NOT THAT KIND OF TIES.

Youth Unaware of Nature of Job He
Asked For.

About 20 years ago, when I was in
Spokane, Wash., a young fellow was
sent there from Boston by his father
for his health, and, incidentally, to
make his fortune, says a writer in the
Boston Herald. He worked at his
trade as a tailor for his health and
gambled for his fortune. Needless to
say, he lost both, for, at that age, he
being about 19, he was a delicate
youth.

His money and job giving out about
the same time, he looked around for
something to do. Chancing to pass
an employment office, he saw on the
blackboard, "Tie-makers wanted, 12 1/2
cents a piece." He walked in, and ad-
dressed himself to the man behind the
desk, a big, raw-boned specimen, with
a fierce mustache.

"I see you want tie-makers, sir," he
said.

"Yes, we do, sonny; but don't you
think you are rather too light for the
job?"

"Oh, no," replied the young man.

"I can sew."

"Sew," the other roared. "Why,
great Scott! kid, these are railroad
ties!"

Excuse of Election Judge Blown Away
by Investigator.

In recalling incidents connected
with Virginia politics some years ago
a prominent Virginian recently re-
lated an account of an investigation
of election frauds in the lower sec-
tion of the state. In the course of
the proceedings it developed that the
ballots in an important precinct had
not been sealed after the final count,
thereby being exposed to fraudulent
practices. The chairman of the inves-
tigating committee closely questioned
the election judge as to why the pre-
scribed duty of carefully securing the
ballots had been neglected.

"Could you not obtain any mullage
in the town?"

"No, sir."

"Could you not procure some seal-
ing wax, some shoemaker's wax, if
nothing else?"

"No, sir."

"Well, then, sir, why didn't you
go out into the woods and get some
resin? Do you mean to tell me that
there were no pine trees around there
shedding tears at your infamous ras-
cality?"

Geese Make Good Actors.

A farmer would scarcely believe
that a goose requires only about 60
hours in order to prepare it for the
footlights and a critical audience, and
that a common pig, which has been
bought in the market, will in 30 hours
be competent to blossom forth as an
actor. According to Mr. Clyde Pow-
ers, a trainer of wide experience and
much patience, it takes a duck about
three days to learn how to march on
the stage, to follow the chorus, and to
march off again at the proper time; it
takes a chicken a week or more, and a
turkey cannot grasp the art of acting
before six months' time. Mr. Powers
has tried to train a peafowl, but he
finds that it is impossible. A goose
is the most intelligent of all the feath-
ered tribe, and a goose is also the
only one of the domestic fowls that
shows affection.—Hein Grant in Los-
elle's Weekly.

Tame Beaver in Canada.

In Manitoba the beaver is protected
by law from either being shot or
trapped, and the protection results in
increase. Colonies of the animals can
now be found both on the Ochre and
Turtle rivers, to the east of Dauphin.
One colony has started building a
dam on the Ochre river at the railway
bridge near the village. So tame have
the animals become that it is a com-
mon thing for the residents to visit
the locality in the evening and watch
the industrious animals at work. In
one or two cases the work of the
beaver in damming the Turtle river
has proved a loss to farmers in the
vicinity by their land being flooded
and the water overflowing it. The
matter was laid before the govern-
ment in Winnipeg by parties interest-
ed, and permission obtained to open
the dams, but not to molest the ani-
mals. As the beaver increases rapid-
ly, the government is likely to have
another problem on its hands to
solve before a great while.

When Will War End?

In the time of Christ the people
asked for a sign, and were rebuked
by Him for such foolishness. In times
of stress like these, the tendency is
to hark back to the superstitions of
ancient days. Old prophecies, and
alleged old prophecies, are resurrected,
the Bible is searched and construed
in order to find something upon which
to base a guess of when peace will be
restored. The following is figured
out by the Pittsburgh Gazette-Times
and, to say the least, is interesting:

Money Not Tied Up.

There seems to be an idea by some that money invested in a Liberty Loan Bond is going to be tied up for fifteen or thirty years. This belief is not warranted. Probably no property in the world outside of actual money or currency will have a wider and more ready and constant cash market than the Liberty Loan Bond.

There will be a constant demand made for them from many sources. They are good security for loans from the Federal reserve banks; courts have decided that they are legal investments and proper for trust funds; they are legal investments for insurance companies and other corporations whose investments are supervised and regulated by law; their international character (being issued for international purpose and guaranteed in part by our European allies) gives them an international status and market. They will be sought for in India, Egypt, Japan and Russia, England and France, Italy and Austria, and in fact wherever a government bond has a market.

They have been truly called the premier security of the world.

sent the heads of all the allied governments which have participated actively in the war against the central powers. The half of 1884 is 1917, or the year in which we live. Just why it should be argued that because of these coincidents the war will end in 1917 is a bit hard to figure.

