Western Newspaper Union News Service.

Paris, June 24.—The German government at Weimar has formally communicated its willingness to sign the peace terms unconditionally, it was announced by the French foreign office. The Italian delegates at present

the peace treaty was formally pre-sented to the aliles at 5:25 p. m., Mon-a constructor of the United States day, less than two hours before expiration of the time limit. Colonel Henry, French linison officer, received the note from Secretary von Haniel of the German peace delegation at Versallies.

Berlin - General Maercker, who commands the forces guarding Welmar, made a pessimistic statement at meeting of various parties regarding the signing of the treaty, according to a Weimar disputch. All the generals and staff officers of the army have threatened to retire when the government signs peace unconditionally. Remore of a threatened red revoit also have caused concern in official cir-

Germany is to sign unconditionally the peace trenty of the allied and as sceinted powers.

Although the Germans had pleaded that the treaty provisions acknowledging Germany's responsibility for the war, and calling for the trial of former Emperor William for "a supreme offense against morality and the sanctity of treaties," be stricken out, the will of the allies that these remain in the document is to prevail.

Likewise a request for an extension of the time allowed for announcement meet the allies' terms was peremptorily refused.

After having promised to meet the allied demands, the spirit of recalcitrancy apparently prevailed for a time in the new government of Herr Bauer, but this seemingly later was overcome.

In their pleas the Germans continued to the last to declare that the conditions imposed were impossible of fulfillment, and to make reservations declining responsibility should Germany be unable to meet the requirements of the allies.

## THE KNOX RESOLUTION

TO SEPARATE LEAGUE FROM TREATY CAUSES SCRAP.

HAS STRONG BEARING ON ACTION.

Washington, June 20.—Debate of the League of Nations shifted to political grounds again in the Senate with a resulting flurry of party feeling which ended in an admonition by the chair that Senate rules must be

obeyed. The flareup started when Senator Williams of Mississippi, a Democratic member of the foreign relations committee, charged the Republicans had stacked" the committee against the League. Senator Moses of New Hampspirited denial and Senator McCormick, Republican, of Illinois, declared the Paris peace mission had been

"stacked with Democrats." Other senators quickly got into the discussion and still others were asking recognition when Vice President Marshall called a halt, ruling that the discussion, which had interrupted a speech by Senator Thomas, Democrat, of Colorado, was out of order. ALLIED ARMIES WERE READY TO ADVANCE ON SHORT NOTICE.

Western Newspaper Union News Service Coblenz, June 21.-Germany has decided to sign peace treaty after allnight session of the cubinet at Weinar. Large percentage of people favor action is the official announce ment here.

Berlin, June 21.—Opposition to Gustay Noske, minister of national defense, as a successor of Chancellor Scheidemann is increasing, while Dr. Mueller, under secretary of war food bureau, is declining the premiership, pleading illness. Noske is the least liked of the two and would antagonize hundreds of thousands of persons, who regard him as a "bloodhound and oppressor." As a result, a temporary directorate of five members may rule Germany in case President Ebert fails to form a cabinet.

Berlin.-The cabinet has resigned. President Ebert will retain his office temporarily. It was stated on good authority that President Ebert had decided to stand or fall with Chancellor Schiedemann, because he felt that he must resign rather than sign the peace treaty.

Paris.-The Temps understands that Mathias Erzberger, if he takes power in Germany, will ask two mos tions of the peace treaty. The first will be the toning down of the clause concerning responsibility for the war, so as to spare German susceptibilities, and the second, abandonment of prosecution of the former emperor.

These will include sanitary personnel, merchant ships' officers and crews, and a number of civillan internes. Only thos who wish it are being repatriated. No war prisoners are included.

## Senate Votes Dry.

Washington. - Any possibility of Congress repealing or modifying war time prohibition, which goes into ef fect July 1, is lost. The Senate by vote of 55 to 11 refused to sanction modification of the law permitting the manufacture and sale of beer and wine from July 1 until constitutional prolibition goes into effect in January 1920. This overwhelming support of the "dry" law in the Senate demot strates the futility of the "wets" look ing any longer to Congress for relief.

## **AUTOMOBILE IS NOW NECESSITY**

Has Established Itself as Quick, Clean Method of Transportation Everywhere.

