TERRITORIAL FAIR PLANS MATERIALIZING

Railroad Rates, Advertising
Scheme, Merchants Parade
and Horse Racing

ARE FEATURES ON THE MOVE

"Get on the trail that leads to
Albuquerque. The territorial fair
September 19-23, 1905. We're get-
ting down to the home stretch,
but always have time to stop for
your orders. If we don't hit a
washout, or develop a hot box,
we will be with you about.....
representing Green, Kelly & Co."

This is the card Dick Dillon, trav-
elling salesman for the above popular
firm, is sending out to his customers.
It is a very clever advertising scheme,
and would be a good example for other
enterprising business houses of Al-
buquerque.

Secretary Sellers today received a
letter from V. R. Styles, general pas-
senger agent for the El Paso & South-
western railroad, promising a rate of
one and one-third fare for the terri-
torial fair. Mr. Styles stated in his
letter that this rate would be put on
only between September 15 and 22,
with return limit on the 25th. The
fare on the Santa Fe Central during
the territorial fair, which occurs in
Albuquerque, will be one and one-
third regular fare, which from Tor-
rance, on the Rock Island, will be
\$4.65.

Thomas Moran, office man for P. F.
McCanna, who is now in Chicago, has
a letter from Mr. McCanna, saying
that he will return to New Mexico
about September 1. Mr. McCanna has
charge of the merchants' parade,
which will be one of the features of
the territorial fair, and will begin
boosting it as soon as he returns. Lib-
eral prizes have been offered for the
best decorated floats, and this should
help some to encourage every mer-
chant to vie with his neighbors in
producing the best float.

Edward Albright and Willie McMill-
an have been appointed to conduct
the information bureau during the fair.
The lodge building to the east of the
entrance of the Alvarado, near the
station, will be used as headquarters
for the boys. This will place the bu-
reau convenient to the depot, where
it cannot be missed by strangers.
Messrs. Albright and McMillan had
charge of this function of the fair last
year and their experience on the pre-
vious occasion will assist them in-
stantly in attending to the wants of
the people this year.

The racing this year will be equal
to that of any previous fair. Although
it is early yet, many letters from
horsemen from every part of the
country, have been received, inquiring
about rules for the meet, and asking
that stable room be saved for their
animals. The 3:11 stake race, with a
purse of \$1,000, has five entries so
far, and the time for nominations does
not close until September 1.

ENCOUNTERED A BURGLAR IN HER APARTMENTS

MRS. E. C. WHITSON CONFRONTED
BY BOLD INTRUDER WHEN
SHE TURNED ON THE LIGHT.

It must be a strange sensation for
a woman to turn the gas on at night
and find a strange man in her private
apartment. This was the experience
of Mrs. E. C. Whitson, of the Whitson
Music company, when she went to her
home at 504 North Second street last
evening at 9:45 o'clock, and the
strange man was a burglar. He ran,
however, as did Mrs. Whitson, the
former toward the rear of the
house, where he had entered by tear-
ing a screen from the window, and
the latter through the door which she
had just passed in entering the house
from the street.

Mrs. Whitson had been accompan-
ied home by some friends, Mrs. Mac-
haffey, who is stopping at the Whit-
son house, being one of them. She
had gone on ahead of the party on
hearing the house and had entered
alone. On seeing the burglar she
screamed and ran to her friends, who
had approached the gate by that time.
They immediately entered the house
to find that the intruder had gone,
making his escape over the back
fence.

Some articles of more or less value
were in the dining room and the story
of an attempted theft. The only clue
Mrs. Whitson could give of the intru-
der was that he wore a black shirt
and white suspenders, and as nothing
was taken by the thief might be
traced. It is doubtful if he ever will
be captured.

MEXICANS TO BE SENT BACK TO THEIR HOMES

H. H. Owenby, county commissioner
of Grant county, New Mexico, has
written to Immigration Inspector
Schmucker at El Paso, asking that the
Mexicans who arrived there a few
days ago, suffering from smallpox, be
deported. The immigration bureau
will at once take steps in the matter.
According to the statements made
by the Mexicans themselves, they are
not entitled to remain in this country,
and it is likely that they will be sent
back across the border in a hurry
when they get well enough to be
moved.

James Melini, of the firm of Melini
& Babin, wholesale liquor dealers,
was a passenger north this morning.

DUAL TARIFF WOULD MAKE GERMANY SIT UP AND THINK

PUT A CLUB IN THE HAND OF THE PRESIDENT WHEN KAISER
WILHELM'S COUNTRY SHOWS UP THE TARIFF AGAINST US—
CHANCES AGAINST THE PASSAGE OF THE BILL ARE POOR,
HOWEVER.

By Gilson Gardner

Washington, D. C., Aug. 24.—The
"dual tariff" plan which has been put
forward by the Chicago reciprocity
convention is not a new scheme in
congress. A bill has been introduced
in the house by Representative
James A. Towner, of Minnesota, a
member of the ways and means com-
mittee, and by Senator Henry Cabot
Lodge, of Massachusetts, embodying
the idea of the maximum and mini-
mum tariff schedules of the dual sys-
tem. There are also some influential
members of the house and one or two
senators who are openly in favor of
the plan.

The idea is to fix by congressional
enactment two rates, one high and
the other low, and to authorize the
president or the secretary of the treas-
ury, under the president's direction,
to adjust the duties against foreign
countries within the two limits. A
country which permits us favorable
trading relations would get the best
terms, and a country which put up
the barriers against us would have
the barriers put up to the maximum
as fixed by law, or as high as the
president might think necessary.

The advantage of the system lies
in the fact that it would correct the
hard and fast inflexibility of the pre-
sent tariff. So long as no rate can
be altered without congress, an en-
actment, or by a treaty ratified by
the senate, there is no way to meet
the changing attitudes of foreign gov-
ernments. For example, Germany is
preparing to raise their rates 50 to
100 per cent on all the principal arti-
cles bought from the United States,
and there appears to be no way to ad-
just our tariff to placate or retaliate.

The congress as a whole, and par-
ticularly the senate, will be found to
be opposed to the maximum and mini-
mum, or "dual" tariff plan. The
reason is the same that causes the
"stand pat" sentiment there now,
and defies any move toward revis-

ion or change of the tariff. The Amer-
ican Protective Tariff League—and
behind them all the trusts and vested
interests which profit by the exclu-
sion of foreign competition—is unwill-
ing to take any chances of a lowering
of the present tariff rates.

The "dual" tariff plan would take
the "control of the ball" from con-
gress and give it to the president, or
the executive branch of the govern-
ment. With such a law particular tar-
iff schedules could be elevated or
lowered—within the two limits fixed
by congress—at the discretion of the
executive.

But what if there should occur an
election by which a democratic presi-
dent came to the White House? Or
what if a republican were elected on
some collateral issue and then he
turned out to be in favor of "down-
ward" revision of the tariff? He
would not have to ask the consent of
congress, but could go to work and
reduce all rates to the minimum by
executive decree.

"That plan," the protectionists
will say, "would be all right if we
were perfectly sure that we could al-
ways control the president. But we
are not. We do not want any tariff
rate reduced. We now have control
of the ball. We control congress
very satisfactorily. What we do not
own of the house we have in the
senate. We can rely on our friends
in the senate to kill any efforts at
downward revision which might em-
anate in the house. We do not care
to take any chances, and will oppose
any plan by which the control might
be taken from the senate and vested
in the executive branch of the gov-
ernment."

That is the position of the stand-
pat tariff people. And with the back-
ing of the strong estro of New Eng-
land senators they will come very
near to making their position good as
against the efforts of the western in-
terests to secure legislation of the
sort outlined.

NATIONAL SHOOTING TOURNAMENT OPENS

Magnificent Prizes by Government and Others—
Forty-Three Teams Participating From
All Parts of the Country.

Sea Girt, N. J., Aug. 24.—The great
national shooting tournament, under
the auspices of the National Board
for the Promotion of Rifle Practice,
opened at the Sea Girt National Rifle
Range, this morning. It is the third
tournament of its kind ever held in
this country under the law of con-
gress authorizing these competitions
in marksmanship, and providing for
the requisite funds for holding them.
How much the interest in these an-
nual tournaments has increased is ap-
parent from the fact that only fifteen
teams competed in the tournament
in the fall of 1903, four of them be-
ing from the army and navy, Ohio
and Michigan were the only states
which sent complete teams. At the
tournament in 1904, which was held at
Fort Riley, Kan., nineteen teams took
part, while this year forty-three teams,
representing nearly every state in the
Union, Hawaii and the District of
Columbia, have been entered, besides
teams from the U. S. infantry and
cavalry, the navy, the marine service,
and the academics at West Point and
Annapolis.

The present meeting is held under
the supervision of General W. P. Hall,
U. S. A., one of the members of the
National Board for the Promotion of
Rifle Practice, representing the gov-
ernment. Captain Rhodes of the gen-
eral staff, is post adjutant, and Lieut.
Albert B. Jones, secretary of the Na-
tional Rifle Association, and two ar-
my officers will act as station
officers. Capt. Alvin H. Graff, First
Regiment, N. J., National Guard, is
post quartermaster, and Capt. H. B.
Ordinance officer. Congress has ap-
propriated \$4,000 to defray expenses
of the tournament, and the state of
New Jersey and the National Rifle
Association have also contributed lib-
erally to insure the success of the
event.

The riflemen of the various teams
and individual crack shots began to
arrive here last week and found every-
thing ready for their reception. A city
of tents has been erected back of the
range which will give ample accom-
modation to all the sharpshooters al-
ready here and those who will arrive
here during today and tomorrow. Gov-
ernor Stokes has opened headquarters
here and will entertain a large number
of prominent visitors during the tour-
nament. Several governors, United
States senators, and members of con-
gress, besides other prominent gov-
ernment officials and officers of the
army are expected to attend the shoot-
ing as the guests of the governor.

This morning the individual con-
tests for the individual national cham-
pionships began. Among the competi-
ants are many members of the com-

peting teams and individual crack
shots from various clubs affiliated
with the National Rifle Association.
The shooting this morning was slow
firing at the 200, 300, 500 and 600
yard ranges. It will be followed im-
mediately by a rapid fire contest at
200 and 500 yards. That will end to-
day's program. The program for to-
morrow morning includes runs in the
national individual match. In the af-
ternoon the pistol match for individual
contestants will take place in three
divisions, slow, timed and rapid fire.

The team contest shooting will
begin until Saturday. It will open at
8 a. m., with slow firing at 200 and
500 yards, and will be followed im-
mediately by the 200 and 500 yards rapid
firing contest. There will be no shoot-
ing on Sunday. On Monday the na-
tional team shooting match will be
continued and on Tuesday it will be
concluded with skirmish runs. On
Wednesday the various trophy match-
es will begin, which will end on Sat-
urday, September 9th.

Among the prizes to be competed
for in team shooting are the govern-
ment trophy, authorized by congress,
the famous Hilton trophy, presented
by the late Judge Hilton, and the
bronze "Bullseye of Marathon," pre-
sented by the commander-in-chief on
behalf of the state of New York. Each
trophy carries with it a money
prize and individual medals to the
members of the victorious teams. The
prizes competed for in the National
Rifle Association contests include the
Winchester Cup, the Leech Cup, the
Hale Silver Target, silver medals and
cash prizes aggregating over \$1,000.
The last event on the program is the
President's emblem, \$50 in cash and a com-
memorative autograph letter from the
president.

Dedication of New Church.

Beatty, Pa., Aug. 24.—The new St.
Vincent's church, one of the hand-
somest Roman Catholic churches in
the state, recently completed at a
cost of over half a million dollars,
was dedicated this morning with ap-
propriate ceremonies. Many visitors
from Pittsburgh and other cities in the
state attended the impressive cere-
mony. St. Vincent's is the abbey
church of the Benedictine monastery,
the largest in the world. It is not
very large, but exquisitely decorated
and contains nine beautiful altars of
Carrara marble. The edifice was de-
signed by Bishop Casper and Bishop
McPard of Trenton, N. J., preached
the sermon.

Will Protect Home Industries.
Battle Creek, Mich., Aug. 24.—For
the first time in the history of this

town, the annual picnic of the Gro-
cers' and Butchers' Association is held
here instead of at some resort out
of town. This is the first tangible
result of the inauguration of a policy
of protecting home industries, which
was agreed upon by the merchants
and citizens of Battle Creek at a re-
cent meeting. The citizens are de-
termined to buy all their needs from the
local merchants, instead of sending
mail orders to Chicago and other
cities. It is expected that the example
of the citizens of Battle Creek will
find imitators in many other smaller
towns in this state.

BUILDING RECORD OF A LOCAL CONTRACTOR

IN HEATED TERM HE HAS EIGHT-
TEEN THOUSAND DOLLARS
WORTH OF RESIDENCE WORK,
BESIDES BUSINESS IMPROVE-
MENTS.

Building in Albuquerque this sum-
mer has shown little if any abate-
ment, though here as in El Paso, the
busy building season includes half of
the fall, all of the winter, and much
of the spring. Yet now, in the very
height of the heated term, one can
scarcely go through the city in any
direction, whether business or resi-
dence part, without seeing here, there
and everywhere, buildings in various
stages of construction.

A citizen representative was talk-
ing with A. V. Tegner, contractor, who
is about completing the changes in
the Harper building on the corner of
Railroad avenue and Paradise alley,
by which the building will be fitted
for the occupancy of Yarrow, the
paw-mover, the changes here will
cost about \$500, including a change
of front, the thorough refitting of the
interior, and the construction of
booths for ladies, who may obtain pri-
vate entrance from the alley on the
side.

