All Kinds of Building Material, and in

**JOHN DEERE IMPLEMENTS**  
The New Deere Sulky and Gang

Built upon practically the same lines with that indispensible sign of superiority, the John Deere Trade Mark. Both sulky and gang fitted with a powerful footlift. This special foot lift works so easy that anyone can raise or lower the plow with ease. The gang has an auxiliary hand lever. You can walk and stretch your legs, if you like, and still control the plow perfectly. The lever is within easy reach of your hand and it has wonderful lifting power—five times the lifting leverage found on any other gang. A small boy easily lifts the plow weighted down by furrows while at a standstill.

**Lightest of Draft**

75% of all the friction on a plow being come in front of a line drawn up and down across the mouldboard—a third the way back from the point. The peculiar shape of John Deere plow bottoms enables them to penetrate the soil easiest on that part of the bottom where the friction is heaviest.

Write or call on us. We want to tell you about the other exclusive patented improvements on the New Deere Sulky and Gang such as Adjustable seat—Batter steel—Easy management—Dust-proof wheel bearings—good high wheels—easy running—also run in oil.

Equal Distribution of weight on each wheel

Highest award at every World's Fair or Exposition since 1840.

### MULE AND BEAR FIGHT DUEL

The story of a duel to the death between a mule and a bear comes from Chambersburg, Pa. The mule came out victorious. Aroused by a commotion in his barn, Dan Shawley, lumberman and farmer, found the bear in combat with his pet mule. Contrary to the established custom the mule was using his front feet in the battle and peppering bruin a regular tattoo over the head. One savage slap by the mule broke one of the bear's front legs and the bulky animal fell prostrate. Then the mule reversed himself and let loose the death dealing assault from his hind quarters. The bear died shortly after Shawley reached the scene. It weighed 263 pounds and showed the marks of eight bullet punctures.

### ARIZONA BRIDGE OF AGATE

The petrified forests of Arizona present some of the most marvelous evidence of volcanic action known to the world. Groves of giant trees, becoming solidified, have fallen of their own weight. One log which is probably the largest example of petrification has recently come to attention. It is 110 feet long, spans a "hot canon" 60 feet wide, forming a convenient foot-bridge, and is really a mass of fine agate weighing hundreds of tons. The huge roots of the fallen monarch rise to a height of eight or ten feet at one end while the upper extremity of the trunk is buried in the soft formation of the land in which it grew. Its diameter is from five feet to two at the smaller end.

### FORTUNE IN A SMALL DISC

In the radium institutes like the one recently opened in London there is nothing more wonderful to the visitor than the little square or circular trays of metal containing specks of radium in shellac varnish whose rays hold such vast possibilities in the future of mankind's struggle against disease. The disc illustrated contains 76 milligrammes of radium, worth £1,850. The trays when applied to the patient are covered with metal caps or screens which lessen or intensify the power of the rays according to the nature of the disease. In the basement of the London institution is a strong room holding the largest stock of radium in the world. The safe-room where these tiny black specks of radium are weighed is a broad, lofty, white-tiled room absolutely vibration-proof.

### SEVEN YEARS OF SILENCE

That they lived together as husband and wife for seven years without speaking to each other, their only communication being by means of written notes, was one of the statements made by Mrs. Ellen Klitgaard in her application for a divorce from Carl E. Klitgaard, at San Francisco, recently. This silence, she declared, was enforced by her husband who ceased speaking to her soon after their marriage in 1903. He would not even receive the notes from her hand, compelling her to leave them in a designated place. One day she wrote to him: "How long are you going to keep this up?" "Forever," was the written reply.

### DOG TO THE RESCUE

An exciting incident occurred at Atlantic City one morning recently when Joseph Gallagher attempted to swim around Young's old pier accompanied by a large shepherd dog. When off the end of the pier he was seized with cramps and cried for help. The dog seized Gallagher's jersey in his teeth and held him up. Gallagher's cries attracted the life guards, who attempted to beat the dog away, but the animal would not release his hold until he was hit over the head with an oar. Gallagher sank and one of the life guards dived after him. He and the dog were rescued.

