Vol. 7 No. 17

FULTON, KY. MARCH 13, 1931

R. S. Williams, Publisher

Health Dept. Inspect Schools

The yearly inspection of the school children by the health department is an effective step toward the betterment of the health and the lengthening of life if the parents will heed the advice which is sent home by each child regarding his defects and present condition. The purpose of these inspections is to head off weakness and disease by pointing out to his parents the early indications of their approach, and its object is to keep the child well. In a recent inspection of Fulton City School 712 pupils were inspected and 332 were over 7 per cent underweight, which means that one-half of all the white children attending school here, lacking 24 pupils, were underweight enough to cause grave concern on the part of their parents, for underweight is the most fertile ground we have for the development of tuberculosis, as well as many other disease-bearing germs. It is sometimes more dangerous to be run into by a microbe than a trolley car, and being underweight is one of those causes. It is up to the mothers in this city to see that this appalling number of underweights is corrected this year. In an effort to help parents understand some of the essentials of the physical fitness of a child the State has adopted the following standard for blue ribbon school children, and on National Child Health Day, May 1st, a blue ribbon is presented to each child who has attained this standard. Will you not begin now to help your child to receive this award on May 1st, 1931?

1. Normal weight for the height and age.
2. Good posture, meaning A or B.
3. Normal teeth or defects corrected.
4. Normal throat or defects corrected.
5. Normal vision or defects corrected.
6. Smallpox immunization.
7. Toxin-antitoxin to prevent having diphtheria if child is under 10 years of age.
8. Capable of passing grade in school.

No more valuable gift can be bestowed on your child than good health habits and freedom from physical defects.

The blue ribbon pupils in Fulton High School for the time are: Edith Bell Smith, John Campbell, Thomas McGee, James Henderson. For the second time: Oscar Cobb, Edward Pewitt and Millie Mitchell; and the following were blue ribbon for the first time: Rudolph Brock, William Cheniac, Philip Hill, Robert St. John, Audrilla Watts, Helen Watts, Christine Holt, Robert Batts, Durwood Binkley, Harry Brady, Miller Burgess, Chas. Campbell, Jimmie Jolley, Robert Thompson, Robbie L. Crafton, Elva Davis, Gilbert Cheniac, Sneddon Douglas, David Henderson, Charles Henderson, Harold Muzzall, Mary Bowers, Marie Holloway, Ernest Fall, Herman Grymes, Ward Johnson, Harry Jonnakin, Ernest Khourie, Floyd Putnam, Isaak Reed, Harold Binkley, Wendell Binkley, Gordon Buckingham, Glenn Dunn, William Edward, Julian Henderson, Leslie Walker; Edward Pewitt, Jimmy Jolly and Ernest Fall have a posture meaning excellent.

The Carr Institute blue ribbon pupils for the third time are: Nell Genung, Maxine McGee, Mary Wayne, Evelyn Davis, Inez Shelby, Majorah Walker, L. H. Cook, Ronald Grogan, Mary Francis Page, Nell Buckingham. Third time: Edith Carver, Janice Puckett, Francis Davis, Ruth Small, Ruth Nall, Thelma Beard; and

those for the second time: Carolyn Atkins, Bobbie Taylor, Felix Gossum, Dorothy Jane Cole, Covita Brown, Mildred Grissom, Mildred Scott, Earl Taylor, Margarite Clark, Hugh Earle, Willis Atterberry, Virginia Brooks, Sunshine Shupe, Jane Scates, Martha Maupin, William Scott, Walter Byars, Susye Fall, Emma Francis Wilkins, Schiefe Haman; and the following for the first time: Virginia Barker, Myrtle Brien, Joseph Westerman, Dave Lovelace, Francis Wiseman, William Mungar, Robert Stevenson, Lucile Smith, Mary Lowe, Ruth Marsh, John Jones, Helen Khourie, Harvard Waken and Tyrus Wade.

The blue ribbon pupils in the Terry-Norman School for the second time are: Ruth Sanders, Ellen Jane Pursell, Jarell Stockdale, Winnie Price, Eugene Mullins, Jimmie Carroll, Howard Armbruster, Wilo Dean Simpson; for the first time: Billie Reed, Milton Crawford, Merville Mullins, Howard Stansberry, Carl McKenney, Mozelle Boaz and Ann Murrell Whitnell.

There are 45 blue ribbon pupils in Fulton High—9 girls and 36 boys; 51 in Carr Institute—16 boys and 35 girls, and 15 in Terry Norman—9 boys and 6 girls; a total of 111, or 61 boys and 50 girls.

REGIONAL AT MURRAY

Coach Carlisle Cutchin, tournament chairman, of Murray State College announced today that plans have been completed for the entertainment of the 16 high school basketball teams which shall compete in Region One as guests of the college Friday and Saturday, March 13-14.

The winners and runners-up from Districts One, Two, Three and Four will participate in the regional at Murray to decide upon the contestants who shall go to the State meet.

The proceeds from gate receipts at Murray in previous years have been sufficient to defray the traveling and entertainment expenses of all participating teams, according to Chairman Cutchin.

The Murray gymnasium-auditorium will seat approximately 3000 and is equipped with one of the best playing floors in Kentucky. A modern press-box with a score-board is an added feature that enhances the value of the gymnasium.

The contestants at Murray will be the winners and runners-up in the district meet at Murray, Fulton, Mayfield and Princeton.

The Tolu boys' quintet defeated Tilghman of Paducah last year 42-26 at Murray to win the regional. The girls' team of Bardwell won its third victory in the regional by defeating Hopkinsville 31-18.

RED CROSS

GARDEN SEED

The local chapter of the Red Cross received a shipment of garden seed this week to be given the families of Fulton and that part of the county east of the Mobile and Ohio Railroad. Instructions have been given the chapter here to give each family which has received aid one of these packages, provided the persons will make proper preparation to plant and cultivate a garden. An extra supply of seed was sent along to be given such other families as the chapter is convinced needs such assistance. The Red Cross hopes that the people in general will make their greatest effort this year to grow a garden, and then can and preserve the surplus for the next winter.

The Rookie

Brieflets

Most Fulton people would be lots happier if they didn't put in so much time worrying over whether they are as happy as they might be.

When you see a woman in a deep brown study she is usually trying to figure out how she can make a neighbor green with envy.

An eastern editor asks "What has become of the old tuning fork?" It probably went along to join the old-time tunes.

The Fulton man who is looking for a good wife, takes no chances on a girl who includes kitchen aprons in her "hope chest."

A successful man is one who works like the dickens to get rich and then spends the rest of his life sitting on the porch of a sanitarium watching the healthy poor go by.

When a married man learns to love another woman it is usually because his wife makes the lessons easy.

Fulton mothers can tell you that women will never be fully emancipated until some genius invents a machine that will wash and dress small children.

Habit gets the best of some men. Many a man that worked his way through college is now working his son's way through.

A "go-getter" to day is one who knows what corner Prosperity is hiding behind and goes around and gets it.

The only time some Fulton wives are willing to listen to what their husbands have to say is when they are talking in their sleep.

Fashion reports that green will be the stylish color for men's suits this spring, but it will take the long green to buy them.

There are lots of fellows around Fulton who can remember the time when a woman didn't think that anything between two slices of bread constituted a sandwich.

The automobile not only shortens distance, but it frequently shortens the future.

The younger generation in and around Fulton don't care whether it catches up with happiness or not, so long as it has a good time pursuing it.

That judge who recently ruled that a husband should divide his salary with his wife is probably a bachelor.

"BACK SAVING KITCHEN" TRAINING SCHOOL

Miss Ida Hagman, Field Agent in Home Improvement from the University of Kentucky, instructed the Home Improvement leaders of Homemakers' Clubs on "Back Saving Kitchens" Thursday, March 5. Fourteen back saving devices were considered and will be discussed and illustrated at the Homemakers' Club meetings in March.

