission to the MSW program. Focuses on economic, social, and political theory and research on communities and social change. Examines conceptual models of community practice within the generalist model and develops skills in organizing, advocacy, and planning.

**SOC WK 5350 Social Work And Human Service Organizations: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4300 or PSYCH 3318 or MGMT 3611 or equivalent or admission to the MSW program. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, structure, goals, membership, leadership, motivation, technology and organizational culture. Using organizations as settings for social work practice and as targets for change, students learn strategies and skills for assessment and intervention.

**SOC WK 5410 Social Work Research Methods And Analysis I: 3 semester hours**

Prerequisites: SOC WK 3410 or SOC 3230 and SOC 3231 or equivalent and SOC 3220 or equivalent or admission to MSW program. The first of a two-course sequence designed to provide students with the knowledge base and skills for using scientific method to advance social practice, knowledge, and theory. Focuses on research methods at different levels (e.g., individual, group, organization, and community) and critical analysis and synthesis of academic literature necessary for effective, evidence-based social work practice. Covers quantitative and qualitative methods, research design, sampling, measurement, use of results, impact of research, and ethical considerations.

**SOC WK 5450 Social Work Research Methods And Analysis II: 3 semester hours**

Prerequisites: SOC WK 5410 or equivalent. Advanced course, focusing on analysis of qualitative and quantitative data to advanced social work practice, knowledge, and theory. Students learn to use and interpret various statistical procedures for analyzing quantitative data, including bivariate and multivariate analysis, and content and statistical analysis for qualitative data. Students apply these analytic techniques to social work case material using computer software applications.

**SOC WK 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours**

Same as GS 5500. Prerequisites: SOC WK 3510 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

**SOC WK 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as GERON 5610 and PSYCH 5610. Prerequisites: Graduate Standing and BIOL 1102 or equivalent (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**SOC WK 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as GERON 5611 and PSYCH 5611. Prerequisites: SOC WK 5610, GERON 5610, PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**SOC WK 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as GERON 5612 and PSYCH 5612. Prerequisites: SOC WK 5610 and SOC WK 5611, or GERON 5610 and GERON 5611, or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**SOC WK 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as GERON 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**SOC WK 5635 Social Work Practice with Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours**

Same as GS 5635. Prerequisites: SOC WK 5100 and SOC WK 5500. This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

**SOC WK 5700 Diversity and Social Justice for Social Work: 3 semester hours**

Same as GS 5700. Prerequisite: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 5800 Graduate Field Practicum I: 4 semester hours**

Prerequisites: Graduate standing and consent of academic advisor. Provides integrative field experience in generalist social work practice.

**SOC WK 5801 Foundation Field Practicum Seminar: 2 semester hours**

Prerequisite: Graduate standing and consent of instructor. Integrates academic content from foundation course work and experiential learning in field placements. Goals are to conceptualize the problem solving process in field practice, synthesize theory into a social work approach that encourages creative use of self, and underscore ethics and service to diverse groups in practices.

**SOC WK 6120 Theory And Practice With Older Adults: 3 semester hours**

Same as GERON 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**SOC WK 6130 Interviewing Older Adults and Life Review: 3 semester hours**

Same as GERON 6130. Prerequisites: Graduate Standing. This course combines training in interviewing techniques with video production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**SOC WK 6150 Theory And Practice With Families: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent, graduate standing and departmental approval. This course will examine theoretical approaches to social work with families, including the impact of the social environment. Skills will include assessment and multi-disciplinary intervention with multi-problem families. Special emphasis will be given to poverty, chemical dependency, intra-familial violence, physical and mental illnesses, and working with family members of diverse cultures, socioeconomic backgrounds, races, sexual orientation, and ability. Values and ethics will be emphasized.

**SOC WK 6160 Advanced Social Work Practice Across the Life Span: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Examines theory and empirically-based assessment and intervention strategies for diverse populations across the life span. Students will gain basic mastery of behavioral, cognitive-behavioral, brief therapeutic and supportive psychotherapeutic techniques and their appropriate use with children, adolescents, and young, middle and older adults. The course will also consider the effects of family, peers, and societal context (e.g. poverty, racism, and ageism) in understanding psycho-social stressors particular to each life era, including academic failure and delinquency, substance abuse, physical and mental illness, family disruption and instability, and grief and loss issues.

**SOC WK 6200 Family Policy: 3 semester hours**

Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines policy development, implementation and impact of social policies on children, youth, and families. International national, and state policies that affect basic family needs will be the focus, including topics such as economic support, health care, child care and protection, and child and youth development. Intended and unintended consequences of existing policies on the family will be examined as well as future policy directions.

**SOC WK 6250 Social And Economic Development Policy: 3 semester hours**

Same as POL SCI 6418. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

**SOC WK 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours**

Same as P P ADM 6300 and POL SCI 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions, and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

**SOC WK 6310 American Philanthropy and Nonprofit Resource Development: 3 semester hours**

Same as P P ADM 6310. Prerequisites: Graduate standing required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

**SOC WK 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff' legal issues that affect these processes.

**SOC WK 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6312. Preequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

**SOC WK 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6313. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

**SOC WK 6400 Practice And Program Evaluation: 3 semester hours**

Prerequisites: SOC WK 5410 and SOC WK 5450 or equivalent or consent of instructor. Provides specialized knowledge in the use of qualitative and quantitative research skills to evaluate the effectiveness of social work practice. Topics will include single system design, group designs, and program evaluation. Students will design and conduct a research project associated with their advanced social work practicum. Results will be presented to the class and the agency. Value and ethical issues, particularly those relevant to client race and gender will be emphasized as students develop and conduct their research.

**SOC WK 6443 Health Care Policy: 3 semester hours**

Same as POL SCI 6443, P P ADM 6430, GERON 6443. Prerequisites: Graduate Standing and consent of instructor. (MSW students will normally take the social policy foundation course prior to enrolling in this course.) Survey course examining current issues in health care policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**SOC WK 6449 Human Resources In The Public Sector: 3 semester hours**

Same as POL SCI 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel & labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation, and labor relations including grievance arbitration and collective bargaining.

**SOC WK 6450 Gerontological Assessment: 3 semester hours**

Same as GERON 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**SOC WK 6491 Strategic And Program Planning For Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and P P ADM 6550. Prerequisites: Graduate Standing or consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**SOC WK 6601 Evid Based Approaches in Direct SW Practice: Cog & Rational Emotive Behavioral Therapy Models: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Cognitive Behavioral and Rational Emotive Behavioral therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6602 Evid Based Approaches in Dir SWork Practice: Sol Focused Therapy Model: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Solution Focus therapy model. Students will utilize this theory to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6603 Evid Based Approaches in Dir SWork Practice: Play and Interactive Models: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Play and Interactive therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6604 Introduction to Motivational Interviewing: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160, or consent of instructor, and graduate standing. This course focuses on skill development in Motivational Interviewing (MI), a specific style of interaction used to help clients/patients increase internal motivation to change behavior. The course will include theoretical underpinnings of MI, including a review of research establishing MI as an evidence-based intervention for a number of behavior areas. The course will also review a model of learning MI and provide specific opportunities for students to practice the skill. The broad objective of this course is to provide social work students an overview of Motivational Interviewing and its application to various domains of social work.

**SOC WK 6630 Diagnosis And Related Pharmacology For Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Course is designed for social work students, and will provide an overview of the development and treatment of selected mental health disorders classified by Diagnostic and Statistical Manual of Mental Disorders. In particular, the course will examine, from a systems perspective, the psychological and neuropsychological etiologies of mood, psychotic, personality and other disorders and their preferred pharmacological treatment.

**SOC WK 6640 School Social Work Practice in Public Schools: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or graduate standing and consent of instructor. Examines the role of the social worker in school settings and includes work with youth, families, and communities in relation to the child or adolescent's functioning in school.

**SOC WK 6645 Hospital Social Work: 3 semester hours**

Prerequisites: SOC WK 5100 and SOC WK 5500 or equivalent. This course focuses the key issues and practices of providing social work services through an interdisciplinary model in a large academic urban hospital setting. Practice issues will include discharge planning (housing, transportation, insurance and finances, medications and social/community supports) with focus on cultural competence and health literacy. The course will also review the following aspects of hospital social work: inpatient medicine, inpatient psychiatry, forensic social work, emergency department social work, transplant social work and clinic social work. Class discussions will integrate information concerning current health care economics.

**SOC WK 6800 Graduate Field Practicum II: 3 semester hours**

Prerequisites: SOC WK 5800 and SOC WK 5801 and consent of academic advisor. Provides integrative field experience in student's graduate social work practice concentration. May be taken concurrently with SOC WK 6850 with special permission.

**SOC WK 6850 Graduate Field Practicum III: 3 semester hours**

Prerequisites: SOC WK 6800. Provides advanced integrative field experience in students' graduate social work concentration.

**SOC WK 6900 Directed Study In Professional Social Work: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor. Independent graduate-level study on a topic of particular interest through readings, reports, and field work under faculty supervision.

## Courses

**SOC WK 2000 Social Work And Social Issues: 3 semester hours**

Prerequisites: SOC 1010 or PSYCH 1003. Examination of the network of social programs and services developed in response to social problems in modern urban communities and the various roles and functions performed by the helping professions. Students will be introduced to basic values, skills, and training involved in a helping relationship as well as the characteristics of clients seeking help and professionals engaged in the helping process.

**SOC WK 2001 Social Work and Social Issues Lab: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2000. The lab session will be used for field trips to social agencies which will allow students to better understand the many roles social workers are involved in. This course is required for social work majors.

**SOC WK 2102 Introduction To Gender Studies: 3 semester hours**

Same as HIST 2102, SOC 2102, and GS 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**SOC WK 2200 Social Welfare As A Social Institution: 3 semester hours**

Prerequisite: SOC WK 2000 or consent of instructor. A study of the: 1) development of social welfare service and the philosophy underlying the present practices and systems, 2) present social welfare programs with particular emphasis given to public income maintenance provisions, 3) special welfare needs of the black, elderly, women, indian and hispanic americans, and 4) Development of social work as a profession. This course may be taken by non-social work majors.

**SOC WK 2201 Social Welfare As A Social Institution Laboratory: 1 semester hour**

Prerequisites: Simultaneous with SOC WK 2200. The lab session will be used for field trips to social agencies. This course is required for all Social Work majors.

**SOC WK 2330 Asians In Migration: 3 semester hours**

This course is a comparative analysis of the social and cultural diversity of the peoples of East, South, and Southeast Asia. Study focuses on their reasons for migration and the extent and quality of the social and cultural connections they maintain to their homelands. Implications of these cultures for students in a variety of disciplines are explored. This course satisfies the cultural diversity requirement.

**SOC WK 3100 Introduction To Strategies for Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 2200, SOC 1010 and PSYCH 1003 or permission of instructor. A presentation of basic knowlege, skills, and theory used for entry-level professional practice, such as problem assessment, interviewing skills, crisis intervention and referral procedures. The course objectives will also be to teach students how to help clients negotiate systems effectively, and to use resources, services, and opportunities.

**SOC WK 3210 Social Issues And Social Policy Development: 3 semester hours**

Prerequisites: SOC WK 2200, POL SCI 1100, and ECON 1000. The identification of issues concerning governmental provisions to meet contemporary social needs, with analysis of the principles and values underlying alternative solutions. A study of the processes by which citizen opinions and public policies evolve and are implemented in areas such as income maintenance, crime and delinquency, employment, family and child welfare, and public mental health.

**SOC WK 3410 Research Design In Social Work: 3 semester hours**

Prerequisites: Satisfaction of Math Proficiency requirement and either SOC 3220, CRIMIN 2220, or PSYCH 2201. Students explore research concepts and procedures (hypothesis testing, sampling, measurement, and design) emphasizing issues in social work research. Students learn to collect, analyze and present data.

**SOC WK 3510 Human Behavior In The Social Environment: 3 semester hours**

Prerequisites: BIOL 1012 and SOC 2160 or PSYCH 2160 or permission of instructor. This course will focus on the normative stages in the life span, and specifically, how human development is affected by the physical environment and social status characteristics. Empirical information and theoretical views on human development will be included. Human development will be viewed as a complex interaction of individual developmental stages with family, social, and community systems.

**SOC WK 3700 Diversity And Social Justice: 3 semester hours**

Same as GS 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 4110 Social Work Practice with Individuals, Families, and Groups: 3 semester hours**

Prerequisites: SOC WK 3100, SOC WK 3510, and SOC WK 3700 taken prior to or concurrently. This course continues the presentation of basic knowledge and practice skills for entry level professional practice begun in SOC WK 3100. It builds on the generalized helping model, incorporating specialized skills for working with specific groups of clients (e.g., children, aged, mentally ill, and physically handicapped), with families and small groups.

**SOC WK 4300 Social Work Practice with Communities: 3 semester hours**

Prerequisites: SOC WK 3210 taken prior to or concurrently, senior standing. Continuation of basic practice skills with emphasis given to analysis and intervention at the community level. Includes assessment of community assets and needs and the development of community-level interventions. Emphasis is also placed on helping the practitioner evaluate the impact of intervention.

**SOC WK 4350 Human Service Organizations: 3 semester hours**

Prerequisite: POL SCI 1100; PSYCH 2160 or SOC 2160 and admission to the BSW program or consent from instructor. This course seeks to help develop knowledge of organizational functioning and an understanding of organizational history, principles and philosophy of effective administration. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, organizational structure, goals, membership, leadership, motivation, technology and organizational culture. They will learn to develop a budget and to submit proposals for grant funding. Using a systemic perspective with organizations as settings for practice students learn to function in and through organizations.

**SOC WK 4376 Mental Health And Aging: 3 semester hours**

Same as GERON 4376 and PSYCH 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

**SOC WK 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours**

Same As PSYCH 4398 and CAST 4398. Focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology and social work are provided.

**SOC WK 4601 Abused And Neglected Children: 3 semester hours**

Prerequisites: SOC WK 3510 or equivalent. This course explores the major concepts necessary for understanding abused and neglected children and their families. Emphasis is placed on (1) defining the problem, including societal stresses which contribute to the abuse and neglect; (2) examining existing practice methods; and (3) understanding the role of the social worker on interdisciplinary teams.

**SOC WK 4610 Intimate Partner Violence: 3 semester hours**

Same as GS 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

**SOC WK 4620 Addictions: Assessment And Intervention In Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent, (or are taking concurrently), or consent of instructor. This class examines the interface of psychological, physical, social, and spiritual aspects of addiction. This practice class is designed to deepen students' abilities to address clients' issues related to addictions and addictive behaviors, including: prevention, assessment, and intervention. It builds on the generalized helping model within a systems perspective, and it introduces specialized skills for working with individuals, with specific groups of clients, with families, and with small groups.

**SOC WK 4630 Gender Issues in Social Work: 3 semester hours**

Same as GS 4630. Prerequisites: SOC WK 3700, GS 2102, or graduate standing. This course will help students become more sensitive to the social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

**SOC WK 4641 Crisis Intervention: 1 semester hour**

Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent (or are taking concurrently), or consent of instructor. This course introduces students to the theoretical framework as well as the skills needed to understand and engage in effective crisis intervention. Students will learn a specialized model for assessment and intervention with people in crisis and will have an opportunity to apply this model to a variety of case situations.

**SOC WK 4642 Non-Violent Crisis Intervention: 1 semester hour**

Prerequisites: Senior or Graduate Standing. Nonviolent Crisis Intervention is a nonharmful behavior management system designed to aid human service professionals in the management of disruptive and assaultive people. These techniques are used to reduce tension in agitated people, control anxiety during interventions, determine alternative approaches if a person becomes violent. Students will learn how to use nonverbal, paraverbal, verbal and physical intervention skills to maintain the best care and safety for clients.

**SOC WK 4643 Social Work Practice with Individuals with Development Disabilities: 1 semester hour**

Prerequisites: Senior Standing This evidence based course exposes students to the diverse issues related to the services and support needed by individuals with development issues. Students will explore the complex social contexts in which this population lives and the appropriate interventions to meet the unique challenges facing these individuals.

**SOC WK 4645 Social Work in Mental Health: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4110 or the equivalent. The role of social work in the field of behavioral health has evolved over the last thirty years as the setting for service activity has shifted from inpatient facilities to community-based care and treatment. This course will integrate the basic components of good social work practice with the contemporary role of the social worker in the field of behavioral healthcare. This course will focus on practical applications of social work in the context of working with individuals and families dealing with mental health and/or addiction disorders with an emphasis on consumer empowerment and recovery.

**SOC WK 4670 Cross Cultural Perspectives On Social Policy: 3 semester hours**

Prerequisites: SOC WK 3210 or equivalent. This course examines social policies in different countries, which may include social insurance, social assistance, health care, and social services. Using a comparative framework, the course examines the nature of government involvement, and public and private sector relations. It examines adequacy, equity, inclusiveness, comprehensiveness, effectiveness, and efficiency of social policies in the countries being studied.

**SOC WK 4680 Introduction to Gerontological Practice: 3 semester hours**

Same as GERON 4680. Prerequisites: Advanced undergraduate or graduate standing. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

**SOC WK 4800 Supervised Field Experience In Social Work I: 4 semester hours**

Prerequisite: SOC WK 3100, SOC WK 4110. SOC WK 4110 must be taken prior to or concurrently with SOC WK 4801; consent of instructor. This course provides students practice experience in social service agencies. Students work at the agencies approximately 20 hours per week. The purpose of this experience is to familiarize students with agency operations. Selection of the agency is based on student education needs.

**SOC WK 4801 Integrative Field Experience Seminar I: 2 semester hours**

Prerequisite: Consent of instructor and concurrent registration in SOC WK 4800. This seminar provides an opportunity for students to integrate previous course work with their experience in social work agencies. Classroom discussion will emphasize direct practice issues.

**SOC WK 4850 Supervised Field Experience In Social Work II: 4 semester hours**

Prerequisite: SOC WK 4800, SOC WK 4801 and consent of instructor. This is a continuation of agency practice experience. Students work at the agency approximately 20 hours per week and continue at the same agency as SOC WK 4800 or change agencies with the consent of the instructor.

**SOC WK 4851 Integrative Field Seminar II: 2 semester hours**

Prerequisites: Consent of instructor and concurrent registration in SOC WK 4850. This seminar is a continuation of SOC WK 4801. Classroom discussion will emphasize administration and community organization issues.

**SOC WK 4900 Special Study: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through advanced readings in method and philosophy on a topic of particular interest, or field research in an agency.

**SOC WK 5100 Generalist Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 4110 or equiv or admission to MSW program. Using a problem-solving approach, students develop theoretical and empirical understanding and practical application of generalist social work methods. Students gain knowledge and skills that include interviewing, assessment, crisis and short-term intervention, contracting, resource development, and case documentation needed for competent direct practice with diverse populations.

**SOC WK 5200 Social Policy And Social Services: 3 semester hours**

Prerequisites: SOC WK 3210 or POL SCI 2420 or POL SCI 3460 or equivalent or admission to the MSW program. Covers the history and development of social welfare policies, legislative processes, and existing social welfare programs. Examines frameworks for social policy analysis, analyzes how social and economic conditions impact the process of social policy development and implementation, and introduces policy practice in social work.

**SOC WK 5300 Community Practice And Social Change: 3 semester hours**

Prerequisites: SOC WK 3300, or SOC 3344, or equivalent or admission to the MSW program. Focuses on economic, social, and political theory and research on communities and social change. Examines conceptual models of community practice within the generalist model and develops skills in organizing, advocacy, and planning.

**SOC WK 5350 Social Work And Human Service Organizations: 3 semester hours**

Prerequisites: SOC WK 3510 and SOC WK 4300 or PSYCH 3318 or MGMT 3611 or equivalent or admission to the MSW program. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, structure, goals, membership, leadership, motivation, technology and organizational culture. Using organizations as settings for social work practice and as targets for change, students learn strategies and skills for assessment and intervention.

**SOC WK 5410 Social Work Research Methods And Analysis I: 3 semester hours**

Prerequisites: SOC WK 3410 or SOC 3230 and SOC 3231 or equivalent and SOC 3220 or equivalent or admission to MSW program. The first of a two-course sequence designed to provide students with the knowledge base and skills for using scientific method to advance social practice, knowledge, and theory. Focuses on research methods at different levels (e.g., individual, group, organization, and community) and critical analysis and synthesis of academic literature necessary for effective, evidence-based social work practice. Covers quantitative and qualitative methods, research design, sampling, measurement, use of results, impact of research, and ethical considerations.

**SOC WK 5450 Social Work Research Methods And Analysis II: 3 semester hours**

Prerequisites: SOC WK 5410 or equivalent. Advanced course, focusing on analysis of qualitative and quantitative data to advanced social work practice, knowledge, and theory. Students learn to use and interpret various statistical procedures for analyzing quantitative data, including bivariate and multivariate analysis, and content and statistical analysis for qualitative data. Students apply these analytic techniques to social work case material using computer software applications.

**SOC WK 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours**

Same as GS 5500. Prerequisites: SOC WK 3510 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

**SOC WK 5610 Mechanisms Of Aging I: The Aging Body: 1 semester hour**

Same as GERON 5610 and PSYCH 5610. Prerequisites: Graduate Standing and BIOL 1102 or equivalent (MSW students normally take all foundation courses prior to enrolling in this course.) Introduces students with a social science/humanities background to the normal changes in the biology and chemistry of the aging human body and how these changes affect behavior.

**SOC WK 5611 Mechanisms Of Aging II: The Aging Brain: 1 semester hour**

Same as GERON 5611 and PSYCH 5611. Prerequisites: SOC WK 5610, GERON 5610, PSYCH 5610 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background a basic introduction to the biology and chemistry of the aging human brain and nervous system and how these systems impact behavior.

**SOC WK 5612 Mechanisms Of Aging III: Diseases Of Aging: 1 semester hour**

Same as GERON 5612 and PSYCH 5612. Prerequisites: SOC WK 5610 and SOC WK 5611, or GERON 5610 and GERON 5611, or PSYCH 5610 and PSYCH 5611 or equivalent, or consent of instructor. (MSW students normally take all foundation courses prior to enrolling in this course.) Provides students with a social sciences/humanities background with information on how diseases associated with aging exacerbate the effects of aging on the human body, mind, and behavior.

**SOC WK 5620 Dying, Grief & Death in Older Adulthood: 3 semester hours**

Same as GERON 5620. Prerequisite: Six hours of graduate level gerontology, psychology, counseling and/or social work coursework, or special approval from the instructor. Undergraduates in their senior year may also request approval for entry from the Director of Gerontology. For those planning to work with older adults in counseling, healthcare, hospice and/or community support settings. Will examine trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives.

**SOC WK 5635 Social Work Practice with Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours**

Same as GS 5635. Prerequisites: SOC WK 5100 and SOC WK 5500.

This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

**SOC WK 5700 Diversity and Social Justice for Social Work: 3 semester hours**

Same as GS 5700. Prerequisite: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

**SOC WK 5800 Graduate Field Practicum I: 4 semester hours**

Prerequisites: Graduate standing and consent of academic advisor. Provides integrative field experience in generalist social work practice.

**SOC WK 5801 Foundation Field Practicum Seminar: 2 semester hours**

Prerequisite: Graduate standing and consent of instructor. Integrates academic content from foundation course work and experiential learning in field placements. Goals are to conceptualize the problem solving process in field practice, synthesize theory into a social work approach that encourages creative use of self, and underscore ethics and service to diverse groups in practices.

**SOC WK 6120 Theory And Practice With Older Adults: 3 semester hours**

Same as GERON 6120. Prerequisites: Graduate Standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

**SOC WK 6130 Interviewing Older Adults and Life Review: 3 semester hours**

Same as GERON 6130. Prerequisites: Graduate Standing. This course combines training in interviewing techniques with video production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

**SOC WK 6150 Theory And Practice With Families: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent, graduate standing and departmental approval. This course will examine theoretical approaches to social work with families, including the impact of the social environment. Skills will include assessment and multi-disciplinary intervention with multi-problem families. Special emphasis will be given to poverty, chemical dependency, intra-familial violence, physical and mental illnesses, and working with family members of diverse cultures, socioeconomic backgrounds, races, sexual orientation, and ability. Values and ethics will be emphasized.

**SOC WK 6160 Advanced Social Work Practice Across the Life Span: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or consent of instructor.

Examines theory and empirically-based assessment and intervention strategies for diverse populations across the life span. Students will gain basic mastery of behavioral, cognitive-behavioral, brief therapeutic and supportive psychotherapeutic techniques and their appropriate use with children, adolescents, and young, middle and older adults. The course will also consider the effects of family, peers, and societal context (e.g. poverty, racism, and ageism) in understanding psycho-social stressors particular to each life era, including academic failure and delinquency, substance abuse, physical and mental illness, family disruption and instability, and grief and loss issues.

**SOC WK 6200 Family Policy: 3 semester hours**

Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines policy development, implementation and impact of social policies on children, youth, and families. International, national, and state policies that affect basic family needs will be the focus, including topics such as economic support, health care, child care and protection, and child and youth development. Intended and unintended consequences of existing policies on the family will be examined as well as future policy directions.

**SOC WK 6250 Social And Economic Development Policy: 3 semester hours**

Same as POL SCI 6418. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

**SOC WK 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours**

Same as P P ADM 6300 and POL SCI 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions, and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

**SOC WK 6310 American Philanthropy and Nonprofit Resource Development: 3 semester hours**

Same as P P ADM 6310. Prerequisites: Graduate standing required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, from planning through donor relations.