Mr. Tegner is also nearing com-
pletion on the addition to the pianoforte
building, for which he obtained the
contract. He is improving a business
property on South Second street, has
but recently completed the improve-
ments in the Gleichen building,
Fourth street and Gold avenue, where
the Albuquerque Electric Light, Gas
and Power Company have their office,
and is now working on a platform
40x24 feet for the Albuquerque Power
Company, to connect with the convey-
or from the American Lumber Com-
pany's city mills.

Mr. Tegner also stated that he now
has in hand or has completed in the
last few weeks \$18,000 worth of resi-
dence buildings, among which he men-
tioned a home for Rabbi Kaplan, ad-
joining the Jewish Temple, a resi-
dence in the Highlands for Mr. Mon-
roe, and a double house, of artificial
stone, and containing twenty rooms
on North Fourth street, for the
Thelin brothers.

This is but the record of a single
contractor, and one who has been
working for himself, less than two
years. Could the citizen get a sim-
ilar list from all the other contractors,
it would show a summer record of
which any city might well be proud.

SANTA FE PREPARING FOR EXCURSIONISTS

Santa Fe, N. M., Aug. 24.—Have ar-
ranged accommodations for one thou-
sand, and will give you league ball-
game, will meet you on Santa Fe Cen-
tral.

FRANK OWEN,
Mr. Santa Fe Ball Team.
This telegram was received by Mr.
Houston, manager of the McIntosh
Browns, this afternoon, and means
that Santa Fe has arranged to accom-
modate one thousand people if they
take the excursion next Sunday. That
the band will meet the excursion on
the Santa Fe Central may be inter-
preted to mean that the Santa Fe
band will meet the excursion at Kan-
nedy, where the Santa Fe is victu-
al by the Central.

It is understood that Santa Fe has
secured a Pueblo battery for the
game with the Browns, and if such is
the case, a good game may be ex-
pected. Both the new pitcher, who
will be the twirling for the Browns.
Regarding the excursion tickets,
which are being sold this afternoon
by Frank Houston and Robert Abrah-
am, it must be understood that these
cards are to be taken to the local tick-
et office and exchanged for other tick-
ets furnished by the Santa Fe com-
pany.

Gouverneur's Memorial Arch.

Gouverneur, N. Y., Aug. 24.—Old
Home Week, the centennial celebra-
tion of this town, began here this
morning. The streets were filled with
visitors from the neighboring districts
and the flags on nearly every build-
ing gave the town a festive appear-
ance. The principal event of the cele-
bration which will close on August
30th, will be the dedication of the
marble memorial arch erected by the
citizens to commemorate the centennial
of Gouverneur and to honor the
memory of its pioneer soldiers.

The arch stands at the Main street
park entrance, is 23 feet high, has
a ten foot span, and is 13 feet clear-
ing. The front of the top of the arch bears
the inscription, "Lost We Fought,"
while the keystone of the arch bears
the inscription, "Gouverneur's Cen-
tennial, 1906."

Dr. R. H. Briggs has returned from
a short outing at Camp Blinn.

PICKING HUBBY'S POCKET A WIFE'S VESTED RIGHT

OPINION THAT MADE JUDGE SLOVER, HIMSELF MARRIED, WID-
ELY FAMOUS—REFUSED TO CONSIDER THE COMPLAINT AS
GROUND FOR DIVORCE, BUT GAVE A DECREE FOR OTHER
REASONS.

JUDGE J. H. SLOVER.

Kansas City, Mo., Aug. 24.—By up-
holding the "ancient right" of wives
to pick their husband's pockets at
night, Jas. H. Slover, judge of a di-
vision of the circuit court, has stepped
into the limelight. His mail is
heavy with letters commending on his
ruling.

One Harding, in seeking a divorce,
told of innumerable indignities in-
flicted upon him by his wife and
wound up by saying: "At night she

almost invariably went through my
pockets and cleaned them out."
Judge Slover granted the decree,
saying specifically:
"That he is from me to condemn the
ancient right it wives to go through
their husband's pockets. A wife has
the right to do that. This divorce is
granted, but for other reasons."

Judge Slover has been married for
nearly 50 years. He is a southerner
of dignified, courteous bearing.

TAX OF TEN MILLS ON THE DOLLAR NO TRACKAGE AND TRAFFIC ALLIANCE

Judge McFie Grants Manda-
mus Directing Levy To
Pay Judgments
Rock Island Has Made No
Agreement With
Santa Fe
RED BALL SYSTEM IS ADOPTED

Attorneys Spence and Davis, of Las
Vegas, have filed petition in the First
Judicial District Court for Santa Fe
county, praying that a peremptory
mandamus issue on the relation of
Bird S. Coler and Elverson R. Chap-
man, holder of judgments for delin-
quent coupons against Santa Fe coun-
ty, obtained them on September 24,
1900, in the sum of \$74,558, and in the
sum of \$69,926, directing the board of
county commissioners to levy a tax,
of ten mills on the dollar of taxable
property in the county of Santa Fe for
the payment of the said judgments
and interest thereon from date there-
of, the total amounting to \$22,724 and
to \$75,794, respectively, these amounts
including interest at five per cent per
annum to date. Associate Justice John
H. McFie has issued a peremptory
mandamus commanding the board of
county commissioners of Santa Fe
county to meet before August 31st,
and make the tax levy as prayed for
by the petitioners. The mandamus
was served on Chairman Arthur Selig-
man of the board. It is understood
that the board will have an early
meeting to take this matter into con-
sideration, and to make the tax levy.
The examination of this record
shows that the attorneys for Coler
and Chapman included in their peti-
tion for the mandamus, only the prop-
erty of the present county of Santa Fe,
while it is contended by attorneys
for the Santa Fe Central, the present
of the Santa Fe Central, which were
out from Santa Fe county by the
thirty-fifth and thirty-sixth legislative
assemblies, should have been included
in their petition. Notice is also called
to the fact that on February 7, 1901,
the board of county commissioners
made a levy of 12 mills or 1.5 cents
on each dollar of all assessed valua-
tion in the county at that time, for
the purpose of paying the judgment
above referred to, and which judg-
ments were made the basis for the
petition by the court. The payment
of this levy made by the board, at
that time, has been refused by the
taxpayers, and has never been paid.
It is held by lawyers that the fact of
the existence of the first levy should
be taken into consideration, and if the
levy ordered made by the mandamus
of Tuesday is to be paid, the levy
made in accordance with the judgment
in October should be stricken from
the tax rolls. As it now stands this
levy of 1.5 cents on the dollar is
valid, and stands on the tax rolls
against the taxable property of the
county located within its limits then
and there.

On the other hand, it is alleged by
other attorneys that the levy just
made by the court vacated the levy
made by the county commissioners on
February 7, 1901, and is virtually
stricken from the tax rolls of that
year. It is said that it was the in-
tention of the lawyers for complain-
ants in this case to abandon the 1901
levy and that no objection will be
made by them, should this be done,
and ordered by the county commis-
sioners.

Frank T. Dolan, general superin-
tendent of the southwest district of
the Rock Island, says that the new
system of handling freight which is
commonly known as the Red Ball sys-
tem, will be in operation by the 15th
of September. This is the system
which is used on the Frisco and it has
worked very satisfactorily to the com-
pany. The Rock Island change will be
made about the 1st of September, and
at that date the reports are to be sent
to that plant.

Chicago Live Stock.
Chicago, Aug. 25.—Cattle—Kensilla,
10,000; market 80 to 85; native steers,
\$4.50 to 5.00; southern steers, \$2.50 to
3.25; southern cows, \$1.75 to 2.50;
cows and heifers, \$1.75 to 2.50; steer-
cows and feeders, \$2.75 to 3.25; bulls,
\$1.50 to 2.25; calves, \$2.50 to 3.25; western
steers, \$3.50 to 4.50; western cows, \$2
to 2.25.

EASTERN WILL BE COMPLETED AT ONCE

Col. W. S. Hopewell, Just
Back From New York,
Brings Good News.

TORRANCE-ROSWELL EXTENSION

Col. W. S. Hopewell, general man-
ager of the Albuquerque Eastern rail-
way, who has been in New York for
the past six weeks, during which time
he succeeded in raising funds for the
completion of the Albuquerque East-
ern, was in the city a short time last
night on his way to his ranch at Hill-
born, Sierra county, where he goes to
visit Mrs. Hopewell, who is suffering
from a slight attack of illness. He
will return to Albuquerque in a few
days.

Mr. Hopewell stated that construc-
tion work on the Eastern from Mor-
rison to Albuquerque would be push-
ed to completion at once and that
trains would be running into this city
over the new road in a few months.
The branch to the Hagan coal fields
will also be built.

While east the colonel and his asso-
ciates went over the plans for the pro-
posed extension of the road from
Torrance to Roswell and he says that
it is not at all unlikely that actual
construction work on this line will be
commenced shortly.

Upon Colonel Hopewell's return
from Hillsboro, he will be met here by
an expert engineer and railroad build-
er from the east, sent here by eastern
capitalists for the purpose of inspec-
ting and investigating the Torrance-
Roswell project, and together they
will make a trip over the proposed
line.

It is said that the report made by
this engineer, upon his return to New
York, will depend largely whether or
not the road will be built. If Mr.
Hopewell's opinion that bonds for the
construction of the road, will at once
be issued.

Mr. Hopewell is a strong advocate
of joint stockholding for the two terri-
tories and stated that he was confident
from conversations with leading eastern
financiers and politicians, that
public sentiment favored joint stock-
holding for New Mexico and Arizona,
and that in his opinion, no other kind
of stockholding was possible for the two
territories for many years to come.
He, himself, while east, expressed his
opinion to many who asked him con-
cerning the matter, that joint stock-
holding would be best for the two terri-
tories, and whenever he possibly can,
he is putting in a bid for joint stock-
holding.

PORTRAIT OF LINCOLN IS FORMED IN STONE

Portland, Ore., Aug. 25.—A very fine
likeness of Abraham Lincoln, trans-
ferred to a limestone, at once by natural
process, is one of the most interest-
ing curiosities at the Lewis and Clark Ex-
position. To make this picture as it
is today, indelibly printed in the ac-
tual stone and permanently framed
with a solid stone an inch thick, re-
quired two months.

It was known that the waters of the
Thermopsis Hot Springs, in Big Horn
county, Wyoming, possessed the pow-
er of depositing lime in such quanti-
ties as to form sculptures. A local
genius determined to try the experi-
ment of making the water transfer a
likeness of Lincoln to stone.

Procuring a picture of the martyred
president in a magazine, he placed the
likeness face down upon a plank and
laid it in the water of one of the
springs, so that the surface was bare-
ly covered. Any greater depth of
water would have washed away the
lime instead of depositing it.

Within two months the action of
the water had formed a likeness
such an inch thick, upon the surface
of which appeared the picture of Lin-
coln, startlingly vivid. The slab is
now seen in the Wyoming section of
the Mines and Metallurgy building at
the Portland Fair, where anyone who
desires may look at the picture.

Unveiling Soldiers' Monument.

Ogdensburg, N. Y., Aug. 23.—The
monument erected in honor of the 84
lawrence county soldiers, who fell
during the Civil war, was unveiled
here today by Vice President Fair-
banks. The celebration had a de-
cisively military character and was at-
tended by the Twenty-second regi-
ment of infantry, of Sackett's Har-
bor, the Forty-third battalion of Vi-
ctoria rifles, of Canada and the Fourth
battalion of New York National
guard. The Twenty-second infantry
arrived here this morning, after hav-
ing marched the entire distance of
eighty miles, from Sackett's Harbor.

CATFISH CAUGHT IN

THE SAN JUAN RIVER.
It is an unusual thing for a catfish
to be seen or caught in the streams
of northern New Mexico, and this
makes the fact of a recent catch in
the San Juan river all the more in-
teresting. Last week while fishing in
the San Juan, near Farmington, San
Juan county, Edward Lewis caught a
twenty-eight pound catfish with a hook
and line and another smaller one
which he caught a little later with a net.

NEW MEXICO GEOGRAPHY.

A number of changes in the boundary lines of New Mexico counties were made by the recent legislature and therefore a list of counties with their present area is of interest. Hernalillo is the smallest although larger than the state of Rhode Island. It covers 1,240 square miles. Santa Fe county is the only other county with less than 2,000 square miles, it having lost recently Espanola and Moriarty precincts, and now lays claim only to 1,980 square miles, which, however, is greater than the extent of the average principality of dukedom in Europe and upon which a million people can find room before the county will be as thickly populated as is the kingdom of Belgium. Taos county is third with 2,283 square miles. Mora fourth, with 2,643 square miles. The other counties range as follows: Quay, 2,992 square miles; Luna, 3,946; Biera, 3,981; Roswell, 4,110; Torrance, 5,330; Dona Ana, 5,818; Sandoval, 5,831; Colfax, 5,857; Guadalupe, 5,952; Lincoln, 6,559; San Miguel, 6,593; McKinley, 6,577; Saa Juan, 5,589; Valencia, 5,712; Rio Arriba, 5,952; Union, 6,037; Elddy, 6,500; Otero, 6,879; Grant, 7,402; Chavez, 9,599; and Socorro, 15,605. The states of Maryland and Massachusetts could be crowded into the last named county and seven counties the size of Santa Fe or twice the size of Hernalillo could be carved out of it.

