CENTER MOVES EAST.

CENSUS EXPERTS SEE CHANGE IN POPULATION.

Authorities Declare That Increase in Eastern Cities Has Offset Growth in Territory of the West.

Washington.—Population experts of the census bureau are inclined to the belief that the center of population of the United States, which has traveled westward steadily since the foundation of the republic, has turned and is now headed eastward. If this is true, the fact is of interest as indicating that the movement of population toward the east and southeast is greater than the movement toward the west. It is expected that censuses to be taken in a dozen states during May and June will throw light on the present location of the center of population, which the census of 1900 placed six miles southeast of Columbus, Ind.

The year 1905 is just half-way between two national census periods, and there is curiosity which cannot be accurately satisfied as to how far and in what direction the center of population has gone since its location was last established five years ago and how far and in what direction it will continue to go during the next five years. Because of the increase of population in eastern cities, especially New York and a steady trend of growth in the southeastern Atlantic seaboard states the population experts have formed the opinion that if there is a westward movement of the center it is very slight, and that if its direction has not been reversed there is a possibility that it will be before the end of the present decade. The only fact which they find to combat this theory is the rapid growth of population in the state of Washington, which offsets a much larger growth in the eastern states.

The tendency toward reversal of the direction of the center of population was noted in the decade between 1890 and 1900. It then moved westward only a little over 14 miles, which is the smallest movement that ever has been noted. The course until possibly within the last year or two has been uniformly westward, clinging closely to the 39th parallel of latitude. Starting in 1790, 23 miles east of Baltimore it traveled 41 miles in the decade from 1790 until 1800; 36 miles in the decade from 1800 to 1810; 50 miles from 1810 to 1820; 39 miles from 1820 to 1830; 55 miles from 1830 to 1840; 55 miles from 1840 to 1850; 81 miles from 1850 to 1860; 42 miles from 1860 to 1870; 58 miles from 1870 to 1880; 48 miles from 1880 to 1890, and 14 miles from 1890 to 1900. This is a total continuous westward movement of 519 miles since 1790.

THE REAL "YELLOW PERIL."

Napoleon Had the Cossacks in Mind When He Warned Europe Against Russia.

Last winter, when, among those of the Russians who were not hoping for war and the defeat of their own country, I inquired the grounds for their contemptuous underestimate of the Japanese, I scarcely ever got for reply more than the citation of Russia's 130,000,000 of population, her possession of one-seventh of the dry land of the earth and the Cossacks. The discussion usually closed with the assertion: "One Cossack can whip ten of those little yellow monkeys."

This faith, writes David B. MacGowan, in "The Cossacks," in Century, is based partly on the impression which the Cossacks made upon western Europe as long ago as the Seven Year's war, and which was heightened by their disorganization of Napoleon's retreat from Moscow. Napoleon himself pronounced them perfect masters of partisan warfare, furious in attack and impossible to reach, and said that he did not remember having made a prisoner of a single one of them. Finally, he had the Cossacks in mind when he warned Europe that, unless checked by such a powerful unit as he had sought to construct, Russia would enslave the world. That Napoleon's prediction has not been forgotten may be inferred from the recent assertion in various quarters that the real "yellow peril" is the possibility of the organization of the Mongolian races by Russia, and that a Slavic Jenghiz Khan may direct a new Golden Horde against the west.

The Sierra County Advocate is entered at the Post Office at Hillsboro, Sierra County, New Mexico, for transmission through the U. S. Mails, as second class matter.

FRIDAY, JULY 14, 1905.

Thomas W. Lawson in his speech at Ottawa, Kansas, in discussing the trust evil said: "What are you going to do about it? How shall it be ended? What are ballots against dollars? and 'the system' has unlimited dollars. With \$5,000,000 I saw H. H. Rogers rob that able, fearless, and honest, but all-wrong-on-the-money-question, William Jennings Bryan, of the presidency of the United States in 1896. Do you imagine that he would shrink from repeating the operation in 1908 if he feared the man you nominate would upset his control?"