**SOC WK 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff; legal issues that affect these processes.

**SOC WK 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6312. Prerequisites: Graduate Standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

**SOC WK 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour**

Same as P P ADM 6313. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

**SOC WK 6400 Practice And Program Evaluation: 3 semester hours**

Prerequisites: SOC WK 5410 and SOC WK 5450 or equivalent or consent of instructor. Provides specialized knowledge in the use of qualitative and quantitative research skills to evaluate the effectiveness of social work practice. Topics will include single system design, group designs, and program evaluation. Students will design and conduct a research project associated with their advanced social work practicum. Results will be presented to the class and the agency. Value and ethical issues, particularly those relevant to client race and gender will be emphasized as students develop and conduct their research.

**SOC WK 6443 Health Care Policy: 3 semester hours**

Same as POL SCI 6443, P P ADM 6430, GERON 6443. Prerequisites: Graduate Standing and consent of instructor. (MSW students will normally take the social policy foundation course prior to enrolling in this course.) Survey course examining current issues in health care policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**SOC WK 6449 Human Resources In The Public Sector: 3 semester hours**

Same as POL SCI 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of instructor. Presents an overview of personnel & labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation, and labor relations including grievance arbitration and collective bargaining.

**SOC WK 6450 Gerontological Assessment: 3 semester hours**

Same as GERON 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. Major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

**SOC WK 6491 Strategic And Program Planning For Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and P P ADM 6550. Prerequisites: Graduate Standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**SOC WK 6601 Evid Bsd Approaches in Direct SW Practice: Cog & Rational Emotive Behavioral Therapy Models: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Cognitive Behavioral and Rational Emotive Behavioral therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6602 Evid Bsd Approaches in Dir SWork Practice: Sol Focused Therapy Model: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Solution Focus therapy model. Students will utilize this theory to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6603 Evid Bsd Approaches in Dir SWork Practice: Play and Interactive Models: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160 or consent of instructor and graduate standing. This course examines theory and evidence based practices through use of the Play and Interactive therapy models. Students will utilize these theories to conduct hands on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

**SOC WK 6604 Introduction to Motivational Interviewing: 1 semester hour**

Prerequisites: SOC WK 5100 and SOC WK 6160, or consent of instructor, and graduate standing. This course focuses on skill development in Motivational Interviewing (MI), a specific style of interaction used to help clients/patients increase internal motivation to change behavior. The course will include theoretical underpinnings of MI, including a review of research establishing MI as an evidence-based intervention for a number of behavior areas. The course will also review a model of learning MI and provide specific opportunities for students to practice the skill. The broad objective of this course is to provide social work students an overview of Motivational Interviewing and its application to various domains of social work.

**SOC WK 6630 Diagnosis And Related Pharmacology For Social Work Practice: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Course is designed for social work students, and will provide an overview of the development and treatment of selected mental health disorders classified by Diagnostic and Statistical Manual of Mental Disorders. In particular, the course will examine, from a systems perspective, the psychological and neuropsychological etiologies of mood, psychotic, personality and other disorders and their preferred pharmacological treatment.

**SOC WK 6640 School Social Work Practice in Public Schools: 3 semester hours**

Prerequisites: SOC WK 5100 or equivalent or graduate standing and consent of instructor. Examines the role of the social worker in school settings and includes work with youth, families, and communities in relation to the child or adolescent's functioning in school.

**SOC WK 6645 Hospital Social Work: 3 semester hours**

Prerequisites: SOC WK 5100 and SOC WK 5500 or equivalent. This course focuses the key issues and practices of providing social work services through an interdisciplinary model in a large academic urban hospital setting. Practice issues will include discharge planning (housing, transportation, insurance and finances, medications and social/community supports) with focus on cultural competence and health literacy. The course will also review the following aspects of hospital social work: inpatient medicine, inpatient psychiatry, forensic social work, emergency department social work, transplant social work and clinic social work. Class discussions will integrate information concerning current health care economics.

**SOC WK 6800 Graduate Field Practicum II: 3 semester hours**

Prerequisites: SOC WK 5800 and SOC WK 5801 and consent of academic advisor. Provides integrative field experience in student's graduate social work practice concentration. May be taken concurrently with SOC WK 6850 with special permission.

**SOC WK 6850 Graduate Field Practicum III: 3 semester hours**

Prerequisites: SOC WK 6800. Provides advanced integrative field experience in students' graduate social work concentration.

**SOC WK 6900 Directed Study In Professional Social Work: 1-10 semester hours**

Prerequisite: Graduate standing and consent of instructor. Independent graduate-level study on a topic of particular interest through readings, reports, and field work under faculty supervision.

**Courses****SOC 1010 Introduction To Sociology: 3 semester hours**

An introduction to sociological approaches to human behavior including types of social organizations, patterns of social interaction, and social influences on individual conduct.

**SOC 1040 Social Problems: 3 semester hours**

Conditions defined by society as social problems, as well as potential solutions, are examined from various sociological perspectives. Emphasis is given to problem issues prevalent in metropolitan settings. Analyses focus on victims and beneficiaries of both problem conditions and alternative solutions.

**SOC 1051 Sport, Culture, and Society: 3 semester hours**

Same as ANTHRO 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

**SOC 1061 Religion in Contemporary Society: 3 semester hours**

This course covers the impact of religion on political, social, cultural, and economic institutions. It examines the role of religion in contemporary social life, including the relationship between gender, ethnicity, race, class and religion; the contested place of religion in secularization and modernization; and the role of religion in political conflict.

**SOC 1091 Introductory Topics in Sociology: 3 semester hours**

This course features special and current topics at the introductory level in the field of sociology. Examines the basic concepts and provides an understanding of the development of new trends and areas of study. May be repeated provided topic is different.

**SOC 1241 Globalization and Social Change: 3 semester hours**

Introduces sociological approaches to globalization. Covers sociological concepts such as modernization, Westernization, global capitalism, and the information society. Themes include global governance and transnational society, the global diffusion of American popular culture and consumer culture, and the role of new media. Also discusses the anti-globalization movement and forms of social resistance.

**SOC 1999 The City: 3 semester hours**

This course explores the central role of cities in the modern world. Covers processes of urbanization such as immigration, segregation and ghettoization, suburbanization, and sprawl. Explores the consequences of urban inequality and issues related to race and ethnicity, class, and gender in an urban context. Also covers urban landscapes, demographics, and lifestyles; and cities as centers of music and other forms of popular culture.

**SOC 2102 Introduction To Gender Studies: 3 semester hours**

Same as GS 2102, SOC WK 2102, and HIST 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

**Sociology**

**SOC 2103 Gender Roles In Society: 3 semester hours**

Prerequisite: SOC 1010. The study of social processes through which gender roles are developed and acquired; the impact of gender roles on personal identity and social conduct; the relationship between gender roles and social inequality; and individual and social consequences of changing gender roles in contemporary society.

**SOC 2160 Social Psychology: 3 semester hours**

Same as PSYCH 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

**SOC 2180 Alcohol, Drugs And Society: 3 semester hours**

Same as CRIMIN 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

**SOC 2192 Special Topics in Sociology: 3 semester hours**

This course focuses on a specific society or group of societies utilizing sociological approaches. Examines environmental, economic, social, political, ethnic, religious, linguistic and/or cultural domains. Students are exposed to basic sociological concepts for understanding diverse societies in their historical and/or contemporary contexts. May be repeated provided topic is different.

**SOC 2200 Languages and World View: 3 semester hours**

Same as FGN LANG 2100 and ANTHRO 2100. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

**SOC 2201 Deviance and Society: 3 semester hours**

The study of traits and behaviors that violate social norms and elicit negative reactions. Explores the establishment of categories of deviance; the motivations behind deviant behavior; the identification of individuals and groups as deviant; the effects of institutionalization and social control upon the deviant; and the efforts of deviants to eradicate the label society has placed upon them.

**SOC 2202 Urban Sociology: 3 semester hours**

Covers classical works and contemporary theories in urban sociology from the nineteenth to the twenty-first centuries. Examines urbanism and community, forms and functions of cities, inequality and social difference, gender and sexuality, globalization and urban change, immigration and its impact on cities, and urban exclusion/social resistance. Includes reading well-known ethnographic works on such topics as sex work, homelessness, drug users and crackhouses, life in corner bars, gang members, and other alternative subcultures.

**SOC 2224 Marriage And The Family: 3 semester hours**

Same as GS 3224. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure are considered.

**SOC 2280 Technology And Society: 3 semester hours**

Examines the role of technology in the development of today's industrial and post-industrial societies. Topics include the social and cultural origins of technological innovation; the connection between technology and urbanization; and the impact of technological change on beliefs and values. Outlines the transition from industrial society to the post-industrial "information society," and the role of technology in globalization.

**SOC 2316 Power, Ideology And Social Movements: 3 semester hours**

This course explores how power and ideology operate in the advanced modern world. It investigates the historical and institutional contexts that help explain uprisings and discontents in the twentieth and twenty-first centuries, such as the Occupy Wall Street movement, the political struggles in the Middle East, and the uprisings and social movements throughout Latin America. Topics include an overview of the key works of Marxist theory and major radical social thinkers. Among the issues examined is the potential for social movements to produce revolutionary action resulting in new social systems.

**SOC 2338 Health & Society: 3 semester hours**

Exploration of social dimensions and issues related to health and illness such as access to the health care delivery system; factors influencing prevention, utilization and compliance; changing relationships among health care providers and consumers; health care costs, trends, and cross-cultural variations.

**SOC 3210 Sociological Theory: 3 semester hours**

Prerequisite: SOC 1010 or consent of instructor. The nature of sociological theory. An investigation of theory from Comte through contemporary developments. Contributions made by theorists in related disciplines.

**SOC 3211 Language and Society: 3 semester hours**

Same as ANTHRO 3211. Prerequisites: ANTHRO 1011 or SOC 1010 or consent of instructor. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

**SOC 3220 Social Statistics: 3 semester hours**

Same as ANTHRO 3220. Prerequisite: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analysis relevant to quantitative sociological research e.g. elementary probability, measurements of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

**SOC 3224 Families in Global Perspective: 3 semester hours**

Same as GS 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status, and health.

**SOC 3230 Research Methods: 3 semester hours**

Prerequisites: SOC 1010 and satisfaction of mathematics proficiency requirement or consent of instructor. Research planning and interpretation, principles of research design, measurement, and sampling. Techniques for the collection, analysis, and presentation of data. The course also includes an introduction to the Statistical Package for the Social Sciences (SPSS) and lab exercises.

**SOC 3237 Contemporary Japanese Culture: 3 semester hours**

SAME AS ANTHRO 3237. Prerequisites: Junior Level Standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

**SOC 3250 Sociology Of Victimization: 3 semester hours**

Same as GS 3250. Prerequisite: SOC 1010. This course examines the role of social factors in a wide range of kinds of victimization--crime, violence, natural disasters, accidents, disease, etc. The topic of social reactions to various kinds of victimization is also covered. Sociological theories of victimization are emphasized.

**SOC 3260 Social Interaction In Small Groups: 3 semester hours**

Prerequisites: SOC 2160 or PSYCH 2160 or consent of instructor. Analysis of human interaction with emphasis on group problem solving, group structure, and group process.

**SOC 3268 The Sociology Of Conflict: 3 semester hours**

Prerequisite: SOC 1010 or consent of instructor. The conditions under which social conflicts arise, develop, and are terminated (or in some cases resolved) are examined. The functions of different levels of conflict are studied to determine the potential effects and outcomes of planned intervention.

**SOC 3280 The Networked Society: 3 semester hours**

Prerequisites: SOC 1010, ANTHRO 1011, or introductory course in another social science, or consent of instructor. Explores the effects of modern information technology on societies worldwide. Covers the ways in which new technologies of communication have created increasingly networked local and global societies, as well as to the ways in which they have created new social problems.

**SOC 3291 Current Issues in Sociology: 3 semester hours**

Prerequisite: SOC 1010 or ANTHRO 1011; or consent of instructor. Selected topics in sociology, with emphasis on current issues and trends in the field. May be repeated provided topic is different.

**SOC 3344 Problems Of Urban Community: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. Issues of inequality and identity in cities, with emphasis on the consequences of urban growth; processes of class, racial, and ethnic group formation; and urban poverty. Also covers local community organization and politics, and the role of popular culture and religion in community identities.

**SOC 3600 Management and Organizational Behavior: 3 semester hours**

Same as MGMT 3600. Prerequisites: Junior standing and a 2.0 campus GPA. This course involves the study of the behavior of individuals and groups in an organizational setting. Specific topics examined include: motivation, leadership, organizational design, and conflict resolution, as well as basic coverage of management principles. In covering these topics, both classic and current perspectives are provided.

**SOC 4040 Survey Research Practicum for Sociology: 3 semester hours**

Prerequisite: Junior standing, SOC 3230, college-level statistics course, and consent of instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results. May be repeated provided the course topic is different.

**SOC 4100 Introduction to Feminist and Gender Theory: 3 semester hours**

Same as GS 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

**SOC 4150 Feminist Theory and Social Research: 3 semester hours**

Same as GS 4150. Prerequisites: GS 2102 and Junior Standing or consent of instructor. This course provides an in-depth examination of feminist theoretical contributions to social science research. We begin by examining the 20th century roots of contemporary feminist theories. With these foundations in place, we then shift to an investigation of how feminist theory has informed sociological research by examining current feminist understandings of gender, race, class and sexual inequalities across a range of contemporary social problems. Fulfills WGS feminist theory requirement.

**SOC 4160 Geographic Information Systems in Anthropology & Sociology: 4 semester hours**

Same as ANTHRO 4160. Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or SOC 1010 or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

**SOC 4280 Social Informatics: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course reviews the key social issues related to information and communication technology (ICT) design, development, and use. It analyzes the way social forces and social practices interact with information and communication technologies (ICTs), focusing specifically on social, cultural, and organizational change. This course is for students interested in the way information and communication technologies (ICTs) relate to patterns of interaction in the human context, including cultural milieu, professional concerns, community dynamics, and social inequities.

**SOC 4300 Communities And Crime: 3 semester hours**

Same as CRIMIN 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

**SOC 4307 Community-Based Research in Sociology: 3 semester hours**

Prerequisites: Junior standing, SOC 3210, SOC 3230, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying sociological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is different.

**SOC 4312 Sociology Of Wealth And Poverty: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. Theory and research on social stratification and inequality in contemporary societies.

**SOC 4320 Forms Of Criminal Behavior: 3 semester hours**

Same as CRIMIN 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

**SOC 4325 Gender, Crime & Justice: 3 semester hours**

Same as CRIMIN 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills Criminology diversity requirement.

**SOC 4331 Qualitative Methods In Social Research: 3 semester hours**

Prerequisites: Junior Standing, SOC 3230, college-level statistics course; or consent of instructor. This course is devoted to qualitative methods including participant observation, ethnographic fieldwork, intensive interview, content analysis, and oral history. Considers the place of these kinds of techniques in social research, as well as the issues raised by them. Involves participation in individual or group research projects using one or more of the methods learned.

**SOC 4336 Sociology of Organizations: 3 semester hours**

Prerequisite: SOC 1010 and junior standing or consent of instructor. This course examines the internal and external forces that influence the structures, adaptive flexibility, and actions of public and private organizations and agencies. Specific foci include: organizational responses to opportunities, constraints, and contingencies in their surrounding environments; sources of conflict and impediments to organizational goal attainment; and strategies for increasing organizational effectiveness, efficiency, and chances for survival.

**SOC 4340 Race, Crime, And Justice: 3 semester hours**

Same as CRIMIN 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CCJ diversity requirement.

**SOC 4350 Special Study: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, and field work.

**SOC 4354 Sociology Of Business And Work Settings: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. The sociology of work and occupations in America, Europe, and Asia; organization structures and worker participation; worker attitude, behaviors, and commitment; the socialization of the worker; determinants of worker behavior; social problems of work and business; and the impact of community on the work place and business behavior.

**SOC 4356 Sociology Of Education: 3 semester hours**

Prerequisite: SOC 1010 and junior standing, or consent of instructor. Education as a social institution, its role as an agent of socialization, and its effect upon the processes of social change and social mobility. The relationship between the school and its community.

**SOC 4360 Sociology Of Minority Groups: 3 semester hours**

Same as GS 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

**SOC 4361 Social Gerontology: 3 semester hours**

Same as GERON 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include: Sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

**SOC 4365 Sociological Writing: 3 semester hours**

Prerequisites: SOC 1010, ENGL 3100 and Junior standing, or consent of instructor. This course offers directed practice in the interpretation and reporting of sociological research in a wide range of styles, including those appropriate for research reports, journal articles, policy papers, non-technical magazines, books and monographs, as well as oral reports to diverse consumers.

**SOC 4378 Selected Topics In Social Psychology: 1-3 semester hours**

Prerequisite: PSYCH 2160 or SOC 2160 or consent of instructor. Focused examination of selected issues, concepts and methods in the study of social interaction. May be taken twice for credit.

**SOC 4380 Advanced Topics in Sociology: 1-3 semester hours**

Prerequisites: SOC 1010 and junior standing or consent of instructor. Examination of a specific sociological topic of current relevance in the community. May be repeated provided the topic is different.

**SOC 4385 Internship In Sociology: 1-6 semester hours**

Prerequisites: Junior standing and consent of instructor. Students participate in supervised placements in positions related to the profession of Sociology.

**SOC 4600 Masculinities: 3 semester hours**

Same as GS 4600. Prerequisites: SOC 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies WGS gender theory requirement.

## Courses

### **SOC 1010 Introduction To Sociology: 3 semester hours**

An introduction to sociological approaches to human behavior including types of social organizations, patterns of social interaction, and social influences on individual conduct.

### **SOC 1040 Social Problems: 3 semester hours**

Conditions defined by society as social problems, as well as potential solutions, are examined from various sociological perspectives. Emphasis is given to problem issues prevalent in metropolitan settings. Analyses focus on victims and beneficiaries of both problem conditions and alternative solutions.

### **SOC 1051 Sport, Culture, and Society: 3 semester hours**

Same as ANTHRO 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

### **SOC 1061 Religion in Contemporary Society: 3 semester hours**

This course covers the impact of religion on political, social, cultural, and economic institutions. It examines the role of religion in contemporary social life, including the relationship between gender, ethnicity, race, class and religion; the contested place of religion in secularization and modernization; and the role of religion in political conflict.

### **SOC 1091 Introductory Topics in Sociology: 3 semester hours**

This course features special and current topics at the introductory level in the field of sociology. Examines the basic concepts and provides an understanding of the development of new trends and areas of study. May be repeated provided topic is different.

### **SOC 1241 Globalization and Social Change: 3 semester hours**

Introduces sociological approaches to globalization. Covers sociological concepts such as modernization, Westernization, global capitalism, and the information society. Themes include global governance and transnational society, the global diffusion of American popular culture and consumer culture, and the role of new media. Also discusses the anti-globalization movement and forms of social resistance.

### **SOC 1999 The City: 3 semester hours**

This course explores the central role of cities in the modern world. Covers processes of urbanization such as immigration, segregation and ghettoization, suburbanization, and sprawl. Explores the consequences of urban inequality and issues related to race and ethnicity, class, and gender in an urban context. Also covers urban landscapes, demographics, and lifestyles; and cities as centers of music and other forms of popular culture.

### **SOC 2102 Introduction To Gender Studies: 3 semester hours**

Same as GS 2102, SOC WK 2102, and HIST 2102. This core class is required for all Women's and Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

### **SOC 2103 Gender Roles In Society: 3 semester hours**

Prerequisite: SOC 1010. The study of social processes through which gender roles are developed and acquired; the impact of gender roles on personal identity and social conduct; the relationship between gender roles and social inequality; and individual and social consequences of changing gender roles in contemporary society.

### **SOC 2160 Social Psychology: 3 semester hours**

Same as PSYCH 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

### **SOC 2180 Alcohol, Drugs And Society: 3 semester hours**

Same as CRIMIN 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

### **SOC 2192 Special Topics in Sociology: 3 semester hours**

This course focuses on a specific society or group of societies utilizing sociological approaches. Examines environmental, economic, social, political, ethnic, religious, linguistic and/or cultural domains. Students are exposed to basic sociological concepts for understanding diverse societies in their historical and/or contemporary contexts. May be repeated provided topic is different.

### **SOC 2200 Languages and World View: 3 semester hours**

Same as FGN LANG 2100 and ANTHRO 2100. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

### **SOC 2201 Deviance and Society: 3 semester hours**

The study of traits and behaviors that violate social norms and elicit negative reactions. Explores the establishment of categories of deviance; the motivations behind deviant behavior; the identification of individuals and groups as deviant; the effects of institutionalization and social control upon the deviant; and the efforts of deviants to eradicate the label society has placed upon them.

### **SOC 2202 Urban Sociology: 3 semester hours**

Covers classical works and contemporary theories in urban sociology from the nineteenth to the twenty-first centuries. Examines urbanism and community, forms and functions of cities, inequality and social difference, gender and sexuality, globalization and urban change, immigration and its impact on cities, and urban exclusion/social resistance. Includes reading well-known ethnographic works on such topics as sex work, homelessness, drug users and crackhouses, life in corner bars, gang members, and other alternative subcultures.

**SOC 2224 Marriage And The Family: 3 semester hours**

Same as GS 3224. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure are considered.

**SOC 2280 Technology And Society: 3 semester hours**

Examines the role of technology in the development of today's industrial and post-industrial societies. Topics include the social and cultural origins of technological innovation; the connection between technology and urbanization; and the impact of technological change on beliefs and values. Outlines the transition from industrial society to the post-industrial "information society," and the role of technology in globalization.

**SOC 2316 Power, Ideology And Social Movements: 3 semester hours**

This course explores how power and ideology operate in the advanced modern world. It investigates the historical and institutional contexts that help explain uprisings and discontents in the twentieth and twenty-first centuries, such as the Occupy Wall Street movement, the political struggles in the Middle East, and the uprisings and social movements throughout Latin America. Topics include an overview of the key works of Marxist theory and major radical social thinkers. Among the issues examined is the potential for social movements to produce revolutionary action resulting in new social systems.

**SOC 2338 Health & Society: 3 semester hours**

Exploration of social dimensions and issues related to health and illness such as access to the health care delivery system; factors influencing prevention, utilization and compliance; changing relationships among health care providers and consumers; health care costs, trends, and cross-cultural variations.

**SOC 3210 Sociological Theory: 3 semester hours**

Prerequisite: SOC 1010 or consent of instructor. The nature of sociological theory. An investigation of theory from Comte through contemporary developments. Contributions made by theorists in related disciplines.

**SOC 3211 Language and Society: 3 semester hours**

Same as ANTHRO 3211. Prerequisites: ANTHRO 1011 or SOC 1010 or consent of instructor. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

**SOC 3220 Social Statistics: 3 semester hours**

Same as ANTHRO 3220. Prerequisite: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analysis relevant to quantitative sociological research e.g. elementary probability, measurements of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

**SOC 3224 Families in Global Perspective: 3 semester hours**

Same as GS 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status, and health.

**SOC 3230 Research Methods: 3 semester hours**

Prerequisites: SOC 1010 and satisfaction of mathematics proficiency requirement or consent of instructor. Research planning and interpretation, principles of research design, measurement, and sampling. Techniques for the collection, analysis, and presentation of data. The course also includes an introduction to the Statistical Package for the Social Sciences (SPSS) and lab exercises.

**SOC 3237 Contemporary Japanese Culture: 3 semester hours**

SAME AS ANTHRO 3237. Prerequisites: Junior Level Standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

**SOC 3250 Sociology Of Victimization: 3 semester hours**

Same as GS 3250. Prerequisite: SOC 1010. This course examines the role of social factors in a wide range of kinds of victimization--crime, violence, natural disasters, accidents, disease, etc. The topic of social reactions to various kinds of victimization is also covered. Sociological theories of victimization are emphasized.

**SOC 3260 Social Interaction In Small Groups: 3 semester hours**

Prerequisites: SOC 2160 or PSYCH 2160 or consent of instructor. Analysis of human interaction with emphasis on group problem solving, group structure, and group process.

**SOC 3268 The Sociology Of Conflict: 3 semester hours**

Prerequisite: SOC 1010 or consent of instructor. The conditions under which social conflicts arise, develop, and are terminated (or in some cases resolved) are examined. The functions of different levels of conflict are studied to determine the potential effects and outcomes of planned intervention.

**SOC 3280 The Networked Society: 3 semester hours**

Prerequisites: SOC 1010, ANTHRO 1011, or introductory course in another social science, or consent of instructor. Explores the effects of modern information technology on societies worldwide. Covers the ways in which new technologies of communication have created increasingly networked local and global societies, as well as to the ways in which they have created new social problems.

**SOC 3291 Current Issues in Sociology: 3 semester hours**

Prerequisite: SOC 1010 or ANTHRO 1011; or consent of instructor. Selected topics in sociology, with emphasis on current issues and trends in the field. May be repeated provided topic is different.

**SOC 3344 Problems Of Urban Community: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. Issues of inequality and identity in cities, with emphasis on the consequences of urban growth; processes of class, racial, and ethnic group formation; and urban poverty. Also covers local community organization and politics, and the role of popular culture and religion in community identities.

**SOC 3600 Management and Organizational Behavior: 3 semester hours**

Same as MGMT 3600. Prerequisites: Junior standing and a 2.0 campus GPA. This course involves the study of the behavior of individuals and groups in an organizational setting. Specific topics examined include: motivation, leadership, organizational design, and conflict resolution, as well as basic coverage of management principles. In covering these topics, both classic and current perspectives are provided.

**SOC 4040 Survey Research Practicum for Sociology: 3 semester hours**

Prerequisite: Junior standing, SOC 3230, college-level statistics course, and consent of instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results. May be repeated provided the course topic is different.