Over 4,500,000 acres of the area of New Mexico, or one out of every eighteen acres, is included in forest reserves and if the James forest reserve is created, as is likely, the proportion will be even more. The Gila forest reserve now covers over 3,000,000 acres, a princely domain of mountains, forests, river valleys, mines and grazing land. The Lincoln reserve has an area of 200,000 acres. The Pecos river reserve has 431,040 acres to its credit but is soon to be increased in area by the addition of several townships. Much of the area of the territory is given up to Indian reserves and Indian grants. The Navajo reservation includes 2,345,492 acres in the northwestern part of the territory. The southern Ute reservation has a patch of 107,314 acres in northern San Juan county. The Jicarilla Apache reservation in Rio Arriba county covers 404,788 acres and the Mesquero Apache reservation in Otero and Lincoln counties 494,280 acres. The Zuni Indian reservation covers 273,280 acres, including 55,000 acres granted to the pueblo of Zuni. The Indian pueblo all have land grants. The San Felipe pueblo covers 15,817 acres; the Nambé 7,689 acres; Laguna 125,225 acres; Isleta 119,000 acres; Acoma 95,000 acres; Sandia 24,185 acres; Santa Ana 17,000 acres; Pojoaque 15,520 acres; while Santa Clara, San Juan, Picuris, Santo Domingo, Cochiti, Taos and other pueblos, have large reservations or over 900,000 acres altogether.

There are five military reservations in the territory. Fort Union, in Mora county, covers 66,880 acres; Fort Wingate, in McKinley county, 83,290 acres; Fort Stanton, 28,221 acres; Fort Bayard, 8,440 acres; the Fort Sumner post cemetery, 160 acres.

TREMENDOUS GRAIN WEALTH.

Whatever woes may be in store for the people of this country, it is quite certain that, in the immediate future at least, we shall not starve.

Corn is ripening into a great golden harvest—a harvest that will tax the labor capacity of the whole great west to its fullest.

America has long been teaching the world to take our corn. Europe has learned to eat it and to like it. The market is practically unlimited. There is no such thing as overproduction of corn.

There is no cereal carrying more nutrition, none capable of wider adaptation, than corn. It fills an amazingly broad field of usefulness, extending all the way from the daintiest breakfast tables to the pig sties; and everywhere it is delicious and healthful. It makes bone and muscle and sinew and brain, and those make character.

There is no end to the explanations advanced for the characteristic strength and vigor of the American people. No explanation is near the truth if it does not include corn.

Corn enters into the character of the Americans as truly as macaroni does with the Italians and sauer kraut with the Germans. If there is to be a national flower zone is more appropriate than the corn tassel.

Last year's corn crop in this country broke all records. The new record was short lived. This year's corn crop exceeds it by the astonishing figure of 127,000,000 bushels.

The latest government report indicates a total crop for the country of almost 2,600,000,000 bushels—the largest corn crop ever produced and considerably larger than the ordinary mind can comprehend.

The indicated yield in the six principal corn states, based on government percentages of conditions, are here shown:

	1905.	1904.
Kansas	252,000,000	135,000,000
Nebraska	280,000,000	261,000,000
Missouri	235,000,000	152,000,000
Iowa	302,000,000	303,000,000
Illinois	346,000,000	344,000,000
Indiana	165,000,000	143,000,000

And corn is not all we can have to eat in plenty. The total winter and spring wheat crop of the United States promises to be 690,000,000 bushels—the largest, with one exception, ever raised.

The aggregate production of wheat, corn and oats amounts to 4,164,000,000 bushels, which is 350,000,000 bushels more than last year.

NEED OF CARLSBAD VALLEY.

The board of consulting engineers, representing the reclamation service of the department of the interior, will meet in Carlsbad, Monday, August 28th, at which time they will take final action upon the report of the projecting board which will, with their recommendations, be submitted to the department. Dependent upon their recommendations is the ultimate outcome of the irrigation proposition whether or not the system will be taken over for government control. The personnel of the board is as follows: Arthur P. Davis, assistant chief engineer; Geo. Y. Wiener, of Detroit, consulting engineer; Morris Bion, consulting engineer of the legal department, and B. M. Hall, of Carlsbad, superintending engineer of this district, and Wm. Reed, district engineer.

It seems that the fate of what may be called the Carlsbad district of the Pecos valley, hangs suspended upon the decision of this meeting. Twice has the magnificent system of irrigation at Carlsbad been destroyed by floods, and now the company and the people are at the end of their ability. If the government shall refuse to take over and restore the system, on a better basis of course, then must that part of the valley speedily return to the desert condition to which it was wrenched with so much expenditure of money and labor.

GOOD OUTSIDE TESTIMONY.

Denver & Rio Grande's southern route has passed through the belt of land that may be aptly classed as non-productive, having been Indian lands until recently, and is now just entering the fruit belt, where the eye feasts for miles upon orchards, meadows and gardens, where the purple cluster of the ripening grape contrasts with the pink of the peach and variegated hue of the apple, where all is fertile and the soil yields a competency to the amateur, and a good living to indifference, where all the hardy and semi-tropical products respond in perfect growth to man's effort and water's touch.

San Juan county, New Mexico, is the one spot where the minimum acreage produces maximum results; where the lazy farmer is pensioned and the industrious grower opulent; where the consumption in tributary sections is vast and the markets cash and over-demanding the products of the soil. The one spot where the miser who toils at high altitudes can locate his family amid pleasant surroundings and if he will so entirely to profit account. Completion of the route from Farmington opens up a

section of country that will be densely populated, as it affords all that the higher and more rigorous altitudes deny in much that is health giving, and all that the upper reaches bar in the way of soil growth. It is to be a section of homes, of schools, of churches. Get in now.—Durango Democrat.

Another balloon expedition to the North Pole is being organized in Paris by the well known French aeronaut Merville. He proposes to avoid some of the inconveniences of the Andree expedition, when not sufficient attention was paid to the necessity of a parachute and to the effects of extreme cold on the gas contained in the balloon. He proposes to equip his balloon with a motor to be used only in case of contrary winds, and is confident he will be successful in reaching the pole and in finding traces of the Andree expedition. The cost of the equipment he calculates at about \$10,000, which he claims to be able to obtain from his friends and admirers.

According to the Farmington Hustler, W. A. Hunter sold ten acres of land, two and one-half miles east of that town to R. H. Meyer, of Silverton for \$900. The deal was made through the real estate agency of Clark & Amabile. Mr. Meyer is an old schoolmate of Mr. Amabile, and went to Farmington on a visit. He was so well pleased with the country and its prospects that he concluded to locate there. He left for Silverton and will return later with his family. Ninety dollars an acre is no bad price for land, even if it is in San Juan county, and only two and one-half miles from town.

"You can put be down as convert to the proposition to annex New Mexico to Arizona, 'in order to secure statehood,'" said Dr. Marcus A. Rodgers, of Tucson, to the Oasid editor, Tuesday. "The frequent and repeated appointments of carpet baggers to federal offices in Arizona are what converted me. Through outside influences we have had inexperienced kids thrust into positions of importance and responsibility which should go only to men of ability and long experience. I am opposed to such evils and the only remedy I can see is to elect officials by the vote of the people. We must have statehood to do that. I am for statehood in any form."—Nogales, Ariz. Oasid.

LESSON THREE OF ANTI KITTENISH STATEHOOD CATECHISM From St. John's Herald

What is an argument put forth by the Graham Guardian? The following "Notia," which it published as original, with the explanation that it occurred in Graham county, and was written and posted by an advocate of joint statehood: "If every man or woman has horses, cows or oxen sit into this here field, his or her tail will be cut off as the same may be."

Is it original with the Guardian? It was copied into the Columbian Jester, edition of 1845.

Was the Guardian quoted as original in this? Yes; by the Blade, Citizen, Gazette, et al, with this remark: "That is a fair sample of the intelligence of the people who want joint statehood."

Will that kill jointure? Not a bit.

Will these editors have to swallow jointure? They will.

They are in the same position as the boys in Mr. Squire's school; only these will have to swallow jointure instead of sulphur and molasses.

Do these editors love the taxpayers? They do; but they love somebody else still more.

What did the Prospector say about jointure? "The rank and file of the joint statehood corrie—two Arizona editors—have resolved to call a convention at Tucson and debate the vexatious question. The meeting will doubtless be a howling success, and while there will not be a dissent, conglomeration and miscegenation will have crowned the efforts of the 'convention.'"

What did it mean by "rank and file" and "corrie"? These are supposedly choice terms to exhibit "the other fellow" as an object of derision.

Who are the two editors referred to? It is not right to guess who is meant, as there are more than two in Arizona who favor joint statehood; we'd have to pass that.

Will the Prospector have to take jointure, too? Yes, or hunt another prospect hole.

Which Arizona newspaper produced the first real argument against jointure? The Register, which is not afraid to tackle any damned old thing, and does it without using any vile epithets.

Will you give that argument? It comes in another lesson?

What does the Gazette call jointure? A crime.

What does the Gazette call W. B. Clery? "Every man, woman and child in Arizona."

How do you make that out? In one little spot in its columns it said: "Every man, woman and child in Arizona are giving their money and time to down the crime of joint statehood." And in another little spot it said: "W. B. Clery is the only person who is working against the monster crime of joint statehood." Or words to that effect. That's how it was got at.

Is Phoenix getting ready for single statehood? She is.

How? By gobbling up all the offices and handing them over to her residents.

The New York World, in uttering truths not new but which are too much truths to be allowed to be forgotten, says very effectively: "Don't be afraid of a little fun at home. Don't shut your house lest the sun should fade your carpets, and your hearts, lest a hearty laugh shake down some of the old cobwebs there! If you want to ruin your sons, let them think that all mirth and social enjoyment must be left on the threshold without when they come home at night. When once a house is regarded as only a place to eat, drink and sleep in, the work is begun that ends in gambling houses and reckless degradation. Young people must have fun and relaxation somewhere; if they do not find it at their own hearthstones it will be sought at other and less profitable places. Therefore, let the fire burn brightly at night and make the homestead delightful with all those little arts that parents so perfectly understand. Don't repress the buoyant spirits of your children; half an hour's merriment round the lamp and fireside of home blots out the remembrance of many a care and annoyance during the day, and the best safe guard they can take with them into the world is the influence of a bright little domestic sanctum."

At Cleveland, Ohio, on Brainsade street, lives Wm. Whitworth. He is nearly 90 years old. He works every day. He has a modest home. He has a useful, happy family. He has a little garden full of smiling nasturtiums and nodding pansies. There is a porch with vines, where the cat dozes and purrs contentedly. He has a little bank account that will last him through. His health is good, his mind bright, his interest in affairs alive. He wants nothing. He has injured no man, and will smile when death shakes hands with him. He has reared children who are a real part of humanity and to whom he will leave only a magnificent example of high philosophy and right living. He started with Huntington, Rockefeller and others of the early Standard Oil crowd. He went one way. Rockefeller the opposite. Rockefeller has his millions. Whitworth has—what God Almighty intended man to have. If he were wise and just—contentment, happiness and a right to plead, on that day when Rockefeller's millions will blister his soul, that he loved his fellow man.

J. A. McDonald, the proprietor of the Safford dye works, will open a free library and reading room where young and old will be at liberty to read choice books and periodicals free of charge. Mr. McDonald has rented the "entire upper story of the Birnie building and besides a free library, will install a gymnasium where the young men can take physical exercise. Now that Mr. McDonald has taken the lead in this laudable undertaking the citizens of Safford, Layton and the surrounding towns should assist him in the work.—Safford Journal.

COSTLY ROAD BUILDING BY THE SANTA FE

A Fortune Being Expended on Ten-Mile Stretch of Track Near Trinidad.

CONSTRUCTING MASONRY BRIDGES

One little stretch of about ten miles of track near Trinidad, Colo., is costing the Santa Fe railroad more money than any one hundred miles anywhere along the system.

This is the short stretch between Morley and Jansen, where the company is doing double tracking. The cost cannot be even roughly estimated, but it is probably well into six figures.

The work has been going on for some time, but the progress has been rather slow. It is part of the double track which is being put in between Trinidad and Raton to relieve the traffic congestion over the hill.

The great cost is due to the fact that about six bridges are being put in to cover this brief distance. Every one of these bridges will be a very costly affair, inasmuch as they are all being constructed of masonry. They are being put in to stay for all time and no expense is being spared in the work.

At the present time the work is being done on two bridges between Morley and Starline. A force of nearly five hundred men is being worked on the bridges and the double tracking together. One of the largest masonry bridges in the country is included in the plans. It will be thrown across the Animas river and will be two hundred and ten feet in length. The firm of Widell & Finley of Chicago has the contract for the bridges and it is one of the largest single contracts of the kind which has ever been let by a railroad company.

After leaving Morley and Jansen the work of double tracking will be comparatively easy as only a few more bridges are necessary. It is expected that the stretch of track between these two points will be completed before the winter sets in.

Work of putting in the masonry wall along the Santa Fe tracks in front of the depot at Trinidad will be commenced in a few days. The concrete has been ordered on the ground along with some stone.

NEW MEXICO MEN INTERESTED IN NEW ROAD

A syndicate has just been formed to build a road in western Texas that is to be an enterprise of the greatest importance, and the Tailmades, who are among the best known business men now operating in the Pecos valley, are among the backers of it. W. W. Gatewood, of Roswell, has just returned from a trip over the proposed right of way, where he, as attorney, was drawing up contracts for the land, and he brings a full report of the big affair.

The syndicate is to be composed of E. H. Stahlman, formerly a prominent railroad man of Tennessee, but now of New York, who has been president of several railroads, is one of the large property owners of Nashville, is owner of the Nashville Banner and a leading capitalist of the south; W. C. Benton, leading manufacturer of Nashville, who owns a controlling interest in West Nashville, which is the leading manufacturing center of the south; of E. C. Gordon, brother of General John B. Gordon, of several other millionaires of the south, and C. L. and E. R. and B. H. Tallmades, of Chicago, Denver and Roswell.

