Tinkering with Comments: Tailoring Practice by Spying on Written Artifacts

Vicki R. Kennell, Ph.D.

Josh Weirick

Amy Elliot

Purdue University Writing Lab

IWCA Conference, Chicago, Illinois, November 2017

Overview

- Overview of two IRB-approved research projects
 - Why Code
 - Methods
 - Participants
- Asynchronous Online Tutoring (Josh)
- Social Sciences Graduate Writing Group (Amy)

Why Coding?

Methods: Asynchronous Online Tutoring

- Coding of marginal and summative tutor comments
 - ✓ Coded using Nvivo
 - ✓ Inter-rater Reliability—Kappa Coefficients & Percentage of Agreement
 - ✓ Type: Global, Surface, Meta-textual
 - ✓ Focus: What is the comment about?
 - ✓ Mode: How does the comment communicate?
- Interviews with tutors

For details of this coding scheme's development, see Weirick, J., Davis, T., & Lawson, D. (2017). Writer L1/L2 Status and Asynchronous Online Writing Center Feedback: Consultant Response Patterns. *Learning Assistance Review (TLAR)*, 22(2), 9-38.

Inter-Rater Reliability

Kappa Coefficient

- Lowest—0.4811
- Highest—1.0
- Most frequent—1.0
- Guidelines for interpreting
 - 0.4-0.75 = Fair to Good agreement
 - Over 0.75 = Excellent agreement

Percentage Agreement

- Lowest—84.21%
- Highest—100%
- Vast majority >90%

Sample Coded Comment

Comments from a single bubble

This is a very important point, and I think that it clearly communicates the purpose of this paragraph.

Codes for each independent clause

Type: Global
Focus: Content
Mode: Praise

Perhaps it should move to the beginning of the paragraph?

Type: Global
Focus: Organization
Mode: Qualified Command

Methods: Graduate Writing Group

- Manual coding of marginal comments (pen and paper)
- Comments could receive more than one code per method
- Inter-rater reliability by “compare and discuss” method

Method 1: Style of Feedback

- ✓ Corrective
- ✓ Directive
- ✓ Interactive
- ✓ Evaluative

Method 2: Focus of Feedback

- ✓ Deletions
- ✓ Insertions
- ✓ Discipline-Specific
- ✓ Organization
- ✓ Sentence Level

Sample Coded Comment

Reader Comment

I would lead with this thought. The logic here should be that deployment poses a threat to the attachment system, thereby causing family members to experience anxiety and threat regarding safety and comfort.

Coding

Method 1:

Directive & Interactive

Method 2:

Discipline-Specific (General Content) & Organization (Paragraph)

Methods: Important Similarities

- Emergent code/*A priori* code hybrid
- Code refinement or clarification in the early stages
- Development of a coding scheme
- Codes based on writing center values rather than writer values

Participants

Asynchronous Tutoring (Josh)

- Tutors— “Christen” & “Ellen”
 - NS
 - Grad
 - 1st year Tutor
- Writers—94
 - 38 NS & 56 NNS
 - 38 Undergrad & 56 Grad+
 - 17 had 2 sessions
 - 15 had > 2 sessions

Graduate Writing Group (Amy)

- Social Sciences Research Institute
- ~4-6 regular attendees
- Focus on 2
 - “Mary”—experienced grad & WG
 - “Lisa”—1st yr. grad & WG

Asynchronous Tutoring

Coding Tutor Comments

Impetus

Tutor training:

- While tutors receive training for face-to-face sessions, they receive very little formal training for asynchronous online tutoring.
- What type of training would most benefit tutors, and on which areas of asynchronous tutoring should this training concentrate?

Type, Focus, and Mode – Christen and Ellen

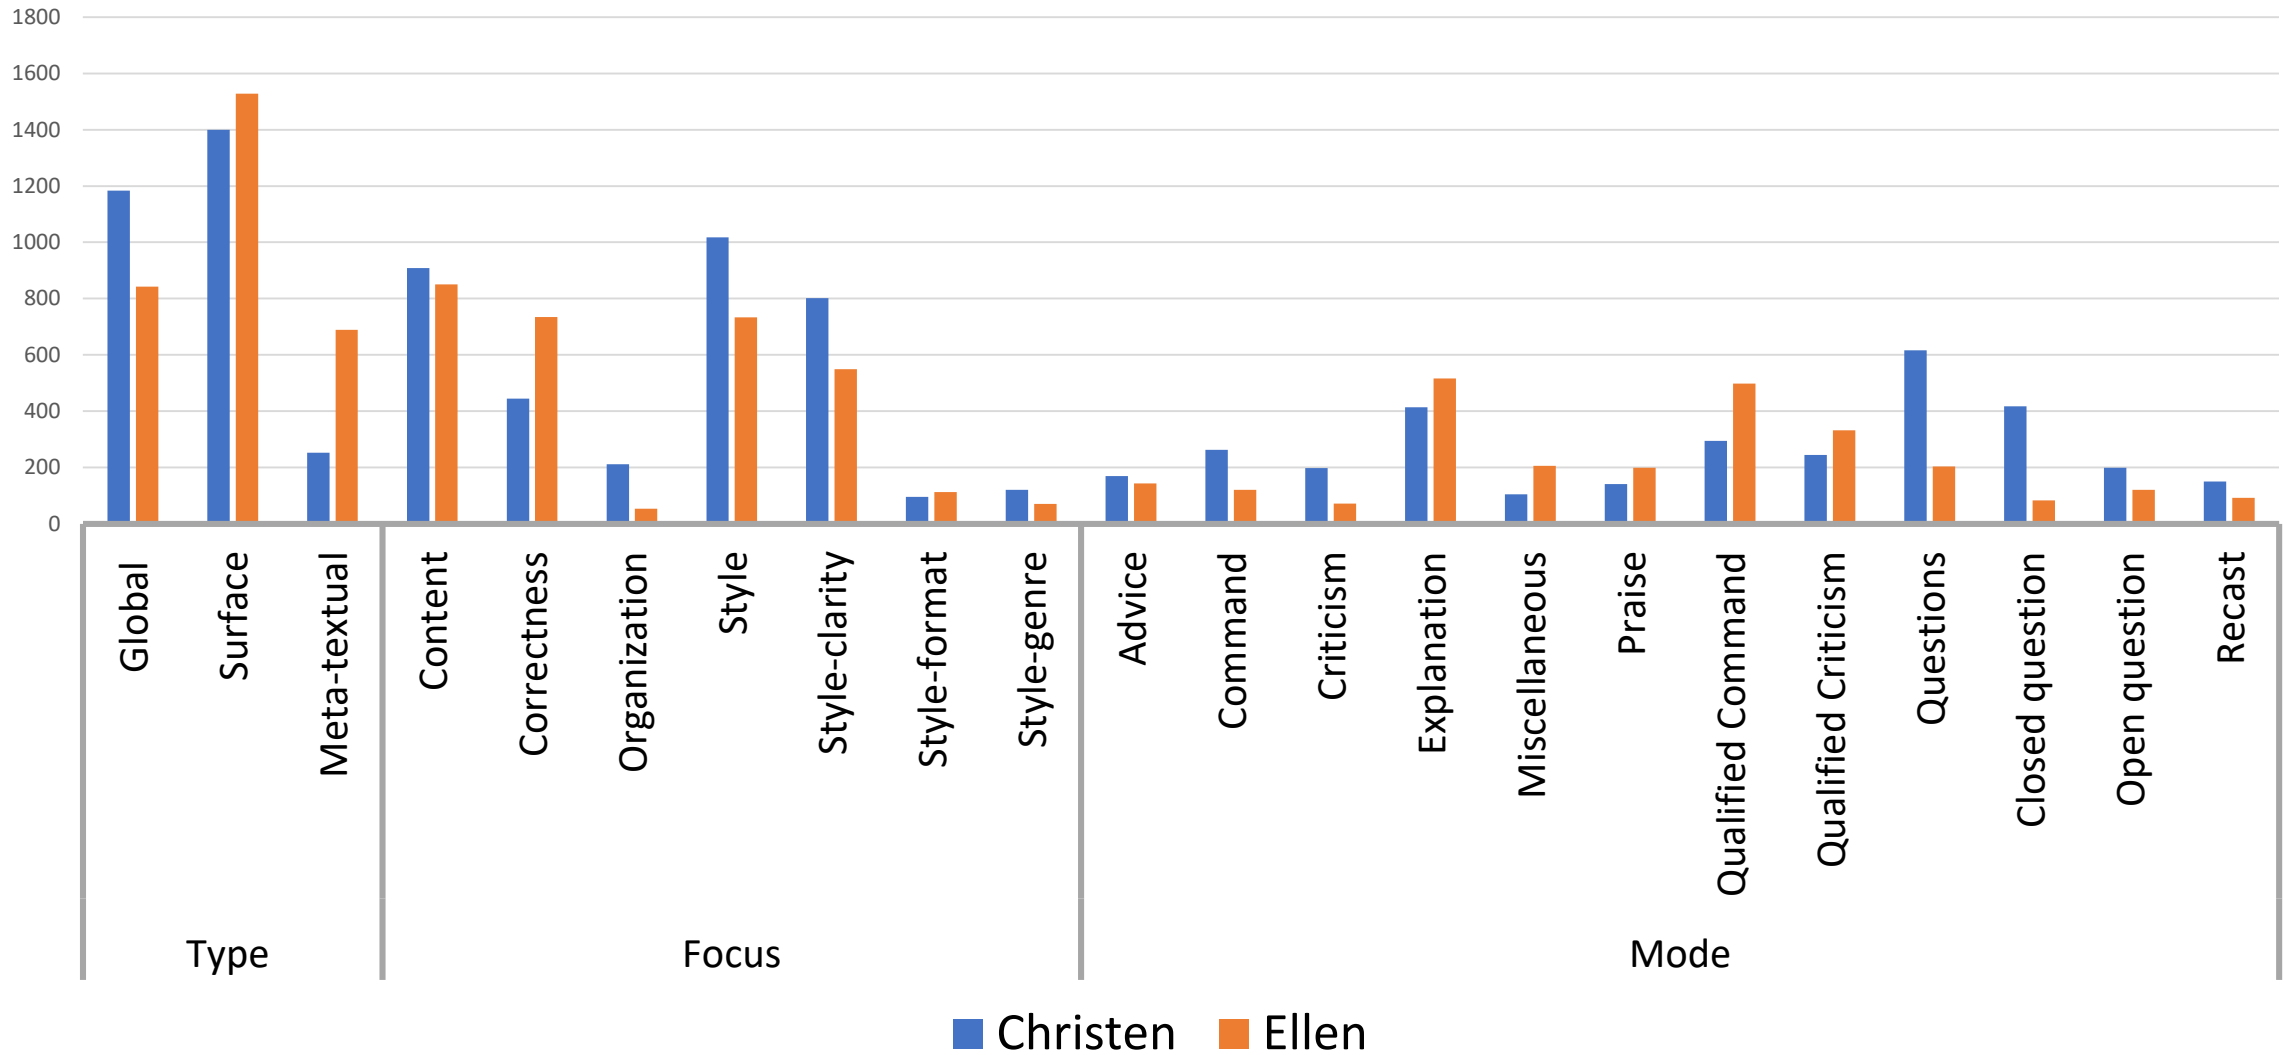

Interviews: General Patterns

What would you say are the most common issues that you address in online submissions?

- **Ellen:** A lot of grammar. Mostly grammar. Even if they don't really need help with grammar, or they actually really want help with the structure of the paper, they usually still say grammar ... even though, as a tutor, you know they don't really want help with grammar, it [the appointment form] says grammar, so I try and help with that no matter what if they say it.
- **Christen:** The most common request is grammar ... but I always still make an effort to comment on global issues.