**SOC 4100 Introduction to Feminist and Gender Theory: 3 semester hours**

Same as GS 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

**SOC 4150 Feminist Theory and Social Research: 3 semester hours**

Same as GS 4150. Prerequisites: GS 2102 and Junior Standing or consent of instructor. This course provides an in-depth examination of feminist theoretical contributions to social science research. We begin by examining the 20th century roots of contemporary feminist theories. With these foundations in place, we then shift to an investigation of how feminist theory has informed sociological research by examining current feminist understandings of gender, race, class and sexual inequalities across a range of contemporary social problems. Fulfills WGS feminist theory requirement.

**SOC 4160 Geographic Information Systems in Anthropology & Sociology: 4 semester hours**

Same as ANTHRO 4160. Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or SOC 1010 or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

**SOC 4280 Social Informatics: 3 semester hours**

Prerequisites: Junior standing or consent of instructor. This course reviews the key social issues related to information and communication technology (ICT) design, development, and use. It analyzes the way social forces and social practices interact with information and communication technologies (ICTs), focusing specifically on social, cultural, and organizational change. This course is for students interested in the way information and communication technologies (ICTs) relate to patterns of interaction in the human context, including cultural milieu, professional concerns, community dynamics, and social inequities.

**SOC 4300 Communities And Crime: 3 semester hours**

Same as CRIMIN 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

**SOC 4307 Community-Based Research in Sociology: 3 semester hours**

Prerequisites: Junior standing, SOC 3210, SOC 3230, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying sociological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is different.

**SOC 4312 Sociology Of Wealth And Poverty: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. Theory and research on social stratification and inequality in contemporary societies.

**SOC 4320 Forms Of Criminal Behavior: 3 semester hours**

Same as CRIMIN 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

**SOC 4325 Gender, Crime & Justice: 3 semester hours**

Same as CRIMIN 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills Criminology diversity requirement.

**SOC 4331 Qualitative Methods In Social Research: 3 semester hours**

Prerequisites: Junior Standing, SOC 3230, college-level statistics course; or consent of instructor. This course is devoted to qualitative methods including participant observation, ethnographic fieldwork, intensive interview, content analysis, and oral history. Considers the place of these kinds of techniques in social research, as well as the issues raised by them. Involves participation in individual or group research projects using one or more of the methods learned.

**SOC 4336 Sociology of Organizations: 3 semester hours**

Prerequisite: SOC 1010 and junior standing or consent of instructor. This course examines the internal and external forces that influence the structures, adaptive flexibility, and actions of public and private organizations and agencies. Specific foci include: organizational responses to opportunities, constraints, and contingencies in their surrounding environments; sources of conflict and impediments to organizational goal attainment; and strategies for increasing organizational effectiveness, efficiency, and chances for survival.

**SOC 4340 Race, Crime, And Justice: 3 semester hours**

Same as CRIMIN 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CCJ diversity requirement.

**SOC 4350 Special Study: 1-10 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports, and field work.

**SOC 4354 Sociology Of Business And Work Settings: 3 semester hours**

Prerequisite: SOC 1010, junior standing or consent of instructor. The sociology of work and occupations in America, Europe, and Asia; organization structures and worker participation; worker attitude, behaviors, and commitment; the socialization of the worker; determinants of worker behavior; social problems of work and business; and the impact of community on the work place and business behavior.

**SOC 4356 Sociology Of Education: 3 semester hours**

Prerequisite: SOC 1010 and junior standing, or consent of instructor. Education as a social institution, its role as an agent of socialization, and its effect upon the processes of social change and social mobility. The relationship between the school and its community.

**SOC 4360 Sociology Of Minority Groups: 3 semester hours**

Same as GS 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

**SOC 4361 Social Gerontology: 3 semester hours**

Same as GERON 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include: Sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

**SOC 4365 Sociological Writing: 3 semester hours**

Prerequisites: SOC 1010, ENGL 3100 and Junior standing, or consent of instructor. This course offers directed practice in the interpretation and reporting of sociological research in a wide range of styles, including those appropriate for research reports, journal articles, policy papers, non-technical magazines, books and monographs, as well as oral reports to diverse consumers.

**SOC 4378 Selected Topics In Social Psychology: 1-3 semester hours**

Prerequisite: PSYCH 2160 or SOC 2160 or consent of instructor. Focused examination of selected issues, concepts and methods in the study of social interaction. May be taken twice for credit.

**SOC 4380 Advanced Topics in Sociology: 1-3 semester hours**

Prerequisites: SOC 1010 and junior standing or consent of instructor. Examination of a specific sociological topic of current relevance in the community. May be repeated provided the topic is different.

**SOC 4385 Internship In Sociology: 1-6 semester hours**

Prerequisites: Junior standing and consent of instructor. Students participate in supervised placements in positions related to the profession of Sociology.

**SOC 4600 Masculinities: 3 semester hours**

Same as GS 4600. Prerequisites: SOC 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies WGS gender theory requirement.

**Courses****SPANISH 1001 Spanish Language and Culture I: 5 semester hours**

This first Spanish course is designed to encourage the development of communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It encourages development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they develop their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence. Note: Intended for students with no previous Spanish experience. Students with previous Spanish experience are expected to contact the department for placement advising.

**SPANISH 1002 Spanish Language and Culture II: 5 semester hours**

Prerequisite: SPANISH 1001 or equivalent. This second Spanish course is designed to continue the development of communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It encourages development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they strengthen their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence.

**SPANISH 1199 Special Topics: Language Immersion: Spanish: 1-3 semester hours**

Prerequisites: SPANISH 1002 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated, provided the topics vary, for a maximum of 3 credits.

**SPANISH 2101 Spanish Language And Culture III: 3 semester hours**

Prerequisites: SPANISH 1002 or equivalent. This third Spanish course is designed to further develop communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It continues the development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they strengthen their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. Students will complete a final project that demonstrates the knowledge acquired through the basic language sequence. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence. Successful completion fulfills the foreign language requirement for Bachelor of Arts candidates. Students who have successfully completed this course may advance to SPANISH 2172/ SPANISH 2172A or SPANISH 2180/ SPANISH 2180A.

Prerequisites: SPANISH 3280 or SPANISH 3281 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary, for a maximum of 3 credits.

**SPANISH 4300 Advanced Grammar: 3 semester hours****SPANISH 4311 Special Topics In Hispanic Culture: 3 semester hours**

Prerequisites: SPANISH 3280, or SPANISH 3281 or junior standing. Selected topics in Hispanic culture taught in Spanish. This course may be repeated for credit provided the topic is different each time.

**SPANISH 4312 Special Topics in Hispanic Literature: 3 semester hours**

Prerequisites: Junior standing or SPANISH 3280 or SPANISH 3281. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

**SPANISH 4323 Spanish Second Language Acquisition: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent, or by instructor approval. This course provides an introduction to the theoretical and methodological foundations of second language acquisition of Spanish. Key topics in the field such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad are addressed. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and discourse features of Spanish as a second language. Small-scale analyses of Spanish interlanguage data are also conducted. Course taught in Spanish.

**SPANISH 4324 Spanish Sociolinguistics: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent, or consent of instructor. This course examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in context, bilingualism, and language change. Students are introduced to phonological, morphosyntactic, and discursive features subject to sociolinguistic variation across the Spanish-speaking world. The social context and implications of Spanish in the United States are also addressed. Course taught in Spanish.

**SPANISH 4325 Poetry And Drama Of The Golden Age: 3 semester hours**

Prerequisite: SPANISH 3280. Selected readings from the drama of Lope de Vega, Tirso de Molina, Ruiz de Alarcon, Calderon de la Barca and from the poetry of Garcilaso, Fray Luis de Leon, San de la Cruz, Gongora, Lope de Vega, and Quevedo.

**SPANISH 4328 Spanish Phonetics and Phonology: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students will learn to represent Spanish speech sounds and patterns through transcription. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

**SPANISH 4330 Cervantes: 3 semester hours**

Prerequisite: SPANISH 3280. A study of Don Quixote in relation with the author's life and with the cultural background of the Spanish Golden Age. Independent readings on other works of Cervantes.

**SPANISH 4331 Picaresque And Satirical Prose (1550-1650): 3 semester hours**

Prerequisite: SPANISH 3280. A study of Renaissance and Baroque prose in its social context. All readings and discussions in Spanish.

**SPANISH 4390 Special Readings: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports and conferences.

**SPANISH 4399 Seminar On Hispanic Literature: 3 semester hours**

Required of major students in the senior year. Subject to be announced every year by the instructor in charge of the seminar.

**SPANISH 5172 Introduction to Creative Writing in Spanish: 3 semester hours**

Prerequisites: Graduate Standing or permission of instructor. This course will be presented in two parts. First, students will read literature samples and receive theory for creative writing; and second, they will explore their own creativity by writing poetry, essays and short stories through exercises and examples given by the instructor.

**SPANISH 5199 Intensive Advanced Immersion Experience: 1-3 semester hours**

Prerequisites: In-service teacher of target language or enrollment in post degree completion program. Designed for in-service and pre-service/post baccalaureate foreign language teachers, this course focuses specifically on enhancing oral proficiency in the target language and enriching cultural knowledge for purposes of classroom language instruction. The course may simulate a study abroad immersion experience or may be taught within the context of a study abroad program. This course may be repeated, provided the topics vary, for a maximum of 3 credits.

**SPANISH 5311 Advanced Topics In Spanish Culture: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in Spanish culture; may be repeated for credit with a different topic. Students will be expected to conduct an independent research project. Language of instruction is Spanish.

**SPANISH 5312 Advanced Topics in Hispanic Literature: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

**SPANISH 5323 Spanish Second Language Acquisition: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, provides an introduction to the theoretical and methodological foundations of second language acquisition on Spanish. Key topics in the field are illustrated through examples from Spanish, such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and discourse features of Spanish as a second language. Analyses of Spanish interlanguage data are also conducted.

**SPANISH 5324 Advanced Spanish Sociolinguistics: 3 semester hours**

Prerequisites: Graduate standing or consent of the instructor, and advanced proficiency in Spanish. This advanced course in Spanish linguistics examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in contact, bilingualism, and language change. The social context and implications of Spanish in the United States are also addressed. Students will complete a sociolinguistic research study design and presentation. Course taught in Spanish.

**SPANISH 5328 Spanish Phonetics and Phonology: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students read and critique state-of-the-art experimental research on second language Spanish phonology and conduct analyses of Spanish phonological data. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

**SPANISH 5330 Cervantes: 3 semester hours**

Prerequisites: Graduate standing and advanced proficiency in Spanish, or permission of the instructor. A study of Don Quixote in relation to the author's life and the cultural background of the Spanish Golden Age. Course includes independent readings on other works of Cervantes. All course work will be in Spanish. This course is intended to improve proficiency both orally and in writing in accordance with ACTFL guidelines through discussion, debate, online interactions, presentations, and papers. Students will lead a class discussion about a particular theme that requires them to do in-depth research, and will develop a Unit Plan for teaching the Quixote.

## Courses

**SPANISH 1001 Spanish Language and Culture I: 5 semester hours**

This first Spanish course is designed to encourage the development of communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. Prerequisites: SPANISH 2101 or equivalent. Development of language skills through continued study of the grammatical structures of the Spanish language. To be taken online concurrently with SPANISH 2180.

**SPANISH 2190 Special Readings: 1-3 semester hours**

Prerequisite: SPANISH 2101 and consent of department. Independent study through readings, reports and conferences.

**SPANISH 2199 Special Topics: Language Immersion: Spanish: 1-3 semester hours**

Prerequisite: SPANISH 2101 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary, for a maximum of 3 credits.

**SPANISH 2199A Spanish Grammar for Language Immersion: 1 semester hour**

Prerequisites: SPANISH 2101 or equivalent. Development of language skills through continued study of the grammatical structures of the Spanish language. To be taken online concurrently with SPANISH 2199.

**SPANISH 3199 Special Topics: Language Immersion: Spanish: 1-3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary for a maximum of 3 credits.

**SPANISH 3210 Hispanic Culture And Civilization: Spain: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. The Development of Spanish Peninsula Civilization from its Romantic Beginnings to the Present.

**SPANISH 3210A Spanish Grammar for Hispanic Culture and Civilization; Spain: 1 semester hour**

Prerequisites: SPANISH 2171, SPANISH 2172, or SPANISH 2180 (2 of the 3 courses) or equivalent. Development of language skills through continued study of the grammatical structures of the Spanish language. To be taken online concurrently with SPANISH 3210.

**SPANISH 3211 Hispanic Culture And Civilization: Spanish America: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. The development of the cultures and civilization of the Spanish speaking nations of the western hemisphere.

**SPANISH 3211A Spanish Grammar for Hispanic Culture and Civilization: Spanish America: 1 semester hour**

Prerequisites: SPANISH 2171, SPANISH 2172, or SPANISH 2180 (2 of the 3 courses) or equivalent. Development of language skills through continued study of the grammatical structures of the Spanish language. To be taken online concurrently with SPANISH 3211.

**SPANISH 3215 Practicum In Spanish: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. This course introduces students to the Hispanic/Latino cultures in the US through community service and academic work. Students will perform a minimum of 20 hours per semester of supervised fieldwork in local organizations that serve area Hispanics. Students will study several issues related to the community they serve, will reflect on their field experience, and will connect their field experience with class readings and discussions. Required weekly seminar accompanies the field experience. Designed for majors of various disciplines. Placement at the agencies is relevant to the enrolled student's.

**SPANISH 3220 Introduction to Spanish Translation and Interpreting: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. This course introduces students to the theory and practice of translation and interpreting in professional settings. It combines translation/interpretation theory with hands-on practice using a variety of activities from specialized areas, including medical and legal professions. This course has a community-based component.

**SPANISH 3260 Spanish For Business: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Cultivation of advanced language skills with emphasis on business vocabulary, basic business and cultural concepts and situational practice to help prepare for interaction in the Spanish speaking business world. Designed for international business students, economics students, or anyone interested in expanding their awareness of the Spanish language or wishing to explore the possibilities of positions with companies that need to conduct business in Spanish.

**SPANISH 3271 Advanced Spanish Conversation: 3 semester hours**

Prerequisite: SPANISH 2171 or consent of department. Emphasis will be placed upon the further development of oral skills in Spanish.

**SPANISH 3280 Introduction To Hispanic Literature: Spain: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. A survey course that introduces students to a rich variety of Peninsular texts ranging from the early Hispano-Arabic texts, through the Middle Ages, the Golden Age, and finally, modern Peninsular literature. The focus is on texts and excerpts that will familiarize students with the major movements and styles of Peninsular literature. The socio-political contexts in which the works were written will be studied.

**SPANISH 3281 Introduction To Hispanic Literature: Spanish America: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. A survey course that introduces students to selected texts of Spanish American writers from the colonial period to the present. The focus is on texts and excerpts that will familiarize students with the major movements and styles of Spanish-American literature. The socio-political contexts in which the works were written will also be studied.

**SPANISH 3290 Special Readings: Spanish: 1-3 semester hours**

Prerequisite: Consent of department. Independent study through readings, reports and conferences.

**SPANISH 3311 Introduction to Special Topics in Hispanic Culture: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Selected topics in Hispanic culture taught in Spanish. This course may be repeated twice for credit provided that the topic is different each time.

**SPANISH 3326 Introduction to Hispanic Linguistics: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or the equivalent. Students will develop an understanding of the basic aspects and tools of analysis in the primary areas of linguistics as applied to the Spanish language, including phonetics and phonology, morphology, syntax, semantics, pragmatics, and sociolinguistics.

**SPANISH 3327 Introduction to Hispanic Dialectology: 3 semester hours**

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Students will develop awareness of the different dialects and colloquialisms found in the Spanish-speaking world.

**SPANISH 4172 Introduction To Creative Writing In Spanish: 3 semester hours**

Prerequisites: SPANISH 3280 or SPANISH 3281 (junior status) or consent of instructor. This course will be presented in two parts. First, students will read literature samples and discuss theory for creative writing; and second, they will explore their own creativity by writing poetry, essays and short stories through exercises and examples given by the instructor.

**SPANISH 4199 Special Topics: Language Immersion: 1-3 semester hours**

Prerequisites: SPANISH 3280 or SPANISH 3281 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary, for a maximum of 3 credits.

**SPANISH 4300 Advanced Grammar: 3 semester hours****SPANISH 4311 Special Topics In Hispanic Culture: 3 semester hours**

Prerequisites: SPANISH 3280, or SPANISH 3281 or junior standing. Selected topics in Hispanic culture taught in Spanish. This course may be repeated for credit provided the topic is different each time.

**SPANISH 4312 Special Topics in Hispanic Literature: 3 semester hours**

Prerequisites: Junior standing or SPANISH 3280 or SPANISH 3281. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

**SPANISH 4323 Spanish Second Language Acquisition: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent, or by instructor approval. This course provides an introduction to the theoretical and methodological foundations of second language acquisition of Spanish. Key topics in the field such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad are addressed. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and discourse features of Spanish as a second language. Small-scale analyses of Spanish interlanguage data are also conducted. Course taught in Spanish.

**SPANISH 4324 Spanish Sociolinguistics: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent, or consent of instructor. This course examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in context, bilingualism, and language change. Students are introduced to phonological, morphosyntactic, and discursive features subject to sociolinguistic variation across the Spanish-speaking world. The social context and implications of Spanish in the United States are also addressed. Course taught in Spanish.

**SPANISH 4325 Poetry And Drama Of The Golden Age: 3 semester hours**

Prerequisite: SPANISH 3280. Selected readings from the drama of Lope de Vega, Tirso de Molina, Ruiz de Alarcon, Calderon de la Barca and from the poetry of Garcilaso, Fray Luis de Leon, San de la Cruz, Gongora, Lope de Vega, and Quevedo.

**SPANISH 4328 Spanish Phonetics and Phonology: 3 semester hours**

Prerequisites: SPANISH 3326 or equivalent. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students will learn to represent Spanish speech sounds and patterns through transcription. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

**SPANISH 4330 Cervantes: 3 semester hours**

Prerequisite: SPANISH 3280. A study of Don Quixote in relation with the author's life and with the cultural background of the Spanish Golden Age. Independent readings on other works of Cervantes.

**SPANISH 4331 Picaresque And Satirical Prose (1550-1650): 3 semester hours**

Prerequisite: SPANISH 3280. A study of Renaissance and Baroque prose in its social context. All readings and discussions in Spanish.

**SPANISH 4390 Special Readings: 1-3 semester hours**

Prerequisite: Consent of instructor. Independent study through readings, reports and conferences.

**SPANISH 4399 Seminar On Hispanic Literature: 3 semester hours**

Required of major students in the senior year. Subject to be announced every year by the instructor in charge of the seminar.

**SPANISH 5172 Introduction to Creative Writing in Spanish: 3 semester hours**

Prerequisites: Graduate Standing or permission of instructor. This course will be presented in two parts. First, students will read literature samples and receive theory for creative writing; and second, they will explore their own creativity by writing poetry, essays and short stories through exercises and examples given by the instructor.

**SPANISH 5199 Intensive Advanced Immersion Experience: 1-3 semester hours**

Prerequisites: In-service teacher of target language or enrollment in post degree completion program. Designed for in-service and pre-service/post baccalaureate foreign language teachers, this course focuses specifically on enhancing oral proficiency in the target language and enriching cultural knowledge for purposes of classroom language instruction. The course may simulate a study abroad immersion experience or may be taught within the context of a study abroad program. This course may be repeated, provided the topics vary, for a maximum of 3 credits.

**SPANISH 5311 Advanced Topics In Spanish Culture: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in Spanish culture; may be repeated for credit with a different topic. Students will be expected to conduct an independent research project. Language of instruction is Spanish.

**SPANISH 5312 Advanced Topics in Hispanic Literature: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

**SPANISH 5323 Spanish Second Language Acquisition: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, provides an introduction to the theoretical and methodological foundations of second language acquisition on Spanish. Key topics in the field are illustrated through examples from Spanish, such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and disclosure features of Spanish as a second language. Analyses of Spanish interlanguage data are also conducted.

**SPANISH 5324 Advanced Spanish Sociolinguistics: 3 semester hours**

Prerequisites: Graduate standing or consent of the instructor, and advanced proficiency in Spanish. This advanced course in Spanish linguistics examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in contact, bilingualism, and language change. The social context and implications of Spanish in the United States are also addressed. Students will complete a sociolinguistic research study design and presentation. Course taught in Spanish.

**SPANISH 5328 Spanish Phonetics and Phonology: 3 semester hours**

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students read and critique state-of-the-art experimental research on second language Spanish phonology and conduct analyses of Spanish phonological data. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

**SPANISH 5330 Cervantes: 3 semester hours**

Prerequisites: Graduate standing and advanced proficiency in Spanish, or permission of the instructor. A study of Don Quixote in relation to the author's life and the cultural background of the Spanish Golden Age. Course includes independent readings on other works of Cervantes. All course work will be in Spanish. This course is intended to improve proficiency both orally and in writing in accordance with ACTFL guidelines through discussion, debate, online interactions, presentations, and papers. Students will lead a class discussion about a particular theme that requires them to do in-depth research, and will develop a Unit Plan for teaching the Quixote.

## Special Education

### Courses

**SPEC ED 3318 Inclusive Classrooms: 3 semester hours**

Prerequisites: Completion of Level I courses. This class is an introductory overview of inclusive education, the characteristics of special populations in diverse classrooms, and issues related to compliance with state and federal law in serving students with varying needs. In addition, Individualized Education Plans (IEPs) and the eligibility process will be emphasized. Applicable strategies for the successful inclusion of all students that enhance collaboration among relevant stakeholders will be provided.

**SPEC ED 3345 Cross Categorical Special Education I: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Ed Program. Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 3346 Literacy Assessment and Reading for Students with Special Needs: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Must be taken during the same semester as SPEC ED 4989. Examination of current research and issues specific to educating students with disabilities in the area of reading. Topics include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction.

**SPEC ED 3349 Cross-Categorical Special Education: 3-6 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Study of research-based instructional, behavior, and IEP writing strategies used to assist students with cross-categorical disabilities. Students take this during the same semester as their Practicum I course.

**SPEC ED 4315 Speech And Language Of Exceptional Children: 3 semester hours**

Prerequisites: SPEC ED 3318 and Admission to the Teacher Education Program. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning. Not available for graduate credit.

**SPEC ED 4323 Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings: 3 semester hours**

Prerequisites: Completion of Level I and Level II courses. This course establishes healthy and culturally appropriate teacher-student relationships that build successful classroom community and enhance student learning. Teacher candidates develop a culturally appropriate classroom management plan that includes rules, procedures, and expected behaviors and uses problem-solving strategies to resolve behavior problems. In addition, teacher candidates will develop skills to assess, design and implement extensive, individualized, positive behavioral supports. Emphasis is on the candidates developing the social competence of PreK-12 students within diverse inclusive classrooms and engaging families in supportive interactions. Not available for Graduate Credit.

**SPEC ED 4325 Behavior Management: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program, completion of all Level II Education courses. Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 4342 Transition Issues And Planning: 3 semester hours**

Prerequisites: TCH ED 3313 and Admission to the Teacher Education Program. This course provides information to teachers and human service professionals who work closely with adolescents and young adults with disabilities. Emphasis is placed on understanding and planning for the transition from school to adult life for students with disabilities. Transition outcomes include employment, residential options, and other developmental concerns. Topics include self-determination, career education and planning, interagency collaboration, vocational and residential issues and resources, and family support and involvement.

**SPEC ED 4989 Special Education Professional Internship: 3 semester hours**

Prerequisites: Level I & Level II requirements and ELE ED 4989. This course is an intensive professional development experience (9 hours per week for 14 weeks) working in a school setting with students with disabilities. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding student teaching. This course is to be taken in conjunction with SPEC ED 3349. Assignments from this course are carried out in the Internship, and Internship experiences inform the activities and discussions in this course. Not available for graduate credit.

**SPEC ED 4990 Special Education Student Teaching I: 6 semester hours**

Prerequisites: Completion of Level I, II & III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experience in elementary level special education program under university and school supervision. Required of all special education majors; must be taken during the same semester as SPEC ED 4991. Not available for graduate credit.

**SPEC ED 4991 Special Education Student Teaching II: 12 semester hours**

Prerequisites: Completion of all Level I, II and III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experiences in secondary school classrooms under university and school supervision. Must be taken during the same semester as SPEC ED 4990. Required for all majors in special education. Not available for graduate credit.

**SPEC ED 5305 Planning And Managing The Teaching And Learning Environment: 3 semester hours**

Prerequisites: SPEC ED 4303 or consent of instructor This course provides an in-depth exploration of various behavior management techniques that are particularly applicable for students in cross-categorical placements. Projects on functional behavioral assessment and behavior support plans will be conducted.

**SPEC ED 6315 Understanding/Implementing Speech & Language Interventions that Assist Children with Special Needs: 3 semester hours**

Prerequisites: Graduate Standing. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning.

**SPEC ED 6325 Advanced Studies in Classroom & Behavior Management: 3 semester hours**

Prerequisite: Graduate Standing. Advanced study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

**SPEC ED 6345 Characteristics and Education of Students with High-Incidence Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of the exceptional child. Advanced study of characteristics of students with high-incidence and cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

**SPEC ED 6346 Reading Instruction and Intervention in Special Education: 3 semester hours**

Prerequisites: Graduate Standing. This course examines current research and issues specific to educating students with disabilities in the area of reading. Topics will include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction. (No credit earned if credit previously earned from SPEC ED 3346).

**SPEC ED 6372 Screening And Diagnosis Of Developmental Delays: Birth To 5 Years: 3 semester hours**

Prerequisite: ED REM 3721. This course addresses the content, techniques, and special problems related to the assessment of children at risk for developmental delays in the birth to five year age range. Students gain experience in construction, administration and interpretation of assessment tools used with young children. Required for certification in severe handicaps and early childhood-special education.

