CARNIVAL OF RACES AND BASE BALL A BIG SUCCESS

Some of the Fastest Base Ball Ever Played in This City Was Seen Saturday and Sunday Between Amarillo and Tucumcari Teams.

COMMERCIAL CLUB DECIDES TO HOLD 3 DAYS FAIR SEPT. 27, 28, 29

The three days of racing and base ball ending here Sunday afternoon of last week was a big success and attracted many visitors to the city during the three days, anywhere from 1200 to 1500 people attending the sports each day. The program for the entire three days was well conducted and the people are well satisfied with the character of the sports given.

The News can't say too much for the magnificence and generous department of the Amarillo club and we may as well add to this that they play ball like thunder. We gave the result of Friday's game and the races in our last Saturday issue and the games of Saturday and Sunday between Tucumcari and Amarillo resulted as follows:

Saturday's Game		A	R	H	P	O	A	R
Tucumcari	AB	1	0	1	1	1	1	1
Stewart, R.		0	1	0	1	1	1	1
Hutchinson, 2b & c		0	1	1	2	4	1	1
Dingwell, ss		2	4	0	2	2	2	2
McGowan, cf		1	0	1	0	0	0	0
Dingwell, lb		0	0	0	0	0	0	0
Lyons, p		1	2	1	8	0	1	0
Chavonough, cf		2	1	0	0	0	0	0
Laneester, rf		2	0	1	0	0	0	0
Schert, cf		1	1	0	0	0	0	0
Bess, 3b		5	1	0	0	0	0	0
Robertson, p & 2b		5	2	0	0	1	1	1
Bowman, c		4	0	2	10	2	1	1
Total		43	10	14	27	12	0	0

Sunday's Game		A	R	H	P	O	A	R
Tucumcari	AB	1	0	1	1	1	1	1
McGowan, 3b		4	3	1	3	0	0	0
Hutch, 2b		4	1	2	1	3	1	1
Bowman, c		4	1	8	1	0	0	0
Schert, p		4	1	0	0	0	0	0
Laneester, rf & lf		4	1	2	0	0	0	0
Stewart, lf & cf		4	1	0	0	0	0	0
Meade, cf		4	1	1	0	0	0	0
Lyons, lb		4	0	1	1	0	0	0
Dingwell, ss		4	0	2	1	1	1	1
Total		36	9	10	9	17	0	0

Score by Innings	
Tucumcari	0 0 0 1 0 1 1 1 0
Amarillo	0 0 4 0 0 0 1 3 17

Summary	
Stolen bases—Chavonough, Robertson, Sims, Crofford.	
Two base hits—Lewis, Bowman, 2.	
Hutch, Lyons, Dingwell.	
Three base hits—McGowan.	
Strike out by Lewis 8; by Robertson 3; by Hutch 2.	
Innings pitched by Robertson 4; Hutch 2; Lyons 10.	
Sacrifice hits—McGowan.	
Errors—Lyons—Amarillo 8; Tucumcari 1.	
Double plays—Hutch to Bowman to Lyons.	
Times on ball—off Robertson 3; off Hutch 2; off Lyons 3.	
Hit by pitcher, Sims, Schert.	

MERCHANTS TRADES CARNIVAL AN UNQUALIFIED SUCCESS

One of the Most Enjoyed Home Talent Shows Ever Seen in This City and Well Patronized.

FUNDS GO TO IMPROVEMENT OF CITY PARK

The Merchants' Trade Display put on at the Evans Opera House last night by Mr. and Mrs. J. K. Crofford, under the auspices of the Blue View Club for the benefit of the public park was an unqualified success both from a financial viewpoint and otherwise. Something over a hundred dollar home made goods the committee in charge the first night and tonight a new program will be put on with several additional scenes, and it is going to be worth your while to see it. The Women of Tucumcari always do things in a way that makes you feel like tipping your hat to a worthy matron and their daughters. The improvement of the city park is a worthy cause and merits the splendid patronage which is being given this entertainment. This is one of the best home talent shows ever produced in this city, and the advertising given the business firms of the city is worth many times the cost.

The High School Orchestra furnished the music which was up to their usual good standard. Among the special numbers was the vocal solo by Miss Ruth Aber which did full credit to the untalented talent of this charming young lady, the instrumental number of Miss McKenzie who needs no introduction to a Tucumcari audience, and the closing duet by little Mabel Peavin and Robert Sandusky. The price of five dollars, offered to the child selling the largest number of tickets was won by little Miss Evelyn Tromp.

Among the most striking displays were those of Barnes & Bonkin Furniture Co., represented by Mrs. Shaaf and little Gladys George and Edith Young, in which the billiard scene displaying a handsome folding davenport was most effective; the Ice Plant was beautifully represented in a tableau with Mrs. Chapman as the principal figure; C. C. Chapman was finely represented by Miss Alrizer with the gun and ammunition that "gets the game"; Mrs. Secora's Millinery had a beautiful display in Mrs. Robertson, exquisitely gowned and hat-ted; the Elk Drug Store was ably represented by Mrs. Holloman in a Rexall and hair restorer scene; one of the best was the Farmers' Restaurant, given by Miss Beulah Simpson; the Artists Studio and Mrs. Nix were cleverly represented by Miss Stoum and Mrs. George; M. R. Goldenberg & Co. had a handsome clothing display put on by Miss Corn; Miss Aber represented Gross Kelly & Co. in a very beautiful costume; the three lumber companies each had good displays. Mrs. Clark in a colonial costume representing The Tucumcari Lumber Co., and Mrs. Matland the Belmont Lumber Co. in a very clever scene. "There are no flies on me" to the tune of America; the two banks were repre-

ented by Mrs. Littleton and Miss Sadie Crofford, the former, the First National, in black and silver with a splendid national banner, and the latter in black and silver guarding the wealth of the International Bank of Commerce with a sixshooter; the grocery store was ably represented in character, Miss Deline Brown in a Japanese girl, Miss Whelan in a Japanese girl, Miss Allie Peavin very cleverly representing Wolfe & White's Meat Market with a live pig in a straw strap, Mrs. Sandusky, F. S. Smith's Flour Mrs. Finkenberg, Roger Bros.' Flour Miss Harrison, Alton's Coffee, each being exceptionally good. Dodson's Feed & Grain Co. was represented by Mrs. Standil, The Evans Realty Co. by Mrs. Edger, Porter, the City Bakery by Ruth Davis and little Robert Sandusky, the Jersey Dairy by Hettie Allen, the Telephone Company by Maple Neufus, Miss Neufus also represented the Tucumcari High School in a very effective scene closing with the chorus "School Days." Miss McKenzie as a traveling salesman talking shop to the Emporium manager was very effective, Miss Cox in a gorgeous headpiece of unique decorations represented Givell's Curio Works, W. L. Kirkpatrick, the plumber, was represented in a very pretty bathing scene in which Mrs. Outlip transformed a very much soiled youngster into a fairy of cleanliness; Mrs. Crofford's newly instituted green house was prettily represented by Miss Brown and little Montie Wharton in a wheelbarrow of greenery and flowers; one of the most effective scenes was that in which Miss Powell drove a handsome rig across the stage for the City Livery; this lady also was the central figure in the open did exhibit of the Cigar factory; one of the best was the display of Bert Gregory's blacksmith which Miss Colla Shoberger gave with fine effect; Roberts & Pack were represented by Miss Reece Littleton who served a number of ladies with cream; the firm of Ritz & Son was represented by Mrs. Crofford and some new boys building a miniature sidewalk; Mrs. McDonald, the Lady of the Brook Decoration left no doubt but that she was the Tucumcari Brown Factory; the Steam Laundry was well represented by Mrs. Cannon; Jones the Jeweler displayed his wares on Miss O'Grady; J. A. Nichols the Shoe man was represented by Vivian Langley; the Tucumcari News was doubly represented by Mrs. Smith followed by a most convincing-looking devil and little Miss Ann Russell in another scene who was gotten up very effectively as a newsboy. Tucumcari is there when it comes to pulling off a classy show and you should be there tonight.

QUAY COUNTY TEACHERS' INSTITUTE CLOSSES SUCCESSFUL TERM

Nearly a Hundred in Attendance and a Very Beneficial Session Held and Standard of Excellence Higher Than Heretofore Among the Teachers of the County

TERRITORIAL SUPERINTENDENT J. E. CLARK COMMENDS WORK

One of the most successful county institutes ever held here closed its work Thursday, and Friday and today examinations are being conducted for the benefit of those desiring certificates. Nearly one hundred teachers have been in attendance and the standard of proficiency among the teachers of the county is higher than ever before. The work of the institute was highly commended by Superintendent Clark, and others who had the opportunity to visit during its session. The teachers were pleased with the institute faculty and their work was made a pleasure instead of a task by the courteous and professional treatment given them throughout the term. The cost of the residence and employment of the teachers is attended, since follows:

Roster	
Carrie Collins, Tucumcari.	
J. C. Williams, Hanley, teach.	
Carrie Colvin, Tucumcari.	
Virginia McJure, Mills, teach.	
Lee Lanester, Plains, teach.	
A. J. Cannon, Russell, teach.	
R. B. Garrett, Dodson.	
J. T. Doty, Allen, Valencia Co.	
J. D. Buck, Armon, teach.	
W. L. Hoffman, Nara Vista, teach.	
George Jeffrey, Tucumcari, teach.	
Hilmae Swift, Loney, teach.	
Clara Latham, Loh, teach.	
W. V. Willis, Armon, teach.	
P. D. Pullen, Revuelto, teach.	
Fred Irving, Obar, teach.	
Bell Irving, Obar, teach.	
Clara Kennedy, San Jon, teach.	
Judd Miller, Tipton, teach.	
Nora Waggoner, House, teach.	
Mabel Stoum, Tucumcari, teach.	
May White, Reno, teach.	
J. H. Rain, Endes, teach in Valencia Co.	
Burgess Hopner, Montoya, teach.	
Mrs. C. F. Pratt, Ragsdale, teach.	
C. L. Daley, Tucumcari, teach.	
Mrs. C. B. Long, Loyd, teach.	
Soldier Troop, Salina, teach.	
Stella Reed, Russell.	
Hella Reed, Russell.	
Lola Martin, Frost, teach.	
Lois McKeehen, Nara Vista.	
Edna Chesland, Allen.	
Grandford Williams, Tucumcari.	
Fred Bell, Tucumcari.	
Zella Whitmore, Tucumcari.	
Irish Davis, Tucumcari.	
Hettie Allen, Tucumcari.	
Sadie Crofford, Tucumcari.	
Fay Porter, Tucumcari.	
Jewel Manner, Tucumcari.	
Lee Nora Shearer, Tucumcari.	
Edna Shearer, Tucumcari, teach.	
Lee Conley, Tucumcari.	
Belle Jordan, San Jon, teach.	

PERSONALS FROM THE INSTITUTE
Mrs. C. A. McCammon, arrived from Paulson, Kansas, where she has been spending the summer with Mr. Cammon's parents.
Thursday night Prof. Henderson's Orchestra and the city teachers entertained Territorial Superintendent James E. Clark and all visiting teachers. A program was rendered and refreshments served, and a very enjoyable evening was spent. Prof. Clark is very enthusiastic and well pleased with our schools. State Superintendent Clark visited the institute Thursday. This is Prof. Clark's first visit to the Quay county Normal and they feel highly complimented.
Mrs. Cornell, who has been conducting the institute at Santa Rosa, passed through our city today for her home in Itaton.
Dr. C. M. Light and Miss Marjorie Hubbard, two of the instructors, left for Raton today where they will conduct the Colfax county institute. Their work has been satisfactory here and Quay county wants them again.
Supt. Secora of Carrizosa, has been a visitor to our city the past few days, representing the Oklahoma school methods.
The Normal closed Thursday night, Friday and Saturday being devoted to examinations.

These stopping at the Elk Rooms this week were: Mr. and Mrs. Allen, Quay; O. M. Anderson, Liberal, Kans.; C. A. McCammon and wife, city; G. F. Pruitt, Pastora; Lon Shipplet and wife, Dawson, Mr. Dykes, Duran; Thos. J. Hogan, Memphis, Tenn.; Sherman Ray, Bell Ranch; Mrs. Virginia Cates, Knoxville, Tenn.; Mrs. E. J. Parrham, El Reno, Okla.; A. C. Schickel, Amarillo; E. J. Tammis, Little Rock; E. J. Snow, Little Rock; Alex. Aston and family, Endes; W. W. Pratt, Canode; Miss Dorothy Russel, Clayton; Miss Hubbell, Raton; J. D. Buck, Armon; G. F. Miesky, Kirk; Lee Lanester, Plains; J. T. Doty, Allen.

FAIR ORGANIZATION BEGINS WORK

Committees are Appointed at Meeting the First of the Week and Duties Assigned—Vice Presidents Appointed Over the County.

The Fair Association held a meeting the first of the week and appointed committees and assigned their duties and instructed them to begin their work immediately. The publishers of the county and many other are appointed vice-presidents. The premium list and literature advertising the three days program will be out by the middle of the month. The committees appointed are as follows:
President—A. B. Carter.
1st Vice-Pres.—S. T. Hopkins.
Sec.—Trans.—Stanley Lawson.
Vice-Presidents: L. L. Klinefelter, Obar; M. J. Norton, Norton; Fred Walker, Puerto; J. B. Pettit, Plain; H. P. Whitesides, Quay; E. O. Davis, Pleasant; B. F. Conger, Hudson; W. B. Haynes, Bard City; W. L. Batson, Endes; F. Martinez, Revuelto; Wm. Weber, Logan; Paul Siegel, Nara Vista; Geo. Sall, San Jon; H. S. Barnham, Castleberry; J. C. Anderson, Hanley; J. W. Prunty, Montoya; Walter Gray, Ogle; J. H. Welch, Forest; J. P. Brissey, Ragsdale; W. A. Thomas, Ima; J. L. Housa, House; E. A. Mauer, Orton; W. C. Hawkins, Montoya; Paul Jones, Logna; V. E. McNeil.

SCIENTIST HERE LOOKING FOR POTASH DEPOSITS

Louis B. Dutcher, Sec. of the National Earth Co., the producers of Pullers Earth, Chicago, has been in the city several days, and is making this his headquarters while he takes samples of potash and materials used by his company in the manufacture of Pullers Earth. Since the German government has placed an embargo on potash and salt, these deposits are becoming more valuable. Mr. Dutcher has visited the Obar country, the Caprock and Salado in Grand lunge country. He carries his own chemical laboratory with him and makes analyses and assays of the materials he wished to learn of in this section of the country.

FOR POTASH DEPOSITS

G. W. Reek, who lives on Fourth Street in the Southwest section of the city has a very fine garden. He left a cucumber at the office today that weighs two pounds, and he says he has cabbages just as fine as they are supposed to grow in any county. A small garden spot is a great deal of help in governing the grocery bill.

THE COUNTY FAIR SEPTEMBER 27, 28, 29.