The new road is to be called the Canyon City, Fairview & Southern railway, with a prospective terminus at Eagle City, on the Rio Grande. At first the road will be built only from Canyon City to Plainview, but the intention is later to pass through Lubbock, Gayle, Big Springs, Garden City, Sherwood, Eldorado, Sonora, Rock Springs, Brackettville to Eagle Pass. When completed this far, the road will connect with the Mexican International for Monterey and Mexico City, thus becoming a direct route from Kansas City and Denver to the Mexican capital.

UNION PACIFIC BAGGAGE HANDLERS HAVE UNIFORMS

Employees of the baggage department of the Union Pacific have appeared in neat uniforms of straw colored canvas, in accordance with an order recently issued from the office of General Superintendent W. L. Park. Ordinary baggage handlers must appear in canvas of this color, although they may show their blouses when work makes them work. Baggage masters may wear uniforms of blue, similar to those of brakemen if they so desire, but must be uniformed. The uniform order was issued because baggage handlers at way stations and in small cities cannot be distinguished from ordinary laborers when garbed in ordinary working clothes. Hereafter no person will be permitted in baggage cars or in the vicinity of baggage tracks unless he wears a uniform.

Opening of the Storting. Christiansia, Norway, Aug. 21.—The people of Norway are looking forward with great interest to the action which the storting will take, which was opened today for probably the most important session it ever held. Notwithstanding the general excitement over the dissolution of the union between Norway and Sweden and the de-thronement of King Oscar, so overwhelmingly endorsed by the recent plebiscite, the opening of the storting was not accompanied by any breach of order. Everything passed off smoothly and in perfect order. An enormous crowd, was assembled in front of the parliament building and cheered the deputies as they arrived from the opening of the session.

It is expected that the storting will repeat the request that the riksdag declare the riksdag incompetent and the union dissolved. The storting will also express a vigorous protest concerning the details of the dissolution. It is the earnest desire of Norway to conclude the dissolution amicably.

Street Commissioner Martin Tierney today let the contract for his new two-story residence to be erected on his lots at the corner of Fifth street and Fruit avenue. Contractor A. W. Hayden secured the contract for the house, J. L. Bell & company the plumbing and M. Nash the electrical wiring. The residence will cost in the neighborhood of \$2,000.

PITCHER BENN MAKES GOOD

Fans Hoot Gallegos Off The Field For Playing Baby Act

LAS VEGAS DEFEATS SANTA FE

Aspirants 16; McIntoshes 8. Just two to one. That was the result of yesterday's games, witnessed by about a hundred fans.

It was just a game of who could hit the hardest, and the Aspirants won. The McIntoshes seemed demoralized by Benn's prowess. Benn is the new pitcher, an angular individual, six feet from spike to cap, and brawny. Benn wandered into Manager Houston's

First Baseman French Couldn't Hit Benn.

sports goods house about a week ago and said he was a pitcher. Houston told him that it would be of no use for him to hang around unless he could deliver the goods. He kept hanging around and yesterday he made good. The first three veteran

"Billy" Brown Reaches for 'Em on First.

McIntoshes up did not even so much as touch him. The fans were with Benn from that time on.

At the close of the third inning the score was 5 to 2, in favor of Benn. He and Pettus were the battery for the

Gallegos (Third Inning): "Me for Old Town."

Aspirants. Gallegos was mad and jealous and when the Aspirants made two more scores and the "yellow" came out on him, Gallegos took his bat and coat and went home, with his little

Umpire Combs Was Firm.

dog at his heels. Gallegos had only one friend at Tractor park and that was the dog. The release of Gallegos would be no great loss to the McIntoshes. It would be a saving of \$75 a month to them. Well, Willie Neher pitched and Starr pitched, and the fireworks went on. Ortiz and Pettus each made a circuit of the bags, and the fans hooted. It was the only way they could get their money's worth, and they yelled. It was not an errorless game, by a count which was finally lost. Rains caught for the Regulars.

The McIntoshes will go to Santa Fe next Sunday and a big excursion will accompany them.

Dr. Otto G. Heber, the optician, has recovered from a severe illness and is again in his office.

RIFLE THAT KILLED JOHN WILKES BOOTH

Bowling Green, O., Aug. 18.—The gun that avenged the death of President Lincoln, a gun which collectors would give a small fortune for, is enjoying a peaceful old age among its admirers of this country.

This gun, which is the rifle with which Boston Corbett shot Wilkes Booth after the assassination of President Lincoln by Booth, is still a serviceable arm, and bears few marks to indicate the strenuous life it has led.

The weapon was one of the Henry rifles issued to Union sharpshooters during the war. It was carried by Boston Corbett, a cavalryman in Col. E. G. Conger's command, and was used by Corbett against Booth when the latter was hiding in a barn, to which pursuit by federal soldiers had driven him.

Corbett acted against orders when he fired the shot that wounded Booth, and for this breach of discipline he was court-martialed and the weapon taken from him.

Col. Conger carried the gun for a long time in hunting trips. Wm. Strong, a captain of infantry, who was a warm personal friend of Conger, often accompanied the colonel on these hunting trips, and once carried the colonial twenty miles to a settlement in the Wisconsin woods after a deer had attacked and wounded the hunter.

After Conger's death, Mrs. Conger gave the weapon to Mr. Strong, who had been so intimate with the colonel. Mr. Strong, in turn, gave it to his sister, Mrs. (Dr.) G. B. Spencer, of Weston, O., and it remains in her possession, a much treasured souvenir which price could not buy.

The old leather case which covered it is still in existence, though quite badly worn out. The rifle shows a peculiar kind of ammunition not commonly sold any more, and for years has not awakened the echoes with its sinister "crack" that in times past sounded the death knell of many a brave confederate.

The government has made repeated offers of money for the relic.

FLEAS ACT AS ALLIES FOR A BOLD FORGER

GEO. EMMET FEARLESSLY ENTERS OFFICE FROM WHICH ALL HAD FLED AND WROTE SOME CHECKS.

Milwaukee, Wis., Aug. 18.—In Wisconsin fleas have become accessories to forgery. That is the condition found at North Milwaukee.

Geo. Emmet, alias Jack O'Malley, stands accused of having committed forgery with the aid of fleas. He is a fugitive from justice.

O'Malley has had a checkered career, judging from his story. He turned up at North Milwaukee, where he wrote poetry and showed himself generally full of interesting stories. He secured a position with Luther Bros., manufacturers of grinding machines. His quick wits made him popular with the company. Soon he was writing their advertisements and became a trusted employee.

Monday at 10 a. m. he passed the office door. The next moment the employees were driven from their desks by an army of fleas which descended upon them. Where they came from was a mystery. They routed the office forces and then made an attack on the plant. It had to be shut down. The managers of the plant telephoned to Milwaukee in attempts to get some exterminator which would war with the fleas.

They were not successful. George Emmet entered the office and his cousin fleas have become accessories to forgery. They decided to raise his salary. Emmet stayed in the office a long while for the ostensible purpose of exterminating the fleas.

That afternoon he left town. About the same time the fleas disappeared. The next morning Samuel Newmann, manager of the company, received telephone calls regarding several orders of goods. Come to find out, Emmet had made the rounds the day before, ordered all kinds of goods and cashed \$500 worth of checks drawn on the Wisconsin National Bank. The surplus of a large stock of small grinding machines also was found in his room.

Then they woke up. While Emmet has been in the office, presumably to kill fleas, he had been writing checks. Everyone agreed that unless he had some secret understanding with the fleas he could not have lived in the building. Whether it is true or for the people of North Milwaukee believe firmly that George Emmet, alias Jack O'Malley, and alias several other things, had trained the fleas and that when he left town his army of winged coadjutors had left with him.

ANNUAL RETREAT OF PRIESTS AT SANTA FE

The annual retreat of the arch-diocese of the Catholic church of Santa Fe will go into session at the capital city tomorrow. The following priests from the lower Rio Grande valley passed through the city this morning en route to be present:

Rev. J. P. Moag, of Salsburg; Rev. J. A. Pickard, of Helen; Rev. P. Pelser, of San Marcel; Rev. J. Kraye, of Monticello; Rev. J. B. Hollister, of Tome; and Rev. M. A. Dorchner, of Ileta.

St. Louis Wool Market. St. Louis, Mo., Aug. 21.—Wool market steady; territory and western medium, 26¢/27¢; fine medium, 22¢/25¢; fine, 17¢/19¢.

Regular meeting of Woodmen Circle tomorrow afternoon at 2:30 o'clock at Odd Fellows' hall.

Merry makers killed by a freight train. Butte, Mont., Aug. 21.—Nine persons were killed, one fatally injured and about thirteen more or less injured in a collision between a street car filled with returning merry-makers from Columbia gardens, and a freight train on the Butte, Anaconda & Pacific railway last night.

The dead are: Maggie Herrington, age 19 years.

Maudie Johnson, age 19.

Mrs. Jacobs, colored, age 19.

Mrs. Shale Smith, age 19.

Chris Wolf.

An unidentified man and woman.

Vera Houghton, age 14 years.

A three-fourth thought may save you no end of trouble. Any one who makes it a rule to keep Chamberlain's Colic, Cholera and Diarrhoea Remedy at hand knows this to be a fact. For sale by all dealers.

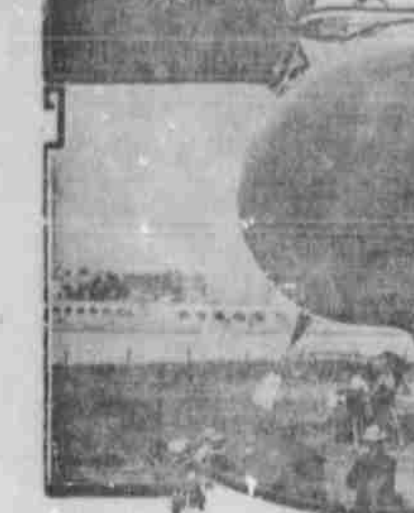

for men who toil

LEVI STRAUSS & CO'S OVERALLS

LINCOLN BEACHEY, A BOY AERONAUT

LAD OF 18 YEARS MAKES DARING FLIGHTS IN THE BIG BALDWIN AIR SHIP AT LEWIS AND CLARK EXPOSITION—HE TELLS HOW IT FEELS TO BE UP IN THE AIR A MILE.

Portland, Ore., Aug. 23.—Beachey, the boy aeronaut, that sounds something like the title of an old-fashioned

Portland, Ore., Aug. 23.—Beachey, the boy aeronaut, that sounds something like the title of an old-fashioned dime novel, doesn't it? But there is no fiction about the story of Lincoln Beachey, 18 years old, the boy aeronaut, who has made half a dozen daring flights in the big Baldwin airship at Portland, and who declares that he will keep on going up in this craft or some other, until he proves to the world that it is possible and practicable for man—even for a boy—to navigate the air.

KOREANS WANT COMPLETE NATIONAL INDEPENDENCE

San Francisco, Cal., Aug. 23.—The 7,000 Koreans of Hawaii have united in sending a representative to the peace conference between the peace commissioners of Japan and Russia. They have selected Rev. P. K. Yoon, a minister of the Korean Methodist church, who has been in Hawaii about two years. Of course, Mr. Yoon will have no official status.

ENVOY KOMURA'S MISFIT SLANT EYES

THE JAPANESE MINISTER OF FOREIGN AFFAIRS IS A QUEER LOOKING, QUERELY DRESSED LITTLE MAN, WHO SEETH BUT SAY ETH NOT.

New York, Aug. 23.—Baron Komura, Japanese minister of foreign affairs, who comes to plan peace as the representative of the victor, would not impress the casual observer as being the great man he really is.

Second Tennessee Memorial Unveiled
Shiloh, Tenn., Aug. 23.—The monument erected to the memory of the Second Tennessee Infantry Regiment, C. S. A., on the battlefield of Shiloh, was unveiled yesterday in the presence of several thousand ex-cavaliers from all parts of this state. Among those present at the ceremony were about one hundred former members of that regiment and a large number of Confederate veterans from other regiments of Tennessee. Mrs. J. M. Cheney, daughter of Commodore H. J. Cheney, of Nashville, Tenn., unveiled the handsome monument. Several interesting addresses were delivered.

Dr. W. A. Ferguson, pastor of the First Presbyterian church of Wilmington, Ohio, passed through this city this morning en route home from a visit to his daughter, Mrs. Blinn, wife of Dr. Blinn, of Kelly, Socorro county.

Utah Week at Portland.
Portland, Ore., Aug. 23.—The Lewis and Clark exposition management has designated the present week as Utah week at the big fair, and from present indications it will be one of the most successful weeks of the summer. Many visitors are already here from that state, and scores of others are on their way to take part in the big celebration of Utah day next Thursday. On this occasion the speakers will include Senators Smoot andutherland, Congressman Howell and Governor Cutler.

Frank Killeher, who came here a few weeks ago to take the position of day clerk of the Alvarado, has found that the altitude of Albuquerque is too high for him, and he expects to leave in a few days for a lower altitude.

CONTAGIOUS BLOOD POISON

Contagious Blood Poison more thoroughly poisons the blood than any other disease. Every part of the body is affected when the virus becomes entrenched in the circulation, red eruptions break out on the skin, the mouth and throat ulcerate, glands in the neck and groin swell, the hair falls out, copper-colored spots appear on the body, etc.

I was afflicted with blood poison, and the best doctors did me no good. I took their treatment faithfully, in fact I seemed to get worse all the while. I took almost every remedy that was suggested, but they did not seem to reach the disease. I was almost dead when I was cured by S. S. S. I feel like a new man now. I can do anything I want to do. I am cured of my blood poison. I am cured of my blood poison. I am cured of my blood poison.