Mr. Lawson has hit the robbing trusts some staggering blows, but he seems to have lost sight of the reason and powder that put the big thieving trusts in the saddle and who are now running down the people free handed. When such men as Rogers threw their millions into the campaign of '96 and defeated Mr. Bryan and established the gold standard it was for the benefit of the money trust—the king of trusts. In the next presidential campaign Mr. Rogers and his friends will spend untold millions to defeat any formidable candidate who in opposition to their individual interests. Yet, after being authority for the statement that Mr. Rogers alone spent \$5,000,000 to defeat Mr. Bryan, has the audacity to say that Mr. Bryan "is all-wrong-on-the-money-question" If, according to Mr. Lawson, Mr. Bryan is "is all wrong on the money question," Why did Mr. Rogers spend his millions to defeat Mr. Bryan? The election of Bryan meant the remonetization of silver that would have checked the piracy of the money trust—the great banking institutions. To fetter the piracy of the trusts—a crime which Mr. Lawson is, or pretends to be fighting—was obnoxious to Mr. Rogers and he spent five millions to defeat Mr. Bryan. If Mr. Lawson is sincere in his fight against the trust robbers we fell sorry for him in his shortsightedness and not being able to grasp the proper idea of what created the power of the money sharks that he now so vehemently denounces.

Jose Zamora 96 years of age has filed on a homestead in Colfax county.

Owing to pressing business at home the Czar of Russia will not attend the Portland exposition.

John Allison was found dead near Springer. He was standing in an upright position between the wheels of his buggy with his chin resting on the end of the seat.

Ernest Saunders a X SX cow boy on the Upper Gila was probably fatally hurt by a horse falling upon him.

To John Ryan, deceased, his heirs, administrators and assigns and all persons claiming under or through him or them, and to all whom it may concern:
You and each of you are hereby notified that the undersigned have expended the sum of \$100 during the year 1904 in labor and improvements upon the Ranger mine or mining claim situated in the Las Animas Mining District, Sierra County, New Mexico, in order to hold such premises under the

In the good old days the sexton announced a death in the community by a stroke on the church bell for every year of the life that was gone. People expected, then, to live to old age, and speculation at the first tap of the bell took a narrow range including only those who had lived the allotted time. There is no reason why people should not have the same expectancy of age to day, except for the neglect and abuse of the one organ on which all the other organs depend—the stomach. Dr. Pierce's Golden Medical Discovery enables men and women to be strong and healthy, by curing diseases of the stomach (and other organs of digestion and nutrition), which prevent the proper nourishment of the body.

"I had been sick for two years with indigestion and nervous debility, and had taken medicine from my family doctor for a long time without much benefit," writes Mrs. W. H. Peebles, of Lucknow, S. C. "Was induced by my husband to consult Dr. Pierce by letter. You advised me to take 'Golden Medical Discovery' and 'Favorite Prescription,' which I did, and to my great surprise, after taking six bottles I was cured." The Medical Adviser, in paper covers, is sent free for 21 one-cent stamps to pay expense of mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

provisions of Section 2324, revised statutes of the United States, and if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as co-owner, together with the cost of this publication, the interest of John Ryan, deceased, and of his heirs, administrators or assigns in said mining claim, will become the property of the undersigned under the provisions of said Section 2324.

FRIDAY, JULY 4, 1905.

LOCAL NEWS.

The weather continues dry and hot.

Al. Shepard has put up a new Samson wind-mill at his residence.

A ball was given in honor of Judge Parker at Socorro last week.

Several of our citizens contemplate going to the Portland exposition.

A young cyclone visited Ringer's ranch last Monday night and blew down a wind mill.

John Anderson, who was laid up with diphtheria, is again behind the butcher's block.

Mrs. Jean Stauffer and little daughters came in from the Hopewell ranch Wednesday.

President John Moffitt of the Moffitt Mining & Milling company spent yesterday in Hillsboro.

J. C. Plimmons went to Hermosa this week to start up work on the Palomas Chief mine.

A cobbler from Lincoln has opened up business in the Kasser building next to Hart's store.

Frank Morris has opened a blacksmith shop in the Kasser place opposite the jail. See his ad.

The dyke has been completed and the town is safe from floods, provided, however, the floods are not too large.

Yesterday Bob Reed brought in the pelts of two mountain lions which he killed in Sawpit gulch near Kingston. One of the beasts measured over eight feet.

It is reported that a valuable gold discovery has been made in the San Mateo Mountains. The lucky discoverer is P. C. Bell and the claim is located near San Mateo peak.

Mr. S. F. Malette, Mr. Walter Malette and M. John A. Henry, of Chicago, arrived here last Friday. The three gentlemen are the principal owners of the Wicks mine which they are investigating.

Dr. Brown, dentist, of El Paso, arrived here last Friday and has had a busy week of it with headquarters in Dr. Given's office. In a few days the Dr. will go with H. A. Ringer on a bar hunting trip.

