Judge Wm. Burns, deputy revenue collector, has returned from a trip to the Mogollon re-gion, and is glorifying in the possession of a magnificent specimen of English bull dog just received from an admirer in New York .-Albuquerque Citizen.

Jno. P. Jones, Jno. W. Mackey, D. O. Mills, Irwin C. Stump and other moneyed men, prominent in mining matters, are about to form a New York company to promote the exploration and sale of American mining properties. The waning interest in the "Kaffir circus" an London and the renewed interest in gold mines in New York make the present an auspicious time for the organization of a big concern, with plenty of capital. which, rightly managed, will be of benefit to all.

"Somebody," said Walter C Hadley, "is making money and bushels of it, if the times are bard and silver under a cloud. Listen to this: The Copper Verde, 25 miles from Prescott, in Arizons, declares in its official report that in one year its output was \$1,500,000 in gold, 7,500,000 onnes of silver and 11,000,000 pounds of copper, worth 10 cents a pound. This aggregates \$7,500,000. Isu't it stupendous? Isn't this encouragement for our miners? The Congrees mine, too, is putting out enormous quantities of the precious metals. In one month recently that mine produced \$59,-000 in ore-most of it gold. There is just as much wealth in New Mexico as there is in Arizona. and it will be found, too,"-Albuquerque Democrat.

An amusing incident occurred in court Monday. District Attorney Harliee was addressing the jury and in his conclusive way was impressing the fact upon their minds that the defendants were guilty. He noticed that the jurymen were amiling, some of them quite audibly, and thinking he had scored a point by some witty allusion, be sought to clinch his argument by the use of his long index finger. Noticing that the jury continued to smile, our worthy district attorney turned round to seek the cause. A brother attorney, carrying a flask of medicine in his hip pocket had sat down rather suddenly, the reagit being a broken flask, and a strong medicinal aroma prevading the court room. The cause of the disturbance was removed, and Attorney Harllee continued his address to the jury .- Silver City Enterprise.

It seems to be a fact, although it is lamentable, that it is impossible for citizens of Las Cruces to conduct an election honestly. There is now a row over the recent school election. The election was held at the house of Padre Lassaigne, the Catholic priest. The ballot box was several feet from the window, so the election judge, after receiving the balllot, would turn his back to the voter, walk to the box and deposit the vote. This gave him an elegant chance to change a ballet and put in one of the right kind. It is alleged that election judge Ryan did this many times. He was accested twice for changing ballots. The Padre and his ticket were elected but the election will be contested. It is not claimed that the Padre was guilty of participating in the fraud, but how he svoided having a guilty knowledge of what was being doue is a mystery. The object of the people who were ranning the opposition ticket was to take the school from the control of the Catholic church .- Lordsburg Lib-

THE WHISTLING PILLOW. louse with Horror and Made

Night Hidanus. Mr. John G. Rumble was a man after his own name. You could always tell when John G. was about because he was always "kicking" about some-thing. He had dyspepsia and was troubled with insonnia. He had tried all the well known eyes, and yet only averaged about three hours' sleep a night. He was a queer looking char-acter, was John G., he was so awfully bald, with a pink, shining dome, surrounded by a rim of stubby hair. He looked sallow and discontented and lean and altogether disgusted with life. His wife was very fond of him and petted him as much as he would allow. One day some one suggested that he get a rubber pillow. It was argued that the pillow would keep his head cool, and allow him to go to sleep. He was willing to try anothing, so he bought the pillow. That hight he

inflated it, and as he placed his head on it he said to his wife: "Ah! this is the thing. I'll be able to sleep with this, sure." And he actually dropped off to sleep without

His wife was delighted. An hour or two later she swoke with a thrill of horror; she felt something on her feet. She was sure it was the hand of the midnight assassin. As soon as she could get her voice she gave vent to a shrick that brought John G. on to the floor with a bound.

"Murder!" she yelled. "Somebody's got me by the feet." John G. struck a light and investigated. It was the

rubber pillow. John G. put the pillow in place and went to sleep once more.

Mrs. Rumble was just dozing offshe was still very nervous-when she heard a low, continuous whistle. She sat up and listened. She was sure it was a signal from a burglar under the bed to an accomplice downstairs. Her heart seemed to stop beating for awhile and then she shook her husband awake and into a sitting posture. Then the whistling ceased.