Friday night the 11th, the Chamber of Commerce took advantage of the large crowd of farmers in the city to attend the meeting and base ball sports and held a meeting as previously announced and discussed the subjects of "Good Roads and County Fair." The Avade Theater was full of interested members and visitors who took a lively part in all the proceedings.
There was many interesting things said on the road question, and Commissioner Stubbins explained that the county had something like \$8000 coming from the territory that could be available in the road fund. The commission has been allowed something over \$2000 that will be available to construct a bridge across the Plaza Largo and to begin work on the road proposed to be built across the Caprock at different places. Needed repairs are to be commenced upon Quay immediately. We all understand how important good roads are in the life of every town and Tucumcari is no exception to the general rule. All roads in Quay County lead to this city and this summer we have a lot of them to build. It will increase our trade with the out lying precincts and stimulate added production among the farmers who raise for the market.
County Fair
When the subject of the county fair came up there was more than the ordinary amount of enthusiasm manifested in the minutes and there was thorough and general discussion. H. M. Cottrell, representing the agricultural interests of the Rock Island, entertained those present for half an hour in a way that the impression he made and the information he conveyed will last for a long while. He stated that he had been engaged in soil experiments and scientific agriculture in the states of Kansas, Nebraska and Colorado for the past twenty five years, and that he believed he had more confidence in the future greatness of Quay county than any citizen he had met. He explained to those present that with a small acreage under irrigation from wells and scientific cultivation of dry farm lands this country should be settled as thickly in a few years as western Kansas or any of the states in the rain belt. But, he continued, as long as a few school teachers and preachers who work at something else most of the time are depended upon to develop the country and produce profitable crops little would be accomplished. He did not mean, we believe to cast any reflection upon either the teacher or the preacher, but by way of distraction he intended to convey the thought that the man who turns the deserts into a garden and makes substantial homes on these plains and plateaux, that, as the room said in the crop game, keep his mind on his business. He must cultivate the soil and not give a part, maybe most of his time to some other business or profession. He predicted a great future for Quay county and explained that it is the intention of the Rock Island to devote much time and will expend large sums of money to aid the agricultural interests of Quay county and the northeast New Mexico. He spoke of the importance of a county fair as the means of a stimulant to the farmer to grow the best stuff possible for the labor and money expended, and in conclusion explained the great work ahead of the Dry Farming Congress, to convene at Colorado Springs in October and urged us to prepare exhibits for this exhibition of dry farm products and to have them ready not later than the 10th of October and the Rock Island would help them to the Colorado Springs show free of cost, where they will have every attention possible to give them. Mr. Cottrell's brief lecture to the farmers present and the Chamber of Commerce was full of valuable information and was received with great appreciation by everybody present.
Prof. Christenson, a government hydrographer was next called by Mr. Carter, the president of the Chamber of Commerce, and he told us something of what the government is doing to determine the annual flow of streams that are proposed to be used in storing water for irrigation reservoirs in this section

Prof. Christenson, a government hydrographer was next called by Mr. Carter, the president of the Chamber of Commerce, and he told us something of what the government is doing to determine the annual flow of streams that are proposed to be used in storing water for irrigation reservoirs in this section

Score by Innings	
Tucumcari	0 7 0 1 0 0 1 8 9
Amarillo	0 0 0 2 0 2 0 0 7

Summary	
Stolen bases—McGowan, 3; Hutch, 1; Lyons 1.	
Two base hits—Lanester 2, Hutch, Meade, Alburn 2, Lewis.	
Home runs—Sims.	
Strike out by Schert 8; by Malloy 5.	
Sacrifice hits—Hutch, Harper.	
Bases on balls—off Schert 6, off Malloy 3.	
Double Plays—Schert to McGowan to Hutch.	
Passed Balls—Bowman 2.	
Wild Pitches—Schert 1, Malloy 1.	
Hit by Pitcher—Keith.	
Umpire—Seigel.	
Attendance—1400.	

Malloy got his bumps in the second inning. Four two-baggers, a single and a base on balls netted seven runs. After that Tucumcari romped home an easy winner.
This is how the runs were scored in the second. Lanester, the first man up, hit for two bases and was safe on third when Cook belted Stewart's grounder and failed to get either man. Meade made a double two-bagger scoring Lanester. Lyons struck out. Dingwell followed out, Stewart and Meade scored on Gowans' hit. Hutch hit for two bases and Bowman walked filling the bases. Justice dropped Schert's fly and Gowans and Hutch scored. Lanester came up for the second time and signaled the ball out for another two bases, scoring Bowman and Schert. Stewart was tossed out at first on a grounder to Harper.
Amarillo got two runs in the fourth after Sims and Manning struck out. Keith was safe on an error by Hutch went to third on Alburn's two-bagger, and both scored when Schert threw wild to third trying to catch Keith. Justice went out on a fly to Dingwell.
Tucumcari scored in the third when Gowans singled and went to third on Bowman's hit. In Amarillo's half of the sixth Sims hit for a home run. Manning and Keith struck out. Alburn cracked out a single. Malloy was safe when Lanester dropped his fly. Alburn moving to third and scoring when Lyons muffed a thrown ball. Harper ended with a grounder to Gowans and Justice was forced at second.
Tucumcari was blanked in their half and Amarillo added three more runs in the seventh. Cook singled and Lewis doubled. Dingwell allowed Sims a grounder to go through him and Cook scored. Manning struck out. Cresting ton sacrificed. Alburn hit safely, scoring Lewis and Sims. Malloy struck out, ending the inning and run getting for Amarillo.
The home team scored their final run in the eighth inning after Lyons hit a grounder to second and was thrown out at first. Dingwell popped to short making two out. Gowans walked, stole second, went to third on a wild pitch and scored on Hutch's hit. Hutch going to second on the throw in. Bowman fanned.
Now in conclusion and getting down to some personal mention the News desires to say for the base ball fans that Amarillo has a fast looking set that will make any day in the week. After seeing them in action Saturday and Sunday we can understand how they happened to win 33 out of 34 games played previous to coming here.
Ducky Gowans made himself solid with the fans by his great work. His third base play in the second game was the classic exhibition ever seen around here. In addition to his great defense his aggressive work on the base line and at bat were a la Ty Cobb.
Bowman caught a good game Sunday.

ORGANIZES DRY FARMERS AT CHAUTAUQUA

Association Will Affiliate With International Dry Farming Congress; Lectures by McPherson and Ely.

(By D. R. Lane)
Mountair, N. M., Aug. 7.—After the regular session of the Chautauqua had closed Saturday and organization was effected, which will probably do more than any other body or institution to advance the prosperity of New Mexico as applied to the raising of crops on lands having a limited water supply.

This organization is the New Mexico Dry Farming association, an affiliation of the International Dry Farming congress and Prof. J. D. Tinsley of Albuquerque was the man who took the foremost part in its formation.

Following the regular session, Mr. Tinsley addressed a number of dry farmers, of whom a large portion of the audience had been composed, on the subject of the formation of an association in the territory. Prof. J. M. Jardine was also present, as were President Isaac Barth and Secretary John B. McManus of the territorial fair, and they took active parts in the organization of the association.

Professor Tinsley spoke of the objects of the congress and explained that the farmers could achieve the greatest benefit from it through the organization of a section devoted exclusively to New Mexico and affiliated by New Mexico men with a New Mexico membership.

He stated the object of the proposed organization to be the advancement of production on lands of sparsely watered areas through the means of seed selection, moisture conservation and scientific soil treatment.

A constitution embodying the best points of all the constitutions of similar state organizations was adopted, and the officers elected, in part. These were as follows:

President, W. E. Garrison, Mesilla Park; vice-presidents, N. S. Belden, Las Vegas; T. A. Tillingshast, Elida; J. M. Harlan, Melrose and Earl Scott, Estancia; temporary secretary, treasurer, A permanent officer will be selected as soon as the executive board meets. Its entire committee, Isaac Barth, Berna Lillo, Charles F. Schreck, Guadalupe C. A. Probert, Thos. John W. Corbett, Terrance. Others are to be elected from the other counties; none other being represented at the time.

Exhibit to be Made at Fair

The question of making an exhibit at the State fair in Albuquerque this fall was taken up and discussed, and it was the sense of the meeting that such an exhibit should be made, but as it is the business of the executive committee alone to decide on what exhibits and where, shall be made, the matter could receive no official action. Each farmer agreed, however, to save particularly fine specimens which he should raise for exhibition.

All these specimens will be awarded a place at the fair, and will be judged there. Then the finest selected stock of them all will be sent to the dry farming congress in Colorado Springs. It is made plain that space there will cost nothing, nor will transportation of exhibits and the only item of expense would be the cost of shipping and decorating the exhibit.

Mr. Tinsley made it equally plain in his address that this was a critical time with New Mexico, because the crops of the country are at present on the territory due to the action of congress to day and that it was up to the dry farmers to do their share. He also said that it was unlikely that the dry farming congress would again meet in Colorado Springs or in other southwestern city for some years to come and that it was up to New Mexico and New Mexicans to attend this year if possible.

The meeting closed with enthusiastic signing of the constitution and the paying of membership fees, and the outlook for the future of this organization is brilliant.

Bulletins covering the work of the international congress will be mailed each member throughout the year. These are said to be very valuable and

many are joining merely for the sake of obtaining the information they contain.

"Magic of the Pump"

By Ralph C. Ely

One of the features of Saturday's entertainment at the Chautauqua was the illustrated lecture of Hon. Ralph C. Ely of Deming, on the "Magic of the Pump." Mr. Ely's address was delivered in the characteristic manner of the well known speaker, and was both entertaining to the layman and instructive to the prospective punper. It was also an able exposition of the marvelous possibilities of the Deming region.

Mr. Ely began with the time he came to Deming eleven years ago, and spoke interestingly of the barrenness of the country at that time. He told of his first attention to the pumping idea by seeing an old Chinaman at work in his garden, irrigating by means of a pump, and his subsequent experiments in that line of operation, and spoke of the development of the industry into its present magnitude. He illustrated his address with many fine slides of Deming and vicinity, some of which told graphically and far better than any speaker could in mere words of the contrast between former barren plains and present fertile farms. He gave an able exposition, and spoke at length upon this phase of the subject, illustrating with views of his own and other pumping works as well as photographs of chosen spots of Deming country.

His address was replete with facts and figures regarding the costs of sinking and operating wells and pumps, he placing the initial cost of a well and pumping outfit in the Deming country as low as \$1,000 to \$1,500 set up ready to operate, and the potential profits as high as \$500 per acre, which he said many farmers were making at present.

His lecture included a comparison of the Deming with the California situation, and he answered all questions asked by the audience regarding the matter.

Mr. Ely showed that it was possible not only to profitably pump water for irrigating special crops like onions and celery but that general crops such as alfalfa could be profitably watered in that manner.

According to him the Deming water supply is practically inexhaustible, and the pump lift very moderate, much less in fact than that in California.

His lecture was well worth hearing by a more casual observer, and valuable in the extreme to the farmer, especially in view of an arid or semi arid region.

McPHERSON TELLS THE FACTS ABOUT FRUIT LANDS

Alexander McPherson was the second speaker on the evening program on Saturday and delivered an able treatise on irrigating fruit lands. His statements on trees and tree growth were simply marvelous for exactness and his illustrating slides wonderful.

Mr. McPherson began his remarks by saying that he was confident that the policy adopted that day by each county to speak only the truth in New Mexico advertising was one that would rebound alike to the credit and profit of the new state.

Mr. McPherson's most startling statement was that he had found a system to obviate the excess and wastes of the farmers' irrigation, side-hill irrigation, and did all his at night when he knew the water would be taken care of by the slope of the ground.

This system consisted of a number of spouts placed in the boxes of the distributing ditches or laterals and of size varying to meet the demands upon them. He advocated the growing of all crops in such a manner as to do away with the moving of their thorny roots with water at any time, and said he had disregarded the flooding proposition entirely, regardless of the crop.

Prof. McPherson advocated deep plowing and much subsoil cultivation, and said that it was useless to expect to grow crops on soil not at least four feet in depth, as a shallower soil would not retain a sufficient moisture to produce a crop. He thought six feet a better depth, and showed by slides the great length to which the roots of fruit trees and alfalfa and other crops penetrate. He said that in Colorado roots of alfalfa had been encountered in places 100 or more feet below the surface of the ground and showed that and must be deep to provide for such

root growth. The roots of a tree, he said, were larger than the top and he proved his statement.

Mr. McPherson called the smudge pot the farmer's insurance against crop failure and talked interestingly of the smudging at Roswell last spring, when every able-bodied man in the city helped light smudges whenever they were needed.

He advocated rigid winter pruning, and said that summer pruning misunderstanding over the trees daily and thumbing back every shoot not needed. He said winter pruning was the only possible commercial method.

Prof. McPherson's lecture was one interesting alike to farmers and fruit growers and the general public, and was well received. The committee is to be congratulated on having secured so able a speaker at this meeting.

Rev. S. A. Bright of Albuquerque delivered a sermon lecture at the Chautauqua Sunday afternoon which was much appreciated. Rev. Mr. Bright is superintendent of missions for the Methodist church of the territory and his address was listened to with the closest attention on the part of the large crowds which attended. His masterly handling of this difficult theme did him credit as a speaker and as a theologian.

The Sunday school was headed by Rev. Hermon P. Williams, also of Albuquerque, and was in good hands. Rev. Charles Oscar Brodman had been selected to take charge of this department yesterday, but was called back to Albuquerque to officiate at a funeral. His place was ably filled by Rev. Mr. Williams.

Large crowds continue in attendance, and the fact that all trains bound for Albuquerque are now being held 45 minutes each night is expected to materially increase the number of visitors from the metropolis.

The Chautauqua's success is assured and again Mountair is the credit of financing a Chautauqua in the smallest town where such a gathering is held. This is the third year in which such an affair has been held and no doubt cannot be said about the past and enterprise of the people back of the thing. Great credit is due to John W. Corbett, "father of the Chautauqua," and a tireless worker in its behalf; to W. M. McVay and to Dr. R. E. Hedding, able supporters of the president, as well as many others whose efforts have gone to make the thing big here that it is. Mountair may not have many people, but every one who lives there is a live wire, man, woman or child, and there are no knuckle-drawers and a host of loafers.

This evening Hon. Gordon C. Crow, former secretary to the late Sam Jones, will deliver a lecture just as the great evangelist used to do. His subject and the matter itself are the work of Jones, and Mr. Crow is said to deliver in exceptionally fine and interesting manner, and a treat to those who attend the evenings when he is on the program. His subject tonight is "The World as It Is and Ought to Be." Tomorrow night he will be "Character and Character."

Miss Emma I. Smith, a woman's work missionary of the Baptist church in the territory, delivered an address Sunday evening on her experiences among the Hopi Indians. She told of her hazardous journey across the desert north of Holbrook, of nights spent in the open with no other care than that of Him, and of her talk at length of Hopi customs and superstitions.