The Santa Fe railroad company have agreed with the Territorial Fair Association to make a rate of 1 1/2 cents per mile both directions from all points on their lines in Colorado, New Mexico and Arizona to Albuquerque, from Sept. 17 to 25, which takes in the week of the fair, which is much less than a 1/2 half fare rate.

According to the Socorro Chief, the editors of the El Defensor have been arrested for libeling Judge Parker. The Chief says: "The action is brought by District Attorney Elfrago Baos and is based on a clause of an article in yesterday's issue of the El Defensor del Pueblo, which clause says in effect that if the Chief says in effect that if the Chief is scandalized by the sentences of the court, it ought to seek information from the lawyers, the judge, etc., and it will be convinced of bribery and political intrigues to condemn or to save criminals, not by the verdicts of juries but by other means with which the partisan Chief is well acquainted."

Mrs. M. Armer, breeder of thorough bred Angora goats, with fanges in Sierra county, will make

an exhibit of goats at the fall territorial fair. In a letter to Secretary Sellers, of the fair, Mrs. Armer says: "Angoras do fine in New Mexico and if the people would take more interest in them, this territory can be first in Angoras. Our climate produces extra mohair and great length with care." Pasha Columbia, the first prize buck at the great show at Kansas City and the head of Mrs. Armer's flock, will be brought to Albuquerque among those to be exhibited at the fair.—Albuquerque Citizen.

Sierra County's Annual Normal Institute.

Teachers of Sierra County are hereby notified that the Annual Normal Institute will begin on the 14th of August and will be in session two weeks. Any person who wishes to teach in this county is compelled by law to attend same institute. No third-class certificates from other counties in the territory or diplomas from outside the territory will be recognized. Examinations will take place August 25th and 26th.

F. LUNA Y GARCIA, Supt. of Schools.
H. A. WOLFORD, Instructor.

The new wild animal bounty law passed by the last legislature says: "That each applicant must present the entire skin of each gray wolf, lobo, panther, bear or mountain lion to the probate clerk and ex-officio clerk of the board of county commissioners, as now provided by law, to be properly cancelled before his claim can be filed. Said skins to be cancelled in such manner as not to destroy their marketable value, and when cancelled to be returned to the owner."

NEVER DISSAPPOINTS—"Many extensively advertised remedies are failures when put up to the test. Hunts Lightning Oil is an exception. Confidence in it is never misplaced—disappointment never follows its use. It is certainly the greatest emergency remedy now obtainable. For cuts, burns, aches, sprains and pains I know no equal. Geo. E. Paddock, Doniphan, Mo. For sale at P. O. Drug Store.

The territorial fair association has contracted with an eastern manufacturer for one ton of red fire and by an arrangement now planned proposes to keep the streets of Albuquerque aglow every evening during fair week from 8 to 11 o'clock. It is also their intention to set off 500 pounds, at one time, on the top of the Sandias mountains and other distances from Albuquerque on some night during the fair, the reflection of which probably will be seen from Rincon to Las Vegas north and south, and from Gallup to Santa Rosa, east and west.

SAVED HIM—"It didn't kill me, but I think it would if it had not been for Hunts Cure. I was tired, miserable and well nigh used up when I commenced using it for an old and severe case of eczema.

One application relieved and one box cured me. I believe Hunt's Cure will cure any form of itching known to mankind." Clifton Lawrence, Helena, O. T. For sale at P. O. Drug Store.

The Territorial Fair management are this year offering a purse of \$200 for a cow-boy relay race, all horses to be actual cow ponies, the saddle and rider not to weigh less than 155 pounds. A number of strings of five horses each have already been made up, and as the result of a large purse offered, promises to be the biggest relay race ever held in the west. Each rider will change horses every mile, and for rough riding, the race will in all probability excel anything of the kind ever pulled off in Albuquerque.

TAKES HOLD AND LIFTS UP—"If you wish to grow fat, strong and healthy, get rid of the impurities in your system by using Simmons' Sarsaparilla. It lifts you up—keeps you well, and makes the old world look cheerful.—For sale at P. O. Drug Store.

The exhibition of Indian past times and cow-boy sports at the coming Territorial Fair, this year, promises to be the best ever given in New Mexico. Col. Greer, president of the association, has volunteered to bring several car loads of out law horses and a big bunch of cow boys from his southern New Mexico ranches to do the real thing at this time.

CHIGGERS AND MOSQUITOES are now in their glory—their business is good and they are happy. There is no earthly use of letting them chew on you, however, if you don't like their ways. A little Hunt's Lightning Oil applied to exposed parts will keep them off, and immediately relieves the irritation caused by their bites. Rub a little on and see for yourself. For sale at P. O. Drug Store.