Type, Focus, and Mode – Christen and Ellen

Interviews: General Patterns

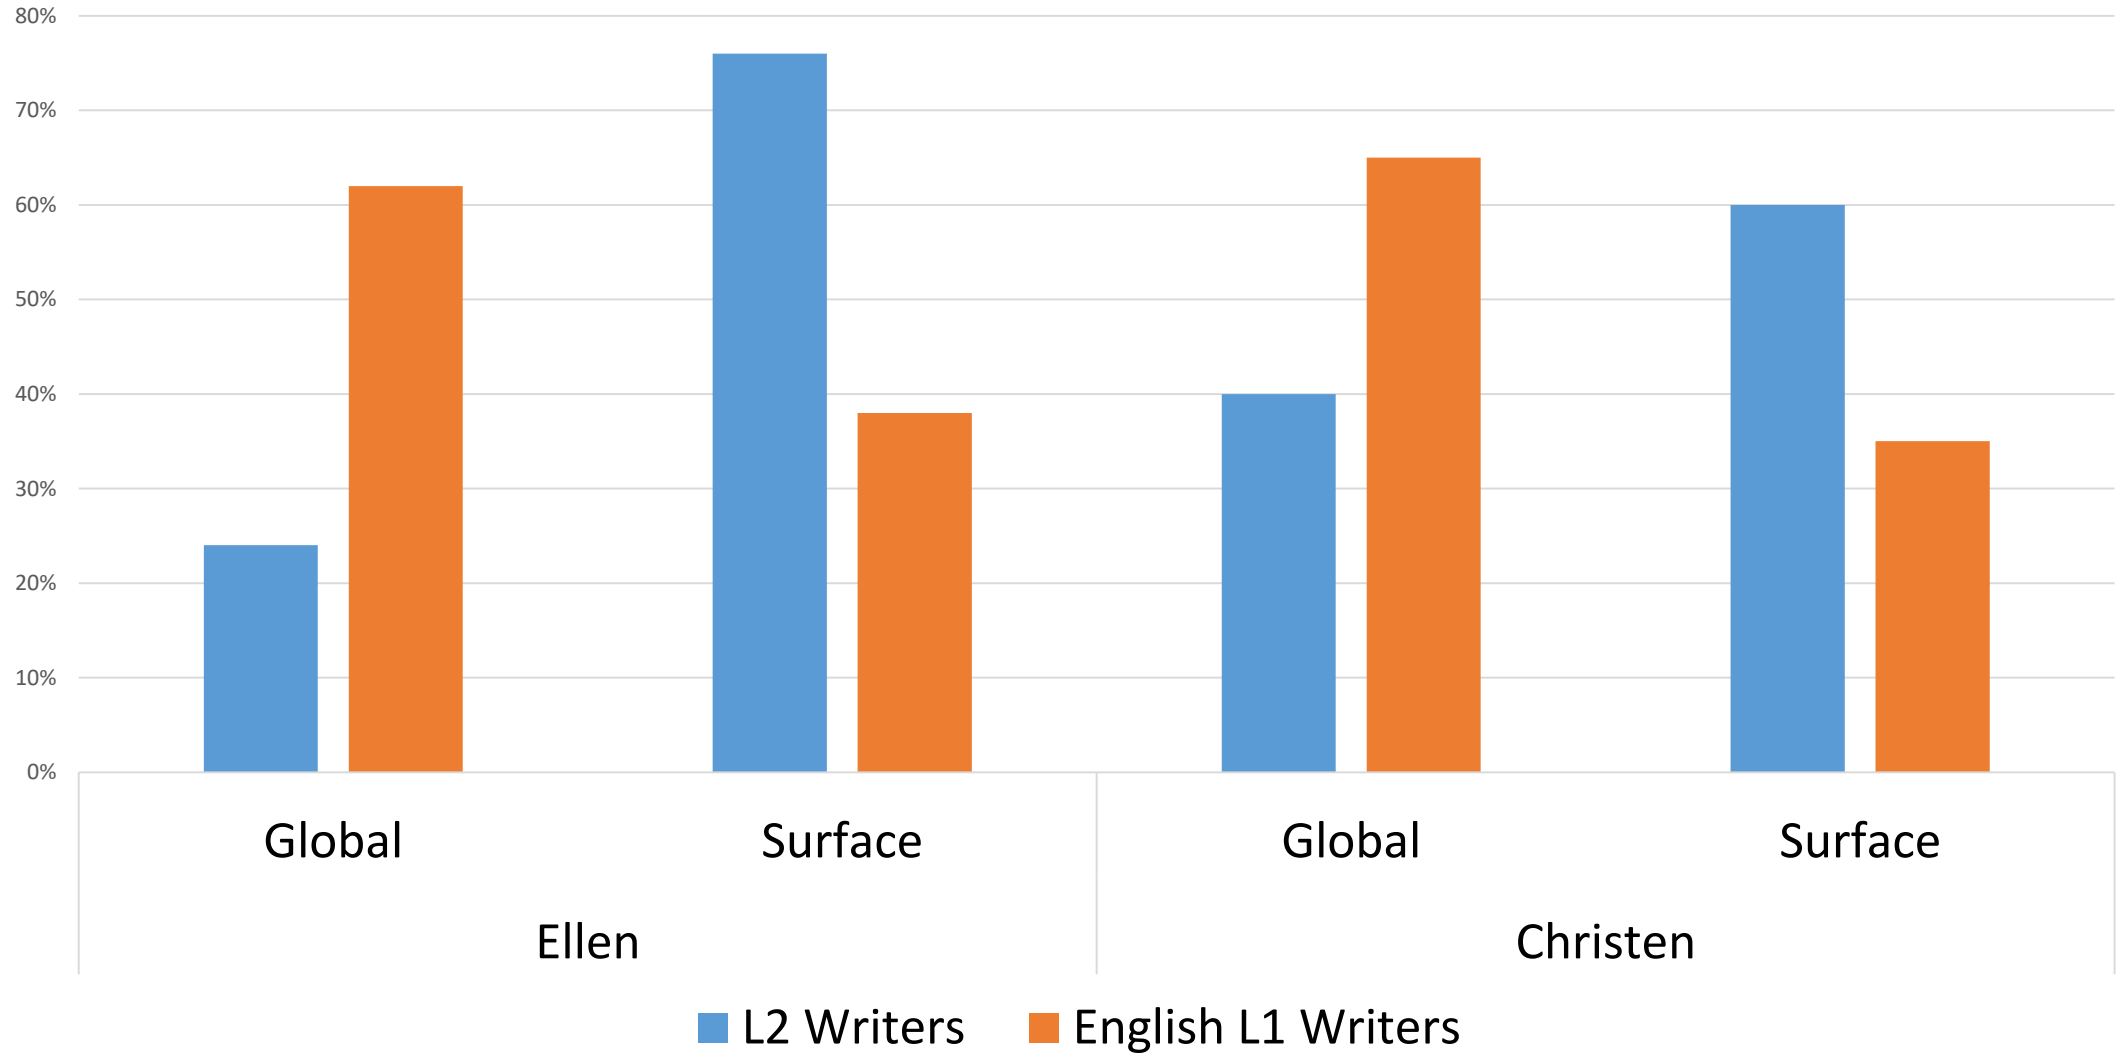

When you've identified something to comment on, how do you decide what to say?

- **Christen:** Sometimes it's questioning, like "I'm not following you here, what is this? What do you mean here?" Sometimes ... I might say "ok, so your thesis seems to be XYZ... is this accurate?" or "I'm having trouble following you at this part of the paper, can you strengthen your topic sentences?" ... as much as possible, I try to write down what I say out loud.

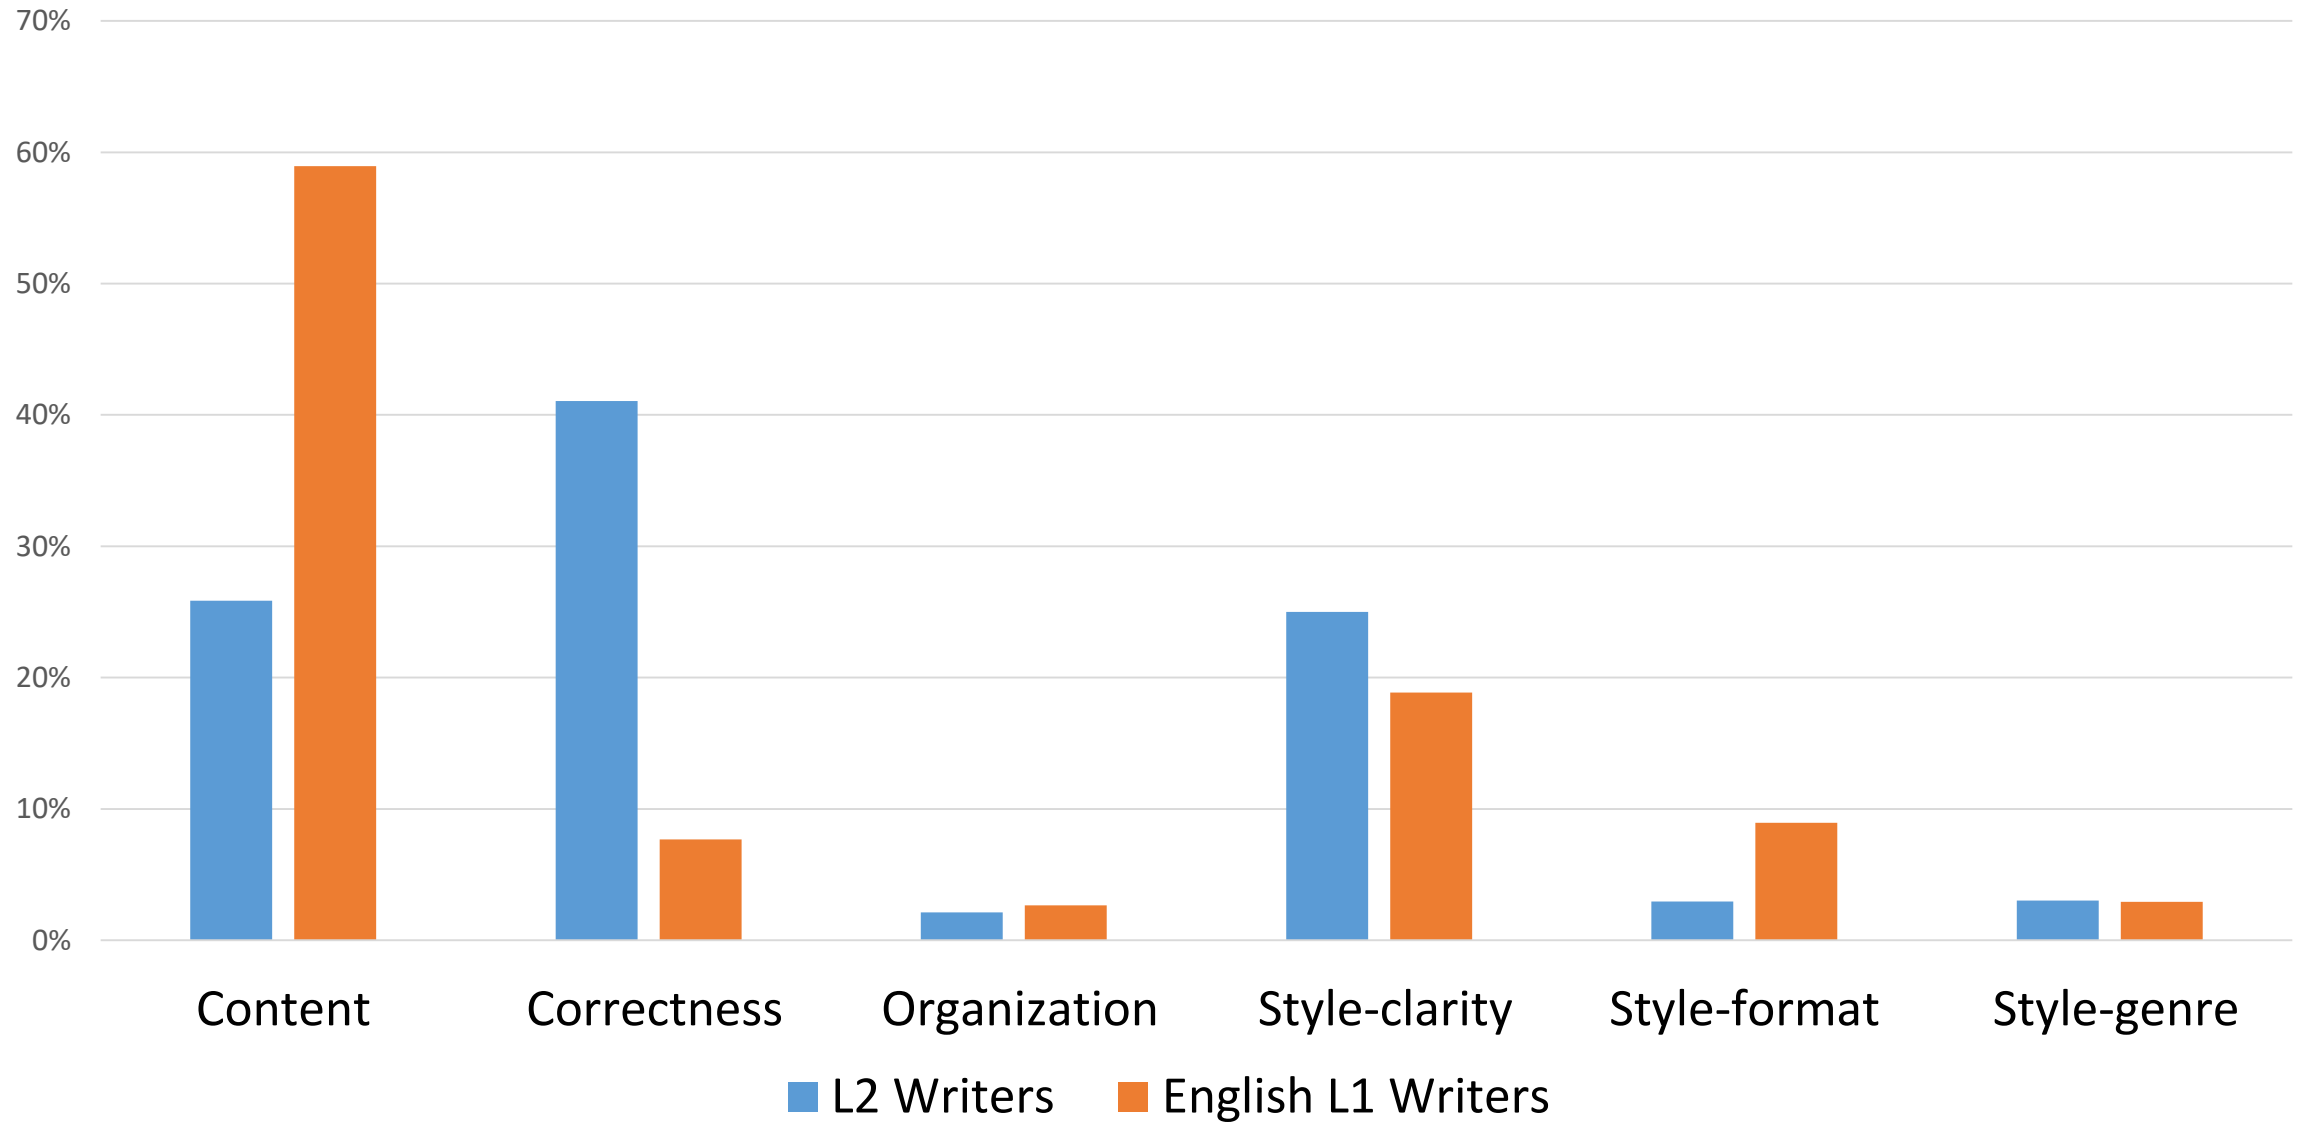

Three Applications

- Comparing comments written to L1 and L2 English writers
- Comparing summative and 'side' comments
- Observing change over time