Mr. Matson, field agent in Rural Engineering, discussed installing simple water systems on the farm. He will be available for personal visits to farms where the farmer is interested in putting in a system.

Results from the Water and Sewerage Disposal survey taken in this county show a rather deplorable condition general in regard to sanitary conditions and water supply facilities.

C. of C. Continues The Good Work

A GOOD INVESTMENT

At a meeting of the Chamber of Commerce Tuesday night the following directors were elected for the ensuing year:

Arch Huddleston, T. M. Franklin, Joe Davis, Paul DeMyer, A. M. Nugent, Lon Jones, John Earle, E. C. Hardesty, Warren Graham, J. E. Fall.

It was decided that a paid secretary be eliminated for the time being and the budget reduced to maintain only the upkeep of the organization with an assistant secretary in charge.

It was estimated that something near \$1,000 of \$1,200 would finance the work that is proposed and on motion it was decided that every firm would be asked to pay 25 per cent of the dues formerly paid. That is, if a firm paid \$100 last year, the amount of dues this year would be \$25.00. A minimum fee of \$10.00 for business firms and \$6.00 for individual memberships will be charged. Committees were named to raise this budget.

Aquino, Tailoring and Cleaning Establishment In New Location

Aquino, tailoring and cleaning establishment, is now located in its new home on Commercial Avenue, in the building formerly occupied by the White Kitchen. It is one of the prettiest buildings on the avenue, conveniently located and admirably suited for the business with plenty of room and light. Since taking charge of the property Mr. Aquino has made numerous improvements, adding a new building in the rear and equipping his establishment with the newest and most modern machinery and appliances to turn out work with satisfying results.

Mr. Aquino is justly proud of his new place and extends a cordial welcome to everybody to call and inspect his new home and modernly equipped tailoring and cleaning plant.

the juniors by the members of the senior chamber, namely, Joe Davis, secretary; R. H. Wade, ex-mayor of Fulton, and Ernest Fall, local building and loan official.

The following officers were elected for 1931: Ed Slaughter, president; Abe Thompson, vice-president; Joe Hall, secretary; Foad Homra, treasurer. Board of directors were elected as follows: Vernon Owen, Olin Williams, Ed Slaughter, Joe Hall, Billy Carr, Abe Thompson, Foad Homra.

GOOD MAN PASSES AWAY

Again the death angel has entered our midst and called from his labor here on earth to his reward in heaven Frank C. Hodges, who had lived more than three score years on earth. He passed away early Monday morning, March 9, at his home in the northern suburbs. He was a member of a pioneer family of Hickman county and was highly esteemed, having lived near Clinton all his life at the old Hodges homestead until twenty years ago, when he moved to his late home near Fulton. He was the son of the late Eli and Martha Jane Seay Hodges, who were well known by early settlers of both Fulton and Hickman counties. He professed faith in Christ in early life and united with the Cumberland Presbyterian church at Mt. Zion in Hickman county, where he was a faithful member the remainder of his life.

He leaves to mourn his loss his widow, Mrs. Mary Louise Seay Hodges, four daughters, Mrs. Ernest Hindman who made her home with him, Mrs. Carnell Hancock, of Beelerton, Mrs. Robert W. Davis of near Fulton, Mrs. Merritt Milner of west of town, and two sons Sam Hodges and Bard C. Hodges of St. Petersburg, Fla., and a brother Eli P. Hodges of Clinton, with other relatives, and a host of friends. His last message to his wife was that he had been blessed of God, and was ready to go home. The funeral service was held at his boyhood home, Mt. Moriah church, near Clinton, Tuesday at 1 p. m., conducted by Rev. L. E. McCoy and Rev. E. S. Hick, and interment followed in the church cemetery, near by. The entire community extends sympathy to the bereaved.

JUNIOR CHAMBER ELECTS

Ed Slaughter Is President of Young Fulton Men's Body

The Junior Association of Commerce was definitely established Thursday night, March 5, at the local Chamber of Commerce rooms. Twenty-four young business men of Fulton met with directors of the chamber to effect the organization. Keen interest and enthusiasm has been manifested for some time for such an organization, and many helpful suggestions were offered

passengers in an airplane.

It would seem that about all that is necessary to complete our modern crime record is for some lone bandit to hold up the

BREAD AND WHEAT

Fulton citizens will watch with interest the outcome of the U. S. Senate's investigation to find out why bread prices have not come down with the decline in wheat. Since Senator Capper has pointed out that the farmer gets but one cent for the wheat that goes into an 8c loaf, a sub-committee on the Senate committee on agriculture is going to try to find out where the balance of it goes to.

There was a time in this country when the spread between what the producer received and what the consumer paid was nothing like as great as it is today. Then came the jobbers, and the middlemen, and the distributors, and the wholesalers and what-not, until today by the time every fellow gets through raking off a profit, the producer isn't getting as much as he once did, while the consumer is paying several times more. No one has ever been able to explain why there should be a wholesaler to sell to a jobber and a jobber to sell to a distributor and distributor to sell to a retailer before the retailer can get a chance to sell to the consumer. Yet everyone does know that it is combinations of this sort responsible for the present high-cost of everything we eat, drink, wear or use in our homes.

Nobody feels that the Senate committee will encounter very much trouble in locating the true answer to present conditions. But it would be hard to find anyone who believes that the producer and the consumer are going to benefit very much by the outcome of the investigation.

WHAT MAKES ACCIDENTS?

There were 32,500 people killed in auto accidents in the U. S. in 1930. There were 962,000 injured the same year. Now, a complete check-up of all these has been made, with the result that three-fifths, or 70 per cent of the total are traced directly to carelessness on the part of drivers. Road conditions are blamed for 20 per cent, and faulty brakes to the remaining 10 per cent. The three factors causing the largest number of deaths and injuries are given as failure to grant the right-of-way, exceeding the speed limit, and driving on the wrong side of the road or street. In other words, and as every Fulton motorist will do well to remember, carelessness caused 70 per cent of all accidents in 1930. All of which leads us to wonder why there should be any accidents at all from this source, since there is no law and no rule compelling anyone to be careless.

ALL MUST EAT

One principle must stand out clear and undisputed in these difficult times, and that is that nobody shall be permitted to starve as long as there is food in the whole country. That is a joint obligation of society and of the government. Picture a group of some 50 people on an island where some half-dozen have managed to accumulate stores of food while others are struck by drought or some other misfortune and left without anything to eat. The food on the island would be shared—either voluntarily or involuntarily. Society's obligation in this respect is recognized in the regular feeding of prisoners, no matter how scarce food may be. Decent people who have food are willing to share it with the unfortunate hungry, whether pay is forthcoming or not. If any are unwilling to share in such circumstances they will, if necessary, be compelled by the government to do so—or by the hungry ones obeying the first law of nature—self-preservation.

More than 73,000 miles in a New Ford

THE substantial worth of the new Ford is reflected in its good performance, economy and reliability. Its stamina and endurance are particularly apparent in sections where bad roads and severe weather put a heavy extra burden on the automobile.

In less than a year a new Ford Tudor Sedan was driven more than seventy-three thousand miles over a difficult route. The operating cost per mile was very low and practically the only expense for repairs was for new piston rings and a new bearing for the generator.

The car carried an average load of 1200 pounds of mail and was driven 250 miles daily. "The Ford has never failed to go when I was ready," writes one of the three mail carriers operating the car. "The starter did the trick last winter even at 34 degrees below zero. The gas runs about 20 miles per gallon. At times I pull a trailer whenever I have a bulky load."

Many other Ford owners report the same satisfactory performance. Every part has been made to endure — to serve you faithfully and well for many thousands of miles.

LOW PRICES OF FORD CARS \$430 to \$630

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

FEATURES OF THE NEW FORD

Attractive lines and colors, rich, long-wearing upholstery, sturdy steel body construction, Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, more than twenty ball and roller bearings, and bright, enduring Rustless Steel for many exterior metal parts. In addition, you save many dollars because of the low first cost of the Ford, low cost of operation and up-keep and low yearly depreciation.