Her address was very interesting and her description of an Indian marriage feast especially so. According to her, the Women's Home Missionary society of the Baptist church has two women at work with these people and is here trying them such.

CURTIS BIPLANES AT FAIR

Albuquerque, N. M., Aug. 7.—Glenn H. Curtiss, probably the best known aviator in the world, general director of the Curtiss Exhibition Company of New York, a man who has won and amazed thousands by his thrilling flights, has signed a contract with the New Mexico Fair Association for two flights daily in Albuquerque on Wednesday, Thursday and Friday of Fair Week, October 1 to 14. It is not yet known whether Mr. Curtiss will make the flights himself, or whether they will be made by one of his associate aviators, John A. McAnis, Eugene B. Ely, Hugh A. Robinson, James J. Ward, Lincoln Beavers and C. C. Wilmer, all of whom have splendid records for flight on many fields. The conditions of the contract signed in New York Wednesday afternoon between P. F. McCanna, Chairman of the Advisory Board of the Fair Association, and Mr. Curtiss on behalf of his company, are that there shall be two flights daily on three days of Fair week, one flight to be at least over five hundred feet high. The fact that an aviation meet has been secured for the State Fair, and that aviators of international repute will participate, more than assures the success of the avian meet feature of the fair exhibition.

CURTIS KIND OF AVIATORS

Albuquerque, N. M., Aug. 7.—Visitors to the New Mexico State Fair in Albuquerque, to be held October 9 to 14, are now positively assured by the fair Association that they will witness airplane flights by either Glenn H. Curtiss or one or more of his five associate aviators, the ascents into the higher altitude to be made in the latest type Curtiss biplanes. A contract for successful flights more than five hundred feet into the air on Wednesday, Thursday and Friday of fair week was signed Wednesday in New York City by P. F. McCanna, Chairman of the Advisory Board of the Fair Association, and Glenn H. Curtiss, of the Curtiss Exhibition Co. Mr. Curtiss is the kind of aviator in America and the Curtiss flights will be the biggest feature at the fair.

REMINGTON UMC
AUTOLOADING SHOTGUN

Not a single ounce of muzzle energy is lost. Part of the recoil, ordinarily absorbed by your shoulder, is utilized to operate its mechanism. You have five shots, three to get the crippler—each and all under absolute control for rapid or deliberate fire as need may be. Solid Beech. Hammerless. Safe!

Remington-UMC
—the perfect shooting combination.

ONE FAIR FOR ROUND TRIP TO STATE FAIR

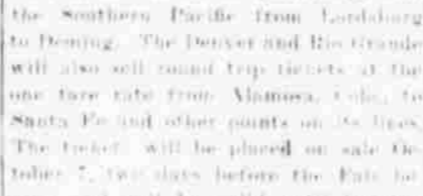

Albuquerque, N. M., Aug. 7.—It is with pleasure that the New Mexico Fair Association announces that one fare for the round trip here has been secured on all railroads in New Mexico and territory for the New Mexico State Fair to be held in Albuquerque, October 9 to 14. The Santa Fe railroad company will sell round trip tickets at one fare from points on their lines from Trinidad, Ohio, and intermediate points on the route from Amarillo, Texas, Roswell, Griggs, Okla., and all intermediate points on the route from El Paso, Texas, and all intermediate points on the route, and from Ash Park, Ariz., and all intermediate points on the route. A rate of one fare for the round trip has also been granted by the El Paso and Southwestern, the Arizona and New Mexico railroads from Clifton to Lordsburg, and the Southern Pacific from Lordsburg to Deming. The Denver and Rio Grande will also sell round trip tickets at the one fare rate from Alamosa, Colo., to Santa Fe and other points on its lines. The tickets will be placed on sale October 7, two days before the Fair begins, and will be valid until October 16, two days after the final day of the exposition.

NORTON NOTES

The people of Norton are in need of another of those refreshing showers. Mr. Norton has a crew of men pulling brown even this week.

J. H. Bedford was a Sunday caller at the B. M. Bates home.

There are strange things happening in our world lately. If we don't know whether to buy it, this rainy season we will buy it. A little while ago since the wedding bells were ringing for Mr. Joe Strong and Mrs. Mary Strong, and now we hear their night out it is Mr. John Cronan and

Nature is now in her loveliest mood in the woods and lake regions of the North and East—it's cool and green.

The streams and lakes are teeming with bass, "muskie" and trout and a variety of game fish, worthy foemen to try the angler's skill. There are fishing, sailing, boating and all the pleasures you need for health and happiness. Good hotels and boarding houses with reasonable rates will make you comfortable and the going is a pleasure on a Rock Island train.

A Welcome Change

Smoke curling up from the farmhouse chimney as the men are coming in from the fields, gives a pretty suggestion of a good supper and a comfortable home. But it also means a hot, tired woman, working hard over a blazing fire.

Your wife can escape this with a New Perfection Oil Cook-stove.

A New Perfection keeps a kitchen many degrees cooler than any other range, yet it does all a coal or wood range can do. It saves time, labor and fuel. No wood to cut; no coal to carry; no ashes; no soot. With the New Perfection even it is the best cooking device you can find anywhere.

New Perfection Oil Cook-stove

Made with 1, 2 and 3 Burners, with long, tapered blue enameled chimneys. Heat evenly cooked steaks. The 3 and 5 burner stove can be had with or without a cabinet top, which is lined with drop shelves, towel racks, etc.

Dealers everywhere or write for descriptive circular to the nearest agency of the Continental Oil Company (Incorporated)

Miss Mary Ayler. We wish them both long and happy futures.

We have just one of our popular neighbors from Norton, Mrs. J. T. Edgerwood and family, but their absence we believe, is limited. Mr. Edgerwood has one of the best crops in this vicinity.

We see in the News something about the road. That is the kind of talk we like to hear. Let us hear more and do more towards good roads. It is a bright day some of the farmers have to be going to town. The farmers will figure the distance and the road condition between Deming and San Juan trying to see which would be the easiest on him and his team. San Juan is already getting some of the Philo trade and the roads are the main cause of it. I don't believe there is a farmer in Quay county who does not endorse the "Good Roads" movement.

The Rev. Welch's 25 series of lectures are looking fine.

J. C. Smith has 5 acres of cotton that makes one think he is in a cotton country.

ENLARGED HOMESTEADS

Acts of February 19, 1909, and June 17, 1910—Instructions Amended. Department of the Interior, General Land Office, Washington, D. C., July 12, 1911. Registers and Receivers, United States Land Office, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, Wyoming, Arizona and New Mexico.

Continued: The instructions of Dec. 11, 1909, 28 U. S. D. 3813, under act of February 19, 1909, 35 Stat., 610, providing for an enlarged homestead in the States and Territories above named, except Idaho, and those of July 18, 1910, 36 U. S. D. 901, under the act of June 17, 1910, 36 Stat., 531, providing for an enlarged homestead in Idaho, are hereby amended by striking out of section 2, of each order, the last clause of the first paragraph thereof, reading as follows:

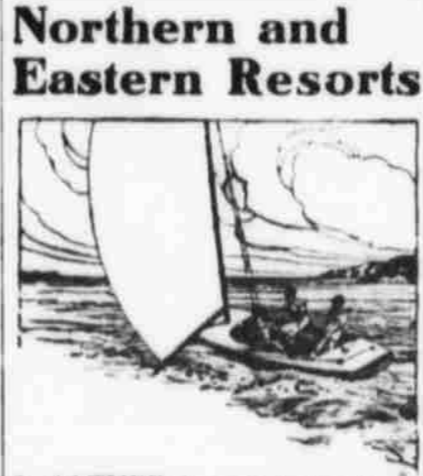

♦♦♦♦♦ one acre an entrance who enters under the general homestead law designated as falling within the provisions of this act afterwards enter any land under this act.

The effect of this amendment is to permit one who has entered under section 2298, U. S. D. 80, lands designated as subject to entry under the enlarged homestead law, to subsequently make an additional entry under section 2 of said laws in the absence of other objection.

Very respectfully,
FRED DENNETT,
Commissioner.

Approved July 12, 1911.
SAMUEL ADAMS,
Acting Secretary.

GAVEL OF ANCIENT MANZANO TREES FOR CONGRESS

Ex Governor Will Make a Unique Present to Denver Gathering; New Mexico Apples Should Be There.

At event of the annual meeting of the American Apple congress in Denver, beginning November 12, next, will be the presentation to the congress by ex-Governor L. Bradford Pyles of New Mexico of a gavel made from the wood of one of the 100 year-old famous apple trees of Manzano, U. M., which are still bearing fruit.

It is now planned to have a big apple show and carnival in connection with the Denver meeting and it is particularly desired that every apple growing district in New Mexico send displays to this event. The New Mexico apple has the Colorado apple looking like a worm-eaten nut, and New Mexico should have her apple there to prove it. A recent number of the American Apple congress bulletin says:

The organization of the American Apple Exposition association with a capital stock of \$50,000 has been accomplished during the past six weeks in Denver, Colo.

This organization's purpose is to promote the national apple show and carnival to be held at the same time as the meeting of the congress in Denver next November, during the week of the 12th.

It is proposed to make this organization a permanent one that will promote and conduct national apple shows every year. It is thought that the stock will be a good investment and under the

plan on which the show is to be operated is expected to pay liberal dividends.

Through a contract that was made by the executive committee of the congress and the exposition promoters the congress agreed to meet in Denver this year during the same week as the show is held. In consideration of this decision, the exposition directors have agreed to furnish the congress with halls, committee rooms and such accommodations as are necessary to the convenience of the convention. Each member of the congress will be given a season ticket to the show and will not be charged any entry fee for his competitive exhibits. Furthermore, apple growers or dealer can exhibit at the show unless he becomes a member of the congress and when he does and pays the congress membership fee will receive five shares of stock in the association. To an association of company having and a membership a share of stock will be given with each dollar paid on membership. This arrangement will hold until the entire \$50,000 shares have been distributed.

"I never felt so near my grave," writes W. B. Patterson of Wellington, Tex., as when a frightful cough and lung trouble pulled me down to 100 pounds, in spite of doctor's treatment for two years. My father, mother and two sisters died of consumption, and that I am alive today is due solely to Dr. King's New Discovery, which completely cured me. Now I weigh 187 pounds and have been well and strong for years. Quick, safe, sure, it's the best remedy on earth for coughs, colds, lagrippe, asthma, croup and all throat and lung troubles. 50c and \$1.00. Guaranteed by Elk Drug Store.

FIRST ANNOUNCEMENT

While in Chicago last month I purchased the largest stock that was ever purchased for the Holiday trade in my line that was ever shown in Tucumcari, and I hope the buyers will not be in a hurry to make Holiday purchases until my entire line arrives, then you will have a stock of unlimited goods that have the quality and the guarantee back of them and the prices will more than surprise you.

Yours for business,

JONES, The Jeweler and Optician

THE CARE OF THE CAMP FIRE

WILLIAM T. COX
BY FIELD & STREAM

Who is not stirred at the mention of a camp fire in the forest? Civilization has not taken from us the appreciation of the camp fire's glow near a bivouac or tent, but it has too often removed us from the opportunity of enjoying this pleasure. To the increasingly large number of people who do find it possible to spend the summer and fall in the woods and mountains a note of friendly warning at this time may not be amiss. This is the season when each year thousands of inexperienced and oftentimes careless people enter the forest to camp and fish and wander, to let their winds and bodies grow. How many of these people realize what a menace they are to that same forest which they admire, and to the old trees which they reverence?

WHEN THE CAMP FIRE GETS BEYOND CONTROL

Even old, experienced woodsmen are not always careful with their camp fires. Hunters who have been in the woods for 20 years often leave smoldering embers when they break camp. This, of course, is pure recklessness, for these people know better. They appreciate what consequences may follow if the wind should fan the smoldering coals. Usually, however, men who have lived in the woods all their lives or who frequent the forest regions during a portion of the year are very careful where they build camp fires and how they leave them.

The question of camp fires, like the forest fires which may result from them, must be handled differently in different parts of the country and in different kinds of forest. The difference in the danger element is very apparent between a fire started in the sandy soil beneath the spruce, butting even the dry season it is perfectly easy to clear away inflammable material and scoop out a hole in the sand where a camp fire may be built with comparative safety. In the spruce forest it is different; great care must be taken in the selection of the site for a fire, since it will be apt to creep backward after all trace of it is supposed to have been extinguished. When one digs a fire hole in a forest, such as spruce or fir, it is necessary to dig deep and fire material which will not smolder, or, better yet, select a site along some stream or lake where there is gravel or rocks.

Do not build large fires. They serve no useful purpose. As an old Indian said: "Indian he build little fire, stay up close, keep wa-a-r-m. White man he build great fire, stand way back, roast one side, freeze other." It is too often true that campers, particularly those who are but slightly wood-wise, pile on the wood to their own discomfort and sometimes to the imminent danger and that of the surrounding forest. Of course camp fires should never be built against trees or stumps where they are likely to smolder. It is well to give thought to the fire some little time before breaking camp. Do not build up a hot fire only an hour or so before leaving the locality. This will save trouble in extinguishing the last vestige of the coals and perhaps save an extra bucket of water carried from an inconvenient spot.

The question of camp fires leads inevitably to the question of forest fires. Nearly every one who has been in the woods during the dry season, whether it be in Maine or in British Columbia, has had the opportunity to prevent the spread of some incipient forest fire. Sometimes they are called upon to take part in controlling a fire well under headway. This kind of work is necessary. It may mean carrying water to pour upon smoldering fires in dry peat in a spruce or tamarack swamp; it may mean raking back the leaves from a creeping surface fire in an oak thicket; it may mean digging a trench through the leaf mold and duff in a forest of fir; very often it means busting out with bonks the flames advancing through grass and needles beneath the pine; occasionally it means the fighting of fierce crown fires when a gale is blowing. In the latter case, of course, fighting from the side and narrowing in the front of the fire is one way of making progress. Another is to retreat to some favorable ridge, water course, or other natural point of vantage, dig trenches, and back fire a strip across which the advancing fire cannot travel.

Practically every state has laws making it a misdemeanor to leave camp fires unextinguished. In Colorado the penalty is \$25 to \$100, or 15 to 60 days' imprisonment. In Maine the penalty is \$50. In Montana "Persons starting camp fires without taking sufficient steps to prevent spreading of them, or failing to extinguish them before leaving, are guilty of misdemeanor and liable to a fine of \$2,000 or one year's imprisonment."

In New York, camp fires are allowed on the state forest preserve, but space around must be cleared and fire extinguished before leaving. For violation to do this there is a fine of \$1,000 or imprisonment for one year, or both.

In Oregon, "building camp fires without clearing the ground around or leaving them without extinguishing, subjects a person to a penalty of \$25 to \$500, or imprisonment for one day for every \$2."

In Pennsylvania, camp fires on state reserves must be made in a hole or pit one foot deep and circled by the earth removed. Violation of these regulations, or leaving fires unextinguished, is punishable by a fine of \$100 to \$500. On private lands, starting fires which injure other property, is punishable by a penalty of \$100 or imprisonment for one day for every dollar of loss.