Stunner for the Manager—When Manager Henderson was in possession of a certain metropolitan theater a would-be patron, obviously well bred, but rather too well primed by stimulant, called at the box office and demanded an orchestra seat. His wish was regretfully declined. But he wanted a more precise reason, which was not forthcoming, and at last Manager Henderson was summoned. Pressed for the reason of his refusal, the latter finally said: "Well, if you must know, it is because you are drunk!" Unabashed, the visitor replied: "Why, of course I'm drunk! D'ye think I'd—hic—come to your—hic—blessed theater if I wasn't drunk?"

Strenuous Treatment of Children. A Milwaukee physician, Dr. John E. Jordan, has adopted this strenuous treatment to prepare his babies for the rigors of life, and as to the present his methods have been abundantly justified by their success, says an article in Good Health for October. His little daughters, Shirley and Jane, aged respectively eight and three years, are two of the firmest and healthiest bits of humanity, to whom disease of all kinds is unknown. During the cold weather these children may be seen barefooted and bareheaded, clad only in their cotton garments, thoroughly enjoying the romp in the snowdrifts, and without a goose draple on their skin.

Pains, Dizzy Spells

Mrs. G. P. Cartwright, of Whitwell, Tenn., writes: "I suffered with bearing-down pains. . . The dizzy spells got so bad that when I would start to walk, I would just pretty nearly fall. Was very much run-down. I told my husband I thought Cardui would help me. . . He got me a bottle. . . It helped me so much that he got me another bottle. I got a whole lot better. The dizzy spells and the bearing-down pains . . . left me entirely."

SAVAGE

Walter Winans, Esq. The most famous shot in Europe, with hand and shoulder arms.

Two World's Records in One Day
(with the .22 Savage Hi-Power)

At the Bisley Matches of the British National Rifle Association—the biggest rifle match in the world—the .22 Savage Hi-Power rifle and Savage ammunition in the hands of Mr. Walter Winans on July 25, 1914 made the highest possible score on the Running Deer target—six straight 5's. This is a World's record.

On the same day, with the same rifle and ammunition, Mr. Winans made the highest possible score on the Running Wild Boar target—six straight 5's. Another World's record.

This merely clinches what other shooters have proved—that the Imp's wonderful accuracy (25 consecutive shots in a 20-inch circle at 500 yards), tremendous velocity (2800 feet—more than half a mile—a second), long point blank range (200-yard trajectory less than three inches), and trifling recoil (4.6 foot-pounds) make it easier to hit moving game with than any other rifle.

And it has killed Alaskan Brown Bear, Grizzly, Buffalo, and man-eating tiger, besides the deer and black bear it was originally designed for.

Write us for particulars about "the biggest little gun in the world."

HILLSBORO

Mr. and Mrs. Jas. Hiler returned from El Paso Sunday.

P. J. Ward, federal agent for the Santa Fe system, was a Hillsboro visitor yesterday.

Mrs. A. M. Gillespie and children have returned home after an absence of several months in Texas.

Patricio Lopez, of Las Cruces, is in Hillsboro. Mr. Lopez is district manager of the Fernald Aid Union of Kansas.

Mrs. E. J. Capell and little daughter Nona May, of Winslow, Arizona, are the guests of Mr. and Mrs. Harry Benson.

D. P. Crawford, the genial representative of the Western Newspaper Union, of Denver, was a pleasant caller yesterday.

Mrs. C. M. Howells, trained nurse, formerly of Kingston, is taking care of Joseph Evers who accidentally shot himself through the foot some time ago.

E. V. Van Dieman, manager of the Las Animas Peak Gold mines at Andrews, suffered the loss of one of his toes yesterday which was badly infected and had troubled him for some time. Dr. J. O. Hatcher performed the operation.

Sheriff Bojorquez and Deputy Bob Richardson returned from Engle last night with two men named Pitts and Townsley who recently escaped from the penitentiary at Florence, Arizona.

We are in receipt of a letter from Frank B. Pitcher, of Los Angeles, California, telling of the death of C. H. Cady and E. M. Magner, the former passed away some five months ago, and the latter about a year ago. Both were early residents of Chloride; Mr. Cady was a mining partner of the late Charles A. Canfield in the early 80's. Mr. Pitcher is one of the real pioneer prospectors of the Black Range, having operated in the mining camps of Chloride, Kingston and Hillsboro. He is one of the original locators of the Snake mine and other mining properties in this district.

Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

CLAY EQUAL TO EMERGENCY.

How "Great Commoner" Satisfied
Disgruntled Constituent.

One of the best stories told of Henry Clay relates to his dealing with an old Kentucky mountaineer who asserted the "great commoner" after one of his speeches and said: "Well, Henry, I have always voted for you before, but I can't do it this time." "Why, now, what's the trouble?" asked Clay. "I don't like your vote on the bank bill," replied Tom. "Is that all; I have suited you generally, have I not?" "Oh, yes, always but that time, but I don't like that vote." "You think I was honest in giving it, don't you?" "Yes, but you made a mistake." "Say, Tom, you are a hunter, and sometimes your gun misses fire; what do you do then—throw it away." "No, I just pick the flint and try it again." "Of course you do, Tom, and all I ask of you is to treat me as well as you do your old gun. Will you not do it?" "Yes, by thunder, Henry, I will! I'll try you again."