## BENEFIT TO CIVILIZATION

To Treat Motor as a Plaything is Big Mistake-Is Important Factor in All Spheres of Life-Commands Respect.

The automobile, as a method of quick, clean transportation, has estab-

lished itself the world over. It is true it was not considered such in the early days when its mechanical dependability had not been proved. But when dependability came, its position was made secure. Today the motorcar is an important factor in all place. spheres of life. It is a utillity, a vital one, and is so recognized by those who have been introduced to its use, and who appreciate, to the fullest extent, its manifold advantages, and how helpless they would be if it were necessary

to do without this modern convenience To treat the modern automobile lightly, as a plaything, is a mistake True, it is ready for recreative pur poses, but that is simply one method for which it may be employed.

Those who know most about ac complishment of the motorcar and the great changes the use of the automo bile has made in this country hold it in deepest admiration and respect.

### Motor Has Influence.

We all seem to agree that transpor tation is close to civilization. To achieve one, you must have the other. They go hand in hand. And it is not too much to say that the advent of the motorcar and its use during the last 12 years, particularly, has had a marked influence on the people of this

The use of the automobile has brondened us. We are better able to apprehiate the country. We have a better idea of our United States Through this agency the East understands a little better the West, the South knows more about the North and vice versa. The automobile has actually brought our people closer to-

Take the matter of good roads: What single thing has been responsible for our activity in this direction? The automobile, of course. And we all know it. The country was woefully behind in the matter. But marvelous achievements have taken place. Thousands of miles of splendid, durable highways have been built; more are under construction, and it is only a question of time before we shall have a fine network of roads throughout the whole country.

Is the automobile a necessity? It is. It is proving itself so. It is owned by those who appreciate the motor-car as such. It is estimated that more than a third of the automobiles in use in this country are owned by farmers, or those who live in the country, and who find it necessary to make frequent trips to near-by communities

to buy supplies or for other purposes. It is true the man in the country was able to get along, in some way, before the automobile came, but it is likewise true that his progress and advancement is dated from the time he was able to use a motorcar. Farm

## Is Economic Factor.

Is the automobile an economic factor? It is. Its use in the business world has been recognized for some time and is a recognized factor in present-day activity. To the salesman, the business man, the merchant, the real estate man, to those who must be about, it has lengthened days. They are able to do more—to see more people and to cover more territory.

get tired as easily as he would other-

wise. He saves his energy for his work, rather than using it in getting to his destination.

Does the automobile save life? It does. The use of motorcars by nearly 100 per cent of the physicians in this country is ample proof of the esteem in which it is held by this profession.

In every walk of life, in every endeavor, in every instance where time is a consideration, where energy is desired, the automobile looms large as the vehicle to be used. Ask the automobile owner and see what he says. Stop the next one you meet and put the question to him.

We are living in a remarkable age In an age when so much is taken for granted. The marvelous seems to be commonplace for us in the midst of marvels. The automobile was introduced in such a period.

It may be that we are too close to its newness to appreciate its wonder. For it is a wonder. A truly great one. But, like many other things given to us in the last 25 years, we have accepted it without giving the necessary credit to its wonderful capabilities. But it is a certainty that future history will give to the automobile its proper

### Automobile la Safe.

We need not worry. The automobile is safe. The automobile industry is secure. The automobile serves the people and as long as it does this efficiently, and there is a reason to be-lieve that this efficiency, if anything, is going to increase, it is safe to say that there will be need for motorcars, and that the law of supply and demand will govern their manufacture and

But let us not forget this: That the development of the auto-nobile from a crude, mechanical affair-erratic and feeble in performance—to the powerful, smoothly run-ning, efficient machine of today is a glowing tribute to the courage, determination and skill of those farsighted pioneers who saw in the crea tion of their handiwork the birth of a utility which would some day become indispensable to industrial progress and national prosperity.

### HANDY NEW AUTOMATIC JACK

Invention of Iowa Man Makes It Pos sible to Raise Car by Power Secured From Engine.

The new automatic automobile jack invented by Walter P. Evans, Des Moines, Ia., makes it possible to raise car wheels free from the floor, the power for operating the jack being obtained from the car itself, says Illustrated World.