A CULINARY COLLECTION.

Some New Recipes for Dishes That Are Palatable and Seasonable.

To make coconut pudding, take three ounces of butter, one-half pound grated coconut, one cupful and a half of stale sponge cakes crumbled fine, three ounces sugar, one large cupful of milk, six eggs, one-half teaspoonful of vanilla or rose-water, says the New York Post. Cream the butter and sugar, and add the beaten yolks; when these are well mixed put in the coconut; stir well before adding the milk, cake crumbs, and flavoring; lastly, add the whites of three eggs. Pour the mixture into a pie dish—which should not be quite full—and bake for half an hour. At the end of this time whip the other whites to a very stiff froth, with three tablespoonfuls of white sugar, and flavor with vanilla. Pile this in large spoonfuls on the pudding, and close the oven till it is slightly brown. For all meringues the oven should be only moderately hot, or they will burn. These quantities are sufficient for a large pudding.

For gooseberry pudding, which is also a delicious dessert for this season, take one pint of gooseberries, one teacupful of milk, one-half teacupful sugar, one tablespoonful of butter (melted), toasted bread. Stew the gooseberries gently in a little water for about ten minutes. Cut some slices of bread, trim off the crust, and toast it to a slight brown. Dip each slice, while hot, into the milk, and spread it with the melted butter. Cover the bottom of the dish with them; next put a layer of gooseberries, sprinkled well with sugar, and so on, till the dish is full. Cover closely, and steam in a moderate oven for 20 or 25 minutes; then remove the cover, and let it brown before serving. Serve with good pudding sauce, if liked.

Those persons who have never tried whirled eggs will find the following receipt worth experimenting with: Take six eggs, one quart boiling water, some thin slices of buttered toast, pepper and salt to taste, a tablespoonful of butter. Put the water, slightly salted, in a saucepan over the fire, and keep it at a fast boil. Stir with a wooden spoon or handle in one direction until it whirls rapidly. Break the eggs, one at a time, into a cup, and drop each carefully into the center or vortex of the boiling whirlpool, which must be kept in rapid motion until the egg is a soft, round ball. Take it out carefully with a perforated spoon, and put it on a slice of buttered toast laid upon a hot dish. Put a bit of butter on the top, set the dish in the oven to keep it warm, and proceed in the same way with each egg, having but one at a time in the saucepan. When all are done, dust lightly with salt and pepper, and send up hot.

TO PUT A TAX ON CATS.

English Proposal to Raise Money by Elevating Social Standing of the Felines.

Just as the returns for the quarter ended June 30, showing a decrease in British revenue of over £2,500,000, were issued, a large meeting held in London under the presidency of a dignitary of the Church of England, pointed out to the chancellor of the exchequer a new source of revenue. The meeting decided that it would be advisable to tax cats half a crown a head.

This, it was estimated, would produce £500,000 yearly, and, while reducing the number of cats in England, would elevate their social standing by removing the stigma of cheapness.

Our Trade in Argentina.
Americans appear to be doing some trade in Argentina, says the Mexican Herald. The agent of an American plow company went there in 1899 and sold 40 plows; last year he sold 7,000. American sewing machines have a great sale down there.

Colonies in Mexico Have the Reputation of Being Most Desirable Citizens.

The following information was recently given to the Chihuahua Enterprise by President Iruja, of that state, who presides over the Mormon colonies in Mexico.

"The year just passed has been quite prosperous for our people in Mexico, although the crops were not the best on account of the scarcity of rain last summer; yet the aggregate shows an increase of wealth. In Colonia Juarez, at Nevas Casas Grandes, the average income for each head of a family was \$1,400, or \$140,000 for the 100 families. The other colonies have done quite as well, the total for the 4,000 colonists being about \$400,000 per year. We have a very perfect system of obtaining statistics among our people, and every year a complete census is taken of our people and what they are doing. About 3,600 of them reside in this state and the rest in Sonora.

"At Colonia Juarez we have commenced to build an academy at a cost of \$30,000, and this will be finished in a year. The school will be free to all Mexicans included."

LIGHTNING ROD VINDICATED

Experiments of Sir Oliver Lodge Prove That Copper Conductors Attract the Destructive Bolts.