**SPEC ED 6412 Psychology Of Exceptional Children: 3 semester hours**

An in-depth analysis of the unique psychological problems of exceptional children and youth. Current psychological theories and research emphasized.

**SPEC ED 6415 The Law And Special Education: 3 semester hours**

Prerequisite: Graduate Standing. Special education is governed by an elaborate and extensive body of statutes, regulations, and court decisions. This course will focus on the requirements, history, and evolution of laws impacting special education services; current legal requirements in providing a free appropriate public education (FAPE) to students with disabilities and the procedures to obtain legal information in law libraries and on the Internet; and how to conduct legal research using a variety of sources.

**SPEC ED 6430 Characteristics and Education of Individuals with Low-Incidence Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or equivalent course in psychology of the exceptional child; graduate standing. An advanced study of the theoretical and methodological problems related to autism and developmental (low-incidence) disabilities. Particular emphasis on the application of current research findings to issues confronting individuals with autism and developmental disabilities, and family-and community-systems dynamics. Required course for concentration area: Autism and Development Disabilities.

**SPEC ED 6437 Applied Behavior Analysis: Functional Assessment and Interventions: 3 semester hours**

Prerequisites: Graduate Standing. Study of the evidence-based, best practice principles and interventions of applied behavior analysis strategies. Exploration of approaches that prove effective when designing and implementing functional behavior assessments, positive behavior support techniques, and behavior intervention plans.

**SPEC ED 6440 Disability, Schooling And Culture: 3 semester hours**

Prerequisites: TCH ED 3313 or equivalent. An advanced course that will examine foundational issues in social and educational policy for students with disabilities. The course explores the historical, philosophical, sociological and economic dimensions of the recent emphasis on inclusive and community-based support systems for individuals with disabilities and their families. The course will review recent research and experience in the U.S. (primarily) concerning the evolving roles and relationships of families, teachers, administrators, and students with and without disabilities in disabilities in increasingly diverse schools and communities.

**SPEC ED 6443 Characteristics and Education of Students with Learning Disabilities: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the theoretical and methodological problems related to learning disabilities. Particular emphasis on the application of current research findings to the problems confronting learners with learning disabilities.

**SPEC ED 6450 Characteristics and Education of Students with Emotional/Behavioral Disorders: 3 semester hours**

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the problems and characteristics of learners with emotional/behavioral disorders. Particular emphasis on the application of current research findings to problems confronting learners with emotional/behavioral disorders.

**SPEC ED 6462 Introduction To Early Childhood Special Education: 3 semester hours**

Prerequisites: SPEC ED 3313 or equivalent. Study of issues and concepts central to special education of young children with disabilities, and at-risk for disabilities, and their families. Focus on program models, screening and assessment procedures, and curriculum concepts. An ecological perspective is emphasized.

***SPEC ED 6463 Curriculum, Methods, And Materials For Early Childhood Special Ed: 3 semester hours***

Prerequisites: SPEC ED 6462. In-depth study of integrated assessment-based curriculum development for learners in early childhood special education. Emphasis on individualized educational planning and implementation for learners and their families.

***SPEC ED 6492 Practicum In Special Education: 3-6 semester hours***

Prerequisites: Two courses in the area of concentration (developmental disabilities, early childhood special education, emotional/behavioral disorders, or learning disabilities). Supervised experience in the education of learners with disabilities in a school or other appropriate setting.

***SPEC ED 6497 Problems: 1-10 semester hours***

Prerequisites: TCH ED 3313 or equivalent and consent of instructor. Investigation of a selected problem related to the education of learners with disabilities. To be conducted under the direction of a graduate faculty member.

***SPEC ED 6510 History Of Disability And Special Education: 3 semester hours***

Prerequisite: Consent of Instructor. Provides a historical context for approaching contemporary issues in the education and support of people with disabilities and their families. Requires students to become familiar with methods of retrieval and analysis of historical material.

***SPEC ED 6610 Foundations of Autism Spectrum Disorder: Research to Practice: 3 semester hours***

Prerequisites: Teaching Certificate and SPEC ED 6437 with a grade of B or higher, or Consent of Instructor. The course focuses on characteristics of children and youth with autism spectrum disorders (ASD); trends and issues connected with ASD; and effective practices and strategies for structuring, managing, and promoting functional/behavioral skills development and interaction among children and youth with ASD.

***SPEC ED 6620 Assessment and Interventions for Children and Youth with Autism Spectrum Disorder: 3 semester hours***

Prerequisites: SPEC ED 6610 with a grade of B or higher and Teaching Certificate, or Consent of Instructor. The course reviews functions of behavior as a foundation for understanding and completing functional behavior assessments; entails interpreting and graphing collected data; and incorporates intervention practice and applied curriculum modifications.

***SPEC ED 6630 Principles of Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6620 with a grade of B or higher or Consent of Instructor. Provides a detailed look at the theories, philosophy, and principles of applied behavior analysis. Focus is on applying these principles to assess behavior and develop and implement best practice interventions for reducing problem behaviors and teaching new behaviors to individuals with autism and other developmental disabilities in a variety of settings. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

***SPEC ED 6650 Practicum I in Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6630 with a grade of B or higher or Consent of Instructor. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of National Board Certified Behavior Analyst licensure exam preparation.

***SPEC ED 6660 Advanced Applications of Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6630 and SPEC ED 6650, each with a grade of B or higher or Consent of Instructor. Provides a detailed look at methods of data collection, teaching new skills, and evaluating teaching strategies. Focus is on applying these methods to develop and implement best practice strategies that teach new behaviors to individuals with autism and other developmental disabilities, and evaluating the efficacy of these methods. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

***SPEC ED 6670 Practicum II in Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6630, SPEC ED 6650, and SPEC ED 6660. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

***SPEC ED 6675 Ethics and Professionalism in Applied Behavior Analysis: 3 semester hours***

Prerequisites: SPEC ED 6670 with minimum grade of B. The course prepares students in the BCBA Program for the ethical and professional practice of Applied Behavior Analysis. Students will learn about the foundations of professional and ethical behavior that ensures high quality of practice in behavior analysis. The course will prepare students for the national Behavior Analyst Certification Board Exam. Students will primarily receive instruction in Ethical Considerations (Content Area #1), but also Behavioral Assessment, Experimental Evaluation of Interventions, and Selecting Intervention Outcomes and Strategies (Content Areas #4, 5, and 8) of the Behavior Analysis Task List – Third Edition.

***SPEC ED 6685 Analysis of Verbal Behavior: 3 semester hours***

Prerequisites: SPEC ED 6670 with minimum grade of B. Provides a detailed look at B.F. Skinner's analysis of verbal behavior and the behavior analytic and functional approach to teaching language. Focuses on the behavior analytic view of speaking, thinking, writing, feeling, reading, and other verbal behavior. In addition, provides information on how to assess and teach verbal behavior to individuals with developmental disabilities.

## Courses

***SPEC ED 3318 Inclusive Classrooms: 3 semester hours***

Prerequisites: Completion of Level I courses. This class is an introductory overview of inclusive education, the characteristics of special populations in diverse classrooms, and issues related to compliance with state and federal law in serving students with varying needs. In addition, Individualized Education Plans (IEPs) and the eligibility process will be emphasized. Applicable strategies for the successful inclusion of all students that enhance collaboration among relevant stakeholders will be provided.

***SPEC ED 3345 Cross Categorical Special Education I: 3 semester hours***

Prerequisites: TCH ED 3313 and Admission to the Teacher Ed Program. Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

***SPEC ED 3346 Literacy Assessment and Reading for Students with Special Needs: 3 semester hours***

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Must be taken during the same semester as SPEC ED 4989. Examination of current research and issues specific to educating students with disabilities in the area of reading. Topics include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction.

***SPEC ED 3349 Cross-Categorical Special Education: 3-6 semester hours***

Prerequisites: Admission to the Teacher Education Program, completion of all Level II education courses. Study of research-based instructional, behavior, and IEP writing strategies used to assist students with cross-categorical disabilities. Students take this during the same semester as their Practicum I course.

***SPEC ED 4315 Speech And Language Of Exceptional Children: 3 semester hours***

Prerequisites: SPEC ED 3318 and Admission to the Teacher Education Program. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning. Not available for graduate credit.

***SPEC ED 4323 Classroom Management and Positive Behavioral Supports in Inclusive Educational Settings: 3 semester hours***

Prerequisites: Completion of Level I and Level II courses. This course establishes healthy and culturally appropriate teacher-student relationships that build successful classroom community and enhance student learning. Teacher candidates develop a culturally appropriate classroom management plan that includes rules, procedures, and expected behaviors and uses problem-solving strategies to resolve behavior problems. In addition, teacher candidates will develop skills to assess, design and implement extensive, individualized, positive behavioral supports. Emphasis is on the candidates developing the social competence of PreK-12 students within diverse inclusive classrooms and engaging families in supportive interactions. Not available for Graduate Credit.

***SPEC ED 4325 Behavior Management: 3 semester hours***

Prerequisites: Admission to the Teacher Education Program, completion of all Level II Education courses. Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

***SPEC ED 4342 Transition Issues And Planning: 3 semester hours***

Prerequisites: TCH ED 3313 and Admission to the Teacher Education Program. This course provides information to teachers and human service professionals who work closely with adolescents and young adults with disabilities. Emphasis is placed on understanding and planning for the transition from school to adult life for students with disabilities. Transition outcomes include employment, residential options, and other developmental concerns. Topics include self-determination, career education and planning, interagency collaboration, vocational and residential issues and resources, and family support and involvement.

***SPEC ED 4989 Special Education Professional Internship: 3 semester hours***

Prerequisites: Level I & Level II requirements and ELE ED 4989. This course is an intensive professional development experience (9 hours per week for 14 weeks) working in a school setting with students with disabilities. Activities on site include assisting the classroom teacher in all areas of instruction, assessment, and classroom management. This course is to be taken during the semester immediately preceding student teaching. This course is to be taken in conjunction with SPEC ED 3349. Assignments from this course are carried out in the Internship, and Internship experiences inform the activities and discussions in this course. Not available for graduate credit.

***SPEC ED 4990 Special Education Student Teaching I: 6 semester hours***

Prerequisites: Completion of Level I, II & III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experience in elementary level special education program under university and school supervision. Required of all special education majors; must be taken during the same semester as SPEC ED 4991. Not available for graduate credit.

***SPEC ED 4991 Special Education Student Teaching II: 12 semester hours***

Prerequisites: Completion of all Level I, II and III coursework. Must enroll in both SPEC ED 4990 and SPEC ED 4991. Clinical teaching experiences in secondary school classrooms under university and school supervision. Must be taken during the same semester as SPEC ED 4990. Required for all majors in special education. Not available for graduate credit.

***SPEC ED 5305 Planning And Managing The Teaching And Learning Environment: 3 semester hours***

Prerequisites: SPEC ED 4303 or consent of instructor This course provides an in-depth exploration of various behavior management techniques that are particularly applicable for students in cross-categorical placements. Projects on functional behavioral assessment and behavior support plans will be conducted.

***SPEC ED 6315 Understanding/Implementing Speech & Language Interventions that Assist Children w/ Special Needs: 3 semester hours***

Prerequisites: Graduate Standing. Study of speech and language development for students with exceptional needs and the techniques employed by classroom teachers to support their learning.

***SPEC ED 6325 Advanced Studies in Classroom & Behavior Management: 3 semester hours***

Prerequisite: Graduate Standing. Advanced study of classroom management and applied behavior analysis strategies. Focus on teacher as decision maker in the design, implementation, and evaluation of individual and group management programs with emphasis on functional assessment and positive behavior support.

***SPEC ED 6345 Characteristics and Education of Students with High-Incidence Disabilities: 3 semester hours***

Prerequisites: TCH ED 3313 or an equivalent course in psychology of the exceptional child. Advanced study of characteristics of students with high-incidence and cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

***SPEC ED 6346 Reading Instruction and Intervention in Special Education: 3 semester hours***

Prerequisites: Graduate Standing. This course examines current research and issues specific to educating students with disabilities in the area of reading. Topics will include historical and contemporary perspectives on reading instruction and assessment, and implementation of evidence-based practice to improve phonological awareness, decoding, word recognition, fluency, comprehension, and vocabulary. Written language will also be addressed as it pertains to reading instruction. (No credit earned if credit previously earned from SPEC ED 3346).

***SPEC ED 6372 Screening And Diagnosis Of Developmental Delays: Birth To 5 Years: 3 semester hours***

Prerequisite: ED REM 3721. This course addresses the content, techniques, and special problems related to the assessment of children at risk for developmental delays in the birth to five year age range. Students gain experience in construction, administration and interpretation of assessment tools used with young children. Required for certification in severe handicaps and early childhood-special education.

***SPEC ED 6412 Psychology Of Exceptional Children: 3 semester hours***

An in-depth analysis of the unique psychological problems of exceptional children and youth. Current psychological theories and research emphasized.

***SPEC ED 6415 The Law And Special Education: 3 semester hours***

Prerequisite: Graduate Standing. Special education is governed by an elaborate and extensive body of statutes, regulations, and court decisions. This course will focus on the requirements, history, and evolution of laws impacting special education services; current legal requirements in providing a free appropriate public education (FAPE) to students with disabilities and the procedures to obtain legal information in law libraries and on the Internet; and how to conduct legal research using a variety of sources.

***SPEC ED 6430 Characteristics and Education of Individuals with Low-Incidence Disabilities: 3 semester hours***

Prerequisites: TCH ED 3313 or equivalent course in psychology of the exceptional child; graduate standing. An advanced study of the theoretical and methodological problems related to autism and developmental (low-incidence) disabilities. Particular emphasis on the application of current research findings to issues confronting individuals with autism and developmental disabilities, and family-and community-systems dynamics. Required course for concentration area: Autism and Development Disabilities.

***SPEC ED 6437 Applied Behavior Analysis: Functional Assessment and Interventions: 3 semester hours***

Prerequisites: Graduate Standing. Study of the evidence-based, best practice principles and interventions of applied behavior analysis strategies. Exploration of approaches that prove effective when designing and implementing functional behavior assessments, positive behavior support techniques, and behavior intervention plans.

***SPEC ED 6440 Disability, Schooling And Culture: 3 semester hours***

Prerequisites: TCH ED 3313 or equivalent. An advanced course that will examine foundational issues in social and educational policy for students with disabilities. The course explores the historical, philosophical, sociological and economic dimensions of the recent emphasis on inclusive and community-based support systems for individuals with disabilities and their families. The course will review recent research and experience in the U.S. (primarily) concerning the evolving roles and relationships of families, teachers, administrators, and students with and without disabilities in disabilities in increasingly diverse schools and communities.

***SPEC ED 6443 Characteristics and Education of Students with Learning Disabilities: 3 semester hours***

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the theoretical and methodological problems related to learning disabilities. Particular emphasis on the application of current research findings to the problems confronting learners with learning disabilities.

***SPEC ED 6450 Characteristics and Education of Students with Emotional/Behavioral Disorders: 3 semester hours***

Prerequisites: TCH ED 3313 or an equivalent course in psychology of exceptional children; graduate standing. Advanced study of the problems and characteristics of learners with emotional/behavioral disorders. Particular emphasis on the application of current research findings to problems confronting learners with emotional/behavioral disorders.

***SPEC ED 6462 Introduction To Early Childhood Special Education: 3 semester hours***

Prerequisites: SPEC ED 3313 or equivalent. Study of issues and concepts central to special education of young children with disabilities, and at-risk for disabilities, and their families. Focus on program models, screening and assessment procedures, and curriculum concepts. An ecological perspective is emphasized.

***SPEC ED 6463 Curriculum, Methods, And Materials For Early Childhood Special Ed: 3 semester hours***

Prerequisites: SPEC ED 6462. In-depth study of integrated assessment-based curriculum development for learners in early childhood special education. Emphasis on individualized educational planning and implementation for learners and their families.

***SPEC ED 6492 Practicum In Special Education: 3-6 semester hours***

Prerequisites: Two courses in the area of concentration (developmental disabilities, early childhood special education, emotional/behavioral disorders, or learning disabilities). Supervised experience in the education of learners with disabilities in a school or other appropriate setting.

***SPEC ED 6497 Problems: 1-10 semester hours***

Prerequisites: TCH ED 3313 or equivalent and consent of instructor. Investigation of a selected problem related to the education of learners with disabilities. To be conducted under the direction of a graduate faculty member.

***SPEC ED 6510 History Of Disability And Special Education: 3 semester hours***

Prerequisite: Consent of Instructor. Provides a historical context for approaching contemporary issues in the education and support of people with disabilities and their families. Requires students to become familiar with methods of retrieval and analysis of historical material.

***SPEC ED 6610 Foundations of Autism Spectrum Disorder: Research to Practice: 3 semester hours***

Prerequisites: Teaching Certificate and SPEC ED 6437 with a grade of B or higher, or Consent of Instructor. The course focuses on characteristics of children and youth with autism spectrum disorders (ASD); trends and issues connected with ASD; and effective practices and strategies for structuring, managing, and promoting functional/behavioral skills development and interaction among children and youth with ASD.

**SPEC ED 6620 Assessment and Interventions for Children and Youth with Autism Spectrum Disorder: 3 semester hours**

Prerequisites: SPEC ED 6610 with a grade of B or higher and Teaching Certificate, or Consent of Instructor. The course reviews functions of behavior as a foundation for understanding and completing functional behavior assessments; entails interpreting and graphing collected data; and incorporates intervention practice and applied curriculum modifications.

**SPEC ED 6630 Principles of Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6620 with a grade of B or higher or Consent of Instructor. Provides a detailed look at the theories, philosophy, and principles of applied behavior analysis. Focus is on applying these principles to assess behavior and develop and implement best practice interventions for reducing problem behaviors and teaching new behaviors to individuals with autism and other developmental disabilities in a variety of settings. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6650 Practicum I in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 with a grade of B or higher or Consent of Instructor. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of National Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6660 Advanced Applications of Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630 and SPEC ED 6650, each with a grade of B or higher or Consent of Instructor. Provides a detailed look at methods of data collection, teaching new skills, and evaluating teaching strategies. Focus is on applying these methods to develop and implement best practice strategies that teach new behaviors to individuals with autism and other developmental disabilities, and evaluating the efficacy of these methods. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6670 Practicum II in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6630, SPEC ED 6650, and SPEC ED 6660. Provides the opportunity for students to practically apply the principles and standards of ABA in applied settings. Focus is on students actively demonstrating skills in the areas of behavior assessment, behavior intervention development, and implementation, consultation, ongoing evaluation, and training others in a variety of settings with a variety of clients. Access to field site required. Partially meets requirements of national Board Certified Behavior Analyst licensure exam preparation.

**SPEC ED 6675 Ethics and Professionalism in Applied Behavior Analysis: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. The course prepares students in the BCBA Program for the ethical and professional practice of Applied Behavior Analysis. Students will learn about the foundations of professional and ethical behavior that ensures high quality of practice in behavior analysis. The course will prepare students for the national Behavior Analyst Certification Board Exam. Students will primarily receive instruction in Ethical Considerations (Content Area #1), but also Behavioral Assessment, Experimental Evaluation of Interventions, and Selecting Intervention Outcomes and Strategies (Content Areas #4, 5, and 8) of the Behavior Analysis Task List – Third Edition.

**SPEC ED 6685 Analysis of Verbal Behavior: 3 semester hours**

Prerequisites: SPEC ED 6670 with minimum grade of B. Provides a detailed look at B.F. Skinner's analysis of verbal behavior and the behavior analytic and functional approach to teaching language. Focuses on the behavior analytic view of speaking, thinking, writing, feeling, reading, and other verbal behavior. In addition, provides information on how to assess and teach verbal behavior to individuals with developmental disabilities.

## Studio Art

### Courses

**ST ART 1020 Expanded Artforms: 3 semester hours**

A practical and theoretical exploration of contemporary art practices organized around structured assignments that will explore various modes of working in art. This course is designed to assist studio students in developing a personal, non-medium specific approach to art making and problem solving. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1025 Art of 3D Animation I: 3 semester hours**

This course will explore the principles of animation and the mechanics of spatial graphics software such as *Maya*, as well as the storytelling and visual techniques central to creating a successful animated presentation. Students will produce an animated video presentation. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1026 Art of 3D Animation II: 3 semester hours**

Prerequisites: ST ART 1025. In this production course, students will work on advanced techniques of animation and the mechanics of spatial graphics software such as *Maya*, and will study the storytelling and visual techniques central to creating a successful animated presentation. Each student will produce an animated video presentation during the class. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1030 Ceramics I: 3 semester hours**

An introduction to basic methods and theory of ceramics including work with hand-built construction, wheel techniques and glazing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1060 Photography I: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1061 Introduction to Digital Photography: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies. Students who plan to pursue a career in art should enroll in ST ART 1060 rather than ST ART 1061. ST ART 1061 does not satisfy the prerequisite requirement for other courses in Photography beyond the 2000 level, but may count towards Photography electives.

**ST ART 1080 Comics & Cartoon Illustration: 3 semester hours**

A course in creating and appreciating the world of comics and cartoons. This course will investigate the tools and techniques for creating cartoons, cartoon illustrations and the world of comics. Students will create their own cartoons with traditional media and also with computers. While designed for beginners, experienced artists will be encouraged to perfect their personal styles. The class will create and print its own comic book. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1130 Ceramics II: 3 semester hours**

Prerequisite: ST ART 1030. A continuation of ST ART 1030. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1132 Sculpture I: 3 semester hours**

An introduction to traditional and contemporary materials, aesthetics, and theories of three-dimensional art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1133 Introduction To Fibers And Textiles: 3 semester hours**

Prerequisites: ST ART 1150. Exploration of a variety of on- and off-loom weaving and other fiber and textile media and techniques. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1140 Drawing I: 3 semester hours**

An introduction to drawing through the study of figure, object, and environment. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1141 Drawing II: 3 semester hours**

Prerequisite: ST ART 1140. The development of drawing skills through continued observation and problems of invention. A further exploration of varied drawing materials and techniques including graphite, charcoal, conte crayon, and inks. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1142 Figure Drawing I: 3 semester hours**

Basic studies of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1143 Figure Drawing II: 3 semester hours**

Prerequisite: ST ART 1142. Continuation of Figure Drawing I. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1150 Design I: 3 semester hours**

Studio problems in the creative use and integration of the elements of two-dimensional design: line, form, space, texture. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1151 Design II: 3 semester hours**

Prerequisite: ST ART 1150. A continuation of ST ART 1150, two-dimensional design, with introduction to color theory. Some application of mixed media problems. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1170 Printmaking I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking techniques, materials, and theories. The course will include work in a variety of print materials. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1173 Printmaking: Screenprinting I: 3 semester hours**

Prerequisite: ST ART 1170. An introduction into the techniques, methods, and aesthetics of screenprinting. Studio problems involving uses and approaches will be emphasized. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1180 Painting I: 3 semester hours**

Prerequisite: ST ART 1140, ST ART 1150 or consent of instructor. An introduction to the use of oil and/or acrylic painting media. Studio problems to develop technical and expressive skills on various surfaces. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1181 Painting II: 3 semester hours**

Prerequisite: ST ART 1180 or consent of instructor. Continuation of basic studio problems in painting media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1210 Graphic Design I: 3 semester hours**

Prerequisite: None. Introduction to graphic design with an emphasis on fundamentals of space, emotion, shape, form, and concept. Projects in design, layout and typography will be addressed. The course is recommended to be taken concurrently with ST ART 1150, Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1220 Graphic Design II: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1210. Continuing introduction to graphic design, focusing on developing concepts and design process, typographic systems and layout systems. The course is recommended to be taken concurrently with ST ART 2220, Computer Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2100 Advertising Art Fundamentals: 3 semester hours**

Prerequisites: MEDIA ST 2090 or consent of the Coordinator for the Certificate in Advertising. This course introduces students to basic principles of production, including layout, type, color, readability, and image selection. The course is intended for students pursuing a Certificate in Advertising, and does not count towards a degree in Graphic Design.

**ST ART 2160 Photography II: 3 semester hours**

Prerequisite: ST ART 1060. An introduction to the techniques and aesthetics of black and white photography and the darkroom. Students must provide a film camera with adjustable speeds and aperture. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2201 Fundamentals of User Experience Design: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent, or consent of instructor. Through lecture and presentation, students will explore fundamental concepts of User Experience (UX) Design and specific tools and methods used throughout the process. Coursework will involve research and writing, allowing students to implement these methods. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2202 Fundamentals of Researching User Experience: 3 semester hours**

Prerequisite: ST ART 2201. In this course, students will discover in greater detail the methods for researching user experiences within interactive systems. This will include basic tools like interviews, surveys and usability studies. The course will demonstrate how to translate user research into personas, use-case scenarios, and functional requirements for software and other uses such as implementation in marketing and product design. Course work will include readings, research papers and user research. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2210 Typography: 3 semester hours**

Prerequisites: ST ART 1220 or consent of the instructor. Course intends to instill a sense of responsibility relative to typographic and production design, while developing the student's capacity for critical thinking and general typographic rules, visual hierarchy of typographic elements, classical typographic tradition, book design, awareness of typographic aesthetic.

**ST ART 2212 Image Making for Graphic Design: 3 semester hours**

Prerequisites: ST ART 1220 or instructor's consent. This course teaches skills of making images and custom type for use in visual communication. Topics covered include a survey of traditional and experimental illustration techniques with an emphasis on creation of original imagery. The class will discuss how hand images are further developed and combined on the computer for use in design. Creativity, discovery, and craft are highly emphasized. Lab fee required.