The device consists of two sets of inclined independent jacks arranged to engage the automobile axles. A crank arranged to be operated by the auto-

The front legs of the jack are ad justable in height to suit different cars. Any convenient arrangement of es and pulleys makes it for the operator to move the controlling lever that frees the car from the jacks while he is still at the real of the automobile, and without the necessity of his going to the car in order to release it.

Lafayette soon had an opportunity to show his mettle. The English general, Lord Howe, was approaching Philadelphia with a superior force. Washington marched out to meet him, and in the skirmish at Brandywine Lafayette was

wounded while urging his men to stand firm. Lafayette wrote to his wife: "Be entirely free from anxiety as to my wound, for all the doctors in America are aroused in my behalf. I have a risted who has spoken for me in a way to insure my being well taken care of, and that is General Washington. That estimable man, whom I venerate the more now that I learn to know him. has become my intimate friend. His tender interest in my welfare quickly won my heart. When he sent his surgeon in chief to me he told him to care for me as if I were his son, because he loved me so much; and, having learned that I wanted to Join the army too soon again, he wrote me a letter full of tenderness, in which he admonished

me to wait until I should be entirely well." Washington's exact words in writing to the surgeon were: "Take care of him as if he were my son, for I love him the same."

On November 25, 1777, Lafavette was sent with General Greene to test British advance on Philadelphia. Having disclosed their position near Gloucester, he attacked the Hessians with such fury that the latter were routed and Cornwallis, thinking that he was surrounded by the entire American army, retreated with his 5,000 men in hot haste.

This pleased Washington so much that he wrote to congress asking for a regular command for Lafayette. A few days later Lafayette, to his great delight, was assigned to the command of the Virginia division of the army.

As time went on relations between Washington and Lafayette became stendily closer, the latter sometimes referring to himself in their correspondence as Washington's "young soldier." The ntimacy between the two men was like that of father and son, the Frenchman being twenty-five years younger than the general he so greatly

Having made a voyage to France on furlough he returned in May, 1780, joining Washington at the army headquarters in Morristown and telling him what nobody on this side of the Atlantic yet knew, of the coming of the military and naval expedition sent by the king of France to help the Americans. It was Lafavette himself who had been largely instrumental in persuading the king to send the fleet, together with 6,000 picked Ceht-Ing men under Rochambeau and the young marquis was dispatched in advance to carry the good

In due time Rochambeau arrived with the army of 6,000 men and Admiral de Grasse with a fleet manned by 4,000 sallors and marines,

Lafayette was put in command of 2,000 men and directed to march to Virginia and meet Cornwallis, the British commander. The troops were so destitute that something had to be done. Lafayette after expending his own available cash borrowed on his personal account \$10,000 from the merchants of Baltimore.

Grasse's fleet headed for Yorktown, and Washington, with Rochambeau, started to unite with Lafayette in the struggle with Cornwallis. How Washington made forced marches to the South in order the more completely to hem in Lord Cornwalls; how the Count de Grasse with his great fleet arrived off Yorktown before the arrival of General Washington, and how Lafayette persuaded the French admiral to delay the attack until Washington could take command. so that by winning that fight Washington could overthrow the enemies in congress that were trying to have some one else made com

In this final struggle the whole force of the colonies consisted of 7,000 men of Washington's army, 3,000 under Rochambeau and 3,000 of De Grasse's French marines and sailors

Would it have been possible for us to win without the aid of France? Washington and Franklin believed not. Fifty years afterward when the question was asked of Charles Carroll of Carrollton, then the only man alive who had signed the Declaration of Independence, that

venerable Christian and statesman replied: "It was God's will." It will always be a much-vexed question how much financial aid France rendered America. It seems impossible to straighten out the account. Professor Marion of the College of France has expressed the opinion that the total expenditures were fully 2,000,000,000 livres. Much information will be found in his "Histoire Financiere de la France depuis 1715." Fiske in his "Critical Period" puts the expenditure of France at 1,400,-000,000 feanes. Trevelynn states the following in a note to his "American Revolution:" "It was calculated that between the years 1778 and 1783 the war with England cost the French treasury £48,000,000. It was the main cause of those finan-

nearly three times what it is in our day. When victory was ours Lafayette went home to France. He came back for a short time in 1784. Then came the French revolution. by Napoleon in 1797, In 1824, when Lafayette was sixty-seven, he was invited by President Monroe to visit the United States. He came as the guest of the nation in pursuance of an unanimous resolution passed by congress. The occasion was the dedication of Bunker Hill monument. He made a triumphal tour of the twenty-four states of the Union. Every possible honor was showered upon him. Probably the most moving event in the whole tour was his visit to the tomb of Washington. The climax was the ceremony at Bunker Hill.