"John," she whispered. "I heard a whistle in this very room. Some one is under the bed."

"I can't hear no whistle," said John, crossly and sleepily, and straightway dropped off to sleep again. The whistle sounded again and she shook John once more. John got up and lit the gas and looked around the room. Then he noticed his pillow was very fist and the whistling robber mystery was solved. The cap on the tube of the pillow had worked bose in its journey around the bed and John's hend had been pressing the wind out of it; when he arese and took away the pressure the whistling ceased.

Mrs. Remble's nerves had had all the rubber piller they could stand, and John will have to go back to counting sheep if he wants to sleep, for his rubber pillow is up in the attic behind an old trunk.-Kampa Clty

Italian Marionettes. The first modern Italian writer who alludes to the performancest of marlonettes is the learned Dr. Jerome Cardan who was born at Pava in 1391. He speaks with positive enthuslasm of the perfection to which the art of workng the little figures had then been brought, how by the pulling of a single string they could be made to play, fight, hunt, dance, blow trumpets and cook "very artistically." Judging from sixteenth century pictures and descriptions, the popular puppet shows of those days differed but little from the performances that may be witnessed on the plazza of any Italian city in our own time. There was the little portable stage or castelleto, on which the burattini of Florence and Rome and the fantoccini of Naples played their mimic parts. The latter city was the birthplace of the modera street drama, "Pulcinella," so named, it is said, from the hen chicken whose ery his voice is supposed to resemble. The Neapolitan puncinella was by no means such a monster of iniquity as our English Punch. He seems to have been nothing worse than a pleasure-loving, quick-witted, irre-sponsible scamp of the "nobody's enemy but his own" type.-Cornhill Mag-

It is claimed that one of the reasons for the undisturbed morning sleep especialty for children and delicate and nervous persons is based on a well-understood scientific theory. We are told that the vitality of humanity is at its lowest cub between two and half-past three in the morning. This being the case, it would naturally require some hours to restore the equilibrium. It is very easy to see that if the cares of the day are taken up before this is accured, the individual would start in handlcapped by a certain lack of force. Where the rest continues uninterruptedly until the voluntary awakening, it stands to rouson that the system is in much better condition to perform its allotted task. So important to the well-being of the individual is this little understood and searcely appreciated quality that we call vitality, that it is well worth while to see to it that every condition is made as favorable as possible. To this end, undisturbed rest, with the best surroundings, is a thing to which a good deal more atten-

tion should be paid. - N. Y. Ledger. She Was Complimented

THE phrase "almighty dollar" was first used, so far as known, by Washington Irving. It has since passed into general employment to indicate the worship of wealth, both in this country and in England.

ADVICE FOR CYCLISTS.

As unduly long handle-bar is weak, it spreads the rider out too much, and it nsteadies the steering.

RIDERS should never discontinue cycling for any length of time, because there is no better tonie; but if they are compelled to for some reason, they should immediately adopt some other form of exercise.

To LEAVE an insufficient length of handle-bar stalk in the tube, though less disastrous to the machine, is more dangerous to the rider, for the handle bar is apt to come out into his bands.

Chloride Wednesday evening, They were on their way from Hillisboro to Magdalens.

The presence of a number of knights of the branding-iron in town Wednesday evening gave Chloride a slight tinge of days passed away when times were good and cattle plenty.

Mrs. M. A. Guenther, little son Paul, of Sedalis, Mo, and sister Miss Florence McGogy, arrived here Monbay night and are the guests of Mr. and Mrs. W. B. Dawson. The ladies will remain several weeks.

A fine young steer belonging to Tom Whitley was recently killed all one-quarter mile, first on the west mesa, within a stone's money \$15,00. Entrance fee throw of town. The animal was shot twice, once in the breast and once through the back. The perpetrators of the cowardly crime has not been discovered.

Lew Kruse was down from Gratton Tuesday. He spant three weeks among the mines in the Mogollops. He was very well satisfied with the mines in that vicinity and says there was about six hundred men working at the time he was 6th.—Sack Race, for men. Cold Rox which he reports looking

Procopio Torres, of Monticello. was in town yesterday. He says the fruit and gram crop is in ex-cellent condition and that harvesting will commence on the Fourth of July. There will be a fease, there next Monday. J. J. Aragon is doing business in his new and commodious store which he has recently completed.

