Western Newspaper Union News Bervice. ABOUT THE WAR

Three squadrons of the Fifth Polish regiment of Uhlans have been annihilated in Podolia by Ukrainian peasants who refused the soldiers' demands for food supplies.

The total losses of the brigade of marines with the American expeditionary force in France so far reported was announced by Maj. Gen. Barnett, commandant of the corps, as 278. At Villers-Bretonneux the British Friday held their lines and completed the work of clearing out the last German positions on the ground held before the German attack on Wednesday.

The slaughter caused by the small British tanks among a concentration of the enemy near Cachy in Wednesday's fighting appears to have been even greater than was originally reported.

The American troops in the Seicheprey fight, additional details show, were outnumbered, in some instances, eight to one. Latest advices are that the American casualties are much under the first estimates.

American troops made a successful trench raid over the heights of the Meuse, in the vicinity of Vaux-Les-Palameiax (on the front below Verdun, nine miles north of St. Mihiel). Their French comrades harassed the enemy in the same way at a number of places in Lorraine and in the Vosges.

The French Friday attacked Kemmel hill, and a furious battle was raging, says a dispatch from Reuters' correspondent at British headquarters in France. The Germans have attacked from La Clytte to the Ypres-Comines canal, the dispatch adds. The Franco British armies, attacking from Villiers-Bretonneux to opposite Hangard, have made progress.

The Associated Press learns from a high naval source that the operations at Zeebrugge were a complete success, with the result that the Flanders flotilla now will be obliged to resort to the Ostend route in putting to sea, from which the British forces can more easily handle the German ships. In addition to the damage done the mole and the German guns, material and shipping, the channel has been blocked by the cement ships and a German dredger was destroyed.

mole while the kaiser was inspecting the results of the recent naval raid there.

Sixty-six steamers, aggregating 514,-000 tons dead-weight, will be turned over by China to the United States for use in the war.

Vice Admiral Schroeder, the commander at Zeebrugge, according to reports reaching Amsterdam, will be deprived of his command for being taken by surprise by the British.

Viscount Motono, Japanese minister for foreign affairs, has resigned, according to a Reuter dispatch from Tokio. Viscount Motono will be succeed. ed by Baron Goto.

A French general will decorate with the croix de guerre the colors of the American regiment which defeated the risings. They are Russia, Austria, five-day attack by picked German troops northwest of Toul two weeks 880.

The German ultimatum to Holland, according to advices received in London, demands the right of transit not only for civilian supplies and of sand and gravel through Holland, but also for war materials.

Fifty-eight members of the crew of the German raider Seeadler, which op erated in the south Pacific ocean until it was wrecked, have been interned in Chile, according to announcement by naval authorities at Honolulu.

The Austrian ministry of railways announces the entire suspension of passenger traffic on the northern railways, according to advices from Vienna. This action was taken because of the shortage of coal, due to a strike of miners.

Two American soldiers, wounded in the engagement around Seicheprey, were found alive in a dugout in No Man's land. The dugout had been badly smashed by German shell fire, and how the men managed to keep alive, aculous.

Major General Radcliffe, director of operations, declared in London, in discussing the loss of Kemmel hill, that he expects a big German offensive be tween Arras and Amiens-"far greater than the present attacks," for the purpose of separating the British and French armies. "So far the German successes have been merely tactical," he said. "There has been no change in the strategical situation."

London, April 29 .- Five countries are reported in the throes of revolt or threatened with epoch-making up-Germany, Siberia and Finland.

Grand Duke Alexis, son of the former Czar, is reported to have been proclaimed Emperor of Russia, with Grand Duke Michael, brother of Nicholas, as regent, and it is said that the new government will refuse to recognize the Bolshevist peace treaty with Germany.

In Austria an anti-Emperor Charles party has been formed to militate against the influence of the Empress Zita. The southern Slavs are reviving their agitation for separation from Austria. May Day is expected to witness a general labor strike and demonstration for peace throughout Austria and Hungary. Premier von Seydler of Austria has found his position untenable on account of the exposure of the Emperor's peace letter and his tactless handling of the food crisis.