"I wish we had a telephone! nobody asks us to go places"

Consider for a moment how much your name in this book will mean to you and your family. Your position in your community, your family's social activities, your opportunities to enjoy life require that you be always within quick and easy reach of your friends and business associates. A telephone in your home provides for these contacts.

In a home without a telephone, this is an often repeated complaint. And the children are not the only ones who feel the need for a telephone. Mother, too, is frequently inconvenienced and even embarrassed when forced to answer to friends who say "I'll call up some time" that "we haven't a telephone." Why continue to deprive yourself and family of the satisfaction and comfort of a telephone in your home? You too, can afford a telephone,

with all its convenience and protection in emergencies, for the cost is so low as to be within the reach of almost every one. Find out, today, how easy it is to have a telephone and how little it costs. Just call the Business Office, or see any telephone employe.

Betty's Lover From the Sky

By RUBY GRUBER

"MAY I see Jimmy Dalton, the aviator who was injured?" Betty Randall stood before the desk in the wide hospital corridor.

"I am sorry, but Mr. Dalton can have no visitors," spoke the attendant. "Is he seriously injured?" Betty asked anxiously, her eyes fast filling with tears.

The kind gray-haired woman at the desk hesitated, her voice sympathetic as she spoke. "Mr. Dalton is in the operating room. I have no later report than that. If you would care to wait, I will call you."

"Thanks, I will wait," Betty walked slowly to the door of the waiting room.

She crossed the threshold and sat down near the door. Directly across from her sat a man. He wore a leather coat, and Betty's eyes wandered to the leather cap with a chin strap, lying on the table—a fellow flyer, waiting to hear about Jimmy, her numbed brain reasoned.

"You have heard from Jimmy Dalton?" The voice of the young aviator startled her. She glanced up. He was advancing across the room with swift strides to the kind old lady from the desk who was standing in the doorway.

"Not yet," she smiled and went back to the desk.

"You know Jimmy?" timidly ventured Betty.

"He's my pal . . . and what a pal! Oh, God! I hope he comes out of it!" The weather-toughened face of the aviator was rigid, as he clinched his hand over the arm of the chair.

"You know him?" he turned to the girl.

"Yes," Betty answered. "Jimmy ever speak of Zip? . . . that's what he always called me."

"No, I . . . I . . . might as well tell you, I never heard him speak . . . only saw him . . ."

"What do you mean?" interrupted Zip. "You mean you are one of those aviator worshippers? Jimmy is pretty much of a grandstand fellow, but I didn't know he had a fan following. Of course, you are not just one of the mob of goofy hero-worshippers . . . Jimmy knows you?"

"Why yes . . . he sent me messages . . . oh, I might as well tell you all of it."

"Not unless you want to," Zip tried to appear unconcerned.

"I do want to. You see, I teach school up in the plains, and every morning as I was walking to school, a plane passed. Well, one morning the pilot leaned over and waved at me. Of course, I ignored it, as I should. A few mornings later, he dipped low in front of me away down to the trees and dropped the morning paper."

"For a week he dropped the papers regularly; then one morning a tiny parachute came floating down, and the most lovely roses were in the little basket! Candy, magazines, more flowers followed. Every morning, something different . . . and all so lovely!"

"And you learned to love him?" asked Zip, his gaze lingering on the troubled little face.

"I guess I do . . . I don't even know what he looks like . . . he always had on goggles and helmet."

"Jimmy is a handsome chap," admitted Zip.

"He is wonderful! He often wrote poems and stuck them in the flowers or marked a funny joke in a paper, and one time he wrote: 'I laughed at this; hope you do, too.'"

"That was an idea," Zip grinned.

"He always signed his poems, 'J. D.' Then, one morning the plane passed, but he didn't wave. I wondered about it all day, and then that night old Doctor Martin passed, coming out from Hillsburg. He stopped in at the farm house for supper, as is his habit, and in his argument against aviation, he spoke of a flyer having a bad crash that morning. I called the hospital, and learned the name of the flyer was Jimmy Dalton . . ."

"Mr. Dalton is resting very well, but the doctor says no visitors today. His wife is with him now," the kindly old lady smiled and left them.

"His wife?" Betty was dumfounded.

"Sure, Jimmy's married. Got a boy four years old," Zip admitted.

"Oh, why . . . what must you think of me?" Betty pulled her hat down over her eyes to hide the trace of tears. She must get out of here!

"I think you are adorable; and upon close inspection you look better than my fondest dream!" Zip was now standing before her, and trying to take her in his arms.

"Are you mad? Go away!" She pushed him with all her might.

"Mad about you. You see, dear, my name is Jack Drake, so why shouldn't I sign my poetical efforts 'J. D.'?"

"Oh, go away! I hate you . . . and your 'J. D.'s' and Jimmy and every thing!" Betty sobbed.

"Yesterday morning I was relieved to see a new pilot, as all the men familiar with the country were ordered to search for Jimmy, when he failed to come in, otherwise you would have known I wasn't Jimmy."

"And you wouldn't have heard my bold confession." A trace of a smile dashed around the lips of the little school teacher.

"I love you!" The tall aviator said. "Take me home, Zip," she murmured.

BACK OF THIS . . . 3 YEAR GUARANTEE is the name GENERAL ELECTRIC

IT IS SIGNED by one of the greatest electrical institutions in the world—the notable 3-Year Guarantee on the General Electric Refrigerator. General Electric guarantees every new purchaser against any upkeep expense for three long years! And always you are protected by the simple mechanism in the famous Monitor Top—hermetically sealed—self-oiled—lastingly quiet. Dust-proof, moisture-proof, and sinker-proof, the current-saving unit in the Monitor Top naturally shields you from upkeep. And now the 3-Year Guarantee signed by General Electric—becomes final conviction for thousands of buyers.

Come in yourself. Realize that prices have actually been reduced on all new models! Quickly all the General Electric economies will return your small down payment. And then the savings go on!

Cooking Kraut

A GREAT many people like sauerkraut, not only cold sauerkraut juice as a healthful drink, but the hot kraut itself as a tasty food. If you want to cook it in a casserole, which is a mighty good way, put some bacon fat in the bottom of the dish, then a layer of kraut, and continue to alternate the layers. Cook for several hours, and the result will have a rich meaty flavor which will make you ask for more. If there's any left, which isn't likely, put it in the refrigerator and use it as the basis for a salad the next day.

Simple Recipes

Here are a couple of simple recipes for both hot and cold sauerkraut.

Week-end Camping

A BRAND new business has grown up in the last few years—one which, in turn, has stimulated other branches of industry. The business of renting out camp sites to tourists has become a popular and lucrative industry, swelling the sales of camp accessories as well as camp food supplies.

As you motor along the highways from California to Maine and see the myriad signs "Camp Sites" with their backgrounds of khaki tents and campfires, you verily believe that the whole world is camping. Not only vacationists, but also those out only for the week-end, seem to have succumbed to the charm of broiling bacon over the open blaze and sleeping under summer skies. And why not, since the new equipment makes this the simple life indeed!

Equipment and Food
The ideal equipment for the motor trip is a small grub box, cook kit, collapsible grill, water canteen, and collapsible canvas water bucket which fits easily into the car or canoe. Aluminum is perhaps the handiest material for utensils; it is light to carry and can be bought in "nests"—small utensils packing into large ones—to save the precious inch of space.

And what foods tempt the hungry camper? Canned foods provide the most perfect camp eats since they are safeguarded against weather or insects until needed. Even frankfurters and bacon are available in cans and there are even-baked beans, ready to be heated, as well as corn on the cob—tender and more juicy than that dried out on the market shelves. "What shall we have for dessert?"—the camper cook's problem—is answered by an endless number of luscious canned fruits and berries which have only to be poured into dishes and served with tempting cookies.*

WHETHER YOUR BUILDING REQUIREMENTS are large or small, regardless of your plans and ideas in this line, our experience is freely at your service.