So highly contagious is this disease that many a life has been ruined by a friendly hand or from using the toilet articles of one afflicted with the disease. To cure this hideous and fatal disease a constitutional remedy is required. S. S. S. goes down to the very root of the trouble and forces out every particle of the virus from the blood and cures the disease permanently. S. S. S. is purely vegetable and drives out the blood, cleanses the system, and restores the body to its normal state. Those who have been cured by S. S. S. can testify to its power. It is a cure for all blood diseases. It is a cure for all blood diseases. It is a cure for all blood diseases.

THE SWIFT SPECIFIC CO., ALBANY, N. Y.

DECREASE IN CATTLE RECEIPTS LAST WEEK

Kansas City, Mo., Monday, Aug. 21.—Cattle receipts last week 58,000 head, against 66,000 the week before. The decrease was in corn-fed cattle and quaternaries, while receipts of westerns and stockers and feeders were heavier, there were also plenty of cows and canners, which met a ready sale at average prices. The stockers and feeders sold at 10 to 20 cents lower during the week. The country demand has been a disappointment up to the last few days, but since prices have gone down to the present basis, the movement has been very large. Six hundred cars went out last week, the largest week this season, against 576 cars the previous week. The supply of cattle today is 12,000 head, smaller Monday for three weeks, and not up to expectations, and indicating a smaller supply this week than last. Market today is higher on everything except western grass steers, which are steady. There are mainly from Kansas and Nebraska pastures, and will sell better relatively from now on, as they are killing out better every day. They bring from \$3.40 to \$4.40, weighing from 1,000 to 1,250 pounds. Stockers and feeders sold from \$2.50 to \$3.75, mainly large numbers of panhandle cows today at \$2.25 to \$2.60, a few above this; canners \$1.75 to \$2.25, veal calves quarter higher today at \$4.00 to \$5.25, while \$2.15 to \$2.40. Packers ended last week with everything killed up and with a better demand from both the killers and from country buyers, together with an after receipts this week, the outlook is good for higher prices all around.

Sheep and lamb receipts were so small up to Friday last week that traders did not follow outside markets at all, so that cashmen secured advances regularly every day. A better run was received Friday, and receipts amount to 5,000 today, and buyers have made an effort to get back into line, but prices are still 15 to 25 cents above last Monday. Top lambs today \$5.75, although good diamonds sold at \$7.00 on three different days last week. Yearlings range from \$3.25 to \$5.75, withers around \$3.00, ewes \$4.40 to \$4.65, stock and feeding sheep \$3.00 to \$4.50, supply last week 16,000 head, but twice that number could have been handled at the prices indicated above.

CATTLE AND SHEEP SALES

Kansas City, Mo., Friday, Aug. 18.—Some sales of Panhandle cattle at Kansas City this week:
Monday, Aug. 14, 1905—
P. O. Wilson, Claude, Texas, 12 cows, 864 pounds, \$2.00; 21 heifers, 408 pounds, \$2.50.
L. N. Carson Canadian Texas, 22 cows, 541 pounds, \$2.40.
Mr. Davis, Pampa, Texas, 51 cows, 788 pounds, \$2.40; 88 calves, 213 pounds, \$2.65; 2 calves, 183 pounds, \$4.50.
N. T. Nelson, Clarendon, Texas, 31 cows, 721 pounds, \$2.90; 51 calves, 197 pounds, \$1.25.
Adair and W. Clarendon, Texas, 178 calves, 188 pounds, \$2.50; 26 cows, 378 pounds, \$2.40.
Mr. Owens, Allenhead, Texas, 201 steers, 991 pounds, \$2.25; 81 stockers, 727 pounds, \$2.50.
Tuesday, Aug. 15, 1905—
Reeves, Thomas, Shamrock, Texas, 23 cows, 631 pounds, \$2.20; 9 calves, \$2.50 pounds, \$2.25.
O. P. Jones, Shamrock, Texas, 60 cows, 724 pounds, \$2.30; 29 canners, 756 pounds, \$2.00.
W. D. Bailey, Wellington, Texas, 47 stockers, 821 pounds, \$2.30; 9 cows, 628 pounds, \$2.25.
Wednesday, Aug. 16, 1905—
W. Ellis, Miami, Texas, 53 calves, 180 pounds, \$1.80; 20 calves, 223 pounds, \$3.00.
H. G. Gill, Shamrock, Texas, 25 calves, 173 pounds, \$2.00; 10 calves, 128 pounds, \$2.00; 25 calves, 249 pounds, \$2.25; 27 cows, 790 pounds, \$2.40; 1 bull, 1,590 pounds, \$2.25.
Nay & Harris, Shamrock, Texas, 41 stockers, 655 pounds, \$2.05; 64 cows, 834 pounds, \$2.45.
Some Sales of Western Sheep at Kansas City This Week
Monday, Aug. 14, 1905—
B. Miller, Ash Fork, Arizona, 416 ewes, 88 pounds, \$4.50; 426 wethers and yearlings, 81 pounds, \$5.00; 65 yearlings, 77 pounds, \$5.50.
Beattie & Co., Rock Springs, Idaho, 2,159 lambs, 52 pounds, \$6.75; 324 lambs, 60 pounds, \$6.40.
Wednesday, Aug. 16, 1905—
Hayner & T. Cochrane, Kan., 227 ewes and wethers, 79 pounds, \$4.50; 139 bred ewes, 80 pounds, \$4.10; 28 feeders, 68 pounds, \$4.10.
Thursday, Aug. 18, 1905—
W. L. Booth, Holdrege, Nebraska, 233 sheep and yearlings, 97 pounds, \$5.50.

Hayley & Saunders, Nampa, Idaho, 335 sheep and yearlings, 83 pounds, \$5.60; 221 ewes, 92 pounds, \$4.60.
L. Finch, New Mexico, 190 yearlings, 67 pounds, \$5.85; 216 ewes, 90 pounds, \$4.75.
Garnes & Co., Colorado, 421 wethers, 87 pounds, \$5.00; 672 feeders, 91 pounds, \$4.35.

OFFICIAL MATTERS

Postmaster Appointed.
Peter L. Herrington has been appointed postmaster at Lynn, New Mexico.

Notaries Public Appointed.
The following notaries public have been appointed by Governor Otero: Encarnacion Randoval, Gallegos, Union county; Anna T. Baker, Las Alamos; Dona Ann Conner, Samuel T. Bishop, Capitan; Eddy Conner, J. R. Darrell, Elida Roosevelt county.

Decision in Bernillo County Cases.
It is more than likely that Governor Otero will not announce his decision in the cases of the charges preferred by District Attorney Frank W. Clancy against Frank A. Hubbell, treasurer; Delavio Villa, superintendent of schools; and Thomas S. Hubbell, sheriff of Grant county, this week. District Attorney Frank W. Clancy, who is very busy with his official duties, has requested reasonable time for the preparation and submission of his brief in the Thomas S. Hubbell case. This, it is believed, will be done next Saturday, and will then be taken under consideration by the executive.

BASE BALL

As evidence of the strength of the Las Vegas team, the doctory Clinton Miners were defeated at Gallinas park yesterday by a score of 8 to 5, with Panning in the box for the Blues. This Clinton team is the same that beat the McIntosh Browns at Clinton last week by scores of 10-0 and 8-0. "Big Chief" Myers, formerly of El Paso, is with them, and Charles Daniels, a former Las Vegas favorite, is among them. Manager Ed. Twining for the Miners in the Gallinas park game.

The McIntosh Browns are around selling tickets for their ball to be given at the El Paso opera house tomorrow night, and the most vendors are meeting with great success. The Browns used a little money to tide them over till fair time. The Woodmen organizers has been secured for the occasion.

Tickets for the excursion to Santa Fe on Monday were placed on sale today. This excursion is made for the purpose of showing as near as possible how many will go so that the Santa Fe will know how many cars will be needed for the occasion. As the H. S. Santa Fe has ordered six coaches, which will easily accommodate 600 people, but if the crowd proves to be larger, more cars will be secured. The fare will be \$2 for the round trip.

Apparently the people of Santa Fe are beginning to give the Albuquerque businessmen a clean reception next Monday. In holding its patrons the New Mexican says:
"When the Albuquerque people arrive last Sunday they will evidently be welcomed by the nice large audience and the wealth giving words that should be some of the principal residents of the city. They should be at dawn."

PITTSBURG GETS FAST MINOR LEAGUE PITCHER

Des Moines, Iowa, Aug. 23.—"Lefty" Leifeld, who signs his contract and indorses checks at Albert R. Leifeld, will become a Pirate next season, having been purchased by Dreyfus to bolster up the Pittsburgh pitching staff.
Leifeld leads the Western league twirlers, with twenty-two games won and four lost. He is a left-hander, with wonderful speed and almost perfect control. In addition to his pitching, Leifeld has been hitting a .348 clip, while out of 45 batting chances he has fanned but once.

PLENTY OF PROOF.

From People You Know—From Albuquerque Citizens.
The greatest skeptic can hardly fail to be convinced in the face of evidence like this. It is impossible to produce better proof of merit than the testimony of residents of Albuquerque, of people who can be seen at any time.
Read the following case of it:
J. A. Skinner, dealer in staple and news, says: "When a man finds an article extensively advertised does not do as he promises it is his duty to prevent his fellow men from squandering probably hard earned wealth in its purchase. It is just as much the duty of a citizen to tell his friends and acquaintances about articles upon which they can also depend. Some time ago there came to my notice a case of a child whose control over the kidney secretions was limited. The parents procured for it Doan's Kidney Pills at the Alvarado pharmacy, and the treatment, according to directions for children, was commenced. In addition to the limited control there was considerable backache, the complications fully proving that in some way the kidneys were either weakened or over excited. The treatment of Doan's Kidney Pills, so strengthened, washed and purified the kidneys that the annoyance ceased." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

R. L. Dodson, the automobile expert, returned last night from Santa Fe, where he was called a couple of days ago to doctor up Governor Otero's touring car, which was out of order.

The Difference in Cost

between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cause doctors' bill many times this.

Dr. PRICE'S Baking Powder

is the most economical in the end, because it goes further in leavening and insures perfect, wholesome food. When ordering of the grocer always call for Dr. Price's Cream Baking Powder by name for good health and good food. It makes the finest cake, puddings, flapjacks, biscuits and bread.

NOTE.—There are many imitation baking powders which are sold from five cents to twenty-five cents a pound. They should be carefully avoided as they are made from alum and are unwholesome.

PRICE BAKING POWDER CO., CHICAGO.

RICH STRIKE IN ORGAN MOUNTAINS

Parties in the city from Las Cruces report that the Modoc mine has again begun to make regular shipments of ore, says the El Paso Evening News.

Last week a rich strike was made while new development work was being pushed and some kidneys encountered that furnish ore when assays from ten to twenty per cent lead and from ten to twenty ounces in silver per ton.

The regular body of ore runs about 10 per cent lead and five ounces of silver. It is stated that there is an immense body of ore of this character already in sight and the present outlook justifies the employment of a large force of men.

The Modoc, as well as other properties in the Organ mountains, has frequently changed hands, and this to a certain extent has interfered with the proper development of the mine. There are vast deposits of lead in the Organ and several good veins of silver ore. Owing to the nearness of the district to El Paso special interest is taken in the development of its mining industry, and besides a number of persons from this vicinity own claims in that section.

A Hungarian Romance.
Pasadena, N. J., Aug. 23.—A pretty international romance culminated here yesterday in the wedding of Miss Amelia Dobbs of this city, and George Szecskay, editor of a Hungarian paper published at McKeesport, Pa. Miss Dobbs has been very active in Hungarian patriotic affairs in this country, and while he was editor of a Budapest paper, Mr. Szecskay read of her in the Hungarian papers of America. His admiration for her unknown, but patriotic countrywoman, went so far that he dedicated a poem to her and sent it from Budapest. The acquaintance began by correspondence, ripened into something more when Mr. Szecskay arrived in this country a year ago. Yesterday's wedding took place in St. Stephen's church, and was attended by prominent Hungarians from various parts of the country.

British Cruise in Baltic.
London, Aug. 23.—In view of the disturbed political conditions in the Scandinavian peninsula and the recent activities of the German emperor in that direction, it is but natural that keen interest should be manifested in the cruise of the British channel fleet, which started recently for the Baltic sea. The admiralty, however, disclaims any political move in choosing this unusual locality for naval maneuvers. It is stated that the fleet will pay no ceremonial visits, that the Baltic is an open sea and that the fleet is simply on a cruise to execute manœuvres.

Yesterday afternoon at the residence of Rev. Crawford, of the Christian church, occurred the wedding of Miss Mary Motzenbacher and George E. Sutherland, both young people are well known in this city. Mr. Sutherland is employed as a clerk in the Briggs drug store.

Cohocton's Centennial.

Cohocton, N. Y., Aug. 23.—The two days' celebration of the 100th anniversary of the founding of this town opened here this morning with the ringing of all church bells and the firing of cannons. Every public building and many business houses and private residences are gallantly decorated, and a festive holiday spirit seems to pervade the town. Hundreds of visitors from all parts of the state have come here to witness the celebration. The celebration proper began early this afternoon with a mass meeting, the program of which included many excellent addresses and the reading of a brief historical sketch of the founding and development of the town. In the evening there will be a reunion of old residents, and many of them will relate interesting experiences of the early history of the town. Tomorrow morning there will be a grand international parade, representing the business growth of development of Cohocton. Five bands will furnish the music. There will also be an exhibition of historical relics of the early history of the town.

Mrs. Rita L. Mensch and daughter will leave tomorrow for Denver and Colorado Springs to make a visit of several weeks.