Austria, Bulgaria, Turkey, the Czechs and Jugo-Slavs are already quarreling over what they consider prospective spoils in the Balkans.

In Germany Herr Scheidemann denounced the gagging of the press and physicians say, is little short of mir- reports come of the masses crying for peace

Finland upper classes are urging a "kingdom," while the middle and lower classes are fighting for a republic.

With the British Army in France, April 29 .- By one of those back-to-thewall stands for which they have been famous in this war, the Franco-British forces have saved the situation in the Ypres sector from turning into success for the Germans after the loss by the allied forces of the dominating peak of Kemmel.

The entire allied line in France and Flanders still stands firmly. Nowhere have the Germans been able to make close to the Minnesota governor. It a further dent in it. Hard fighting has been in progress on the Ypres sector, around Voormezeele, and to the south of Locre. Both places have several times changed hands, but at last reports Voormezeele had been recaptured by the British, but the Germans had obtained another foothold in Locre.. Voormezeele was taken by the Germans Saturday, but the British in a night attack won it back and since have held it, inflicting heavy casualties on the Germans in renewed ef-

Lusitania Stoker, Injured in Service, Three Brothers and Mother Killed by Huns, Still Fighting,

> By ALICE AVON. Of the Vigilantes.

"I never went to school a day in my life and I never thought I would be able to speak in public. But when you lose three brothers "Over There" and have your mother killed by those Ger man devils in the streets of London. well, I guess you can do more than you ever thought you could. And this war certainly woke me up!"

Thus speaks Tommy Ray, stoker of the Lusitania, in his talks to our boys "Over There."

"See this arm," says Tommy, indicating his right, "Well I hurt it for good in the stoke hole and on account of my operation they won't let me

fight. Can you imagine that? Not let an Irishman fight? Well maybe they can't let me fight but they can't stop me from talking, and now that I know I can talk, even though I never went to school a day in my life, believe me, I'll talk. And I'll get every mother's son of you to volunteer and lick those German devils 'Over There.' '

Tommy means it too. He even promises all the recruits he gains, passing the examination, three months to bacco in advance, a dollar a week, newspapers and magazines. And after that he intends to keep right on talking. Let's help him. Even if we can't supply tobacco in advance, or period icals, we can talk. Not narrow minded prejudiced talk, not hopeless silly talk about if so and so did so, I would do so too, or even about what you would do if you were 'Over There,' or if you were in President Wilson's place. Remember that every building must have a firm foundation if it would

brace the elements, every head must be on strong shoulders to bear itself erect. And so, we the fighters for Principle, for Justice, for Liberty and Democracy must be the shoulders for Mr. Wilson's head.

Let's talk. The best thing to talk about now. Talk that will help. I mean, help Uncle Sam. Help you and me and all those "Over There." Let's talk for the Third Liberty loan. Uncle Sam will appreciate your giving, if it be the buying of many bonds or the buying of only one at \$1.00 a week. And above all remember that you are only investing your money and at 4% per cent too. And the investment spells freedom for the world, so invest and keep right on talking.

is great. But if we did do this at last, picture what the country we love would be reduced to first. Stare at the war pictures from France and Belginm and the invaded portions of Italy and you won't require much effort of the imagination to visualize your own town or village or peaceful farming country under the Prussian heel.

If we, incapable of resisting invasion, yielded to the Prussian demands, what would these be?

Germany wants much after the wasting of four years or nearly that of war. We should have to repay her her losses by huge indemnities, which would put a staggering burden on all of us. We would live under a threat, a threat from the most brutal nation the world has ever known. If we howed to that threat, and a beaten nation must bow, then the very spirit of America, all we mean by the word life as we interpret it, would lie murdered. Better that we ourselves should die, and our children with us. The hope of our fathers, the work of us all, this nation, our individual character and freedom, all ended. The price of Liberty has been paid by this nation twice before. To fail now-to fail now! Shall our noble dead have died in vain, and we bow to the oppressor? Or shall we bring freedom fully to earth at last, and with the soldiers of our great allies see the dawn of a tomorrow whose foundations were laid in Yorktown and Appomattox, by men whose blood runs in our veins, whose think you could be insulted."