In Idaho, kindling camp fires in or near forests and leaving them unextinguished, penalty \$10 to \$100.

In Minnesota, a person kindling a fire and leaving it unextinguished is guilty of a misdemeanor and subject to a fine of \$25 to \$100, or 10 to 90 days in jail.

In Vermont, persons building fires in the woods must extinguish them before leaving; penalty \$50 or 30 days' imprisonment, or both.

In Maryland, persons starting fires or allowing them to escape are liable for damages and costs of fighting the fire; also a penalty of \$20 to \$1,000 or 30 days to one year in jail.

In Wisconsin, persons starting fires and leaving them unextinguished are liable to a penalty of \$100 or one month's imprisonment, or both.

In Wyoming, persons starting fires and leaving them unextinguished are liable to a penalty of \$10 to \$100, or 10 to 30 days' imprisonment, or both.

In Nova Scotia, persons must clear the land for a distance of 10 feet in every direction from a camp fire started in the woods. The place selected must contain the least possible amount of debris and the fire must be extinguished before leaving.

The United States law requires that fires built on the public lands must be extinguished before leaving them; penalty not to exceed \$1,000 or one year's imprisonment, or both. Fines go to the school fund of the county where offense was committed.

Campers in the forest can be of immense value as a protection against forest fires, or they can be a destructive element, depending upon the character of the person and his attitude, and the degree of care exercised. In the National Forests the government is anxious to have as many settlers as the limited amount of agricultural land in the mountains will support. Every careful settler means additional protection against fire. Campers should constitute a force of fire wardens scattered through the forest wherever they happen to be. Instead of having to be warned and watched and sometimes apprehended by state federal forest officers, sportsmen and others camping in the forest should check the common enemy, fire. This is gradually coming to be the attitude of every one, but it is coming rather slowly. The lumberman, of course, realizes what destruction can be wrought to his property by the careless camper. The railroads are beginning to realize what they have lost and are continuing to look through the burning of lumber and lumber that they should have hauled. They know, too, of the hurry calls for rescues trains when whole villages and settlements have to flee before the advancing flames.

Let every camper be a forest ranger, taking care of his own fires, warning others of the danger, and fighting such fires as he may encounter, whether left by some one else, set by the passing locomotive, or perchance by lightning.

The following extracts from the Ontario fire laws are well worth quoting, being virtually a manual in brief for handling inflammables in the forest: "Every person, who, between the first day of April and the first day of

November, makes or starts a fire within a fire district for the purpose of clearing land, shall exercise and observe every reasonable care and precaution in the making and starting of such fire, and in the managing of and caring for the same after it has been made and started, in order to prevent the fire spreading and burning the timber and forests surrounding the place where it has been so made and started.

"Every person who, between the first day of April and the first day of November, makes or starts within such a district a fire in the forest, or at a distance of less than half a mile therefrom, or upon any island for cooking, obtaining warmth, or for any industrial purpose, shall—

(1) Select a locality in the neighborhood in which there is the smallest quantity of vegetable matter, dead wood, branches, brushwood, dry leaves, or rubbishous trees.

(2) Clear the place in which he is about to light the fire by removing all vegetable matter, dead trees, branches, brushwood and dry leaves from the soil within a radius of ten feet from the fire.

(3) Exercise and observe every reasonable care and precaution to prevent such fire from spreading, and carefully extinguish the same before quitting the place.

"Any person who throws or drops any burning match, ashes of a pipe, lighted cigar, or any other burning substance, or who discharges any firearm within such fire district, shall be subject to the pains and penalties imposed by this act, if he neglects completely to extinguish before leaving the spot the fire of such match, ashes of a pipe, cigar, wadding of the firearm, or other burning substance.

"Every person in charge of any drive of timber, survey or exploring party, or of any other party, requiring camp fires, for cooking or other purposes, within a fire district, shall provide himself with a copy of this act and shall call his men together and cause the act to be read in their hearing, and explain to them at least once in each week during the continuance of such work of service."

ANCIENT OFFICE OF CORONER

In Former Times Powers of This Official Were Many and of Importance.

It has been supposed, and legal historians have told us, that the office of coroner was originally instituted by King Alfred with that of the sheriff, both being added to aid in keeping the peace when the earls gave up the wardships of the county. The legal historians are wrong, according to Dr. F. J. Waldo of the British Medical-Legal Society, who has traced the history of the coroner and his ancient office as far back as the year 1194.

In early days the coroner had a wider and more general jurisdiction than he now enjoys. Coroners were wont to "hold their views" not only upon deaths where an investigation was considered necessary, but also upon various serious crimes which were treated as occasions for the raising of revenue for the Crown. The mission of the coroner to the state was not alone to investigate crimes and bring felons to justice. He superintended the forfeiture of money and personal property by criminals to the Crown, for the recording of which he was responsible. These forfeitures were not confined, in cases of violence and death, to the property of the person who could be held directly responsible, but included animals and instruments to which loss of human life under any circumstances might be traceable.

On Getting Even. Tailor—The raincoat suits you splendidly, sir. Makes you look ten years younger. Customer—Good. Then you can send in the bill in 1921.

weighed three times since her husband died. She would be shocked if she knew she had gained right along. Fortunately, she is too near-sighted to read the scales herself, so it is easy to make her think she is wasting away."

Far, Far Away. Knicker—is she very distant to you? Hooker—As distant as a commuter's home from the station.—Harper's Bazar.

Correct. "Who were Roosevelt's ancestors?" asked a teacher of a class in the third grade. "His forefathers," said Johnny promptly.

An Exception. "Nobody cares for cold comfort." "Hold on a minute! How about a prospect of cheap ice?"

MANY PLAYERS FROM COAST

Last Year's Crop of Recruits Has Kept Big Leagues Going Quite Lively This Season.

California is noted for its big trees, fine climate and gold; also, hardly a year goes by that the Pacific coast does not turn loose to the big leagues a crop of ball players who make good. In fact, very few of them are turned back. What is more, the Californians who are shipped to the big leagues get in the limelight right off the bat. They seem to develop into the kind of stars that the fans want to see every time they appear in any city. Scouts skip about to all kinds of leagues and get ball players, who are tried out only to be sent back, but the golden west sends them on and they stay.

Twenty-six players from the coast are now in the American league circuit, and all are making good. The New York Yankees have five Chase started out there where they have fine oranges and all kinds of other fruit. Harry Wolter, who covers right field for the Yanks, is another. Otis Johnson comes from out that way. Then the Yankees have Wilkinson and Fitzgerald, also from the Golden Gate city. Lynch was another who came from that country, although he has been turned over to the Pittsburgh club.

The Boston Americans have Harry Hooper, Lewis, Madden, Pope, Moser and Hall. Connie Mack is not very strong with California players, but has just secured Leonard of St. Mary's college, and it is rumored that the player will surely make good.

Washington has Johnson, who is one of the star pitchers in the big league baseball. In addition to Walter Johnson, the Washington club has Street, Groom and Gray, and they are all making good in the American league.

The Cleveland club is well supplied with players from the coast. It has Gregg, who has been touted as one of the best pitchers ever turned over to the big league from the minors. They also have Krapp, Olson, Eastery, Pfenor, Graney and Harkness. The Naps think all of these players will be the goods.

Jim Rodie, who is getting a great big send-off in the American league as some a weather and fielder, is another from the coast. He is with the Chicago club, and he is doing well. Doug Gray, who was also in California and came from that baseball country.

The Tigers can only boast of one player, but Jennings thinks he has a fine young pitcher in Lively from the coast, who is making good for the Detroit nine.

Holly Wallace has Meyers, W. Homan and Hallman with the Browns, and seems to be well pleased with those players, and, what is more, Stange is well known in that part of the country.

BRAINY PITCHER BIG ASSET

Star Flinger Can Render Signals and Inside Play Worthless—Good Common Sense Counts.

Otto Knabe, who is one of the brainiest players in the National League says this about signals: "Signals and inside play are great things for a ball club to have, but plain common sense, quick thinking and intelligence have signals beaten to death."

"What use have signals and inside play been against Mathewson, Brown Moore, Camnitz and other star big

Otto Knabe.

ers? Put a pitcher in the box who has brains and he will smash all the bats you ever saw. Base runners will be the pile for the catcher and hit-and-run plays will be jokes. Give me a pitcher in there with the old noodle, and I want to see some of these machines' work."

Rights of Married Men. Judge Hugh Grimm in the St. Louis circuit court the other day told Cornelius Campbell that "married men are entitled to some rights in this world and when a wife objects to her husband attending a ball game or any other innocent amusement, he should assert his rights and go any way."

He gave Mrs. Lillian M. Campbell of 2147 South Second street, a decree of divorce because Campbell did not contest the suit. Campbell said they would not agree about anything.

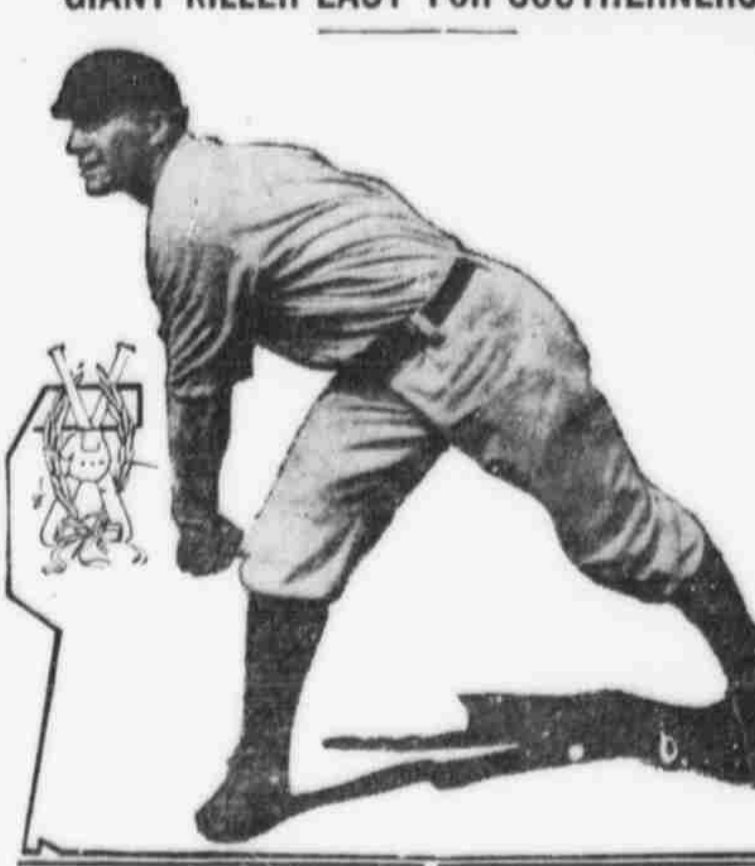

Judge Grimm asked for some specific incidents as to their disagreement and Campbell said: "She tussled when I wanted to attend a ball game."

Cobb Surpasses Everybody. Leading the American league in batting average, in number of base hits, in run-getting and base stealing, Cobb of Detroit sure shows conspicuously his superiority over all players in the major circuits. The only words left for him to conquer in baseball activities are the records of past seasons, of which he holds quite a number, and toward which he is now rapidly heading.

Favors Sunday Ball. Rev. J. W. Larkin of Poughkeepsie, believes in Sunday baseball. To prove it he addressed a crowd of 1,000 at a Sunday game, speaking for 30 minutes. He then sang "There were Nine and Nine," offered a fervent prayer and then watched the ball game.

Hickman to Retire. Cheerful Charlie Hickman, who has had a long career in the national pastime, is about to retire for good. He is still a member of the Toledo American association team, but is too fat to do anything but bat now.

GIANT KILLER EASY FOR SOUTHERNERS

Pitcher Covaleskie of New Orleans.

Ball players said this spring that they would "get to" Covaleskie, the big Pole whom Chattanooga is casting about as one of its star attractions, and it looks like they are making good. The "Giant Killer" is no longer in the bearcat class if the scores that have been made against him recently give a fair idea of the work he is going to do this season.

About the only reason ball players had for saying they would hit Covaleskie this season after woefully failing last season was that they would play the same kind of a game against him that they played against any ordinary pitcher.

"We'll test his control," they said. "He used to get away with most anything, because he had us baffled."

Whatever was the cause there is no doubt that Covaleskie put the jinx on many good ball players in the South and league last season. They dropped their little angoras just as soon as he came in sight. Some of them were bewildered with his speed, others feared his lack of control would result

BALL-BAT NOTES

The unexpected makes baseball. Hyatt, of Kansas City, is a slugger. He has poked 11 home runs this year. Both Merkle and Marquard have ceased to be butts for the humor of the Cubs.

Umpire Mal Eason discovered Knetzer when Eason was manager of the Lawrence, Mass., club.

Baskette, of Toledo, has pitched six games in which the opposing team has made less than six hits.

Hugh Nicol, famous old time player and now coach for Purdue university, is acting as scout for the Cincinnati Reds.

Indianapolis has a new pitcher in Charles Overman who won fame as an all-around athlete with De Pauw university.

From all reports Umpire Mallon is improving steadily under the tutelage of Umpire Keans, with whom he is paired.

Washington is so taken with the first base play of Germany Schaefer that his work is compared to Hal Chase's.

President Horace Fogel is willing to pay \$2,500 for another good pitcher and an outfielder that can hit as well as Mizege.

Jimmy McAleer, it is said, may quit the Washington Senators, owing to the poor showing of the club in the present race.

Red Nelson, the grand pitcher of the Browns, is a man of iron. He works all the year around so as to keep his muscles in trim.

Louville denies that it ever had any intention of selling Fisher to Mobile. He expects to release one catcher or soon, however.

Although one has not heard much about it, the Athletics seem to be having a little more than their share of hard luck this season.

Umpire Egan believes Ben Johnson's decree abolishing the warning of pitchers is to be obeyed at the discretion of the official.

Fred Parent, former White Sox player, still leads the batting order for the Itanmore Orioles. Parent is hitting and holding at a good clip.

Pitcher McAdams of the Dallas club, who has been purchased by the Cardinals, has made a wonderful record in the Texas league this year.

Grover Cleveland Alexander declares that with himself and Moore alternating the Phillies would run away from other teams in the National league.

Chester Thomas, the young catcher the Boston Red Sox turned over to the Sacramento team last spring, is playing wonderful ball on the coast.

Southpaw Brennan, formerly of the Philadelphia team, pitched a no-hit game against Jersey City in the Eastern league. Brennan is with Buffalo, N. Y.

Protecting games is getting to be a habit with Fred Clarke. He has protested a game with the feds on the ground that the infield fly rule was not enforced.

Burke, of Indianapolis; Barrett, of Milwaukee, and Shay of Kansas City, are American association managers who have been suspended this year.

The baseball recruits are handicapped. They must show quickly, while past records help the veterans to hold on.