Painless, Natural Childbirth.
Many a woman who would be preceded by a certain preparation on the part of her mother who experts in her duty to her unborn babe is to use every means within her power to aid his entrance into the world. Baby cannot help himself in this ordeal, therefore mother must help him. His health is often injured by the strain of his coming. Would you have your child a cripple, or would you have him a tower of strength? Strong men are not grown-up children; a famous surgeon in Vienna is devoting his life-work to the cure of little helpless cripples, deformed by birth, do not allow your child to become a cripple.

Mother's Friend
is a treatment which will forestall any possibility of accident at birth; that it releases all the anatomical muscles and tissues, and permits of an easy access to the child. It eases the mother's pain, and so assists nature that when baby comes he starts out in life with a constitution well able to fight life's battles, and to bloom into strong pure manhood that is the comfort and delight of every true mother's heart.
One dollar is the price at drug stores. Send for one book on "Mother's Friend." It is free.

NOTICE OF PUBLICATION.

Notice is hereby given that on April 15, 1905, the secretary of the Interior restored, to settlement the public lands in the following described townships which were temporarily withdrawn pending the procurement of an executive order by the secretary of war permanently reserving them for military purposes, and that the said public lands so restored to settlement on April 15, 1905, will become subject to entry filing selection at the United States land office at Santa Fe, New Mexico, on August 21, 1905, viz: Townships 9, 10 and 11 North, Ranges 2 and 4 East, N. M. Mer.
W. A. RICHARDS,
Commissioner General Land Office.
Approved May 8, 1905.
E. A. HITCHCOCK, Secretary.

TAKING ADVANTAGE OF GOOD HAY CROP

Stockmen Are Making Hay Now to Tide Them Over Winter.

ALL STOCK IS DOING WELL

Santa Fe, N. M., Aug. 21.—The last week has been warm and dry, with a large percentage of sunshine. The temperature averaged about a degree a day above normal. Practically no precipitation occurred and in some districts additional showers are beginning to be needed, the heat causing a rapid drying out of the soil.

Wheat, oats and barley are maturing slowly in the higher northern districts and harvesting continues, good yields being secured. A late threshing is also progressing and surprisingly large yields are reported in some instances. Second crop alfalfa has mostly been stacked and considerable work is being done in the native hay meadows, stockmen and ranchmen being anxious to take advantage of the good hay crop to tide over an occasional period of unfavorable weather during the coming winter, thereby reducing their stock losses. Reports from eastern counties state that millet cutting has begun. Range grasses continue good, and all kinds of stock are in excellent condition.

Beans and chick are ripening, and promise good yields. Corn is filling well, mostly beyond roasting ear stage and thus comparatively safe, except that late drouth will cause some shrinkage on the highlands, as the crop is touched by early frost. Fruits are ripening in unusual abundance. Melons are also ripening and some are of great size and excellent.

The following notes are taken from reports of correspondents:

Albuquerque, N. M., Aug. 21.—This week has been very dry, potatoes good, stock and sheep look well; hopes of a good hay crop.

Bethlehem, Frank Miera—Good rains at the close of the previous week. The seeds on the range are disappearing and grass growing nicely, laying clean and good; no hope for hay crop, however, but good winter grass is expected, and plenty of it. Very early the last of the week; stock of all kinds in very fine condition.

Capitan, Clement Hightower—Fine growing week, and crops are making good progress, spring wheat has been thrashed; corn getting too hard for roasting ears; prairie grass in bloom and growing nicely; no rain.

Colmar, W. H. Fulwider—Warm dry week, with no rainfall; grass on range and crops looking fair; beans and chick ripening nicely; corn filling well; orchards look well; cattle in good condition.

Elizabethtown, George E. Beebe—Warm, dry week; ideal weather for making hay, which work has begun in this vicinity. Highest temperature, 77 degrees; lowest, 54; rainfall, 0.01 of an inch.

Espanola, Frank D. Melville—Hot and dry weather, with no rainfall; native ranchmen busy cutting wheat.

Flora Vista, C. H. Tomlinson—Dry and clear weather; rain badly needed; second crop of alfalfa giving a fair yield; wheat and corn crops good; range dry, but feed is fair and stock are fat; water plentiful; early apples, peaches and melons are ripening.

Fraser, John R. Milligan—Second cutting of alfalfa finished and yield considerably better than first crop; good yields of beans and corn expected, if frost does not come too soon for the latter; cattle, horses and sheep in fine condition; grass fine in some places on range, but more rain is needed. There is a good supply of water in the creek.

Garcia, Lino Garcia—Some showers the previous week, which, however, did not fully relieve the drouth conditions; stock are in a satisfactory condition, but the calf crop is the lightest for several years.

Laguna, Gus Weiss—Harvested wheat has considerable cheat; rain is needed for the corn, as the heat is drying it out, but will be a good crop if rain comes soon; stock are in first-class condition; apples, plums, stone peaches and musk melons are ripe. Highest temperature for the week, 86 degrees; lowest, 52; no rainfall.

Las Vegas, Wm. Curtis Bailey—Clear, dry week, fully 80 per cent of sunshine; highest temperature, 94 degrees; lowest, 47; rainfall, 0.01 of an inch.

Logan, W. L. Bease—Crops in splendid condition.

Los Lunas, Charles F. Jones—Light showers during the previous week, but the river is low; second cutting of alfalfa about over and a light yield; prairie hay being cut, and yield will be quite heavy and quality good. This week was clear and hot; threshing and haying progressing; unusual number of birds, especially sparrows and wrens, evidently attracted by the abundance of grasshoppers on which they are feasting; a-spies are badly injured by the hoppers.

Manuelito, W. A. L. Tarr—Pleasant, hot week, but nights cool; stock looking fine; green corn, peas and beans plentiful.

Mescalero, J. W. Prude—Wheat is being threshed and yielding very well; some damage was done to it by the recent heavy rains; oat crop the best ever known on the reservation; are beginning to ripen; grass fine and range stock fat; outlook for winter wheat better than for years, and everything is lovely.

Pecos, A. Buente—Good growing weather; wheat harvest just begun and is promising; oats, corn and beans in good condition; second alfalfa crop at hand and is a better yield than the first; stock doing well.

Roswell, V. E. Weather Bureau—Very hot week; rain would be beneficial; highest temperature, 90 degrees; lowest, 59; sunshine, about 73 per cent; no rainfall.

San Rafael, Charles M. Grover—Frequent showers the previous week and range and crops growing finely; native grass is being cut in the mountains; wheat ripe; apricots and early apples are ripe and trees are full of fruit as they can hang.

Santa Cruz, J. M. Alandi—Wheat is an excellent crop; corn and alfalfa well; stock of all kinds are plentiful; gardens fair to good; hot weather is affecting some things, but there is plenty of water yet, and crops are all right; chile damaged some by corn.

Toxica, H. R. Putnam—Weather hot and sultry, but good growing weather;

THREE GREAT DRIVERS WHO WERE RECENTLY INJURED

OLDFIELD, KISER AND JAY, VICTIMS OF THE SPEED FRENZY, WHICH SEEMS TO HAVE THE WORLD IN ITS GRASP—SUCCESSIVE TRACK HORRORS IN THREE WEEKS, MAY DOOM CIRCULAR TRACK RACING.

OLDFIELD, KISER AND JAY, VICTIMS OF THE SPEED FRENZY, WHICH SEEMS TO HAVE THE WORLD IN ITS GRASP—SUCCESSIVE TRACK HORRORS IN THREE WEEKS, MAY DOOM CIRCULAR TRACK RACING.

WEBB JAY, EARL KISER, BARNEY OLDFIELD.

Within ten days three of the greatest track drivers in the automobile world have sustained injuries which, in two cases, shaved fatally so near now that the escaped border on the miraculous.

And in one case, that of Webb Jay, the injured man is not out of the shadow of the valley of death. He has, it is reported, a fighting chance to live.

The men injured are Barney Oldfield, of Toledo; Earl Kiser, of Dayton, and Webb Jay, of Cleveland, all from Ohio and all driving cars made in Cleveland.

In each case the driver was injured by his car plunging through the fence of a circular track, while doing better than a mile a minute.

Barney Oldfield, driving the Peerless Green Dragon, holder of more track records than any man in the business and generally regarded as the greatest track driver in the world, was injured during the Detroit national meeting.

His accident was peculiar in itself. Oldfield, leading his competitors, and the position next to the fence, when his engine went wrong and the car slowed up. Dan Wargula, driving the Rio Hilo, was close behind Oldfield, his machine running at full speed. Unable to turn out, Wargula crashed into the Green Dragon, sending it through the fence into the infield.

Oldfield, leading his competitors, and the position next to the fence, when his engine went wrong and the car slowed up. Dan Wargula, driving the Rio Hilo, was close behind Oldfield, his machine running at full speed. Unable to turn out, Wargula crashed into the Green Dragon, sending it through the fence into the infield.

"EVERYTHING SATISFACTORY" NOT ENOUGH ON UNITED STATES SUBMARINE.

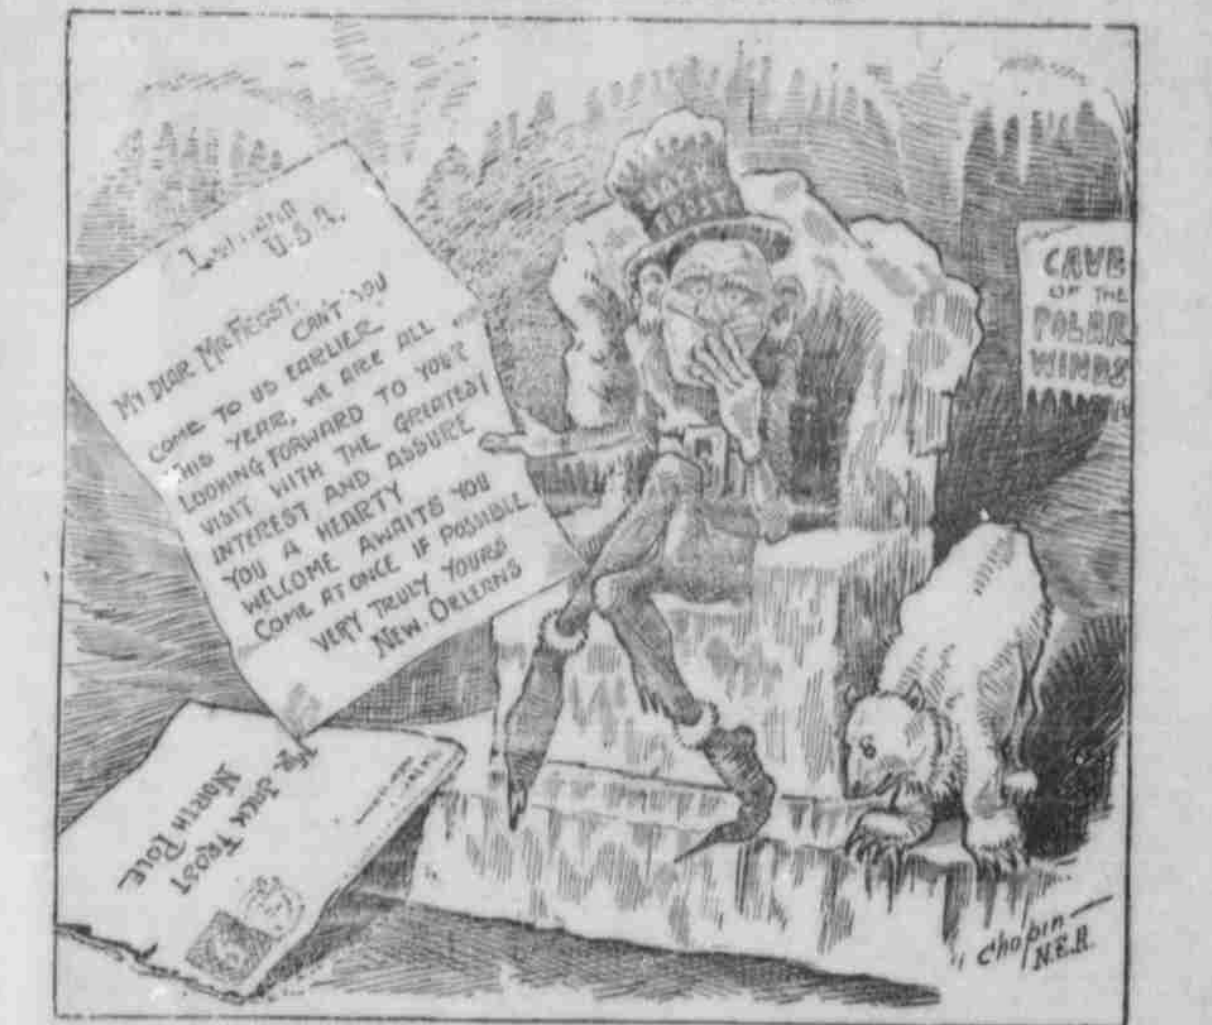

MUST BE MORE THAN THAT ON THE PLUNGER WHEN SHE STARTS TO SINK—IF PRESIDENT ROOSEVELT SHOULD TAKE A NOTION TO HAVE A TALK WITH FATHER NEPTUNE.

New York, Aug. 22.—"Everything satisfactory" will not do," said Assistant Naval Contractor Roberts, at the Brooklyn navy yards, as he gave orders to submerge Uncle Sam's crack submarine Plunger for a more thorough test.