Lafavette lived ten vears longer. ident Andrew Jackson heard the news of his death in 1834, he ordered on behalf of the whole American people "that the same honors be rendered upon this occasion at the different military and naval stations as were observed upon the decease of Washington, the Father of His Country, and his contemporary in arms."

Lafayette has been dead 85 years. His clay is dust. But his soul still lives. It has breathed courage into the breasts of war-worn French soldiers. It has wept over the deported, enslaved and outraged women of his native land-over the shughter of the innocents. And who may doubt that his soul called across the ocean:

"Help us, America! Help us as I helped you!" At first we did not hear, or if hearing, did not answer. But at last we heard and heeded and went. The fighting men of France, staggering with wounds, digzy with fatigue, and the women of France, white with horror over an impending fate worse than death, saw the Star-Spangled Banner afur and cried in thankfulness: "The Americans are coming!"

We arrived-young, busky, smiling, larking fighting men. The French loved us for our looks and our ways. But could we fight? Then came June and Chateau-Thierry, when we stopped the flower of the German shock troops in their tracks, attacked in turn, put the Hun on the run and kept him running! No wonder all France went delirious with joy.

That was what we promised through "Black Jack" Pershing, when he saluted at the tomb in the little cemetery of Picpus in Paris and said: "Latayette, we are here,"

And we made the promise good. He and his

### DAPHNE, AIDED AND ABETTED BY HER SISTER-IN-LAW, SUCCUMBS TO LURE OF THE SHOPS.

Synopsis.-Clay Wimburn, a young New Yorker on a visit to Cleveland, meets pretty Daphne Kip, whose brother is in the same office with Clay in Wall street. After a whirlwind courtship they become engaged. Clay buys an engagement ring on credit and returns to New York. Daphne agrees to an early marriage, and after extracting from her money-worried father what she regards as a sufficient sum of money for the purpose she goes to New York with her mother to buy her trousseau. Daphne's brother, Bayard, has just married and left for Europe with his bride, Lella. Daphne and her mother install them-selves in Bayard's flat. Wimburn introduces Daphne and her mother to luxurious New York life. Daphne meets Tom Duane, man-abouttown, who seems greatly attracted by her. Daphne accidentally discovers that Clay is penniless, except for his salary. Bayard and his wife return to New York unexpectedly.

"All right," sighed Lella, "I'll be brave and worry through somehow, till noon, with my sweet new sister's help. But we'll come down and lunch with you. About what time do you go out to luncheon, By?"

Bayard's answer was discouraging: "This is one of the three days a week when the heads of the firm always funch at Delmonico's in a private room. I'm afraid I can't lunch with you to-

"I'm mighty sorry, honey. But men must work, and-so-forth. I've been away too long. The office needs me. And I've spent a lot of money, and I've got to go down and earn some more to buy pretty things for my beauty."

This brightened her to a way he had not expected, and a little too far beyoud his hopes. Gloom left her face like a cloud whipped from before the sun. She dazzled him with her smile. "Oh. I knew what to do! Daphne and your mother and I can go shop-

She had come to the marriage with her troussess only partly completed, on account of the haste of the wedding. But she had bought and bought in Europe. Leila grew more cheerful at a terrifying rate: "Go on to your old function, my dear child, and Dapline and your mother and I will go on a spree in the shops. Then we'll all have a banquet tonight and a theater, and if we're not too tired, a supper; and if you're very good I'll take you to one of those duncing places afterward. I'll buy the theater tickets myself. I'll get good ones. I want to save you as much trouble as I can, honey. So run along to your office and don't worry But you must miss mereightfully! Will you?"

read it?" he asked. "I can get another at the subway station."