Proportion of Type, L2 & L1 Writers

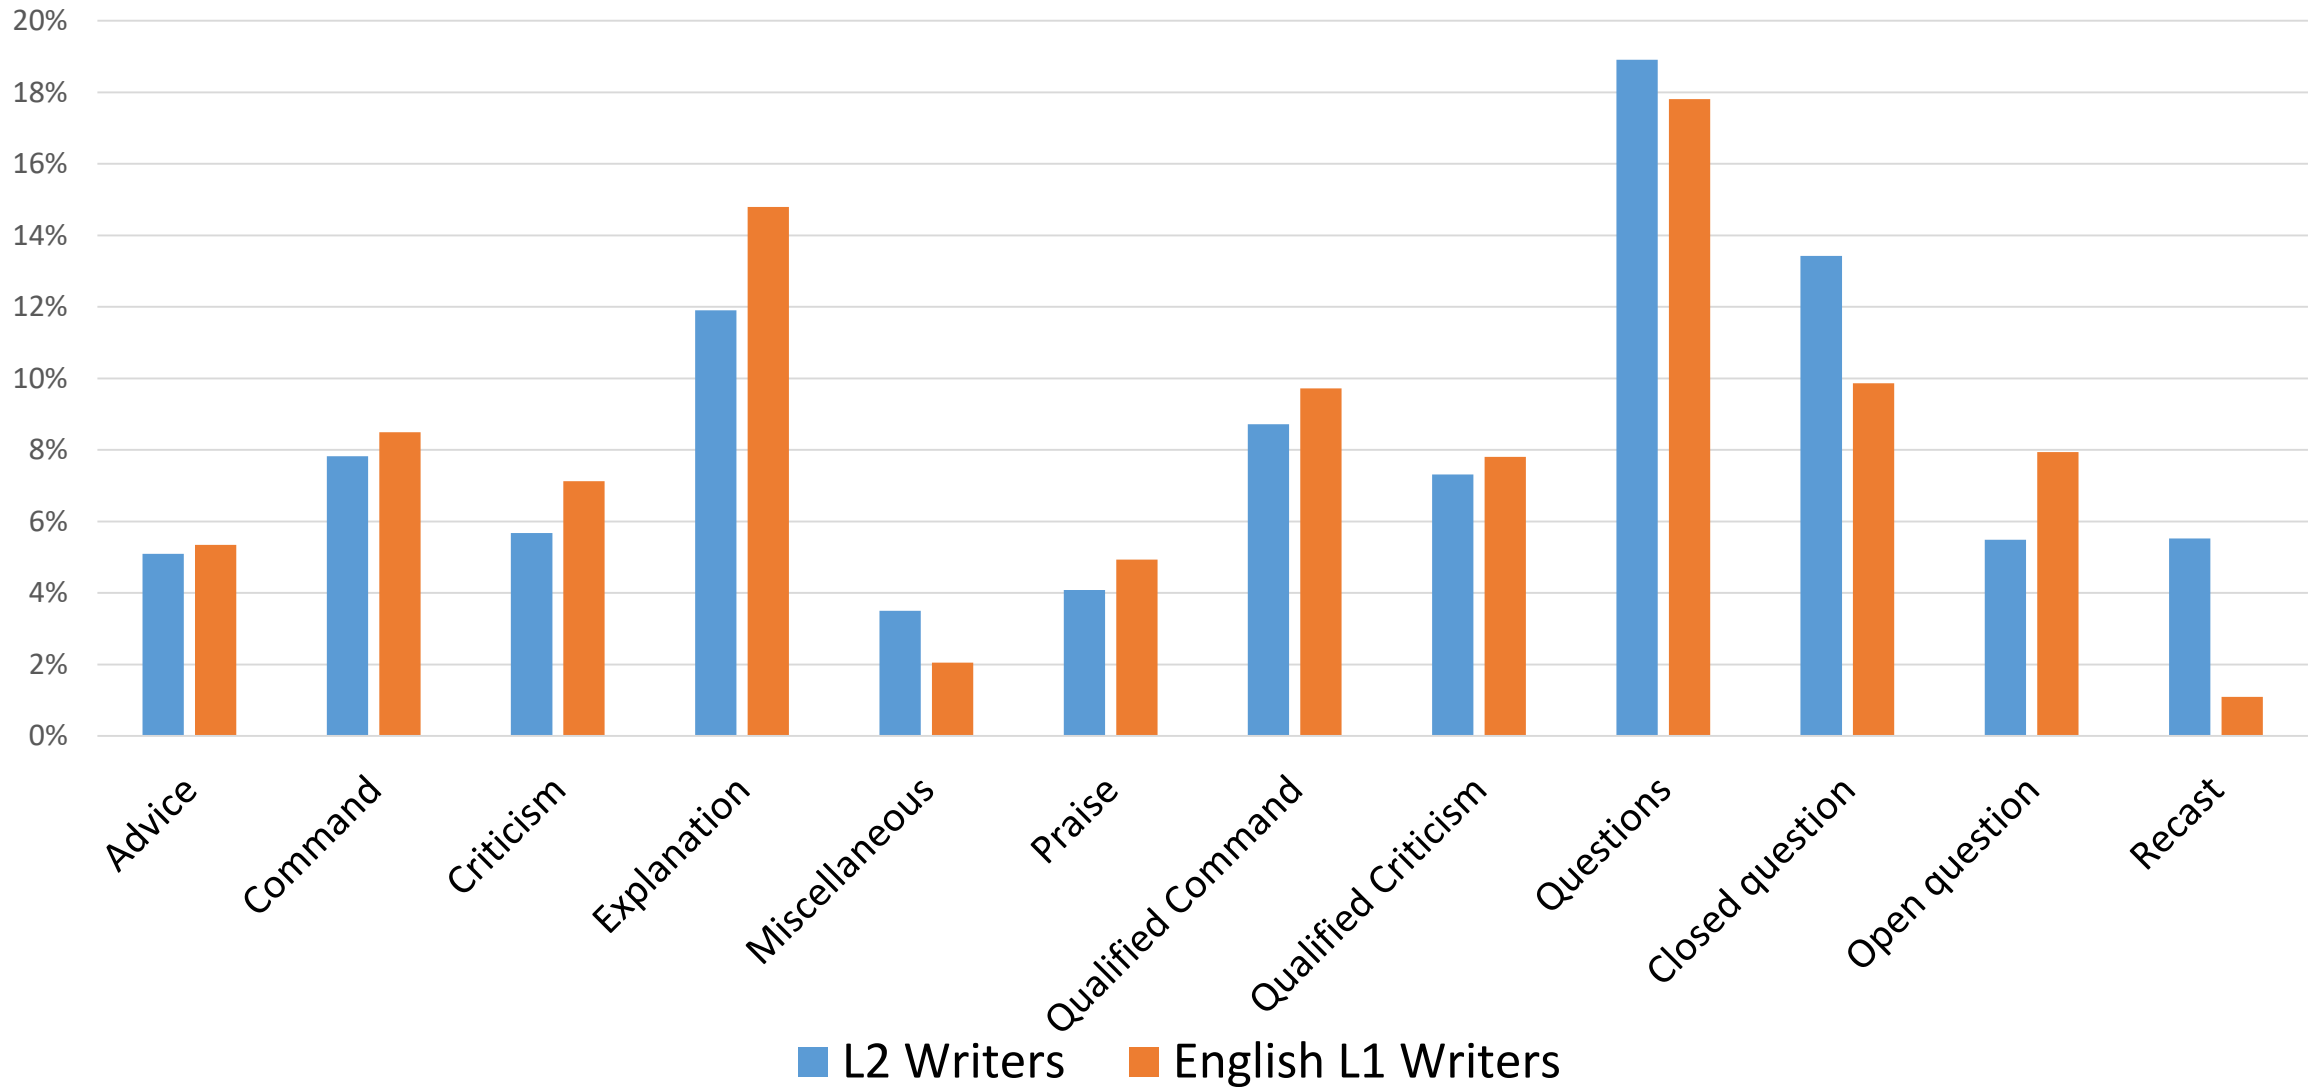

Proportion of Focus, L2 & L1 Writers– Ellen

Proportion of Mode, L2 & L1 Writers– Ellen

Proportion of Mode, L2 & L1 Writers– Christen

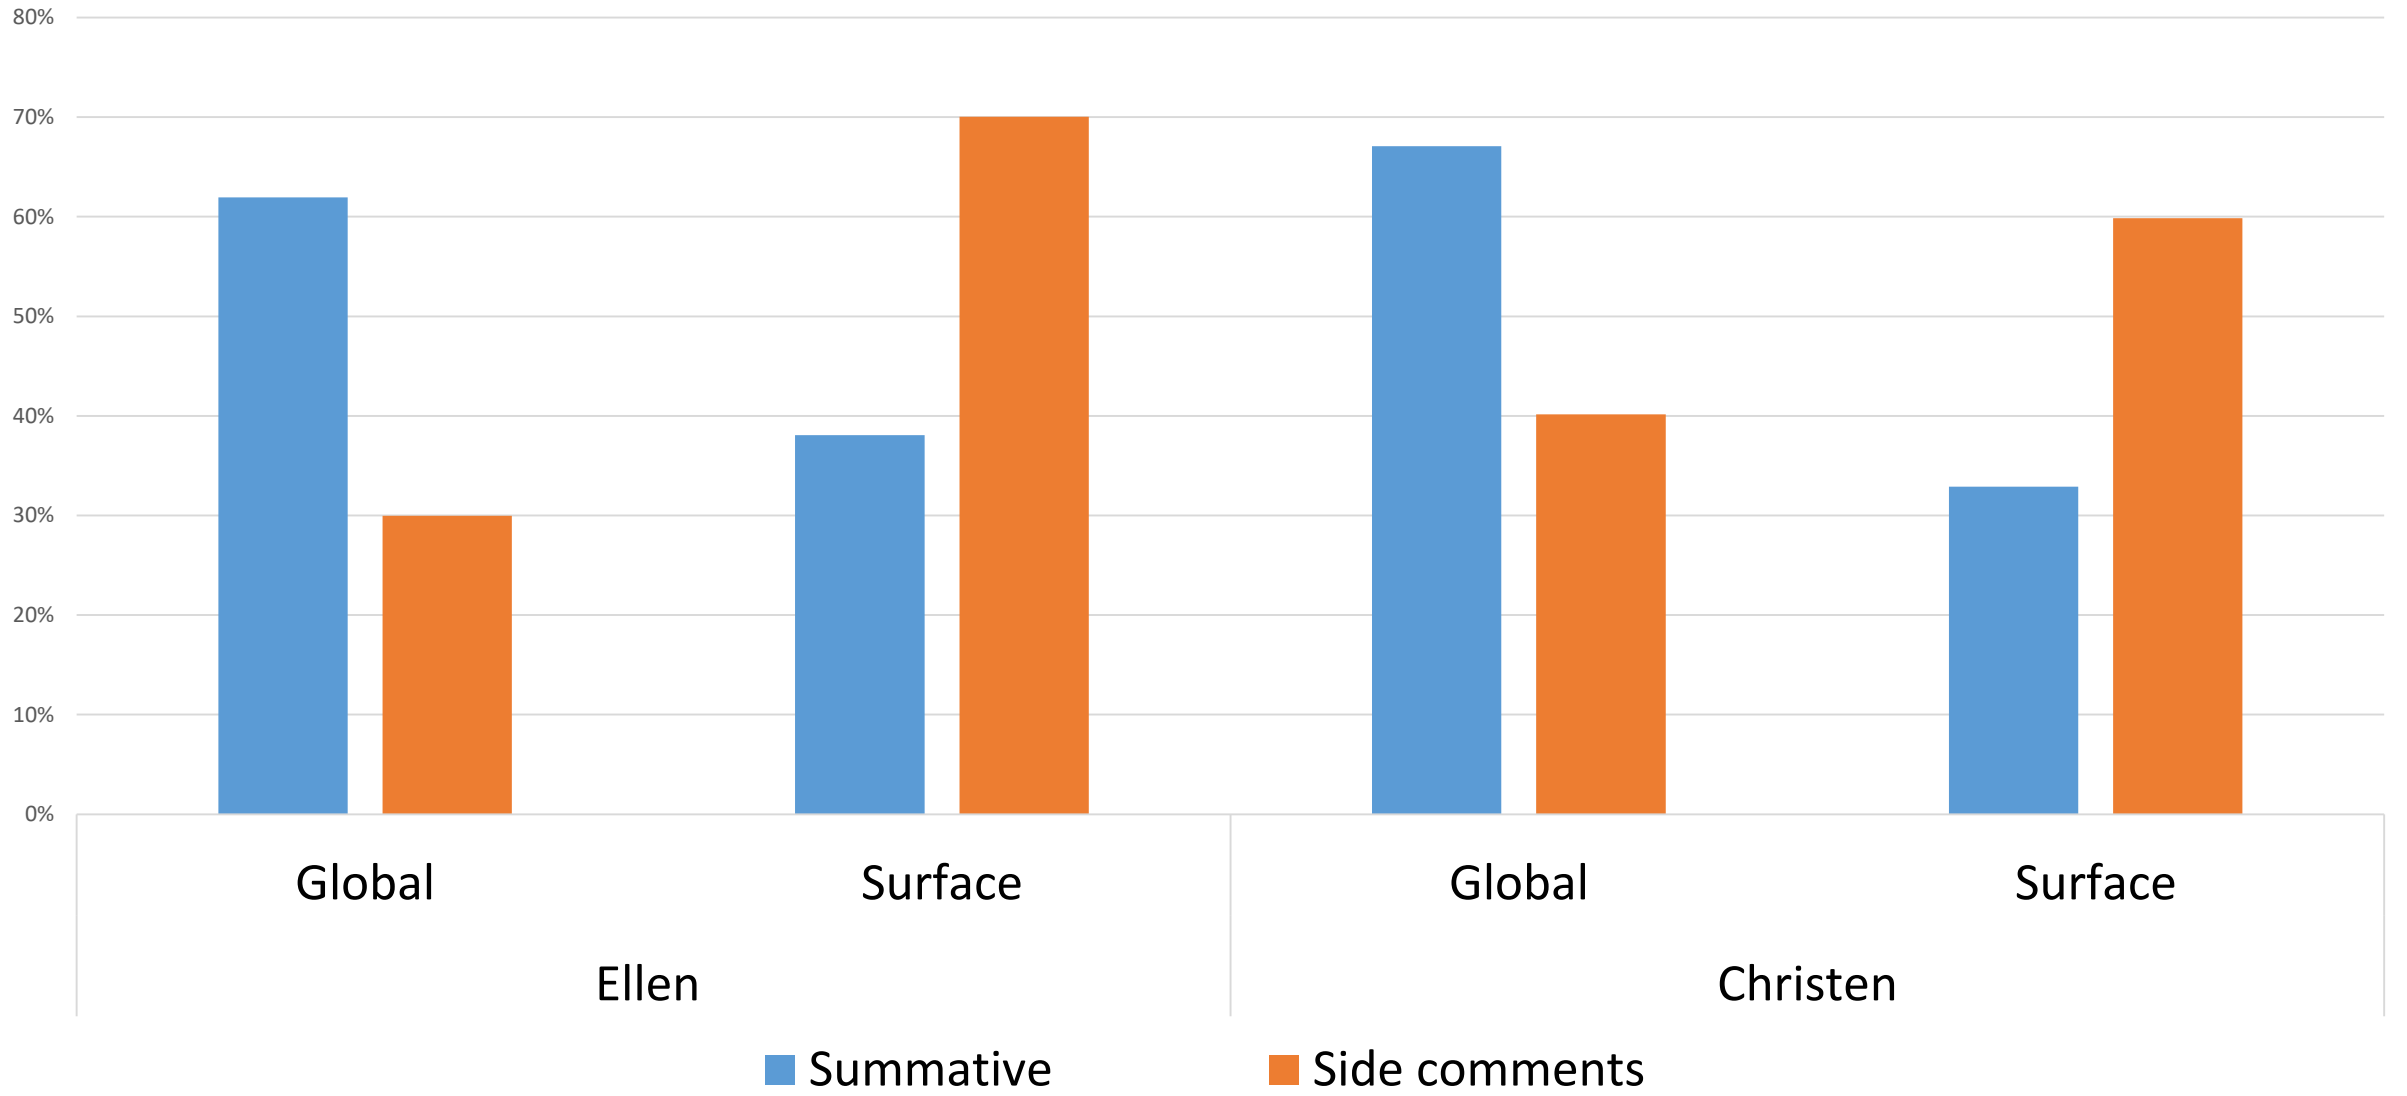

Interviews: L1 and L2 English Writers