If you tell us what you want to accomplish often times we can suggest plans for saving you money and serving your purpose better.

Whether you buy of us or not, we want everyone in this community who has a need in our line to come to us freely for building advice.

Old World Recipes *By Helen Schaeffler Domestic Science Expert*

TO most of us old China means incredibly lovely bits of pottery, delicate color prints, gorgeous silks and intricately embroidered fabrics, along with fragments of lovely poetry. Many of us do not know that these ancients were also epicures of the highest order. We are under the impression that the Chinese have subsisted since before Confucius upon chowmein, chop suey and rice, with now and then a bird's nest soup. As a matter of fact, their diet presents a bewildering variety, ranging all the way from peacocks' tongues to the most delicious pork dishes, recipes for three of which are given here.

Helen Schaeffler

water, one-half teaspoon of lemon juice and a small piece of preserved ginger for each chop. Cook uncovered until tender. Do not turn the chops.

Roast Pork with Chestnuts—Wipe four pounds of loin of pork. Pepper well and dredge with a little flour. Shell and peel two cups of chestnuts. Peel and cut into small quarters two cooking apples. (One cup of dried apples may be substituted). Boil these for five minutes in two cups of water with two tablespoons of sugar. When the roast has been in the oven for three-quarters of an hour surround it with chestnuts and apples. Pour the syrup over the whole. Baste frequently until pork is brown and tender.

Pork Chops Baked with Pineapple—Cover the bottom of a shallow baking dish with slices of fresh or canned pineapple. Sprinkle with two tablespoons of sugar. On top of these lay peppered pork chops. Place in a hot oven for ten minutes. When the pork fat has fried out a little, salt well and pour pineapple juice sweetened with one teaspoon of sugar over the chops. Bake from twenty to thirty minutes. Garnish and serve.

Pork Chops with Ginger—Pepper loin chops and dredge in flour which has been mixed with one tablespoon of sugar. Sauté with a little fat until brown on both sides. Add to the chops, salt, one cup of

Current Wit and Humor

A CRITICISM

Lady Kannard, about to return home on the Mauretania, was asked what she thought of the new summer fashions.

"I'll answer your question," she said, "by telling you a story. Two men were talking on a boat.

"You can tell a girl's character," the first man said, "by her clothes."

"Oh, no, George," said the other man. "Oh, dear, no. Girls have more character than that."

REAL NICE FELLOW

"I hear you met that brilliant young painter. Is he very artistic?"
"No, not at all. He is really a very nice fellow."

Making Life Interesting

A monarch may himself amuse
With lack of great propriety
And so rejoice us with the news
Of doings in society.

A Superfluous Accomplishment

Friend (who has been admiring baby)—Can he walk yet?
Extremely Rich Mother—Not yet, but, of course, there will never be any real necessity for him to do much walking.

No Place for Trousers

"You have such a smart overcoat that I cannot understand why you have such wornout trousers."
"Now, how can a man get new trousers in a restaurant?"

Hated Ignorance

"I can't get along with my wife. All she does is ignore me."
"Ignore you?"
"Yes. And if there's anything I hate, it's ignorance."

A Help in That Case

Hornshy—Being big-headed never got a person anywhere.
Bell—Not unless it was a fellow who made a living by passing the hat.

ORIGIN OF SWEATERS

"Where are sweaters made?"
"In sweatshops, of course."

Obstructionist

Thought can't be successfully led
By one with words direct.
Whose speech is largely limited
To saying, "I object."

A Terrible Fog

Lady—I'd like to buy a gas mask, please.
Army Store Clerk—What are you going to use it for?
Lady—My husband works in a powder mill in the day and has to do all his smoking at home.

Comes High

Lawyer—And just how bad do you want this divorce, Mose?
Mose—It only cost me a string o' fish to git married, sub, but, please Gawd, Ah'd give a whale to git rid of her.—Exchange.

Rash Enough

"If I turn him down, will he do anything rash?"
"He'll probably propose to another girl."

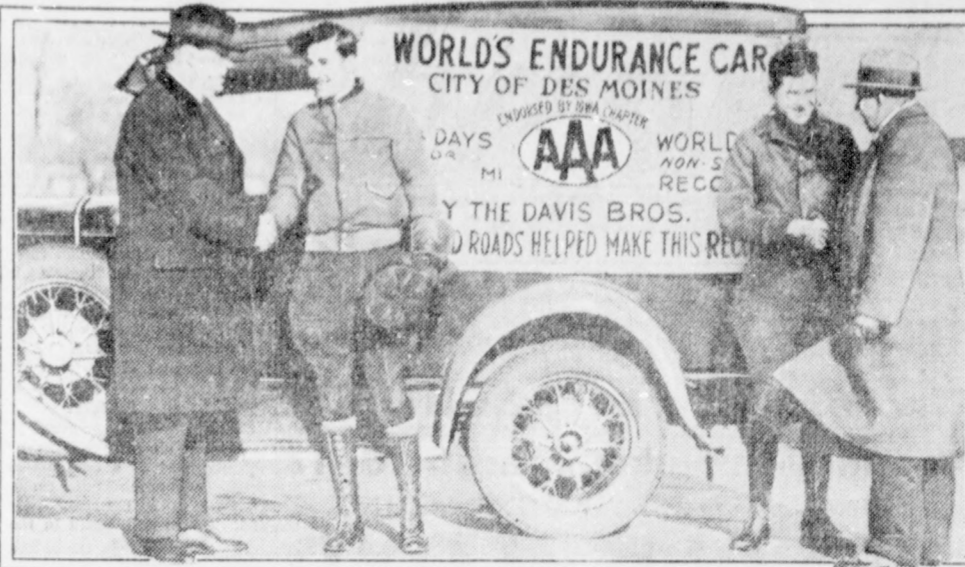

Just Married

"She married a champion."
"What's her problem?"
"Trying to furnish a home with golf cups."

Over and Under

Fair One—Do you like my hair? I spend a long time over it!
Mere Man—Indeed? I spend all my time under mine!

Iowa Brothers Set New World's Record in Ford

Governor John Hammill of Iowa (left) and Walter Ferrell, executive secretary of the Iowa chapter of the American Automobile Association (extreme right), congratulating the Davis brothers on the establishment of a new world's non-motor, non-wheel stop automobile endurance record.

IOWA state officials and civic leaders witnessed the establishment of a new world's non-motor, non-wheel stop automobile endurance record recently, when Ralph and Roland Davis, brothers, brought their Model A Ford to a halt at the east entrance of the state capitol in Des Moines after 2,775 hours and 46 minutes of continuous driving.

When Governor Hammill, standing with Walter Ferrell, executive secretary of the Iowa Chapter of the American Automobile Association, gave the signal to stop, the Ford had traveled a total of 47,138.3 miles over all sorts of roads in all sorts of weather and had exceeded by 33,680 miles

and more than 2,335 hours the American non-stop endurance record which, theretofore officially recognized, was made by a much heavier car under almost ideal conditions on the Indianapolis speedway last year. In the course of the endurance run, the car, known as "The City of Des Moines," covered practically the entire state of Iowa.

Engineers who examined the Ford at the conclusion of the run asserted that neither engine nor chassis showed evidence of the grueling strains to which they were subjected during the 116 days of continuous driving. Both apparently, according to the engineers, would have been good for another 50,000 miles or more.