**ST ART 2220 Computer Design I: 3 semester hours**

Prerequisite: ST ART 1150 and ST ART 1210. An introduction to the use of computer graphics for the creation of artwork applicable to the graphic design industry. The course is recommended to be taken concurrently with ST ART 1220, Graphic Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2221 Computer Design II: 3 semester hours**

Prerequisite: ST ART 2220. Designed to familiarize students with the methods processes, software, and computer functions used in graphic design and illustration. The course is recommended to be taken concurrently with ST ART 3310, Graphic Design III. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2240 Drawing III: 3 semester hours**

Prerequisites: ST ART 1140 and ST ART 1141. This course offers studio problems designed to further the development of drawing skills in various media. Limited color will also be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2241 Drawing IV: 3 semester hours**

Prerequisite: ST ART 2240. Studio problems with emphasis on color and multi-material approach to drawing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2242 Figure Drawing III: 3 semester hours**

Prerequisites: ST ART 1142 and ST ART 1143. Advanced study of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2243 Figure Drawing IV: 3 semester hours**

Prerequisite: ST ART 2242. Continuation of ST ART 2242. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2250 Composition: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. An investigation of the use of formal design elements as used in historic and contemporary art. Weekly studio problems and discussions will concentrate on skills, application, and unifying effects of compositional elements on a variety of visual art forms. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2251 Design III: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. Advanced studio problems in design materials. Use of two-dimensional and three-dimensional mixed media. Experimental use of materials and media will be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2262 Color Photography I: 3 semester hours**

Prerequisite: ST ART 1060 or equivalent. An introduction to the techniques and aesthetics of color photography. Mastering the printing and finishing processes and producing a color print portfolio will be the requirements of this class. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2263 Digital Color Process: 3 semester hours**

Prerequisites: ST ART 1060. An extended study in the process of digital printing. The class will help students refine their techniques using digital color management and explore various techniques to assure the closest relationship between the image on the monitor and the resulting print. Hands-on training with different digital printers, digital media and scanning techniques will be offered. This class will involve both learning exercises and the creation of original computer-aided photographic art. Lab fee required. Students must provide a digital camera. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2264 Non-Silver Photography: 3 semester hours**

Prerequisites: ST ART 1060 and ST ART 2160. An introduction to the aesthetics and techniques of nontraditional photographic processes. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2265 Commercial Applications In Photography: Portrait Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of portrait photography. Techniques of lighting, posing, and studios equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2266 Commercial Applications in Photography: Product Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of product Photography. Techniques of lighting, posing and studio equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2267 The Constructed Photograph: 3 semester hours**

Prerequisites: ST ART 2263. An exploration of the constructed photograph through the art of digital collage. The class will survey the history of hand-created photographs. In addition, students will learn advanced Photoshop techniques in order to create original computer-aided photographic art. Lab fee required. Basic computer equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2268 Commercial Applications in Photography: Event Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of event photography. The class will focus on a variety of event photography types, including weddings, corporate and non-profit events, photobooths, concerts, etc. Special emphasis will be placed on photographing for the client. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2269 Commercial Appl in Photo: Photojournalism, Documentary, & Publ Relations Photography: 3 semester hours**

Prerequisite: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of photojournalism, documentary, and public relations photography. The class will concentrate on a variety of photographic applications focusing on news and editorial imagemaking, as well as training the student in public relations assignments. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2271 Printmaking II: 3 semester hours**

Prerequisite: ST ART 1170 or consent of instructor. A continuation of ST ART 1170. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2272 Printmaking:Lithography I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory in stone and plate lithography. Studio problems in the use of materials and equipment. Attention will be given to individual development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2273 Printmaking: Etching: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory of contemporary etching practices. Development of skills and aesthetic judgements in the media using non-toxic etching processes. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2274 Printmaking And Relief: 3 semester hours**

Prerequisites: ST ART 1170 and ST ART 2271. Advanced problems in relief printmaking. Work in wood and mixed materials. Development of skills and aesthetic judgments in the media. May be repeated for credit with consent of instructor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2280 Painting III: 3 semester hours**

Prerequisite: ST ART 1181 or consent of instructor. Advanced studio problems in painting media. Attention paid to individual development of theory, expression, and technique. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2281 Painting IV: 3 semester hours**

Prerequisite: ST ART 2280. A continuation of ST ART 2280. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2283 Watercolor Painting: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141. Beginning problems in watercolor painting. Includes the study of traditional and contemporary approaches to color, color techniques, and treatment of papers. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2290 Special Study: 1-10 semester hours**

Prerequisites: Junior/Senior standing and consent of department and instructor. Independent study through readings, reports or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3074 Special Topics In Studio Art: 3 semester hours**

Prerequisites: Minimum completion of 18 hours in Studio Art. Selected topics in studio studies. May be repeated for credit with a change of topic. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3260 Photography III: 3 semester hours**

Prerequisite: ST ART 2160. An exploration into contemporary theories and trends in photography. Advanced projects, portfolios and techniques will be expected from those enrolled. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3263 Digital Color Portfolio: 3 semester hours**

Prerequisites: ST ART 2263. Intermediate exploration of the aesthetics and techniques of digital photography including an investigation of color management in printing. Students will produce one or more portfolios of digital images. Lab fee required. Basic lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3310 Graphic Design III: 3 semester hours**

Prerequisite: ST ART 1220 and ST ART 2220. Advanced studio problems to further the understanding of design and its relationship to typographic elements, illustration, and communication. The course will encourage both conceptual and technical development of the designer. The course is recommended to be taken concurrently with ST ART 2221, Computer Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3311 Graphic Design IV: 3 semester hours**

Prerequisite: ST ART 3310 and ST ART 2221. Further studio problems in the graphic arts. The course is recommended to be taken concurrently with ST ART 2210, Typography. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3312 Advanced Topics in Graphic Design: 3 semester hours**

Prerequisites: ST ART 3311 or permission of instructor. Studies of selected topics, which will vary. May be repeated for credit with a different topic, for a maximum of 9 credit hours. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3340 Advanced Problems In Drawing I: 3 semester hours**

Prerequisite: ST ART 2241. This course is focused on professional-level art and portfolio production. It offers studio problems designed to further the development of drawing skills. Emphasis will be given to the study of drawing as an independent art form. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3341 Advanced Problems In Drawing II: 3 semester hours**

Prerequisite: ST ART 3340. A continuation of ST ART 3340. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3350 Studio Art Internship: 1-6 semester hours**

Prerequisites: Junior/Senior standing in studio art and consent of the faculty advisor. The internship provides experience in design firms, professional art studios, or comparable settings. Students will assist professionals in the diverse duties associated with studio art activities. Course assignments may include research assignments and/or reports to be reviewed by the faculty advisor and/or supervisor. May be repeated for credit, up to a maximum of 6 credit hours.

**ST ART 3363 Special Topics In Photography: 3 semester hours**

Prerequisites: ST ART 2160. Photography II & permission of advisor. Selected topics in photographic practice. May be repeated for credit with permission of advisor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3370 Advanced Problems In Printmaking I: 3 semester hours**

Prerequisite: ST ART 2274. This course is focused upon professional-level art and portfolio production. After completion of this and the preceding course, students should be ready to meet the artistic and intellectual demands of today's visual art world. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3371 Advanced Problems In Printmaking II: 3 semester hours**

Prerequisite: ST ART 3370. A continuation of ST ART 3370. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3372 Advanced Lithography: 3 semester hours**

Prerequisite: ST ART 1173. Continuing problems in lithography with problems in black and white, photolithography, and/or color. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3380 Advanced Problems In Painting I: 3 semester hours**

Prerequisite: ST ART 2281. This course is focused on professional-level art and portfolio production. Non-traditional materials might be explored. Attention is focused on individual development of painting theory, self-expression, and advanced techniques. The student is expected to assume a substantial responsibility with regard to direction, motivation, and content. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3381 Advanced Problems In Painting II: 3 semester hours**

Prerequisite: ST ART 3380. A continuation of portfolio production in ST ART 3380. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3383 Advanced Problems In Graphic Design I: 3 semester hours**

Prerequisite: ST ART 3311 and ST ART 2210. This course is focused on professional-level art and portfolio production. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3384 Advanced Problems In Graphic Design II: 3 semester hours**

Prerequisite: ST ART 3383. A continuation of ST ART 3383. The course includes the preparation of a faculty-reviewed portfolio. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3390 Special Study: 1-10 semester hours**

Prerequisite: Junior/senior standing and consent of department chairperson and instructor. Independent study through readings, reports, or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3391 Advanced Problems In Photography I: 3 semester hours**

Prerequisites: ST ART 2263 and ST ART 3260. This course is focused on professional-level art and portfolio production. Students may employ black and white, color, nonsilver, or other traditional or non-traditional press for projects in this course. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3392 Advanced Problems In Photography II: 3 semester hours**

Prerequisite: ST ART 3391. A continuation of ST ART 3391. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 4389 Graphic Design Studio: 3 semester hours**

Prerequisites: ST ART 3384 or permission of instructor. Students will work on actual client projects in a studio setting from creative concept through client presentation. Studies will include client interviews, project planning, studio operations, project budget and estimating, vendor selection, prepress preparation, working in creative groups and professional presentations.

**ST ART 4490 Senior Seminar In Photography I: 3 semester hours**

Prerequisite: Senior Standing and ST ART 3392. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall semester.

**ST ART 4491 Senior Seminar In Photography II: 3 semester hours**

Prerequisites: Senior standing and ST ART 4490. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Spring semester.

**ST ART 4495 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 3381, ST ART 3341, ST ART 3392 or ST ART 3371. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall Semester.

**ST ART 4496 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 4495. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Winter Semester.

**ST ART 4497 Senior Seminar In Graphic Design I: 3 semester hours**

Prerequisites: Senior standing and ST ART 3384. Students must pass the junior portfolio review. Weekly critiques and discussions of technical and professional issues. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 4498 Senior Seminar In Graphic Design II: 3 semester hours**

Prerequisites: ST ART 4497. Continuation of ST ART 4497. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 5590 Special Study: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through art making, readings, reports, or field research. Studio Art fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies. May be retaken for credit with consent of instructor.

## Courses

**ST ART 1020 Expanded Artforms: 3 semester hours**

A practical and theoretical exploration of contemporary art practices organized around structured assignments that will explore various modes of working in art. This course is designed to assist studio students in developing a personal, non-medium specific approach to art making and problem solving. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1025 Art of 3D Animation I: 3 semester hours**

This course will explore the principles of animation and the mechanics of spatial graphics software such as *Maya*, as well as the storytelling and visual techniques central to creating a successful animated presentation. Students will produce an animated video presentation. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1026 Art of 3D Animation II: 3 semester hours**

Prerequisites: ST ART 1025. In this production course, students will work on advanced techniques of animation and the mechanics of spatial graphics software such as *Maya*, and will study the storytelling and visual techniques central to creating a successful animated presentation. Each student will produce an animated video presentation during the class. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1030 Ceramics I: 3 semester hours**

An introduction to basic methods and theory of ceramics including work with hand-built construction, wheel techniques and glazing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1060 Photography I: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1061 Introduction to Digital Photography: 3 semester hours**

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies. Students who plan to pursue a career in art should enroll in ST ART 1060 rather than ST ART 1061. ST ART 1061 does not satisfy the prerequisite requirement for other courses in Photography beyond the 2000 level, but may count towards Photography electives.

**ST ART 1080 Comics & Cartoon Illustration: 3 semester hours**

A course in creating and appreciating the world of comics and cartoons. This course will investigate the tools and techniques for creating cartoons, cartoon illustrations and the world of comics. Students will create their own cartoons with traditional media and also with computers. While designed for beginners, experienced artists will be encouraged to perfect their personal styles. The class will create and print its own comic book. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1130 Ceramics II: 3 semester hours**

Prerequisite: ST ART 1030. A continuation of ST ART 1030. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1132 Sculpture I: 3 semester hours**

An introduction to traditional and contemporary materials, aesthetics, and theories of three-dimensional art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1133 Introduction To Fibers And Textiles: 3 semester hours**

Prerequisites: ST ART 1150. Exploration of a variety of on- and off-loom weaving and other fiber and textile media and techniques. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1140 Drawing I: 3 semester hours**

An introduction to drawing through the study of figure, object, and environment. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1141 Drawing II: 3 semester hours**

Prerequisite: ST ART 1140. The development of drawing skills through continued observation and problems of invention. A further exploration of varied drawing materials and techniques including graphite, charcoal, conte crayon, and inks. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1142 Figure Drawing I: 3 semester hours**

Basic studies of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1143 Figure Drawing II: 3 semester hours**

Prerequisite: ST ART 1142. Continuation of Figure Drawing I. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1150 Design I: 3 semester hours**

Studio problems in the creative use and integration of the elements of two-dimensional design: line, form, space, texture. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1151 Design II: 3 semester hours**

Prerequisite: ST ART 1150. A continuation of ST ART 1150, two-dimensional design, with introduction to color theory. Some application of mixed media problems. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1170 Printmaking I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking techniques, materials, and theories. The course will include work in a variety of print materials. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1173 Printmaking: Screenprinting I: 3 semester hours**

Prerequisite: ST ART 1170. An introduction into the techniques, methods, and aesthetics of screenprinting. Studio problems involving uses and approaches will be emphasized. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1180 Painting I: 3 semester hours**

Prerequisite: ST ART 1140, ST ART 1150 or consent of instructor. An introduction to the use of oil and/or acrylic painting media. Studio problems to develop technical and expressive skills on various surfaces. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1181 Painting II: 3 semester hours**

Prerequisite: ST ART 1180 or consent of instructor. Continuation of basic studio problems in painting media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 1210 Graphic Design I: 3 semester hours**

Prerequisite: None. Introduction to graphic design with an emphasis on fundamentals of space, emotion, shape, form, and concept. Projects in design, layout and typography will be addressed. The course is recommended to be taken concurrently with ST ART 1150, Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 1220 Graphic Design II: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1210. Continuing introduction to graphic design, focusing on developing concepts and design process, typographic systems and layout systems. The course is recommended to be taken concurrently with ST ART 2220, Computer Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2100 Advertising Art Fundamentals: 3 semester hours**

Prerequisites: MEDIA ST 2090 or consent of the Coordinator for the Certificate in Advertising. This course introduces students to basic principles of production, including layout, type, color, readability, and image selection. The course is intended for students pursuing a Certificate in Advertising, and does not count towards a degree in Graphic Design.

**ST ART 2160 Photography II: 3 semester hours**

Prerequisite: ST ART 1060. An introduction to the techniques and aesthetics of black and white photography and the darkroom. Students must provide a film camera with adjustable speeds and aperture. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2201 Fundamentals of User Experience Design: 3 semester hours**

Prerequisites: ENGL 1100 or equivalent, or consent of instructor. Through lecture and presentation, students will explore fundamental concepts of User Experience (UX) Design and specific tools and methods used throughout the process. Coursework will involve research and writing, allowing students to implement these methods. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2202 Fundamentals of Researching User Experience: 3 semester hours**

Prerequisite: ST ART 2201. In this course, students will discover in greater detail the methods for researching user experiences within interactive systems. This will include basic tools like interviews, surveys and usability studies. The course will demonstrate how to translate user research into personas, use-case scenarios, and functional requirements for software and other uses such as implementation in marketing and product design. Course work will include readings, research papers and user research. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2210 Typography: 3 semester hours**

Prerequisites: ST ART 1220 or consent of the instructor. Course intends to instill a sense of responsibility relative to typographic and production design, while developing the student's capacity for critical thinking and general typographic rules, visual hierarchy of typographic elements, classical typographic tradition, book design, awareness of typographic aesthetic.

**ST ART 2212 Image Making for Graphic Design: 3 semester hours**

Prerequisites: ST ART 1220 or instructor's consent. This course teaches skills of making images and custom type for use in visual communication. Topics covered include a survey of traditional and experimental illustration techniques with an emphasis on creation of original imagery. The class will discuss how hand images are further developed and combined on the computer for use in design. Creativity, discovery, and craft are highly emphasized. Lab fee required.

**ST ART 2220 Computer Design I: 3 semester hours**

Prerequisite: ST ART 1150 and ST ART 1210. An introduction to the use of computer graphics for the creation of artwork applicable to the graphic design industry. The course is recommended to be taken concurrently with ST ART 1220, Graphic Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2221 Computer Design II: 3 semester hours**

Prerequisite: ST ART 2220. Designed to familiarize students with the methods processes, software, and computer functions used in graphic design and illustration. The course is recommended to be taken concurrently with ST ART 3310, Graphic Design III. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2240 Drawing III: 3 semester hours**

Prerequisites: ST ART 1140 and ST ART 1141. This course offers studio problems designed to further the development of drawing skills in various media. Limited color will also be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2241 Drawing IV: 3 semester hours**

Prerequisite: ST ART 2240. Studio problems with emphasis on color and multi-material approach to drawing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2242 Figure Drawing III: 3 semester hours**

Prerequisites: ST ART 1142 and ST ART 1143. Advanced study of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2243 Figure Drawing IV: 3 semester hours**

Prerequisite: ST ART 2242. Continuation of ST ART 2242. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2250 Composition: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. An investigation of the use of formal design elements as used in historic and contemporary art. Weekly studio problems and discussions will concentrate on skills, application, and unifying effects of compositional elements on a variety of visual art forms. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2251 Design III: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1151. Advanced studio problems in design materials. Use of two-dimensional and three-dimensional mixed media. Experimental use of materials and media will be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2262 Color Photography I: 3 semester hours**

Prerequisite: ST ART 1060 or equivalent. An introduction to the techniques and aesthetics of color photography. Mastering the printing and finishing processes and producing a color print portfolio will be the requirements of this class. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2263 Digital Color Process: 3 semester hours**

Prerequisites: ST ART 1060. An extended study in the process of digital printing. The class will help students refine their techniques using digital color management and explore various techniques to assure the closest relationship between the image on the monitor and the resulting print. Hands-on training with different digital printers, digital media and scanning techniques will be offered. This class will involve both learning exercises and the creation of original computer-aided photographic art. Lab fee required. Students must provide a digital camera. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2264 Non-Silver Photography: 3 semester hours**

Prerequisites: ST ART 1060 and ST ART 2160. An introduction to the aesthetics and techniques of nontraditional photographic processes. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2265 Commercial Applications In Photography: Portrait Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of portrait photography. Techniques of lighting, posing, and studios equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2266 Commercial Applications in Photography: Product Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of product Photography. Techniques of lighting, posing and studio equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2267 The Constructed Photograph: 3 semester hours**

Prerequisites: ST ART 2263. An exploration of the constructed photograph through the art of digital collage. The class will survey the history of hand-created photographs. In addition, students will learn advanced Photoshop techniques in order to create original computer-aided photographic art. Lab fee required. Basic computer equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2268 Commercial Applications in Photography: Event Photography: 3 semester hours**

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of event photography. The class will focus on a variety of event photography types, including weddings, corporate and non-profit events, photobooths, concerts, etc. Special emphasis will be placed on photographing for the client. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2269 Commercial Appl in Photo: Photojournalism, Documentary, & Publ Relations Photography: 3 semester hours**

Prerequisite: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of photojournalism, documentary, and public relations photography. The class will concentrate on a variety of photographic applications focusing on news and editorial imagemaking, as well as training the student in public relations assignments. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2271 Printmaking II: 3 semester hours**

Prerequisite: ST ART 1170 or consent of instructor. A continuation of ST ART 1170. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2272 Printmaking:Lithography I: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory in stone and plate lithography. Studio problems in the use of materials and equipment. Attention will be given to individual development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2273 Printmaking: Etching: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory of contemporary etching practices. Development of skills and aesthetic judgments in the media using non-toxic etching processes. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 2274 Printmaking And Relief: 3 semester hours**

Prerequisites: ST ART 1170 and ST ART 2271. Advanced problems in relief printmaking. Work in wood and mixed materials. Development of skills and aesthetic judgments in the media. May be repeated for credit with consent of instructor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2280 Painting III: 3 semester hours**

Prerequisite: ST ART 1181 or consent of instructor. Advanced studio problems in painting media. Attention paid to individual development of theory, expression, and technique. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2281 Painting IV: 3 semester hours**

Prerequisite: ST ART 2280. A continuation of ST ART 2280. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2283 Watercolor Painting: 3 semester hours**

Prerequisites: ST ART 1150 and ST ART 1141. Beginning problems in watercolor painting. Includes the study of traditional and contemporary approaches to color, color techniques, and treatment of papers. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 2290 Special Study: 1-10 semester hours**

Prerequisites: Junior/Senior standing and consent of department and instructor. Independent study through readings, reports or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3074 Special Topics In Studio Art: 3 semester hours**

Prerequisites: Minimum completion of 18 hours in Studio Art. Selected topics in studio studies. May be repeated for credit with a change of topic. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3260 Photography III: 3 semester hours**

Prerequisite: ST ART 2160. An exploration into contemporary theories and trends in photography. Advanced projects, portfolios and techniques will be expected from those enrolled. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3263 Digital Color Portfolio: 3 semester hours**

Prerequisites: ST ART 2263. Intermediate exploration of the aesthetics and techniques of digital photography including an investigation of color management in printing. Students will produce one or more portfolios of digital images. Lab fee required. Basic lab equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3310 Graphic Design III: 3 semester hours**

Prerequisite: ST ART 1220 and ST ART 2220. Advanced studio problems to further the understanding of design and its relationship to typographic elements, illustration, and communication. The course will encourage both conceptual and technical development of the designer. The course is recommended to be taken concurrently with ST ART 2221, Computer Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3311 Graphic Design IV: 3 semester hours**

Prerequisite: ST ART 3310 and ST ART 2221. Further studio problems in the graphic arts. The course is recommended to be taken concurrently with ST ART 2210, Typography. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3312 Advanced Topics in Graphic Design: 3 semester hours**

Prerequisites: ST ART 3311 or permission of instructor. Studies of selected topics, which will vary. May be repeated for credit with a different topic, for a maximum of 9 credit hours. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3340 Advanced Problems In Drawing I: 3 semester hours**

Prerequisite: ST ART 2241. This course is focused on professional-level art and portfolio production. It offers studio problems designed to further the development of drawing skills. Emphasis will be given to the study of drawing as an independent art form. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3341 Advanced Problems In Drawing II: 3 semester hours**

Prerequisite: ST ART 3340. A continuation of ST ART 3340. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3350 Studio Art Internship: 1-6 semester hours**

Prerequisites: Junior/Senior standing in studio art and consent of the faculty advisor. The internship provides experience in design firms, professional art studios, or comparable settings. Students will assist professionals in the diverse duties associated with studio art activities. Course assignments may include research assignments and/or reports to be reviewed by the faculty advisor and/or supervisor. May be repeated for credit, up to a maximum of 6 credit hours.

**ST ART 3363 Special Topics In Photography: 3 semester hours**

Prerequisites: ST ART 2160. Photography II & permission of advisor. Selected topics in photographic practice. May be repeated for credit with permission of advisor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3370 Advanced Problems In Printmaking I: 3 semester hours**

Prerequisite: ST ART 2274. This course is focused upon professional-level art and portfolio production. After completion of this and the preceding course, students should be ready to meet the artistic and intellectual demands of today's visual art world. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3371 Advanced Problems In Printmaking II: 3 semester hours**

Prerequisite: ST ART 3370. A continuation of ST ART 3370. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3372 Advanced Lithography: 3 semester hours**

Prerequisite: ST ART 1173. Continuing problems in lithography with problems in black and white, photolithography, and/or color. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3380 Advanced Problems In Painting I: 3 semester hours**

Prerequisite: ST ART 2281. This course is focused on professional-level art and portfolio production. Non-traditional materials might be explored. Attention is focused on individual development of painting theory, self-expression, and advanced techniques. The student is expected to assume a substantial responsibility with regard to direction, motivation, and content. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3381 Advanced Problems In Painting II: 3 semester hours**

Prerequisite: ST ART 3380. A continuation of portfolio production in ST ART 3380. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3383 Advanced Problems In Graphic Design I: 3 semester hours**

Prerequisite: ST ART 3311 and ST ART 2210. This course is focused on professional-level art and portfolio production. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3384 Advanced Problems In Graphic Design II: 3 semester hours**

Prerequisite: ST ART 3383. A continuation of ST ART 3383. The course includes the preparation of a faculty-reviewed portfolio. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3390 Special Study: 1-10 semester hours**

Prerequisite: Junior/senior standing and consent of department chairperson and instructor. Independent study through readings, reports, or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3391 Advanced Problems In Photography I: 3 semester hours**

Prerequisites: ST ART 2263 and ST ART 3260. This course is focused on professional-level art and portfolio production. Students may employ black and white, color, nonsilver, or other traditional or non-traditional press for projects in this course. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3392 Advanced Problems In Photography II: 3 semester hours**

Prerequisite: ST ART 3391. A continuation of ST ART 3391. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 4389 Graphic Design Studio: 3 semester hours**

Prerequisites: ST ART 3384 or permission of instructor. Students will work on actual client projects in a studio setting from creative concept through client presentation. Studies will include client interviews, project planning, studio operations, project budget and estimating, vendor selection, prepress preparation, working in creative groups and professional presentations.

**ST ART 4490 Senior Seminar In Photography I: 3 semester hours**

Prerequisite: Senior Standing and ST ART 3392. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall semester.

**ST ART 4491 Senior Seminar In Photography II: 3 semester hours**

Prerequisites: Senior standing and ST ART 4490. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Spring semester.

**ST ART 4495 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 3381, ST ART 3341, ST ART 3392 or ST ART 3371. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall Semester.

**ST ART 4496 Senior Studio Seminar: 3 semester hours**

Prerequisites: Senior standing and ST ART 4495. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Winter Semester.

