News Service Extended

The St. Louis Republic recently made arrangements with the cable companies, whereby direct news, from all sections of the civilized world, are received. It now prints more authentic news than any other paper, and continues to keep its record for publishing all the home news. The outlook for this year is bright. Big news events, fast succeeding each other, and they will be highly interesting to everyone. The price of the Republic daily is 25 cents, or \$1.00 for three months. The Twice-a-Week Republic will remain same—two dollar a year, by mail twelve cents a week.

PRESIDENT'S BIRTHDAY

WASHINGTON, D. C., January 29.—President McKinley is celebrating his first birthday in the white house, to-day. The chief executive of the nation is fifty-five years of age. Telegrams of congratulations poured into the executive mansion all the morning, and probably the only sorrowful recollections of the day were occasioned by the fact that he could no longer, as he had done for many years past, spend the afternoon and dice with his venerable mother. President McKinley is about the average age among presidents in the year of their inaugurations.

All the members of the cabinet called at the white house this morning and presented their congratulations. And the ambassadors followed suit. Mrs. McKinley was radiantly happy and received many callers.

WASHINGTON, D. C., January 29.—The president to-day celebrated his fifty-fifth birthday. Very few persons knew of it. When the president arose he found the breakfast table decorated with flowers, and an immense basket of beautiful roses adorned his desk. The president received a number of telegrams from friends in Ohio, New York and elsewhere, to-day.

There must come some better method of branding. Do not put a brand on that part of the hide of an animal which is valuable for leather. The rump brand means a loss to the producer of fifty to seventy-five cents a head, according to the size of the brand, while the side brand depreciates the value of the hide of the animal from seventy-five cents to \$1.50 a head, varying with the extent of the brand used. The hide and leather dealer makes these discriminations on branded hides when purchasing from the slaughterer, and the slaughterer, of course, receives less for his branded animal than for his unbranded one; therefore, the producer depreciates the value of his animal to this extent, or, in other words, pays for the privilege of branding his own property.

John Muir, the leading naturalist of the Pacific slope, says the animal life of Alaska is very abundant and varied. More birds are born in Alaska, he thinks, than in any equal area on the continent, and these include not only song-singing birds, but thrushes and finches that winter in Central America.

While Mr. Edison is about it perhaps he will be good enough to look up some wonderful device which will make it possible for a hungry border to spread his morning toast with the flint-like but of winter time.

WHAT WOMEN NOW NEED

More Red Corpuscles in Their Blood --Paine's Celery Compound.

Miss Frances E. Willard, who has been attending the world's convention of the W. C. T. U., says that better health for women is today a more urgent matter than woman's suffrage.

She says: "What women at present most need is a better supply of red corpuscles." From every section of the country from Maine to California, come well-attested reports of women, bloodless, dyspeptic, nervous, seriously run down, and in many cases so weak as to be bed-ridden, who have been enabled to resume their places in the family circle and in social life—healthy, ruddy, well-cared women, by the aid of that great blood-maker and health-maker, Paine's celery compound.

Mrs. E. A. Ward is one of these fortunate women whom Paine's celery compound has saved from an ailing, unhappy invalid condition, as her letter shows: 213 Michigan Ave., Mason City, Ia. Sept. 12, 1897. Wells & Richardson Co. Gentlemen—My greatest trouble seemed to be a general weakness and all over tired feeling. I am 56 years of age and I did not expect to be ever strong again, but I used four bottles of Paine's celery compound and was greatly strengthened, and my cough seemed better so that I stopped using the remedy and have not since felt the need of any further help whatever. Very respectfully yours, MRS. E. A. WARD.

Persons of large experience among nervous women, who, as a rule, are thin and lack blood, recommend Paine's celery compound as beyond

all question the one remedy that can be depended on to renew the vitality of feeble persons. This settled confidence in Paine's celery compound is not a hearsay belief, but rests in nearly every case on personal use or acquaintance with men or women who have been restored to useful health by no other means. The rapid change for the better in color, flesh and expression of the face is so unmistakable that repair of the wasted tissues might well be called a renewed life.

The process by which Paine's celery compound is able to build up health in the run down body is not hard to understand when one observes how surely it disposes the bowels to act regularly, how it increases the capacity to take and assimilate food, and regulates the nerves all over the body.

The heavy, alarming pain in the back and loins disappears; the great ing painless and loss of flesh is stopped; and a bright, buoyant feeling gradually takes the place of that unending sense of tire and depression. Paine's celery compound is the exact remedy for that large class of feeble, thin blooded, often hysterical persons whose greatest need is a thorough re-furnishing of their blood with the red corpuscles upon which the health and happiness in such large measure depend.

The extraordinary virtue of Paine's celery compound to increase the proportion of red corpuscles in the blood is the source of its great power over all blood diseases, rheumatism, neuralgia, kidney diseases, back aches, loss of flesh and general run-down condition.

OFFICIAL PAPER OF THE CITY.

Calendar for January 1888, showing days of the week and dates.

SATURDAY, EVENING, JAN. 29, 1888.

EDWARD B. CURTIS, an old miner, became interested in spiritualists some time ago. He consulted one, who mapped out a course for him to follow.