We are authorized to announce that Chloride will duly patriotically celebrate the coming glorious Fourth of July. There will be horse racing, foot racing, a ropeing match, and various other sports in-dulged on that day, and a grand ball will be had in the evening. Everybody invited to join the

Their horses went into the hole and the vehicle came within a few inches of taking a header into the depths below. Happily, however, Miss McGogy's keen eyes detected the danger in time to check the horses and to prevent a general smash up.

Robt. Howe is in very poor health, but he continues to delve in the deep workings of the Emporis, one of the most promising mines in the district.

The vicious acts of those who sttempt so impersonate Apaches on the warpath, ought to be brought to a disastrous conclusion for themselves-fitting panishment ought to be meted out to them. Information reached here that two shots were fired at a boy who was working on a ditch on the San Francisco river, and one shot was fired in front of the horses of a man who was driving along the road not far from Middle Plaza. The boy ran into the town and reported that he had been attacked by Indians, and he had good reason to think so, from the rumors that they were on the warpath and from the shots fired at him.

WASHINGTON LETTER.

From our Regular Correspondent.

Political sensations are not every day occurrences in Washington at this season of the year, but one, of the first magnitude, has followed atatement of a member of the Cabinet, that President Cleveland regarded it as certain that the republican and democratic parties would both split on the silver question and that the next campaign would be fought solely on the issue, and that all past differences would be forgotten and the members of all parties would line up as silver or gold men and not as republicans, democrats and populists. He further fetated that President Cleveland considered himself the logical candidate of the gold party, and believed that he would be nominated and elected. This view of the sitnation has been taken by others. but this is the first time that it has been authoritatively stated as President Cleveland's view of it. The silver men say they would ask nothing better than a fight on that line against Mr. Ceveland, who they regard as their arch enemy.

Members of the administration are shouting over the victory they claim to have won over the silver democrate in Kentucky. They say that previous to the publication of President Cleveland's anti-silver letter the silver sentiment in Kentacky was stronger than in any state in the South, with the possible exception of Texas, and that if they could win in Kentucky they can win in all the other Southern States. The silver men admit that the news from Kentucky is not oncouraging to their success in the South, but will not admit defeat until the State convention which meets next week acts.

Col. W. W. Dudley, of Indiana, was for a long time regarded as one of the shrewdest campaign managers of his party, but since the first Hardson compaign he has not taken an active part in politics. He said: "I am sure that the republicans would make a great mistake if they were to so conduct the campaign as not to carry the requisite number of states in the Electoral College, and thus throw the election into the House of Representatives. This can only be done by so framing assues or enacting legis lation as to drive the western and northwestern states away from their allegiance to the republican party. To so legislate, or so act in convention, as to make it impossible for those states to give us their electoral votes, would almost inevitably result in driving them away from the republican party permanently. If the western and northwestern states should be lost to the republican party, in the Electoral College what promise or hope is there, the election being thrown thereby into the House, that repub lican representatives from those states, as now elected, could be held to the republican candidate? We must look this danger squarely in the face, and it can only be avert ed by great wisdom, conservatism and patriotism on the part of republicans. We cannot afford to throw the election into the House". One of the objects Col. Dudley had in view when he made public his opinous is already seemingly in a fair vay to be accomplished That is, the killing of the plan, advocated by many anti-silver republi cans, for throwing the election of President into the House, in case the silver republicans should object to the platform or candidate. Col. Dudley has shown it to be very

Senator Stewart, of Nevada, is president of a stock company which has been cliartered under the laws of Yirginia, under the name, "Supreme Temple of the Silver Knights of America," with a capital of \$100,000 divided into shares of \$100 each. The objects, as etated in the application for charter, being to establish a secret society for the purpose of seeking to secure legislation providing for the free coinage of silver in the U.S. and to make silver a legal tender for all debts, public and private.

The Pyramid company's property, near Lordsburg, has been leased and will soon be started up. This is considered a valuable property but it has been worked at irregular intervals for the past several years. -Silver City Eagle.