Catarrh means inflammation. Inflammation is the stagnation of blood—the gorging of the circulation with impure blood. Of course you can't be well under this condition. It means, headaches, indigestion, kidney trouble, coughs, colds, etc.

Peruna By assisting nutrition increases the circulation, invigorates the system, removes the waste matter and brightens you up.

Over 44 Years

Of service to the public entitles it to a place with you.

Child-Training.
It is not fair to a small child for the parents or nurse to be careless about the little things that develop thoughtfulness, self-reliance and self-control in a child. Self-control is a characteristic absolutely essential to manhood or womanhood, and it is not learned in a day. It is the result of patient teaching and training through all the long years of babyhood and childhood.

Thought His Duty Ended.
The Duc de Raguse once explained to the Countess de Boigne the nature of his connection with the emperor as follows: "When the emperor said, 'All for France,' I served with enthusiasm; when he said, 'France and I,' I served with obedience; but when he said, 'I without France,' I felt the necessity of separating from him."

Didn't Appreciate Whitman.
Shortly after Walt Whitman's "Leaves of Grass" made its appearance, J. T. Trowbridge was walking with Lowell in Cambridge, when the latter pointed out a door-way sign, "Groceries," with the letters set zig-zag, to produce a bizarre effect. "That," said he, "is Walt Whitman—with very common goods inside."

Yield of a Grain of Wheat.
Very few people have an idea of the bounty of nature. A scientist of Cambridge, Eng., recently made an instructive experiment which showed that a single grain of wheat sown in June, produced 47 pounds 7 ounces. One acre of fairly good land will produce 30 bushels of wheat or 1,200 pounds of flour.

Nicaraguan "Capote."
Instead of raincoats, the Nicaraguan wears a "capote," which is a piece of impervious material almost square, with a hole in the center large enough for the wearer to put his head through. It is made by pouring rubber over unbleached muslin.

Always There.
A New York theatrical man is advertising for the most beautiful woman in the world, as if every musical show press agent didn't claim that she was in the front row of the chorus.—Detroit Free Press.

Motor Car Jumps Three Feet.
A motor car with six occupants dashed up to a drawbridge at Haddiscoe, Norfolk, just as it was being closed, and safely leaped across a space of three feet between the two leaves.—London Mail.

Proof to the Contrary.
Understand that a number of women used to smoke cigars, as observed by an observer. "I don't," replied Mr. Meekton. "The cigars women buy nobody could smoke."

To Remove Varnish.
Three tablespoonfuls of baking soda in a quart of water, applied with a rough cloth, will remove the old varnish very easily when you wish to revarnish furniture.—Woman's Home Companion.

Whale Cast on Coast.
A whale, weighing five tons, was beached recently on the Berkwickshire (Scotland) coast. The monster had evidently been run down by a steamer, and was cast up by the tide.

GOATLESS SOLDIERS.
Coats no longer will form part of the uniform of United States troops in the future. The war department has decided that the light sweater will be just as good as a more practical one than the present service coat. Not only will the sweater be worn when the men are up and about, but it will be used also to supplement the blanket as a sleeping garment. However, this does not mean that the soldier will not be as "dressed up" in appearance, when parading, as heretofore. It is ordered that the sweater is for use only in the field, around camp and on the march when the weather is too cold to make the flannel shirt alone sufficiently warm.

Agriculture Forest Service THE SIX RULES

For Care With Fire in the Mountains.

If every member of the public strictly observe these simple rules, the great annual loss by Forest Fires would be reduced to a minimum.

1.—Be sure your match is out before you throw it away.

2.—Knock out your pipe ashes or throw your cigar or cigarette stump where there is nothing to catch fire.

3.—Don't build a camp fire any larger than is absolutely necessary. Never leave it even for a short time without putting it OUT with water or earth.

4.—Don't build a camp fire against a tree or log. Build a small one where you can scrape away the needles, leaves or grass from all sides of it.

5. Don't build bon fires
The wind may come at any time and start a fire you cannot control.

6.—If you discover a fire out it out if possible; if you can't, get word of it to the nearest U. S. Forest Ranger or State fire Warden just as quickly as you possibly can.

SIERRA COUNTY

NEW MEXICO

Is Situated in a

Semi-Tropical Climate

and is noted for its

Health, Wealth and Beauty

Its Cattle Ranges

are unequalled. They are the natural home of all range stock. Cattle, Horses, Sheep and Goats thrive vigorously throughout the year.

Also its Rich Mines

GOLD, SILVER, COPPER
LEAD, IRON AND ZINC

Its Mineral Resources

are inexhaustive and practically unexplored and presents an excellent field for the prospector and capitalist. Such portions of the mineral zones that have been unexplored in the past are now being opened up with gratifying results and rich mines are being developed. Large reduction works are now in course of construction and capitalists are now anxious to invest in Sierra County Mining.