Better Breakfasts

WARM breakfasts are needed for these wintry days, but in order to make them a complete success, they must be not only warm but varied. And, of course you want plenty of canned and preserved fruits in winter to keep up your summer average of fruit consumption. Here's a suggestion for a breakfast which combines both these elements:

Baked Peaches with Bacon
Poached Eggs on Whole Wheat Toast
Quince Preserves *Toast*
Hot Beverage

To make the first dish arrange the peach halves from a No. 2½ can, cavity side up, in a shallow pan. Cut eight slices of bacon in halves, and lay crosswise over the peaches. Or, roll up the slices and

place one in each peach. Pour the syrup around the fruit and bake in a hot oven—400°—for about twenty-five minutes. Serves eight.

That Hot Beverage

The hot beverage can be tea or chocolate or coffee. If it's the latter, here's a hint how to have it with all its original flavor and aroma. Buy it in vacuum packed cans and it will all be there. Coffee that is not packed in airtight containers loses from 65% to 70% of its flavor and aroma during the first twenty-four hours it is exposed to oxygen, and by the end of ten or twelve days of exposure, it has not only lost all of them, but has become noticeably stale. But fresh roasted coffee packed in a container which is absolutely impervious to all climatic influences can't get stale.

When in need High-Grade
PRINTING

MAYBE

Jones—You must find that impediment in your speech rather inconvenient.
Jones—Oh, n-no-no; everybody has his p-peculiarity. S-st-st-stammering is m-m-mine. What's yours?
Jones—Really, I am not aware that I have any.
Jones—Do you s-st-st-tir your tea with y-y-your right hand?
Jones—Why, yes, of course.
Jones—Well, that's y-y-y-your p-peculiarity; m-most p-p-people use a t-te-te-teaspoon.

Lucky Black Cat

"Father," said Jimmy, running into the drawing room, "there's a big black cat in the dining room."
"Never mind, Jimmy," said his father, drowsily; "black cats are lucky."
"Yes," was the reply. "This one is; he's had your dinner!"

Perfect!

Teacher—Parse the word kiss.
Pupil—This word is a noun, but it is usually used as a conjunction. It is never declined and more common than proper. It is not very singular, in that it is usually used in the plural. It agrees with me.

Inherited

Jack—I'm from a curious family. My father has a wooden leg, two of my brothers have artificial arms, a sister has false teeth—
Clifford—And you seem to have come by your wooden head naturally, then.

Questions Puzzle

"Are you positive," demanded counsel, "that the prisoner is the man who stole your car?"
"Well," answered the witness, "I was until you cross-examined me. Now I'm not sure whether I ever had a car at all."

Prosperity

Mrs. Montgomery—I thought you loved your pet dog so much?
Mrs. Poulton—So I do, dear; but my husband is doing so well in business now that we can afford one with a better pedigree!

WILLING TO WAIT

"You're a fresh thing—asking for a kiss the first time you meet me."
"Have it your own way. Make it tomorrow."

The Only Way

While walking out with Mary I dropped right on the ground. Asked her to wec—cause in the house Her brother's always 'round.

Wondered Himself

Angry Parent—Why were you kissing my daughter in that dark corner last night?
Sultor—Now that I've seen her in daylight, I sort of wonder myself.

Better

Ted—Why don't you marry Alice?
You used to say she was as good as gold.
Everette—Yes, but I met a girl who has gold.

Weekly Scare

"So your little boy wasn't really lost?"
"No. We found him under the Sunday paper."

Mother Was Stumped

Mother—Now, Johnnie, I know thousands of little boys and girls who would be glad to eat that spinach!
Johnnie—Name three of them!

HANDY REQUEST

He—When my father died I was left a pauper.
Dumb Dora—Oh, wasn't it nice of him to leave you a papa in his place!

Her Answer

When I asked her To be my wife She simply said, "You betcher life."

House Number

"Don't you find it unlucky to live in No. 13?"
"Can't say I do. I got no more bills than my neighbors."

How Many Onions?

Biltmore Waiter—Want soup?
Bill Rogers—Is it good soup?
Waiter—Sure, fourteen carrot.

Call for Fair Play Wins Public Support

A Message from
L. A. Downs,
President,
Illinois Central System.

Dependable for 80 Years

The appeal of the railroads for equality of competition in transportation has won the support of the public.

From press, platform, mail and personal interview has come approval of the aggressive declaration of the railroads.

This response shows that the American people realize that:

No other transportation set-up can permanently supplant the railroads:

Without subsidies or other unfair advantages much of the railroads' competition could not survive;

A square deal in transportation is the only way in which the interest of the public itself can be fairly served.

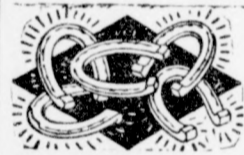

Constructive criticism and suggestions are invited.

L. A. Downs

Chicago, March 2, 1931

THE ILLINOIS CENTRAL SYSTEM

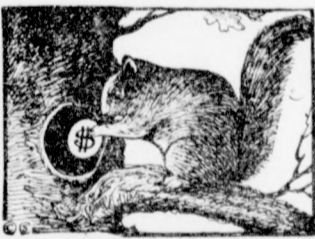

A busy railroad is the public's best assurance of cheap, safe and efficient transportation, and of employment, taxes and purchases in large volume.

Feeding the World

THESE prolific United States may not be feeding the world as they did in the previous times of the World War, but food grown in this country is being eaten in Africa, Asia, Australia, Canada, Central America, China, all over Europe, in Mexico, New Zealand, the Philippine Islands, South America and the West Indies. It goes to them in the American sanitary cans which have made the preservation of food safe for periods of time measured in decades. Our vast exports of canned foods can be due to no other reason than that these peoples find them good.

The Dark Continents

Some of the places in Africa and Asia to which American canned foods are exported are Cairo, Alexandria and Port Said in Egypt; Salisbury, South Rhodesia; Penang, Straits Settlements; Melilla, Spanish Morocco; Johannesburg, Durban and Port Elizabeth, South Africa; Bahrain, Persian Gulf; Colombo, Ceylon; the Dairen, Manchuria; Sargon, French Indo-China; Bombay, India; Mukden, China; and Bangkok, Siam.

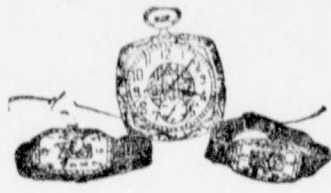

Far and Wide

Australia, Canada, China, Mexico and Newfoundland all eat American canned foods. Nicaragua, Guatemala and the Republic of Panama welcome them to Central America. The countries in Europe where they are consumed are Austria, Belgium, Czechoslovakia, Denmark, England, France, the Free City of Danzig, Germany, the Irish Free State, Italy, Norway, Scotland, Spain, Sweden and Switzerland.

Auckland and Wellington in New Zealand and Manila in the Philippine Islands all get canned foods from here. Argentina, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela are the South American countries which import them. In the West Indies we send them to Cuba, the Dominican Republic and Porto Rico. And the foregoing is only the record of the first six months of this year!

Here's a New Soup

EVERYBODY is drinking chilled tomato juice nowadays, but did it ever occur to you that you can take this same product and heat it, and thus have an excellent thin soup? It's a nourishing soup, too. Tomato juice, whether you squeeze it from the tomatoes themselves or buy it ready to serve in cans, is not just a watery substance with a tomato taste, but the whole tomato with the exception of the skin and seeds. So popular is this new drink, hot or cold, that it is now being canned in gigantic quantities. The secret of keeping all the particles of tomato in suspension in the juice, instead of having them settle, has been solved by the same means that the canners use in processing evaporated milk. Scientists state that unawetened evaporated milk is a good food for babies because of its sterility, its ready digestibility and its uniformity of composition.

Rich in Vitamins
Scientists also commend the tomato as a prolific source of vitamins A, B and C. Dr. A. F. Hess of Columbia University said: "From the nutritional standpoint it may be regarded as a palatable solution of the three vitamins." Dr. Elwood Hendrick characterized it as "one of the most useful food accessories known to man." William Howard Hiltch of the United States Medical Service said: "The popularity of the tomato, fresh and canned, is fully justified by our present knowledge of food values, for the tomato is rich in all three vitamins and retains them well when cooked and canned."