She shook her head: "There's nothing interesting in the papers. I'm just from Paris, and I know more about the fashions than they do."

Bayard shuddered a little, inly. The times were epic. Immortal progress was being made as never before; ancient despotisms were turning into republics, republics were at war with one another; constitutions, labor problems, life problems, all social institutions, were being ripped up and remade, all the relations of masters and men, mistresses, children, wives, ani-

Daphne flared back, "It seems mighty foolish to go and make yourself

really poor in order to keep from seeming poor, especially when you never fool anybody except yourself!"

Lella, with the magnanimity of a native spendthrift, tried to soothe the fever of the rebel: "Let's go prowling around, anyway. I may see something I want for myself. Bayard dragged me away from Paris before I had finished shopping. There are several things I need desperately."

The three wise women set forth: they joined the petticoated army pouring from all the homes like a levee en asse, a foray of pretty Huns.

They reached the alluring place where the famous Dutilh, like an amiable Mephistopheles, offered to buy souls in exchange for robes of angelic In the window, on a dummy, with no

## PRODUCERS AS WELL AS RAILROADS AND DEALERS MUST SHARE BLAME FOR LOSS

tial From Field to the Cor

Much of the loss in marketing potatoes due to shipping ungraded, careessly handled, diseased stock can be eliminated by the grower with a resultant increase in his profits. Every rotten, frozen or under-grade potato that is loaded, and every potato spoiled while in transit or in storage, reduces the grower's profits and means a waste of time and labor. It also means a waste of time and labor for every person handling it, a waste of car space and consequently it emounts to an appreciable loss to the com-munity as a whole. The United States department of agriculture, through its markets inspection service, is trying to eliminate this waste.

The original purpose of the markets Inspection service was conceived to be a protection to the shipper. By a recent act of congress the inspection law has been so amended that anyone with an interest in a shipment can ask for an inspection. If a shipper receives word that a shipment has been rejected by the consignee, he can wire the markets inspection office in designated markets asking for an inspection to determine the cause and justice of the rejection. The result, as was anticipated, has been the almost automatic elimination of unjust rejec tions. Knowing that an inspector is available to the shipper, a receiver who discovers that he has bought on a falling market does not feel so free to reject the shipments consigned to him. The mere establishment of the inspection service has almost done

away with that practice. Faults Found in Shipments.

A second type of protection this service was designed to afford shippers was in settlement of claims when shipments were received in bad condition. Inspections have demonstrated that the railroads often are responsible for losses, especially for freezing injury, and for troubles which may arise because of delay in transit. These results were expected, but to a that the grower and shipper also are responsible, in that they often ship poor, undergrade, diseased potatoes. responsible for much of the loss which results from shipping diseased potatoes, since a large portion of such

prevented, in the field. Serious damage results from careles handling when the potatoes are ha vested. Too many people handle potatoes as though they were cobblestones rather than a perishable product Even the breaking of the protective skin frequently proves serious. Such injury not only damages the appearance and necessitates deep paring of the tuber, but affords ready entrance to infection. Loss of this sort lies in every grower's and shipper's power

Sizing Not Always Dependable. In grading potatoes too much de

pendence should not be put on sizing alone. A potato, for example, may be so covered with second growth kno that it will not pass through the meshes of the grader, but it does not rightly belong in the first grade. The knobs mean much waste and requir extra time in preparing the potato for the table. Or, a potato may measure up satisfactorily to the standards of size and yet be so diseased as to b worthless. A potato may even present the surface and be far below grade be cause of injuries or disease of which there is no evidence without cutting the tuber. Freezing injury, or hollow heart, illustrates cases of this kind The grower should not be blamed for losses which result from these causes but to a great extent field condition are the primary cause of the trouble which appear when the potatoes are

In its study of shipments of potatoe on the principal markets, the inspection service finds that late blight tuber rot, which is frequently followed by slimy soft rot, causes heavy losses This disease is apparent at the tim of loading, and the bad tubers can be

Scab is another example of a field disease which causes severe depreciation in the value of a crop of potatoes. The presence of a few scabby potatoes may lower the grade of an otherwise fancy lot. In some sections scab can be controlled by seed treatment, but in many cases careful grading will prevent scabby potatoes as well as those affected with wire-worm, white-grub, nematode, and flea-beetle injury from eaching the market.