### WHERE EGGS ARE BLACK

Every one has heard of the black broth of the Spartans over which the fastidious Dionysius made a wry face, and was not convinced when told that it was enjoyable with Spartan sauce, the ingredients of which, in the Syracusean's opinion, could little alter the taste. The housewife would, however, probably be shocked to find the eggs left by the milkman jet black. The black Cayuga duck, a South American bird, frequently lays black eggs. The black coloring does not penetrate the shell, being due to an oily pigment which can be rubbed off in successive layings the coloring fades and disappears.

### WHEN CARBON BOILS

When an electric arc light blazes, the carbon, melted from one of the rods, is actually boiling in the little crater formed in the end of the rod. The superheated liquid, with blinding flashes of light, moves and jumps about very much as water does on beginning to boil.

### Latest Thing in Clubs.

"Never again!" This is the motto of a novel club recently organized in Trenton, N. J., in which only persons who have previously attempted to commit suicide are entitled to membership. The club began its existence with forty members.

### SOUTHERN POINT OF NATION

The most southern point of mainland territory in the United States is on a sharp bend of the Rio Grande river about 20 miles southwest of Brownsville. The government official survey shows that its latitude is 25 degrees and 9 minutes, which places it below the most southern part of the peninsula of Florida, but not as far south as Key West. The spot is marked by a group of picturesque Mexican ranch buildings with their thatched roofs. Growing upon the land are groves of wild palm trees which lend to the beauty of the tropical scene. The distance between Brownsville and the mouth of the Rio Grande in a direct line is approximately 22 miles, but the river has so many curvatures that its course between the two points covers 110 miles, according to the survey of the international boundary commission, which is composed of the representatives of the United States and Mexican governments. Before the river empties into the gulf it makes a sharp bend to the south, and this rounded peninsula forms the most southern mainland of the country. Most of the territory between Brownsville and the Rio Grande's mouth is covered by a dense wilderness of chaparral. The soil is of primitive richness, caused by the periodical deposits of silt from the stream's overflow. Owing to the inaccessibility of the little Mexican ranch, which holds the distinction of marking the most southern spot, the place has been visited by very few Americans.

### WHERE MANITOU SPEAKS

A familiar landmark near Hayton, Wis., is the old "Council Elm" that stands at a bend in the Manitowoc river a short distance below Hayton. The Pottawotomic Indians who once occupied this region regarded the tree with awe and veneration, believing it endowed with special attributes by the Manitou or Great Spirit. Under its shade all important councils of the tribe took place. As a meeting place for representatives of the different northwestern tribes who wished to enter the Pottawotomic territory, it must have witnessed some strange scenes. Each spring and fall all the Pottawotomic clans were wont to gather at the spacious camping ground near the tree. For days the beating of drums, the chanting of barbaric songs and fantastic dances occupied the attention of the savages. Among the many Indian legends concerning the tree one of the few that has survived is to the effect that the Manitou speaks to his people in the rustle of its leaves and the sigh of the winter wind through the bare branches.

### Easily Worked.

Crawford—The rich seem to have trouble in doing the duty on things they bring over Crabshaw—Why don't they engage the same lawyers who show them how to dodge their taxes?—Puck

### New Swimming Machine.

Providing a cork jacket, which keeps its wearer upright in the water, with a propeller, driven by two cranks, a New Yorker has invented a device which is a variation from most styles of swimming machines.

### Retain the Tinderbox.

Matches have not yet displaced the tinderbox in certain rural districts of Spain and Italy.

### That Settled Bump.

Mr. Woggs—'I'm through with Bump. I told him we were going to name our baby after some great personage, and asked him for a suggestion.' Mr. Woggs—"What did he say?" Mr. Woggs—"He said: 'Name it after ours.'"—Puck.

## Dry Land Farming.

The Irigated Garden of the Dry Farm.