Manager Joe Kelley of the Maple Leafs has placed Wes Willie Keeler at the head of the batting list, and the Midget has proved even more valuable in his new position.

QUAKER FANS ARE CENSURED

Washington Athletes Complain That Champion Athletic Team is Often Roasted Without Cause.

According to the views of some of the players on the Washington team, the fans in Philadelphia are the most inconsiderate in their treatment of their own players to be found anywhere in the country, with the fans of St. Louis a close second.

"There's some excuse for the fans in St. Louis to feel that the price they pay for tickets gives them the right to get a team that is so persistently in last place, but what explanation can the Philadelphia fans make for such conduct?" asked one of McAleer's boys.

"When we went over to Philadelphia to play last month the people in that city were getting their first chance to see the Athletics since that team set all fandom aflame by winning the world's championship.

"Did the fans rise up and give Mack's champions the greeting they deserved? They did not. They sat in their seats snarling and barking at Connie's men for every little slip they made, actually hooting and jeering at a team that had only six months before defeated the supposedly invincible Cubs.

"Of course, everybody knows that the fans in Philadelphia are famous the world over for giving up early in the struggle if a visiting team gets in the lead, but who would believe that at the beginning of the season they would roast the players who had brought so much glory to that city?"

SHECKARD HELPS THE CUBS

Left Fielder's Work on Bases is of Greatest Value in Run Getting of Chicago Team.

"Who is the most valuable man on the Cub baseball team?" One Chicago fan asked that of another on the West side grounds the other day.

"That is a question difficult to answer," responded the other. "Schulte, Hoffman, Sheppard, Chance, Tinker and Archer are all wonderful players and are doing an equal share to bring an other pennant to Chicago. But I will say Jimmy Sheppard is not appreciated by the fans as much as Hoffman, Schulte, Tinker or Chance. Why? That is a problem. He does not get

Jimmy Sheppard.

all the credit coming to him. I think it is because he is so unassuming and modest in everything he does. Not only that, but he seems so unconcerned in the field and at the plate. In that respect he is much like Schulte. "It is true Sheppard does not receive the praise he is entitled to. Schulte may surpass him as far as driving in runs is concerned, but he does not do much more toward getting points. Sheppard's work probably is overlooked because he has always been close to the top, or on top, of the batting order, where he has not been able to break up games with doubles or triples. Up to this season he has always followed Tinker in which position he has been forced to sacrifice frequently. Now he sends off and is depended upon to start the club on the road to victory in each game. That is where he has been of immense value to the team. His record proves this."

Jake Beckley's Breakfast. While Roger Bresnahan, the manager of the St. Louis Cardinals, was devouring a couple of soft-boiled eggs the other noon, he told a funny story on Jake Beckley.

"Jake was ordering his breakfast on a drier one morning and as he did not feel very hungry, he ordered one soft-boiled egg. He glanced through the bill of fare, but nothing else appealed to him, and he decided to order another egg. Instead of changing the one to a two, he put another one beside the one he had originally made and handed the order to the waiter. You can imagine his surprise and consternation when the waiter brought in 11 soft-boiled eggs and proved Jake had ordered them all by showing him the figures on the order slip."

Home Umpire's Excuse. "We were playing at a little town in Pennsylvania some years ago," says Tom Downey, "just a barnstorming game, of course, and a local citizen, who was recommended as an able umpire, did the arbitrating. He handed everything, without exception, to the home team, and it took us some awful busting to even up the handicap. Finally, when he called me out on a strike way under my shoe, I protested.

"My dear sir," said the umpire, "how can I do otherwise? I am a prominent business man here, and president of two different societies. Would you have me become an outlaw and an outcast in my own community?"

Why Catchers Wear Mask. "George, dear, just one more question, and I promise not to bother you any more during the game," she pleaded, according to the Detroit Free Press. "Well, what is it now?" said George, impatiently. "Tell me why the catcher wears that funny wire thing on his face." "Oh, sometimes the catcher gets mad at the umpire's decisions." "What has that to do with it?" "Some day he might get mad and bite the umpire, and as they don't want that to happen they must

Respecting Her Woe

A healthy looking woman dressed in deep mourning stepped onto the platform scales and requested the grocer's clerk to ascertain her weight. He looked, and said: "One hundred and forty pounds."

"You made a mistake of twelve pounds in that woman's weight," said another man who had also watched the scales. "She weighed 152 pounds instead of 140."

Like Some Senate Witnesses. The Ladies Aid women were talking about a conversation they had overheard before the meeting between a man and his wife.

"I know that," said the clerk, "but she never would have forgiven me if I had told her so. That woman's husband died about six weeks ago. She has gained seven pounds in that time, but to keep her in good humor with herself, I had to make her think she had lost five. I don't know why it is, but anybody who has suffered bereavement seems to think it a disgrace to take on flesh. That woman has been

exclaimed. "I am sure they were talking about musicians, for she said 'trained ear,' as distinctly as could be." The discussion began to warm up, and in the midst of it the woman herself appeared. They carried their case to her promptly and asked for a settlement.

"Well, well! you do beat all!" she exclaimed, after hearing each one. "I'd been out to the country over night, and was asking my husband if it rained here last night."

After which the three disputants re-

**The Tucumcari News
AND TUCUMCARI TIMES**

The Tucumcari Printing Co. Inc.

Entered as Second-class Mail Matter at the Post-office at Tucumcari, New Mexico, under Act of March 3, 1879.

ISSUED EVERY SATURDAY

S. M. WHEATON, Editor.
T. L. WELCH, Business Manager

The thermometer has been above 100 nearly every day this week and the hot winds are telling on all kinds of vegetation.

The Tucumcari Chamber of Commerce are to entertain the Quay county editors at a banquet to be held in that city on the evening of September 28. It goes without saying that there will be a full attendance at said banquet.—Elder En-terprise.

We hereby acknowledge a complimentary membership in the Chamber of Commerce of Tucumcari, also an invitation to attend a banquet to be tendered the press of Quay county September 28th, and desire to express our thanks for the same and we will try to be present on this occasion.—Montoya Republic.

We had the pleasure in company of several other Montoyites of witnessing Friday's entertainment at Tucumcari, and while the program was not carried out as published, it was very good. The race between Joe Stokes and Red Cloud was easily won by the Amarillo horse, Joe Stokes, for a purse of \$100.

The ball games resulted in the Amarillo team winning Saturday's game by a score of 17 to 9; and Sunday Tucumcari took their candy from them in the time of 9 to 7. It was a great three days. Tucumcari always does things.—Montoya Republic.

The fifth annual Quay County Fair will be held in Tucumcari September 27, 28 and 29; the association, of which A. R. Carter is president, is planning for a big exhibit. President Carter has appointed six newspaper editors in the county to be vice presidents, and we extend thanks for the big red badge sent us for that purpose. We would suggest to our brother editors that we all get together on one day of the fair, and organize a corporation of vice presidents or better still, let's form a Quay county press association, and show the outside world that we "do things" in Quay county. What say you, brothers?—New Mexico News.

Some of the leading business men and citizens of this city have said to the News today that they did not endorse the action of the city in refusing to put the sprinkler on the streets. A subscription list is being circulated by T. A. Wayne, asking for a donation of so much a week from the business men for the sprinkling of the streets in front of their respective places of business, and while they are disposed to patronize Mr. Wayne, they do not feel like carrying a burden that they consider should be borne by the city and paid for through taxation all citizens alike. They claim it is the city's business to handle the dust nuisance and that if the council refuses to do it the dust may do its worst before they are going to go down in pocket to employ a sprinkler. Now, city council, the business men of this city are not satisfied with your action in this matter and we believe you will do yourselves credit to rescind your action and set up a little. Think it over in all kindness and try and get the pulse of the people you serve and you will have that sprinkler running before forty-eight hours.

EDITOR APPRECIATES COM-MERCIAL CLUB COURTESY
The editor extends thanks to one of the most wide awake "hunk of hoosters" in this part of New Mexico, the Chamber of Commerce of Tucumcari, for the press of Quay county on Sept. 28 for an invitation to a banquet to be given

28, and also for being elected an active member of that body of gentlemen who are working for the best interests of their city and county.—New Mexico News.

In turn the News will vent the statement for the Commercial Club that the favorable comment of the Nara Via New Mexico News and the editor's good offices are greatly appreciated and the organization will be pleased to see the editor present during the fair and particularly at the banquet tendered the publishers of the county on the evening of September 28th.

LIKE CAESAR DID

When Caesar took an eastward ride and grabbed the thanks of Rome, what was the first thing that he did to make them feel at home? Did he increase the people's loads and liberty, forbid? No, he dug in and built Good Roads—that's what old Caesar did.

Did old Caesar put the iron hoof upon the foreman's breast, or did he try to make them feel that the Roman rule was best? What did he do to make them glad he came their midst amid? He built good roads in place of bad—that's what old Caesar did.

He built Good Roads from hill to hill, Good Roads from vale to vale, he ran a Good Roads movement till old Rome got all the kike. He told the folks to live at home, built roads their will, and until all roads led up to Rome—that's what old Caesar did.

If any town would make the town the center of the map, where folks will come and settle down and live in plenty's lap, if any town its own abodes of poverty would rid, let it go out and build Good Roads—just like old Caesar did.—Elder Enterprise.

NOT WHAT THE PEOPLE EXPECTED

When the people of this city voted bonds for the purchase of the water works system and thus imposed additional taxation on themselves they did not expect that the city government would allow the business men of the city to go down into their own pockets to employ a street sprinkler. These streets must be sprinkled and the dust nuisance must be rid of. Besides the disagreeable feature of the heat and dirt, the possible injury to the public health by breathing quantities of dirt, the stoves of the city are filled with it day after day as it is stirred up by traffic in the streets and blown into the business houses. It gets into the vegetables we eat and onto the clothing and all kinds of merchandise on the shelves of the store room. There is in the opinion of the News no justifiable reason in the idea of poverty on the part of the city as an excuse for pulling off the sprinkler. The city since it watered and a sprinkler will cost only a few hundred dollars and a man and his team to draw it at \$1.50 or \$1.00 a day through the heated period is not going to be much of a burden.

The News has heard many of the business men of the city say that when they were supporting the purchase of city water they did not expect that the administration would deny them the street sprinkler. They feel that this is one of the advantages to which they are entitled and that they believed that they would not be denied when they stand for municipal ownership of water, and they are opposed to going down into their pockets to pay for the riddance of the dust nuisance when they are paying taxes as the city is or they to have this burden removed from their shoulders. They are disposed to vote at this action, the refusal of the city sprinkler, as false economy and the probabilities are that a large number of them will quite to petition the council to reconsider their refusal to put a sprinkler to work. Should the city council in their session they would, the News believes, wear of the sentiment on our part their action is pulling off and putting on the sprinkler on the streets to run the business center.

THE S...-EHOOD TANGLE

Don't be too hasty in your condemnation of Bill Taft for his avowed intention of vetoing the Flood resolution. He hasn't got anything else and retain the respect of the people who elected him President. He has said all the time

that he was opposed to the provision of the recall of the judiciary as embodied in the constitution of Arizona. With him it is a national issue and with Arizona it is a local issue. The principle of the initiative, referendum and recall is directly opposed to that on which Mr. Taft was elected president of the United States. The one is a direct form of government and the other is a representative form of government. The two principles are as different as Africa and Switzerland. The one is an experiment, the other a principle on which we have grown to be the leading nation of the earth. The one is socialistic, and the other democratic and has been the bulwark behind which a republican form of government has been perpetuated in this nation. The institution of the one means the disruption and destruction of the other and when arraigned against each other both cannot survive. The adoption of a direct form of government simply means tearing down what we have and beginning all over again. Taft does not believe in the principles of a direct government, he does believe in a representative government, his party platform on which he was elected does not believe in direct government, he had warned his party and his country that he would not support Arizona's constitution with those principles embodied in it, inorganic republicanism, which the News considers a lot of demagogues have combined against the President and have dared him, as it were, to stand by his convictions. He will veto the Flood resolution and the dare falls falling in his face. There is an objection to the constitution of New Mexico to the president or other of the parties and the blame for our failing to give admission is not with Taft or the administration, but the few unscrupulous politicians with Owen and associates in the foreground unscrupulously insisting that Arizona's misfortunes should be carried on our shoulders or we should remain a territory with her. The President believes the constitution should be voted upon separately and that each should stand on its merit before the congress of the nation. But so, the sentiment represented by Mr. Owen says, since Arizona and her constitution of direct government are swayed by the President and his administration New Mexico must never be allowed her rights as a state in the Union. Such sentiment is positionless as hell, and brands such political intrigue as the spawn of corrupt statesmen. No, New Mexico's grief is at the door of this sort of hostility and no blame should be charged against the President.

WHAT WILL TAFT DO?

"What will the president do with the Flood resolution?" is the question on many persons' tongues today. "What would you do? If you were in his place, is the only logical answer that can be given at this writing.

Those who wish staidness for New Mexico beyond everything else, those who give consideration only to the immediate need and desire of this commonwealth find the answer easy. They say: "Statehood under any and every condition that congress has seen fit to impose. The condition that Congress has imposed, while unjust is neither on terms nor material. New Mexico's advice to the president therefore is: "Sign the Flood resolution and let us at it."

But outside of New Mexico, there is another powerful sentiment. Men who are thoughtful, who are as patriotic as the men who state themselves "Progressive," feel that the nation has reached a crisis, a point where the republican institutions of the nation must stand even a protracted test than during the Civil War. They cry for a man with backbone, who, on matter what the effect on his own personal fortunes, will have the courage to stand up against the new tendency. They believe that passing the Flood resolution up to Taft will give him the opportunity to issue a clarion call to battle against the new democracy that is overwhelming the nation. They argue that the president gave ample warning that he would veto the Flood resolution, that it is now up to him to make good his threat and that there are at least 33 senators left in the upper House who will stand by him to resist any effort to pass the resolution over his veto and that is all that is needed, or rather, it will take all senators to pass the constitution over the executive veto, or 18 more than voted against the Flood resolution last evening. They maintain that it is not the fate of New Mexico and Arizona that is at stake but the integrity of the nation, and that New Mexico can afford to wait the nine months that will admit it automatically.

It is a question not so easily decided. The motive of the Democrats and insurgents in insisting upon the Flood resolution was to put the president in the hole, as if compelling him to decide on a vital political issue, could be interpreted to that effect.

It must be admitted that A. A. Jones, B. Ferguson and J. D. Bond played a very deep and skillful political game; they gambled with New Mexico's statehood chances in order to further their own political supremacy in their own party is concerned, they have won; the party of what is left of it, is now their own to do with as they please. They have demonstrated their astuteness as politicians and their mediocrity as the statesmen, and that is sufficient to make the leaders of a party that believes in the maxim: "Rule or ruin"—Santa Fe New Mexican.

GOOD AUTHORITY

The following letter from the General Land Office at Washington will be found of much value.

It was received by Mr. J. E. Dibble of Olathe and is published by his permission.