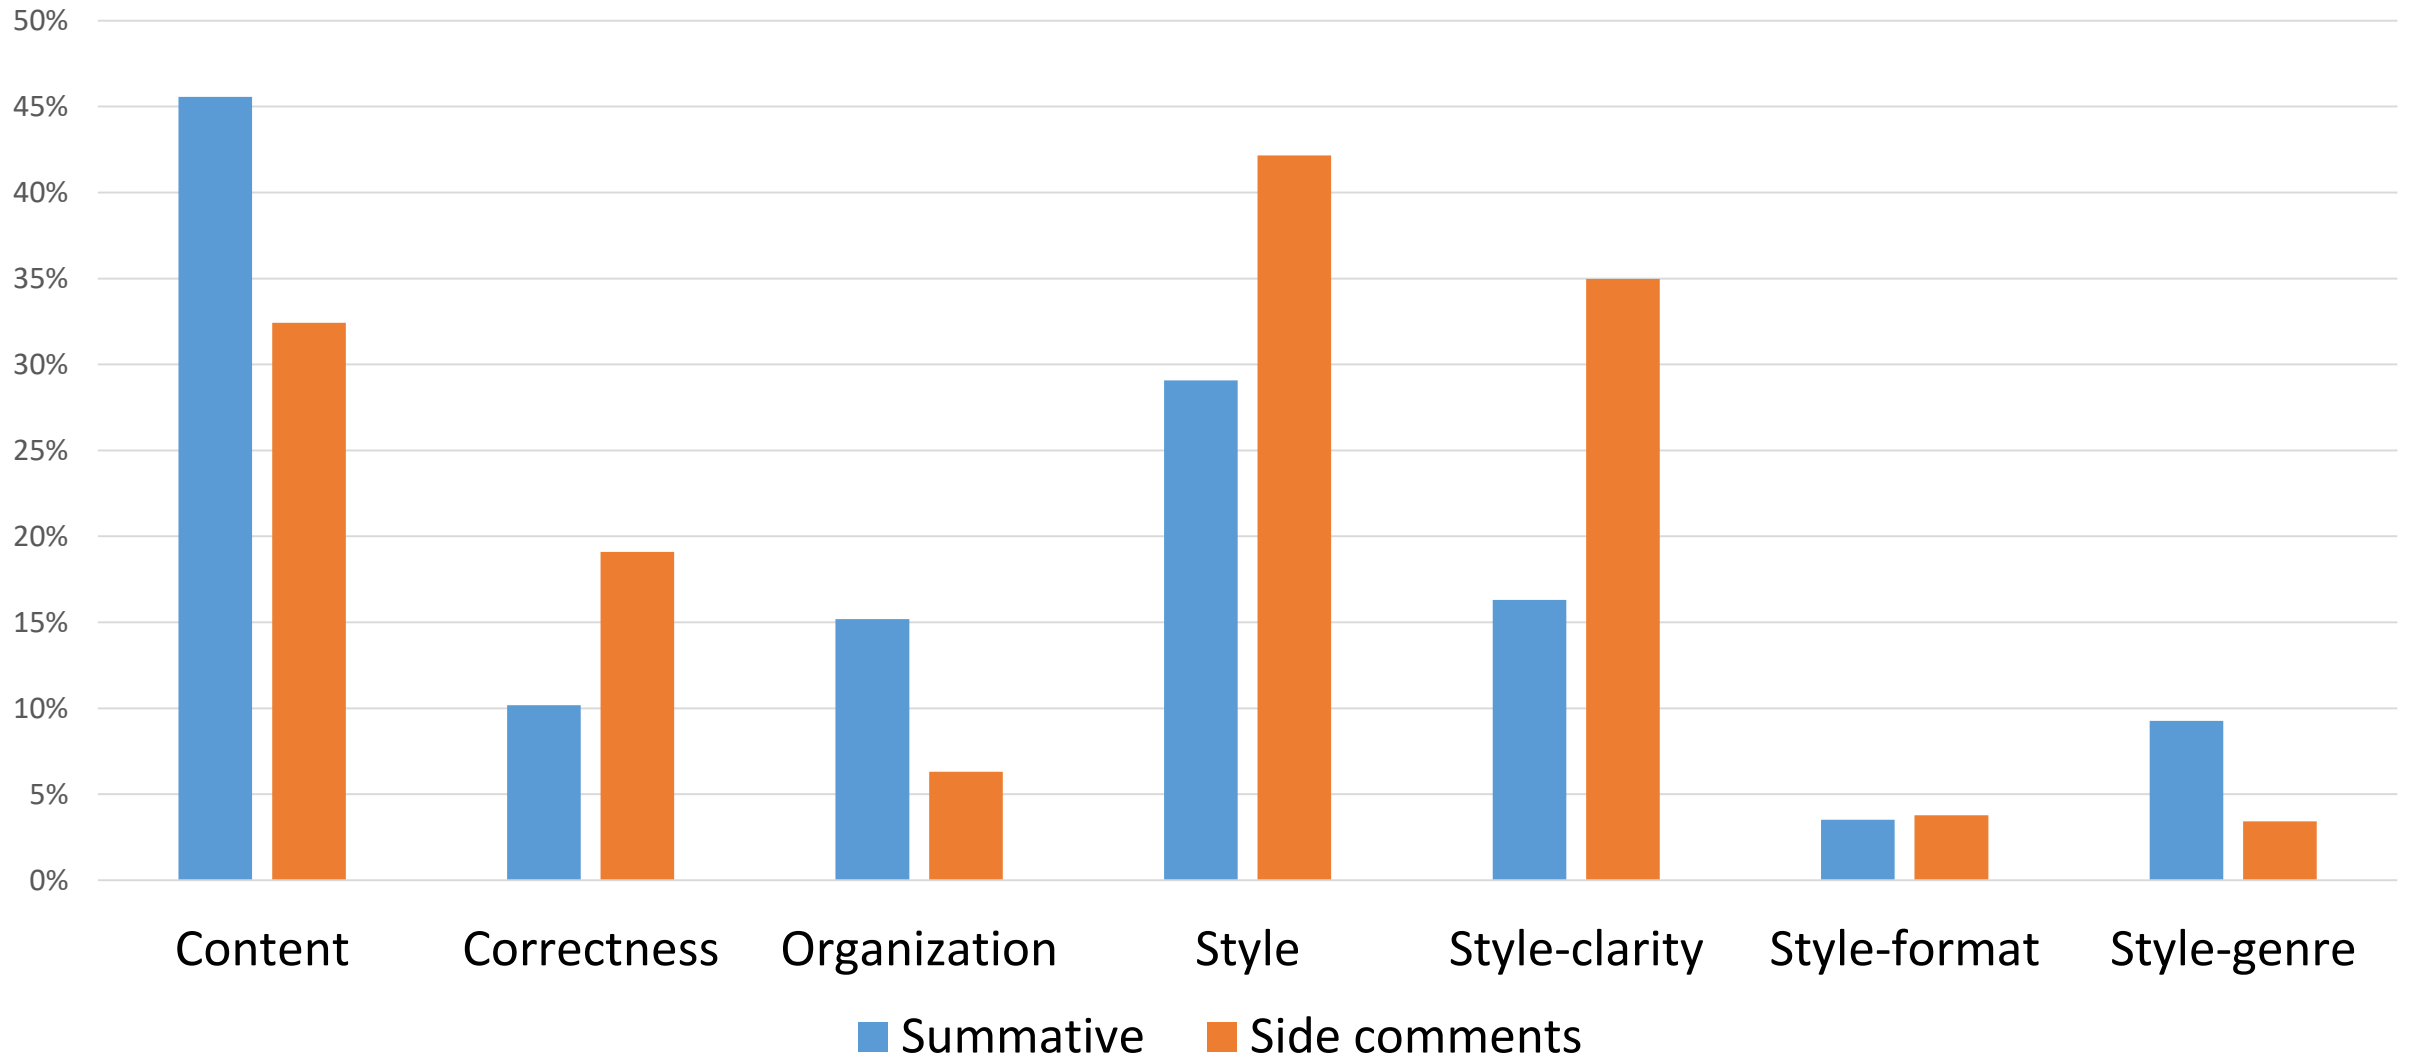

What would you say are the most common issues that you address in online submissions?

- **Ellen:** A lot of sessions in the summer I feel like I've been getting a lot more online sessions with a lot of international students, and a lot of international students want help with grammar.