The windmill should be run day and night the year round. All the water not needed for the house and livestock should be run into the reservoir.

In the winter time the water should be used to thoroughly soak half of the garden. Whenever the reservoir becomes full, the water should be run out over this part of the garden. By using winter irrigation, the windmill will enable the farmer to get large yields from twice the area. If the ground is thoroughly soaked during the winter, and an earth mulch put on early in the spring, good crops can be raised by thorough cultivation, without any irrigation during the summer. On the winter-irrigated land, plant in rows cabbage, tomatoes, turnips, collards, carrots and squash. The windbreak around the house and the garden, and the shade trees around the house can be carried through by the fall and winter irrigation.

On the land that is to be irrigated during the summer, plant in rows, three feet apart, all the ordinary garden crops, such as lettuce, radishes, peas, beans, beets, sweet corn and flowers, and at a greater distance, cucumbers, cantaloupes and water-melons.

The ground for the garden must be plowed deep and worked and reworked with a disc harrow and smoothing harrow until it is fine and mellow. Everything, no matter how small it grows; should be three feet apart and extend the whole length of the garden. Do not plant garden truck in beds or short rows on a dry land farm, if you do not want lettuce enough to take a whole row, put in as much as you want and plant the rest of the row with radishes or peas or beans. Cultivate the garden thoroughly every week, using one horse and a small shoveled cultivator. The dry land farmer does not have much time or inclination to do much hoeing.

When the plants need water, plow a small furrow (six inches wide, three or four inches deep) near each row. Run through this furrow a smooth round post. This will smooth the bottom of the furrow, and the water can be distributed better. Run a ditch from the pipe coming out from the reservoir to your furrow and turn enough water out of the reservoir to make a stream as large as your ditch. A little experience will teach you how long to run the water in each furrow. After one row has water enough, turn the stream into the ditch along the next row.

Water should not come in direct contact with the plants.

## S. STREET, Elida, New Mexico.

Big Store, Jam full of  
GROCERIES AND DRY GOODS.

COME AND SEE.

If the soil is well soaked, the moisture will gradually find its way to the roots. In hot summer days, water will go nearly twice as far if applied after sundown.

The next morning after the garden has been irrigated, it should be thoroughly cultivated to fill up that ditch and make an earth mulch to retain the moisture. Usually, if sufficient water has been used and the soil has been handled right after irrigating, the crops will not need water oftener than once in ten days or two weeks. A little water, and much cultivation secures the largest yields.

How much land can be irrigated from a windmill? From one-fourth of an acre to eleven acres. Not very definite information, but the area depends on the depth the water has to be raised, the supply of water, the size of the windmill, and the number of windy days and nights, the character of the soil and the skill used in applying the water. The new settler had better irrigate half an acre of garden the first year and handle it thoroughly. He can increase the area in after years.

A windmill will often supply a large family with all the vegetables they can use during the year, and a surplus that they can sell for \$100 to \$200 each season.—Southwest Trail.

"Can't I sell you a painless corn cure, madam?" said the peddler. "No, you can't," snapped the woman of the house. "I have no painless corns." Then the door was shut with a sudden slam.

### WHY NOT MARKET YOUR BEAR GRASS

People Are Making Good Wages Gathering This Valuable Product at Other Points in New Mexico.

H. A. Shonkwiler, of the American Manufacturing Co., of St. Louis, was here last week offering to buy bear grass for his company. He has made arrangements with Joyce-Pruit company to buy this product and ship it to St. Louis, so there is a market here now for all the bear grass the farmers want to bring in. The American Manufactur-