Mr. Dibble filed in 1906 and later took an additional quarter. He intends to prove up this fall, and desiring to know just where he stood, he wrote a letter to Delegate Andrews, stating his exact situation and asking him to ascertain the rulings of the Land office in such cases.

The letter received in reply is given here:

"Mr. Dibble may make proof on his original entry, when he can show compliance with the general homestead law, but proof can not be made on the additional entry until the requirements of the Enlarged Homestead Act, as to cultivation have been fully met, but this cultivation may be on the original entry or on the additional entry, or partly on both parties.

"Proof may be made on the additional entry, by showing that one-eighth of the acre of such additional entry has been continuously cultivated for four years, and one-fourth of the area for three years, but in such case the cultivation must be of land embraced in the additional entry.

"If, in making proof on the additional entry, the party relies on cultivation wholly or partly on the original he must show that one-eighth of the combined area of the two entries has been continuously cultivated for four years and one-fourth of such area for three years.

"Should he make proof on his original entry at the expiration of five years and not be able to show the cultivation necessary to meet the requirements of the law as to both entries, it would be necessary for him to make new proof on the additional entry at the proper time.

Very respectfully,
S. V. PROUDFEEL,
Assistant Commissioner.

GET A HUNTING LICENSE

If you have not already secured a hunting license do so before the open season. Open season for doves begins August 1, and for quail October 15th. Violations of the hunting law will be vigorously prosecuted.

M. B. Peyton, Game Warden.

WHAT MUST BE DONE BEFORE NEW MEXICO BECOMES A STATE

Owing to the fact that the statehood bill has passed and that we are admitted to the Union it will be of much interest to the people to learn what is now required of us before we are legally and technically a member of the great commonwealth U. S. A.

The enabling act provides that when the constitution has been approved, the president of the United States shall certify that fact to the governor of New Mexico. Within 30 days after he receives such notice, the governor must issue his proclamation, calling an election to be held not less than sixty days nor more than ninety days after the date of the governor's proclamation.

At this election all the state and county officers, members of the state legislature, representatives in congress and all officers provided for in our constitution must be elected.

This election must be held, returns made, canvassed and certified to in the same way as was required at the election on the adoption of the constitution last January. The qualification of voters at this election must be the same as for voters on the adoption of the constitution.

After the election has been held and the returns canvassed and certified as required, Governor Mills must certify the result of the election to the president of the United States. The president must then, immediately issue his proclamation and the state of New Mexico will be deemed admitted to the Union on an equal footing with the other states.

The constitution provides that within 30 days after the president issues his proclamation as above all officers elected at the election, except members of the legislature, shall take the oath of office and give bond as required by the constitution, or by the laws of the territory, and they shall then enter upon the duties of their respective offices.

As soon as the governor of the new state enters upon the duties of his office he is required by the constitution to issue his proclamation calling the members of the legislature to meet at Santa Fe on a day to be specified, which shall not be less than thirty days nor more than sixty days after the date of his proclamation.

The legislature shall meet on the day named, take the oath of office, and within ten days thereafter, proceed to elect two senators of the United States for the state of New Mexico. When all this is done the state of New Mexico will be fully organized and fully represented in the nation.

A GRACEFUL RECOGNITION

Tucumcari Chamber of Commerce Elects All Quay County Editors to Full Membership Without Dues and Will Give Them a Banquet

Any editor who is worth two loaves in position, and most of us are, is a natural born booster for every worthy public cause.

When anvloidy also does a good deed of boosting, there are many who do such stunts in every locality. The editor beats the lion-tion and swings the lion-tion to let all the world know.

But there seems to be nobody to publish in the world his own persistent though unpretentious boosting from week to week.

The result is that the boosting remains unchanged and the lion-tion remains unshaken, for your average editor is just usually a modest sort of man.

Nevertheless, being very human, in some respects, the editor expects being told that his efforts are noticed and his boosting is appreciated.

Whereupon he goes and promptly boasts some more.

And once in a while the lion-tion of business takes a day off and thinks it over.

That's what the Tucumcari Chamber of Commerce did.

And being the best and brightest bunch of boosters in New Mexico about selves, they show a good booster's face as they can see him and want to work with him.

To show their appreciation of what the newspaper boys are doing, the Chamber of Commerce last Monday elected every editor in Quay county an active member but without dues, and invited them to a banquet to be given in honor of the Press, September 28.—Elder Enterprise.

LOST OR STRAYED

One white mare, one sorrel filly, 2 years old, both branded M, on left thigh. Reward for return or knowledge of their whereabouts.

12-8-11
Chas. A. Brown.

QUAY COUNTY NOR-MAL IS ENTERTAINED

On Tuesday evening of this week Capt. C. S. Cramer entertained the Quay county Normal and friends at the Arcade Theater. A very enjoyable program preceded the social hour and was appreciated by all present. Among the numbers given those of the Chamber of Commerce Club, conducted by Miss Halball, the "compounded" and "uncompounded" vocal solo by Miss Aho, and her quartet selections were especially good, as were also the two readings by Miss Aho.

A social hour and dance followed the program, and the occasion was further enhanced by appropriate refreshments. Mr. Cramer has made of this occasion an institution always looked forward to with great pleasure by the teachers and patrons of the school and the visiting teachers.

FAIR BALL STUNT OF THE SEASON

Next Sunday afternoon at the Ball Park will be played the game of the season in this city. The "Fats" will play the "Leans" and the boys who coached the College teams of two decades ago will show you how to lay the wood on the round side leather lump.

The Fats and the Leans will parade the streets next Saturday afternoon in imported costumes and will be led by Max Goldenberg's Trans-Alpsian Band, but ready for the fun, because the promoters of this game are going to be out for a regular carnival.

Linedup will be given in next issue.

FOUND

One sorrel horse, with bald face, branded P, on left hip and left side of neck. Owner can get same by calling at this office and paying for this notice.

12-8-11

FOUND

The Western Union Telegraph Co. has had a representative here this week to make all necessary arrangements to establish an uptown telegraph office and quarters have been secured with the Chamber of Commerce on Second Street and the office will open in the next few days. This shows the progress the city is making and that we are soon to have every convenience enjoyed in many western towns of ten times our population.

TORTURED FOR 15 YEARS

Rev. Joel Hedgicott returned from the Mountain Chautauque yesterday and will fill his regular appointment at the Methodist Church tomorrow.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is hereby given that I was, on the 5th day of August, 1911, by the Judge of the Probate Court of Quay County, duly appointed administrator of the estate of W. P. Jeanne, deceased. All persons having claims against said estate will file the same with me within the time prescribed by law.

J. T. HAMMAN,
Administrator.

Mr. and Mrs. A. Vorenberg tendered an elegant six course dinner on Wednesday evening at the Vorenberg to Mr. and Mrs. W. B. Jarrell and guests and Mr. S. Vorenberg of Wagonmound, Okla., the honorees of this occasion other than Mr. Vorenberg being Mrs. N. J. Jarrell of Deatur, Texas and Miss Jarrell of Sulphur, Okla.

BEAN CROP A GOOD ONE

Sheriff Frank Ward and Dr. Nichols spent several days of this week in the Plains in the Southern end of the county. Dr. Nichols tells the News that there is a farm near Hartford where twenty-two acres of beans are averaging 500 pounds to the acre and another near House where 110 acres will make about that average. Other crops are looking well with the exception of Indian Corn which is being injured by the hot winds.

RECEPTION AT HIGH SCHOOL

Thursday evening was the culmination of the social relaxations of the Quay County Normal. On this occasion a most delightful reception was given in honor of State Supt. J. E. Clark of Santa Fe and the visiting teachers by the High School Orchestra and the visiting teachers, the receiving line consisting of Dr. Light, Mr. Daley, the new High School principal, Miss McKenzie, Miss Luckey, Miss Hubbard, Miss Russell, Mrs. Hess, Miss Cooke, Supt. Clark, Mr. Henderson and Mr. Cramm.

Get Ready for School

PROGRESSIVE METHODS OF STORING WATER IN THE SOIL

Careful Experiments Have Shown That One to Two Barrels of Water Are Needed to Produce One Pound of Dry Matter—If That Is Not Available Crop Suffers and There Is a Lessened Yield.

(By D. W. SMITH.)

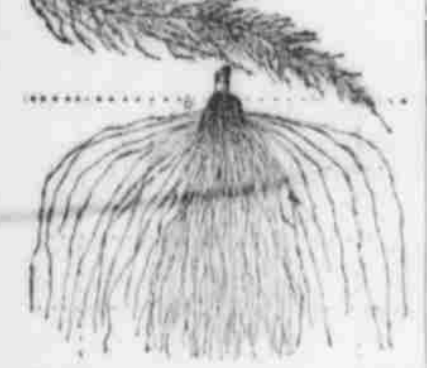

The plant gets the food supply through the water in the soil, which it drinks in or absorbs from the soil through the membranous surfaces of the roots with their root hairs, which later greatly increase the surface connections of the plant with the water of the soil.

Large quantities of water thus taken in by the plants are "breathed out" into the air through the leaves. The quantity of water thus taken in and given out by the plant is enormous—field crops consuming 200 to 500 pounds of water to each pound of dry matter they add to their own weight in growing.

The roots of our field crops are much longer, much more numerous, spread farther and penetrate into the soil to greater depths than most people realize. On the fairly open, easily penetrated soils, where the upper portion of the earth is often too dry for the plant to feed, crop send their deepest roots downward four to six feet and in some cases much deeper. The greater number of roots, however, are in the upper 18 inches of earth.

The richest portion of the soil, and the part in which the plant likes best to feed, if sufficient water is present, is the lower half or two thirds of the furrow slice. With greater depth the plant obtains food with more difficulty.

While the deepest roots doubtless secure some food, their chief function

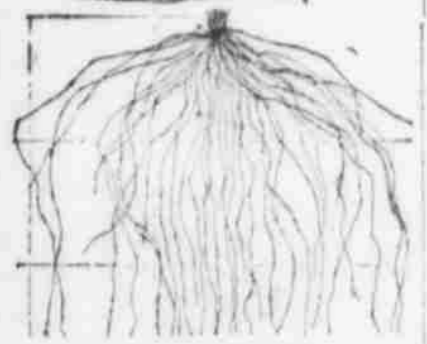

Crown and stem roots of a mature plant from one seed. There are about 10 stem roots, each of which had for some distance on an average about eight branch roots to the inch, making a wonderful mat of roots in the soil.

is to bring water from deep in the earth when the supply near the surface is short. These long, deep penetrating roots have few branches near the tip, while the branches are very numerous near the surface, where the roots spread out so as to reach the more concentrated plant food from every nook and corner of the furrow slice and the uppermost layer of sub-soil. Only the outer recently developed ends of the root branches are active in absorbing water and receiving soluble plant food, the older surfaces being covered with a tough layer of bark like cells.

The roots of other cereal grains are quite similar, and the roots of tame grasses penetrate to like depths. The clovers go a little deeper while some perennial field crops, like alfalfa, extend much deeper. But in all cases the plants get most of their food in the upper layers of soil.

Since the furrow slice and the part of the subsoil just below it are the

At 6 are shown the stem roots of a corn plant nearly ready to tassle out. These roots all have their origin in the base of the stem, and each one has many branches. The dotted lines mark off square feet. The largest roots penetrate nearly four feet downward, while the spread horizontally including the branches, not shown in 6, was over six feet. This drawing was made from a plant nearly every stem root of which was dug out by means of a small wooden trowel, the length, depth and direction of the root being accurately recorded on the drawing.

portions of the soil which supply the most congenial and the richest nutriment to the roots of crops, the aim of the farmer should be to keep them supplied with the proper amount of moisture and to provide that mechanical condition which best promotes the growth and yield of the crops.

That a crop draws up through its roots, and allows to evaporate, an immense amount of water has been

clearly shown in all parts of the country.

Careful experiments in America and in Europe have shown that one to two barrels of water (200 pounds to 500 pounds) are needed to produce a pound of dry matter of a dry crop of our common fields. If this amount is not available in the soil the crop suffers, and if the supply is irregular there is a lessened yield.

During wheat growing months when the foliage presents the greatest expanse of surface and the roots are reaching several feet into the soil for water there is a very great draft of water.

A conservative estimate would place the average moisture percentage in the soil bearing a wheat crop 15 per cent, below that in the soil bearing no crop.

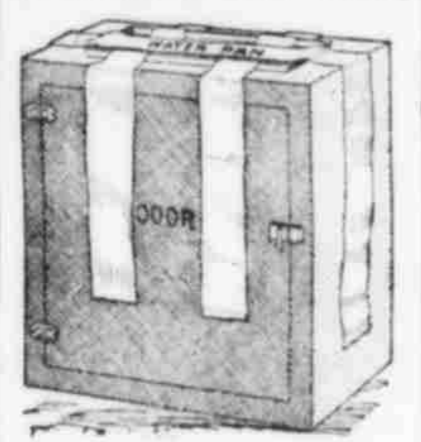

KEEPING BUTTER AND MILK COOL

May Be Done by Means of Iceless Refrigerator Which Is Illustrated and Described Herein.

The problem of keeping butter and milk cool on the farm is a difficult one, writes L. W. Forman in the Prairie Farmer. An iceless refrigerator made according to the following description costs little and will do the work very satisfactorily.

The refrigerator is made from an ordinary dry goods box. To construct, take a box about twelve inches deep, twenty-four inches long and twenty-four inches wide. On one side make a door of convenient size, secured by two hinges and a latch. Tack two or three thicknesses of burlap on the outside, making allowance for the door. After setting the box on end set on the top a deep vessel filled with water and in this basin put strips of burlap or wooden goods about three inches in width, and of sufficient length to reach well down the sides of box. Secure the strips to the bottom of the basin by a weight and the refrigerator is ready for business.

Boxes may be placed in the box to suit varying needs. When complete set outside the house, preferably where prevailing winds can pass over the box, and the cooling resulting

Refrigerator Ready for Use.

from the rapid evaporation of water reduces the temperature within the box. The better it is outside and the harder the winds blow, the cooler it will be inside the box as long as the pan is kept filled with water.

Hemp Kills Weeds.
Some experimental plots of hemp grown in cooperative tests of the Wisconsin agricultural experiment station and the United States department of agriculture have been upon lands badly infested with quack grass and Canada thistles. The rank growth of the hemp, which reaches 10 to 12 feet in height and thoroughly shades the ground, has killed out these weeds that when the land was tilled after the crop was removed few weeds were found.

Food for Broilers.
Sweet skim milk is excellent for finishing off broilers. The chickens should have access to cracked corn at all times and should be given a worm mash five times a day. The best results are obtained if water enough is given which will be eaten up in five minutes' time.

Keep Best Birds.
Don't sell all the best birds you raise. Tempting offers look well, but there is no quicker way to get out of the business than to sell the very best specimens you raise.

Be Generous With Oil.
Are you liberal with your lubricating oil? To save oil on the bearings of machinery is a terrible extravagance.