Other Troubles Cause Rejection. the time of digging than these, often play a role in the rejection of shipments. Among them are brown rot of southern potatoes, and the group of rots associated with fusarium wilt. During the winter the heaviest losses are due to rots which start in wounds inflicted in digging, loading and hauling. These rots, known as fusarium tuber rots, are caused by fungi which live in the soil, and can attack tubers in any sort of break in the skin, whether caused by bruising, fork injury, jamming, freezing, or disease such as late blight tuber rot. These rots progress rapidly in storage and

transit, and cause enormous losses. Freezing due to improper loading or heating of cars is also very con In warm weather, the greatest losses are due to slimy soft rot, which is caused by certain bacteria attacking potato tissue which has been killed by bruising, water-logging of the soil, scalding, freezing, or other causes.

SENIOR AND ADULT TOPIC—Some
Condementals of Falth and Practice.

The method of review will largely be determined by the grade of the school. The primary teacher can use the material which shows love to the Heavenly Father; the junior teacher, that which teaches about God; the intermediate teacher, the marks of a Christian; the senior and adult teacher, the fundamentals of faith and practice. As illustrative of the method for the senior and adult, note the following:

Lesson I. God who was before all things is the cause of all things. The universe came into being by the will and act of the divine personality. Man himself is a creation of God, not an evolution. All things continue to be by the preserving power of God. This great being is the Father of all who belleve on Jesus Christ. We should give him our undivided affection and trust him for food and raiment.

Lesson II. Jesus, the Son of God and Israel's Messiah, is the lamb who bore our sins. Out of God's love be was given, and "whosoever believeth on him shall not perish, but have everasting life."

Lesson III. Jesus Christ rose from the dead. His resurrection guarantees:

The Russian der branch of the former reigning house of Gottorp, sovereigns of the duchies, was personally interested, and took a hand. Russia and England brought pressure to bear and a truce was arranged between Denmark and Prussia while a conference met in October, 1848, at London, to settle the dispute. Denmark demanded that both duchies should be "indissolubly connected" with the Danish crown.

But, harassed by the actions of the confederated council at Frankfort, Prussia desired peace, soon opened direct negotiations with Denmark and another truce was proclaimed on July The rest of Germany, led by Austria, declared this independent action of Prussia a betrayal of the confederation which claimed the duchles as "reichland." a cupful of rich milk, one teaspoonful of corn-starch and the yolks of two eggs, a third of a cupful of sugar until tender, remove the centers, chop and a bit of salt. Pour into a pastry and mix these with butter, chopped shell and bake. Cover with a meringue using the egg whites, or they may be Fill the onlons and pour around them stirred into the mixture just before a little thin cream or rich milk, or any baking.

Filled Rolls.—Cut a slice from the top of the rolls, scoop out the centers and brush with butter, then brown in the oven. Fill with any creamed fish, chicken or vegetable. Sprinkle with parsley and serve.

A most delicious dessert may be made when baking pastry. Reserve a baked shell, which if kept in a dry. cold place will be crisp and good several days later. Fill the shell with sliced strawberries mixed with sugar and heap over the top sweetened whipped cream. Garnish with quarered berries and serve very cold.

Strawberry Bouches.-Cover timbal nolds with a rich biscuit dough and bake, fill while warm with strawberries rushed with sugar, top with the white of egg and brown quickly, or they may be served with whipped cream or spoonful of ice cream as a garnish.

Marmalade Tart.-Fill a pastrylined plate with any desired marmalade-apple or plum are both good. Cover the top with rings of apple cut from a cored and peeled apple. Sprinkle with lemon juice and sugar and bake half an hour. Serve with spoonfuls of whipped cream or cream cheese in each ring of the apple.

Vienna Steak.—Take half a pound each of veni and lean beef; chopped. season well with salt, pepper and onion juice, with a few drops of lemon juice and a grating of nutmeg. Sook over coals or in the broller under gas from eight to ten minutes. Serve with creamed butter and paprika spread over each steak. A very hot frying pan may be used for broiling if it is but lightly greased.