ing Co. has been buying this product at points in New Mexico for a year and they still want more. Most of it has been shipped from Tucumcari, Logan and other points on the Rock Island. They must find it profitable to market this natural product of the plains as they are keeping at work shipping the product. A firm at Tucumcari and another in Logan are both shipping several car loads a week and another firm at Fort Sumner is getting a big lot ready to ship. The price offered is seven dollars a ton delivered at the railway station, baled. Mr. Shonkwiler has been in this work some time and says that fairly good wages can be made by the farmers gathering and baling this product. A man near Logan has devised a baler which handles the grass successfully, and he says arrangement has been made to have some of these balers here in a short time. From experience it has been found that two men can bale three tons a day with this baler, so figuring wages at the customary rate it will not cost over a dollar a ton for baling, including the cost of wire and a reasonable service for the baler. From experience it has been proven that it can be cut on the prairie for about a dollar a ton. The cutting is done with an ax. First it is split and then cut off just at the base of the leaves. It must then lay till it is dried which will take about sixty days. Then the baler can be set at a convenient place and the grass hauled to it where it is put in bales of 250 pounds each. If it can be cut for a dollar a ton and baled for a dollar a ton, the other five dollars a ton should pay good wages for hauling the stuff to the baler and hauling the bales to market. We believe the farmers who have this bear grass on their farms or can gather it near by their homes can make as good wages as they could to go away from home to work. Then if they go away to work they should consider the inconvenience of being away from home, the expense of going and coming and their extra living expense while gone. We understand that several farmers are now cutting and more expect to commence work soon. The

I have not space to mention, that are pretty to look at, and cheap to buy. You will always get a square deal when you trade with

## G. W. Zink,

The Jeweler

baler can be built for twenty dollars, and one baler would probably serve the purpose for several farmers.

Mr. Shonkwiler says that the proposition made nearly a year ago offering thirteen dollars a ton for the bear grass was made on a basis that the leaves be all cut from the root crown. In their work trying out the best method of getting this stuff in shape for shipping they find this is not a practical way of handling it. It takes so much work to cut the leaves loose from the roots and then it is so hard to handle and bale after the leaves are all loose that it is impractical to try to market the stuff in this way. When the leaves are fast to the root it is easier to bale and is easier for the company to handle after they have it at the mill. The part of the root that goes with the leaves makes additional weight, and in this state they only pay seven dollars per ton. As to the use it is put to at the mill, Mr. Shonkwiler says they make fiber out of it and that is all he will say. However, he says it is not for the manufacture of paper by his company. His company makes all kinds of cordage and bagging. —Portales Times.

LOCAL AND PERSONAL.

FOR SALE:—Span of small mules, harness and wagon. \$150—cash or time, if secured. This office.

NOTICE.

Every subscriber who pays us \$1.00 on subscription between this time and Christmas Day will receive the Wichita Weekly Eagle one year as a premium. We desire to increase our subscription list and while offering this inducement to new subscribers will also give old subscribers the same benefit if they flash their dollar.

J. E. Green and his daughter Annie came home Sunday, from Gasolene, Tex., where they had been at work for some time. They went back Wednesday, but do not expect to be away long.

One of Blake Jones' horses was kicked Tuesday night and had a leg broken.

Will Heath returned home, from Roswell, Wednesday morning.

Dudley Jones is hauling lumber to build him a new house. He will tear his old one down.

We have had considerable freezing weather this week. It is disagreeable, but it is of benefit to crop lands.

The cold snap this week has brought several farmers to town for coal. Thin clothes and bear grass roots don't serve to fight the frost off.

Born: Sunday Nov. 26th, to J. D. and Mrs. Daniel—a fine, big boy. Dr. H. L. Fiscus in attendance.

Arthur Garland went to Clovis Wednesday—leaving no word as to date of his return.

One of the parties interested in the shipment of Beargrass was here last week and visited March Dunn. He told Mr. Dunn he would make arrangements to ship from this point, and would pay \$7.00 per ton, on the track.

T. G. Narramore was in town Wednesday and reports his goats are doing fine. He is goat hungry, and is on a deal for 500 more.

W. H. Wood and family arrived home last week, and are now "home to stay." Mr. Wood says the trip away was anything but profitable, and from this time on he will stay and take his chances with the rest of us in New Mexico, wet or dry, as the case may be.