CEMENT TANK IS DURABLE

Can be Constructed at Comparatively Little Expense and Is Practically Everlasting—Directions are Simple.

You can make an everlasting water-tank of cement at a comparatively low cost. Frost will not injure it if it is made right. A tank 6 by 16 and three feet deep is large enough to hold water for sixty cows.

Three men can make this kind of a tank in one day, after the sand and cement have been hauled. Excavate about four inches deep for the foundation. Put one or two inches of crushed rock in the bottom. The frame for the side may be made from old lumber. The better this fits together the more it will improve the appearance of the tank when finished. It must be braced firmly inside and outside. Then put in the mixture of sand and cement in the proportions of three sand to one cement. Use Portland cement.

The sand need not be screened if it is not too coarse. For a tank of this size, it takes about twenty sacks of cement and four loads of sand. Wire netting makes very good reinforcement but gaspipes or iron rods would be better. The sides may be tamped a little to make them fill out the frame well. The sides of the tank should be about six inches thick at the bottom and four at the top. Make the outside perpendicular and the inside sloping. It should be five feet wide at the bottom and five feet four inches at the top. This will keep the cement from cracking when the water freezes.

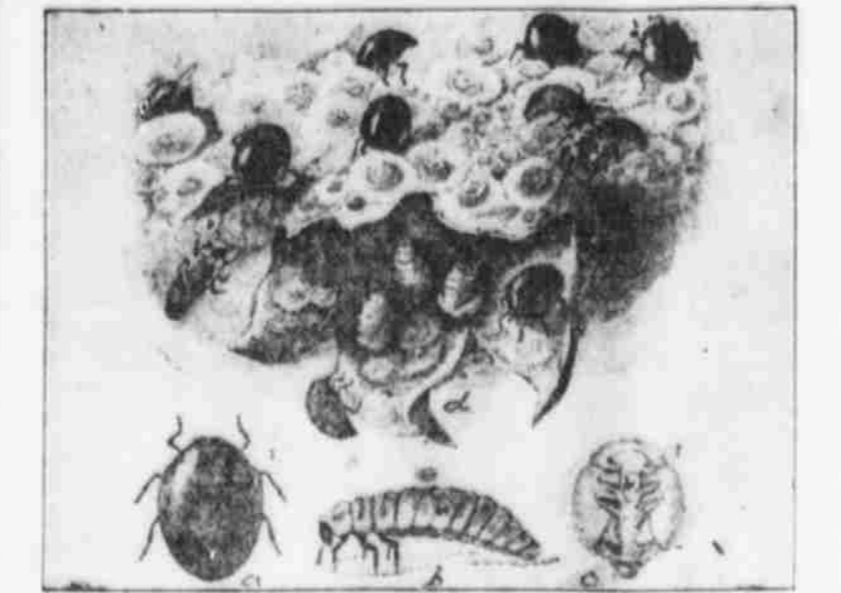

After the sides have been made, fix the bottom. This should be made two inches thick without the crushed rock. Coat the tank with pure cement, making it more impervious to water.

The tank should be made in one day so that it will join together well. Make it a little lower at one end and put a two-inch pipe through the wall at the bottom. This will be a help in cleaning.

Storage tanks are good also as a source from which to irrigate gardens

IMMENSE DAMAGE WROUGHT BY TROUBLESOME SAN JOSE SCALE

Insect Infests Practically All Portions of Plants Above Ground—Is Distributed from One Region to Another on Nursery Stock, Scions, Etc.—Several Washes Used in Control of Pest.

The Pitiful Ladybird. A. Middle; B. larva; C. pupa; D. flower; E. flower; F. flower; G. flower; H. flower; I. flower; J. flower; K. flower; L. flower; M. flower; N. flower; O. flower; P. flower; Q. flower; R. flower; S. flower; T. flower; U. flower; V. flower; W. flower; X. flower; Y. flower; Z. flower.

By A. L. QUAINANCE, United States Department of Agriculture.
The San Jose scale (Aspidiotus perniciosus Comstock) infests practically all portions of the host plants that are above ground—the trunk, limbs, and branches—and when abundant it may cover the leaves and fruit, injury results from the extraction by the scale insects of the juices of the plant. At first this merely checks growth, but as the insects increase in number the speedy killing of the branches and twigs follows, resulting finally in the death of the plant. In addition to the extraction of the juices of the plant, the sucking habit of the scale results in a diseased and often stunted condition of the inner bark or cambium, showing a reddish discoloration, as exposed in cutting with a knife, and the bark itself may crack in some trees, exuding drops of resinous gum. A reddish ring which is also much evidence of red ring appears on the scales on the bark, especially of the apple and pear, and on the trunk of these plants, though not characteristic of any one scale species.

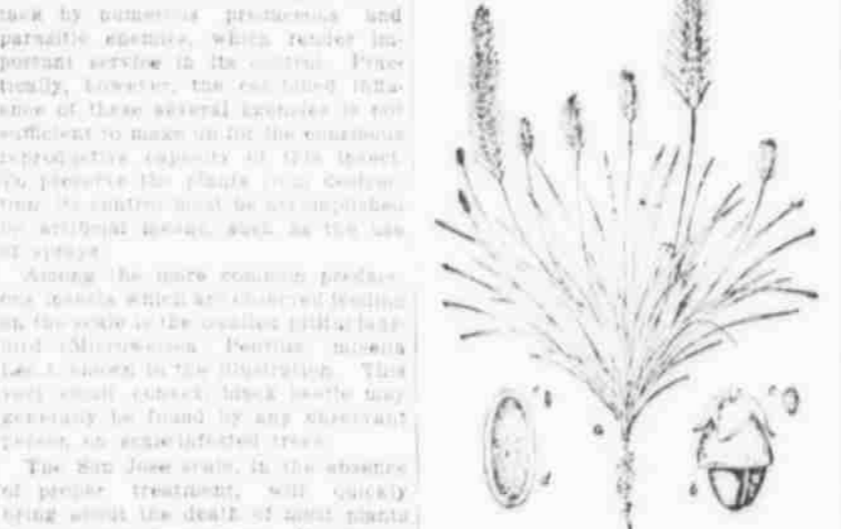

On pear the scales have a tendency to collect to a greater extent the older limbs and branches than the newer growth, as the wood 1 year old. On apple and pear, the terminal twigs are quite generally infested, and many of the young may find their way to the fruit, settling principally in the crotch and stem cavities. Most varieties of fruit trees and plants in the nursery, in the absence of treatment, perhaps never reach fruiting condition. Peach trees will usually be killed in two or three seasons, while pear or apple trees will maintain a feeble existence much longer. This insect, on account of its great similarity to certain other species of scale insects, may be positively determined except by specialists. The occurrence of diseased and dying branches shows severe infestation. Infestation furnishes strong presumptive evidence of the presence of the pest, but specimens of infested twigs should be promptly submitted to a qualified person for examination.

The San Jose scale is subject to attack by numerous predators and parasites, which render important service in its control. Practically, however, the continued infestation of these several species is not sufficient to make up for the enormous reproductive capacity of this insect. To prevent the plants from becoming infested, control must be maintained by regular spraying, such as the use of kerosene emulsion.

Among the more common predators are aphids which are observed feeding on the scale in the winter. This well known insect, which people may generally be found by any observant person, on scale-infested trees.

The San Jose scale, in the absence of proper treatment, will quickly bring about the death of most plants of economic importance. It is, therefore, imperative, whether by orchard or on private fruit trees and other plants in the yard, should call for prompt steps to effect its control. It has been simply demonstrated that the scale may be very successfully controlled and practically its presence requires one thorough treatment during the dormant period each year. On account of the general distribution of the pest, extermination is in most cases out of the question.

Where plants are thoroughly infested, with consequent death of branches and stunting of growth, it

Bracted Plantain.

is not to be despised. If the weed is to be removed, it is usually destroyed by close cultivation. In order to avoid setting the seed on the place, all grass and cover seed should be carefully examined for the dull brown, flat-shaped seeds of the later-leaved plantain or waterhemp.

Sheep don't care for ground feed and it doesn't pay to grind it for them.

Small Fruit.
Don't neglect to pinch off the top of your growth of raspberry canes (the black) when about 20 inches in height; blackberry about the same. You want an abundance of fruit next year, and hence must have all the bearing wood you can get.

Cure for Wire Cuts.
A horse owner says he has excellent results for wire cuts, and claims that it beats anything he ever saw used on cuts, even the severest kind, for rapid healing.

Clean Milk Vessels.
When milk is given, special attention must be given to daily cleansing. If allowed to get foul it is much worse than no milk, though the milk properly given is beneficial in the extreme.

Well-Tilled Orchard.
A small orchard well put in on ground that is in such state that it should be thoroughly tilled would be worth much more than a big one that could not be well cared for.

CHIEF USES OF GOAT

Angora Is Small Animal of Especially Fine Silky Hair.

Suitable Prices for Mohair Have Not Prevailed Because of Large Number of Cross-Breeds—Excellent for Cleaning Up Weeds.

C. M. Evans, superintendent of college extension work at the A. and M. college of Texas, has an inquiry as to the chief uses of the Angora goat, and under what conditions would he advise the growing of same? Mr. Evans answers that the chief uses are:

1. The production of mohair.
2. The production of mutton.
3. Clearing land of noxious weeds.
4. Clearing land of underbrush by browsing.

The Angora goat originated in Angora, Asia Minor, and is a small goat of especially fine silky hair. The greater number of the goats of the United States have been imported from Asia Minor, Turkey and South Africa. A great many of the finest goats in the world today may be found in the United States, scattered from Texas to Washington.

Suitable prices for mohair have not generally prevailed. This is probably explained by the fact that a large number of the goats which we have today are cross-bred goats gotten by a top cross of Angora on the old short-haired Spanish goat. This has not only caused a shortage in the length of the fiber, but has caused a great deal of kemp to be found over the body of the fleece. Kemp is a coarse straight hair found scattered over the body, and is objected to by millers because of its coarseness and because it does not take

Herd of Angora Goats.

COTTONSEED MEAL FOR EWES

Alabama Experiment Station Makes Test and Secures Quite Favorable Results From Its Use.

Particularly in the south many farmers feed nothing but cottonseed meal and hulls to pregnant ewes. While others avoid cottonseed and its products, claiming that they cause kidness, diarrhoea and sometimes death. To test this point a flock at the Alabama experiment station was divided into two lots, one of which was fed upon hay, beans alone and the other upon cottonseed meal and hulls. Both lots were found from other feed. Both lots of ewes came to the lambing period in excellent health and spirit, but those fed on cottonseed meal seemed more alert and spirited than the hay lot. Nevertheless, during these favorable results in feeding cottonseed meal, some caution is necessary in feeding it. Recent investigations by Dr. Crawford of the department of agriculture indicate that cottonseed meal contains a salt of pyrophosphoric acid which may cause various troubles. Probably some kinds of cottonseed contain this poisonous matter in larger amounts than others, which may account for the facts that some farmers have had trouble and some have not. Unless the seed fed has been tested in some way, only small quantities should be used at first. Feeding four parts work at the Alabama station, no ill results have come from the use of cottonseed meal as a feed for sheep, says possibly in one case in 1906. In the experiments noted above the total gain per ewe for the entire period of 108 days were 18 pounds for those fed on hay and 15 pounds for those fed on soy bean hay. The animals averaged about 95 pounds in weight.

Five-Field System.
The department of agriculture advises two systems of farming for the average renter, namely: The four-field system and the five-field system. In the former all the cultivated land on a farm is divided into four fields of equal size, and rotation followed in this order: First, corn; second, wheat; third, clover; fourth, clover for hay or pasture; fifth, clover for hay or pasture.

Bone Phosphate.
Bone phosphate is a name given by fertilizer makers to that combination of lime and phosphoric acid which is found in bone. This means that 54 parts of lime are combined with 46 parts of phosphoric acid. Therefore, if your tanks contain 20 per cent of bone phosphate, only 46 per cent, or a little over nine per cent, of all, is actually a phosphoric acid.

New Wheat for Chickens.
As soon as wheat is harvested bring a few bundles to the chickens daily. They will enjoy scratching out the grain, and it is the best feed they can have. Wheat, oats, corn and buckwheat are all good grains for poultry, their comparative food value being in the order given. Eye is of very little value as a grain feed for poultry, but green rye for fall, winter and early spring picking is excellent.

the dyes uniformly with the finer mohair. As the number of goats increase this problem will be solved to a great extent by a market classification of the product.

Goat mutton has been usually objected to because of the wild flavor of the flesh. The extreme wild flavor of the flesh is usually due to the fact that the animals are raised largely on noxious weeds. Goats pastured on grass or fattened on grains or forage crops produce a quality of mutton that is number one. Only a slight wild flavor can be detected and this but adds to the palatability of the meat. Most of the cultivated lands in this state are paying fair dividends on the investment, but a large per cent of the lands used for pasturing are bringing very poor returns. This is due to a great prevalence of noxious weeds found throughout the south. Goats seem to have a preference for weeds instead of grass and a few goats will readily clean a farm of weeds, thereby doubling the grass yield per acre and at the same time will actually make a profit off the weeds.

Goats are especially fond of underbrush and a few goats will absolutely clean out all underbrush in a pasture in a very short time. This makes the land easy to clear, or if the land is to be used for pasture grass will readily spring up under the large trees. At the same time a profit may be made on the goat crop and the land will be fertilized as in other stock farming. The greatest objection probably to the raising of goats is their ability to climb fences, and it is pretty nearly impossible to keep them enclosed in anything less than a seven-foot fence of a fence made of woven wire. In that case all fences for corner posts and gates will need to be placed on the outside of the wire, as they seem to take an especial pleasure in running up any kind of a brace and jumping over in the neighborly lot.

Illustration Shows Method of Most Approved Construction and Thoroughly Well Done.

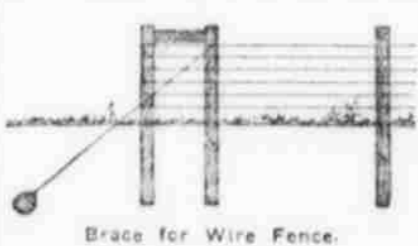

Brace for Wire Fence.

GOOD BRACE FOR WIRE FENCE

Illustration Shows Method of Most Approved Construction and Thoroughly Well Done.

Wire fences are valuable when the wires are tight, useless when they are slack. Not one fence in fifty has end posts properly braced. Often great expense is incurred in bracing posts with long diagonal braces, the ultimate result of which is usually to fit the posts out of the ground, says a writer in the Breeder's Gazette. The illustration shows a method of most approved construction where the wire fencing is most in use and most thoroughly well done. It will be seen that near the end of the fence are set two posts, about thirty inches apart, with a short brace between them at the top. A twisted wire cable of several good strands runs from the second post to a rock or half a round fence post buried deep in the earth. Such a brace as this can never lift or give way. Another point worth considering: It is far better to bore holes through the posts and run the wires through rather than to staple them to the posts, especially if one uses wood that is apt to split and that does not hold staples well. I have seen thousands of miles of fence built in this manner so that the wire that it is too much trouble to here for the wires.