Proportion of Type, Summative and Side

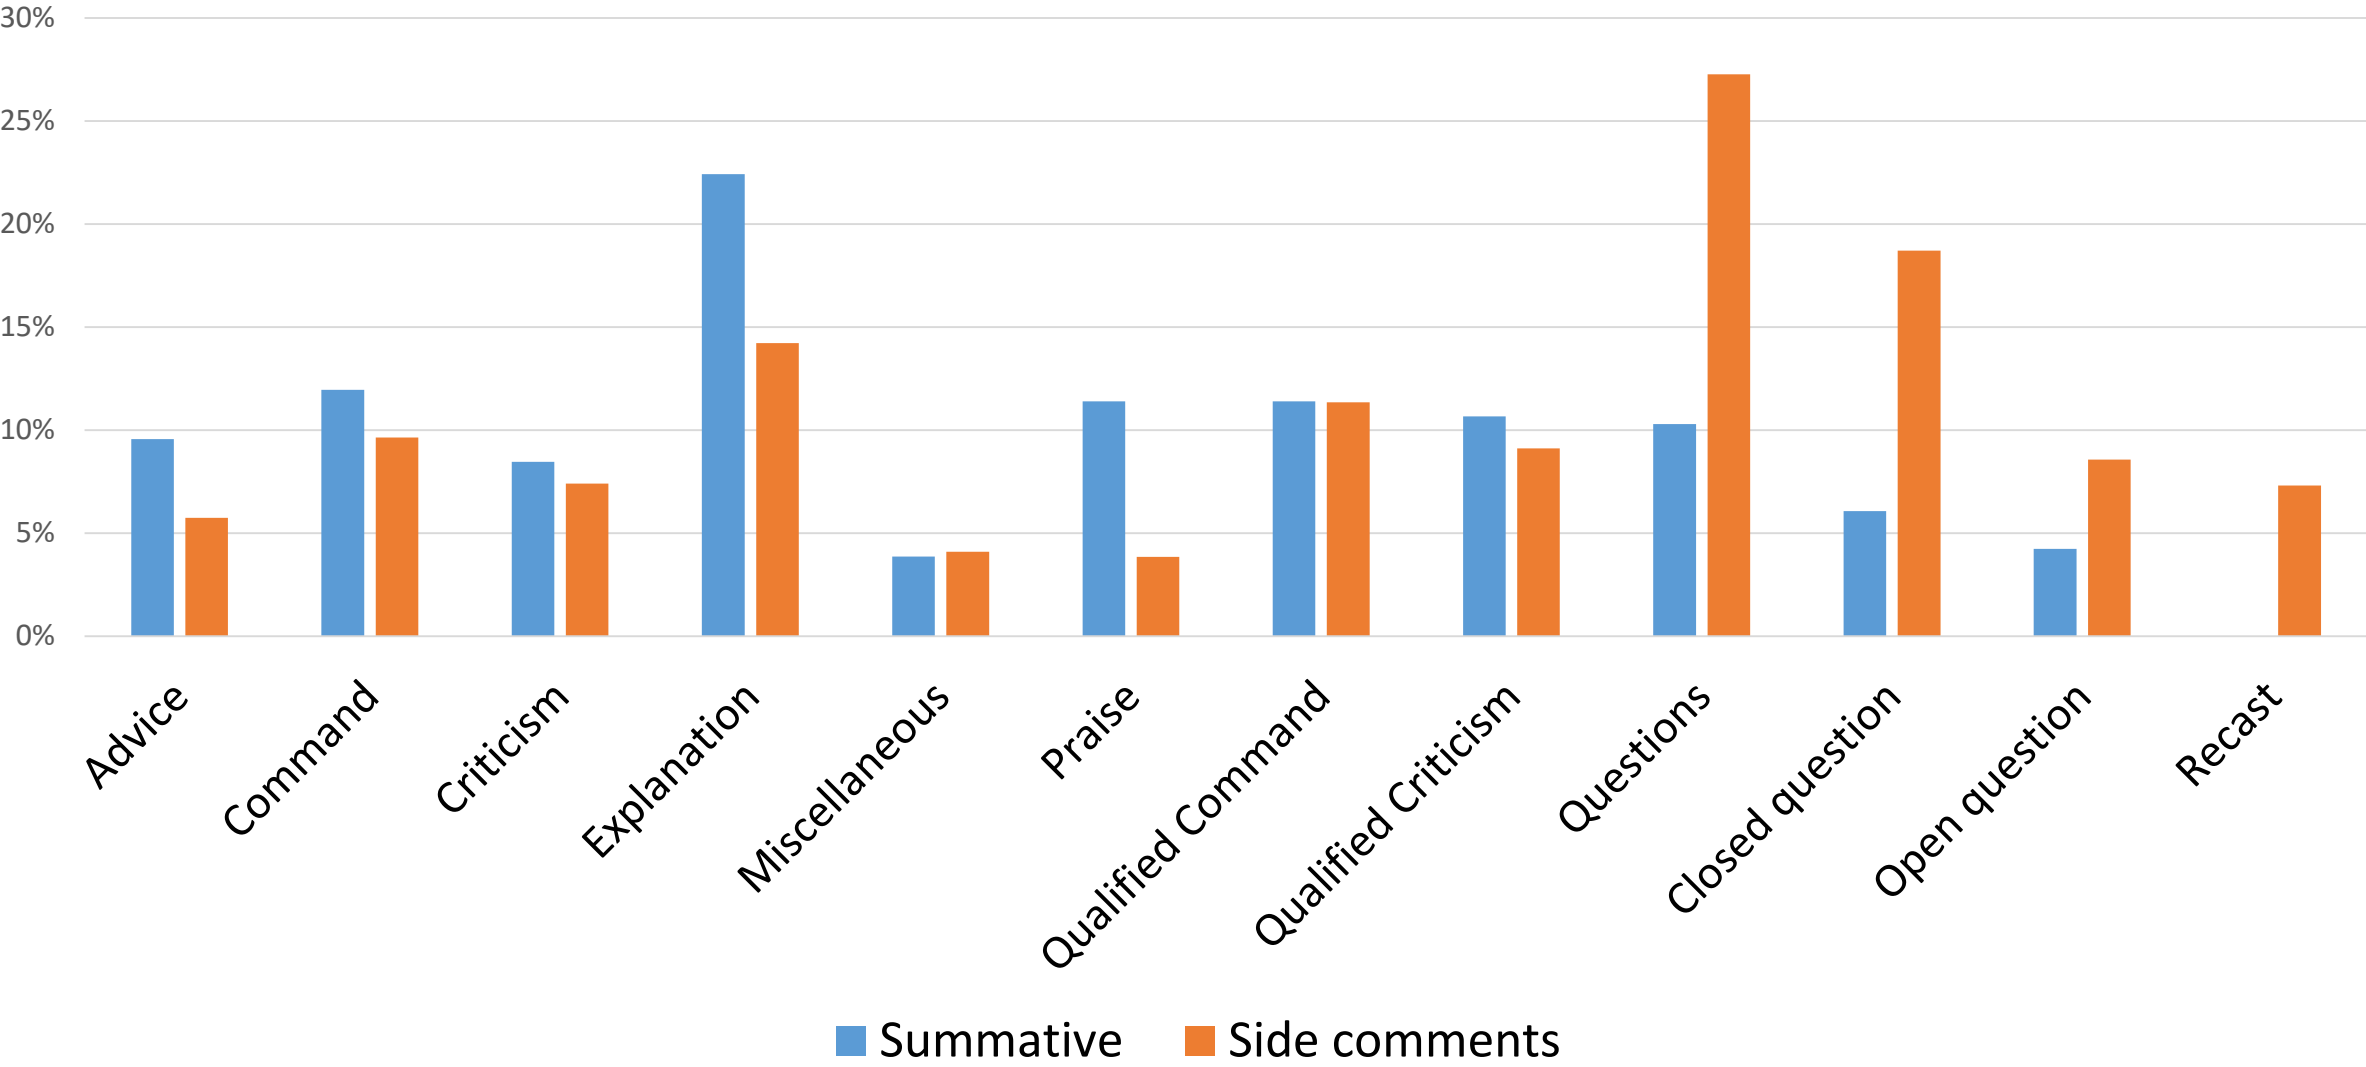

Proportion of Focus, Summative and Side – Christen

Proportion of Mode, Summative and Side – Ellen

Proportion of Mode, Summative and Side – Christen

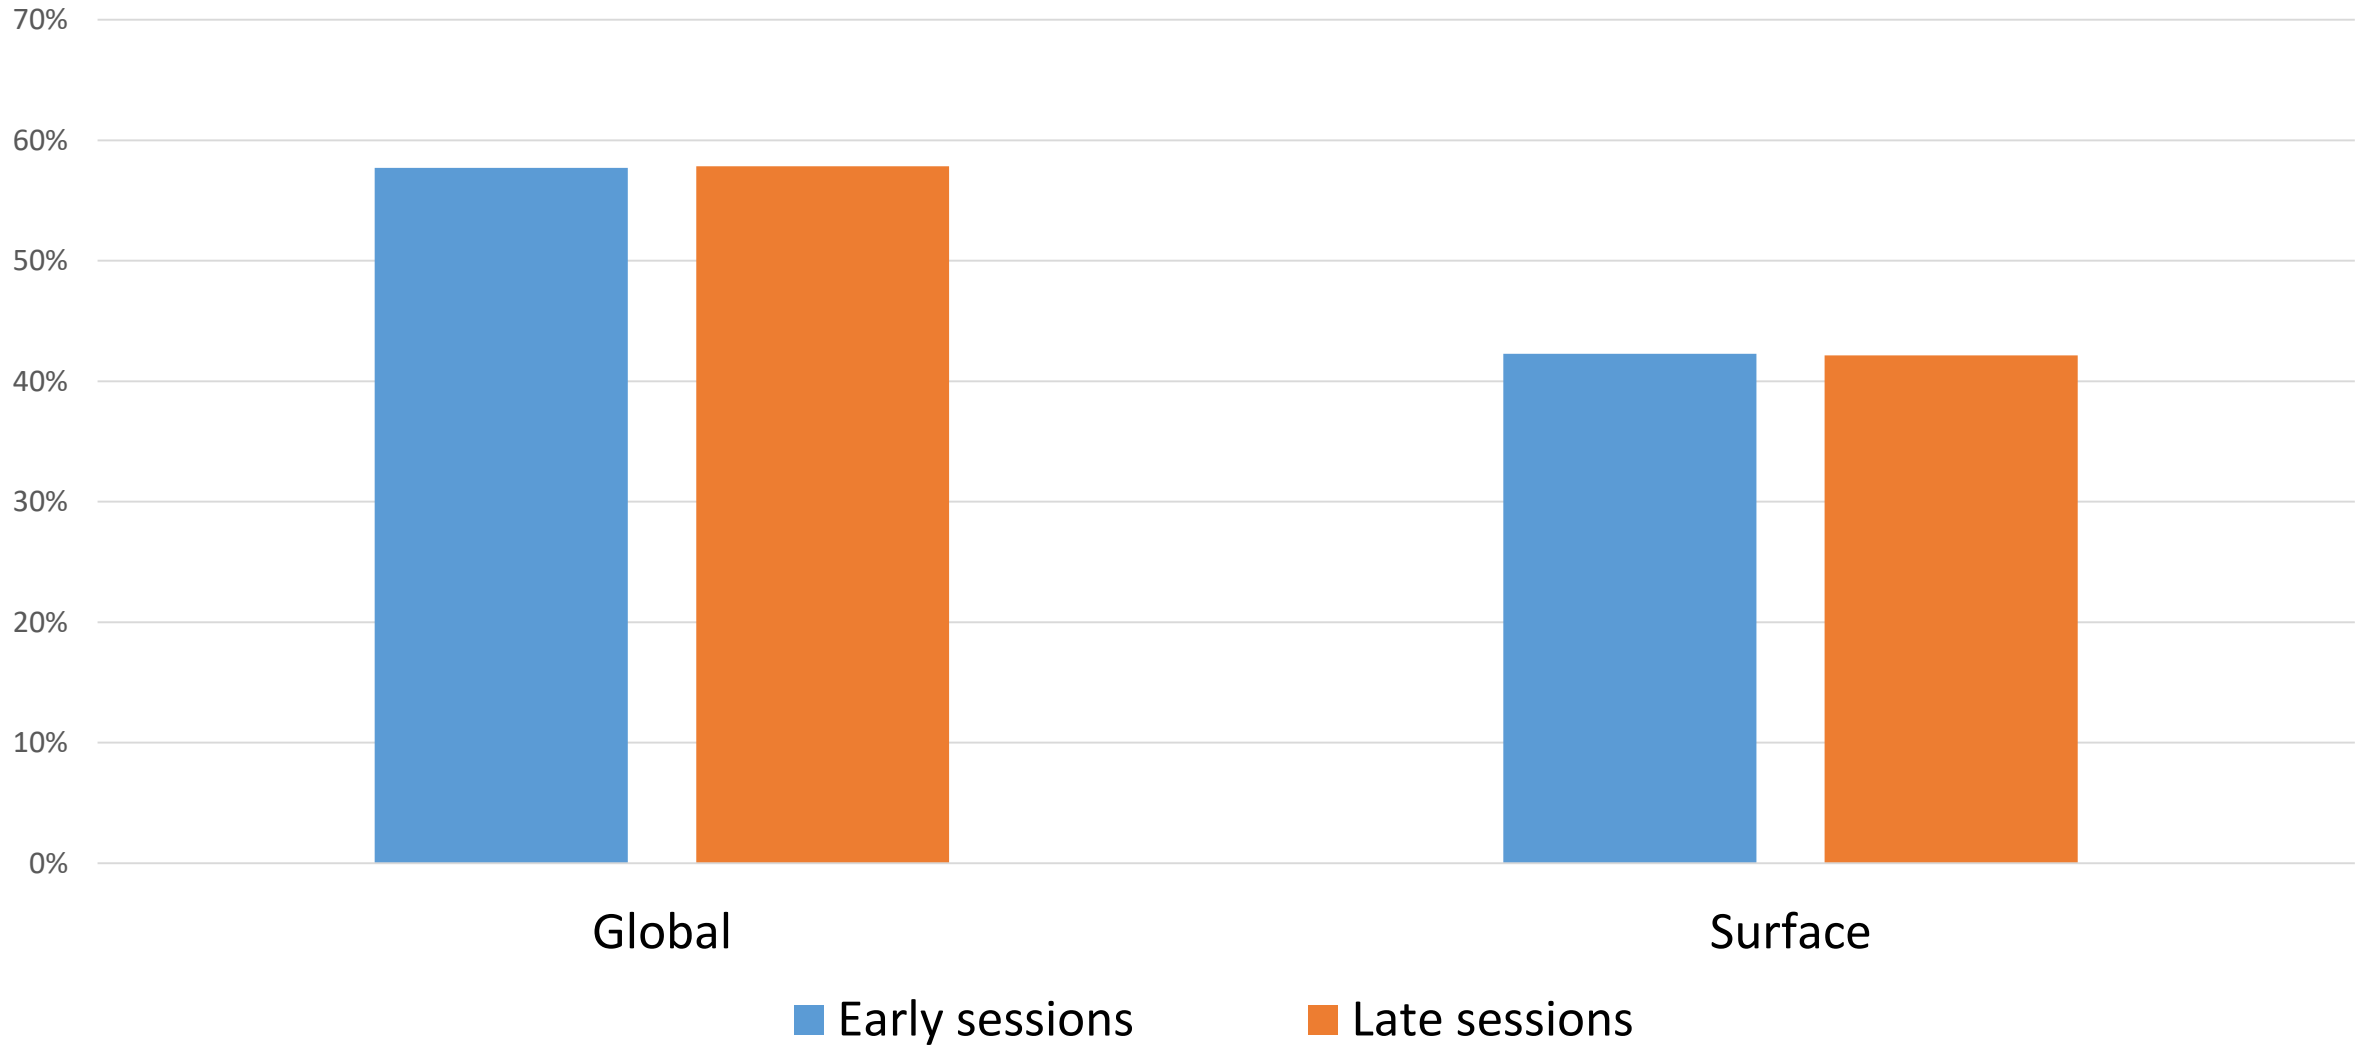

Interviews: Summative comments

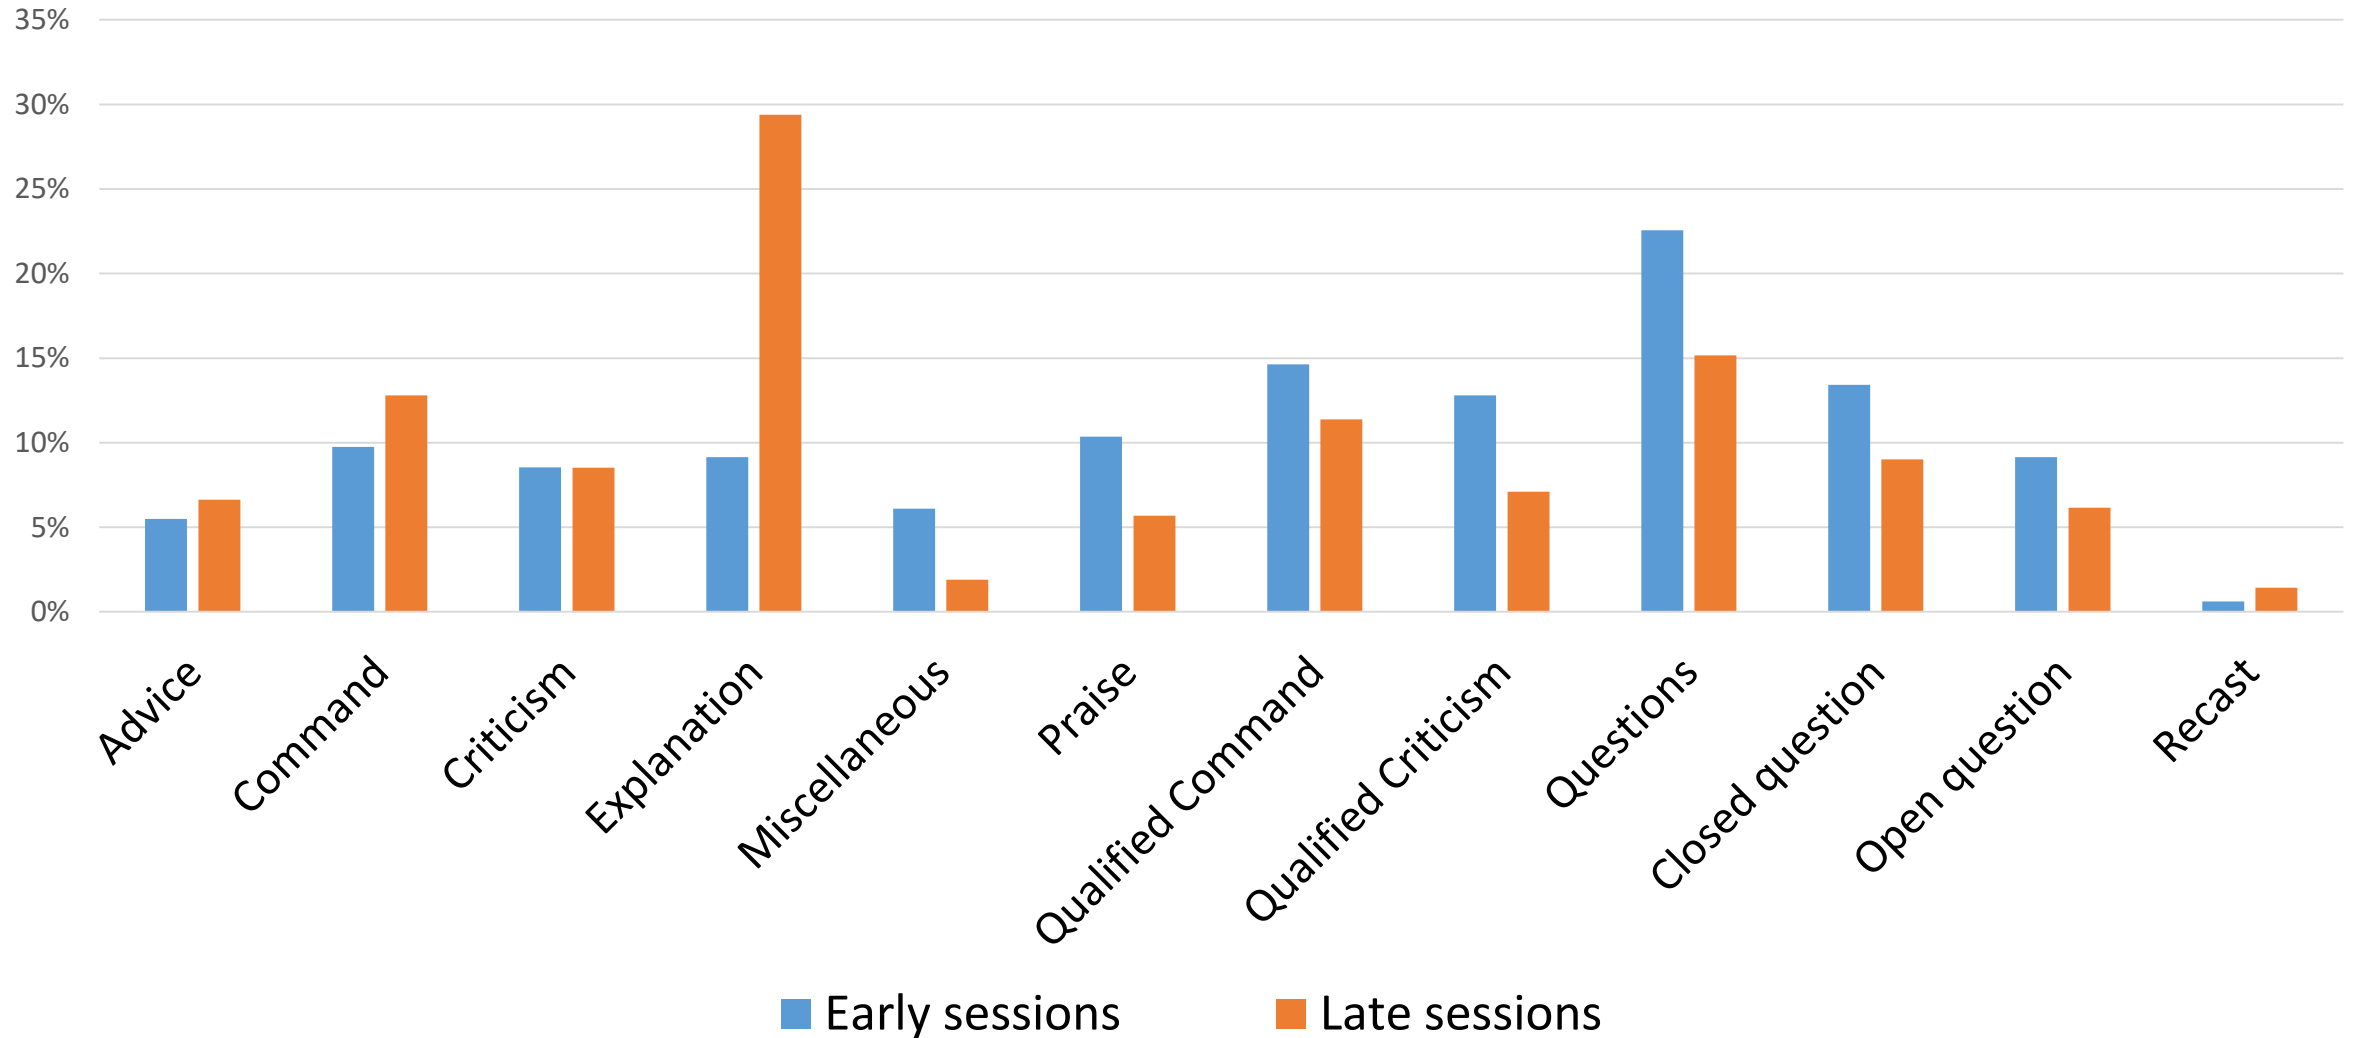

When you've identified something that you need to comment on, how do you decide what to say?