Unless some inventive genius comes forward with a method by which a wet string may be made to do service as a lightning rod the demonstrations recently given by Sir Oliver Lodge before the London Institute of Architects may eventually lead to the restoration of the highly profitable times of the lightning rod agent. His demonstrations go to show that this gentleman of smooth language was far from being mistaken in his statements that his copper tipped rods would draw the electric bolts from their source of destruction. The trouble was that they were too good. In his experiments he used three different substances as conductors—copper, iron and a wet string. While copper was the most intense and rapid conductor, it produced a sharp crack at the flash and showed by the intensity of its action that it was likely to set up a side flash, which in protected buildings has been the origin of most of the lightning accidents which have resulted in the loss of life on the part of the people in the vicinity of the much maligned lightning rod man. Iron took the bolt with less noise and the wet string with hardly any, yet the latter was efficient in protecting the two other conductors. Wet strings, of course, impossible in practice, but Sir Oliver maintained that iron was quite as efficient a conductor as copper and far more safe, in so far as it did away with the side flash. His conclusion was the trial showed that copper as a lightning conductor should be dismissed with costs. Should it be possible to convince the American householders of the correctness of his views, the practical outcome of the demonstration may be the revival of the lightning rod industry, with iron as a substitute for copper.

A SINGULAR COINCIDENCE.

Mont Pelee Celebrates Anniversary of Awful Catastrophe with Another Eruption.

According to a letter written by a young girl resident in Rosseau, island of Dominica, to a friend at New Haven, Conn., the volcano Mont Pelee, in Martinique, on May 8 last, by a singular coincidence, observed the anniversary of the catastrophe, May 8, 1902, when 30,000 lives were lost and the city of St. Pierre destroyed, by again bursting into active eruption. No mention is made of any loss of life.

The letter states that "there was a very active eruption on Sunday, May 8. There was an immense outburst of smoke and cinders, and the central cone within the crater appears to have been entirely ejected."

"Mont Pelee is visible from Dominica. At the same time there was some slight volcanic disturbances at Guadalupe Island, and the volcanic lake in the crater at Dominica was unusually agitated."

It was recalled here that the disturbance of crater lakes and slight eruptions for several days before the tremendous outburst on May 8, 1902, were preliminary of that disaster and led a Martinique scientist to investigate and by a cipher dispatch warn the governor of the island. The warning was withheld from the public. Both scientist and governor were among those who lost their lives.

BUYING RUBIES IN BURMA.

A Transaction Which Is Entered Into with the Greatest Caution.

The peculiar business methods of oriental merchants are illustrated by the manner of buying rubies in Burma. In the examination of rubies artificial light is not used, the merchants holding that full sunlight alone can bring out the color and brilliancy of the gems. Sales must therefore take place between nine a. m. and three p. m., and the sky must be clear, says the Jewelers' Weekly.

The purchaser, placed near a window, has before him a large copper plate. The sellers come to him one by one, and each empties upon this plate his little bag of rubies. The purchaser proceeds to arrange them for valuation in a number of small heaps. The first division is into three grades, according to size; each of these groups is divided into three piles, according to color, and each of these piles, in turn, is again divided into three groups, according to shape. The bright copper plate has a curious use. The sunlight reflected from it through the stones brings out, with true rubies, a color effect different from that with red spinels and tour-

ALL STEVENS RIFLES AND PISTOLS ARE GUARANTEED TO BE SAFE, DURABLE AND ACCURATE. THE FAVORITE RIFLE

is an accurate rifle and puts every shot where you hold it. Weight 44 pounds. Made in three calibers—.22, .35 and .32 Rim Fire.

KEEP YOUR BLOOD CLEAN

TAKE WINE OF CARDUI AT HOME

Are you a sufferer? Has your doctor been unsuccessful?

Wouldn't you prefer to treat yourself—AT HOME?

Nearly 1,500,000 women have bought Wine of Cardui from their druggists and have cured themselves at home, of such troubles as periodical, bearing down and ovarian pains, leucorrhoea, barrenness, nervousness, dizziness, nausea and despondency, caused by female weakness. These are not easy cases. Wine of Cardui cures when the doctor can't.

Wine of Cardui does not irritate the organs. There is no pain in the treatment. It is a soothing tonic of healing herbs, free from strong and drastic drugs. It is successful because it cures in a natural way.

Wine of Cardui can be bought from your druggist at \$1.00 a bottle and you can begin this treatment today. Will you try it?

In cases requiring special directions, address, giving street name, The Ladies' Advisory Dept., The Chattanooga Medicine Co., Chattanooga, Tenn.

Educate Your Bowels With Cascares. Candy Cathartic, cure constipation forever. 25c. H. C. C. Fall, druggists refund money.