First Building at Hanover.

become prominent in affairs have gone out of the building as college graduates.

It is believed here that the first diploma given to any woman from an educational institution of any kind was given here in this building to Margaret Minter of Nantuxet, N. H. More than fifty people who have been members of this church have gone to the town mission field, and ten college presidents were once members of the congregation.

GENERAL FARM NOTES

\$500,000 Picture Is Genuine.
Berlin.—Dr. Wilhelm Bode, director of the royal museums, strongly defends the authenticity of Rembrandt's famous painting, "The Mill," against the attack of Professor von Seiditz of Dresden. In an article appearing in an art publication von Seiditz maintains that the picture probably was the work of Rembrandt's pupil, Gelder. Dr. Bode, who studied the picture closely while it was being cleaned here, says that it is a Rembrandt beyond doubt, and, moreover, that the style is not that of Gelder.

Autobus Is New Child Fad.
New York.—The autobus has displaced the merry-go-round as the popular entertainer of children on the New York East Side. The autobus gives a ride around the block for 2 cents, or three rides for 5 cents. It is tremendously popular, the children fighting to pay their pennies for a ride in a real automobile.

Sun Hatches Hen's Eggs.
Lowell, Mass.—Gilbert Wright of Chelmsford, a suburb of Lowell, reports that ten of a setting of eggs which the hen abandoned hatched without the hen's assistance. The heat had been so intense that it drove the hen off the nest. The atmosphere took the place of the hen after that.

HARRIET BEECHER STOWE

Famous Woman Who Wrote "Uncle Tom's Cabin" Was Born One Hundred Years Ago.

Litchfield, Conn.—The one hundredth anniversary of the birth of Harriet Beecher Stowe, one of the famous children of Dr. Lyman Beecher and author of "Uncle Tom's Cabin," was celebrated at her birthplace here. While the author of many books, Harriet Beecher Stowe is remembered chiefly by her great work, "Uncle Tom's Cabin." She was forty years of age when the story began to run as a serial in the National Era, an Abolition paper published in Washington. It was translated into every language of Europe, had a sale of over

Harriet Beecher Stowe's Birthplace.

200,000 copies in the first two years after its publication, a fourth of which were in England, and it is still called for in many of the public libraries of the country. As a "best seller" it far surpassed all the work of recent days and has been exceeded in circulation by the Bible only. At one time more than a dozen theatrical companies were traveling through the country presenting this drama.

HANOVER'S FIRST BUILDING

Old Presbyterian Church Which Was the Earliest College Structure Is to Be Remodeled.

Hanover, Ind.—The old Presbyterian church at Hanover, which was the first building of Hanover college, will be remodeled. The building was erected in what was then South Hanover, in 1828. Hanover college had had its inception in a little log cabin two years before.

The first real college classes in the state were held in the building that is to be remodeled. A seminary was also started in the building in 1827. This was removed to Chicago later and is now the largest seminary of its kind in the west—the McCormick seminary. A tornado took the top story of the building in 1877 and the college was moved to a new structure about a mile east, overlooking the Ohio river, and the building was made into a church. Every commencement exercises since 1830 have been held in this church, and a large number who have

First Building at Hanover.

become prominent in affairs have gone out of the building as college graduates.

It is believed here that the first diploma given to any woman from an educational institution of any kind was given here in this building to Margaret Minter of Nantuxet, N. H. More than fifty people who have been members of this church have gone to the town mission field, and ten college presidents were once members of the congregation.

FARM FOR SALE—160 acres two and one half miles from Tucumcari, can be irrigated. Patented land.
See 2-11-47

NOTICE OF MASTER'S SALE
In pursuance of a judgment rendered in the District Court of the Sixth Judicial District of the Territory of New Mexico, in and for the County of Quay, in the case of Rodney Jager vs. James K. Pierce, defendant, No. 807, dated the 24th day of July, A. D. 1911, whereby plaintiff obtained judgment against said defendant for the sum of \$350.43, with 12 per cent per annum interest thereon from date of judgment, and costs of suit, and judgment of foreclosure and sale of the property hereinafter described to satisfy the same.

NOTICE IS HEREBY GIVEN: That I, Henry Swan, Special Master heretofore appointed by the court herein, will on the 25th day of October, A. D. 1911, at the hour of 10 o'clock in the forenoon of said day at the front door of the Court House at Tucumcari, Quay County, New Mexico, sell at public auction to the highest bidder for cash, the following described property lying and being in said Quay County, New Mexico, to-wit:

The east half of the northeast quarter of section thirty-three and the west half of the northwest quarter of section thirty-four in township seventeen north, of range thirty-six east, N. M. P. M., together with all improvements thereon. And that I will apply the proceeds of said sale to the satisfaction of said judgment and costs, as provided therein.

HENRY SWAN,
Special Master.

CERTIFICATE OF COMPARISON
I, NATHAN JAFFA, Secretary of the Territory of New Mexico, do hereby certify that there was filed for record in this office at nine o'clock, A. M., on the Fifteenth day of July, A. D., 1911,

Articles of Incorporation
of
THE TUCUMCARI LIGHT AND POWER COMPANY
 No. 6872

and also, that I have compared the following copy of the same, with the original thereof now on file, and declare it to be a correct transcript therefrom and of the whole thereof.

Given under my hand and the Great Seal of the Territory of New Mexico, at the City of Santa Fe, the Capital, on this 17th day of July, A. D., 1911.
NATHAN JAFFA,
 Secretary of New Mexico.

ARTICLES OF INCORPORATION OF THE TUCUMCARI LIGHT AND POWER COMPANY
KNOW ALL MEN BY THESE PRESENTS: That we, R. G. LaFite, Henry Swan and O. F. Edler, all of the City of Tucumcari, New Mexico, in the County of Quay do hereby associate ourselves together for the purpose of organizing a corporation under the laws of the Territory of New Mexico, in manner and form as follows:

FIRST
 The name of the said corporation shall be "THE TUCUMCARI LIGHT AND POWER COMPANY."

SECOND
 The location of the principal office of the said corporation shall be in the City of Tucumcari, in the County of Quay and Territory of New Mexico, and the office in charge of the books and business of said corporation and upon whom service of process may be had shall be R. G. LaFite. This Corporation may establish an office or offices outside of the Territory of New Mexico, and with in the Territory of New Mexico at such places as the Board of Directors may determine.

THIRD
 The objects for which the said Corporation is formed are as follows:

- To manufacture, generate, produce, supply, distribute and dispose of gas, electricity, steam, heat, ice, water, and other commodities in the City of Tucumcari and County of Quay, and the towns, cities and counties adjacent to the said County of Quay now established or hereafter established and also water, for the purpose of light, heat, fuel, power, or for other purposes.
- To construct, purchase, lease or otherwise acquire, maintain and operate plants and works for manufacturing, generating, producing, supplying and distributing gas, electricity, steam, ice, water and other commodities, and to construct, lease, purchase, and otherwise acquire, maintain and operate lines of mains and other pipes and conductors and lines of poles, wires and other conductors and appliances for the purpose of conveying, supplying and distributing gas, electricity, steam, heat, ice, water, and other commodities through the streets, alleys and public and private lands and places in the City of Tucumcari, and the County of Quay and elsewhere, as the interest of said corporation may require, and to make excavations and constructions for the purpose of constructing, repairing, making connections with the same, and to exercise the right of eminent domain in its rights of way, and to do any and all things necessary, useful and convenient to the use, sale, transmission, distribution, disposition of gas, electricity, steam, heat, water, ice, and other commodities, and the collection and receipt of its charges therefor.
- To construct, equip and operate and maintain lines of street and interurban railways, and to do any and all things necessary, useful and convenient to the operating and managing of railway service and to exercise the right of eminent domain in its rights of way for the same.
- To apply for, take out, purchase or otherwise acquire, use or enjoy, and to sell, assign, license and otherwise dispose of any and all inventions, improvements, processes, formulas, letters, patents, copyrights, trademarks, trade names, and incorporeal rights of any and every kind whatsoever.
- To purchase, lease, acquire by consolidation or otherwise, own, manage, control, maintain and operate the properties, rights, franchises and immunities of any gas, electric, steam, heat, ice, water and other company or companies within the Territory of New Mexico and elsewhere, and exercise the right of eminent domain for the same.
- To manufacture, purchase, lease, sell or otherwise dispose of gas, electric, steam, ice, water or other apparatus, appliances, and supplies of every kind and nature, and to engage in the business of general merchandise of any kind whatsoever.
- To purchase or otherwise acquire, own, hold, mortgage, pledge, sell or otherwise dispose of bonds, debentures, notes, shares of stock, or other securities and evidences of indebtedness of any company or companies, and to issue and exchange for such bonds, debentures, notes, stocks, and other securities, its own shares of stock, bonds, debentures, notes and other obligations, and while owner of any such stock, bonds and other obligations to have and exercise in respect thereto all the rights, powers and privileges of individual owners thereof, and to exercise all voting power thereon in furtherance of the rights and purposes of this Corporation.
- To purchase, lease or otherwise acquire, take, hold, or otherwise enjoy, of any real or personal properties, rights, sell, convey, lease or otherwise dispose of way, easements and franchises in furtherance of the objects and purposes of

the Corporation, and to exercise the right of eminent domain for the same.

9. To purchase, lease or otherwise acquire coal lands anywhere in the Territory of New Mexico or elsewhere, and to mine, manage and operate the same for the purpose of supplying its works and plants with coal, or for any other purposes, and to sell, lease or otherwise dispose of the same, or any part thereof, and to sell or dispose of coal, coke and any and all the by-products of its works and plants and other commodities.

10. This Corporation shall have the right to borrow money and execute, issue, negotiate and deliver its notes, bonds or other obligations therefor, and shall have power to mortgage or pledge any or all of its properties, rights, interests or franchises owned or to be acquired as securities for such notes, bonds or other obligations, and to guarantee and become surety in the respect of bonds or other obligations, notes or other evidences of indebtedness or other obligations of any individual, firm, corporation or corporations.

11. This corporation shall have power to lease, sell or otherwise dispose of any and all of its properties, rights, interests, franchises, immunities to any other corporation or corporations, person or persons, or to arrange with any corporations, firms or persons by contract, lease or otherwise for the operation and maintenance of the mains, lines, wires, poles, conductors, apparatus, appliances, works, plants, or coal mines in this corporation or any of them.

12. This corporation shall also have and exercise any and all such incidental powers in addition to those hereinabove enumerated, as shall be a requisite proper or convenient to accomplish the objects and powers aforesaid.

FOURTH
 The capital stock of this corporation shall be One Hundred Thousand Dollars, (\$100,000) which stock shall be divided into One Thousand (1000) shares of a par value of One Hundred Dollars (\$100) per share.

The amount of capital stock with which the corporation will commence business is Twenty-five Thousand Dollars (\$25,000).

The names and addresses of the incorporators, and number of shares subscribed by each are as follows:

R. G. LaFite, Tucumcari, N. M., 248 shares.
 Henry Swan, Tucumcari, N. M., 1 share.
 O. F. Edler, Tucumcari, N. M., 1 share.

FIFTH
 The term of existence of this Corporation shall be Fifty years (50).

SIXTH
 The business affairs of this corporation shall be managed and controlled by a Board of Directors consisting of three members, and the following named persons shall constitute the Board of directors of this corporation for the first three months of its existence and until their successors are elected and qualified, to-wit: R. G. LaFite, Tucumcari, New Mexico, Henry Swan, Tucumcari, New Mexico, and O. F. Edler, Tucumcari, New Mexico.

SEVENTH
 The principal business of the corporation shall be carried on in the City of Tucumcari, County of Quay, and Territory of New Mexico.

EIGHTH
 The Board of Directors of this Corporation shall have power to make from time to time such presidential by-laws as the government of the Corporation as they may deem proper, and to amend and revise the same. The Board of Directors shall also have power to designate such officers and agents as may be necessary or expedient, and to appoint and remove the same at its pleasure, and to fix the salaries of such officers and agents.

NINTH
 Meetings of the Board of Directors of this corporation may be held beyond the limits of the Territory of New Mexico at such places as may from time to time be provided by the by-laws or by order of the Board of Directors.

To all the above and foregoing provisions of the Tucumcari Light and Power Company mutually agree, and for the purpose of the organization of said Corporation, we have hereunto set our hands this 7th day of July, A. D., 1911.

(Signed)

In the District Court of the Sixth Judicial District of the Territory of New Mexico, within and for the County of Quay, (International Bank of Com.)
 versus, Tucumcari, New Mexico, Plaintiff.

No. 937
 Alice Hickox, Defendant.

To Alice Hickox, Defendant:
 You are hereby notified that the above named plaintiff, International Bank of Commerce of Tucumcari, New Mexico, as the successor of the Federal Savings Company of Tucumcari, New Mexico, has filed a suit in the above styled court praying judgment against you for the principal sum of \$200, with 12 per cent interest from May 15, 1911, to settle with 10 per cent attorney's fees on the total amount and the costs of said suit being evidenced by one promissory note dated April 17, 1909, for \$275, given the said Federal Bank Company. The decree of this Court is asked foreclosing a deed of trust given by you to the said bank, and covering the east half of the northeast quarter and the east half of the southeast quarter of section number in Township eleven, north of range thirty, east of the N. M. P. M., containing 160 acres, and that said property be sold and the proceeds applied to the payment of the above debt. And you are hereby notified that unless you appear and answer on or before the 18th day of September, A. D., 1911, plaintiff will apply to this Court for the relief demanded in the complaint herein, and the decree of this Court will be rendered in accord herewith.

Plaintiff's attorneys are Holloman & McElroy, Tucumcari, N. M.
 (SEAL) CHAS. P. DOWNS, Clerk.
 First publication July 22, 1911.

NOTICE OF MASTER'S SALE
 In pursuance of a judgment rendered in the District Court for the Sixth Judicial District of the Territory of New Mexico, within and for the County of Quay, in the case of the First National Bank of Tucumcari, New Mexico, a corporation, plaintiff, vs. A. A. Ball and Iris N. Ball, defendants, No. 907, which judgment was dated the 20th day of June, 1911, whereby plaintiff was given judgment for the sum of \$5014.84, with interest from date of judgment at the rate of 10 per cent per annum, and the costs of suit and sale of the property hereinafter described.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, that I, Henry Swan, special master heretofore appointed, will on the 28th day of September, 1911, at 10 o'clock in the forenoon of said day, at the Court House of the Court House at Tucumcari, New Mexico, sell at public auction to the highest bidder for cash, the following described real estate and property, to-wit: The southwest quarter of section eleven, township eleven, north, range thirty east, N. M. P. M., and I will apply the proceeds of said sale to the satisfaction of said judgment and costs.

HENRY SWAN,
 Special Master,
 Holloman & McElroy, attorneys for plaintiff, Tucumcari, N. M., 7-29-41