Rev. W. P. West, the new pastor of the M. E. Church, will preach here Sunday at 11 o'clock.

A party of the Kenna young folks drove to Elida yesterday and took dinner, spending the rest of the day driving in the country and taking pictures.

There was a "hop" at the hall last night. It was to have been a masquerade ball, but the masquerade feature was cut out.

CHURCH ANNOUNCEMENT.

Preaching at the White Chapel school house next Sunday, Dec. 3, at 11 a. m., and thereafter every 1st and 3rd Sunday. Everybody cordially invited to attend.

Elder W. H. Wood.

Little Ruse Don't Succeed

YOUNGEST'S SCHEME WAS ALL RIGHT, BUT ECONOMICAL FATHER WAS A MATCH FOR HIM

The proprietor of the most prominent hotel in the town of S—, Ky., is a man of a very economical nature, in fact he is an extremist in this feature. He has a six-year-old, red-headed son that didn't inherit his father's economical disposition. Recently the son was very much in need of a five-cent piece for soda water purposes. He went into the dining room, where he was free from observation, and removed his shoe strings and placed them in his hip pocket for future reference. Returning to the office he approached his father and said:

"Pa, give me a nickel to get me a pair of shoe strings."

His father glanced down at his son's shoes, then turning around approached the office safe and opened it in silence. He took out the cash box and raising the lid extracted a pair of new shoe strings which he handed to his son without a word. The youngster took the strings with a crestfallen air and then to the amusement of the onlookers exclaimed:

"Stung again, by granny."

STATE OF OHIO CITY OF TOLEDO, LUCAS COUNTY. FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE. FRANK J. CHENEY. Sworn to before me and subscribed in my presence, this 5th day of December, A. D. 1908. A. W. GLEASON, Notary Public. HALL'S Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

THE WRONG THROAT.

A little boy took an apple to school the other day and was playing with it. When the teacher saw him he took it from him and commenced to eat it.

As the boy saw the last piece disappear he commenced coughing, and when the teacher asked him what he was coughing for, he replied:

"Please, sir, it's gone down the wrong way."

THE BISHOP AND THE BOY.

The late Bishop Williams of Connecticut was very fond of children, and it was always a joy to us youngsters when he came for a visit to my father's parish. His anecdotes and stories enlivened the whole household. Once when he was staying with us he told the following story:

"One Sunday morning, just after breakfast, I repaired to the rector's study, where I was soon followed by his little four-year-old son, who climbed up on my knee and began to talk. Suddenly the little fellow looked up into my face and said: 'Bishop, do you want to see my piggy bank?'

"Yes, indeed," said I. So the child slid down and started to get the hook. When half-way across the room a sudden idea seemed to strike him, and, running back and putting one hand on my knee, he looked up in my face and shook his little forefinger at me, whispering: 'Bishop, it's Sunday. We must do zis on ze sly!'"—Harper's Magazine.

MISSOURIAN'S STORY.

"One very hot day I was helping my neighbor, Capt. A., over on Little Buffalo harvest wheat. I was shocking, that is, putting the bundles up into shocks and consequently was some distance from the other harvesters. A pack of hounds had been baying in the woods all morning and seemed to be gradually approaching the field where we were at work, and evidently they were on the trail after big game. Presently the largest buck I ever saw leaped over the fence closely followed by the hounds. He passed by close where I stood, and as he seemed to be somewhat exhausted I joined in the chase, well the dogs, either from a feeling of disgust or the want of water, quit the chase and started for the creek.