- **Ellen:** So, when I've identified something, it depends on what it is. If it's, like, structure, then I phrase what I want to say differently. **That's more for something I can say as a summative comment at the end...** organization, larger order concerns, that kind of stuff, that's something I feel comfortable more so saying in a summative comment.
- **Ellen:** If it's grammar, I'll usually go ahead and start [reading the document] and I'll just start working on the grammar from the beginning... as soon as I start picking up patterns.

Proportion of Type, Early and Late Sessions – Ellen

Proportion of Mode, Early and Late Sessions – Christen

Challenges

Tutor Comments

It seems to me that there should be a transition here that introduces technological field experiences.

Your use of punctuation is clear and appropriate.

Coding Differences

Focus:

Josh—Content

Vicki—Organization

Focus:

Josh—Correctness

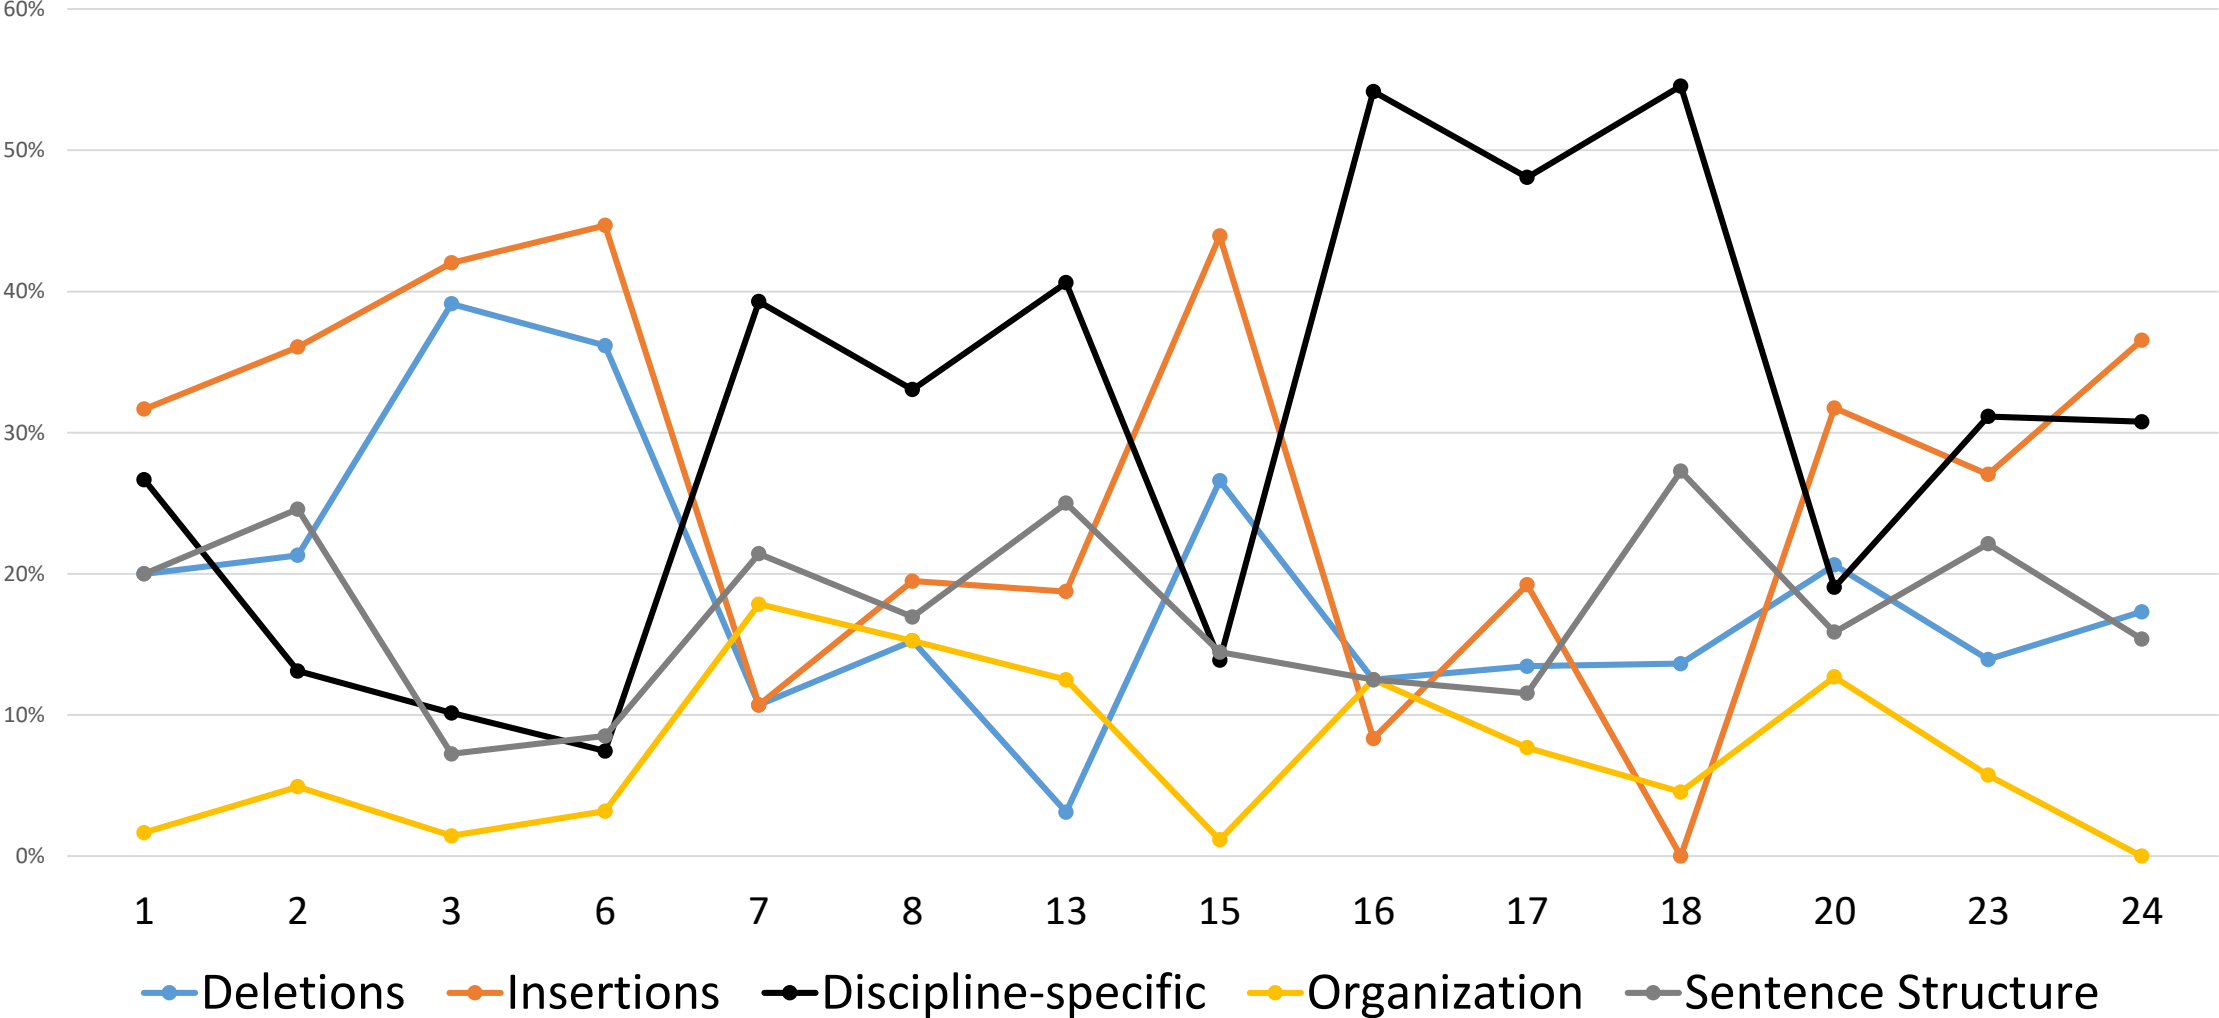

Vicki—Style-Clarity

Graduate Writing Groups

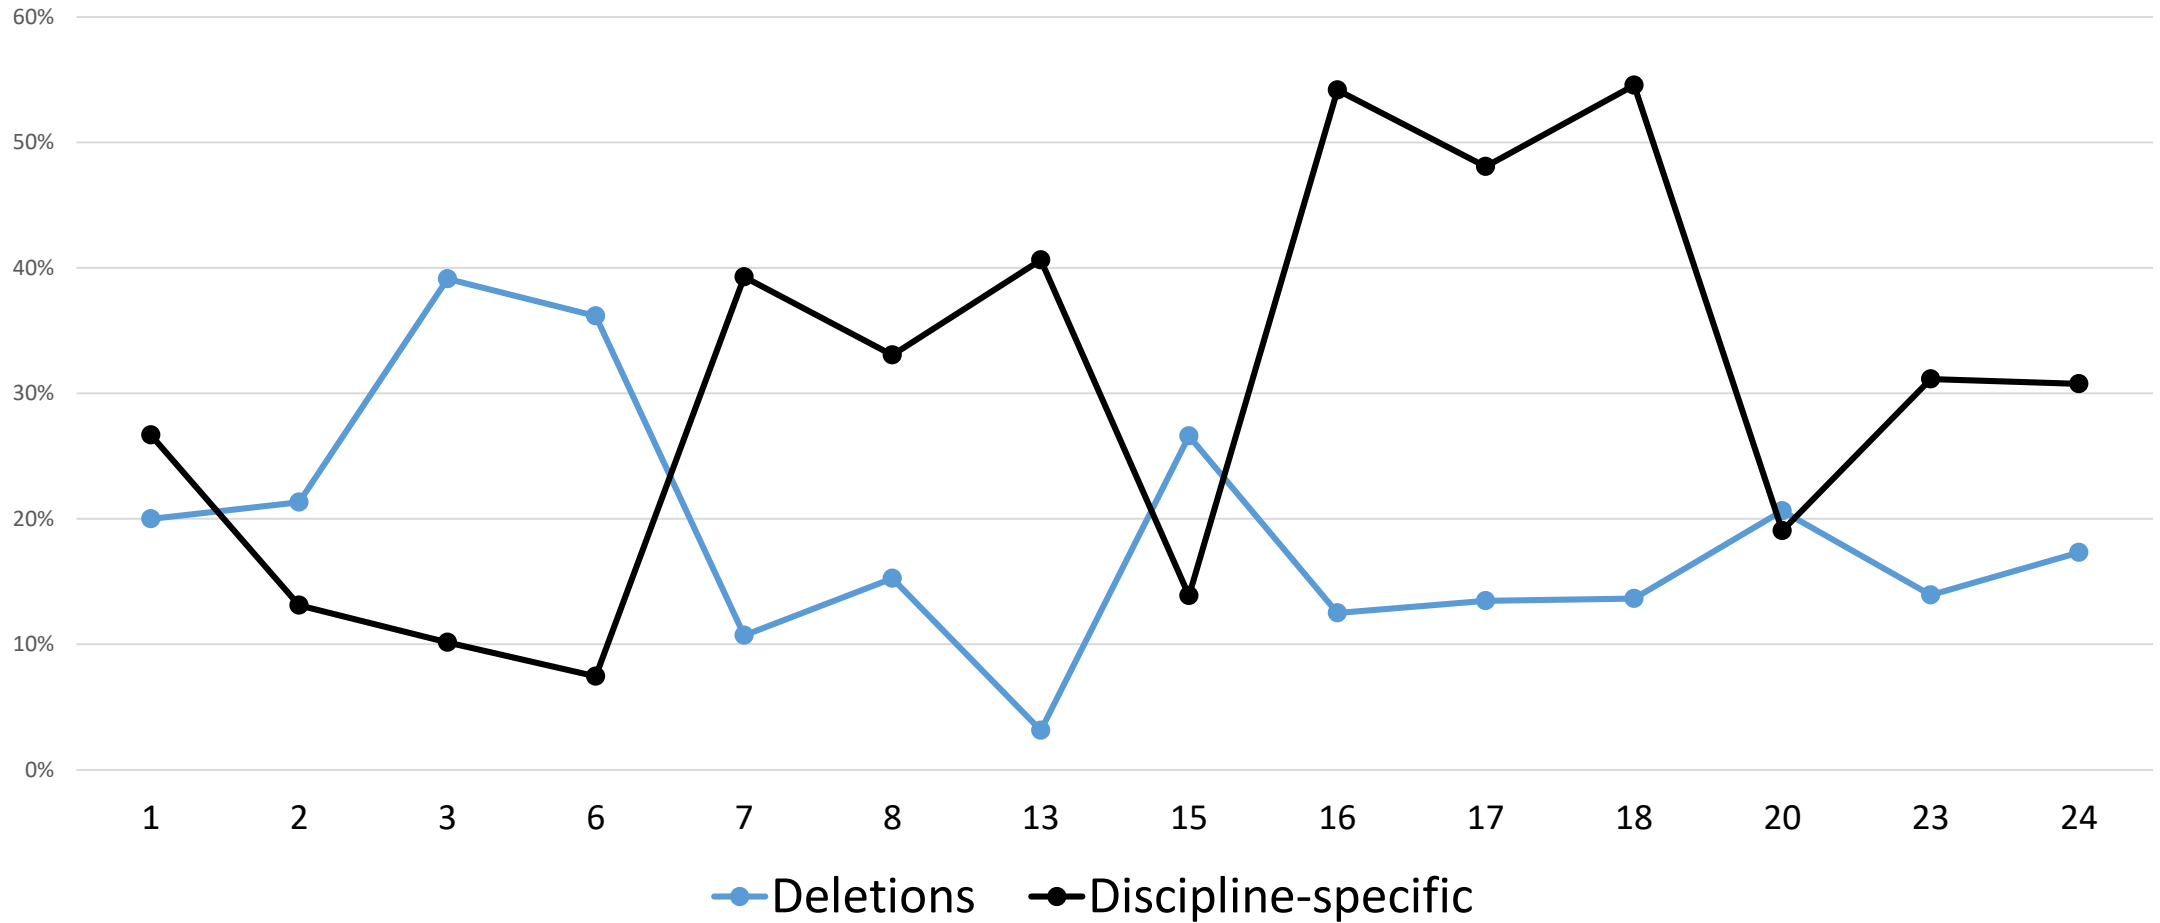

Coding peer comments

Mary, Method 2, Percents of Total Comments

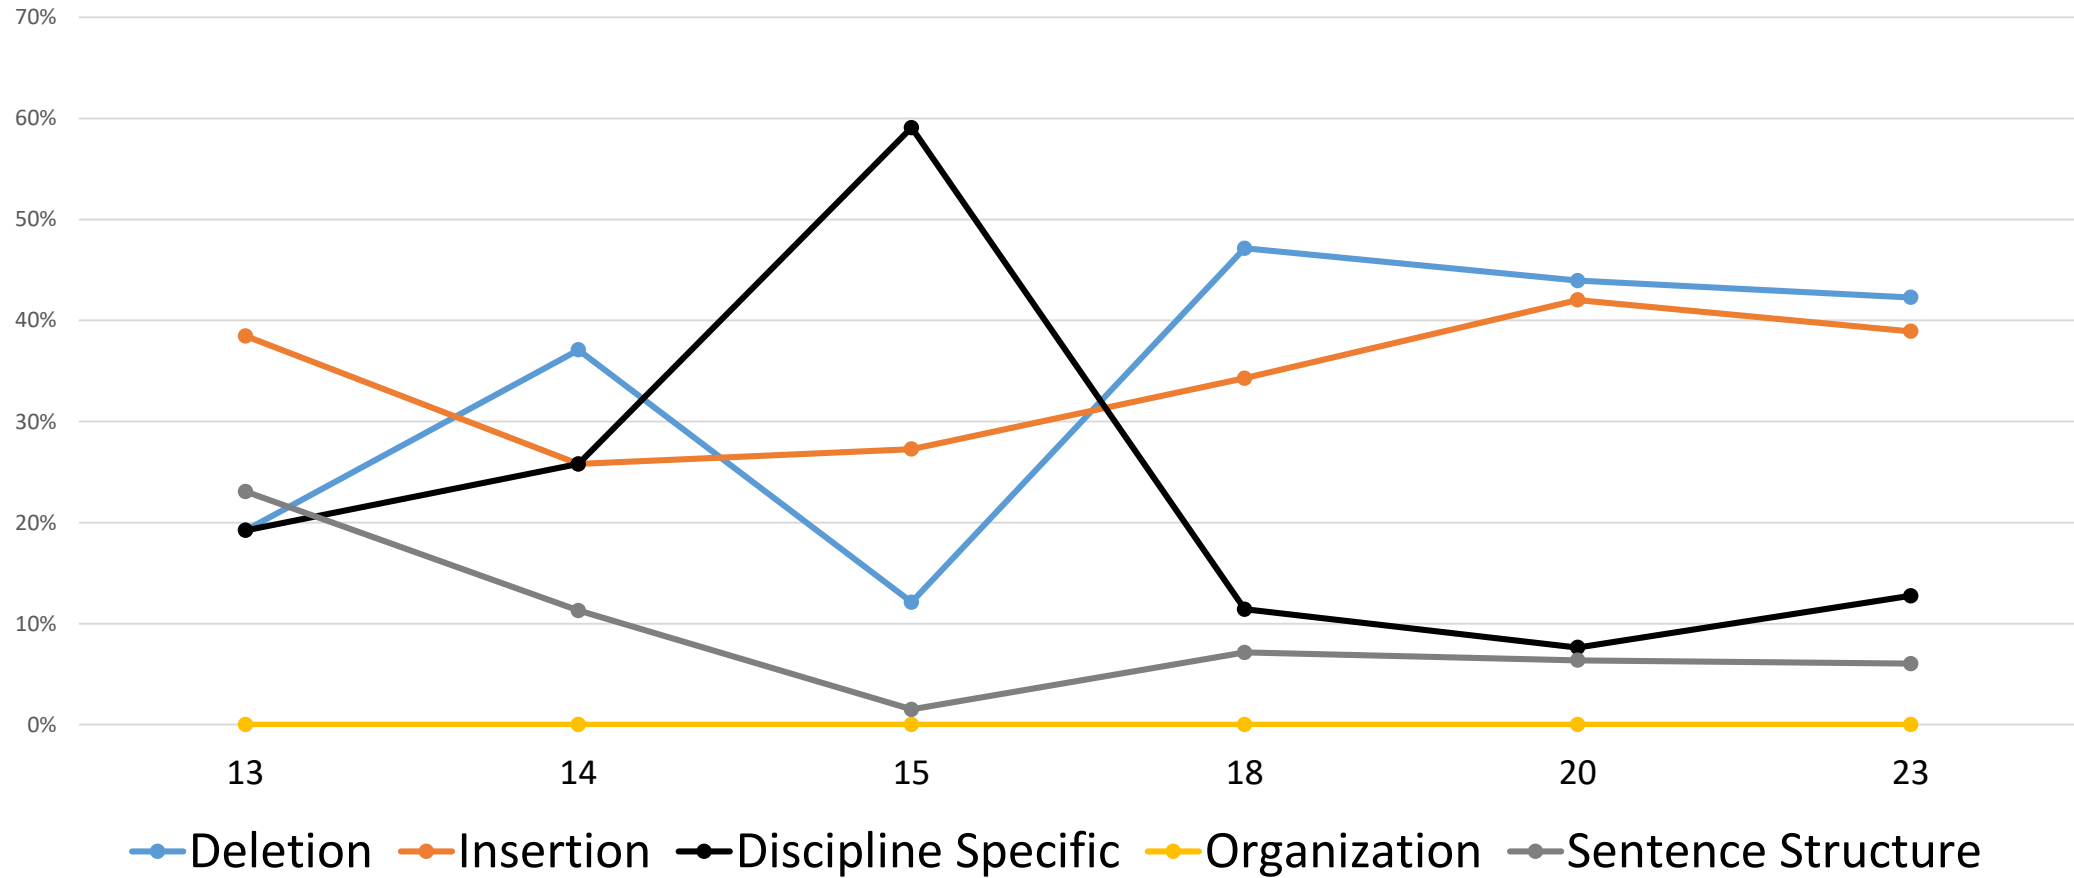

Mary, Method 2

Opposing Movement of LOC and HOC Comments

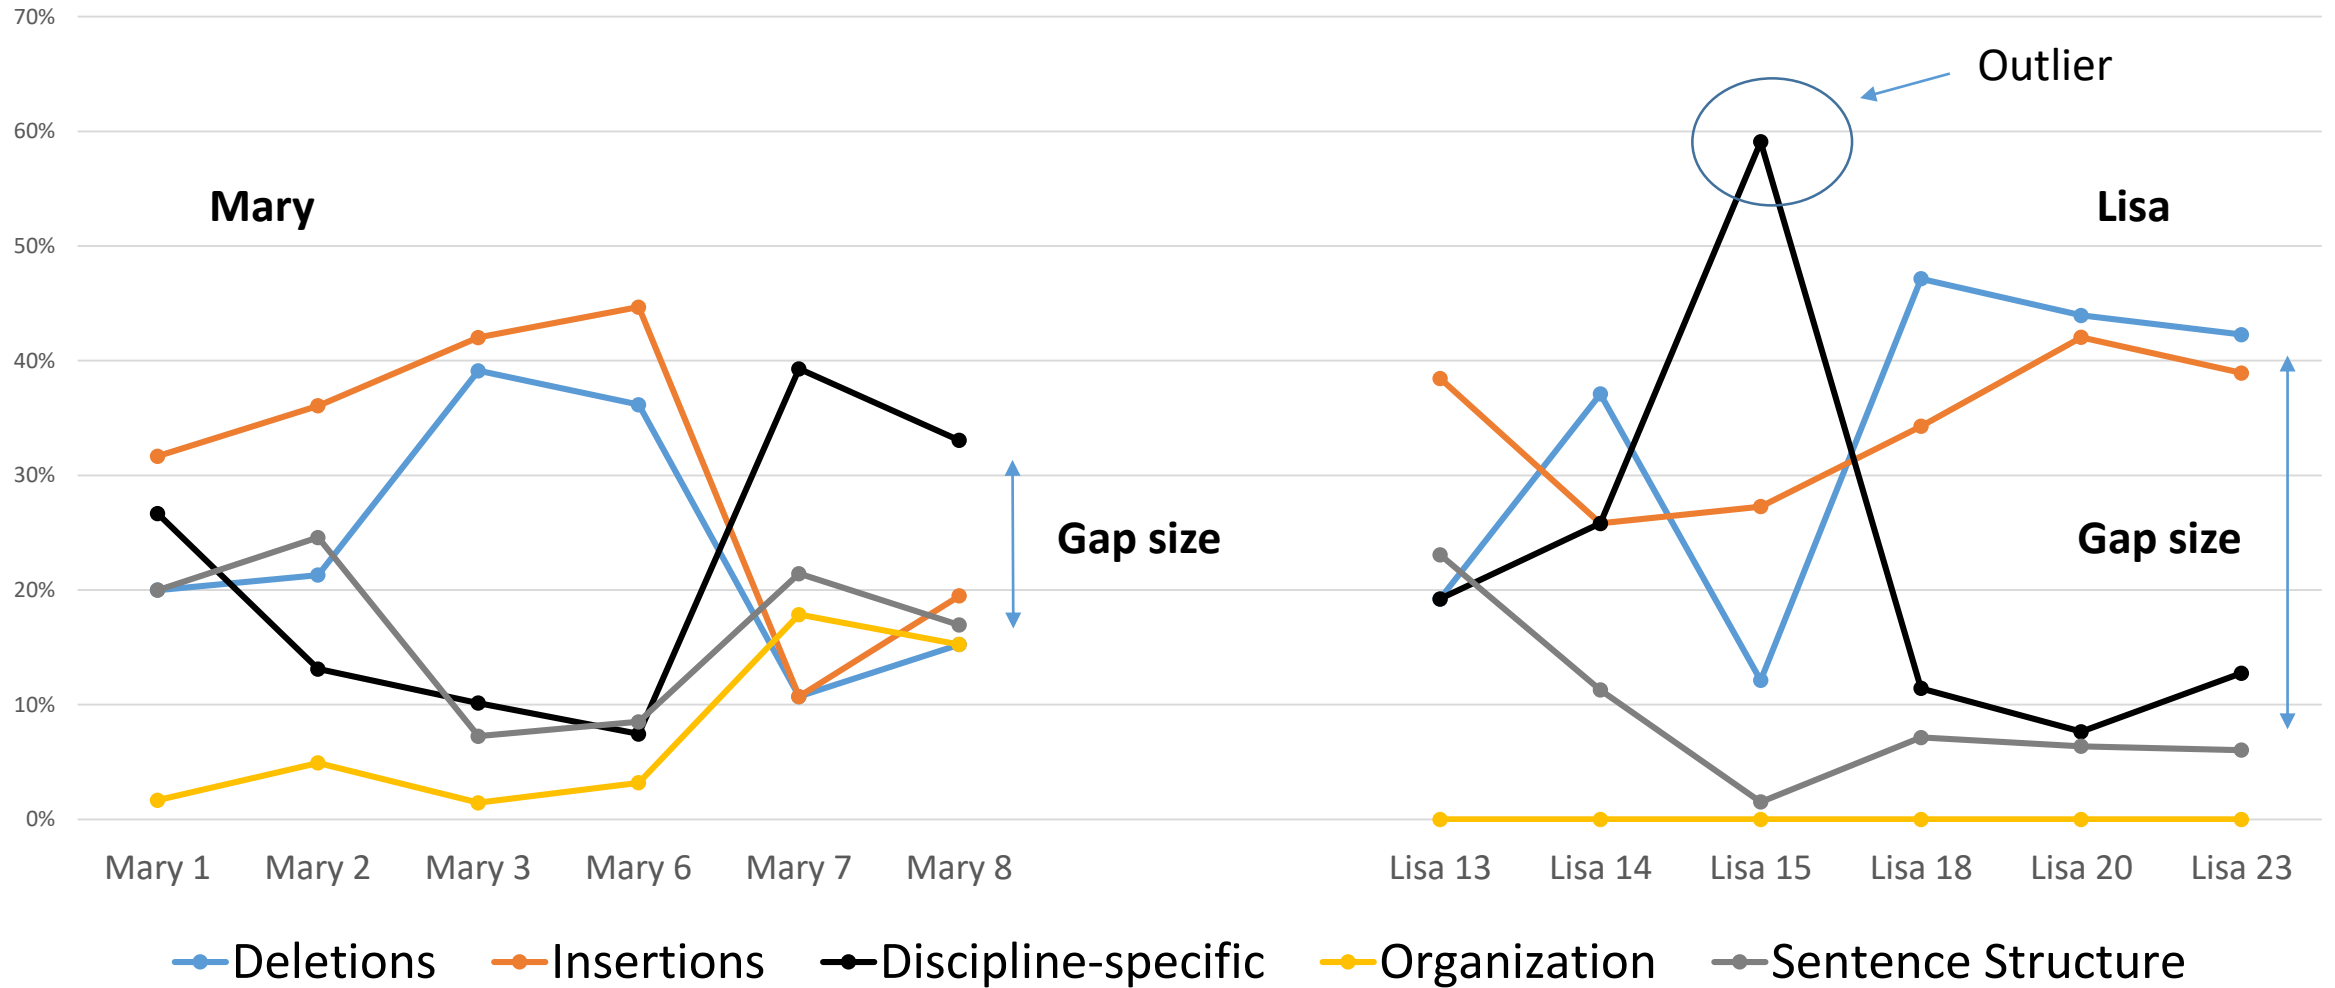

Lisa, Method 2, Percent of Total Comments

