

# Search, Study, Analyze, Download, and Create eBooks or Corpora

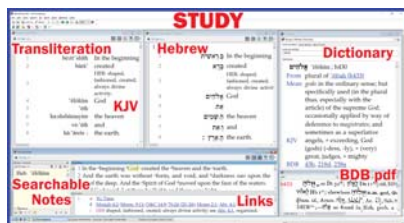

with

## WordCruncher

a **free** personal research assistant for Digital Humanities

**Search tools:** Basic or advanced searches of text, categories, and tags.  
**Display:** Formatted text, color, unicode fonts, images, citation, table of contents, synchronized translations and footnotes, and zoom.

**Study tools:** Searchable user notes, highlighting, and categories. Bookmarks, hyperlinks, dictionaries, PDFs, topics, copy and paste. Synchronized versions, translations, footnotes, or commentaries.

Other apps and online resources may lack helpful tools, tags, markup, formatting, multilingual support, speed, or data.

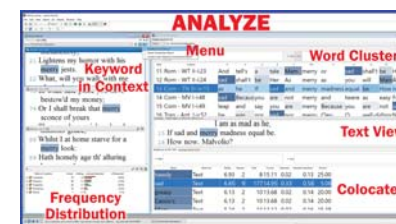

One linguist used online data to create a 700 million-word WordCruncher corpus. He said, "I couldn't have done a lot of my research with what is out there."

Go to **WordCruncher.com** to see:

- how the app, data, and support team can help you research, publish, and teach.
- how Donald Parry, Royal Skousen, Cynthia Hallen, Alan Melby, John Hilton III, and other BYU faculty have used WordCruncher for years.
- how to install the *free* WordCruncher app on Windows or Macintosh computers, and on iPhones or iPads.
- a list of digital texts and corpora you can download.
- PDFs describing tools to help you search, study, and analyze texts.
- how to get the *free* Publishing Toolkit to convert your own documents (e.g., txt, docx) to WordCruncher books or corpora.

The WordCruncher team is part of the Office of Digital Humanities at Brigham Young University.

**Other analysis tools:** Repeated phrases (N-grams), word dispersion chart, vocabulary comparison of sections, paired collocations, normalized results, sort columns, and word or character usage.

**Other languages:** Albanian, Bulgarian, Cebuano, Czech, Dutch, French, German, Greek, Haitian Creole, Hebrew, Hungarian, Icelandic, Ilokano, Italian, Kiswahili, Latvian, Lithuanian, Maltese, Portuguese, Romanian, Spanish, Swedish, Tagalog, and Ukrainian.