**ST ART 4497 Senior Seminar In Graphic Design I: 3 semester hours**

Prerequisites: Senior standing and ST ART 3384. Students must pass the junior portfolio review. Weekly critiques and discussions of technical and professional issues. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 4498 Senior Seminar In Graphic Design II: 3 semester hours**

Prerequisites: ST ART 4497. Continuation of ST ART 4497. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 5590 Special Study: 1-6 semester hours**

Prerequisites: Graduate standing and consent of instructor. Independent study through art making, readings, reports, or field research. Studio Art fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies. May be retaken for credit with consent of instructor.

## Teacher Education

### Courses

**TCH ED 2209 Foundations of Teaching in American Schools: 3 semester hours**

Explores the multiple roles and functions of professional teaching including: communication, leadership, management skills, use of technology, identification of needs of diverse populations and an examination of other selected concepts and philosophies underlying American public education. Portfolio preparation will be introduced. A minimum of 15 field experience hours required.

**TCH ED 3100 Education for Social & Civic Responsibility: 3 semester hours**

Equips students with the knowledge and skills needed to integrate an emphasis on civic and social responsibility, including social justice, into their own teaching. Includes a service learning project and requires reflection on project and in-class experiences, course readings, and personal and professional goals and development.

**TCH ED 3210 General Linguistics in Tchg English to Speakers of Other Languages: 3 semester hours**

Prerequisites: Completion of Level I. An introduction to the historical, legal and pedagogical frameworks relating to Teaching English to Speakers of Other Languages (TESOL), and bilingualism. Students explore principles of language systems including English and the function of language in social and academic settings.

**TCH ED 3211 Basic Principles of Second and Foreign Language Acquisition: 3 semester hours**

Prerequisites: TCH ED 3210. Covers the principles of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors in relation to second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics, and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 3212 Sociolinguistics and communication in the Classroom: 3 semester hours**

Prerequisites: TCH ED 3210 and admission to Teacher Education Program. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intracultural communication. Students develop strategies to enhance home, school and community relations and impact of culture on perceptions, communication, behaviors, and learning.

**TCH ED 3213 Performance-based Assessment for TOSOL: 3 semester hours**

Prerequisite: TCH ED 3210. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can reinforce instruction.

**TCH ED 3214 Material Development and Methods for TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3211, TCH ED 3212, TCH ED 3213, and TCH ED 4391. Students integrate knowledge of second language acquisition research in instructional methodologies in this course. Students will also incorporate theories of linguistics, assessment models, and instructional technology into their material development to meet the needs of diverse English language learners.

**TCH ED 3215 Field Experiences in TESOL: 3 semester hours**

Prerequisites: TCH ED 3210, TCH ED 3212, and TCH ED 3214 or concurrently taking TCH ED 3214. Students observe and reflect on actual classroom practices as well as complete a student's needs analysis and placement tests. The students implement the strategies for advocating an collaborating on behalf of students from diverse language backgrounds. This is a supervised field experience.

**TCH ED 3310 Methods of Teaching With Technology: 2 semester hours**

Prerequisite: TCH ED 2209, ED PSY 2212, or equivalent and admission to Teacher Education Program. Skill development in transforming content into instruction through various teaching methods and educational technologies. Emphasis on differentiating instruction, inquiry learning, and reflecting on practice. Recommended that this course be taken concurrently with ED TECH 3135.

**TCH ED 3313 Psychology of the Exceptional Child: 3 semester hours**

Prerequisites: level I or equivalent. Introductory overview of the field of special education including historical developments, characteristics of special populations, and compliance with state and federal regulations.

**TCH ED 3315 Literacy Learning And Instruction: 3 semester hours**

Prerequisites: Admission to Teacher Education program. May take concurrently with ED PSY 3312 and TCH ED 3313 or equivalents; may not be taken before ED PSY 3312 and TCH ED 3313 or equivalents. Analysis of methods, materials, frameworks, and technology for the effective teaching of literacy to young children, children with special needs, and children in PreK-6 education settings. Emphasis on the role of language experience, phonics, semantics, syntactics, pragmatics, schema theory, and metacognition in literacy development. A total of 20 field experience hours including observation, assessing children's literacy interests and development, and teaching lessons in a school classroom setting are required in addition to scheduled course time. This course may be applied toward a Literacy Minor.

**TCH ED 3316 The Professional Portfolio: 1 semester hour**

Prerequisites: Junior standing or consent of instructor. Students learn the knowledge and skills to develop an electronic teaching portfolio, writing reflective rationales for standards and choosing appropriate artifacts and using technology tools for successful presentation.

**TCH ED 4391 Literacy for Adolescent Learners in Content Areas: 3 semester hours**

Prerequisites: Admission to the Teacher Education Program. Examines the teaching of multiple literacies including reading, writing, speaking and critical thinking in the content areas. Implications of diverse cultures and languages and their relationship to reading will be explored. Field experience hours are required in addition to scheduled course time.

**TCH ED 4988 Teaching and Learning in Urban Schools: 3 semester hours**

Prerequisites: Enrollment in the Minor in Urban Education or permission of the instructor. The capstone course for the Minor in Urban Education. Students design and implement a classroom-based, action research project in an urban school that integrates differentiated instruction, culturally relevant and sensitive teaching strategies, assessing children's learning to meet individual needs, and implementing inquiry-based projects.

**TCH ED 5310 Instructional Design: 3 semester hours**

Prerequisites: Graduate standing, TCH ED 5311, participation in an initial teacher preparation program, and consent of instructor. Students learn to design instruction using different teaching models, plan a teaching unit, select content, design assessment, and develop classroom climate and management strategies. Professional skills are developed through reflecting on one's own practice, using educational technology, and developing a professional portfolio. Ten hours of field experience are required outside of class time.

**TCH ED 5311 Foundations Of Education: 3 semester hours**

Prerequisite: Graduate standing. Students will learn the history of public education, the role of the teacher as a change agent, the influence of technology, and the impact of diversity of American classrooms. Ten clock hours of field work required.

**TCH ED 5312 Differentiated Instruction: 3 semester hours**

Prerequisites: Graduate Standing. Explores differentiated instruction as an approach to meeting the diverse instructional needs of all students in the classroom. Differentiated instruction can be used to enhance literacy developments of adolescent learners in functional literacy, content literacy, technological literacy and creative/innovative literacy. Twenty hours of field experience are required in addition to scheduled course time.

**TCH ED 5850 Topics In The Teaching Of Writing: 1-3 semester hours**

Same as ENGL 4850. Prerequisite: ENGL 3100 or equivalent.

**TCH ED 6010 Examining History, Community And Social Justice In Education: 3 semester hours**

Addresses the issues of equity and social justice from the context of personal and educational history. Students will develop a cultural understanding of their own previous school, community and family experiences and generalize those findings to their current work as educators. They will develop an understanding of the historical foundations of American education and the role of the teacher to be a catalyst for change. Curriculum, instruction and learning will be examined through a variety of lenses including race, class, gender, ability, sexual orientation and religion to become culturally responsive teachers.

**TCH ED 6020 Teacher Action, Advocacy And Leadership: 3 semester hours**

Investigates the relationships among students, general and special education teachers, counselors, principals, parents, and other support and specialist personnel typically present in schools in Missouri and the changing roles of all these individuals as a consequence of general and special education reform initiatives. Develop systemic action plans and become advocates and leaders within the school and larger community for children, families, and the profession. Assists teachers to analyze and improve their management, planning and record keeping systems and professional development planning.

**TCH ED 6115 Historical Thinking in Theory and Practice I: 3 semester hours**

Same as HIST 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

**TCH ED 6116 Historical Thinking in Theory and Practice II: 3 semester hours**

Same as HIST 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115/ TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

**TCH ED 6200 Building Character and Competence with Diverse Learners: 3 semester hours**

Prerequisites: Graduate Standing. This course introduces theories and offers research-based strategies, materials, and resources designed to meet the needs of diverse learners in elementary school settings, including those with special needs and English language learners. Students will also learn ways to promote character and citizenship development, cross-cultural communication, and positive behavior supports.

**TCH ED 6210 Foundations Of Teaching English To Speakers Of Other Languages: 3 semester hours**

Prerequisites: Graduate Standing. This course is an introduction to the historical, legal and pedagogical frameworks relating to Teaching English to speakers of Other Languages (TESOL) and bilingualism. Students explore current issues, trends and influential factors in second language acquisition (SLA) instructional and assessment models.

**TCH ED 6220 Principles Of Second/Foreign Language Acquisition: 3 semester hours**

Prerequisite: TCH ED 6210. This course is a research-based study of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors, as well as linguistic research about second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 6230 Cross-Cultural Communication In The Classroom: 3 semester hours**

Prerequisite: TCH ED 6210. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intra-cultural communication. Within this theoretical context, students recognize their own socio-cultural identity and its impact on teaching models. Students develop strategies to enhance home, school and community relations.

**TCH ED 6240 Assessment for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6210 and TCH ED 6220 are recommended. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can inform instruction.

**TCH ED 6250 Methods and Materials for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, and TCH ED 6240, or consent from instructor. Students integrate knowledge of second language acquisition research in instructional methodologies, linguistics, assessment models, and awareness of socio-cultural dynamics, in order to design and critique a unit plan including materials and needed technology support.

**TCH ED 6260 Practicum in Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, TCH ED 6240, and TCH ED 6250 or concurrently taking TCH ED 6250. Students observe and reflect on actual classroom practices, complete a student's needs analysis and placement test, and implement a unit plan in the classroom with reflection. This is a supervised field experience.

**TCH ED 6350 Gender, Language & Identity: 3 semester hours**

Same as GS 6350. Prerequisites: Graduate level standing. An interdisciplinary look at the ways gendered and racial identities are developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**TCH ED 6440 Experiential Education: 3 semester hours**

Prerequisites: TCH ED 6010. This course addresses facets of experiential learning beginning with the theoretical background. Reflection will be examined as a key component of the experiential learning cycle and reflective questioning techniques developed and practiced. Adventure education, cultural journalism, apprenticeship education and related areas will be investigated as approaches to experiential learning. Students will develop an understanding of the relationship between experience and learning and develop techniques for using that relationship to enhance learning in their own teaching situation.

**TCH ED 6442 Outdoor Education Leadership: 3 semester hours**

Prerequisite: TCH ED 6010 or permission of instructor. Explore concept of a bioregion and development of a sense of place using historic journals, land based essays, outdoor activities, research, discussion and personal reflection. Planning, teambuilding, outdoor leadership skills, regional ecology and culture will be addressed. A 3 day field experience will explore stream, canyon, forest, and cave ecosystems in cooperation with resource professionals. Cultural and economic folkways of the region will be considered.

**TCH ED 6444 Environmental Education: 3 semester hours**

Activity-oriented coursework in developing environmental awareness, field and/or laboratory skills and techniques, and the use of environmental curricula. Materials and activities appropriate for a variety of educational settings, including outdoor locales, will be developed. This course is designed to give educators experience in developing and implementing environmental education curricula, especially in an outdoor setting.

**TCH ED 6565 Enriching Learning through Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisite: Graduate standing. Surveys the association between academic achievement and student participation in art, music, health, and physical education. Review research pertaining to the relationship between participation in the arts and physical education and language development, memory, creativity and learning in other subject areas.

**TCH ED 6566 Cross-Curricular Connections with Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisites: Graduate standing. Surveys research-based methods and strategies for implementing cross-curricular learning activities between the core subject areas and the arts, health, and physical education.

**TCH ED 6880 Gateway Writing Project: 3-6 semester hours**

Same as ENGL 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. may be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

**TCH ED 6890 Seminar In Professional Writing For Teachers: 3 semester hours**

Prerequisites: TCH ED 6880 and near completion of Graduate Certificate in the Teaching of Writing. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/ writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher's own evolution as a writer. Seminar meetings will include both face-to-face and on-line communication.

**TCH ED 6909 Teacher Action Research I: 3 semester hours**

Prerequisites: Graduate Standing Minimal of 21 hours of M.Ed coursework completed. Students learn the knowledge, skills and tools for systematic reflective practice in preparation for completing the Masters Capstone Action Research project in TCH ED 6910.

**TCH ED 6910 Teacher Action Research Capstone: 3 semester hours**

Prerequisites: TCH ED 6909 for teachers and all but the last 6 hours of the M.Ed. program or TCH ED 6909 or ED REM 6040 for non teachers. Students apply research knowledge, skills, and dispositions developed in TCH ED 6909 to an Action Research project, reflecting on and evaluating an aspect of one's own practice within a situated context. Students identify focused questions, collect and analyze data, using both analytic and practice tools, and review literature to research multiple factors in order to improve student learning. The research findings and insights will be shared in a public forum as a capstone for the M.Ed.

**TCH ED 7100 Research in Literacy Studies: 3 semester hours**

Prerequisites: Admission to the doctoral program. Participants will critically examine foundational, theoretical and historical work in the intersection of language, literacy and culture. An analysis of seminal research will explore related traditions and contemporary theories in literacy (K-12).

***TCH ED 7200 Historical and Theoretical Foundations of Curriculum and Instruction: 3 semester hours***

Prerequisites: Admission to the doctoral program. Examines foundational, theoretical and historical work in the field of Curriculum and Instruction. Students will read and analyze key texts, engage in discussions with peers and divisional faculty, build coherent and well-informed arguments, and apply new understandings to problems of practice.

***TCH ED 7210 Issues And Trends in Content and Language Acquisition for English Language Learners: 3 semester hours***

Prerequisites: Doctoral Standing. Analysis of current issues on simultaneous development of academic content and English language learning. Current trends in teaching English to Speakers of Other Languages (TESOL) include Sheltered Instruction Observation Protocol (SIOP), Teaching and Learning Cycle, Teaching Proficiency through Reading and Story Telling (TPRS), and English as an international language. Students will identify an area of inquiry, and design and complete a research project.

## Courses

***TCH ED 2209 Foundations of Teaching in American Schools: 3 semester hours***

Explores the multiple roles and functions of professional teaching including: communication, leadership, management skills, use of technology, identification of needs of diverse populations and an examination of other selected concepts and philosophies underlying American public education. Portfolio preparation will be introduced. A minimum of 15 field experience hours required.

***TCH ED 3100 Education for Social & Civic Responsibility: 3 semester hours***

Equips students with the knowledge and skills needed to integrate an emphasis on civic and social responsibility, including social justice, into their own teaching. Includes a service learning project and requires reflection on project and in-class experiences, course readings, and personal and professional goals and development.

***TCH ED 3210 General Linguistics in Tchg English to Speakers of Other Languages: 3 semester hours***

Prerequisites: Completion of Level I. An introduction to the historical, legal and pedagogical frameworks relating to Teaching English to Speakers of Other Languages (TESOL), and bilingualism. Students explore principles of language systems including English and the function of language in social and academic settings.

***TCH ED 3211 Basic Principles of Second and Foreign Language Acquisition: 3 semester hours***

Prerequisites: TCH ED 3210. Covers the principles of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors in relation to second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics, and discourse, within a communicative framework, which directly relates to instructional strategies.

***TCH ED 3212 Sociolinguistics and communication in the Classroom: 3 semester hours***

Prerequisites: TCH ED 3210 and admission to Teacher Education Program. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intracultural communication. Students develop strategies to enhance home, school and community relations and impact of culture on perceptions, communication, behaviors, and learning.

***TCH ED 3213 Performance-based Assessment for TOSOL: 3 semester hours***

Prerequisite: TCH ED 3210. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can reinforce instruction.

***TCH ED 3214 Material Development and Methods for TESOL: 3 semester hours***

Prerequisites: TCH ED 3210, TCH ED 3211, TCH ED 3212, TCH ED 3213, and TCH ED 4391. Students integrate knowledge of second language acquisition research in instructional methodologies in this course. Students will also incorporate theories of linguistics, assessment models, and instructional technology into their material development to meet the needs of diverse English language learners.

***TCH ED 3215 Field Experiences in TESOL: 3 semester hours***

Prerequisites: TCH ED 3210, TCH ED 3212, and TCH ED 3214 or concurrently taking TCH ED 3214. Students observe and reflect on actual classroom practices as well as complete a student's needs analysis and placement tests. The students implement the strategies for advocating an collaborating on behalf of students from diverse language backgrounds. This is a supervised field experience.

***TCH ED 3310 Methods of Teaching With Technology: 2 semester hours***

Prerequisite: TCH ED 2209, ED PSY 2212, or equivalent and admission to Teacher Education Program. Skill development in transforming content into instruction through various teaching methods and educational technologies. Emphasis on differentiating instruction, inquiry learning, and reflecting on practice. Recommended that this course be taken concurrently with ED TECH 3135.

***TCH ED 3313 Psychology of the Exceptional Child: 3 semester hours***

Prerequisites: level I or equivalent. Introductory overview of the field of special education including historical developments, characteristics of special populations, and compliance with state and federal regulations.

***TCH ED 3315 Literacy Learning And Instruction: 3 semester hours***

Prerequisites: Admission to Teacher Education program. May take concurrently with ED PSY 3312 and TCH ED 3313 or equivalents; may not be taken before ED PSY 3312 and TCH ED 3313 or equivalents. Analysis of methods, materials, frameworks, and technology for the effective teaching of literacy to young children, children with special needs, and children in PreK-6 education settings. Emphasis on the role of language experience, phonics, semantics, syntactics, pragmatics, schema theory, and metacognition in literacy development. A total of 20 field experience hours including observation, assessing children's literacy interests and development, and teaching lessons in a school classroom setting are required in addition to scheduled course time. This course may be applied toward a Literacy Minor.

***TCH ED 3316 The Professional Portfolio: 1 semester hour***

Prerequisites: Junior standing or consent of instructor. Students learn the knowledge and skills to develop an electronic teaching portfolio, writing reflective rationales for standards and choosing appropriate artifacts and using technology tools for successful presentation.

***TCH ED 4391 Literacy for Adolescent Learners in Content Areas: 3 semester hours***

Prerequisites: Admission to the Teacher Education Program. Examines the teaching of multiple literacies including reading, writing, speaking and critical thinking in the content areas. Implications of diverse cultures and languages and their relationship to reading will be explored. Field experience hours are required in addition to scheduled course time.

***TCH ED 4988 Teaching and Learning in Urban Schools: 3 semester hours***

Prerequisites: Enrollment in the Minor in Urban Education or permission of the instructor. The capstone course for the Minor in Urban Education. Students design and implement a classroom-based, action research project in an urban school that integrates differentiated instruction, culturally relevant and sensitive teaching strategies, assessing children's learning to meet individual needs, and implementing inquiry-based projects.

***TCH ED 5310 Instructional Design: 3 semester hours***

Prerequisites: Graduate standing, TCH ED 5311, participation in an initial teacher preparation program, and consent of instructor. Students learn to design instruction using different teaching models, plan a teaching unit, select content, design assessment, and develop classroom climate and management strategies. Professional skills are developed through reflecting on one's own practice, using educational technology, and developing a professional portfolio. Ten hours of field experience are required outside of class time.

***TCH ED 5311 Foundations Of Education: 3 semester hours***

Prerequisite: Graduate standing. Students will learn the history of public education, the role of the teacher as a change agent, the influence of technology, and the impact of diversity of American classrooms. Ten clock hours of field work required.

***TCH ED 5312 Differentiated Instruction: 3 semester hours***

Prerequisites: Graduate Standing. Explores differentiated instruction as an approach to meeting the diverse instructional needs of all students in the classroom. Differentiated instruction can be used to enhance literacy developments of adolescent learners in functional literacy, content literacy, technological literacy and creative/innovative literacy. Twenty hours of field experience are required in addition to scheduled course time.

***TCH ED 5850 Topics In The Teaching Of Writing: 1-3 semester hours***

Same as ENGL 4850. Prerequisite: ENGL 3100 or equivalent.

***TCH ED 6010 Examining History, Community And Social Justice In Education: 3 semester hours***

Addresses the issues of equity and social justice from the context of personal and educational history. Students will develop a cultural understanding of their own previous school, community and family experiences and generalize those findings to their current work as educators. They will develop an understanding of the historical foundations of American education and the role of the teacher to be a catalyst for change. Curriculum, instruction and learning will be examined through a variety of lenses including race, class, gender, ability, sexual orientation and religion to become culturally responsive teachers.

***TCH ED 6020 Teacher Action, Advocacy And Leadership: 3 semester hours***

Investigates the relationships among students, general and special education teachers, counselors, principals, parents, and other support and specialist personnel typically present in schools in Missouri and the changing roles of all these individuals as a consequence of general and special education reform initiatives. Develop systemic action plans and become advocates and leaders within the school and larger community for children, families, and the profession. Assists teachers to analyze and improve their management, planning and record keeping systems and professional development planning.

***TCH ED 6115 Historical Thinking in Theory and Practice I: 3 semester hours***

Same as HIST 6115. Prerequisites: Graduate Standing or consent of instructor. This course explores theoretical and research literature on historical thinking. It further examines effective teaching strategies and curriculum materials that facilitate historical thinking and reading skills while also broadening content knowledge. It will familiarize students with text and web-based resources available for instruction.

***TCH ED 6116 Historical Thinking in Theory and Practice II: 3 semester hours***

Same as HIST 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115/ TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

***TCH ED 6200 Building Character and Competence with Diverse Learners: 3 semester hours***

Prerequisites: Graduate Standing. This course introduces theories and offers research-based strategies, materials, and resources designed to meet the needs of diverse learners in elementary school settings, including those with special needs and English language learners. Students will also learn ways to promote character and citizenship development, cross-cultural communication, and positive behavior supports.

***TCH ED 6210 Foundations Of Teaching English To Speakers Of Other Languages: 3 semester hours***

Prerequisites: Graduate Standing. This course is an introduction to the historical, legal and pedagogical frameworks relating to Teaching English to speakers of Other Languages (TESOL) and bilingualism. Students explore current issues, trends and influential factors in second language acquisition (SLA) instructional and assessment models.

***TCH ED 6220 Principles Of Second/Foreign Language Acquisition: 3 semester hours***

Prerequisite: TCH ED 6210. This course is a research-based study of language acquisition and the factors which influence learning. Students investigate first and second language acquisition processes including socio-cultural and cognitive factors, as well as linguistic research about second language acquisition (SLA). The course analyzes phonology, morphology, syntax, semantics and discourse, within a communicative framework, which directly relates to instructional strategies.

**TCH ED 6230 Cross-Cultural Communication In The Classroom: 3 semester hours**

Prerequisite: TCH ED 6210. Students explore the impact of culture and society on verbal and non-verbal communication, learning styles, and second language acquisition. The course introduces concepts relating to the acculturation process, cross-cultural and intra-cultural communication. Within this theoretical context, students recognize their own socio-cultural identity and its impact on teaching models. Students develop strategies to enhance home, school and community relations.

**TCH ED 6240 Assessment for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6210 and TCH ED 6220 are recommended. By exploring the role of assessment in culturally and linguistically diverse classrooms, this course provides an overview of identifying and placing students at the district and school level. Formal and informal models of assessment are examined as students reflect on the administration and interpretation of equitable measurement strategies and how assessment can inform instruction.

**TCH ED 6250 Methods and Materials for Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, and TCH ED 6240, or consent from instructor. Students integrate knowledge of second language acquisition research in instructional methodologies, linguistics, assessment models, and awareness of socio-cultural dynamics, in order to design and critique a unit plan including materials and needed technology support.

**TCH ED 6260 Practicum in Teaching English to Speakers of Other Languages: 3 semester hours**

Prerequisites: TCH ED 6220, TCH ED 6230, TCH ED 6240, and TCH ED 6250 or concurrently taking TCH ED 6250. Students observe and reflect on actual classroom practices, complete a student's needs analysis and placement test, and implement a unit plan in the classroom with reflection. This is a supervised field experience.

**TCH ED 6350 Gender, Language & Identity: 3 semester hours**

Same as GS 6350. Prerequisites: Graduate level standing. An interdisciplinary look at the ways gendered and racial identities are developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

**TCH ED 6440 Experiential Education: 3 semester hours**

Prerequisites: TCH ED 6010. This course addresses facets of experiential learning beginning with the theoretical background. Reflection will be examined as a key component of the experiential learning cycle and reflective questioning techniques developed and practiced. Adventure education, cultural journalism, apprenticeship education and related areas will be investigated as approaches to experiential learning. Students will develop an understanding of the relationship between experience and learning and develop techniques for using that relationship to enhance learning in their own teaching situation.

**TCH ED 6442 Outdoor Education Leadership: 3 semester hours**

Prerequisite: TCH ED 6010 or permission of instructor. Explore concept of a bioregion and development of a sense of place using historic journals, land based essays, outdoor activities, research, discussion and personal reflection. Planning, teambuilding, outdoor leadership skills, regional ecology and culture will be addressed. A 3 day field experience will explore stream, canyon, forest, and cave ecosystems in cooperation with resource professionals. Cultural and economic folkways of the region will be considered.

**TCH ED 6444 Environmental Education: 3 semester hours**

Activity-oriented coursework in developing environmental awareness, field and/or laboratory skills and techniques, and the use of environmental curricula. Materials and activities appropriate for a variety of educational settings, including outdoor locales, will be developed. This course is designed to give educators experience in developing and implementing environmental education curricula, especially in an outdoor setting.

**TCH ED 6565 Enriching Learning through Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisite: Graduate standing. Surveys the association between academic achievement and student participation in art, music, health, and physical education. Review research pertaining to the relationship between participation in the arts and physical education and language development, memory, creativity and learning in other subject areas.

**TCH ED 6566 Cross-Curricular Connections with Multicultural Arts, Music, Physical Education & Health: 1 semester hour**

Prerequisites: Graduate standing. Surveys research-based methods and strategies for implementing cross-curricular learning activities between the core subject areas and the arts, health, and physical education.