JOHN A. DANA, of Worcester, Mass. is now in receipt of a letter which has been traveling fifty-four years. The Yale class of 1844 agreed to start a letter which was to go to each member.

MILAN, Mo., has a most accommodating judge. When he fined Attorney Clapp for contempt the latter indignantly invited him to adjourn court and meet him on an equal footing.

THE native people of New Mexico, says an exchange, live very economically. Some recent statistics show that they can do and do continually live, where provisions are a relic are expensive.

GEN. BOOTH, it is said, is disappointed because he did not succeed in bringing about a union between the Salvation Army and the Volunteers. The masses of the American people will not be disappointed.

THE vastness of the Nicaragua canal project and the interest taken by Americans is shown by the fact that fourteen American engineers are now in Nicaragua making estimates on the cost of construction.

FOR HOMESTEAD SETTLERS.

Forest McKinley, special agent of the land office for the Territory of New Mexico, writes to the Field and Farm, of Denver, that he has frequently been asked, in his official capacity, "where can I obtain land, under the homestead laws, that will enable me to support my family?"

I have before me the map of the Territory and in casting my eye over its surface I see outlined the Sacramento mountains lying between the two counties of Lincoln and Dona Ana. They seem to lift their heads from the immense plain that surrounds them and with their heavily wooded summits beckon to the homeseeker with the encouragement of a happy home and a pleasant life in their midst.

These mountains are known as the garden spot of New Mexico and until very recently have been withheld from settlement on account of the timber but, by a recent departmental decision these lands were opened for settlement and it is with pleasure that I note the number of settlers that are rapidly filling up the Territory.

There are fifteen townships in this tract of land that has been opened for settlement and a large proportion of this land is fit for cultivation. All that is necessary to secure a homestead on this land is to settle on the tract and make a filing with the local land office at Las Cruces, New Mexico. Then the land becomes the property of the farmer, provided, of course, that he complies with the law.

Here is a place where any one can secure a home, and it is no longer necessary for man to rent when he can get all the land that is necessary to support himself and family for the small sum of fifty filing fees. Become your own landlord and own your own farm. What you pay out for rent to keep some other man may as well be applied on your own thing.

A new railroad, the El Paso Northeastern, is now building into this Territory and will open this farming land to such an extent that a good market can be readily reached by the settlers. This road is now building and will be in position to handle freight shortly, and as soon as the section is open by the entry of a railroad it will thus be a question of but a short time when all the land is taken up. Now is the time to strike while the land is open and not wait till it is all gone.

A LITTLE town near Providence, R. I., boasts a church whose pastor, besides being an eloquent preacher, is a man of stalwart proportions. At one of his evening prayer meetings the services were disturbed by two young men, who audibly scoffed at every thing they saw or heard. Finally the pastor remonstrated with them on their behavior, and asked them why they interrupted the meeting.

Commissioner Leeson Enthusiastic Over the Outlook.

From the Omaha Bee. J. J. Leeson, of New Mexico, a member of the exposition commission, appointed by Governor Otero, arrived in Omaha, this morning, to make arrangements for space for New Mexico's exhibit. By some misunderstanding ex Governor Prince arrived before him and returned to his home.

In addition to the \$1,500 appropriated by the legislature for an exhibit, Mr. Leeson says the counties will contribute between \$5,000 and \$6,000 to the fund for an exhibit, and the state board of immigration will contribute about \$5,500. New Mexico's display will include exhibits showing the agricultural, horticultural, educational and historical resources of the Territory.

Mr. Leeson is somewhat of an enthusiast in the collection of specimens of minerals and has a private collection which weighs twenty-four tons. He says he will send this as a part of the state exhibit. He also says that the historical portion of the exhibit which will be made will be very interesting.

A Fearful Experience

A POSTMASTER LOSES THE USE OF HIS LEGS AND ARMS.

Edwin R. Tripp, of Middlefield Center, Meets with a Hazardous Encounter Which Renders Him Helpless.

From the Chicago Republican, Cooperstown, N. Y.

Mr. Edwin R. Tripp, the postmaster at Middlefield Center, N. Y., recently had a dangerous experience which left him in a helpless state. His system was so much shattered that it was feared he might never recover.

In an interview with a reporter of the Republican, regarding this experience which had attracted considerable attention, Mr. Tripp stated: "In March, 1892, I was taken with what I afterward learned was locomotor ataxia, and was unable to walk, and I kept getting worse until I lost the use of my arms. I doctored with two skillful doctors but received no benefit, and also used a galvanic battery but kept getting worse and the doctors told me they could do no more.

OUR PUBLIC SCHOOLS.

On last Wednesday night, the finance committee met in Secretary Reid's office, to complete the work of getting circulars ready to send out to the parents next week. Had the taxes been paid up as well during former years as they have the present year, this work of the committee would probably not have been necessary. But a condition, and not a theory, confronts the board of education. And after due consideration it has been decided to continue the schools through April and May on private tuition.