First Year in WG Comparison, Method 2

Percents of Total Comments

Comparison of Discipline-Specific Comments—Paper 15

Discipline-Specific Comments for Mary, Paper 18

■ Data Handling ■ Measures; Visual Model ■ Style Guide ■ Content

Mary, Method 1, Percents of Totals

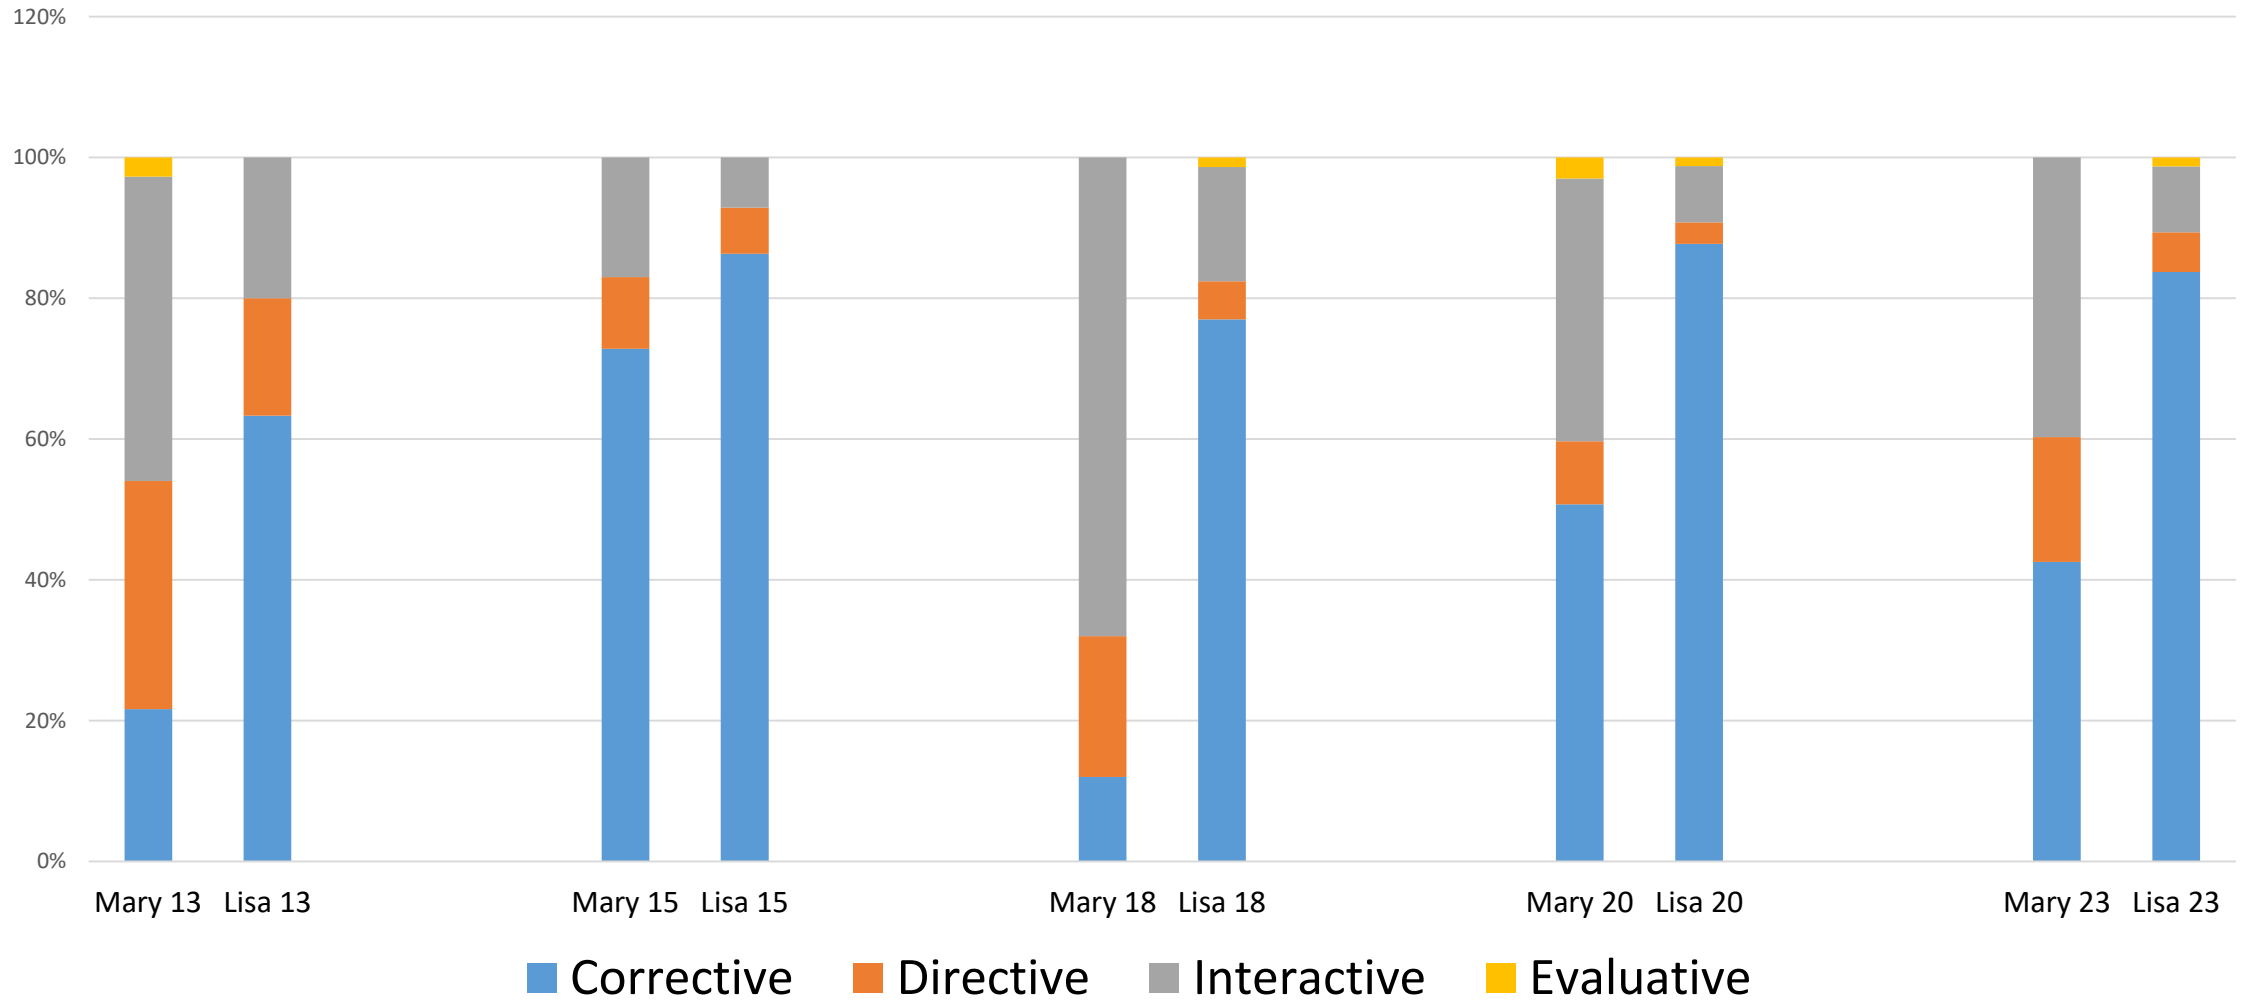

Lisa, Method 1, Percents of Total

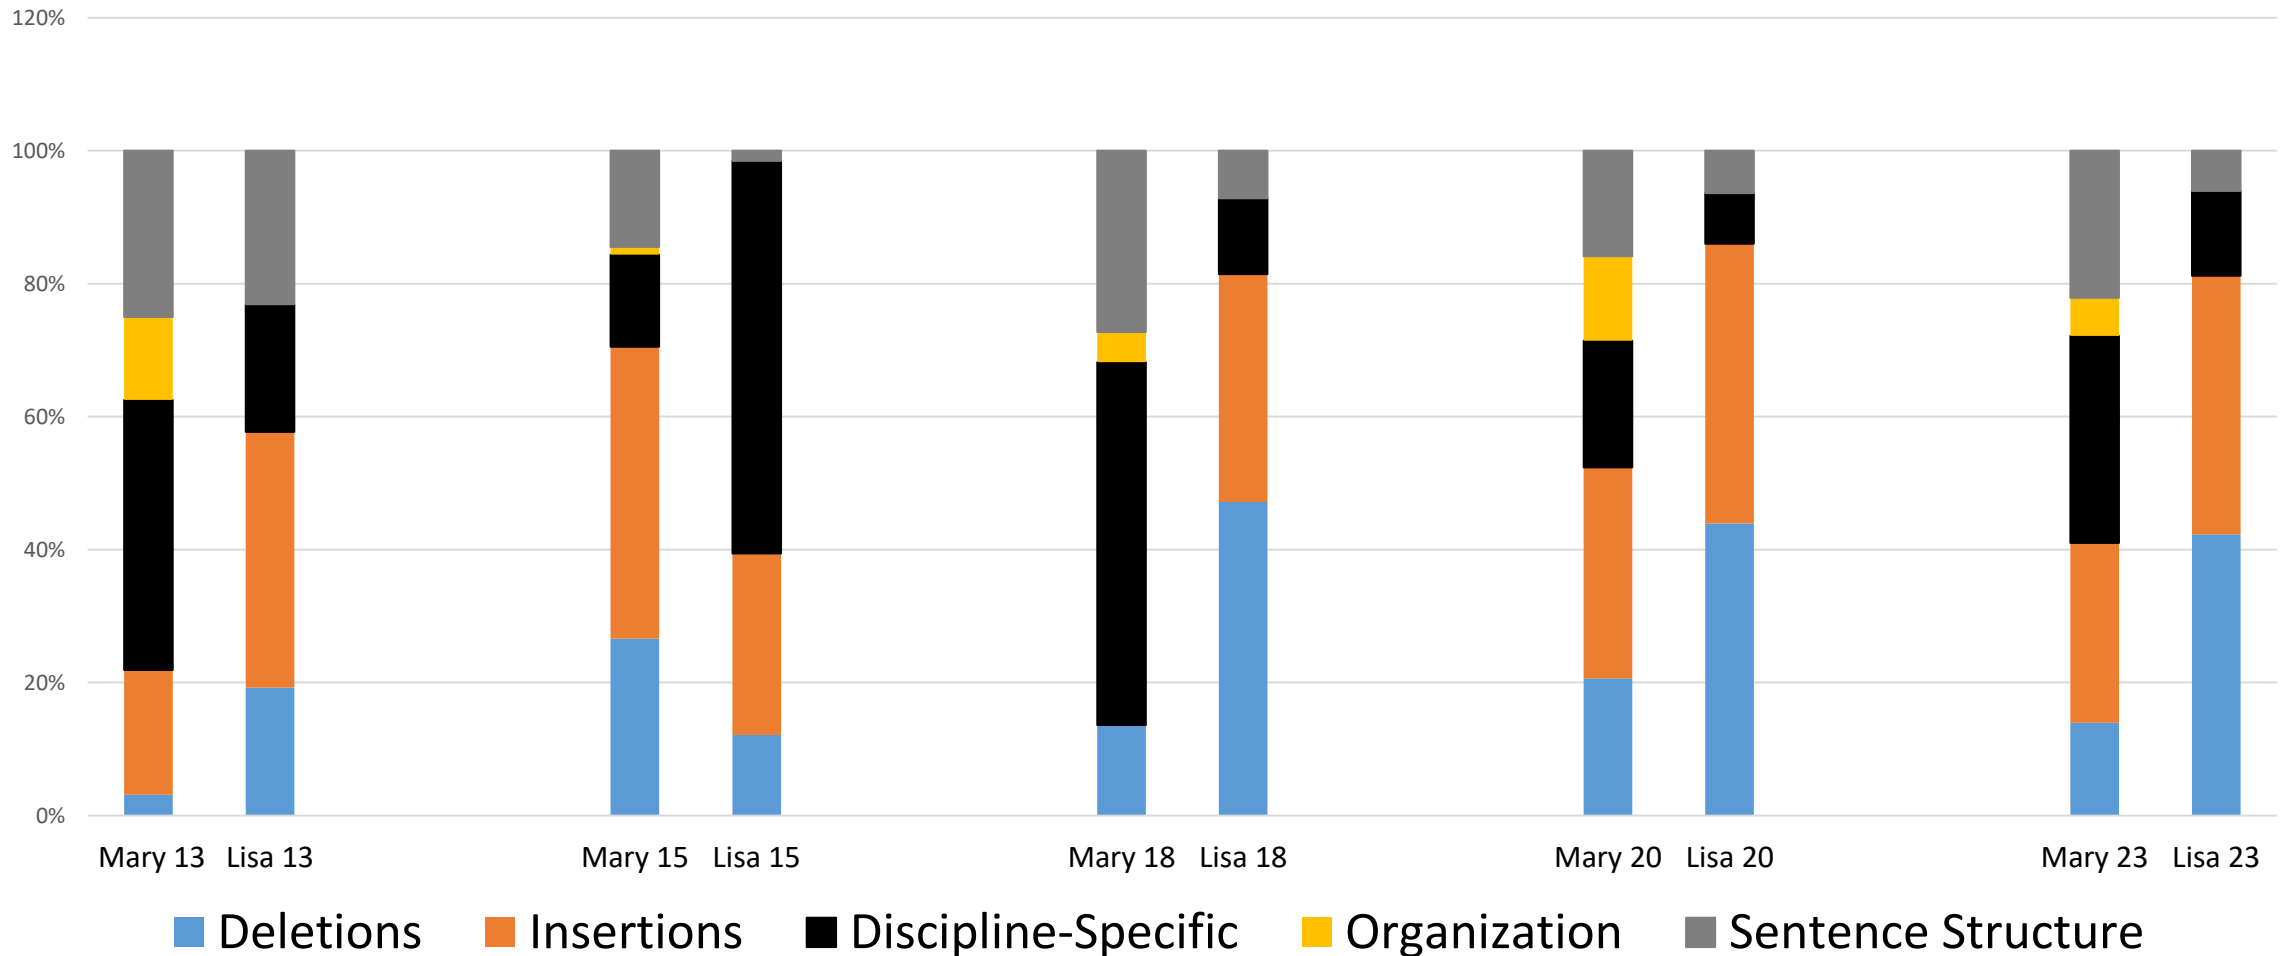

Comparison Method 1, Corrective and Interactive

Comparison, Method 1, Percents of Total Comments

Comparison, Method 2, Percents of Total Comments

Note: Lisa's large amount of discipline-specific in Paper 15 is due to a focus on APA style.