**TCH ED 6880 Gateway Writing Project: 3-6 semester hours**

Same as ENGL 6880. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. Topics may vary. may be repeated for credit. No more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

**TCH ED 6890 Seminar In Professional Writing For Teachers: 3 semester hours**

Prerequisites: TCH ED 6880 and near completion of Graduate Certificate in the Teaching of Writing. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/ writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher's own evolution as a writer. Seminar meetings will include both face-to-face and on-line communication.

**TCH ED 6909 Teacher Action Research I: 3 semester hours**

Prerequisites: Graduate Standing Minimal of 21 hours of M.Ed coursework completed. Students learn the knowledge, skills and tools for systematic reflective practice in preparation for completing the Masters Capstone Action Research project in TCH ED 6910.

**TCH ED 6910 Teacher Action Research Capstone: 3 semester hours**

Prerequisites: TCH ED 6909 for teachers and all but the last 6 hours of the M.Ed. program or TCH ED 6909 or ED REM 6040 for non teachers. Students apply research knowledge, skills, and dispositions developed in TCH ED 6909 to an Action Research project, reflecting on and evaluating an aspect of one's own practice within a situated context. Students identify focused questions, collect and analyze data, using both analytic and practice tools, and review literature to research multiple factors in order to improve student learning. The research findings and insights will be shared in a public forum as a capstone for the M.Ed.

**TCH ED 7100 Research in Literacy Studies: 3 semester hours**

Prerequisites: Admission to the doctoral program. Participants will critically examine foundational, theoretical and historical work in the intersection of language, literacy and culture. An analysis of seminal research will explore related traditions and contemporary theories in literacy (K-12).

**TCH ED 7200 Historical and Theoretical Foundations of Curriculum and Instruction: 3 semester hours**

Prerequisites: Admission to the doctoral program. Examines foundational, theoretical and historical work in the field of Curriculum and Instruction. Students will read and analyze key texts, engage in discussions with peers and divisional faculty, build coherent and well-informed arguments, and apply new understandings to problems of practice.

**TCH ED 7210 Issues And Trends in Content and Language Acquisition for English Language Learners: 3 semester hours**

Prerequisites: Doctoral Standing. Analysis of current issues on simultaneous development of academic content and English language learning. Current trends in teaching English to Speakers of Other Languages (TESOL) include Sheltered Instruction Observation Protocol (SIOP), Teaching and Learning Cycle, Teaching Proficiency through Reading and Story Telling (TPRS), and English as an international language. Students will identify an area of inquiry, and design and complete a research project.

## Theatre

### Courses

**THEATR 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**THEATR 3230 Aesthetics Of Theatrical Styles: 3 semester hours**

Prerequisite: THEATR 1230. analysis of the development of dramatic and artistic styles as they affect the visual presentation of ideas in theatre.

**THEATR 3240 Movement For Musical Theatre: 3 semester hours**

Prerequisite: THEATR 2240 or consent of instructor. Specialized training in movement and dance techniques for musical theatre.

**THEATR 3610 Readers Theatre: 3 semester hours**

Prerequisite: COMM 1160. Study of the oral interpretation of literature as a theatrical experience. Study of theory, techniques, and performance.

**THEATR 3810 Theatre From The Ancient Greeks To The Restoration: 3 semester hours**

Prerequisite: THEATR 1800 or consent of instructor. History of theatre and drama from Classical Greek to the Restoration period.

### Courses

**THEATR 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**THEATR 3230 Aesthetics Of Theatrical Styles: 3 semester hours**

Prerequisite: THEATR 1230. analysis of the development of dramatic and artistic styles as they affect the visual presentation of ideas in theatre.

**THEATR 3240 Movement For Musical Theatre: 3 semester hours**

Prerequisite: THEATR 2240 or consent of instructor. Specialized training in movement and dance techniques for musical theatre.

**THEATR 3610 Readers Theatre: 3 semester hours**

Prerequisite: COMM 1160. Study of the oral interpretation of literature as a theatrical experience. Study of theory, techniques, and performance.

**THEATR 3810 Theatre From The Ancient Greeks To The Restoration: 3 semester hours**

Prerequisite: THEATR 1800 or consent of instructor. History of theatre and drama from Classical Greek to the Restoration period.

## Theatre and Dance

### Courses

**TH DAN 1006 Beginning Ballet Technique: 2 semester hours**

Introduction to the art of ballet emphasizing basic movement, technique and terminology. Course of study will include basic barre exercises, center work, and across the floor progressions for proper alignment, strength, flexibility, and coordination. Prior dance experience is not required. Dance attire and ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 1007 Beginning Jazz Dance Technique: 2 semester hours**

Introduction to the art of jazz dance emphasizing basic principles of traditional and contemporary forms of jazz dance movement, technique, terminology, and style. Course will focus on increasing strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 1008 Beginning Modern Dance Technique: 2 semester hours**

Introduction to the art of Modern Dance movement, technique, and terminology. Course of study will introduce the elements of time, space, and energy through basic structured exercises and improvisation. Emphasis will be focused on alignment, strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire is required. Shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 1023 Fundamentals Of Dance: 3 semester hours**

This course provides an introductory exploration of movement through various styles of dance, emphasizing movement vocabulary, stretching, strengthening, body alignment, and creative expression. Prior dance experience is not required. Dance attire and shoes will be required.

**TH DAN 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 1210 Fundamentals Of Acting: 3 semester hours**

Course develops personal communication and presentational skills through vocal, physical, and emotional exercises designed for the beginning actor. Course emphasizes relaxation, concentration, improvisation, script analysis, characterization and scene work exercises to develop elementary performance skills.

**TH DAN 1600 Voice Ad Diction/Vocal Performance: 3 semester hours**

Course promotes development of clear, distinct enunciation and correct pronunciation for mass media communication, public address, theatre, and oral interpretation. Course includes development of oral-presentational and self promotional skills for voice acting/voice-over in contemporary theatre and media.

**TH DAN 1800 Introduction To Theatre: 3 semester hours**

A study of Theatre as an art form, emphasizing the audience's appreciation of the art of the playwright, actor, director, designers, and technicians. Major periods, genres, and dramatic forms from classical to modern to the avant garde as well as performance art will be covered. Students will attend performances and learn about how theatre functions as an art and an industry in today's world. Attendance at several live theatrical (theatre, play, musical, opera, and dance) performances, will be required.

**TH DAN 1850 Introduction To Non-Western Theatre: 3 semester hours**

Survey of theatre forms of the non-European world in which primary attention is concentrated on analysis of traditional dance drama and puppet theatres of East Asia, South Asia, the Middle East and Africa. Similar forms of European theatre will be included for comparative purposes. Focus on the development of world theatre from a visual point of view, from earliest storytelling rituals through international stage development to contemporary theatrical forms, with a view to understanding the global perspective. Course will survey visual media and writings on dance and theatre traditions found around the non-Western World. (Satisfies the Cultural Diversity requirement).

**TH DAN 1900 Introduction To Theatre Technology: 3 semester hours**

Introductory course covering the basic theories and techniques of theatre technology including stage equipment and safety, scenery, lighting, costuming, properties, sound and box office. Course includes practical application through a minimum of 25 hours of lab work in conjunction with a departmental production.

**TH DAN 1910 Introduction To Theatrical Design: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Introductory course covering the elements and principles of design in the areas of scenery, lighting, and costumes. Course will include various creative projects in two and three dimensions. Some graphic materials will be required.

**TH DAN 2006 Intermediate Ballet Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1006 or consent of instructor. Ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will be a continuation of Beginning Ballet Technique barre exercises, center work, and across the floor progressions. Dance attire and Ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2007 Intermediate Jazz Dance Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1007 or consent of instructor. Jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and expression. Course will also study unique dance styles and artists that have influenced the stage video, film and commercial media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2008 Intermediate Modern Dance Technique: 2 semester hours**

Prerequisites: 2.0 credit hours of TH DAN 1008 or consent of instructor. Modern dance movement, technique, vocabulary, and aesthetics. Course of study will be a continuation of Beginning Modern Dance Technique through incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 2020 Acting for the Camera: 3 semester hours**

An acting course that prepares the actor for work in front of a camera. Working with broadcast quality cameras, students will learn the art of language and expression. Students will learn the art and skill of communicating to an audience. Students also acquire the skills for working with other actors on camera, close-ups, working with props, continuity and hitting your mark.

**TH DAN 2112 Scene Study: 3 semester hours**

This course focuses on actor-training methodologies of Stanislavsky and other text-based approaches. Increases understanding of psychological motivation, concentration, focus of attention and clarity of physical expressiveness. Students prepare and present a minimum of three scenes.

**TH DAN 2195 Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor Provides practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 2196 Practicum In Scenery/Lighting/Sound In Theatre Production: 1-3 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions or other approved independent study projects. Running crew work will involve evening, weekend and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2197 Practicum In Costume: 1-3 semester hours**

Practicum in costume construction, cutting, draping, millinery, fabric dyeing/painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime lab hours, occasional weekend and/or evening laboratory time will be required. Appropriate clothing, personal safety and sewing equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 2198 Practicum In Dance: 1-3 semester hours**

Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work will involve evening, weekend, and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2210 Ensemble Acting: 3 semester hours**

Prerequisites: TH DAN 1210. A Laboratory acting course providing an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavsky-based actor training. Emphasis is paid to ensemble creations, physical characterization, cooperative methods and object performance. May involve practices and theories of Jerzy Grotowski, Augusto Boal, Jacques Lecoq, and/or Tadashi Suzuki.

**TH DAN 2241 Argumentation and Debate: 3 semester hours**

Prerequisite: COMM 1040, or COMM 1041, or consent of instructor. Principles of argumentation and debate with practice in preparing briefs and in delivering spoken arguments in formal debate. Emphasis on analysis of issues, logical reasoning, and audience analysis.

**TH DAN 2244 Introduction to Directing: 3 semester hours**

Prerequisite: TH DAN 2105. An overview of the analytical and creative processes that inform the director's work. Students engage in a close examination of texts, key concepts, and directorial choices in staged performances, opera, films, and video. Students will learn how to articulate responses to theatrical/film work, create and present projects, understand the history and role of the director, and unlock the imagination as an interpretive artist.

**TH DAN 2250 Scenic Fabrication: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. A survey of the theories, terminology, and practices of professional methods and equipment of scenic and properties fabrication, painting, and rigging. Students will learn current professional techniques in wood, metal, and plastic fabrication including the operation and programming of CNC production machinery. Course includes practical application through 45 hours of lab work in conjunction with department productions. Personal safety equipment will be required.

**TH DAN 2252 Costume Design I: 3 semester hours**

Prerequisites: TH DAN 1910 or consent of the instructor. Introduces students to the costume design process including researching costumes, techniques in rendering and painting for costume design, required paperwork for the costume designer, and the understanding of fabrics. Students will use introductory skills to create practical costume design projects.

**TH DAN 2260 Introduction To Theatrical Costume Production: 3 semester hours**

A survey of the theory, practices and vocabulary of theatrical costuming; the visualization and realization of the costume through the arts of pattern cutting; the construction techniques; draping; dyeing, painting, and distressing. Course includes practical application of techniques through required 45 hours of lab work in conjunction with current department productions.

**TH DAN 2270 Audio Recording for Live Production: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. This course is intended to provide an introduction to audio systems. It will include exposure to waveforms and the physical qualities of sound, as well as audio signal flow in analog and digital systems. The course is also an introduction to acoustics, both indoors and out, microphone theory and proper use, design and placement of speakers, microphones and audio recording equipment.

**TH DAN 2290 2D and 3D CAD for Live Performance: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Survey course covering the fundamental techniques of two- and three-dimensional computer aided drafting and rendering.

**TH DAN 2300 Stage Management: 3 semester hours**

Prerequisite: Consent of instructor. Course develops fundamental stage management skills needed to supervise all operative aspects of play production from auditions through performance. These skills include: interpersonal and leadership skills, conflict resolution techniques, venue and staff management/scheduling, and technical script analysis. Course includes production experience.

**TH DAN 2800 History of Costumes: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the Western history of costumes through the cultural, historical, and political influences on fashion from primitive times to the present.

**TH DAN 2810 History Of World Theatre And Drama Through The Restoration: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the history of influence of different cultures, traditions, and technologies on development of theatre as a social institution. History of Theatre and drama from ancient cultures to the Restoration period. Ritual and religious drama. Study of the origins of theatre and drama from oral tradition, myth, storytelling, Shamanism and collective ritual, Greek festival drama, and cloister drama of different cultures. Rise of secular drama, the traditions of classical Greek theatre. Study of the Renaissance, and drama in Europe, Asia, Africa, and the New World.

**TH DAN 2820 History Of World Theatre & Drama From 18Th C To Contemporary Time: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. History of theatre from 18th century to contemporary times. Survey of history of influence of different cultures, traditions, and technologies on the development of theatre as a social institution. Study of realism and subsequent departures from realism in theatre, drama and performance.

**TH DAN 2840 History Of Dance To The 19Th Century: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance from pre-history through the middle ages and renaissance to 19th century. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression.

**TH DAN 2841 History Of Dance From The 19Th Century To Contemporary Times: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance practice from 1850 to the present. History of modern dance: art dance from Isadora Duncan to Martha Graham.

**TH DAN 3006 Advanced Ballet Technique: 2 semester hours**

Prerequisites: TH DAN 1006 and consent of instructor. Advanced ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will include advanced barre exercises, center work, and across the floor progressions. Variations, partnering, and pointe work may be incorporated at the discretion of the instructor. Dance attire and ballet slippers will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3007 Advanced Jazz Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1007 and consent of instructor. Advanced jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and performance. Study of unique dance styles and artists that have influenced the stage, video, film and commercial and media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3008 Advanced Modern Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1008 and consent of instructor. Advanced level of modern dance movement, technique, vocabulary, and aesthetics. Incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 6 credit hours.

**TH DAN 3009 Dance Choreography For The Stage, Television And Film: 3 semester hours**

Prerequisites: 4 Credit Hours of any level and combination of TH DAN 1006, TH DAN 1007, TH DAN 1008, TH DAN 2006, TH DAN 2007, TH DAN 2008, TH DAN 3006, TH DAN 3007 and TH DAN 3008. Course will focus on directed movement studies and composition techniques for the stage, television, and film. Personal creativity and original movement inventions will be explored, as well as the creation, development, and transformation of original movement studies into completed works. Dance attire and dance shoes are required. Course may be repeated for up to 6 credit hours.

**TH DAN 3060 Advanced Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1060, TH DAN 1900 and Consent of instructor. Practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3195 Advanced Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 3196 Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work may involve evening and weekend assigned times. Additional daytime hours will vary according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3197 Advanced Practicum In Costume: 1-3 semester hours**

This course provides advanced practical experience in costume construction, cutting, draping, millinery, fabric dyeing/ painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime Lab hours, occasional weekend and/or evening laboratory time may be required. Appropriate clothing and personal safety equipment will be required. Personal equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3198 Advanced Practicum In Dance: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. May involve additional hours including evening and weekend assigned times. Credit will be based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3211 Period Styles of Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. The course will expose students to the rigorous analytical, physical, intellectual, and vocal demands of acting within a specific historical period. Students will focus on monologue and scene study from the following: Greek Tragedy, Spanish Golden Age, Elizabethan Theatre, Restoration Comedy, Italian Commedia, French Farce, and British comedy of Manners with a special focus on style distinctions between each.

**TH DAN 3218 Shakespeare and Verse Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. An intermediate acting course designed to engage students in Shakespeare's dramatic works from the point of view of the actor. Through text analysis, scene study, vocal work, and acting exercises, students explore the meaning, music and theatrical power of Shakespeare and other playwrights. Topics explored include: blank verse acting, line breath support, scansion, phrasing, word emphasis, antithesis, and imagery.

**TH DAN 3250 Costume Crafts: 3 semester hours**

Prerequisites: TH DAN 2260 or Consent of the Instructor. Develop the skills and techniques needed to execute crafts used in costume design including millinery, mask making, fabric painting and dyeing, wig manipulation, armor, and other craft work. Course may be repeated for up to 6 credit hours.

**TH DAN 3252 Costume Design II: 3 semester hours**

Prerequisites: TH DAN 2252 and TH DAN 2260, or consent of instructor. Content of course includes study of theories, styles, visualization of ideas, and techniques of costume design; discussion of principles of design, script analysis, the collaborative roles of designers in the theatrical production; research, and exploration of character representation; study of the human figure, drawing, and rendering techniques.

**TH DAN 3257 Makeup For Theatrical Productions: 2 semester hours**

Prerequisites: TH DAN 1800, TH DAN 1910, or consent of instructor. The art of makeup and its relation to production. Overview of European history and tradition of makeup. Theory, history and the practice of makeup traditions for theatre, dance and performance will be included.

**TH DAN 3260 Digital Scenography: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2250, TH DAN 2290, or consent of instructor. Survey of the professional theories and practices of scenography for live performances. This course emphasizes a digital creative process including digital sketches, CAD, three-dimensional modeling, digital rendering, and collaboration.

**TH DAN 3261 Digital Lighting Design: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2280, or consent of instructor. Survey of the theories and techniques of digital lighting design and 3D visualization for live performance. This course will emphasize current and emerging digital design practices used by professional lighting designers including 3D visualization, CAD, software-based paperwork creation and management, and collaboration in the digital age.

**TH DAN 3263 Techniques in Scenic Finishes: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, or consent of instructor. Survey of theories, materials, and professional techniques used in finishing fabricated scenery. This course will focus on traditional scenic painting, faux finishing techniques, digital graphics production and application, and design and production of digitally printed and cut drops. Course includes practical application through 45 hours of lab work in conjunction with departmental productions and class projects.

**TH DAN 3305 Writing For Performance: 3 semester hours**

Prerequisite: Consent of instructor. Introduction to writing for performance, including playwriting and dramatic adaptation. Students' particular interests will determine course content: ranging from sketch comedy or adaptation of literature for the stage, to full-length comic or dramatic plays. This course is writing intensive and may require additional laboratory hours.

**TH DAN 3399 Stage Combat: 3 semester hours**

Prerequisites: Junior or Senior standing, or consent of instructor. This is a movement course designed to expand the acting student's awareness of the body as a vehicle for the communication of emotion, action, and drama on the stage. It will introduce the skills and techniques necessary for the creation of safe and effective illusions of violence for the stage.

**TH DAN 4020 Directing for the Camera: 3 semester hours**

Prerequisites: TH DAN 2020. This directing course prepares the student director to work with both the actors and the cinematographer to achieve the directorial concept. The director will work with actors and a cinematographer to produce a short-length film/video from a prepared script. The creation of shooting scripts, story boards, and a shooting schedule are covered in the course.

**TH DAN 4040 Special Topics in Theatre: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Theatre. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4041 Special Topics in Dance: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Dance. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4220 Directing For The Theatre: 3 semester hours**

Prerequisites: TH DAN 1210 or consent of instructor. A survey of the theories and practices of theatrical directing, beginning with the theories and techniques of accomplished directors. The stage director's role in performance development will be studied through script analysis, production planning, and the rehearsal process, culminating with a live performance. Final projects are laboratory scenes or a short one-act play.

**TH DAN 4261 Advanced Projects In Design And Technology: 1-3 semester hours**

Prerequisites: TH DAN 1910 and consent of instructor. Provides opportunities for supervised advanced projects in theatre design or technology in conjunction with departmental productions, or other independent study projects. Credit assigned based on scope of project. Course may be repeated for up to 6 credit hours.

**TH DAN 4390 Theatre Internship: 1-3 semester hours**

Prerequisites: Junior level with consent of instructor. Provides opportunities for supervised projects in conjunction with off-campus professional theatre and/or dance companies in performance, management, design or technology. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4391 Dance Internship: 1-3 semester hours**

Prerequisites: Junior level with Consent of instructor. Provides credit for approved supervised projects in conjunction with off-campus professional theatre and/or dance companies. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as SEC ED 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communication or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989: Secondary Professional Internship. This course must be completed in residence. Not available for graduate credit.

**TH DAN 4900 Senior Project: 3 semester hours**

The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty.

## Courses

**TH DAN 1006 Beginning Ballet Technique: 2 semester hours**

Introduction to the art of ballet emphasizing basic movement, technique and terminology. Course of study will include basic barre exercises, center work, and across the floor progressions for proper alignment, strength, flexibility, and coordination. Prior dance experience is not required. Dance attire and ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 1007 Beginning Jazz Dance Technique: 2 semester hours**

Introduction to the art of jazz dance emphasizing basic principles of traditional and contemporary forms of jazz dance movement, technique, terminology, and style. Course will focus on increasing strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 1008 Beginning Modern Dance Technique: 2 semester hours**

Introduction to the art of Modern Dance movement, technique, and terminology. Course of study will introduce the elements of time, space, and energy through basic structured exercises and improvisation. Emphasis will be focused on alignment, strength, flexibility, coordination, and creative expression. Prior dance experience is not required. Dance attire is required. Shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 1023 Fundamentals Of Dance: 3 semester hours**

This course provides an introductory exploration of movement through various styles of dance, emphasizing movement vocabulary, stretching, strengthening, body alignment, and creative expression. Prior dance experience is not required. Dance attire and shoes will be required.

**TH DAN 1060 Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 1210 Fundamentals Of Acting: 3 semester hours**

Course develops personal communication and presentational skills through vocal, physical, and emotional exercises designed for the beginning actor. Course emphasizes relaxation, concentration, improvisation, script analysis, characterization and scene work exercises to develop elementary performance skills.

**TH DAN 1600 Voice Ad Diction/Vocal Performance: 3 semester hours**

Course promotes development of clear, distinct enunciation and correct pronunciation for mass media communication, public address, theatre, and oral interpretation. Course includes development of oral-presentational and self promotional skills for voice acting/voice-over in contemporary theatre and media.

**TH DAN 1800 Introduction To Theatre: 3 semester hours**

A study of Theatre as an art form, emphasizing the audience's appreciation of the art of the playwright, actor, director, designers, and technicians. Major periods, genres, and dramatic forms from classical to modern to the avant garde as well as performance art will be covered. Students will attend performances and learn about how theatre functions as an art and an industry in today's world. Attendance at several live theatrical (theatre, play, musical, opera, and dance) performances, will be required.

**TH DAN 1850 Introduction To Non-Western Theatre: 3 semester hours**

Survey of theatre forms of the non-European world in which primary attention is concentrated on analysis of traditional dance drama and puppet theatres of East Asia, South Asia, the Middle East and Africa. Similiar forms of European theatre will be included for comparative purposes. Focus on the development of world theatre from a visual point of view, from earliest storytelling rituals through international stage development to contemporary theatrical forms, with a view to understanding the global perspective. Course will survey visual media and writings on dance and theatre traditions found around the non-Western World. (Satisfies the Cultural Diversity requirement).

**TH DAN 1900 Introduction To Theatre Technology: 3 semester hours**

Introductory course covering the basic theories and techniques of theatre technology including stage equipment and safety, scenery, lighting, costuming, properties, sound and box office. Course includes practical application through a minimum of 25 hours of lab work in conjunction with a departmental production.

**TH DAN 1910 Introduction To Theatrical Design: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Introductory course covering the elements and principles of design in the areas of scenery, lighting, and costumes. Course will include various creative projects in two and three dimensions. Some graphic materials will be required.

**TH DAN 2006 Intermediate Ballet Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1006 or consent of instructor. Ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will be a continuation of Beginning Ballet Technique barre exercises, center work, and across the floor progressions. Dance attire and Ballet slippers will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2007 Intermediate Jazz Dance Technique: 2 semester hours**

Prerequisites: 2.0 Credit Hours of TH DAN 1007 or consent of instructor. Jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and expression. Course will also study unique dance styles and artists that have influenced the stage video, film and commercial media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 10 credit hours.

**TH DAN 2008 Intermediate Modern Dance Technique: 2 semester hours**

Prerequisites: 2.0 credit hours of TH DAN 1008 or consent of instructor. Modern dance movement, technique, vocabulary, and aesthetics. Course of study will be a continuation of Beginning Modern Dance Technique through incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 10 credit hours.

**TH DAN 2020 Acting for the Camera: 3 semester hours**

An acting course that prepares the actor for work in front of a camera. Working with broadcast quality cameras, students will learn the art of language and expression. Students will learn the art and skill of communicating to an audience. Students also acquire the skills for working with other actors on camera, close-ups, working with props, continuity and hitting your mark.

**TH DAN 2112 Scene Study: 3 semester hours**

This course focuses on actor-training methodologies of Stanislavsky and other text-based approaches. Increases understanding of psychological motivation, concentration, focus of attention and clarity of physical expressiveness. Students prepare and present a minimum of three scenes.

**TH DAN 2195 Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor Provides practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 2196 Practicum In Scenery/Lighting/Sound In Theatre Production: 1-3 semester hours**

Prerequisites: TH DAN 1900 and Consent of Instructor. Course provides practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions or other approved independent study projects. Running crew work will involve evening, weekend and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2197 Practicum In Costume: 1-3 semester hours**

Practicum in costume construction, cutting, draping, millinery, fabric dyeing/painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime lab hours, occasional weekend and/or evening laboratory time will be required. Appropriate clothing, personal safety and sewing equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 2198 Practicum In Dance: 1-3 semester hours**

Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work will involve evening, weekend, and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 2210 Ensemble Acting: 3 semester hours**

Prerequisites: TH DAN 1210. A Laboratory acting course providing an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavsky-based actor training. Emphasis is paid to ensemble creations, physical characterization, cooperative methods and object performance. May involve practices and theories of Jerzy Grotowski, Augusto Boal, Jacques Lecoq, and/or Tadashi Suzuki.

**TH DAN 2241 Argumentation and Debate: 3 semester hours**

Prerequisite: COMM 1040, or COMM 1041, or consent of instructor. Principles of argumentation and debate with practice in preparing briefs and in delivering spoken arguments in formal debate. Emphasis on analysis of issues, logical reasoning, and audience analysis.