A New Service Flag.

One of our jackies, Maurice Clement, the quartermaster on the U. S. S. Texas, thinks that the conventional service flag which is now flying from immunerable windows all over the country, has one defect. It does not tell what branch of the service each man has entered.

Now Quartermaster Clement is extremely proud of being in the navy. so, when he came to make a service flag for his own home, he framed the central white space with a piece of white-line tied in attractive knots. At the top and bottom of the panel he made a double Carrick bend; at each side, at equal intervals, a figure eight knot, and then a square knot, thus making a balanced design.

This flag is not only very attractive, but it leaves absolutely no doubt as to what branch of the service it symbollzes .-- Popular Science Monthly.

over many different mail routes, have shown the possibilities of marketing of 394 trial shipments were made over distances averaging 654 miles, a much greater distance, it is pointed out, than sirups are likely to be sent by mail. Of these shipments only three showed any material loss of contents because of seepage or leakage and this was due

to unusually rough handling. Tin Containers Used.

Two types of tin containers were found satisfactory for parcel post shipments of sirups and honey. Both types have screw caps and are provided with outer cartons of corrugated paper board. The screw caps contain snugly fitting pleces of cork that cover the opening in the cans when the screw caps are properly closed. As a protection to the screw caps, squares of corrugated paper board are placed on top of the cans beside the screw caps. Such packages properly wrapped and securely tied, marked "fragile" as required by the postal regulations for packages containing liquids, will carry without danger of leakage in the mails.

High Cost of Containers. While the cost of containers is high at the present time, there are doubtless many cases in which parcel post marketing would be desirable and economical, as sirups and extracted honey are good substitutes for sugar. Suggestions on obtaining customers and conducting business with them by parcel post may be found in Farmers' Bulletin 922, "Parcel Post Business Methods." In order to retain customers, say the specialists, it is necessary that only high-grade products be shipped, as the principal incentive to buying by parcel post is to obtain products of high quality. Persons desiring further particulars in regard to shipping sirups and extracted honey by parcel post may apply to the bureau of markets, United States department of agricul-

Gare Makes Bees Efficient.

Because of lack of attention fully half the bees now kept in the United States are virtually useless to their owners and consequently beekeeping is often condemned as unprofitable. Prob-, ably in an average season for the United States as a whole the surplus honey obtained by good beekeepers scarcely will exceed 50 pounds to the colony. Assuming that 400 pounds is the average needed by a hive to maintain its existence during the year, this 50-pound surplus represents then only one-ninth of the nectar gathered by the

of movable frames the vast majority do not get the full crop. By failing to control swarming by providing insufficient room for storage or by lack of proper care in winter their crop is often reduced one-half or more.

******* HOW MANY FARMERS ARE CO-OPERATING

Farmers' co-operative purchasing and marketing associations now number about 14,000 with about two million members and do an annual business estimated at one and one-half billion dollars. On the basis of the value of products handled the elevator associations lead, followed in order by fruit and produce organizations, and creameries and cheese factories.

Community Kitchens Canned. Community kitchens, where surplus vegetables and fruits are canned under co-operative arrangements, were operated last year in Ohio, Pleasants. Kenawha, Jefferson, and, to some extent, in other counties of West Virginia. The kitchens were supervised by the home demonstration agents of the extension division of the state university.

In the city of Charleston, where a kitchen was opened in July, the num ber who brought products to be canned increased from 56 women during the second week to several times that number in a short time.

Supplementing the work of the Charleston kitchen are about 15 volunteer women who, under the supervision of the home demonstration agent of Kanawaha county, established temporary field kitchens in the rural communities, to which the women bring their surplus vegetables and fruits.

As a result of this effort, large quantities of food were conserved, much of which would otherwise have been wasted.

War Job for Boys.