DAIRY FACTS

LOW PRODUCERS ARE LIABILITY
Cows Carried at Actual Loss Should Be Sold.

Tribulating yearly records from 2,325 cows in the six herd improvement associations in North Carolina, John A. Arvey, dairy extension specialist at the North Carolina State college, finds a difference of \$34.08 in profits between high yielding and low yielding cows. "Those animals producing an average of 300 or more pounds of butterfat a year gave an increased profit of \$34.08 over another group which produced less than 250 pounds of fat a year," says Mr. Arvey. "The average of each cow in the high producing group was 7,797 pounds of milk and 333 pounds of fat. In this group were 404 cows in 18 different herds. The average of each cow in the low producing group was 5,197 pounds of milk and 215.5 pounds of fat. In this group were 857 cows from 31 herds." The average feed cost of the high milkers was \$145.64 a year and of the low milkers was \$198.72 a year. Therefore, says Mr. Arvey, it cost \$53.02 more to feed the high producing cows for one year, but in return an additional \$91 worth of milk was secured. Mr. Arvey says he considered the feed cost only in making these calculations. He is convinced had he inquired too closely into all costs, such as the expenses of delivering milk and other items, the cows in the low producing group would not have returned any profit whatever. Some of them were carried at an actual loss and should be sold for beef if their production could not be increased by better feeding and care.

Avoid Blind Teats by Persistent Massaging

There are many three-teated cows that owe their condition to the lack of persistence in continuing to milk the quarter when the milk flow from that quarter first dropped to a small dribble, says a writer in the Montreal Star. Just recently we saw a fine Holstein cow that, a year ago, seemed to have lost the use of one quarter. The owner kept milking and massaging that quarter for the better part of a year. When the cow freshened again a couple of months ago the quarter had returned to normal production and has remained normal since. Had that quarter not been persistently milked, it would have almost certainly been lost. It seems like simple treatment but it is observed that, on most farms when a quarter gives only a trickle of milk it is quickly dried off. In districts where federal inspection of dairies for export of milk or cream to the United States is in force the care of three-teated cows is doubly important, as such inspection requires the elimination of cows with defective udders.

Cow's Worth Depends on Her Production of Milk

A dairy cow is worth only as much as she is able to make as profit in three years, F. S. Harrison, New York State college, states. In a herd of cows milking at Cornell university those cows which produced only 7,000 to 8,000 pounds of milk failed by a few dollars to pay feed labor and other costs. The average productive period in a herd at Cornell was three years. A cow producing 9,000 pounds of milk made \$90 more in milk than did the 8,000 pound cow, when milk was worth \$2.60 a hundred. A cow able to produce 15,000 pounds returns \$420 more income in three years than the 8,000 pound cow on this basis. The value placed on the various cows in the Cornell herd according to ability are: 8,000-pound producer, \$90; 9,000-pounder, \$120; 10,000-pounder, \$175; and the 15,000 pounder is worth \$325.

Dairy Hints

It is a lot easier to milk and care for one good cow than ten poor ones.

Registered pure-bred cows not supported by ancestors of known production and reproduction values find hard going in public sales where discriminating buyers desire to improve the breeding value of their herds.

The thing for the dairyman to do is to grow alfalfa or some other legume crop for hay and let timothy severely alone. Timothy hay, like bright oat straw, makes a good enough filler, but an exceedingly poor milk producer.

Before feeding the dairy cow such feeds as root crops, potatoes, and apples, run them through a feed chopper.

Feed highly flavored feeds after milking instead of before; in fact, it is advisable to do all the feeding at this time.

Progressive dairymen who keep records and study their cows have learned from experience that the most profitable feed is that fed during the dry period.

POULTRY

FEED FOR YOUNG DUCKS AND GEESE

Commercial Mashers Are Not Looked On With Favor.

It seems to do goslings good to have water soon after the finish of the hatch, but feed is not needed for at least 24 hours. Stale bread soaked in milk is a good first feed. This is often mixed with finely chopped boiled eggs and the mixture fed four times each day until they are about three weeks old. Goslings need fine grit or sharp sand. Good results can be obtained by mixing a moist mash of the same commercial dried buttermilk starting mash that is used for chicks. But the hard grain or commercial scratch grain should not be used as the digestive systems of goslings and ducklings can handle mashes better than hard grains.

A good starting feed for ducklings consists of equal measures of bread crumbs and rolled oats to which is added a sprinkling of about 2 per cent sand. When three days old, they can be given a mash composed of equal measures bran, corn meal, rolled oats, and bread crumbs. The commercial starting mash could be used for ducklings. The reason that commercial mashes have not been generally used for ducklings and goslings is due to the fact that only a few of the birds are usually raised on each farm and the tendency has been to use home raised feeds and keep the cost of production down as low as possible, especially as geese and ducks are usually a meat proposition and little income is expected from high priced egg to offset the cost of production.

Coccidiosis Is Disease of Various Young Fowls

Coccidiosis and bacillary white diarrhea are twin pests, though not identical twins. The symptoms are similar, and the search for causes and control of bacillary white diarrhea led to the discovery of the coccidium tenellum. The organism in white diarrhea chicks is coccidium cuniculi. It has been shown at the Storrs station—Experiment Station Bulletin 74, pages 155-185—that it is only during the first few days of its life a chick is liable to infection with bacillary white diarrhea. Female chickens that have recovered from bacillary white diarrhea are bacillus carriers, and the egg is a host. One infected chick spreads the disease. Chicks hatched under hens or in pedigreed trays are said to be more immune to bacillary white diarrhea because they are in smaller groups and one diseased chick cannot infect all the hatch if the flock is not thrown together until the most dangerous period—18 hours—is past. Coccidiosis is a disease of young chicks, turkeys, geese, pigeons and wild birds caused by an animal organism. It infests the intestinal tract, the liver, kidneys and even the lungs.

Poultry Notes

The hatchability of eggs can be improved by giving the flock all the direct sunlight they can get during the winter.

It takes 21 days for a hen egg to hatch, about 28 days for duck eggs, from 30 to 34 for a goose egg, and 28 days for turkey eggs.

The production of good market eggs is perhaps the final objective of all poultry operations. Good market eggs must have a good shell.

Manufacturers of mammoth incubators, improved brooders and properly mixed poultry feeds have also helped to make it easy for the farmer to keep hens that pay.

Capons do not usually attain any greater size than 30 males of similar breeding. What is important, however, is the fact of the capon making more rapid growth and reaching the maximum size at an earlier age.

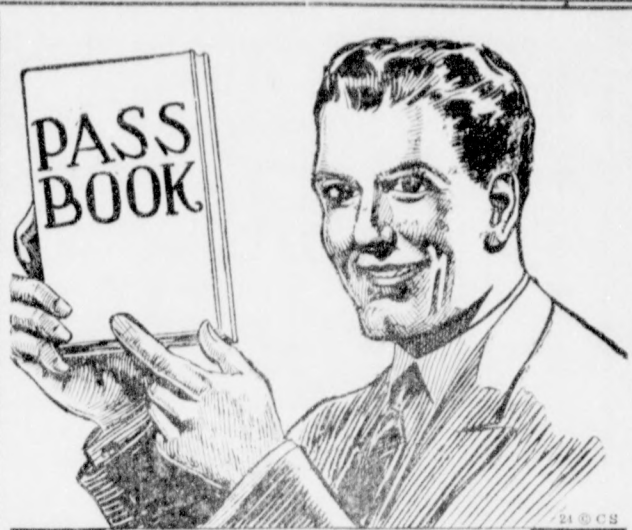

Turkeys, properly handled, are still a profitable enterprise.

When pullets are kept in good condition there is a greater likelihood of a sustained egg production. There is also less danger from colds and molt.

Stunted chicks are likely to be the result of an insufficient amount of hopper space. It is a wise plan to watch the chicks and supply more hoppers whenever the chicks are crowded to obtain feed.