**TH DAN 2244 Introduction to Directing: 3 semester hours**

Prerequisite: TH DAN 2105. An overview of the analytical and creative processes that inform the director's work. Students engage in a close examination of texts, key concepts, and directorial choices in staged performances, opera, films, and video. Students will learn how to articulate responses to theatrical/film work, create and present projects, understand the history and role of the director, and unlock the imagination as an interpretive artist.

**TH DAN 2250 Scenic Fabrication: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. A survey of the theories, terminology, and practices of professional methods and equipment of scenic and properties fabrication, painting, and rigging. Students will learn current professional techniques in wood, metal, and plastic fabrication including the operation and programming of CNC production machinery. Course includes practical application through 45 hours of lab work in conjunction with department productions. Personal safety equipment will be required.

**TH DAN 2252 Costume Design I: 3 semester hours**

Prerequisites: TH DAN 1910 or consent of the instructor. Introduces students to the costume design process including researching costumes, techniques in rendering and painting for costume design, required paperwork for the costume designer, and the understanding of fabrics. Students will use introductory skills to create practical costume design projects.

**TH DAN 2260 Introduction To Theatrical Costume Production: 3 semester hours**

A survey of the theory, practices and vocabulary of theatrical costuming; the visualization and realization of the costume through the arts of pattern cutting; the construction techniques; draping; dyeing, painting, and distressing. Course includes practical application of techniques through required 45 hours of lab work in conjunction with current department productions.

**TH DAN 2270 Audio Recording for Live Production: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. This course is intended to provide an introduction to audio systems. It will include exposure to waveforms and the physical qualities of sound, as well as audio signal flow in analog and digital systems. The course is also an introduction to acoustics, both indoors and out, microphone theory and proper use, design and placement of speakers, microphones and audio recording equipment.

**TH DAN 2290 2D and 3D CAD for Live Performance: 3 semester hours**

Prerequisites: TH DAN 1900 or consent of instructor. Survey course covering the fundamental techniques of two- and three-dimensional computer aided drafting and rendering.

**TH DAN 2300 Stage Management: 3 semester hours**

Prerequisite: Consent of instructor. Course develops fundamental stage management skills needed to supervise all operative aspects of play production from auditions through performance. These skills include: interpersonal and leadership skills, conflict resolution techniques, venue and staff management/scheduling, and technical script analysis. Course includes production experience.

**TH DAN 2800 History of Costumes: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the Western history of costumes through the cultural, historical, and political influences on fashion from primitive times to the present.

**TH DAN 2810 History Of World Theatre And Drama Through The Restoration: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of the history of influence of different cultures, traditions, and technologies on development of theatre as a social institution. History of Theatre and drama from ancient cultures to the Restoration period. Ritual and religious drama. Study of the origins of theatre and drama from oral tradition, myth, storytelling, Shamanism and collective ritual, Greek festival drama, and cloister drama of different cultures. Rise of secular drama, the traditions of classical Greek theatre. Study of the Renaissance, and drama in Europe, Asia, Africa, and the New World.

**TH DAN 2820 History Of World Theatre & Drama From 18Th C To Contemporary Time: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. History of theatre from 18th century to contemporary times. Survey of history of influence of different cultures, traditions, and technologies on the development of theatre as a social institution. Study of realism and subsequent departures from realism in theatre, drama and performance.

**TH DAN 2840 History Of Dance To The 19Th Century: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance from pre-history through the middle ages and renaissance to 19th century. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression.

**TH DAN 2841 History Of Dance From The 19Th Century To Contemporary Times: 3 semester hours**

Prerequisites: TH DAN 1800 or consent of instructor. Survey of western dance practice from 1850 to the present. History of modern dance: art dance from Isadora Duncan to Martha Graham.

**TH DAN 3006 Advanced Ballet Technique: 2 semester hours**

Prerequisites: TH DAN 1006 and consent of instructor. Advanced ballet movement, technique, vocabulary, and aesthetics with particular focus on precision and performance. Course of study will include advanced barre exercises, center work, and across the floor progressions. Variations, partnering, and pointe work may be incorporated at the discretion of the instructor. Dance attire and ballet slippers will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3007 Advanced Jazz Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1007 and consent of instructor. Advanced jazz dance movement, technique, vocabulary, and aesthetics with particular focus on personal movement style and performance. Study of unique dance styles and artists that have influenced the stage, video, film and commercial and media industry. Dance attire and jazz shoes will be required. Course may be repeated for up to 6 credit hours.

**TH DAN 3008 Advanced Modern Dance Technique: 2 semester hours**

Prerequisites: TH DAN 1008 and consent of instructor. Advanced level of modern dance movement, technique, vocabulary, and aesthetics. Incorporation of more complex movement and patterns. Emphasis on accuracy and performance will be explored. Dance attire is required. Dance shoes are not required. Course may be repeated for up to 6 credit hours.

**TH DAN 3009 Dance Choreography For The Stage, Television And Film: 3 semester hours**

Prerequisites: 4 Credit Hours of any level and combination of TH DAN 1006, TH DAN 1007, TH DAN 1008, TH DAN 2006, TH DAN 2007, TH DAN 2008, TH DAN 3006, TH DAN 3007 and TH DAN 3008. Course will focus on directed movement studies and composition techniques for the stage, television, and film. Personal creativity and original movement inventions will be explored, as well as the creation, development, and transformation of original movement studies into completed works. Dance attire and dance shoes are required. Course may be repeated for up to 6 credit hours.

**TH DAN 3060 Advanced Theatre Workshop: 1-2 semester hours**

Prerequisites: TH DAN 1060, TH DAN 1900 and Consent of instructor. Practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3195 Advanced Practicum In Performance Studies: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

**TH DAN 3196 Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides advanced practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work may involve evening and weekend assigned times. Additional daytime hours will vary according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3197 Advanced Practicum In Costume: 1-3 semester hours**

This course provides advanced practical experience in costume construction, cutting, draping, millinery, fabric dyeing/ painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime Lab hours, occasional weekend and/or evening laboratory time may be required. Appropriate clothing and personal safety equipment will be required. Personal equipment will be required. Course may be repeated for up to 8 credit hours.

**TH DAN 3198 Advanced Practicum In Dance: 1-3 semester hours**

Prerequisite: Consent of instructor. Course provides practical experience in dance, stage movement, stage combat, choreography and/or running crew work in conjunction with departmental productions, or other approved independent study projects. May involve additional hours including evening and weekend assigned times. Credit will be based on the scope of the project. Course may be repeated for up to 6 credit hours.

**TH DAN 3211 Period Styles of Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. The course will expose students to the rigorous analytical, physical, intellectual, and vocal demands of acting within a specific historical period. Students will focus on monologue and scene study from the following: Greek Tragedy, Spanish Golden Age, Elizabethan Theatre, Restoration Comedy, Italian Commedia, French Farce, and British comedy of Manners with a special focus on style distinctions between each.

**TH DAN 3218 Shakespeare and Verse Acting: 3 semester hours**

Prerequisites: TH DAN 1210, TH DAN 2210. An intermediate acting course designed to engage students in Shakespeare's dramatic works from the point of view of the actor. Through text analysis, scene study, vocal work, and acting exercises, students explore the meaning, music and theatrical power of Shakespeare and other playwrights. Topics explored include: blank verse acting, line breath support, scansion, phrasing, word emphasis, antithesis, and imagery.

**TH DAN 3250 Costume Crafts: 3 semester hours**

Prerequisites: TH DAN 2260 or Consent of the Instructor. Develop the skills and techniques needed to execute crafts used in costume design including millinery, mask making, fabric painting and dyeing, wig manipulation, armor, and other craft work. Course may be repeated for up to 6 credit hours.

**TH DAN 3252 Costume Design II: 3 semester hours**

Prerequisites: TH DAN 2252 and TH DAN 2260, or consent of instructor. Content of course includes study of theories, styles, visualization of ideas, and techniques of costume design; discussion of principles of design, script analysis, the collaborative roles of designers in the theatrical production; research, and exploration of character representation; study of the human figure, drawing, and rendering techniques.

**TH DAN 3257 Makeup For Theatrical Productions: 2 semester hours**

Prerequisites: TH DAN 1800, TH DAN 1910, or consent of instructor. The art of makeup and its relation to production. Overview of European history and tradition of makeup. Theory, history and the practice of makeup traditions for theatre, dance and performance will be included.

**TH DAN 3260 Digital Scenography: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2250, TH DAN 2290, or consent of instructor. Survey of the professional theories and practices of scenography for live performances. This course emphasizes a digital creative process including digital sketches, CAD, three-dimensional modeling, digital rendering, and collaboration.

**TH DAN 3261 Digital Lighting Design: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, TH DAN 2280, or consent of instructor. Survey of the theories and techniques of digital lighting design and 3D visualization for live performance. This course will emphasize current and emerging digital design practices used by professional lighting designers including 3D visualization, CAD, software-based paperwork creation and management, and collaboration in the digital age.

**TH DAN 3263 Techniques in Scenic Finishes: 3 semester hours**

Prerequisites: TH DAN 1900, TH DAN 1910, or consent of instructor. Survey of theories, materials, and professional techniques used in finishing fabricated scenery. This course will focus on traditional scenic painting, faux finishing techniques, digital graphics production and application, and design and production of digitally printed and cut drops. Course includes practical application through 45 hours of lab work in conjunction with departmental productions and class projects.

**TH DAN 3305 Writing For Performance: 3 semester hours**

Prerequisite: Consent of instructor. Introduction to writing for performance, including playwriting and dramatic adaptation. Students' particular interests will determine course content: ranging from sketch comedy or adaptation of literature for the stage, to full-length comic or dramatic plays. This course is writing intensive and may require additional laboratory hours.

**TH DAN 3399 Stage Combat: 3 semester hours**

Prerequisites: Junior or Senior standing, or consent of instructor. This is a movement course designed to expand the acting student's awareness of the body as a vehicle for the communication of emotion, action, and drama on the stage. It will introduce the skills and techniques necessary for the creation of safe and effective illusions of violence for the stage.

**TH DAN 4020 Directing for the Camera: 3 semester hours**

Prerequisites: TH DAN 2020. This directing course prepares the student director to work with both the actors and the cinematographer to achieve the directorial concept. The director will work with actors and a cinematographer to produce a short-length film/video from a prepared script. The creation of shooting scripts, story boards, and a shooting schedule are covered in the course.

**TH DAN 4040 Special Topics in Theatre: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Theatre. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4041 Special Topics in Dance: 1-6 semester hours**

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Dance. Course may be repeated for up to 12 credit hours, provided the topic is different.

**TH DAN 4220 Directing For The Theatre: 3 semester hours**

Prerequisites: TH DAN 1210 or consent of instructor. A survey of the theories and practices of theatrical directing, beginning with the theories and techniques of accomplished directors. The stage director's role in performance development will be studied through script analysis, production planning, and the rehearsal process, culminating with a live performance. Final projects are laboratory scenes or a short one-act play.

**TH DAN 4261 Advanced Projects In Design And Technology: 1-3 semester hours**

Prerequisites: TH DAN 1910 and consent of instructor. Provides opportunities for supervised advanced projects in theatre design or technology in conjunction with departmental productions, or other independent study projects. Credit assigned based on scope of project. Course may be repeated for up to 6 credit hours.

**TH DAN 4390 Theatre Internship: 1-3 semester hours**

Prerequisites: Junior level with consent of instructor. Provides opportunities for supervised projects in conjunction with off-campus professional theatre and/or dance companies in performance, management, design or technology. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4391 Dance Internship: 1-3 semester hours**

Prerequisites: Junior level with Consent of instructor. Provides credit for approved supervised projects in conjunction with off-campus professional theatre and/or dance companies. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

**TH DAN 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours**

Same as SEC ED 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communication or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989: Secondary Professional Internship. This course must be completed in residence. Not available for graduate credit.

**TH DAN 4900 Senior Project: 3 semester hours**

The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty.

## Theory and Composition

### Courses

**THRY COM 1190 Fundamentals Of Music: 3 semester hours**

This course provides basic music vocabulary: scales, intervals, and chords, and systematic instruction in the melodic, rhythmic, and harmonic aspects of music. This course will not apply toward requirements for a music major.

**THRY COM 1300 Introduction to Music Theory: 1 semester hour**

This course introduces the basic vocabulary of music notation and theory and rudimentary skills of ear training and sight singing. This course must be taken concurrently with THRY COM 1301, but may be waived on the basis of a successful score on the Theory Placement Exam.

**THRY COM 1301 Theory Of Music I: 3 semester hours**

Prerequisite: Consent of department. This course introduces the basic materials of music as well as species counterpoint and diatonic harmony. Concurrent registration in THRY COM 1300 is required unless waived on the basis of a successful score on the Theory Placement Exam. Concurrent registration in THRY COM 1302 is required for music majors and minors.

**THRY COM 1302 Aural Training I: 1 semester hour**

Prerequisite: Consent Of Department. Systematic instruction in ear training and sight singing of all material covered in THRY COM 1301. Includes diatonic melodic and rhythmic dictation, chord quality recognition, sight singing of diatonic melodies, and the reading of units and divisions of units in simple and compound meters. Concurrent registration in THRY COM 1301 is required for music majors and minors.

**THRY COM 1311 Theory Of Music II: 3 semester hours**

Prerequisite: THRY COM 1300, THRY COM 1301, and THRY COM 1302 or consent of department. This course continues the study of diatonic harmony begun in THRY COM 1301. Harmonic function, phrase structure, harmonic sequences, secondary dominants, and simple modulation. Concurrent registration in THRY COM 1312 is required for music majors and minors.

**THRY COM 1312 Aural Training II: 1 semester hour**

Prerequisite: THRY COM 1301 and THRY COM 1302 or consent of department. The systematic instruction in ear training and sight singing begun in THRY COM 1302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 1311. Concurrent registration in THRY COM 1311 is required for music majors and minors.

**THRY COM 2301 Theory Of Music III: 3 semester hours**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. This course begins the study of chromatic harmony and form in music of the eighteenth and nineteenth centuries. Concurrent registration in THRY COM 2302 is required for music majors and minors.

**THRY COM 2302 Aural Training III: 1 semester hour**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. Systematic instruction in ear training and sight singing of THRY COM 1312 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2301. Concurrent registration in THRY COM 2301 is required for music majors and minors.

**THRY COM 2311 Theory Of Music IV: 3 semester hours**

Prerequisites: THRY COM 2301 and THRY COM 2302 or consent of department. This course continues the study of chromatic harmony of late nineteenth-century music, as well as the analysis of larger musical forms. Additionally, this course focuses on developing the ability to communicate analytical observations effectively in both written and spoken formats. Concurrent enrollment in THRY COM 2312 is required for all music majors and minors.

**THRY COM 2312 Aural Training IV: 1 semester hour**

Prerequisite: THRY COM 2301 and THRY COM 2302 or consent of department. The systematic instruction in ear training and sight singing of THRY COM 2302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2311. Concurrent enrollment in THRY COM 2311 is required for all music majors and minors.

**THRY COM 3110 Analysis Of Music from 1900 to Present: 2 semester hours**

Prerequisite: THRY COM 2311 / THRY COM 2312 or consent of department. This course primarily provides a study of compositional devices in atonal and serial music since 1900.

**THRY COM 3120 Tonal Counterpoint: 2 semester hours**

Prerequisite: THRY COM 2311 and THRY COM 2312; or consent of department. Study of tonal counterpoint with emphasis on the eighteenth century style. Composition in two and three parts.

**THRY COM 3130 Advanced Analytical Techniques: 2 semester hours**

Prerequisites: THRY COM 2311/THRY COM 2312. Close analysis, seminar discussion, and focused theoretical/analytical study of selected compositions. Repertoire studied changes from year to year at discretion of instructor.

**THRY COM 3140 Readings in Music Theory: 2 semester hours**

Prerequisites: THRY COM 2311 and THRY COM 2312. An introduction to the primary areas of research in the field of music theory. This seminar-style course will include readings and discussion of a number of important writings in music theoretical areas including, but not limited to the following: tonal theory, post-tonal theory, mathematics and music, music cognition, and the history of music theory.

**THRY COM 3300 Seminar In Composition: 2 semester hours**

Prerequisite: THRY COM 3110 or consent of instructor. The study of composition in theory and practice.

**THRY COM 3310 Studio Composition: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312, or consent of department. Individual lessons in music composition. Course may be repeated for credit.

**THRY COM 3410 Orchestration: 3 semester hours**

Prerequisite: THRY COM 2311 or consent of instructor. Study of the instruments of the brass, woodwind, percussion, and string families; scoring, transcription, and arranging for various instrumental ensembles.

**THRY COM 3420 Choral Arranging: 2 semester hours**

Prerequisites: THRY COM 2311 or consent of department. Study of vocal ranges, characteristics and capabilities at various ages and scoring for choral ensembles comprised of singers in these varying stages of vocal development.

**THRY COM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**THRY COM 5110 Scoring And Arranging: 3 semester hours**

Prerequisite: Graduate Standing In Music. Experience In Scoring And Arranging Music For A Variety Of Ensembles.

## Courses

**THRY COM 1190 Fundamentals Of Music: 3 semester hours**

This course provides basic music vocabulary: scales, intervals, and chords, and systematic instruction in the melodic, rhythmic, and harmonic aspects of music. This course will not apply toward requirements for a music major.

**THRY COM 1300 Introduction to Music Theory: 1 semester hour**

This course introduces the basic vocabulary of music notation and theory and rudimentary skills of ear training and sight singing. This course must be taken concurrently with THRY COM 1301, but may be waived on the basis of a successful score on the Theory Placement Exam.

**THRY COM 1301 Theory Of Music I: 3 semester hours**

Prerequisite: Consent of department. This course introduces the basic materials of music as well as species counterpoint and diatonic harmony. Concurrent registration in THRY COM 1300 is required unless waived on the basis of a successful score on the Theory Placement Exam. Concurrent registration in THRY COM 1302 is required for music majors and minors.

**THRY COM 1302 Aural Training I: 1 semester hour**

Prerequisite: Consent Of Department. Systematic instruction in ear training and sight singing of all material covered in THRY COM 1301. Includes diatonic melodic and rhythmic dictation, chord quality recognition, sight singing of diatonic melodies, and the reading of units and divisions of units in simple and compound meters. Concurrent registration in THRY COM 1301 is required for music majors and minors.

**THRY COM 1311 Theory Of Music II: 3 semester hours**

Prerequisite: THRY COM 1300, THRY COM 1301, and THRY COM 1302 or consent of department. This course continues the study of diatonic harmony begun in THRY COM 1301. Harmonic function, phrase structure, harmonic sequences, secondary dominants, and simple modulation. Concurrent registration in THRY COM 1312 is required for music majors and minors.

**THRY COM 1312 Aural Training II: 1 semester hour**

Prerequisite: THRY COM 1301 and THRY COM 1302 or consent of department. The systematic instruction in ear training and sight singing begun in THRY COM 1302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 1311. Concurrent registration in THRY COM 1311 is required for music majors and minors.

**THRY COM 2301 Theory Of Music III: 3 semester hours**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. This course begins the study of chromatic harmony and form in music of the eighteenth and nineteenth centuries. Concurrent registration in THRY COM 2302 is required for music majors and minors.

**THRY COM 2302 Aural Training III: 1 semester hour**

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. Systematic instruction in ear training and sight singing of THRY COM 1312 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2301. Concurrent registration in THRY COM 2301 is required for music majors and minors.

**THRY COM 2311 Theory Of Music IV: 3 semester hours**

Prerequisites: THRY COM 2301 and THRY COM 2302 or consent of department. This course continues the study of chromatic harmony of late nineteenth-century music, as well as the analysis of larger musical forms. Additionally, this course focuses on developing the ability to communicate analytical observations effectively in both written and spoken formats. Concurrent enrollment in THRY COM 2312 is required for all music majors and minors.

**THRY COM 2312 Aural Training IV: 1 semester hour**

Prerequisite: THRY COM 2301 and THRY COM 2302 or consent of department. The systematic instruction in ear training and sight singing of THRY COM 2302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2311. Concurrent enrollment in THRY COM 2311 is required for all music majors and minors.

**THRY COM 3110 Analysis Of Music from 1900 to Present: 2 semester hours**

Prerequisite: THRY COM 2311 / THRY COM 2312 or consent of department. This course primarily provides a study of compositional devices in atonal and serial music since 1900.

**THRY COM 3120 Tonal Counterpoint: 2 semester hours**

Prerequisite: THRY COM 2311 and THRY COM 2312; or consent of department. Study of tonal counterpoint with emphasis on the eighteenth century style. Composition in two and three parts.

**THRY COM 3130 Advanced Analytical Techniques: 2 semester hours**

Prerequisites: THRY COM 2311/THRY COM 2312. Close analysis, seminar discussion, and focused theoretical/analytical study of selected compositions. Repertoire studied changes from year to year at discretion of instructor.

**THRY COM 3140 Readings in Music Theory: 2 semester hours**

Prerequisites: THRY COM 2311 and THRY COM 2312. An introduction to the primary areas of research in the field of music theory. This seminar-style course will include readings and discussion of a number of important writings in music theoretical areas including, but not limited to the following: tonal theory, post-tonal theory, mathematics and music, music cognition, and the history of music theory.

**THRY COM 3300 Seminar In Composition: 2 semester hours**

Prerequisite: THRY COM 3110 or consent of instructor. The study of composition in theory and practice.

**THRY COM 3310 Studio Composition: 1 semester hour**

Prerequisites: THRY COM 2311 and THRY COM 2312, or consent of department. Individual lessons in music composition. Course may be repeated for credit.

**THRY COM 3410 Orchestration: 3 semester hours**

Prerequisite: THRY COM 2311 or consent of instructor. Study of the instruments of the brass, woodwind, percussion, and string families; scoring, transcription, and arranging for various instrumental ensembles.

**THRY COM 3420 Choral Arranging: 2 semester hours**

Prerequisites: THRY COM 2311 or consent of department. Study of vocal ranges, characteristics and capabilities at various ages and scoring for choral ensembles comprised of singers in these varying stages of vocal development.

**THRY COM 4000 Directed Studies: Variable Topic: 1-5 semester hours**

Prerequisites: Consent of Instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

**THRY COM 5110 Scoring And Arranging: 3 semester hours**

Prerequisite: Graduate Standing In Music. Experience In Scoring And Arranging Music For A Variety Of Ensembles.

## Vision Science

### Courses

**VIS SCI 6400 Sensory Processes And Perception: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor. Current views on the encoding of various aspects of the visual stimulus (intensity, space, time, and wavelength) that give rise to the perceptions of brightness, contour, motion and color will be considered in this course. The psychophysical tools available to examine visual encoding will be emphasized. Other topics will include binocular vision and depth perception, information processing approaches to visual pattern recognition, and the similarities and interactions of the visual system with the other sensory modalities.

**VIS SCI 6401 Visual Optics: 3 semester hours**

Prerequisite: graduate standing in vision science or consent of instructor. This course deals with the optical properties of the eye. Included are a review of general optics including physical optics, paraxial and nonparaxial geometric optics, image quality, radiometry and photometry, and optical instrumentation. Topics in visual optics will include schematic eyes, measurement of the refractive errors, visual axes, spectral absorption by the ocular media, and the optical performance of the eye.

**VIS SCI 6402 Ocular Anatomy And Physiology: 3 semester hours**

Prerequisite: graduate standing in vision science or consent of instructor. The structures and fluids of the eye and orbit, their interactions and functions are considered in this course. Specific topics include the eyelids. Tearfilm, conjunctiva, cornea. Iris, ciliary body, vasculature, aqueous humor, vitreous body, and the retina.

**VIS SCI 6403 Psychophysical Methods And Experimental Design: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor. Advanced methodology for the design and analysis of experiments in a variety of areas of visual science are considered in this course. Both basic and applied topics will be considered. Special emphasis will be placed on psychophysical methodology, signal detection analysis, and scaling techniques.

**VIS SCI 6404 Sensory Neuroscience: 3 semester hours**

Prerequisite: Graduate standing in vision science or consent of instructor.

This course will deal with the neural organization of the sensory system with an emphasis on vision. It will include a review of general neurophysiology and neuroanatomy as they relate to the processing of environmental stimuli into neural information as well as experimental approaches utilized in neurobiology. Topics to be covered include: neural transduction and sensory coding by receptors and neurons, constraints on perception defined by the functional organization of the nervous system, sensory development and plasticity as related to neural development, and evolution of sensory systems.

**VIS SCI 6405 Neuroanatomy: 5 semester hours**

Prerequisite: Graduate standing. Detailed gross and microscopic anatomy of the human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system. Students may not receive credit for both VIS SCI 6405 and OPTOM 8040.

**VIS SCI 6406 Geometric Optics: 5 semester hours**

Prerequisite: Graduate Standing. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined. A student may not receive credit for both VIS SCI 6406 and OPTOM 8020.

**VIS SCI 6470 Individual Studies In Vision Science: 2 semester hours**

Prerequisite: Consent of instructor. This course designation can be used to cover a variety of topics in visual science. In general, very specific topics of limited interest will be presented as individual studies. Individual studies and advanced topics enable the student's course of study to be sharply tuned to his or her major area of interest.

**VIS SCI 6490 Graduate Research In Vision Science: 1-15 semester hours**

Prerequisite: Consent of instructor. Research in an area selected by the student in consultation with faculty members. May be taken to a maximum of ten hours for the M.S. and 15 hours for the Ph.D.

**VIS SCI 6497 Interdisciplinary Geriatric Care: 3 semester hours**

Same as GERON 6497. Prerequisites: Consent of instructor. Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

**VIS SCI 6499 Current Topics In Optometry And Vision Science: 1 semester hour**

Prerequisite: Consent of instructor this seminar course examines and analyzes current publications in eye care and vision research.