"Everything satisfactory" was the report I had after the Plunger's last test, but everything must be more than satisfactory. We cannot take any chances and there will be no doubt about her when she drops into the hands of Father Neptune in at Oyster Bay. It would be a bad thing if all failed, but the crew of the Plunger are, after all, men of the service and they personally guarantee the craft as safe as any of its kind that ever stuck its nose under water. The Plunger is driven by electricity, and is considered by navy officials as marking the very highest development in submarine construction.

CORDIALLY INVITED

IT IS GENERALLY ADMITTED THAT NOTHING BUT FROST CAN BRING TO AN END THE YELLOW FEVER EPIDEMIC—NEWS ITEM.

AMERICAN BAR ASSOCIATION.

Narragansett Pier, R. I., Aug. 22.—The annual meeting of the American Bar Association has brought to this town one of the most notable gatherings of distinguished lawyers ever held in this country. Every part of the United States is represented and among the delegates are many of the greatest legal authorities on various branches of jurisprudence known in this country. The convention was called to order by President Henry St. George Tucker, of Lexington, Va., and held a short meeting in the morning and another meeting in the afternoon. The new Matthews hall had been selected for the headquarters of the association.

One of the most important subjects that will come up for consideration will be the report of the committee on insurance, which will be submitted by Ralph W. Brookbridge, of Omaha, the chairman of that committee. The report makes the following five specific recommendations: Legislation by congress providing for the supervision of insurance; the repeal of all existing policy laws; a uniform fire policy, the terms of which shall be specifically defined; the repeal of all retaliatory tax laws; stricter incorporation laws in the several states as they affect the creation of insurance companies, and a federal statute prohibiting the use of the mails to all persons, associations or corporations transacting business of insurance in disregard of state or federal regulations.

It is expected that W. R. Vance, of Virginia, a member of the committee, will submit a minority report in which he will differ from the majority of the committee not in its general findings but on the proposition that there is no constitutional obstacle existing to the inauguration of federal insurance business.

In addition to the general meetings of the association there will be sectional meetings and a meeting of the Association of American Law Schools. Another feature will be a conference of the commission on uniform state laws. The convention will close on Friday night with a banquet.

MUNICIPAL OFFICIALS MEET.

Toledo, Ohio, Aug. 23.—The annual convention of the League of American Municipalities was formally opened here today. At the opening session this functionary Mayor Finch welcomed the delegates on behalf of the city and Mayor William C. Croft, of Joliet, Ill., who is also president of the league, responded on behalf of the league. Frank H. McDonald, of Minneapolis, delivered an address on "The Workhouse."

In the afternoon session Charles A. Hagne, of New York, spoke on "The Fire Department Water Supply." J. W. Wood, of St. Louis, on "The Municipal Lighting Plant." In the evening Peter W. H. city clerk of Cleveland, Ohio, will deliver an address on "How to Tax Real Estate." H. P. King, smoke inspector of Indianapolis, will speak on "Abating the Smoke Nuisance."

The afternoon session today was very short and immediately after the session the delegates took a trolley ride through the Maumee-Perryburg belt. There will be two sessions tomorrow and in the evening a banquet and theater party. On Friday the visitors will take an excursion trip on the steamer "Eaton" and in the evening they will attend a performance at the Casino.

"THEY ALL DO IT" SAYS MR. RIPLEY

The Rebate Comment of the President of the Santa Fe Railway.

WORK ON THE BELIN CUT-OFF

The following interview with President E. P. Ripley, of the Santa Fe, appeared in the Sunday issue of the Kansas City Star.

"It is a common thing and the only excuse made is that they all do it." This observation was made by E. P. Ripley, president of the Atchafalaya, Topeka & Santa Fe railroad, to a reporter for the Star, last night. Mr. Ripley had just been told of the proceedings brought in the federal court yesterday wherein the government charged the Santa Fe with giving rebates to the Hutchinson, Kansas, Salt company, of Hutchinson, Kan.

Mr. Ripley would not discuss the case or the subject of rebates further. Mr. Ripley arrived on a special train from the west at 9 o'clock last night. He left Kansas City last Sunday morning, and with a number of executive officials of the Santa Fe system has traveled the south line to Guthrie, and thence over on the Peoria valley line to Roswell, N. M.

"There are good crops in all parts of the Santa Fe territory," said Mr. Ripley. "The wheat crop is being handled expeditiously, and I look for no difficulty in handling all of the crop."

"Work is progressing rapidly on the Belin cut-off," continued Mr. Ripley, "but it will not be completed within a year. This cut-off will divert our main line south and cut out the expensive climb over the Hatan mountain range."

We expect to complete the Belin cut-off before winter. This will give us a complete double-track system between Kansas City and Newton, Kan."

Mr. Ripley was accompanied by J. W. Kendrick, vice president of the system; George T. Nicholson, passenger traffic manager; W. B. Storey, Jr., chief engineer at Topeka, and J. E. Hurley, general manager. They will leave this morning at 6:30 o'clock for Chicago.

Had Mr. Ripley arrived in Kansas City an hour earlier he would have met George B. Harris, president, and D. Willard and Darius Miller, vice presidents of the Burlington system. This party arrived in Kansas City yesterday afternoon and after a brief inspection of the terminals in the west bottoms, left for St. Louis.

J. W. Kendrick, vice president of the Santa Fe, represents that road up on the board of directors of the Union Depot company. Mr. Willard represents the Burlington system. Both said that a meeting of the executive committee of the directorate would be held in Chicago soon for the purpose of taking up the proposition for a new union passenger station in Kansas City.

RIO GRANDE BUYS COLORADO & WYOMING

It is rumored that the Rio Grande Railroad company has purchased the Colorado & Wyoming road and will take possession October 1. The Colorado & Wyoming has been owned by the Colorado Fuel and Iron company. It is stated that the object of the Rio Grande in purchasing this road is to build its line from Terrell to a rich farming and mineral country in northern New Mexico, to head off the Rock Island. For the past two years it has been rumored that the Rock Island was bidding for the Colorado & Wyoming with the intention of building from Terrell to Tucuman, which would give a direct line into Terrell. It is thought that the purchase of this road by the Rio Grande interests and the Rio Grande people will forestall the Rock Island.

Work has been commenced on ballasting the roadbed of the Santa Fe between this city and Jales and it is expected that the work will be completed in a few weeks. F. B. Beckett, civil engineer of the Santa Fe, and his assistant, J. D. Newton, are in charge of the work.

MAY MEAN RAILROAD FOR DEATH VALLEY

The fact that "Borax" Smith, the promoter of the Tonopah & Tidewater railway, has shipped several carloads of railroad material and supplies on the Santa Fe to Indio, California, would suggest that he has abandoned the building of the proposed line from Las Vegas, Nevada, and that he would build into Death Valley from the south, making the junction point with the Santa Fe at Indio, or near there.

PHILIPS-DODGE ROAD WILL BE EXTENDED

The surveying camp of the Phelps Dodge company was pitched at Las Vegas Saturday. From Dawson to Las Vegas, a route that has no heavy grades, has been located. Chief Engineer Leavitt says it is the intention of the company to push the road on to Torrance, on the El Paso & South western, just as soon as the line has been run.

NEW SWITCH ENGINES FOR THE WEST END

Some of the new 900 class engines, which were recently ordered by the Santa Fe company, from the Baldwin Locomotive Works, have arrived in Topeka for delivery on the west end. The company is to put in 10 new engines, among which will be a number of switch engines of late design and great power.

FORMER SANTA FE MAN DIES AT KANSAS CITY

Bill Tink, for twelve years general live stock agent for the Santa Fe railway, died at Kansas City yesterday of locomotor ataxia, aged 49 years. He was stricken with paralysis seven years ago and had not walked since.

WESTERN RAILROADS ARE CITED FOR CONTEMPT

Contempt proceedings, charging violation of the order of District Judge John P. Phillips, issued in March, 1905, restraining the defendants from giving rebates in violation of the interstate commerce law, have been filed at Kansas City, Mo., in the United States district court against the Chicago & Alton, the Burlington, the Missouri Pacific, the Rock Island and the Santa Fe railways. These companies are charged with giving rebates in

violation of the restraining order, and the court is asked to cite them for contempt.

The contempt, for alleged rebates specifically in the case of the Alton, that that company granted rebates amounting to many thousands of dollars on the shipments of agricultural and farming machinery to the International Harvester company, "which owns and controls the operating Harvester company, the McCormick Harvester company, the Plano Harvester company, the South Chicago Furnace company and the Illinois Northern Railroad company. It is alleged that the Chicago & Alton agreed with the Illinois Northern to file with the interstate commerce commission pretended joint tariffs of freight rates effective from Chicago to Missouri river points, for the express purpose of evading the restraining order, and that the Alton did in fact, give to the International Harvester company 25 per cent of said pretended tariff rates."

The proceedings against the Missouri Pacific, the Rock Island and the Santa Fe allege that in like manner these companies violated the restraining order by giving rebates to the Hutchinson, Kan., Salt company, in collusion with the Hutchinson, Kan., Salt company, of Hutchinson, Kan., and Arkansas River railroad, which latter company is controlled and operated by the salt company. These roads are alleged to have given the salt company 35 per cent of a pretended joint tariff rate upon salt tonies to points on the Missouri river.

The charges were filed by A. Van Valkenberg, United States district attorney for the western department of Missouri, at the instigation of M. D. Purdy, assistant attorney general of the United States.

Judge Phillips, September 18 as the date upon which the companies are ordered to make their plea to the charge of contempt.

POPULAR SANTA FE EMPLOYE MARRIED THIS MORNING

At the Immaculate Conception church at 9 o'clock this morning, Burton Connelly, checking clerk at the Santa Fe freight depot in this city, was married to Miss Marie Shoop, a well known young lady of Albuquerque. The ceremony was solemnized by Father Mandanier, J. B. Storey, Jr., chief engineer at Topeka, and J. E. Hurley, general manager. They will leave this morning at 6:30 o'clock for Chicago.

REASONS WHY SANTA FE MAY BUY MIDLAND VALLEY

President Ripley of the Santa Fe has decided, it is said, that the Midland Valley railway and its builders are encroaching on the trunk line's territory in building northwest to Wichita, Kan. For that reason the Santa Fe is attempting to buy the Midland Valley and President Ripley has just completed a tour of inspection of the smaller road, has an option on the property, and indications are there will be an announcement shortly of the sale being consummated.

The Midland Valley road is being built by the same men who built the Choctaw, Oklahoma & Gulf, recently acquired by the Rock Island. This road has been completed from Fort Smith, Ark., to Tulsa, and is now under construction to Pawhuska, O. T., the capital of the Osage Nation, with right of way purchased to Arkansas City, and thence into Wichita. The line to Pawhuska will be completed by not later than November 1st, possibly sooner.

It is said that President Ripley has made the owners of the Midland Valley a handsome offer, by which the Midland Valley will receive \$100,000 a mile on the property under construction, which is about 200 miles. It is further stated that if the deal is consummated the road will not be built further than Pawhuska.

The two roads now work in absolute harmony, having terminal, freight and station arrangements here, and turn business to each other.

MEXICAN CENTRAL NOTES TAKEN BY A SYNDICATE

It has been officially announced that a syndicate of New York and foreign bankers, headed by Ladenburg, Thalmann & Co., and Hallgarten & Co., has bought from the Mexican Central railroad company, limited, \$5,000,000 of the company's 5 per cent year notes out of a total authorized issue of \$10,000,000. The sale of these notes comprises the financial arrangements for carrying out some comprehensive plans by the railroad company for the extension of its lines from the present terminus at Tuxpan in the port of Manzanillo, the acquisition of the Mexican National Construction company and Coahuila and Pacific railroad, about 300 miles in length, the latter to be operated in the joint interest of both companies.

WABASH WILL HAVE TRANSCONTINENTAL LINE

Announcement has been made that the firm of William Kennecott & Co., of Pittsburgh, with branches in other cities, has been awarded a \$15,000,000 contract by the Wabash railroad. The contract calls for the building of 400 miles of road between Salt Lake City and San Francisco.

It will require three or four years to complete the job, when the Wabash, with the closing of the gap between Pittsburgh and Huntington, W. Va., will have a continuous line from Baltimore to San Francisco.

ARRESTED FOR ISSUING A WORTHLESS CHECK

Edwardo Vigil was arrested today on complaint of Elias Garcia, the wool and hide dealer, charged with issuing a worthless check. He will have a hearing before Judge Crawford tomorrow morning.

It seems that Vigil gave a check for \$10 to a man in the employ of Elias Garcia, which was cashed by Garcia. Upon taking the check to the bank it was turned down, as the drawer had no funds on deposit.

Garcia then started out to look for Vigil and met him on the street and told him about the worthless check. A war of words followed and the arrest of Vigil was the result.

Metal Market.

Polo Tournament at Newport.

Newport, R. I., Aug. 23.—The annual tournament of the Westchester polo club opened here yesterday. Entries are unusually numerous, and a spirited contest is expected. The tournament will close on the 30th of this month. The principal trophies to be contested for are the Newport, the Westchester polo club and the Brenton Reef cups.

NEW PUMPING PLANT AT AGRICULTURAL COLLEGE.

Prof. Fabian Garcia, horticulturist at the New Mexico College of Agriculture and Mechanical Arts at Mesilla Park, last week completed the installation of the new pumping plant on the land recently purchased by his department just west of the college. The outfit consists of a Fairbanks-Morse twenty-two horse power gasoline engine and a six-inch Fairbanks-Morse centrifugal pump. In the experimental run it has proven to be satisfactory and will be used for irrigation and experimental gardening work.

PARENTS REFUSE AID TO INCORRIGIBLE SON.

Olin Nokes, the 14-year-old Roswell boy, accused of rifling the mails and forging endorsements on checks in order to get them cashed, will have his battle with the law to fight alone. His parents will do nothing for him, as they have already refused to attempt to get him and have decided to let him await trial in the Chaves county jail.