"Gentlemen, I chased that deer through the wheat, over the fence, into the woods, down hill and up hill, and through briars, thickets and swamps, going down hill sometimes I would get nearly within reach of him, but on the up grade he would gain on me, on the level it was about a tie between us. It was a long chase and I was beginning to feel pretty tired but in going down a long slant I gained on him so that when he jumped across the little branch at the foot of the hill I caught him by the tail wrapping it around my hand a few times I thought I had him sure, but this was a mistake, for he only increased his speed, and I tell you I had to make some pretty long steps for it wouldn't do to let go, besides my reputation was at stake and I was determined to win that race. Well, finally we struck a long level stretch overgrown with hazel brush and black jack trees and I saw he was heading for an old deserted field surrounded by a rail fence. I had just about given up when, fortunately for me, he jumped the fence and fell into a snowdrift about four feet deep, and before he could extricate himself I had him by the horns, and pushing his nose into the snow with one hand, with the other drew my pocket knife and severed his jugular. Of course, I was somewhat winded and needed a rest but I had won the race."

"Well," remarked one of the visiting ninruds "that tail was rather long for a deer, but how about the snowdrift in harvest time?"

"Snow!" "Well the great Gee Whiz!" "Why man I run him from the first day of July till the seventeenth of December, and of course it snowed. "See."

The editor of the Holyrood Banner doesn't want to discourage any young man who has an ambition to become moulder of public opinion by running a newspaper in a small town but he wants to give him fair warning. He says "My son don't you remember the Ayer's almanac that used to hang in grandpa's kitchen, up in New Hampshire? And do you remember the poor chap that always stood in the center of the first picture of the first page, with the fish and the scorpions and the sheep and the bulls and the twins around him? And don't you remember that he was naked and that he had nothing in his stomach to speak of?"

Well son, that poor fellow used to edit a newspaper.

THE PACIFIC MONTHLY SPECIAL RATES ON THE LEADING MAGAZINE OF THE WEST

The Pacific Monthly of poetry and, Oregon, is publishing a series of splendid articles about the various industries in the West. The September number contains an article on access with berries. The October number had a beautifully illustrated article on Success in Growing Apples. Other articles shortly to be published are Success with Live Stock, Success in Growing Walnuts, Success with Fodder Crops. These articles are written by experts, and are not only authoritative, but very interesting.

In addition to the above, The Pacific Monthly each month publishes a large number of clean, wholesome, readable stories and strong independent articles on the questions of the day.

The price of The Pacific Monthly is \$1.50 a year. To introduce it to new readers, it will be sent for six months for \$1.00 if this paper is mentioned.

Address: Pacific Monthly, Portland, Oregon.

"Why do you consider women superior to men in intelligence?"

"A bald-headed man buys hair restorer by the quart, doesn't he?"

"Er, yes."

"Well, a woman doesn't waste time on a hair restorer, she buys hair."

Hard to Live Up To.

An example of greatness thrust upon one is an eleven-year-old boy living in Hamilton avenue, Yonkers. His name is George Washington. He was born on Christmas day and christened on Easter. The lad sings in the choir of St. Andrew's Memorial church.

T. C. TILLOTSON,  
Register.

November 17-December 22.

If you are Proving up on your claim be sure and read your Publication Notice carefully when it appears in the paper, and if there are any errors notify this office promptly and they will be corrected.

Homesteaders are advised that it costs \$6.00 more to make five year proof on 160 acres than it does to make commutation proof, and \$12.00 more on 320. The reason for this will be explained by the officer before whom you make proof.

**NOTICE FOR PUBLICATION.**

**Remington**  
.22 REPEATING RIFLE  
The popular idea of the .22 calibre rifle is that it is a sparrow gun—a plaything for the little boy.  
Not so the REMINGTON .22 Repeater. Hammerless. Solid Breech, built to exactly the same high standard of quality as the big game REMINGTON Repeaters, this rifle is a man's rifle, and for the boy who has the making of a man. No rifle to compare with it for target shooting, for crows, hawks, squirrels and other small game of the keener sort.  
Whether you are shooting in the field or at the target, never forget that UMC .22 cartridges are essential to the surest results. Straight shooting, hard hitting, sure fire. UMC .22 short, .22 long and .22 long rifle cartridges can be depended upon to be as perfect as any ammunition of any calibre made.  
Targets Sent Free.  
The Union Metallic Cartridge Company,  
The Remington Arms Company,  
Agents: 239 Broadway, New York City.