Boys who want to help their nation win this war will devote their next school vacation to victory work on a farm, helping a farmer feed the fighters. Get in touch today with the U.S. Boys' working reserve, or your county agent, or your state agricultural college.

was announced that the Gypsy Oil Company leased the Antonchico grant in New Mexico, consisting of 320,000 acres.

As to an abandoned oil well, you can't always tell. Old deserted well at Redfield, N. M., has been found by an explorer to have 180 feet of oil in it. If the oil is pumped out, in two days it has the same amount again.

Dr. John M. Birkner, formerly major of the United States army in charge of the medical corps at Camp Cody, New Mexico, held by the federal authorities on a disloyalty charge, was released from the state penitentiary at Santa Fé on \$5,000 ball furnished by friends in Lincoln, Neb.

Frederick Burkner Golding of Silver City was among the 293 passengers on the naval collier Cyclops, overdue since March 13.

Names of graduates from the third officers' training camp at Camp Gordon, Ga., were made public at Washington by the adjutant general's office through the committee on public information. In the list was Earl W. Notgrass, Albuquerque, who qualified for the commission as second lieutenant of field artillery.

"I haven't bought any Liberty bonds and have no intention of buying any as the war is nothing to me," W. F. Faust, » Santa Fé railroad freight conductor, is alleged to have said a few days ago. But before an Albuquerque crowd got through with him he had kissed every star in the flag and signed up for a \$50 bond.

The care of the unfortunates is one of the state's heavy expenses, though it is a work of mercy of which every citizen is proud. The hospital for the insane at Las Vegas began the last fiscal year with a balance of \$5,066.97 received from all sources \$131,780.40 expended \$131,432.11, and closed the year with a balance of \$5,415.26.

Judge David J. Leahy denied bail to Fayette Moore, indicted at the recent term of the District Court in Guada lupe county for the murder of Charles Baber at Vaughn, March 17.

A report of the Forestry Service a Arbuquerque shows that during 191 there were killed in the national for est of New Mexico 423 deer, 639 tur keys and 68 bears by hunters.

Albuquerque real estate dealer have formed themselves into a branch of the Chamber of Commerce. One o the first tasks they will undertake i raising money for a \$150,000 hotel.

High Beef Prices

If consumers are to pay less for beef, live-stock raisers naturally will receive less for cattle.

If farmers are paid more for live stock, consumers will necessarily pay more for meat.

Swift & Company pays for cattle approximately 90 per cent of the price received for beef and by-products. The remaining 10 per cent pays for dressing, freight to market, operation of distributing houses, and in most cases, delivery to the retailer. Net profits also have to come out of this 10 per cent.

This margin cannot be squeezed arbitrarily without danger of crippling the only effective means of performing the complex service of converting cattle into meat and distributing this meat to the fighting forces and to consumers.

Swift & Company's net profit on beef during 1917 was only $\frac{1}{4}$ of a cent per pound. On all products, it was a little less than four cents on each dollar of sales. Complete elimination of these profits would not affect appreciably retail prices of meat, or farm prices of live stock.

Swift & Company will be glad to co-operate in devising methods that will improve conditions in the meat and live stock industry.

Great Wheat Stocks Isolated.

it's the shortage in ships that is putting the Allies and the United States on wheat rations. Great stocks of wheat are isolated in India, and Australia. At great sacrifice in ship space and use the Allies are forced to secure some wheat from Argentina.

On January 1, Australia had stored 100,000,000 bushels of wheat that was ready for export-but there were no ships. Then came the new crop with an exportable surplus of 30,000,-000 bushels. Now Australia has approximately 180,000,000 bushels waiting for ships.

India, at the same time, had 70,000,000 bushels of wheat stored for export. During April 50,000,000 bushels more out of the new crop will be added to the pile.

Argentina closed the last shipping season with 11,000,000 bushels of wheat left in the stuck available for export. The new crop will add 135,000,000 to the left over.

It is not a problem that the wheat does not exist in the world-it is entirely a problem of shipping, which has thrown on America the obligation of dividing our stock with the Allies.