BANK OF DAYTON TO OPEN IN SIXTY DAYS.

The Bank of Dayton, a state institution, will be open and ready for business at the town of Dayton, Eddy county, within the next sixty days. It is capitalized at \$30,000, with the full share taken up, and calls for more. After securing a charter a two-story brick building will be erected especially as the home of the bank, and it will start out with the following officers: Dr. G. Pinnell, president; Paul Hayes, vice president; A. H. Kent, cashier. The directors are A. H. Kent, G. Pinnell, J. H. White, H. Pearson, A. W. Henry, Paul Hayes, J. L. Edge, H. A. Van Epps and C. L. Davis.

DR. HOOK WANTED BY THE COLORADO SPRINGS POLICE.

Dr. M. B. Hook was wanted by the police of Colorado Springs on a statutory charge, and was arrested in Denver recently. Hook is a married man, his wife living in Iowa, but for a long time he has been living with Miss Hattie De May, of Chicago, and introducing her as his wife. His lawful partner in life has heard of his actions and is now determined to make both the man and woman "so trouble possible. Miss De May is also under arrest at Denver on charges filed by the police of Colorado Springs. Dr. Hook practiced his profession in

MINERS DRILL INTO UNEXPLODED CHARGE.

Richard Cole and Walter Meyers were blown up in the Strawberry mine at Tres Piedras Monday afternoon. The accident occurred from drilling into a charge of powder that had failed to go off. Cole was very badly hurt and Meyers will live. The Strawberry mine is owned by Michigan parties and is situated twelve miles west of Tres Piedras.

EDDY COUNTY SCHOOLS IN GOOD CONVENTION.

The annual report of the schools of Eddy county as prepared by County School Superintendent M. P. Kerr, shows that the schools are in excellent condition. The total enrollment for the year, including district, city and the public schools of Carlsbad, was 1,241. The total receipts for the past year were \$25,998.06 and the expenditures were \$18,141.81, leaving a balance on hand with which to begin the coming school year of \$7,856.25. The enrollment was larger than that of a year ago by 122.

UTILITIES POWER DAM AT CARLSBAD BEING REPAIRED.

Work has been commenced on the repairs to the public utilities company's power dam at Carlsbad, Eddy county, and it is expected to soon have it in condition so that the city electric lights can again be resumed. The entire dam will be rebuilt and made three feet higher. Sluice boards will be used, raising the dam eleven feet above the concrete, but so arranged by means of hinges that in case of floods they can be laid down flat and thus leave the channel entirely unobstructed. The earth work on the east bank will also be made four feet higher.

QUIETLY MARRIED LAST EVENING

C. Herbert Appleton and Miss Mabel Yarbrough were quietly married at 8 o'clock last evening at the home of the bride's mother, Mrs. Myra Yarbrough, at the Harwood home. Rev. William Phillips, pastor of the Lead Avenue Methodist church performed the wedding ceremony. In the presence of a few relatives and intimate friends of the contracting parties.

The bride, who has been a teacher in the Harwood industrial school, is a popular young lady of this city and the daughter of Mr. Myra Yarbrough, the manager of the Harwood school. The groom is also well and favorably known and holds a responsible position, that of shipping clerk, with the Whitney company.

The young couple will take up their residence in the Peoria addition, where Mr. Appleton has built and furnished a cozy cottage for his bride.

"York State Folks," which comes to the Elks opera house next Thursday evening is remarkable for the attention which has been given to detail in the settings and accessories, giving the play a general realistic atmosphere. Electrical devices are used to secure fire fly and other effects in the famous "Maggie Lane" scene, and an almost unceasing real storm of thunder, lightning and rain, is a feature of the first act.

LOCAL NEWS

William R. Fullerton of Socorro, is in the city on business.

W. R. Lyons has filed his bond with the probate clerk as a notary public.

Juan N. Sanchez, well known sheep man of Cuba, is spending a few days in the city.

H. J. Rainer, who owns the famous Phoenix ranch near Watrous, spent the day in Albuquerque.

Hon. W. B. Childers has returned from a trip to Los Angeles, Cal., where he went on legal business.

There was no meeting of the city council last night owing to the absence from the city of some of the members.

R. H. Thompson, city engineer of Seattle, Wash., is spending a short time in Albuquerque on a visit to his brother, Rev. H. C. Thompson, of the Mother, Father, the carpet and rug merchant, returned to the city last night from a trip to New York and other eastern centers, where he went to lay in a new stock.

William Neal, district agent for the United Central insurance company, of Cincinnati, was a passenger north this morning. Mr. Neal expects to be absent from the city until Saturday.

The interior of the postoffice is being repainted and papered and overhauled in general. When completed it will present a much neater appearance. The improvements have been badly needed for some time.

Dr. P. A. Jones, the mining expert, returned this morning from a pilgrimage to the mining districts of the southern part of the territory. The doctor says that there is marked activity in every part of the territory.

Adam R. Lombeck, aged 27 years, died this morning at his apartments on South Arroyo street, after a brief illness with typhoid fever. The deceased was a young architect of Albuquerque, Pa., and came to Albuquerque two months ago suffering with a slight attack of tuberculosis. After coming here he was taken down with typhoid fever, which resulted in his death today. His brother, Henry Lombeck, was with him when he died. O. W. Brown's Sons will ship the body east tonight. The remains will be accompanied home by the bereaved brother.

C. J. Rely, advance agent for "York State Folks," which will be at the Elks opera house on the evening of August 31, is in the city making arrangements for the performance. Mr. Rely expects to be in the city for some time, and is looking for a good place to set up a wood-working shop of a wagon factory. This setting shows the blacksmith, paint and wood shops in full operation, and is one of the bits of novel realism which have made this play different from all others of its class.

Charles M. Cooney, of Socorro, discoverer of the famous Cooney mine in Grant county, is spending the day in the city, accompanied by Mrs. Cooney. Tonight Mr. and Mrs. Cooney will leave on an extended pleasure trip over the northwest country, taking in the Colorado park, Salt Lake City, the Lewis and Clark expedition at Portland, San Francisco and southern California.

Mrs. P. A. Jones and sons, Elston and Frank, returned yesterday from an outing spent at the James hot springs. The elder son, Elston, will leave for Holt, Mo., where he will enter the Missouri state school of mines. The young man is a graduate of the New Mexico school of mines, and now goes east to secure a more advanced knowledge of his chosen profession.

C. P. Myers, of the Post Hardware company, celebrated his birthday last night by a most elaborate party given for a few friends. Prof. Dr. Mauro and his orchestra were present, and one of the enjoyable features of the evening was the rendition by the orchestra of a new composition, Gold Stars, an overture composed by Prof. Dr. Mauro expressly for the occasion, and dedicated to Mr. Myers. Those who were fortunate enough to hear the music pronounced it very fine and greatly to the credit of the professor.

Toar is a new postoffice established in Roosevelt county, with J. W. Coleman as postmaster.

Martin Ingalls, proprietor of the Grand Canyon hotel at Williams, Ariz., is registered at the Alvarado.

Ben Friedberg, a brother of Joseph Friedberg, of the Baumgardner grocery store, from Lafayette, Ind., is in the city.

J. W. Anderson, of the Monarch Grocery company, has returned from a several month's outing at Camp Whittow.

Attorney Harry P. Owen left last night for San Marcel, where he goes on legal business connected with the Armerianos land grant case.

Charles P. Easley, attorney general of the territory under the Thornton administration, is in the city from Santa Fe on legal business.

Postmaster F. O. Flood of Las Vegas, paid a visit to the city this morning, returning to the Mexican territory from a month's visit on the Pacific coast.

W. T. McClellan, business manager of The Citizen, is expected home from a three weeks' journey to New York, Chicago and Kentucky on Friday evening.

Charles H. Rice, son of Mr. and Mrs. O. L. Rice, left this morning for Grand Island, Neb., where he goes for his health. The altitude here is too high for him.

Mrs. J. W. Preater, who went to California early in July to spend the summer, has changed her residence from Los Angeles to Avalon, Santa Catalina islands.

Don J. Hernandez, president of the Albuquerque affiliate of the Fraternal Order of Eagles, has returned from Denver, where he went to attend the grand assembly of the order.

Miss Blanche Owen, formerly of this city, but now of Tucson, Ariz., is in the city, the guest of friends. Miss Owen has been spending several weeks with Miss Anita Becker, of Helen, and is in the city just for the day.

Attorney W. B. Childers left this morning for the north, his destination being Texas, where he is called as counsel in the receiver's sale of property of the Franco-Mountain Copper company. Mr. Childers expects to return to the city on Saturday evening.

Captain R. Hays has called a meeting of the volunteer firemen at the Elks opera house for this evening. The volunteer firemen of New Mexico will hold their annual tournament at Las Vegas the last week in September, and Captain Hays thinks that Albuquerque should send a large squad.

Alfred Stanley, who has been spending a month camping in Bear canyon, has returned to the city.

OBEYING ORDERS OF THE SHEEP SANITARY BOARD

Pursuant to the orders of the territorial sheep sanitary board, the five inspectors appointed by that body for the counties of Eddy, Chaves, Roosevelt, Lincoln and Otero have commenced work of dipping all the sheep and goats in those counties.

Alfred Stanley, who has been spending a month camping in Bear canyon, has returned to the city.

tion and a racing team to the fete of the occasion. These are matters which will come up for discussion at the meeting to be held tonight.

Miss Nell Delaney, Stracke Wolfe and Mary Ebert, three young ladies from Circleville, Ohio, who spent the summer in the west, left this morning on their return home. They were guests of Miss Irene Albright for several weeks and a large number of friends were at the station this morning to see them off.

Tony Ortiz, of the Albuquerque Carriage company, is nursing a very sore neck and a pair of badly bruised shoulders. Mr. Ortiz was tussling with an employee of the factory Monday, when he fell over a wagon wheel. The sharp edges of the axle lacerated his neck and he was severely bruised by the fall. He was able to continue work yesterday, however.

Nat Green returned last night from Denver, where he attended the grand service of the Fraternal Order of Eagles. He was accompanied to this city by W. V. Mackey, of Carson City, Nev., and J. J. Chestnuth, of San Francisco, both prominent members of the order. The gentlemen will spend a couple of days in Albuquerque and then continue their trip home.

Ford Bros., who have been conducting a livery and boarding stable at 211 and 213 West Alvarado avenue, for some time past, have sold their business to J. W. Patterson, a newcomer from Durango, Colo. The consideration was \$2,000. The Ford Bros. have not decided what they will do in the future, but intend to remain in Albuquerque.

One day he told her that he had decided to go to Europe. When he went to go Ada expressed little regret at his coming journey, and bade him goodbye without even a friendly handshake. In truth she did not believe that her lover was really going abroad.

The days passed and he did not appear at the "Frasier" home. One day at the dinner table her father remarked:

"Sherburne is really going to Europe, at last. He wishes to get rid of his plantation, before he goes, and has offered it to me at half its value. He will leave in two days."

Ada's heart beat tumultuously within her breast, but she gave no sign of her feelings. She could not sleep that night, and when the next day passed without bringing him for a last farewell, Ada feared that it was almost more than she could bear.

The day before his departure Sherburne was looking over some possessions that he wished to keep from the contents of the house. He came upon a pair of dueling pistols, and was admiring their exquisite finish, when Harry Bertrand, a young student at home for vacation, and a nephew of Mr. Frasier, burst into the room.

"Oh, Sherburne!" he exclaimed, "those who think enough of the fabulous gold mine story to seek out its location, and they have gone so far as to obtain the friendship and attention of the widow and are hopeful of results. Last week Mrs. Rhodes left the little farm north and west of Price in the care of the help about a place and outfitted for the reservation country. Accompanying her is Joseph H. Sharp of Sunnyvale, Dr. A. W. Dowd of the same place, and Thomas Rhodes of Hejper, the latter a brother of the late Caleb Rhodes. The party has now been out a week, and is believed to be by this time in the north range of the Utah mountains to the east of Heber City and to the west of Vernal. Their departure was announced in no way, and their return is absolutely problematical. They were equipped for a long stay."

The widow of the late Caleb Rhodes is well advanced in years, but despite this is hale and hearty, and capable of standing much hardship of a character that would naturally be encountered. On the other hand, it is not likely that if she possesses the information as to the location of the mine she would intrust its location sixty days after the opening to anyone but herself, if it should be on the reservation proper. If on a forest reserve, the location may be made now, as well as at some future time, in the present quest for its whereabouts, one Hathenbrook, of Provo, who was supposed to be the partner of Caleb Rhodes, in the property, appears to have not been contented, and it may be that the unraveling of the two ended so far as Mrs. Rhodes is concerned, with the death of her husband.

Thomas Rhodes, the brother of Caleb, must have had another and a new revelation as concerns the property, for it was only a short time ago when, discussing the reservation opening, that he connected it with the mine, that he doubted the existence of the mine. Sharp was formerly superintendent of the Sunnyvale coal mines, while Dr. Dowd is the Utah Fuel company's physician at Sunnyvale. Thomas Rhodes is a farmer and cattleman.

As a result of the energetic and effective measures adopted by County Physician S. A. Miliken, of Silver City, small pox, so far as Grant county is concerned, has been practically exterminated. The quarantine established on the Minnervos river at Dwyer was raised some days ago, and Saturday a similar quarantine was taken at Hanover, where another case existed. All of the patients have recovered. Dr. Miliken was called to Hachita last week to look after two cases which had been brought to that town from across the line in Old Mexico. In one of the cases the child died, but the other is getting well, and it is expected that the quarantine there will be raised during the present week.