As only those whose tuition may be arranged for can attend school after the first of April, it is hoped that there may be many that will not only pay tuition for their own children, but will also help some worthy ones who desire to go to school but have not the means. This will appear all the more necessary when it is remembered that in the past, only those who have been able to be promoted who have conformed in school to the end of the year, and many of those who continued to the end of the year but were irregular in attendance, and careless about their work, were also unable to complete the required work.

Three things are essential to the successful pupil: Regular attendance, devotion to school duties, and to be faithful to the end of school. As a rule the pupil who conforms to the above three points never has a complaint to make.

The other day a parent was finding fault with a teacher and said his child was doing no good. A reference to the daily register exhibited the record of the child. The child had been in school only about one half of the time. Those parents who think their children are smart enough to stay out of school two days in the week and still keep up in the grade, are always disappointed in the end, and then look around to find some one on whom to lay the blame. That there is no excellence without great labor, is just as evident now as it was when the first philosopher uttered it.

The Peddie Thacker trial. The trial of the Territory of New Mexico vs. Eustaquio Padilla, charged with the murder of Faustino Ortiz in the spring of 1923, still occupies the attention of the Territorial district court, to the exclusion of all other business, says the Santa Fe paper yesterday.

The attorneys for the defense called the defendant, presumably their last witness, to the stand, yesterday morning, and, on direct examination, generally and in detail, he denied the truth of the several statements made in the confession of Jose Amado Martinez.

As the papers report closed, Padilla was being subjected to a searching cross-examination by the attorneys for the Territory. It has already been shown that his direct testimony now conflicts in essential respects with the evidence he gave at the trial of the late Juan Ortiz y Rodriguez, who was acquitted several years ago of the murder of Eustasio Padilla. It is understood that several witnesses will be examined by the respective sides in rebuttal and it is probable that the case will not be confined to the jury before Tuesday of next week.

RAILROAD RUMBLINGS.

The morning mail train arrived at 9:50 or nearly six hours behind time. H. S. Patrick, stenographer to Chief Engineer Jas. Dun, went south, on No. 1. Jim Connor, a conductor south of Albuquerque, passed through for home, to-day, after a week's confinement at that now all too populous resort.

Zack Potts was down from the hospital, to-day, after a week's confinement at that now all too populous resort.

Chief Clerk Fleish, of F. O. Blood's office, was at the train, this morning, to see his mother-in-law, Mrs. B. Patonau, leave for Topeka.

Conductor Dick Davidson, who had been serving, in Topeka, on the grievance committee of the B. of R. T., reached home, this afternoon.

Conductor Charley Oler returned from Topeka, to-day. When he reached home, he did not know his own overcoat. This is worthy of remark in a man who had been absent for thirty days.

Dr. Shuler, of Raton, is making heavy raids upon the force in the roundhouse there, these cold days. Three employes were sent to the hospital here Monday, with rheumatism, and one with an injured back.

F. M. Carter, for the past two years yard master at Sedalia, Mo., for the M. K. & T., resigned his position there to accept a conductorship on the Santa Fe Pacific at Winslow, Arizona. Mr. Carter, who has charge on account of his wife's health, which has already been greatly benefited.

During the year 1927 there were thirty hold-ups of railroad trains in the United States. Three of the robbers were killed and two shot, and two passengers and train men were killed and five shot. Since 1890, 213 trains have been held up, seventy-eight passengers and train men killed and sixty-seven injured.

The general grievance committee of the order of railway conductors, on the Santa Fe system, has compiled its labor at Topeka, by electing the following officers for the ensuing two years: General chairman, John C. Ramsey, Chanute; vice chairman, John C. King, Raton, N. M.; secretary, Wm. Simpson, Argentine.

Chief Engineer Dunn, of the Santa Fe, has gone down to the Johnson tunnel, which has recently caused so much trouble to the Santa Fe trains. He will see whether the tunnel can be repaired, whether it should be converted into a cut, or whether a new route should be selected. The last fire in the tunnel was caused by the lime which the first fire made of the limestone, being slacked by a seepage through the rocks.

The funeral of Frank J. Garrett, who remains accompanied by Mrs. Garrett, were brought to Albuquerque from Kirksville, Mo., for burial, took place at 2 o'clock yesterday afternoon at M. J. Oler's undertaking parlors. Rev. Mr. Beattie conducted the funeral services. The deceased was a member of the brotherhood of locomotive engineers, and carried \$1,500 insurance in the Mutual Life insurance company of Ohio.

The joint grievance committee of the O. R. C. and B. of R. T. have waited on General Superintendent Mudge, to secure definite constructions on several of the rules in regard to computing time, under the present schedule, which shall be agreeable to the employes. The grievance committee have suffered much injustice, in the past, at the hands of division officials, for the reason that there was no general interpretation of several of the rules, relating to time and rates.

The American builders of locomotives, both steam and electric, are having a boom in business. In addition to the heavy orders for engines for China and Japan, and from several localities in Europe and South America, the General Electric company of Schenectady, N. Y., has just received an order for thirty-two electric locomotives for the Central London underground rail road, which it was understood would be built in England. The same company has orders for the largest direct current, railway generator ever made in the world, having 4,000 horse-power, and for thirty-six 175 horse-power motors for the Metropolitan elevated, of Chicago.