Although broiler prices vary according to the breed of chickens, quality also is an important deciding factor. Poorly feathered or scabby-bucked broilers do not meet the market demands and a cut in price results.

Raise the chicks on ground where no fowls of any age have been allowed to run for at least two years, and where no poultry manure has been spread during that time. In the absence of such favorable conditions, grow the chicks in complete confinement.

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, 1891, Western Newspaper Union.)

Lesson for March 15
JESUS AMONG FRIENDS AND FOES

GOLDEN TEXT—Ye are my friends, if ye do whatsoever I command you.
LESSON TEXT—Luke 10:38-42; 11:14-24

PRIMARY TOPIC—Jesus Among His Friends.
JUNIOR TOPIC—Jesus' Test of Friendship.
INTERMEDIATE AND SENIOR TOPIC—Friendship With Jesus.
YOUNG PEOPLE AND ADULT TOPIC—Dealing With Friend and Foe.

1. Jesus in the Home of Friends (Luke 10:38-42).
There is no place where true character is so clearly revealed as at home. 1. His reception (v. 38). Jesus was received by Martha, as she was the head of the home. Jesus must have greatly appreciated the fact that there was one home in which he was welcome.
2. Mary sitting at Jesus' feet (v. 39). She, with fine spiritual discernment, knew that sitting at the Lord's feet and hearing his word was that which would most please him. He was more concerned with opportunity to reveal himself to human hearts than with the eating of well prepared meals. Mary's way of entertaining Jesus was more acceptable than that of Martha.
3. Martha cumbered about much serving (v. 40). Both sisters loved the Lord. It would be impossible to say which loved the more, but Martha was bent on providing a fine meal for him. Because she was trying to do so many things, she was on the verge of distraction, and found fault with Jesus for permitting Mary to leave the kitchen to listen to his teaching.
4. Jesus' answer (vv. 41, 42). (a) He rebuked Martha (v. 41). He did this most tenderly for he knew that she loved him sincerely. (b.) Defends Mary (v. 42) He declared that but one thing was needful and that Mary had chosen that good part which could not be taken away from her. The one thing needful for every member of the race is a heart for the Lord which brings the individual to Jesus to hear his teaching.

11. Jesus Among Foes (11:14-54).
1. Charged with being in league with the devil (vv. 14-23). Being unwilling to receive him as the Son of God and yet unable to account for his mighty works, they declared that he was casting out demons through Beelzebub, the chief of the demons.
2. Refusal to believe his miracles (vv. 29-32). They asked for a sign to which he replied that they would have a sign from heaven in his death and resurrection. He reminded them, however, that their request showed unbelief, supposing that of the heathen queen of the South and the wicked people of Nineveh.
3. Wickedness denounced (vv. 37-54). He pronounced six woes upon those who were opposing him and seeking his destruction: three upon the Pharisees and three upon the lawyers.
a. The Pharisees (vv. 37-41). These he denounced for:
(1) Punctiliously observing minute rites while at the same time breaking the Ten Commandments. They carefully tithed the small herbs of the garden while practicing injustice with their fellow men and withholding love from God. He pointed out to them their attending to these external acts while their hearts were filled with wickedness. It was as absurd as merely washing the outside of an unclean cup.
(2) Desire for public recognition (v. 43). This is a common sin today. Love for titles of respect and positions of prominence is a very common sin.
(3) Feigning humility (v. 44). He compared their hypocrisy to graves which are on the ground and may be stepped upon unawares by some one who would thus be defiled.
b. The lawyers (vv. 45-54). The strictures of Jesus on the hypocritical Pharisees aroused the lawyers, one of whom indignantly declared, "Thou reproachest us also." In reply to this Christ pronounced three woes upon them:
(1) For placing burdensome requirements upon the people to which they themselves would not submit (v. 46). Religious rites should not be made irksome. (2) For the murder of God's prophets (vv. 47-51). He showed that their attitude toward him was the same as was shown to the prophets by their fathers. Jesus declared that their guilt was the same as that of their fathers and that their generation would be held responsible for all that the fathers had done. (3) For keeping back the knowledge of God by false interpretations of the Scripture (vv. 52-54).

New Fillings Needed
God forbid that any of you should think that two months from now you can work in the power of the filling you receive today. A new filling is needed for each new emergency of Christian service.—R. A. Torrey.

Obedience
Obedience is the great organ of understanding Christ. When we do his will we shall understand him and when we understand him we shall become like him.—Exchange.

The BEST Gray Hair Remedy is Home Made

To each part of water add one ounce bay oil, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair once a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

Community Building

Wealth of Community Based on Real Estate

"Real estate is the one constant factor in a constantly shifting universe and is the real measure of the wealth of a community." This was the message delivered by J. Solis Cohen, Jr. in an address before the community center of Atlantic City.

In his talk he stressed the fact that real estate men from the beginning of modern civilization have been the greatest factors in the upbuilding and the success of the community in which they operated.

"Real estate is real," he said. "It is the basic factor in wealth, the one constant unit in a shifting universe. The manner in which the real estate of any community is utilized determines the measure of prosperity that that community enjoys. Unlike other wealth, real estate cannot be hidden or hoarded. It must be used to its best advantage to really give the owner the greatest benefit and when it is so utilized it benefits the entire community.

"The great problem that confronts the owner of any piece of real estate or the prospective purchaser of any property arises when he tries to determine just what is the best use to which his property may be put. Upon his determination of this question depends his future prosperity and the value of the particular property in which he is interested.

"With the whole world in the throes of a business depression and many dissatisfied with their business, sometimes these times have certainly proved that 'real estate is real.'"

Problems to Overcome in Regional Planning

Regional planning encounters one of its most difficult modern problems in the growing tendency of towns to become specialized centers of activity or leisure, according to W. Harding Thompson of the Royal Institute of British Architects.

When a community develops into an industrial, commercial, residential or amusement center, it is pointed out, it immediately becomes more dependent upon neighboring communities for all the services which it lacks as the result of its narrowed form of life.

The result is that a set of complex conditions entails research over a large region in order to analyze the structure of society and social conditions in any one town. The problem of the regional planner is thus concerned with the relation between work, home and places of recreation to gether with a transport system adequate to the needs of the various populations.

Fireproof City Coming

The "fireproof city" is a commercial possibility. The researches of the British Fire Protection committee, carried out at its testing station in London, have demonstrated conclusively the fire-resisting properties of many materials used today in construction work.

The action of intense heat on the three naturally occurring building stones—granite, sandstone and limestone—is found to follow certain definite laws, and in considering these from the point of view of fire problems, one finds that the subject is rendered more complex by the very process of fire extinction. Very few materials used in building are capable of withstanding the application of a strong jet of cold water after having been heated to a high temperature.

Fire Prevention

It has been found by the National Board of Fire Underwriters that the largest fire losses in twenty-two of the forty-eight states in the country during 1928 were due to strictly preventable conflagration. Fire causes were definitely responsible for a \$12,577,756 property loss. Defective chimneys and flues caused the majority of fires in eleven states, the misuse of electricity in three, sparks on roofs in two states, stoves, furnaces, boilers and their pipes in five and rubbish and litter in one.

The home owner might well use the above list as a guide to follow in renovating his home, for by giving special attention to eliminating these causes of fire he will not only make his property more valuable but will beautify it as well.

For Next Year's Garden

There are many reasons for setting out shrubs in the late months instead of waiting until spring. The one reason, however, that is most convincing—the one that changes fanciful musing to eager activity—is the pleasant anticipation of the picturesque garden that will be yours next year.

Shrubs are the backbone of the planning, so give them first consideration when you plan the development of your outdoor living room.

Study of Safety

The study of safety in public schools has been made part of the curriculum in many states. In most instances the A. A. A. clubs are furnishing the A. A. A. graded safety lessons and posters. Schoolboy patrols are in operation in many states and the A. A. A. clubs are furnishing lecturers to address the children on the importance of safety.

THE COMMUNITY AND ITS BANKS

By ROME C. STEPHENSON
President American Bankers Association

While upon the individual bankers there rests without qualification the direct responsibility for the prudent, honest

R. C. STEPHENSON

conduct of their institutions, nevertheless, the soundness of banking as a practical matter of fact is a community problem in which the public has a part to play as well as bankers and government officials charged with the supervision of banks.

In the first place, the assets of a bank, outside its government bonds, consist mainly of loans to business men and of investments in securities created by corporate enterprises. The deposits of a bank are not kept in the vaults as idle cash but are employed in these loans and investments to earn the money to pay the expenses of the bank so that it can render services to its customers and also pay them interest on such deposits as bear interest. If there were no such thing as an unsound business man or enterprise there would be no such thing as an unsound asset in a bank.

"Hard Boiled" vs. "Easy" Banker

In another aspect the people of the community have a part to play in maintaining the soundness of their banks, and that is through the medium of patronage. The existence of a bank is dependent on public patronage. If only those banks were patronized in which the most careful policies were practiced and the most conscientious and able men in charge, it would go far toward maintaining the standards of banking. If business men in a community when refused loans by their banks for good and sufficient reasons because conditions are not favorable, thereupon withdraw their business to banks where less careful methods prevail, they clearly contribute to the creation of a less sound banking situation.

Also if, in the heat of competition, a banker offers higher interest rates or more free service to attract customers than the earnings of conservative banking justify, and is encouraged by the patronage of the public as against a more conservative bank, obviously the public is again playing a part in bringing about a less sound banking situation. It is an unfortunate fact that the banker who is strict, "hard boiled" if you please, is liable to be less popular than the "easy" banker, and by that same token the public itself has a voice in influencing the character of banking. Also it is the public in the end which pays the main part of the penalty if unfortunate results follow.

Still again the public can exert an influence in shaping the character of banking by supporting the purposes of bankers to maintain intelligent, independent, honest banking supervision by the public banking departments through insisting that this function of government shall be kept as free from political influence as the judiciary itself and shall be manned only by men of the highest ability and character.

In still another way can the people themselves contribute to maintaining the ability of their banks to meet their obligations, and this is by granting them the fullest possible confidence. As I said, the deposits are not kept as cash but are invested in loans and securities. Even the soundest assets of this type require some time to reconvert at full value into cash deposits. In many cases of bank troubles the only thing wrong with a bank was an unduly suspicious and apprehensive state of mind in its customers created by no act or condition of its own but by baseless rumors which sometimes led them to destroy the value of their own deposits by demanding them immediately, forcing a bank to sacrifice its assets and otherwise disrupt its financial operations.

Bankers Help

During the year 1930 the Bankers' Association of Langlade County, Wisconsin, worked out the finances for a cooperative milk plant, which entailed the raising of \$100,000, and also sponsored an active 4-H-Club campaign that culminated in an "Achievement Day" program, in which upwards of 400 young people participated. The increase in the number interested in this work was 200 per cent over the past two year period.

MRS. HURT PASSES AWAY

Tuesday morning at 1:20 the death angel carried away the gentle spirit of Mrs. Alice Hurt. She died at the home of her sister, Mrs. O. J. Atwood, on Third street, where she had been tenderly cared for during her illness. She was fifty-eight years old, and is survived by one son, one sister and two brothers.

HOMEMAKERS MEET

The Lodgeston Homemakers Club met on Tuesday, March 3, at the home of Mrs. Coston Sams, with the chairman, Mrs. T. M. Milner, presiding. All the members and five visitors were present.

Mrs. McClanahan and Mrs. Waggener, who are members of the Crutchfield Club, made interesting talks on what they have learned at the meetings. The home improvement leaders gave the first lesson on "Wife Saving Kitchen," which was "Scoring My Kitchen."

Each member was asked to score her kitchen before next meeting.

Miss Henning asked that each one make at least ten improvements in her kitchen.

The social hour was a very pleasant one. Miss Ruth Byers led in singing "Old Black Joe," and the baby picture contest afforded a lot of fun.

Next meeting will be held on March 26th, at the home of Mrs. E. E. Bondurant.

A welcome is extended to anyone to come and be with us in the meeting.

SADIE JACKSON, Sec.
ALDA HENNING,
Home Demonstration Agent.

SURFACING OF U. S. 45 WILL BE STARTED BY CONTRACTOR BY APRIL FIRST

Construction of the five-mile gap in U. S. Highway 45 north of Fulton to Water Valley will be started about April 1. Contract has been awarded N. E. Stone, contractor, who has launched preliminary steps in preparation for beginning work in the spring.

The road will be surfaced with concrete and will complete the pavement all the way from Paducah to Fulton and thence south to Memphis.

Probably six weeks will be required to build the road, which will be given an 18-foot top.

OLD CITIZEN PASSES AWAY

W. T. Douglas, one of the oldest citizens of Harris, Tenn., passed away Monday, March 9, at his home there, at the age of 77 years.

He is survived by his widow, four sons and two brothers. H. T. and S. C. Douglas of this city are sons of the deceased, and have the sympathy of friends in the loss of their father.

The funeral service was held Tuesday at 2 p. m. in the Methodist church in Harris, Tenn., conducted by Rev. A. N. Walker, and burial was in Shady Grove cemetery in charge of the Fulton Undertaking company.

VETERANS APPLY FOR LOANS

Since the passing of the veterans' relief act sixty or more ex-service men of this city have applied for loans on their certificates. Service Officer L. T. Bugg estimates that the first 60 loans will aggregate \$30,000, and stated that he anticipated \$125,000 would be borrowed within a few weeks.

The applications are being handled here by L. T. Bugg, service officer, and Cecil Weatherspoon, adjutant of the Marshall Alexander Post No. 72 of the American Legion. They are giving their services free.

Gregory Davis, commander of the local post, is helping in the filling out of these forms also, and states that approximately 150 requests for loans will be made.

AFFIRM COURT RULING

The Court of Appeals, in an opinion by Judge Hobson, Commissioner, has affirmed the judgment of the Fulton county circuit court in the case of J. E. Penny vs. Kentucky Utilities Company, et al. in which Penny was defeated.

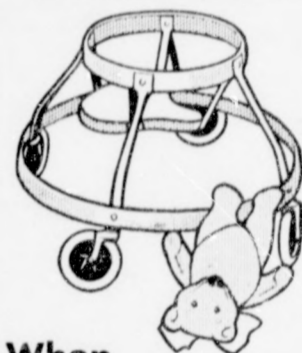

The case on appeal involved claims for various building materials and supplies used in the reconstruction and remodeling of the Hotel Kentuckian on Church street in Fulton during the spring and summer of 1934. The litigation was about \$20,000.

Doran's Condition Not Thought Critical

Will Doran, janitor at South Fulton high school, who was struck by an automobile Tuesday morning when he attempted to cross the Fulton-Martin highway at the edge of the city, is reported resting well Wednesday morning. X-rays were made at the Fuller-Gilliam hospital in Mayfield where he was taken, and Dr. Fuller stated Wednesday that his condition is not as serious as was first thought. However, he sustained a fracture of the skull and several other painful cuts and bruises.

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

HEADACHES NEURITIS NEURALGIA, COLDS

Whenever you have some nagging ache or pain, take some tablets of Bayer Aspirin. Relief is immediate!

There's scarcely ever an ache or pain that Bayer Aspirin won't relieve—and never a time when you can't take it.

The tablets with the Bayer cross are always safe. They don't depress the heart, or otherwise harm you. Use them just as often as they can spare you any pain or discomfort. Just be sure to buy the genuine. Examine the package. Beware of imitations.

Aspirin is the trade-mark of Bayer manufacture of monoaceticacidester of salicylic acid.
